We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars, Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interests of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

WILL WE ALL GO TOGETHER WHEN WE GO?

I used to think nuclear war had one advantage over conventional war: the people who started it got killed just as surely as their workingclass cannon fodder. But, according to research conducted by the U. S. Office of Civil Defense, it seems that the H-bomb is as class-biased as any bomb of World War II. It respects the lives of Top People.

I worked for four months in an American University Research Center studying "post-nuclear attack demography" for the government. For every possible pattern of nuclear attack, we would be given the number expected to be killed in each area. We would then check this against the U. S. Census figures on race, occupation, age, religion, political opinions, tolerance of communism, Atheism, nonconformity, etc., for the area. We fed the data into an electronic computer, and up would come the probable social characteristics of the surviving population.

American cities are, of course, segregated by class and race. If you are Negro, workingclass, Roman Catholic or of recent immigrant stock, you tend to live near the center of the city. If you are white, Anglo-Saxon, Protestant and upper-class, you are likely to live in the "exurbs"---semi-rural settlements as far as 50 miles from the center. The middle classes, true to form, live in between, in the suburbs.

Farmers, of course, are safest of all. But the American "family farm" was wiped out long ago. The few farmers remaining are prosperous businessmen who hire seasonal labor. Many of these farm laborers live in cities when they're not working.

I thought I saw a bright spot in the unusually low survival rates for Washington, D.C. A day-time attack would catch all the bureaucrats in their offices (day-time attacks are more egalitarian, because they get the upper classes in their offices rather than their homes). But there are two things to remember about Washington, D.C. First, its Negro population is about 55 per cent (our rulers need a lot of servants). Second, it is the only place with deep blast (not fallout) shelters, underneath buildings like the Pentagon. Foiled again! The day after a nuclear attack, then, the bureaucrats would be "safely" holed up either hundreds of feet below the Pentagon and White House, or, if it was a night-time attack, on their Virginia estates. With a year's supply of tinned food.

Safest of all of course would be the files and records. All important government records (and most trivial ones) are duplicated and stored in blast-proof shelters in the Virginia hills, far from Washington, D.C. Moreover, all bank records everywhere in the country are similarly duplicated and stored, So while you're floating 40,000 feet over the Atlantic as a radioactive dust cloud, they will know you owe $50 in taxes and $500 in hire-purchase, with $5 in the bank to take care of it.

More important than the study and the studiers. I never met the people in Washington who filed our results in duplicate (one copy for the wastebasket and one for the blast shelter in Virginia). But we six in the California Research

Center all considered our job a patriotic duty: wasting government money helps stimulate the economy, you know. If someone came in fifteen minutes late, he was frowned upon as a slacker. Half an hour late was about right; being an hour late made you a hero of labor. In ways big and small we did our bit to avoid recession. Once we spent an entire day (48 man-hours) arranging to buy an unnecessary electric typewriter. And we took home paper clips whenever steel production dropped.

How did we feel about the exact nature of our work? Political consciousness in our office was high. Everyone was at the very least some sort of peacenik. Yet none of us felt guilt about our part in war preparations. Some rationalized that we were syphoning defense department money away from directly destructive weapon development into merely useless projects. Others felt that some of our startling findings might shock people into seeking peace. (Alas, the fact that an attack killing about 20% of the protestants would also kill 35% of the catholics and wipe out over 50% of the jews would only encourage our generals!). But we all felt wasted: our brains and our hands were simply rented out. We worked all day (albeit sluggishly) without ever making anything that anyone wanted or needed.

We knew, of course, that *we* were not doing any harm. But we worried about the people in Washington. Did *they* take this stuff seriously? Or were they just helping avoid recession, like us? Perhaps there was a man in Washington whose sole job was to think up new projects. If they took it seriously, the implications were ominous. The questions they asked were aimed, crudely to be sure, at techniques of manipulating and dominating the surviving population. Only two of their factors---age and sex---were directly concerned with reconstruction work. All the rest were concerned with social background and political attitudes. They were in effect doing post-attack Gallup Polls.

Our rulers have learned to control the American population through a century-long process of trial and error. They know their public relations techniques will be disrupted by nuclear war. But they apparently think they will be able to adjust to the new situation. When the first politician crawls out of his blast shelter and grasps a microphone, will he "call on the peoples of the world to live in brotherhood now that the totalitarian threat has at last been overcome?" Or will he declare: "Ma fellow citizens, now that the niggers are out of the way, we can really get to work again to rebuild our great nation." Post-nuclear demography may help him decide.

Barbara GARSON

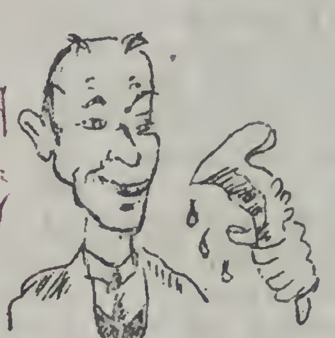
SELECTIONS FROM THE WORKS OF

T-BONE SLIM



Most younger members of the IWW probably know of T-Bone Slim only as the author of "The Mysteries of a Hobo's Life," "The Popular Wobbly" and "I'm Too Old to be a Scab," songs in the current edition of the Little Red Song Book. Older fellow workers who knew him describe him as a "fantastic character" who could hold his listeners spellbound with his rambling stories, raucous word-play and violent humor. He seems, however, to have been somewhat of a loner and to have had few friends. Those I have talked with who knew him were acquaintances, fellow workers who jungled up with him someplace during the Depression or met him at some IWW Hall.

Very little is known of his life. He was born (I have not been able to find in what year) Matt Valentine Huhta in Ashtabula, Ohio and drowned in 1942 while working as a barge captain in New York. His obituary in the Industrial Worker, which (illustrating the obscurity in which he lived) did not appear until nearly five months after he died, commented: "While there have been few workingclass writers in our time better known than T-Bone Slim, little was known about the man himself, even to those with whom he worked or who crossed his trail and stopped for a chat with him in his frequent tours of observation about the country. He is said to have two children somewhere in Ohio. Beyond this, even rumor says little or nothing about his personal relations .... Having lived almost a full life-time in anonymity, Fellow Worker Huhta died that way, and was buried that way. We have an idea that's the way he wanted it to be."

As far as I know, there exists no photograph of T-Bone. The illustration on this page is taken from the cut that headed his column in the Industrial Worker.

I am presently assembling biographical information, reminiscences, letters, manuscripts, etc., for an introduction to a possible pamphlet or book of T-Bone's selected writings, and would like to hear from any older Wobblies who were acquainted with him or who can supply important details of his life. In the meantime I have gone over his columns in the Industrial Worker (which appeared regularly therein each week for years), his contributions to the Industrial Pioneer, and his booklet, Starving Amidst Too Much, published in the early twenties by Foodstuff Workers I. U. 460 of the IWW. It is from these sources from which this selection has been made.

* * *

A few words should perhaps be said about T-Bone's writing. It goes without saying that if what is meant by "literature" is that tasteless soup of words hurled down our throats in high school, then clearly T-Bone Slim has nothing to do with it. Because he escaped the academies, and didn't listen too closely to the limits imposed by authoritative grammarians, T-Bone gives us something else (and something infinitely better) than the esteemed but useless literature of our ruling ¢lass. His spontaneous notations riddled with explosive humor and his savage plays on words transcend all bounds of bourgeois propriety. He'll never make it in the college textbooks. Neither could he be comfortably included in an anthology of "socialist realism," that reactionary middle-class genre which naively thinks that factory-workers, after putting in an eight-hour day or longer, want to read long, drawn-out tales of other factory-workers putting in eight-hour days or longer. As if the work itself wasn't tiring and alienating enough!

Nor can T-Bone be simply and conveniently classified as a writer in the "folk tradition." Folk art, as it has been analysed by the cultural anthropologist Nicolas Calas and others, is the expression of the repressed sensibility of a collectivity, and as such it is extremely interesting and deserves study. But T-Bone and the other Wobbly songwriters (including Joe Hill, who published the first Little Red Song Book and thus more or less started the IWW rebel song tradition) customarily regarded as "folk" artists of some sort, actually rebel against the very roots of folk tradition. They disclaim the essential submissiveness of this tradition and grapple instead with the complexities of industrialization and urbanization in a desperate (and still continuing) struggle to transform the world and change life to meet human needs. T-Bone is horrified by the city, like the folk writer, but he does not recoil into a pastoral quietism, or a "jolly" let's-work-and-like-it attitude, or a submissive expression of weariness, which supply the themes for ninety per cent of the folk song bag.

T-Bone obviously works out of a different bag. His horror of the industrialized city and its concomitant ills is not masochistically turned against himself but is *externalized* as an instrument of social transformation. He savagely ridicules the boss, the politician, the cop, the priest and the scissorbill worker because these are the servants of that oppressive class which makes cities what they are and therefore (in our urbanized world) makes life what it is.

It seems that as he grew older T-Bone was harder hit by his horror of the capitalist city, almost to the point of paranoia. He could sleep with ease in an open boxcar across the countryside but in the city, in a hotel, he would not only lock the door but would stack up tables and chairs against it to protect himself against the persecution of hirelings of the employing class. (This may, incidentally, account for his remarkable propensity for playing on words, which seems to have its psychological origin in some sort of reality disorder.)

But T-Bone, always refusing to succumb beneath the blows of the capitalist system, passionately mobilises his senses of humor and satire, which become his specific weapons in the class war. "True humor," he once wrote, "is the carefree manhandling of extremes." Hilarious rebellion against the rottenness of this system reverberates throughout his writings.

It would be, of course, absurdly superfluous to dwell on the underlying seriousness of T-Bone's writings. All humor, in any case, is serious in one way or another. It is sufficient to know that T-Bone Slim was above all else a Wobbly, that his whole life (in his peculiar way) served the cause of freedom.

"Freedom," as he once said, "is what makes life worth fighting for."

We look upon *The Rebel Worker*, in part at least, as a continuation of the revolutionary spirit which animated the life and works of T-Bone Slim. The following pages contain a few selections from old T-Bone himself.

Franklin ROSEMONT

SELECTIONS

Bugs hide under rocks, germs under fingernails & still other parasites under elm trees on country estates---garbage scow passing down the Thames stunk out the House of Commons.

All leadership is based upon the presumption of dictatorship, the very thing that the boss excercises. Dictatorship, no matter how well intended, makes for tyranny on the one hand and slavery---or rebellion---on the other. The rebellion is inevitable though deferred.

These millions must be freed not by a leader but by an organization formed in such a way that all hands can get leverage on the problem and lend the weight of their considerations to balance the scales of justice.

* * *

The trouble with the workers is: They get too much nothing, and not enough something. (Whatever that something is I leave to proletarian imagination.)

"Sarcastic again?" Who? Me? I'm not sarcastic...just a little blunt.

All right, since too much nothing and not enough something won't do it, it occurred to me to reverse them. I placed them in front of my plate glass mirror, in my laboratories, put on my two-bit spectacles, and sure enough, there she was, a remedy for the workers' ills---T-Bone Slim's Golden Discovery! I could hardly believe my spectacles.

In the mirror the worker is getting too much something and not enough nothing---could anything be more miraculous? He swells up in the middle and a pair of chins starts sprouting on his chest. I shook hands with myself. My mirror is one of those motion mirrors---you throw a dead cat in front of it and it shows the cat tearing up a live buzzard. Says I to myself: "Slim, your discovery transcends all human imagination...you have today not only rescued the human race, but you have prevented the destruction of the world!"

"Well and good---there's the remedy---but how do you apply it to the malady?"

"By joining the I. W. W."

Me sarcastic?...pooh, pooh...just a little blunt!

* * *

Workers should not under any circumstances accept the designation "lower class," because it is not so, and acceptance doesn't make it so. No debate here is necessary. Suffice it to say: Nothing can be lower than the parasite class.

* * *

Machine: A mechanical device used by engineers to create wealth and by financiers to create poverty.

* * *

Profit: The price ignorance pays greed for the privelege of starving in a world of plenty.

Law of supply and demand: The capitalist dictum that makes a commodity in the hands of a robber more deadly than a gun.

⁂

Tear gas: The most effective agent used by employers to persuade their employees that the interests of capital and labor are identical.

⁂

Recurring depressions, say every 20 years, is a good indication of the health of capitalism. Like a sworn-off drunk in a recurring spree....

⁂

Not all of us, but most of us should bear in mind that it is a dead herring that floats with the tide and finally lands on the bathing beach too far gone to take note of nature's wonders. On the other hand, a live smelt bucks the current in most energetic manner and generally arrives at its destination in good shape---and is conscious of its accomplishment.

⁂

The reputation of the IWW is not putting porkchops on our platter today; rather it was the spirit of the IWW then that did it as the spirit of the IWW now does it.

Reputation catches no herring. Past is buried, Future isn't born, Present is here. There are two words that cover it: Now and Action.

⁂

Never try to reach the top too soon---your hat may blow off.

That which you see about you is the product of capitalism. If you don't like it you are probably a worker. If you do like it you are probably a parasite, Derelicts of capitalism, strew the sands of time. Shall we censure them---"the man with the hoe?" Chide them? Chasten those already chastened? Or shall we organize and put skids under the cause of all these wrecks?

⁂

I don't believe there is necessity for a news censor. Editors have been very careful not to let any news get into the papers.

Censorship would be like gold-painting a gilded gladiolus---and we would look foolish to the neighbors, slapping whitewash on ivory towers.

⁂

Life is just one long row of upsets to those whose spoon strays into another man's dish, be the dish empty or full. Retribution is the greater when the dish happens to be empty and the owner doesn't know what became of the mush.

⁂

Brakeman: (in high dungeon) What! You haven't a union card? And you've got the nerve to ride this train! Get off---UNLOAD!---Yes, both of you. Why you're worse off than a ship without a rudder!

First Hobo: (as they are going) Wot did he say, a stiff without a brother?

Second Hobo: (peeved) Naw, he said a ship without a rudder---darn him!

First Hobo: (thinking) Well, I guess he's right. We don't seem to be getting anywhere.

* * *

Organized men will strike for pay increases; unorganized men suck their thumbs....

* * *

The one big trouble with labor and me is that we are forever talking. We know unionism is good. So what?

Well, we should organize once and talk about it afterwards. Let us have no more about this "what we will do," but do it, and then tell what we have done.

The getting of results is simple, indeed. For instance, the shorter workday requires no extended remarks. Just go out later and come in earlier.

* * *

THE BIG QUESTION

Tune: "America"

My Job---now is no more
The boss has slam'd the door;
What shall I do?
Seems like my end is near,
My guts feel awful queer---
Where do we go from here?
---This is up to you.

No, I've not lost a leg,
---Why must I starve and beg?
What shall I do?
Where can the answer lurk?
Why am I out of work,
Gazing on all this murk?
This is up to you.

I can not stand alone,
Masters have laid me prone;
What shall I do?
Why can't we hand in hand
Reclaim our right to stand,
Unhorse the sleek brigand?
This is up to you.

(Dedicated to the Open Shop drive, 1921)

STARVING AMIDST TOO MUCH

Life, it is said, is a funny proposition. But I fail to see the humor of it. And if there is any humor in it, I would be sure to recognize it---for I have quite a rep for distinguishing between the drab and the vivid.... We cannot consider the business of life as an antic, a few years of clowning through the world, or as a farce that brings down the house of the future in outbursts of unroarious laughter. No, we cannot see it that way.

We see life, we feel life, as something mysteriously terrifying. We try to study it. We fear to study it. And sometimes when we are studying it we fear to step into it. We fear to put our foot into it. But thank goodness, we are not afraid to study Industrial Unionism, the breathing, living protest of the millions against a system of wage slavery.

Although we do not know that we are slaves, although we only know that the alarm clock tells us when to wake from our sleep; although we only know that the hours are long and that the pay won't reach around; although we only know that a boss tells us that the company will do all the "sitting down," yet, we sometimes, somehow, feel that we are not free.

Adam, upon a time, felt that he was naked. And a voice said, "Who told you that you're naked." So it is with us: we don't know that we are slaves---we only feel that way. And the feeling is the strongest upon us in times of unemployment. We go from place to place blindly, asking, inquiring, if there is a job for us. We have felt that every man was against us. We have felt that every eye was on us when we got turned down. Where is the system of such proceedings?

Yes indeed, we have felt like slaves. No place is there a guarantee of a job. In a large country a man might travel indefinitely before he would find work. But as serious as is the lack of system in the way civilized people attempt to live, we find that the act of asking for a job has become very "matter of fact." A man will walk into the employment office; without tears or sobs he puts the question to the unemotional employer, and upon being refused he retires gracefully out to the street---to wear out more shoe leather.

Many a pair of high heeled dancing slippers too have been worn out this way.

What is there about work that makes it so attractive? A gang of rough-necks will trample the weaker ones to death in their mad rush for a job. Do you call that a system, and is it the Capitalist System? Aren't you proud of it? Isn't it an elegant arrangement? So perfectly brainless; a child could invent a better one.

That is the reason that time is always pregnant with possibilities for labor. Society is practically "unsystematized." Everything seems to drift along in an haphazard manner. If it succeeds, the capitalist takes the credit; if it fails, the blame is put on labor. Hence, if we are to have the blame, we may as well have the game. If we are to be held responsible for the way they run things, we may as well have "a say so" how things shall be managed---or mismanaged.

We take the position that it is our work that makes industry possible---money and credit produce nothing. We produce everything. We produce money. We produce credit.

Nothing but blind folly can prevent labor from establishing a semblance, at least, of a sane system of production; and the elimination of profiteering on the miseries of those who labor for a living.

Even the foolishness of those who would have labor depend on others than themselves for emancipation, partial or complete, can no longer stand in the way. Industrial Unionism, its benefits, will be made so plain that every worker will consider himself a traitor to himself if he neglects to enroll his name among those of his fellow workers---men and women.

An industrial union is an organization of labor formed in such a way that every man, woman and child working for wages in an industry can become a member of it. That means that they will not be divided in groups. They will be the group, the unit, or whatever you wish to call it. And "what they say, goes!"

⑤

How to keep well has been told those who still care to read the daily papers and many of these articles have been the only ones worth reading. Doctors too have recognized the difficulty people are having in keeping out of a premature grave. Hence, I feel that it is no more than right that I should be allowed "to tell the world" how to keep well. I shall try to be more modest than some I know---so as not to offend those with finer sensibilities.

The only way to keep well (and you're sick) is to join the Industrial Workers of the World and do away with the foods that are making you sick; that is, making everybody sick; that is, making the whole world "sick---and tired."

It will do you no good to shampoo your hair with rosewater or pine juice to stop your hair falling out, so long as the necessary pure food lies rotting on the ground---while you are tormenting your stomach with garbage that would over-whelm a buzzard. After a while (of this) you will need a complete observatory with the most modern telescope to find your shoes in the morning if you continue eating the things the trusts are putting out---You are going blind, so am I.

A wobble: By the way, the wobbles in our papers have a true office to perform---that of bringing the sublime and the ridiculous into a compromising proximity....

To illustrate:

A STEEL MAGNATE CRYING IS A PATHETIC FIGURE.

Not always!

A steel magnate crying and (at the same time) eating a pig's foot---is a rather pleasing spectacle.

That's what I mean by sublime and ridiculous....

Electricity

Juice is stranger than friction:

A friendly stranger is half as strange as a strange friend.

The world's champion friend has 198 friends---two, former friends ---are no more.

China has 440,000,000 opportunities for a man looking for friends.

The thinning out of the Chinese, in favor of western civilinsanity, has started in earnest---earnfest---to enslave the rest.

The idea is to get the 440,000,000 Chinamen to support the world ---an impossibility without thinning them out, and impossible after.

China industrialized will number about 200,000,000 workers, and will be able to do much of Europe's manufacturing, when not conducting an engagement with rice and chop-suey---and, when Europe's unemployed hold extraordinary sessions with soup and petrified biscuits.

Europe's civilinsanity, too, will feel safer after China is deflated: remember how rosy the school girl complexion of "our" capitalism got after labor was deflated, 1920---?

But, (note this) they do not deflate labor in America any more--- they use a stomach-pump: they grab a man in the street, full of compulsory temperance, rush him to a hospital, and pump the constitutional sobriety out of him.

Sometimes they save the man. Good! Bravo! But, neverthelittle, prohibition has killed more men than we lost in the last war---this is not favoring war nor prohibition---prohibition is the worst stuff I ever drank.

I would not mention it if it wasn't a thinning-out process---why carry on war when---when you can give the victims wood alcohol, hair oil, chloral and torso-ointment---?

If you want to thin 'em faster, re-introduce saloons, legalize moonshine and denatured "gas."

Not much prohibitionary stimulant is being guzzled---little is SO effective, and SO cheap. Really, prohibition seems like a concession to the mounting gas bills---with what would you buy a radio if the people were allowed to spend the money for liquor? Only saloon-keepers would have Fords and "Neitherdynes."

Leaving all jokes aside, I would rather listen to a radio than a drunk, yes I would---as much as the pufformers stagger in their igloo---Sixon---but I would rather be half shot while doing it, yes I would.

How helpless we Americans are! Law tells us when to work, what to eat, what to drink, what to chew and smoke, where and when to sleep; tells us what to think; tells us where to live; tells us when to die---where would we be without law? What would we do? It tells us not to celebrate our Independence with Chinese fire-crackers.

I suggest---patriotically suggest---that we loan our laws to China, just as soon as we can spare them.

Another thing in our favor is cheap food. It's really astoundful!

You can get two spoonfuls of oats and a tube of milk for 10 cents ---everybody, too, seems to have a dime---ah, may the dimes never grow extinct!

I stood by the cashier's desk and watched the breakfast customers pay their bills. Here is what the register registered: 10, 15, 10, 05, 05, 10, 10, 10, 10, 05, 10, 20, 10, 10---I wonder where all that money is coming from.---A hundred years from now they'll celebrate this prosperity and Coolidge---the one-man PROSPERITY.

Preamble of the Industrial Workers of the World

The working class and the employing class have nothing in common. There can be no peace so long as hunger and want are found among millions of working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the every-day struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

ON THE JOB

ON THE JOB

Once upon a time there was a labor movement in this country. Hundreds of thousands of working men and women carried red cards, IWW cards, and pulled strikes that hurled the capitalist class into some of the most troubled waters it has ever seen.

Today the term "labor movement" is used to describe those massive bureaucratic structures, the actual function of which is to "keep the workers in line" by tossing them occasional bread-and-butter gains. The class interests of the bureaucrats who "lead" these organizations are identical with those of the exploiting class, rather than the working class. It is thus absurd to speak of these groups as composing a "labor movement," for it neither represents the interests of the workers, nor is it a "movement" since it obviously isn't moving (at least not forward): its bureaucracy has bound it irrevocably to the ruling class mechanism. If the official trade unions "move" at all, it's downhill.

This is not to say, however, that there has not been a labor movement in this country for the last twenty-five years. We will leave such deprecations of "workers' apathy," "wrong historical period," etc., to the middle-class socialist intellectuals who invent the terms and find the means to theorize about them endlessly. That there has been a labor movement, in the real sense of the term, and that it is growing into proportions which may presently make it into a greater force than it has been for many years, we can see by looking to the actions of rank-and-file workers, rather than their "leaders." Every wildcat strike, every rank-and-file slowdown, every "un-official" (i.e. without the imprimatur of the labor bureaucrats) protest action by the workers themselves, in or out of the unions, is adequate testimony to the intrinsically revolutionary spirit of the working class. These sporadic skirmishes with the labor bureaucrats and the employing class are the chief indications of the class struggle in our day.

These indications are growing in number and in significance. In the railroad industry we are witnessing an almost total breakdown of communication between the men-at-the-top and the rank and file. In many other industries workers are realizing more and more that the so-called "unions" to which they belong are actually only additional exploiters. Look at the ridiculous postal workers' unions, for instance, which do not even have the right to strike. Or the various restaurant workers unions, to which many restaurant workers belong without knowing it (unless they inquire about the "misc. ded."--miscellaneous deductions, i.e. union dues--on their paychecks.)

Aside from the decline of the official trade unions, these developments in the workingclass movement have demonstrated the complete impotence of the traditional "socialist" left. It is obvious that the growing class consciousness of American workers is not finding its expression in the middle-class sentimentality of the Socialist Party, or the hysterical reformism of the Socialist Workers Party, or in any of the other pathetic little sects clustered around the shrine of Tradition of the Holy Left. The struggle of workers to build a really free and more human world continues entirely outside of the tiresome dogmas of these groups.

We in the IWW suffer no illusions about our own role in this struggle. We do not pretend to be a large organization, but we are growing, and our influence is growing considerably beyond our own ranks. Press coverage alone is adequate evidence of this resurgence. The year 1964 marks the first IWW strike in many years. IWW organizers are becoming increasingly active in various industries in which the voice of militancy has too long been drowned out by choruses of defeat and resignation. We see as our role the fostering of mass consciousness among our fellow workers in industry, so that more and more working men and women can apply their own leverage and their own solutions to the problems that confront them every day at the point of production.

As a writer in Solidarity,* the journal of our English friends and fellow workers, wrote a while back: "Real power lies in our hands. If we use it, we will win. And as long as we keep it there, we can't be sold out."

* * *

The Rebel Worker is the sounding board of working men and women in their struggle for freedom. In these first few pages of each issue we'll let you know what we've been up to, and what we've got cooking.

The Chicago IWW Branch will soon be getting its own office, a storefront on the North Side. For several years the Branch has shared offices with IWW international headquarters on Halsted Street, but this has proved inadequate for our needs. Now we will have a branch office open at all hours (since a fellow worker or two will be residing in back), better facilities for meetings, free weekly movies, speakers and discussions on matters of revolutionary interest, free coffee: in other words, a definite center of radical activity in the city.

This branch office will also be the only radical bookstore in Chicago, headquarters for Solidarity, Anarchy, Freedom, La Breche, Reconstruir, Tierra y Libertad, Le Combat Syndicaliste, Direct Action, Views and Comments, Pouvoir Ouvrier, etc., and for books from various radical publishers (Solidarity, Freedom Press, Le Terrain Vague, Charles H. Kerr, J.-J. Pauvert), many of which are practically unobtainable in U. S. bookstores.

We will, of course, also be carrying used radical books. If you have any old radical books, pamphlets or magazines which you would like to donate to help us get started, send them to The Rebel Worker c/o IWW headquarters. We'll pay the postage....

* * *

As part of the Agricultural Workers Industrial Union #110 drive, new "silent agitator" stickers for agricultural workers have been printed up in bright red ink, with the famous black cat symbol. As the old Wobbly pamphlets said, these are "just the thing to wise up the slave, jolt the Scissor Bill and throw the fear of the O.B.U. into the boss." A packet of fifty costs only a dime.

---

* This is surely one of the best radical journals published today. Write c/o Bob Potter, 197 Kings Cross Road, London WC1. Monthly; about $3.00 a year.

We will also be putting out other stickers in the near future: for railroad workers, restaurant workers, and several general organizational (and agitational) stickers.

* * *

Much of the reanimation of the IWW is materializing in new pamphlets. Agricultural Workers I.U. 110 will soon be publishing a pamphlet on agricultural labor in the U. S.. This will contain a history of the IWW in agriculture; a review of the 1964 AWIU 110 drive and its plans for next year; and a number of articles on various aspects of the situation of agricultural workers today.

Members of Railroad Workers I.U. 520 are hoping to soon publish a new pamphlet for railroad workers, analyzing recent developments in the railroad industry and how they are likely to affect its workers. Railroad workers interested in collaborating on this important pamphlet, which will replace the somewhat dated pamphlet issued by this union in the late 1940's, are urged to contact us through IWW headquarters.

Members of the Chicago Branch hope to pool their resources this winter in organizing restaurant workers in this city. We hope also to publish a pamphlet on restaurant work, and would like to hear from restaurant workers throughout the country who would be interested in contributing to this pamphlet and/or in distributing it.

* * *

We had hoped to include in this issue an article on Chicago rent strikes, and hope to be able to publish one in our next issue. Metropolitan CORE, organizing these strikes, at the moment is somewhat handicapped by some "socialist" bureaucrats who are in many ways preventing its becoming a rank-and-file organization. It has been suggested that the IWW publish a rent strike manual, to be sold or given to slum residents; if you have experience in rent strikes, as an organizer from the outside or a striker from the inside, let us know if you're interested in helping us put together this manual.

* * *

These few paragraphs can only provide a hurried summary of our activity. We have arrangements for IWW speakers at Michigan State University, Shimer College, the University of Wisconsin and Roosevelt University. We're working on the possibilities of recruiting younger workers (high-school dropouts, etc.) and developing some action suited to their particular problems. We hope to soon be putting out an IWW Action Bulletin in Spanish for Puerto Rican and Mexican workers here. We also hope to publish a pamphlet by and for post office workers. We're setting up an IWW literature table at the Maxwell St. Open Air Market on Sunday mornings, expounding revolutionary industrial unionism from the soapbox. We also soapboxed at Bughouse Square a short time ago, resulting in a more than usually agitated crowd of listeners and the sale of several copies of Rebel Worker #1 and the Industrial Worker. We're also trying to revive some peace action in this city.

In the factories, in the fields, in the shops and in the streets: the IWW is on the job. Our third issue will be coming out in early November. See you then. And send in your letters and your news; we like to hear from you.

Franklin ROSEMONT

Organizing Blueberries

"Blueberries are what tide you over between cherries and apples. You pick them because you got to, and you got no money." A fruit tramp, as he called himself, from Benton Harbor, Michigan told me this, but I was heading back to Chicago then and I couldn't have cared less . . . .

Two weeks later with three more Wobblies, I (we) returned to Michigan and discovered the Great Blueberry Conspiracy was real. The blueberries don't just "tide you over," they are a specially rigged economic trap. Workers come up from the South and pick strawberries, blackcaps (black rasberries) and cherries in early July. Then when the blackcaps are through and cherry-pickers are allowed to pick only a few hours a day because of the glutted market, pickers turn to blueberries as a last resort. If they can last through blueberries, they can make good money again picking apples. In blackcaps I often made $12 a day; in blueberries I couldn't make $6. And this was a ten-hour day.

We entered the Michigan blueberry fields to fathom the extent of wage worker discontent in agriculture, and to see how this discontent might be organized. We started with little enthusiasm, having been told all too frequently of the impossibility of organizing agricultural workers: "They move around too much . . . they don't understand unions." The A.F. of L., I was told, spent $100,000 in an agricultural organizing campaign and gave up. On the other hand, the old I.W.W. A.W.I.U. 400 had organized the most unorganized workers in the grain belt. Well, we would see . . . .

Discontent was rife. Except for a few workers who commented on "how nice this farmer is to work for," most were fed up with the whole deal. Just about every day we saw or heard of a "strike in detail" with a discouraged family leaving, usually not because of a better job elsewhere, but because they preferred living on savings to working for 50¢ an hour. Everyone was discouraged, but most had no choice but to stay.

The foreman told us that the berries would get better. We were encouraged. A veteran picker told us how they dropped the price down when they got better. "Wouldn't you know it," a picker commented, "you start to get ahead and they take it away from you."

Hodgman's blueberry farm where we started work was a small farm, too small for our purposes we decided, and prepared to get our pay and leave. Then on Friday night Bob talked with a couple of unconsciously class-conscious Arkansas boys who, before he knew it, declared that they would strike with us. That stopped our moving plans immediately. From then on, around the cabins at night, and in the rows by day, we cautiously felt out the strike potential of each picker.

By Monday we were sure we had all but two families even though we didn't have a commitment from everyone. We were trying to figure out the best time to strike when a large family from Florida announced that they wouldn't wait for a strike, but were leaving for home the next morning. That decided it; we would strike the next day. Our questions to fellow workers were now bolder: "We're walking out. Will you come with us?" By night we counted five families who would strike or just leave and three who were staying.

The next day we worked for an hour. Then each turned in his berries, had his card punched, and slipped it into his pocket. Our last striker joined us from his picking machine detail and we walked together towards camp.

"What seems to be the trouble?" we were asked by a frightened farmer.

"Can't make nothing picking these berries. We want higher wages and showers."

"Well, you can go elsewhere then."

"Everybody tells us that, but they all pay the same. We're staying here on strike."

We argued further but our friend was not willing to negotiate. He turned and started to walk away saying, "I'll pick them myself if I have to; now clear out of here!"

Back at camp we packed and waited for the police. The fearsome police turned out to be a genial deputy sheriff who listened sympathetically to our tale of woe and then told us how he had been a union man since 1914, and was proud of it. Our deputy sheriff left, but the terrible state trooper arrived a minute later. He strolled on the scene with wrap-around sunglasses and cigarette holder, and after a detailed explanation of how and why he must carry out his obligations, he announced: "It is time for you to depart." So we left for Grand Junction to plan our next strategy. Our fellow strikers we found were in bad financial shape so that they decided to work at a farm down the road for a couple of days and then return to picket with us. We left to make signs and work on a leaflet.

Just before dawn we returned and crept through each farm in the dark dropping a strike proclamation at each doorstep of every farm in the area. At seven we returned for our second attack with signs:

On Hodgman's farm the three remaining families went dutifully to work. But on an adjoining farm the workers were not returning to work but stood clustered about the camp watching us. The owner of this farm walked up to us. Her workers, she said, were afraid that if they returned to work we would "slash their tires and beat them up." She asked us to sign an agreement that her workers would not be injured and said that she would pay them 10¢ a pint (they were getting 9¢) and promised to build a shower. We talked to the workers in her camp explaining the situation at Hodgman's. We assured them that we intended no violence toward them or anyone, that we were trying to build a union of agricultural workers.

Unfortunately our next-door neighbor did not keep her agreement, but lowered th;e price back to 9¢. We had no way to hold her to this so we had to be content with her promise of a shower. It must also be noted that her price of 9¢ was a penny more than we were paid at Hodgman's, her berries were thicker, and her camp was better (stoves and refrigerators in the cabins at no cost to the pickers).

The second day of the strike we paid a visit to our fellow strikers. We found them enthusiastic to hear how we fared. But in very short order we were surrounded by hostile faces and voices which declared that "You're not going to make us strike. We like it here. Why don't you stay at your own camp?" We left, posthaste, after receiving a few well-placed kicks. When we drove by the next day we saw that our friends' cars were gone. We weren't able to find them again.

It was amazing the mystique our strike exercised in the minds of some workers. One camp was fearful that we would beat them up, another camp would beat us up if we "made them strike."

On Saturday Fred Thompson and Jack Sheridan arrived from I.W.W. headquarters in Chicago and agreed to assist us in union negotiations. They, together with Bob Green, talked with the Hodgmans. A very vindictive Mrs. Hodgman referred to pickers as "filthy" and "slimy" and stated that if a shower were built the pickers would tear it down. A familiar tune, no? She then called over some of her loyal workers (we were in the habit of calling them scabs and scissorbills, however) and Sheridan had the chance to ask them a few questions:

"Do you want higher wages?"

"No."

"Showers?"

"No."

"Toilet paper?"

"No, we like it here."

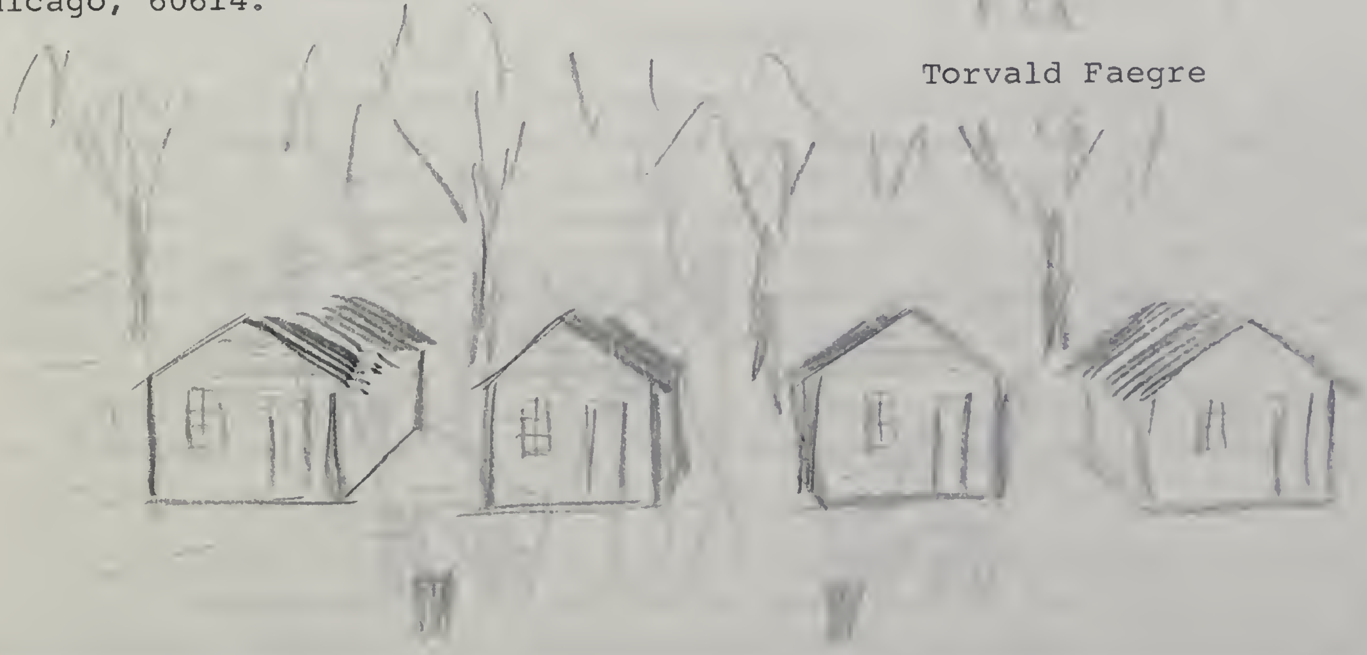
At the end of the week we called a strategic withdrawal (never defeat) and returned to Chicago to plan further assaults.

What did we achieve? At Hodgman's the only material progress we could see was garbage can covers, put in after a visit (provoked by our picketline) of a state employment commissioner. Next door we obtained a guarantee of showers. But more important, while picketing we talked with many sympathetic and interested workers--many more were friendly than antagonistic. A few actually took out red cards. Others put Wobbly Agricultural Workers stickers on the front windshields of their cars. We had a strike in an area and an industry in which strikes are almost unheard of. The newspaper coverage, although hardly unbiased, was big, and the biggest headline--"PICKETS NOT UNION SENT"--was obviously designed to allay the fears of the farmers. (Clippings from this and other stories can be found on the back cover of this issue.)

Most important we discovered that agricultural workers will respond to the call for an agricultural union and with many more I.W.W. organizers in the field next summer, we should be prepared to strike to win.

Those who are interested in joining the harvest for the rest of this summer or our major drive next summer, contact the Agricultural Workers Industrial Union 110 Organizing Committee, 2422 N. Halsted, Chicago, 60614.

Torvald Faegre



Kitten in the Wheat

A sab-cat and a Wobbly band,
A rebel song or two;
And then we'll show the parasites
Just what the cat can do.

From early spring till late in fall
We toil that men may eat,
And "All for one and one for all,"
Sing Wobblies in the wheat.

And have you fixt the where and when
That we must slave and die?
Here's fifty thousand honest men
Shall know the reason why.

The sab-cat purred and switched its tail
As happy as could be.
They'd better not throw Wobs in jail
And leave the kitten free.

The sab-cat purred and twitched its tail
And winked the other way.
Our boys will never rot in jail
Or else the plutes will pay.

The above anonymous Wobbly verse is reprinted from "John Neuhaus: Wobbly Folklorist," by Archie Green, The Journal of American Folklore, Vol. 73, No. 289, p. 196.

Thoughts on Bureaucracy

One of the greatest problems facing the revolutionary movement today is that of bureaucracy. What is it? Is it a rootless "thing", floating between the working class and their rulers? Is it a "new class"? No other issue more clearly shows up the bankruptcty in ideas of the traditional "left" than its inability seriously to grapple with this problem.

The traditional "left" is incapable of looking at reality as it is, of analysing it here and now. Instead it gazes at society from the standpoint of political doctrines expounded a century ago, doctrines in many cases relating to very different social conditions and class alignments.

The contributions of Marx, Lenin, Trotsky and other "giants" of the past have been reduced to "sacred scriptures". They are quoted as "divine authority" on the assumption that "nothing has changed". The term "revisionist" has become a term of abuse. That the "giants" themselves constantly revised their ideas in the face of the constantly developing experience is conveniently forgotten.

This "religious" attitude to the past is a complete rejection of dialectical thinking. With such tram-lines firmly laid in their brains it is little wonder that so many self-styled revolutionaries fail to see that Russia today, for instance, is as much a class society as any Western country.

****

The traditionalists, for instance, are all obsessed with the legal status of property, as if this were the fundamental thing. They fail to see that the bureaucracy in Russia has assumed the role of ruling class because it dominates production, manages it in its own interests and decides, through the exclusive control of the State, all about the distribution of the social product. State capitalism hadn't developed in Marx's day. His doctrines must be brought up to date in this respect.

Marx's dream of state ownership, centralised* and rapidly increasing productive forces has been fulfilled with a vengeance in Russia today. But is this socialism? The Russian workers are never consulted in the important, everyday decisions that concern them most. Hours or tempo of work, wages, consumption and leisure. They were never consulted about the resumption of tests (any more than ordinary people in the West were). Sometimes they are not even informed of such facts. And in the Arts, what the Party says, goes.

---

* "...to wrest, by degrees, all capital from the bourgoisie, to centralise all instruments of production in the hands of the State, i.e. of proletariat organized as ruling class; and to increase the total productive forces as rapidly as possible." Manifesto of the Communist Party, Foreign Languages Publishing House edition, Moscow 1957, p.85.

Marx defines capitalism as a society based on commodity production and wage labour and in which "surplus value" is extracted from the workers. Part of this surplus value goes to capitalisation and part goes to the unproductive consumption of the rulers themselves. But many "marxists" fail to see that from this standpoint the Russian worker is exploited just as much, if not more, than his American counterpart.

The mere assertion that the State is "owned" by the workers has about as much relevance to the Russian worker as the fact that British Railways are "publicly owned" has for the rank-and-file member of the NUR. The abolition of private ownership is clearly not enough. Private ownership is only one "legal form" for the power of the ruling class. The ruling class has certainly perceived this. It is high time the revolutionaries did too.

The more far-sighted sections of the ruling class are beginning to realize that only by introducing State ownership can they effectively rationalize their economics, overcome the old type of economic difficulties, and thus maintain their rule.*

At the same time the rulers have learned that they need the Labour bureaucrats to discipline the workers, to tie them ever more closely to the job. They need the traditional unions as an outlet for grievances. In parallel with the increased State intervention in the economy, the Labour leaders and the unions have become increasingly integrated into the political structure of capitalism.

For the worker, these developments have meant increasing domination from above, both in work and in leisure. More and more the employer tries to fashion his employees along the lines so accurately depicted by Charlie Chaplin in "Modern Times".

****

Many other "doctrines", unquestioningly accepted by the "left" today, are equally contradictory. For instance some people pay lip-service to the idea that "the liberation of the working class can be achieved only by the working class itself." But the same people act and speak as if the working class is an unintelligent herd, incapable of achieving socialism without an "elitist" party, "steeled in struggle," "disciplined," "centrally controlled," a party which would lead the class to revolutionize society by capturing political power.

---

* Bismarck and Churchill were advocates, in their time, of nationalisation. Even the Nazis put forward the following economic demand, in 1923: "We demand the abolition of unearned incomes and the abolition of the thraldom of interest. We demand the nationalisation of all industrial trusts". History of Nazi Germany, Pelican Books, p.199.

Socialism to us means the maximum freedom for the worker in all his activities. It is the very opposite of the massive bureaucratic control which has developed on both sides of the Iron Curtain. The germ of socialism, i.e. maximum participation of the workers themselves, existed in the Paris Commune of 1871, in the Soviets or Workers' Councils of 1905 and 1917, in Spain in 1936 and 1937, and for a few weeks in Budapest in 1956. What has happened to that germ?

Millions of words have been written about the "degeneration" of the October Revolution and of the Bolshevik Party. The writers invariably miss the crucial point, namely that the seeds of the degeneration lay in the dual (and typically capitalist) conceptions of an elitist party and of the authoritarian management of industry. These ideas -or rather this mentality- was to govern all decisions on political and economic questions.

The elitist theory finds its highest expression in the works of Lenin. In What Is To Be Done, written in 1902, he argues that the the working class is incapable of independently developing "socialist consciousness," which has therefore to be injected from outside. "Socialist consciousness," he wrote, "arose quite independently of the spontaneous growth of the working class movement. It arose as a natural and inevitable development of ideas among the revolutionary socialist intelligentsia."*

From here it is a logical step to the overall conception of the ignorant herd of workers on the one hand, and the leading "cadre" of intellectuals on the other. The "cadre" do all the "thinking." The workers "test" the resultant "theories" in their everyday struggles with the boss. The division of labour between manual and intellectual, which capitalism developed, has now affected the ranks of the would-be "revolutionaries." Here is the ideological justification for bureaucratic politics.

Once these premises are accepted it matters little how opponents are fought, so long as workers "believe" the facts given them. In describing how one should deal with opposing factions (i.e. members of the same party) Lenin advocated "the spreading among the masses of hatred, aversion and contempt for the opponents." "The limits of the struggle based on a split are not Party limits, but general political limits, or rather general civil limits, the limits set by criminal law and nothing else."** Modern "Leninists" certainly seem to have learnt this part of the message!

---

* What Is To Be Done, Foreign Languages Publishing House edition, p. 51.

** Lenin, Selected Works, Vol. III, Lawrence & Wishart, pp. 493 and 494.

In the field of production, this philosophy found expression in the doctrine of "one-man management," the militarization of labour and the determination to prevent the rank-and-file bodies from taking over the factories. It was presumed, in a typically bureaucratic way, that only those possessing technical knowledge were entitled to impose decisions concerning production. "In the interests of socialism, the revolution demands," Lenin wrote as early as 1918, "that the masses *unquestionably obey the single will* of the leaders of the labour process." Writing in *Terrorism and Communism*, Trotsky echoed: "The unions should discipline the workers and teach them to place the interests of production above their own needs and demands." Trotsky continued: "That free labour is more productive than compulsory labour is quite true when it refers to the period of transition from feudal to bourgeois society. But one needs to be a liberal to make that truth permanent and to transfer its application to the period of transition from the bourgeois to the socialist order."

These quotations show the contemptuous attitude held by the Bolshevik "vanguard" for the working class. It was to have disastrous results. It led for example to the bloody suppression of the Kronstadt mutiny in 1921, when workers demanded that the power stolen from the Soviets by the Bolshevik Party be returned to them. The mutineers were massacred by the Bolsheviks. Significantly both Lenin and Trotsky publicly claimed that it was a counter-revolutionary rebellion, led by Tsarist officers. They both knew this to be a lie, but truth did not matter. Political expediency did.

The culmination of these doctrines was the introduction of completely capitalist methods into Russian production: speed-ups, piecework, unpaid "voluntary" overtime, permanent labour control, time and motion study, and the open advocacy of a drive for "American efficiency." Engels could have been foreseeing modern Russia when he wrote: "The modern State, no matter what its form, is essentially a capitalist machine, the State of the capitalists, the ideal personification of the total national capital. The more it proceeds to the taking over of productive forces, the more does it actually become the national capitalist, the more citizens does it exploit. The workers remain wage workers, proletarians. The capitalist relation is not done away with. It is rather brought to a head."*

****

"Being determines consciousness" is an oft-quoted marxist truism. Related to a bureaucrat it means that any man possessing power over others cannot fail but to see society through the eyes of a master. So long as political power exists, class society will exist. So long as a specific social stratum manages production, the ruler and ruled relationship will persist. The political power held by Lenin and his elite over the rank and file of the pre-revolutionary Bolshevik Party was simply transformed, by the October Revolution, into State power. The Party appointed the industrial managers. It opposed workers' management of production. Its members took up key positions in the State apparatus. The Party built a society in its own image.

---

* F. Engels, *Socialism: Utopian and Scientific*, Foreign Languages Publishing House edition, Moscow 1954, pp. 105-106.

The trade union and Labour bureaucrat in this country plays the same role as his Russian counterpart. His prime concern is to maintain himself. This he has no difficulty to do as he is an essential cog in the whole edifice of bureaucratic capitalism. Socialism and workers' power would mean his extinction.

It is no accident that trade union and Labour bureaucrats, of every political colouring, instinctively and inevitably must oppose any form of rank and file activity. The bureaucracies are fully integrated into the structure of capitalism. Independent action by the working class is the greatest threat to their existence. To talk, therefore, of these leaders "selling out" the membership is absurd. There is no other way in which they could act. They differ with one another only in respect of the kind of class society they would choose: the Western, based to an ever-diminishing degree on private ownership, or the Russian brand, organized through total State ownership.

As capitalism develops the State bureaucracy "takes over" managerial functions to an increasing degree until it becomes the ruling class. The economic basis for this new bureaucracy is the enormous concentration of capital and power and the increasing intervention of the State in all economic transactions, and finally in every aspect of social life. The old "property-owning bourgeoisie," which characterized the capitalism of the days of Marx, is dying together with the era of laissez-faire. It now has to share its power with the new bureaucracy. It will eventually be eliminated altogether, either gradually and piecemeal (as in the West) or suddenly, as the result of a violent struggle (as in Russia and China). In this respect the only difference between East and West is that the former has already achieved total centralization in the hands of the State, while in the West the process still continues. It is a quantitative difference.....not one of quality.

In their attitude to rank and file ("unofficial") activity, the organizations of the "left" reveal most clearly their bureaucratic make-up. The great Frank Foulkes, then "Communist" President of the ETU, could say to the power workers (November 14, 1960) that "Unofficial bodies are not in the best interests of the industry." The Stalinist weekly World News devoted a major article, in May 1958, to attacking the "unofficial" attempts of sections of the London busmen to extend their strike. Even the ultra "rrrevolutionary" S.L.L. declares its policy in all strikes is to make them official.* This is a permanent call for workers to leave control of the disputes in the hands of the bureaucrats. It goes hand in hand of course with calls for "better leadership" (i.e. themselves).

Here's a bit for your new IWW mag., The Rebel Worker. Needless to say, "I hope you make a great go of it.

George Slaychuk
(Syndicalist George)
Youngstown, Ohio

I was pleased to see your magazine The Rebel Worker, but I was more impressed by the organizational work you are doing.... Would you send me information about the Agricultural Workers Organizing Committee of the IWW?

Hyatt Bache
Kensington, Maryland

*

The four-hour day, four-day week proposal of the IWW...would open up countless opportunities for presently unemployed workers to directly control their destinies at the point of production. The four-hour-day, four-day week slogan is as applicable today as in the 30's; I think it should be revived and propagated and implemented by the workers today. Let's not wait for the tomorrows of the politicians.

Bernard Marszalek
Chicago, Illinois

THOUGHTS ON BUREAUCRACY, concluded

Experience has shown that movements relying on leaders can achieve nothing of fundamental benefit to the working class. Bureaucratic parties can only build bureaucratic societies. Socialism cannot be built with capitalist tools. The only saviour of the working class must be the working class itself---a statement that must be taken in its most literal sense.

Bob POTTER

STARVATION ARMY 1964

HISTORICAL INTRODUCTION

The IWW and the Salvation Army have always had rather conflicting philosophies. Nevertheless, these philosophies have often been directed at the same type of men: the unskilled and unemployed workers who rove the skid roads while waiting for another job. To the Salvation Army they've always been tramps, hoboes and bums who have gone astray, but might be "led into the light of Jesus and be saved." To the IWW they are, in Haywood's terms, "the elite of the working class," whose task is to lead the other workers on the path of revolutionary industrial unionism.

The most interesting example of this antagonism occurred in 1909 when the Spokane IWW branch hired Jack Walsh, a professional Socialist Party orator, to recruit members. His idea was to preach industrial unionism from the soapbox and take a 50¢ commission out of the $2.50 initiation fee of each new member.

Walsh soon drew large crowds and signed up hundreds of new members, but the Salvation Army and the Volunteers of America had objections to the IWW approach and proceeded to drown out Walsh with their bands. Not to be deterred, Walsh organized his own band and beat the evangelists at their own game.

Sparked by this idea, Walsh took his band and toured the northwest coast doing satirical take-offs on the Salvation Army and parodies of their songs. Joe Hill was later to write the most famous hymn-parody, The Preacher and the Slave:

> "And the starvation army they play,
> And they sing and they clap and they pray.
> Till they get all your coin on the drum,
> Then they tell you when you are on the bum:
>
> You will eat, bye and bye,
> In that glorious land above the sky;
> Work and pray, live on hay,
> You'll get pie in the sky when you die."

The following is an account of how the Salvation Army is faring in Chicago today.

T. F.

And who does Jesus save? The old gray head, the lame, the blind, the young man on the bum, the wino, the Negro, the Puerto Rican, the poor white, the Indian, the Mexican, the Oriental, the one who speaks with an "old country" tongue, the homeless, the jobless, the hungry, the sick... Poverty's children, that great American army of extraneous men...those who live mass lives of quiet desperation. JESUS! JESUS! JESUS! SWEETEST NAME I KNOW! Now clap your hands for God's Glory and MAKE A JOYFUL NOISE UNTO THE LORD! This is the Way, the Truth and the Light on the dark side of the American dream. Are you poor and hungry? Is your life a failure? Then be a success, feasting on the riches of the grave of Jesus. Services every night at seven..The Harbor Light Center of the Salvation Army. Vistors Welcome.

Already before seven over 200 men have assembled in the big chapel, while downstairs in the basement another 100 sit waiting for the Word of God to come from the loud speaker hung in the corner. It's rather dark down here where I'm sitting...underneath an air vent. The service begins but the sea of voices drowns it out. I offer my seat, one of the two together, to some late-comers. I want to get up front in order to hear better. There's an empty seat in the very front row. I sit down before a life-sized wooden cross, turned on its side and used as a hat rack by my neighbor on the left. On my right an old man sits reading his newspaper:

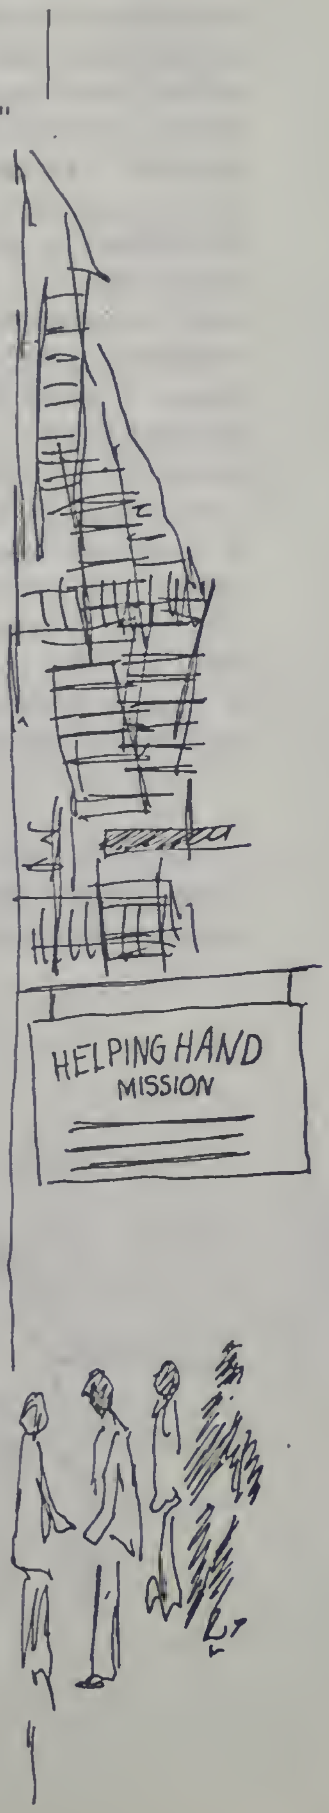
DALEY LAUDS LBJ
WAR ON POVERTY

Here and there a few are smoking. I light up and begin to take notes. I copy the Bible verse chalked on the blackboard in front. "The God of my Rock, In Him Will I Trust: He is my shield, and the Horn of my Salvation, my High Tower, and my Refuge, my Savior; Thou savest me from violence. II Sam. 22:3. A hand touches my shoulder, "Hey, bud, save me the butt." "Sure, here, take it." Almost immediately an attendant comes over. "If you want to smoke, get out." A sign on the door, "Your life is but a little while. Do your job with a smile. Remember the Lord. He remembers you." Cripples on crutches are coming in late. They're singing hymns upstairs now. A few down here make feeble attempts to join in but the majority just sit in silence or talk to their neighbors. An old black blindman sits tapping his cane. The Brigadier speaks, "Men, the Holy Spirit is moving among us. Life's changed, re-arranged. Souls saved." "Amen," says one brother. "Since Jesus came into this town, the Devil is wearing a frown." (I look around: a roomful of devils.) "Turn to number five. There's a melody within my heart." The Brigadier announces there'll be twelve witnesses, each giving an hour-long testimony. Moans and groans come from the flock. The Brigadier is in fine spirits and kids us along, "If any of you gentlemen have previous engagements, heh, heh, heh..." Actually a few get up to leave. I follow them upstairs. I want to get closer to our Brigadier. I'm hustled to an opening off a long hallway where about 25 men are seated. Meanwhile the witnesses are on. One after another they tell how Jesus saved them. "My wife died. I had no friends. I was lonely. I began to drink. I became a drunk. I lost my job. I was out on the street. I had nowhere to go, no one to turn to. Then Jesus came into my heart." "All you men know me...Al, I'm the one by the door, almost every night. That's how I serve Jesus and how I serve you. It's wonderful when you accept Jesus as your Savior." An old man, 86 years young, speaks in a singsong that sounds like "foreign tongues." He goes on and on into eternity. He sings out his 86 years of misery on this earth and his hope for a better life to come in the kingdom of Heaven. The witnesses are through and now an official is singing. Beside me sits a Negro who doesn't like it. "We ought to strangle that guy." I turn and look at him. "Not you," he assures me. "That guy that is singing," Naturally, I agree. The Brigadier is now telling a story. One day a member of his staff informs him there's a woman waiting in his office. "She's proably just drunk," he says. But the Brigadier ignores his assistant's crude remark and goes to talk to her. It's later discovered that the woman is dying of cancer. "You can never be sure when a person comes to you and says, 'I'm in trouble', whether he's lying or not, but a Christian must always be there, ready and willing to help. True, sometimes you must turn people away. Especially some people"(laughter). "But even then the Christian must be kind and do it with a smile." At that moment an attendant, a young skinny white man with a crew cut, is shoving an old Negro out the door. The old man is protesting, but loses the battle. The attendant comes back...smiling. The Brigadier announces that Mayor Daley has asked him to head a committee to study the woman alcoholic in Cook County. "These unfortunate women...something must be done for them. We need a hospital."

Two more latecomers are seated. One wears a black glove on his right hand. A Mexican, who up till now, had been religiously reading his newspaper, suddenly begins gesturing wildly. He's showing the man with the black glove his injured hand. He squeezes an invisible ball. Blackie takes off his glove. His hand lies dead. He just can't move his hand. This seems to make the Mexican squeeze his hand all the more frantically. There seems to me to be something obscene about all of this. Later the Mexican gives me strange, hostile looks and begins making weird noises. He abruptly goes back to reading but then starts sucking on his tongue. It sounds like someone cleaning his teeth after a meal. The Brigadier announces that on April 22 (Lenin's birthday, I think to myself) the wife of the late great Capt. Cedric will be there to speak. She's a wonderful woman and her departed husbnd, well, "There was never more saintly a man that walked the streets of Chicago than Capt. Cedric. God rest his soul." An old man behind me tells his younger partner, "He's right. Capt. Cedric was a great guy. He always looked out for the boys."

The Brigadier is now going into his sermon. The book of Daniel. The handwriting on the wall. The King shook in fear. We all act afraid in tight situations. Especially when we don't or won't listen to God. We must take his warnings and turn from our wickedness to Him before it's too late. The handwriting is on the wall, etc., etc. He reaches eloquent heights of pleading. I'm reminded of Billy Graham, and like Billy, the Brigadier reminds us this is our hour of decision...and that a collection will be taken up. The boys from upstairs, who have been practicing all afternoon, harmonize on a few hymns. An attendant comes out of a side door, walks hurriedly past us, smoke trailing behind him. The hymns over, an official is saying a prayer. I am wondering how I can get out of the collection, and if not, how much I should give. I'm also wondering how I can get into the big chapel. The Brigadier saves me. He's asking us to come forward and make our decisions for Christ. Someone gets up and I follow him into the big chapel. I sit down in a back row, but an attendant tells me I have to keep moving. I find myself up front with about 12 others. We're standing before a large stage. Its curtain is drawn. Below there are a few rows of makeshift wooden benches. We kneel down, fold our hands in prayer and put them on the benches. Suddenly a group of men come down from the stage. They kneel down before us and put their hands on ours. I get Bob, a graying Negro of about 45. I know his name is Bob because it says so on his recently laundered bowling shirt. He asks me what my problems are.. I tell him I just sort of got caught up in the current. No, I don't drink. He seems a little bewildered. Finally, he asks me to join him in prayer. He tells God I don't look like a drinking man. I look somewhat intelligent. "Maybe with your help, O Lord, he can learn a few more things. Through Jesus' name. Amen." He then rattle off the routine I'm to follow. He gives me a slip of paper which he says entitles me to breakfast. After that, all of us - the converts - go up on the stage behind the curtain. Others take our places below. We take our seats and wait. I ask a man next to me about the slip of paper. He says it's good for the 6 o'clock breakfast. "You don't have to wait in line with the others...just come right in." "It's your press card," a man behind me jokes. I ask them about their decisions for Christ, whether it has any meaning in their lives. "We told you you don't have to wait in line for breakfast." "But is 6 o'clock worth it?..." I ask. Then I ask what they serve. "You know, the same old shit...mush, sweet rolls, milk." "Yeah," another man joims in. "The same old shit. Two silver-haired old men with beards come in with the next group. They're engaged in a lively discussion. They sit down, one on each side of a third man. They continue their conversation, talking right through the third man. A civilian-dressed official takes our names and ages. A man next to me takes out his discharge papers. He thinks he has to show his ID. He's from some place, Wyoming. His hands are trembling. An officer comes in and tells some religious and routine information. He stops because of the talking and glares at the two young Negroes in front of me. Meanwhile the two old men are still talking furiously and ignore him completely. He reprimands the group, goes on, finally ending in a standardized prayer. We march downstairs. Half of the chapel is already there...in this large dining hall. There are about five rows of eight long tables. Each man is almost shoulder to shoulder and standing.

since there are no seats. There's a bowl of vegetable soup which I hurriedly gobble up. I haven't eaten all day. I break the cheese in half and taste a small piece. I don't like it. The bread and pastry look and feel stale. I don't try them. I drink the milk. It's powdered. I see some people have cake and pie but it's probably stale, too. I ask who wants the rest of my food and a hand from across the table snatches it away. The man next to me complains, "He's got too much already." I agree and take half of it back and give it to him. I look around and see surprisingly, a lot of full-headed, gray-haired old men. Everyone, I think to myself, is dressed like a scarecrow. I go around to take my dirty dishes to the kitchen crew. I've left my spoon in the bowl and so...get a dirty look. I take it out and give it to the next man in line. I walk out on the street and see a small Chinese man leaning against the Salvation Army truck. I ask him if he had attended the service. No, he's waiting for someone. I wait awhile, watching the men come out, light up, and disappear into the night. I decide the best thing to do is to wait in the bar across the street and get into a conversation with someone I may recognize. The first place has a long -about 60 foot- bar. It advertises the cheapest fish bowl in town: 17¢. It's crowded. I find a place and order. The beer is very stale. A group of Puerto Ricans are slapping each other and singing. A man behind me is imitating a saxophone player. A Negro fag is swishing around the bar. He's very popular with boys at the other end. They're constantly laughing and making good-natured jokes. A middle-aged white man is talking to the fag up front now. The fag keeps saying, "I have to pay the rent. I have to pay the rent." The white man says, "Don't put me on. That's too much." He sneers and leaves. The fag goes over and makes a phone call. The TV up above is blaring. There's some confusion involving the other Negro in the place. The man next to me who speaks with a foreign accent, says, "They ought to throw him out...he's a terrible trouble-maker." The man bar-tender, who has a big bandage over his left eye, tells the Negro to cool it. The Negro walks about giving everyone menacing looks. I think a fight may break out when he pushes someone, but it turns out to be his friend. Another bar-tender comes in with his left hand in a cast. I decide to try next door. I enter and sit next to an old Negro. I buy a blind robin. I tell the Negro I just came to town and need a place to stay. "I was at the Salvation Army but they don't put people up there." He's very friendly and constantly smiles. I ask him if he had attended the service. No, he hadn't been there in over a month. I



show him my slip of paper. Yes, he knows, he's been saved lots of times. We exchange information about our lives, our road experiences. He thinks Kansas City and Indianapolis are the best for missions. He's been hoboing since '28. He even went to a mission in Detroit, his home town. When they checked up on him and found out he had people living in Detroit, they threw him out. He says he's been in a mission in every big city in the United States except Seattle. He once lived and worked in Seattle and he told his woman he was going down to the mission "just to see what it looks like." She thought he was crazy and he got drunk and never did make it. No, he never took a woman to a mission. "There's two things I'll never do--take my family to a mission or take them on the road." We had both seen families on the road but never at a mission. Neither of us had ever seen a woman at a mission. "A woman can always make it somehow," he smiles. He's going back to Detroit when the weather changes. He hasn't been there since opening day last year (baseball). He never hitchhikes. He always rides the freights. He tells me about the mission situation in Chicago. "It's too late to get put up now... you have to be there lined up already in the afternoon. I tell him I have a friend here I'm trying to get in touch with by phone. He tells me he's working now (washing cars) and he's going to eat now. "If you haven't reached your friend and you're still here when I get back, I'll give you 40¢ for a hotel room. The same hotel I stay at." I thank him and he leaves. I wait awhile, then leave, too. I pass another mission. It has a neon sign saying JESUS and another saying

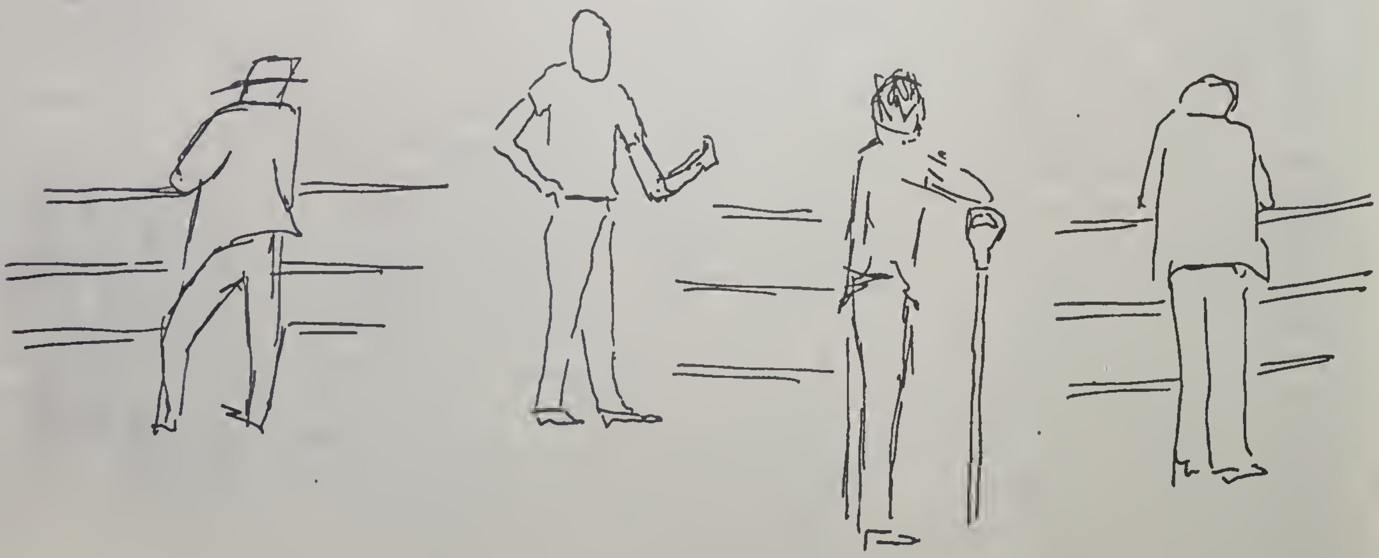
"Please stay out of the doorway." When I cross the street and head toward the Loop, a Wall Street Journal truck makes a sharp turn around the corner...

Daniel R. THOMPSON



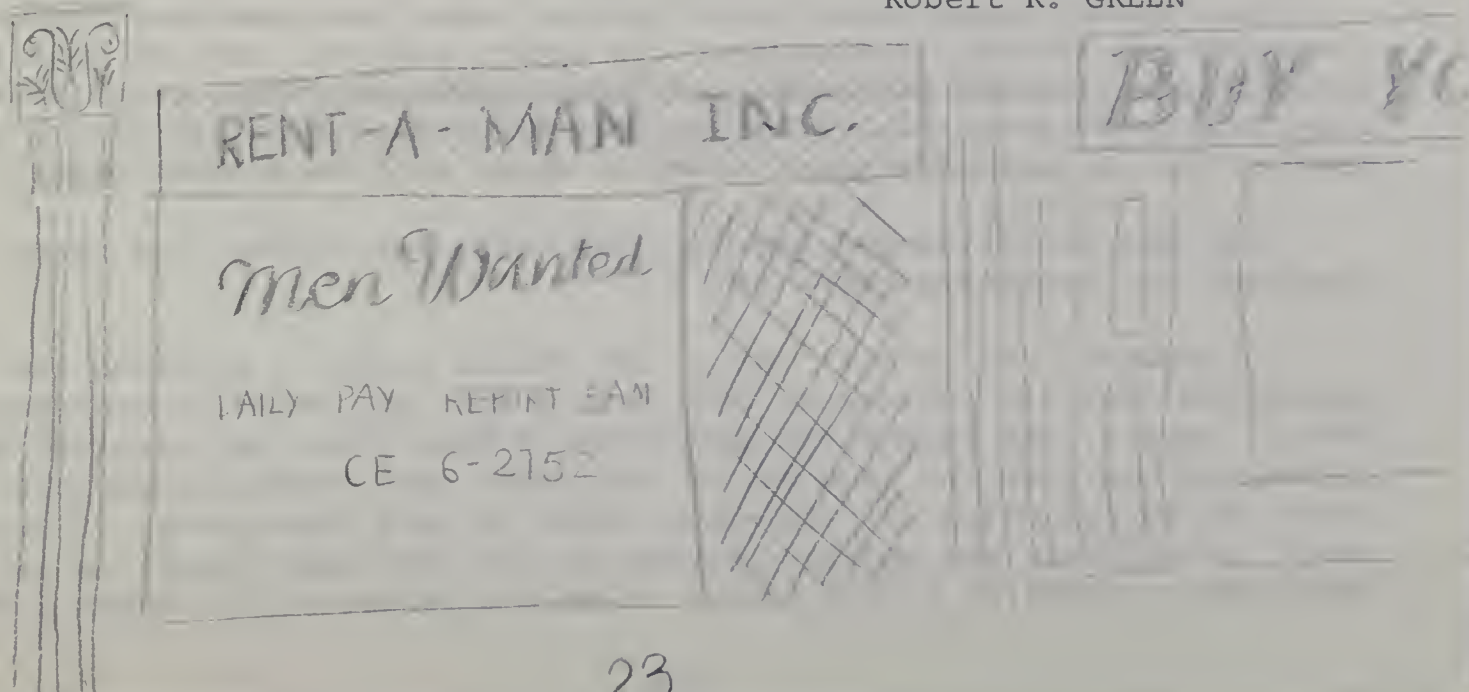
BARBARA

Barbara found herself unmistakably poor because her wants added up to more than her needs, and these wants were unattainable in the digit of three. The first was that the economic system under which she lived ignored her desires. The second was that the present social system feeds on the desires of those less deserving; and the third was that yet uninvented technology has not provided these things. "All of these things have unlimited power!" exclaimed Barbara, "But they can only have this power up to the point of peoples' control. I know," she cried, "because we're in the majority." Barbara thought over what Francis Hackett said: "I believe in materialism. I believe in all the proceeds of a healthy materialism--good cooking, dry houses, dry feet, sewers, drain pipes, hot water, baths, electric lights, automobiles, good roads, bright streets, long vacations away from the village pump, new ideas, fast horses, swift conversation, theatres, operas, orchestras, bands,--I believe in them all for everybody. The man who dies without knowing these things may be as exquisite as a saint, and as rich as a poet; but it is in spite of, not because of, his deprivation."

As Barbara herself put it so aptly, in the words of André Breton, "The idea that freedom, acquired here on earth at the price of a thousand--and the most difficult--renunciations, must be enjoyed as unrestrictedly as it is granted, without pragmatic considerations of any sort, and this because human emancipation--conceived finally in its simplest revolutionary form, which is no less than human emanciaption in every respect, by which I mean, according to the means of every mans disposal--remains the only cause worth serving."

It is regretful to say, however, that Barbara thinks she is the only one who thinks this way. Let's pass the word, fellow workers.

Robert R. GREEN



Poets and Pearls
a Rhapsody

Our poet came near landing another job today. He was walking along the street, wondering where we could raise the price of a Turkish Bath to match his cleanly rainment, when his eyes lit upon a sign:

"Dishwasher Wanted, Experienced."

Dear Reader, let me interrupt you while I tell you I can see the Editor's eye gleam BALEfully, as he anticipates the harrowing tale of his crack poet cracking dishes.

He will rise up in his sanctum, paw the air and distribute hands full of hair in the wastebasket---the mere thought of our poet entering the "field of art"---Spasms of suppressed Emotion will shake his frame and he will utter words no Mule Skinner need be ashamed of, even though the Editor may repent, and deny them later.

He will try to argue that a premier poet, with fine spelling and comprehensive punctuation, is frittering away his time diving for pearls in a restaurant when he might be making himself useful wheeling sonnets on a Construction Job.

But our poet will cite authorities to prove that former great poets have reached dizzy heights in the fertile plains of Art, on the verdant pastures of Science.

Robert Burns, the brilliantmost star in poesy's constellation, won greater fame as a wielder of the broom than our modest bard can ever hope to win---washing dishes.

"Dishwasher Wanted, Exp."

Here was my opportunity for a Turkish Bath. Our poet might enter the sweat-box kitchen, perspire to his hide's content, and get paid for it. Wash six thousand dishes for pastime, scrub the floor, compliment the cook, and while away the rest of the day discussing relative merits of chewing gum as essence piquant added to soup, with or without celery.

All this for $1.42 6-7 per day; and bath; and coffee, and beans, and comebacks and never-arriveds, etc.

I entered---in my best voice, and choice words, I informed the proprietor that his anxieties, from this moment on, would be banished; that I, even I, the inimitable immaculate T-Bone Slim, had resolved to emancipate him from the drudgery of the sink; that I would undertake to bathe his superb china (in the sweet water of Lake Minnetonka, if necessary), to maintain the spotless purity of the "hot-dog" joint, Le Par Excellence---would he kindly reveal to me the nature of the wages I would be honor'd with?

"Certainly, my friend," (I had won a friend already---though I hadn't touched the dishes), "Certainly," he says, "we are paying ten dollars a week and we furnish all the soap and water...."

"Why damn it, man, you don't want an expert dishwasher---what you want is a Common dishwasher"---I had reverted back to my mother tongue.

"Are you an experienced man?" he inquired.

"Why man alive," say I, "I've cracked rock on some of the leading rock piles all over the country." (This, of course, was a lie. Little indeed "moots" a lie when facing the realities of life; when a man wants a job; and a good sweat over a tank of dishes, little indeed.)

"Well, if that's the case," he says, "I'll give you Eleven dollars and a quarter."

"What in the name of benevolence is the quarter for?" I inquired. "Make it Eighteen dollars a week and free pie three times a day---I'll take it."

"Goodness Gracious!" he exclaimed, "Eighteen dollars a week---that would be 77 dollars a month; 800 dollars a year, Eight hundred dollars, just think---

"With Eight hundred dollars you would be able to support a family. No, no, this place cannot afford to support a family, excepting, of course, my own dear family---leave me," he pleaded, "We---we couldn't afford to let you eat any custard pie anyway. Good Day," he says, as he hit me in the eye with a fresh doughnut.

With my remaining eye I saw that if I prolonged the "conference" he would still hang on to his money (but lose his mind), so I went (as is a custom with great poets) down to the river---but, not to drown myself.

I'll get a chance to wash dishes yet---when the weather gets warmer....

T-BONE SLIM

A Contemporary Culture Document: Peter, Paul and Mary

Peter, Paul and Mary sing folk music. In your hands you hold their first album. But to be more accurate, you hold a bouquet of song still fresh as earth, and strong with the perfume of sincerity. For Peter, Paul and Mary sing!

There is nothing apologetic about their work. No ineptitude disguised as charm. No uninspired professionalism passed off as authenticity. Whatever they have thus far undertaken, Peter, Paul and Mary have done well, and with flair. And, obviously, with their whole hearts. The temptation is to run on in a riot of superlatives. Probably, you're either reading this instead of listening, or else reading and trying to listen at the same time. Either way, it's a mistake. The Truth is on the record. It deserves your exclusive attention. No dancing, please. Just look at their faces, listen to their songs, and hope that you have a chance to hear (and see) them in person.

These dynamic youngsters have been "together" almost a year now (by spring '62, when this is being written), and each day seems to bring new definition to that word..."together." The trio has elsewhere been described, visually, as "Two bearded prophets of the folk idiom in league with a bright, young blonde-and-a-half. And vocally, as "An angel, and two cellos playing guitars." Beyond such imagery, such facts as birthplaces, hobbies, ages, and last names are unimportant here. Their identities as artists, both individually and collectively, are emphatically established on the record inside. By way of rounding out the biography, lets just add that what they do in their spare time is sing.

More important than biography, there seems to be something optimistic, something encouraging about this whole musical experience. Peter, Paul and Mary's first album is bright with enthusiasm. No gimmicks. There is just something Good about it all. Good in the sense of Virtue, that is. And the news that something this Good can be as popular as this is can fill you with a new kind of optimism. Maybe everything's going to be all right. Maybe mediocrity has had it. Maybe hysteria is on the way out. One thing is for sure in any case: Honesty is back. Tell your neighbor.

(Liner notes for Warner Brothers album W1449.)

4 Picketing Grower At Gr. Junction

Four blueberry pickers have formed a picket line in front of Hodgman's Blueberry Farm near Grand Junction following a walkout yesterday.

The four told Hodgman that they were going on strike where upon the grower told them to leave his property. Mrs. Hodgman said that the workers refused to leave until ordered to do so by state police. Early this morning the four pickers passed out letters to nearly all area farm workers and several businesses.

Claims

The letters claim that over half of the workers at the Hodgman farm are on strike and that the workers were forced to live under unhealthy living conditions on the farm. The letter is signed: Industrial Workers of the World — Agricultural Workers Industrial Union No. 110.

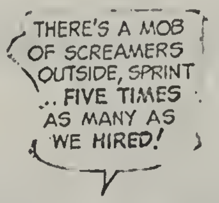
On Strike

The four pickers claim to be "out on strike for decent wages and healthy living conditions." They claim to have been forced to work for fifty cents an hour and to live in "good-for-nothing shacks", according to their letter passed out yesterday.

WANTED — Cherry Pickers. Small trees. 6 miles east on Phoenix Rd. Eldon Ruell.

The four pickers walked out yesterday when Hodgman refused to grant their request for an increase in pay. Hodgman told them that he was paying the same as other area growers and that the four had been aware of the wage scale when they took the job. The pay is 50 cents per hour.

Farm Strikers



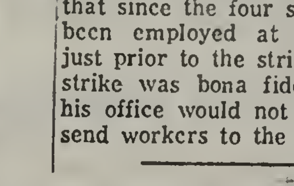
THERE'S A MOB OF SCREAMERS OUTSIDE, SPRINT ... FIVE TIMES AS MANY AS WE HIRED!

Two other pickers joined the picket line yesterday afternoon but left within a few hours to seek employment. The four strikers have been going to other picking camps in the area to recruit support for their strike. When asked what results they had had in the other camps, the strikers replied that they had had a good response.

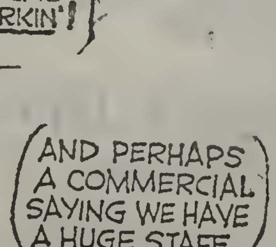
Walk Out

The pickers, who claim to be members of the Industrial Workers of the World Union, walked out Tuesday after Kenneth Hodgman, owner of the farm, refused to grant them a pay increase.

Dale Hough, crop area supervisor from the Benton Harbor farm labor office and Henry Florian of the South Haven labor office investigated the strike yesterday. Hough said that since the four strikers had been employed at Hodgman's just prior to the strike that the strike was bona fide and that his office would not be able to send workers to the farm.



WELL, UNCLE JOE SURE SEEMS HAPPY WORKIN'!



AND PERHAPS A COMMERCIAL SAYING WE HAVE A HUGE STAFF OF HELP.

Pickers' Strike Continues With Tension Build-up

A picket line in front of the Hodgman Blueberry Farm south of Grand Junction is going into its second week with little change on either side, except an increase in tension.

Letter To Workers

Union members put out a printed letter to area workers over the weekend urging them to organize and join their strike. They said to "Watch for our organizers in your camp."

However, despite the work done by the four original organizers, they seem to be making little gain with no farms reported organized. Three others joined the first four over the weekend but by this morning only one was still with them.

The pickers claim to be members of the Industrial Workers of the World union, a union that became known as the "Wobblies" during World War I. It reportedly is the same union that organized farm workers in California a few years ago.

The Industrial Workers of the World

PREAMBLE

The working class and the employing class have nothing in common. There can be no peace so long as hunger and want are found among millions of working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the every-day struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

THE IWW HERE AND NOW

In our last issue we mentioned that we were working on the possibilities of recruiting younger workers and developing some action to meet their particular needs. This issue of the Rebel Worker is the result of many discussions on this subject, and presents several points of view on various problems of young workers today.

We're a bit late with this issue, but we haven't been idle. We've opened our new Chicago Branch Hall and the IWW Solidarity Bookshop at 713 Armitage and are presently preparing an illustrated and descriptive catalog of books, pamphlets and periodicals available. (See page 33.) Branch meetings are held there the first Friday of each month at 8 P.M. All wage-workers are welcome.

We're also working on several new pamphlets, primarily one for our forthcoming Agricultural Workers drive this spring, summer and fall, and another on restaurant work. These should be readyby April or so. Details on the plans for these organizational drives will appear in the next issue of The Rebel Worker and in the IWW tri-weekly newspaper, The Industrial Worker.

Several new IWW "silent agitator" stickers have been printed up by the Bay Area (California) branches, and are available at ten cents for a packet of fifty. These include a four-hour day sticker, one saying "Lay the Boss off, it makes more sense!;" a railroad workers sticker; and one with the IWW Preamble printed in bright red ink. Write to the Chicago Branch, 713 Armitage, Chicago, Illinois 60614.

STRIKE

Our fellow workers in San Francisco are presently engaged in a strike at the Cedar Alley Coffee House. They are fighting not only the bosses, but the reactionary AFL-CIO Culinary Workers Union (which came in to "organize" the place after the boss had broken his contract with the IWW, and which is now doing all it can to help break the strike with its hord of scissorbills and scabs), and also the capitalist courts (which are using every trick of anti-labor legislation to confuse and hamstring the strike and the IWW out of existence. Our fellow workers, of course, are in need of strike relief. Send contributions to: Michael Brown, San Francisco Branch, Industrial Workers of the World, 52 Dearborn Street, San Francisco, California.

We are planning for future issues of The Rebel Worker a large section on various revolutionary groupings in other countries, consisting of statements of these groups on important theoretical and practical questions, and also an issue on women.... We are also hoping to include several book reviews in each issue.

Our next issue should be out in April. See you then.

The Unfree Child

The molded, conditioned, disciplined, repressed child---the unfree child---whose name is Legion, lives in every corner of the world. He lives in our town just across the street. He sits at a dull desk in a dull school; and later, he sits at a duller desk in an office or on a factory bench. He is docile, prone to obey authority, fearful of criticism, and almost fanatical in his desire to be normal, conventional and correct. He accepts what he has been taught almost without question; and he hands down all his complexes and fears and frustrations to his children.

Psychologists have contended that most of the psychic damage to a child is done in the first five years of life. It is possibly nearer the truth to say that in the first five months, or in the first five weeks, or perhaps even in the first five minutes, damage can be done to a child that will last a lifetime.

Unfreedom begins with birth. Nay, it begins long before birth. If a repressed woman with a rigid body bears a child, who can say what effect the maternal rigidity has on the newborn baby?

It may be no exaggeration to say that all children in our civilization are born in a life-disapproving atmosphere. The time-table feeding advocates are basically anti-pleasure. They want the child to be disciplined in feeding because non-time-table feeding suggests orgastic pleasure at the breast. The nutriment argument is usually a rationalization; the deep motive is to mold the child into a disciplined creature who will put duty before pleasure.

Let us consider the life of an average grammar school boy, John Smith. His parents go to church now and then, but nevertheless insist that John go to Sunday School every single week. The parents had married quite rightly because of mutual sex attraction; they *had* to marry, because in their milieu one *could* not live sexually together unless one was respectable---that is, married. As so often happens, the sex attraction was not enough; and differences of temperament made the home a strained place, with occasional loud-voiced arguments between the parents. There were many tender moments, too, but little John took them for granted, whereas the loud quarrels between his parents hit him in the solar plexus, and he became frightened and cried and got spanked for crying for nothing.

From the very first, he was conditioned. Time-table feeding gave him much frustration. When he was hungry, the clock said his feeding time was still an hour away. He was wrapped up in too many clothes, and wrapped too tightly. He found that he could not kick out as freely as he wanted to do. Frustration in feeding made him suck his thumb. But the family doctor said that he must not be allowed to form bad habits, and Mamma was ordered to tie up his arms in his sleeves or to put some evil-smelling substance on his fingertips. His natural functions were left alone during the diaper period. But when he began to crawl and perform on the floor, words like *naughty* and *dirty* began to float about the house, and a grim beginning was made in teaching him to be clean.

Before this, his hand had been taken away every time it touched his genitals; and he soon came to associate the genital prohibition with the acquired disgust about feces. Thus, years later, when he became a traveling salesman, his story repertoire consisted of a balanced number of sex and toilet jokes.

Much of his training was conditioned by relatives and neighbors. Mother and father were most anxious to be correct---to do the proper thing---so that when relatives or next-door neighbors came, John had to show himself as a well-trained child. He had to say *Thank you* when Auntie gave him a piece of *chocolate*; and he had to be most careful about his table manners; and especially, he had to refrain from speaking when adults were speaking.

His abominable Sunday clothes were a concession to neighbors. With this training in respectability went an involved system of lying---a system he was usually consciously unaware of. The lying began early in his life. He was told that God does not love naughty boys who say damn, and that the conductor would spank him if he wandered along the train corridor.

All his curiosity about the origins of life were met with clumsy lies, lies so effective that his curiosity about life and birth disappeared. The lies about life became combined with fears when at the age of five his mother found him having genital play with his sister of four and the girl next door. The severe spanking that followed (Father added to it when he came home from work) forever conveyed to John the lesson that sex is filthy and sinful, something one must not even think of. Poor John had to bottle up his interest in sex until he came to puberty, and then he would guffaw in the movies when some woman said she was three months pregnant.

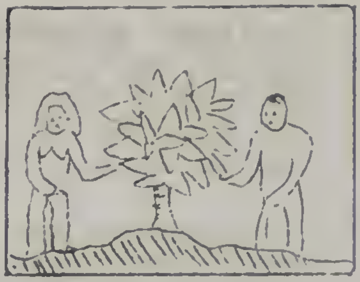
Intellectually, John's career was normal. He learned easily, and thus escaped the sneers and punishment a stupid teacher might have given him. He left school with a smattering of mostly useless knowledge and a culture that was easily satisfied with cheap tabloids, trite films, and the pulp library of crime.

John Smith's rich cousin, Reginald Worthington, went to a private school; but his development, in essentials, was the same as that of poor John. He had the same acceptance of the second-rate in life, the same enslavement to the status quo, the same negation of love and joy.

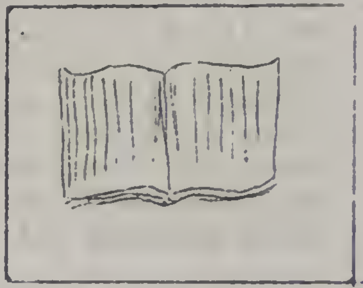
Are those pictures of John and Reginald one-sided caricatures? Not exactly caricatures, yet I have not given the complete picture. I have left out the warm humanity of both, a humanity that survives the most evil character conditioning. The Smiths and the Worthingtons of life are in the main decent, friendly folk, full of childish faith and superstitions, of childlike trust and loyalties. They are the people who decree that animals must be killed humanely, that pets must be properly cared for; but they break down when it comes to man's inhumanity to man.

Both are staunch supporters of the patriarchal state, even if neither ever heard of the term. They have been fashioned into a product the patriarchal state finds necessary for its continued existence. Their emotions tend to be crowd emotions rather than individual feelings. In psychological terms, they accept the father without constructive rebellion against him; and so the father-authority tradition is carried on for generation after generation.

To complete the portrait of John Smith I ought to give a short sketch of the life of his sister, Mary---short because, by and large, her repressive environment is the same as that which stifles her brother. She has, however, special handicaps that John does not have. In a patriarchal society she is



In Adam's Fall
We ſinned all.



Thy Life to mend,
This Book attend.

The Cat doth play.
And after ſlay

A Dog will bite
A Thief at Night.

The idle Fool
Is whipt at School.

a definite inferior, and she is trained to know it. She has to do house chores when her brother reads or plays. She soon learns that when she gets a job, she will get less pay than a man gets.

Mary does not as a rule rebel against her inferior status in a man-made society. Man sees that she has compensations, tawdry as they mostly are. She is the focus of good manners; she is treated with deference; a man will stand in her presence if she is not seated. A man will ask her if she will graciously marry him. Mary is subtly taught that one of her chief functions is to look as lovely as possible, the result being that many more millions are spent on dress and cosmetics than are spent on books and schools.

In the sex sphere, Mary is as ignorant and as repressed as her brother. In a patriarchal society, the menfolk have decreed that their women must be pure, virginal, innocent. Mary's grandmother, and probably her mother, too, were not supposed to have any sex until the right man came along and aroused the sleeping beauty. Mary has got away from that phase, but not so far as we would like to believe. Her love life is ruled by fear of pregnancy, for she realizes that an illegitimate child will very likely spoil her chance of getting a man.

One of the big tasks of today and tomorrow is the investigation of repressed sexual energy and its relation to human sickness. Our John Smith may die of kidney trouble and Mary Smith may die of cancer; and neither will wonder whether his narrow, repressed emotional life had any connection with his illness. One day humanity may trace all its miseries, its hates and its diseases to its particular form of civilization that is essentially anti-life. If rigid character training makes rigid human bodies---cramped and confined instead of being alive and pulsating---it seems logical to conclude that the same rigid deadness will prohibit the pulsation in every human organ necessary to life.

To sum up, my contention is that unfree education results in life that cannot be lived fully. Such an education almost entirely ignores the emotions of life; and because these emotions are dynamic, their lack of opportunity for expression must and does result in cheapness and ugliness and hatefulness. Only the head is educated. If the emotions are permitted to be really free, the intellect will look after itself.

I should like to quote a few Instructions for Expectant Mothers issued some years ago by a hospital of a women's medical college in Pennsylvania.

"The habit of thumb and finger sucking may be prevented by placing the infant's arms in a cardboard tube in order that it may not be able to bend the arm at the elbow."

"Private Parts. These should be kept scrupulously clean, to avoid discomfort, disease *and the formation of bad habits*." (My emphasis.)

I blame the medical profession for much of the wrong rearing of children. Doctors are not as a rule trained in child rearing; yet to many women, the doctor's word is the voice of God. If he says that a child must be spanked for masturbation, the poor mother does not know that he is talking through his own sex guilt and not through his scientific knowledge of child nature. I blame the doctors for prescribing the fatuous time-table feeding, the sucking deterrents, the stupid prohibition about playing with the baby, and about giving him his own way.

The problem child is the child who is pressured into cleanliness and sexual repression. Adults take it for granted that a child should be taught to behave in such a way that the adults will have as quiet a life as possible. Hence the importance attached to obedience, to manners, to docility.

Many a mother who treats her child fairly well at home will storm at him or spank him in public because she is fearful of the opinion of her neighbors. The child must from the start be forced to fit himself into our insane society.

Once, when I lectured in a seaside town in England I remarked, "Do you mothers realize that every time you spank your child, you show that you are hating your child?" The reaction was tremendous. The women shouted at me savagely. When later in the evening I gave my views on the question, "How can we improve the moral and religious atmosphere in the home?" the audience hissed me with great gusto. It was a shock to me, for when I go lecturing, I lecture mostly to those who believe what I believe. But here was a working-and-middle class audience who had never heard of child psychology. It made me realize how entrenched is the compact majority that is against freedom for children---and freedom for themselves.

Civilization is sick and unhappy, and I claim that the root of it all is the unfree family. Children are deadened by all the forces of reaction and hate, deadened from their cradle days. They are trained to say *nay* to life because their young lives are one long nay. Don't make a noise; don't masturbate; don't lie; don't steal.

They are taught to say *yea* to all that is negative in life. Respect the old; respect religion; respect the schoolmaster; respect the law of the fathers. Don't question anything---just obey.

The tragedy is that man, who holds his family in bondage, is, and must be, a slave himself---for in a prison the jailer also is confined. Man's slavery is his slavery to hate: he suppresses his family, and in doing so he suppresses his own life. He has to set up courts and prisons to punish the victims of his suppression.

Enslaved woman must give her son to the wars that man calls defensive wars, patriotic wars, wars to save democracy, wars to end wars.

There is never a problem child; there are only problem parents. Perhaps it would be better to say that *there is only a problem humanity*. That is why the atomic bomb is so sinister, for it is under the control of people who are anti-life---for what person whose arms were tied in the cradle is not anti-life?

There is a great amount of good fellowship and love in humanity, and it is my firm belief that new generations that have not been warped in babyhood will live at peace with each other---that is, if the haters of today do not destroy the world before these new generations have time to take control.

The fight is an unequal one, for the haters control education, religion, the law, the armies and the vile prisons. Only a handful of educators strive to allow the good in all children to grow in freedom. The vast majority of children are being molded by anti-life supporters with their hateful system of punishments.

Girls in some convents still have to cover themselves when they take a bath, lest they see their own bodies. Boys are still told by parent and teacher that masturbation is a sin leading to madness and all sorts of fearful consequences. Recently, I saw a woman spank a baby of about ten months for crying when it was thirsty.

It is a race between the believers in deadness and the believers in life. And no man dare remain neutral: that will mean death. We must be on one side or the other. The death side gives us the problem child; the life side will give us the healthy child.

A. S. NEILL

(Reprinted, slightly abridged, from *Summerhill: A Radical Approach to Child Rearing*, New York, Hart Publishing Co., 1960)

LIARS SHALL HAVE THEIR PART IN THE LAKE
WHICH BURNS WITH FIRE AND BRIMSTONE.

THE VICTIMS OF THE BENEFACTORS OF THE POOR

Have you ever bought a newspaper from a ten year old youth on a school day? Have you wondered why he is working? After all, there are laws prohibiting work for kids under 16 during school hours. The fact is that it is good economics for the newspaper to hire kids--and that fact determines child employment as much as any law or regulation.

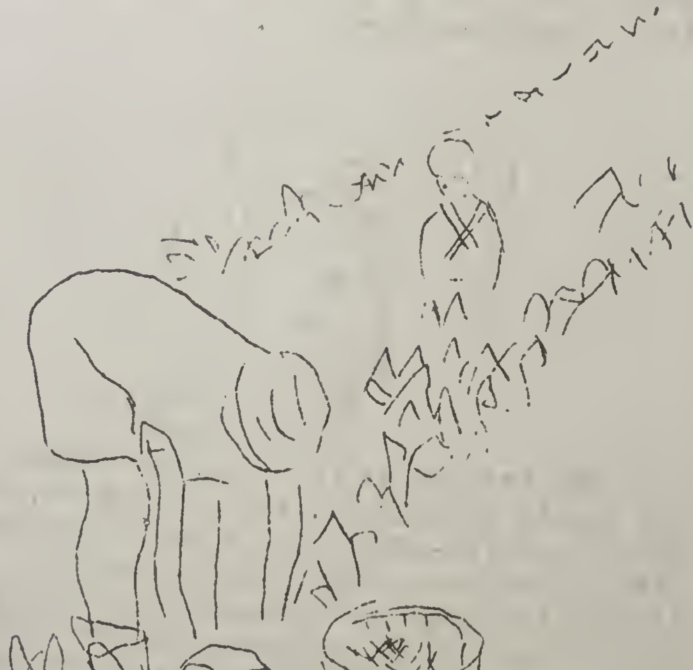
Child labor was an invention of the industrial revolution. As hand labor was replaced by machine production, children from 6 years and up provided a cheap and plentiful labor supply. As a result, the almshouses and jails were emptied of paupers and orphans. The employers advertised themselves as the benefactors of the poor.

At the turn of the century the first laws began to be enacted to prohibit the more brutal labor practices and at the same time, compulsory education became a nationwide law. Such laws continued to eliminate the worse ills--work at very early ages, sweatshop conditions, and work in hazardous occupations--but the effect was not a continuing decline in child labor.

The number of employed youth have always reflected the general labor market more than the law (economics precedes jurisprudence). The forced unemployment of the depression decreased the young labor force and increased school attendance. World War II greatly revived employed youths which reached a peak in 1945 of 3 million kids from 14 to 17 working full or part time. After the war there was a steady decline which continues today.

The supposed problem of the young worker today is the lack of a job, not his exploitation by the boss. The excitement today is over the school drop-out, not the young worker. This means that the on-the-job situation for youth is largely ignored. And because the bosses have the choice of many young workers, they can, and do fix wages and conditions to their own liking.

The real problem with the young worker is that he has no reccurse to action while on the job he is often payed the lowest wages of any worker today. His only "choice" is to quit and take another job if there is one, or no job which is more often the case. He has no union to represent him. He is a victim of the benefactors of the poor.



Torvald FAEGRE

EYGPTIAN TROUBLE

One day John Skelece got an airplane ticket to Egypt. he had been planing to go there for a long time. His brother, Tom, a scientist, wanted him to stay and help him in his work.

Finaly the time came for him to go. The trip would take four days. When the plane left there was a hurricane blowing up. The trip was rough and almost crash twice.

The land in a half-deserted area. All the people went to a city near there. Except for, for John. He staded. He wanted it to be a surprise to Tom, who thought he was taking a vacation. He was on a expodition.

Finally he was alone. All alone. Except for one, who wasn't discovered yet. The thing not yet discovered was something that was terrizing Egypt. Tom, his brother, didn't know about the thing.

The thing was undiscribible. It was so ugle and terribal looking.

One day John was working, doing some research when all of a suden he heard this noise. It was getting closer and closer, and A_____! Yes, he was dead. Well at least we thought so.

When his brother Tom heard this he ammidatly went to Egypt. Naturally he wasn't alone.

When they got there they found a not which he had written just before he was killed. Here's what it said:

Dear Tom
I have found the most ugle and deveis
"Thing" the world has ever known. Right now
there is something coming. The earth is shaking
like mad
The Thing

When Tom and the police found this they knew he was dead. But wait! Tom said. The plain went down in the hurricane. Then, all of a sudden, out of howhere, came John. Yes, it was John. John said he didn't have much time to live. He said if we don't stop testing bombs we would_________. He was dead before he could finish, said Tom. Now we might end the world he said.

Back home they found John's body at the bottom of the sea. They baried him before Tom got back.

One day Tom got permishon to dig up his grave. When he did he found him wrapped a mummy.

HARLEM JOURNAL OR
Homage to Pandemonia

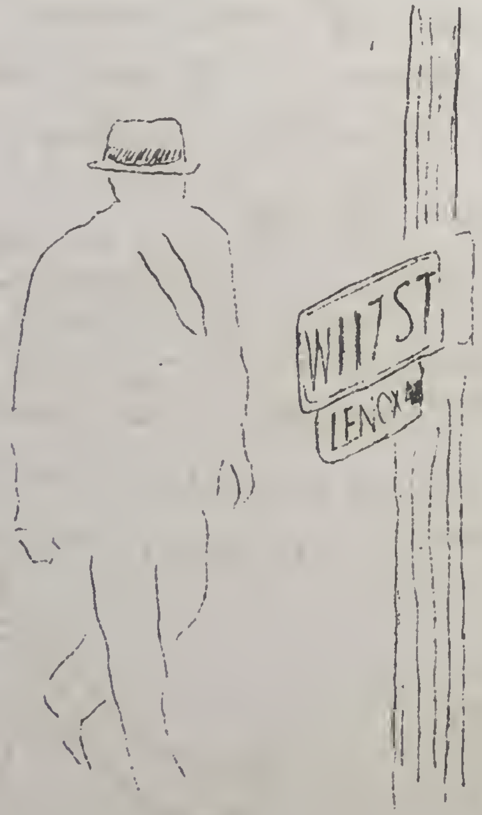
Sunday
July 19, 1964

Visiting friends. Learned that "riots" had broken out in Harlem the previous nite. Phoned CORE to see if they were doing anything about it. Informed, "There's a riot going on. That ought to be enough activity." Decided to go up and look around anyway. Live only 10 blocks away.

11:00 p.m.: Crossed 110th St. on 8th Ave. walking north into Harlem. Area strangely dark--resembled blackouts during war. Few pedestrians about, but lots of police cars and fire engines whipping around, sirens screaming. Progressed north. Area got ominously quiet...eerie. No police in evidence, streets dark and deserted, but bars going full swing on inside. Entered fish and chips place and ordered shrimp. Informed, "There's none left." Ordered fish. "Just sold the last order."

Went into bar, ordered beer. Received a few quizzical glances but most patrons didn't notice me at all. Bartender told me a gentleman wanted to buy me a drink. Turned out to be someone who thought he knew me. Couldn't place him but joined his party. Was asked: 1. What's your solution? 2. Are you a white liberal? Answered: 1. Didn't have any solution. 2. Didn't come up here to be insulted.

Left bar after a while and joined crowd of about 10 at corner of 125th St., Helped glare at police, visible for first time in large clusters. 125th St. blocked off by police barriers, though crosstown buses being allowed through along with police cars and ambulances. Whole block empty except for cops, mostly wearing aluminum helmets. (Usually they wear these only while turning off fire hydrants during the summer as kids throw bear cans at them for spoiling their fun.)



Ordered to move on by cop. Asked if could walk northward (barricades confusing). Was told yes. Went north a block or so, then started back meeting friends from bar. At 125th St. stepped inside barricades (had seen others do it) snd phoned home from sidewalk phone booth.

Walked homeward on 8th Ave., emerging south of 110th St. with great relief. Immediately encountered fight, however; two Negroes--a cab driver and passenger. Two white cops interceding rather ineffectually. Nearby Negro onlooker commented, "Man, them cops can't even fight." Slipped in plug for nonviolence pointing out that the cops would have been better off interceding without nightsticks in their hands. Weapons are often an impediment--especially if accompanied by humane feelings or reluctance. Started discussing race problem, but condemned both Abraham

Lincoln and recent Civil Rights Bill as equal farces, so middle-aged drunk took a swing at me. ("Son of a bitch, you don't want my people to ever have nothing.") Black Muslim warded him off and we continued discussion for an hour. Arrived home (100th St.) about 2:00 a.m.

* * *

Monday
July 20, 1964

Left work in Bronx at 9:00 p.m., furious that police could just take over a whole section of city like Nazi Storm Troopers. They were in the wrong--the kid didn't shoot the cop. Where was CORE?? Why wasn't anybody protesting?

Left subway at 135th St. and Lenox Ave.--pretty much the same scene as previous nite, except more people about. Decided to walk south on Lenox Ave. if allowed--police barricades were baffling. Asked fellow pedestrian. He didn't know either, though "swear to God" he'd tell me if he did. Started south tentatively--wasn't stopped--joined devout one. Was harrangued with complications of his love life after cavalier disposal of racial crisis. ("Don't know nothing at all about that shit out there.") Selected a bar--companion wouldn't recommend one lest he be suspected of complicity "if everything wasn't just right." Atmosphere much colder than bar of previous evening, bartender barely civil--resented being kidded about policeman's nightstick he was armed with. Companion mentioned unliklihood of a 15-year-old boy's being able to "whip the ass" of a grown man like Gilligan--evidently he did know something about "that shit out there" despite earlier disclaimer. Bar patrons glaring out window at cops lining curbstone glaring in. Behemoth approached us, eyed first me then my 1 1/4" pin. ("Blood Brother" over a black and white handshake.) Told him handshake was a SNCC symbol. He'd never heard of SNCC, but ceded my right to wear it if I believed in it. He went away but returned a while later with a bar stool for me to sit on.

Left bar and continued south, feeling effect of beers on empty stomach. Companion explained that if he returned to bar now he'd probably get beaten up for having brought me in. Also we might well "get our asses whipped right now" for walking dwn the street together. Pointed out that as a pacifist, wasn't taking my hands out of my pockets come what may. Little consolation to him.

Separated at 125th St. and ordered fish and chips at sidewalk counter. Teenager inside with head all bandaged. He'd arrived from Puerto Rico the day before and come to visit counterman, a former next-door neighbor. Waiting for a bus across the street he had encountered "law and order"--two cops came over and bludgeoned him on suspicion. Berserk cop had tried to club him, but missed, while he was in the act of loading another police victim onto a stretcher.

Cops lined curbstone at ten-foot intervals, radiating hatred. Made it difficult to eat fish with savoir faire. Young, very conservatively dressed fellow walked by police line. Carried a large poster with remarkable self-assurance: "Wanted For Murder/Gilligan, the Cop..." One-legged panhandler appeared--bought him some pizza. In front of building next door drunk with bandage—swathed head was heckling police.

Resumed course down Lenox Ave. acquiring Puerto Rican lady with three infants. Walked them to 116th St. where she mooched a quarter in parting. Arrived home about 1:00 a.m.

* * *

Tuesday
July 21, 1964

Determined to continue going into Harlem, though not quite sure why. Walked up 8th Ave. about 11:00 pm. Block after block deserted, still no street lights. Area seemed much more tense somehow.

Police barricades gone from 125th St. but whole block empty nevertheless, except for some teenage boys and girls in a doorway midway down. Police only at corners in clusters. Walked down 125th St. past teenagers, overhearing: "He wouldn't have come up here if the cops weren't here" (True.) and "He wouldn't dare walk down (unintelligible) street." Didn't stop. Wanted to locate CORE whose office used to be around corner in Hotel Theresa on 7th Ave. Got new address there, and turned back into 125th St. passing helmeted white news photographer, alone and unhappy in doorway.

Girl and three escorts, one wearing "Freedom Now--CORE" pin, walked right by without seeing me. Hailed them. Bizarre exchange: What are you doing here?... Farmer announced on radio that all white civil rights workers should stay out of Harlem because white faces might inflame Negroes...Get out quick before there's one dead CORE sympathizer...Ask nearest cop (!!!) to put me safely on bus. Exeunt CORE.

Decided to talk to teenagers and possibly offer to walk down street they'd mentioned linking arms with them. Never got there. Police cars careened by, sirens wailing. Older group appeared from nowhere, one guy leaping out into street screaming "Mother Fuckers" after them. Accosted him--"want to shake your hand!"--which surprised him a bit, but we shook. Group evaporated, light-skinned guy popped up and asked, "What's happening?" Usual answer is, "Nothing much, man," Didn't seem appropriate. Strolled down to 8th Ave. chatting with cat--pretty far out panorama.

Ordered root beer at outdoor counter and dug scene. Groups moving up and down street giving out "Wanted for Murder" posters--police everywhere--squad cars looping back and forth. Same CORE group came up. Girl: "I thought I told you to get out of here." Noncommittal response elicited, "Farmer said..." etc. Answered: "Look, Honey, I don't take orders from Farmer." Immediately pictured half of Harlem clobbering me for putting down Negro chick siding with cops against them. Another CORE group appeared, including Bayard Rustin. Chick ran over and pointed me out. He merely shrugged.

Left on next bus, getting home around 12:30 a.m.

~

Wednesday
July 22, 1964

Journal-American ran front-page exposee, "What Sparks the Rioters" with picture of the poster. Naturally it wasn't the murder of a schoolboy, it was "known Communists" and "outside agitators" who were "fanning the flames of fury." Noted address of Progressive Labor Movement, the "Communist splinter group" which published the poster.

Phoned Committee for Nonviolent Action and War Resisters League to see if peace movement doing anything about Harlem. Told that civil rights "leaders" had asked them all to stay away.

After work went to hall of Progressive Labor Movement and got large batch of posters, plus leaflets announcing protest march that Saturday. No charge, but contributed $2.00. Was asked to give them out anywhere outside of Harlem. Refused. Walked home holding up posters, but giving them out only when specifically requested. Half gone on arrival.

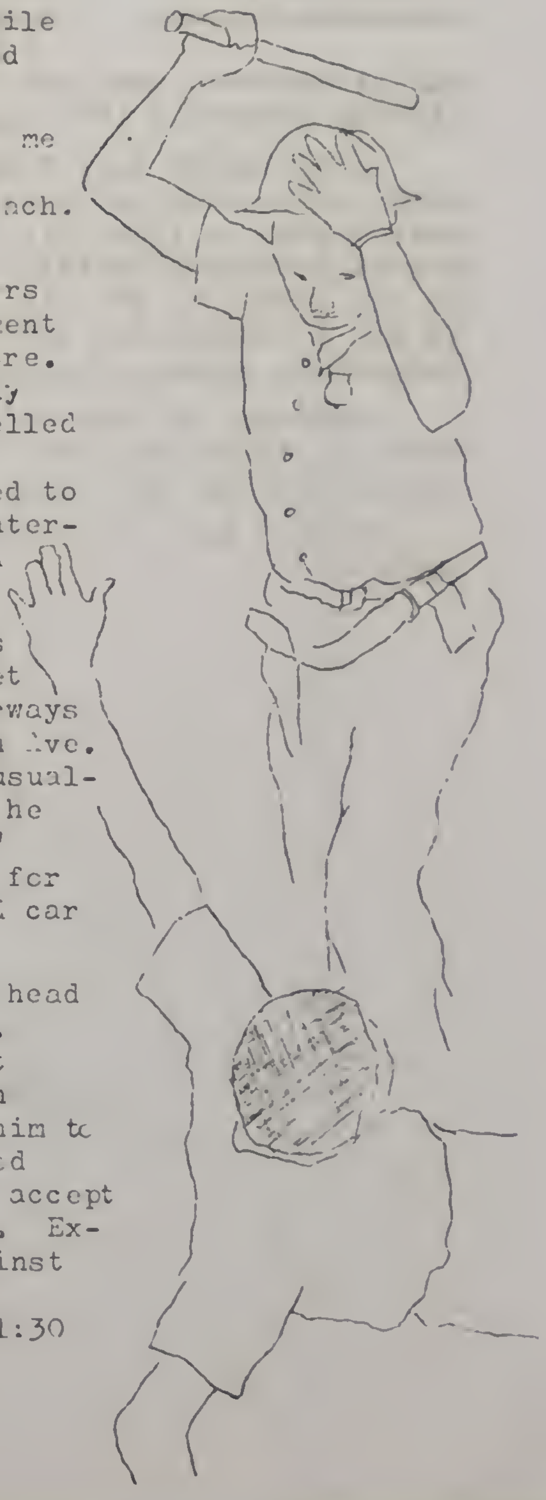
By now had evolved plan of action: nod and smile with open countenance at every one met. Many nodded or smiled back; most didn't notice me at all.

Phoned a few friends. Only one wanted to join me but was tied up at other end of Manhattan. However assured me that mine was "correct" nonviolent approach. Others' reactions mixed.

At 11:00 p.m. pinned "Wanted for Murder" posters on front and back of my shirt with Nuclear Disarmament pins (!) and set out uptown. Felt like William Moore. Everyone asked for posters and/or leaflets. One guy wanted an ND pin too. Around 114th St. two cops yelled "Hey, you." Figured it was all over but they just wanted posters. Game them leaflets also, then tried to shake hands. Was scornfully rebuffed. Woman at watermelon stand asked, "Is you from de CO'?" Refrained from giving opinion of "de CO'."

Leaflets gone by 125th St., but plenty posters left. Intended to join anyone agitating, but street completely empty except for cops sheltering in doorways out of drizzling rain. Walked from 8th Ave. to 5th Ave. and back on 125th St. giving out posters to cops, usually with statement about everyone having to do what he believes in. One replied, "I didn't say anything." Cop wanted a poster "to show my kid"; another, one for a souvenier. Was scared half to death when a squad car pulled up--they asked for ten!

Towards 8th Ave. met same drunk with bandaged head who'd been heckling cops Monday nite. Still drunk. Bought him root beer at corner stand. Learned that "cops"was right" when clubbed him because he'd been bugging them. Hung around for a while, then took him to nearby bar. Still wearing the two posters. Spilled some beer on another fellow's coat but he wouldn't accept payment for cleansing. Bought him a drink instead. Explained how companion seemed to have something against police clubs--bangs his head on them. Walked home letting rain soak off the posters. Arrived about 1:30 a.m.



Thursday
July 23, 1964

Learned a CORE demonstration at downtown Police Headquarters had been mobbed the previous nite. Local neighborhood people--mostly Italians (my compatriots). The friend who had wanted to join me was there. Towards midnite went up to Harlem again. Kept posters folded, not wanting to agitate if everything was quiet. It was.

Hung around 125th St. for a stretch. Saw two white men walk by--first ones not there in obviously official capacity. Later discovered another CORE protest had been mobbed at Police Headquarters.

* * *

Friday
July 24, 1964

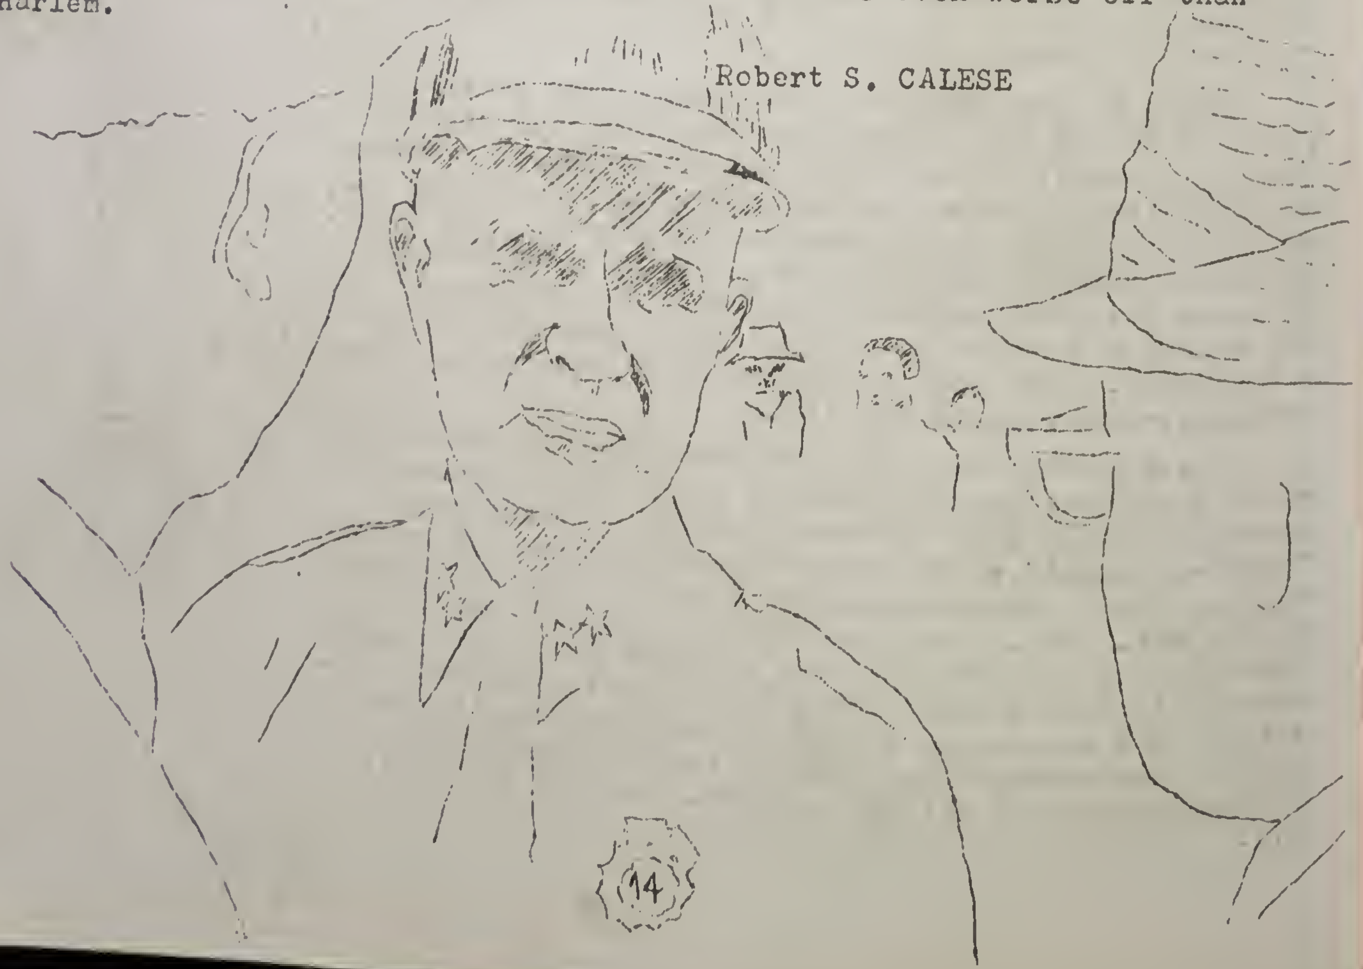
Went to Progressive Labor Movement's hall in afternoon for more posters. Few available--stock low, and being saved for protest march next day. Was asked why hadn't given posters out in Italian district instead of Harlem. Was told it wasn't "sound tactics" to have PLM literature given out in a Negro area by a white person. Also Harlem was already saturated (??) anyway.

About 11:30 p.m. walked uptown accompanied by musician friend. Area still quite dark and very quiet. Police outnumbered people. Stopped for soft drinks at 125th St., then started across towards Lenox Ave. Encountered Bayard Rustin--identified self with, "Met you in London." It was the truth! He was trying to get William Epton (of PLM) to call off the protest march; he had a forthcoming meeting with Mayor Wagner; and he was trying to get an injunction against the police's banning the protest.

Wandered by PLM, but hall was closed. Introduced friend to fish and chips at 125th and Lenox, then dropped by bar on 8th Ave. where bartender asked, "How are you tonight?"

Walked home discussing music business which is even worse off than Harlem.

Robert S. CALESE



HERESY

It is said that one of our substantial citizen-workers bankrupted three Hoboken saloons by eating up all their free lunch. No mercy and no consideration! Another, a pillar of panhandling recites that he has spent the past ten years in jail with practically no lost time between jolts.

The last time he was laying his ropes for a sentence a great hesitation afflicted him. "Finally," he says, "I picked a guy who was snoring heaviest in a chair and sent him head first into the corner. Of course they had to send out and get a doctor to stitch him up and I get six months." But you do not always have to go to such extremes to partake of government hospitality. You can bum the cop for a cigaret. This attracts his attention to you (youre a major attraction now). Very naturally his roving eye follows your footsteps and he struggles to determine if it's a habit with you or merely a flash in the pan.

Later however as the buxom dowager is digging into her purse as she enters a limousine, and hands you half a dollar, the cop is looking over your shoulder and says--"What are you doing; did you bum this lady?" You say, "Officer, you just tend your business and I'll tend mine."

"Come along," sez he, and you're good for 90 days and four bits for tobacco (if the cops don't frisk you).

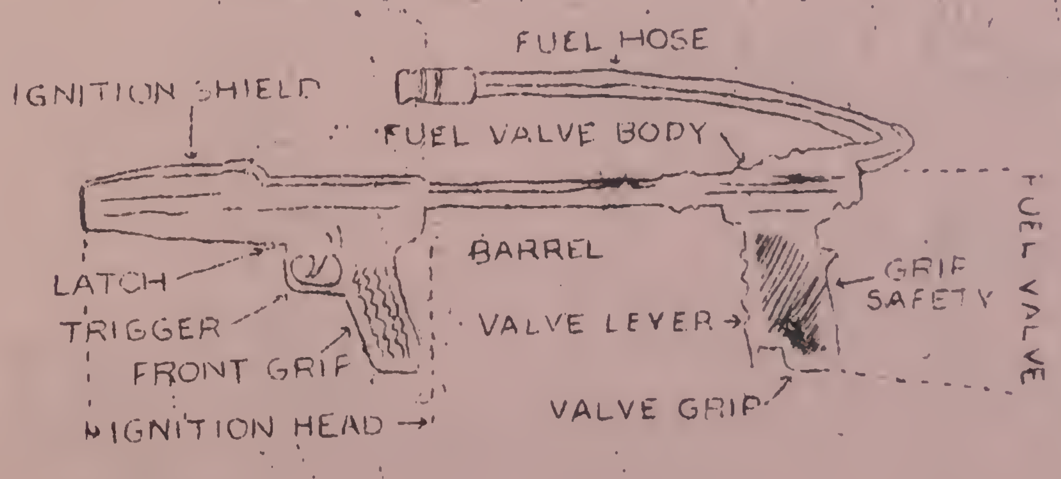
Dammit, they don't respect jail anymore!

All this would be unnecessary did the boys organize industrially and accept of the full product of their working years.

Other bums, economic tramps and intellectual half-wits, are trying to adjust the nation's economy to the proposition of dishing up millions to the few and pennies to the many.

Many choose jail.

T-Bone SLIM

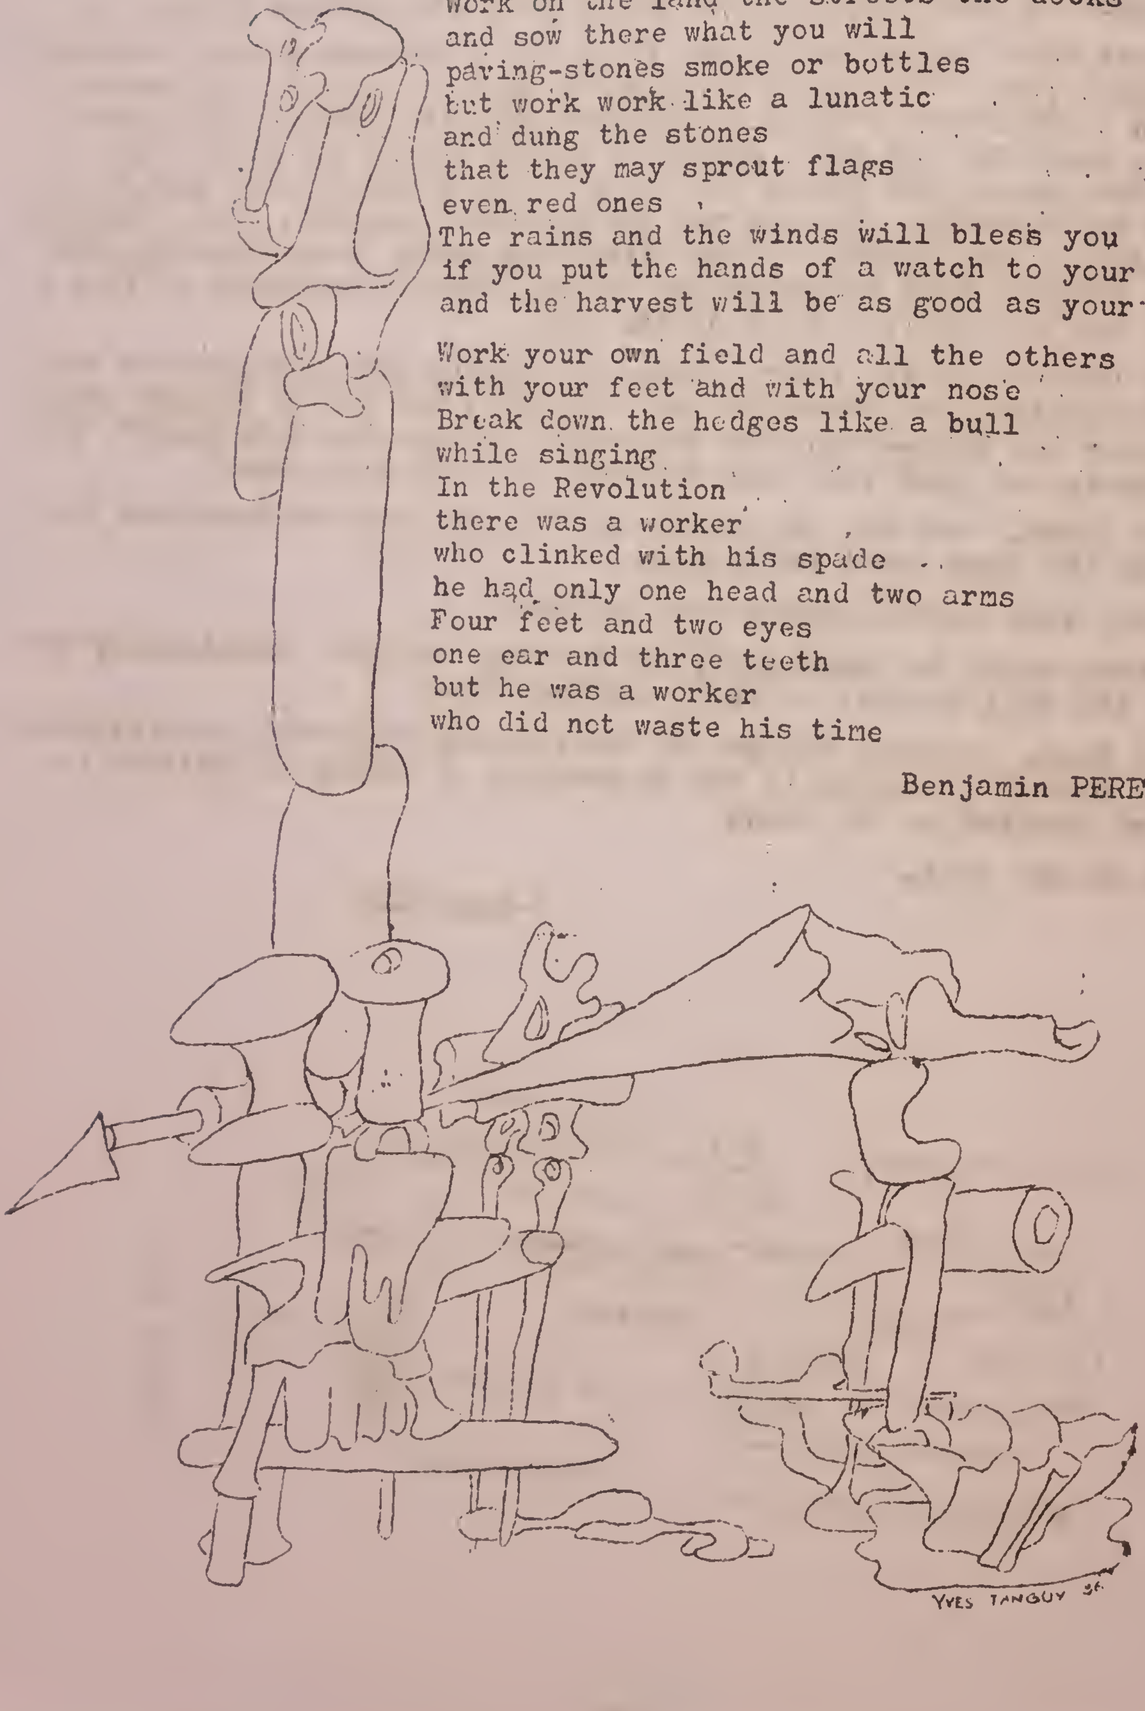


THE FLEAS OF THE FIELD

Work with all your strength
Work on the land the streets the docks
and sow there what you will
paving-stones smoke or bottles
but work work like a lunatic
and dung the stones
that they may sprout flags
even red ones
The rains and the winds will bless you
if you put the hands of a watch to your ears
and the harvest will be as good as your wife's stew

Work your own field and all the others
with your feet and with your nose
Break down the hedges like a bull
while singing
In the Revolution
there was a worker
who clinked with his spade
he had only one head and two arms
Four feet and two eyes
one ear and three teeth
but he was a worker
who did not waste his time

Benjamin PERET



Mods, Rockers & the Revolution

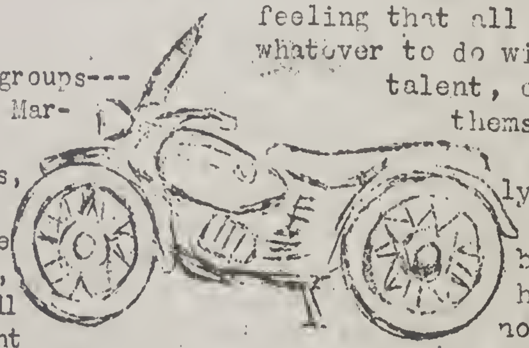
Wobblies, and true revolutionaries in general, are much less interested in the vague longings of college professors and Nobel prize-winners for a "better world" than in the day-to-day struggles of our fellow workers, not only the direct struggles against exploitation by the bosses, but the struggle to live some sort of decent life against all the obstacles presented by a society divided into classes. Thus it is essential that we concern ourselves not only with the job situation and economic questions (though those, of course, are the major issues) but also with more "superstructural," anthropological factors: working class culture.

In this connection, the significance of rock'n'roll, and popular adolescent culture in general, has for too long been ignored. That rock'n'roll is one of the most important working class preoccupations (among the young, at least) is clearly evident. That it has been ignored in the "Left" press is additional testimony to the isolation of the "socialist" intellectuals from the class in whose name they so often enjoy speaking. Certain unfortunate souls, including many of traditional "Left" orientation, have attempted to deny that rock'n'roll is really a workingclass phenomenon, even suggesting that it is *imposed* (!) on working class adolescents by Madison Avenue, etc., as a form of exploitation through cheap talent, record sales, and juke-boxes. To them rock'n'roll is a sign only of the "decadence" of contemporary capitalist society. They can neither take it seriously as a form of music, nor see in it anything other than a possible "reliever of tensions" which they feel might better be expressed in more constructive activity. Thus Marshall Stearns, in *The Story of Jazz*, thoroughly puts down rock'n'roll as a form of music but claims that by offering "release" to anxious kids it actually contributes to the decrease of juvenile delinquency. This rather uneasy, semi-intellectualized, patronizing, anti-rock'n'roll "theory" is, amusingly enough, shared by Stalinists, liberals, Presbyterians, conservatives, fascists, bourgeois sociologists, etc.

We must have done, once and for all, with this kind of evasive excuse-mongering, and look at the situation as it really exists. Rock'n'roll must be recognized not only as a form of music (which, for its players and its listeners, is clearly as "serious" as any other) but also as an important expression of adolescent preoccupations.

As music, rock'n'roll is certainly "primitive," but this must not be assumed to mean that it is therefore inferior. No one is less able than musicologists and other prisoners of academic limitations to situate this problem into its proper context. For the importance of rock'n'roll lies not only in the music itself

but even more in the milieu which has grown up with it. It is characterized above all by delirious enthusiasm, a frenzy which is no stranger to tenderness, which undoubtedly appears scandalous to the easily-outraged watchdogs of bourgeois morality. Much could be said for the influence of rock'n'roll on the emergence of a new sensibility (intellectual as well as erotic and emotional). Much could be said, too, of its unconscious quality, which, with its roots in automation (and thus in the class struggle) lends to it its "subversive" aspect. For rock'n'roll is, more than anything else, a latent cultural expression of automation. Indeed, a study of the psychoanalytical and anthropological implications of automation might well make rock'n'roll its point of departure. Witness the fact that almost all of the popular rock'n'roll groups are from the most highly automated cities: in the United States, Chicago and Detroit; in England, Liverpool, where one out of every fifteen "Liverpudlians" between the ages of 15 and 24 now belongs to a rock'n'roll group. As for those sad people who insist on dividing rock'n'roll into "white" and "Negro" varieties (which, like all oversimplifications, says nothing), I prefer to let them choke on their own banalities. That there are differences between Negro rock'n'roll (or rhythm and blues) and white rock'n'roll is obvious to even the most casual listener, but too often these categorizations are used to justify rock'n'roll for Negroes (because of its derivation from blues) and discredit it for whites (who are supposedly without "cultural foundation" in it). But rock'n'roll cannot be explained away in strictly racial terms. The influences of automation and an increasingly complex urban environment are far more significant.

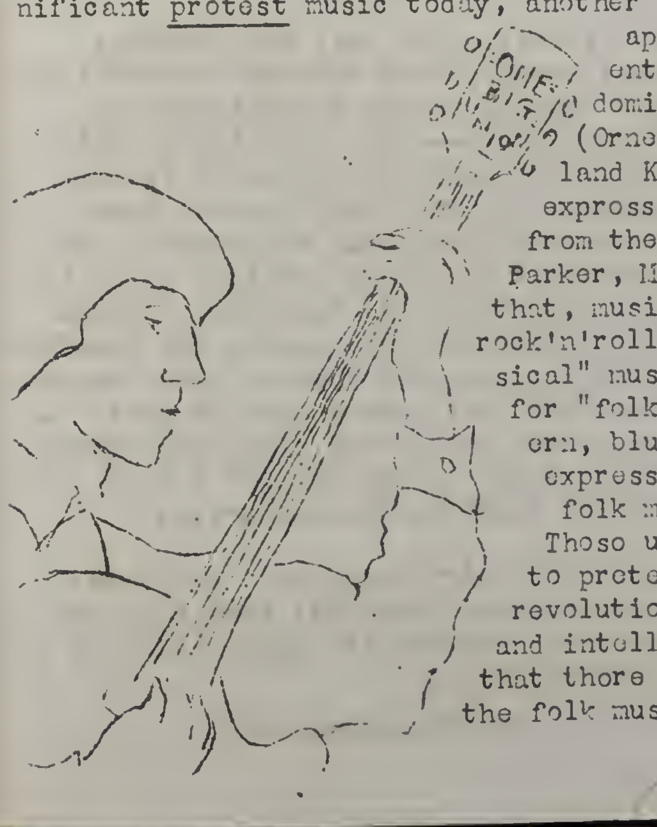


The best of the new groups---Martha and the Vandellas, Marvin Gaye, The Jewels, The Velvellettes, The Supremes, Mary Wells (all from Detroit), and The Kinks, The Zombies, Manfred Mann and, of course, The Beatles (all from England), have brought to popular music a vitality and exhuberance---and a rebelliousness---which it has never seen before. The Beatles, more than any other group, have brought the sociology and anthropology of rock'n'roll into the prominence they deserve. The Beatles are the most successful group in entertainment history. Their flippant replies to interviewers, their wild, raucous behavior, their riotous and insulting sense of humor remove them far beyond the pale of "respectable entertainers." Their first movie, *A Hard Day's Night*, will remain one of the greatest cinematic delights of 1964, a lone cry of uninhibited freedom and irrationality in a cold wilderness of "seriousness" and pretentiousness. The legendary quality, which can almost be called *mythical necessity*, of The Beatles, has not failed to attract the critical attention of some more perceptive commentators. Consider this judgement from the pen of Jean Shepherd, who interviewed The Beatles for *Playboy* magazine (February 1965): "In two years they had become a phenomenon that had somehow transcended stardom---or even showbiz. They were mythical beings, inspiring a fanaticism bordering on religious ecstasy among millions all over the world. I began to have the uncomfortable feeling that all this fervor had nothing whatever to do with entertainment, or with talent, or even with The Beatles themselves. I began to feel that they were the catalyst of a sudden world madness that would have burst upon us whether they had come on the scene or not. If The Beatles had never existed, we would have had to invent them. They are not prodigious talents by any yardstick, but like hula hoops and yo-yos, they are at the right place at the right time, and whatever it is that triggers the mass hysteria of fads has made them walking myths. Everywhere we went, people stared in openmouthed astonishment that there were actually flesh-and-blood human beings who looked just like the Beatle dolls they had at home. It was as though Santa Claus had suddenly shown up at a Christmas party."

Another British group, The Rolling Stones, has risen to popularity more recently, bringing with them a more disquieting, more sinister, more violent attitude into the rock'n'roll arena. The Stones are significant, too, because they are the first major British group to devote themselves entirely to the rhythm-and-blues side of rock'n'roll.

It is in England today where the adolescent revolt (of which rock'n'roll is only one, albeit the most important---culturally speaking---constituent element) seems to have assumed its largest proportions. In England the kids are categorized into two "tendencies:" Mods, fashionably (often bizarrely) dressed, and who are associated with motor-scooters; and the Rockers, who prefer black leather jackets, bluejeans and motorcycles. In both cases the boys wear their hair long, considerably longer than in America, and (according to a New York Times writer from Britain) "the word in London and Liverpool is that male hair is going to get longer and longer." (The girls' hair is usually straight and worn down to the middle of the back.) The hair itself deserves comment, particularly since long hair is growing in the United States as well as in England and elsewhere in Europe. The social implications of hair fashion have been inadequately studied, if studied at all. Some psychologists and sociologists have confined themselves to brief, unexplained remarks on "sexual confusion," "identity problems," and the like, which help very little. Others, it is true, have gotten a little closer to the heart of the matter, but without by any means being thoroughgoing in their analyses. Thus the New York Times writer referred to above mentions that "the sociologists, always a pessimistic lot, look on our jungled tresses and prophesy a future filled with indulgence and rebellion." For it is an undeniable fact that short male hair has always been a characteristic of submission to authority. The police, prisons, the army, schools, and employers are all in agreement in insisting upon short hair and regular haircuts. Also, crew-cuts are the symbol, almost, of the Goldwater menagerie. Before making unfounded judgements on the "identity problems" of today's kids, one might consider the problems of a culture so obsessed with keeping male hair short.

The riots and brawls of the Mods and the Rockers have also called attention to another aspect of the rock'n'roll revolt: that rock'n'roll represents the only significant protest music today, another reason why it deserves study and sympathetic appreciation by revolutionaries. Jazz has entered the colleges, become respectable and academic. Developments in jazz of the last few years (Ornette Coleman, Eric Dolphy, Charlie Mingus, Roland Kirk, etc.) are evolving into a form of musical expression (the so-called "Third Stream") far removed from the obvious protest character of, say, Charlie Parker, Monk and Coltrane. (It is useless to point out that, musically, jazz is ten thousand times superior to rock'n'roll: this is not the point.) Contemporary "classical" music is strictly limited to the academies. As for "folk" music and its derivatives (country-and-western, bluegrass, etc.) these have become the official expressions of today's college fraternities. (Real folk music is primarily of historical interest.) Those unhappy souls of the traditional "Left" who try to pretend that the "folk revival" has some sort of revolutionary content reflect only their sentimentality and intellectual superficiality. I do not mean to imply that there is not much that is beautiful and important in the folk music tradition, and certainly it deserves serious



study. But it can no longer be assumed to have anything to do with the contemporary working class. At any rate, working class kids are bored by it.

The rise of the Mods and the Rockers indicates to some degree a rise of young rebellion everywhere. (One could mention the "new youth" of Tokyo, Berlin, Moscow, etc.) This inevitably provokes innumerable journalistic treatises on "new parents, teen crises" which appear monotonously and repetitiously in various Sunday supplements. These articles, of course, contribute nothing of importance to the understanding of the contemporary adolescent, though they do shed a little light on the problems and preoccupations of adults. Often more repressed adults, attempting to analyze younger people, merely project their own problems. Afraid themselves, for instance, to participate in uninhibited dancing, they approach the question with their repressed presuppositions that there is something *wrong* with this kind of dancing, that it must be rooted in deep emotional anxiety, etc. I do not mean to say that these dances are expressions of "freedom" in any absolute sense (in particular, the lack of physical contact between dancing partners is problematical and deserves further investigation). But we cannot advance one step in our understanding of these problems if we begin by saying that the kids are wrong.

There can be no doubt that the present development of rock'n'roll, and the milieu of young workers in which it thrives, is more consciously rebellious than it has ever been before. But to be *revolutionary*, of course, is to be more than rebellious, for a revolutionary viewpoint necessarily includes some sort of *alternative*. And popular adolescent culture is pregnant with revolutionary implications *precisely* because it proposes alternatives (although crude, undeveloped and unconscious) to the ignoble conditions now prevailing. Songs like "Dancing in the Streets" by Martha and the Vandellas and "Opportunity" by The Jewels show that the feeling for freedom and the refusal to submit to routinized, bureaucratic pressures, are not confined to small, isolated bands of conscious, politically "sophisticated" revolutionaries. They are the almost *instinctive* attitudes of most of our fellow workers in industry. Presently these feelings are to a great extent repressed, and are sublimated into bourgeois politics, baseball, television, etc. It is our function as disrupters of the capitalist system and union organizers to heighten consciousness of these feelings, to encourage rebellion, to do all we can to liberate the intrinsically revolutionary character of the working class. Rock'n'roll, which has already contributed to a freer attitude toward sex relations, can contribute to this liberation. I must point out that I refer to the more raucous, "primitive" rock'n'roll (as performed in the U.S. generally by ghetto Negroes) rather than the lukewarm, diluted versions of discotheque and of older professional musicians who feebly try to play it.

There is no use being overly romantic about all this. I do not, for example, think that adolescent hangouts and record hops will provide very fruitful recruiting grounds for the One Big Union; at least, not right away. But what revolutionaries must consider is that many younger workers---rock'n'rollers---are discontented with existing society, and are seeking and developing solutions of their own. If traditional revolutionary politics hasn't appealed to them, it's probably because those politics haven't been as "revolutionary" as their protagonists like to pretend, and once again we notice the utter bankruptcy of traditional socialist politics among the workers. We in the IWW are not tied to theoretical traditions and immovable dogmas. We are rising today because we are free to seek new solutions and develop new tactics to meet new situations. If we are going to keep growing, we will have to turn more to the problems of younger workers. It might be noted that jobs most common to kids (stock work, filling station work, store clerking, etc.) are almost completely unorganized and offer us a splendid opportunity to channel the "youth revolt" into a consciously revolutionary movement. The sooner we get started, the better....

In any case, we cannot go on assuming that the rock'n'rollers are a helpless, ignorant, reactionary mass; that their problems are not our problems; that they are somehow "irrelevant." We must recognize that they, too, despite the hesitations of a few "socialist" puritans, are our friends and fellow workers.

Franklin ROSEMONT

SELECTED REFERENCES on the Subject of the Preceding Article

"The Beatles are avowedly non-political. But their music, and the craze that they have started, is blatantly subversive. On the surface it is brash, and by our conventional standards, uncivilised. But it revels in gaiety and abandon. If the Beatle people have rejected the drab world of adult responsibility and obscure political squabblings, it is because they have formed for themselves--in the dance halls, at parties and even just singing in the streets--a revoluntionary alternative to this world. If they can find laughter and enthusiasm on their own, even for just one evening a week, then the efforts of the politicians become irrelevant."

Richard Mabey
(Peace News, 20 December, 1963)

"You'll never be able to convince the Beatleboys that some cities in America aren't police states, for they were in them. You'll never convince them there's no such thing as police brutality, because they saw it. If you talk about news censorship to the Beatleboys, they can recall complete news blackouts covering some cities, with authorities making pacts with deejays and news editors to keep news from Beatlefans."

(Teenville, January, 1964)

"In Bournemouth 1000 Beatlefans stormed the Winter Gardens to get tickets. In Carlisle 600 beatlefans started a baby beatleriot and smashed windows. In Hull 2000 beatlefans swept aside police and crush barriers in a beatleriot and in Cambridge 2000 beatlefans took up the full width of the road and started throwing bottles through church windows. Two nights later the Beatles themselves were amorously assailed on stage in Stockholm and 7000 Newcastle beatlefans held another beatleriot.

"We should be beyond consoling ourselves that the Beatles and their fans are neo-fascists or sub-human twits; we should be beyond putting them away in the back of our minds with the teddy bears and forgetting them an peripheral to our ideas. The point is that they are not peripheral. The beatlefans, the mods, the rockers, the ton-up kids are people with ideas of their own. If anarchism has nothing to say to them it has nothing to say at all."

Charles Radcliffe
(Freedom, 16 November, 1963)

"...(The Rolling Stones') appeal is in the symbol they represent: a teenage rebellion against society, authority, convention and parenthood. Stated Variety, 'The Rolling Stones decidedly is not a bunch of cleancut youngsters out to make a buck from innocent kids. ...this group is tapping a Freudian vein of savagery and malignancy.... In Cleveland...their appearance...resulted in a call for police reinforcements to help get the group out of the studio. Pebbles (Rolling Stones fans) were everywhere! They literally came out of the radio station's woodwork, having hidden out hours before in the ladies' and men's rooms, under stairways, in cleaning closets, between buildings, on fire escapes. It was a human stampede of Pebbles that was as surprising as it was exciting to see. Cleveland broadcasters had never seen anything like this in their entire history! Hurrah for teen rebellion! Hurrah for the Rolling Stones!

(Teenville, January, 1964)

"There was a party (celebrating the Beatles' return to England) in the Dorchester Hotel, and the princess came. So did Brian Jones and Keithe Richards, two members of the popular new quintet called the Rolling Stones. The party was formal, with gowns and black ties, but Jones and Richards were wearing turtleneck shirts. "Isn't this the greatest party crash of all time?" said Jones. The Rolling Stones latest record, It's All Over Now, had just hit the top of the British pop-record charts, and the Beatles came to congratulate them with a glass of champagne. A society orchestra was trying to play rock-'n'roll, but not even the dancers were listening to its eviscerated beat. An elderly woman came up to John and said, "You're simply darling.'

"Can't say the same for you, Luv," John replied. Later, as the party broke up, he told her, "Good night, Mrs. Haitch. We'll dance again some Somerset Maugham," Meanwhile a crowd of begowned autograph hunters were besieging the Rolling Stones. Brian Jones was still signing his name when the orchestra began playing God Save the Queen. "Stop it.."a diamond-necklaced woman at his table commanded sternly. He kept on signing. "Stop it!" she commanded again, this time with the fury of the empire in her voice. Jones stopped signing and picked a woman's scarf which was lying on the table in front of him. Slowly, to the solemn tones of the music, he wrapped it around his neck. When the orchestra came to the final verse, an off-key voice at the front of the ballroom shrieked out the word "save" from God Save the Queen. It was John Lennon (of the Beatles), and what he actually had sung was, "God s-a-a-ve the cream."

Alfred G. Aronowitz
(Saturday Evening Post, 8 August, 1964)

They don't even say that they play Rhythm and Blues, in fact, the purists will say they don't. But what they play is a wild, valid defiance of convention and society.

"Parents are beginning to like us now. We'll have to be a bit more repulsive. But that's not so hard for Keith," said Brian.

Whenever they come on stage, most people evacuate the seats and charge to the front. You can never tell if they're Stones' fans trying to get a better view or Stones-haters trying to get the cops to stop the show.

(The Crazy World of England's Rolling Stones
No. 1, Summer, 1964)

The Rolling Stones are more than just a group. They are a way of life.

Andrew Loog Oldham
(Liner notes from The Stones' first album)

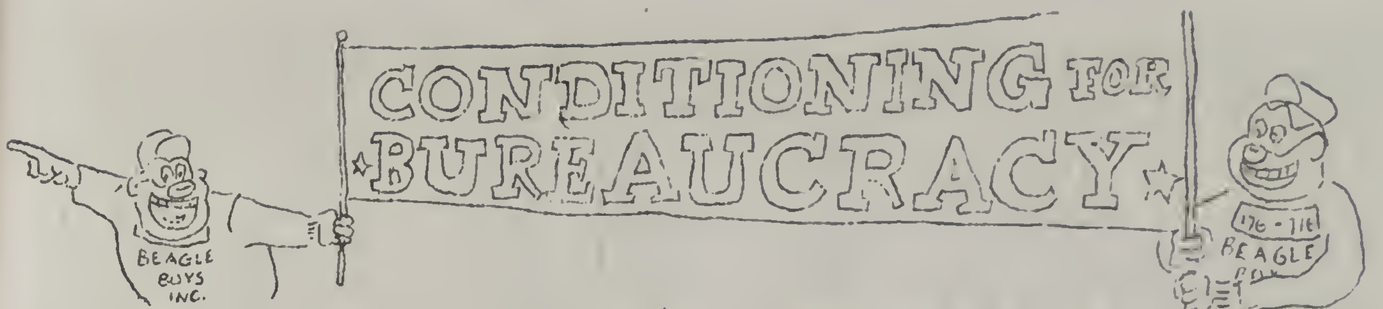
CONDITIONING FOR BUREAUCRACY



It is the dilemma of all children coming into a society that is highly structuralized, bureaucratized, segmented, and regimented, to find their place, feel they belong, satisfy their need to change, re-evaluate themselves, understand their world and feel comfortable in their relationships with others. Max Weber pointed out it is the ideal of every bureaucracy to have each individual performing assigned duties in an efficient, machine-like manner as set forth in a table of organization. Perhaps there may be an informal organization which modifies and runs counter to the formal organization, but still when a person joins a given organization, much of his behavior is defined and proscribed. Unless he conforms, at least within limits , he will not be able to retain his position. A nation's way of governing its people is translated down into distinct influences on individual human behavior. Such is the case when a child joins a "boys club."

The main purpose of boys clubs is to condition children to a regimented bureaucracy. Nowhere else is this so evidently the case.

A club consists of a director, an activities director, an assistant activities director, and instructors for gym, arts & crafts, wood shop, and the games rooms, in that order. It is the job of each of these officials to supervise and control the particular area to which he is assigned, since the club is separated into distinct units or areas.

When a child comes into the club, he is asked to fill out a long questionnaire (usually assisted by the secretary of the director), asking questions about his age, religion, race, family background, health, etc. He then receives an identification card with the instructions to wear it around his neck. (This makes him feel as if he belongs.) He is then assigned to a group according to his age & sex, i.e., Rangers, Props, etc., with preassigned times for preassigned activities for preassigned days. When his time has come for arts & crafts, no matter where he is or what he is doing, he is forced to run to his new activity as quickly as possible. He is not to eat his lunch until a preassigned time. He has one hour for this activity but if he finishes early he must sit and wait.

If he wishes to play a particular game during "game time" and there are not enough games to go around, he must sign a list to determine his turn, and is given a specific amount of time to play when that time comes.

In arts & crafts, wood shop and gym he is allowed to do only the assigned task for the day. If he does not cooperate he is sent out of the club with instructions not to return until he is willing to cooperate.

The summer brings new activity and the days are designated "beach day," "trip day," "park day," "show day," etc. Transportation to these activities usually involves walking or taking a hired bus. Walking procedure is done in this fashion: First the kids are divided into two's in the gym which involves separating the "trouble makers" and placing them in more controlled positions closer to the instructors (or, as they are called, "leaders".) They are then marched in two's to their destination. At a given time they eat and after each piece of paper is picked up and the grounds are inspected they are allowed to go about the assigned activity. A whistle sounds to indicate "home time" and they march back to the club begins in the same fashion.

The decisions as to where the kids will go and what they will see and do is entirely decided by the activities director who is responsible to the director who is responsible to the board downtown. The director's position is dependent upon three factors: the amount of money he brings into the club, the number of mem-

*

I have just finished reading your great journal The Rebel Worker. We in England have possibly an easier task in obtaining "left" literature than you in the U.S., owing to our lack of McCarthyism, which I understand still lingers in the States.

The journal is fresh and hardhitting; like Solidarity it is no respecter of "the traditional Left" and bricks are more often thrown than bouquets. More power to your elbow.

I personally would like to read more about the Negro struggle for equality and the U.S. Left's opinion of the Black Muslims & why such an obscenity as Goldwater has been spewed up.

Tom Hillier, AEU
(Amalgamated Engineers Union)
London, England

*

I bought the first two issues of The Rebel Worker when I was in Chicago, and I think it's great! I think you could really get a big circulation---I have no idea how many people read it now---because it's about the only thing around with a good viewpoint that is really well done.

Judith Kaplan
Philadelphia, Pennsylvania

We read your Rebel Worker with interest and have forwarded to you copies of our own Broadsheet, which we will continue to send. Your letter coincided with our annual camp at the beginning of September, and received wide circulation. At present we would be able to distribute copies of the Rebel Worker ourselves, if you would care to send on a few of each issue.

The radical movement here is considerably fragmented. A strong anarcho-syndicalist influence has persisted in a few trade unions, notably the wharfies and seamen; however, other pressures are growing stronger and only a week ago the Communist secretary of the Seamen's Union, in return for a substantial wage award increase, relinquished the right of the union to man ships. However, in the Waterside Workers' Federation, job control is flourishing. Many other unions are frankly right-wing, out for wage increases at all costs. Official Communist Party policy is to defend the arbitration court (from which militants in the WWF, Seamen's Union and Building Workers Industrial Union want to de-register) and counsel moderate attitudes so as to "influence" the moderate unions for purposes of solidarity. Hence the defection of the Seamen's Union leadership.

There is a lot of interest among students and young people in CND, anti-election campaigns and so on, but the society as a whole is complacent.

Ian Bedford

Received #2 of The Rebel Worker. In reading it we noted with pleasure the revival of activity of the IWW. We wish you a good continuation in this course.

(Continued on next page)

CONDITIONING FOR BUREAUCRACY (CONTINUED)

bers he is able to obtain and statistics as to the number of activities in his particular club. When on one occasion a staff member organized a union consisting mainly of teenagers to make decisions about their own activities, this staff member was immediately fired because it was claimed he was "making trouble."

However, the effectiveness in conditioning these children for bureaucracy is somewhat questionable. In the summer when it's possible for kids to find enjoyment without this structure the membership drops to about one-third. But there are other indications that the effects could be greater than can be judged by the membership rate alone. Some kids tend to develop a driving lust for power and control. This may take the form of working hard to be accepted into the "junior leader" program, or of pushing other kids around when one feels he can safely do so.

Many more things could be said pertaining to the system of the club and the incidents which go on every day; and much more could be said about the effects that all this has upon the individual child. In the case of the boys club even more than in school children are every day subjected to a bureaucracy through manipulation of the activities they enjoy most. The effect tends to be stronger because they do not hate the "club" as they do the school and they adjust and condition to it much more voluntarily. The club is associated with play whereas the school is associated with forced work; thus the former is more desirable than (and even a relief from) the latter. Even in cases where the kids do not voluntarily come to the club, it is often the case that parents in their own struggles with the present system find it convenient to send their children to the boys club for free babysitting.

The inherent danger of such an organization cannot be easily overlooked. A system that has found it necessary to control and regiment the behavior of its adults has now realized the necessity of training for this control long before adulthood.

Robert R. GREEN

LETTERS (CONTINUED)

...the revolutionary movement in the United States is a question which is very little known here and would certainly interest ourmilitants and our readers.

Federation Anarchiste
Paris, France

*

Enclosed find the STRIKE loaflet (of the recent Berkeley Student Strike); we do not know who the author was; however, when it hit the streets, Gov. Brown called in an army of police and announced that he would not tolerate ANARCHY in California as long as he was Governor. Nearly 800 students, teachers and workers were arrested in a desperate attempt to smash our General Strike at the Education Mill. The Governor's move boomeranged. IBM machines ground to a halt. Classes were cancelled or empty. 12,000 students and workers manned the picket lines, collected funds, coordinated, directed and won the greatest victory over the combined forces of State authoritarianism in anyone's memory.

Among the arrested were two IWW organizers and several rank-and-file members. IWW tactics and slogans (notably: "An Injury to One is an Injury to All") were tried, tested and proved true.

The Chancellor and the Regents, stunned by the demands for student and faculty control of "their" university, were completely routed. The powerful academic senate (composed of the entire professorial staff) voted overwhelmingly to support the student demands. The Regents are in a tough spot. They must either concede to the student & faculty demands...or face what Gov. Brown claims is Anarchy. The Strike goes on.

The activities of the IWW in the Bay Area including our participation in the General Strike at the University of California have brought us into increased prominence. The SF city jail is once again covered with Wobbly stickers. The daily press slanders us. The bosses jail us. The scabs & finks fear us; but most important, spirited, rebellious, and responsible students and workers are JOINING our movement. The American labor movement is being rebuilt.

Alan Graham

Berkeley, California

STORMING HEAVEN IN HUNGARY

What actually happened in Hungary in 1956 is not known to the majority of American workers. Those who read the average daily voice of the employing class probably have the impression that the Hungarian Revolution was bourgeois-democratic and that the Hungarians fought to gain "freedom" in the capitalist sense of free enterprise. Meanwhile, Stalinists have found it necessary to "prove" that the Hungarian Revolution was "fascist inspired." In the Solidarity Book Hungary 56, Anderson explains both these points of view in terms of the ideological necessity from which they grew. It was essential to their own preservation that the capitalist countries conceal the nature of the Revolution. And the best answer to the Stalinist's silly charge is provided by the satirical humor of the Hungarian workers themselves in the form of crude posters: "Ten million counter-revolutionaries at large in the country!" and "Former aristocrats, land and factory owners, Cardinals, Generals and other supporters of the old capitalist regime, disguised as factory workers and peasants are making propaganda against the patriotic government and against our Russian friends." Anderson's book is the only one available which allows the reader to see the Hungarian Revolution as it was--a spontaneous revolutionary uprising of the working class.

In the first 18 pages Anderson describes the situation prior to the demonstrations of October 23, beginning with the East-West agreement at Yalta and the Russian domination of Eastern Europe. He then gives a clear account of the specific events and demands of the workers during the days of the Revolution. He explains why the Kremlin crushed the Hungarian workers, and why Hungary received no aid from the West. The Hungarian Revolution should be distinguished from all other revolutions of the past and also from those presently occurring in Africa, Latin America, and Asia because it occurred in a modern industrial country dominated by a bureaucracy. The Hungarian Revolution was the rising of the workers against the exploitation of the bureaucratic state. The functioning of the bureaucrat "elite" was halted by the formation by the workers of workers' councils, followed by a general strike. "From the first day of the revolution, a truly proletarian movement had expressed itself ... These councils, partially isolated by the Red Army, immediately sought to federate. By the end of the first week...only their authority meant anything. The Government...had no authority whatsoever."

Students and intellectuals played a significant but somewhat confused role. The Revolution began essentially with the government rejection of student demands for reform. However, the workers realized much sooner than the students that bargaining with bureaucracy is impossible and took the iniative in organizing councils. The Hungarian Revolution failed to receive aid from the West or concessions from Russia because its demands of workers' management of production threatened the bureaucratic and class-divided foundations of both. It "was far more than a national uprising or than an attempt to change one set of rulers for another. It was a social revolution in the fullest sense of the term. Its object was a fundamental change in the relations of production..." Hungary 56 is a book which everyone ought to read, especially those who still believe it possible for the working class and the employing class (even if the "employing class" disguises itself in socialist rhetoric) to have something in common.

Penelope ROSEMONT

Hungary 56 by Andy Anderson. A Solidarity Book. Paperback; 48 pages. 75¢

The I.W.W. is Dead! Long Live the I.W.W.!

Rebel Voices is a large (9" x 11"), 419-paged, profusely illustrated anthology of manifestoes, editorials, magazine articles, songs, poems, anecdotes, photographs and cartoons culled from fifty-nine years of the Wobbly press. All in all it's a very enjoyable book, and every IWW member can certainly spend quite a few pleasant hours reading through it.

...

Probably the worst thing about the book is its price, which automatically places it beyond the reach of the very people at whom the Wobbly revolutionary message has always been directed. I doubt if this book is going to find its way into many working class libraries. For the most part it's made-to-order for folkheaded liberals who get all sentimental about the IWW ("Oh, yeah. International Workers of the World.") and amuse themselves singing "Solidarity Forever" over their bourbon on New Year's Eve. In a way, the publication of this book, and the "fashionableness" of the Wobblies of which it is indicative, is just another way of burying the truly revolutionary (and contemporary) significance of our union. Whoever would have thought it possible that employing class writers and publishers could make a profit on a book about the IWW?

The book is not without other faults. It is, of course, almost totally nostalgic-historical in its approach. The IWW is a thing of the past, etc. A nice old thing and all that, but now just a relic, a "cantankerous curio," as a New York Times Book Review critic wrote in his review of this book. Etc., etc., etc. It's significant, I suppose (if one wants to be ironic) that at the time this book is being put into the bookstores, the country is witnessing a reanimation of IWW activity that has already resulted in two strikes, the opening of a new hall and IWW bookshop in Chicago, the appearance of two IWW journals (and a third---Black Cat---soon on the way), and in appreciable recruitment and agitation in various industries all over the country. If we're dead as an organization (and Rebel Voices pretty much gives that impression), then we're surely the most active and growing dead group around.

The selections are mostly very good, and the editor's biographical and historical prefaces and annotations are usually helpful. I would have personally have preferred to see a little more by T-Bone Slim (certainly the greatest of the Wobbly writers), as well as something by Mary E. Marcy, a revolutionary economist whose articles often appeared in the IWW press. Throughout the anthology the emphasis has been on IWW activity rather than theory, and there is nothing particularly wrong with this. Two of the greatest IWW strikes ---Paterson and Lawrence---are covered in detail in separate chapters. There is also a chapter on the Free Speech Fights, and a selection of works by Fellow Worker Joe Hill, including a beautiful article, "How to Make Work for the Unemployed," which we hope to reprint either in The Rebel Worker or in some sort of "direct action" anthology. There are also chapters picturing IWW organizational activity in various industries: agriculture, lumber and mining, though for some reason there is no chapter on the marine transport industry, in which the IWW made some of its greatest efforts and still serves as an active influence. Such an omission is not so bad in itself. But it's somewhat misleading, to say the least, to imply that the IWW functioned as a union only in non-urban industries (as Miss Kornbluh does by her selections). We need only mention IWW organization in the metal machinery industry (particularly in Cleveland); the automobile industry (in Detroit); restaurant work; the railroad industry; packinghouse work; and also the

---

Rebel Voices: An IWW Anthology, edited, with introductions, by Joyce L. Kornbluh. Ann Arbor, The University of Michigan Press, 1964. 419 pages. Cloth bound. $12.50.

IWW Unemployed Unions organized in major U. S. cities during the Panic of 1929-35, to dispel any illusions about the so-called organizational "failures" of the IWW -- among urban industrial workers.

I also feel that no work calling itself "an IWW anthology" can present our union in its proper perspective without at least offering a sampling of its influences and activities in countries other than the U.S. IWW unions were organized in Australia, South Africa, Mexico, Chile, Sweden, Great Britain, Canada and other countries. Some of these, it is true, were skeleton organizations with minimal popular support, but it is no less true that others (in Australia and Chile, at least) were real mass movements which united the revolutionary aspirations of thousands of workers in their struggle for emancipation from wage slavery. (Small IWW branches, it might be noted, still exist in Australia, Sweden and Canada. Who knows...they too may once again experience a rebirth of activity as the IWW continues to spread its influence.)

Also, in this connection, more should have been said and anthologized by Miss Kornbluh of the numerous IWW foreign language branches and publications existing in the United States. Immigrant workers, customarily ignored or spurned by the reactionary AFL craft unions, found in the IWW a real union, fighting for the best interests of all workers, and poured into it the heart and soul of their collective resources. To have omitted a detailed discussion of these international aspects of the IWW is to misrepresent it as a national organization, confined to the boundaries assigned by the U.S. State Department.

Miss Kornbluh, however, can hardly have been expected to be too objective about these matters. The Jacket of Rebel Voices tells us that she "has written for the CIO News and the AFL-CIO News" and (best of all) "the CIO Political Action Department." (!) Perhaps her experience in the official "labor movement" is also what caused her to omit from her anthology any critical discussion of the CIO from the IWW point of view. The IWW press of the time contained innumerable articles on this subject, republication of which might prove embarrassing to our "labor leaders."

In spite of these deficiencies and omissions, Rebel Voices remains a valuable and much-needed work. Some day soon I hope we can put out our own Wobbly anthologies for a dollar or two. Till then there's this one, and if you can afford it (or look it up in the public library) it's quite nice to read through. But it would be a hell of a lot nicer if you could get a copy without putting money into the hands of the exploiting class.

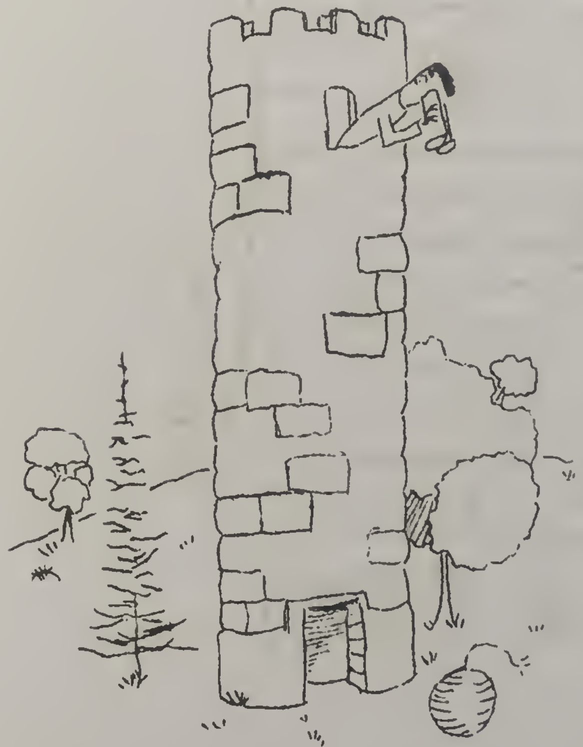
ANARCHISM as seen from an IVORY TOWER through opaque lenses

Anarchists, unfortunately, are in no position, financially, to re-publish rare anarchist classics or to publish inexpensive paperbacks for mass distribution. Until that day arrives we must be saddled with the likes of The Anarchists*: Irving Horowitz's recent anthology of writings by anarchists and about them and their accomplishments. What makes the volume deplorable is not that Horowitz doesn't have an intellectual grasp of anarchism, but that he lacks an incisive view of the state of present society, wanting this he is blind to the relevancy of anarchism.

The selections are fair; historically, anarchists from Godwin to Goodman are represented--all one would expect. But besides the classics, there are several pieces that one must applaud the entry of: Samuel Yollan and Gerald Brenan's Histories of anarchists in the U.S. and Spain and Berkman's eyewitness account of the Kronstadt massacre. Yet Horowitz does manage to include a great deal of garbage; for instance, Berkman's Kronstadt commentary is sandwiched between Woodcock's Latin American historical fantasies and Hugh Thomas' apology for the Spanish Republicans. And Conrad, Dostoyevsky, and Camus share Section Two: Anarchism as a Style of Life (and Death?), with Tolstoy, Goldman, and Sacco and Vanzetti!

It is usually fruitless to belabor the omissions in anthologies, for though the omissions constitute their notorious weakness, the editors may be excused for purely technical reasons, like lack of space. Sadly, this is not the case with Horowitz, for his omissions definitely leave the reader with the misconception that anarchy has no significance in a highly complex, technological world. Horowitz' whole condescending approach to anarchy stems from his (purposeful?) inability to appreciate its contemporary relevance beyond its pertinence as a "posture" for intellectuals.



Two very recent articles, one by Herbert Read, the other by Karl Shapiro, typify, according to Horowitz, current anarchist writings. The Shapiro article, mistitled "The Revival of Anarchism", desperately attempts to distill anarchism from Gandhism in order to make anarchism comfortable with some heavenly, sugar-coated world of brotherly love. He altogether overlooks the real revival of anarchism within American radical political thought and direct action. Read in his essay from Reconstruir, No. 19 (July-August, 1962) reprinted here, pathetically searches for anarchism in the kibbutzim of Isreal and the Chinese communes, but he ignores the Committee of 100, the Spies for Peace, and the recent British industrial disputes, all of which have been influenced by anarchists.

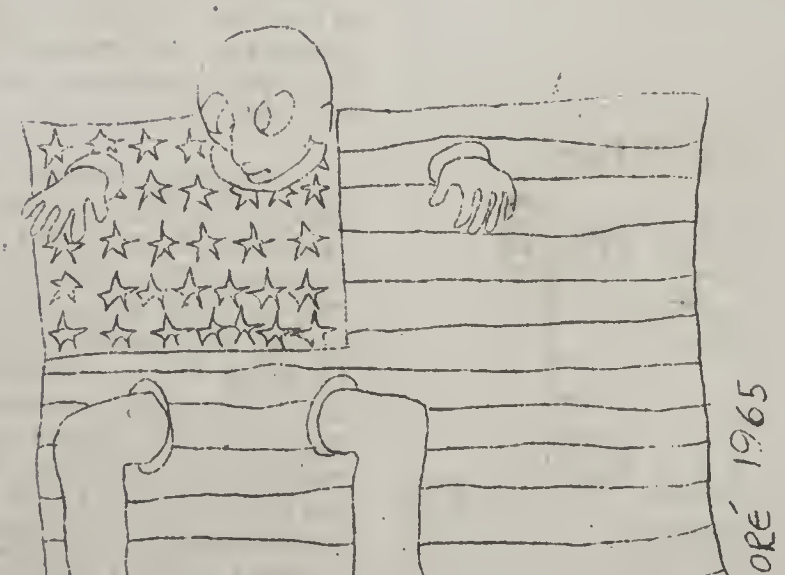
Moreover, where Horowitz touches on anarcho-syndicalism, the most obviously relevant strain of anarchism, his discussion is sterile and completely devoid of any exposition of the syndicalist truths, slowly but definitely being realized by the workers throughout the world, that the boss can reside in the union hall just as surely as he does in the executive john. The realization on the part of the workers that they must fight bossism in the unions can have radical consequences not only for future union structure, but for society as a whole. Nowhere does Horowitz mention, much less explain, the revival of syndicalist thought among radicals throughout the world. This is doubly strange (and likewise more unforgivable) because his teacher, C. Wright Mills, was a part, though one must admit a small part, of this revival.

---

*The Anarchists, Edited, with an Introduction, by Irving Horowitz, Dell Publishing Company, New York, .95¢.

This paperback will be purchased in drugstores across the country and read by people who imagine anarchists as cloaked, bearded, bomb-throwers; Horowitz has done his academic best to destroy that conception and replace it with that of a toothless, palsied codger feebly and absurdly flaying the wind with incoherence. Even an anarcho-pacifist would prefer the former image, with all of its falsity, to one that relegates anarchism to the dustbin of history, there to remain undisturbed except by the journey of an occasional scholar in the pursuit of professional recognition. But we must not be too severe, for after all, academicians are the last group in society to recognize change. Iam thoroughly confident that the sparks of truth ignited by the true anarchist selections in The Anarchists are not about to be extinguished by the rancid syrup of a vapid academicism.

Bernard MARSZALEK



AMERICA FIRST

THE BASIC QUESTION

Recently, there has been a great deal of discussion concerning the Havinghurst and Hauser reports, which both more or less concern themselves with the concept of "cultural deprivation." Loosely defined, these two terms refer to the condition of the child who is beginning his education without those necessary skills, normally learned in the pre-school experience, that would enable him to learn things at the level that is demanded of him in the first years of school. Now, the controversy concerned itself mainly with the fact of the Chicago Negro ghetto and its naturally detrimental and degrading effect on the mentality of those individuals imprisoned in it, but there is also some interesting findings and commentary in the reports concerning things like "low socio-economic neighborhoods."

Havinghurst states that "the three schools with the highest proportion of over—age pupils are all in low socio-economic neighborhoods, but two are practically all-white and the other is practically all-Negro." A few pages later, he goes on to state that "there is a good deal of useful research that shows that children from many low-income families suffer an intellectual deprivation which puts them at a severe disadvantage when they come to school." We see, then, that it is not so much an exclusively ghetto or "race" factor (as some diseased minds would maintain), as a question of not having any money, and thereby, by the ethics of "our" society, no value. To be poor in a society where it is universally believed that no one who really is worth anything is poor makes the state of being poor a crime, as if one chooses to be poor, as if the poor are guilty of a crime. This is reflected in Havinghurst, who says "the central city is sick. Its increasing proportion of low-income residents means it has decreasing tax potential...," and "present trends lead to a decrease of middle income people and a decrease of whites in the central city. The task is to change these trends." Shall the city become "healthy" by "cleansing" itself of this guilty and vari-colored lower class, whose crime is that they cannot support the graft-grabbers of the city bureacracy in the style to which they have accustomed themselves? If the central city is sick indeed, one need merely cut out the cancer that is sapping its strength--geographically located downtown, in city hall.

It is quite plain that, save for proposals like taking children away from their parents and having others raise them (Havinghurst: "there is abundant scientific evidence that infants from poverty-stricken parents develop into adults with average or superior intelligence if they are taken from their true parents and raised by educated people."), nothing will be done to relieve the social causes of "cultural deprivation; there are not enough opportunities open to the poor to gain employment that is in any way meaningful, or, for that matter, any employment at all, and there is at the same time an "ethic" which condemns the poor. Along with this there are laws which discriminate against the poor (anti-sex, anti-drunk, anti-vagrancy, and anything else the copsscan incorporate into their sadistic fantasies), and things like "urban renewal" projects that alleviate "slum" and "ghetto" (which is any place where poor or Negro people have to live) conditions by tearing down the only housing open to the poor and erecting, as can be seen in the Hyde Park and Prairie Shores areas (where good, easily renovated buildings once stood) buildings intended only for the middle and upper class.

Society wishes to prevent poverty, so it makes it impossible to be poor and live like a human being. People aren't poor if they are in jail or dead.

Lionel BOTTARI

Youth For Freedom

The grimness of the social reality to-day, and the terrible future which may be its outcome, gives all our propaganda a very sombre note. This is not to be avoided if we are to adhere to an honest policy; we do not underestimate the problems which confront us, nor have we any interest in painting a rosy picture of the future. This general bleakness is not likely to attract adolescents to throw their energies into something that looks like a movement of Jeremiahs, for, quite naturally, the oppression of society on them makes them react by shunning all that is sombre, and seeking all possible gay diversion from the grimness of the schools, the workshops and the city streets, and from the drabness of family life. Adolescents are not ignorant of the evils of modern society; in a confused way they know these evils only too well in the direct impact on their own lives. Their impulse, therefore, is to fly these evils, to shut their minds to them, rather than to harp on them, dissect them and even glory in them, as some revolutionaries do.

But anarchism is not a dreary messianic cult; it is a thing of life and vigour, a rising against life-denying forces of our time. The positive aspect of anarchism has much to appeal to the adolescent; it realizes the need of realizing all his potentialities to the full, now in the present. We do not seek to fob him off with pie in the sky, with present toil and careful restraint in the interests of well-being in the problematical future. We point out that the only sane road to healthy living, both personal and social is through present happiness.

Young people sense that there is a conspiracy of age against youth, and they are right. Too much is preached about the responsibilities which adolescents must learn to accept, responsibilities which involve going like cattle into the military corral, sweating as underpaid apprentices, grinding as students to make themselves more efficient units of production, denying their lusty sexuality when it is at its height, dutifully fulfilling the vicarious ambitions of their parents. We are not going to preach social revolution as another duty which the younger generation have got to shoulder. Our message to the young is entirely one of encouragement, of realizing the value of their own aspirations, of spurning the burdens that authority places upon them and the shoddy rewards cynically offered in return for the sacrifice of their own natures. Emotionally frustrated boys and girls turn to idealism all to easily, but it is idealism of an impractical and sentimental kind. A youth who burns to sacrifice himself to a revolutionary cause may be as mentally sick as the one who burns to lay down his life for his king. It is no great task to capture the frustrated emotionalism of adolescence with bands and banners and songs, but such mysticism is useless for truly revolutionary ends. Youth, disturbed in its natural harmony, is too willing to sacrifice, to give; we must show it how to take.

Tony GIBSON

Education ★ Organization ★ Emancipation

Knowledge, like energy, is power only when it is put to work to get results.

All together, the working class knows how to make everything, how to do everything, how to create abundance and the necessary conditions for happiness for us all. But to put that knowledge to work requires organization. To get the full results that can come only from using all of it, requires organization as a class—One Big Union.

Science is knowledge organized. The I. W. W. is the working class organized—just the working class, with everybody from the coal miner to the chemist who figures out how to make a new flavoring extract out of the coal, organized to use our brains for ourselves. And it spells emancipation and a new era of abundance and security.

To start the process takes scientific industrial union education—such as you spread when you get new readers for the I. W. W. periodicals and pamphlets, pass-out I. W. W. leaflets, or put up I. W. W. stickers. Educate to organize, and organize to educate—that's the road ahead to freedom. That's where the I.W.W. is marching, and you are cordially asked to hop into the parade.

AN INJURY TO ONE IS AN
INJURY TO ALL

IWW

IWW PREAMBLE

The working class and the employing class have nothing in common. There can be no peace so long as hunger and want are found among millions of working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the every-day struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

Calligraphy & Art-Work by Lawrence DeCOSTER, Lester DORE, Torvald Faegre, Bernard MARSZALEK and Franklin ROSEMONT

In Rebel Worker #3 we listed a number of other libertarian publications in which our readers would probably be interested. Here are some more:

Anarchy: Freedom Press, 17a Maxwell Rd. London SW6, England. Monthly anarchist theoretical journal. 30¢ per copy.

The Anarchist: Care of Peter Neville, 12 S. Grove, Erdington, Birmingham 23, England. Mimeographed and occassional.

Cuddon's Cosmopolitan Review: 283 Gray8s Inn Road, London WC1, England. Fortnightly, anarchist journal of art and literature.

España Libre: 231 W. 18th St., N. Y. 11, N. Y. 2pages in English; one of the best sources of information on current labor activity in Spain. 10¢ per copy.

Glasgow Solidarity: Care of McLeod, Flat 76, 60 Kingsway Court, Glasgow W4, Scotland. Subversive socialist journal.

Resurgence: Care of Solidarity Bookshop, 713 Armitage Ave., Chicago, Illinois. Publication of the Resurgence Youth Movement. 25¢ per copy.

News and Letters: 8751 Grand River, Detroit, Michigan. Marxist-Humanist monthly paper. 10¢ per copy.

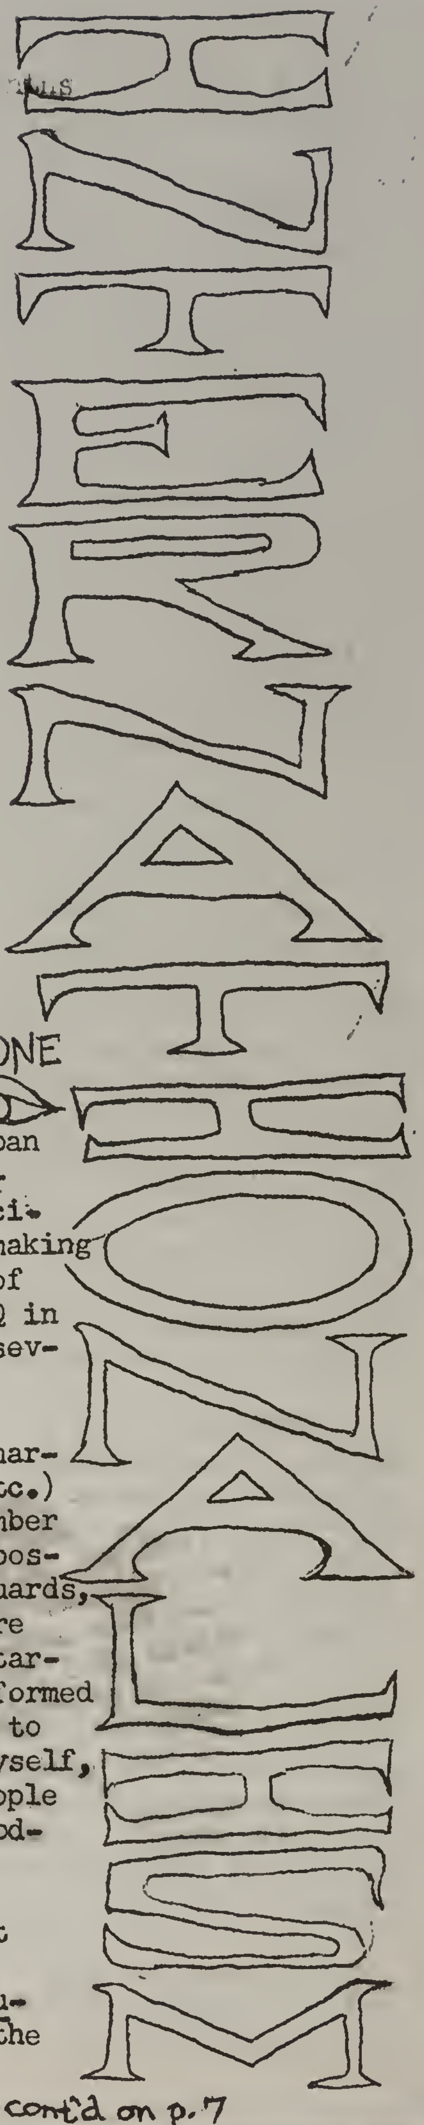
Socialist Leader: 197 King's Cross Rd., London W. C. 1, England. Weekly paper of the Independent Labour Party. 10¢ Per copy.

This is the fourth issue of The Rebel Worker, fourteen months after our first (which appeared on May Day 1964). The first and second issues are entirely sold out; a few copies of #3 are still available. In the future we are going to try to bring out slightly smaller issues, but more frequently: every two months. There'll still be six-issue subs for $1, and copies will be 25¢ each.

This is an "International Issue"---with articles and letters from and/or about a half-dozen or so foreign countries. One of the tasks which the Industrial Workers of the World are taking up is the rebuilding of a true internationalism; toward this, it is of great importance to consider the problems and perspectives of our comrades and fellow workers in other countries. We hope this issue of The Rebel Worker is a step in that direction.

We'll be bringing out our first pamphlet, Mods, Rockers & the Revolution (a collection on rock'n'roll, youth and the revolutionary movement; see ad in this issue) in the next couple of weeks, in time for the Beatles concert here in Chicago. Advance single and bulk orders are welcome: 15¢ a copy, 8 for $1.

We'll be seeing you again sometime around mid- or late September. In the meanwhile, we still need correspondents and contributors. Why don't you send in an article?



HOW TO MAKE FRIENDS and INFLUENCE NO ONE

A REPORT ON THE ANARCHIST-PACIFIST YOUTH CONFERENCE

Friday, June 11 was as beautiful a day as any for the urban marxist-anarchist-syndicalist synthesizers to meet their homesteader friends and neighbors, except that visitors from the cities sweat more. Anyway, on that day began a far-from-epoch-making Anarchist-Pacifist Youth Conference in the rural hinterlands of [illegible] Maryland. It was sponsored by the School of Living (HQ in Ohio), The Mutual Aid Fellowship (in East Chicago, Ind.) and several independent fellow-travelers and passersby.

From most points of view, including several of my own (anarchist, pacifist, IWW, CNVA, Junior Woodchuck, motorcyclist, etc.) it was a failure. About [illegible] or 50 people showed up. Quite a number were "marxists" of various kinds, on the scene to get anyone possible sected, carded and catalogued into their factions, vanguards, splinters and fronts: i.e., the traditional Left! A number were homesteaders and back-to-the-land Green Revolutionaries, vegetarians, etc. These were mostly sincere and surprisingly well-informed people with whom I felt quite sympathetic, but some came only to recruit others into various communities. A few people, like myself, came mostly to see what was happening and to meet some new people with new and original ideas. These last, I can say with all modesty, were the most interesting people there.

Of the sessions held, some were of very little or at best mild interest, others were quite good. Mildred Loomis of the School of Living (publishers of A Way Out and The Green Revolution) gave what was actually a pretty interesting account of the economic theories of Henry George, once widely known and accepted, but now [illegible] forgotten. Her p[illegible]

cont'd on p.7

Modern Capitalism & REVOLUTION

A prolonged political apathy of the working class seems to characterise modern capitalist society. This contrasts with the activity of the masses in "backward" countries. Since Marxism is above all a theory of proletarian revolution in advanced countries, one cannot call oneself a marxist and remain silent on this problem. What does the modernisation of capitalism consist of? How is it linked with the political apathy of the masses? What are the consequences of all this for the revolutionary movement today?

New and lasting features of capitalism should first be described and studied. The ruling classes have achieved greater control over the level of economic activity and have succeeded in preventing major crises of the classical type. Unemployment has greatly diminished. Over a period of several decades real wages have been rising, both more rapidly and more regularly than in the past. This has led to an increase of mass consumption which has become indispensable to the functioning of the economy and which is by now irreversible. The unions have become integrated into the whole system of exploitation: they negotiate the docility of the workers in production in return for wage increases.

Political life is almost exclusively limited to specialists. Ordinary people are uninterested in it or frankly contemptuous of it. In no important country are there any political organizations whose members are mainly industrial workers or which is capable of mobilising the working class on political issues. Outside of production, the proletariat no longer appears as a class with its own objectives. The entire population is drifting into a vast movement of private living. It attends to its own business. The affairs of society as a whole seem to have escaped its control.

Prisoners of traditional schemas would have to conclude that there is no longer any revolutionary perspective. Traditional marxism saw the "objective contradictions" of capitalism as essentially economic ones The total incapacity of the system to satisfy the economic demands of the workers made of these demands the driving force of the class struggle.

Although the classical analysis corresponded to certain manifestations of capitalism, at a certain period of its development, it must be re-examined in the light of contemporary experience. The "objective economic contradictions" disappear with the total concentration of capital (as in countries controlled by the Stalinist bureaucracy). But even the degree of state intervention found today in the West is sufficient to confine within narrow limits the spontaneous imbalance of the economy.

Wage levels are not determined by "objective economic laws" but by the actions of men. The class struggle plays a crucial role in this respect. It has its own dynamic which modifies the actions and consciousness of both workers and bosses. Wage increases, provided they do not exceed increase in production, are quite feasible under capitalism.

The traditional socialist view of capitalism is also false philosophically. Objectivist and mechanistic, it eliminates the actions of men and classes from history, replacing them with an objective dynamic and "natural" law. It makes of the Proletarian revolution a simple reflex against hunger, lacking any clear connection with a socialist society. But it has even more serious implications. It sees the understanding of capitalist economy and of its crises as a task for specialised technicians (the revolutionary elite). The solution to such problems then becomes a question of economic transformations to be performed from above, needing no autonomous intervention of the proletariat. The working class is reduced to the role of infantry at the disposal of revolutionary generals. This approach is, has been, and can only be the foundation stone of bureaucratic politics.

If the fundamental contradiction of capitalism is not to be found in the "anarchy of the market" or in its "inability to develop the productive forces," where is it to be found? It is in production, in the labor process itself. It is in the alienation of the workers. It lies in the necessity for capitalism on the one hand to reduce workers to simple executors of tasks, and on the other hand, in its impossibility to continue functioning if it succeeds in so doing. Capitalism needs to achieve mutually incompatible objectives: the participation and the exclusion of the worker in production—as of all citizens in relation to politics.

This is the real contradiction of contemporary society and the ultimate source of its crises. It cannot be alleviated by reforms, by increasing the standard of living or by eliminating private property and the market. It can only be eliminated by establishing collective management of production and society by the collective producers: the working class in the course of production. This is the only possible foundation of a socialist consciousness. It is what gives the class struggle under capitalism its universal and permanent character, whatever the level of production.

Such conceptions provide a framework for understanding the history and development of capitalist society, which is nothing else than the history and development of the class struggle. Such a dynamic is historic and not "objective" for it constantly modifies the conditions of its own development. It modifies the adversaries themselves. It gives rise to collective experience and collective creation. The class struggle has more and more determined the evolution of technology, production, economy and politics. It has imposed on capitalism the profound modifications of its structure which we see today.

There are few patterns of thought more "unmarxist" than those which attempt to explain contemporary economy and politics in terms of "laws" governing an entirely different phase of capitalist development. Equally "unmarxist" is the assumption that these "laws" are absolute, like the laws of gravitation, and cannot be profoundly modified by the actions of men.

At the subjective level, the modifications in capitalism appear in the accumulation of class struggle experience among the ruling classes, and in the new policies they accordingly adopt. Marxists used to regard capitalist policy as impotence, pure and simple. It was dominated by the ideology of laissez-faire, limiting the role of the state to that of a policeman. Today, however, the more far-sighted of our rulers recognize the state's potential and constantly seek to enlarge its function. They assign to their state certain objectives (such as full employment and economic development) that were once left to the spontaneous functioning of the system. The ruling class today tends to submit more and more spheres of social activity to state control; society thus becomes increasingly totalitarian.

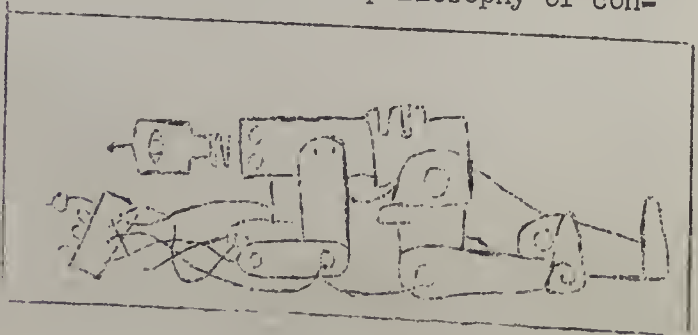
At the objective level, the transformation of capitalism is expressed in increasing bureaucratization. The roots of this tendency are in production, but they extend and finally invade all sectors of social life. Concentration of capital and statification are but different aspects of the same phenomenon. And in their turn they significantly modify the functioning of the economy as a whole.

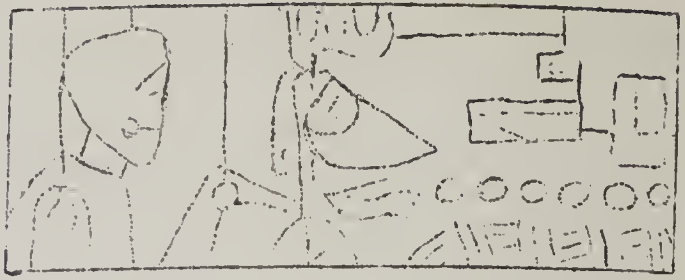
Bureaucratization implies the "organization" and "rationalization" of all collective activity from the outside. To the extent that it succeeds, it completes a process started by an earlier phase of capitalism: it renders all social life meaningless. It produces mass irresponsibility. Individuals begin to seek private solutions to social problems. This is the inevitable corollary of bureaucratization.

The inherent objective, the "ideal tendency" of bureaucratic capitalism is the construction of a totally hierarchic society in constant expansion, a sort of monstrous bureaucratic pyramid where the increasing alienation of men in labor will be "compensated" by a steady rise in the standard of living, all initiative remaining in the hands of the organizers. Anyone who cares to look at contemporary social reality can easily recognize this tendency. It coincides with the ultimate objective of the ruling classes: to make the revolt of the exploited fail by diverting it into a personal pursuit of the standard of living, by breaking up working class solidarity through hierarchy and differentials, and by preventing all atempts at collective action from below. Conscious or not, this is the real aim of bureaucratic capitalism and the real meaning of ruling-class action.

The bureaucratic drive must fail. It cannot overcome the fundamental contradiction of capitalism, as we have defined it. In fact, bureaucratic capitalism multiplies this contradiction manyfold. The increasing bureaucratization of all social activities only succeeds in extending into all domains the conflict inherent in the division of society into order-givers and order-takers. It scatters everywhere the intrinsic irrationality of the bureaucratic management of production. It is for this reason that capitalism cannot avoid crises (that is, periodic breakdowns in the normal functioning of society), which vary in kind and stem from very different immediate causes. The inherent irrationality of capitalism remains but now finds expression in new and different ways.

Only the class struggle can give the contradictions and crises of modern society a revolutionary character. The present situation is peculiar in this respect. In production the struggle shows an intensity formerly unknown. It tends to raise the question of who will manage production, and this in the most advanced countries. But outside of production the class struggle hardly shows itself at all, or only distorted by bureaucratic organizations. This political apathy of the working class has a dual significance. On the one hand it represents a victory of capitalism. The bureaucratization of their organizations drives the workers away from collective political action. The collapse of traditional ideology and the absence of a socialist program prevent workers from generalizing their critique of production and transforming it into a positive conception of a new society. The philosophy of consumption penetrates the proletariat. But this apathy also has potentially positive aspects. Working-class experience of the new phase of capitalism could lead it to a criticism of all aspects of contemporary life, a criticism far more profound and total than anything attempted in the past. And from this could arise a renewal of the socialist ideal in the proletariat, at a much higher level than witnessed hitherto.





The "ripening" of the conditions of socialism continues. This does not mean a purely objective "ripening" (increase of the productive forces, increased centralization, increasing "contradictions"). Nor does it mean a purely subjective "ripening" (accumulation of experience in the proletariat). It means the accumulation of the objective conditions of an adequate consciousness. The proletariat could not eliminate reformism and bureaucratism before having produced them as social realities and experienced them in everyday life. Today, large numbers of people can grasp as profoundly real and relevant the idea of workers' management of production, and can reject as inadequate the capitalist values that see production and consumption as ends in themselves.

This new type of analysis will demand profound changes of the revolutionary movement. Its criticism of society, which is essential to help workers to evaluate and generalize their everyday direct experience, must be completely reoriented. It should seek to describe and analyze the contradictions and the irrationality of the bureaucratic management of society at all its levels. It should denounce the inhuman and absurd character of contemporary work, the alienation of people in consumption and leisure. It should expose the arbitrariness and the monstrosity of the hierarchical organization of production and of contemporary relations between men.

The central element of its program of demands should be the struggle around the organization of labor and life in the factory. It should oppose everything which tends to divide workers (wage differentials, piecework, etc.). But it should do more. Under modern capitalism, the essential problem is how to pass from the struggle at factory level to struggle against the whole pattern of society. The revolutionary movement will only succeed in this respect if it ruthlessly denounces all equivocations and double-talk on the idea of socialism, if it mercilessly criticizes the values of contemporary society, if it presents the socialist program to the proletariat for what it really is: a program for the humanization of labor and of society.

The revolutionary movement will only be able to fulfill these tasks if it ceases to appear as a traditional political movement (traditional politics are dead) and if it becomes a total movement, concerned with all that men do in society, and with their real daily lives.

(The above "Synopsis" of Modern Capitalism and Revolution by Paul Cardan was sent to us for this issue of The Rebel Worker by Bob Potter of the London Solidarity Group as a statement of their revolutionary perspective.)

HOW TO MAKE FRIENDS & INFLUENCE NO ONE, cont'd.

claimed, but now nearly forgotten. (Her presentation was more interesting---and I hope more representative of the facts---than the unsigned ridiculous rave review of this conference which appeared in the latest issue of The Green Revolution.) By far the best discussions were on the subject of psychedelics, which interested nearly everyone there.

One thing should be noted: hardly any girls showed up. This is significant, isn't it? Why doesn't the revolutionary movement attract women? This is a subject that needs a closer look than I can give it here. But I think it's important. As Joe Hill said:

"We've had girls before, but we
need some more
In the Industrial Workers of the
World,
For it's great to fight for freedom
With a Rebel Girl."

The conference closed, after founding a loosely-defined (perhaps only semi-existent?) Mutual Aid Society and calling for a second conference to be held, presumably in New York, some time in August. For further details write to The Rebel Worker. If you can't make it there, see the next issue for a report. Meanwhile, let us hear from you.

Sermon

From TRIBUNE, Labour's Independent Weekly

"It is clear from the present day writings which are couched in the old terms that the IWW have forgotten nothing---nor learned anything new. Their greatest achievement surely lay outside their own organisation. The rise of the Congress of Industrial Organisations (CIO) and its industrial unions, which today are so powerful in America are the direct result of the early struggles of the Wobblies. Workers are practical people, and if they can achieve their aims through the CIO why continue to support the IWW?

"It is clear to me that the IWW will never be revived, Its great days are part of history, and have become part of our labour heritage. It is now essential to move forward, to create and refurbish the organisation necessary in modern terms for social change. Let us on this May Day salute the old warriors of the IWW. Let us try to emulate their [illegible] self-sacrifice and idealism. Let us uphold the idea of building a new society. Let us pay homage to them, while criticising their faults and mistakes. They were brave men and women, their vision of a new world continues to light our path."

Eric Heffer, M.P.

(30 April 1965)

Toward A Renewal Of Libertarian Researches

It is hardly easy to delimit at the onset the worlds which must be explored... taking into account the general lines "toward a renewal of libertarian researches". Too many of the questions have remained uncertain, too many new roads have been opened in the domain of the sciences, both human and social. One is not able to envisage, much less to establish, an order of priority. In the plan of work proposed here, it will remain to each to deal with the problems which cut across his own preoccupations, experiences, and his past studies.

At the same time, if this program appears too ambitious for our immediate possibilities, it does not intend to be exhaustive; it merely acts as a beginning which must also permit a practical classification by spheres of interest, the notes of which we will later be able to consolidate.

The plan of study of "libertarian researches" can be articulated in the following way:

Theoretical Basis: To restudy the history of libertarian thought, following simultaneously the evolution of the problem of liberty in the history of philosophy, taking liberty in contemporary thought as a point of resolution; also to clarify the philosophical positions which orient the attitudes facing the promblem of liberty: rationalism, materialism etc.

Libertarian Anthropology: The Problem of liberty in the "sciences of man". Is one able to define the hypotheses and the libertarian methods in psychology, in sociology, in history? Will one learn the sciences on the road to liberty.

The State: Is there a "static structure" permanent under all the diverse forms which the state hasttaken in history? What are the rapports between the State and the social classes, more generally social life, society? We will have to restudy and remake a psychology of work, disengaging the complex relations which exist between will to power and will to submission. We will have to take up again the great debate on the suppression or the disappearance of the State, the "dictatorship of the proletariat".

War: To study the reality of the State is also to analyze its phenomena like nationalism, imperialism, war. The role of economic factors in the causes of recent wars has been often debeloped. But has anyone reflected enough on the psychological and social conditions (other than the strictly economic ones) which push a society towards war? Must such a tentative "polemologie" (Bouthoul) renew pacifism reborn of new forms of conflict against the danger of war? On the other hand it will have to be disengaged from the particular characters of "the wars of liberation", the rapports, too often affirmed or denied, between nationalism and revolution.

Industrial Society and Bureaucracy: Under which forms does the "conflict of classes" manifest itself in industrial society? It is necessary to clarify the rapports between modern capitalism, the State and the bureaucracy; the role of the bureaucracy in the organization of work; to analyze the fundamental conflict between the followers and the leaders, the contradictions of the heirarchial structure, opposition and competition in work. We will inevitably pose the question of integration and of the bureaucratization of workers' organizations. More generally we will analyze the "methods of conditioning and manipulation" used in work to control the daily life: psychotechnical propoganda and publicity. Such an analysis will launch a "critique of daily life" (Lefebre), and by examining the different forms of opposition to different forms of alienation.

Leisure, Artistic Activities, Education: The problem of industrial society is itself involved in mass culture and conditioning by the "mass media". In the bureaucratic organization the individual is reduced little by little to passivity, the "spectacles" of all types which are organized for leisure leaves one paralyzed in the attitude of a spectator, a watcher. In such a predicament will the divers forms of artistic activity develop the separation between active organizers and passive consumers? Will there be a revolutionary art, and under what conditions? We have been told that this is the "era of leisure": an era which promises the expansion of libety both individual and collective, but is it not actually the contrary: the systematic manipulation of amorphous crowds by the "organization of leisure"? Anarchism has always affirmed the emancipating function of "popular culture", however, the extant organizations of "popular education" are more or less controlled, created and led by the State. How to react? How can one formulate a libertarian action on a cultural plan? And how to find correct information in making a judgement as to what is actually a good education; we will have to study the pedagogial methods to be able to promote a libertarian education.

The Organization of the Socialist Administration: The constitution of active cultural unities and non-conformist responses to the problem of "decision" and "collective responsibility" we have already mentioned. Anarchism accords a fundamental importance to the "group": The actual development of the psychology of the "dynamic of groups" etc. Are we able to study these questions more methodically? Libertarian socialism has behind it all a series of experiences (co-operatism, community of production, anarcho-syndicalism). We must study this "micro-social experiment" without making explicit reference to our theories. All these researches will eventually be replaced by the rapport of the global society which will pose the questions of federalism, democracy, reformism, integration into the capitalist society.

Personal Realization: Conflict for a socialist society implies a free and creative sourse of personal existence. Which of the many value systems of free existence shall we follow? Is it possible to elaborate, to experiment with techniques of liberation, of indivuation? Reflection on liberty, sociological and psychological researches, and daily experience will have to converge here towards a libertarian "art of life."

Revolutionary Action: Most of the points envisaged in this plan spring from the problem of revolutionary action. It is necessary to examine the cohesion and the ways in which different forms of revolutionary action complement one another in the present context; and where are the forms of organization which imply such action?

It is to reinstitute the fundamental themes of anarchism in the actual society, and in re-examining in a libertarian perspective the methods of the human and social sciences that this plan is directed...

---Rene Forain
translated from LE MONDE LIBERTAIRE, May 1965

Note: At the last congress of the Anarchist Federation during the inevitable discussions on the actualization of libertarian ideas, a certain number of participants became aware of the necessity of a group of researches. The above article is the second in a series discussing these researches.

Miraculous Noon

O THEN, what a miraculous noon, after the long moveless morning. You are quite alone before the mirror. Your ears are too pretty for you to show them both. You shake your hair and, with one motion, tumble the whole mass to the right. On the left a pink transparent shell rests on a bed of flamboyant sea-weed. Then, satisfied, you go toward the house where there is no light but the flamboyant caprice of fish behind the glass.

Balloons of hope, stars of foliage, bushes of hatred, rainbow bubbles, orchids of love, lisnes of traitresses, rumblings of thirst, sea-fruit and flowers of waves, diaphanous doves, birds of sky and sea, what an aurora at the bottom of the sea they have painted, these pearly acrobats. In their meshes unknown suns have left such rays that in seeing them, Cynthia, you have become radiant for life. Slide, eels, O you desended from the mountains where you were serpents, to desend to the depths of the Sargasso sea to knot yourselves to one another. Mauve mouths of mute singers beat against the panes. The center of a monstrous onyx lights up with the magnificent conflagration, although on the dust of its exterior facets little apes of nothing at all force the jibers to stop laughing and to recognize their proudly human agonies. But cinocephaloids and their handfuls of satisfied desires were not made for your amusement, stroller. And likewise what have you to do with their giant brothers who have no other games than to make delicate flowers out of banana-peels?

In the middle of the day, in the greatest capital of Europe, you feel your strength growing. The grass is green, the sun is round, and simpler than the roads of the fields are the paths going across the botanical gardens to the animals. You go, ashamed of a part of the world which must ask the rest for its wild beasts and of whom no member could now yell with the long tearing cries of the forest. A jungle of roughly-painted iron, with central heating, in vain attempts to imitate Africa; it is a furtive grumbling of exiles, instead of the raucous, free singing. Fetid incense of giant tortoises, cobras too pliant to be trusted, feigned sleep of crocodiles, Cynthia,---you will never forget the cages and the aquarium in the midst of the greensward, but since neither these exceptionally flat fish, nor this octopus, nor this ocelot, is to determine your destiny, you leave this Zoo without returning.

That same evening at seven o'clock, you will be in a capital on the other side of the Channel, and you will accept a whole family because of a too-handsome son-in-law, whose eyes seem to you the very color of the sky, a Havana sky which would not be at all blue, but tobacco. Owing to the gift of the faceless man, this azure chestnut will be metamorphosed little by little into yellow metal. Thus twice praised be he who, having operated on your virginity, makes you in addition a present of a satchel of dreams. You travel with your paradise and, on all your days, have hours in an oasis of immobility.

Now, here, is the moment to halt. You have walked through the streets of flesh. For the child becoming woman, you have spoken. But it is late, mysterious one. You are the passer-by. One must say farewell. Tomorrow you leave once more for your original mists. In a red and gray city, you will have a colorless room, with silver walls, with windows open even to the clouds, whose sister you are. It is in open sky that the shadow of your face, the gestures of your fingers, must be sought.

Legs apart, a city falls asleep, naked on the phosphorescent sea.

(From Babylone; Kra, Paris 1926) Rene CREVEL

Perspective of the Revolutionary Movement of Japan

ZENGAKUREN

The political and theoretical position of ZENGAKUREN today has been attained through many years' hard struggle in the midst of the class struggle of Japan in recent years.

ZENGAKUREN eight years ago was under the strong influence of the stalinist party. We had been known as the "leftist and militant wing" of CP through our incessant struggle against the government since the establishment after the war.

The revolt of the Hungarian proletariat in 1956 was the beginning of the transition period of ZENGAKUREN from stalinist dominated movement to the revolutionary movement against both imperialism and stalinism.

There broke out a heated discussion over the suppression of the rising Hungarian workers by the tanks of the "red army," yet there were very few students at that time who supported the uprising of the Hungarian proletariat against the stalinist oppression, It has, however, given rise to the criticism of the existing state of the USSR and other so-called socialist countries and the distortion of Marxism by the hands of the stalinist bureaucrats and it has gradually combined itself with the partial and tactical disagreement with the Japan CP that had existed before that.

Two years after that passed in the deepening conflict between ZENGAKUREN and CP, and in 1958 many communist students were excluded from CP because of the "leftist adventurism."

The Ampo struggle (struggle against the amendment of Japan-USA mutual security act) 1959-60 was a stage of open conflict between CP and us. We opposed the policy of CP, according to which the struggle should be fought as that of the "patriotic and democratic" power against the "supporters of USA." For our part we insisted to concentrate our struggle against the Japanese capitalists who tried to strengthen their domination over us to prepare for the imperialistic aggression based on the accumulated power that they attained through the "development" after the war.

On the tactical problem we emphasized on the militant demonstration combined with the industrial action of the working class, while CP together with SP tried to confine the struggle in the "peaceful march" for petition to the members of the Parliament, being afraid of the vital energy of the workers and students ready to explode against the ruling class.

The conflict took place in every sphere of the struggle. When there was a demonstration around the Diet, for example, and ZENGAKUREN wanted to join the demonstrating workers, the officials of CP came in haste and made a "cordon" between the workers' demonstration and that of the students, saying that they were defending the workers from the "provocation" of the ZENGAKUREN as a duty of a "vanguard party" of the proletariat. CP even formed a picketline in order to "defend the policemen from the 'violence' of the ZENGAKUREN."

When the angry workers and students at the massacre of a girl student by the brutal policemen in the demonstration rushed against the Diet in which the act had been passed, the role of CP was to persuade the demonstrators to refrain from "provocative action" and to go home to sleep in the daily order of life, Moreover CP excused themselves to the government that they had no intention of "disturbing" the society but it was ZENGAKUREN that tried to "violate the order."

Many workers and intellectuals saw CP together with SP suppress not only the demonstration of ZENGAKUREN but also every struggle when it took a militant character against their expectation. As a result, after the defeat of the Ampo struggle CP lost support of the workers and students who fought the struggle and experienced the suppression of the "vanguard" party.

In the general assembly after the struggle in 1961, we discussed over the problem which was sharply posed through the struggle, especially about the character of the existing leadership of the labor movement and found that its degeneration is connected with the policy of the so-called socialist countries. We also examined the history of our struggle during the period since the revolt of the Hungarian proletariat and through the criticism of our own experience adopted the fundamental line that we should fight against all kinds of suppression, whether it be capitalistic or stalinistic, with our own power and that the student movement should be closely connected with the struggle of the rank and file workers to overcome the false leadership of the labor movement today.

Anti-war struggle of the ZENGAKUREN has been possible only through this discussion and we have been able to develop our fundamental line through actual struggle against the American and Russian bombs together with the young workers and in the international solidarity. Thus a new era has begun for the Japanese student movement to be anti-stalinist revolutionary mass movement.

* * * * * *

The period starting in 1956 is characterized by the rapid rationalization and modernization of Japanese capitalism, and at the same time, by the heavy resistance of the proletariat against the mass discharge and aggravation of the working conditions accompanied with the process of the drastic transformation of Japanese capitalism. Especially the workers of railway, post office and coal mines fought the most militant struggle but they were compelled to surrender to the attack of capital under the pressure of the conformistic leaders of the trade unions.

In the railway workers strike in 1957 against mass discharge, CP which is the minority in the labor movement assisted the socialist leadership in giving up the strike against the fighting will of the workers. Many communist workers left the Party on that occasion.... In this situation the independent struggle of ZENGAKUREN drew keen attention of the militant workers and in the Ampo struggle there were certain co-operation between the rank and file workers and the ZENGAKUREN. In the anti-war struggle the co-operation was developed further and resulted in the "Anti-war Assembly of Workers and Students."

The whole process of the ZENGAKUREN from left-wing opposition in the stalinist party to a revolutionary wing of the Japanese proletariat for self-emancipation has been strongly influenced by the activity of an anti-stalinist revolutionary organization, the JAPAN REVOLUTIONARY COMMUNIST LEAGUE (JRCL). This organization, established after the Hungarian Revolution in 1956, has the support of militant workers through its uncompromising struggle in the factories against management and labor bureaucrats at the same time, through denouncement of the Japanese Communist Party based on the sharp and exhaustive criticism of the distortion of communism and Marxism in the USSR, China and other so-called socialist countries. The JRCL has influence not only in the workers but also in the students and intellectuals, and the recent struggle of ZENGAKUREN has been developed through the concentrated discussion of stalinism suggested by JRCL.

Threatened by this situation unfavorable to the stalinist bureaucrats who had long pretended to be the only "vanguard party" of the proletariat, CP is trying to destroy the movement of ZENGAKUREN. Their attempt of building up another student organization outside ZENGAKUREN and abusing by the demagogy such as "ZENGAKUREN are paid by American imperialists," etc., is confronted with the strong criticism of the majority of students.

(ZENGAKUREN is composed of self-governed body of the universities and committees are elected by all the students in the university. The activities of ZENGAKUREN are practiced through discussion in the class room of the university and the success of the struggle depends on the contents and method of the discussion.)

Besides, ZENGAKUREN is confronted always with suppression by the government not only by the direct attack of the brutal policemen during demonstrations (against this we have developed the unique tactic of linking arms of the demonstrators and the sit-down), but also by juridical forms. Thus, we ZENGAKUREN are surrounded by many difficulties and the hardest thing is our struggle against the general tendency of the Japanese labor movement to go after the reformistic and collaborative policy of the labor bureaucrats of the Western countries.

We regard the present stage of ZENGAKUREN as very important, for now through the exposure of the false character of the Moscow-Peking conflict we can clarify the fundamental problems and the perspective of the revolution in the world today.

We do not choose between Russia and China. Neither do we choose between East and West. These alternatives only mean to choose between different kinds of alienated class society. Our problem is not to adapt ourselves to the existing societies, but to create a new society which adapts to us. Russian and Chinese stalinists force us to admit either of the two stalinist societies as "communism"---the one is relatively developed, while the other is underdeveloped, both of which are dominated by the priveleged bureaucrats just as the western societies are ruled by the monopolizing capitalists. Thus the working class of the whole world is deprived of political and economic powers and is reduced to passive object in both West and East.

Communism means, however, essentially the abolishment of class and private property through combining the powers of production of all the world by means of the international struggle of the proletariat against the oppressors who possess all means of production in their hands.

The Russian and Chinese "communism" is far from communism. "Communism" that is dominated by bureaucrats! "Communists" that fight each other over their "national interest!"

The emancipation of the working class and human beings can be attained only through overthrowing the capitalistic and stalinistic domination by the power of people's own.

We are convinced that we are combined with the revolutionary struggle of the Japanese working class and with the struggle overseas for the same purpose.

Joji ONADA
General Secretary of ZENGAKUREN

REPRINTED FROM THE SPU BULLETIN '63

The Class Struggle
IN THE CITY OF BROTHERLY LOVE

June was a rough month for the anti-working class elements in our society (whether boss, politician or labor bureaucrat); and Philoadelphia, the "City of Brotherly Love", had to contend with a king-size dose of "irresponsibility" on the part of its wage-earners. Along with the New York and Chicago cab strikes, the Philadelphia Teamsters wildcat proved that the class struggle is not dead (no matter what sociologists try to tell us). The 12,000 members of Teamsters Local # 107 declared a "holiday" in support of four men from the Roadway terminal fired for refusing to load a truck alone when they considered the work dangerous without a helper (or at least would not scab on the first of their group who refused to load on those grounds).

The dynamics of the situation include the aggravation of Teamsters in 107 over the dehumanizing work conditions that Hoffa and the "Teamster leadership" continually sanctioned in negotiations. (Example: Loaders at the Roadway terminal must ask permission of a foreman before they can use the john.) The Roadway sackings were the direct cause of the walkout of all workers there and the following local-wide holiday, but they were not the only cause. Another dynamic of the situation involves the particularly well-developed local bureaucracy, led by the "Voice of the Teamsters" group, the former "political party" (sic) in the local that won most of the offices and business agents positions in the last election. They won because they, like the workers, were anti-Hoffa. While the immediate goals of the Voice group and those of the rank-and-file were the same, the Voice group was as far from real rank-and-file control as any Hoffa, Carey or Dubinsky.....as the members now know.

As soon as Roadway walked out, Judge Weinrott, Philadelphia's judge who handles all labor cases--that's ALL, from injunctions against strikes to assault cases arising during strikes, issued an injunction against it. It was ignored. Ten days later when the local voted its support "holiday", Weinrott was there again with his injunction. The papers and the local government joined immediately, echoing Weinrott's cries of "anarchy". Headlines blared, "Gangs Roam City" (and indeed they did).

One particular incident, related by a revolutionary-minded participant, deserves repeating because of its beautiful Marx Brothers-like quality. This particular teamster was not a member of the striking local, and so could not join the strikers without definitely threatening his job. He could and did, however, drive slightly out of his way in order to encounter the aforementioned gangs which were stopping trucks. He was stopped and deserted his truck "to avoid personal injury". This happened on a divided expressway near the Sears warehouse. The cops drove up immediately and starting backing part of the striking marauders (including the trucker "avoiding personal injury") into the Sears parking lot, while the others seemingly ran off. Seemingly because as one cop looked around he saw the runaways on the other side of the expressway again stopping trucks! Off went the cops to get them, and the ones in the Sears lot returned to getting business done on their side of the divider. This went on for an afternoon.

But like all local wildcats, this one finally collapsed after one week. The

Roots of Revolt

Although the formal libertarian left is dormant in Britain, there are signs that it is not yet dead. The stupor of the entire left here is easy to understand. There were those people who had glibly assumed, despite the evidence which increases every time it happens, that the return of a Labour Government would make significant changes to the nation's political and social stance, even to its military alliances. Harold Wilson's kow-towing to Johnson over Vietnam--despite the patently obvious risk of this ugly effusion of international militarism degenerating into an all-out East-West nuclear crisis--the gradually increasing arms bill and the obvious inability of the Government to offer the left even the vaguest sops of satisfaction (although Left Labour papers like Tribune are attempting to stage-manage some signs of intelligent understanding between the 'hard' left and the Government) will inevitably lead to disillusion. Whether the peace movement and the libertarian alliances will be able to mobilize this disillusion, as they did the dissatisfaction of the last years of the Tory malaise, remains to be seen. The other major factor militating against the establishment of a hard-headed, unsentimental libertarian movement in Britain is the general feeling of tiredness and ineffectiveness arising from apparently futile years of public action. The younger libertarians are, after all, of that generation which felt, in the early '60's, that it had the power to rid England of its nuclear defence and establish in its place a society in which the people had a real and genuine control of the government and governmental agencies. It was an impossible aim; but it was nonetheless genuine.

The British peace movement came up against the most confident, dedicated and pragmatic ruling class in our recent history. Its pragmatism enabled it to deal with large numbers of dedicated and active opponents without, except in rare cases, resorting to the mailed fist. The authorities have almost always been able to adjust their position in the face of public pressure, leaving the protestors shoving against a wall which no longer serves any function. The issues around which the post-Korean war left in this country centred itself were more clear-cut than they are now and small movements are almost always more able to cooperate for clear ends and despite doctrinal differences than the large popular movements, of which the English peace movement is probably an example (at least by British standards). The peace movement split into its natural component parts but the smaller groups were rarely able to act as effectively on their own as they had been in larger groupings and the disillusion which kept many of the older generation aloof has now seeped through to younger people, leaving them doubtful of even their most cherished beliefs.

The turning point of the British peace movement came during the Cuba Crisis in October 1962, when all the pressure we were able to make quite obviously had no effect on the course of the crisis, nor on those people who were indulging their power paranoia through it. Only Bertrand Russell remains under the illusion that he was able to do anything about the situation. Cuba laid the seeds of what is by now known as a notion fixé that nuclear war is in itself such an instant phenomenon that no protest movement can possibly prevent it. Even those people whose anarchist attitudes enabled them to see the limitations of both the Parliamentary-oriented CND and the naively-idealistic Committee of 100 now suffer from the sheer emotional frustration and exhaustion of five or more years of apparently fruitless activity. The testing time might be if conscription were to be re-imposed; but it is hardly worth looking forward to that, just to analyse the results on those people who have been associated with the peace movement! This is a depressing atmosphere in which to attempt any form of constructive action; I may be overstating my case--this is an occupational hazard of trying to convey an ambience rather than hard facts--and there are one or two more encouraging signs.

I would like to detail these encouraging signs briefly though I hasten to add that any predictions based on them may prove to hopelessly optimistic. Not being personally involved in industry I find it difficult to assess whether there has been any change in the feelings of young workers towards their 'social function' though I suspect that over the last decade there has. The recent Kodak affair, still not over, where the police obviously acted in collusion with Kodak snoopers to secure the dismissal of two men attempting to give Kodak some sort of union protection can hardly fail to produce scepticism in anybody about the ways in which industry is organized and the degree of collaboration between industry and authority in general. There are also signs that apprentices in various industries long ignored by the official unions are organising to make demands. It is difficult to draw any conclusions from this; but, even at its least-promising level, it means that younger people in industry are rather more bloody-minded than they used to be. Generally I would say there is a widely different attitude to authority from young people today than, say, ten years ago.

By a large proportion of the deeply-alienated youth of this country--not only those young people who make up the parallel teenage cults of the Mods and the Rockers--the police are viewed with a scepticism amounting to contempt and, more rarely, a fear amounting to hatred. This may only be a healthy trend insofar as it is an expression of something deeper, but one has to start somewhere and contempt for the police is probably as good a place as any. Indeed, one of the few occassions on which the libertarians have badly damaged the authorities was the case in which an unprepossessing fuzz, Det-Sgt. Harold Challoner, had the bad fortune to misplant a brick on a singularly intelligent individualist-anarchist called Donald Rooum after the July,1963, demonstrations against the Greek royal visit. This case had the authorities scuttling into war records as a justification of poor Challoner and ended in an almost open admission that police do frame innocent people, by giving free pardons to other Challoner victims. The police do, of course, still frame people high, wide and handsome and if anyone pretends otherwise they are usually jumped on by innocuous and ordinary people whose cynicism about the police is bolstered almost every day by some new evidence public or personal.

At present, the Bristol anarchists are giving wide publicity to another obvious frame-up--this time a raid on a public house which ended in various people going to prison for possession of dangerous drugs (the usual harmless marijuana of course). The point is that cases like these effect many people, mostly people young enough to be easy victims of the sort of casual delinquency which marks a good police force. The young club goers in London and elsewhere, the rhythm 'n' blues (local variety for the most part, unfortunately!) enthusiasts and the folkniks, know that the police are as likely to plant evidence as not, and, among all these people, you will be lucky if you find a single one who will admit anything less than dislike of the police. Obviously it becomes increasingly difficult to imagine that the police fulfil a valuable social function if to do so involves them in imprisoning the innocent. The real breakthrough will be when people object to them jailing the guilty as well, but in the meantime the fact that the traditional working class distrust of the police is finding a wider public is very encouraging.

There have been other cases of small libertarian groups getting together with other people to put pressure on the authorities. The Cardiff anarchist group recently helped caravan tenants to resist eviction or rent increases--despite rather shoddy treatment by the Committee of 100 groups (a rare example of internal friction between the various groups which now constitute a loose anarcho-pacifist alliance.

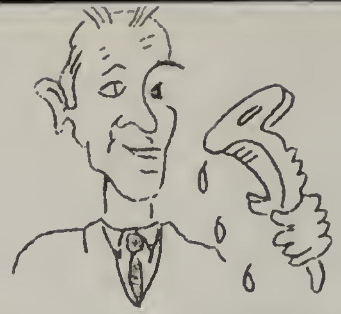
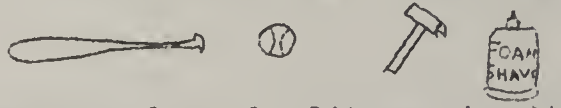
T-BONE



Harvester Co., Chicago, goes in for profit-sharing. Steel declares a dividend in "common"-- money rolling in like nobody's business. 1/4 million was added to army of unemployed as of February last and -- get this - -- attendance at the ballgames is expected to drop. Displacement of labor continues apace -- one man "tends" 2.000 ton boat in New York harbor. Night and Day. No, you don't have to organize? You can go on relief and learn to sing communist hymns -- recently Pittsburg commies were brought up with a round turn for using the name of FDR. Hm, I once knew a man who thought himself --Napoleon. Nothing serious; just a bit of hysteria.

FDR JFK LBJ FDR JFK LBJ FDR JFK LBJ FDR JFK LBJ FDR LBJ JFK LBJ FDR JFK JSHITFLBJ FDR JFK LBJ

Darn this world anyhow -- can't sleep and read at once... can't sleep because the boys are fighting the war all over again; second-seeing the errors, terrors and tragedies a of the past. If I lay down those race-horses might step on me. Or, I might get beaned by a base-ball.



Where you find injustice, the proper form of politeness is attack. As Patrick Henry truthfully groaned: Shall we gain strength by lying on the flat of our shoulder blades until we are bound hand and foot?

Tis easier to sit down when you have la grippe -- you go down -- Kerplunk! all in a bunch. This morning when I glanced at the mirror I decided I better not go to heaven right now looking as I do. We can't all die looking young and beautiful and I'm afraid if they don't have a rejuvenating process over there I would look like a holy fright even with a clean shave. A new suit of clothes wouldn't help me out much and even a set of wings would still leave me looking like John Farmers gargoyle scarecrow in his Sunday best. Most of those who die are in pretty dilapitated condition, racked by illness or the parasites system (which is all the same) and the angelic expression is far removed. Possibly, however, when they get over these they start growing young and wind-up with a pair of wings and a pair of diapers.

How's that for fantasy?

But we are living in realities and the unemployed army of 10 million plus is growing -- And the gallon and half of stew the Pearl Street restaurant dumped in the swill-barrel didn't last five minutes... No wonder the pigs are plowed-under and the dogs have a far-away look in their eyes -- even the police-dogs neglect to grab us by the shanks -- wont even get up to sniff our pants to verify the high emprise of our social standing. They don't seem to give a damn who we are -- or possibly they have lost confidence in us and fear they will wind-up in a stew-pot. Stranger things have happened. You wouldn't call that fantasy or imaginings of a cracked writer? Two meals a day seems to be the rule (breakfast is composed of several groanings in bed) and, if I do say so myself, the bed and the meals doesn't look any better than the man himself.

There is no remedy other than organization. Organize as you are. You cannot gain strength by waiting. Strength can be gained only by organizing.

Wait long enough and you'll be too homely to go to heaven. Let us not lose sight of the fact that we are at grips with "the noble white man" that made agony both ingenius and scientific and relegated life's possibilities to the select few...and life's "garbage" to the many. Production is now years supply

TALKS

ahead and still we are in want.

It's rotten---the system---and recently the great State of New York could not accept as a gift the mansion and lands of The Greystone from the Untermeyer Estates because the acceptance presupposed an expenditure of $75,000 a year for maintenance.

This minature paradise of the Hudson has to go begging.

Could a system be more rotten?

CLASS STRUGGLE CONT.

food retailers and wholesalers, the cops, the courts, the local NAACP and Hoffa all fought the strike. And the strikers valiantly fought back, releasing their resentment by overturning trucks and picketing City Hall (three or four thousand strong). But the "Voice" group leadership, the "rank-and-file's friend," finally capitulated under court threats against their pocketbooks. Michael Hession, 107 Secretary and "Voice" leader, called a general meeting and ordered the workers back to their jobs. The papers reported mixed cheering and booing; truckers report that most everyone is just plain pissed off....

But before the city could recover, other disputes erupted. Non-professional workers at hospitals in Camden, N. J. and Chester, Pa. struck for recognition of their union and against discrimination in hiring practices. Philly's trashmen didn't get a raise when firemen and cops did, so they "slowed down" and "worked to rule" for a week (time-honored Wob tactics), raising havoc with trash collection in the entire city. Another Teamsters local (the warehousemen) called a wildcat, which Judge Weinrott immediately declared illegal until the national Teamsters contract runs out in 1966. They kept striking.

Now the class struggle has quieted in Philadelphia, but it will erupt again soon with more workers aware that bureaucrats as well as bosses are their enemies. And these workers will be aware that the IWW is again on the scene with an answer. Only the other night, the papers reported the extent of class consciousness in a small item about about a cab driver who was robbed by a man who wanted only "the company's cash. Keep your own money." The proletarian bandit told the cabby, "You know how it is, I've got to eat."

Bruce ELWELL

Inaugural  Break

After twenty-five years of uninterrupted expansion, surrealism does not flatter itself that it has advanced beyond a preliminary stage, or that it has contributed anything more than a consciousness of the need for a new collective sensibility. Its confidence in the perfectibility of man's lot is, today as yesterday, the corrective with which it mitigates the disheartening spectacle of the world. Though this perfectibility may depend on economic factors, surrealism maintains that it is still more intimately bound up with the elimination of the conflicts blocking the way to freedom, such as those of dream and action, the marvelous and the contingent, the imaginary and the real, the expressible and the inexpressible, candor and irony, the fortuitous and the determined, reflection and impulse, reason and passion, that is, particular cases of an even wider antinomy opposing for man's greater misfortune, desire to necessity. It is because surrealism has never despaired of eliminating these conflicts that it very quickly exhausted the patience of those who expected of it only pretexts for eluding the problems which, to be sure, it has not solved, but whose data it has circumscribed and which it poses every day with increasing rigor.

Surrealism, concerning which so many, both on the right and on the left, ostentatiously speak in the past tense, is undoubtedly not so sure of its course as its detractors are of theirs. We say right and left advisedly, for it must be admitted that if the countless recent attacks launched against surrealism had been part of a concerted plan, things would have been no different. Had surrealism been willing to recant to the point of gravitating blindly into the orbit of the Communist Party, and in doing so renounced everything that justifies its existence, it would have thereby found favor in the sight of M. Sartre; its conduct, in his eyes, would have been that of a viable movement. Thus it is just as awkward to be the only one to betray as to be the only one who doesn't. Here we need only charge up against M. Sartre, in its tasteful wrappings, the following brilliant consideration: Surrealism's opposition to the Communist Party will be accentuated, M. Sartre tells us, "when Soviet Russia and, consequently, the French Communist Party have entered upon the phase of constructive organization." We are well acquainted with the recently formulated "constructive opposition" of M. Thorez. And now we are favored with an even more flattering terminology. However, we rather think that this "phase of constructive organization" took place somewhere around 1934-1935 and corresponds to the beginning of the Communist Party's collaboration with that same bourgeois class which M. Sartre reproaches us with working to consolidate. Previously, M. Sartre had taken pains to tell us that, in his opinion, "literature is, in its essence, the subjectivity of a society in permanent revolution." It would be nice to know what there is of permanent revolution in Soviet society. But with all his contradictions, M. Sartre is not yet capable of founding a dialectic, and if tomorrow Parisian existentialism were to enter into an alliance with the Communist Party---despite the ill temper of Pravda---it

(Declaration of the International Surrealist Movement.

would be the better to prove that two deviating ideologies do not make one accurate idea.

While its adversaries of the right and left obey, as if spellbound, rather dismal tactical considerations or cut their own throats with short-range calculations, surrealism forges ahead, both protected and exposed by the passion which gives it life and which remains its first, its chief constant. This passion, concerning the nature of which there can be no uncertainty---a subversive passion, in fact, and not a sacrificial one, intended for the unchaining of man and not for his hypocritical and infamous "redemption"---has never for a moment been inconsistent, whatever the ordeal, and it guarantees better than any long phrases the part that surrealism undertakes to play in the permanent revolution of men and things, from which it is inseparable.

To the extent to which it asks the Revolution to include the whole of man and not to conceive his liberation in any one respect but rather in all its aspects at one time, surrealism emerges as the only doctrine qualified to throw into the balance the forces of which it was first the prospector and then the marvelously magnetic conductor---from the child-woman to black humor, from objective chance to the will to myth. The chosen ground of these forces is the unconditioned, overwhelming, mad love which alone permits man to live expansively and to evolve according to new psychological dimensions.

Once prospected and given the possibility of joining together and stimulating one another, there is some chance that these forces may finally reconcile human finality and universal causality. They are the corollaries and participants of the progress of the most advanced intellectual disciplines of our time to which we owe a non-Euclidean geometry, a non-Maxwellian physics, a non-Pasteurian biology, a non-Newtonian mechanics---disciplines which, in turn, are solidary with a non-Aristotelian logic and with that evolving non-Mosaic moral code whose authority we instantly invoke to avert the unlivable.

The response evoked by Rimbaud's outcry with regard to life, by Marx's injunction with regard to the world,* is assuredly no new thing in the heart of man. But ever since the reasonable and rational developments of consciousness took precedence over the passionate developments of the unconscious, that is, since the last myth hardened into a deliberate mystification, men seem to have lost the secret which permitted them to know and to act---to act without alienating the acquirements of knowledge. The hour has come to promote a new myth, one that will carry man forward a stage further towards his ultimate destination.

This undertaking is specifically that of surrealism. It is its great rendez-vous with History.

It is in the nature of dream and revolution to agree, not to exclude each other. To dream the Revolution is not to renounce it but to pursue it doubly and without mental restrictions.

To avert the unlivable is not to flee life, but to throw oneself into it totally and irrevocably.

SURREALISM IS THAT WHICH SHALL BE.

The above declaration of the International Surrealist Movement was extracted from the pamphlet Inaugural Break, issued on the occasion of the International Surrealist Exhibition, Paris, 1947.

SONG IN TIME OF DROUGHT

Policeman sky, is it going to rain?
if it rains you'll have a donkey
unless it rains skunks

Parson sky, is it going to rain?
if it rains you'll be butchered
if it doesn't rain you'll be burned

Sewer sky, is it going to rain?
if it rains you'll have a flag
if it doesn't rain a crucifix

Is it going to rain, sky of ashes?

Benjamin PERET

(fragment)

* Reference to the words of Rimbaud, "to change life," and of Marx, "to transform the world."

SCOTS against WAR

Scots against war first appeared on the May 1963 "Peace Ship" demo. at the Holy Loch. Hundreds of demonstrators on the boat were given copies of a leaflet called, "How to subvert, disrupt and sabotage the Warfare State."

Press, police and Peace Committee reacted in typical manner. The "People" headline ran, 'Sabotage call to CND'. The Home Office agreed that the leaflet was seditious. Gradually, however, the bally-hoo declined and SAW it seemed had returned to their cellars.

But not for long. Back they came on the 1964 May-Day Rally in George Square, Glasgow, handling to infuriated Labourites and mystified coppers, a leaflet addressed to the armed forces. "We are inciting you to mutiny and desertion, we are asking you to disobey your officers and set up your own authority." SAW claimed that the leaflet had been sent to serving soldiers, sailors and airmen abroad, using the trick of collecting names from those announced on BBC 'Family Favourites'. The Special Branch began to take notice.

Later that spring, Cdr. W. Jester of Edzell Polaris Communications Base, near Dundee, opened a small brown envelope. So did 50 of his men. The envelopes contained a message from SAW, "Refuse to fight for the politicians of East or West. We know that you would rather be home with your people, leave the U.S. Navy... NOW!" SAW had struck again.

But SAW really became notorious (hunted high and low, by the Special Branch and Scottish CND) during the Faslane march of June 27-28 this year. Soon after the march left Glasgow Green, hundreds of copies of a 3-page pamphlet, "Is sabotage the Answer?", were circulated among the marchers. CND were furious, who were they, why had they done this to our march? At any rate from that moment on, the march became, not only a protest, but a THREAT.

Another 3-page pamphlet was circulated, "The set-up for military rule on Scotland's East Coast". Mainly concerned with Civil Defence around Aberdeen, Dundee and Perth, it also located the massive shelter (for the commander), near the Edzell base. Telephone numbers, names and accounts of breakins to official property were given! This was published by another militant group, "Workers against the Bomb."

The sabotage pamphlet gave details of how to put anti-setting agents in cement, how to introduce dry rot spores on building sites and ended with this, "We may not be right, but who'll be left to say we were wrong?" The Special Branch weren't interested, or so it seemed.

A couple of months later, somebody must have thought sabotage was the answer. The site offices and huts at Faslane were burned to the ground, The SB swung into action, People were followed, offices and housed watched, telephones tapped. Then came the shock. Ardnadam pier, which had been sat on and sung about, went up in a sheet of flame. As dawn broke, detectives wrapped up chunks of incinerated pier and sent it to the forensic labs. in Glasgow. After careful scrutiny, the experts gave their decision...beyond all doubt the pier had been burnt.

The police searched around for someone to blame, while the sabotage rumours grew stronger. At last...they produced a story appealing for a priest, who had been seen near the area in a yacht, to come forward. The elusive cleric failed to appear. Whether the Vatican was called in to help the police I can't say. When this one wore thin, they decided that the fire could have been caused by a spark from the funnel of a wee puffer. There is no truth in the rumour that MI5 are looking for Para Handy!

SAW never allowed the SB time to get over their burnt offering. Within two months, the Army information offices in Glasgow had been attacked with bricks and bottles. The Army office in Sauchiehall Street had five smashed front windows and two at the back..Between the Army and Navy offices, damage was estimated, by an army spokesman, to have reached £1,700.

Who can tell what the anonymous Scots will do next? Certainly not the Special Branch, whose illegal activities, telephone tapping, etc., are getting worse, nor the Labour Party-oriented Scottish CND. This has been the strength of Scotland's underground gnomes, they have broken the first rule in the political leader handbook. They don't have a leader. I can only wish the Special Branch 'Good Hunting'. And don't get into your car without looking for bombs under the bonnet. --Ian S. Sutherland (Reprinted from FREEDOM)

SABOTAGE

(FREEDOM 10 April 65)

On the night of March 27 and 28 we broke into Faslane--a Polaris Base near Garelochead. We then immobilised a truck and a pneumatic compressor which works the cement silo. We removed 50-100 wooden levels (this means the whole of the new road will have to be replanned.) Our purpose was to halt or to slow down building of the new road for as long as possible and to be as much of a nuisance to the building of the base as possible. We will continue to do this for as long as we can.

Yours, SCOTS AGAINST WAR

Roots of Revolt

(CONT'D FROM PAGE 16)

The most interesting tendency and, I think, the most valuable in the long run has been the increasing concern of people within the anarchist movement with education. There are even signs that young people are more aware of the function of education in authoritarian society. When the London County Council education Committee attempted--and they will probably still succeed--to close down the libertarian oriented Risinghall school, a part of the LCC educational complex, it was pupils, not outside agitators who organised a protest march through London to the Prime Minister's Downing Street residence to demand the school stay open. At many schools anti-election campaigns were originated to coincide with mock-elections so that the anarchist and anti-militarist case could be put. The number of spoilt ballots--usually less frequent in school elections where it is all an exciting game anyway--exceeded all expectations. In a number of cases the distribution of anti-conscription leaflets to senior schoolchildren has caused a furor largely because these leaflets stated a good case well and had a large effect on more intelligent students. Recently young anarchists in Essex wrote a leaflet describing to pupils the functions of authoritarian education and pointing out ways in which this could be resisted by pupils. The publicity received--which could only in the long run help the anarchists--was tremendous, the local press howling with dismay. There has been no Berkeley here yet but the various incidents mentioned above may be the early signs of producing the sort of young people who will not tolerate being crushed by anonymous corporate identities.

At present the biggest question mark here is the color problem. The politicians are already attempting to ride the tide of racial mistrust and the three major parties are united in their approval of immigration control. Deserted by any human imagination they see no alternative to the ghetto but the unthinking and blinkered prevention of any coloured immigration, oblivious to the fact that this is in itself liable to create intense distrust amongst our coloured community and a ghetto mentality. The West Indian population, the largest and most confident of Britain's coloured minorities, does not seem unduly perturbed by the growing political racialism, partly because it has in any case been forced to become more or less self-contained and partly because of its traditional political apathy. Without putting too strong a point on it, this community with its spontaneity, exhuberance, and distrust of authority is possibly the most basically libertarian in the country though this does not stem so much from political bias as from the situation in which they find themselves here. It is difficult to see where we go from here but I think it possible that within the next few years the libertarian movement here is going to find itself facing a concrete, day-to-day problem the like of which it has rarely, if ever, faced before. The obvious starting point is that immigration should be unrestricted and there should be a full-blooded effort to point out to those people, whose bigotted attitude--the result of mental idleness rather than intransigent fascism--bedevil the solution of this issue, that the West Indians have as much to offer us as we have to offer them, that our national life can either be enriched by our patience and mutability or it can be permanently blighted.

Obviously in this country at present there does exist the basis for a new pacifist/libertarian movement, less ambivalent in its attitude to authority that the last one and less idealistically inclined to take for granted its own powers of persuasion. It remain to be seen whether it will be mobilized. --Ben COVINGTON

LETTERS

Just recently a copy of your magazine The Rebel Worker came into my possession. I am very much a member of the working class---my father is a miner in the Rhondda and I am a quarryman in a remote village in West Wales, Consequently, your magazine expressed a lot of my own politic opinion (if that is the right word to use).

Could you inform me how it is possible to get further copies of The Rebel Worker? Also, is it possible to get a copy of IWW songs, there are some flames of discontent in the quarry where I am employed and occasionally working.

Deri SMITH
Llandysul, Cardigan, Wales

*

We sold most of the 45 copies of Rebel Worker #3 which you sent us at a CORE & an anti-war-in-Vietnam demonstration. Those 45 disappeared in 3 days and we haven't even gone around to bookshops yet. Send 50 more. It's really a great issue. Except for the mimeographing.

Barton STONE
Berkeley, California

*

We liked Rebel Worker #3 very much. Those we had were snapped up like hotcakes. I think the format which you have adopted is the best one as it gives you room to deal with subjects on a serious basis. Workers today are no longer physically hungry, but they are hungry for information, and not only about industrial matters. One of the greatest condemnations of most "radical" papers is that their attitude to workers is analogous to cheerleaders at a football match (American style not soccer). They first of all deal with struggle itself in a most primitive manner ("rahrah strikes are good") when what is needed is information and analysis so that when workers do fight they fight on their own ground and they fight to win. Secondly, the average radical paper treats the worker as if he is as the boss would like him to be, a philistine, without interest in art, education, psychology, history, etc. etc. Thus the socialist movement itself has contributed to the debasement of working class life. They treat him (and believe him to be) the object of history not the subject.

The reason for this attitude is obvious. Leninism, Fabianism, etc., etc., all preach that the ordinary bloke cannot understand society and that this is the role of the elite who, armed with the sacred texts, will lead him unknowing into the promised land. It is this attitude which separates libertarians from authoritarians.

So keep up your broad coverage in The Rebel Worker although as you develop I would like to see more description of what modern industry in the US is really like, more reportage (inside news if possible) and analysis of new managerial techniques and workers' resistance and offence.

If we in England can help you in any way or if you see anything which you want us to cover just let us know.

Ken WEILER
London Solidarity Group
London, England

*

Please send us The Rebel Worker, official quarterly journal of the Chicago Branch IWW. We wish to receive The Rebel Worker from its first issue. We have strong interest in the emancipation of workers in the age of automation.

I. Shigeo
The Three-Penny Review
Nagano-shi, Japan

*

We have to have some way to contact the younger generation to get them interested in the class struggle or it won't be long before the IWW will go out of existence. So it is up to you young fellows to devise ways and means to get the IWW back in the industries where it belongs, so that workers will get some benefit of their struggles and have a goal to drive at such as the six hour day to do away with unemployment. We all know it was the struggle for the 8-hour day that put the IWW on the map in years gone by....

O. N. Peterson
Branch Secretary, IWW
Seattle, Washington

LETTERS, cont'd

I received The Rebel Worker a few days ago. What impresses me most about it is that it deals with all sorts of questions which the traditional radicals consider "non-political" but which are actually of the greatest concern to most ordinary people (such as rock and roll and child-raising) and it does not treat of these things from the point of view of the "superior" intellectual decrying the ignorance or backwardness of the masses. The test of a revolutionary publication is very often much more what questions it concerns itself with rather than its formal political "line" in the narrow sense. I have, however, I must confess (despite the fact that we publish a mimeographed bulletin ourselves) an antipathy toward mimeographed magazines intended as popular organs. But I suppose mimeographing is the inevitable consequence of being poor.

Martin GLABERMAN

*

I enjoyed Rebel Worker #3 very much, especially the article called "Mods, Rockers and the Revolution." I was also glad to see the excerpt from Summerhill—the fact that you printed it shows that revolution has to be in every sphere, and we have to examine everything we do, because no area is free from the influence of our sick society. Your conception seems to be opposite that of the traditional groups: they concentrate on the political area and call themselves revolutionary, but in every other area they are quite conventional. This has probably been their greatest hindrance to growth—who except a schizophrenic will accept a philosophy which calls for revolution in one sphere and reaction in another? You seem to be revolutionary in everything, hurray!

Judy KAPLAN
Philadelphia, Pennsylvania

NOTICE

The Rebel Worker is growing in circulation and influence. To continue growing we will need more and more the increased participation of our readers. In a more than rhetorical sense this is your journal. Send us your articles, letters, comments, drawings, cartoons, suggestions, government secrets, job information, clippings, news of "unofficial" strike and slow-down actions, demonstrations, sabotage, etc., etc.

Letters from an Organizer

15 July 1965

I'll endeavor to tell you of some of the conditions existing here in the Yakima Valley as compared with the Wenatchee. There is no soft fruit here this year and approximately a 40-45% apple crop. These growers have treated the workers so miserably on the wages and living conditions that year by year the workers are bypassing Yakima and are heading North to the Wenatchee area. The cabins here are nothing but shacks, not fit for pigs. The majority of the farmers do not have any cabins. When they need you they can be nice to you; when they don't need you then it's "get out of town, you bums!" The police tolerate the jungles during the summer and fall months but when the last apple is picked they go down to the jungles and burn them out and shoot holes in their stew pans and tell them to hit the road.

As soon as the work opens here in the spring they raise the rent on flophouse rooms $2 or $3 a week. Groceries go up, meals in the restaurants go up--everything goes up except wages, and they go down.

If pickers should happen to have a 10-dollar bill and come out of a tavern they are promptly picked up by the police, and there goes their last money and they have to hit the road. There have been industries that have tried to establish in Yakima but the Chamber of Commerce will not permit it as they want cheap labor for the farmers, canneries and warehouses. The pickers starve during the winter months so they have to go to work in the spring at whatever wage they can get.

The growers are worried about getting pickers for their 45% crop this year--what will they do when they have a full crop?

The day is rapidly approaching when these growers will have to change their attitudes toward the workers and realize they are men and not animals.

In regards to the Wenatchee area: they have the heaviest apple crop in the history of this valley extending from Wenatchee to the Canadian border--a distance of about 100 miles of nothing but solid apples. At picking time (approximately Sept. 15) they will need thousands of pickers to harvest this crop. I have a Wobbly up there now distributing papers and pamphlets for the IWW.

The conditions in the Wenatchee area are greatly improved over the Yakima area. This does not mean that they cannot stand improvement; they must be improved. They do pay 2 or 3 cents more per box for picking and their living conditions are much improved over this area.

I encourage all workers to head North this fall for the harvest...

25 July 1965

Well my old car finally broke down. While I was down in the lower valley the 22nd, looking at a propping job, the transmission went out and I had to be shoved all the way to Yakima. I am junking it and am keeping the wheels and tires as I can use them. I am on a good deal to buy a '55 Oldsmobile for $200. I will get it tomorrow if the loan goes through. I am sure I'll get the car. I must have one to drive to work and also to continue with the organizing for the IWW.

Yakima is a Ghost Town. Yesterday I went downtown and I think you could have shot a cannon down main street and not hit anyone. I looked around and took a survey of the cheap hotels, rooming houses and flophouses (of which there are many). Every one of them had a sign out, "Rooms for Rent." In an ordinary year when we have peaches and pears you cannot find a vacant room anywhere. Yakima has a population of 50,000 and when you see it so deserted as this it gives you an eerie feeling. This is the worst I have seen it---in all the years I have been here.

The Spokane area is a large area covering the Columbia Basin with thousands of acres of sugar beets. We should have an IWW branch in Spokane, also the border town of Lewistown, Idaho, but both these towns are over 200 miles from Yakima. This winter when I'm not busy I will try to go to these towns and other towns in Northern Idaho and Eastern Washington. Of course to make any good connections a person will have to spend about 10 days on such a trip. If my finances permit I will go this winter and try to line up some delegates in these towns.

Now for some facts about the sprays that you may not be aware of. They are making the sprays stronger each year as each year the bugs grow immune to the sprays being used. Two years ago a hop field by Toppenish was being sprayed by plane. This spray drifted and then settled over a Mexican family's home, putting four of them in the hospital with two of them in a serious condition for a long time. In a field adjoining the Mexican home was a pasture in which there were cattle. A large number of these cattle died from the spray. I read in the paper the other day where the spray company paid for the loss of their cattle, but there has been nothing said about the injury to these people --no settlement offered. The value of the slave's life is very cheap.

This is one of the hottest days we have had this year--it must be 100 degrees. Hope this finds you in good health.

I remain,

A worker,

George C. UNDERWOOD

The preceding letters were written by Fellow Worker George Underwood who has lived and worked in the apple country of the Northwest his entire life. He signed up only seven months ago and already has spread the seeds of discontent for hundreds of miles around. His work stands as a tribute to what one man can do--but now his organizational drive requires a great deal of outside help. Though f.w. Underwood has never pleaded for money, we believe that this drive needs funds and helpers to sustain it through the picking season. We encourage all those Wobblies who can, to go North, as Underwood says. And if you can't directly participate, then send a contribution to National Headquarters.

If you are a student, then write to the Chicago Branch, 713 Armitage for a leaflet describing the Wobbly Northwest Organizing Drive and distribute them around your campus. ---editor

News from Spain

On February 23 Barcelona workers struck for a minimum daily wage of $3.36 (the national average is 85¢ a day), free unions, and the legal right to strike. Under the direction of the ASO, the Workers' Syndicalist Alliance (which includes the CNT and the UGT), 3000 strikers demonstrated in front of the government-controlled "Workers' Union" building, where they were attacked and dispersed by cops, although not before the doors and windows of the TU were broken.

5000 students at the University of Madrid demonstrated on February 24 after a series of lectures on Christian Democracy was banned. After the guardians of law and order attacked the demonstrators and arrested a large number of them, including the foreign newsmen present, protest demonstrations took place in Universities in the entirety of Spain. Franco was forced to permit freely elected student unions, amnesty for all students, and freedom of speech and political action. Foreign observers consider these demonstrations the most serious student opposition to Franco yet.

In Mieres, a town in Austurias, 1000 demonstrating miners demolished the local fuzzhouse on March 13 after fifteen of their number were arrested. Fuzzes had to be imported from the provincial capital to bring the miners under control.

On April 7, 8000 engineering workers in Madrid demonstrated for a $1.94 minimum wage, free unions, and the legal right to strike. In Barcelona, 3000 workers struck on April 30; the demonstration lasted more than two hours despite attempts by the cops to break it up by violence.

At the Nicolas Pit of the Mieres Co., in Asturias, workers struck in protest of the suspension of thirty-five miners for digging insufficient quantaties of coal. At the Ensidesa Mine in the same area, miners struck in protest of the failure of the owners to give a legally required pay raise. Both of these strikes began on May 25 and, according to latest reports, are still in progress.

6800 blast furnace workers went on strike for a bonus increase near Valencia on May 31. As far as is known, the strike has not yet ended.

On May 31, 3000 workers at the Sestao shipyards near Bilbao struck in protest against the lack of safty precautions and demanded compensation for those involved in an explosion on a ship under construction on May 29, in which three workers were killed and six injured. On June 8 they returned to work when the management agreed to their demands.

Due to the slowness in getting labor news out of Spain and the voluntary censorship of all Spanish political news in the Free American Press, we have no information on more recent events in Spain.

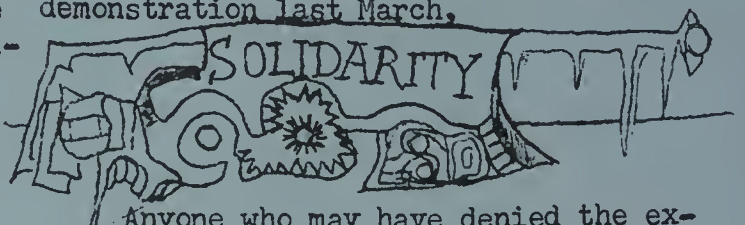
notes on the world revolution of youth

Some members of the Chicago IWW Branch issued a leaflet for high school students, explaining the class basis and authoritarian character of official education and urging kids to drop out and join the IWW. This controversial leaflet has resulted in considerable publicity (mostly locally, although the right-wing National Review covered it in a department called "The Week," 13 July 1965, p. 578) and several new members, mostly dropouts. Branch members hope to issue another leaflet urging collective action, solidarity, disruption and "unofficial" protest in schools.

"Dropouts appear with the regularity of automobiles rolling off the assembly line. Secretary of Labor W. Willard Wirtz describes them as 'the outlaw pack' who are 'unemployed today and will be for the rest of thrir lives at a cost to us of $1000 a head a year...' Michael Harrington calls them 'The New Lost Generation' and James B. Conant's more strikingly descriptive phrase 'social dynamite'is enough to pull every citizen up sharp. J. Edgar Hoover, in a report on the outbreak of violence in nine Northern communities, pointed his finger at the dropout, rather than racists or communists, as Public Enemy Number 1." (Advertising copy from the University of Michigan Press for The Dropout: Causes and Cures by Lucius F. Cervantes.)

Details of recent developments in the "World Revolution of Youth" (this is the slogan, by the way, of a New York kids' gang) can be found in Resurgence #2, publication of the Resurgence Youth Movement in New York. IWW organizer Bruce Elwell, presently in Philadelphia, is editing a special issue of Way Out devoted to youth revolt. A mildly interesting though somewhat pessimistic article on the British rhythm-and-blues scene appeared in Anarchy 51. (All these are available from the Solidarity Bookshop at 25¢. 50¢ and 30¢ respectively.)

A group called Mods Against the Bomb turned up at a CND demonstration in Glasgow, Scotland, in early Spring. They were criticized by a writer in Freedom, also (apparently) by some members of the Independent Labour Party, and defended by members of Glasgow Solidarity. I have no details on what happened. Meanwhile, in Chicago, several members (including an organizer) of the Rolling Stones Fan Club showed up for an end-the war-in-Vietnam demonstration last March.



Anyone who may have denied the existence of a youth revolt quickly abandoned his illusions on the Fourth of July, when riots of young people erupted across the country. Consider this item from Time magazine (16 July 1965, p. 78-9):

"In Rockaway Beach, Mo., 3000 visiting youths were incited when police arrested and jailed a drunken boy for giving a friend a piggyback ride on his motorbike. As word of the arrest spread along the beach front, kids in madras shorts and sweatshirts began to crowd onto the main street, chanting 'Let him out! Let him out!' Hundreds climbed to the roof of a nearby dance hall, began to pelt the police below with bottles, cherry bombs and rocks. Others broke in the windows of nine stores, turned over a patrol car. When 125 policemen from neighboring counties arrived and began to search nearby tourist cabins, they discovered, among other things, a room that contained 42 people, including four nude girls."

I found nothing of any interest which attempted to relate these riots with the revolutionary movement, even by implication. As far as I can tell, the traditional Left hasn't said a word about them. The Chicago American, however, a cheap daily in the tradition of yellow journalism, printed an editorial calling the riots "insurrections" and demanding that the rioters be treated like any other insurrectionaries.

"A Leningrad Soviet Communist Party official demands tougher compulsory education laws to cope with Russia's growing dropout problem. Yuri Lavrikov, a secretary of the Leningrad City Communist Party Committee, wrote in the newspaper Pravda that too many pupils were dropping out of school. Citing evidence strikingly similar to Western studies, Lavrikov said school dropouts are more likely to get into trouble with the law and make inferior workers." (Clipping from a Philadelphia paper)

The extreme Right has developed its own line on youth: the Beatles, for instance, are part of---guess what?---a Communist plot! It seems that the CP, through its clever use of mass hypnosis in the music industry, is preparing American youth for riot and revolution. It's all described in minute detail, complete with 159 footnotes, in a 26-paged pamphlet called Communism, Hypnotism and the Beatles, published by the Christian Crusade.

Students at Hyde Park High School rioted on two different days over a dispute with the administration on the handling of their graduation ceremonies. It was kept out of the papers for the most part, though considerable damage was done, particularly in the cafeteria. It is a predominantly Negro high school, and one of the key points in the youth rebellion in the Chicago area.

"The vast majority of motorcycle outlaws are uneducated, unskilled men between 20 and 30, and most have no credentials except a police record. So at the root of their sad stance is a lot more than a wistful yearning for acceptance in a world they never made; their real motivation is an instinctive certainty as to what the score really is. They are out of the ball game and they know it---and that is their meaning; for unlike most losers in today's society, the Hell's Angels not only know but spitefully proclaim exactly where they stand.

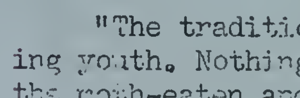
"I went to one of their meetings recently, and half-way through the night I thought of Joe Hill on his way to face a Utah firing squad and saying his final words: 'Don't mourn, organize.' It is safe to say that no Hell's Angel has ever heard of Joe Hill or would know a Wobbly from a Bushmaster, but nevertheless they are somehow related. The IWW had serious plans for running the world, while the Hell's Angels mean only to defy the world's machinery. But instead of losing quietly, one by one, they have banded together with a mindless kind of loyalty and moved outside the framework, for good or ill. There is nothing particularly romantic or admirable about it; that's just the way it is, strength in unity." (Hunter S. Thompson, in The Nation, May 17, 1965; p. 523-4.)

"...the student has been depersonalized, dehumanized, alienated from himself. That's what the student revolts are about. When students 'senselessly" ripped apart a New Hampshire resort town, it was their target that was senseless, not their revolt." (A college student in Philadelphia, quoted in The Free Speech Movement and the Negro Revolution.(News & Letters, p. 33.)

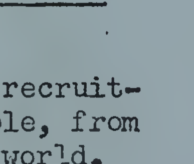
es

"The traditional organizations of the 'left' succeed less and less in recruiting youth. Nothing separates these organizations, in the eyes of young people, from the moth-eaten and rotten institutions they meet on coming into the social world. The revolutionary movement will be able to give positive meaning to the immense revolt of contemporary youth and make it the ferment of social revolution if it can express what youth is looking for and can show young people effective methods of struggle against a world they reject." (Paul Cardan, Modern Capitalism and Revolution; Solidarity, pp. 94-5.)

Resurgence #3 has just been published, reprinting the Chicago IWW high school leaflet and other articles on education, revolutionary theory, etc. A Chicago issue will probably appear forthwith.



Franklin ROSEMONT



BERKELEY WAS ONLY THE BEGINNING

Recently students have begun to emerge from the so-called post-war political apathy---a development, by the way, not particularly welcomed by the very same bourgeois critics who lamented that apathy, Through increasing interest and participation in the civil rights struggle students have begun to develop a consciousness of themselves and an understanding of their own situation, along with an understanding of this odious system that becomes increasingly oppressive.

Far from being only the "attention-seeking protests of children against parent-substitutes" (as Prof. Lewis S. Feuer, amateur psychologist, would have us believe); far from being a "Communist plot of Maoists and Castroites," etc. (as Feuer, now posing as a political analyst, again missed the point); far from being instigated by "non-students," "Bohemians" and outside agitators, the rebellion at Berkeley last fall was the manifestation of an indigenous revolution, conscious in its opposition to the "benevolent bureaucracy" of Clark Kerr and all that stands with it. Needless to say, the forces of reaction---the police, the politicians, the press, the state, and the businessmen---came to the aid of the administration. Even the few papers who gave somewhat favorable (or accurate) coverage managed to explain away the significance of the revolt by attributing it to the "bigness" of the university, thus obscuring the main accusations made by the students against the university: that the administration had ceased to treat them as human beings, and instead treated them as commodities; that the universities had become "factories to produce technicians" to fit the requirements of industry; that the university administration is totally allied with the "status quo."

These students, according to a writer in the NY Times Magazine, were not "political in the sense of those student rebels in the turbulent thirties; they are too suspicious of all adult institutions to embrace whole-heartedly even those ideologies with a stake in smashing the system. An anarchist or IWW strain seems as pronounced as any Marxist doctrine." (14 Feb. 1965; p. 25).

Two excellent pamphlets* have recently been published on the Berkeley revolt and are available at the Solidarity Bookshop in Chicago. Students in Revolt is a Solidarity pamphlet containing a narrative of the events last Fall, and a review of Hal Draper's pamphlet The Mind of Clark Kerr, itself a review of two books by University of California President Kerr, in which his reactionary ideology is exposed. The Free Speech Movement and the Negro Revolution was published by the Marxist-Humanist group News & Letters, in Detroit. It contains articles on the student revolt itself ("Berkeley Fall" by Mario Savio and "Inside Sproul Hall" by Joel L. Pimsleur, "the only journalist to spend 12 hours in Sproul Hall when the students were arrested..."), and articles relating the Berkeley revolt with the Negro Freedom struggle, In Raya Dunayevskaya's article is included a brilliant critique of the views of Kerr and Feuer (spokesmen for the faculty minority who opposed the student strike: scabs).

The Berkeley revolt and strike united thousands of students who proved that they could run their own university and run it well, without a bureaucracy. They disowned the bureaucratic machine, what it stood for and what it wished to make of them---unthinking parts for an automated giant corporation. Along with this they realized how profoundly bureaucracy (as well as automation) has affected our society, and how their own destiny was bound up with that of the worker.

The Berkeley Revolution was only the beginning of the student revolution, and the student revolution is only part of the revolution of youth, who threaten the survival of the system which refuses them the right to themselves.

Penelope ROSEMONT

*Students in Revolt; Solidarity, 30 p. 15¢. The Free Speech Movement and the Negro Revolution, News & Letters, 53 p. 50¢.

EVERYTHING MUST BE MADE ANEW

It does not take more than average perceptiveness to realize that the traditional Left is dead (more or less), in theory and practice, and that a new and vital revolutionary movement is gradually emerging. But this raises at least two important questions which have been insufficiently discussed in U.S. radical papers: why and how did the traditional Left lose its relevance, and how is the new revolutionary movement fundamentally different?

It is useless, it seems to me, to attempt to answer these questions from any standpoint other than that of a complete revaluation of all revolutionary values. Young radicals today are, for the most part, undogmatic, experimental, free, looking for solutions to problems that the traditionalists don't even know exist. (Witness, for example, the condescending approach of the traditionalists to the problem of alienation.) The traditionalists see very little (although they are good at pretending) of what is happening in the world today. How could they? They use their opaque marxism (and sometimes anarchism and syndicalism) to shut themselves off from anything in the real or surreal world that might challenge their cherished, archaic beliefs. They wave their hands in the darkness and pretend they possess the light. They have, with their dogmatism, sectarianism, lack of imagination and general inability to see what's happening, cast a dark shadow over what should have been the brilliant and unfettered development of radical thought.

Paul Cardan* has brought a sort of Diogenes' lamp into this political darkness. Modern Capitalism and Revolution can perhaps best be "reviewed" by reading its synopsis, reprinted in this issue of The Rebel Worker (pp. 4-7). It is the latest of several excellent publications of the London Solidarity Group, with whom we are in rather close contact and in nearly complete agreement with their analysis of contemporary bureaucratic capitalist society and with their revolutionary perspective.

The book is described in a brief introduction as "an attempt to describe the main features and to analyze the dynamic of modern, fully industrialized, capitalist societies from a revolutionary socialist point of view." This Cardan does with a conciseness and yet a thoroughness which the hurried or casual reader with no fondness for searching through huge tomes in remote libraries should find gratifying. It also presents the clearest, deepest and most thorough-going critique of the traditional Left available today. Finally, it offers a perspective for today's revolutionary movement. It is, as far as members of the Chicago Branch are concerned, an IWW perspective.

> "Meaningful action is whatever increases the confidence, the autonomy, the initiative, the participation, the solidarity, the equalitarian tendencies and the self-activity of the masses and whatever assists in their demystification. Sterile and harmful action is whatever reinforces the passivity of the masses, their apathy, their cynicism, their differentiation through hierarchy, their alienation, their reliance on others to do things for them and the degree to which they can therefore be manipulated by others----even by those allegedly acting on their behalf."
>
> from Modern Capitalism and Revolution

Modern Capitalism calls into question everything that socialists have been supposed to take for granted. And its attention is always focussed on just what it is that makes socialism worth fighting for. "Socialism is not fundamentally about production.... It is about freedom." (p. ii)

But read the synopsis. Read the book. And buy extra copies for your friends.

F.R.

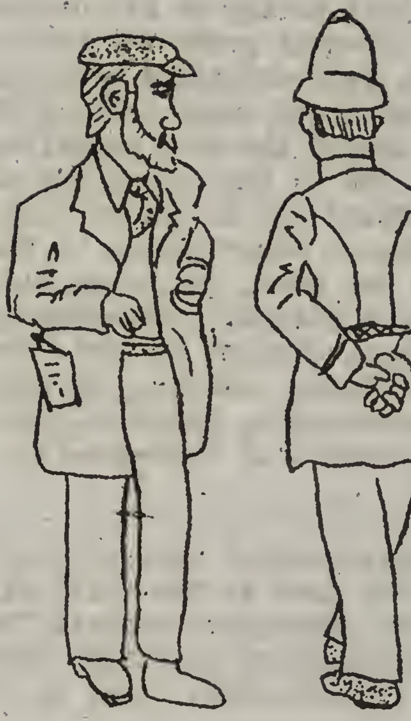
* Modern Capitalism and Revolution by Paul Cardan. Solidarity 1965. 107 p. paper $1

Malatesta



Errico Malatesta was born in Santa Maria Capua Vetere in the province of Caserta, Italy on December 14, 1853, met Bakunin when he was only seventeen years old, was exiled from Italy when he was twenty-five and returned several times only to be exiled each time within a year for his radical activities. At the age of sixty he strongly took issue with Kropotkin over the latters support for the Allies during the War. He returned to Italy in 1919 to stay until he died in 1932. This is about all that most historians know, or care to know, about Malatesta.

To set the picture straight, Vernon Richards compiled his book*, which stands as undeniable proof that Malatesta was more than an untiring anarchist activist, he was a superb writer and theoretician. Better than half of this book is devoted to Malatesta's extensive writings most of which Richards translated and compiled according to twenty-seven topics, ranging from "Anarchism and Violence" and "Money and Banks" to "The Workers and the Intellectuals." The book is rounded out by a short fifty page biography and an essay of equal length entitled "Malatesta's Relevance for Anarchists Today."

This arrangement makes the book an excellent introduction to the anarchist case, for Malatesta's writings are lucid and free from pettiness. But Richards does not see his book as another volume to be added to the small shelf of anarchist tracts already in print. His reason for publishing is based on his belief that Malatesta is relevant for our age as are none of the classic anarchists. For him Malatesta is a bridge to us, because his anarchism is firmly grounded in the same industrial society we live in. And because he possess two highly esteemed qualities of the Industrial Revolution--pragmaticism and realism.

In his approach to anarchism Malatesta was pragmatic, for he was an anarchist because it "corresponded better than any other way of social life" to the kind of life he wished to live. And he was realistic in his approach to politics, in his un-apocalyptic view of the revolution and in his non-sectarian views towards participation with others in common struggles.

But these aspects of Malatesta's thought don't make him any more relevant than any one whose ideas are lucid and free of trivialites. Malatesta is not ome of those rare individuals who seems to speak to two generations in the future . He dealt with the people and and the events of his time and he did that quite effectively. But we today have to face very different problems. We can no longer pretend that capitalism has changed only insignificantly since the twenties. Capitalism since the twenties would be unknown to Marx, much less Malatesta. And when Richards maintains that the problem remains the same for us as Malatesta, and then claims that the problem is one of authority, he is merely begging the question.

What we must face squarely is the fact that under capitalism the methods of exploitation have changed and along with them the tactics of defense employed by the exploited. Exploitation is more subtle: the ruling class having at its disposal the entire gamut of mass media and the cornucopia of consumer goods with which to entice the proletariat into the most hideously stupid, self-defeating behaviour. But even dullards eventually realize that they have exchanged their freedom for a bucket-seat, and when this dawns upon them they can devise the most magnificent schemes to beat the credit and installment syndrome. And in this way these assumed sheep protect themselves and in the process revolutionized the defensive tactics traditionally associated with the oppressed. For instance never before in history have so many people used the system to beat it at its own game, and never before have they so effectively defended themselves from such a distinct anti-organizational basis. Direct-action demonstrations, wildcat strikes, student boycotts are all kinds of protests which are outside the rules of established society. No wonder that every petty, drivelling bureaucrat, whether in government, business, the unions or in school administrations, screams "FOUL" at the prospect of rank-and-file direct action.

---

* Malatesta, His Life And Ideas, edited by Vernon Richards (Freedom Press, 1965) 309p cloth$5.00 paper $2.00

The affluence of modern capitalism and its bureaucratization individually are responsible for these two changes; and collectively they lead to the third major development of modern society, the metamorphosis of the lumpenproletariat. The lumpens can no longer be relegated to the dank, black forces of reaction, they must be correctly seen as the most oppressed and the most revolutionary force in our society.

Malatesta is relevant to anyone of these tradition shattering developments in only the sense I mentioned previously, that is, in his clear thinking. What he says about unionism for example highlights the most serious defect for the radicalization of the lumpenproletariat. Malatesta saw unions as "a means whereby workers can begin to understand their position as slaves, to want their emancipation and to accustom themselves to the solidarity of all the oppressed in the struggle against the oppressers." This latter point, class consciousness, has not yet been evoked in large segments of the lumpen.

Though the lumpens become radicalized individually by evermore increasing bureaucratic rationalizations, in the same manner as union men do through the machinations of their "leaders," they along with the workers will require somekind of organization to give them a sense of community, of solidarity. What kind and how it will arise remains to be seen. This is an impasse we must face. To maintain that Malatesta speaks to us with more relevancy than the classic anarchists may be true , but for Vernon Richards to believe Malatesta can contribute significantly to the radicals perspective in modern society is dangerous, because the prospects for relevancy are not to be found in his writings, but in the new society emerging.

Knowledge to further the revolution will be found struggling with people and witnessing them evolve their unconscious radicalism into a mode of expression, as they will, as have all oppressed peoples throughout history.

The activist among the dispossed and exploited would do well by reading the writings of anarchists and libertarian socialists for they all contain important lessons that the traditional Left has never learnt. And now can be added one more volume to his list, but I would suggest that he insert it in its proper alphabetical place.

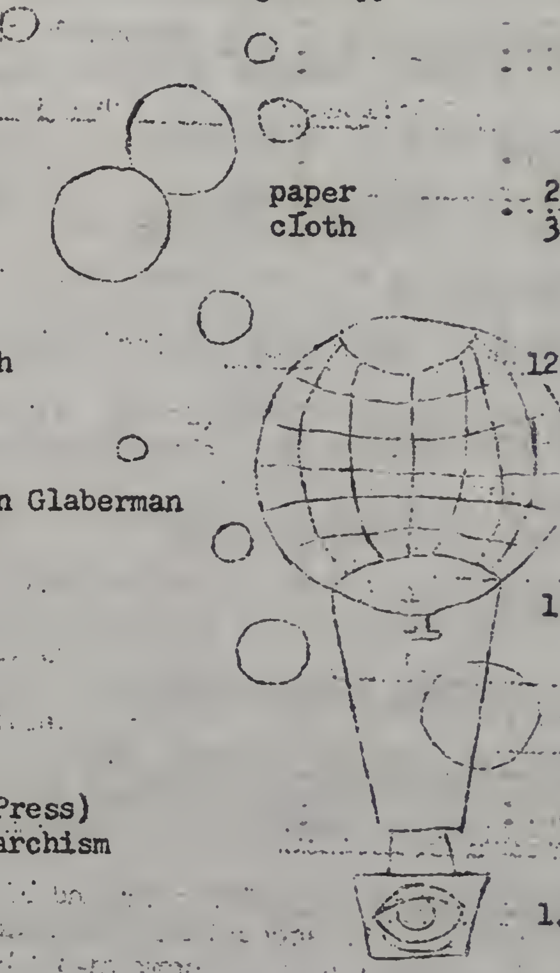
SOLIDARITY BOOKSHOP

......The only radical libertarian bookshop in the United States, ~~is run~~ by members of the Chicago Branch of the Industrial Workers of the World. The following list is a brief selection of available material. An extensive, descriptive catalog will be issued shortly for 25¢.

The Industrial Worker Monthly paper covering world labor news	one-year sub single copy	$1.00 .10
The Rebel Worker Quarterly journal of the Chicago IWW Branch	6-issue sub single copy	1.00 .25
IWW Songs: To Fan the Flames of Discontent 31st edition of this labor classic; songs by Joe Hill, T-Bone Slim, Richard Brazier, etc.		.40
The IWW: Its First Fifty Years by Fred Thompson Wobbly history summarized from 1905 to 1955	paper cloth	2.00 3.00
Rebel Voices: An IWW Anthology by Joyce Kornbluh Articles, songs, cartoons, photographs; a Wobbly panorama of 414 big pages		12.50
Union Committeemen and Wildcat Strikes by Martin Glaberman (Facing Reality)		.20
Eros and Civilization by Herbert Marcuse Revolutionary implications of psychoanalysis		1.25
Marxism and the Intellectuals by J. R. Johnson (Facing Reality)		.25
ABC of Anarchism by Alexander Berkman (Freedom Press) Clearest and best exposition of communist-anarchism		.40
Les Manifestes du Surrealisme by Andre Breton French text		1.50
Nadja by Andre Breton English translation of one of the most important surrealist works		1.95
Apologies to the Iroquois by Edmund Wilson A study of the American Indian nationalist movement		3.75
The Mass Strike, the Political Party and the Trade Unions Rosa Luxemburg's important libertarian Marxist classic		.80
The Accumulation of Capital by Rosa Luxemburg (Monthly Review Press)	paper	3.95
Peret's Score: Twenty Poems by Benjamin Peret Seeds of surrealist subversion	paper	1.75



Modern Capitalism and Revolution by Paul Cardan (Solidarity) Important critique of the traditional Left		$1.00
Students in Revolt: The Battle of Berkeley Campus (Solidarity) Best pamphlet on the Fall 1964 student revolution		.15
Errico Malatesta: His Life & Ideas, edited by Vernon Richards Selections from, and a study of, the Italian anarchist agitator and thinker (1853-1932)	paper cloth	2.50 5.00
Poems of Humor and Protest by Kenneth Patchen (City Lights)	paper	.75
The Welsh Political Tradition by Ioan Bowen Rees (Plaid Cymru)		.25
The Labyrinth of Solitude: Life & Thought in Mexico by Octavio Paz	paper	1.95
The Theater & Its Double by Antonin Artaud Revolutionary essays on the theater	paper	1.95
Direct Action by April Carter (Peace News)		.25
Negro Americans Take the Lead (Facing Reality)		.50
Hungary '56 by Andy Anderson (Solidarity) Important description & analysis of the first proletarian revolution in a modern industrialized, bureaucratic country		.75
Anarchist Cinema by Alan Lovell (Peace News) A study of Jean Vigo, Luis Bunuel and Georges Franju		.35
Lenin and Workers' Control by Tom Brown (Syndicalist Workers Federation)		.35
Punching Out by Jack Kramer (Facing Reality) The American working class today		.20
Workers Battle Automation by Charles Denby (News & Letters)		.25
The American Worker by Paul Romana and Ria Stone (Facing Reality) A factory worker's account of the class struggle at the point of production, with commentary by Ria Stone		.25
Indignant Heart by Matthew Ward Autobiography of a Negro production worker		.50
Anarchy 51: Blues, Rhythm and Blues, Pop Folk		.30
Leninism or Marxism? by Rosa Luxemburg (Independent Labour Party)		.15
The Sexual Revolution by Wilhelm Reich Contains "The Fiasco of Sexual Moralism" and "The Struggle for the 'New Life' in the Soviet Union"		2.75

WHAT'S HAPPENING

Who really tolerates dissent? Few really tolerate it, but most have no way of implementing their intolerances. This winter we found out how a few did succeed...

It concerns the Solidarity Bookshop: Several patriotic groups wandered in and declared their dislikes. They treatened our removal. Some brought in the police, a few of which felt it their unofficial duty to harrass our landlord. Suddenly we were told to move. Ah ha, we said, cause and effect! We were wrong, however; neither the cops nor our neighbors were guilty of the act.

Our real crime, it turns out, was that we were feeding bad ideas to innocent young minds. The bookshop was directly across the street from a high school and the board of education decided that was too close. (Admittedly we had leafleted the school, invited in and talked with many students.) The authorities banished us from the vicinity. Happily, we now have a new shop not far from our old location which is even better for our needs (low rent).

During this melee we managed to turn out our bookshop catalog and now another Rebel Worker (trust that the next will be sooner). We hope to come out with some more R. W. pamphlets and have hopes of having a printed Sabotage Anthology out in the spring if we can get printing costs.

One encouraging trend we note has been the proliferation of anarchist and libertarian oriented literature published not by starving anarchists but by wealthy capitalist firms. Anarchism (as marxism has already become) has become good business. There is hope, though, that many hitherto unavailable or costly tracts will be made available. Sociologists, historians, and others are beginning to take the view that libertarian minded movements constitute material of historical and scientific merit. There is word that the physical anthropologists are making studies of anarchist skulls to determine cranial capacity. Historians are pointing out that certain anarchist ideas may have influenced the history of the 19th century and the Pleistocene Era. Sociologists have even admitted that anarchists and socialists beat them to the idea that workers spend most of their time avoiding work.

But the anarchists have not been standing passively by. In Chicago a new anarchist group has just been formed. One of our contributors, Louise Crowley, has been instrumental in setting up an anarchist-libertarian socialist aggregation, the Seattle Group.

Many of you are probably aware that the I.W.W. Agricultural Drive in the Northwest will be picking up this summer. The time for such a drive could not be better. George Underwood, our man in Yakima, has been organizing in the I.W.W. for two years now. He is a farm worker and has signed up many Yakima members. Further south in California, the grape strike is still on. This is the first time in too long a time that a large group of farm workers have stood together against the bosses. Farm workers everywhere are thinking union and are determined that things are going to change. Fellow worker Underwood is going to open an office this spring. He urgently needs help. This summer will be the most important one in 30 years. Pitch in and join us.

Peter Allen, making his first appearance, minus his Capuchin monkey, in the Rebel Worker with this issue remains an active Chicago revolutionary.

Jim Evrard is a contributor to SOLIDARITY who thinks Capitalism Stinks and who is active in a working-class school in Munich much like the old I.W.W. Work Peoples' College in Duluth, Minnesota.

$$$ Money not!!! counseling

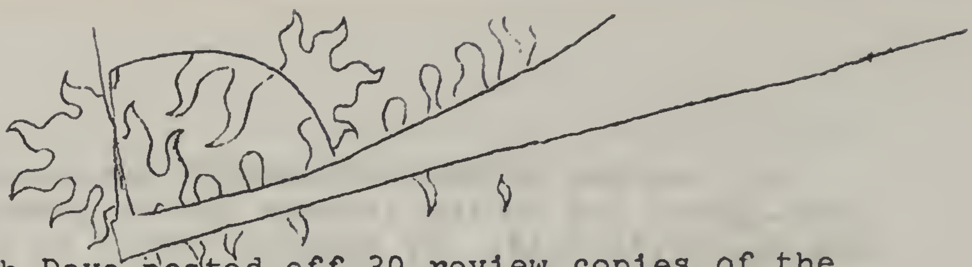
The Chicago Daily News has been running a series on how the war on poverty "works" in one Chicago neighborhood. The concluding article had this to report:

> The trouble with Chicago's war on poverty, according to the people of one neighborhood, is that too many of them are still poor.
>
> "There's nothing they can do for somebody like me," says Roy Howard, a tall, rangy, gray-haired man who speaks in the twangy tones of the West Virginia hills.
>
> "Oh, yeah. Welfare projects. Heck, I don't need no counseling. I need money."
>
> One of 25,000 Southern whites who have moved to Chicago's mid-north Uptown area since the end of World War II, Heward has a wife, four children and no job.
>
> Two years ago he was laid off as a freight handler for the Chicago, Burlington and Quincy R. R. and since then has supported his family by showing up every morning at one of the day-labor agencies sprinkled around the Wilson-Broadway elevated station.
>
> "They send you out to some freight yard or factory, and pay you $1.25 an hour," he says.
>
> "After they deduct for meals, you come away with maybe $8 a day.
>
> "They say the four-eyed jokers who run the places keep $10 for every $8 they give us. And if you get hurt on a job, forget it. Next time they tell you, 'We don't want to see you around here again.'"
>
> But the antipoverty program's Uptown Urban Progress Center says it has a fulltime, semiskilled job for every able-bodied man. Why doesn't Howard get one?
>
> "And what do we eat while I try to get It?" he asks.
>
> "See, you can't turn loose from day labor to take a good job. They got you.
>
> "That You-bain Progress Center, I went there and a man wanted to send me out to apply for a job that paid $3.21 an hour. And I said no.
>
> "The first paycheck wouldn't have come for two weeks. When I don't bring home my $8 every day, we don't eat.
>
> "Iasked the man, 'Can you tide me over until the first check comes?' He said "What do you think we are, the Salvation Army?'
>
> "So I said forget it."

The Golden Convolvulus

When the 1959 Obscene Publications Act came along, it was hailed as a liberalising measure. Material was "obscene" only if it tended to "deprave or corrupt" those who were likely to, "read, see or hear" it. Presumable depravity was the "depravity" of erotic stimulation; corruption - the "corruption" of an antisex ethic. If experts could show in court that the publication of material was for the "public good" or "in the interests of science, literature, art or learning," the publishers would not be convicted. Work, such as "Lady Chatterley", that was approved of by the literary establishment, could be let through the net - but woe betide those who did not endear themselves to acknowledged experts, a conviction could mean a fine, up to three years in prison or both.

The Direct of Public Prosecurtions was allowed to give a warrant to the police enabling them to seize (using force if necessary) material that was considered obscene and published for gain. They could also seize documents relating to the "obscene" material (and a relationship can be pretty obscure). Several amusing test cases cropped up, that made an ass of the law, so in 1964 the powers of police and justice were extended. Stencils, plates and negatives could be seized, and, if a conviction was obtained, they could be destroyed. Most important of all, a person could be prosecuted if he was found in possession of material that was obscene, if he intended to get it published "for gain." He did not have to get the material published before being prosecuted. Intention was enough. Writers, artists, editors and photographers were laid open to prosecution. The law still stands, and in spite of parliamentary assurnces that it was intended to prevent the spread of pornographic photos, it can be used against all literary and political magazines that offend antisex prejudices. These misgivings are confirmed by recent happenings in Blackburn. Dave and Tina Cunliffe run a small literary press; their thick, duplicated magazine "Poetmeat" is a prominent mouthpiece for the young and unestablished poets in England. Standards are becoming high, and poets, both here and in the States are enthusiastic about the magazine. Dave and Tina also bring out small booklets of poetry and anthologies on various themes. The latest of these was "The Golden Convolvulus"; an anthology of eroticism ranging from modern poetry to press cuttings, from comments on censorship to childrens' songs and graffiti (I was pleased to see 'the shit-house poet strike again'). The booklet was intended to offend a few prejudices, to protest against and ridicule sexual repression; it printed a few "fucks" and "cunts" but (unfortunately) provided no sexual stimulation.



On July 13th Dave posted off 30 review copies of the "Convolvulus"; the G. P. O. intercepted these, seized them and complained to the Balckburn police. On July 27th plain clothes police visited the Cunliffes and took sample copies of all their publications, which they forwarded to the Director of Public Prosecutions. They were very insistent on getting the addresses of the editor, and the printer of the covers, but Dave and Tina refused to divulge these.

On August 10th the police returned copies of all the books except the "Golden Convolvulus", which the Director of Public Prosecutions is still considering. Dave gave assurances that he would distribute no more copies of the erotica anthology until the case was over, and he has kept to his word.

Not content with this the police returned on August 19th brandishing a search warrant, and proceeded with a thorough probe. They seized ALL copies of "Golden Convolvulus" and issues of the periodical "Poetmeat" and an inoffensive collection of Tina's poems. They took the stencils and original manuscripts, not only of the "Convolvulus" but of the latest issue of "Poetmeat". Worst of all, they took all the Cunliffe's files, mailing lists, invoice records, etc., thus making it impossible for them to carry on with any of their publications. Dave and Tina quoted the law to the police, telling them they were only entitled to seize material that could be considered "obscene and publixhed for gain". The reply - "If someone reads it you've gained a reader." So much for liberal safeguards.

--LLOYD (Resistance Vol. 3 No.8)

* * *

On Friday, December 4, 1965, prosecuting counsel aaid that 'merely to reprint writings from lavatory walls is hardly of any literary merit because any male can see it without reading the book', and defence counsel considered it 'nonsense to say that a person who knows and uses certain four letter words will have his life changed by seeing them written down'. In his summing-up speech the Assistant Recorder said that 'you may think some of it is dirt for dirt's sake.' but you must judge the book as a whole...

The jury finally reached a decision that I was not guilty of publishing an obscene book for gain, not guilty of sending a postal packet containing obscene literature but that I am guilty of sending a postal packet containing indecent literature. The Assistant Recorder said he'd decided not to send me to prison but fined me £50 with three months in default of payment.

So, now the GOLDEN CONVOLVULUS can be sold in bookshops, news-agents and on the streets but it cannot be sent through Her Majesty's Mail. My deepest thanks to all those witnesses who waited but were never called...and to...the others who gave moral support.

Literary freedom has won a resounding victory in a samll provincial town.

--DAVE CUNLIFFE (Freedom Dec. 11, 1965)

An american foot-note: Ed Sanders, editor of Fuck-You--A Magazine of the Arts, was arrested on January 2 at his bookshop, the Peace Eye Bookstore in New York, on charges of possessing obscene publications for sale.

Scots Against War

As we left the Scots Against War in our last issue they were merrily displacing wooden levels marking a proposed roadway at Faslane, a Polaris Base in Scotland. Since that time they have been successful in converting the Armed Forces information offices in Glasgow into brick proof fortresses, stink-bombed an Army exhibition which had expropriated a beautiful portion of Scottish country-side, and on May Day poetically expressed their disgust with labour leaders like George Brown all over Scotland along with many other rank and file militants.

Later in May SAW raided, in the warming rays of the naked sun, a large Civil Defense shelter at Portlethan, five miles south of Aberdeen. The documents they removed contained a great deal of information about CD preparations in Scotland. These documents relating to CD preparations in England were sent to peace militants in Yorkshire. A few days later several Aberdeen anarchists were arrested and questioned but on proving their alibis, were released. Weeks later painted slogans appeared on the Headquarters of the Royal Officers Corps. And several days later the Portlethen CD shelter took on the appearance of a three dimensional testing area for the wearing ability of paint.

This brings us up to date and we quote from the January 22 issue of Freedom:

> On January 7 at about 9 o'clock four SAW supporters made their way back to Portlethen Civil Defense HQ. The previous raids had been hasty and they wanted to do a thorough search and also render the bloody place useless.
>
> The entry was very difficult, more so because the drill broke, but finally the bolt of a cast-iron grille was sawn through and the lock of the door behind sawn off. Before the entry at about 10.20 the cables to the radio mast were cut.

Inside various good maps of installations were found but the filing cabinets (to which they had the keys) were practically empty.

The radio and telephone equipment were then put out of order, and one of the telephones must have set off an alarm, for they were surrounded after about half-an-hour heading for Aberdeen by a back road. Two police cars drew up and what followed convinced the four that they must eventually triumph over the State, because, Christ they're stupid. There they were with sacks of tools and stolen maps, in the dead of night, four suspicious characters, and they only took their names, saying there'd been an incident back on the road, then they drove off. When they were seen coming back 10 minutes later, the SAW people managed to hide a good part of the stuff before being driven to Bucksburn County Police HQ. There efficientcy reigned supreme once more.

The accused were sent to different rooms and Ian Mitchell tell me he had time to stuff the keys to Portlethen which he had got during the raid, and other incriminating evidence up a ventilator. They were then interrogated for a couple of hours.

I must however make one thing clear. There was no violence, there were no threats. New police methods you see, take a long time to get to this part of the country. The detectives were quite goon mannies and one of them was nearly converted to Anarchism.

The impression they gave was that they watched 'Z-Cars' too much.--'Ever been in trouble before?' 'No.' 'Youre in big trouble now' and 'Listen, I'll come clean with you' also 'I make no deals...' and 'I give the orders around here'.

They asked them to confess, saying it would go easier. But they didn't appreciate the humour of the suggestion that the sackful of tools and maps plus the fact that the SAW agents were there at the time were only circumstantial evidence.

Finally they were charged with 'theft by housebreaking' and 'malicious damage of property to the value of £750, belonging to the Scottish Home and Health Department'. What the hell have these places to do with homes and health!

They appeared in Stonehaven Sheriff Court on Saturday and pleaded guilty then were remanded for background reports. The sentence is on January 19 at 10.30 am.

When the accused got their property back they found that proposed leaflets, etc, for the Scottish Easter YCND demonstration had been taken and also letters and an Aberdeen YCND agenda. 'This,' as one of the police said, a free country'. There was nothing important taken, so good luck and many worried sleepless nights to them.

The sentence was two adults fined ₤120 each. Juveniles: one ₤50 fine and one two years probation. Appeal being lodged. Funds necessary.

Watching the War

"War is the health of the State. It automatically sets in motion throughout society those irresistible forces for uniformity, for passionate cooperation with the Government in coercing into obediance the minority groups and individuals which lack the larger herd sense. The machinery of government sets and enforces the drastic penalties, the minorities are either intimidated into silence, or brought slowly around by a subtle process of persuasion which may seem to them really to be converting them..Of course the ideal of perfect loyalty, perfect uniformity is never really attained. The classes upcn whom the amateur work of coercial falls are unwearied in their zeal, but often their agitation, instead of converting, merely serves to stiffen their resistance. Minorities are rendered sullen, and some intellectual opinion bitter and satifical. But in general, the nation in war-time attains a uniformity of feeling, a hierarchy of values culminating at the undisputed apex of the State ideal, which could not possibly be produced through any other agency than war. Other values such as artistic creation, knowledge, reason, beauty, the enhancement of life, are instantly and almost unanimously sacrificed, and the significant classes who have c-nstituted themselves the amateur agents of the State are engaged not only in sacrificing these values for themselves but in coercing all other persons into sacrificing them."

-- Randolph Bourne THE STATE

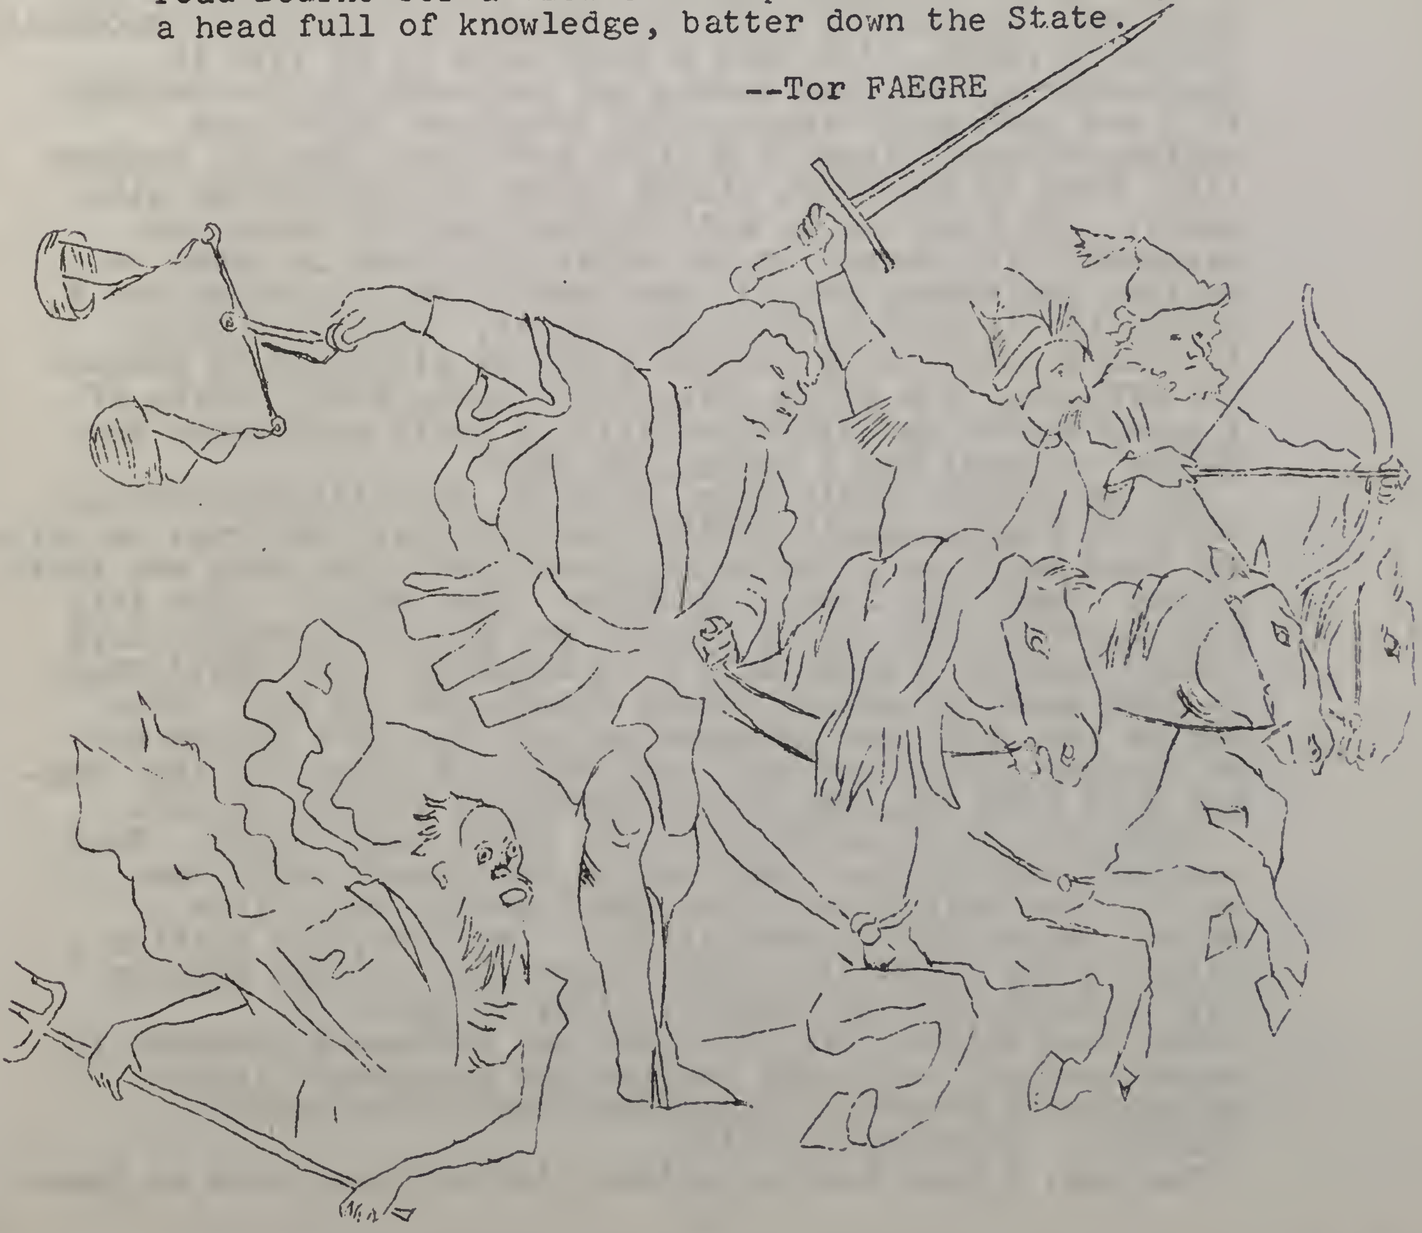
Bourne doesn't ring true anymore. His State was too obvious, too open. It sentenced objectors to the firing squad, jailed them, or had vigilante squads run them out of town. Viet Nam isn't World War I, but one still expects a little more of the old style suppression, news blackouts on American "mistakes", and a crescendo of enemy atrocity stories -- it hasn't happened, not yet anyhow. The machine no longer seems to need the old rationalizations. It can admit the war is a mistake, the issue a hoax, the whole thing a fraud and yet go right on cooking. Why bother wasting time stiffling dissent? Spend the time fighting the war. There is less patriotic fervour, but then there is less needed.

It all makes for a frustrating experience. Some suggest blowing up tanks. Others would sit in front of them. No one has a clear idea of how to stop the war. But if we are to end this mess we had better begin by understanding it: Then like a hungry dog we will look for the weak points, grab by the neck and hang on.

The Solidarity Group has started us on the way to understanding with a short but excellent pamphlet on Vietnam (Bob Potter: VIETNAM, Solidarity Pamphlet No.30 15¢) It claims a "dispassionate analysis...detrimental to all parties concerned." For Solidarity (and for us) the battle cannot be viewed simply as a peasant guerrilla war against bad imperialist aggressor. Viet Nam must be seen in the context of the world situation -- a world where the giant economic powers...are struggling for supremacy."

The pamphlet traces the history of the two Vietnams and how the people of both have been used. That the Vietnamese peasants are sincere revolutionaries is unquestioned. But how this dedication is used by Hanoi, Peking, and Moscow is an altogether different matter. "It is not the first time in the history of communism that bureaucracies have been founded on the sacrifices of millions of dedicated revolutionaries." Read the pamphlet. Go back and read Bourne for a view of our past troubles. Then, with a head full of knowledge, batter down the State.

--Tor FAEGRE



On the Unwholesomeness of Honest Toil

Last November, an article my husband and I wrote was printed in MONTHLY REVIEW. REgularly published writers may smile at our naiveté, but nothing like that had ever happened to us before, and we hadn't the slightest idea what to expect. As it turned out, we got almost everything from anathemas to praise; but of all of it, what confused me most were the honest workmen who rose indignatly to defend their addiction to work. Mostly, they came to us in a spirip of good will, sincerely puzzled that we could defend anything as indefensible as sloth, and condemn anything as laudatory as industriousness. Their sincerety merits a thoughtful answer.

Yet confronted in person, I always found it hard to give one. That work -- i. e., the labor one is constrained to perform in order to "earn" the right to food, shelter, and clothing -- should be a good-in-itself is a concept impodsible for me to grasp; I've sold a great deal of my life in eight-hour slices, anc always got the worst of the bargain. If I had been more highly paid, or worked under less unpleasant conditions, I'd still have been cheated, because life, even by the hour, simply cannot be cmmpensated with money. All that can be said is that lack of money can terminate life sooner in our societ, so that in order to prolong our years, we sell our days -- no; no matter how I phrase it, it just doesn't make sense, Whether a life is sold in toto on an auction block or piecemeal in personnel offices, it's still life that's being sold. Maybe if I accepted the aalability of life, I could comprehend the virtue of work; but I don't, and can't.

But if people didn't have to work, our diligent critics tell us, they wouldn't do it. That may well be true, we agree and they smile in satisfaction, confident they have won their point. Then it's I who's puzzled: what point? That idle people would waste their lives? but how can lives be more wasted than in a steel mill or a laundry? What could they do that would be worse? Watch television all day? That may be bad, with the programs we get, but it's not as bad as feeding punch-presses. Get drunk? but they do that anyway when they can, and with desperation instead of joy.

Maybe the point is that society needs their labor. That has been true in the past, but at the moment, with over 40,000 jobs being lost to automation each week, it's a rather anachronistic proposition. Besides, our critics s seldom argue society's need; their fear is that society will demonstrate tha dispensibility of their labor, any minute. If that fear has decreased somewhat in recent months, it's only because the government is now thoughtfully providing make-work jobs in the murder industry. That can't be it.

You see, I have been thinking, And defining work as labor performed under the duress of economic need or social custom, I cannot find any valid defense for it except as a dubiously necessary evil. For pay, the human workman degrades himself into an adjunct to an inanimate machine or into a brute beast of burden; and that act is a prostitution of his humanity.

There is, however, a thoroughly plausible explanation for this proletarian devotion to the cult of Work: it's a pathological condition, an industrial disease, one of the more malignant manifestations of that endemic Time-clock syndrome with which the modern working class has been inoculated...

The nineteenth-century socialist did not fall victim to this madness, by then as rampant among the working class as consumption and rheumatism. They recognized clearly enough that love of work was a monstrous perversion of the worker's human instincts, and they took the proletariat of their day roundly to task for allowing itself so to be corrupted. Note this, from Paul Lafargue's THE RIGHT TO BE LAZY (1880):

> And meanwhile the proletariat, the great class embracing all the producers of civilized nations, the class which in freeing itself will free humanity from servile toil and make of the human animal a free being -- the proletariat, betraying its instincts, despising its historis mission, hwas let itslef be perverted by the dogma of work. Rude and terrible has been its punishment. All its individual and social woes are born of its passion for work.

"Shame on th proletariat!" he added; and went on to propose a three-hour workday as the maximum compatible with human health and welfare, and entirely feasible given France's level of productivity in 1880; but to be reduced as new machines were invented:

> Our machines, with breath of fire, with limbs of unwearing steel, with fruitfulness, wonderful inexhaustible, accomplish by themselves with docility their sacred labor. And nevertheless the genius of the great philosophers of capitalism remains dominated by the prejudice of the wage system, worst of slaveries. They do not yet understand that the machine is the savior of humanity, the god who shall redeem man from the sordid arts and from working for hire, the god who shall give him leisure and liberty.

Engels noted the corruption of the British proletariat, but the housepainter-writer Robert Tressel described it best:

> In May, as the jobs increased and the days grew longer, they were allowed to put in overtime; and as the summer months came round, once more the crowd of ragged-trousered philanthopists began to toil and sweat at their noble and unselfish task of making money for Mr. Rushton. Papering, painting, whitewashing, distempering, digging up drains, repairing roofs, their zeal and enthusiasm were unbounded. Their operations extended all over the town. At all hours of the day they were to be seen going to or returning from jobs, carrying planks and ladders,

paint and whitewash, chimney pots and drainpipes, a crown of tattered Imperialists, in broken boots, paint-splashed caps, their clothing saturated with sweat and platered with mortar, The daily spectacle of the workmen, tramping wearily home along the pavement of the Grand Parade, caused some annoyance to the bettercclasses, and a letter appeared in *The Observer* suggesting that it would be better if they walked on the road. When they heard of this letter most of the men adopted the suggestions and left the pavement for their betters.

In America, the Wobblies had a word for such workers, and they spat it out with utmost scorn: Scissorbill!

Yet even socialism's resistance broke down, when after the Soviet Revolution of 1917 it was exposed to a new and more virulent form of ourgomania, the pathological addiction to work. Contrary to expectation, socialism had come first to a backward, agriculture-based nation, and the urgent need of the new socialist state was development of an industry that could hold its own in competition with the capitalist countries. Of necessity, work became the order of the day. If it seems a bit ridiculous that the poor devils who had fought a revolution to lighten their labors found themselves toiling harder than ever to sustain their revolution -- well, ourgomania is a madness, by definition. At any rate, it happened; and as capitalsim's necessity had been elevated into a GOOD, so too did socialism's. In the Soviet Union, diligent scissorbills got Stakhanovite medals. Glorifying the working class, Soviet idelogists found themsleves glorifying Work itslef -- they had to, for their heroic working class must continue to work, else descend to hoolinganism and bourgeois decadence, and fall prey to the capitalist enemies that ringed it round. So the cult of work was sold to socialist workers too, and soon they surpassed all others in their zeal. Working like piss-ants, they consolidated their socialist society, caught up with capitalism both industrially and militarily -- and have become so addicted towork they now strive even harder, aiming for a twenty-percent advantage. When they get it they'll undoubtedly raise the ante, become unable to conceive a life free from toil.

Indeed, they suffer from the most fearful depression at the very suggestion of it; and any ral threat to deprive them of their work, or even to reduce thehours of its duration, is quite likely to bring on hysteria andmay precipitate suicide. That itis fear of idleness and not that of payless which so obsesses the burgomaniac is demonstrated by his desperate resistance to all proposals for his emancipation, even those which carry with them provisions for the continuance of his income. He clings tenaciously to outmoded methods of production, that he may work the harder. Fearful that is a moment of unwonted clarity he may be tempted to revert to his natural inclinations, he often sets up elaborate precautions, enmeshing himself in debts for no other reason than to reinforme his need to work. In one serious form of the malady, the ouromanic whose job does not reduce him to the utter nothingness he apparently craves may remove himself to a distant suburb, in order to lengthen his unsatisfactorily short workday by several hours of strenuous freeway driving, and add yardwork to his extravocational chores. The advanced case (most often a childless worker with relatively well-renumberated skills, who least needs the additional pay) seelks another job, and moonlights. When this occurs the crisis may follow quickly, and the worker who escapes death revovers with a high degree of immunity.

The more spphisticated worker is apt to exhibit somewhat different symptoms. He claims that he himself would welsome his freedom from work, and it quite certain he could use it wisely and well, yet suffers from the delusion that he is alone, or nearly so, in his capacity for living. Others, he feels, would surely find a workless life unendurable, and be only corrupted thereby -- blindness to their present corruption, and his, being a universal concomitant of the disease.

BLACK INTERVENTION IN AMERICA'S DREAMS

BLACK INTERVENTION IN AMERICA'S DREAMS

BLACK INTERVENTION IN AMERICA'S DREAMS

One hundred years later: white agricultural slaveholders still fighting white urban-industrial wage-slavers over style for sustaining black labor force. (Klan rightly shooting and beating mostly white northern christians not ourlocalniggers.) So northerners are winning and are bigger and southerners want northern escape-from-unions new factories and are giving in. But the black man thinks Our King is winning.

One hundred years later: he still waits Something to be Done About rotten high-price food and flimsy easy-credit furniture and quarter-meter television and $20 more rent no maintenance apartments or live in projects and uninterested personnel offices and "social workers." (And that's only beginning of it and everything else is included and someone else can break out but you can't.)

And he waits change in northern toughcop and misidentification in court (if you disobey you may get caught. or someone else may get caught. and if you obey someone else may get caught. or they may get you anyway.) Cops obey higher cops and you stay out of their way or obey them. Cops don't think and with Whites and (sometimes) middle-class Negroes, maintain law and order and thank you for your help. But blackman law is Enforced and crime Prevented and youth can't stand on street corners (where every family has had young uncle, cousin, brother in jail) and no protection for anyone against cops lies.

One hundred and one years later and again one hundred and two, people get pissed.

Which seems thank-God healthy. Where problem?

Whites

Hungry editors at end of second season of (dogdays August) newspaper-selling riots assign reporters to keep on writing. Paperinches of Well-informed long-quotes and "analysis" columns again (as if they hadn't said it all year before) lie: people have no reasons and cops are absolved. Dumbcop humiliating mother and manhandling youth at start in L. A. is disbelieved or ignored (afterall, Alleged drinkingdriver pleaded guilty...rather than get bigger sentence.) Sameway with Chicago: firetruck drunkmurder is just routine "freak accident" news.

(But later white Opinion thoughts are confused (silent) when murdered turn out to be colored and facts are not like newsflash (police) reports. Whiteman "nearly killed by mobs" gets first aid and lives. Snipers never hit anyone. (Possibility of New Year's Eve style shooting in air, ignored.) Bullet marked cars are there but they all belong to colored people (maybe rioters.) At first TV says rioters are all young; but, like radicals, older rioters are slower and get caught or shot for funfear.)

Reactionary cops, soldiers release deeper hates (from not knowing and not belonging there) than the festive rioters. And politicians and machines no longer have contact and leave get-people-off-streets talking to christians. (All the king's precinct workers and All the king's clergy men couldn't put riots forgotten again.)

Blackmasses' frustration in hurting Whitey becomes his (blackman's suffering) demonstration (like non-violence) (but not civil rights movement which defends eternal Constitution law and order and so sit-ins are more urban American middle-class than Klan and win.) Liberals left say causes and correction and amelioration. More important, in '64 Goldwater hate-votes don't show in north and instead bad-conscience "Poverty" money (but still no real works and little hope.)

Negroes

America's Twenty Million("There's always been a lot of Negroes. But before 1960, Opinion writers weren' leafing through census summaries muttering 'How many Negroes are there?, anyway'.") colored people weren't shocked.

Radicals

Revolutionaries thought (somewhere got) the revolution is foretold; or thought hoodlums. Political types don't see rioters state (when explanation is demanded) "make Whitey listen" reform goals. No one thought "the young people have sensed the mood" and angriest, looking for manaction youth (not ivy kids who mostly guess rewards for propriety but others who sense "Boy" bullshit being rewarded) for a while chase and/or divert confuse cops and people celebrate their temporary freedom in their own community.

No one sees all-important expect it to end fatality and no one thought anthropology festivals and community license or saw implicit nothing-to-lose-but-chains values or remember our American own holiday youthriots. And old revolutionaries who are American Left without a revolution and are content or moving right-- see only Hoodlums, VIOLENCE!.

Anarchists (and psychologists) don't look for (even though horrible breakdown of all law) order; no reports of rape or group whitemurder. No radicals miss spontaneous voluntary organization which was not there. Marxists say "It could as easily be any poor." recognizing historical inevitability but not historical fact; Black people, not of white society, do not think to control it (or even attack whiteworld homes and powerlines) but -- like Quebecois -- only seek to control own community within.

But bottom teengang leaders do negotiate with upper spokesmen and even with satan cops and bring soldiers out of whiteworld jobs and don't give in. And masses do destroy pawn debt tickets and "your rent is late" realestate records and loot "fruits of their labor". So revolutionaries at best (better than newspapers) see this: Expropriation!, and proclaim the prophecy, promised land.

(Always "What does this historical event mean for Vanguard, us" never first what does it mean.) And so, planning and plotting history (That's what Lenin spent his time doing and he made it.), can't get into it; with or without black and whiteboy American-given skins. Can't get together without first planning to hustle something (of one's personal own) on everyone else. (Always selling The Way It Must Be Done door-to-door.)

All left agrees U.S. out of Viet Nam and no capitalists in the White House and no nationarmies should march across our continents and live friends-in-blue in our cities but can only think Workers or poor people and never other race american, human motivation non-workers.

Problems

All men are created equal; but, growing up different, live in 2 races. Someone said (in midst of leftwing changing party-line 1940's) "There is no Negro Question. The Negroes are right." America's White problem continues.

Whites grow up in culture of Big Future Ahead of You. Others (Negroes, Indians) do not. Don't see Johnsonpromise of Great Society or any other. Black man, unlike early 1900's immigrant, has 3 centuries acquaintance with promise land. As each child grows into member, again unlike melting-pot minorities, parents are not found to be old-country unfit. And besides, he gets tired of being black for whitefolks

So, blackman (with different background, different futures) continues black separate (sub-) culture. As if in some science-fiction "Space-Time Warp", in same spot at same instant as Other America. (There are not, of course, two America's. Newspapers and Michael Harrington who see only one half, glimpse the other occasionally as assorted problems.) And job, income, cars, home, vacations with pay great american promise goes to fewer; while population -- him -- increases. (and then some white kids don't want American dream he (blackman) can't get and think he's Hip for ignoring it so long.)

Peter ALLEN [October 1965]

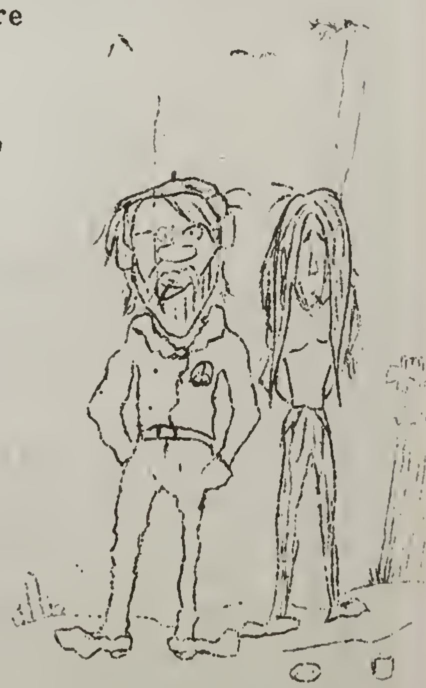
POPULARLY APPLAUDED and SCICLISTICALLY OBFUSCATED

Berkeley: The New Student Revolt by Hal Draper (Grove Press) 246p $.95
Revolution at Berkeley edited by Michael V. Miller and SusansGilmore
(Dell) 348p $.95
The Berkeley Student Revolt edited by Seymour Lipset and Sheldon
S. Wolin (Anchor) 585p $1.95

The "revolution" these three books are about is one gigantic and odorous crock of shit. No one can deny that the act of taking over the Berkeley campus was truly revolutionary, but everything since the tremendous Sproul Hall sit-in has been singularly lacking in ardor, revolutionary or otherwise. The events therefore taken as a whole cannot be termed revolutionary. To do so is journalistic hyperbole, misleading by its superficiality. What has come out of the Berkeley controversy besides a fantastic legend is a place in the young radicals' vocabulary of "student-faculty control", "Free Universities" and so forth. This is certainly significant, though one should keep in mind that the reforms that have grown-out of the Berkeley Disturbances have been just that--reforms. Nothing revolutionary has happened anywhere else; in fact nothing as simply colorful as the tar and feathering of professors that took place in this country during the 19th century!

The Free University of New York, the School in Chicago, the Swathmore Society and other educational experiments aren't anything to crow about, one can hardly entice a yawn. If this is "revolt" god help us. Yet on another level the events at the Berkeley campus are revolutionary, just as are "wildcat" strikes and draft dodging, but the authors of these volumes aren't talking about that for to do so requires a larger view of this sick society than they wish to admit to. To them "revolt" is merely an "in" concept and something which will grap the public. A concept of course that does have an element of truth in it.

The student revolt that does exist is smaller than the Luce corporation's imagination would make it, but in terms of activists it is a little larger than the much less publicized student "rebellion" that thrived during SPU's heyday in the early Sixties: larger because firstly of the immediacy of the War; secondly because of the complacent myths shattered in many youth by the U.S. intervention in the Dominican Republic; and thirdly because the bureaucratic trends of this society have become even more pronounced and many more are getting the shaft. All of these reasons for growth of the Left have resulted in a qualitative difference comparable to a generational one for students only three years apart on the academic ladder. The vast anti-Americanism evident on the "new left" is proof of this, as is the mark-



ed lack of enthusiasm for sitting around discussing the fine points of foreign and domestic policy exhibited by the young people in YPSL and SPU. Today's New Left wants action. They want a commitment to a purpose--a pity that that is the easiest fulfilled of desires, much like "getting religion." The point is, where do we go from the commitment?

The New Left is receiving all kinds of advice in that regard. Draper wants them to politize their communities; Goodman wants them to communalize their politics.* Draper deplores the lack of clear ideological thinking among the students and posits that this deficiency as the reason the FSM didn't persist thru the spring semester. Goodman doesn't exhibit despondency over this, he rather is stimulated by the community he found in Berkeley during his Spring visit. He bases his alternative advice on this experience.

He beleives that the wonderful dynamism that the FSM possessed, and which Draper freely admits grew out of FSM's political naivete, should be directed toward developing better communications among the young students and the faculty, and creating a real community from which politics can emerge in a meaningful sense. Furthermore Goodman understands the significance of the "social revolutionaries" at Berkeley, the hashish-users and the "Filthy Speech Movement," whereas Draper remains utterly blind to their relevancy. He in fact reduces himself to hysterical name-calling in refering to these people as nihilists! Goodman on the other hand must be commended for his insight into the need for a New Left, one that is more than just a political expression of a superficial ideology.

Yet those who perceive the frivolity of Draper's traditionalist approach grow impatients with Goodman's reflections. Berkeley and many SDS and SNCC centers of activity are communities for the particpants, but isn't there the possibility of moving beyond these centers to the disaffilated elsewhere? The dynamism of the movement is providing the outside world withthe fruits of the labors of these groupings, but when that dynamism is dissapated one fears that the movement will fall apart as the erstwhile "peace movement"did after the signing of the Test Ban Treaty, Or will this movement remain and transform itself into a few insular, scattered communities of dissent? And will it leave the field open to the stalinists to again drag out their frail, shrivelled tit of a program that they always have ready with the pathetic expectancy that the masses will suckle at it? This is the saddest and most terrifying of possibilities.

PET
EVAPORATED
MILK

Problems and opportunities must be met with understanding now! We can't wait. We have to build a truly revolutionary movement by reaching out to people on their terms. This means we talk to students about controlling their schools directly and not school boards or,worse, city halls. When they begin to smash their teaching machines we will know that we are getting someplace. With workers, we must understand their distrust of bureacracies and the overriding pride they take in that part of the job they can control; obviously we have to encourage them to extend this control. When they start smashing their time clocks we shall know that the revolution is around the corner. The most myopic prejudice that the New Left will have to dispense with is that only the most dispossed are worthy of identification. Both on the job and in school and in their everyday life, people are beginning to verbalize the major problems of this society as the suppression of their alienation, through unlimited cultural escapism and consumption and the increasing division of people into order-givers and order-takers.

---

*Those interested should read Draper's book, it's filled with advice and also the best description of what happened. Goodman's views are contained in both the Dell and Anchor books, but probably best in the former which has a reprint of his Dissent article (Spring'65). The Anchor book, a testament to Goodman's statement that the FSM was the best re- — researched and documented movement in history. Among the reams of boring analyses it contains one worth reading, Henty May's "Impressions" of the students and non-students (the community) around the campus.

All of these workers and others--students and the unemployed, experience our society in bsically the same way. No matter who they are, they are ordered about and constantly humiliated. Its not impracticable to express to them the arbitrariness and cruelty of heirarchies both in factories as well as in welfare agencies and schools and their total superflousness. Nor is it difficult to explain that the basic problems of society are not solved by a rise in the Standard of Living but in fact are hidden by it. And that this is the whole purpose of the "Great Society"--to obfuscate the real issues about who will control this society, the people or the bureaucrats.

Its not absurd to advocate a radical change, its imperative! Any genuine New Left must do just this; otherwise what's the use of wallowing in self-righteous parlance? Yet the New Left won't be able to do a damn thing until it sees beyond the various surface "issues" to the basic contradictions of modern capitalism.

Though I have rambled to some extent all of this does relate to Berkeley, for there in one of our finest institutions of learning who was benefitting? Not the students. Nor the faculty. The basic problems of a meaningful teacher-pupil relationship increased with the university's budget. Just as a worker's real problems increase with his paycheck. The students and faculty took action to cut through the bureaucracy and get on with their purposes. Workers also wildcat. The students and faculty haven't suceeded, they took only one step. They actually won't succeed until the workers do; when the people who work in factories and offices run them then the students and faculty will run their schools.

Berkeley was one battle in a war more and more people are waging against an absurd, regimented, and sanguinary system. In this sense and only in this sense was there a "revolution"on Berkeley's campus last Fall. But none of these books see it this way. A pity, for their authors are in for a shock.

Bernard MARSZALEK

5 O'CLOCK WORLD

People are always talking about advertising, propaganda, and manipulation of public opinion in general, but they rarely get specific. I would like to take the concrete example of a concrete popular song about the five o'clock world to illustrate some aspects of the techniques of manipulation to which we are constantly exposed.

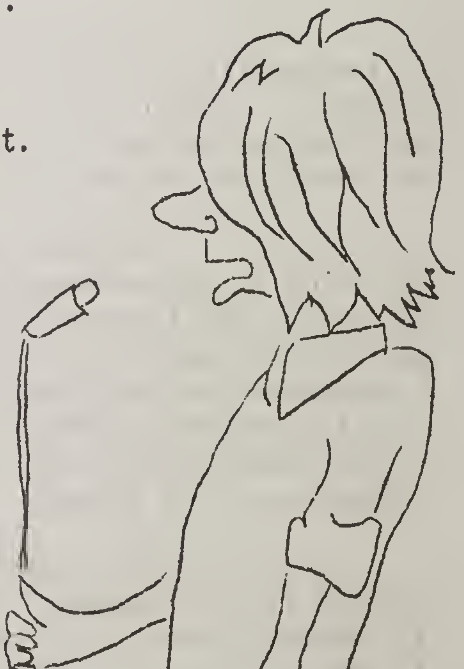
But first a word of clarification. This talk of manipulation is often brought up by smug, pseudo-sophisticated individuals who think they themselves are exempt, who think propaganda is effective only on the "peasants" below them. These people think that responding to manipulation techniques is a matter of insufficient intelligence, naivete, "human weakness", or letting yourself be taken for a sucker. If there were only fewer "stupid" people in the world, they pretend, the problem would be solved.

This approach is fundamentally wrong. It is rather the fact of not responding to their techniques that would indicate there is something wrong with you. One of the most basic techniques they use is made possible for them by the lousy condition of "our" capitalist society. In this miserable society of ours, many of our most fundamental needs and wishes are constantly and systematically frustrated. Modern psychology has discovered methods whereby this condition of frustration can be exploited by offering us partial satisfaction in the form of surrogates, that is substitutes of inferior quality.

Let's exemplify this on the basis of the text of the song. It begins by indicating how miserable our work day is, using the phrase "another day down the drain." What human being who has ever worked for his living in our society would not respond to that statement? You don't need to be "stupid" to respond to that one. You only need to have to work for a living. Under the inhuman conditions of work in our sick society, work time is in fact time cut out of your life, another day down the drain. Up to this point then a song like this one fullfills one of the functions that folk songs used to fulfill in the past, namely to help people alleviate their sufferings by giving expression to them.

Then comes the verse: "But in the five o'clock world, when the whistle blows, no one owns a piece of my time." What working person hasn't felt that? When you work, you don't own your time anymore. The company does. "You may own your soul, but the company owns your body." As far as your boss is concerned, your work power is a commodity which you sell on the "labor market" as the economists call it. (As you know the slave market has been abolished.) And what you've sold, your friend the boss puts to good use in his own interest, regardless what human misery this may cost you.

No propaganda yet. Up to here, it could even be the beginning of a revolutionary song. You can imagine how the text should go on: "Take over the work day. Take over the factories and manage them yourselves. Don't let anybody own a piece of your time before five o'clock either.



But here comes the twist. Up to now, if you are a normal working person, the text of the song has said "Yes" to some of your profoundest human strivings. If you are a normal human being, with normal human feelings, wishes and sorrows, your emotional response has been positive. You have been "softened up for the sale." Not because you are "stupid" or "weak", but because the text up to now *really does* correspond to your needs and wishes. *This is an important point for the understanding of manipulation techniques*. It always starts out by offering partial satisfaction for a genuine human need. You are now ready for the message.

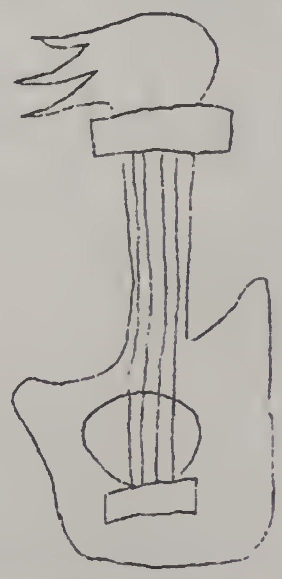
And what is the message? Find yourself a fair-haired girl after five o'clock, who will make you forget the misery of everyday existence in our society (until tomorrow morning at eight o'clock). How sweet! And the girl? What does she get out of this? As you know, in real life, relationships between people built upon a basis like this dry up in a matter of weeks, or months at best. So the message offered by the song turns out to be first rate establishment propaganda.

For three reasons (at least).

First, it suggests we seek the answers to a real problem in an unreal world. There is a whole collection of pop songs, movies, radio and television programs whose basic tendency is the suggestion to escape from our miserable real life into a dream world, instead of taking active steps to change the real world. In this song, it takes the form of a dream girl waiting for me at five o'clock to make me forget my misery by attending to all my frustrated wishes of the day without having any needs or demands of her own. (Nice role for your girls, isn't it? But don't fret; our loving entertainment industry is busy creating dream boys for you.)

Second, it suggests an individual solution to a social problem. The problem of inhuman working conditions can be solved only in the factory or office itself by collective workers' action, not by each individual going home and overtaxing his wife or girl friend.

Third, it suggests we accept a surrogate for a fundamental human need, a surrogate in the form of sexuality. Don't get me woong. I am not putting sexuality down. As an activity in its own right between two people who dig one another, it is one of the best things mankind has discovered yet. But as a substitute for eight hours afday of my humanity? No, Thanks! As a matter of fact, this tendency we develop in this sick capitalist world of ours, to make too many demands of sexuality, is another of the things that creates human misery, because it inevitably leads to disappointment. Sex is wonderful, but it is a wonderful thing in itself, not as a substitute for the many frustrations and miseries our inhuman society causes in us. If we demand the latter of it, it will disappoint us. (And then we blame it on our partner.) The frustration caused by inhuman working conditions cannot be solved except by changing these working conditions. All suggestions that we seek surrogates instead of making work human are propaganda for they imply the suggestion not to take action to solve the basic problem, an inhuman social order.



This type of argument is often misunderstood. It does not imply that you should stop digging pop music. You can sing a lousy text to swinging music. You can go on dancing to the music and ignore the text. Furthermore, this argument does not suggest that song writers are conscious propagandists for capitalism. As individuals, they themselves may be as much victims of brain washing as anyone else.

The point is, we can go on digging pop arts, but we can at the same time keep our eyes open for the propaganda hidden in them. The heart is not the natural enemy of the head. It is only the miserable conditions of our society that make it seem so.

WINDY CITY EMERGENCY

Laughable Unlaughables
Unborn wailing night children
Dropped like coal flakes
                    singing
In earth's sullen furron of the new world they were all looking at
Redeemed in a hurricane
(The eye hovering this spring)
Risen on ten thousand legs at various places
On multiple artillery torch helicopter thoughts
Shattering clattering on new horizons
Floating insurrection motions
After the wheels across iron unconscious pastures
Sing out brothers and sisters
Earth Air Fire Water

Mentionable Unmentionables
Witches and warlocks : vietcong street gangs
Unembraced save in red and black magic
Afternoon alchemy
Dust will not burn nor melt, must be submerged
Stone will not burn nor melt, must be smashed
Hate will not burn nor melt, must be swallowed
   By ten thousand timeless laughing antichrists

The year of the beast, the fire horse
With hooves of solid oak

Touchable Untouchables
Suddenly, or with all appregations possible
Remember : if it all unfamiliar, this is the Change
                                        It Is Now

Will bends and sinks
Lead guilt soaked nastiness of straight and crooked crosses
Burning crosses and double crosses
A five pointed star
A six pointed star
A seven pointed star
A star with ten billion points that
Has become a circle
Turning : the revolution

LETTERS

I dug the hell out of your number four. I was impressed by the varities of different points of view you've united under one cover. It should be possible for me to tell you in a discussion "You're wrong you're all wrong, you're completely wrong, you're talking thru your assholes!" and then go on working with you together on what unites us. Unfortunately, throughout most of the history of the traditional left this has not been the case.

Your criticism of "revolutionary" groups without women is good. If they're not faggots, there's something wrong with them.

I was glad to see an article stressing among other things the need to consider the theoretical and philosophy foundations of a radical position. The doctrine that the head is the natural enemy of the heart is integral to Anglo Saxon culture. Whereas this doctrine on the continent remains more exclusively associated with facism and the right in general, in America and England it affects the radical left as well. It is an inhuman doctrine, and should be exposed as such, in all its subtler forms as well.

I second Ken Weller's request for more reportage on industry, with analysis. Students and intellectuals like myself in fact have different troubles and needs from industrial workers, but any intellectual who thinks he can be free in an unfree society is off his rocker.

Yours for solidarity,
Munich Jim Evrard

Dear Editor,

As a new york wob, and a female, i'd like some more information on the upcoming anarchist-pacifist youth conference to be held here this month. i saw it mentioned in issue 4 of the rebel w worker, which by the way, was rea-ly beautiful.

i can't agree with craig beagle that there are hardly any rebel girls (i know many myself) but i think that the number of women involved in politics has always been proportionately lower than the number of men. i don't think the proportions any different among the radical groups than anywhere else.

yours for the revolution
judi sigler
NEW YORK IWW BRANCH

Dear Friends,

I am taking my sophomore year at the Rome Center of Loyola University of Chicago. I think THE REBEL WORKER is a tremendous publication. Could you please start me a one-year air mail subscription, figure out how much it will cost, and bill me? Also, could you send me several sample copies? I would like to see if I can get more people to subscribe.

Sincerely yours,
Brooks Lewis Erickson

Dear Friends,

Thanks for the REBEL WORKER which we think is a good paper. I read most of the items with great interest. We hope you will continue to send it to us, and we in turn shall send you our DE VRIJE in return.

Fraternal greetings, for
DE VRIJE anarchist monthly
Arthur Mendes-Georges
Rotterdam
The Netherlands

Dear Friend,

Despite the date of your letter we only received it yesterday so i guess somebodys reading... we got the copies of mods rockers and revolution and the latest r.w./excellent as ever. i still think that its the best political magazine being produced anywhere at present - of the ones i've come across, of course.

The highpoint of public popularity of blues is now probably over -- the days when wolf's smokestack lightning crawled into the top thirty and john lee hooker crawled into the top twenty for a tail-end dice are past. however th residue remains and its possible now to write seriously on the subject for jazz magazines as well. (viz Jazzmonthly - to which Mike Rowe and I contributed the first of a two part epic we are doing on chicago blues) certainly this year's blues fest will be a sell out, whereas count basie won't be and ornette coleman, my vote for the most lyrical of all alto-ists presently working an avant garde vein, wasn't. we have jimmy lee robinson, buddy (yeah, yeah), shakey horton, fred mcdowell, roosevelt sykes, jb lenoir et all coming and this year's should be the one to end them all. my rough guess is that big mama willie mae thornton's going to go thru this year's audience like a knife. no one's really expecting anything from her because no ones heard me 'n' my chauffeur.

i like r. w.'s insistence on the revolutionutricional value of rock but i think its a sight too optimistic, at least applied to this country. our censors get much less steamed up about rock than about eve of destruction type shit. the trouble is that big mods rockers thing needs explanation would you like an article? promise it will be factual and not overly pessimistic. the big rocker-mod crisis is almost certainly passé. it began just pre-beatles and seemed to disintegrate, at least as far as open manifestations were concerned as the beatles stormed to popularity (viz Pop goes the beatle). as the beatle-fad subsided the crisis came out into the open once again. the mods, as described in my pice, dress-wise, began to seek victums. the rockers, whose name came simply from the fact that they went on digging rock via records, juke boxes etc, after the craze had died down and ballads came back (trad jazz uggh), never manifested any open hostility towards mods and what offended the mods who were much more overtly rebellious (ie rockers will usually say that we're doing no harm, just enjoying youth before we settle down in a suburban nest) was the rocker's insistence on ultimate reppectibility and their constant endeavours to anaesthetize opposition, by organizing charity drives, church rocknroll, etc. the rockers were much more interested in motorbikes than rebellion per se. the mods picked on them and for their part were interested in largely aimless rebellion per se. now the whole thing seems to be submerged. only one mod rock group here, the brilliant Who who do create a real storm of sexuality and rebellion (my next song is going to be anti-bosses, anti-war, anti young marrieds!

LONDON

Charles Radcliff

How to Make Work for the Unemployed.

Much has been written lately about various new ways and tactics of carrying on the class struggle to emancipate the workers from wage slavery.

Some writers propose to "organize with the unemployed;" that is, to feed and house them in order to keep them from taking the jobs away from the employed workers. Others again want to organize a Gunmen Defense Fund to purchase machine guns and high-powered rifles for all union men, miners especially, that they may protect themselves from the murderous onslaughts of the private armies of the master class. Very well; these tactics MAY be perfectly good, but the question arises: Who is going to pay for all this?

Estimating the unemployed army to be about five millions in number and the board bill of one individual to be five dollars a week, we find that the total board bill of the whole unemployed army would be twenty-five million dollars per week.

The price of a machine gun is about $600 and a modern high-power rifle costs from $20 to $30. By doing a little figuring we find that fifty million dollars would not be sufficient to buy arms for the miners, let alone the rest of the organized workers. Every workingman and woman knows that, after the bills are paid on pay day, there is not much left to feed the unemployed army or buy war supplies with.

What the working class needs today is an inexpensive method by which to fight the powerful capitalist class and they have just such a weapon in their own hands.

This weapon is without expense to the working class and if intelligently and systematically used, it will not only reduce the profits of the exploiters, but also create more work for the wage earners. If thoroughly understood and used more extensively it may entirely eliminate the unemployed army, the army used by the employing class to keep the workers in submission and slavery.

In order to illustrate the efficacy of this new method of warfare, I will cite a little incident. Some time ago the writer was working in a big lumber yard on the west coast. On the coast nearly all the work around the water fronts and lumber yards is temporary.

When a boat comes in a large number of men are hired and when the boat is unloaded these men are "laid off." Consequently it is to the interest of the workers "to make the job last" as long as possible.

The writer and three others got orders to load up five box cars with shingles. When we commenced the work we found, to our surprise, that every shingle bundle had been cut open. That is, the little strip of sheet iron that holds the shingles tightly together in a bundle, had been cut with a knife or a pair of shears, on every bundle in the pile—about three thousand bundles in all.

When the boss came around we notified him about the accident and, after exhausting his supply of profanity, he ordered us to get the shingle press and re-bundle the whole batch. It took the four of us ten whole days to put that shingle pile into shape again. And our wages for that time, at the rate of 32¢ per hour, amounted to $134.00. By adding the loss on account of delay in shipment, the "holding money" for the five box cars, etc., we found that the company's profit for that day had been reduced about $300.

(cont'd on following page)

So there you are. In less than half an hour's time somebody had created ten days' work for four men who would have been otherwise unemployed, and at the same time cut a big chunk off the boss's profit. No lives were lost, no property was destroyed, there were no law suits, nothing that would drain the resources of the organized workers. But there WERE results. That's all.

This same method of fighting can be used in a thousand different ways by the skilled mechanic or machine hand as well as by the common laborer. This weapon is always at the finger tips of the worker, employed or unemployed.

If every worker would devote ten or fifteen minutes every day to the interests of himself and his class, after devoting eight hours or more to the interests of his employer, it would not be long before the unemployed army would be a thing of the past and the profit of the bosses would melt away so fast that they would not be able to afford to hire professional man-killers to murder the workers and their families in a case of strike.

The best way to strike, however, is to "strike on the job." First present your demands to the boss. If he should refuse to grant them, don't walk out and give the scabs a chance to take your places. No, just go back to work as though nothing had happened and try the new method of warfare.

When things begin to happen be careful not to "fix the blame" on any certain individual unless that individual is an "undesirable" from a working class point of view.

The boss will soon find that the cheapest way out of it is to grant your demands. This is not mere theory; it has been successfully tried more than once to the writer's personal knowledge.

Striking on the job is a science and should be taught as such. It is extremely interesting on account of its many possibilities. It develops mental keenness and inventive genius in the working class and is the only known antidote for the infamous "Taylor System."

The aim of the "Taylor System" seems to be to work one-half the workers to death and starve the other half to death. The strike on the job will give every worker a chance to make an honest living. It will enable us to take the child slaves out of the mill and sweat-shop and give their unemployed fathers a chance to work. It will stop the butchering of the workers in time of peace as well as in time of war.

If you imagine "Making Work for the Unemployed" is unfair, just remember Ludlow and Calumet and don't forget Sacramento where the men who were unable to get work had their brains beaten out by the Hessians of the law and were knocked down and drenched to the skin with streams of ice-cold water manipulated by the city fire department, where the unemployed were driven out of the city and in the rain only to meet the pitchforks of the farmers. And what for? For the horrible crime of asking the governor of California---for a JOB!

This is the way the capitalist class uses the working class when they can no longer exploit them---in the name of Law and Order. Remember this when you MAKE WORK FOR THE UNEMPLOYED!

Joe HILL

The preceding article was originally published in the International Socialist Review (December 1914). The poem below was first printed in the IWW paper Solidarity (June 27, 1914).

The Rebel's Toast

If Freedom's road seems rough and hard,
And strewn with rocks and thorns,
Then put your wooden shoes on, pard,
And you won't hurt your corns.
To organize and teach, no doubt,
Is very good---that's true,
But still we can't succeed without
The Good Old Wooden Shoe.

Notes

Pierre MABILLE was a leading surrealist theoretician of the 1930's and 1940's, author of La Conscience Lumineuse, Egregores, Le Miroir du Merveilleux, etc. Another excerpt from this last work ("The Destruction of the World") will appear in the forthcoming Rebel Worker pamphlet Surrealism & Revolution.

Karl MARX was a 19th century socialist whose works have exerted considerable influence on the revolutionary movement.

Kenneth PATCHEN is an un-American poet exiled in the United States.

Benjamin PERET was a surrealist poet and theoretician who fought in the ranks of the C.N.T. during the Spanish Revolution; author of Mort aux Vaches and many other works.

Archie SHEPP is a poet, playwright and one of the major tenor sax voices amongst the current jazz avant-garde. He has a number of albums available both in England and the U.S. -- Fire Music (Impulse A86) is particularly recommended.

This is the first English "edition" of The Rebel Worker. Everyone who wants to put out further issues in England, and/or is interested in helping to do so should write to the address below. We would also welcome letters and comments on this issue, as well as addreses of bookshops and individuals who wish to distribute copies of The Rebel Worker.

Anything appearing in The Rebel Worker may be freely reprinted, translated, or adapted, even with out indicating its source, and we reserve the same freedom for ourselves regarding other publications.

Freedom is grassroots utopianism

IWW

LOST WHISPERS

This is the Chicago printing of Rebel Worker 6 (June,'66), originally published in London on May Day, exactly two years since our first issue. Response to the London issue has been encouraging, both in terms of sympathetic letters, subscriptions, and offers of future collaboration as well as the outcries and disdainful comments of traditional radicals and liberals. (One English cat said it was the first revolutionary paper which actually frightened him. Another, a member of the Young Communist League, said he would have none of these "little sects," adding that he at least, belonged to a "well-organized group"!) Let us note here that the London Solidarity Group are graciously distributing 100 copies of the London printing for us; this is the group which publishes Solidarity, one of the best revolutionary periodicals in the world today,--write to Bob Potter, 197 King's Cross Road, London W.C. 1; sample copies are available from us for 15 cents.

Charles Radcliffe, our London soul-brother, has written to us that further issues of an incandescent-carbonated journal sharing similar scandalous preoccupations with the Rebel Worker will appear there with the name Heatwave, adding its own delirious lucidity, vengeful humor and millenarian sensibility to the revolutionary movement in England. Heatwave #1 shall appear in 3-4 weeks--for details write to Charles Radcliffe, 13 Redcliffe Road, London SW 10. Copies will, of course, be available from us at 25 cents each.

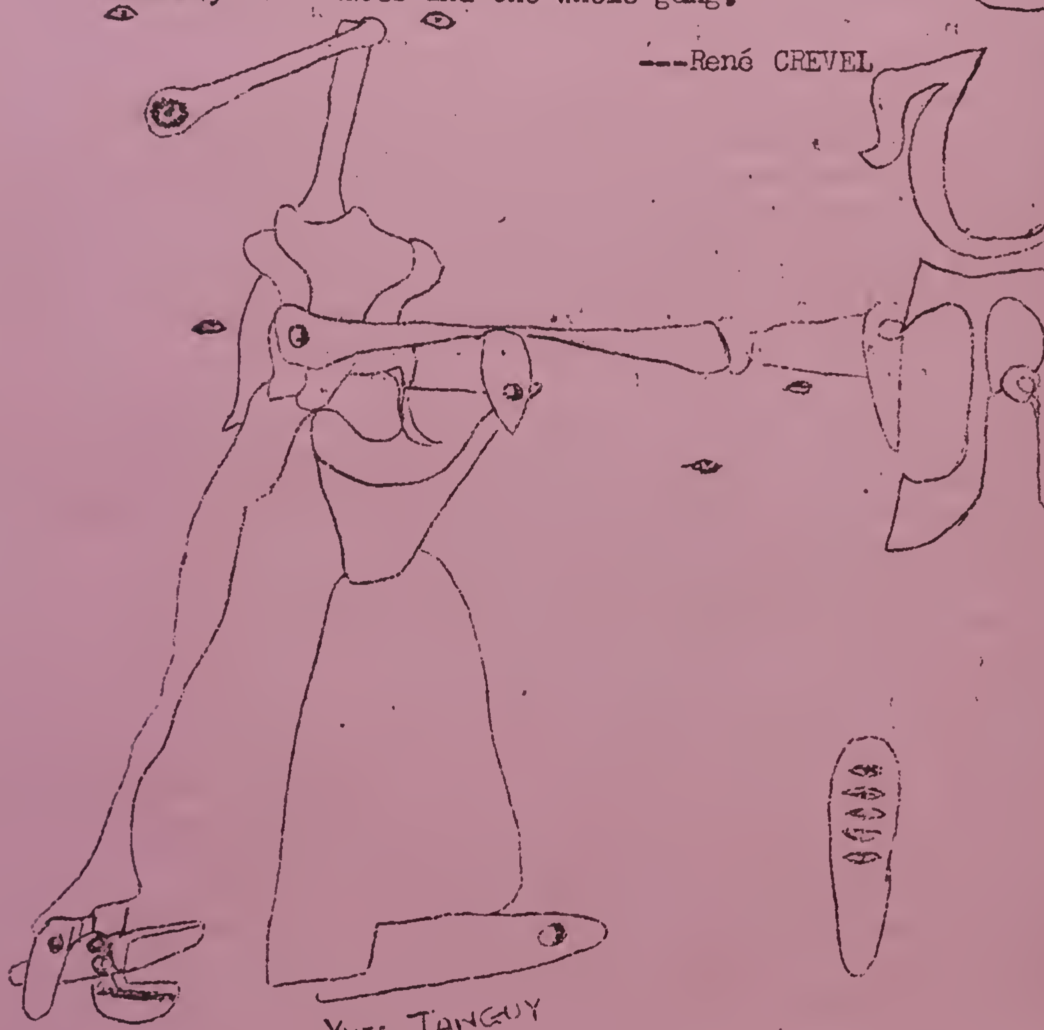
The London printing carried a last-minute-type cover, hastily prepared by Radcliffe portraying a bearded bomb-toting anarchist in a ballon; we have decided to use here, instead, an engraving ("The Temptation of St. Anthony") by Radcliffe's distant relative, the Flemish anarchist Pieter Bruegal the Elder. H. Arthur Klein, in his Graphic Works of Pieter Bruegel the Elder (Dover Books, paperback) writes about this particular engraving: "In its drastic criticism of the conditions of both the Church and State, this may well be the most 'outspoken' of Bruegel's graphic works. Corruption and decay beset both the State (the one-eyed head below) and the Church (the rotting fish above)." (p. 268) This engraving is for us a pretty accurate presentation of contemporary reality, although we feel that the curious figure in the lower right-hand corner (who happens to be St. Anthony) is now historically and poetically outmoded, to say the least, and would perhaps be replaced best today by a passionate saboteur, armed to the teeth with mad love and the uncontrollable desire to be free.

On the back we have reprinted the text of a leaflet issued by The Anarchists of Chicago (April, 1966). The only other additions to this issue, aside from the cover, are this page of notes and the message from René Crevel on the other side.

AU GRAND JOUR

The time is coming when seas of boiling rage will reverse the icy current of rivers, overflow and fertilize, fathoms deep, a crusted, petrified soil, tear away frontiers, uproot churches, clean the hills of bourgeois complacency, decapitate the headlands of aristocratic insensitivity, drown the obstacles the exploiting minority set in the way of the mass of the exploited, restore humanity to its future by freeing it from outdated institutions, religious fears, jingoistic mysticism and all that constitutes and consecrates the evils of the majority for the benefit of the two-legged sharks, their mates and the whole gang.

---René CREVEL



YVES TANGUY

FREEDOM

This sixth issue of The Rebel Worker is being produced in London, several thousand miles from its customary home in Chicago. We hope this issue, and subsequent ones, will help give our ideas a wider audience than they have had so far in Britain.

The Rebel Worker is an incendiary and wild-eyed journal of free revolutionary research and experiment devoted principally to the task of clearing a way through the jungle of senile dogmas and aiming towards a revolutionary point of view fundamentally different from all traditional concepts. We believe that almost all political propaganda is useless, being based on assumptions which are false and situations which do not exist. We are tired of the irrelevant concepts and the old platitudes. The revolutionary movement, in theory and in practice, must be rebuilt from scratch.

Many of us around The Rebel Worker are members of the Industrial Workers of the World (IWW), once one of the largest and most powerful rank-and-file revolutionary organisations the world has ever seen. We have joined the IWW because of its beautiful traditions of direct action, rank-and-file control, sabotage, humor, spontaneity and unmitigated class struggle.

It is these principles that constitute our editorial basis, but our task is not limited to mere recruitment. Our role is to promote "Whatever increases the confidence, the autonomy, the initiative, the participation, the solidarity, the equalitarian tendencies and the self-activity of the masses and whatever assists in their demystification".* We want and support revolutionary direct action on every level -- in the factories, on the docks, in the fields, in schools, in colleges, in offices and in the streets. But this is not enough. Revolutionary action should be accompanied by theoretical understanding. The Revolution must be made by men, women and children who know what they are doing. Consciousness and desire must cease to be perceived as contradictions.

The Revolution, for us, cannot be limited to economic and political changes; these are urgent and absolutely necessary, it is true, but we see them as a beginning rather than as an end; we see social liberation as the essential prerequisite, the first steps, in the total liberation of man.

the only
cause
worth
serving

It is especially to young people -- young workers, students, drifters, draft-dodgers, school dropouts -- to whom we address ourselves and our solidarity: you are one of the largest and most oppressed sectors of our society, and it is you who must make the Revolution.

What we want, and what The Rebel Worker is about, in short, is Freedom -- "the only cause worth serving."**

A very nice very respectable very useless CAMPAIGN

When the anarchist poet Jeff Nuttall spoke at the final rally of this year's CND easter march, he added new dimensions to the usual ritual, just as did the giant political puppet theatre which showed politicians as they really are -- not just without conscience but small, grovelling men, sustained only by the persecuting knowledge of their own vacant treason to their humanity. By calling for the destruction of the Ministry of Defence Jeff Nuttall gave intention to an affair which had none of its own. By speaking he let it be known that any number of people saw in CND and its charmless entourage of parliamentary vipers nothing so much as the sell-out of a once genuine popular movement against nuclear war to the so-called immediate imperatives of political relevance and political advance.

Since the CND leadership made public its refusal to challenge society -- after the Spies for Peace revelations in 1963 -- the Campaign has lived on borrowed time. The complex manoeuvres to present a libertarian image while denying to anarchists the right to speak at the rally, the dummy-protests and the dummy- Members of Parliament are not going to save it. CND is doomed. It is time for a young movement which addresses the contemporary reality, a movement which will challenge every tiny aspect of our war-sustained society, even unto the last public utility, which will militarise the dissatisfaction of almost every young person in this country. For dissatisfaction is not confined to politics; it extends into every street, club and classroom. It must be encouraged in its every aspect; its active expression may be welded into a revolutionary weapon which will strike fear into the deepest recesses of our society. Imagine briefly: if every time the police decided to victimise young people they were faced with the united fury of such people, if young people were to turn on their attackers with all the venom their frustration could muster. Then we might talk of protest.

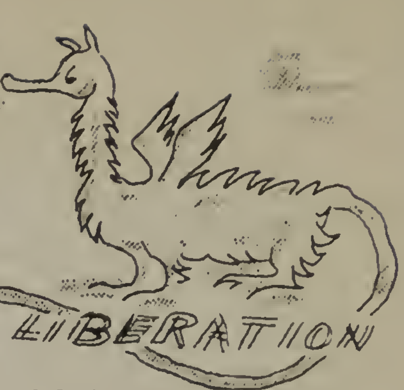
Such a movement would support the emotional eruptions of all youth; would learn to sanction the outrages of youth recognising in them a kindred spirit -- albeit a bolder one -- in the rejection of the spiritual death of a society which has attempted too long and too successfully to postpone the irrefutable logic of its indifference -- destruction. This society, if we will it, can drown in its own corrupted blood. It can die in its tracks -- on the streets, in the clubs, in the factories. The new revolution may be obscene and blasphemous; it must deface the power structure when it cannot destroy it; the criterion is defiance not discipline.

The new revolution must support every last insurrection of the mind and body againt this bloodfed society -- our movement is symbolised by the bomb-thrower, the deserter, the delinquent, the hitch-hiker, the mad lover, the school drop-out, the wild cat striker, the rioter and the saboteur.

This year 500 anarchists caused a 'near riot' in Trafalgar Square, until the 'platform' capitulated to their demand for a speaker. Significantly it was Nuttall who spoke on their behalf, rather than an

(cont'd p.16)

SOUVENIRS OF THE FUTURE



PRECURSORS of the THEORY & PRACTICE OF TOTAL LIBERATION

It is clear that man has lost his comfortable foothold in the provincial, one-dimensional flatlands where bourgeois society originally built its little mental world. The peace-loving resident of the suburbs, for instance, used to looking outside and seeing only his overfed neighbor or somebody's excuse for an automobile, now sees through his window only the most terrible darkness, the most violent natural calamities, the most permanent insurrections. He may try, fond as he is of wearing a heavy overcoat of ignorance wherever he goes, to lose himself before his television set, or in an uninspired affair with his best friend's wife; he may even succeed in utterly exterminating the last traces of the free play of his imagination by utilising any of the various means lying conveniently along a well-trod path of emotional and intellectual exhaustion: golf, for instance, or watching baseball. But such efforts are useless. Every scream of protest and genuine anger, every signal of true resistance, whether expressed in wildcat strikes, in certain strains of pop music, in violence against the police on anti-war demonstrations, in ghetto uprisings, in the blues, in jazz, in poetry or in guerilla warfare against the state -- wholehearted revolt in any and every form -- gives the lie to the fat and hypocritical complacency of those who cower in fear behind locked doors, afraid of the people in the streets, afraid of their own children, afraid of everything that gets in the way of their stupidity, afraid above all of any vestige of a human being concealed within themselves.

It is also clear, however, that the presently emerging movement of protest is too little conscious of the implications of its actions, too unsure of whence it came, where it is going and why. Certainly one of the most important tasks of a revolutionary journal is to expand, broaden and deepen this consciousness. The motives, inspirations and aspirations of the present movement, of which The Rebel Worker constitutes one of the more adventurous forces, cannot be understood properly without a complete revaluation of revolutionary values as well as a vast reassessment of the whole revolutionary tradition, necessarily involving research into, and reinterpretation of, all levels and all varieties of past struggles. This requires the complete repudiation of those pitiful "radicals" who look to history only to justify themselves and their actions with the "sacred texts," and who thus demonstrate only their weakness and blindness in confronting the reality of today. It goes without saying that we reject, absolutely, both those who choose to hide themselves in the past, or attempt to impose the past upon the future (reactionaries of all traditional varieties) and those who manipulate the past to conceal or distort the true nature of the present (liberals, social democrats, elitist "socialists," conservatives, etc.). "In matters of revolt," as André Breton once said, "one should not need ancestors." It is no less true that we must redefine the past according to the needs of the future determined by the situation of the present.

If there are a few people of the past whose words are still meaningful for us today, it is obvious that they cannot be the same ones presented to us for our admiration in school. Teachers, after all, in class society, are usually little more than cops, and who can respect the same things as a cop? The most relevant voices of the past are not the ones sanctified in the bourgeois mausoleum of heroes. The degree to which they are acceptable to this society is the degree to which they are useless to us. Nor can we hope to find most of them in the genealogy cherished by the traditional left, whose dogmatism, sectarianism, humorlessness, elitism and myopia we reject here as in everything else. The revolutionary movement, presently rebuilding itself from scratch, will have to re-envision its history from scratch as well. In particular, I think it is necessary now to give special consideration to precisely those past revolutionaries who have been most consistently ignored by the traditional left. It is also essential that we do not seek from them exclusively political or economic or even sociological revelations. "In periods of political inactivity," as fellow worker Lawrence DeCoster wrote not long ago, "the greatest hope of revolutionaries lies in non-political activity." (Of course we must also work like hell to revive serious rank-and-file political activity, primarily on the shop-floor level and in the streets where it matters most.) Today, with the resources of psychoanalysis, surrealism, anthropology, the physical and biological sciences being placed increasingly at the service of the revolution, we know that certain allegedly "non-political" works of the past are more thoroughly subversive, more liberating, more revolutionary than the most obviously "political" works of the same period. Every effort of man to realize his dreams in total freedom is revolutionary. But politics, by itself, no matter how revolutionary, remains a partial truth.

Let us note here a few of those whom we can unhesitatingly affirm as precursors of our own theoretical and practical activity, a few desperate enchanters whose magical lucidity still burns in our eyes today, a few lone soul brothers of whom we can still speak in connection with freedom. Academic and journalistic parasites may attempt to obscure them with their false elucidations, or ignore their work through the ignoble "conspiracy of silence," but nothing will stop us from pouring into the crucibles of the revolution these splendidly subversive inspirations and implacable dreams:

Lautréamont

It was Aragon who, before his Stalinization, observed that just as Marx had laid bare the economic contradictions of society, and Freud the psychological contradictions, so Lautréamont threw into a dazzling new light the ethical contradictions: the whole problem of morality, not to mention such other problems as the animalization of the intellect and the purpose of literature, assume with Lautréamont an excruciating significance next to which most of the philosophical babbling of his contemporaries seem to us today as nothing more than a handful of lies. The importance of Lautreamont on the ideological development of surrealism is second to none. His work has been called "a veritable bible of the unconscious;" the validity of many of his discoveries and revelations were subsequently demonstrated by Freudian psychoanalysis. It can probably be generally agreed that the liberal-humanist pantheon has, in the last century and especially during this century, crumbled to ruins; and it is Lautréamont whose criticism of it was most thoroughly, most devastatingly to the point, and who, moreover, best indicated a way out of the morass of confusion by rallying around the "reality of desire" which, theoretically elaborated by surrealists, remains the key to our most revolutionary aspirations.

Fourier

The traditional left of the 20th century has almost invariably consigned the many so-called "utopian socialists" to a position amounting to historical irrelevance, assuming them to be of interest exclusively for their influence on Marx and Engels, or Proudhon and Bakunin. Critical re-examinations of utopians by revolutionaries have occasionally appeared, and sometimes they are very good (see, for instance, Marie-Louise Berneri's Journey Through Utopia which discusses not only the best-known utopians, but also Winstanley, Diderot, Sade, William Morris, etc.). But much more still needs to be done. In particular the fantastic and visionary works of Charles Fourier (whose delirious cosmology and "passional psychology," no less than his penetrating social analysis, intrigued Marx and later Trotsky as well as many anarchists) deserve sympathetic and serious study. Fourier, more than any of the other utopians, pioneered many of our own preoccupations. He was very aware, for instance, of the central problem of love and the crucial role of human passions in social life. He insisted on the necessity of completely changing the very fabric of life to meet the needs of desire. The implications of his theory of analogy suggest a possible new development in revolutionary theory. His importance, in any case, cannot be limited to the experimental rural phalansteries (Fourier's name for communes) of his disciples---which are important too, of course, but in a very different way---nor to his most immediate influences on later socialists: it is above all Fourier the poet and seer who interests us today.

Sade

The theoretical and imaginative work of the Marquis de Sade, along with the practical efforts of the celebrated Enragés, can be considered, from the revolutionary point of view, the highest points reached during the French Revolution (and the so-called Age of Reason). The rising bourgeoisie was anti-feudal, anti-monarch, anti-superstition: but its talk of liberty and reason soon reduced itself to platitudes to be carved by the State above the doors of prisons -- it was a limited freedom, freedom defined to meet the needs of only one comparatively small class of exploiters. The Enragés struggled for a deeper revolution, representing the class needs of the proletariat: this effort was to receive its theoretical analysis and justification later, first in certain workers' papers and eventually in the monumental contributions of Marx and Engels. Sade, too, realized the inherent weaknesses of the revolution (see particularly his Frenchmen! One More Effort If You Wish to be Republicans which was, incidentally, reprinted as revolutionary propaganda in the struggles of 1848). He was aware of the social conflict -- the class struggle -- but brought to his analysis a consciousness of other problems (love, sexuality, desire, crime, religion, etc.) which were not to receive systematic exploration until surrealism. His works, which have at various times been reduced to providing tea-party chatter for senile litterateurs, and are currently enjoying a paperback revival (doubtless for being "classic pornography"), should now be read by everyone struggling for a revolution which will not end in a new set of chains.

BLAKE

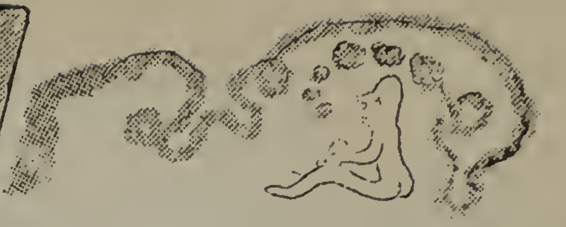
The editions of his own works printed by William Blake are highly-prized by cretinous bourgeois rare book collectors (let us spit in their faces and note in passing that everything he wrote spit in their faces too). Probably the greatest poet in the English language, most radicals seem to know nothing about him in connection with revolutionary politics other than the fact that he hid Thomas Paine who at the time was wanted by the British government. It is insufficient to add that, in England at least, his poem "London" has become a "socialist" hymn: for Blake's importance lies far beyond any isolated minor work which can be unfairly harnessed to the anti-workingclass needs of the Labour Party. Let us note only that Blake was, for a time, associated with the circle that included William Godwin and Mary Wollstonecraft, and that he and his works are thoroughly imbued with the revolutionary ideas of his epoch. But Blake saw much farther than any of the other English radicals of his time, and his works -- which are only now really becoming active influences on the revolutionary movement -- bear witness to the extraordinary depth of his perception and the prophetic surreality of his vision. The Revolution, too, will become "non-Euclidean:" common sense, already abandoned in almost every significant contemporary thought current (non-Euclidean geometry, non-Maxwellian physics, non-Newtonian mechanics, probability theory, psychoanalysis, general relativity theory, surrealism, etc.) must give way in revolutionary politics, as well, to less limited points of view, to superior methods of knowledge. Blake cut through the superficial rationalism of his day with the axe of poetry and vision. It is true that the semi-religious symbolism he often employed has detracted somewhat from the truly subversive, anti-religious and liberating message of his works; but compared to his contemporaries -- and that was a revolutionary age! -- Blake was the brightest star in a cloudy, moonless night.

The Gothic Novelists

Professional literary critics and academics today are practically unanimous in their rejection of that extraordinary profusion of works of the late 1700's and early 1800's usually known as "Gothic novels." These tales of haunted and crumbling castles, apparitions in the night, maddening lust, pacts with the devil and bleeding nuns are quite evidently not suited to the refined tastes of our numerous literature experts, who dismiss the entire genre as "musty claptrap" or with some such other derisive appellation. Like most matters of interest to us, the academics put them down, utterly missing the point. These works, like the real meaning of the revolution, are simply beyond their understanding. What makes the Gothic novels of special importance is both the immense popularity they enjoyed at the time of their publication (they were the best-sellers of their day) and also the great influence they exerted upon some of the most brilliant and critical minds of the younger generation: Shelley, Byron, Coleridge, Sade, Hugo, Baudelaire, the Bronte sisters, etc. Very few works of any period enjoy this double privelege: it was,

(to page 20)

HUMOR or not or less or else!



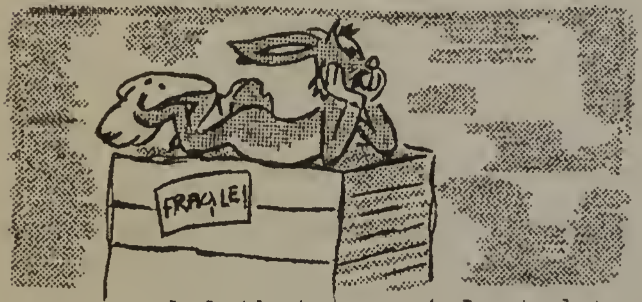
Humor, which has long been neglected by many so-called revolutionaries in their attempts to prove to themselves that their intentions are altogether noble and serious (no doubt, also, because of the desolation and barrenness of their thinking), ought to be given the recognition it has long deserved and regain its rightful place in the revolutionary struggle.

> "Humor is not resigned; it is rebellious. It signifies the triumph not only of the ego but also of the pleasure principle...."
>
> ---FREUD

The Wobblies have long been recognized for the humor they have contributed to the class struggle, for instance their use of humor as a means of lowering the boss's self-esteem to a minus one, often expressed in acts of collective sabotage such as the planting of cherry trees upside down with their roots blowing in the wind. Another famous incident in the history of revolutionary humor occurred when IWW construction workers, whose pay had been cut in half, reported for work the following day with their shovels similarly cut in half. (The pay was raised.)

"Sabotage is the soul of wit." (Solidarity, 1913-15).

Besides these examples of on-the-job humor there is the Little Red Song Book containing such songs as "The Preacher and the Slave" which mocks the famous religious hymn "In the Sweet Bye and Bye" used by the Starvation Army when it tried to sell its "pie in the sky." And the telegram which Joe Hill sent before he was legally murdered in which he asked his fellow workers to come get his body because he didn't want to be "caught dead" in Utah... And aside from being the greatest of the IWW writers T-Bone Slim is also one of its greatest humorists. (Watch for reprints of his writings as well as previously unpublished material in forthcoming issues of The Rebel Worker.)

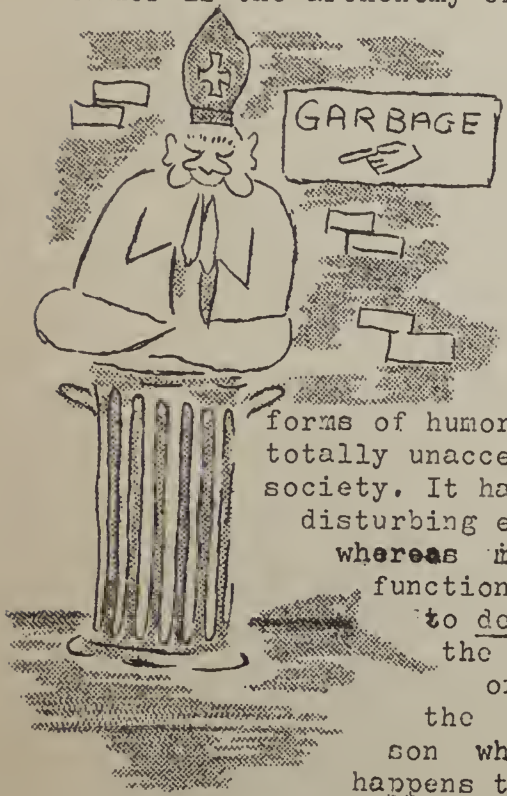


Humor has vast, as yet only partially realized, powers as a polemical weapon. Its users can with the least possible effort pull the keystone out of any argument leaving his opponent standing stunned amid a pile of bricks. Solidarity, for instance, one of the outposts of revolutionary humor today, once recommended that non-violent demonstrators "go limp and refuse to bleed."

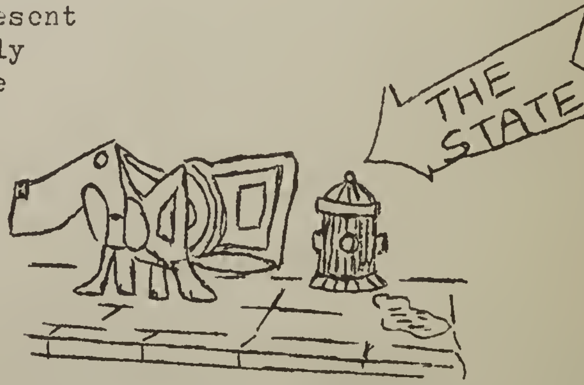
The movies of the Marx Brothers, Charlie Chaplin, Bugs Bunny are all implicitly dangerous to bourgeois society; they express their bitterness and aggression in humor. They attack society and everything it holds dear, and if you do not leave the movie theatre and destroy the nearest squad car, it's your fault, not theirs.

> "Beautiful as the fortuitous encounter, upon a dissecting table, of a sewing-machine and an umbrella."
>
> ---LAUTRÉAMONT

Potential potentates are notorious for their lack of humor and their total inability to cope with it. The entire functioning of a bureaucracy depends on the fact that it is taken seriously. The bureaucrat as an individual usually has little control over the violence which is at the command of the state. This is functional in that it serves to absolve him of any guilt which might result from the use of this violence, for in a bureaucracy as in a firing squad no one really knows who has the live bullet. Bureaucrats have at their disposal little more than the prestige, respect and all the trappings of their position. They take themselves and their positions utterly seriously, and because of this it is possible to utterly demolish both them personally and also the sacristy of their office. Humor is the archenemy of prestige!



The most violent and extreme form of humor, known as black humor, has found its greatest expression in the work of Lautreamont, Alfred Jarry, Jacques Vache and Benjamin Peret. A popular, if diluted, variety of black humor is found in the elephant jokes and "sick" jokes (What is black and white and lies in the gutter? ---A dead nun). An example of proletarian black humor which originated during the Spanish Revolution of 1936 is the saying "hang the last politician with the guts of the last priest." Unlike other forms of humor, black humor is totally unacceptable to present society. It has an extremely disturbing effect because whereas milder wit functions merely to deflate the ego of the person whom it happens to be used against, black humor threatens it and devastates it. It surveys reality, sees through it and exposes it. Black humor releases all the power of unconscious desire.



Through the adoption of humor as a conscious attitude we can assert ourselves over the confines of environment, reality, and in effect topple the whole structure and reassemble it as we wish, thus revealing a glimpse of the pride which the Revolution will restore to man. Revolutionaries must be the enemies of reality -- they must be poets and dreamers with uncontrollable desires that will not be repressed, sublimated or sidetracked. They must be willing to be ruthless. The economic change brought by the Revolution is only the first of our demands: we will not be content with anything less than the total annihilation of existing reality and the total triumph of Desire.

Penelope ROSEMONT

CONSCIOUSNESS at the service of DESIRE

He who wishes to attain the profoundly marvellous must free images from their conventional associations, associations always dominated by utilitarian judgements: must learn to see the man behind the social function, break the scale of so-called moral values, replacing it by that of sensitive values surmount taboos, the weight of ancestral prohibitions, cease to connect the object with the profit one can get out of it, with the price it has in society, with the action it commands. This liberation begins when by some means the voluntary censorship of the bad conscience is lifted, when the mechanisms of the dream are no longer impeded. A new world then appears where the blue-eyed passerby becomes a king, where red coral is more precious than diamond, the toucan more indispensable than the cart-horse. The fork has left its enemy the knife on the restaurant table, it is now between Aristotle's categories and the piano keyboard. The sewing machine yielding to an irresistable attraction, has gone off into the fields to plant beetroot. Holiday world, subject to pleasure, its absolute rule, everything in it seems gratuitous and yet everything is soon replaced in accordance with a truer order, deeper reasons, a rigorous hierarchy.

In this mysterious domain which opens before us, when the intellect, social in its origin and in its destination, has been abandoned, the traveller experiences an uncomfortable disorientation. The first moments of amusement or alarm having passed, he must explore the expanse of the unconscious, boundless as the ocean, likewise animated by contrary movements. He quickly notices that this unconscious is not homogeneous; planes stratify as in the material universe, each with their value, their law, their manner of sequence and their rhythm.

Paraphrasing Hermes' assertion that "all is below as what is above to make the miracle of a single th ing," it is permissible to assert that everything is in us just as that which is outside us so as to constitute a single reality. In us the diffuse phantoms, the distorted reflections of actuality, the repressed expressions of unsatisfied desires, mingle with the common and general symbols. From the confused to the simple, from the glitter of personal emotions to the indefinite perception of the cosmic drama, the imagination of the dreamer effects its voyage, unceasingly, it dives to return to the surface, bringing from the depths to the threshold of consciousness, the great blind fish. Nevertheless, the pearl-fisher comes to find his way amid the dangers and the currents. He manages to discover his bearings amid the fugitive landscape bathed in a half-light where alone a few brilliant points scintillate. He acquires little by little the mastery of the dark waters.

But the mind is not content to enjoy the contemplation of the magnificent images it sees while dreaming, it wishes to translate its visions, express the new world which it has penetrated, make other men share therein, realize the inventions that have been suggested to it. The dream is materialized in writing; in the plastic arts, in the erection of monuments, in the construction of machines. Nevertheless, the completed works, the acquired knowledge, leave untouched, if not keener, the inquietude of man, ever drawn to the quest of individual and collective finality, to the obsession of breaking down the solitude which is ours, to the hope of influencing directly the mind of others so as to modify their sentiments and guide their actions, and, last and above all, to the desire to realize total love.

Pierre MABILLE

From *Le Miroir du Merveilleux*
(Excerpt reprinted from the surrealist review *London Bulletin*, June 1940)

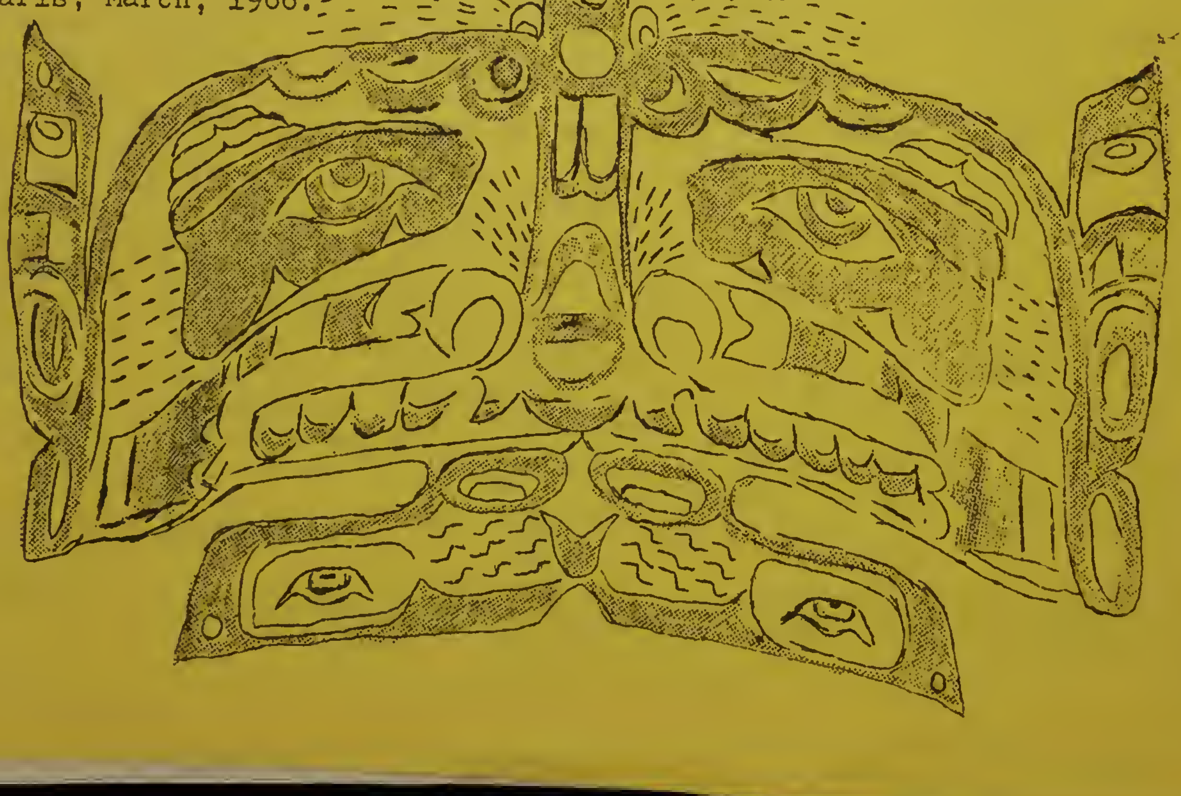
THE HAUNTED MIRROR

The gray pillow decorates the omnivorous moon, upsetting the wizard's organ of the electric sidewalk. Later, the silence grows sinister and delinquent. The old women run frequently, and the monkey loses track of the crisp cathode. There is a striped squirrel on the roof, and a staircase on the bridge or bog. The night is as spacious as a sacrificed mirror, and all I know is that I love you because goldfish are cavernous and the sea is as singular as a rose.

Meanwhile, the cliffs overlook the visible waves, and the trees are black with ostriches. The automobiles entice the chairs in the desirable rain, as if the pedestrians had all recalled their spiral doorbells. The streets are full of rugs and windows; the shopwindows full of waves. Who knows what the thunder will be like tomorrow, or the day after? The wheels are forlorn like the sleeping finger, or the tigers running loosely on the shore, observed only by the prickly scorpion, who sleeps with one eye open as wide as a paper and always keeps another eye bearded next to his winding ear.

Finally, the woman cuts open the resourceful pendulum. There are the usual uncanny screams, the bloodstains on the sky, astonished limits in the dimly-lit ocean. The wolves are rheumatic. The house burns foolishly like a sacrificial accordion. The deceptive goat lies in the osteopath's bed. Every door leads to a new thief; but the blind adjectives own all the pencils. Every old winner is an alphabetical loser, every red table a letter of white sugar. Fallacious pipes are always rare, and I love you as madly as the sky is contagious.

Paris; March, 1966. Franklin and Penelope ROSEMONT



Crime against the bourgeoisie

I first heard about The Who before they were The Who; just another mod r 'n' b group, playing one of Central London's most fiercely mod clubs, but apparently doomed to remaining unknown outside a small circle of fans, despite their defiantly hip name - the High Numbers. I didn't hear any more about them for nearly two years, when suddenly a rash of posters appeared in Central London advertising a new group -- The Who. The posters were superb -- heavily shadowed, crudely dramatic and featuring The Who lead guitarist, Pete Townshend, his arm raised in an arc over his head, his guitar barely visible. A few months before they had been unknown, under the new name, outside the Shepherds Bush area but gradually the news spread that the Marquee Club -- whence came, among others, the Rolling Stones, the Yardbirds, the Moody Blues and Manfred Mann -- had a fantastic new group. They were taken up by Melody Maker, the hippest British music weekly, and shortly afterwards by Record Mirror.

Despite the enthusiasm of the fans -- the musical press, for the most part managed little more than perplexed astonishment -- The Who's first record, "I Can't Explain", one of the best pop records of 1965, didn't really move nationally at first though it created enough interest in the group for their explosive views about pop to gain some attention. More people went to the Marquee. Provincial fans carried back the news. The record took off, finally making the top ten. When The Who made their second record, "Anyway, Anyhow, Anywhere", they were again able to go almost into the Top Ten. The weird feedback sound effects, the carefully cultivated Pop Art image -- the wearing of jackets made from the Union Jack and sweat shirts embroidered with the free-form sound effects of American comics, as well as military insignia -- and later their championship of autodestructive pop guaranteed them attention in a world where long hair was becoming more a recommedation for respectable employment than a mark of depravity.

The Who's stage act is a shattering event. They start off quietly but providing the audience is with them they soon turn on the special effects. The singer, Roger Daltrey, legs slightly apart, torso jutting forward, begins to smash his microphone with a tambourine, first gently and then with increasing fury until the amplifiers howl. Alternatively he crashes a hand-mike against the cymbals or screams harshly into the microphone, leaning forward at an absurd angle, his body straight, held above the stage by the microphone stand. While singing he cavorts round the stage in the curiously paralytic dance of a reigning mod. Occasionally he blows harmonica, furiously and grotesquely, like the screeching of a moon-struck tom cat. One way or the other he often leaves mic=

(to p 17)

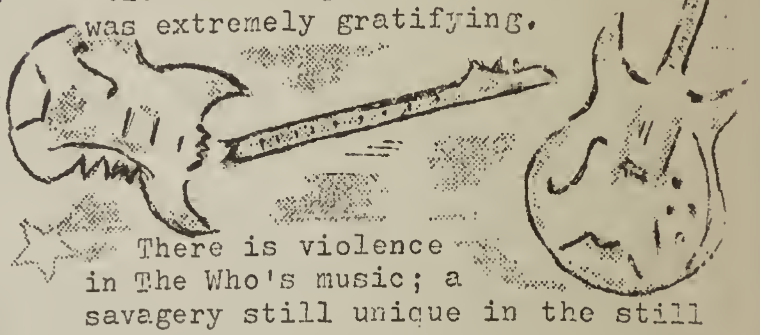
rophones smashed. Meanwhile Pete Townshend, face bland and impassive, creates banshee howls, stutters and the staccato burr of distant machine guns from feedback and by scraping his instrument against the amplifier, before finally smashing it into the amplifier to produce the noise of tearing metal and screeching car tyres. His arm swings wildly, higher than his head, arcing before smashing back onto the guitar. He strikes chords and his arm swings in circles, faster and faster. He holds a pose; arm extended, before once again swinging onto his guitar. Or, he holds his guitar at the hip, shooting notes at the audience. The Who's stage act can end with his guitar hurled into the crowd. John Entwhistle, on bass guitar, keeps the thread of the group's performance with heavy double rhythms and a driving bass line. Drummer Keith Moon, mouth wide open, head gyrating from side to side, eyes wide and glazed, thunders out a furious rhythm, acknowledging the howls of the crowd for whom he has always been the main attraction.

The whole effect of The Who on stage is action, noise, rebellion and destruction - a storm of sexuality and youthful menace. They proudly announced after the success of "Anyway" that their next record was going to be anti-boss, anti-war and anti-young marrieds. The result was this:

"People try to put us down
Just because we get around
Things they do look awful cold
Hope I die before I get old
My generation, this is my generation, baby,
Why don't you all f-f-fade away
Don't try to dig what we all say
Not trying to cause a big sensation
Talking about my generation"

"My Generation" was the most publicised, most criticised and possibly the best record yet by The Who.

If it didn't entirely live up to its expectations and if it wasn't quite so unrecalcitrantly rip as "Anyway" the offence it caused -- particularly when the group announced that the singer was supposed to sound 'blocked' (high) on the record -- was extremely gratifying.



There is violence in The Who's music; a savagery still unique in the still overtly cool British pop scene. The Who don't want to be liked; they don't want to be accepted; they are not trying to please but to generate in the audience an echo of their own anger. If their insistence on Pop Art, now dying a little, is reactionary -- for of all art, pop art most completely accepts the values of consumer society -- there is still their insistence on destruction, the final ridicule of the Spectacular commodity economy. Townshend's room has shattered guitars hanging as trophies on the wall. There is also their insistence on behaving as they wish. Townshend told Melody Maker:

"There is no suppression within the group. You are what you are and nobody cares. We say what we want when we want. If we don't like something someone is doing we say so. Our personalities clash, but we argue and get it all out of our system. There's a lot of friction, and offstage werre not particularly matey. But it doesn't matter. If we were not like this it would destroy our stage performance. We play how we feel."

ZOOOUNKK

Likewise their manager told reporters that he saw their appeal lying in rootlessness. "They're really a new form of crime -- armed against the bourgeois. Townshend

(cont'd on p.1

I am not angry: I am enraged!

I address myself to bigots -- those who are so inadvertently, those who are cold and premeditated with it, I address myself to those "in" white hipsters who think niggers never had it so good (Crow Jim) and that it's time something was done about restoring the traditional privileges that have always accrued to the whites exclusively (Jim Crow). I address myself to sensitive chauvinists - the greater part of the white intellegentsia -- and the insensitive, with whom the former have this is in common: the uneasy awareness that "Jass" is an ofay's word for a nigger's music (viz. Duke and Pulitzer).

Allow me to say that I am -- with men of other complexions, dispositions, etc. -- about art. I have about 15 years of dues paying -- others have spent more -- which permits me to speak with some authority about the crude stables (clubs) where black men are groomed and paced like thoroughbreds to run till they bleed or else are hacked up outright for Lepage's glue. I am about 28 years in these United States, which, in my estimation is one of the most vicious racist social systems of the world -- with the possible exceptions of Southern Rhodesia, South Africa and South Viet Nam.

I am, for the moment, a helpless witness to the bloody massacre of my people on streets that run from Hayneville through Harlem. I watch them die. I pray that I don't die. I've seen the once children-now men of my youth get down on scag, shoot it in the fingers, and then expire on frozen tenement roofs or in solitary basements, where all our frantic thoughts raced to the same desperate conclusion:"I'm sorry it was him; glad it wasn't me".

I have seen the tragedy of perenially starving families, my own. I am that tragedy. I am the host of the dead: Bird, Billie, Ernie, Sonny, whom you, white America, murdered out of a systematic and unloving disregard. I am a nigger shooting heroin at 15 and dead at 35 with hog's head cheeses for arms and horse for blood.

But I am more than the images you superimpose on me, the despair that you inflict. I am the persistent insistence of the human heart to be free. I wish to regain that cherished dignity that was always mine. My esthetic answer to your lies about me is a simple one: you can no longer defer my dream. I'm gonna sing it. Dance it. Scream it. And if need be, I'll steal it from this very earth.

Get down with me, white folks. Go where I go. But think this: injustice is rife. Fear of the truth, will out. The murder of James Powell, the slaughter of 30 Negroes in Watts are crimes that would make God's left eye jump. That establishment that owns the pitifully little that is left of me can absolve itself only through the creation of equitable relationships among all men, or else the world will create for itself new relationships that exclude the entrepreneur and the procurer.

Give me leave to state this unequivocal fact: jazz is the product of the whites -- the ofays -- too often my enemy. It is the progeny of the blacks -- my kinsmen. By this I mean: you own the music, and we make it. By definition then, you own the people who make the music. You own us in whole chunks of flesh. When you dig deep inside our already disembowelled corpses and come up with a solitary diamond -- because you don't want

(cont'd on p. 19)

A very nice, very respectable, very useless campaign (cont'd)

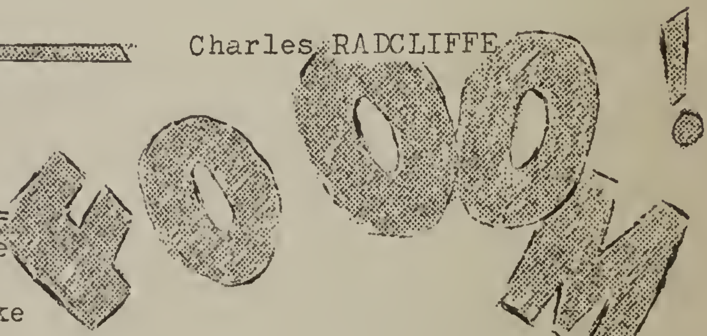
"Establishment anarchist" (as Peace News delights to term those com=rades who are old enough to have sold out but have not done so). The anarchists were roundly condemned by the national press. The peace movement, as represented by Peace News, condemned them in more soph=isticated fashion. (The dedication of the liberals to respectability has so clouded their vision that they no longer care about the effect of their actions, only that they should not be attacked for them). The relevance of the action of these predominantly young anarchists is obvious. Their voices and actions exploded their precise conscious=ness of the fact that respectability finally involves simply this:

Clamber into your own arsehole and quietly die.

Charles RADCLIFFE

Crime against the bourgeois (cont'd)

talked defiantly on the 'hip' TV show, "Whole Scene Going", to denounce the other members of the group, the pop scene, society at large and non-drug users in particular. "Drugs don't harm you. I know. I take them. I'm not saying I use opium or heroin, but hashish is harmless and everyone takes it." Townshend's views, which he expresses freely and frequently, are weirdly con=fused. On the General Election: "Comedy must come in the end and it just has ... I think the tories will win because so many people hate Wilson ... I still reckon English Communism would work, at least str=onger trade unions and price free=dom. I've always been instructed by local communists to vote Labour if I can't find a Communist candidate. The British C.P. is so badly run -- sort of making tea in dustbins like the Civil Defence". On the Chinese: "They are being taught to hate. But they are led by a great person who can control them". In the same Mel=ody Maker interview he came out ag=ainst the Vietnam war but curiously did not support the Vietcong, com=plained about vandalism in phone booths and Keith Moon getting old ("Once - if I felt ageing, I could look at Keith and steal some of his youth"). The conscious revolution, if at all, is however submerged under the unconscious and consuming fury of The Who.



The Who are at full volume; des=pite predictions of their imminent demise they have two records in the English charts and they will not die until they are replaced by a group offering more far-reaching ex=plosions of sounds and ideas. The Wh are symptomatic of discontent. Their appearance and performance alike denounce respectability and conformity. They champion their own complete ex=pression of feeling. Bernard Marszalek has written*; "One can only work towards this goal ('the intrusion of desire with all of its marvellous aspects into a decadent and crusted so iety') by developing with youth a sense of rage and urgency to unite the realms of dream and action fear=lessly and with candour".

The Who may be a small particle o this explosion but they have a powe unlike any other pop group's; on a good night The Who could turn on a whole regiment of the dispossessed.

Ben COVINGTON

* Freedom, London, April 23, 1966

MONEY

The power to confuse and invert all human and natural qualities, to bring about fraternization of incompatibles, the *divine* power of money, resides in its *character* as the alienated and self-alienating species-life of man. It is the alienated *power* of humanity.

What I as a *man* unable to do, and thus what all my individual faculties are unable to do, is made possible for me by *money*. Money, therefore, turns each of these faculties into something which it is not, into its *opposite*.

If I long for a meal, or wish to take the mail coach because I am not strong enough to go on foot, money provides the meal and the mail coach; i.e., it transforms my desires from representations into *realities*, from imaginary being into *real being*. In mediating thus, money is a *genuinely creative* power.

...The difference between effective demand, supported by money, and ineffective demand, based upon my need, my passion, my desire, etc. is the difference between *being* and *thought*, between the merely *inner* representation and the representation which exists outside myself as a *real object*.

If I have no money for travel I have no *need* -- no real and self-realizing *need* -- for travel. If I have a *vocation* for study but no money for it, then I have *no vocation*, i.e., no *effective*, *genuine* vocation. ...Money is the external, universal *means* and *power* (not derived from man as man or from human society as society) to change *representation* into *reality* and *reality* into *mere representation*. It transforms *real human and natural faculties* into mere abstract representations, i.e., *imperfections* and tormenting chimeras; and on the other hand, it transforms *real imperfections and fancies*, faculties which are really impotent and which exist only in the individual's imagination, into *real faculties and powers*. In this respect, therefore, money is the general inversion of *individualities*, turning them into their opposites and associating contradictory qualities with their qualities.

Money, then, appears as a *disruptive* power for the individual and for the social bonds, which claim to be self-subsistent *entities*. It changes fidelity into infidelity, love into hate, hate into love, virtue into vice, vice into virtue, servant into master, stupidity into intelligence and intelligence into stupidity.

Since money, as the existing and active concept of value, confounds and exchanges everything, it is the universal *confusion and transposition* of all things, the inverted world, the confusion and transposition of all natural and human qualities.

He who can purchase bravery is brave, though a coward. Money is not exchanged for a particular quality, a particular thing, or a specific human faculty, but for the whole objective world of man and nature. Thus, from the standpoint of its possessor, it exchanges every quality and object for every other, even though they are contradictory. It is the fraternization of incompatibles; it forces contraries to embrace.

Let us assume *man* to be *man*, and his relation to the world to be a human one. Then love can only be exchanged for love, trust for trust, etc. If you wish to enjoy art you

(to page 19)

I HATE the poor

Until all men unite in hating the poor, there can be no new society. Stalin loves the poor --- without them he could not exist. The revolutions of the future must be directed not against the rich but against the poor. To be poor means to be blind, demoralised, debased. The poor have been the slop pails of capitalism, repositories for all the filth and brutality of a filthy, brutal world. Do not liberate the poor: destroy them --- and with them all the jackal-Stalins that feast on their hideous, shrunken bodies. How the Church and the false revolutionaries draw together: love the poor --- for they are humble. I say hate the poor for the humility which keeps their faces pressed into the mud. The poor are the product of a false and cruel society; but they are also the cornerstone of that society. Lift them to the stars; tell them to walk proudly on this earth: the cathedrals and broad roads were made by the labor of their hands; it is the duty of all true revolutionists not only to restore these things into their hands but also --- and this is the key --- to put them into their heads. Empty stomachs, empty heads: fill both with good food. Don't shove Peter the Great back into their throats.

Kenneth PATCHEN

from

The Journal of Albion Moonlight
(New Directions)

LETTER from Chicago!

...i wrote a leaflet in honor of barry bondhus a minnesota youth who took two buckets of shit into his draft board office and dumped them into six file drawers. I hope to pass these out at Dick Clark's World Fair of Youth being held for ten days at the Amphitheatre and which will present 10 r'n'r groups, mod clothes exhibits, youth culture generally, --- it is being billed throughout the Midwest --- a real blowout! But very conservative --- several of us plan to change that. we still get suburban kids in to talk and i am beginning to come up with nice variations on disruptive activity that they can pull off.

what generates me at present is the altogether exquisite future that i see... wait till you get back; the climate is changing here at a surprising rate; the acceleration is simply fantastic. everybody is flipping out.

another thing i am working on is a ball for may probably outdoors, maybe at the tap root after we get chased off open lots; with several rock bands, blues, etc., several anarchists are interested, but i may have to do all the work, ecch

there is a group here from the western suburbs called the shadows of night have they been heard of in england?

bruce elwell is hoping to start a theater of provocation in phillie ... what i am DOING is getting high and higher on one little realization --- that i have one task alone and that is to bring out the most delicate outrage in myself. explode the hair follicles whee...

...i can think of only lovely destructive stuff, like painting ourselves blue & walking on water. these scandals...must be spontaneous. i'll talk to you when you're both back in this land of the brave & home of the free, or is it the other way around, i never could get it straight. ...may day...i'll send you a letter from prison.

Bernard MARSZALEK

I am enraged . . . .!

(from p.15)

to flood the market -- how different are you from DeBeers of South Africa or the profligates who fleeced the Gold Coast?

I give you, then, my brains back, America. You have had them before, as you had my father's, as you took my mother's: in outhouses, under the back porch, next to the black snakes who should have bitten you then.

I ask only: don't you ever wonder just what my collective rage will -- as it surely must -- be like, when it is -- as it inevitably will be -- unleashed? Our vindication will be black as the color of suffering is black, as Fidel is black, as Ho Chi Minh is black. It is thus that I offer my right hand across the worlds of suffering to black compatriots everywhere. When they fall victim to war, disease, poverty -- all systematically enforced -- I fall with them, and I am yellow skin, and they are black like me or even white. For them and me I offer this prayer, that this 28th year of mine will never again find us all so poor, nor the rapine forces of the world in such sanguinary circumstances.

I leave yoy with this for what it's worth. I am an antifascist artist. My music is functional. I play about the death of me by you. I exult in the life of me in spite of you. I give some of that life to you whenever you listen to me, which right now is never. My music is for the people. If you are a bourgeois, then you must listen to it on my terms. I will not let you misconstrue me. That era is over. If my music doesn't suffice, I will write you a poem, a play. I will say to you in every instance, "Strike the Ghetto. Let my people go."

Archie SHEPP

Archie Shepp's article is reprinted here in part from Down Beat where it presumably had a readership akin to the magazine's policy of woolly blue-eyed liberalism. We hope this reprint will let his words reach a small part of the audience they deserve. We agree with what he says but think Fidel and Ho would sell him short. Maybe one day we'll get the chance to discuss this with him.

MONEY

(continued from p.17)

must be an artistically cultivated person; if you wish to influence other people you must be a person who really has a stimulating and encouraging effect upon others. Every one of your relations to man and to nature must be a specific expression, corresponding to the object of your will, of your real individual life. If you love without evoking love in return, i.e., if you are not able, by the manifestation of yourself as a loving person, to make yourself a beloved person, then your love is impotent and a misfortune.

Karl MARX

From the Economic & Philosophical Manuscripts of 1844
(Bottomore translation)

LOBSTER

The aigrettes of your voice spurt
out from the burning bush of
your lips
where the Chevalier de la Barre
would be pleased to decay
The hawks of your gaze fishing
thoughtlessly all the sardines of my head
Your breath of wild thoughts
reflecting from the ceiling on my feet
running through me from all sides
follow me and precede me
lull me to sleep and awaken me
throw me from the window to make me
come up in the lift
and conversely

Benjamin PERET

SOUVENIRS of the FUTURE, cont'd from p. 8.

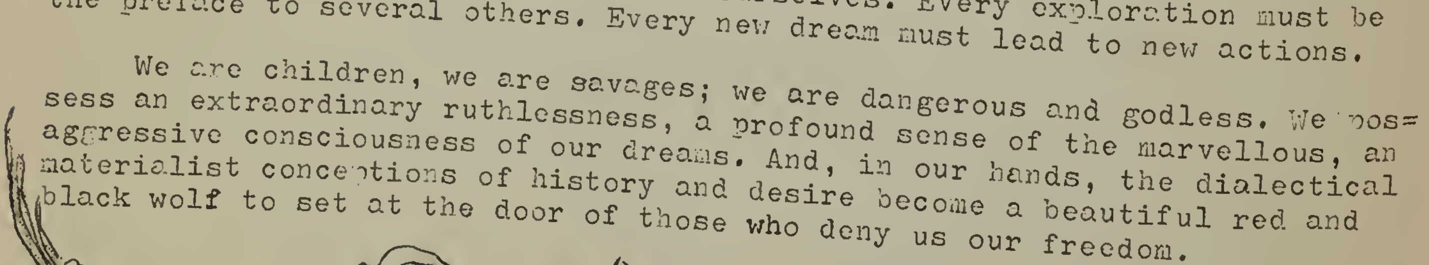
I believe, Andre Breton who first pointed out that these works were highly successful expressions of the latent content of the period in which they were written (i.e., the days of the bourgeois revolutions). Now certainly one of the greatest weaknesses of the traditional left has been its neglect of the problems of the individual, and human personality in general; these have been ignored through the exclusive preoccupation with social problems, analysis of which in turn has been weakened through ignorance of psychology. There has been, for instance, little investigation of the psychological changes occurring during periods of great social upheavals (or for that matter, little investigation of the psychology of factory workers). It is obvious that people who support reactionary candidates in bourgeois elections do not think the same way as do the people who take over the factories and smash the government. Workers as a class cannot make a really successful revolution (that is, one leading to complete freedom) unless they are individually, psychologically, as well as socially, capable of it. That is why it is important for revolutionaries to reinforce spontaneity, creativity, self=reliance, independence and rebellion of individual workers as well as of the working class. (This is also one aspect of the relevance and importance of sabotage, an individual act serving the needs of the class.) Obviously much more work must be done along these lines. Meanwhile, we should restudy the imaginative works of sensitive writers of the past who, more or less automatically, documented some aspects of this problem. In particular, the greatest of the Gothic novels (Horace Walpole's Castle of Otranto, Lewis's The Monk, Maturin's Melmoth the Wanderer) offer us valuable testimony in tracing the genesis and evolution of individual revolutionary sensibility, the latent and personal drama unfolding with the manifest and general cataclysm.

Of course we have only penetrated the surface of a hardly=explored sea, to which no limits can yet be assigned. Living, as we do, in a civilization rapidly falling to ruin, it is up to us to trace the trajectory of its destruction, to propel it further along this path, to read the prophecies of tomorrow's dawn with a defiantly critical eye, to explore all the unknown worlds inside and outside of man, and, eventually, to pool our collective resources with our billions of fellow workers and soul brothers in the really fundamental tasks of the Revolution: to realize our dreams, our desires, and "to rebuild human understanding," as Breton put it, "from scratch."

We must remember that we are in the preliminary stages of our experiment. We know that we cannot build a new revolutionary movement with the skeletons of the old. The old left has taught us very little of what we want to know; we must learn to teach ourselves. Every exploration must be the preface to several others. Every new dream must lead to new actions.

We are children, we are savages; we are dangerous and godless. We possess an extraordinary ruthlessness, a profound sense of the marvellous, an aggressive consciousness of our dreams. And, in our hands, the dialectical materialist conceptions of history and desire become a beautiful red and black wolf to set at the door of those who deny us our freedom.

Franklin ROSEMONT



SOLIDARITY

......The only radical libertarian bookshop in the United States, run by members of the Industrial Workers of the World for the purpose of disseminati revolutionary literature to the widest possible readership. The following list is a brief selection of available material.

SHAPES OF THINGS

Barry Bondhus a 20-year old Big Lake youth was being held in Hennepin County Jail under $10,000 bond today on a charge that he dumped two buckets of human excrement into the files of the Sherburne County draft board at Elk River.

The arrest climaxed a series of difficulties he and his father have had with the draft board. The elder Bondhus said he has told the Board repeatedly that he is opposed to any of his sons serving in the Armed Forces. "If you draft Barry I have nothing to look forward to for the next 24 years but flag-draped caskets," he said.

Barry is the second oldest of 10 Bondhus boys. After a board hearing, February 15, the youth was classified 1-A and ordered to take a pre-induction physical examination in Minneapolis. The FBI said the youth refused to co-operate.

Wednesday, the complaint charged, the young Bondhus walked into the board's office and dumped the substance into six draft board file cases. His draft board status is still pending.

----from the Minneapolis Star
February 25, 1966

The Anarchists wish to express their collective support for Barry Bondhus' noble and appropriate response to the most obscene attempts by the State's flunkies to enslave and possibly murder him. Barry has renewed our faith in mankind and for that we must thank him, but more, we must develop in ourselves, and of course others, the same altogether exquisite outrage which moved him to so poetically reveal his prpfound humanity. Along with wheelbarrows of desire buckets of shit will stop the War in Vietnam.

WILD CELERY*

The protracted decline and thorough disintegration of criminal desperation has been happily reversed in the last several years, in every major American ghetto, if no where else, but naturally, also elsewhere. Though the cynical may refer to these explosions of expectations as picturesque forays based upon shallow greed and shame, we prefer to think of them in a revolutionary context as merely the opening shots in a new and **revivified** class struggle. The possibilities for a total repudiation of everything offered to us by this society have never been so complete. For what is offered that is not merely an invitation to assimilation, to incorporation into a petty and disgusting niche? The universality of this exigency leads us to conclude that, at bottom, fortuitous differences aside, we all live the same disgusting lives. One of the necessities for a revolutionary journal is to elucidate the various implications of this situation, for class differences, which in our affluent society only apparently have been extinguished, dominate the course and content of radical consciousness and protest.

Under these circumstances the rebel is confronted with a double necessity: to overcome, on the one hand, all the cops of everyday life (at home, school, work, and play) and, on the other hand, the hesitations derived from a fragmented and delicate rationalization, a systematization of unconscious fears rooted in memory and sustained by the official watchdogs of "common-sense", which tend to inhibit the natural and perpetual superimposition of revolutionary aspirations. What is needed, obviously, is a proper perspective or an indecent indifference; we hold no distinction here, but in fact wish to serve as a wrecking bar at the service of all and at the same time a crystal ball forecasting the delights that await us beyond the mean presumptions of our rulers. The efflorescent revolutionary situation today catalyzes our endeavors, and our works in turn should be considered nothing but wasted unless they raise the stakes.

The logics of all this necessitates our coming transformation: being, above all else, alchemists of Desire who know no boundaries we jubilantly announce that this is the last but wildly prehensile Rebel Worker. To intensify our assaults we have decided to forego regular publication and opt for the thorough exploration of the Streets. Our aims remain essentially the same but now our war-cry shall be ZTANGI!

---

* FAVORITE FOOD OF THE GORILLA

The unbelievable paucity of truly revolutionary literature is merely a reflection of the larger failure of a thorough-going revolutionary opposition to make its appearance, a failure attributable at least in part to the regrettable tendency of too many to flounder about in the platitudes of a parasitic demagogy percolated by the Establishment or, what is essentially similar in the end, to retreat to the theoretical peregrinations of the Loyal Opposition, which handsomely serves the needs of the System, just as glue holds together a broken plate.

To be at all relevant, theoretical assaults have to be situated in the streets, alleys, schools & factories -- wherever desecrations are manifested. With this prerequisite in mind, we have published the following pamphlets since the last issue of The Rebel Worker:

Blackout! -- Twenty-four hours of Black Anarky in New York; Secrets now revealed in this Rabelaisian account by H.W. MORTON, New York anarchist. Learn what really happened in the elevators & subways and why many were unhappy when the lights came back on. Complete with Feiffer cartoon & 9-month Anniversary News-Clipping. Cover cartoon by Roland TOPOR. 16 pages.

Revolutionary Consciousness -- A collection of articles including "Consciousness & Theory" by Jim EVRARD; "Return to Anarchy" by Lawrence DECOSTER; "Reflections on Invisibility" by Walter CAUGHEY & "Surrationalism" by Gaston BACHELARD. 18 pages.

Surrealism & Revolution -- A profusely illustrated 40-paged compilation of otherwise unobtainable-in-English theoretical texts and manifestoes by Antonin ARTAUD, Andre BRETON, Nicolas CALAS, Rene CREVEL, Pierre MABILLE, Paul NOUGE, Benjamin PERET. Preface by Franklin ROSEMONT. Titles include "Open the Prisons, Disband the Army;" "On Revolutionary Sadism;" "The Destruction of the World" & the Breton-Trotsky "Manifesto For a Free Revolutionary Art."

We've also put together fifty or so copies of a Rebel Worker Anthology -- consisting of articles from the first four issues (now out of print) plus a selection of leaflets issued during that period. We also brought out a rather limited number of Walker C. Smith's old IWW pamphlet Sabotage: Its History, Principles & Methods, very few of which are left but which we hope to offset-reprint soon. Our next pamphlet, which should be ready in January 1967, is titled: The Watts Insurrection of 1965, a reprint of the English translation of "The Decline & Fall of the Spectacular-Commodity Economy" published by the Situationist International in Paris, 1965.

We also hope to bring out a number of other new pamphlets in the coming months, including one to be called BLACK ANARCHY, consisting of wild-eyed anarchist ravings from the Golden Age of Anarchy & Chaos: Johann MOST's "Science of Revolutionary Warfare;" Louis LINGG's speech to the court that sentenced him to death; editorials from the Alarm & Arbeiter-Zeitung (leading Chicago anarchist papers of the 1880's); T. LIZIUS's text "Dynamite;" Emma GOLDMAN's defense of Leon Czolgosz; the famous "Revolutionary Catechism" of Michael BAKUNIN, etc. We still hope to bring out our SABOTAGE ANTHOLOGY as well as pamphlets on psychedelics, the world revolution of youth and Surrealism & the Savage Heart.

HEATWAVE

Rebel Worker #6 was published in London on May Day 1966 & reprinted in Chicago a little over a month later. It has already been followed up with two issues of *HEATWAVE*, edited by our London collaborator & trans-world soul-brother Charles Radcliffe, who has since been joined by Christopher Gray (translator of the situationist pamphlet *The Totality for Kids* by Raoul Vaneigem) and others. We are bringing out a compilation of articles from these first two issues of *HEATWAVE* (both out of print in London) -- see Announcement on page 18. Future issues of *HEATWAVE* will be available from us at 25¢ a copy; but why not subscribe? 1$ a year (four issues) postpaid; please send only International Postal Money Orders. Write 13 Radcliffe Road, London SW10, England.......

FROM: The *Rebel Worker* Group.
TO: F.B.I., C.I.A., and the Secret Service.
RE: *Rebel Worker* #2 was printed, we wish proudly to announce, with the total (even if involuntary) assistance of a Department of the Government of the United States of America by our operatives, using a government offset press and paper (not to mention government "time") and removed in two cartons labelled "subpoenas."

We encourage all other revolutionaries to make similar use of the unlimited resources of this imperialist government, and all others, thus facilitating the inevitable destruction of all exploitation & furthering the cause of the World Revolution.

Several of us collaborated on a special Chicago issue of RESURGENCE NUMBER 8 which includes a PROVO-CHICAGO manifesto; ANTIPOLITICS APOCALYPSE ANARCHY; HERMETIC GUERRILLA; RETURN to DREAM, PRISONERS! etc. etc. 25¢

IN THIS ISSUE

"The FORECAST IS HOT" (p. 10) was distributed at Pastor King's Freedom Rally last summer, attended by 50,000 people who later marched 15 abreast down State Street to City Hall shouting, among other slogans, "Black Power" and "Hey, Hey, Whattya know; All Cops Must Go!" This manifesto-leaflet has been subsequently distributed throughout the country and reprinted (with some amusing errors: "guests" instead of "quests," etc.) in the State University of New York at Buffalo Spectrum and read over Buffalo radio..It also appeared in issue #2 of HEATWAVE, & a Dutch translation is to appear in Provo (Amsterdam); an excerpt appeared in #2 of Black Mask, along with excerpts from HEATWAVE, the Internationale Situationniste & the Resurgence Youth Movement of New York.

A small book of poems by Benjamin PERET, Peret's Score, in a bilingual edition with English translations by J. H. Matthews and illustrations by E. F. Granell, was published by M. J. Minard (Paris) in 1965.

The first three paragraphs of "Vengeance of the Black Swan" are extracted from an automatic text; the theoretical "irresponsibility" of these opening paragraphs is not supposed to be justified by this simple explanation but rather by the elucidations which follow the purely introductory, objective delirium.

"Elementary Structures of Reification" by Jean GARNAULT was translated by Franklin Rosemont and Dorothy DeCoster from issue #10 of Internationale Situationniste (Address: B. P. 307-03, Paris, France). As far as we know this is the first situationist text to appear in a journal published in the U.S. We shall soon reprint their manifesto on the 1965 Watts Insurrection, also a text on "Unitary Urbanism" in the Chicago compilation-issue of HEATWAVE. A situationist pamphlet, The Totality for Kids by Raoul Vaneigem, is available from us for 25¢.

The Durruti Column, founded by Buenaventura Durruti, comprised the most militant sections of the Spanish anarchist movement, who roamed the countryside liberating the towns & villages during the Revolution of 1936. They are best described by their own words: "We all hate the war, but we accept it as a revolutionary means. We are no pacifists and we fight with passion. War, this old-fashioned idiocy, is only justified by the Social Revolution. We do not fight as soldiers but as liberators. We advance, not to capture properties, but to liberate those oppressed by capitalism and fascism. The column is a union of class educated idealists. Up to now, victories & defeats only served capitalism to keep armies & officers and to secure profits & rents. The Durruti Column serves the proletariat. Every victory of the column is followed by the liberation of the workers of the captured village." (From a memorial pamphlet for Buenaventura Durruti published by the CNT-FAI.)

Leonora CARRINGTON, surrealist painter & storyteller, lives in Mexico. "White Rabbits" originally appeared in English translation in View (#9-10, Dec. 1941 - Jan. 1942).

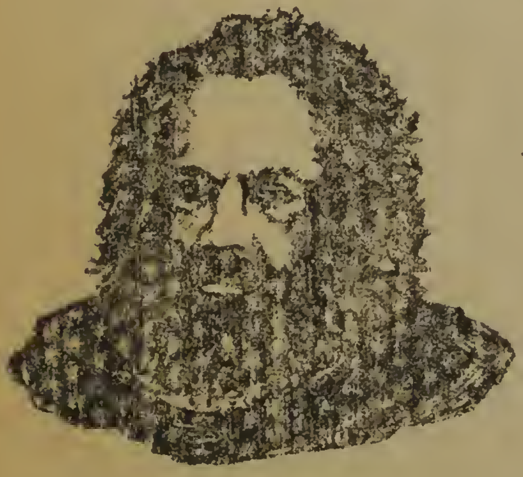
"A Plea to All" by Robert D. CASEY, excerpts of which are reprinted herein, was unanimously adopted as the official statement of the Board of the Survival of American Indians Association.

[PAGE 5 CONT.]

I saw it on TV and then we proved it at home.

THE ONLY EVIDENT EXPLANATION FOR the current dirth of creative, uninhibited, subversive and let's face it, lucid thinking on the part of those who supposedly are most aware of this society's liberating potentialities must simply be the novelty of a revolutionary situation. Its the old story again, and we hope for the last time, of the spinster's blind owl.

The thought patterns and ways of behaving that defined this society are speedily disintegrating in splendid imitation of sparkling Alka-Seltzer, progressively increasing its decomposition as the end approaches. Despite this one finds all about a gloom and despair, an inappropriate stillness--and have you noticed how emtpy the streets are of dancers during the day? Nonetheless each established institution confronts a vast spectrum of discontent and abuse, amplified at every moment traditional values are refurbished and displayed to the "masses." Spontaneous revolt is present in all places. Its more energetic forms exhibit a fiery brillance not frequently manifest in the context of a supposedly contented populace and therefore easily misunderstood, or, worse, ignored by those who pretend to bow at Wisdom's egg-shells.



M. BAKÚNIN

The end of the common consensus, has been marked for all to see, through the immediate and intimate explosion of innumerable, complex social issues and crises.

In white urban areas it is the racial unrest in the ghetto and its appalling intimations that has had the most recent and significant consequences upon formally complacent individuals. The riots have struck a raw nerve, albeit superficially racial, more profoundly social in effect, that hurtles into proper perspective the formerly ignored machinations of Established Society's political leaders. Irrationality pervails not only in racial matters, but in every manifestation by the appendages of a wilted and constipated governmental structure.

The obfuscating complexity of the War in Vietnam, so carefully fostered by our well-suited war-lords, to induce apathy upon the citzenry, has engendered an unexpected popular reaction: the politicians appear to be witless and bungling fools (reinforcing a long held prejudice) who cannot cope with these intricacies and therefore cannot be trusted in their present course. The reaction has not been to cut through the complexities and thereby end the confusion in a violent manner, but in a pacific one, thanks to the reportage of the mass media.

Television especially has contributed positively in this respect, for every news program carries quite candid coverage of the war in progress, with each report adding more evidence to the brief that there is absolutely nothing in South Vietnam worth sacrificing the lives of American youth for. On top of all the useless bloodshed the bankruptcy of the war is personified by that supremely unpleasant caricature of a fly-swatting, moustachioed petty dictator out of an hastily assembled, low-budget flick--General Ky, who, unfortunately for Washington, has done a magnificent job in building U.S. anti-war forces. A beautiful case of the double-edged razor at work: the institution meant to serve as a seditive has in fact, through its own inexorable economic laws, become a stimulant. And this despite the censorship that runs rampant, suppressing news of Army revolts in Vietnam, for instance. One can appreciate the opposition of Hans Morgenthau, and those of his ilk, to the war, for Realpolitik is threatened to its foundations since it presupposes a modicum of intelligent political behavior that is altogether absent in this situation leaving open the field of political "science" to the uncontrolled excursions of psychoanalysts, astrologers and other disreputable types.

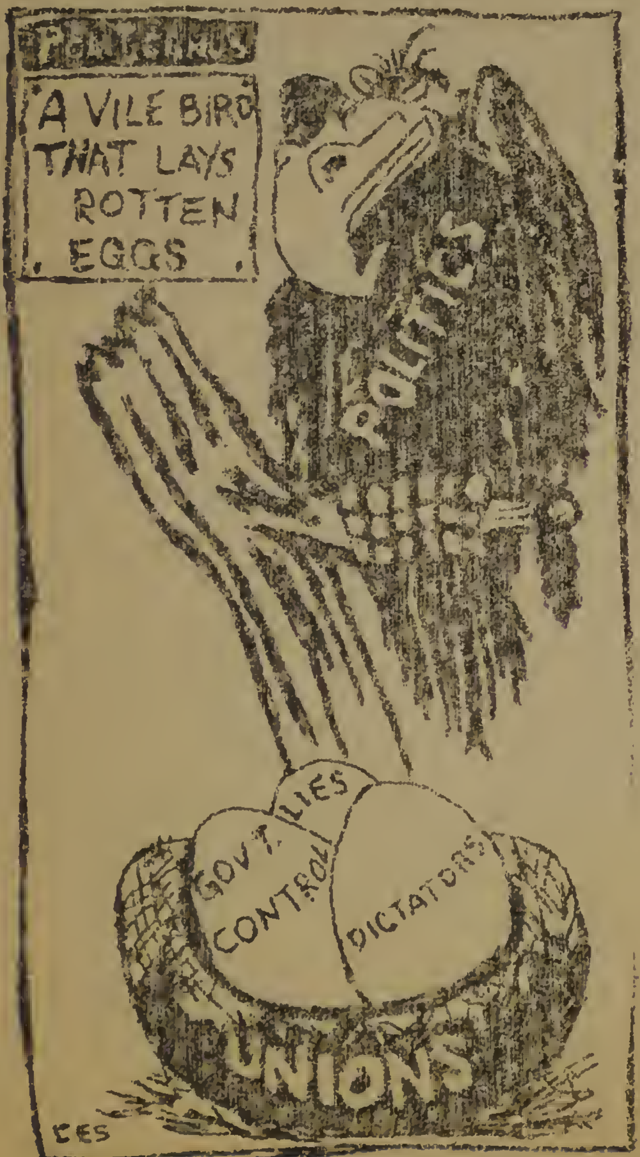
Media journalism in this case undeniably flabbergasted the Establishment in inadvertently presenting a real solution to a fictitous crisis and institutional solution it was meant only to report. In other areas of unrest, however, this has not been true. Institutional solutions to racial problems, for example, are pretty thoroughly demonstrated to be wholly inadequate by the media, simply because riots persist, but no real solution (even partial one) is offered. The resulting irrationality has a profound and disturbing effect upon those who expected answers from their community leaders, not evasion and patently inadequate stop-gap measures. Religious, business, and civic spokesmen have only two claims to respect: obviously they are symbols of success (the right order of people and things), and, less visibly, but more basically, they are (or were) voices of Reason; one flowing out of and depending on the other. In recent crises their erstwhile reasonable voices now echo political platitudes, and their powers of settlement (reasonableness) are only made legitimate by the acquiescence of the opposition, as typified by Martin Luther King's open-housing agreement for Chicago. An agreement that will benefit the black bourgeoise and the white power structure.

Yesterday's complacency and privatism were situated within a mellow and all-answering rationality: others would safely prevent the intrusion of the world--afterall it was their world anyhow. But with street rioting in cities all over the globe, with a senseless war resembling more the nightmare of a megalomaniac, with television revealing angry black faces screaming fear into virgin ears and silly, impotent white men shouting back, with long-hair youths flaunting everything proper,--generally with all things in question from God to autos, complacency has lost its moorings and chaos reigns. All forms of communication have contributed to this conflagration of an ingenuine security.

Mass media has moved from a position of neutrality and passitivity on certain matters towards a hesitant force for chaos itself. Every news program, every television documentary, the newspapers and popular magazines all scream horror and destruction, amplifying for more sales every riot, all mass murders and rapes and blood begins to seep through the pages and flow from one television program to another eventually to drip upon living-room rugs across the country.

Among all of these hammer blows to the mirror and among all the broken glass the most beautiful and hopeful signs of wakefulness are emerging. Young blacks are tasting for once victory and an almost forgotten appetite has been revitalized, never to be quickly appeased in the future. The most militant unionism since the Forties is developing. Only yesterday (september 22) several thousand auto-workers in Milwaukee struck the American Motors Stamping Plant despite the opposition of local union leadership who hysterically demanded that the workers return to the line for a shutdown during the beginning of new model production could seriously hinder American Motors' attempt to achieve plush solvency. The workers, we should take heart, still know when to strike effectively. The anti-war sentiment, not withstanding the futility of Saran-Wrap boycotts, is definitely growing among all segments of the population. And lastly we have the flourishing disaffiliation of youth of all economic levels and from all geographic areas.

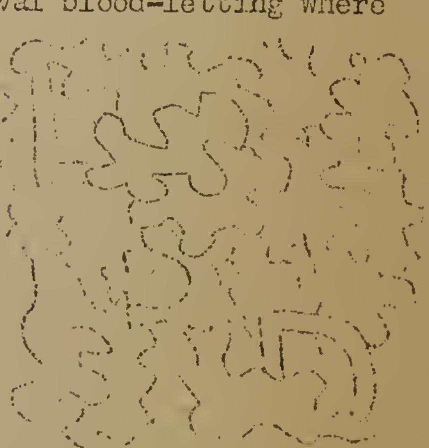
This last development has reached outstanding proportions in only the last year, when with their gains in sexual freedom elaborately displayed, young people began to invade their own consciousness and there extract the beginnings of a new culture. The drug scene lumbered out of the basement and began to occupy a choice but mistrusted storefront to become a part of what the Situationists refer to as the Spectacle.



The mass influx of young people created the Psychedelic Movement and this movement has joined the other red and black forces of chaos generating more broken-glass for reasonable adults to nervously swipe aside. (The popularization and resulting commercialization could only be anticipated given the nature of this commodity-orientated society where the emotional starvation of the population must constantly be stayed by new extravaganzas.) Yet the psychedelic phenomenon is of a different order from the other chaotic happenings, for within it there is the wholly significant tendency towards the most absolute confrontation with Authority. Unlike the physical threats and destructions, which are needed of course, the psychedelic phenomenon cannot be a matter of argument. Authority can be altogether banished temporarily from its putrid, concrete pedestal by dynamite, but to prevent new lice from re-building, a totally free consciousness is demanded; a consciousness that has dismissed the dualisms that are the very sand and stome of Authority's support. Psychedelic experiences in transcending so thoroughly the individual and the collectivity will aid tremendously is advancing this new, sublimely complete consciousness.

The collectivity of these licentious black desires issuing from the shadows illuminates the disgradeful insipidity of thought and action quivering behind cliches, an almost unnoticiable twitch, its only claim to life. History has again rushed past the innovators, leaving behind in their over-crowded rowboat a socially myopic and emotionally bovine horde of cater-waulling malcontents, diligently oozing out of their tender open pores a pessimism that is too puerile to be an existentialist affectation. A most quaint ethical predicament affects this group, who in stating their aim to transcend pessimism and optimism achieved a "new" stage: the Idea of Struggle, which encompasses all activity and becomes the very meaning of life. What they in fact achieved was a new pessimism, steeped in traditional ethics, not a new foundation for action, but only a restatement of a familar failing of will. Some threat to our rulers this! The entire mystification of social reality gains form and propagates itself on the basis of duty and on an inverse conception, the so-called enemies of this mystification expect to reveal its putrescence!

The only results possible from this spurious ethic is a program of non-violence and its communitarian aim--the counter-society: medieval blood-letting where immediate major surgery is required: banal utopianism. To avoid unnecessary confusion we should make clear that we are not opposed to social experimentation, in fact we wish to encourage it for the multifarious social and personal relationships possible should be thoroughly explored. However the test-tube in this case cannot transform the laboratory and we do not wish to be deluded by attacks upon "the twigs of the capitalist tree."

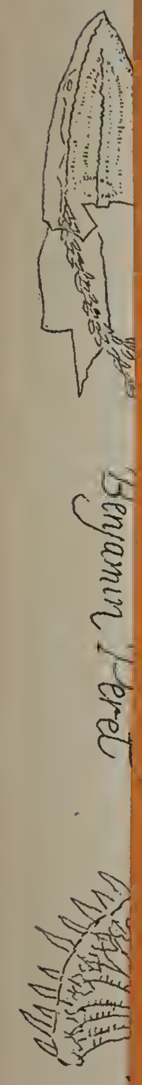


Needless to say, the expectations of these utopians are filled with their own liberating contradictions, for there are those who while half-heartedly subscribing to the Idea of Struggle also, to the hoorror of the establishment, hold Kicks Now as a proper demand. These are the "human beasts of love" acclaimed by Michael McClure, who in their glorification of passion in all of its manifold brilliance chafe under the reins of the new pessimism and its mangy superfluities. Here we have the souls divining the freest expression of the fullest extension of their immediate needs and creating, to speak cryptically, the Revolution. For as Felix LeDantec has said, "Rights are natural:duties are metaphysical."

To these various colored threads we add a sweetly warm and wet crow-bar with which we can break out of this musty crate. Firstly, we must clear the decks of the seaweed of moral elitism that can only attract more of the same and the very last thing we need is the twaddling savant displaying his refurbished liberal values to the select. (The tear-damp cheek is laughable.) Only a cracked-mirror could reflect such useless piety in the face of breathtaking transformations. An impacted affirmation will not suffice, for only an exhaustive celebration is proper while avowing that everything is immanent to man. The frightened thread upon the dismal planks of a rotted ship and remain oblivious to its slow sinking.

Accomplishing this we are free to subvert Authority with a methodical thoroughness it will never overcome.

B. MARSZALEK (to be continued)



Benjamin Peret

THE FORECAST IS HOT!

Rejecting, totally, the political, theological, literary, philosophical and academic assumptions which hinge our society to the withered refrigerator of civilization (and which are, in any case, rooted in stupidity & class interest) and insisting, moreover, on our own irresistable emotional autonomy, we find it essential to affirm, here & now, without reservations & at any price, the marvelous red & black validity of absolute revolt, the only attitude worthy of survival in the present millenium of streets and dreams.

More than ever, with everything continually at stake, we find it necessary to affirm the impassioned use of the most dangerous weapons in the arsenal of freedom:

Mad Love : totally subversive, the absolute enemy of bourgeois culture;

Poetry: (as opposed to literature) breathing like a machine-gun, exterminating the blind flags of immediate reality;

Humor: the dynamite & guerrilla warfare of the mind, as effective in its own domain as material dynamite & guerrilla warfare in the streets (when necessary, however, rest assured: we shall use every means at our disposal);

Sabotage: ruthless and relentless destruction of the bureaucratic & cultural machinery of oppression.

It is necessary, at times (and this is one of them) to speak bluntly: we affirm deliriously & simply the TOTAL LIBERATION OF MAN.

Long live the Negroes of Watts, the Puerto Ricans of Chicago, the Provos of Amsterdam, the Zengakuren of Japan and the youth of all countries who burn cop cars in the street and demonstrate by these exemplary manifestations that the struggle for freedom cannot be guided by the rulebooks of priests & politicians!!

Long live the New Guinea tribe who, aware of the stupidity of technological civilization, massacred the managers of a washing-machine factory, took over the building and converted it into a temple of the marvelous but elusive Rabbit-god!!

Long live the youth of Fairbanks, Alaska, who, after being forbidden by law to drop out of school, retaliated by burning down the schoolhouse!!

Long live the lunatic who escaped from an asylum and calmly robbed a downtown bank only to have his "sane" brother tell The Man!!

Long live Barry Bondhus of Big Lake, Minnesota, who dumped two buckets of shit into the file drawers of his draft board!!!

Long live the twelve Fort Lauderdale, Florida, teens who, prevented by their schools from meaningful experimentation, independently began manufacturing LSD, two sizes of plastic bombs, smoke bombs and a varied & catalytic assortment of revolutionary hardware!!

Long live the Incredible Hulk, wildcat strikers, the Nat Turner Insurrection, high-school drop-outs, draft-dodgers, deserters, delinquents, saboteurs and all those soul-brothers, wild-eyed dreamers, real & imaginary heroes of defiance & rebellion who pool their collective resources in the exquisite, material transformation of the world according to desire!!!!

The lucidity of alley apples and broken bottles has replaced autumn leaves — the crushing subservience to authority scorched by molotov cocktails of fantastic destruction, and, far from finally, the expressionless caress has been delicio transcended by the touch that stimulates to unheard-of heights the sensuous po of the only dynamism that matters. As liberated souls (and we are, for our quest cannot be stopped now) we have necessarily an historically enviable role as cosmic architects armed with hammers, electric guitars & apocalyptic visions, but more significantly, armed with the exhilarating knowledge that we are able to crush systematically all obstacles placed in the way of our desires & to build anew EVERYTHING.

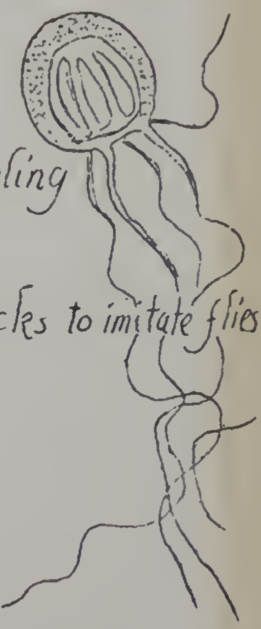
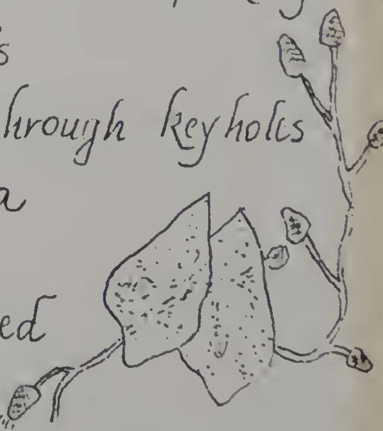
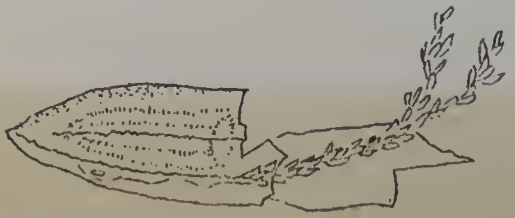
POST NO BILLS

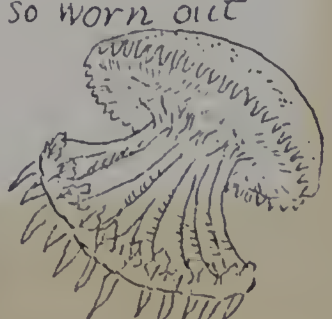


Nevermore shall the wind's bones terrify the oldsclocks howling
in the sardine tins
Nevermore shall the feet of tables put their legs round their necks to imitate flies
Nevermore shall broken teeth make music.
Nevermore shall loaves of bread walk about naked
Nevermore shall air-currents give orders to statues of salt
Nevermore shall the cross-bar be a railway signal
Nevermore shall my shaved-off moustache grow again above my neighbor's eye
Nevermore shall the beefsteak whistle for its dog
Nevermore shall the metro ask for a drink for pity's sake
Nevermore shall cherry-stones steal latrines for the last speck of dust
which looks for the ears left behind in taxis
the hardboiled eggs which are so good at spying through keyholes
and all thats left of the great wall of China
are there to observe the traditions
and see that the first strawberries are respected
which look at themselves in every mirror
and would be so pleased to see a calf hanging from the butcher's stall
throw itself on to the butcher
and run away after its skin which would be so worn out
that it would see its brother through it





Benjamin Peret



VENGEANCE OF THE BLACK SWAN

from Haldororian Zoology to the Barricades of the Revolution

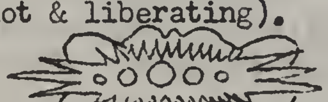
Apples fall from trees at a slower rate than novels are published, yet gravity is a conventionally established fact, the world is believed to be round, and time is measured by the duration of its turns. If the world is round, then what is called "literature" must be flat: in any case, there is no place for it in visions of freedom, though it complements well the revolving monotony that passes for life today. Literature: the beloved toy of ladies of the court and men of the cloth: ugly bitches and weak-kneed clerics twittering in their guilty cages, seeking the "eternal" values of literature as if eternity was the ringing of a vicarious alarm clock. Literature: hypocrisy, cowardice, defeat, sentimentality, patriotism, Virtue, reaction, stupidity, religion, masturbation, guilt, senility, anemia, greed, self-restraint, good breeding, bourgeois morality, impotence, shit. If I exist, then literature has no right to exist.

Literature points in all directions at the same time because it has no place to go. Bourgeois religion, bourgeois politics, bourgeois sex, bourgeois comedy, bourgeois crime: these are the ends and means of a meaninglessness without end. But I do not wish to be misunderstood: deliver me from the "meanings" of literature, from the absurd maneuvers of a clever literary psychology that calls all the shots and invariably declares itself the winner. A little psychology is a dangerous thing. Literature, it is true, is older than psychology, perhaps older than man. This is at least the impression it tries to give. Bourgeois morality says: respect your elders, and literature is one of the eldest. Respect above all the dead, and certainly literature is related to death: no living person could possibly have anything to do with it, a mere past-time of dying people.

But literature is flammable, it burns well. Perhaps man will attain a higher stage of civilization, a higher stature, when he learns to piss on literature and draw the conclusions. Even if the conclusions must wait, human freedom will have made an appreciable advance. Literature could be depicted as a prison of straw. I choose to live outside it, and, from time to time, to set fire to it, or dismantle it calmly. But many of my contemporaries live inside its gloomy walls: sometimes I am not sure whether they need pity, a helping hand, or a punch in the nose. A book of matches is more useful than a book of sonnets or the average novel. This is not in itself of much importance, but this is: the book of matches is infinitely more interesting, more enlightening, more charming. It also poses more valid solutions to the problems confronting us.

* * *

It is time to spit on literature, to expose it before it stabs us in the back. Actually it may be argued that it lacks the strength to do this, but its social function alone (as a new opium of the people) inevitably necessitates an attack against it. It is time to discredit the idea of a literary imperialism which submerges free human expression under several centuries and millions of pages of rhetorical chains, grammatical traditions, senile metaphysics and general philological inhibition dogmatized and bureaucratized in modern bourgeois society. It is time to distinguish clearly, once and for all, between LITERATURE (authoritarian, official, rigid, academic, confining & cold) and POETRY (desperate, spontaneous, wild-eyed, convulsive, hot & liberating).



To the bourgeoisie, for whom prophecy long ago became the compartmentalized private property of "scientific" specialists, poetry too has become the task of "qualified experts" with college degrees, those who are called Poets by *Mademoiselle* or *The Paris Review* and whose works fill the cretinous libraries of politicians, university administrators and the presidents of large metropolitan banks. The bourgeois sees in words only commodities, and in communication only the exchange of commodities: for him, "money talks." His conception of the role of language in human affairs is thus rationalized to the astonishing limits he has placed on this society: it is as if the prisoner were to construct a world-view based on the "everlasting truth" of handcuffs, guards, stone walls and iron bars. This degraded conception of language resembles the equally degraded bourgeois conceptions of love, freedom, dreams and art, in which man's inhumanity to man is transformed into the collective insult known as the Humanities. Against these conceptions, however, and against the whole edifice of bourgeois-Christian civilization, the surrealists have raised the battle cry of Lautréamont: "Poetry must be made by all. Not by one." This "all" exists on at least two levels: first, that of an all-inclusive collectivity; second, that of a human psycho-physical totality rather than exclusively emotional, intellectual or other partial and therefore, alienating, restricting planes. We must oppose to the reactionary conceptions of the ruling classes all the latent potentialities of truly human life. We must fight the superstitious fantasies of bureaucrats with ruthless, implacable, everyday magic.

We are taught in schools to respect literature the same way we are taught to respect cops. If we are under 18 in most cities, we are coerced into schools by day and confined to parents' homes by curfews at night. All day we witness a ceaseless spectacle of unfreedom held together by soldiers, cops, governments, businessmen, bosses, priests, teachers, scoutmasters, social workers, truant officers, courts, pseudo-opposition groups (like the Communist Party), journalists, loan companies, insurance agencies and the Book of the Month Club.

It is evident from the start that we must *rebel* against all this with anger, humor, violence and the whole range of emotions and intelligence. But to rebel, we must love, madly, and to love, madly, we must hate the obstacles to our love. From the dream to the word to the act! Let us destroy the obstacles to love! Let us rebuild this world, this society, *everything*, from top to bottom.

Thus comes the deluge of visible messages of insubordination on the rooftops of consciousness and in the streets of dreams: Drop out! Make love, not war. Dodge the Draft. Let the State Disintegrate. Don't Fight the Bosses' War. I Won't Work. Sabotage. Freedom Now! Dancin' in the Streets. In the long hot summer, the rain of terror and the rain of pleasure.... Burn, baby, burn!

Understood in this sense, poetry *is* the revolutionary movement.

To forestall unnecessary confusion:

1) The poetry taught in schools has nothing to do with poetry. Occasionally, it is true, real poets are included in textbooks: but most often they are "represented" by their worst poems, or their works are so concealed in the maze of introductory notes, annotations, explanations, biographical and bibliographical information and critical remarks that they do not breathe and pulsate as poems should. Textbook poetry is lifeless, irrelevant, empty and above all *safe*. It offends no one, destroys nothing, creates nothing, inspires nothing: it is boring. And this is the condition generally reserved, officially, for poetry today: bureaucratic-capitalist society, in bureaucratizing poetry into textbooks, has thus attempted to bureaucratize real poetry out of existence. Poetry, now a specialization, is thus excluded from the lives of "ordinary people" except in sterilized, deodorized, State-approved regulation plastic squeeze-bottle form. We shall see, however, that these attempts, like all defense-measures of our ruling classes, backfire in reality, for just as people in the street find weapons (rocks, bricks, bottles, gasoline) to use against cops, so they will find poetry: *automatically*.

2) Poems, in any case, are not nearly as important as poetry.

3) At certain historical periods, especially periods of crisis and great social change, poetry has sought refuge *outside* the poem. This was true of late *18th* century France, which produced no poems of any importance, but which brought into being the anarchist, pre-surrealist and marvelously poetic works of the Marquis de Sade (as well as Diderot and some others) whose best works were written in prose. The same is true of the United States immediately after the Revolution, which saw the appearance of several amazing novels by Charles Brockden Brown (*Wieland, or the Transformation*; *Edgar Huntly*), extensions of certain preoccupations of the Gothic genre in England.

At other periods, poetry breaks through its traditional forms into something altogether *new*. The works of Blake, Baudelaire, Lewis Carroll, Lautréamont, Rimbaud, Mayakovsky, Samuel Greenberg, Lorca & the surrealists are evidence of the poet's desire to smash complacency, conformity, convention, the "official" view, the accepted version of things, --- to pose anew for the consideration of all the gravest problems of human existence, and to propose tentative, daring solutions.

* * *

The following examples will help clarify our conception of poetry:

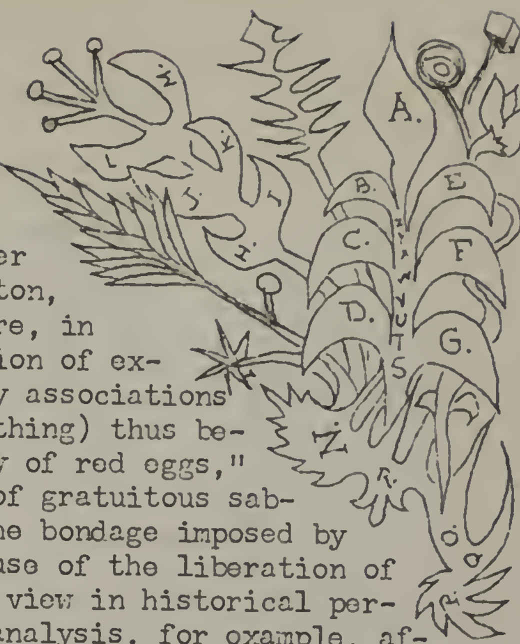
During the rioting by Puerto Ricans in Chicago, June 1966, two south siders and another person from the suburbs who were passing through the neighborhood of the rioting in a car, stopped for a few minutes: JUST LONG ENOUGH FOR THEM TO OVERTURN AND SET FIRE TO A POLICE SQUAD CAR. "There's a big, black, oily patch," wrote the *Daily News* reporter, on the street "where...the squad car was turned over and set afire." Modern capitalist society: "Paint it Black" -- which, incidentally, was the Number One record in Chicago at that time.

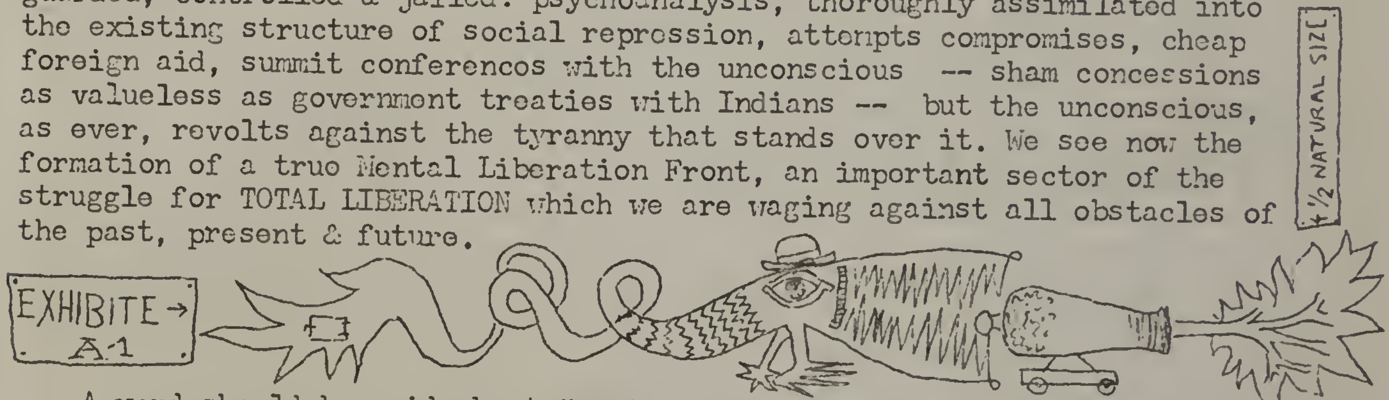
Or again:

On 29 January 1966 Indians of the Northwest Coast, engaged in a violent struggle against immediate government persecution and long-range government cultural intervention, held a night rally to protest the brutality of state authorities. ON THIS COLD, RAINY NIGHT, AMIDST LOUDSPEAKERS, A GROUP OF YAKIMAS DID AN AUTHENTIC WAR DANCE AROUND A HUGE BONFIRE -- which could be seen for miles -- AND TWO YOUNG INDIAN GIRLS THREW A LIFE-SIZE EFFIGY OF WASHINGTON STATE GOVERNOR EVANS INTO THE FLAMES WHILE THE INDIANS CHEERED AND SHOUTED WAR WHOOPS.

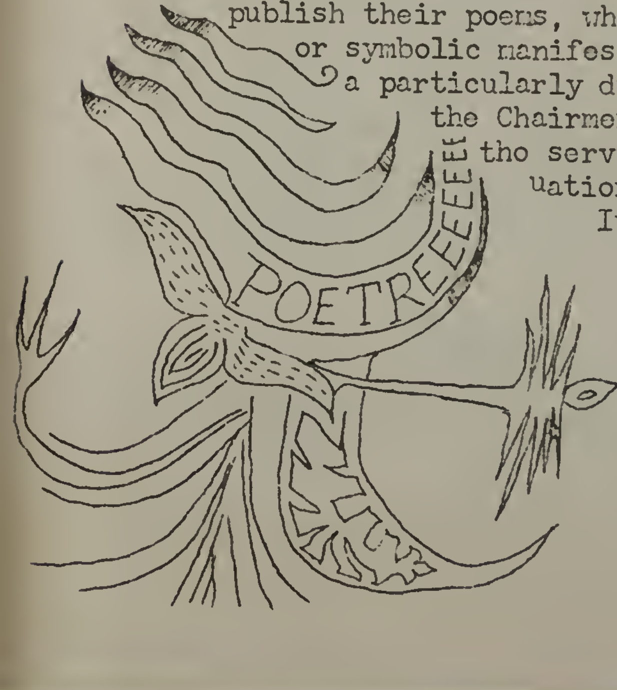
Rioting and guerrilla warfare in the streets and in the country are the social complements of individual rioting & guerrilla warfare in the mind.

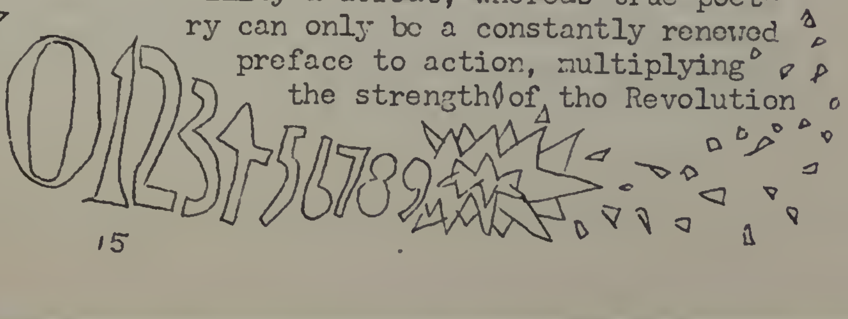
Poetry is thus a form of guerrilla warfare, or perhaps it would be more to the point to say that guerrilla warfare is a form of poetry. The automatic image is a valid & triumphant expression of emotion, but, precisely because of this, it is also a weapon: and the wilder the image the greater the explosion. "Words make love," wrote Andre Breton, but only in poetry & dreams. The rest is literature, in which words do nothing but work for the preservation of existing reality. To free words from their customary associations (& to disrupt the conventional relations of everything) thus becomes a revolutionary necessity. "The strident cry of red eggs," wrote Benjamin Peret. This is essentially an act of gratuitous sabotage, or creative vandalism: words, freed from the bondage imposed by bureaucratic-capitalist society, can serve the cause of the liberation of the mind. This can be seen from various points of view in historical perspective. The reactionary consolidation of psychoanalysis, for example, after Freud (as exemplified by Jung, Adler, Horney, Fromm, etc. & their followers) effected an imperialist colonization of the unconscious, which, far from being explored in the manner of Freud, is now instead more than ever policed, guarded, controlled & jailed: psychoanalysis, thoroughly assimilated into the existing structure of social repression, attempts compromises, cheap foreign aid, summit conferences with the unconscious -- sham concessions as valueless as government treaties with Indians -- but the unconscious, as ever, revolts against the tyranny that stands over it. We see now the formation of a true Mental Liberation Front, an important sector of the struggle for TOTAL LIBERATION which we are waging against all obstacles of the past, present & future.





A word should be said about "poetry" magazines, the independent, one-shot, mimeographed or occasionally university-sponsored & printed "little magazines" which one finds on the waysides of everyday life and to which at least a few people look for flashes of intuitive lightning or at least a luminous grain of possible hope. It seems to me that the very notion of a "poetic" specialist publication of any kind is anti-poetic from the start, based on a sentimentalized, false idealism indicating a clear incapacity for action. The poetry of images & words is nothing if it does not lead to actions and realizations. "Poets" who have nothing better to do than publish their poems, who are interested only in the purely verbal or symbolic manifestations of poetry, are not poets at all but a particularly dull species of quasi-bureaucrats (analogous to the Chairmen of so-called "charitable societies") at the service of their own alienation and the perpetuation of universal commodity-monotony society. It is not by accident that the verse in these magazines is almost invariably unreadable, insipid and flat, because they are only the apologetic postscripts to premature senility & defeat, whereas true poetry can only be a constantly renewed preface to action, multiplying the strength of the Revolution





at its source in human desire.

It is undoubtedly true that sometimes revolutionaries are found working on these "little magazines," and that sometimes one can find in their pages poetry of a particularly subversive quality. But it will all come to nothing unless they explode the illusion of "pure poetry" or "art for art's sake" that too often confuses & injures an otherwise radical orientation. Is it necessary to add that there can be no question of "engaged" art, of dictatorship over art, of any chains of any kind? As Trotsky wrote to Breton in 1939: "...truly independent creation in our period of convulsive reaction and return to savagery cannot fail to be revolutionary by its very spirit, for it can no longer seek a solution in an intolerable social asphyxiation. But art in its entirety and each artist in particular must seek this solution by individual means, without waiting for some external order, without tolerating it, rejecting it and covering with scorn all those who submit to it..."

Traditional political journals, however, in their theoretical austerity, preferring the technological chemistry of speech to the "alchemy of the word," and too often settling for uninspired versification of the embarassingly obvious & boringly incidental, present themselves as a body of ideas without any blood. It is insufficient to remain critically "receptive," for it is not a matter of having poetry in one hand and criticism in the other, but of letting poetry be marvelously critical and criticism ruthlessly poetic. This must be done, of course, without a trace of eclecticism, and without sacrifice, relying only on the voluntary luxury of our wildest dreams which our conception of Revolution verifies at every step.

So-called "socialist" realism is merely a reflection of a whole ideological mausoleum based on central committees, party discipline, and fear of the unconscious. Rosa Luxemburg, in her polemic against Lenin's organizational conceptions (printed in pamphlet form under the title Leninism or Marxism?) wrote: "...the errors committed by a truly revolutionary movement are infinitely more fruitful than the infallibility of the cleverest Central Committee." This is clearly visible in the field of art, where the results are immediate & concrete: one has only to compare the wildest ravings of T-Bone Slim, or the songs of the Mexican Revolution, or the architectural marvels of the French mailman Cheval or Simon Rodia in Watts, or any surrealist text, with a Communist's Ode to Stalin, or Aragon's patriotic Je te salue, ma France or l'Homme communiste, or party-line sculpture in Maoist China, to see the difference between the beautiful dreams of revolutionaries and the superficial sentimentality & hypocrisy created by obedient party-members.

"Socialist" realism is, in its own way, an "ivory tower" art, despite its trappings of common language, character simplicity, & familiar working-class settings. And it is an essentially bourgeois ivory tower art precisely because of these characteristics: guilty, middle-class, masochist intellec-

THE COLORS OF FREEDOM

Ranged above our heads, the flag-like windows forever unlit continued to lap up their measure of air. They had the dimensions of those flags of red cloth which in Paris flank certain highway works and from which there stand out, in big black letters separated by dots, the inscription "SADE" which has often returned to me in reveries. The red flag, free from any mark or inscription: this flag I shall always see with the same vision that I had at seventeen when, during a popular demonstration just before the other war, I saw it unfurled by thousands, low in the sky of the Pré Saint-Gervais. And yet — I feel that reasoning is powerless to intervene here — my pulse will continue to beat yet more powerfully at the evocation of that moment when this flamboyant sea, in places flowing but thinly and restrictedly, was pierced by the soaring flight of black flags. At that time I had no great political consciousness and I must admit that I remain perplexed when I take it upon myself to gauge what degree of consciousness I have since attained. But, more than ever, the currents of sympathy and antipathy seem to me strong enough to demand the submission of ideology; and I know that my heart was set beating, is still set beating, by this day's very movement. In the deepest galleries of my heart I shall always rediscover the swaying to-and-fro of these countless tongues of flame amongst which a few linger to lick a marvelous carbonised flower. The present generation will hardly be able to imagine for itself a spectacle of that order. As yet the heart of the proletariat had not been rent by innumerable factions. The torch of the Paris Commune was far from being extinct; there were many hands there which had held this torch — a torch binding all together in its great light that would have been less beautiful, less true, without a few spiralling wreaths of thick smoke. So much individually disinterested faith, so much resolution and ardour could be read in these faces, so much nobleness too in those of the veterans. Around the black flags, to be sure, the effect of sheer physical suffering could be sensed more strongly, but passion had really burnt itself into some eyes, had left there unforgettable points of white-heat. It will always seem as if the flame had spread over them all, burning them only less or more fiercely; serving to maintain some in their absolutely realizable and well-based demands and hopes, whilst leading others, more rarely, to burn themselves out on the spot in an inexorable attitude of sedition and defiance. The condition of humanity is such (independently of the ultra-amendable *social* condition which man has made for himself) that this last attitude especially — to which there is no lack in the history of the intellect of illustrious respondents, whether they be named Pascal, Nietzsche, Strindberg or Rimbaud — has always seemed to me absolutely justifiable on the emotive plane, leaving out of account the purely utilitarian reasons for which society may repress such an attitude. One is compelled at least to recognize, in oneself, that it alone is marked by an exaltation and the pride which overcame me, when as a child I was taken for one of the very first times into a cemetery, at this discovery —

among so many depressing or ridiculous funeral monuments — of a slab of granite engraved in red capitals with the superb device: NEITHER GOD NOR MASTER. Poetry and art will always retain a preference for all which transfigures mankind in this desperate, irreductible demand which -- now and then--he takes the derisory chance to make upon life. The fact is that above art and poetry also, whether one likes it or not, there beats a flag --in turn red and black. There too time is urgent: it is a question of ensuring that from human sensibility is drawn all that it is capable of giving. But whence comes this apparent ambiguity as to the color? Perhaps it is not given to any man to act upon the sensibility of other men in order to mould and enlarge it, except at the price of offering himself as a sacrifice to all the scattered forces in the soul of his time; forces which, in general, only seek for each other in an attempt to pronounce mutual exclusions. It is in this sense that such a man is, has always been and, by a mysterious decree of these forces, must be at the same time their victim and their dispenser. Thus, the same is necessarily the case as regards a certain taste for human freedom which, called to extend the field of receptivity of all to practically infinite proportions, draws down upon a single person all the baleful consequences of immoderation. Freedom does not consent to caress this earth a little except in taking into account those who have not known or have only partly known how to live because they have loved her to a point of madness.

Elementary Structures of Reification

As if the old Marx was directing everything from his grave, the commodity form contributed, by the logic of its real development, to the clarification and deepening of the critique of political economy. Most certainly, the heirs of this critique have done everything, theoretically and practically, like the bourgeois and like the bureaucrats, to disguise or to maintain confusion on his subject by drowning it beneath a heap of metaphysical subtleties and theological arguments. But the world has continued without them. These analyses which they strive themselves to conceal, it has transcribed with a blinding light in everyday triviality: it has made the theory of fetishism of commodities both an objective truth and common knowledge.

Despite the transformations it has undergone since Marx, the commodity-economy has been conserved in its form: a form clothing the products of creative activity (of praxis) that wage labor has stripped of all humanity; a form which, faithful heir of the old judeo-christian god, acquired an autonomous existence and created man and the world in its image; a form which has engendered the anthropology of an isolated individual who remains deprived of the wealth of his social intercourse. The commodity-economy is the praxis of power: not only the principle of dissolution of the old peasant-religious civilization (the ruins of which it still pursues), but a mode of representation of the world and a form of action upon it; it has reduced the whole of social reality to the quantifiable and established the totalitarian domination of the quantitative, extending this increasingly to all the as yet non-dominated sectors of life. (see Internationale Situationiste #7, #8, Banalities de Base by Raoul Vaneigem. English translation, The Totality For Kids, available as a pamphlet.)

What appeared to be most concrete was in fact the most abstract; a formal rationalization, an illusion. But such an illusion, similar to and contrary to revolutionary ideas, once it had acquired its autonomy, operates, like an incitement to resignation, on the real world.

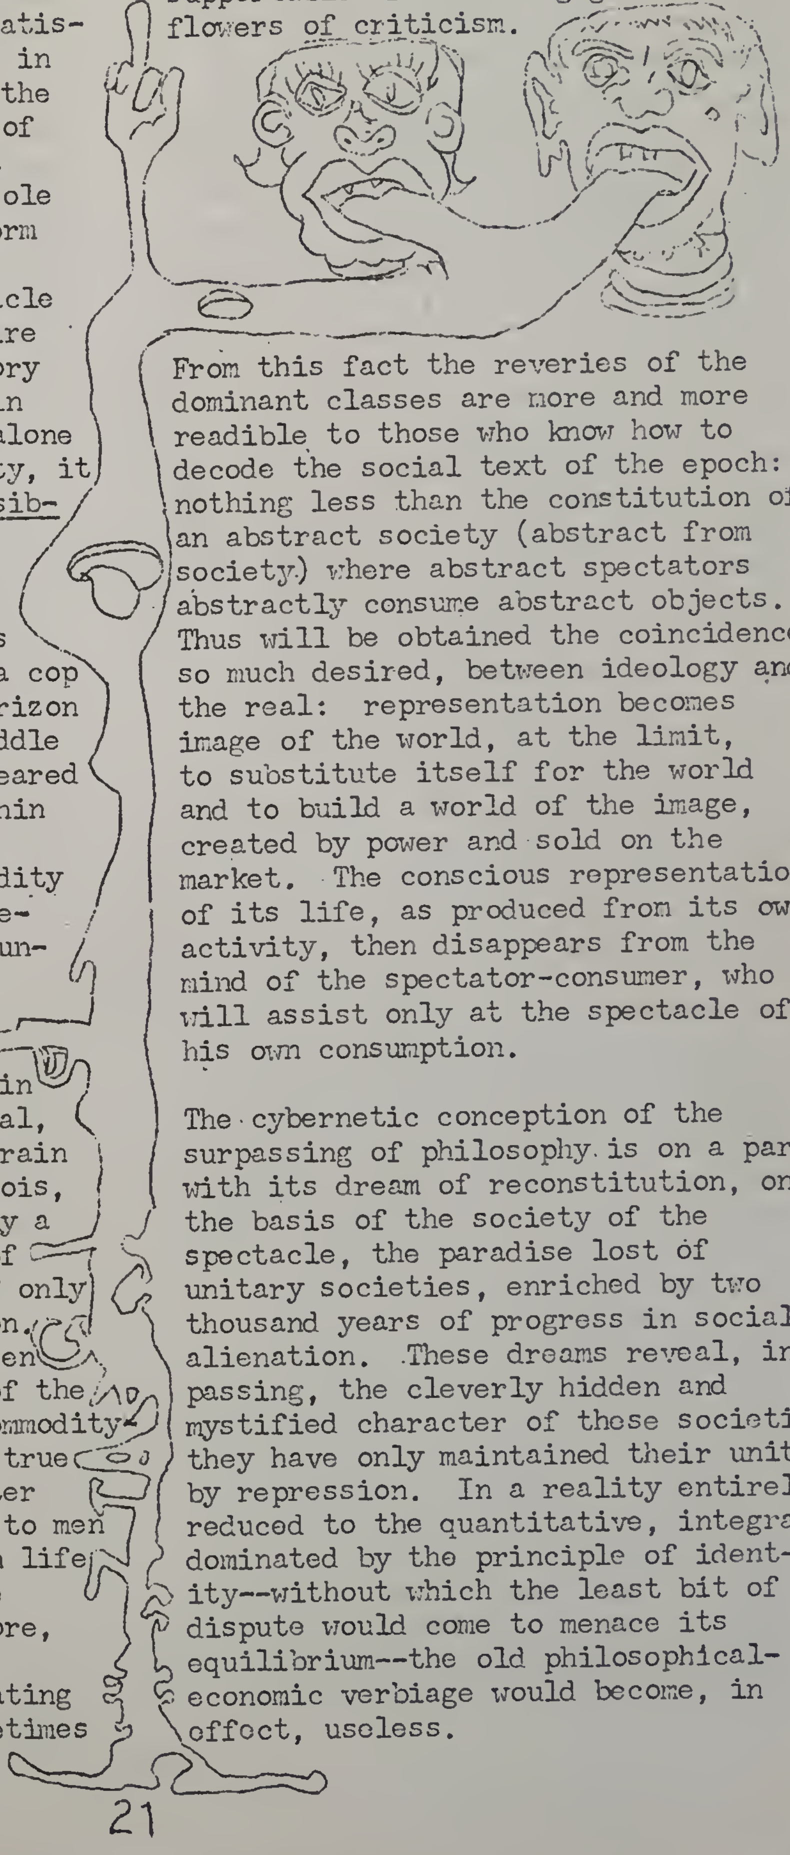
Dominant society always moves forward and leaps to new stages in the escalation of repression and alienation. The "Cybernetic State" has thus raised, in combining the fetishism of commodity-economy and the fetishism of the work of art, a successive fetish: the commodity-spectacle, projection of all life in a hypostatic and crystallized essence, the image and normative model of this life. The concentration of alienations is thus pursued in the course of the accumulation of capital. Competitive capitalism was content to overwhelm social man with a multitude of partial alienations; in reducing the formerly separated spheres to one and the same reification, this bureaucratic capitalism, on the road of rapid cybernetization, congeals and places it in a showcase.

Such a process was unforseeable only

promoters of modes of narcotic thought, like the Hindu philosophers, extol a purely vegetarian diet. They wished to make of this diet a law with the masses, searching thus to provoke the needs which they are capable of satisfying, those and no others." But in a society which can secrete only the need for another life, the opium of the commodity-spectacle is only a paradoxical realization of this sole real desire. By the commodity form and the representations which it issues, the society of the spectacle tends to crumble this unique desire in furnishing it a mass of illusory satisfactions in small portions in exchange for abandoning what is alone *possible*, that is, another society, it generously grants us all the *possibilities of being another in this society.*

The commodity spectacle colonizes the possible in delimiting like a cop the theoretical and practical horizon of the epoch. Just as in the Middle Ages the religious framework appeared to be the unpassable horizon within which the class struggle must be inscribed, the spectacular-commodity form tends to create such a framework, in the womb of which will unfold all the struggles for total emancipation, lost in advance.

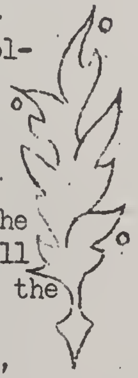
But just as the commodity form, in monopolizing the whole of the real, has real existence only in the brain of the nineteenth century bourgeois, this nightmare of society is only a true ideology, an organization of appearance which elevates itself only to the appearance of organization. The spectacle, in effect, has been only the fantastic realization of the commodity-economy because the commodity-economy has never possessed any true reality: its mysterious character resides simply in its returning to men the characteristics of their own life and presenting them as objective characteristics. Power, therefore, projects the image of survival, permitting this image by integrating therein elements possessing sometimes a liberating content, to be always open to the possible. By this operation they pass to the service of repression, rendering alienation more supportable after having glorified the flowers of criticism.



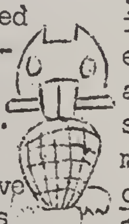
From this fact the reveries of the dominant classes are more and more readible to those who know how to decode the social text of the epoch: nothing less than the constitution of an abstract society (abstract from society) where abstract spectators abstractly consume abstract objects. Thus will be obtained the coincidence, so much desired, between ideology and the real: representation becomes image of the world, at the limit, to substitute itself for the world and to build a world of the image, created by power and sold on the market. The conscious representation of its life, as produced from its own activity, then disappears from the mind of the spectator-consumer, who will assist only at the spectacle of his own consumption.

The cybernetic conception of the surpassing of philosophy is on a par with its dream of reconstitution, on the basis of the society of the spectacle, the paradise lost of unitary societies, enriched by two thousand years of progress in social alienation. These dreams reveal, in passing, the cleverly hidden and mystified character of these societies: they have only maintained their unity by repression. In a reality entirely reduced to the quantitative, integrally dominated by the principle of identity--without which the least bit of dispute would come to menace its equilibrium--the old philosophical-economic verbiage would become, in effect, useless.

These phantasms find elsewhere, from time to time, an embryo of practical realization, always exemplarily revealing. A hospital in Richmond, Va. features an "Isle of Life" for the seriously burned. This consists of a gigantic plastic bubble maintained free of all germs. Inside, the patients, after complete decontamination, are installed in a pre-sterilized atmosphere. "No claustrophobia: the Isle of Life is transparent." (Paris-Match) While waiting for a nuclear conflict to furnish to this philanthropic work the patients it merits, society builds the image of the conditions it imposes: survival in controlled isolation.



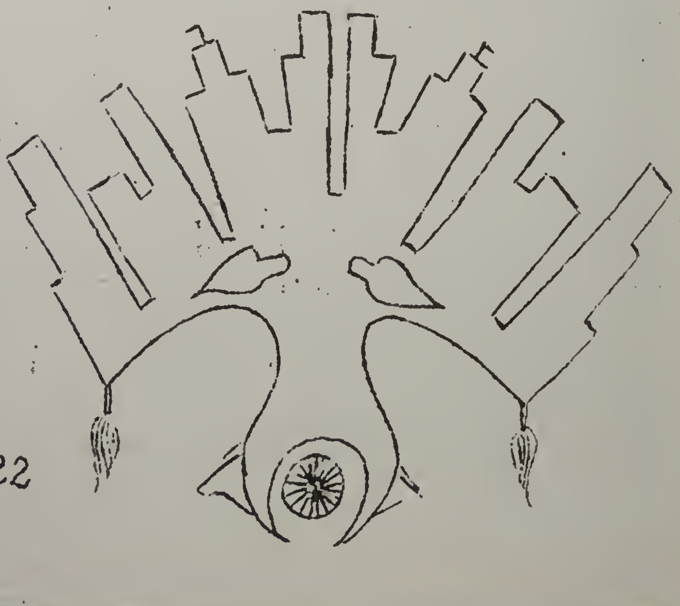
Although the commodity-spectacle tends to establish this flat and spiritual positivity, it reheats the negative in its breast, and like all historical reality produces itself the germs of its own destruction. The ancient socio-economic commonplace, the development of the industry of mass-consumptive goods produces and superproduces superproduction. Certain sociologists have even arrived at the understanding that with commodity superproduction all objective difference between things disappears. The only differentiation which would be able to be introduced is subjective. But to discover the latent tendencies to auto-destruction which such a process conceals is beyond the capacities of a sociologist. With the disappearance of use-value, the general identity between things passes from living fantasy to phantasmagoric realization. Use-value, however, is the nucleus of reality, indispensable to the production and survival of exchange value. Commodities themselves suppress their own conditions. When the system is able to do without reality, then reality is able to do without it. Modern society has grown to such a point of revolution that it parodies in advance its own destruction. Gadgets work to the end of the world of commodity-economy. The last gadgets are the "nothing gadgets": the useless machine, the machine which destroys itself, counterfeit money to burn in the fireplace.



But the commodity-economy, also produces its own gravediggers, who would not limit themselves to the spectacle of its destruction, since their objective is the destruction of the spectacle. One cannot refute the conditions of existence, one can only liberate oneself.

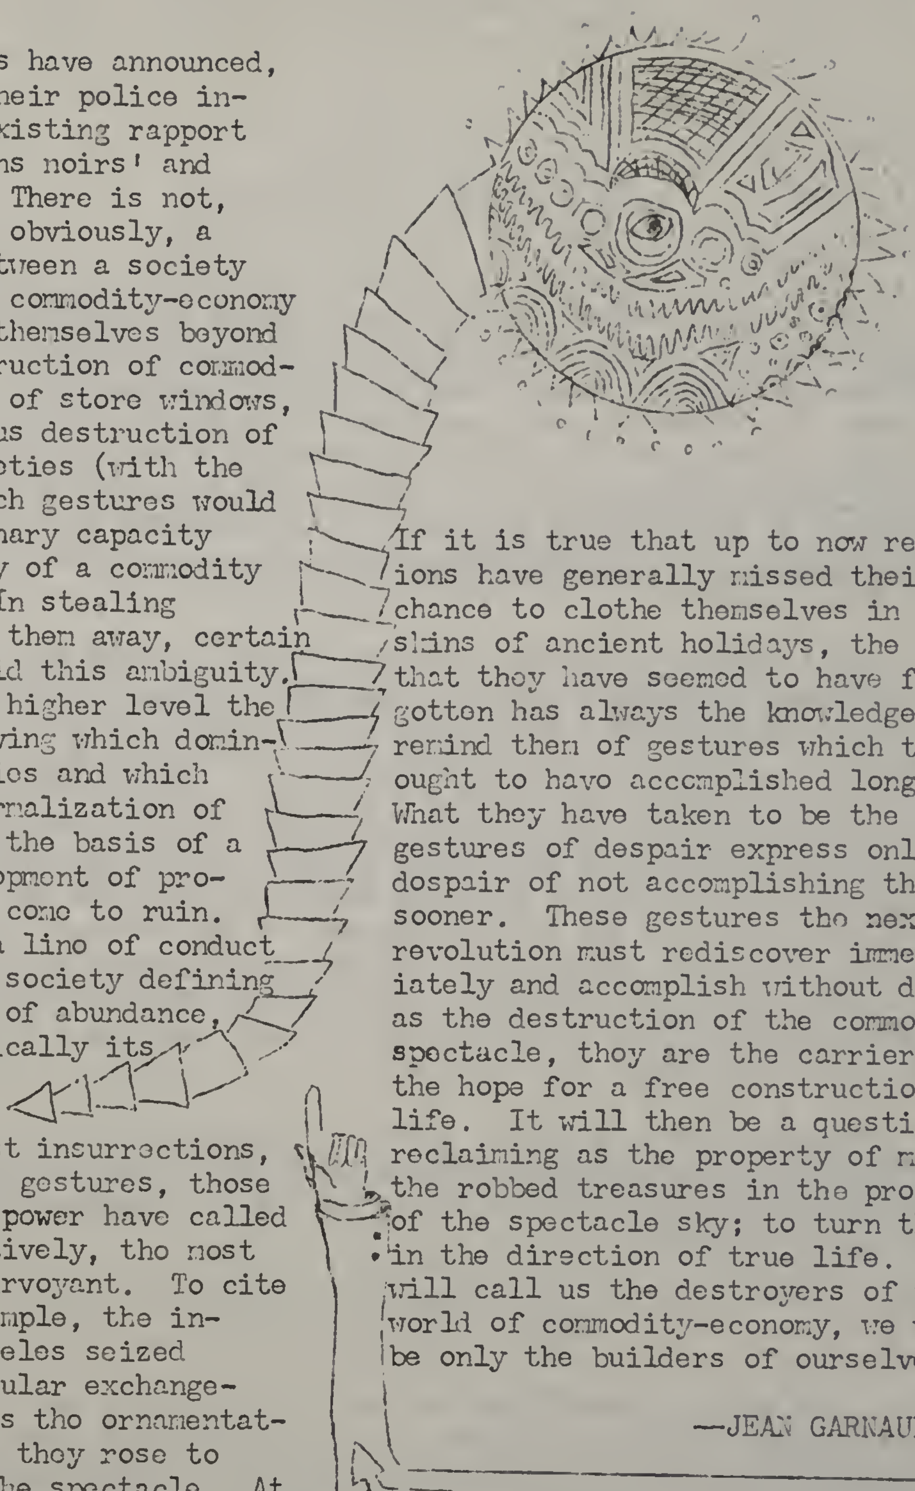
EXIT

At all stages of practical confrontation, gestures proliferate themselves, ready to transform themselves into revolutionary acts. But in the absence of a revolutionary movement this practical confrontation remains on the individual level. The nostalgia of the deprived appropriation has been the basis of the theory of individual reappropriation and has reduced it to a simple reaction against abstract socialization, introduced by the commodity form. Theft in the big department stores, that the psycho-sociologists of the owners have so justly called the "unknown method" is of a qualitatively different essence. In the spectacle of abundance, the so-called objects of consumption cease to be objects of enjoyment and become instead objects of contemplation, more and more radically strangers to those whose needs they are supposed to satisfy. Theft seems to be, then, the only mode of appropriation for enjoyment, contrary to the "known method" which appears as a mode of contemplative use, a way of being possessed by objects without enjoying them.



Certain sociologists have announced, as a discovery in their police investigations, the existing rapport between the 'blousons noirs' and archaic societies. There is not, however, simply and obviously, a real resemblance between a society on this side of the commodity-economy and groups placing themselves beyond it. Voluntary destruction of commodities, the breaking of store windows, recalls the sumptuous destruction of pre-capitalist societies (with the reservation that such gestures would see their revolutionary capacity limited in a society of a commodity superproduction). In stealing commodities to give them away, certain 'blousons noirs' void this ambiguity. They reproduce at a higher level the practice of gift-giving which dominated archaic societies and which exchange, as the formalization of social relations on the basis of a weak level of development of productive forces, has come to ruin. Thus they discover a line of conduct better *adapted* to a society defining itself as a society of abundance, and beginning practically its transformation.

In the course of past insurrections, the most spontaneous gestures, those that the bandits of power have called blind, were, definitively, the most revolutionarily clairvoyant. To cite an actual recent example, the insurrgents of Los Angeles seized directly the spectacular exchange-value which served as the ornamentation of their slavery; they rose to assault the sky of the spectacle. At the same time that they were destroying windows and burning supermarkets, they outlined on the spot a restoration of use-value: "One black carrying a stolen refrigerator in a wheelbarrow, opened it and took out the steaks and some bottles of whiskey." (L'Express)



If it is true that up to now revolutions have generally missed their chance to clothe themselves in the skins of ancient holidays, the enemy that they have seemed to have forgotten has always the knowledge to remind them of gestures which they ought to have accomplished long since. What they have taken to be the gestures of despair express only the despair of not accomplishing them sooner. These gestures the next revolution must rediscover immediately and accomplish without delay; as the destruction of the commodity-spectacle, they are the carriers of the hope for a free construction of life. It will then be a question of reclaiming as the property of man all the robbed treasures in the profit of the spectacle sky; to turn them in the direction of true life. They will call us the destroyers of the world of commodity-economy, we will be only the builders of ourselves.

—JEAN GARNAULT

"Living and ceasing to live are
imaginary solutions.
Existence lies elsewhere."
André BRETON
(The Surrealist Manifesto - 1924)

REMINISCENCES of T-Bone Slim

We have published in this and past issues of The Rebel Worker, and shall continue to publish in ZTANGI, various texts by T-Bone Slim (whose "real" name was Matt Valentine Huhta) the great IWW humorist, poet, traveler, story-teller & theoretician. We hope soon to bring out an offset reprint of his only published pamphlet, Starving Amidst Too Much, out of print since the 1920's, and perhaps a collection of other of his writings, which appeared regularly in Industrial Solidarity, the Industrial Worker and the various IWW magazines until his death in 1942.

Almost nothing is known of T-Bone's life, except that he was born in Ashtabula, Ohio (year unknown), and that he was a wanderer & a loner & a militant Wobbly most if not all of his adult life. The absence of biographical information emphasizes the defiantly enigmatic & elusive character of his work, singularly seductive among IWW writings, both in method & implication, and which remains probably the most advanced & articulate expression of the latent content of the Wobbly dream. The following text, details of which we have not been able to verify yet, is published here to put at the disposal of our readers, especially those interested in the anthropological, millenarian, occult & surrealist aspects of the revolutionary workingclass movement in the U.S, a few personal reminiscences which can at least provide a foundation for additional research.

The author, Guy B. Askew, known as Skidroad Slim, has been actively promoting the IWW since its early days. He lives in Seattle where he continues IWW propaganda efforts and maintains an unshaken faith in an anarchist One Big Union.

12 - 12 - 64

...Yes I knew T-Bone Slim for many years during the IWW harvest Drives in North Dakota and Montana. His mind was far above the average of the Wage Slaves, but strictly Rank and file. He was highly intelligent, generous and Kindly towards his Fellow Workers, always neat and clean in appearance and was considered by many as Handsome. When I knew him he was strictly Sober at all Times. He was a Powerful Prolific writer and Journalist.

T-Bone Slim many years ago was a Top Writer and Reporter for the Duluth Minn. Daily News-Telegram. In the early days of the IWW he was Sent by this Paper to cover an IWW Mass Meeting. T-Bone Slim sent the Paper a Good factual write-up favorable to the IWW. But the Editor of the Duluth News-Telegram mis-quoted him and balled up his article. T-Bone Slim

That What Is NOT To Be?

Ante-Bellum Jitters

And Coda After the Storm

Bone

1940

Years ago if a man came from Ohio he was good enuff to be president of United States of America; today they won't even let him push a wheelbarrow or wield a shovel. WPA snubs him and won't even say "good morning," "go-to-hell," or any of those other endearing terms of the mauve age. Old Buckeye is beginning to make speeches to himself and may blossom out a full-fledged orator and put Patrick Henry and Roscoe Conkling in the shade...

After the war, "sometime to come," an acute seige of decentralization will set in. Contrary to the belief here that the warring nations will proceed to reconstruct that what is destroyed, the world will lay down on such dreams of glory; for it knows that centralization can travel only toward destruction.

Fantastic dreams of post-war trade are due for a rude awakening. Giant wharves, built to handle the commerce that was, are surplus baggage in the commerce that isn't... Giant liners are through -- cost of wharfage prohibits the use of them as showboats.

Return to simple life resembles Napoleon returning from Moscow; most thoroughly domesticated. There goes my reputation, folks, hand me my crutches. (Washington papers please copy).

As I see it the whole of Asia will be drenched in blood -- saw it year ago -- saw it years before -- and said so.

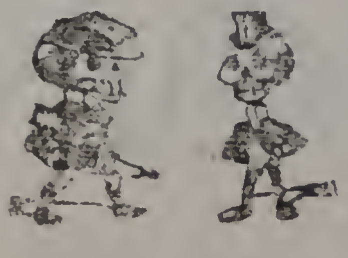
The invasion begins Friday night -- daylight saving time.

Plattsburg (Up-Stairs) New York:
Plattsburg Training Camp is not a free summer vacation for broken-down businessmen, they pay the Army $43.50 a month for training. It's worth it during these heat waves in the city streets. (Note: I'm still packing my fishlines, Dave.)
By the way: why doesn't the British language give fishline a name? I hate to make a speech every time I want to mention fish snares.

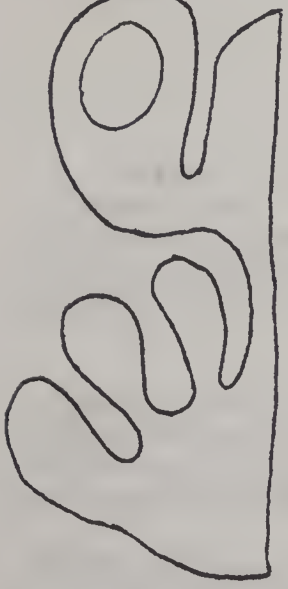
Enemy cinderellas (incinerator bombs) and stuff like that -- just when we need the poorhouses most. "Another Poorhouse Goes Up In Smoke" -- could anything be more ennervating!

The purpose of the economic royalists seems to be "risk all our substance in defense of their racket and run the wealth of the nation down to zero." -- All right. Labor can help here by accepting higher wages and thus bring the revelation that much sooner -- a juggy-horse never again plows.

Unquestionably children should be moved out of the areas of man-made danger in war zones. I doubt however if the warring nations can come to an agreement on the method to be used. Therefor, to help the thing along, I suggest each mercy ship



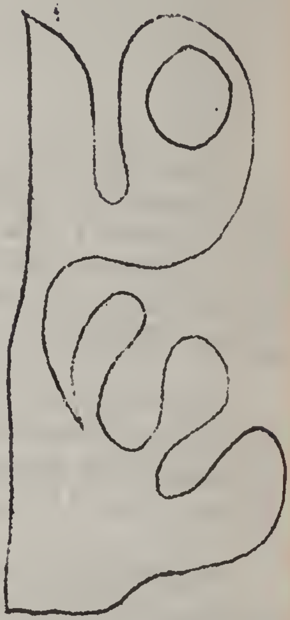
be examined at sea, coming and going, by interested belligerants, to verify the fact that no politicians or plutocrats are aboard disguised as nursemaids.



Dirge

The workingclass had lots of sense,
   When hunger came;
Our trenchant knowledge was immense,
   When hunger came;
In worldly wisdom we were wise --
To this the inner-man replies:
"We knew not how to organize
   And win the game."

Too prone perhaps were we to run
   When showdown came
Perhaps we may have even won
   A slacker's name
No nary thing did we aright
Our wars were anybody's fight
And still we proved our latent might:
   We died as ONE.



Too hot to Sit On:

D'ye ever notice the park benches are in the sunshine all day long -- this comes in handy during winter months -- when our feet are in the oven.

Facts are most explosive element known.

Detailed knowledge places next.

Action, skill and despatch are "in the money" -- power.

"Glory that was" proves to have been exaggerated -- the hills of our youth show up as mere knolls.

I'm in one terrible fix -- and hope the Big G can throw the soot: if I shave, my overalls won't look so good; if I take off my overalls, my face won't look so good.

"Why not do both?" --

Wrong again, me lord, I'll do neither -- I'll go as I am.

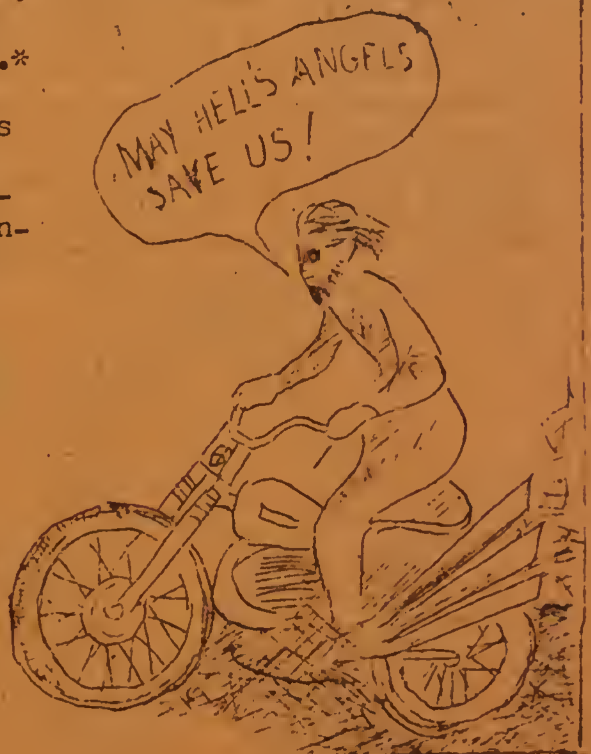
WRL

Milling around somewhere in (my memory of) the events that prepared, mounted, and stepped off as, The International Days of Protest, March 25-26, was one PAUL WILLER (1350 N. Sedgwick; fone WA-4-9624) who filled out the War Resisters League questionnaire which was sent out around January 18, 1966. Willer, who is on the mailing list of the anarchists (c/o Solidarity Bookshop, 1644 Meyer Court) wanted to get a WRL group started in Chicago (I had been thinking the same thing). His answer came from Dave McReynolds who said that WRL does not want him to initiate a WRL group in Chicago because it is afraid that it wd become filled with anarchists. (Since I have been connected with various "brotherhood" movements, I have always felt more discriminated against by Civil Rightists, pacifists and other redeemers of Humanity than I have by racialists). Apparently McReynolds/WRL wd rather have no WRL group in Chicago than to have an anti-State one (or one merely weighted for anti-Statism: how can you contrive to "keep" a WRL group "left" of McReynolds without engaging in the moral turpitude and sabotage that McReynolds engages in?) like in Japan, probably in Belgium, and possibly in France.



MAY HELL'S ANGELS SAVE US!

Perhaps Chicagoans shd sign the pledge and attempt to affiliate directly to Middlesex.* This development makes Ralph Di Gia appear an even worse fink than McReynolds if it is true that he (R. D. G.) is an anarchist as rumored. Anarchists who administer the suppression of other anarchists, Like the Spanish Civil War (and the Russian Revolution) all over again. May Hell's Angels save us from the "comrades"!

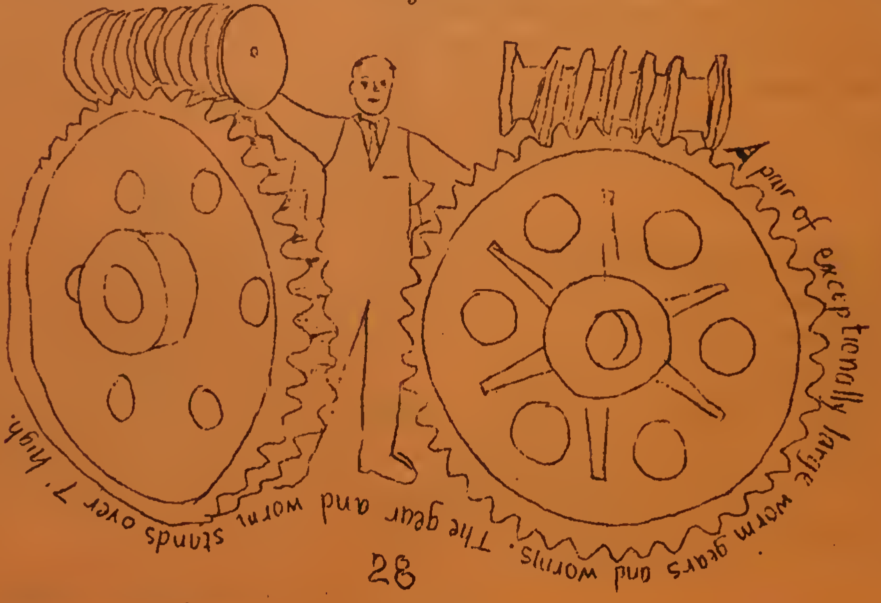
THE FIVE O'CLOCK WORLD 2

Anybody who's got a 9 to 5 job doesn't have to be told how the bastards are fucking him at work. They're taking it right out of his hide, and he can feel that by himself. This series of articles is about the more subtle ways they have of making life miserable for us in the world after 5 o'clock.

You convert your work power, your muscle, nerves, intellect, your creativity as a human being into a commodity, and sell it on the "labor market" from 9 to 5 (or other hours) for the lousy wages you get. As far as they are concerned, you are not a human being during this time, but a thing, a "factor of production", as the economists like to call you. You, or rather your wage--you actually don't count--you go down on the books as "costs of production" alongside plant machinery, raw materials and fuel. Human being OK, but not on company time.

Pretty miserable life, isn't it? Especially when you consider that Hungarian workers in 1956 proved to the world that workers could run the show themselves, except for Russian tanks. True, you say, but at 5 o'clock my tour of duty is finished, and I can go home and rest and enjoy myself. Wrong again, my friend--your loving rulers got other plans for you. At 5 o'clock your tour of duty as consumer begins. Somebody's got to buy all that junk your labor has created. You don't think they spend that $10,000,000,000 a year or so on market research, packaging and advertising just to make the super market shelves look pretty. Man, in this economy you're on duty from get-up to go-to-bed, and you better not forget it. You find out if you've got a good wage that it isn't all it's made out to be either. It only makes your consumer duty heavier, and you got more shit you can worry about the kids breaking on you. If you want to become a specially devoted consumer pig, you can even spend more on their pile of junk that you earn, and so hock slices of your life you haven't lived yet, trade your life of the future for their junk pile today.



A pair of exceptionally large worm gears and worms. The gear and worm stands over 7' high.

All of us partake in this rat race in one way or another, including people like me who write about it. You can't escape it in our society, not even if you see through it.

But how do they hook us?

Before answering this, I'd like to forestall a possible misunderstanding. I don't mean here to put down material wealth itself. In its pure material aspect, a great part of that junk pile they sell us has real value: good food, sharp clothes, cars, TV, pets, records, houses, furniture, modern plumbing and electrical appliances etc. You can have the potatoes and beans if you want, man; I'll take the steak and gravy. As objects of practical utility or enjoyment, many of these things have real value, and satisfy real human needs We may complain about the high money and human price the bastards exact from us for all that wealth. After all, these businessmen are in it for the dollar, not for love. But no one in his right mind is going to put that good stuff down.

So that's the first way they hook us. Because all those goodies they offer us in exchange for our souls are in fact the good things of life, things we ought to be demanding from them without having to pay the price. Don't burn the factories down, but burn them super-markets to the ground, after they've been cleaned out.

But you'll find the clue to their chief method if you look at their advertising. They've known all along that they'd have a hard time selling the masses of their junk they want to sell if they offered it to us merely as useful and pleasurable stuff in its own right. We'd never be willing to pay the price they ask for only that. And, in fact if you study carefully their advertising in any mass magazine or on TV, you'll find it's quite rare that any large ad limits itself to praising the material qualities of the commodity it is pushing. All the better advertising besides or instead of this, will offer you security and adventure, development of your individual personality and human recognition, communication with other human beings, sexual satisfaction etc. Buy a car and you'll get not only a useful vehicle, but also "the feeling of power behind the wheel " Buy the right ale and you'll get not only a refreshing taste on your tongue, or a 3-day drunk, but also a "real man's drink" for your threatened masculinity. Buy the right cigarette, and you'll be "where particular people congregate" And what's the tiger looking for in the tank? (As you know, of course, it's not you and me who fall for this, just the others.)

But how does this work? Simple. Just look around you. All those wishes whose fulfillment they promise us in their lousy wares really are basic human needs. But that's not enough. They are needs whose genuine fulfillment is systematically frustrated in real life. Otherwise why would we ever look for their fulfillment in a car or cigarette? But these commodities give no direct or genuine satisfaction as promised in the ads. How many of you have not felt that feeling of elation and happiness while making some purchase and for a short time making braided rugs out of old socks and ties, you may satisfy yourself personally by it, but you're not doing much for the "economy". You can be sure there'll be a dozen advertisers after you trying to sell you a hobby that will cost you more MONEY. Why don't you try electric trains, or photography, or some activity that will require you to sink a thousand or two into power tools? On some job applications they ask you about your hobbies as if having one, or the right one, were a prerequisite for the job. If you don't have the safety valve, you might begin making too many demands for satisfaction out of your job, and make trouble for the company.

After having deprived you of the possibility of doing human work in your wage labor time, the bastards expect you to return to market, this time as buyer, and pay them back your hard earned money in exchange for the wherewithal, that you may work, this time in the human sense In this rat race they've got you coming and going. Who says capitalism don't stink?

But no matter how much you invest in your hobby, you'll get at best only partial satisfaction of the basic need that drives you to indulge in it and spend your money on it. For your real need and what you have every right to demand, is more than a measly hour or two at the end of the day, isolated from the rest of your life. You have the right to demand that your whole working day be meaningful, pleasurable, satisfying activity. You have the right to demand that the fabulous possibilities of mechanization and automation be exploited not for maximum profit or efficiency (from the manager's point of view) but to abolish the stupid and unpleasant jobs, and to preserve the pleasant and satisfying ones from the worker's point of view, that it be introduced to eliminate superfluous work, not superfluous workers. You have, in short the right to demand that work, in the pre 5 o'clock world, be converted into the type of activity many now chose freely after 5 o'clock in their hobby. Or rather you will have to make this conversion yourself. The bosses won't do it for you.

The social function of hobbies is therefore exposed as that of a safety valve. You are allowed just enough satisfaction of your need for human work during your free time, that your collective frustration during work time does not become an explosive force. And they have the nerve to expect you to pay for it.

In addition, their multi-billion dollar propaganda and brain washing apparatus hammers at you night and day the line that demands of this sort are utopian. Considered from the angle of the techniques of exercise of power, they have to do this of course. It is both cheaper and more efficient to brain-wash people into thinking that a society that would allow them genuine satisfaction of their needs is utopian, that it would be to pay the tremendous costs of police and army necessary to keep them down once they catch wise that a free world is possible.

(Continued from page 24)

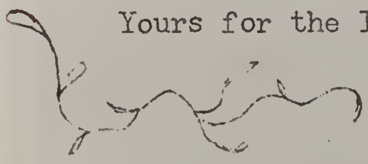
quit his Job as Crack Reporter for That Paper and Lined up in the IWW. Then he traveled around the country and Reported and Wrote for the IWW Press -- Industrial Worker, Solidarity, Industrialisti and the IWW Monthly Magazine.

T-Bone Slim's articles for the IWW Press were always printed with a Pencil, so the Editors wouldn't make any mistakes on them and he could Print with a Pencil to perfection.

T-Bone Slim was an excellent cook and used to cook on IWW Threshing Rigs in the Cook Shacks. He could also make the finest and Tastiest Swedish Hot Cakes of any chef in the U.S.A. On one Job the Workers ate so many of his hot cakes Slim quit. Altho There was plenty of Ham and Eggs and other good Chuck for Breakfast the Threshing Crew liked Slim's Hot Cakes so well they didn't eat much of anything else. So he got tired making so Many hot cakes and Blew the job. The Wobs always wanted T-Bone Slim for Cook in their Jungle and Picket Camps. All T-Bone Slim's wonderful talent was given by him to the IWW and its Press Free Gratis.

Although T-Bone Slim went by the name of Arnold he was of Finnish descent. He was known, highly Respected and Well-Liked by Thousands of Home Guard and Migratory Wage Slaves all over the country. If he wasn't working on Some Job he was a Damn Good Bum on the Main Stem at Restaurants, Rich Homes, Offices and elsewhere. T-Bone made Friends among the Wage Slaves wherever he went and was always active and agitating for the IWW on the Job, Picket Lines, Box Cars and every where else.

Yours for the IWW, the Libertarian League and the Free Society,



Guy B. ASKEW
(Skidroad SLIM)

* * * * * * * *

If any of you reading this are still brain-washed enough yourselves to think that workers management of production, genuine and concrete community democracy, in short, concrete freedoms, as opposed to abstract freedom, are all impossible, I have one small polite request to make of you. Go on, if you will, kissing their asses before 5 o'clock, and trying to rebuild your self-effaced identity and integrity in the evenings and on weekends. But please, please stay out of our way while we fight for freedom. Poor brain-washed victims, you are not our real enemies. The new world we want to build has a place for you. Only for bosses and rulers it doesn't.

--JIM EVRARD

FANTASTIC FABLES

1. OFFICER & THUG

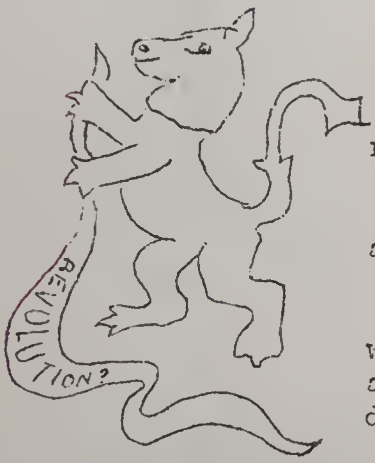
A Chief of Police who had seen an Officer beating a Thug was very indignant, and said that he must not do so any more on pain of dismissal.

"Don't be too hard on me," said the Officer, smiling; "I was beating him with a stuffed club."

"Nevertheless," persisted the Chief of Police, "it was a liberty that must have been very disagreeable, though it may not have hurt. Please do not repeat it."

"But," said the Officer, still smiling, "it was a stuffed Thug."

In attempting to express his gratification the Chief of Police thrust out his right hand with such violence that his skin was ruptured at the armpit and a stream of sawdust poured from the wound. He was a stuffed Chief of Police.



REVOLUTION?

2. DOG & REFLECTION:

A Dog passing over a stream on a plank saw his reflection in the water.

"You ugly brute!" he cried; "how dare you look at me in that insolent way?"

He made a grab in the water and getting hold of what he supposed was the other dog's lip lifted out a fine piece of meat which a butcher's boy had dropped into the stream.

3. LION & MOUSE

A Judge was awakened by the noise of a lawyer prosecuting a Thief. Rising in wrath he was about to sentence the Thief to life imprisonment when the latter said:

"I beg that you will set me free, and I will some day requite your kindness."

Pleased and flattered to be bribed, although by nothing but an empty promise, the Judge let him go. Soon afterward he found that it was more than an empty promise, for having become a Thief he was himself set free by the other, who had become a Judge.

Manifesto of the Durruti Column

Revenge! Our friend, our brother Durruti fell in Madrid, his heart filled with goodness and his rifle in his strong worker's hand.

In our ranks no one is more than the other, But the one who has won our love is considered superior to all the others. And no one was better loved, no one more loving than our Durruti. We do not weep over his death. But our eyes are hazy, our fists will remain closed as long as a single enemy remains alive.

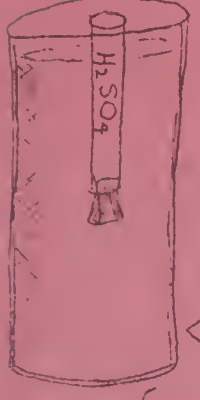
We went out to defend our libertarian Ideal, we have fought for a better life, our hearts filled with human desire.

Today we have one more slogan: Revenge!

We have become brothers in our column through Durruti, We shall fraternize to avenge him. We have fought like men. Now we shall fight ferociously.

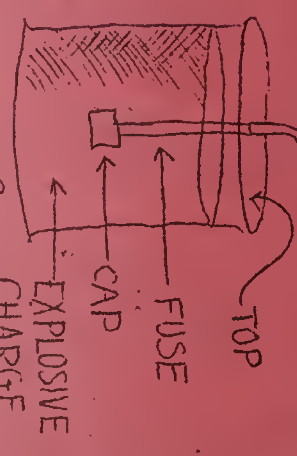
Comrades of the Durruti Column! Brothers! Let us avenge his broken life. We must carry his name through fascist Spain and it shall mean death to our enemies!

INCENDIARY TIME BOMB



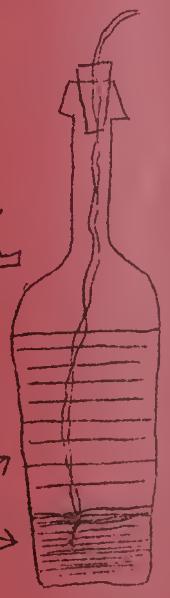
A cardboard or iron tube is filled with a mixture of 3/4 POTASSIUM CHLORATE & 1/4 SUGAR & is sealed. A glass vial is filled w/ SULPFURIC ACID & stoppered w/ paper. To arm bomb, insert vial, stoppered end down, into tube. The ACID will eat thru paper & ignite the mixture ✳

HAND GRENADE



Metal can filled with dynamite - a detonating cap placed in it w/ a 5-6 second length of fuse running through the lid ✳

MAKHNO COCKTAIL



A bottle is filled w/ $2/3$ gasoline & $1/3$ oil

A fuse is lighted & the bottle hurled at objective. On breaking the contents will ignite. The enemy will be unable to extinguish w/ H_2O.

WHITE RABBITS

The time has come that I must tell the events which began in 40 Pest St. The houses which were reddish-black looked as if they had survived mysteriously from the fire of London. The house in front of my window, covered with an occasional wisp of creeper, was as blank and empty looking as any plague-ridden residence subsequently licked by flames and saliva'd with smoke. This is not the way that I had imagined New York.

It was so hot that I got palpitations when I ventured out into the streets--so I sat and considered the house opposite and occasionally bathed my sweating face.

The light was never very strong in Pest Street. There was always a reminiscense of smoke which made visibility troubled and hazy--still it was possible to study the house opposite carefully, even precisely; besides my eyes have always been excellent.

I spent several days watching for some sort of movement opposite but there was none and I finally took to undressing quite freely before my open window and doing breathing exercises optimistically in the thick Pest Street air. This must have blackened my lungs as dark as the houses. One afternoon I washed my hair and sat out on the diminutive stone crescent which served as a balcony to dry it. I hung my head between my knees and watched a bluebottle suck the dry corpse of a spider between my feet. I looked up through my lank hair and saw something black in the sky, ominously quiet for an aeroplane. Parting my hair I was in time to see a large raven alight on the balcony opposite. It sat on the balustrade and seemed to peer into the empty window, then it poked its head under its wing apparently searching for lice. A few minutes later I was not unduly surprised to see the double windows open and admit a woman onto the balcony--she carried a large dish full of bones which she emptied onto the floor. With a short appreciative squawk the raven hopped down and picked about amongst its unpleasant repast.

The woman, who had hemp-long black hair, wiped out the dish, using her hair for this purpose.

Then she looked straight at me and smiled in a friendly fashion. I smiled back and waved a towel. This seemed to encourage her for she tossed her head coquettishly and gave me a very elegant salute after the fashion of a queen.

"Do you happen to have any bad meat over there that you don't need?" she called.

"Any what?" I called back, wondering if my ears had deceived me.

"Any stinking meat? Decomposed flesh....meat?"

"Not at the moment," I replied, wondering if she was trying to be funny.

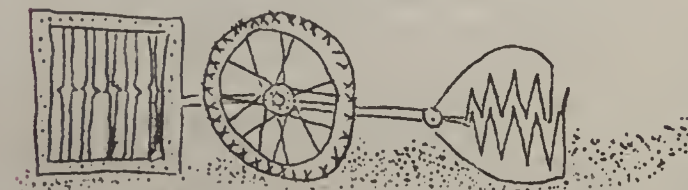
"Won't you have any towards the end of the week? If so I would be very grateful if you would bring it over."

Then she stepped back into the empty window and disappeared. The raven flew away.

My curiosity about the house and its occupant prompted me to buy a large lump of meat the following day. I set it on the balcony on a bit of newspaper and awaited developments. In a comparatively short time the smell was so strong that I was obliged to pursue my daily activities with a strong paper clip on the end of my nose--occasionally. I descended into the street to breathe.

Towards Thursday evening I noticed that the meat was changing color, so waving aside a flight of numerous bluebottles I scooped it into my sponge bag and set out for the house opposite. I noticed, descending the stairs, that the landlady seemed to avoid me. It took me some time to find the front door of the house opposite. It turned out to be hidden under a cascade of smutty ivy, giving the impression that nobody had been either in or out of this house for years. The bell was of the oldfashioned kind that you pull and pulling it rather harder than I intended it came right off in my hand. I gave the door an angry push and it caved inwards emitting a ghastly smell of putrid meat. The hall which was almost dark seemed to be of carved woodwork.

The woman herself came rustling down the stairs carrying a torch.



"How do you do? How do you do?" she murmured ceremoniously, and I was surprised to notice that she wore an ancient and beautiful dress of green silk. But as she approached me I saw that her skin was dead white and glittered as though speckled with thousands of minute stars.

"Isn't that kind of you?" she went on, taking my arm with her sparkling hand. "Won't my poor little rabbits be pleased!"

We mounted the stairs and my companion walked so carefully that I thought she was frightened.

The top flight of stairs opened into a boudoir decorated with dark baroque furniture and red plush. The floor was littered with gnawed bones and animals' skulls.

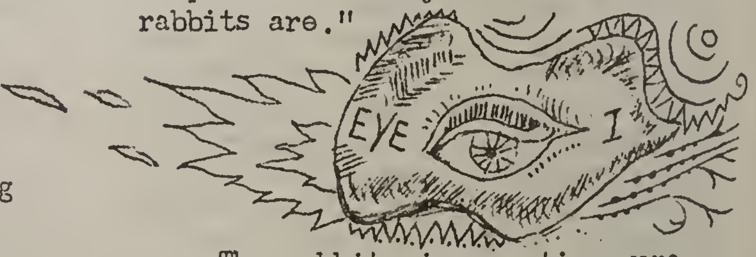
"It is so seldom that we get a visit," smiled the woman, "so they all scuttle off into their little corners."

She uttered a low sweet whistle, and, transfixed, I saw about a hundred snow-white rabbits emerge cautiously from every nook, their large pink eyes fixed unwinkingly upon the woman.

"Come pretty ones--come, pretty ones," she cooed, diving her hand into my sponge bag and pulling out a handful of rotting meat.

With a sensation of deep disgust I backed into a corner and saw her throwing the carrion amongst the rabbits which founght like wolves for it.

"One becomes very fond of them," the woman went on, "they each have their little ways. You would be surprised how very individual rabbits are."



The rabbits in question were tearing at the meat with their sharp buck teeth.

"We eat the, of course, occasionally. My husband makes a very tasty stew every Saturday night."

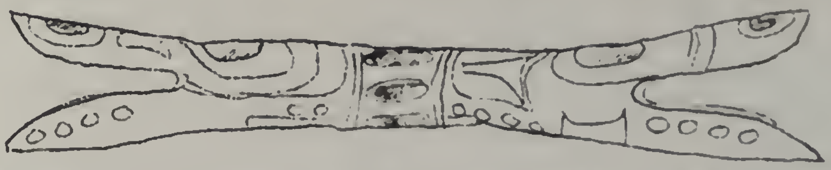
Then a movement in the corner caught my attention and I realized that there was a third person in the room. As the woman's torch light touched his face I saw he had glittering skin like tinsel on a Christmas tree. He was dressed in a red gown and sat very rigidly with his profile turned towards us.

He seemed to be as unconscious of our presence as of that of a large white buck rabbit which sat masticating a chunk of meat on his knee.

The woman followed my gaze and chuckled, "That is my husband, the boys used to call him Lazarus."

(Continued on P 44)

A PLEA TO ALL



This can be considered as an Indian appeal to all other minority groups within America--as well as to those whites still possessing a moral conscience or code--to form a coalition movement, dedicated to righting the wrongs within American society itself before embarking upon the self-appointed role of world policeman...

The Indian's objective today is stated simply enough, to regain every single acre of land that they can, and to recieve a proper indemnity for all that they cannot regain. All of this in order that they may lay the economic foundations for rebuilding an Indian way of life. To bring to an end, finally, the intolerable conditions under which they live today, Conditions which give them a life expectancy of 43 years! Is there a racial crime worse than the theft of life itself? No other group of people, in American society, has a life expectancy as low as the Indian. And the time has come to put an end, once and for all, to the cruel farce of attempting to integrate him into a society for which he is not adapted, historically or culturally. And if "biological memory" means anything at all, he never will be...

One major factor, in this struggle, should be firmly established from the very outset--and that is that the various American racial minorities have different goals and objectives. It is basic that they form a coalition , learn to work together, in order to compel the white power structure to face its responsibilities to all of them. Alone, as in the past, none of them can muster the pressure needed to get their wrongs redressed, but together they can accomplish this, so of course there is no alternative to forming a coalition. But, once having said this, they must then go on to the realization that each group has the right to a different solution to its problems. One blanket program will not cover it all. Nothing better illustrates this than the contrasting goals of the Negro minority and the Indian minority. So lets briefly examine them:

The Negro aims at nothing less than full integration into American society. He is now fighting to have his children bussed to predominantly white schools, for his right to live in a predominantly white residential district, for his full share of jobs at all levels, for his civil rights, in short to an end to every single form of racial discrimination against him in America. And he has every right to these objectives, if that is what he really wants.

But this is not the Indians goals. He is fighting desparately to retain his identity, not to lose it! He doesn't want his children bussed to predominantly white schools, he doesn't want to live in a white nieghborhood, he considers it below his dignity as a man to fight for equal rights in his own country! This is his "America", it is the others who shot their way in, uninvited and unwanted...

Oversimplified, he doesn't want to pack a lunch bucket to a Boeing plant, as a preliminary step towards owning a Cadillac car and belonging to the country club set. He doesn't want a thing to do with the "rat race", (to use the phrase some white critics have coined), that he sees all about him. He sincerely believes that his own native way of life is better--or at least better suited to him. So lets have an honest look at why there are such basic differences in Indian society and that which the Whites have evolved from their European base...

The Indian believes that he is an integral part of a harmonious whole, all created by a Great Spirit, and that even the smallest creature has a right to life. He is, so to speak, in tune with Nature---not at war with it. On the other hand the caucasian believes that the diety was made in his own image and likeness, and if he so desires he has the right to exterminate every form of life here on earth, including his own. He has already wiped out many species of animal life...One of the reasons the Indians so hated the early settlers was this insane mania for killing. The Indian tribe used virtually every part of a slain buffalo, killing only to eat, and then saying a prayer for forgiveness to the Great Spirit for this taking of life. The settlers often slew for the pure joy of killing, taking only the buffalo's tongue for eating--and sometimes not even that. Many wantonly butchered the great beasts, taking only the tail for a trophy and letting the huge carcass lie upon the plains to rot. And this trait is still present today, in the few remaining places where there is game to vent it upon...

For example the current craze of the white businessman turned 'hunter' hiring a white bush pilot, in the Arctic regions, who run down a polar bear--with his plane! When the bear is thoroughly exhausted, and not a moment sooner, they set their plane down and the "great white hunter" steps out and shoots the spent bear. What your eskimo and Indian hunters think of him would have to be printed on asbestos paper.

No, the Indian's religious beliefs are far closer to Bhuddism than they are to Christianity, which perhaps reflects his racial origins. And he is beginning to suspect that these never ending wars, of white America's making, are a part of this blood lust rather than the product of insoluable problems. Young as the United States is, and isolated by two oceans, it has still managed to wage war against virtually every European country at least once. Not a bad record, for even a Christian Nation. And how do you explain the morality of a race which believed that the Japanese were buck-toothed monsters, capable of every crime, then less than five years later were calling them faithful allies and marrying their daughters by the hundreds. Simply because they had found a new enemy to hate. Can their society function without an enemy to fight?

No, the Indian wants his own way of life, and who is to say that he is wrong? To obtain this goal he must have his broken treaties reviewed by an International Tribunal, one in which other colored nations have representation, and whose decisions are final. To gain these ends he must join in a coalition with the other minority groups in America, helping them to gain redress for their grievances in exchange for aid in his own fight. They might adopt, as their slogan, the old saying--"An injury to one is an injury to all"...

Prophetic Mutterings —

We have learned to live with the Bomb in Macabre togetherness. Strains of the Dies Irae mix with our folk-rock to warn us of the Promethean dream long last come true, though in unexpected form. The collective deeds of we human usurpers of the Apocalypse make possible an infernal innocence: everyone has a good conscience, because no conscience is required at any point. Militarism saps the inner vitality of our people. The postwar marriages of defense plants and the Pentagon are not isolated boondoggles as dewy-eyed liberals would lead us to believe, but, rather a pattern of centralized symbiosis. This totalitarian drift of society creates the only conspiracy which most people know: the controlled life. As faceless cogs, we move through the predetermined motions of the humming treadmill. It is not that our controllers love freedom less but that they love efficient operation more.

Men often see the world as fluid and chaotic, a place where individuals are victims of impersonal forces which they can seldom understand or control. They feel caught in a system which they cannot change or escape, and so they acquiesce. Their potential revolt, unable to find words, is hastily buried by forces and shadows. The shadow of our doubts beckons us to succumb to the siren of self- perpetrated comfort. Men know that rash commitments may prove outdated tommorrow, viewpoints are rapidly shifting, and it is difficult to locate a fixed position on which to stand for even a few moments. Our paralyzed will leaves promises unrealized, dreams dead, and prevents ourselves from hoping for anything beyond the necessary evil. And that evil is simply man's failure to confront himself. Our paralysis is founded on ourselves being taught to relinquish the right to order our own lives. Accustomed to the top-down control of our society, men forget that they are capable of doing the opposite--of working to change the conditions that oppress them. But our doubt is not reason for inaction but serves as a reminder that infallibility is not the possession of any one man, and compassion and empathy for the stranger are manifestaions of our deepest moral anxiety.

"Not every paradise is los

---André Breton, 1896-1966

Elsewhere in this issue of The Rebel Worker we have reprinted a short text by André Breton, a text forming part of the anthology Surrealism & Revolution which we have just published, and which contains extracts from several of his other works. "The Colors of Freedom" had already been selected for inclusion in this issue, with the hope of introducing to our readers the marvelous, formidable and clairvoyant thought of the leading theoretician of the surrealist movement, when we learned of his death in Paris in late September. It will be understood that we are ill-disposed to carving, in the air of our time, heavy eulogies of stone with their miserable accompanying repertoire of futile gestures of sorrow, words over a grave, dull obituary notices for the daily papers and hypocritical tributes by life-long enemies for the "intellectual" journals. If we choose, here, to say a few words about him, it is primarily because of the lies and defamations that will inevitably appear elsewhere, doubly dangerous and doubly detestable because they will be masked as kindness, generosity, sympathy and good will.

André Breton, in the Surrealist Manifestoes, Surrealism & Painting, Nadja The White-Haired Revolver, The Communicating Vessels, The Political Position of Surrealism, Mad Love, the Anthology of Black Humor, Arcane 17, Young Cherr Trees Secured Against Hares and the Ode to Fourier, has given to us, to the revolutionary movement of all countries, works of enormous theoretical importance, and excruciating significance also as weapons with which to battle the armed guards of our mental and physical prisons. His influence upon our own sensibility has been decisive, thorough-going, and second to none. Many of us discern in his life, in his works, the most essential reasons we could give for living; that is, the idea, first (subtle and convulsive in its simplicity) that "freedom, acquired here on earth at the price of a thousand -- and the most difficult -- renunciations, must be enjoyed as unrestrictedly as it is granted, without pragmatic considerations of any sort, and this because human emancipation...remains the only cause worth serving" (Nadja), and also love: "absolute love, ...the only principle of physical and moral selection capable of guaranteeing the non-vanity of human presence and human witness" (Mad Love), "the exceptional grandeur and value of human love" (The Communicating Vessels), "that promise which goes beyond us" (Fata Morgana).

Breton's work, which he hoped was of a nature "to send some men rushing out into the street, after making them aware, if not of the non-existence, at least of the crucial inadequacy of any so-called categorical self-evaluation..." must find its way into the hands and minds of millions. The coming Revolution must be made by people who know what they are doing, people whose spontaneity and improvisation are rooted in the consciousness of gratifying desire, in the aspiration toward total liberation. The surrealist evidence of Breton is the common theoretical property of this Revolution, which will see, which is seeing already, the emergence of surrealist action complementary to the surrealist dream.

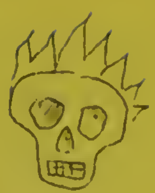
To advance: that is what is essential. Not to malinger over uncertainties, not to bemoan the vicissitudes of chance, not to weigh down one's mind with doubt and hesitations; but to act, and to act freely, to move continually closer to the fusion of dream and reality, to seek the Revolution as Jason sought the Golden Fleece.

We are already in the street, where, in the heat of our vision and the light of our dreams, André Breton is "living among us."

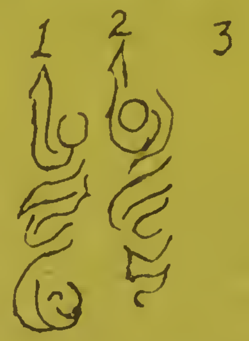
---F.R.

DELIGHT NOT DEATH

Excerpts from a letter



After the bathtub gin delight of our last silent communique (the stars must have escaped in transit), I've decided to again put the pen to flint & open the flame to the public. 4 okapis you say, hardly enuf for a cosmology -- as yet just a microcosm but in the future... And the future is today or rather yesterday -- we're just a little slow in starting.



...There is much planning to do in which I am at the very least passionately interested & involved. Many moments of destruction have already passed unused. To reinvigorate the divine necessity of Surrealist activity in nearby forests is the cause to which I am devoted. ...That the Revolution of love in all its splendor & trappings bicycle-dreams & shooting galleries fixed on rape can happen at any moment is obvious. But that it hasn't is similarly obvious. If it is teleological, where is the prime cause? Now, as ever, anguish holds back my mind. Why hasn't the world we all know & ardently hate yet changed? Total liberation is no utopian goal -- it's existed as a germ too long. I'd better drop this line -- it's getting nowhere way too fast.

Despair is not a state -- just a town.

a few minutes later or so...

...Read Dynaton yesterday. In many ways it's great & its tenor often reflects an ideological obsession of mine -- the personal scene. But also in many ways it's badly dated. Paalen erects a beautiful case for anthropomorphism & then denies it. Human not humanist. Then this chick, Jackeline Johnson I believe, comes on with a mixture of convulsiveness & silly shit. Their constant prating on eternity & a narrow view of surrealism!

For believers in analogy the following fact: the heaviest artillery & ground to air missiles are not so effective for the North Vietnamese against U.S. bombers as the kid with a sniper rifle who merely aims at the computer section of the bomber & effectively destroys its capability to deliver bombs causing its later scrapping. A 50¢ shell for a multi-million dollar bomber. Is not society as delicate as its bombers? This analogy appears to me quite fateful & a necessary pt. of departure for anyone passionately determined to change life. To remove the locks from the gates of a consciousness beyond our wildest dreams involves the revolution entire & self-sufficient in a vastly increasing fellowship of individual conspirators -- from the bomb thrower to the IBM card mutilator. A host of scandal mongers & immoralists constantly attacking the cops over desire. Comics were censored -- when will R & B? And then an underground?

"Be Yourself" -- does this adage now become the revolutionary's key to victory? And what would happen if we'd invent new palaces equal in emphasis to the "mod" scene -- strewing the streets with jewels for cops to trip on? The value of any non-social universe is its necessary attack on history which ever more increases its meaning to reaction while pulling its shell thinner & more brittle.

& the sea is so beautiful at twilight -- just as trees at dawn. It"s a conversation & an opera, a memory. I've been shadowed in recent weeks by "remembrance of things present" which even prompt me to consciously enlarge the vision by checking details of the memory not immediately apparent.

Lawrence DECOSTER

MESSAGE FROM THE GANGSTERS OF LOVE ♡

thank you For your Letters written on the skin of the kazoo, that most palpable arrangement of concrete fascinations ever to Escape Nirvana--

the Strip is a zoo whose cats we've not fed lately...we couldn't MAKE IT cause our dream machine/ the Black gypsy Hog called DESIRE was infirmed, some of our comrades have been fighting: Star attacked a Radio newsman/ we'll be makin the scene soon and lay it on you in next letter----------

As we write 400 more dispersed and 50 busted.

That Mesa Mass Murder first planned to shoot up a school--Gangster of Love--Jesus is in a continuation school/ it's where they put kids after you been kicked out of high school--go 4 hours a day, attended by Hells Angels, The Undertakers, and other poets/ the kids are relentlessly sabotaging the shit-house/ 2 kids beat up 4 teachers, charged out in the parking lot & leaned up against car lit up & talked out chicks until the Fuzz came & took them away.

Lecturing youths on SADE/ got gravy response--in drama class started making love to this chick (improvisation)...

Back to the Mothers & Motherhood (Freaking). Made the first freak-out scene here ... We FREAKED--obscenely according to one little chick's post mortem--a non-dance, rather a spontaneous ritual--in this case largely sadistic with flagellation, stabbings, strangulations & agonized screams--EAT THAT CHICKEN--one chick is still scared. It's an unleashing of the primitive power on the individual level--unbound from all inhibition--reaching collectively a frenzied ritualism totally anti-social, even disturbing...

Outlaw laboratory---containing all instruments of CLASS warfare--- From the philosophers stone & molotov cocktails/ handless clocks/ police jammers/ inflammable books/ dust of 10000 devils & revolutionaries/ ferris wheels of hair/ freaking sticks/ black laughs/ dreams/ computer for inventing desires...

WE WANT JR. WOODCHUCK GUIDE

Love
Nikki Black & Asmodeus

Continued from page 38

At the sound of this familiar name he turned his face towards us and I saw that he wore a bandage over his eyes.

"Ethel?" he enquired in a rather thin voice. "I won't have any visitors here. You know quite well that I have forbidden it strictly."

"Now, Laz, don't start carrying on." Her voice was plaintive. "You can't grudge me a little bit of company. It's twenty-odd years since I've seen a new face. Besides she's brought meat for the rabbits."

She turned and beckoned me to her side. "You want to stay with us, do you not, my dear?"

I was suddenly clutched by fear and I wanted to get out and away from those terrible silver people and the white carnivorous rabbits.

"I think I must be going, it is supper time."

The man on the chair gave a shrill peal of laughter terrifying the rabbit on his knee, which sprang to the floor and disappeared.

The woman thrust her face so near to mine that her sickly breath seemed to anaesthetize me. "Do you not want to stay and become like us?"

I stumbled and ran, choking with horror; some unholy curiosity made me look over my shoulder as I reached the front door and I saw her waving her hand over the banister, and as she waved, her fingers fell off and dropped to the ground like shooting stars.

-- Leonora Carrington

VENGEANCE of the BLACK SWAN

~ cont'd from page 16

tuals confusing their own narrow & oversimplified fantasies of industrial life and proletarian struggle with a complex & more or less hysterical reality, and attempting to impose their idle & impotent dreams on a working class who are either indifferent or passionately interested in other matters.

Stalinism, and much of the non-Stalinist traditional left as well, deluded itself and too many others into believing that it attacked essentials. According to its reasoning, the "superstructure" would fall into its proper place, as a matter of course, once power was shifted from the hands of the bourgeoisie to the hands of the proletariat. The puritanical & masochistic justifications of this attitude inevitable constitute, primarily, a means of evasion & an apology for blindness.

The tasks historically handed down to us -- by Lautréamont, Marx, Engels, Bosch, Fourier, Blake, Rimbaud, Sade, Jarry, Dadaism, Charles Fort, Freud, Maturin, the IWW, the surrealists, Shays' Rebellion of 1786, the Nat Turner Insurrection of 1831, the Paris Commune of 1871, the Russian Revolutions of 1905 & 1917, the Spanish Revolution of 1936, the Hungarian Revolution of 1956, the Enrages, the Durruti Column, Emiliano Zapata, much of contemporary science, the youth revolts & guerrilla wars of all generations, & the liberating mythology of desire suggested in Bugs Bunny, Daffy, Uncle Scrooge, Hulk & Spirit comics, in the Cthulhu Mythos, the blues, the "trickster tales" & in the Rebel Worker (Numbers 1-7) -- are being achieved, not by academicians or the editors of such journals as Encounter, Evergreen, Life or Liberation, nor by traditional radicals caught up a tree of limitations, but by the people in the streets, for whom these questions, though often unconscious & thus theoretically unformulated, are nevertheless in practice a matter of life & death. Our own role is to raise these questions to the level of general consciousness, to share visions & the most far-reaching experiments with others on all levels of revolutionary struggle, to penetrate deeper & soar higher into the multifarious reality of our time & all times, and to unite theory & practice in a mad, passionate embrace.

Words in chains (in advertising, law, religion), words manipulated by sclerotic bureaucrats, words abandoned in textbooks, words gagged by television, words surrounded by newspapers, words without margins, words whose light has nearly been snuffed out, archaic words, words waiting to be born, words that order one about senselessly, words whose edges are blunted, words imposed on the poor, words confined to the rich, words that fight the bosses' war, words smothered by the ruling classes, words that riot & burn, words that lie in the street, words that sit in the tops of trees, words that ride on the crests of waves, words that fly, dive, swim & burst into flame: let us liberate those words, let us open once & for all the commodity-literary cages of their quotidian imprisonment and let them speak for us in the poetry of revolution.

The black swan of Lautreamont, "...with a body bearing an anvil surmounted by the putrefying carcase of a crab, and rightly inspiring mistrust in the rest of its aquatic comrades," "...confined...to a distant bay at the end of the body of water, alone among the fowl of the air as he was among men," is now everywhere, a comrade-in-arms, one of us & all of us. The poet is no longer isolated as he was in the past; his alienation in modern society, assuming a clarifying totality and thus, dialectically, permitting total transcendence & total suppression of alienation through the total liberation of man -- economically possible today for the first time -- unites rather than separates his destiny with the subjugated classes. The Revolution today is no longer a question of political parties and vanguard sects -- which inevitably have led to nothing or new ruling classes -- but rather of the **spontaneous** self-activity of masses of people risking everything to be free. And this watchword of Lautreamont is its most splendid & prophetic & convulsive battle-cry: "Poetry must be made by all. Not by one."

Men & women must be made to realize that the world of the mind is capable of practically limitless expansion, and that the material world is capable of providing practically limitless pleasure, perceived in its countless manifestations according to love, humor, mythology, dream, play & the thirst for adventure. "The dream, too," said Nicolas Calas, "must have its own Bastille Day."

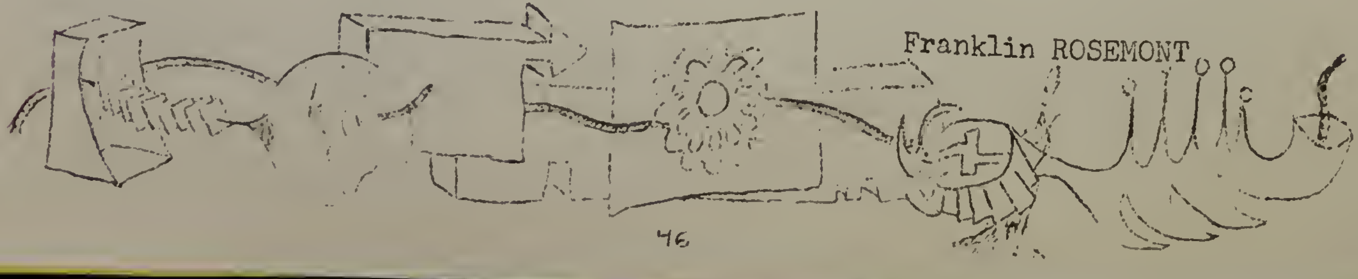
* * *

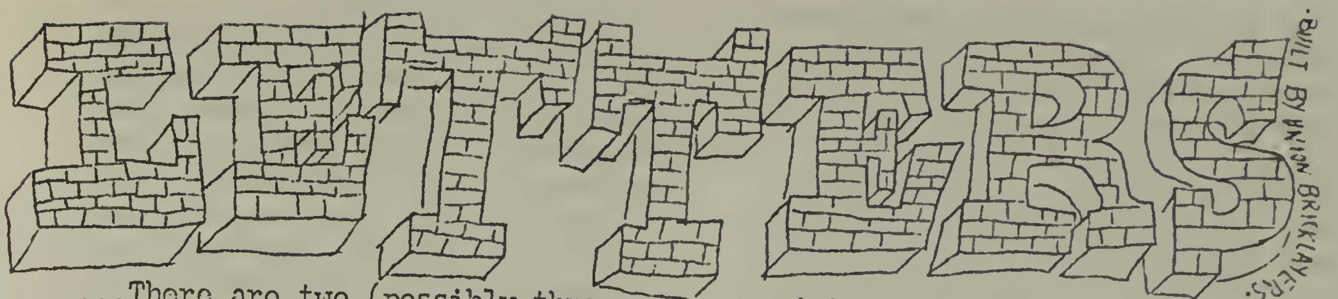
Freedom, despite the innumerable compromises performed so ignobly under its name, retains still its power of limitless attraction. Like love, it can be understood most clearly during its realization (I should say: surrealization); otherwise it succumbs too easily to abstraction. Like love, too, the more it is realized the better it is understood. (I say "understood" the way one can say that darkness or light or a Kwakiutl raven sculpture is understood: that is, one sees, and draws conclusions from what one sees.)

Defiance is a step toward freedom; black & green, red & gold, with terrifying leaves of sedition in the coils of its sleepless fog, it crumbles reality, loses track of obstacles, dismounts the sense of time & vanishes into the visceral anatomy of the hours & the days, only to re-emerge momentarily with even greater wrath & a sense of immanent triumph crowned with clearly ascertainable dimensions of laughter. Thick with sand, the moon is heavy on the drawn blade brandished through the unevenly shaped air. The room is without chairs; the table is too high, & the fire too low. There is a vague sort of window hidden in suspicious moments, dark in its hinge of water but destined soon to enlarge the scope of our vision with any & all available & unavailable means (is it raining & are there wolves on the stairs & is little sister home from the sea yet please?). Even if the operator could speak, even if the weather was known, there would be no reply: this is the end of the line, only poetry, only life, only the world go any farther.

Poetry, the nocturnal flamethrower, the black sunflower, burns latently in the eyes of all who see. The journey from vision to action comprises a series of steps in which the superficial mystifications of immediate reality are successively liquidated. We must take these steps: we must aid relentlessly in the incessant proliferation of totally poetic acts. In this way the labyrinth loses its terrors and the minotaur, formerly a total stranger, becomes our closest friend.

Franklin ROSEMONT





...There are two (possibly three counting the hipster) ways to respond to Authority -- obey or pour shit in its files. We know of course which is the more noble. I am not so sure as you about the existence of a revolutionary situation -- although I would like to think so. But anything like sabotage, mutilating IBM cards, etc., no matter how futile in itself, can be justified in that it keeps Authority on its toes and reminds it of its ultimate fate. Also keeps fires of holy rebellion alive in bad times. Also such acts can serve as an example for others who mistakenly believe that bureaucracy becomes stronger as it grows. On the contrary -- the bigger & more complex it gets the more vulnerable it becomes to having sand thrown in its gears (or shit in its files).

Mike EVERETT
Washington, D.C.

...You are right about high school, it's very disgusting. The rules, how stupid! Being treated like a dog on a leash & not being able to give your opinion.

There are quite a few reasons why I like the Stones, one is because they seem to be rebelling, and that's good! Maybe that's why parents don't like them, because they show truth. Another reason is I like their music, R&B and R&R. I like the way they dress, act, sing, their looks and, well, I guess it all adds up to just the way they rebel.

...I agree very much with your ideas about revolting & the way society is pushing us ariund. We just can't be free.

Of course I read your *Mods, Rockers & the Revolution* pamphlet, and a lot of it really shows the truth that society just won't face. So youth rebels and it's about time. We've taken enough from parents & society and it's about time we did something about it. The way they push us around & look down at us & are always mocking us! You'd think we were animals or something! I could write forever about the Youth Revolt and I'm starting to get carried away so I'd better stop before I do something drastic.

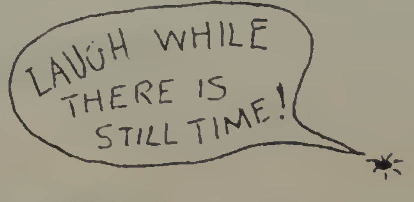
* * *

Recently I came across an article titled "Mods, Rockers & the Revolution" which appeared here in translation in *Informations Correspondance Ouvriers*. We understand that this was extracted from a brochure published by your group in Chicago. We are very interested in mods & rockers, rock'n'roll & the youth movement in the U.S. and would like to receive this brochure and your other publications.

I am a member of the Provos, an organization of anarchists, mods, rockers, ban-the-bombers, beatniks, nozems, blouson noirs, etc. I am sending you copies of PROVO, published in Amsterdam, and REVO, published by Provos in Belgium.

Madrid DANIELE
Brussels, Belgium



LAUGH WHILE THERE IS STILL TIME!

I have talked with several provos here & they are interested in communicatingwith american anarchists. I enclose a manifesto, the only thing they have at the moment in English. You have probably read about these people by now, they are quite remarkable & have a lot of strength here in Amsterdam. The movement is spreading with students in Paris staging experimental street happenings to test the reactions of police. Very likely there'll follow several advance copies of articles now in translation for a book to be published in English in England in a few months. These are, I understand, the pick of articles from the past issues of PROVO...

Lester DORÉ

Amsterdam

...I was glad to be reproduced in your surrealist pamphlet. The publishers of anthologies and histories of surrealism seem to ignore me because they do not consider me dead enough for their purposes.... I am indeed gradually moving toward a more aggressive point of view; I think the time is ripe but I still maintain that the independance of the artist from political domination is absolutely necessary and I am too marxist in my training to approve of adventurism. ...I still believe that pop art is an important phenomena and I am for constructive criticism. Breton, when I last saw him 4 years ago, agreed with me on this. I refuse to take up a dogmatic position in art.

Nicolas CALAS

New York

...Oh but the crumbling cities are the playpens of the new revolution and each day I wake up with another bloodstained apocalyptic vision of standing amidst the rubble of London covered in Eisner blossoms and a gigantic party going on all around me for as far as the eye can see -- the realization of all popular poetry, drawing on the most delirious urges and consciousness of all time. It is of course a nationalistic dream but then its extension is as inevitable as its realization.

Apart from smashing the mask of anarchy we have been definitely improving the spirit wherever we find it. The atmosphere now is about six months pre-Amsterdam by my calculations -- I predict the spring'll really get sprung this spring. Nothing much can hold me back after that date... The only precaution I am taking is to get so stoned that most of the time I can't do anything anyhow. When I lay off I'll be out there....

SMASH URBAN RENEWAL

STOMP SMASH KILL STOMP STAMP CRASH HIT. BREAK CRUSH STOMP!

During summer and early winter we have been engaged in one skirmish after another with Chicago's Department of Urban Renewal, which is ignobly engaged in displacing poor people to build expensive apartments for the rich. Several years ago they invaded the Northside neighborhood around the Solidarity Bookshop intent upon driving out PR's, Spades, Mexicans, Indians, the poor whites, our little revolutionary bookshop and razing the old and rather beautiful buildings that are located in this area.

We decided to stand firm in the face of this outrage. We refused to pay rent to the city when they bought the property and demanded that they find us a suitable storefront for the same rent ($40) before we even thought of moving. For over three months we operated our Bookshop rent=free at the expense of the city until one day they boarded it up and padlocked the door. We, of course, removed the lock and boards and resumed our regular subversive routine of peddling treasonous literature. After a week of this, two of our number were arrested for trespassing within our own Bookshop!

The Bookshop was nailed shut again and this time we broke in through the rear and sold books and pamphlets in this clandestine manner after dark until police surveillance became too repressive to keep the shop open at all. One night we broke in and retrieved our books, mailing lists, mimeograph, roll-top desk and a 25-year-old traffic stoplight, and opened up in a former cobbler shop that has remained vacant for 30 years at 1644 Moyer Court, our present location.

The last paltry harrassment perpetrated by Urban Renewal consisted of obliterating the slogans we painted across our former bookshop storefront such as SMASH URBAN RENEWAL--SMASH THE STATE--SMASH THE COPS and one week later these creeps defaced our huge (4'x6') Rene Crevel statement printed in Rebel Worker #6.(Chicago edition).

With the advance of wrecking derricks another Bookshop storefront will be totally erased from the face of the earth (try finding 713 Armitage--our first storefront.) And because 1644 is slated for destruction in '67 a third storefront will evaporate.

The hassles enumerated above are sufficient explanation of the delay in filling some orders during this period. Our files were very much in disorder, stored in several places, (& once the bulk of them were rummaged through by cops), meanwhile our finances dwindled & the practice of ordering books from commercial publishers came nearly to a standstill. This situation no longer exists & we have a full-scale operating Solidarity Bookshop once again.

Some new material at the Bookshop is worth mentioning. The Libertarian League of New York recently closed its hall & very kindly sent us a large quantity of its stock of anarchist literature, including some comparatively rare pamphlets. We are also carrying a selection of Arkham House books, publishers of H.P. Lovecraft, Clark Ashton Smith & other fantasy writers of considerable significance as pre-surrealist mythologists; some new books & pamphlets on guerrilla warfare; & "little magazines" from around the world. We are preparing a small book list (our 55-paged 50¢ Annotated Catalogue is almost sold out) of these & other recent acquisitions -- 5¢ (stamps appreciated).

BOOKS & PAMPHLETS AVAILABLE FROM THE SOLIDARITY BOOKSHOP

...the only anarchist & surrealist bookshop in the U.S.

The Rebel Worker (soon to become ZTANGI!)	25¢ a copy $1 for a 6-issue sub
Mods, Rockers & the Revolution (RW pamphlet #1) Articles on youth revolt by F. Rosemont, C. Radcliffe, R. Mabey	15¢
Blackout! by H. W. Morton (RW pamphlet #2)	15¢
Revolutionary Consciousness (RW pamphlet #3)	15¢
Surrealism & Revolution (RW pamphlet #4)	35¢
The Watts Insurrection of 1965 (RW pamphlet #5)	15¢
HAYMARKET ANARCHIST POSTER (see back cover)	$1
IWW Songs: To Fan the Flames of Discontent the famous "little red song book" w/ songs by Joe Hill, T-Bone etc.	40¢
The Place of the Individual in Society by Emma Goldman	15¢
Vote: What For? by Errico Malatesta (Libertarian League)	5¢
Art & Revolution by Leon Trotsky (w/ Breton-Trotsky Manifesto)	25¢
Maldoror (includes the Poesies) by Lautreamont (New Directions)	$2.10
Nadja by Andre Breton (Grove Press) paperback	1.95
Peret's Score: Twenty Poems by Benjamin Peret	1.25
The History of Surrealism by Maurice Nadeau w/ surrealist documents, bibliography, etc.	6.95
l'Ecart Absolu -- Catalog of the XIIth Int'l Surrealist Exhibition Paris, 1965-66. Texts by Breton, Legrand, Schuster, Benayoun, etc.	5.00
The Totality for Kids by Raoul Vaneigem	.25
The Abominations of Yondo by Clark Ashton Smith (Arkham House) Fables & tales of subliminal subversion	4.00
150 Questions for a Guerrilla by Gen'l Alberto Bayo (illustrated)	2.
Collected Writings of Ambrose Bierce paperback	2.75

Wobbly #3, October, 1963, is published by the Berkeley Branch of the General Recruiting Union, Industrial Workers of the World.

Address all subscriptions and correspondence to:

WOBBLY, ℅ Ellington
1941 Oregon St.
Berkeley Calif. 94703

((Please note new address))

Price: 25 cents per single copy, subscription 6 issues for $1.

WOBBLY is not an official publication of the Industrial Workers of the World, but it is a publication of the Berkeley GRU Branch, an accredited local of the IWW, so of course WOBBLY will reflect IWW policy and ideas. But we do not--and cannot--speak for the IWW.

* *

THE EDITOR SPEAKS:

...albeit somewhat apologetically. I'm speaking of course of the long delay between issue #2 and this one. Reasons are many, varied, colorful, untruthful... If we were a Big, Important Magazine I guess I could speak pompously of Personnel and Financial Difficulties but we're not so I'll just diffidently mention that the Branch Treasury is kind of short and I'm the third editor for three issues. HELP!

You can help with some of our problems--stop looking over your shoulder, I'm talking to you. Money would be nice, introducing the magazine to others (preferably Paying Others) would help and your material might be useful too. C'mon, don't be bashful--send us something. The most we can do is send it back.

And don't forget to write. We like to hear from you.

--RDE

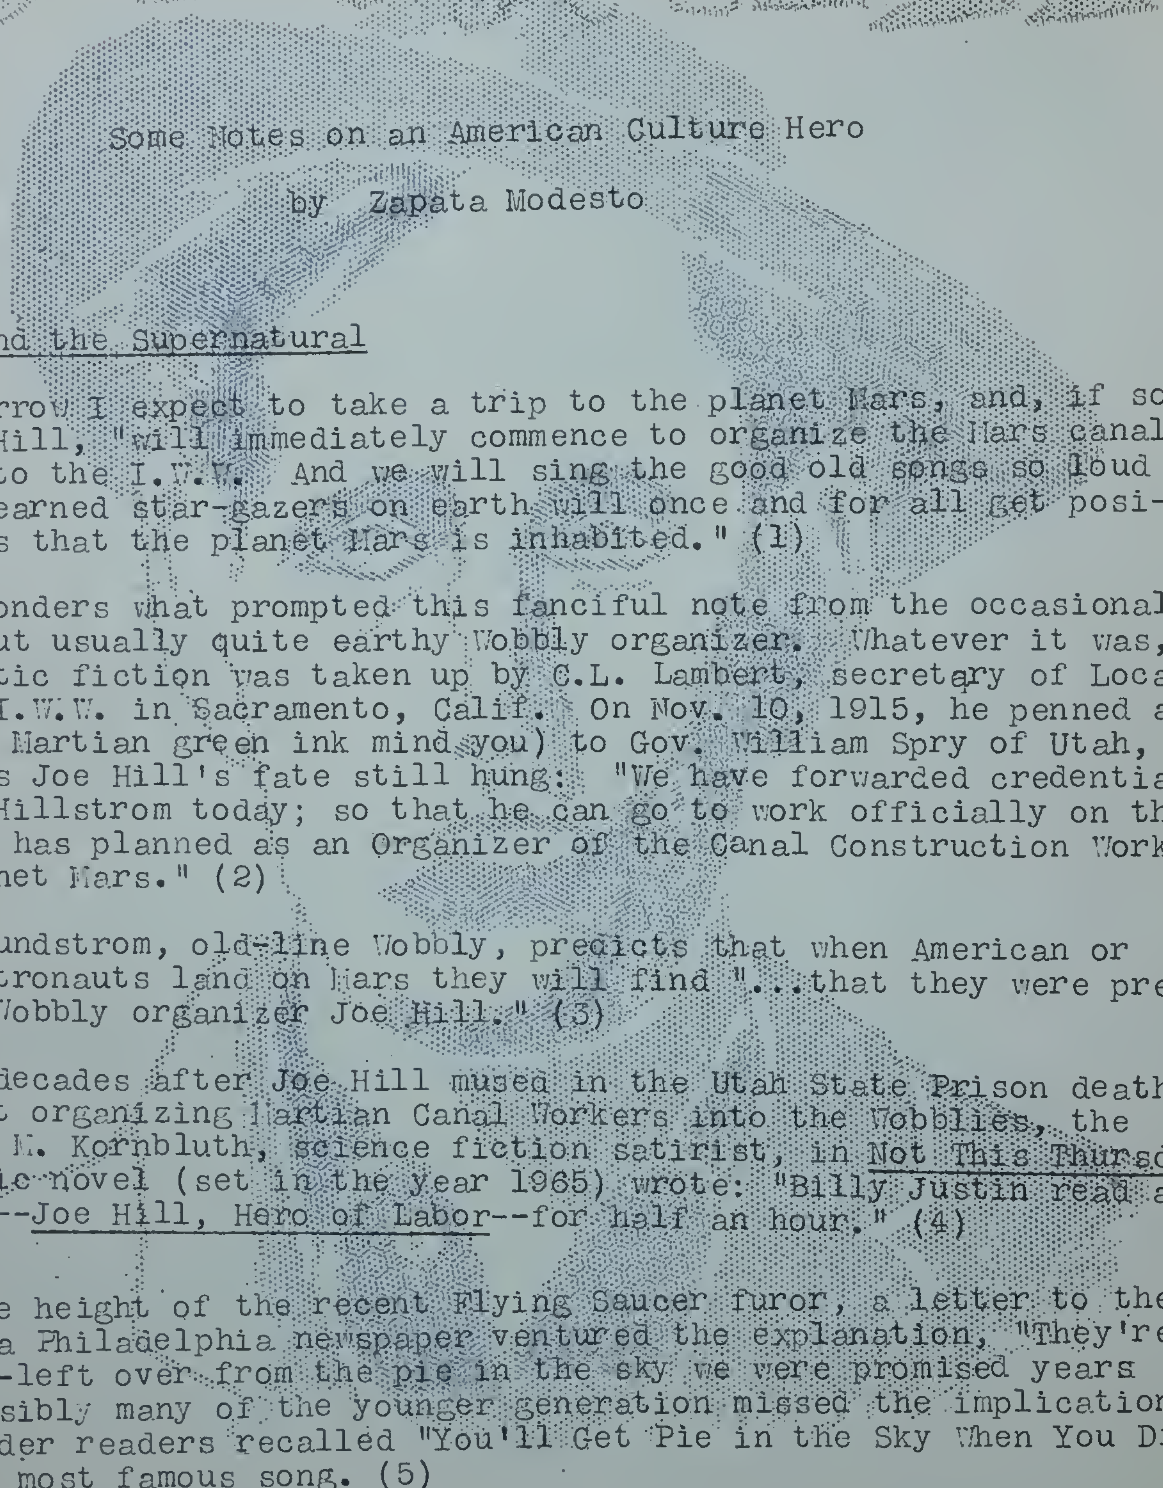
Joe Hill



Some Notes on an American Culture Hero

by Zapata Modesto

Joe Hill and the Supernatural

"Tomorrow I expect to take a trip to the planet Mars, and, if so," wrote Joe Hill, "will immediately commence to organize the Mars canal workers into the I.W.W. And we will sing the good old songs so loud that the learned star-gazers on earth will once and for all get positive proofs that the planet Mars is inhabited." (1)

One wonders what prompted this fanciful note from the occasionally romantic but usually quite earthy Wobbly organizer. Whatever it was, the fantastic fiction was taken up by C.L. Lambert, secretary of Local 71 of the I.W.W. in Sacramento, Calif. On Nov. 10, 1915, he penned a letter (in Martian green ink mind you) to Gov. William Spry of Utah, in whose hands Joe Hill's fate still hung: "We have forwarded credentials to Joseph Hillstrom today; so that he can go to work officially on the mission he has planned as an Organizer of the Canal Construction Workers on the Planet Mars." (2)

Al Grundstrom, old-line Wobbly, predicts that when American or Russian astronauts land on Mars they will find "...that they were preceeded by Wobbly organizer Joe Hill." (3)

Four decades after Joe Hill mused in the Utah State Prison death house about organizing Martian Canal Workers into the Wobblies, the late Cyril M. Kornbluth, science fiction satirist, in Not This Thursday, a futuristic novel (set in the year 1965) wrote: "Billy Justin read a comic book--Joe Hill, Hero of Labor--for half an hour." (4)

At the height of the recent Flying Saucer furor, a letter to the editor of a Philadelphia newspaper ventured the explanation, "They're pieplates--left over from the pie in the sky we were promised years ago." Possibly many of the younger generation missed the implication, but the older readers recalled "You'll Get Pie in the Sky When You Die," Joe Hill's most famous song. (5)

Of course, writers in several periodicals and books have speculated upon the possibilities of an afterlife for Hill. For instance:

"Two weeks from today and Hillstrom, the convicted murderer, will be trying to make trouble up in Heaven, or else disputing with his satanic majesty down in Hades." (6)

"Surely, if some heavenly visitor had decided to intervene in the troubled life of America in this period," wrote Alan Lomax, "he would have behaved like Joe Hill, would have been misunderstood like him, and would have died like him." (7)

In The Fireside Book of Folk Songs, cartoons by Alice and Martin Provensen show (1) a man in bed, crazy quilt pulled up to his throat. His head is diademmed by a stocking cap topped by a tassle. Gape-mouthed, the fellow in bed stares at the apparition at the foot of his bed--worker Joe Hill, big as life, wearing overalls, checkered red shirt, cap, angel wings (sprouting handsomely from his shoulders) and a canoe-shaped grin. Hill's left hand grips a poster-knob at the foot of the bed. His right hand rests on his right hip. A humanized alarm clock (pointing to four minutes after four a.m.) stands spider-leggedly on the dresser. Behind the head of the bed, on a small table, sits an old coal oil lamp--relic of the pre-incandescent past. The second cartoon shows Joe Hill yet wearing a cap, work shoes, angel wings and grin. This time he also wears a coat. Effortlessly he floats through the air, between two clouds. He holds a picket sign inscribed, "Unfair." From far below smoke rushes up, just ahead of him, from the smokestack of a factory. (8)

Our class-conscious folk hero has troubled staid citizens as much in death as he did in life. They tried to forget him, but reminders kept popping up.

Less than a month after Hill's execution on Nov. 19, 1915, an unshaven young man dressed as an Italian quarryman (battered hat, grimy work clothes, a wilted collar folded over his coat collar), his right hand waving a red flag, burst into O.C. Ralston's metallurgy class at the University of Utah.

"During the Skull and Bones (Junior Society) initiation, on Friday, Dec. 3 (1915) he (engineering student John Langford, class of '17) delighted the coeds by exploding bombs after the most approved methods and by cavorting around the campus as the shade of Joe Hill." (9)

In James Jones' From Here to Eternity, Jack Malloy--the man the main character in the novel looks up to as his philosophic mentor--"worshipped the memory" of Joe Hill: "He was a saint. He had to be one, to have been given the life he was allowed to have...Joe Hill, whom Jack Malloy envied more than any other man...That's the way to go out. That shows what can be done. But you have to have what it takes. And then on top of that you have to have the luck. Someday they will rank Joe Hill right up alongside old John the Baptist. He must have done something great, back a long time ago before he was ever Joe Hill, to have earned a chance at a ticket like that one."(10)

Wallace Stegner anticipated Jones' reference to reincarnation in connection with Joe Hill. (As their novels appeared not far apart--Stegner's in 1950 and Jones' in 1951--it would appear that the authors arrived at such an approach independently.) On p. 386 of The Preacher and the Slave, Stegner has Hill say, "I think it (his execution) was kind of predetermined. When I first came into this burg I had a cold hunch, and I kept having it. Something was due to happen to me in this place. I could feel it." (11)

Joe Hill as Christ Symbol

In Big Jim Turner, James Stephens wrote, "Joe Hill stood back away, saintly eyes big and bright under a low hat brim, face as hard and cold as an ice-coated stone." Three pages later he depicts Joe Hill as a brutal pistol-whipper. (In real life Joe Hill was the victim of vicious vigilante pistol-whippers.) On p. 211 Stephens writes, "It was Joe Hill, all right, Joe Hill with a gun under his coat and his right hand ready to flash for it. The eyes that could look at you like the eyes from a picture of Jesus Christ were deathly in their glittering stare." (12)

Wallace Stegner's The Preacher and the Slave shows a violent, complex Joe Hill. Stegner approached Hill with a scholarly discipline that included depth psychology, Oedipus complex, martyrology and so on. In this novel Joe is an intermixture of good and evil, a sort of half-Christ, half-Robin Hood. In one scene Joe "deliberately and without heat" bends a pistol-barrel over a rancher's balding head and loots his safe. (p.165) But in another scene, as the novel nears the climax, Stegner makes a couple of Christ analogies. Joe Hill asks, "what do you think the Mormons would have amounted to if they hadn't shot Joe Smith? How would Christianity have got along in Rome if the Romans hadn't liked throwing them to the lions? They'd have been just another little sect about as big as the Holy Rollers now...For that matter what if nobody had hung Jesus on a cross?" (p.379) On p.386 the Christ symbolism becomes overt when the author describes the execution frame as "crude and rough as the cross of Calvary." (13)

Barrie Stavis, in The Man Who Never Died, A Play About Joe Hill, has negro Ben Winton, On June 26, 1914, give an impassioned talk at a "Joe Hill Defense Meeting" in Salt Lake City Wobbly Hall. Just before the news is brought that Joe has been found guilty, Winton compares two organizers of "the poor and the lowly and the downtrodden," and tells why they want to silence such men by nailing them to "the bleeding cross": "And I'm not blaspheming when I say, 'Jesus Christ is you. Joe Hill is you.'...That's why they're framing Joe Hill. It's you they want to crucify." (14)

Elizebeth Gurley Flynn tells of her visit, in May, 1915, with Joe Hill in the Sheriff's office, at the Salt Lake County Jail. She quotes Hill as having told her he was "...the age when Jesus was crucified." (15)

In 1961, the Joe Hill House of Hospitality was founded by ex-Wob Ammon Hennacy in Salt Lake City. On the kitchen wall, the only "mission" in the "City of Saints" Mary Lathrop painted a 12'x16' mural of the execution of Joe Hill. Hovering above the smoke of the five-man firing squad's blazing rifles is Jesus Christ on a cross. The Catholic Worker wouldn't print a photo of the mural inasmuch as Joe Hill dominted it. The Industrial Worker wouldn't print it for Jesus Christ on a cross was in the background.

Roy Berkeley wrote a parody of Woody Guthrie's "Jesus Christ" ballad (which itself parodied the famed Ballad of Jesse James). Berkeley ends his song with Jesus saying Joe Hillishly: "Don't pray for me--organize!" (16)

Joe Hill and Wobblies, Socialists and Communists

In April, 1948, "Friends of Joe Hill" picketed and handed out handbills boldly headed: "JOE HILL, LABOR'S MARTYR, LIBELLED IN NEW REPUBLIC," in front of that publication's office at 40 East 49th St. They were steamed up about Wallace Stegner's article, "Joe Hill; The Wobblies' Troubador," which appeared Jan. 5, 1948. A year before, in an earlier, unnoticed article, Stegner had written: "It might be possible, if one wished to do it, to whittle the figure of Joe Hill down to the stature of a migrant yegg." (17) New Republic, Nov. 15, 1948, printed a 3,000 word digest of a lengthy defense of Joe Hill compiled by the "Friends of Joe Hill Committee." Time, on April 19, in a half-column story on the picketing, told how "The Wobblies March Again" "...to keep a legend of martyrdom alive. A New Yorker writer covered the affair. The New York Times ran a two-column head on the picketing. New Republic and Nation editorialized on the affair.

"We found the Stegner piece interesting," dryly commented the Nation editor, "but we doubt whether the legendary figure of Joe Hill can or even should be discredited by the disclosure of the failings of a mere man, Joe Hillstrom, who happened to be turned to legendary use. Such figures are not disposed of so easily. We are not surprised that Wobblies, who are legendary themselves, have appeared before the New Republic's door. We shan't be surprised, either, to hear that Joe Hill is among them." (18)

Daniel Aaron, in writing on "Episodes in American Literary Communism" noted: "They (communist writers) had written poems and tracts about the lynching of Frank Little and the execution of Joe Hill." (19)

It's understandable why the Wobblies don't want to share Joe Hill with other radical movements who have claimed him as their own. But Joe Hill has outgrown the radical and labor movements. As a full-blown folk hero he belongs to the people.

The International Socialist Review, before WW I, offered original sketches of a dozen or so socialist labor heroes--Joe Hill, Eugene Debs and Jack London were among Americans included.

Several poems and stories were written by radicals on Joe Hill in the '20s and '30s. In the '40s up to the '60s Joe Hill had flowered in radical circles to arch-symbol status. Joe Hill is not only an American folk hero. He has been or is honored as a folk hero by radicals in many countries, including Australia, Canada, Germany, Mexico, Russia and Sweden. He has been mentioned in recent months in such radical publications as [illegible] and [illegible] (Sweden); Tierra y Libertad (Mexico); Freedom (England); Political Affairs, National Guardian, Industrial Worker, The Worker, The Promethean Review and Lumberjack News.

The British opinion of Benedict Arnold and the Russian notion of Joe Hill differ sharply from America's. (20)

Gus Hall, general secretary of the C.P.U.S.A., in a Carnegie Hall tribute funeral service, Sept. 18, 1961, ranked Joe Hill with other "true greats of American Labor," in the radical pantheon of "union fighters who gave their all to organize America's wage slaves."

Wobbly Fred Thompson wrote: "If the Communists hope to run the working class here, they come up against a body of democratic traditions, including that of individual integrity. This set of traditions that prevents the assimilation of communist habits of thought is to a large extent centered around our 'folk heroes'--Jefferson, Lincoln, Paine, Debs, Parsons, Altgeld, Joe Hill and the like." (21)

Joe Hill's Place In Literature

A legend is a kind of myth that attracts professional literary artists. The rich ore of Joe Hill's life and legend has been mined by many writers and poets. Joe Hill is found in books of fiction by Archie Binns (23); Elias Tombenkin (24); John Dos Passos (25); Margaret Graham (26); Alexander Saxton (27); and a number of others. He is found in plays by Upton Sinclair (28) Louis Lembert (29); and Arturo Giovanitti (30). He is found in poems by Kenneth Patchen (31); Kenneth Rexroth (32); Carl Sandburg (33); Alfred Hayes (34); and Carlos Cortez (35). Writers who deal with Joe Hill in folklore include B.A. Botkin (39); William Alderson (40); Wayland Hand (41) and Ray McKinley Lawless (Lawell) (42). Joe Hill appears in every kind of book from cultural studies (43) to regional history books (44) to books on revolutions (45) and national history books (46).

The Legend--and the Man

In 1947, Wallace Stegner contended that "...the biography in Dos Passos' 1919, Earl Robinson's ballad, 'I Dreamed I Saw Joe Hill Last Night,' the singing of Paul Robeson and Michael Loring, have built Hill into a folk figure, almost the number one labor martyr and legend." (46)

Stegner said further, "People have made him into a Galahad, a hero, and a martyr, and they have done so because he gave them the opportunity, he offered the leads. He had what none of the other dozens of eligible (labor) martyrs had--imagination, a flair. He died for a cause, for a principle, for a woman's honor, for the things that fire the imagination, and the world-wide scattering of his ashes was a fitting finale. That symbolic act fertilized both the movement his songs served and the legend of labor's songster.

"They killed everything of Joe Hill but the poet, and the poet went on to organize. The Joe Hill who may never have walked a picket line (sic!) in his life has been on hundreds since his death. He has been improved and purified and remade in the image of his makers. As legend, he is whole and unambiguous." (47)

Wallace Stegner was unaware that Joe Hill had for years been IWW secretary in San Pedro, and had written his songs "Where the Frazer River Flows" and "The Mucker's Dream" first hand when the Wobblies threw up a thousand mile picket line during their British Columbia railroad strike. Stegner was also unaware that Joe Hill had led in auto and dock strikes, had been fired and blacklisted for his flying organizer activities.

When, in Sept., 1962, I visited the NBC newsroom in Salt Lake City, the head newsman asked me why we didn't erect a monument to Joe Hill in Sugarhouse Park. At 7 a.m., Nov. 19, 1965, I intend to hold a memorial meeting in that park on the ground where Joe Hill was shot 50 years before.

Former Wob soapboxer Alexander MacKay scoffs at the "romantic bushwah" that's been written about his old pal, the "cynical and bitter Joe." He says, "I fear that Stégner's concept of Joe as a glamorous Robin Hood has to go overboard, at least in San Pedro....he has Joe Hill masquerading as a half-Villon crossed with Wild Bill Hickok."

"Mac" is equally critical of The Man Who Never Died, by Barrie Stavis.

"I am sure if you were to tell Joe Hill now that he was the man that 'never died' he would shoot you on the spot. He died all right and no fooling, but, of course, the Joe Hill mythology may some day inspire revolting slaves, so may it be." He asks, "Why pick on Joe Hill in an effort to destroy the constructive myth built on the power of his songs and martyrdom? Joe earned his mythology the hard way, which is a damned sight more than can be said for much of the mythology of our capitalistic and theological heroes and saints." Of Joe Hill House he notes, "The mythical Jesus Christ rising to Heaven with the immortal soul of atheist Joe Hill is a spectacle to make the gods on High Olympus split their fat sides. I can still work up a chuckle when I think of Joe Hill up thar on Cloud Number 75, gazing on that mural and on the general activities. Joe is still mumbling: 'Don't mourn for me!' but with a good deal less conviction than in 1915. I suspect he has added to his last wish another slogan: 'Don't play around with my memory. Quit creating mythology around me memory. We don't need a Joe Hill cult, we need social action.'" (48)

Joe Hill has been linked with many heroes and folk figures--Robin Hood, Jesus Christ, John the Baptist; Hagi the Bold, Sir Lancelot, Galahad, Old Quiz, Socrates, Robert Burns, Francisco Ferrar, Raffles, Francois Villon, Olaf Dalin, Wat Tyler, John Brown, Johnny Appleseed and others.

"In death Joe Hill has become an authentic legend of the U.S. labor movement." acknowledges Life.

Barrie Stavis wrote, "For several years after Joe Hill's death, a good deal was written about him--articles, poems, songs. Then a curious curtain of silence descended, and, except for an occasional item here and there, little was written about the man. During this time, though his songs continued to be sung all over the world, knowledge of the man and his deeds began to fade. He assumed a mythlike character. Paul Bunyan and Joe Hill; John Henry and Joe Hill; Johnny Appleseed and Joe Hill. This transformation of man into myth was aided by the extremely moving and beautiful song, 'Joe Hill,' by Alfred Hayes and Earl Robinson. Gradually, even in labor circles, the myth replaced the man." (49)

Folklorist Archie Green writes, "More has been written about Joe Hill--novel, drama, poem, essay--than any other labor hero." (50)

Actually Joe Hill's legend mushroomed from 1938 to 1962. More was written on him in articles and books in this period than was written on him in the 1915-1938 period. Today no industrial hero of American folklore approaches Joe Hill in fame. Stegner and Stavis both emphasized the influence of the Hayes-Robinson song in the construction of Joe Hill's legend or myth. Yet almost 20 years before Hayes wrote the moving lyrics to this song, Ralph Chaplin (in 1914) wrote "Joe Hill in Jail," and "Joe Hill," and T-Bone Slim dreamt he saw Joe Hill one night in his song "I Want to Free Miss Liberty" which begins:

"While the moon was softly shining
On my cot, as I lay pining,
Thinking of the day--long passed away;
Came a drowsy feeling o'er me--
And Joe Hill stood there before me--
I seemed to hear this joyous fighter say: etc." (51)

T-Bone narrated what he heard "the spirit say." Richard Brazier, in 1916, wrote "Farewell, Joe!" in which he quoted the "last brave words" of Joe Hill as "Don't Mourn for me, but Organize!" (52) John E. Nordquist, on Nov. 19--the day Joe Hill was shot--wrote "November Nineteenth." These songs appeared in the Little Red Song Book in edition after edition for years before the Hayes-Robinson work appeared, first as a poem in New Masses, and finally as the famed ballad.

Certainly the Wobbly poets played a big part in bolstering the Hill legend so that young poets half a generation later could revivify it. Two persons played a larger part than Hayes in moulding the legend of Joe Hill. Ralph Chaplin and Gurley Flynn, through their articles, prepared Joe Hill for canonization before their songster was executed. Elizabeth Gurley Flynn was quoted by the New York Post, "The day that Joe Hill's brave, strong heart is torn with bullets, his fruitful pen is stilled, and we take his body forth to the music of his own songs; the stigma of murder is stamped on every cowardly member of this Mormon Board." (53)

Among poems written on Joe Hill shortly after his death were "A Fair Trial" by Covington Hall, "In Memory of Joe Hill," by George Weiss, and "Joe Hill" by "C.O.G."

Eugene Burdick, in The Ninth Wave, tells how four American kids "fought to play Joe Hill." (54)

Joe Hill took on the stature of a folk hero by his own acts. His legend was blown to gigantic proportions by thousands of radical "press agents" who spoke up for him. He was a living legend before his trial for murder and execution. Hill, the Swede immigrant, who came to America when he was 22 and beat his way West and joined the Wobblies; Hill, the composer of a dozen world-famed labor songs while yet in his early 30's ("Casey Jones," "Pie in the Sky," "Scissor Bill," "Mister Block," "The Tramp," "Ta-ra-ra-boom-de-ay," "The Mucker's Dream," "Workers of the World Awaken!," "Rebel Girl," and "We Will Sing One Song"); Hill, the impassioned union flying organizer; Hill vagged for leading a dock workers' strike; Hill, taking off for the San Diego free speech fight as soon as he was sprung; Hill, hoboing to San Francisco to muster footloose rebels to invade the embattled town to spring his fellow workers; Hill the revolutionist, who helped the I.W.W. army take Mexicali and Tia Juana during an adventure aimed at seizing Lower California's wasteland to set up a Commune; Hill, the labor hero, defiant against his frame-up; Hill, dead game to the end--a chuckle in his throat, a smile on his lips, facing enemy rifles with bravado unexcelled by Icelandic heroes, spitting final defiance with his final breath--all these facets of Hill's life, wrapped in mystery, combined to produce a larger than life figure who loomed above prison walls. He rose above the monumental distortions about his being a dynamiter, cop-killer, etc., finally towering above other labor heroes of his time.

No group of writers added much to Joe Hill's legend. He was a hero of American labor before any well-known writer touched his legend.

Of his last words and acts, Wallace Stegner wrote: "These are the words of a great natural showman, the infallible raw materials of legend, and they are in themselves almost sufficient explanation of how an obscure dock worker and sailor, a nameless stiff, a crude poet and a mushy writer of sentimental songs could also be the Francois Villon of American Labor." (55)

John Greenway writes: "Joe Hillstrom was responsible for his own beatification. The entire legend that has grown up around him derives from his conduct after his arrest for the murder of a Salt Lake City grocer--an astounding display of incredible self-detachment, apparent eagerness to die a martyr's death, and an almost unparalleled flair for self-dramatization. Taciturn, eremitic, and mysterious in his movements before his arrest, Hillstrom suddenly began to act as if he were playing the part of the quixotic hero of a fantastic melodrama --he refused to divulge, on grounds of chivalry, the name of a woman allegedly implicated in his shooting; he refused to testify in his own defense; he refused to permit the IWW to hire lawyers to defend him; he fired his two defense attorneys in a sensational courtroom outburst; he rejected an unofficial offer of clemency; he wrote in his death cell poignant letters, poems, and songs full of phrases that in such circumstances easily lend themselves to immortality; and he climaxed this unbelievable show of bravada by shouting to the firing squad the orders which executed him." (56)

Greenway said in a letter: "Hill as a real human being has no more relation to Hill the Hero than Abraham Lincoln, the Civil War Politician has to Abraham Lincoln the folk hero." Like Lincoln, Hill's philosophy was homely. Like Lincoln, Joe Hill picked up and used colorful "Americanisms." Like Lincoln, Hill was a fighter, a humorist and an agnostic.

Among factors that contributed to Joe Hill's becoming a folk hero can be included:

1. Joe Hill was a temperate bachelor, a brave fighter for the underdog.
2. His adventurous life and courage in facing death as a labor martyr inspired thousands of people.
3. Tales were spun by authorities, reporters, and friends of his exploits.
4. Hill's taciturn nature made him a mysterious figure, hence provoked curiosity, and tales about him. The more the press distorted his life the more questions about the real Joe Hill were fathered.
5. His memory has been kept alive through word-of-mouth legends, articles, memorial meetings, essays, sculptures, paintings, drawings, murals, Joe Hill House, ballads, novels, poems, biographical sketches, plays, records and above all his own subliterary folksongs.
6. Like many legendary heroes he was killed by his Enemy; is a regional, national, and international legendary figure.
7. He has much in common with standard American folk heroes: humor, slang; his contempt for the dandy and jerk (he ridiculed them in his cartoons and verses); his eye-spitting defiance to his enemies. Like most folk heroes he has been refined, recast by sentimentalists and propagandists.
8. He helped mold new values and hence a new culture.

...

Joe Hill was perhaps the Twentieth Century's first egghead-heman folk figure in the U.S. In his poems and songs he reached the middlebrow intellectual as readily as he did the working stiff with his lyrics lampooning phony morality: "The harsh, tough, skeptical songs of Joe Hill convey most clearly the nature of the I.W.W.'s appeal to the well-brought-up intellectuals of radical sympathies. Here, if anywhere, was a clear breach with timidity, moralism, and the whole manner and content of the standard American culture. 'Long-haired preachers' try to tell us what's right and wrong, but turn out to offer only 'pie in the sky.' Only Joe Block, 'born by mistake!' swallows the pious promise that he 'may be President some day' and is therefore willing to 'go jump in the lake for Liberty's sake.'" (57)

John Dos Passos, in a thumbnail sketch, left Joe Hill in a coffin "with his handsome stony face staring into the future." (58) Joe rared up and vaulted out of the pine box and spat words something like those in the Ballad of Joe Hill: "Takes more than guns to kill a man. ...I ain't never died."

History Lesson: Spain 1936-'39

THE WORKERS AND THE WOBBLIES

by Maurine Blanck

The modern industrial working class, an element in society which, if you must make a living you hardly escape being a part of, finds itself today more alienated from control over the work process and from the control of the products of the work process than ever before. The vast network of management and machinery, because of its sheer bulk and abstract power, is unapproachable by the single worker. The interstices and exceptions to the system become fewer and fewer. The "discipline" of employment becomes longer and more rigorous.

The "official powers" of the labor movement either accede to the conditions of work laid down by management, or actively participate in the building of that structure by cooperating with it in the abstract regulation of the work process and by growing their own bureaucracies which fit hand-in-glove with those of the industrial powers. Nearly all the unions, excepting a few rare craft guilds here and there, are replete with bureaucracies and hierarchies of all kinds, often exploiting their own members and workers in general in ways reminiscent of those of the owners of industry.

In short, while there are plenty of "Agencies" eager to represent the worker, as a commodity with a price, as a thing, possessive of certain economic powers, and desiring higher wages for those economic powers (wages which are eaten up by inflation, except when a certain craft like plumbers, get a differential advantage--made at the expense of their fellow workers of course), agencies gaining in exchange greater organizational power over the workers, there is no "official" union willing to represent the worker as a human being who also works, none which aspire to increase his control over the method of work and the means of production, hours, conditions, rules and regulations, and, perhaps most important, over what is produced and how much.

In short, no established union wants to liberate the worker from his present condition of drudgery* and insecurity surrounded by gadgets and excess products, or from his condition as a mere thing in the industrial process; no established union would establish the man as the center, above the social mechanism.

However, the IWW is one union, albeit small and long dormant, which would strive to defend the worker's humanity as well as his pocketbook, which would remove the degrading and dehumanizing conditions of employment under capitalism.

This issue of the worker's humanity may sound vague and abstract but it is not--it boils down to very mundane and everyday conditions in the real world--for there are innumerable forces at work, in our capitalist-managerial society, striving to reduce all people to things, little points on graphs that respond properly to the slave-making stimuli of the Controllers. Naturally those people who work, who are

* Drudgery is work controlled by someone else.

closest to machine technology and who are subject to the greatest amount of pressure on the part of the social machine due to the necessity of their conforming to work-discipline, are threatened with the greatest deformation of character and destruction of individuality and freedom.

The forces I refer to range from the crude application of behaviorist (rat psychology) theories to human beings--the pigeon-holing of potential employees by means of psychological tests, questionnaires, investigations, and other probing devices and on-the-job control of them through manipulation of their psychological characteristics, to the forcing of women employees into spending half their wages on clothes--by means of simple pecking order social pressure--so that they will be appropriately (as for church or a party) dressed for work, resulting in the false disguise of near and actual poverty in bright though unbeautiful garments, to enticing people to perfectly ordinary dead-end jobs through bright promises of advancement, to the building up of an economy where more and more non-essential (and usually undesirable) goods and "services" are produced merely to create more work so that management might make more profits off of all of us and control our desires more effectively.

The industrial psychologist, and indirectly his buyer, would reduce you to a set of crude reactions and stimuli-response mechanisms; a money-making thing that would automatically respond in a certain way to whatever stimulus he laid out in front of you. Through the psychological tests, interviews, investigations, etc., he would solve the puzzle of your character neatly for your boss in order that he might, to his profit, "fit you where you are best suited," and hire or not hire you depending upon your score and appearance, thus pigeon-holing you forever. He would play God all the more efficiently, and the working class' general lack of will and ability to actualize its potential power makes it all the easier for him to play God--even in the AFL-CIO, well-organized groups such as the machinists are not subject to that sort of probing to nearly the degree clerks and women workers are.

The employers of women, in their search for fine appearances and the ultimate in "chic," would reduce them to the industrial equivalent of a well-dressed whore combined with a well-trained serf. (Question: Does the donning of a $30 dress and or high heels improve one's typing over what it would be in a $3 sweater, dirty jeans, or stark nude?) The creators of "consumer economics" would shove goods down your throat, to the point of forcing you into consuming one kind of goods to keep your job or get advanced up from it, at the expense of having time and or money to spend on other needs and pleasures.

It is to his profit to turn you into a consuming work machine, which, ideally, would lust after two new cars in its garage, 69 pairs of undies, 48 ties, a $30 dress for every day of the week, and turn its consumption-happy back on shorter hours and longer vacations. In short they prefer watchers of spectator recreations, the one who would prefer to pay to dance to another's turn than dance to their own. All this, because in the weird logic of "our" economic system, the more goods and work that are devoured, the more profits and power for the Managerial Elite.

The Wobblies would try to do something about this; eventually striving to free industry from class rule and monopoly so that it might be a complete expression of your needs and your wants.

First they would organize their unions on the basis of industry and factory, rather than splitting the working classes up into mutually competitive craft unions, thus increasing the actual power of each factory or business full of workers.

The IWW would oppose all probing, testing, investigating and social censoring on the part of bosses that was not strictly related to the skill aspects of the job itself.

We would oppose unemployment by acting in favor of shorter hours and more employees, rather than busily seeking higher wages for the lucky ones who happen to be working while ignoring the fact of unemployment or poorly paid employment for the unlucky others.

We would work to get better working conditions, longer breaks, habits of work, etc., under the control of the workers at each particular plant or business and out of the hands of bosses, foremen, managers and "efficiency experts." We would demand collectively to choose our own foremen--or to abolish foremen--while also demanding that each individual worker be allowed to follow his own whims as to how he consumed social goods, his personal habits, and opinions--something not now allowed for vast numbers of workers--most oppressively at the lower-white-collar level.

Finally, we would seek to achieve workers' control over how much is produced, what to produce, when to produce, and how to dispose of the product. We would eliminate the managerial classes' power to fire people from their jobs.

Unlike present unions, the IWW would not treat its members like things in a commodity structure because it recognises the solidarity of all workers, and the obvious fact that the workers (its members) are the IWW.

We seek the humanization of your work, not through an arbitrary program imposed upon you by us, but by offering you a means to express your will and your power as human beings to transform society, rendering it humane, free, and just,* rather than self-cannibalizing, exploitive, unjust and unfree, through the concerted, rational action of many, voluntarily united for the benefit of their mutual development as human being engaged in work.

---

* Unless of course you prefer inhumanity, slavery and injustice, for you also have the power to make a world filled with the bad things of life as well as with the good things.

THE OBSERVERS

BY Carlos Cortez

The screen of the televiewer changed from one scene to another and it seemed to always be the same tiresome thing. No matter which way his fingers moved the scanner button, the results were anything but encouraging. With a weary shrug he closed the switch button and as the screen went blank he turned to his partner.

"Man, this is the worst place we've had to patrol yet!"

"You can say that again, buddy-o," replied the other, "Of all the places to go, we had to draw this one. Sometimes I'm sorry I ever volunteered for this exploration patrol. Being so far away from home and over a forsaken spot like this can sure as hell give you the willies."

"You're not the only one feeling that way," said the first one, "Especially when you realize that with all the places we've explored, this is the first place we haven't as yet made any direct contact with the natives. In all the other places we have established amicable relations from the start but this place here seems too damned risky. From what we've been able to observe thru our televiewers, these critters don't even seem to be able to live with each other. They are either killing each other or making those senseless explosions that are polluting their own atmosphere. With all this hostility they have among themselves you can well imagine how they would react to outsiders like us."

"But why the hell are they that way?" asked his partner, "They seem to be intelligent creatures. They have apparently evolved a technology not too far behind our own, yet there seems to be an undercurrent of unbridled savagery among them that doesn't exist among our lowest cellular forms back home. I tell you it scares the hell out of me! It just doesn't--"

The conversation was interrupted by a sudden loud buzzing from the small box on the televiewer.

"Hey, that's the chief's signal! And he's calling all ships! I wonder what's in his craw now?"

The one nearest the televiewer switched on the first button and as the screen lit a figure gradually appeared, the one spoken of as chief, though in manner of speech, bearing and attitude he was no different from the two who were waiting silently, more out of comradely indulgence than out of subordination.

"Boys, perhaps you're wondering why I've buzzed you all on the party-line? Well, I have a suggestion and I would like to submit it to all of you so we can act on it."

"Go ahead Chief."

"As you all know we have been patrolling this area for some time now and of all the sectors we've ever patrolled this is the worst spot yet! Through our televiewers we've kept a steady observation on the planet below us. We've also monitored their communications and found their languages easy to crack. In fact we've only had to crack just one of these languages and that gave us the key to all of the others, proving beyond a doubt they are of one basic stock which is unlike the situation we have at home with our diversified cultures. They have developed a technology that is dangerously close to our own and--"

"Why do you say dangerously, chief?"

The sudden flickering of the televiewer screen indicated that the chief had been barraged by the same type of interruption from every ship in the fleet.

"I say 'dangerously" because only a comparative few of them have the full knowledge and control of that technology, causing the rest of them to be dependent on a small minority who own and control that technology. Now I know it sounds fantastic that the greater majority of these wretches consent to be denied full knowledge and independence. Remember the one word of theirs that we could never find an equivalent of our own for? 'Klass' I believe it was. I am beginning to think this word has some relation to their situation. I likewise believe that this lack of diffusion of technical knowledge and its benefits has some bearing on their savagery. They are divided into various camps according to whatever group of knowledge owners they happen to be under and are always ready to bring destruction onto another of their own kind, a situation which naturally would not exist were they all of the same knowledge, but then of course there would be no need for the knowledge owners!"

"But to get back to the danger bit: While only a few of these creatures have a more or less comprehensive savvy of the benefits as well as the hazards of this technology, they're quite helpless in the face of the knowledge owners who use this technology to further their own ends, the end result being that overwhelming majority of this planet's inhabitants are mere appendages to a machine society."

Pausing briefly to be sure his train of thought was being followed, the chief continued:

"Now, the quickest comparison I can make is to remind you of some of the experiments on a certain plant form that have been conducted by some of our chief students. Whenever there was unequal polinazation among a certain species certain forms would receive more nourishment than others, resulting in a malignant growth that would under normal conditions be useful but instead becomes parasitic and threatens the continued existence of the whole plant colony. Such is the situation we have been observing below us. The society of these creatures has all the symptoms of abnormal growth patterns.

"They have magnificent technical progress considering that their emotional and social behavior is quite infantile. Can you imagine one of our infants being given a decompositor to play around with? Especially when said infant is subject to chronic tantrums?

"They have only recently discovered nuclear power and to date have literally been playing with fire--gradually polluting their own atmosphere as well as polluting their oceans, which at their present rate of population increase will soon be their major source of food supply.

And to what purpose are they playing with this power? To be made into an implement of destruction to be used against each other! Already they are competing to see who can make the most devastating explosion!

"At present they are trying to break from the confines of their own atmosphere. Though their present attempts are pathetically humorous, it is only a matter of time before they stumble onto the secret of space travel and then onto intergalactic exploration. When you take into consideration the simple naivete of some of the cultures we have come in contact with you can well imagine they would be a poor match against an onslaught of these savages whose antics we have been studying down there. In fact--let's fact it--they would even give us a hard time. So I can see only one thing we can--"

"Chief! You don't mean the force field?" came a sudden interruption from one of the ships.

"Exactly," resumed the chief, "With a force field thrown around them, no matter how far they progress towards space travel, they will be hopelessly contained within the confines of their own gravitational pull until we see fit to lift it."

"But chief, that means if they keep on the way they are going, they'll soon turn themselves into another Sun!"

"I am afraid so."

"But chief, there must be another way out. Couldn't we go down there and try and educate them? See if we can't give them a little common sense--at least to save them from themselves?"

"As you well know, with all the diverse cultures we have come in contact with in our explorations it has been our policy not to interfere with an alien culture. Yes, whenever it was comprehended, we have imparted our technology to aliens and they have successfully applied it to their own way of life without destroying their basic cultural values but we do not do anything to alter the basic pattern of another culture because in the early part of our history we have had some tragic results in that respect. So I firmly believe our present policy is the wise one."

"Couldn't we possibly make an exception here, chief?"

"I'm afraid not. The only advancement we could impart to them would be mechanical and since they do not possess the emotional maturity they should have for the technology they now possess, any further technological knowledge would only be misused by them and the results would be all the more disastrous. Therefore, as you can see, they are the only ones who can save themselves."

"So...?" came the voice of another.

"So, we will establish a force field around this planet and have one of our patrol ships check at various intervals to look for the time it can be safely lifted."

"And when do you think that time will come, chief?"

"Who knows?" answered the chief, and with a perceptible note of sadness, "Perhaps never." After just a brief pause he resumed, "So what do you say friends, shall we lay this force field and get the hell out of here?"

The sudden violent flickering of the tele-screen and the cacaphonous buzzing of the sound box followed by an expression of tired relief on the chief indicated that not a member of the fleet needed any coaxing to agree with the suggestion.

"Very well. Let's not waste any more time. We'll mass our fleet and start laying this force field. The sooner we do this, the sooner we head for home. I know you're all anxious to get back. I know the first thing I'm going to do when I get back home and the first wise guy that asks me what, is going to be promoted to chief. So let's get with it! O.K.?"

* * * * * *

The bartender was just dozing off on the stool behind the small bar in his cross-roads tavern and liquor store when one of his neighbors came rushing through the door, out of breath and hardly able to blurt out what had apparently caused the terrified look on his face.

"They're real! My God, they're real! They actually exist!"

"Yeah? What's real?" asked the bored bartender.

"They are; I just saw them!"

"Saw what, f'chrissake?"

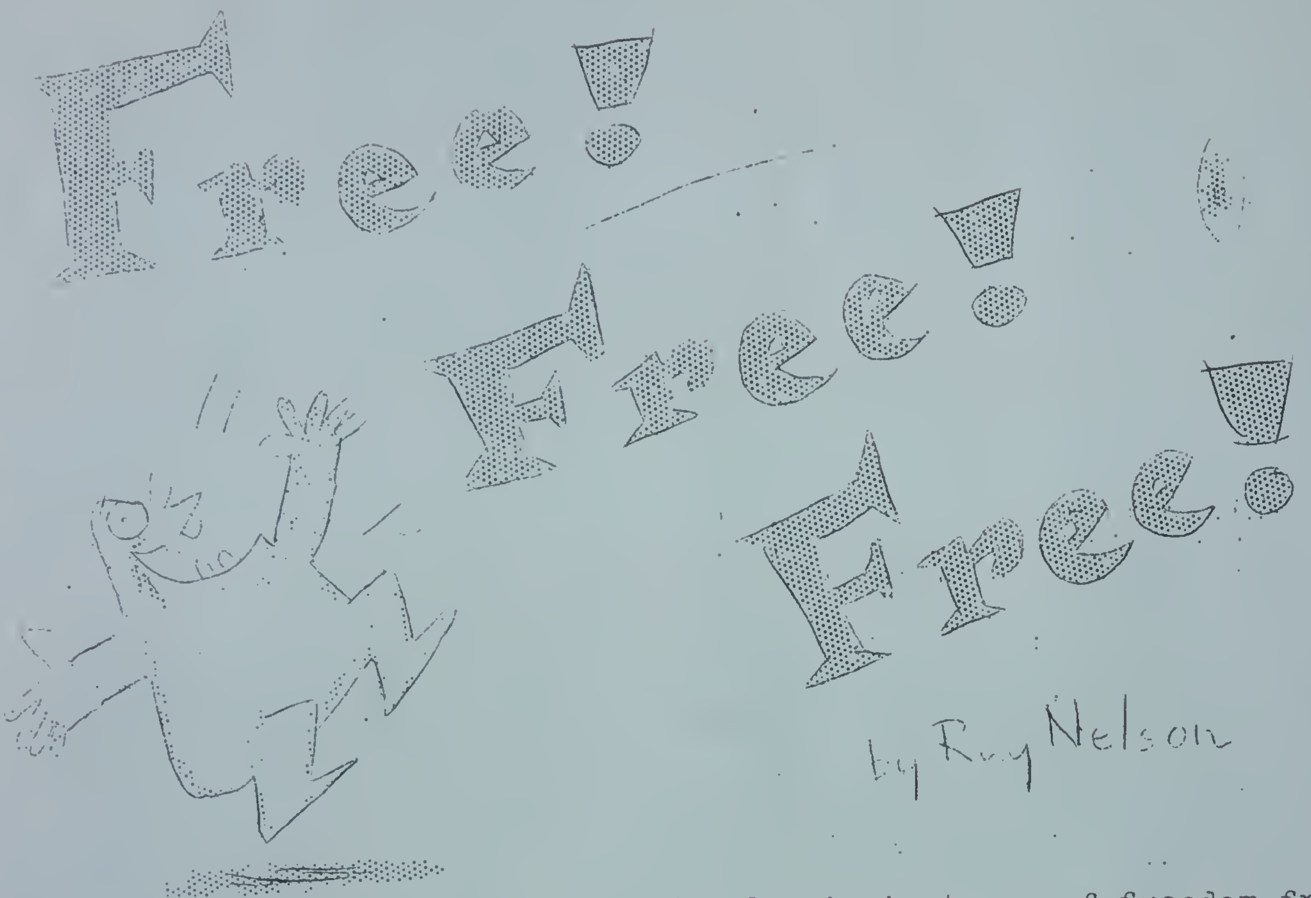
"Up in the sky. A whole fleet of them!"

"You know, I don't think I'm going to serve you nothing. You act like maybe you had too much already."

"I don't want anything to drink. I'm trying to tell you that a whole fleet of flying saucers just went by. Honest, I ain't had a drop to drink."

"Aw, c'mon now--you're letting all this science fiction crap go to your head. What you saw was prob'ly one of them Rooshun cosmo-whatsits. I bet the bastard is spying on us. What we oughta do is take all our A-bombs and H-bombs and wipe them red bastards out! Yeah and the Chinks too! Then this world would be safe for decent white Americans. Hey! You do look pretty shook up! Here, you better siddown. C'mon, I'll give you one on the house..."

--30--



Free! Free! Free!

by Ray Nelson

The way we usually think of freedom is in terms of freedom from restraint, a lack of walls and locked doors. We think of birds as free because they can fly, even though we know that they are prisoners of the iron law of subsistence. We think of bums as being free, and rich people, and savages. Those who hold a Hindu or Buddhist point of view regard the sage or holy man as being the only man who is really free.

When a man is released from jail, he is called a "free man"--and a person who has just gotten a divorce is also called "free." The USA is supposed to be a "free" country, and the nations who join us in being anti-Communist, including Franco's Spain and Chiang's Formosa, are called the free world. Under the dictator, Batista, Cuba was also a part of the "free world"--now, under Castro, we regard Cuba as "only a red satellite," even as a "slave state."

Freedom is the cornerstone of atheistic existentialism--a vast freedom of choice in which one can even, to some extent, choose one's mode of being, yet atheistic existentialism provides no standards of right and wrong--better or worse--by which these choices can be made.

What is freedom? What does that word really mean? Or does it have any real meaning? The strict determinist, for one, would regard freedom as a delusion and would rigorously exclude it from his clockwork universe.

In this country we are supposed to have "Four Freedoms," at least, freedom of speech, freedom of religion, freedom from fear and freedom from want. Norman Rockwell painted a series of scenes during the Second World War illustrating these concepts so even an idiot--or let us say, especially an idiot--could understand them. We have freedom of speech--so long as we "don't offend." We have freedom of religion--so long as we don't happen to be old-fashioned polygamous Mormons or something like that. We have freedom from fear--except when we happen to read a newspaper. And we have freedom from want--so long as the boss can't figure out how to make a machine do the same thing we do.

Why, we even have the most precious freedom of all, the freedom to kill ourselves or go insane. And every year more people are excercising these freedoms. If we don't like it here, we can always leave.

In a way, the freedom of suicide is the cornerstone of all other freedoms. We can do anything we please, within the realm of possibility, and escape punishment by a quick getaway to the graveyard. We're all going to die sooner or later anyway.

Personally, I can't understand freedom in its political sense at all. When they start talking about Franco's Spain as part of the "free world," I get the feeling I'm really in over my head. I remember when Russia and China were part of the "free world," and Germany and Japan were "enemies of freedom." The funny thing about it is that Russia was part of the "free world" when Stalin was in power, and Stalin was such a real stinker of a dictator that they won't even let "Good Old Uncle Joe," as we used to call him, park his corpse in the same tomb anymore with good guys like old Papa Lenin. The way the term free gets kicked around in politics, I sometimes feel like setting up a league of assassins to rub out anyone who uses it.

On the other hand, I can't understand its philosophical or abstract usage much better. I've heard the old argument about free will versus predestination argued to a draw so many times I'm beginning to think it's just one of those questions that can never be answered because it never should have been asked in the first place. I wouldn't be surprised if the whole argument arises from the way the question is phrased, and the way to go at the problem is to back up and try another route that bypasses it altogether.

I don't know whether I have free will or not. I know that I do make some decisions and translate these decisions into action, but I also know that the way I was brought up has a lot to do with what decisions I make.

Let's pretend, for the sake of argument, that I do have a free will. In that case I am free in so far as that will of mine gets what it's after, and un-free in so far as something gets in the way of my will reaching what it wants. I want to wave my arms and fly--sorry, have to buy a plane ticket. I want to live forever--sorry, that would really be too much of a good thing. I want to--but I'd better knock off.

It's pretty clear by now that there are plenty of things I want that I can't have, just because the universe isn't built that way. The innate perversity of natural objects is the first and greatest limitation on my freedom. Only by means of a careful scientific study of the natural qualities of this perverse universe can we even partially overcome this limitation. This kind of study can never be the work of one man. One man doesn't live long enough. It must be the work of many men, each picking up where the one before him left off, a work that bridges the centuries and is never really finished. It requires also a complex civilization to pass on the work, support and protect the individual scientist and translate the theories into the hardware needed to serve human purposes. That is why I don't believe the savage is more free than I am. It is I who am more free than he, because I am less than he a slave to natural conditions. I am also less a slave than he to custom and tabu. It is science that has freed me, in both cases.

I think it is more fruitful to think of freedom in terms of what I can do, rather than in terms of what I am not prevented from doing. A little boy once described the president of the USA as a man who "can do anything he wants to, so long as nobody stops him."

Actually, that might equally well describe the position of any one of us, up to a point. Living in society, we are faced with a maze of restrictions and rules which seem to limit our freedom on every hand, yet paradoxically, without this seemingly tyrannical society, we would be at the mercy of a still more tyrannical nature. The rules of society may often be evaded by the individual--the rules of nature cannot be evaded. They cannot really be evaded at all, but they can be turned to man's advantage by a patient, persistent effort on the part of a complex, highly organized society or a large group of disciplined individuals.

It's a sort of deal. In order to gain a certain measure of freedom from nature, we must give up a certain measure of freedom from our fellow man. But do we really give up our freedom by voluntarily accepting some measure of discipline? If I decide to impose a discipline on myself, even if it is a very demanding one, is my freedom really being restricted? If I make a decision and stick to it, is my will really being obstructed? If so, what is obstructing it? No, I believe that, strange as it may seem, freedom is not the opposite of discipline, but actually the direct result of it, if that discipline is self-imposed.

As long as my actions are only reactions to outside stimulae, my will is not free--it is only a result of outside causes. If I lay down a rule for myself--that I will, say, go to work at a certain time every weekday, then my will is brought into play. So long as nothing prevents me from going to work at that time every morning, I am a free man. If I change my mind, my will has been broken, and it remains broken until some other firm decision takes the place of the first.

If I vow to limit my sexual attentions to one woman, defined in this society as my wife, then so long as I am able to confine myself sexually to her and her alone, I am a free man. Divorce, from this point of view, would not set me free, but would rather constitute an obstacle to my will as expressed in my original vow. Divorce would make me a prisoner, since it would come between me and the object of my will. It might even break my will, as the death of my wife might, if I abandoned my vows. So long as I still strive to reach the original object of my desire, my will may be blocked but it is not broken. It is only broken if I abandon my vows, if I turn aside or give up because of the greatness of the obstacle or the weakness of my will. If my wife died and had removed from our marriage vows the escape clause, "till death do us part," and I followed my loved one to the grave, I would still be a free man, so long as I did it voluntarily. Anything that kept me from suicide would then be an imprisonment--would make me a prisoner in this world.

If I pledge my life and all I own to someone, I am a free man so long as I am able to live up to that pledge. If someone to whom I am pledged lacks food, clothing or shelter and I am unable or am prevented from helping him, then my way is blocked--I am a prisoner. This is the true meaning of free love--to freely love, to give voluntarily of myself to the limit of my ability.

Freedom may be a mere catchword in politics and an empty abstraction in philosophy, but to someone who has taken a pledge to his fellow man, it takes on a very special significance. To him the first freedom, the fundamental freedom, the freedom that is the fulcrum of his existence, is the freedom to give.

PREAMBLE

to the Constitution of the Industrial Workers of the World

The working class and the employing class have nothing in common. There can be no peace so long as hunger and want are found among millions of the working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interests of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

ORDER FORM

		No. of Copies	Total Price
( )	WOBBLY. 6 issues for $1.00 or 4s. (Send shillings direct to WOBBLY.)	_____	_____
( )	INDUSTRIAL WORKER. 52 issues: $3.00; 26: $2.00; 12: $1.00. The INDUSTRIAL WORKER is the official newspaper of the IWW and is published every other week.	_____	_____
( )	The IWW, Its First Fifty Years. Cloth: $3.00; Paper: $2.00. Fred Thompson's book was compiled from IWW records and the accounts of participants. It is a very good introduction to the movement and summary of its early history. . .	_____	_____

Joulu

Vuostuhannet on valonjuhla tää
Ollut inehmolle suuri ilonaihe.
“Täst’ alkain Valotar päivää pidentää!”
Näin sai tunnuksen tää — vuoden vaihe.

Jo ammoin tunnuksen tään vento saa;
Sanoo: “Valonjuhla pahetta NÄIN on!
Täst’ alkain Taivaan Herraa palvelkaa!
HÄN Pimettären ajoi — piilohon!”

Tää viekas valhe sujuu tapoihin —.
Juurtuu kansoihin kuin taudinturma.
Täst’ kultaa kertyy “pyhäin” kassoihin,
Se totuudelle mielii olla — surma!

I. W. W:n Esipuhe

Työväenluokalla ja työnantajaluokalla ei ole mitään yhteistä. Mitään rauhaa ei voi olla niin kauan kun nälkää ja puutetta on olemassa miljoonilla työläisillä, ja niillä harvoilla, jotka muodostavat työnantajain luokan, on kaikki elämän hyvyydet.

Näiden kahden luokan välillä täytyy taistelun jatkua niin kauan kunnes maailman työläiset järjestyvät luokkana, ottavat haltuunsa maan ja tuotantokoneiston ja poistavat palkkajärjestelmän.

Me huomaamme, että teollisuuksien johdon keskittyminen yhä harvempiin ja harvempiin käsiin tekee ammattiuniot kykenemättömiksi pitämään puoliaan työnantajain luokan alati kasvavaa valtaa vastaan. Ammattiuniot pitävät yllä sellaista asiaintilaa, että se katkeroittaa yhden työläisjoukon toista vastaan ja siten auttaa työläisiä tuhoamaan toinen toisensa palkkataistelussa. Tämän lisäksi ammattiuniot auttavat työnantajan luokkaa johtamaan työläisiä harhaluuloon, että työväenluokalla ja työnantajaluokalla on yhteisiä etuja.

Tämä asiaintila voidaan muuttaa ja työväenluokan edut säilyttää ainoastaan siten muodostetun järjestön avulla, että kaikki työläiset yhdellä teollisuusalalla, tai kaikilla aloilla, jos välttämätöntä, lakkaavat työstä milloin lakko tai työnsulku on julistettu jossain järjestön osassa, siten tehden loukkauksen yhtä vastaan loukkaukseksi kaikkia vastaan.

Vanhoillisen mielilauseen: "Tyydyttävä päiväpalkka tyydyttävästä päivätyöstä" asemasta meidän on kirjoitettava sotalippuumme vallankumoukselliset tunnussanat: "Palkkajärjestelmän poistaminen."

Työväenluokan historiallinen tehtävä on kapitalismin kukistaminen. Tuotannon armeija on järjestettävä ei ainoastaan jokapäiväistä taistelua varten kapitalisteja vastaan, vaan myöskin jatkamaan tuotantoa sitten kun kapitalismi on voitettu. Järjestymällä teollisuuksittain me muodostamme uutta yhteiskuntarakennetta vanhan kuoren sisällä.

Kadotettu Vapaus

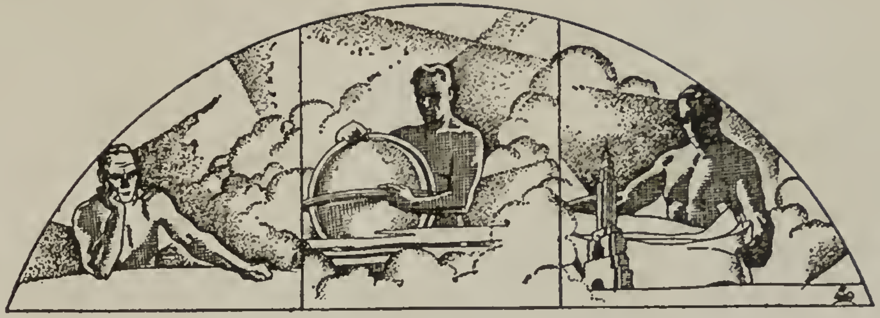
Kirj. MRS. L. M. EATON — Suom. K. K.

Maamme porteilla, katsoen merta vastaan,
Me näemme seisovan Vapauden Patsaan.
Sitä aurinko suutelee pesevät ve'et.
Se merkki taistojen, mi tuskin on alkaneet.
Se voitoista isiemme saamista haastaa.
Lastemme niitä jatkamaan kehoittaa.
Ja laivat, mi etäistä reittiä käyttää,
Sen valossa liikkuu, mi tietä näyttää.

Isäimme silloiset viholliset, papit,
Kirkot, kruunut, narrit ja kardinalit;
Maamme anasti korkeimman lakinsa avulla,
Todistain tekonsa. Eläin sikojen tavalla.
Omat vihollisemme on rotua alhaista;
Oikeusjumalansa sikiön kaltaista.
Ja teollisuusporhot, käyttäin luottoaan;
Meitä jauhavat alas, aina tomuhun maan.

Tämän maan, jonka voitti ja taisteli jänkit,
Meidän lapsilta poijes on riistänyt pankit.
Öljyn, kaivannot, virrat ja purotkin sen,
Käsis samojen on ahnaiden riistäjien.
Maamme lait on niiden tekijäin käskyjä.
Jotka lukevat ahneuden jumalan läksyjä.
Maan rikkauden mittana mahti on kullan,
Jota hallitsee yhtymä Shylokin julman.

On meiltä he työn, kodin, maankin jo vienyt.
Eikä jälellä mitään, millä arvoa lie nyt.
He vääryyttä, kurjuutta luoneet on tummaa.
Yhä saarnaa he ahneuden aatetta kummaa.
Suurliikkeillä menestys ollut on verraton,
Joka suoritettu Vapauspatsaan varjos' on.
Ja sen puolesta ellemme taistele, ja kuole,
Niin ei muuta, kuin valhe, sen merkitys ole.



Joulu Ja Uuskonto

Joulujuhlan historiallinen alkuperä ja tämän juhlan tarkoituksen muuttelu aina sellaiseksi, mikä enimmän hyötyä vallassaolevalle luokalle on tuottanut, on tullut selostettua työväenluokan valistuskirjallisuudessa siksi usein ja seikkaperäisesti, että emme katso tarpeelliseksi saman asian kertaamista. Mainittakoon tässä kuitenkin, että nykyinen ennenkuulumaton taloudellinen lamaannus yli maailman on yhtenä tekijänä siihen, että yhä laajemmat tietämättömät joukot tänäkin jouluna osallistuvat kirkon järjestämiin uskonnollisiin menoihin. Puutteessa elävät miljoonat pohjakerrokseen kuuluvat etsivät lohtua krkollisesta loistosta ja pappien sympaattisesta rauhan ja hyvän tahdon päätöksestä.

TOISELTAPUOLEN keskiluokkalainen aines, joka on kamppaillut tämän lamaannuskauden ajan tavalla tai toisella pysyäkseen liikeuralla, tekee entistä kiihkoisammin kaikkensa että tämän joulujuhlan nimessä voitaisi nälissään olevan perheen ja yksilön viimeinenkin sentti kiskoa jouluostoksiin. Ja kun katselee liike-elämää pienien kylien kauppakaduista suurkaupunkien loistoisiin valtakatuihin asti, täytyy myöntää, että ihmeellinen voima on vielä tuolla vuostuhansia vanhalla uskonnolla ihmiskunnassa, kun noin voidaan sitä vetää senttejänsä tuhlaamaan.

Niin nopeaa kuin yhteiskuntataloudellinen kehitys kohti uutta yhteiskuntajärjestelmää onkin jo nykyaikana, niin paljon, paljon on luokkatietoisella työväestöllä vielä valistus- ja järjestämistyötä tehtävänä, ennenkuin perusteellinen muutos voi tässä järjestelmässä tapahtua. Luokkatietoinen on kuitenkin toivorikas ja empimättä jatkaa työtänsä luokkansa suuressa tehtävässä, sillä hänellä on monta seikkaa nähtävänä tässä järjestelmässä, jotka siten häneen vaikuttavat. Hän ei epäile, eikö kerran toteudu se historiallinen tapaus, että ihmiskunta on yksi suuri kansanvälinen luokaton perhe ja juhlii tätä aikaa vuodessa valonjuhlana siellä missä luonnolliset seikat siihen aihetta antavat.

Uskonnon perusopit lahovat

Tieteen väsymätön edistystyö tulee yhä enemmän vaikuttamaan siihen suuntaan, että uskonnon perusopit menettävät arvonsa ja uskonnollinen humbugi samalla muodostuu yhä kouraantuntuvammaksi vähemmäntietoisellekin kansanainekselle. Sellaiset kuin vapahtajatarinat, kuolleista ylösnousemukset, sielun kuolemattomuus ja taivas sekä helvetti, jotka muodostavat kaikkien sivistysmaissa olevien uskontojen perusopit, joutuvat alkeelliskouluopetuksen kanssa ristiriitaan siinä määrin että ne menettävät taikamaisen tenhonsa. Biologian aakkoset, joita sivistysmaiden alkeelliskouluissa jo opetetaan, sotivat ensiläksystä alkaen uskonnon vankempia perusoppeja vastaan.

Ylemmillä luokilla ja varsinkin jo korkeakouluissa tai niitä vastaavissa kouluissa Europan maissa, opetetaan biologia niin käytännöllisesti, että yksinkertaisimman soluelimistön omaavasta matelijasta, onkimadosta korkeampiin eläinlajeihin asti tutkitaan käytännöllisten operatsionien avulla niiden ominaisuudet ja niihin vaikuttavat luonnonlait synnystä kuolemaan asti. Samoin tehdään kasvikuntaan nähden; kukkasen siitepölystä kasvin kuolemaan asti.

Täten sellainen taru, että korkeampi elimistö edellyttäisi jotain kuolemattomuutta, tai sellaista, joka ei ole tästä maailmasta lähtöisin, kärsii tässä auttamattoman haaksirikon ja kasvavan lapsen ajatusmaailma täyttyy — kehitykselle kiitos — terveillä johtopäätelmillä synnystä ja kuolemasta. — Kuinka nopeasti nouseva sukupolvi täten astuisikaan tieteellisen maailmankatsomuksen avarille maille, ellei niin moni koti olisi vähän, ahtaan ja pimeydessä elävän uskonnon saastuttama ja siten vanhemmat yhdessä kirkon kanssa turmelemassa lastensa tervettä älyä.

Tarina kuolemattomasta sielusta

Tämän joulusaarnamme yhteydessä haluamme liittää sitä enemmän yleensä uskonnollisten harhojen poispyyhkimistä, mitä vähemmän tässä olemme käsitelleet joulun historiallista puolta, kuten alussa mainitsimme. Otaksumme että joululukemisena täten voimme tyydyttää lukijaa tällä kirjoituksella, kuten tarkoituksemme jo alussa oli. Ja että voisimme mahdollisimman täysipainoista tavaraa tarjota, lainaamme tähän sellaisen kuuluisuuden, kuin lakimies Clarence Darrowin mietelmiä näistä asioista. Eräässä jo viisivuotta sitten kirjoittamassaan artikkelissa lausuu hän:

Sielun pysyväisyyden ikuisuutta vastaan olevat todisteet ovat yhtä vahvoja kuin todisteet maan vetovoimasta ja vieläpä paljon ilmeisempiä. Yhtä vakuuttavasti tiedetään sielun katoavan kuolemassa kuin katoaa puu tai kivihiili palaessa. Ellei olisi varmaa, että henkilön kuolemaan päättyy myöskin hänen tuntonsa ja muistonsa, niin silloin melkein kaikki, mitä ihminen pitää totena, olisi vailla todistusta.

Kokeneet tietävät varsin hyvin että jos he haluavat saada henkilön vakuutetuksi jostakin asiasta, on hänet saatava ensin haluamaan, että asian juuri niin tulisi olla. On lukuisia toivoja, monia voimakkaita haluja ja kaipauksia, jotka liittyvät kuolemattomuuden oppeihin, että on melkein mahdotonta saada ketään siihen toivoon, että hän ei olisi kuolematon. Mutta näistä voimakkaista haluista huolimatta on miljoonia ihmisiä jotka ovat täynnä epäilyjä, joista eivä voi päästä erilleen enään milloinkaan, elleivät menetä normaalista ajatuskykyään. Ja eikö olekin parempi katsoa näitä kysymyksiä suoraan kasvoihin ja tutkia josko me sittenkin tuudittelemme mielessämme harhakuvia?

On tavanmukaista puhua "uskosta kuolemattomuuteen." Katsokaamme siis ensin mitä tarkoitetaan sanalla usko. Jos minulle sanotaan, että minun on ensiviikolla matkustettava Pöhlölään; että en saa ottaa ruumista mukaani; että tulen siellä Pöhlölässä olemaan ikuisesti — niin löydänkö yhtään tosiasiaa joka koskisi tätä matkaa —miten matkustan, mikä osa minusta matkustaa, koska lähdetään, mihinkä maahan tullaan ja mikä osa se on tästä aurinkokunnastamme, kuinka minä siellä elelen tai mitään muutakaan tosiasiaa, joka johtaisi minut järjellisesti uskomaan että minä nyt todellakin tulen ensiviikolla tuonne Pöhlölään matkaamaan. Olenko minä koskaan tuntenut ketään, joka on siellä käynyt ja sieltä palannut? — Kas niin, jos minun on tuo matka uskottava, täytyy kai minun toki tietää jotain näistä perin tärkeistä matkaa koskevista seikoista.

Mutta jos minä otan junan Chicagosta puolisen aikaan, joka menee New Yorkiin, minä uskon että pääsen tuohon suurkaupunkiin seuraavana aamuna. Uskon näin siksi, että olen siellä ennenkin käynyt, olen lukenut siitä kaupungista; tunnen useita henkilöitä, jotka ovat siellä olleet ja sieltä jotain kertoneet ja heidän kertomuksensa lyö justiin yhteen kokemuksieni kanssa. Minulla on vielä aikataulukin, jossa tarkalleen osoitetaan kuinka menen ja kauanko matka kestää. Ja kun astun tuohon junaan, uskon että pääsen New Yorkiin, koska minulla on syyt niin uskoa.

Kuolemattomuus todistamaton

Minkämoisten todistusten perusteella meidän siis pitäisi uskoa kuolemattomuuteen? Ei ole mitään todisteita. Käsketään vain luottamaan uskoon ja epäilemättä tämä palvelee tarkoituksen niikauan kuin henkilö uskoo mitä tahansa hänelle sanotaan. Mutta ellei ole todisteita, joille horjumaton usko kuolemattomuudesta rakentuisi, niin tarkastakaamme kysymyksen toista puolta. Ehkä löydämme todisteita siihen, että usko kuolemattomuuteen on harhaluulo.

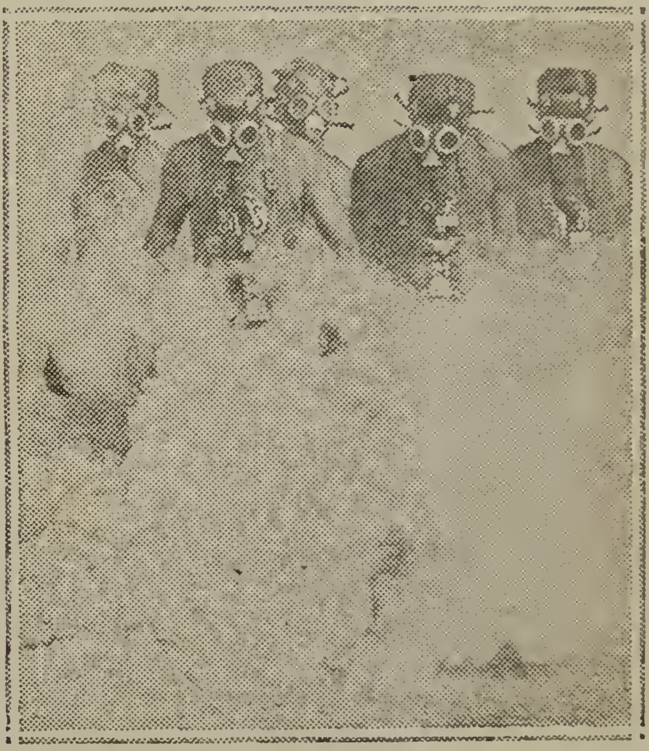
Usko kuolemattomuuteen ilmaisee itsensä kahdessa eri muodossa. Toiseltapuolen on olemassa usko "sielun" kuolemattomuudesta. Tämä joskus tulkitaan tarkoittavan että yksilön henkisyys, tunne tai muisto säilyvät kuoleman jälkeen. — Toiseltapuolen on monia uskonlahkoja, jotka ovat muodostaneet uskon ruumiin "ylösnousemuksesta" — joka on jo kokonaan toista. On tarpeellista tarkastaa näitä molempia uskonmuotoja.

Ajatus elämän jatkumisesta kuoleman jälkeen on sangen vanha. Epäilemättä on sen juuret ihmiskunan lapsuudessa asti. Ja katsoessamme primitiivisen ihmisen tietoisuuteen ei se ole ollutkaan aiheetonta. Hänen kuolleet sukulaisensa ja ystävänsä ilmestyivät hänelle unessa ja mielikuvituksissaankin ja olivat läsnä hänen tunteissaankin niinkauan kunnes hän heidät kokonaan unhoitti. Täten ei kuolleen ruumis aiheuttanut kysymystä haihtumisesta vaan pikemminkin dualistisuudesta — kaksoisolennosta. Ajateltiin ihmisen olevan kaksoisolento, jolla on ruumis ja sielu kaksi eri oliota ja kun ihminen kuolee, vapautuu sielu ruumiista jatkaakseen elämää erillään. Tästä johtuen asetettiin ruokaa ja juomaa kuolleiden haudoille ja ne olivat vielä sellaisia, joita tavattiin käyttää vain sangen pitkillä — pitkillä — matkoilla.

Uudistus uskonnossa

Nykyaikana tämä kaksoisolento-usko vallitsee uudistetussa muodossa. Ruumis puetaan hienosti — riippuen varoista — matkalle lähtiessään, vaikka ruumiillista ravintoa ei enään evääksi panna. Koruja, kuten sormuksia, kaulaketjuja, rintaneuloja, sekä kiillotetusta nahasta tehtyjä vöitä y. m. sovitetaan arkkuun, että kun perille pääsee, on jotain olemista ja saa siis senmukaisen kohtelun. — Mutta alkuperäisellä ihmisellä ei ollut lainkaan käsitystä siitä, että elämällä olisi ollut alkua taikka loppua. Hän oli tässä suhteessa kuin muutkin eläimet.

Nykyaikana jokainen järkevä ihminen tietää, miten elämä alkaa ja elämän alkua tutkittaessa väistämättä joudutaan vetämään johtopäätelmiä siitä, miten elämä päättyy. Jos ihmisellä olisi sielu, täytyisi sen luikerrella jossain sen ajan kun ihmistaimi on vielä perin alkuperäisellä asteella ja ei siis vielä sellainenkaan olio, että siinä olisi eroa samalla kehitysasteella olevan eläimen alun kanssa. Ja sitten vasta, kun tämä alku olisi kehittynyt sille asteelle, jossa tiede voi jo todistaa sen ihmistaimeksi, olisi sielun ollut löydettävä joku hetki, jolloin se olisi puikahtanut tähän alkuun ja alkanut siinä asua.



Suur-New Yorkin tummaihoisia kapulajusseja opetetaan toimimaan esivallan asioilla kaasupilviäkin vastassa

Kaikkien korkeimpien eläinmuotojen olemus saa alkunsa yhdestä solusta. Ja ennenkuin soluyksikön elo voi alkaa kehittyä, täytyy sen tulla hedelmöittävään yhteyteen toisen solun kasssa; sitten tämä solu jakautuu ja kertautuu kunnes se saa lajinsa muodon ja laadun. Eräällä varmalla kehitysajalla se alkaa tehdä lähtöä tähän maailmaan, jota prosessia kutsutaan syntymiseksi.

Ihmisen myöhemmän kehityksen aikana syntyy sen ruumiissa miljoonia soluja, niitä kuolee ja haudataan ja uusia taas syntyy jatkuvasti tilalle ja tätä prosessia jatkuu kunnes aika, sairaudet tai joku katastrofi sattuu ja solut eivät enää voi toimia tehtävissään niin elämä silloin päättyy.

On ilmeistä, että solun hedelmöityminen pitää tapahtua oikeiden suhteiden alaisena, muuten olio ei voisi elää. On turhaa väittää että tällä alkusolulla on sielua. Eräässä mielessä sillä on elo, mutta sekin on satunnaista ja riippuu siitä, että se on jatkuvassa yhteydessä toisen solun kanssa, joka on sopiva toveriksi. Ihmisäiti kantaa ruumiissaan noin kymmenentuhatta yhdenlaista solua ja isä kantaa ruumiissaan lukemattomia biljoonia toisenlaisia soluja. Mutta näistä soluista vain pieni murto-osa aiheuttaa elämää, toiset tavalla tai toisella tuhoutuvat. Jos miehen ja naisen hedelmöitymättömätkin solut omaavat sielun, niin tämän maailman väkiluku on sitten satumaisen paljon suurempi kuin on milloinkaan osattu uneksia, jossa nimittäin sielun omaavat oliot vain ovat ihmisiä.

Sellainen ajatus kuin on usko solujen kuolemattomuuteen ei tietysti tyydytä kenenkään ihmisen ajatusmaailmaa, sillä silloi yhdestä ihmisestä lähtisi vähän liian suurenlainen "perhe" liikkeelle ylösnousemuksen aikana. Suuremmallakin tilalla kuin tämän maapallon pinta-ala tulisi silloin auttamaton tungos.

Vironneen hukkuneen sielu

Tiedetään että lapsi voi elää ja täysin kehittyä äitinsä kohdussa ja sitten syntyessä jonkun tehokkaan täräyksen johdosta syntyykin kuolleena. Menneisyydessä oli yleisenä tapana että täten kuolleet lapset heti haudattiin. Mutta nyt tiedetään monessa tapauksessa käyneen siten, että kun kuolleena syntyneen ruumis oli muuten täysin kehittynyt, asetettiin hikoilua ja sähköistystä aiheuttava kone käymään. Tällöin alkaa ruumis elää ja voidaan pitää elossa pitempiä aikoja näin keinotekoisesti, kunnes sillä on voimaa ilman koneen apua. Tiedetään myös, että usein hukkumistapauksissa tai muissa tapaturmissa ruumiista lähtee elo, ruumis toivottomasti vioittuen, otetaan keinotekoinen virvoitusmenetelmä käytäntöön ja ihminen saadaan elämään kunnes hän taas aikojen kuluttua joko uudessa turmassa tai "luonnollisesti" kuolee. Uskommeko nyt että kuolleena syntyneen lapsen ympärillä jossain hääräili sielu ja pistäytyi lapseen tämän virottua elämään tai hukkuneen sielu vähän lähti vain lomalle ja sai hengitysmoottòrilta kutsun astua takaisin vironneen ruumiisee? — Tämän ratkaisu on jätettävä metafyysikkojen ratkaistavaksi.

Työläisvanhusten Joulu

Johtopäätelmä

Kun me täysin ymmärrämme elämämme suppeuden, sen syntyvät ja haihtuvat ilot ja karttamattomat vaivat ja tuskat, sen tarjoamat nautinnot ja vaatimat uhraukset; kun me täysin olemme vakuutettuja myös siitä, että kaikki naiset ja miehet kohtaavat kerran auttamattomasti elämänsä päätöskohdan, tuhonsa — kun me nämä seikat ymmärrämme, tulisi tämän ymmärryksen tehdä meistä myötätuntoisempia, ystävällisempiä ja huomaavaisempia toisiamme kohtaan.

Tämän mukaisen tunteen tulisi johdattaa naiset ja miehet tekemään parhaansa auttaakseen matkustajatovereitaan tällä elämän tiellä; sen tulisi luoda läheisemmän toveruuden, suuremman yhteisymmärryksen ja syvällisemmän myötätuntoisuuden kanssamatkailijoitamme kohtaan, joiden täytyy, kuten meidänkin, elää vain tavallinen elämä ja kuolla vain tavallinen kuolema.

* * *

Meille palkkatyöläisille soveltuu mainiosti tämänlainen elämän ohje yhteistoiminnoissamme ja pyrkimyksissämme tämän eripuraisuutta ja onnettomuutta itsessään sikiävän järjestelmän poistamiseksi ja uuden elämänjärjestyksen luomiseksi.

Isälleni

Kirj. FEMIA.

Ma aina muistan kiroukset raa'at,
Kun hyvästiä sanoin isällein.
Ne usein vielä kyyneliin mun saavat,
Vaik' kulki tieni kauas erillein.

En unhoittaa voi isä raakuuttasi
Se aina kalvaa herkkää tuntoain.
On surullinen muisto lapsellasi;
Sen muiston sulta perinnöksi sain.

Ma yksin vento läksin lännen maille.
Ja jätin kodin nuorna varahin.
Vaikk' lapsena jäin rakkauttas vaille,
Niin seurasi mua onni parahin.

* * *

Ma havasin ett' ompi kaksi luokkaa.
Ne riistäjiä raakoja on toiset.
Ja ikeen alla riistetyt ne huokaa,
Kun rosvoaa työn tulokset nuo loiset.

Ma heihin yhdyin kun olin orja vainen,
Meill' miljoonilla sama toivo lie.
Ma yksilönä olen heikko nainen,
Mutt' joukkona on varma voiton tie.

On aate sorretuilla ylväs, jalo,
Se veljeyttä orjain rakentaa.
On oppaanamme vapauden valo,
Sen loimu orjain voiton varmentaa!

Ei silloin enää yksi toista sorra,
Vaan yhteistunne kaikki valloittaa!
Ei isäin raakuus lasten mieltä murra,
Vaan vanhempiaan lapset rakastaa!

Erään Äidin Päiväkirjasta

Kirj. **EFFIE.**

(Jatkoa edelliseen numeroon.)

OLEN viettänyt jälleen unettoman yön. Minua kiusasi kaikenlaiset mielikuvat, olen perin huonossa kunnossa, selkääni särkee, kuin olisin sen loukannut, mutta mitään sellaista en tiedä tapahtuneen.

Olen kovin heikkohermoinen. — Kun kuulen tuolta ylhäältä synnytyshuoneista tuskan huutoja, en voi muuta kuin itkeä noiden kärsivien kanssa. — Voi, miksi jumala kirosi naisen Paratiisissa, sanoen, — Kivulla on sinun synnytettävä lapsia ja miehesi on vallitseva sinua. — Hyi, tuota rikollista tuomiota, mikä on naisen osalle langetettu!

* * *

Tänään kävi sairaalan ylilääkäri minua tutkimassa, kun en saanut enää yhtään lepoa. Hän sanoi olevan minussa pahan munuaistulehduksen, seuraus siitä, että olen itkenyt ja valvonut. Lastani en saa imettää ennenkö olen terve, sanoi hän ja vakuutti että vielä paranen, kun muistan olla iloisella mielellä.

Sairaanhoitaja toi pikku enkelini luokseni, kun pyysin nähdä. Olen ikävöinyt niin kovin. — Hänellä näyttää olevan nälkä. — Etsii suuhunsa jotain. — Voi, kun ei äiti saa ruokkia pikku raukkaansa.

Mitähän on tuleva sinun osallesi, jos äiti korjataan pois ja isäkin kiroo syntymääsi. Voi kuinka kurjia ja ymmärtämättömiä me ihmiset vielä olemme, lapsemmekin saavat kärsiä meidän hulluudestamme . . .

* * *

Minut siirrettiin toiseen huoneeseen, ei tänne kuulu synnytys osastolta valitukset. Täällä onkin paljon rauhallisempaa. Sairaan hoitajat ovat minulle hyviä, usein tuovat minulle lämmintä maitoa. Yksi heistä on ruotsalainen, pikku tyttönä sanoi käyneensä Helsinforssissa. On kovin ystävällinen. — Kuljettaa minun pikku tyttöäni ympäri huonetta näytellen, että se on kaunein "baby" mitä hän on koskaan nähnyt.

Tässä huoneessa on neljä vuodetta ja jokaisella lepää äiti, tuossa vierelläni on juutalais-äiti. Ei osaa maan kieltä juuri ollenkaan. — Hän on saanut maitokuumeen, silmät kyynelissä imettää hän lastaan, mutta valitusta ei kuulu. Lapsi vain ärisee, kun ei saa rintaa suuhunsa, rinnat ovat niin äärettömästi paisuneet.

Tuossa vastapäätä, toisella puolen, lepää Kadadan ranskalainen äiti. Hän on oikea ilon luoja. — Kun sairaanhoitaja poistuu huoneesta, nousee hän lattialle tanssiin omia hassuja tanssejaan. Tunnen täällä oikein virkistyväni tuosta ilon pidosta. Neljännellä vuoteella lepää skotlandilainen äiti, hänkin vekkuli vaikka toisinaan valittaakin poltteissaan. Hän ei vielä ole noussut vuoteeltaan lattialle, kuten tuo ranskalainen.

* * *

Tänään on vierailu päivä ja sataa jäistä lunta. Puut ja katukäytävät ovat kuin lasin peittämiä. Varron niin kovin miestäni tänään luokseni, vaikka sairaanhoitaja sanoi että en voi nähdä ketään vierailjoita, kun sairaalan säännöt määrää, että milloin useampi sairas on huoneessa, ei kukaan saa mennä häiritsemään. Sitten vasta kuin itse pystyy kulkemaan, voi mennä erikoiseen vastaanottohuoneeseen tapaamaan ystäviään.

Siitä huolimatta toivon minä että hän tulisi. — Olen niin kovin levoton kaiken sen jälkeen kun hän viimeksi kävi. — Odotan ainakin jotain tietoa. Hän ei voi saapua ennenkö vasta iltasella. Kumpa tämä aika pian menisi.

* * *

Olen tänään paljon virkeämpi. Kirkas aurinkoinen aamu antaa eloa sairaaseenkin. Nukuin viime yönä paremmin kuin pitkään aikaan, näin toki kaikenlaisia unia mutta mieleni on nyt paljon rauhallisempi. Mieheni oli illalla käymässä täällä. Vaikka en voinutkaan häntä tavata, niin on mieleni hyvä kun tiedän että hän ei ole meitä vielä unhoittanut.

Sairaanhoitaja toi kirje lipun, sanoi sen olevan mieheltäni. — Kertoi että hän oli kovin surullinen, kun ei voinut tavata vaimoaan. — Kirjeessään kertoi yhtä ja toista, mutta kaikkein tärkeintä oli minulle se tieto, että hän oli tullut järkiinsä, koska pyyteli anteeksi viime käytöstään ja lupasi ostaa pienet lapsen vaunut siksi kun täältä palaamme. Huoneet hän oli jo löytänyt mielestään sopivat. —

Oi kumpa minä vain pian paranisin ja pääsisin kotiin. Täällä tulee aika niin kovin pitkäksi, kun en saa edes lastani pitää luonani. Kerran päivässä vaan käyvät näyttämässä kuin aarretta, ja aarre se tosiaankin on minulle...

* * *

... Nyt on kulunut monta päivää, enkä ole muistanut päiväkirjaani. Täytyy sentään merkitä joitain kohtia. — Olen nyt jo ollut jalkeillakin jonkun päivän, saan ruokkia lastani. — Hän on jo olevinaan kovin viisas, näyttää kun hymyilisi kun puhun hänelle että pian pääsemme kotiin täältä ja että hänelle on siellä jo vaunukin vartomassa. — Kuuntelee aivan kuin ymmärtäisi, mistä on kysymys. — Voi sua pikku rakkaria...

Täältä ovat toiset äidit, paitsi se juutalaisäiti, päässeet jo kotiin. Hän on kärsinyt hirveitä tuskia. Hänessä täytyi tehdä pieni leikkauskin, lapsi ei voinut enää saada maitoa.

Tähän huoneeseen tuotiin uusia äitejä, toinen on hyvin nuori tyttö — kanadalainen sotaäiti. Sääliksi käy kun itsekin näyttää olevan vielä lapsi. — Tuo toinen on myöskin kanadalainen, naimisissa oleva, mutta nuori aviomies on Ranskassa rintamalla. — Siis molemmat samalla asteella avioliittoon nähden. Kummaltakin on sota riistänyt rakkaimman rinnalta, mutta he ovat siitä — ylpeitä...

Istun vuoteellani ja valmistan pieniä pumpuli tukkoja sairaalan käyttöä varten. Täällä ei saa olla laiskana, jos vain vähänkin pystyy työhön. On tässä yritettävä, eihän tätä hauskuutta ilman saa...

* * *

Tänään olin lääkärin tarkastuksella. Hän sanoi, että huomenna saan lähteä kotiin. — Olen kovin iloinen. — En tiedä miten tämän aikani nyt kuluttaisin. Olen kulkenut useissa sairashuoneissa. — Kyllä tämä on kuin suuri teollisuuslaitos. Tuhansia naisia tänne tulee vuosittain ja tuhansia äitejä ja lapsia täältä lähtee ulos avaraan maailmaan...

Paljon täältä viedään äitejä ja lapsia vuosittain hautaankin. Äsken juuri kuulin, että nainen kuoli synnytyspöydälle. Lapsi jäi eloon. — Olisi mielestäni ollut paljon parempi jos olisi lapsikin saanut seurata äitiä. — Ajatella pientä lasta ilman äitiä...

Eilen eräs äiti tuli mielisairaaksi kun kuuli, että hänen seitsenkuisena syntynyt lapsensa oli kuollut. Ei voinut sitä tyynenä kestää, vaan juoksi pitkin käytävää ja huusi, että murhatkaa minutkin...

Nyt hän on eristetyssä huoneessa, erikoisen vartioinnin alaisena ja kuuluu olevan — raivohulluna.

* * *

Kotona! Niin, kotona jälleen! Tuntuu kuin olisin ollut vuosia poissa. Vaikuttaa kai sekin että olemme nyt uudessa asunnossa. Pienokainenkin jo katselee ympäri, niinkuin tietäsi että nyt ollaan kotona.

En tiedä mistä syrjästä tätä elämää alkaisi järjestää. Miehelläni on täällä tosin ollut naisjärjestäjiä, mutta ei se minua tyydytä. Haluaisin lapsenvuoteen oman sänkyni viereen... tuossa järjestyksessä se ei sovi. Siis täytyy alkaa työhön. — Olen vähän heikko, mutta työssähän voimat varttuu, sanoo sananlasku...

* * *

Joulu 1916. Tämän päivän sanotaan olevan rauhan ja rakkauden päivä. Mutta minulle se ei sitä ole. — Tunnen itseni niin väsyneeksi ja onnettomaksi. — Aamusta alkain olen keitellyt ja valmistellut joulupäivällistä. Kello kaksi oli määrä saapua vieraitakin, koska mieheni niin halusi...

Nyt on tuo joulupäivällinen vartonut tuossa monta tuntia, mutta ei vaan kuulu miestäni, enempää kuin vieraitakaan. Aavistan kyllä tuon viipymisen syyt. — Kapakka ja sen seura viihdyttää. — Eihän siellä muista kotia, vaimoa eikä lasta — eikä joulupäivällisiä...

Näen miehessäni tapahtuneen suuren muutoksen, hän on välinpitämätöin ja käyttäytyy minua kohtaan niin halpamaisesti. — En tiedä olenko minä kaiken tämän ansainnut?

* * *

... Näyttää kuin elämämme kulkisi kohti haaksirikkoa. Olen kauan aavistanut, että jotkut vieraat vaikuttimet ovat astuneet väliimme. — Nyt aavistukseni alkaa näyttäytyä toteen...

Väkijuomat, niin mitäs väkijuomat ilman naisia; nämähän kulkevat käsitysten, siellä missä juodaan siellä huorataankin, sanoo vanha sananlasku.

Täällä on siihen mainio tilaisuus. Ovathan kapakat aina avoinna, niissä naisia, jotka värväävät yksinäisiä miehiä armeijaan. Ei muuta kuin ryyppy suihin ja pusu päälle, niin on mies valmis kirjoittamaan nimensä vaikka minkälaisen murha kontrahdin alle.

Kyllä on halpamaista meininkiä. Pelko ahdistaa, että miehenikin voi tehdä juovuspäissään tuon erehdyksen. Ihailee hänkin sotilaspukua. Onhan niiden ansaan joutunut toisiakin ja vielä sosialististen johtajienkin poikia — kansalaisiamme.

* * *

... Kotiliesi kylmenee. — Ei tunnu viihdytystä kotona, vaikka ennen oli koti kaikkein kallein pyhättö. Miestäni ei tämä viihdytä enää ollenkaan ja raskaaksi tulee minunkin täällä aina olla ja odottaa toista...

En välittäisi mitä kohtalo tuo tullessaan minulle, mutta kun meillä on tuo pieni olento, jonka elämän vastaisuus vaatisi meidän molempien edesvastuuta. — Jumalan kiitos että lapseni on terve ja voimistuu kiitettävän hyvin vaikka minä itse sairaalasta lähtöni jälkeen en ole nähnyt tervettä päivää.

Lääkärini käski olla iloisella mielellä, mutta minun iloni rajoittuu siihen, mitä lapseni minulle tuottaa. Kunpa tervehtyisin niin näyttäisi elämäkin vähän valoisemmalta. Voisin ainakin hoitaa lapseni kunnollisesti — ehkä joskus kaikki kääntyy vielä — hyvinpäin.

* * *

On lauantai-ilta. Olimme kävelyllä mieheni kanssa. Hän lykkäsi pienokaista vaunussa. Kävelin hänen rinnallaan. Mikä yllätys meidät kohtasi?

Vieras nainen astuu mieheni viereen sanoen: "Etkö halua yhtyä armeijaan", samalla ottaen käsivarrestaan kiinni katsomatta minua ollenkaan.

En viivytellyt enempää, vaan sanoa tiuskasin: "Häpeä senkin hävytöin, etkö näe että hänellä on vaimo ja lapsi?" — "Haa, vain yksi lapsi! Täällä on yhtynyt armeijaan sellaisiakin miehiä, joilla on ollut yhdeksän ja kymmenenkin lasta", — väitti hän ja varoitti minua että olen vastaisuudessa varovaisempi, etten joudu sotaoikeuden eteen...

Hyi häpeällistä tekoa ajattelin, ei enää uskalla mennä miehensä kanssa kadulle kävelemään. — Kaiken ilon he hävittävät. Kuinka kauan tällaista saakaan jatkua?

* * *

Olen ollut vuoteessa. — Terveys karttaa minua. Nousin lähteäkseni vähän kävelemään ulos, jos siten virkistyisin, mutta saapui vieraakseni eräs vaimo. — Hän kuiski minulle jotain epämääräisiä juttuja, joita olin jo itsekin kauan aavistellut, mutta luulin ja uskottelin itselleni, ettei kukaan sellaista voisi ajatellakaan. —

Se koski minuun niin, että en jaksanut muuta kuin mennä takaisin vuoteeseen — kyyneleet ainoana lohdutuksena.

Kun mieheni saapui kotiin, ehdotti hän minulle virkistysmatkaa Chicagoon siskoni luo. Tiesin hyvin mistä tuo hyvyys nyt tulee. Koetin salata tunteeni ja näyttää iloiselta, vaikka rintaani ahdisti tuska, ja silmät täyttyi kyynelistä. Sain vihdoin kuitenkin sanotuksi:

"Kumpa tästä vähän voimistuisin, että voisin matkustaa lapsen kanssa." — Hän ärjäsi: "Ei se ole muuta kuin laiskuutta! Nouse ylös ja lähde kävelemään, et sinä muuta tarvitse."

"Voi sinua raakalainen", sain tuskin sanotuksi, kun maailma musteni silmissäni...

En tiennyt mitään, ennenkuin sairaalassa virkosin, kahdeksan vuorokauden kuluttua. Hampaani olin pureksinut pois, mieheni oli saanut niistä muisto esineitä.

Siis taasen käynyt kuoleman portilla. Kumpa voimistuisin. — Lähtisin siskoni luo ja tuskimpa enää takaisin tulisin. — Mieheni silmissä olen minä vain kallis mööpeli, jolla ei ole tunteita ja jonka saa heittää nurkkaan, kun saa uuden paremman...

(Jatketaan.)

Yksin

MINÄ olen yksin.

Mutta niin ei ole aina ollut.

Ihmiselämä on kuin vaellusta suuren ja tuntemattoman erämaan halki. Sen matkan ihminen kulkee vain kerran, aina eteenpäin ponnistelee, ei koskaan pysähdy eikä takaisin palaja. Mitä hän tuota suurta tuntematonta kohti taivaltaessaan on näkemään, kokemaan ja kärsimään joutuva, siitä hänellä ei ole aavistustakaan. Paljon hän kyllä aavistaa, paljon toivoo, ja suuret ovat hänen tulevaisuutensa kultaiset unelmat, mutta oi, ne ovat kuin saippuakuplia jotka eivät kestä vähääkään siinä elämän todellisuuden vinhassa viimassa, mikä tuleva on.

Tulevaisuudestansa ihminen ei tiedä mitään. Ei mitään!

Niin "monivaiheista elon on temmellys" tällä vaivaloisella ja urhoollisuutta kysyvällä erämatkalla, että ei voi koskaan aavistaa mitä seuraava hetki on mukanansa tuova. Läpipääsemättömiltä näyttävät rämeiköt, särmikkäiset louhikot, jylhät äkkijyrkät kalliot, kuilut ja kukkulat.. kaikki ne voittaa täytyy ja jälkeensä jättää.

Mutta ei elontiekään aina okaista ole.

Kulkee se kukkatarhojenkin, leppoisain lehtojen ja vihantain viljakenttienkin kautta. Aina ei tuiverra tuuli, ei mylvi myrsky, eikä taivas elon aina pilvessä piileksi... Paistaa päivyt, kuumottaa kuuhut... lumoovata on luonto kaikki... Tällöin ilostuu ihminen ja onnellinen on, riehahtaa rinta jäinen, sydän synkeäkin heltyy, hehkuu tunteitten tuli...

Mutta murhe musta ja suru suuri masentaa mielen, kahlehtii kielen, silloin... kun on yksin...

* * *

Tässä minä nyt istun, kolkossa kammiossani, orpona ja yksinäisenä... Menneitä minä muistelen, kohtalon kovuutta minä suren... elämän ja kuoleman traagillisuutta minä itken... Muistelen aikaa milloin minulla oli tulevaisuus edessä, tuntematon tulevaisuus, mikä menneisyydeksi muuttunut on... Men.neisyys ja tulevaisuus — mitä niillä on eroa? Menneisyys tietää kaikki, tulevaisuus ei mitään.

Tuuliajolla tulevaisuus on — jos se ei menneisyydeltä mitään kysy, eikä mitään opiksensa ota.

Kun minä nuori olin, ja tulevaisuus ihana sieluni silmiin kaukainen kangasti, paljon, paljon minä silloin elämältä toivoin, ja uskossa unelmiin onnellinen olin... Mutta silloinkin minä olin yksin. Yksin minä elämän korpimatkalle läksin... ja yksin minä olen taas.

Elämän ja kuoleman arvoituksen edessä minä mykistyn... olen avuton aivan... Ja ijäti ikävöin sitä mikä ollut ja mennyt on...

Minä ikävöin ihmistä sellaista,
joka nukkuu jo nurmen alla,
kun orpona ja yksinäisenä
minä harhailen maailmalla.

Minä ikävöin mennyttä ystävää,
joka koskaan ei luokseni palaa.
Sydän-suruni suuret ja katkerat
minä peitän... ja itken salaa...

JOHANNES JUURAKKO.

JÄRJESTYKÄÄ TUOTANNOSSA
TIETO ON VALTAA

Mihin Kapitalismi On Menossa

Yhdysvalloissa ei ole työnantajayhtymillä puute rahasta. Eikä heillä ole aikomus antaa ylijäämien jäädä makaamaan uutta kultaa tuottamatta. Ei mitään sellaista. Vaan heillä on aikomus sijoittaa ei enempää eikä vähempää kuin $70,875,000 kaikkien tuotantolaitoksia ja niiden tuotantotehoa parantavien uusien koneiden ja yleensä uudistusten teettämiseksi. Tämä kaikki kulta tähän tarkoitukseen aiotaan käyttää vuoden aikana, joka alkaa elokuulla v. 1933 ja päättyy elokuulla, v. 1934.

ETTÄ tässä ei ole kysymyksessä yksi yhtiö tai korporatsioni, vaan kuusitoista, samaan unioon, tai jos mielimme nimittää trustiin, kuuluvaa teollisuusyhtymää. Tämä yhtymä, edellämainitussa tarkoituksessa perustettukin, tunnetaan Yhdysvalloissa ja yli koko kapitalistisen maailman nimellä National Committee on Industrial Rehabilitation — suomeksi Kansallinen Komitea Teollisuuksien Tehokkuusasteelle Palauttamiseksi. Emme katso tarpeelliseksi luetella tässä kaikkia näitä kuuttatoista teollisuusyhtymää ja niiden sijoittamaa pääomaa tuosta edellämainitusta kokonaissummasta, mainitsemme vain muutamia suurempia.

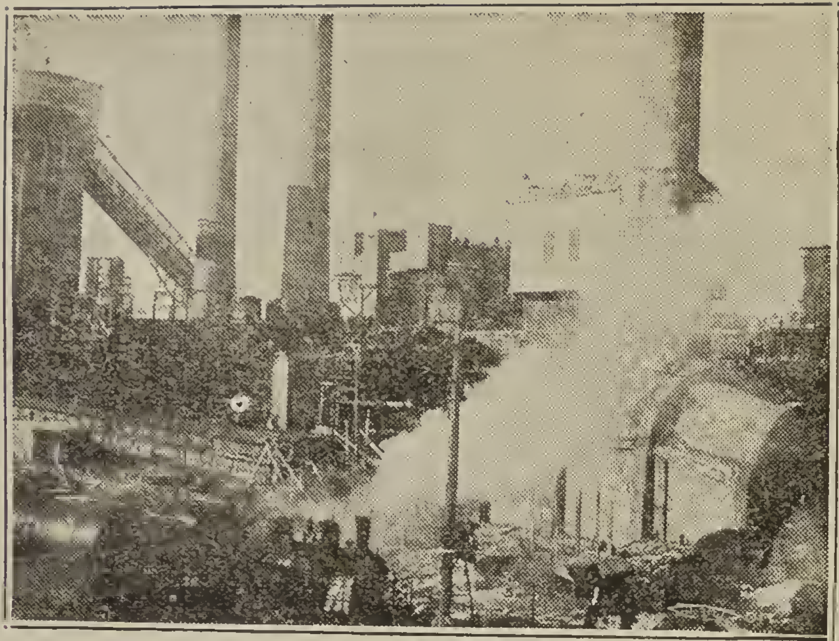
The American Telephone and Telegraph Co. summalla $35,000,000; Standard Oil Co. of N. J., osa Rockefellerin Standard Oil trustista $20,000,000; Pacific Gas & Electric Co. $5,000,000; Great Southern Lumber Co. $1,250,000; Westinghouse Electric & Manufacturing Co. $1,260,000; Bogalusa Paper Co. Bogalusa, La. $1,500,000 ja viimeisenä listalla yli miljoonan dollaria sijoittanut on Contiental Oil Co., summalla $1,500,000. Muut tuotantokoneiston ja yleensä uusien tehokkaampien riistomenetelmien hyväksi pääomiaan sijoittaneet ovat teollisuuden laadun ja yhtymän laajuuden huomioonottaen sijoittaneet alle miljoonan dollarin.

Ja kun otamme huomioon että näissä ei ole U. S. Terästrustia, Gen. Sähkötrustia eikä monia muita jättiläisyhtymiä, jotka tekevät samoin uusien riistomenetelmien kehittämiseksi, niin havaitsemme että todellakin tämän maan suurpääomalla on aikomus vapautua elävästä työvoimasta mahdollisimpaan minimiin. Niin automaattisia koneita ei toki vieläkään suuremmilla summilla voida koskaan kapitalismin aikana yleisesti soveltaa teollisuuksiin, että elävää työvoimaa niiden osana ei kaivattaisi.

Katsomme rohkeasti eteenpäin

Kaikki teollisuusunionismiin luottavat palkkatyöläiset voivat kaikesta tästä huolimatta, tai oikeammin sanoen, tähän kaikkeen katsoen, silmäillä rohkeasti tulevaisuuteen. Teollisuusuionistinen oppi osoittaa tieteellisten tosiasiain valossa että mitä tehokkaammaksi tuotannonvälineet käyvät, sitä suurimerkityksellisemmäksi niiden käynnissäpitämiseksi välttämätön elävä työvoima yhteiskunnallisesti katsoen tulee.

Mitä automaattisempi joku työkone tai konesarja, joista oikeastaan nykyään jo joudummekin puhumaan, on, sitä suurempi yhteiskunnallinen merkitys sen käynnissä



Kuznetskin Teräsmylly Venäjällä. Tälle paikkakunnalle on mennyt useita suomalaisia terästyöläisiä Ohion ja Pa:n alueelta. Myllyssä valmistetaan useammanlaista terästuotetta.

olemiselle välttämättömälle elävälle työvoimalle on kasvanut. Otamme yhden esimerkin. Yhdysvalloissa vielä vv. 1920—1923 tehdä nuljutettiin ammattityövoimalla niitä sähkövalopalloja, joita meidän asumuksissa yleensä nykyäänkin on käytännössä. Myös niitä, jotka palvelevat liikemaailmaa, suuret liikehuonevalot. Mutta jälkimäisenä yllämainittuna vuonna päättyi tuolla alalla tässä maassa ammattityöläisten tarve melkein olemattomiin.

Emme kulje tätä kehitystä yksityiskohdin, sillä se venyttäisi tämän kirjoituksen pitemmäksi, mitä on tarkoituksemme, sanomme vain lyhyesti, miten kone valtasi tuon ammatin ja miten se tänäpäivänä osoittaa paremmin kuin tuhannen agitaattoria mikä sinä työläinen sittenkin tässä maailmassa lopputingassa olet.

Kun Yhdysvalloissa oli sähkövalopallojen ammattityö ylimmillään, kahden johtavan yhtiön alaisena, General Electric Co. Ohiossa ja Houghton Co. New Yorkin valtiossa, oli ammattilaisten luku tällä alalla pyöreissä luvuissa noin vaille 2,000. Tähän on laskettuna vain n. k. lasinpuhaltajat ja heidän apulaisensa, jotka kuuluivat täysinä miehinä samaan unioon. Kun General Electric Co. sai ensimäisen automaattisen koneen sanokaamme osittain yhtiötä tyydyttävälle asteelle, saivat ammattityöläiset lähdön siltä työalalta. Joitakin vähäisiä erikoistilauksia, joita pienuutensa vuoksi ei juuri keksittyä jättiläiskonetta kannattanut asettaa tuottamaan, teetetiin vielä ammattityövoimalla.

Nyt ei enään. Niles, Ohio, on ainoa merkitsevä lasitehdaskaupunki, jossa valmistetaan Yhdysvaltain sähkövalopallot ja ne mitä niitä täältä ulkomaille lähetetään. Tehtaassa on uusi tekniikka lasin sulatuksessa, joka tekee mahdolliseksi viiden koneen tuottamaan noin puolessa vuodessa kyllin paljon sähkövalopalloja, mitä edellä osoitettiin tarvittavan. Yksi kone, automaatti, voi valmistaa 40,000 yleiskokoista — mutta paitsi suuret liikevalot —. sähkövalopalloa kahdeksassa tunnissa. Näitä koneita on yhden uudenlaisen uunin ympärillä viisi, se riittää. Ne käyvät kaikki tuon ihmeuunin suostumuksella 24 tuntia vuorokaudessa — onneksi ettei vuorokaudessa ole useampaa tuntia.

Näinollen saamme viiden automaatin tuotteeksi vuorokaudessa 600,000 sähkövalolamppua. Ja nämä hirviöt käyvät seitsemän vuorokautta viikossa, kolmella vuorolla. Ne tarvitsevat elävää työvoimaa noin kuusisataa henkilöä, jokaisen kolmen työvuoron työläiset laskettuna. Näihin kuuluu suuripalkkaiset insinöörit, kemistit, metallurgistit ja työnjohtajat; kaikki, aina lattian lakaisijaan asti.

Teemme johtopäätöksen

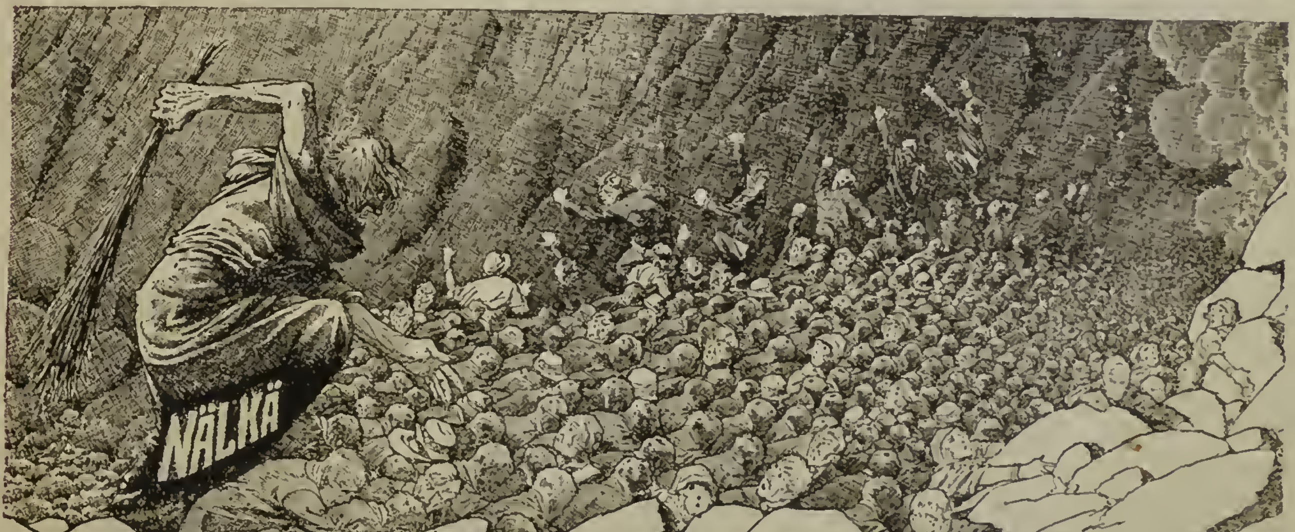
Mitä arvelitte niistä noin 2,000:sta ammattilaisesta, joista suuri enemmistö oli union miehiä? Oliko se yksimielinen joukko työläisiä? Mitä vielä. Ammattiylpeys rikkoi ensiksikin sen. solidariteetin jo työmaalla. Ja union suuripalkkaiset johtavat herrat työsopimuksissa. Sitä oli kankea saada taisteluun ja notkea johtaa mihin johtajat haluaisivat. Kumma se oli. Mutta sillä oli mahtava tuotannollinen voima, jossa piili suuremmoinen yhteiskunnallinen merkitys Yhdysvalloissa. Katsokaas, jos se olisi ollut kuin me i. w. w.-läiset opetamme, yksi kaikkien ja kaikki yhden puolesta, olisi se voinut sanoa: Tulkoon pimeys Yhdysvalloissa, ellei työnantaja suostu vaatimuksiimme!

Miten niin? Sähkövalopallot olivat jo vv. 1920—1923, jotka olivat tämän alan ammattilaisten viimeiset vuodet, siksi suuresta merkityksestä, että ne varsinkin liikemaailmassa ja suurkaupungeissa yöllä merkitsivät samaa kuin aurinko taivaalla päivän aikana koko maassa. Sellainen oli näiden työläisten taloudellinen voima, jos se olisi ollut oikein järjestynyt. Mutta se ei voinut olla oikein järjestynyt, koska se oli vielä ammattitaitoa vaativaa työtä ja siis koko yhteistoiminta sille perustuvaa, eikä kuten teollisuusunion, teollisuudelle.

Mutta nyt. Kuusisataa elävää ihmistä vastaa moninkerroin enemmän kuin nuo kaksituhatta. Miten vastaa? Kun he sanovat, tulkoon pimeys, se tulee, jos takana on yksi suuri unio, I. W. W. Ja kun he taas sanovat tulkoon valkeus, se tulee. Eikä oikeastaan heidän tarvitse pimeyttä tehdäkään, käytimme tässä vain sitä vertauksena. Sillä nyt merkitsee sähkövalopallot jo siksi paljon, koska niitä ei tuoteta suuresti varastoon, että tämä 123 miljoonainen kansa ei tule juttuun ilman niitä. Sen puolisen vuotta, jotka nuo viisi konetta täytyy olla käynnissä, tuottaakseen riittävän määrän valomahdollisuutta kansalle, ovat näiden kuudensadan, henkistä ja ruumiillista työtä tekevän ihmisen kontrolloimia, koska ilman heitä ei valoa tulisi, niin automaattisia kuin koneet ja koko tehdas onkin.

Eikö tämä totea että järjestömme I. W. W. liiton rakentajat jo lähes kolmekymmentä vuotta sitten omasivat kaukonäköisen taloustieteilijän ominaisuudet. He voivat antaa järjestökysymyksestä määritelmän jo silloin, minkä me nyt omin silmin näemme tuotannossa käytännöllisenä tosiasiana. Heidän oli täytynyt kuluttaa paljon sydänyön öljyä, voidakseen analysoida taloustieteen ja historian materialismin totuudet joiden perusteella järjestömääritelmänsä tekivät. Nykyinen ja tuleva sukupolvi voi tässäsuhteessa päästä paljon helpommalla, kun sillä on edessään nämä ilmiöt kouraantuntuvina ja silmin nähtävinä.

Eikö olekin suurta kuulua sellaiseen järjestöön kuin I. W. W. liitto, jolla on noin horjumattomat elävälle elämälle perustuvat periaatteet, vallankumouksellisine päämäärineen. Ei ole toista niin eheää, selväpiirteistä ja tuotantoelämän kehityksen mukaista taloudellista luokkataistelujärjestöä kuin on Maailman Teollisuustyöläisten Liitto. Sen on tulevaisuus, koska se on historiallinen välttämättömyys.



Pirstoutuneet Haaveet

Kirj. **ELLENOORA.**

(Kilpailukirjoitus.)

JOKAISELLA meillä on jotakin menneitä kokemuksia joista voimme kirjoittaa. Tässä kerromme kappaleen erään työläisnaisen elämäkertaa. Alamme sen hänen ollessaan vielä hyvin nuori Suomessa, ollen hän tavallinen piikatyttö.

Alma, jolla nimellä hänet tässä tunnemme, oli piikana Saarelan talossa, jossa myös oli renkinä eräs Kalle Mäki niminen mies.

Elämä tuntui niin ihanalta, tulevaisuus oli haaveiluja pilvilinnoista, joita he rakentelivat kahden iltahämärässä kun päivän työt olivat päättyneet.

— Tiedätkö, Alma, että olen ajatellut että menen Amerikaan ja sitten kun olen saanut työn niin tulet sinäkin sinne. Menemme avioliittoon siellä. Laitamme oman pienen kotimme, jossa saamme vapaasti olla, vain kahden, kuuletko, vain kahden. Silloin ei sinun tarvitse muuta kuin laittaa minulle ruokaa ja pitää huoli vain meidän omasta pienestä kodistamme.

— Minusta se tuntuu aivan uskomattomalta, tuumi Alma, se olisi liian hyvää. Miten olisinkaan silloin onnellinen. Kalle, oletko varma että minä pääsen luoksesi. Minä en luota siihen, minä lähden kanssasi, voinhan minä mennä myös siellä palvelukseen ja yhdessä kootaan rahat että voimme pikemmin saada sen oman kotimme.

* * *

Siitä on kulunut jo kuusi kuukautta kun Alma ja Kalle astuivat Amerikan mantereelle ja pysähtyivät asumaan Ironwoodiin, Michiganiin. Alma on palveluksessa eräässä perheessä ja Kalle on työssä rautakaivoksessa.

— Huomenna on siis se suuri päivä jota olemme odottaneet. — He olivat jo hommanneet itselleen huoneet ja ostaneet jo joitain huonekalujakin. — Tänä iltana jälkeen illallisen menemme taas sinne järjestämään sitä pientä kotiamme.

Nyt on iltahämärä ja näemme Alman ja Kallen yhdessä järjestämässä huoneita jotka he ovat jo vuokranneet. — Kulta, kuinka tunnenkaan itseni onnelliseksi kun tiedän, että sinä olet minun ainoa oma armaani. — Huomenna siis menemme vihille kun pääsen työstä, heti kello neljän jälkeen ja sitten tulemme tänne meidän omaan kotiimme...

Tulisin suudelmin ja syleilyin he erosivat molemmin, toivoen että huominen päivä pian koittaisi. Alma oli jo sanonut itsensä irti palveluspaikastaan, lähtien sieltä päivällisen jälkeen. Hän oli jo valmiina kello kolme, kun Kalle tulee työstä ja he menevät heti papin puheille, kuten siihen aikaan vielä yleensä oli tapana suomenkielistenkin keskuudessa.

* * *

Kello oli vähän yli kolme kun Alma katsoi kelloa, jonka hän oli saanut Kallelta kihlalahjana, kun samassa kuului korvia vihlova kaivospillin puhallus.

Se, mitä tämä puhallus merkitsi, oli kaikille kaivostyöläisille ja heidän perheilleen tuttu. Se merkitsi että jollakin kaivoksella oli tapahtunut tavallista hirvittävämpi työtapaturma...

Ensin ei Alma ottanut uskoakseen että hän kuuli oikein, sillä hänen mielensä johti heti siihen, että Kalle on vielä kaivoksessa ja ... ei... se ei saa olla niin.

Ihmiset juoksivat kilvan kaivosaukolle. — Alma heidän mukanaan — jokaisen kysellessä omaisiaan...

* * *

— Kaivosaukolle oli jo ennättänyt sairasvaunut, lääkäreitä ja sairaanhoitajattareita — Naisia ja lapsia oli kaivosaukon läheisyydessä, epätoivoisena itkien ja kysellen mitä on tapahtunut. — Oliko hänen miehensä tai poikansa sillä tasanteella jossa räjähdys oli tapahtunut?

Viimein päästiin sille tasanteelle, jossa räjähdys oli tapahtunut ja tuotiin loukkaantuneita ja surmaantuneita ylös.

Poliiseilla oli vaikea työ pitää hysteerisessä tilassa olevat naiset pois kaivosaukolta. — Alma oli näiden joukossa.

— Nyt tuotiin yhtä ruumista ylös. — Alma tunsi hänet heti — se oli Kallen murskaantunut ruumis. — Maailma musteni Alman silmissä ja hän päästi sydäntävihlovan tuskanhuudon, kaatuen tiedottomana maahan...

* * *

— Elämä ei suvainnut heille sitä onnea, jota he olivat yhdessä haaveilleet. Olojen julma todellisuus näytti missä on työläisten onni.

Näin sortui monta työläistä kapitaalin uhrialttarille, joiden joukossa Kallekin. Ainoastaan vähän aikaa ennemmin hänelle elämä vielä hymyili ja tulevaisuuskin näytti lupaavalta.

Kuinka monen työläisen haaveet ja unelmat ovatkaan näin murskattu?

Kuinka monet kyyneleet ovat työläisiltä valuneet tämän kapitalistisen järjestelmän riiston ja kurjuuden alaisena.

— — —

Kun Alma heräsi, ei hän heti tiennyt missä hän oli. Hänet oli myös viety sairaalaan, jossa hän oli maannut tiedottomana toista vuorokautta. Ensin ei hän oikein käsittänyt mitä oli tapahtunut ja miksi hän oli siellä. Vasta kun sairaanhoitaja tuli hänen luoksensa, selvisi hänelle kaikki.

Hän ei voinut itkeä eikä hän liioin voinut mitään puhua. Lääkärit epäilivät että hän oli menettänyt järkensä, tai mielensä niin murtunut että ei välitä mistään mitään.

— — —

— Alma laskettiin pois sairaalasta ja meni hän sinne perheeseen ensimmäiseksi jossa Kalle oli ollut sisällä. — Siellä sanottiin että he ovat hommanneet Kallelle jo ruumisarkun ja hautajaiset pidetään.

He pyytivät Almaa olemaan heidän kanssaan, johon hän mielellään suostui, sillä hän ei halunnut mennä takaisin sinne perheeseen missä hän oli ollut palveluksessa.

Alma meni hautaustoimistoon katsomaan että Kallen viimeinen leposija oli hyvin järjestetty. — Kun Kallen arkku avattiin auki, puhkesi Alma katkeraan itkuun —. Hän puheli kuolleelle toverilleen — Näinkö meidän tiemme erosivat. — Häittemme tilalle tulikin hautajaiset. — Oi miksi kohtalo oli meille näin ankara . . .

* * *

Kuka on syyllinen tämänlaiseen työläisten surmaamiseen? Siihen on kaksi vastausta. Työnantajaluokka yrittää teettää työtä niin nopeasti ja vaarallisilla paikoilla kuin voivat siten päästäkseen vähemmillä kustannuksilla ja vähällä työvoimalla.

Työväenluokka puolestaan on syyllinen siksi että se ei järjesty luokkana vaatimaan turvallisempia työpaikkoja ja parempaa palkkaa — riistojärjestelmän lopettamista.

Kun työläiset järjestyvät joukkoina ja vaativat parannuksia olosuhteisiinsa, voivat he estää työskentelyn tämänlaisissa surman loukuissa kuin sekin, jossa Kallekin joutui menettämään henkensä — antamaan elämänsä kapitaalin uhrialttarille.

* * *

Niin paljon oppi Almakin tässä katkerassa kokemuksessaan että on sen jälkeen tuntenut velvollisuudekseen toimia jatkuvasti työväenluokan vapauttamisen puolesta palkkaorjuudesta.

Hän muutti pois Ironwoodista syystä että ei voinut olla siellä kun henkilö, joka oli hänelle kallein maailmassa, ryöstettiin näin julmalla tavalla häneltä pois.

Alma ei ole ainoa joka on menettänyt kalleimman ystävän maailmassa, niitä on miljoonia. Kuinka suuri onkaan niiden leskien ja orpojen lukumäärä, joiden isät ja elämäntoverit ovat joutuneet uhraamaan henkensä riistäjien surmanloukuissa.

Tämänlainen työläisten lahtaus ja murhaaminen tulee jatkumaan kunnes luokkamme järjestyy tuotannossa ja ottaa maailman tuotanto- ja jakokoneiston haltuunsa. Tämä on historian määräämä tehtävä luokallemme.

Jos mielimme muuttaa maailman sellaiseksi kuin sen tulisi olla tuotannollisen kehityksen tasolla ollakseen, on työväenluokan ryhdyttävä järjestämistyöhön ja valmistauduttava sitä päivää varten, jolloin luokkayhteiskunnan kuolinkellot soivat.

Nuoruudelle

Kirj. FEMIA.

Kun muistan aikaa mennyttä,
Nuoruuden kevättä —
Niin rinta riemuun ratkeaa
Ja tunteet vallan saa.
Se on kuin kaunis uni vaan,
Mi muisteloista kumpuaa
Ja viepi aikain taa.

Ma viihdyn mielelläni siel'
Aatoksissain viel' —
Ja muinaista tuot' unelmaa
Mun mielen halajaa.
Ei nuoruuttaan voi unhoittaa.
Sen tahtois elää uudestaan,
Vaikk' unelmissain vaan.

On nuorus elon keväimen
Toiveista kylläinen —
Se haave-linnat rakentaa
Ja lempii, toivoo vaan.
Ei huomis-huolta tunnekkaan,
Eik' pettymyksiin uskokaan.
Se luottaa onneen vaan.

Maailman Ensimäinen Lakko Ja Pyramiidit

Kirj. P.

MAAILMAN ensimmäinen lakkotaistelu käytiin Egyptissä, menneisyydessä jo kolmetuhatta vuotta sitten, Rames III hallituksen aikana. Historia kertoo kivilouhimotyöläisten ensimmäisen kerran lakkoutuneen Niilin rannalla, vastapäätä Thebaa, joka oli senaikaisten faaraoiden hallituskaupunki.

Heidän vaatimuksensa oli enemmän leipää, kalaa, öljyä, olutta ja muita parannuksia kurjiin oloihinsa. Kallion sisällä ja vuoren rinteillä, äärettömässä kuumuudessa, missä he louhivat ja valmistivat kiviä temppelirakennuksille, hautakammioiksi ja pyramideihin, siellä heidän olonsa olivat olleet todella kurjat. Yksinpä juotavastakin oli puute ollut.

Tämän maailman historiallisen ensimmäisen lakon syistä ja tapahtumista ovat selville päässeet arkeologian tutkijat Theban kaupungin kirjurin päiväkirjasta. Kuin myöskin muista työväestöä koskevista puristusseikoista. Esim. miten tarkkaa kirjanpitoa oli pidetty jokaisen työläisen työskentelystä. Päivän työstä pois olemiset ja niiden syyt oli tarkoin merkitty kirjaan. Niinpä heidän lakkoutuminenkin oli merkitty, että he kolmena päivänä olivat laskeneet työkalunsa maahan ja jättäneet työmaansa. Mutta heidät oli lupauksilla houkuteltu aina takasin työhön. Kolmasti he olivat lakanneet työstä ja joka kerta tulleet petetyksi yhdentoista päivän ajalla.

Sitä ei tiedetä varmuudella, voittivatko työläiset tällä ensimmäisellä lakollansa vaatimuksensa. Mutta se seikka käypi selville, että välikädet, työläisille tarpeiden jakajat, olivat itselleen kähveltäneet työläisille tulevista tarvikkeista, minkä vuoksi muun kurjuuden lisäksi alkoi tämä maailman ensimmäinen tunnettu lakko. Myöskin sama päiväkirja kertoo mainitulla työmaalla olleen 43 työnjohtajaa, jokaisella heistä joukko työläisiä komennettavana, aivan meidän aikainen komento jo tuhansia vuosia menneisyydessä.

Mutta noin sata vuotta jälkeenpäin, tiedetään alkaneen toisen lakon samoista syistä, jolloinka työläiset olivat taistelussaan täydellisesti voittajina suoriutuneet. Silloin he olivat suunnitelmallisesti, niin historia kertoo, paljon mahdollista jo järjestyneinä, taistelun alkaneet. Mahdollisesti näitä työselkkauksia on voinut olla useampiakin jo kaukaisessa muinaisuudessa, joista historian kirjoittajat, arkeologian tutkijat eivät ole saaneet mitään selvyyttä. Ainoastaan niiltä ajoilta nämät kaksi lakkotapausta tunnetaan, joista voidaan saada jonkunlainen käsitys jo silloisten työläisten orjuusasemasta. Myöskin se tiedetään, että palkka maksettiin elämän tarveaineissa, koska toista lakkoa oli sovittamassa tuomari, joka määräsi annettavaksi lakkolaisille vissejä tarveaineita, rahaa kun ei vielä tunnettu.

Kaikesta päättäen työtätekevä luokka oli muinoisessa Egyptissä kovan kuorman alla, sillä faaraot tuhlasivat hovielämänsä loisteliaassa haaremielämässään niin paljon, kuin tuhlaamiseen keinoja keksivät. Samoin teki virkakunta ja papisto, he mässäsivät ja porsastelivat. Kaikki oli työtätekevän kansan kustannettava. Nämät virkaherrat varastivat faaraon, hallituksen työläisille lähettämistä muonatarpeista, mikä käypi selville saman kirjurin päiväkirjasta.

Verotaakat olivat raskaat, joita maanviljelijät saivat kaikista tuotteistaan faaraolle suorittaa. Temppelit, hautakammiot (mastabat) ja pyramidit oli tälle joutilasluokalle työläisten ja maanviljelijäin rakennettavat. Niiden rakentamiseen tuhlattiin kansan työ — ylijäämä — mitä faaraoiden ja vallassaolevan luokan loistoisasta elämän ylläpitämisestä kansa pystyi suorittamaan. — Se oli heidän maailmansa rakentamista — samaa, kuin meidän rakentamamme — koneitten maailma. Egyptin orjilta ei loppunut työ — kuten meille on käynyt.

Heitäkin kiusattiin nälällä ja ruoskalla — aivan samalla tavalla kun tämän päivän työläisiäkin. Eri tarkoituksiin vaan, sen aikainen — ylituotanto — käytettiin, jos sitä nimitystä käytämme. Nimittäin se työ, mitä ei elämässä muuten tuhlata voitu, se tuhlattiin näihin ikuisiin kivitemppeleihin, hautakammioihin ja pyramiidien rakentamiseen, joita on paljon kaivettukin näkyviin erämaan santa-aavikolta. Egyptin faaraot ja yläluokka eivät muuhun vielä voineet sijoittaa loisteliaasta elämästään — ylijäämää — työn luomia arvoja kasata, kuten meidän "faaraomme" aikana tavaratuotannossa tehdään. Egyptin faaraot teettivät orjillaan työtä omaa tarvettaan varten — siksi työtäkin riitti, vuosituhansiksi — edellä mainituiden rakentamisessa. Niiden rakentamiseen tuhlattiin kansan ponnistukset. Sen ajan orjain tuskat — ja kärsimykset ovat — hämärän peitossa nykymaailmalta, ainoastaan osa tiedetään. — Meidän maailmamme — pyramiidit — valmistuivat sadoissa vuosissa — Egyptin pyramiideja rakennettiin vuosituhansia.

Kansan painajaisena, uskontona ja vakaumuksena oli, että faaraot ovat auringon jumalan "Banin" poikia, siksi kansa ponnisteli ja teki kaikkensa jumalallisen hallitsijansa tyydytykseksi. Se oli orjuuteen alistumisen pääsyy. Se uskonto maksoi kansalle työtä ja tuskia vuosituhansia. Ja nämä jumalalliset faaraot uskoivat itsekkin itsensä yli-ihmisiksi ja siksi alkoivat huolehtia kuolemansa jälkeisestäkin ikuisesta lepokammiostaan, joka heille viimein muodostui heidän elämänsä päätehtäväksi. Ensin rakennettiin faaraoille mastaboita, joista kehittyi pyramiidi-rakennukset näiden mastabain päälle. Ja viimeksi niin, että jokainen faarao valtaistuimelle päästyään alkoi uuden hallituskaupungin, palatsin ja pyramiidin rakennuttamisen. Rakennuttivatpa lopulla faaraot pyramiidin vaimolleen kuningattarellekin.

Muutakin, sen aikaista ylellisyyttä, mitä maailmasta löysivät faaraot, kasasivat hoviinsa ja koettivat säilyttää omalla suvullaan. Avioliittojakin solmittiin, veli sisarensa, täti veljensä pojan kanssa ja onpa mennyt isä tyttärensäkin kanssa naimisiin. (Tosin se oli yleinen tapa Egyptissä, että sisar ja veli meni naimisiin, mutta ei kukaan muut tyttärensä kanssa, paitsi faarao.) — Myötäjäisiä ei tyttärelle silloin tarvinnut valmistaa — kun isä itse tyttärensä nai. — Rames II niin teki. On tosin selvitetty silläkin tavalla että jumalallinen suku tällaisten avioliittojen kautta säilytetään puhtaana alhaisten verestä, mutta omaisuussuhteet lienevät olleet määrääjinä ja siten se on ollut uskon vahvistamista jumalallisuudestaan kansan keskuudessa.

Nämä edelläkerrotut Egyptin kansan rakentamat pyramiidit, faaraoiden hautakammiot, ovat maailman ihmerakennuksia, vielä tämän päivän ihmisille. On arvoituksena meidän rakennusteknikoille miten ne on voitu rakentaa sen aikaisilla työvälineillä? Se on asia, jota eivät arkkitehtimme voi käsittää. Nykyään tunnetaan 80 pyramiidiä, mutta sitä ei tiedetä, kuinka monta on erämaan povessa vielä? Kerromme yhdestä, päästäksemme jonkunlaiseen käsitykseen, mitä työ on voinut luoda jo viisituhatta vuotta menneisyydessä ja saadaksemme jonkunlaisen käsityksen sen kautta niistä tuskista ja kärsimyksistä, mitä varmasti sen aikaiset orjat ovat saaneet kärsiä vuosituhansia näitä rakentaissaan, joista historian kirjoittajat eivät paljon tiedä. Pari työläisten lakkotapahtumaa tiedetään, pari tuhatta vuotta myöhemmin, mitä pyramiidien rakentamisista tiedetään, joita tuhansia vuosia ennen näitä jättiläispyramiidejä on jo rakennettu.

Kairon edustalla on yksi sellainen, faarao Kheopsin pyramiidi, joka on rakennettu viisi tuhatta vuotta sitten. Se on päällystetty sileäksi hiotulla hohtavan valkoisella kalkkikivellä. Alaosa punaisella hiotulla graniitilla. Sen korkeus on 145 m.

On laskettu että Kheops pyramiidi sisältää niin paljon kiveä, että se riittäisi ympäri Suomen rajojen tehdä aita, kaksi metriä korkea ja puoli metriä paksu. Sadantuhannen miehen kesti sitä rakentaa kaksikymmentä vuotta. Kivijärkäleet ovat vastakkain niin hyvin asetettu, ettei ohkainen paperi sovi liitosten väliin. Tutkijat ovat laskeneet Kheops pyramiidissa olevan sadan ja viidensadan tonnin painoisia kivimöhkäleitä. Se on kaikille hämärän peitossa, miten he näitä kivijärkäleitä kulettivat ja miten he niitä nostelivat ja käsittelivät? Kilometrin pitää ihmisen kävellä maan pinnalla ennenkuin on kävellyt ympäri Kheops pyramiidin. Pyramiidin sisällä ovat monenmoiset huoneet ja galleriat, kaikki kivestä hakattu. Ihmeelliset graniittijärkäleet ovina. Seiniin hakatuita kuvia ja kaiverruksia.

Tällaisen pyramiidivuoren sisälle faaraot haudattiin kiviarkkuineen palsamoituna. Huoneet täytettiin kulta- ja kaikenlaisilla arvoesineillä, mitkä vainajalle olivat olleet rakkaat ja arvokkaat, ne pantiin mukaan ikuiseen lepokammioon. Kaikki tämä maksoi arvaamatointa työtä alamaisille, joista ei ole ollut mitään hyötyä jälkimaailmalle muuta, kuin muistoina ovat säilyneet ja joiden avulla tutkijat, tiedemiehet, ovat voineet kurkistaa tuhansia vuosia taaksepäin muinaisuuteen, sen aikuisten kansojen elämänkirjaan.

Näiden pyramiidien ympärille haudattiin muita ylimyksiä. Arvonsa jälkeen ylimykset pääsivät faaraon pyramiidiä lähelle. Heille rakennettiin kivestä kammioita (mastoboita) arvonsa ja tietysti varallisuutensa mukaan. Jokainen itse lepokammionsa eläessään jo rakennutti. Tätä tällaista rakentamista kesti vuosituhansia, mistä muinaisuuden tutkijat ovat selville päässeet, juuri näiden kivihautojen avulla. Näiden pyramiidien rakentamien, jokaiselle faaraolle näin muodosti oman kaupunkinsa, koska jokainen rakennutti oman pyramiidinsä. Siis monenmoiset tuhlaustavat olivat sen aikuisilla ylimyksillä. Haudat täytettiin tavaroilla, jumalille uhrausmeininki oli yksi hirvittävä tapa mitä harjoitettiin temppeleissä. Jumalana pidettiin eläimiä, joita hoidettiin ja ruokittiin, siinä tuhlattiin äärettömän paljon, temppelin seinien sisällä.

Kaikki tämä kertomamme tapahtui työtätekevän luokan ponnistuksilla, kärsimysten hinnalla — kuten meidänkin päivinämme, meidän — faaraoiden tuhlauksen ja toisenlaisten pyramiidien luominen on ollut meidän, nykyajan orjain tehtävänä. Mutta ei toki niin turhaan meidän rakentamamme — pyramiidit ole menneet, kuin Egyptin orjain oli mennyt. — Meidän koneellista — pyramiidi-maailmamme — jälkeen jääneet voivat käyttää eduksensa. Mutta Egyptin pyramiidit seisovat muistomerkkeinä jälkimaailmalle — arvoituksena, miten ne ovat rakennetut?

Haaveista Todellisuuteen

Kirj. **AUG. JUNTUNEN.**

(Jatkoa edelliseen numeroon.)

BEN omasi voimakkaan luonteen ja oli aina tunteittensa herra. Nytkin hän muisti asemansa, häntä voi odottaa vankila ja työnsä menettäminen, oli hänellä aina mahdollista, olihan hän jo merkattu mies. Ben ei epäillyt, että eikö hän voisi pitää huolta perheestään kuten toisetkin. Hän oli aina oppinut luottamaan itseensä, mutta nyt olivat asiat toisin. Nyt olivat sisaret hänen huolensa alaisia ja hän muisti isänsä viimeiset sanat.

Hän oli tehnyt lupauksen isälleen, että tekee parhaansa työväenluokan hyväksi. Muisti äitinsä ennen aikaisen kuoleman sekä sisarensa häpeällisen pettymyksen. Nämä ovat asioita jotka kannustivat häntä toimintaan. Siinä on myöskin syyt, jotka pakottivat hänen asettamaan pakko-paitaan kaikkein kauneimmat luonnolliset tunteensa. Hän uhrasi ne tuskien punoittamalle luokkataistelun veriselle alttarille.

Benilla oli kaksi tuntia aikaa seurustella Alman kanssa. Hän oli saanut kutsun ylimääräiseen kokoukseen kello yhdeksän. Niinpä hän esitti Almalle että lähdetään hänen asunto taloonsa ja Alma oli valmis lähtemään, otti Benin käsivarresta kiinni ja pyysi hymyillen anteeksi rohkeuttaan.

Kun he saapuivat Benin asunnolle, oli Laura heitä vastassa ja Ben esitteli sisarensa Almalle samalla pyydellen anteeksi, että asuivat vain tällaisessa vaatimattomissa oloissa.

— Ymmärräthän sinä miksikä työläisten täytyy tyytyä vähään ja siihen johtavat syyt? — Alma nyökkäsi ja sanoi ymmärtävänsä.

Laura ilmaisi mielihyvänsä, että Alma oli saapunut heitä tervehtimään ja sanoi. — Olemme kovin kiitollisia kun tulit, olemme täällä niin vieraita ja yksinäisiä. Tuntuu joskus kuin olisimme suljetut tänne yksitoikkoiseen elämäämme ilman minkäänlaista iloa. — Otti Alman käden vielä omaansa ja sanoi, olen todellakin iloinen kun tulit, ja kyyneleet tulvahtivat pitkin poskipäitä.

Almankin silmät täyttyivät kyynelistä ja hän lohdutteli, että ei hänkään ole korkeasta kodista eikä tiensä ole kulkenut ruusujen eikä kukkien keskellä. — Hanssonilta olen kuullut teidän elämänne kovista kohtaloista, ei ole minun tieni sen parempi. — Samanlaiset muistot seuraa minua kuin sinuakin.

Mutta sinun elämäsi ei ole turmeltu kuten minun, sanoi Laura katkerasti. — Sinulla on vielä elämisen mahdollisuus, mutta minulta on riistetty kaikki, ja hän purskahti hillittömään itkuun. — Alma koetti lohduttaa kertomalla oman elämän tarinansa Lauralle.

Isäni ja äitini ovat aina toimineet työväenliikkeen mukana. Sitten tapahtui onnettomuus, jota en voi koskaan unhoittaa. Isäni ajettiin kaivoksessa sellaiseen loukkoon työhön, jossa murskaantui aivan muodottomaksi kun jäi katosta putoavan suuren kiven alle. Enkä myöskään unhoita sitä hetkeä, jolloin äitini tallattiin ratsuhevosen jalkoihin, kun hän oli lakkovahdissa saman kaivoksen ympärillä, missä isänikin murhattiin. — Eikä siinä kaikki. Minun kaksi veljeäni vietiin pakollisesti sotarintamalle maa ilmansodan aikana ja sinne jäivät molemmat, eivätkä koskaan palaakaan.

Alman silmissä leimusi vihan tuli, kertoessaan tuon kohtalokkaan tarinan perheensä hävityksestä ja päättävästi jatkoi hän.— Niin kauan kuin suonissani virtaa punainen veri, teen minä kaikkeni työväenliikkeen eteen, että ei tuollaiset murhenäytelmät saa jatkua loppumattomiin.

Lauran katseessa oli osaaottavainen ilme ja hän sanoi, paljon olet sinäkin kokenut nuoresta iästäsi huolimatta. — Ben oli kuunnellut Alman kertomusta ja huomasi hänessä piilevän voimakkaan luokkavihan ja tietoisuuden. Se ikäänkuin rohkaisi häntäkin luokkataistelun tiellä. Ei hän koskaan ollut kuvitellut, että nuori tyttö voisi olla luokkatietoinen ja noin varma päätöksessään. Hän iloitsi mielessään, että oli tavannut Almassa sellaisen toverin.

Ilta oli kulunut ja Benin täytyi lähteä kokoukseen. Hän ehdotti lähtöä Almalle, että hän ehtii vielä saattamaan Alman hotelliin. Niin he läksivät, hyvästeltyä siskot ensin, jälleen näkemisen toivossa.

Kun Ben oli vienyt Alman hotelliin, kiirehti hän kokoukseen. — Mutta ei voinut aavistaakaan, että häntä seurasi musta varjo, ihmishaamussa, se oli rautatie komppanian salakyttä, joka vainusi jokaista hänen askelettaan.

Pian sen jälkeen sai Ben määräyksen, että häntä ei enää tarvita työhön. Ei minkäänlaista selostusta annettu erottamisen syistä.

Tämä tieto ei ollut Benille mikään yllätys. Hän oli sitä ikäänkuin vartonut jo pitemmän ajan. Se vain oli ihmeellistä, kuinka rautatie komppanian urkkijat olivat päässeet heidän unionsa kokoukseen, josta syystä hänet nyt leimattiin vaaralliseksi toimihenkilöksi, teollisuusunionismin edustajaksi. Siitä syystä hänet asetettiin mustalle listalle ja siitä seurasi työstä erottaminenkin.

Mutta se tieto ei lannistanut Benia. Hän sai uutta intoa toimia tuollaisia mustia voimia vastaan. Se kiihoitti uusiin ponnistuksiin. Nyt oli hävitettävä tuo koti pahanen.

Laura sai kohtalaisen palvelus paikan. — Lili pääsi ruokataloon. — Hän itse meni lähellä olevaan hiilikaivokseen. Sieltä sai työn heti ja oli iloinen, että onni oli mukana. Mutta ei se ollut pitkä aikaista, sillä hänen unionistinen toimintansa alkoi herättää huomiota työn antajissa. — Häntä alettiin pitää silmällä.

Lili oli täyttänyt kuusitoista ikävuotta ja kehittynyt erittäin kauniiksi ja miellyttäväksi tytöksi, hän kävi usein tapaamassa Benia. Sen oli huomannut komppanian pääkirjuri. Hänen sanottiin olevan hyvin rikkaasta perheestä. — Hän oli iskenyt silmänsä tuohon nuoreen tyttöön ja alkoi lähennellä, tuttavuus tarkoituksella Liliä.

Mutta kun Ben oli saanut vihiä, että Donald Jones lähenteli siskoaan, arvasi hän mistä nyt on kysymys.

Eräänä lauantai iltana Jones jo oli saattamassa Liliä kotiin, palvelus paikkaansa. Hän meni Lilin huoneeseen, istui ja veti Lilin syliinsä. — Silloin Lili alkoi nyyhkyttää ja kysyi, rakastatko sinä todella minua, vai petätkö? Minua niin pelottaa, kun en tiedä varmuutta, jätätkö minun niin kuin rikkinäisen kintaan nurkkaan?

Jones koetti lohduttaa tyttöä ja veti lähemmäksi sanoen — kultaseni kuinka voit tuollaista epäilläkään minusta? Rakastanhan sinua. — Olen sen sanonut sinulle jo niin monta kertaa, tiedäthän kuinka loistavan tarjouksen olen sinun tähtesi sivuuttanut.

Mutta miksi sitten viivytät ratkaisua viikosta viikkoon, vaikka tiedät miten asiani ovat. Sinun täytyy tehdä jotain pian, en minä jaksa kestää tällaista epävarmuutta kauempaa, kuuletko!? Ja hän purskahti vallattomaan itkuun. — Jones koetti tyynnyttää hyväilyllään sanoen — Et sinä rakkaani ole ajatellut sitä, että minun asemassani oleva mies ei voi mennä naimisiin palvelustytön kanssa. Minulla on varakas koti ja minun vanhempani eivät voi noin yht'äkkiä siihen suostua. Minun täytyy ottaa aikaa ja hankkia vanhemmiltani lupa, ennenkuin voin avioliittoa ajatellakaan. He voisivat tehdä minut perinnöttömäksi ja se ei ole niinkään vähäinen asia, kun ehkä sinä luulet.

Mutta jos eivät vanhempasi suostuisi avioliittoomme? nyyhki Lili. — Silloin minun täytyisi luopua perinnöstäni, niin ikävää, kun se olisikin.

Lili kietoi kätensä Jonesin kaulaan sanoen, anteeksi rakas että epäilin sinua. Sinä siis rakastat minua.

Mutta nyt astui Ben odottamatta sisään, tapasi Lilin Jonessin syleilystä.

Säikähtyneenä Lili hypähti lattialle ja alkoi hypistellä tuolin karmia, jolla Jones istui, silmät alas luotuina. Hän aavisti veljensä katseesta jotain uhkaavaa.

Halloo, Mrs. Esterholm! huudahti Jones, teeskennellen kohteliaisuutta. Halloo, vastasi Ben, yksitoikkoisena.

Mikä sattuma se on joka teidänlaisen miehen on ajanut tänne palvelustyttöä tapaamaan? Toivoni olisi, että Mr. Jones tästä lähtien hakisi itselleen sopivampaa seuraa ja jättäisi palvelustytöt rauhaan. — Hänen äänensä ilmaisi uhkausta.

Mutta Jones istui alallaan rauhallisena ja vastasi Mr. Estterholm on oikea mies. Puhutte suoraa kieltä. Siitä minä pidän. Totta on että meidän yhteiskunnallinen asemamme ovat suuresti erilaiset ja olisi perin lapsellista kieltää, että en kuuluisi toiseen luokkaan. Olen saanut toisellaisen kasvatuksen. Minulla on toisellaiset tulevaisuuden suunnitelmat, toisenlaiset ihanteet ja tarkoitusperät, kuin teillä. — Minä en välitä siitä, jos löydän mieluiseni tytön, matalasta majasta tai palatsista, minä seuraan rakkauden ääntä ja tunteiden vaatimuksia. — Ja hänen katseensa harhaili sinne tänne kun hän jatkoi. — Minä olen seurannut sydämmeni ääntä löytäessäni tämän pienen miellyttävän sisarenne. Hän on minulle rakkain, mitä tielleni on koskaan ennen sattunut. Joko ymmärrätte miksi olen täällä, Mr. Esterholm? Ja sanon vielä, että Lilistä tulee minun vaimoni ja ymmärtääkseni ei teillä pitäisi olla mitään sitä vastaan.

— Erittäin hyvä! Hyvä, Mr. Jones. Minusta näyttää että teillä olisi tavattoman hyvät edellytykset tulla kuuluisaksi näyttelijäksi ja olempa oikein pahoillani että olette kulkeutunut väärälle uralle. —

Jones kävi levottomaksi ja pureskeli huuliaan, sanomatta sanaakaan. Ben jatkoi. — Olette kenties onnistunut viettelemään siskoni, kuten sitä ennen monen muun nuoren tytön jotka viattomuudessaan eivät ole nähneet teissä mitään pahaa. Olette onnistunut löpertelyillänne heittämään verkon heidän silmilleen! — Teidän oma tuntonne ei siitä kärsi, jos olettekin saattanut tytön koko elämäkseen onnettomaksi! Minä vihaan sellaisia olioita, jotka kyynillisyydessään menevät niin pitkälle!

— Te nähtävästi unhoitatte, kenelle te puhutte Mr. Esterholm!

— Päinvastoin minä tiedän, että puhun yhdelle sellaiselle oliolle joka ei valitse keinoja mennäkseen saastaisen mielikuvituksensa perille. Mikään ei estä minun näkemästä, mihin teidän tarkoituksenne tähtäävät!

Lili lähestyi Benia ja pyyteli rauhoittumaan, mutta Ben työnsi hänet syrjään ja sanoi maltillisesti. — Minulla on sinullekin jotain sanomista sisko rukkani. Ole hiljaa, niin kauan kun olen selvittänyt asiani Mr. Jonessin kanssa. — Ymmärrän että te voitte nyt iloita ja teeskennellä rakastuneisuutta, siskoni herkka uskoisuuden ja tulevan avuttomuutensa vuoksi — nyt kun olette saattanut hänet onnettomaksi! Tietäkää, että nyt olette tavannut miehen, joka ei pelkää rikkauksianne ja arvoanne, vaan kohtelee teitä sellaisella arvolla kun teille todellisuudessa kuuluu!

Olempa utelias näkemään, oletteko huomenna yhtä urhoollinen ja rohkea kuten tänään? sanoi Jones ivallisesti.

Mr. Jones. Minä oletan teissä olevan niin paljon miehekkyyttä, että poistutte tästä huoneesta, ja jätätte sikoni rauhaan. Luvatkaa että ette tule häntä tästä lähtien enää vaivaamaan. Hakekaa arvonne mukaista seuraa!

Jones nousi, pisti kätensä takataskuun ja sanoi röyhkeästi. — En tunne mitään voimaa joka minun täältä ajaa ulos! Teidän käskyjänne ei minun tarvitse noudattaa. On parempi itsellenne jos poistutte ja jätätte koko kylän, ennenkö se on liian myöhäistä!

Ben näki, että Jones veti revolveria taskustaan hyökkäsi hän heti ylivoimaisena ja otti aseen pois sanoen, nyt ei leikitellä tällaisilla kaluilla.

Jonesin käsivarsi loukkaantui ja hieroili sitä hermostuneena. Ben jatkoi. — Teidänlaisenne miehet ovat kaikki yhtä heikkoja. Olisi parempi ettette koskaan erehtyisi koettelemaan voimianne kunnon miesten kanssa. — Otti sitten Jonesia käsivarresta kiinni ja talutti ulko-ovelle sanoen, menkää nyt kauniisti kotiinne, kun on vielä hyvä ilmakin. Mahdollisesti voi tulla pian sadekin. — Jones poistui sanomatta mitään, hampaitaan kiristellen.

Kun Jones oli lähtenyt, sanoi Lili. — Voi, mitä sinä Ben teit! Mitä luulet tästä seuraavan meille kaikille, etupäässä sinulle. — Etkö tiedä, että Jonesia sinun olisi kiittäminen siitä, että ei sinua ole työstä pois pantu. — Sinut olisi jo vangittu ellei Jones olisi käyttänyt vaikutusvaltaansa sinua puollustaessa. — Sinun toimintasi työläisten unioon järjestämisestä, on huomattu jo pitkän aikaa. Lukemattomia ilmiantoja on sinusta tehty komppanialle. Jones vain on saanut sen aikaan, että olet saanut näin kauan tehdä työtä, päätti hän ylen kiihtyneenä.

Ben sanoi rauhallisesti, minä olen tietänyt jo kauan minkälaisissa kirjoissa minä olen. Mutta luuletko, että minä kunnioitan tuollaisia roistoja siitä, että saan olla työssä. Tiedän hyvin senkin, miksi eivät ole minua ennemmin työstä pois ajaneet. Ymmärrän heidän tarkoituksensa. He ovat vartoneet tilaisuutta, vangituttaa minut, ovat vartoneet että esiintyisin varomattomasti ja he saisivat sitten yllytettyä poliisit niskaani. — Ei ole ollenkaan Jonesin ansiota, että olen näin kauan saanut olla työssä. Jos hän on niin sinulle uskottanut, on sekin yksi petollien keino ollut sinulle uskottaa hyvyyttään. — Ja jos hän olisi jotain hyväkseni tehnytkin niin luuletko, että säästäisin selkänahkaani sinun häpeäsi ja onnettomuutesi kustannuksella, ei koskaan! Minä uskallan mennä vaikka vankilaankin asiani puolesta. — On sinne uskaltaneet monet muut, jo ennen minua...

Lili sanoi arkaillen. — Miksi sinä ajattelet Jonesista niin huonoa, kuin sanoit? Eihän hän ole paha mies. — Minulla on syytä epäillä tuollaisia kettuja! Hän omaa täydellisesti porvarillisen moraalin. — Kiihtyen. — Hän on kasvatettu rikollisesti ryöstetyllä omaisuudella. Työläiset ovat uhranneet verensä ja henkensäkin heidän hyväkseen kuten meidänkin isämme ja monet muut, jotka olemme tunteneet. He ovat röyhkeitä ja kohtelevat meitä kuin raakoja eläimiä.

Hillitymmin. — Mitä Jonesiin tulee. Olen kuullut, että hän on turmellut jo monen nuoren tytön elämän ainiaaksi, kuten toisetkin kaltaisensa. — Tätä sanoessaan astui talon emäntä sisään. Ben pyyteli anteeksi kysyen, olette kai kuulleet mitä täällä on tapahtunut?

Olen, vastasi emäntä. Kyllä Ben on oikeassa. — Mutta minä tulin ilmoittamaan, että joku tuntematon mies oli puhelimessa ja kysyi josko Ben Esterholm on täällä. Minä uskon tietäväni, että se oli salapoliisi ja aikoo tulla vangitsemaan sinua, siksi tulin ilmoittamaan sinulle että tiedät mitä teet.

Ben naurahti sanoen. -- Sen minä kyllä arvasinkin. Mutta minun vangitsemiseni ei ole varsin niin helposti tehty kuin on sanottu. Lili laita itsesi matkaan me emme voi jäädä tähän paikkaan kauemmaksi, meidän täytyy jättää koko valtio.

Minä en voi lähteä, vaikeroi Lili. Enkä usko että Jones voisi sinua vangituttaa.

Onneton tyttö! Valmista sitten itsesi ottamaan vastaan kaikki kohtalosi, sanoi Ben katkerana. — Minun täytyy lähteä ja heti, en voi enempää viivytellä. — Voi älä lähde Ben, minä pyydän, älä lähde. — Minä pyydän Jonesilta anteeksi sinun käyttäytymisesi. — Hän kyllä antaa sen anteeksi sinulle.

Älä vaivaudu tekemään sitä tyhmyyttä. Minä kadun kun en vääntänyt päätä irti siltä konnalta.

Ben läksi omaan huoneeseensa ja jonkun minuutin kuluttua palasi tuntemattomana ja pukeutuneena.

Kun hän astui ruoka saliin missä ruokatalon emäntä istui, sanoi Ben, olenko vanhentunut sitten viime näkemisenne?

Emäntä katsoi ihmeessään. Empä tosiaankaan olisi sinua tuntenut, jos et olisi puhunut mitään!

Benista oli tullut vanha, harmaahahpsinen mies, jolla oli pitkä parta ja horjuvat askeleet, silmälasit nenällään hän asteli ruokailu huoneessa. Hän lähetti pojan naapuriin sanoen. — Käske heti Matson tänne autollaan. Sano että Ben lähetti sinut pyytämään, älä sano mitään muuta.

Talon emäntä laittoi vielä Benille kahvia ja pienen eväspaketin lausuen. — Tarvitset nämä iltaseksi. Kyllä sinua nyt on vaikea kenenkään tuntea ja sinunlaista miestä on nyt vaikea löytää, vakuutti hän.

Ben otti raha pussinsa esiin ja sanoi, minä maksan ruokani ja asuntoni nyt, mitä minä olen velkaa? — Emäntä sanoi. — Eihän siitä ole kuin kaksi päivää, sinähän silloin maksoit enemmän kun määräsin, joten ei sinulla ole nyt mitään maksamista, kiitos vain ja onnea yrityksillesi päätti emäntä.

Nyt saapuikin jo Matson autoineen, hän uteli mikä kiire lähtö sinulle nyt on tullut, ethän päivällä puhunut lähdöstäsi mitään?

— No täytyyhän sitä minunkin päästä hellutelemaan näin lauantai-iltana, puhui Ben leikillään. Hän ojensi kätensä emännälle, pyydellen että hän vähän pitäisi siskoaan silmällä ja katsoisi ettei Jones ole ympärillä. — Jos hän jonnekin lähtee täältä, niin koettakaa ottaa selvää mihin päin on mennyt. Antakaa minun tietää asioista silloin tällöin. Hyvästi siis ja kiitos kaikesta, sanoi Ben, astuessaan ulos, vetäen naamion kasvoilleen. Hän kehoitti Matsonia ajamaan lähimmälle rautatien vesisäiliölle. Siitä hän saa kymmenen minuutin kuluttua tavarajunan, sillä matkustan kauas länteen, sanoi Ben.

Nyt luuli hän olevansa turvassa, kun istui kiitävässä junassa joka kuljetti häntä pois näiltä vaarallisilta alueilta.

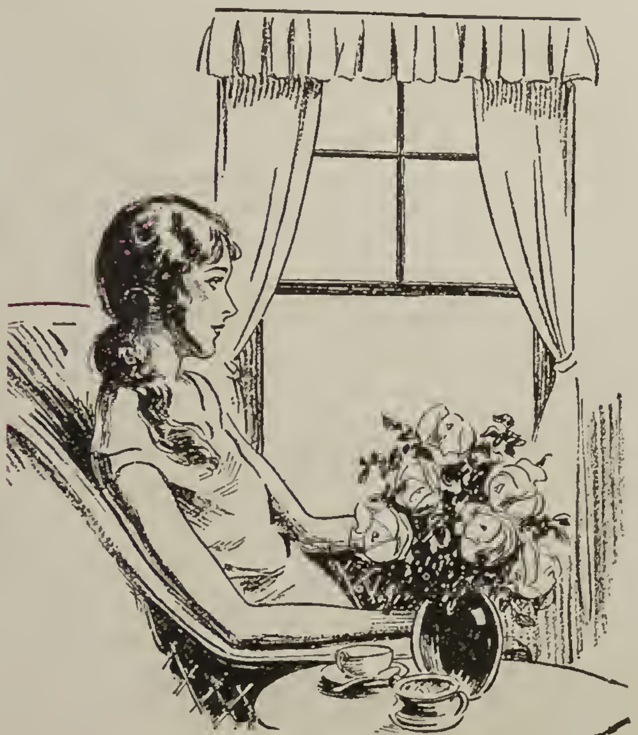
* * *

Oli kulunut jo kuusi kuukautta Benin lähdöstä Almakin oli sillävälin muuttanut kaivoskylään. Hän oli nyt komppanian ruokatalossa keittäjänä. Eräänä iltana saapui Alma tervehtimään Liliä. Kun hän astui Lilin oven taakse kuuli hän sieltä hiljaista laulun hyminää ja eroitti sanat:

Rintani on rauhaton
ja sydäntäni polttaa.
Etkö armas muistakaan?
Et' kultas täällä oottaa?

Oi miks' et' yhtä sanaakaan,
Sa mulle tiedoittanut?
Vai onko toinen rakkaampi,
Sun lempes valloittanut.

Se sydän aina sairas on,
mi kerran haavan saa.
Ei enää muu kuin kuolema,
Voi sitä parantaa. —



Lili istui ikkunan edessä

Alma astui sisään. Lili istui ikkunan edessä selkä oveen päin, eikä huomannut Alman tuloa. Tuoksuvat kukkaset, joita Lili oli käynyt poimimassa maljakkoonsa levittivät tuoksua huoneessa. Alma lähestyi takaa päin Liliä ja sanoi. Hyvää iltaa, laulaja! Mutta sinulla täytyy olla kovin ikävää täällä, kun noin surullisia laulat?

Lili nousi tervehtimään Almaa sanoen, tervetuloa, olipa se oikein hyvä, että tulit. — Minulla todellakin on toisinaan kovin ikävää. Mutta riisu nyt päällysvaatteesi pois ja istu alas, tarjoten keinutuolin Almalle. — Alma katseli Liliä omituisen tarkkaavasti ja kysyi — Oletko sairas, vai miksi olet noin kalvennut ja muuttunut?

Lili ei voinut hillitä tunteitaan, vaan purskahti itkuun ja sanoi, olen sairas enkä tiedä mitä tekisin, kun ei Joneskaan ole antanut mitään tietoa itsestään. — Älä itke lapsi, ei se itkemällä parane, kyllä kaikki menee taasen pian hyvin — koetti Alma lohdutella.

On jo kulunut neljä kuukautta kun Jones läksi täältä ja sanoi menevänsä kotonaan käymään Bostonissa. Eikä ole edes yhtään kertaa kirjoittanut minulle, vaikka tietää miten asiani ovat.

Vai sellainen roisto sekin ja sinä luotitkin vielä tuohon lurjukseen. Kyllä sietäisi joutua edesvastuuseen tuollaisesta petoksesta, kun kehtaakin narrata lapsen ja jättää oman onnensa nojaan, pauhasi nyt Alma, silmät tulta iskien. — Mutta jos Ben saa elää vähänkin aikaa, niin kyllä hän tulee tuolle lurjukselle kostamaan tekojensa mukaan, olen varma siitä.

— Oletko saanut Beniltä mitään tietoa? kysyi Lili. - - Olen, hän kirjoittaa minulle usein ja kyselee sinun vointiasi. Hän tietysti tietää sinun asiasi, miten ne jäivät kun läksi täältä.

Hän tietää. — Aikooko Ben tulla tänne takaisin? — Hän tulee kun saa viikon loman. Ben on nyt Kanadan vuoristossa, rautatie työssä ja aikoo käydä tervehtimässä minua.

— Oi kun minä olen onnetoin. Minä ihan häpeän tavata Beniä. Kun hän lähteissään sanoi minulle minkälainen mies Jones on ja minä en uskonut häntä sellaiseksi ja kieltäydyin lähtemästä Benin mukaan. Hän olisi vienyt minut täältä. — Mutta minä uskoin vielä silloinkin, että Jones aikoo minut korjata avioliittoon. — Ja kun en minä uskonut Benia, vaikka hän niin varmasti vakuutti olevansa oikeassa. Minä en voi tavata Benia. Sinun täytyy sanoa että olen muuttanut jonnekin, etkä tiedä minne, vaikeroi Lili.

Älä hyvä lapsi haudo tuollaisia ajatuksia mielessäsi. Nythän sinä juuri kipeimmin Benia tarvitsetkin Ben on veljesi hän rakastaa sinua ja hän ei vihaa sinua, vaan Jonesia, kyllä hän ymmärtää, että sinä olet vielä lapsi ja tarvitset apua juuri nyt. Ben kyllä pitää huolen sinusta, samoin kuin siskostasikin, Laurasta. Muistathan ettei hän vihannut Lauraakaan, vaan teki parhaansa että kaikki menisi hyvin, lohdutteli Alma yhä.

— Kuule, oletko sinä rakkaussuhteissa Benin kanssa? uteli Lili. — Miksi sitä kysyt? — Minä toivoisin niin mielelläni, että teistä tulisi onnellinen pari . . .

Alma jäi miettimään hetkeksi ja sanoi sitten. — Enpä tiedä varmaan sanoa, minä kyllä pidän paljon Benistä, mutta pelkään, että Ben ei välitä minusta niin paljon että voisin sellaista kuvitella. —

Hän on kyllä minulle hyvä ja kohtelias, mutta kertaakaan ei hän ole maininnut, eikä puhunut sinne päinkään. — Tiedän kyllä, että hän on minusta niin paljon yläpuolella, että ei minun sopisi sellaista toivoakaan.

— Mitä tarkoitat sillä? ?kysyi Lili hämmästyneenä. — Tarkoitan, että Ben on kaikin puolin kunnioitettava mies ja luulen että hän tuntee arvonsa ja siksi toiseksi hän on syventynyt yhteiskunnallisiin kysymyksiin koko sielullaan, että hän tuskin koskaan pysähtyy ajattelemaan avioliittoa. — Hänelle näyttää olevan työväenliikkeen eteenpäin vieminen sydämenasiana, eikä hän hetkeksikään unohda luokkataistelun asiaa.

Talon emäntä astui sisään ja huomasi, että tytöt keskustelivat vakavista asioista. — Taisimpa tulla sopimattomaan aikaan, koska olette noin vakavissanne? — Alma katsahti emäntään ja sanoi, Totta on, että juttelimme vakavista asioista. Mutta tuntuu kuin saisi lohtua sydämelleen, kun saa jonkun kanssa niistä vakavista asioista puhua.

Aivan niin tuumi emäntä. Olipa hyvä, että Lilillä on täällä seuraa. Minulla onkin nyt ikävä uutinen Lilille. — Mitä — mikä uutinen? hätäili Lili ja nousi ottamaan emännän käsivarresta kiinni.

Emäntä istahti ja kertoi, että kun Ben läksi täältä, pyysi hän että pitäisimme silmällä Jonesin toimia ja nyt olemme sen verran saaneet tietää, erään, mieheni entisen työkaverin kautta, että hän on jossain Tyynenmeren rannikolla mennyt avioliittoon erään rikkaan lesken kanssa, joka omistaa suuren puutavaraliikkeen ja sahamyllyn siellä, päätti emäntä päästäen pitkän huokauksen.

Lilin katse näytti sammuvalta ja hän tuijotti eteensä lattiaan, kun samassa alkoi huojua ja huusi, Ben! Ben! Hän olisi kaatunut lattiaan, mutta Alman valpas silmä huomasi sen ajoissa ja hän ehti ottamaan kiinni tuon vapisevan olennon.

He kantoivat hänet vuoteeseen, Lilin kasvot olivat kuoleman kalpeat ja hän huokaili raskaasti. Alma hoiti ja koetti lohdutella, kaikella tarmollaan tuota avutonta tyttö raukkaa.

Hän puheli. Sinäkin olet vain yksi uhri lisää kapitalistiluokan uhrialttarille. — Sinun on kestettävä ja otettava vastaan kaikki tyyneesti, että voit säilyttää ainakin terveytesi. — Sinä olet vielä nuori ja elämässäsi voi tulla vielä päivän paistettakin . . .

Lili ikäänkuin heräsi ja sanoi, nyt minä ymmärrän mitä Ben tarkoitti kun hän minua varoitti luottamasta Jonesiin. — Ben tiesi mitä hän puhui. — Voi minkälaisia konnia miehet saattavat olla. — Joneskin himoitsi vain rikkautta ja mainetta. Ei heillä ole tunteita, kuten meillä köyhillä. — Ei heitä liikuta vaikka me kärsisimme minkälaisia — sielun tuskia — heidän tähtensä, vaikeroi Lili vuoteessa.

Ei lapsi, eivät he välitä siitä mitä me kärsimme. Meidän vain täytyisi heitä palvella nurkumatta kaikessa. He näkevät luokkarajat selvemmin kuin me. He näkevät palvelustytössä vain olion, joka ei ole minkään arvoinen heidän mielestään, sanoi Alma, vakava ilme kasvoillaan.

Emäntä, joka oli seurannut heidän keskustelujaan alkoi nyt poistua ja sanoi Almalle — Sinussa on paljon yhtäläisyyttä ja ajatustapaa Benin kanssa. — Minä toivoisin, että teistä tulisi enemmän kuin tuttavat toisillenne — ja jatkoi — Minun täytyy nyt mennä. Ole sinä Alma Lilin hoitajana täällä kunnes hän vähän voimistuu. Minä keitän kahvia ja tuon tänne, että Lilikin virkistyy.

Emännän lähdettyä, sanoi Lili Almalle. — Voi jos minussakin olisi niin voimakas luonne kuin on sinulla. En minä olisi tällaiseen asemaan joutunutkaan. Mutta minä olin niin lapsellinen, nyt sen vasta huomaan. — Nyt kun en voi sitä enää auttaa . . .

Sinä olit kaunis ja miellyttävä, siksi jouduit tuon pedon kynsiin. Jos olisit ymmärtänyt valita toverin itsellesi omasta luokastasi, ei sinulle näin olisi käynytkään, sillä oman luokkasi jäsenillä on edesvastuuntunne voimakas ja he eivät saata lapsia onnettomaksi.

Kuului koputusta ovelta. Alma riensi aukaisemaan ja sisään astui mies joka näytti olevan siinä kolmenkymmenen iässä. Hän muistutti jotain rikollista kämpläriä tai kapakoitsijaa. Leveä ihrainen naamansa samoin kuin vatsansakin tekivät inhoittavan vaikutuksen.

(Jatketaan.

Huumoria

Salaisuus.

— Heidän kihlauksensa on yhä salaisuus.

— Niinhän ne kaikki sanovat.

Tehtävä ajoissa.

Eräs pappi saarnasi että avioliitto on este itsemurhille. Emme ole varma siitä mutta se on totta, että jälkimäinen estää edellisen.

Pula tuntuu.

Hautaantoimittaja. — Enkö tuntisi pulaa! Tunnempa toki. En ole saanut haudata yhtään sielua puoleen vuoteen.

Vain Visitori.

Filmitähti. — (Esittää viimeksinaineensa miehen pikkutytölleen). — Nyt, darling tässä on sinun uusi isäsi.

Darling. — Oh, ole niin hyvä ja kirjoita jotakin minun visitorikirjaani!

Oli uutuus.

— Vai on Alkulaan lähes sata mailia lähimmästä kaupungista. Teillä ei siis liene usein kosketusta kaupungin kanssa. Käyttekö asemalla aina kun tulee juna?

— Mikä juna?

Savolaista.

Eräs savonukko tavanmukaan Kuopion markkinoilla vaihtoi vanhan luuskan nuorempaan hevoseen. Uusi hepo olikin virkkunlainen. Sitä siis piti kokeilla. Pantiin rillien eteen ja ajamaan kaupungin valtakatua edestakaisin päästä päähän. Viimein tarttuu esivalta suitsipieleen kiinni ja ärähtää:

— Mittee sie eestaa rilloot kesken päevee?

Ukko vastaa. — Kah, ajappa sie yhtäällepäen, suat nähä kuin kaavan pysyt kaapunnissa!

"Eekä tok piisannakkaa," ärähti savolainen kun tuli poltti navetan ja kysyttiin josko samalla paloi kaikki heinätkin.

Maailman lyhin runo.

On yö,
Täi syö!

Kaikki, kaikki.

Isä. — Voisitko sinä taata minun tyttärelleni kaikki mitä hän haluaisi?

Kosija. — Varmasti. Hän on vakuuttanut että ei halua muuta kuin minut.

Kyllä se niin oli.

Mike. — Näkee Patin sillalla aikeissa hypätä virtaan. Tarttuu hänen käteensä ja vetäsee Patin alas kaiteelta. — Miksi sinä Pati sellaiseen aiot ryhtyä, sehän on ihmisen viimeinen teko?

Pati. — Tämä maailma on minulle niin vastenmielinen joka tavalla, että kuolema on nyt kaikkein paras.

Mike. — Odotahan, Pat. Istumme tähän viideksitoista minuutiksi ja keskustelemme tästä asiasta. Jos sinä sitten vielä aiot toteuttaa aikeesi, niin olkoon menneeksi.

Mike ja Pati istuvat ja keskustelevat hartaasti käyttäen vuoroin suuvuoroja. Kun viisitoista minuuttia on kulunut, nähdään molemmat miehet hyppäävän sillalta virtaan.

Merenrannalla.

Mr. Gold saapuu merenrannalle pari viikkoa jälkeen kuin hänen rouvansa.

Gold. — Minä ampuisin kenen tahansa miehen, joka olisi sinua mielistellyt täällä minun poissaollessani.

Rouva. — Niinkö, rakkaani. Siinä tapauksessa olisi pitänyt tuoda mukanasi konekivääri.

Lola on juuri palannut sunnuntaikoulusta, jossa hän oli ensikertaa.

Isä. — Mitä minun pikku tyttöni nyt oppi siellä?

Lola. — Sen, isä, että olen Saatanan lapsi.

Voittaa 5-v. suunnitelman.

Mrs. Bloom. — Me vietämme sukulaistemme kesähuvilalla joka kolmannen kesän.

Mrs. Brown. — Niinkö, mitä te teette niinä välikesinä?

Mrs. Bloom. — Aina ensimmäisenä me juttelemme edellisen kesän kokemuksista ja toisena kesänä me suunnittelemme seuraavan kesän viettoa.

Synninpesu.

Kun vaimo sua alkaa vierastaa,
Se on merkki että sussa on vikaa.
Ala heti sun tapojasi parantaa,
Ja miehuuttas' vakavasti tarkastaa,
Ehkä näet siihen tarttuneen likaa.

Käy silloin kiireesti pesemään,
Joka tahrasen, pienen ja suuren.
Sitten vaimolles' auliisti näyttämään
Kuin lian oot saanut sa lähtemään,
— Niin taas voitte alkaa avion uuden.

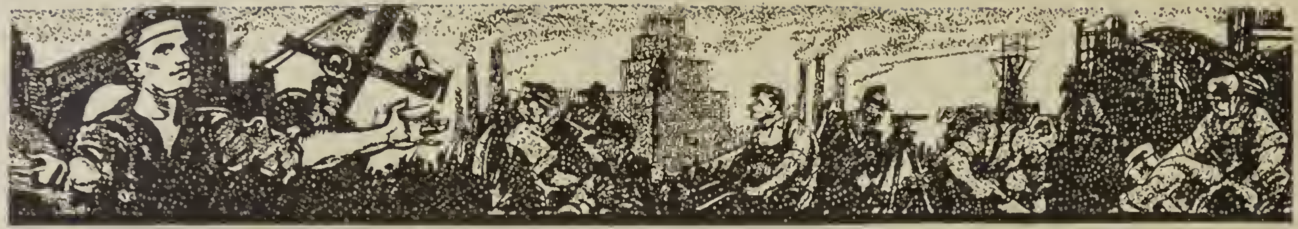
KOKENUT.

Oomme Ruokkineet Teitä Vuostuhannen

Oomme ruokkineet teitä vuostuhannen,
Meitä nälkä viel' tervehtii!
Vaikk' ei ainutta taaleria teillä lie,
Miss' leimaa ei kuolon ois.
Teille antanut ain' parhaamme vain,
Verivillat on vuoteenne.
Veri hinta jos on kaiken rikkauden,
Oi, taivas, täysin maksoimme!

Missä kaivos ilmahan räjähtää,
Teille siellä meit' haudataan!
Missä haaksi se rantahan ajehtii,
Sen uhrit on meistä vaan!
Uhrit meistä siel' missä ahjon lies;
Tehtaissa, miss' kehräämme!
Veri hinta jos on kurjan kultanne,
Oi, taivas, täysin maksoimme!

Chorus:
Oomme ruokkineet teitä vuostuhannen.
Osa meidän se tunnetaan
Siitä asti kun oltiin kahleissa,
Viime lakkohon katkeraan!
Monta surmattu meit', lasta, vaimoakin,
Laki teille kun myöntää sen.
Veri hinta jos on kurjan rikkauden,
Oi, taivas, hyvin maksoimme!



Sirpaleita Maksim Gorjkin 40-Vuotistyöstä

EI MENE suomalaiselle työväestölle valtameren tälläpuolen muuta kuin mielenkiintoista tutustua edes osittain kuuluisan venäläisen proletaarikirjailija Maksim Gorjkin neljäkymmenvuotta kestäneeseen kirjailijatoimeen, jonka kunniaksi tämän vuoden lokakuussa juhlittiin suuremmoisesti Venäjällä. Turvaudumme näin suuressa asiassa vain tunustetun asiantuntijan julkiantamiin tiedotuksiin ja kuvailuihin, koska pidämme sen tavan lukijallekin edullisempana.

Yleisessä valistustyössä ja kirjallisuuden erikoistuntijana pidetty A. V. Lunatsharskij on kirjoittanut laajasti Maksim Gorjkin 40-vuotistyön kunniaksi, josta on tehty lyhenneltyjä suomennoksia, jotka antavat meillekin mahdollisuuden syventyä tähän harvinaiseen asiaan. Ja siis se mitä tässä tulemme lukemaan, on lainausta suomennetusta Lunatsharskij'n työstä. Lähdemme siihen:

Maksim Gorjki näyttelee venäläisen kirjallisuuden historiassa erikoista osaa ei ainoastaan ensiluokkaisten lahjojensa ja lukuisten tuotteidensa taiteellisen muodon ja arvokkaan sisällön puolesta, vaan myöskin proletaarisen kirjallisuuskauden ensimäisenä mahtavana edustajana. — M. Gorjki on proletaarisen kirjallisuuden edelläkävijänä ja alkajana, proletaarisen kirjallisuuden esitaistelijana. Gorjki kohosi proletaariseen luokkatietoisuuteen hitaasti, asteettain. Tulevat kirjailijapolvet tulevat tässä suhteessa olemaan puhtaampia sekä syvemmällä ja laajemmalla luokkatietoisuudella varustettuja. Tällainen rajapyykillä olo on antanut aihetta epäillä, voidaanko Gorjki lukea proletaariseksi kirjailijaksi, mutta ne saavutukset, jotka G:lla on venäläisen kirjallisuuden uuden kauden luomisessa ja ne vaikeudet, jotka G:n oli voitettava, suuresti ylittävät ne kiertämättömät puutteellisuudet ja epäkohdat, jotka G:lla oli nuoruudessaan.

Gorjki on aivan ensimäisen kauden proletaarinen kirjailija, jolloin proletariaatin oli tavattoman vaikea nostaa omaa komennuskuntaansa, varsinkin kaunokirjallisuuden alle. Teorian ja politiikan alalla intelligenssin parhaat edustajat näyttelivät proletariaatille tärkeätä osaa, mutta taidetyön alalla ei sitä ollut. Ja juuri tämän takia voimmekin arvioida, miten suuri arvo oli siihen aikaan sellaisilla Gorjkin tuotteilla kuin "Äiti," "Viholliset," y. m., vaikka tekijä ei ollutkaan lähtöisin tehdasproletariaatin keskuudesta.

Perusvoimia G:n tietoisuudessa jo varhaisessa nuoruudessa olivat romantiikka ja realismi tavattoman omituisissa keskinäisissä suhteissa. G. pyrki onnelliseen elämään, jossa lahjakkaat ihmiset, veljellisissä suhteissa keskenään, loisivat jättiläismäistä kulttuuria, joka olisi sopusoinnussa mahtavan luonnon kanssa. Mutta G. ei aina pitänyt luontoa tällaisen sisältörikkaan onnen ehtona. Ihmistäkin, kaikista hänen heikkouksistaan huolimatta, piti G. korkeana olentona. Tämän on m. m. lausunut erään novellinsa ("Mies") sankari Shebujev seuraavasti: "Ei ole totta, että elämä on synkkä, että siinä on vain haavoja, valituksia, kurjuutta ja kyyneleitä. Siinä on ei ainoastaan alhaista, mutta myöskin sankarillista, ei vain likaista, mutta myöskin valoisaa, tenhovaa ja kaunista. Siinä on kaikki, mitä ihminen haluaa ja ihmisellä on voimaa, luodakseen sen, mitä luonnossa ei ole. Tätä voimaa on tänää vähän — se kehittyy huomenna."

Mutta vaivaloinen tie, jonka Gorjki on kulkenut, osoitti hänelle niin paljon kielteisiä ilmiöitä, että hän helposti tuli tuntemaan kuilun romanttisten toiveittensa ja todellisuuden välillä. Tämän takia tuntee hän tarvetta kertoa intelligenttisille lukijoille elämän karvasta totuutta. Kertomuksessaan "Ihmiset" G. sanoo: "Kertoessani näistä kauhuista tahdon osoittaa teille, missä te elätte ja miten elätte. Kaikki me elämme surkean inhottavaa ja likaista elämää, kas siitä on kysymys."

Gorjki vähitellen muuttui intelligentiksi ja on luonnollista, että tämä yhteiskunnallinen ryhmä kiinnitti hänen huomion puoleensa. Hän suhtaantui tähän kerrostumaan hyvin monimutkaisesti. Alkoi romaanikautensa intelligenttien kanssa, joka oli paljon pitempi kuin kulkuriromaanien kausi. Intelligenssiä jaotellessaan eri ryhmittymiin ja yliarvioidessaankin Gorjki hyvin ymmärsi sen, että se ei ole yhteiskunnallisuuden perusvoimana eikä joudu läheskään kärsimään sellaisesta suuresta kurjuudesta, jossa G. näki ihmiskunnan enemmistön olevan. Ja vähitellen selveni G:lle sen työtätekevän väestönosan — teollisuusproletariaatin — osuus mikä hänelle kauan oli kaukaisena ja epäselvänä. Taiteilijana G. ensi kertaa vakavasti lähestyi proletariaattia näytelmässään "Vihollisct", joka oli kirjoitettu v. 1906. On selvää, että sysäyksenä tämän näytelmän kirjoittamiseen olivat vuoden 1905 tapahtumat.

Viime vuosina ja vuosikymmenenä on Gorjki tehnyt tavattoman paljon työtä. Hänen taiteilijakykynsä ei ole laisinkaan himmennyt. Siitä on todisteena esim. romaani "Djelo Artamonovyih," jossa Gorjki täytti pitempiaikaisen toiveensa — saada kuvatuksi kokonaisen kauppiassuvun historia. Tässä suurteoksessa on niin paljon elävyyttä ja värikkyyttä, jollaiseen täydellisyyteen G. ei missään aikaisemmassa teoksessaan ole päässyt. Vielä keskeneräinen romaaninsa "Neljäkymmentä vuotta" eli "Klim Samginin elämä" tulee olemaan valtavana yhteenvetona Gorjkin elämänkokemuksista ja aivankuin kokoelmana niistä ihmisistä ja aatteista, joita G. on tavattoman monipuolisessa elämässään tavannut.

Taiteilijana on Gorjkilla erikoinen sija venäläisessä kirjallisuudessa ei ainoastaan aihepiirinsä laajuuden ja sosialistisen asenteensa, vaan myöskin välittömien kirjailijalahjojensa puolesta. Lahjakkuutensa puolesta G. kuuluu maailmankirjailijoiden joukkoon. Tämä G:n kyky on selvitettävissä ei ainoastaan monivivahteisen ja mutkikkaan elämänsä rikkailla kokemuksilla, mutta myöskin herkällä havaintokyvyllä ja muistin laajuudella. Taiteilijan luovat hänen psykoloogiset kolme perusominaisuuttaan: havaintokyvyn herkkyys, tarkkuus ja rikkaus, toiseksi — kyky pysyttämään muistissaan ja muokkaamaan saadut havainnot aivankuin säilyttääkseen niitä pitemmät ajat varastossaan, ja kolmanneksi — kyky esittää, ilmaista ne kyllin voimakkaasti ja sytyttävästi. Kaikissa näissä kolmessa suhteessa on Gorjkilla erinomaiset lahjat.

Gorjkin sanonnan värikkyyden ohella, kuvatkoonpa hän sitten elämän kurjuus- ja synkkiä taikka aurinkoisia puolia, on sille ominaista myöskin musikaalisuus. Gorjki on erittäin vaativa sanonnan selvyyden alalla ja hän tavattomalla tarkkuudella voi huomata rytmien puutteen lauseessa. Gorjkin proosa laulaa rytmikkäästi ja juhlallisesti silloin, kun se siirtyy valitteluun ja silloinkin, kun on kyseessä riemu ja ilo. Gorjkin kieli astuu miehekkäin askelin kuin marssissa.

Dramaturgina on Gorjki heikompi kuin romaanien ja novellien tekijänä. Tässä joutuu hän vaille kaunokirjailijan keinoja. Dramaturgiassa hän on määrätyssä suhteessa Tshehovin oppilaana ja vaikkakin näytelmissään asettaa ratkaistavaksi paljon tärkeämpiä probleemeja kuin Tshehov, niin muodollisesti on niissä samaa liiallista vuoropuhelua, mielialojen ja asenteiden vaihtelua. Tästä huolimatta on Gorjkin näytelmissä muutamia erittäin vaikuttavia kohtia ja tyyppejä. Esim. näytelmä "Pohjalla" muodollisista vajavaisuuksistaan huolimatta on tänäkin päivänä aatteellisen, kielellisen ja elintapakuvausten rikkautensa puolesta venäläisten teatterin ja näyttämötaiteen loistonäytelmiä.

Gorjki on paljon kirjoittanut myöskin arvosteluja ja artikkeleita eri kysymyksistä. Parasta, mitä on kirjoitettu Leon Tolstoista, ovat Gorjkin kirjoitukset. Arvokkaita ovat myöskin hänen kuvauksensa Leninistä ja Korolenkosta. — Erittäin arvokkaana lahjana ihmiskunnalle tulee olemaan Gorjkin suunnattoman suuri kirjeenvaihdossa kertynyt kirjemäärä. Mahdotonta lienee saadakaan kokoon kaikkia Gorjkin kirjoittamia kirjeitä, mutta nekin, jotka ovat saatavissa, osoittavat Gorjkin suurta kirjeenvaihtotaitoa. Hän on kirjoittanut suunnattomat määrät kirjeitä ystävilleen, tuttavilleen, tuntemattomille, aivan satunnaisille henkilöille, työläisille, kollektivisteille, puna-armeijalaisille, lapsille. Kaikissa niissä on puhuttu tärkeistä asioista ja joskus voidaan löytää todellisia helmiä, ohjeita eri kysymysten alalla.

Gorjkin työkyky on tavaton. Hän tekee työtä 10—12 tuntia vuorokaudessa, kirjoittaen teoksiaan, kuin myöskin lukien erilaista kirjallisuutta, mikä on tehnyt hänet aikamme yhdeksi sivistyneimmäksi ihmiseksi. Tämän lisäksi hän kirjoittaa vastauksia ja ohjeita eri henkilöiden kirjeiden johdosta, työskentelee lehtien ja kirjojen toimittajana, tarkastaa käsikirjoituksia, joko toimittajan ominaisuudessa, taikka yksinkertaisesti antaa ohjeita ystävilleen, vanhempana toverina. Nykyään hän kirjeenvaihdollaan nuoren kirjailijapolven kanssa on sanomattoman suuri organisatoorinen ja uria aukova merkitys.

Raskas elämä, joka lankesi Gorjkin osalle hänen nuoruudessaan, on jättänyt häneen pysyvät jäljet. Hän on sairas, keuhkonsa ovat heikot, jotka usein asettavat työkykynsä ja elämänsäkin uhkan alaiseksi, mutta luonnostaan Gorjkilla on rautainen organismi. Hänen laiha, korkea ja hieman kumarainen vartalonsa on esikuvana ihmiselimistön joustavuudesta. Kaikki hänen liikkeensä ovat todisteena suuresta sisäisestä voimasta, joka olisi aikaansaanut vieläkin enemmän, elleivät kärsimykset ja rasitukset olisi olleet esteenä. Mutta kaikki nämä on teräksinen organismi voittanut ja antaa toiveita korkeasta iästä, jonka loppukausi ei tule olemaan vähemmän tuottoisa kuin tähänastisetkaan.

Yhteenvedoksi luonnekuvaukselleni Gorjkista lainaamme sanat hänen omasta artikkelistaan, joka on julkaistu kokoelmassa "Shit" ("Kilpi"): "Siihen saakka, kunnes emme opi pitämään ihmistä planeettamme kauneimpana ja ihmeellisimpänä ilmiönä, siihen saakka me emme vapaudu elämämme valheellisuudesta ja alhaisuudesta. Tässä vakaumuksessa minä astuin maailmaan, tässä vakaumuksessa myös lähden ja lähtiessäni alan järkkymättä uskoa, että jolloinkin maailma tunnustaa: pyhin pyhimmistä on ihminen."

Orkesterissa 700 Jäsentä

Äskettäin pitivät Rumanian musikantit viikon kestäneen vuotuisen konvetnsioninsa Bucharestissa. Konventsionin väliaijoilla suorittivat soittajat maailman kuuluksi tulleita konsertti-esityksiä. Eräästä mainitaan amerikalaisissa lehdissä, joka pidettiin pääkaupungin Carolparkissa olevalla Roman Arenalla, johon osallistui kaikkiaan 700 musikanttia. Mainitaan, että tämän jättiläisorkesterin soittaessa sävellystä "Tannhäuser", oli tämän sävellyksen overtyyria soittanut kaksikymmentäkaksi torvea, "jotka olisivat yhtähyvin voineet olla vain yksi torvi, niin yhtäsointuinen oli niiden yhteissoitto."

AJAN KUVA

Kirj. K. KIIKKA.

Yön hiipuvan hiljaisuudes',
Kaikki äänet kun katoaa . . .
Työ, leikki, laulu ja laine
lepotilahan uinahtaa.
Kun unien hellään helmaan
työnraatajat raskahat saa.
Kun aurinko läntehen laskee,
kun taivahan valloittaa.

Mies liikkuvi vielä yksin,
mies kalpea kasvoiltaan;
yön synkeän syvyydessä,
kuni kulkeva kiertäjä maan.
Kenkä rikki, rikki on nuttu.
Suru, nälkä ja nääntymys syö.
Hänen sielunsa sisintä silpoo
epätoivojen tolkuton yö.

Puupenkille puiston vaipuu
hän harmaissa haaveissaan.
Kuin kuumeessa kuiskien hourii
ja valittaa vaivoissaan.
Vuoks' itsensi en sure suinkaan,
eestä lasteni antaisin,
oman henkeni, vaikka jo sillä
elinehtonsa turvaisin.

Mutta työtä en saa ja ne raukat
kuin tuhannet riutuvat muut.
Ne nääntyvät nälkään. Turhaan
ne itkevät suru-suut.
Ja vaimoraukkani rakkain,
mitä heille hän antaa voi . . .
Yön hiljaisuudessa varmaan
epätoivossa vaikeroi.

Eikä hän ole yksi, mi kärsii.
Sama kohtalo tuhannet saa.
Sama nälkä, puute ja pula
jo miljoonat valloittaa.
Eikä toivoa huomisen päivän
samersilmähän köyhän näy.
Yhä kurjaa kurjemmaksi
tila päivä päivältä käy.

Ja kärsivän tumma tuska,
min päivisin jaksoi kantaa . . .
yön pilkkosen pimeydessä
satakertaisen iskunsa antaa . . .
Se saattavi mielehen monta
epätoivoista aatelmaa.
Hän tuokion tuumii . . . Vannoo:
En pelkää mä kuolemaa!

Minä koetan. Kävi kuin kävi.
Oli onni tai onnettomuus,
oman vaimoni, lasteni tähden.
vaikka kuolisin hirsipuus . . .
Hän kulkunsa kohdisti kohti
Yläkaupungin ravintolaa . . .
Siellä kassassa kaunis summa,
jolla lapsille leipää saa.

Kädet ilmaan ja istukaa hiljaa . . .
tai muuten se paukahtaa . . .
Oli hämminki suuri ja naiset
epätoivossa vaikertaa . . .
Käsin ahnahin kaikki hän kahmi
rahat kirstusta kiireissään . . .
Ulos syöksyvi synkkähän yöhön
ikiturvissa tumman sään.

Yksi aatos vain mielessä paloi:—
Omat lapseni kuolla ei saa,
niin kauan kuin kassoissa rahaa,
jolla rikkahat rillastaa.
Ja kotia kohti hän rientää
pikamarssissa kiiruhtain;
joka nurkassa vaanivat vaarat
pois mielestä unhottain.

Mutta tuskinpa tupaansa ehti
riemumielessä miekkonen tää,
kun ovesta esiin jo pistää
salapoliisin ponteva pää.
Hänet tunsivat ravintolassa.
Oli lyhkänen riemunsa hetki . . .
Lyhyt oikeuskuulustelukin . . .
Elinkautinen vankilaretki.

Ja vahvat on vankilan muurit.
Lujat raudat, rangit ja puut.
Sielä riutuvi rikkuen vanki,
kuni riutuvat tuhannet muut.
Nyt hiljaisuudessa halki
yön synkän mun korviini soi
kivimuurien mustien takaa . . .
kun tuomittu vaikeroi . . .

Miten katkera kalkki on juoda,
oi vaimoni, lapseni tää . . .
Olen kahlittu vankilan kauhuun,
jonka loppua ei edes nää.
Ja raiskatun ihmisraukan
viha villi on arvaamaton.
Mutta suurempi sortajaluokan
väkivalta on voittamaton.

Niin, että jos kirpoovi kahle
se viimeinkin haaskaajain,
on jälelle jäänyt raiska
sikisilvottu sielu vain.
Sikisilvottu sielu ja ruumis,
vihan vitsoma vaivoineen,
iesvallan vaanivan haukan
uhri uupunut haavoineen.

* * *

Mutta muurien toisella puolen
vain syveneen synkkyyden yö.
Työnpuute, kuin nälkä ja taudit
yhä yltyen köyhiä lyö.
Kun miljoonat työtönnä harhaa,
pula rintoja riuduttaa
ja tuhannet tuottajaraukat
vankityrmissä tyys'sijan saa.

Siksi juuret jo julmurivallan
tukiliitteissä tutjuaa..
Joka rinnassa riutuvan orjan
viha liekkinä leimuaa . . .
Se suitsuvi sielusta sieluun,
joka povehen polton saa.
Kun luokka tää vaivan ja vainon
jo vihdoinkin kuohahtaa.

Se piiskan ja pistimen valtaa
ja kääntää ne riistäjään,
Aseet, mi vuos'sadat vinkui
yli jokaisen raatajan pään.
Kas silloimpa silpojavalta
ilopäiväsi päättyvä on,
kun kulkevat kumousjoukot
viime voittohon, taistelohon.

Tili tuomiotiiman on läsnä
ja kirjotus seinällä tää:
Alas riisto ja riistäjämahti.
Ylös orjat jo rynnätkää!
Punalippuhun käyköön kiinni
joka raatava nainen ja mies,
joka riistetty, raastettu raukka,
jot'on iskenyt sortajan ies.

Ja silloimpa vankilamuurit,
tukipylväät ja rangit ratkee.
Silloimpa siteet ja piteet,
joka vangilta kahleet katkee.
Silloin on tuomari tuima
läpiraastettu rahvas 'työn.
Ja silloimpa sortajat kohtaa
tuhotuntinsa viimeisen yön!

Yhteiskunnallistuttamista Kohti

IHMINEN tuli 'paratiisista' karkoitetuksi. Paratiisi. Missä? Ei missään erikoisessa paikassa, vaan yleensä troopillisessa ja puolitroopillisessa vyöhykkeessä missä tahansa. Troopillinen alue on aikojen kuluessa muuttunut ja muuttuu edelleenkin. Metsäihminen 'Aatami ja Eeva') eli troopillisessa vyöhykkeessä hyvin yksilöllistä elämää, ollen sangen vähän riippuvainen toisista ihmisistä. Kun perhe ja sukukunta kasvaa, muodostuu siitä heimokunta. Tällaiset määrättyjen patriarkkaisien ympärille nousevat heimokunnat muodostavat kukin oman riippumattoman yhteiskuntansa. Troopillisissa maissa on alkuasukkaiden elämä tämäntapaista vielä tänäkin päivänä.

Elämä ulkopuolella 'paratiisin'.

He eivät käytä paljon aseita tai työkaluja, sillä he eivät niitä välttämättömästi tarvitse ja kuumassa ilmanalassa työskenteleminen on vaikeata. Heidän yhteiskunnallinen kehityksensä on sangen hidasta. Kun ISÄ tai 'keruubit' karkoittavat heimojäseniään ulommaksi 'paratiisista' tai kun kokonaiset heimot asuinpaikkaa muuttavat voimakkaimpien heimojen pakoittamana tai muista syistä, siirtyvät he ajanpitkään lauhkea- ja kylmäilmastoisiin seutuihin.

Näillä alueilla tarvitaan olemassaolontaistelussa suhteellisesti enemmän aseita ja työkaluja eli — tuotannonvälineitä. Tarvitaan parempi asunto, tarvitaan lämmitys, tarvitaan vaatteita.

Elinkeinot — valtiolaitos.

Karjanhoitoa ja maanviljelystä on harjoitettava, sillä luonnonantimet eivät sellaisinaan enää riitä tai sovellu ihmisen ravinnoksi. Läheinen ympäristö ei tarjoa kaikkia tarvikkeita, joten niitä on saatava muualta. Kehittyy kuletus ja vaihto. Ihminen, perhe tai heimo ei enää tule toimeen omin avuin, vaan tulee toisista riippuvaiseksi. Ihmisten lukumäärän lisääntyminen ja rajoitetut alueet johtavat heimo- tai kansakuntien välisiin sotiin. Erinäisille heimokunnille muodostetaan yhteinen puolustus- tai hyökkäyslaitos — valtio. Ihmiset tulevat alati enemmän yhteisöstä riippuvaisiksi. Ihmiselämä kehittyy yhteiskunnallisemmaksi.

Vaihtotalouden kehittyminen.

Vihdoin tullaan siihen pisteeseen, jolloin kaikki tarpeet täytetään vaihdon kautta. Kukaan ei tuota yksinomaan käyttöä varten. Kukaan ei tuota täyttä valmistetta, vaan tekee siitä vain osan. Kehittyy tavattoman laaja työjako. Tämä ulottuu kansakuntien ja mantereittenkin väliin. Se suurenee ja laajenee päivä päivältä ja vuosi vuodelta. Ihminen tulee enemmän ja enemmän yhteisöstä riippuvaksi. Kokonaiset kansakunnatkin tulevat toisistaan riippuvaisiksi. Ne koettavat alistaa toisiaan sotien avulla. Pääoma tunkeutuu lohikäärmeen tavalla ristiin rastiin kaikkiin maihin. Talous pyrkii sulautumaan yhteen, mutta hallitus- ja valtaluokat taistelevat sitä vastaan. Patriotismia lietsotaan kansoihin. Suunnattomia sotakoneistoja sekä armeijoita rakennetaan. Kansakunnat syöstään toistensa kurkkuihin joidenkin riisto- ja vallanhimoisten luokkien pyyteiden täyttämiseksi.

Natsiotismia saarnataan.

Samalla kun ihmisen hyvinvointi edellyttäisi talouskuntien laajentumista; yhä suurempaa työjakoa ja kansojen yhteensulautumista, taistelevat valtiolaitokset sitä vastaan. Tämä kehitysvastainen kamppailu ulottuu myös syvälle kansojen sisimpiin. Kouluissa, kirkoissa ja patriottisissa seuroissa opetetaan ja painostetaan nationalismia vetoamalla ihmisen alkuperäiseen perhe- ja heimovaistoon.

Kuletus yhteiskunnallistuu.

Kaikista poliittisista ponnisteluista huolimatta maailma yhteiskunnallistuu jättiläisaskelin. Se ilmenee kaikkialla ja kaikilla aloilla. Se ei pysähdy ainoastaan varsinaisiin tuotantolaitoksiin, missä se kouraantuntuvammin esiintyy, vaan tunkeutuu kaikille elämänaloille. Kulku ja matkustuskin yhteiskunnallistuvat. Yksityisten tai perhematkailujen sijasta järjestetään matkajoukkueita toisissa, sosiaalisemmissa puitteissa. Amerikasta esim. matkustellaan Europaan ja kaukaiseen itään määrätyissä joukoissa, joilla on omat oppaansa ja tulkkinsa ja joiden matkaohjelma on suunnitelmanmukainen määrätyn tarkoitusperän saavuttamiseksi. Venäjällä esim. melkein kaikki matkailu on tällaista joukkomatkailua, erittäinkin ulkomaalaisten suhteen. Yksityiset autot ja muut yksityiset kulkuvälineet tulevat häviämään pois käytännöstä, sillä niitä ei tarvita, paitsi farmeilla, jotka ovat kehityksestä jäljessä.

Kotielämän yhteiskunnallistuminen.

Asunnotkin yhteiskunnallistuvat. Ensimäinen askel on yksityistalous apartmenttitaloissa. Myöhemmin kenelläkään ei ole huonekaluja eikä omaa asuntoa, sillä paremman asunnon tulee saamaan halvemmalla yhteiskunnallisista taloista ja hotelleista. Syöntikin yhteiskunnallistuu. Ei kodeissa laiteta ruokaa, kun ei koteja olekaan, eikä niitä tarvita. Päinvastoin tehoistuminen ja työjako määrää ne häviämään.

Perheen yhteiskunnallistuminen.

Perhe ja avioliitto tulee myös muuttumaan kehityksen mukana. Yksityisperhe häviää kokonaan pois ja sen tilalle tulevat suuremmat ja erikoistuneet yhteiskunnalliset laitokset. Lapsen kasvattaminen yksityisperheessä tulee maksamaan kymmeniä tuhansia dollareita kun äidin tai lastenhoitajan työpalkka myös lukuunotetaan. Yhteiskunnallisissa laitoksissa voidaan antaa parempi hoito, opetus ja kasvatus pienellä murto-osalla siitä kustannuksesta kutakin lasta kohti. Parempi ja halvempi voittaa traditsionin vihdoin ja kun jokin kehityshaara kerran pääsee alkuun, eivät vitkastelijat voi kilpailla sen kanssa, vaan se tulee nopeasti yleisesti käytäntöön. Täten on käynyt esim. kouluille.

Vapaan tahdon avioliitto.

Avioliitto. Se pyhä laitos, jonka takia niin paljon kyyneleitä ja vertakin on vuodatettu. Avioliiton tarkoitus on uuden sukupolven kasvattaminen. Tulevaisuuden avioliitto tulee olemaan kokonaan kummankin sukupuolen vapaalle tahdolle perustuva. Mutta lasten synnyttäminen tulee olemaan yhteiskunnan kontrollin alainen. Kaikilla ei tule olemaan oikeutta lasten siittämiseen ja synnyttämiseen. Siihen tarvitaan 'lupakirja'. Sivumennen mainittakoon että Meksikossa jo on tekeillä tällainen laki. Kun tuotanto kehittyy suunnitelmanmukaiseksi yhdellä alalla täytyy samoin tapahtua toisellakin alalla. Täten uusien sukupolvien synnyttäminenkin kehittyy suunnitelmanmukaiseksi.

Sairashoito — huvitus.

Sairaalat ja teatterit ovat tällaisia yhteiskunnallisia laitoksia, jotka poistavat kodin ja yksilöllisen kodin tarvetta. Kirjastot saattavat kirjojen oston tarpeettomaksi. Kirjoja ei myös kannata jokaista yksilöä varten tuottaa, sillä se olisi suunnatonta tuhlausta.

Rikollisuus — rankaisulaitokset.

Rankaisulaitokset häviävät tilalle kehittyen tieteelliset parannuslaitokset. Rikollisuus vähitellen häviää sikäli kun sen syyt poistuvat ja kansat valistuvat. Varkautta ei voi olla silloin kun kenelläkään yksilöllä ei ole omaisuutta, vaan yhteiskunta antaa kullekin tarpeensa mukaan. Murhat ja muut rikokset häviävät silloin kun ihmiset voivat luonnollisella tavalla tyydyttää luonnolliset vaistonsa ja kun heissä on itsekontrolli korkealle kehittynyt.

Kuri — oikeuslaitokset.

Mielisairaat ainoastaan voisivat moraalisia rikoksia tehdä, mutta ihmiset tutkitaan jo kouluissa ja sittemmin aika-ajoittain, joten kaikki sairaat toimitetaan hyvissä ajoissa parannuslaitokseen tai eristettyyn hoitoon. Valtiolliset oikeuslaitokset häviävät. Työväen uniot tulevat huolehtimaan oikeuden jaosta ja keskinäisestä kurista. Kaikki hallinto tulee työväen unioiden kautta.

Palkan yhteiskunnallistuminen.

Palkkajärjestelmä yhteiskunnallistuu. Se prosessi on käynnissä tänäkin päivänä, joskaan ei nopeasti kuin suotavaa olisi. Miten palkka voi yhteiskunnallistua? Työläisen muussa kuin suoranaisen palkan muodossa saama suhteellinen korvaus uurastuksestaan suurenee, jolloin palkan merkitys hänen ylläpitämisekseen suhteellisesti pienenee. Esimerkiksi? Koulut kasvattavat lapset, muut yhteiskunnalliset laitokset tai seurat suorittavat kasvatusta loma-aikoina, järjestävät huvipuolen, varustavat vaatteetkin. Kirjastoista saa kirjat. Puistoissa ja uintipaikoilla tarjotaan yhteiskunnallisten laitosten käyttöoikeutta joko vapaasti tai puolella maksulla. Teiden ja siltojen käyttö tulee vapaaksi. Sairaus- ja loukkaantumistapauksissa viedään sairaalaan. Työttömille annetaan avustusta, samoin vanhoille ja kyvyttömille.

Raha poistetaan vihdoin tykkänään.

Yksinomaan palkkaan luottaminen merkitsee yksityistaloutta. Silloin täytyy ihmisen säästääkin tai muuten varustautua sairauden, loukkaantumisen, työttömyyden ja vanhuuden varalta. Se ei ole enää mahdollista, josta syystä palkan täytyy muuttua yhä enemmän yhteiskunnalliseksi, jolloin rahankin merkitys kansantaloudessa vähenee. Nykyään ollaan vielä varsin alhaisella kehitysasteella tässä suhteessa, mutta kehityssuunta on ilmeinen. Vihdoin tullaan sille kehitystasolle, jolloin palkkaa rahan muodossa maksetaan ainoastaan vähäinen prosentti ja rahatalouden romahtaessa se loppuu tykkänään. Tällä tavalla kaikki taloudellisessa elämässä tarvittavat laitokset kehittyvät vähitellen, joka on taloudellisen vallankumouksen prosessi.

Yhteiskunnallinen apu välttämätöntä.

Työttömistä ja vanhuudenkyvyttömistä huolehtiminen erittäinkin Amerikassa on nykyään yleisen kerjuun varassa. Kerjuu onkin ensimäinen yhteiskunnallisen huollon muoto. Yksilöllinen kerjuu, mierontie, on sen alkeellisin muoto. Yhteiskunnallisuutta kohti kulkiessa, muuttuu apukin järjestelmällisemmäksi ja suunnitelmanmukaisemmaksi. Työttömyyttä tulee löytymään läpi koko kapitalistisen aikakauden. Löytyy lukuisia mahdollisuuksia, joiden kautta ihminen voi joutua ansiokyvyttömäksi tai turvaa vaille. Yhteiskunnallinen apu samoin tulee olemaan välttämätön koko kapitalistisen aikakauden. Löytyy lukuisia mahdollisuuksia, joiden kautta ihminen voi joutua ansiokyvyttömäksi tai turvaa vaille. Yhteiskunnallinen apu on silloin välttämätöntä — jo tänään ja huomenna.

Porvarilliset talouskäsitteet.

Poroporvarillisen käsityskannan mukaan pitäisi jokaisen yksilön ja 'huushollin' hoitaa asiansa niin että voisi tulla toimeen ominavuin omilla ansioillaan, palkalla ja säästöillä. Muinaisen ammattiunionistisen käsitteen mukaan myös työläiselle kuului sellainen palkka että perhe sillä tuli toimeen ja voi säästää sadepäivän varalle. Tällaiset patavanhoilliset säästämisteoriat ovat sittemmin kuitenkin romahtaneet maahan, kun on tultu käytännöllisesti huomaamaan että työläinen voi joutua työttömäksi tai työkyvyttömäksi usean vuoden ajaksi — ja koko elinajakseenkin. Se ei pysähdy kuitenkaan tähän, vaan joutuu ihminen avuntarpeeseen muistakin syistä millä hetkellä tahansa ja missä tahansa, jolloin järjestetty yhteiskunnallinen apu käy välttämättömäksi.

Ainoa työttömyyden poistokeino.

Lyhennetyn työajan kautta voidaan poistaa työttömyys, mutta yhteiskunnallisen avun tarvetta ei voida poistaa millään muotoa. Sen täytyy aina olla olemassa. Sen kehitysmuodot vain muuttuvat aikojen mukana. Kuten mainittu, on sen ensimäinen aste yksilöllinen kerjuu, sitten yhteiskunnallinen kerjuu (joka nykyään on käytännössä ensimäisen kerran Amerikassa), senjälkeen määrätynlaiset valtiolliset vakuutukset, kuten tapaturma- ja sairasvakuutus, työttömyysvakuutus ja vanhuudenvakuutus. Vakuutusjärjestelmä edellyttää vielä yksilöllistä taloutta ja rahankäyttöä avustuksessakin. Sitä seuraava aste on n.s. luontainen apu, joka kuitenkin edellyttää korkeampaa taloudellista kehitystasoa kuin nykyään.

Työväenluokka maksaa kaikki kustannukset

Yhteiskunnallinen apu on tavallisesti kehittynyt kahta tietä, valtiollista ja unionistista. Voitaisiinpa siihen vielä liittää työmailla työnantajien toimesta perustetut apurahastotkin, joiden merkitys tosin on pieni. Kaikissa tapauksissa joutuu työläinen eli työväenluokka itse maksamaan kaiken ansiokyvyttömien avustuksen — joko suoranaisesti tai epäsuorasti. Joka yhteiskunnallisia asioita vähänkin käsittää, tietää sen ensimäisen totuuden että työläiset, kaiken tuottajat, suorittavat kaikki yhteiskunnan kustannukset, niin sisäiset kuin ulkonaisetkin. Ei muuta asiaa missä muodossa se sen tekee tai miten se siltä kulloinkin otetaan.

Keksiminenkin yhteiskunnallistuu.

Monet väittävät edistyksen kärsivän yksilöllisten pyrkimysten loputtua. He viittaavat keksintöihin y.m. Nykyään jo suurimmat ja tärkeimmät keksinnöt tehdään suunnitelman mukaisesti teollisissa laboratorioissa. Yksilöllisen keksimisen aikana sadattuhannet keksinnöt eivät tule koskaan käytäntöön, mutta suunnitelmallisen keksimisen kautta tulevat enimmät keksinnöt käytäntöön heti. Lisäksi, mitä monikertaisemmiksi ja suuremmiksi kehittyvät tuotantolaitokset, sitä vaikeammaksi käy yksilöllinen kammarikeksiminen. Työläinen työmaalla voi tehdä keksintönsä, jotka hän ilmaisee laitoksen insinööreille käytäntöön sovellutettavaksi.

Rahatalouden häviäminen.

Muutamat asettavat kaiken pahan rahan syyksi. Niin kauan kuin yksilöllinen talousjärjestelmä vallitsee, tarvitaan vaihdonväline — raha. Vasta sitten kun yksilöllinen talous häviää ja yhteiskunnallinen talous astuu sen tilalle, poistuu raha kansantaloudesta — sillä rahaa ei silloin enää tarvita eikä sitä voitaisikaan käyttää. Milloin se on mahdollista? Mahdoton kenenkään sanoa kuukauden tai vuoden päälle, mutta yleisenä mittapuuna on pidettävä taloudellisten laitosten kehitystä. Lasten opetus kodeissa ei voi lakata ennenkuin tilalle on kehittynyt sellainen koulujärjestelmä, koulut ja opettajisto, että se kykenee huolehtimaan koko kansakunnan nuorisosta.

Paljon uusia laitoksia tarvitaan.

Samoin yksilöllinen talous ei voi lakata ennenkuin tilalle on kehittynyt riittävät yhteiskunnalliset laitokset, se on, asunnot ja niiden lämmitys, valaistus, puhdistus, korjaus y.m.; yhteiskunnallinen ruuanlaitto ja ruokailujärjestelmä sadoille miljoonille ihmisille; yhteiskunnalliset pesu- ja puhdistuslaitokset; yhteiskunnalliset lastenseimet ja -tarhat miljoonille lapsille; yhteiskunnalliset huvituslaitokset; yhteiskunnalliset hoitolat työkyvyttömille ja sairaille; varsinaisen tuotannon kehittyminen siihen pisteeseen että koko tuotantokoneistoa voidaan 'runnata' keskeytymättä ikäänkuin yhtä suurlaitosta.

Maatalouden kehitys välttämätöntä.

Huomioon on myös otettava maatalouden kehitys sillä se muodostaa tärkeän osan tuotannosta. Niin kauan kun maassa löytyy 6,288,648 farmikotia, ei voida puhua yksilöllisen talouden ja rahan lakkauttamisesta. Kehitys tapahtuu asteettain, vaikka nopeamminkin. Kiinteämpi yhteys varsinaisen teollisuuden ja maatolouden välillä on välttämätön. Maatalouden täytyy ensin kehittyä suurtuotannolliseksi, missä on miljoonille työläisille varattu tarpeelliset ravinto-, vaate- y.m. -tarvikevarastot ja työpaikat talven ajaksi, joka tulee tapahtumaan kahta tietä, nimittäin, työläisten siirtymisen kautta kaupunkeihin talveksi sekä teollisuuslaitosten farmiseuduille perustamisen kautta. Henkilö, joka tällaiset seikat jättää huomioonottamatta, on äärimmäinen idealisti, todellakin.

Solidarity for ever!

Solidaarisuus tulee täydelliseksi vasta sitten kun kaikki yksilöllisyyden portit ovat sulkeutuneet. Hyveet kukoistavat ja kantavat täyden hedelmän vasta silloin kun paheiden ja itsekkyyden perussyyt ovat poistuneet. Kuten edellä on koetettu julkituoda — riippuu kaikki ennenkaikkea taloudellisesta kehityksestä kaikessa laajuudessaan ja kaikissa yksityiskohdissaan. Valistuneet työläiset eivät koskaan ryhdy vastarintaan tämän kehitysprosessin suhteen, sillä he näkevät niissä edistysaskeleen — joskaan ei se välttämättömästi merkitse suoranaista hyppäystä sosialistiseen yhteiskuntaan. — W. R.

Kellastuneet Lehdet

On syksyn tullen lehdet kellastuneet,
on kukka painununna nurmen taa.
On myrskytuulet vihaan vimmastuneet
ja alastonna lepää luonnon maa.
Noin pikkulintu käypi oksalleen,
pois katoaapi yöhön, pimeyteen.

Oi köyhän lapsi, sydänrukka syinen,
sa inehmojen, orja syksy sään,
jos tervehtäis taas toivo kevähyinen,
sa ettet raukka jäisi pimeään.
Jos kestäis usko, vaikka turha ois,
niin sekin rohkeutta uutta tois.

On monta tiellä mieron harhailijaa,
niin monta koditonta kulkijaa,
tien varrella on monta leposijaa,
ja monta unta, monta nukkujaa.
Jos toivorukka riemuin kohoaa,
taas usvaan vaeltavi varjon taa.

On syksy tullut, tuulet raivoo yössä,
on vihurit nyt kaiken voittaneet,
Nyt mustat voimat temmeltävät työssä
ylivuotavat on orpoin kyyneleet.
On kärsimystä, tuskaa yllä vaan,
on hornan henget kaikki valloillaan.

On musta yö ja myrsky mylvii vasten,
ja sydämiss' on murheen musta syys,
on aikaa tämä pimeyden lasten,
ja turman henkien on väkevyys.
Mut' kevät taasen joutuu toukokuun,
käy pikkulintu päälle mandelpuun.

W. M. MATTSON.

TÖLLIN POIKA

. *Kirj. K. A.*

Olen syntynyt Suomen niemellä,
Satakunnassa, kuten kuulin —
Oli mullakin niinkuin monella
Nuoruuden päivinä riemuja —
Jotka alati seuraavan luulin.

Tölli pahanen, jossa asuimme
Kuului manttaali herrallen,
Josta veroa työllä maksettiin.
Siinä asua saatiin, jos jaksettiin
Tehdä korkea työvero sen —

Oli veljiä mulla ja siskojakin,
Oli kaikkiaan kuusi meitä —
Me metsissä, saloilla samoiltiin,
Pelloilla pienillä kisailtiin,
Riemu täytteli elomme teitä —

Kevät kun se saapui kukkineen,
Aika herttaisin ain' oli silloin.
Me niityltä kukkia poimittiin,
Yhä yhtä ja toista me toimittiin,
Kunnes väsymys saavutti illoin ——

Käki kukkui, linnut lauloivat –
Sitä säveltä me säestimme.
Varis kun raakui, niin matkimme,
Kans' harakan kilvan nauroimme,
Kukon lauluhun vastailimme —

Kun syksy taas saapui halloineen,
— Jo lintujen laulukin taukoo —
Kukkaset kaunihit kuolohon saa,
Ruoho kuivaa ja lehdet putoaa,
Taas talvi kun tietänsä aukoo —

Meitä eipä tappanut talvikaan,
Eik' intoa lamannut meissä —
Kun nuoruus uhkui eloaan,
Oli mielet täynnä iloaan,
Vaikk' olimmekin repaleissa.

Aika rientää ja elon huolia
Se mökkiimme pienehen tuo —
Jotka meiltä ilon sammuttaa.
Äidin armahan hymyn karkoittaa,
Kovin koskevat isäänkin nuo —

Tauti huolten harmaja kumppani,
Se meidät kaikki nyt tapaapi —
Iski isään säälittä — kovasti.
Hän joutui vuoteensa omaksi,
Jossa talven hän olla saapi.

Isä toipui ja taasen elämä
Meille näytteli valon puolta.
Vaikka nyt olikin rästissä
Taas useita työvero päiviä
Ja monta muutakin huolta —

Kun terveys ilojen toveri,
Taas takaisin toivehet toi.
Kun isäkin jälleen terveenä
Jo ahertaapi kans' perheensä,
Niin ilolaulut ne taaskin soi.

* * *

Näin vuotta monta vieri taas
Ja pahin voitettiin —
Mutt' aina riitti kuitenkin
Puutteita loppumattomiin,
Joita poistaa koetettiin.

Pois isän pitkä sairauskin
Kun mielistä jäänyt on —
Niin äiti alkoi vuorostaan
Taas ankarasti sairastaa,
Mi päättyi kuolohon — —

Kaikista muista murheista
On muistossa mitätön —
Rinnalla kalman katkeran,
Mi äidin kuolon sanoman
Tuon tuotti turmion — —

Kotimme köyhä hävisi —
Nyt aivan tykkänään —
Kuin muuttolinnut majoiltaan
Läksimme maailmaan avaraan
Onnemme etsintään — —

En ole tosi onnea
Tavannut milloinkaan.
— Vaan silloin orja onnen saa
Kun unten mailla vaeltaa
— Saaneeko silloinkaan —

Työn orjillekin kuitenkin
On yksi onnen tie — —
Voima yhden suuren union
On tie se suorin, verraton
Mi orjat onneen vie!

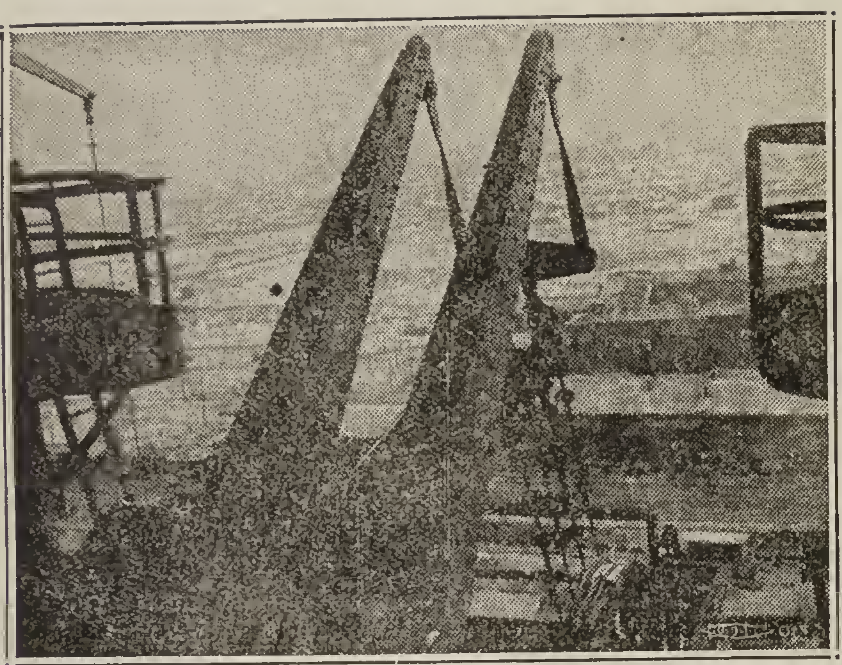
Meille Kuuluu Maa Ja Tuotantokoneisto

Totuus ei koskaan tule yli-ikäiseksi. Kun I. W. W. liiton perustajat lähes kolmekymmentä vuotta sitten julistivat työnantajaluokalla ja työväenluokalla ei olevan mitään yhteistä, käy tämä totuus päivä päivältä yhä ilmeisemmäksi ja laajoille joukoille helpommaksi käsittää. Yhteiskuntataloudellinen elämä kulkee yhä pitemmälle jyrkkien luokkaristiriitojen tilaan. Ennenkuulumattoman harvalukuisten omistajaryhmien, trustien käsiin kertyy elämän välttämättömyydet ja kaikki rikkaus; ennenkuulumattoman suureksi kasvaa elämän välttämättömyyksistä syrjään työntynyt miljoonaisten työläisten luku. Näitä yhä kärjistyviä luokkaristiriitoja omistavan luokan hyväksi valvoo yhä ilmeisemmin n. k. kansan hallitus; käyttäen kaiken kykynsä omistajien eduksi ja myös kaiken kykynsä näiden osattomien miljoonien alistamiseksi.

KATSO minkä tahansa trustin olemukseen, näet että hallitus on käynyt yhä alastomammin sen etujen valvojaksi. Takavuosina tätä yritettiin peitellä, nyt ei enään yritetäkään. Eikä tarvitse olla enään joku vanha, jo kauan maailman rikkaimpien joukkoon luettu trusti. Aivan viimeaikainen nopeasti kehittynyt tuotannonala, kuten voidaan sanoa kumituotanto, on nostanut olemaan vaikutusvaltaisia trusteja, jotka määräävät hallitusta miten edut vaatii.

Emme tarkoita tässä kirjoituksessa käydä väsyttävän laajoille aloille, vaan tyydymme ottamaan vain yhden trustiutuman asiain valaisemiseksi. Käytännöllinen tosiasia, joka tässä maailmassa effektuoi, on hyödyllisempi ottaa käsittelyn alaiseksi, kuin pitkät mietiskelyt samoista asioista. Otamme siis yhdysvaltalaisen kumitrustin, jonka arvelemme muodostuvan monilla eri nimillä toimiviksi korporatsioneiksi, kuten sanotaan terästrustinkin toimivan.

Tunnetuita kumikorporatsioneja, joiden tuotantoala ulettuu kaikkeen siihen, mitä nykymaailma kumista valmistettua tuntee, nimitämme tässä vain ne, jotka äskettäin magnaattiensa ja neuvonantajiensa kautta olivat edustettuina tämän maan "kansan hallituksen" herrojen kera pidetyssä konferenssissa Washingtonissa. Nämä ovat: United States Rubber Co., Firestone Tire & Rubber Co., Cambridge Rubber Co., Hood Rubber Co. ja näistä sekä muistakin, muo-



Venäjällä valtaa konetekniikka tilansa kuten muissakin maissa. Kuvassa suurterrikat auttamassa Magnitogorskin suurterästeollisuuden rakentamista

dostuvat Rubber Manufacturers Association ja National Council of American Import & Traders.

Kuinka hallitusta käsketään

Nämä mainitut korporatsionit ovat osa Yhdysvaltain kumitrustista, jotka olivat ehkä asian joustavuuden vuoksi lähetetty edustajiensa kautta edustettavaksi. Kysymys oli, mitä hallitus aikoo tehdä yhdysvaltalaisen kumituotantoa edustavan pääoman hyväksi, sen joutuessa tappiolle ei yksin maailman markkinoilla, mutta aivan tässä kotoisilla mailla olevilla markkinoilla. Eikä tämä kumikontrolli tyytynyt vain kysymään, se teki sen muodin vuoksi, todellisesti se käski mitä tehdä. Ja "kansan hallitus" auliisti lupasi niin tehdä; se taipui kuin kuminanuha.

Oli keräytetty laajahko varasto tilastoja kumitavaramarkkinoista. Pääasia oli osoittaa hallitukselle, että se saa osoittaa kansalle, jos tarvitsee, miten Japani ja Tshekkoslovakia valtaavat kumituotemarkkinat kaikkialla. Ne myyvät paljon halvemmalla Aasiassa, Europassa ja Yhdysvalloissa, kuin kotoiset kumikorporatsionit voivat tehdä. Ei yksin kumipohjaisia jalkineita, mutta tuhansia muita kumituotteita ne myyvät. Ja sitten osoitetaan tilastoilla.

Japani on vallannut Indian ja joidenkin muiden maiden kumikenkämarkkinat. Kolmessa vuodessa on se syrjäyttänyt meidät Indiasta ja myy nyt siellä 15,000,000 paria kumipohjaisia jalkineita vuosittain. Yhdysvalloissa myyvät molemmat, Japani ja Tshekkoslovakia, varsinkin jälkimmäinen, kumipohjaisia kenkiä newyorkilaisten ketjuliikkeiden välityksellä 24.5 sentillä parin. Näitä samoja kenkiä voi U. S. Rubber Co:n jalkineosasto myydä 71.79 sentillä. Kun Japanin ulkomaakaupasta oli v. 1931 noin 2 pros. kumikengistä Yhdysvaltain osalle, oli tämä lisääntynyt kahdeksan ensimäisen kuun ajalla 1932 noin 700 prosenttia.

Ja lausuu Rubber Manufactur Associationin edustaja R. H. Goebel: "Eilen huomasimme että japanilaiset kumiraaputtimia (erasers) myytiin 40 sentillä grossi (12 tusinaa) ja edellisenä päivänä niiden hinta oli 50 senttiä grossi. Jos tätä jatkuu kaikilla aloilla kumitavaratuotannossa, tulee amerikalainen kumiteollisuus lakaistuksi pois olemasta." — Edelleen esitettiin verrannollinen taulukko japanilaisista ja amerikalaisista hinnoista. Otamme tähän vain osan siitä, ensisarake Japanin ja toinen Amerikan hintoja:

Uimarengas	$0.19	kpl.	$0.45	kpl.
Uimatyyny	.17	„	2.46	„
Kumieläin-lelu, tusina	1.75		3.96	
Rantapallo	.12	kpl.	1.47	kpl.
Rantapallo No. 2	.10	„	.41	„
Jalkapallo	.07	„	.15	„
Rantapallo 13t	.08	„	.27	„
Kumilelu No. 2, tusina	.84		2.28	
Kumilelu, grossi	3.64		14.12	

Hallituksen täytyy taipua

Pikkuvertaus hinnoissa. Japanilainen uimatyyny, kuljetus- ja tullikulut laskettuna hintaan, maksaa 17 senttiä, amerikalainen $2.46, siis noin 15 kertaa enemmän. Japanilainen kumilelu grossi $3.64, amerikalainen grossi $14.12, lähes neljä kertaa kalliimpi.

National Council of Am. Import & Tradersin yleisjohtaja James W. Bevans lausuu että kaksi maata, Japani ja Tshekkoslovakia ovat jo vallanneet amerikalaisilta kumikorporatsioneilta markkinat kumipohjaisille kengille. Hän ennustaa: "Jos saamme kuoliniskun kotoisilla markkinoilla kumipohjaisille kengille, eikö ole syytä arvioida että sama kohtalo on vastassa autokumitehtailijoita ja tuhansien muiden kumituotteiden tehtailijoita. Ellei ulkomaisille kilpailijoille löydy täältä keinoa, joka toisi helpotusta kotoisille tuottajille, on meidän ikäväksemme nähtävä monia kumituotetehtaita suljettuina pikapuoliin."

Näin uhkaavalla äänellä puhutaan muutamien suusta tälle 120-miljoonaisen "kansan hallitukselle" ja sen täytyy taipua. Lukuisia muita todisteita voitaisiin käyttää osoittamaan, miten peittämättömästi tämä totuus luokkaetuja palvelevasta hallituksesta ilmaisee itsensä, mutta tämä riittäköön tässä.

Me teollisuusunionistit olemme, kuten alussa sanottu, jo lähes kolmekymmentä vuotta osoittaneet, miten turhaa ja työväenluokan etua vahingoittavaa on levittää sellaista käsitystä, että muut kuin kapitalistit kontrolloisivat koskaan edes osaksikaan "kansanvaltaisintakaan" hallitusta kapitalistisessa maassa.

Totuus ei koskaan tule yli-ikäiseksi, ja siksi me edelleen julistamme: Tuotannon armeija on järjestettävä ei ainoastaan jokapäiväistä taistelua varten kapitalisteja vastaan, vaan myös jatkamaan tuotantoa sitten kun kapitalismi on voitettu.

Noki Jussi

Kirj. TUNTEMATON.

Noki Jussi,
Niinhän häntä kutsuttiin.
Selässänsä aimo pussi,
Jos milloin missä kohdattiin.
Näin hän kulki vuotta monta,
Mieron tietä lohdutonta.

Vanhus ilta hämärässä,
Läksi poikki järven jään.
Lumi pyryn ryöpynnässä,
Sattui rankka eksymään.
Harhaeli täällä, siellä,
Vasyi viimein umpi tiellä.

Sattui eräs nuori neiti,
Tietä ohi kulkemaan.
Keksii hänet vaan ei heti,
Käynyt siitä kertomaan.
Kertoi aamusella vasta,
— Kotonansa asiasta.

Miehissä nyt mentiin sieltä,
Kummaa tuota katsomaan.
Jussi vähän matkaa tieltä,
Nietoksessa nukkui vaan.
Kuulunut ei kuorsausta,
Hiljaisinta huokausta —

Kantamalla sieltä Jussi,
Kirkon kylään vietihin.
Toverinsa vanha pussi,
Mukahan myös korjattiin.
Aarteet siinä kerjäämänsä,
Sai ukko alle harmaan päänsä.

Sokerin ja kahvikullan,
Posti mummo sentään sai.
Leipä palat saaliiks' mullan,
Tarpeeks hälle lienee kai.
Kylmästi noin lausui vaan,
Lukkarikin ivallaan —

Päänsä alla leipä pussi,
Rauhan unta nukkuu nyt.
Kalmistossa Noki Jussi,
Mieron tie on päättynyt.
Kansa tiesi kertoo vainen,
Kuoli vanha mierolainen.

Tietoja Eri Maista

Nukkukaa pää kohti pohjoista

Englantilainen tiedemies, tri Bernhard Falk on eräässä kirjoituksessaan selittänyt, että unettomuutta kärsivät henkilöt monissa tapauksissa parantuvat, jos kääntävät sänkynsä päänpuolen magneettista pohjoisnapaa kohti. Hän mainitsee useiden sanatorioiden jo kauan sitten havainneen tämän ja sijoittaneen sängyt oikealla tavalla. Minkätähhden uni on parempaa tällä tavoin nukuttaessa, sitä hän ei osaa selittää, mutta psykologi, tri Avelin Lontoon yliopistossa sanoo hänen olevan oikeassa ja selittää unen olevan terveempää ja syvempää, kun päänalainen on magneettista pohjoisnapaa kohti. Otaksuttavasti ihmisen ruumiiseen ja mieleen vaikuttavat magneettiset ja kosmilliset voimat.

Näiden tiedemiesten lausuntojen jälkeen on englantilaisissa lehdissä ollut sellaisten henkilöiden lähettämiä kirjoituksia, jotka ovat kokeneet, kuinka suuri vaikutus magneettisella pohjoisnavalla on heidän nukkumiseensa. Jotkut vieläpä selittävät, että heidän on mahdotonta nukkua, ellei sängyn päänpuoli ole tarkalleen kohti magneettista pohjoisnapaa, jota ei ole sekoitettava maantieteellisen pohjoisnavan kanssa.

Merkillisintä on, että kiinalaisten sanotaan tunteneen tämän seikan jo vuosisatoja ja sivistymättömimmänkin kiinalaisen vaistomaisesti asettuvan nukkumaan pää pohjoista kohden, samoin lapsilla ja eläimillä väitetään olevan merkillisen kyvyn aina kääntää päänsä oikeaan suuntaan nukkuessaan.

Pariisi katselee viinimarkkinoita.

Neljän ja viiden miljoonan välillä liikkui se lukumäärä, jolla laskettiin ne viini ja sampanja pullot, joita Ranskasta tuotiin vuosittain Yhdysvaltoihin ennen Volstead-lakia. Tämä sama määrä ja ehkäpä enemmänkin, on varustettu siksi ajaksi kun Yhdysvalloissa luvassa oleva kapakkajärjestelmä tulee lailliseksi ja kieltolaki saa siirtyä historian lehdille. Nyt varsinkin kun presidenttinä tulee olemaan sellainen mies, joka ei ollut kahdenvaiheilla tässä asiassa, on pariisilaisilla viini- ja samppanja-tehtailijoilla suuret toiveet.

Joka paikassa Pariisissa kuulutaan keskustelevan siitä, tuleeko Yhdysvalloista märkä? Muuta ei enään Amerikasta puhutakaan. Vaikka pariisilaiset tietävätkin että amerikalainen ei ole erikoinen viinin juoja, olettavat he tämän pitkän puualkoholi ja kotitekoisen oluen aikakauden jälkeen tavat täällä voitavan helposti muuttaa. Tehtailijain keskuudessa on siitä vain enään epävarmaa jutustelua, tullaanko Yhdysvaltain uuden hallituspuolueen kautta lujittamaan vaiko löysäämään viini ja sampanja tulleja.

Musiikki yhä koneellistuu.

Saksan pääkaupungissa esitettiin äskettäin maailman ensimmäinen cinema-concert, kuten amerikalainen sanomalehtimies sitä kutsuu. Tämä uusi keksintö esitettiin Berliinin Marmorhaus nimisessä oopperateatterissa johtaja Max von Schillings'in ohjauksen alaisena. Konserttifilmi, joka todella tilaisuudessa esitettiin, soitti overtyyrin "Wilhelm Tell" nimisestä sävellyksestä. Saksan parhaat musiikkikritikot olivat läsnä ja joutuivat myöntämään filmistä "lähteneen" musiikin olleen virheetöntä.

Vorwaertsin kirjeenvaihtajan kerrotaan lehdelleen tiedottaneen: "Ollessa merkityksellisin väline, mitä tähänasti on tunnettu, musiikin yhä pitemmälle ratsionaloinnissa — järkiperäistyttämisessä, tulee tämä keksintö löytämään tuhansia imitaattoreita — epätodelliseksi jäljentäjiä ja toiseltapuolen se auttaa yhä kaventamaan sitä peltoa, josta musikantit elämänsä tekevät antaessaan ihmiskunnalle todellista musikaalista nautintoa." — Osa tilaisuudessa olleista huomatuista asiantuntijoista, samalla kun joutuivat myöntämään konserttifilmin täydellisyyden, lausuivat pahamielisyytensä siitä, että samalta näyttämöltä on kauan totuttu katselemaan ja kuulemaan maailman parasta ruumiillistutettua soitto- ja laulutaidetta, josta nyt voi tulla vain mekaaninen esitysinstituutti.

Hevosten luku Yhdysvalloissa.

Vaikka myönnetään että nykyinen pula aiheuttaa sen, että Yhdysvaltain farmarit joutuvat luopumaan traktorien käytöstä ja hevosia otetaan huomattavasti lisää pienviljelykseen, vähenee hevosten luku Yhdysvalloissa säännöllisesti jokaisena vuonna.

Hallituksen maanviljelysviraston jäsen J. Williams osoittaa kerätyillä tilastoilla että Yhdysvalloissa on hevosten luku alempana kuin se oli 40 vuotta sitten, eli v. 1892, jolloin hevosista oli ankara puute.

Maailmansodan päättyessä 1918 laskettiin Yhdysvalloissa olleen vähän yli 27 miljoonaa hevosta ja nykyään niitä on enään noin 17,500,000, tämä luku väheten tasaisella nopeudella jokainen vuosi.

---

60 Albumia postimerkkejä.

Lontoossa myydään — tai on myyty — näinä aikoina huutokaupalla kallisarvoinen postimerkkikokoelma. Sen on lähes 70 vuoden kuluessa kerännyt rikas hollantilainen filatelisti Henry Philip Manus, joka viime vuoden lokakuussa kuoli Anmsterdamissa yli 80 vuoden ikäisenä. Kokoelma käsittää 60 isoa albumia ja kaikkiaan noin 50,000 postimerkkiä. Sen arvo lasketaan noin 150,000 punnaksi, ja siinä on m. m. kaksi kuuluisaa Mauritius-merkkiä, jotka yksistään maksavat 10,000 puntaa.

Suutarista suurmies.

Tanskalainen suutari Carl Andersen on keksinyt keinon sähkövoiman saamiseksi ilmasta. Hänen on onnistunut laitteen avulla, joka muistuttaa radioaparaattia, saada tavallinen normaalisen kokoinen sähkölamppu palamaan sekä pieni sähkömoottori käymään. Ammattimiehet ovat tutkineet keksintöä, ja he kiinnittävät siihen suuria toiveita. Eräs kööpenhaminalainen yhtymä on tarjonnut Andersonille keksinnöstä suurehkon summan — puhutaan 1,7000,000 kruunusta — sillä edellytyksellä, että se kestää käytännölliset kokeet, mutta Anderson on pyytänyt miettimisaikaa, syystä että hänen ystävänsä ovat kehoittaneet häntä kääntymään joko Fordin tai General Motorsin puoleen. Muuten kerrotaan myös Siemens & Schuckertin osoittavan mielenkiintoa keksintöä kohtaan.

Uppoaako Lontoo maahan?

Jos otettaisiin elokuva Lontoosta pitkän ajanjakson kuluessa ja sitten esitettäisiin se niinkuin tavallinen filmi, nähtäisiin merkillisiä asioita, nimittäin miten Waterloo Bridge hyppii ylös ja alas kuin kouristuksissa, miten uusi County Hall (kaupungintalo) keinuu edestakaisin ja Englannin Pankki hiljaa vojaa maahan, miten St. Paulin kadetraali hitaasti, mutta varmasti kallistuu alkaen muistuttaa Pisan tornia sekä mitenkä koko Lontoo vajoaa maahan.

Tämän totesi jokin aika sitten Englannin topografiseen laitokseen kuuluva kapteeni T. E. Lonfield eräässä esitelmässään.

Maanvajoaminen Lontoossa lasketaan noin 1 yardiksi 250 vuodessa eli jonkinverran nopeammaksi kuin mitä se oli roomalaisaikana, jolloin vajoaminen on laskettu 1 yardiksi 400 vuodessa. Kapteeni Longfield esitti myös sellaisen teorian, että roomalaiset ovat maanvajoamisesta johtuvien vaarojen torjumiseksi rakentaneet Thamesin rannoille noin 4 metrin korkuisen penkereen.

— On mahdollista, lausui hän, että niitä töitä, jotka kaupungin viranomaiset ovat nyt panneet käyntiin koroittaakseen pengermää vuoden 1929 tulvien toistumisen ehkäisemiseksi, on pidettävä vain roomalaisten toimenpiteiden uusimisena ja että tulevaisuuden insinöörit aina saavat puuhailla saman kysymyksen ratkaisemiseksi.

Yksi piirre koulukasvatuksen suurteollisuusluonteesta.

Washingtonista tiedotetaan että Yhdysvaltain koulurakennusten lukumäärä on kymmenen vuoden ajalla vähentynyt yli 24,000:lla, mutta käytännössä olevien koulurakennusten arvo samalla aikaa on kohonnut 157 pros. Tarkemmin numeroilla osoitettuna oli Yhdysvalloissa v. 1920 koulurakennuksia 271,319 ja v. 1930 oli 247,289. Näiden rakennusten arvo v. 1920 oli $2,409,719,120 ja v. 1930 $6,211,327,040.

Samalla aikaa siis kun koulurakennusten lukumäärä aleni ja niiden arvo nousi noin suuresti, tarkoittaa tämä että koulukasvatus Yhdysvalloissa kulkee yhä enemmän suurteollisuuksien latua opetuslaitosten suuruuteenkin katsoen. Osoitamme tämänkin numeroilla. Kun v. 1920 oli 189,227 yhden huoneen koulurakennusta, oli niiden luku laskenut keskimäärin 4,052 vuodessa, siis kymmenessä vuodessa 40,515, täten v. 1030 tässä maassa ollen enään 148,712 yhden huoneen koulurakennusta.

AIKA

Kirj. JUSSI PUSKANEN.

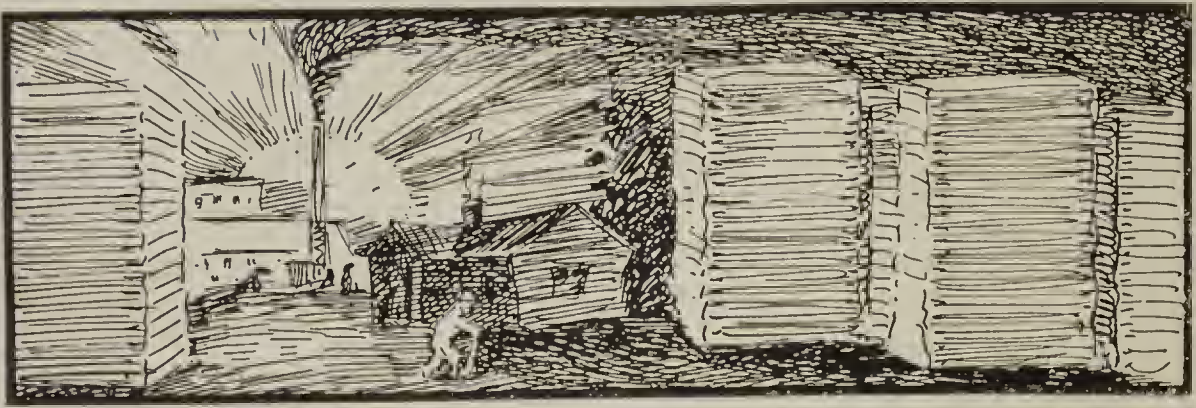
Aika askeltansa lyö,
Olkoon päivä taikka yö;
Jos SE kaikille ei riitä,
Aika välitä ei siitä.

Suurta vaikk' on ihmistyö,
Aika alas kaikki lyö.
Olkoon susi, taikka lammas,
Armoton on Ajan hammas.

Mitä maailmassa lie,
Mukanansa Aika vie.
Hukkuu maa, ja hukkuu kansa,
— Aika kulkee kulkuansa.

Minne kerran kaikki vie
Päättymätön Ajan tie?
— — —
Tulkoon mitä tulkoon, mutta
Aika astuu uraa uutta . . .

Vanha kaatuu, nousee uus,
— Edessä on ikuisuus.
Tasainen on Ajan tahti,
Voittamaton Ajan mahti.



Yhteiskuntamme Rikos

Leipäkaupan myyjätär.

NÄYTTÄMÖ.

Laitakaupungin himmeästi valaistu katu, hiljaisessa lumisateessa. — Oikealla leipämyymälä, jonka näyteikkunalla kiiltää maukkaan näköiset leivokset ja leivät. — Esiripun noustessa tulee myymälästä joku leivän ostaja häviten kantamuksineen. Joku yksinäinen kulkija tulee ja menee kiireesti katua. Mynth tulee oikealta raskain laahustavin askelin, kasvoilla synkkä epätoivoinen ilme. Hän muistuttaa elävää kurjuuskuvaa. Hän pysähtyy ikkunan eteen katsellen leipiä. Epäröiden horjuu hän ovelle mennen arasti sisälle. Hetken kuluttua palaa hän tyhjin käsin. Katsoo vielä kerran ikkunalla olevia leipiä. Aikoo poistua, ottaen muutaman askeleen, mutta vaipuu voimatonna kadulle.

MYNTH. Oih! Tunnen etten jaksa askeltakaan enään kauemmaksi... Täytyykö minun kuolla nälkään leivän ääressä. Koko päivän olen kulkenut tämän vieraan kaupungin outoja katuja, etsien työtä ja ruokaa, mutta turhaan. Joka paikassa on annettu kieltävä vastaus. Hänkin tuolla sisällä sanoi: "Minua on kielletty antamasta kerjäläisille." (Synkästi) Voi Jumal'auta tätä elämää! Kuinka syvälle kurjuuteen voi ihminen vaipua, ennenkuin hän mielettömässä raivossa tuhoo esteet tieltään leipää saadakseen. — Hullu minä olen ja raukka, tyytyessäni vapaaehtoiseen nälkäkuolemaan. (Katsoo hurja ilme kasvoillaan leipiä ikkunalla). Ainoastaan ohut, särkyvä lasi eroittaa minut noista pullean lihavista, niin viettelevän suloisesti hymyilevistä leivistä. (Puhuu kuin houreessa). Kas, kas, kuinka viehkeästi ne iskevät silmäänsä. (Yrittää nousta). Odottakaahan veitikat, kyllä minä vilkkeenne ymmärrän. Te kutsutte minua. (Ottaa pari horjuvaa askelta, vaipuu maahan aivan ikkunan alle). Ah' minne te katositte, en voi nähdä teitä enään. (Näyteikkunan valot himmenee ja katulyhdyt sammuu. Mynth jää liikkumattomana makaamaan, raskaasti hengittäen.

UNI.

(Näyttämön taustalle syttyy himmeä valo, vähitellen kirkastuen, valaisten kurjasti kalustetun huoneen. Seinät ovat huurteessa ja nurkassa on räsyinen vuode, jossa heittelehtii, valittaen kuumesairas lapsi. Ruostuneessa kaasu-uunissa palaa lepattava liekki, sen ympärillä lämmittelee kolme lasta.)

NORA. Nyt on jo pimeä ulkona, äiti ei voi viipyä enään kauan.

WALTER. Ja sitten saamme maitoa, pehmoista leipää ja omenia.

MARY Miksi, ei isä tule enään koskaan kotia? Minulla on niin ikävä isää.

NORA. Isä lähti työtä hakemaan. Hän on mennyt kauas toiseen kaupunkiin. Hän tulee varmasti sitten kun hän ensin löytää työtä ja saa rahaa.

LILY (Vuoteesta). Äiti, äiti. (Valittaa itkien).

(Lapset ryhmittyvät vuoteen ympärille.)

NORA. (Hyväillen ja lohdutellen). Äiti tulee pian. Tuoko Nora vettä?

LILY. Minulla on nälkä, minä tahdon maitoa.

MARY. Katsokaa, kuinka Lilyn posket ovat punaiset, eikä valkoiset niinkuin ennen.

WALTER. (Laskee kätensä Lilyn otsalle). Hänellä on kuuma pää, se lämmittää kättäni yhtä paljon kuin kaasuliekki.

NORA. (Hätäillen). Voi, voi, jos hän kuolee ennenkuin äiti tulee.

(Ulkoa kuuluu askeleita. Ovi aukenee ja sisälle astuu kalpea nainen, kantaen muutamia kääröjä. Lapset ryntäävät häntä vastaan huutaen yhteen ääneen: Äiti, äiti. Sarah luovuttaa käärönsä heille. Walter ja Mary avaavat ne alkaen ahnasti syödä leipää ja maitoa.)

NORA. Äiti, voi kuinka iloinen olen, että tulit kotia, me olemme odottaneet niin kovasti koko päivän. Lily on kipeä ja pyytänyt maitoa vähän väliä. (Menee pöydän luo alkaen syödä.)

SARAH. (Kiiruhtaa vuoteen luo nostaen lapsen syliinsä.) Äidin oma kulta. Hyvä Jumala kuinka kuuma hän on. Hänen poskensa hohtavat kuin tulessa. (Laskee lapsen takaisin vuoteelle, etsii vaatteen jonka kastaa kylmään veteen käärien sen hänen päänsä ympäri.)

Oma pieni poloiseni, koskeeko kovasti?

LILY. Toiko äiti maitoa?

SARAH. Kyllä, rakas. Äiti lämmittää nukelleen maitoa. (Menee pöydän luo. Lapset ovat tyhjentäneet maitopullon.) Mitä? Te olette juoneet kaikki maidon pikku siskolta vaikka hän on kipeä ja odottanut maitoa koko päivän. (Nuhtelevasti). Voi, kuinka ahnaita ja itsekkäitä te olette.

(Lapset lopettavat syöntinsä katsoen noloina toisiaan.)

NORA. Minun kupissa on vielä vähän. Lily saa tämän.

WALTER. (Ottaa ensin pitkän ryypyn kupistaan työntää sen äidilleen.) Ja tämän.

MARY. Minunkin kupissa on vielä vähän jäljellä. Lily saa tämän.

SARAH. (Suruvoittoisesti hymyillen). Poloiset lemmittyni. Niin mielelläni soisin teille tarpeeksi kaikkea. (Kaataa maidon tähteet pataan, lämmittäen sen kaasuliekin päällä.) Valkeneekohan koskaan se päivä, että pienokaiseni saavat tyydyttää nälkäänsä, saavat yllin kyllin maitoa ja ravitsevaa ruokaa. Sitä on puuttunut heiltä jo monet kuukaudet. Voi! Mikä meidät lopulta perii? (Tukahduttava nyyhkytys kohoaa hänen rinnastaan). Päivä päivältä käyn heikommaksi, en jaksa enään työskennellä kuuman silitys pöydän ääressä. Tänään olin väsymyksestä puoli sokea; poltin hienon puvun, johtaja syytti minua huolimattomuudesta, sanoen, ettei liike voi ottaa vahinkoa itselleen. Siihen meni melkein koko viikon palkkani. Ellei ihmettä tapahdu näännymme nälkään. (Kaataa maidon kuppiin, menee vuoteen luo. Lapset ryhmittyvät hänen ympärilleen.)

SARAH. (Nostaa Lilyn istuvaan asentoon tarjoten maitoa.) Kas tässä, oma rakas. Juo, se helpottaa kipuasi. Juo, ota vielä hiukan lisää sitten äiti laulaa kultansa nukkumaan.

(Sarah laskee kupin pöydälle. Walter ottaa sen alkaen ryyppiä maitoa. Mary kurkottaa kuppia hänen kädestään, he ryyppivät vuoron perään tyhjentäen kupin.)

NORA. Äiti onko Lily kovin kipeä? Kuoleeko hän?

SARAH. Jospa hän kuolisikin, nukkuisi enään koskaan heräämättä. (Itkien). Se olisi parempi meille kaikille, ikuinen uni, silloin ei tuntisi nälkää, eikä vilua; vaan loppumaton rauha ja hiljaisuus.

NORA. Mutta sitten me emme näkisi isää enään koskaan.

SARAH. Ei isä ole enään tässä maailmassa. Jos hän eläisi olisi hän varmasti antanut jotain tietoa itsestään. Ei hän näin olisi meitä hyljännyt, sillä hän rakasti meitä suuresti.

NORA. Äiti minä haluan päästä isän luo.

MARY. Äiti pyydä isää tulemaan kotia. Minulla on niin ikävä isää.

Walter. Isä lupasi lähettää minulle veitsen, mutta hän ei olekaan sitä lähettänyt.

(Kaikki kolme yht'aikaa.)

Äiti vie meidät isän luokse.

SARAH. Lapset te ette ymmärrä mitä te pyydätte, eihän äiti tiedä missä isä on. Tulkaa nyt nukkumaan, huomenna puhelemme siitä enempi. Ehkä isä tulee kotia pian tai lähettää meille kirjeen.

(Sarah ottaa nurkasta patjan jonka levittää lattialle, peitellen lapset vaateriekaleilla joita kokoilee ympäri huonetta.)

Menkää lähelle toisianne, niin pysytte lämpöisenä. (Polvistuu lattialle peitellen lapsia ja suudellen jokaista.)

NORA. Äiti kerro meille satu.

SARAH. Ei tänä iltana, äiti on liian väsynyt ja pikku sisko on sairas. Painakaa silmät kiinni, niin nukkumatti tuo kauniita unia.

WALTER. Minä tahtoisin nähdä sellaista unta, että istun suuren omenapuun oksalla, joka on täynnä makeita omenia joita saan syödä niin paljon kuin haluan.

MARY. Ja minä tahtoisin nähdä unta, että minulla on suuri voileipä, joka ei lopu koskaan.

SARAH. Ehkäpä pian tapahtuu jotain, että toiveenne täyttyy ihan todellisuudessa, ehkä jo huomenna saatte syödä tarpeeksenne. Hyvää yötä.

(Menee sairaan luo, ottaen kääreen hänen otsaltaan, kastelee sen uudelleen asettaen takaisin lapsen otsalle. Kokoilee pöydältä leivän tähteet, istuen lapsen vuoteen viereen alkaa syödä.)

SARAH. (Yksin). Missähän oleilee mieheni. Voi, jospa hän lähettäisi jotain tietoa itsestään, että tietäisin varmuudella hänen kohtalonsa; tietäsin josko hän vielä elää, ehkä silloin olisi helpompi kantaa tätä raskasta kuormaani. Tällä hetkellä tuntuu etten jaksa kauemmin kestää tätä epätoivoista elämää. Ei, ei tätä voi sanoa elämäksi; unta tämä on, pahaa painajaisunta. Me olemme yhteiskunnassa, joka kylmäverisesti julmasti kiduttamalla uhkaa jättää meidän nälkään ja kurjuuteen kuolemaan, hitaasti kiduttavaan kuolemaan. Mikä on kaiken tämän kurjuuden ja kärsimysten päämäärä... ? (Nousee kävelemään).

Huu kuinka täällä on kylmä. Jalkani ovat kuin jäässä vaikka päätäni polttaa. Ja hiilet ovat kaikki lopussa, eikä minulla ole rahaa, eikä mitään ruokaa lapsille aamuksi. Nälkä, vilu ja sairaus ovat liittoutuneet meitä vastaan. Näin toivottomalle ei elämä ole vielä koskaan tuntunut. (Vääntelee epätoivoisesti käsiään, kyyristyen lattialle tyrskähtää itkuun.)

(Hetkeen ei kuulu muuta kuin Sarah'n hillittömät nyyhkytykset.)

LILY. (Kuiskaten). Äiti... äiti... (Kovempaa) Äiti, tule Lilya janottaa.

SARAH. (Hypähtäen ylös kuivaten nopeasti kyyneleensä). Kyllä rakkaani, äiti tuopi nukelleen vettä. (Tarjoaa vettä). Onko vähän parempi nyt?

LILY. Kaulaan koskee ja Lilyn on kylmä. Miksi ei äiti tee uuniin tulta, että tulisi lämmin?

SARAH. (Ääni värähtäen). Meillä ei ole hiiliä rakkaani... Mutta sinun kätesihän ovat ihan polttavan kuumat ja kuitenkin viluttaa. Sinä mahdat olla, kovin, kovin sairas. Taivas mitä olisi minun tehtävä? (Tempaa lapsen syliinsä seisoen hetken neuvotonna, kuin ankaraa sisäistä taistelua käyden. Päättävin elein laskee hän lapsen vuoteelle puhuen viihdyttävästi:)

Odota rakas, äiti sytyttää kaasu-uuniin tulen. Sitten otan syliini ja laulan nukkumaan. (Itsekseen) Tuuditan ikuiseen uneen josta emme enään koskaan herää. (Vääntää kaasu valvin auki). Mitä? Kaasu loppunut, eikä minulla ole rahaa jolla saisin mittarin käymään. Voi tätä kohtalon ivaa, se ei soisi meille edes kuolon kautta saavutettua pelastusta. Mutta katsotaanhan kuka tässä jää voitolle. (Etsii kirveen jolla särkee seinässä olevan kaasumittarin).

Kas niin nyt kaasu virtaa vapaasti; hetkinen vielä ja kaikki kärsimyksemme ovat lopussa. (Polvistuu lattialle suudellen nukkuvia lapsia). Jääkää hyvästi, armaat, poloiset pienoiseni. Tämä on parhain mitä voin teille tehdä. (Nousee mennen vuoteen luo ja ottaa lapsen syliinsä). Nyt äiti laulaa tyttösensä nukkumaan. (Istuu rikkinäiseen keinutuoliinä Hiljaa keinuen laulaa:)

KUOLEVAN ÄIDIN KEHTOLAULU SAIRAALLE LAPSELLEEN.

Kirj. Venhotar.

Sovitettu säveleeseen: "Äiti se laulavi lapselleen
Tuvassa tummaisessa..."
(Näytelmästä: Laivan kannella.)

Uinuos unehen untuvaiseen,
Häipyvät haaveet hohtaa —.
Tuvalle Tuonelan tummaiseen,
Matkamme määrä johtaa.
Pium paum, Pium paum,
Tuuditan nukkeain nukkumaan.
Pium paum, pium paum,
Tanhuille Tuonelan käymme nyt kulkemaan.

Siel' kaikkoaa nälkä ja puute pois,
Tuskasi vaimentuupi —.
Sielläpä armahin hyvä ois,
Huolemme unhoittuupi.
Pium paum, pium paum,
Tuuditan nukkeain nukkumaan.
Pium paum, pium paum,
Ei ehtinyt nuoruutes puhjeta kukkimaan.

Viimeisen kerran nyt lauluni soi,
Uinuos ainiaaksi —.
Kohtalo sulle vaan murhetta toi,
Kuolossa kauniimmaksi.
Pium paum, pium paum,
Tuuditan nukkeain nukkumaan.
Pium paum, pium paum,
Näin varhain jouduit sä maaksi maatumaan.

(Viimeisen säkeen aikana pimenee huone. Leipämyymälän ikkunaan syttyy valot. Lumisade jatkuu.)

MYNTH. (Unissaan). Sarah! Lapseni! Apua, apua! (Herää nousten istumaan).

HELLÄ (Kiireesti vasemmalta.) Huusitte apua. Oletteko sairas ?

LEIPÄ MYYJÄTÄR. (Myymälän ovelta). Kuka huusi apua? (Huomaa miehen ja naisen. Tulee ulos.)

MYNTH. (Katselee kummastellen ympärilleen.) Taisin nähdä pahaa unta. (Ravistelee päätään.) Olenko ollut tässä jo kauankin?

MYYJÄTÄR. (Itsekseen.) Tuohan on sama mies joka kävi leipää pyytämässä. (Ääneen.) Siitä on noin kymmenen minuuttia kuin kävitte kaupassa. Oletteko maanneet koko tämän ajan kadulla.

MYNTH. Ah! Nyt muistan, olin aikeessa särkeä leipäkaupan ikkunan ja ottaa leipää, mutta mailma musteni silmissäni ja minä kaaduin. Tulin yht'äkkiä pahoin voivaksi nälästä ja menetin tajuntani. — (Pyyhkeilee kasvojaan.)

HELLÄ. Onko teillä nälkä?

MYNTH. Kyllä rouva, nälkä polttaa sisälläni kuin tuli.

HELLÄ. Miksi ette mennyt kauppaan ja pyytänyt leipää?

MYNTH. Minä kävin pyytämässä, mutta tämä neiti kielsi.

HELLÄ. Sepä sydämmetön teko; kieltää leipäpalan nälkäiseltä.

MYYJATÄR. Olen kovin pahoillani, en aavistanut että tilanne oli näin vakava. Kas täällä käy leivän pyytäjiä kymmenittäin joka päivä, ei heille kaikille voi antaa. Mutta teille tuon pussillisen, odottakaa.

(Aikoo menä, mutta Hellä tekee torjuvan liikkeen kädellään.)

HELLÄ. EI tarvitse, säästä se jollekin toiselle. (Kääntyen mieheen). Jaksatteko seurata miuua? Kotini on tästä pari kadun väliä. Siellä saatte levähtää ja kuivata vaatteenne, nehän ovat aivan likomärät.

MYNTH. (Nousee vaivaloisesti.) Kiitos rouva. Voin tuskin uskoa korviani, teidän siunatut sananne ovat kuin lämmittävä aurinko; ne ovat myöskin ensimmäiset säälivät sanat mitä osakseni on tullut koko tällä kurjalla matkallanni. (Poistuvat yhdessä)

ESIRIPPU.

* * *

Toinen Näytös.

NÄYTTÄMÖ:— Tietoisen asunto. Avara kodikas huone, puolittain keittiö ja puolittain oleskeluhuone. Vasemmalla keittiön uuni jonka päällä on pari kattilaa kiehumassa. Keskellä huonetta on puolittain katettu ruokapöytä. Peräseinällä ulko-ovi ja ikkuna jonka edessä on pöytä, oikealla kirjahylly ja ovi. Sanomalehtiä, julkaisuja ja kirjoja on ympäri huonetta silmäänpistävässä epäjärjestyksessä.

(Esiripun noustessa istuu Tietonen lukien sanomalehteä. Helmi kirjoittaa ja Harry lukee ikkunapöydän ääressä.)

HELMI. (Heittää kärsimättömästi kynän kädestään, nousee mennen Tietosen luokse). Isä, voisitko antaa minulle erikoisen aiheen ainekirjoitustani varten? En osaa itse ajatella mitään tyydyttävää.

TIETONEN. No, voisithan esimerkiksi kirjoittaa siitä, mitä käsität isänmaallisuudella.

HELMI. Mutta jos kirjoittaisin siitä täytyisi minun sanoa toisin kuin mitä koulussa opetetaan, sillä sinä olet opettanut, että työläisten isänmaa on kaikkialla missä hän voi leipänsä ansaita.

HARRY. (On seurannut keskustelua). Helmi ei uskalla sanoa mitä hän ajattelee.

HELMI. En minä pelkää, eihän siinä ole mitään pahaa eikä väärin jos uskon isää enempi kuin opettajaa. Mutta minä tiedän että opettaja ei tykkää jos sanon, että työläisten lasten velvollisuus ei ole rakastaa tätä maata enempi kuin jotain toista maata.

TIETONEN. Mutta ethän sinä kirjoita miellyttääksesi kuinka hyvin ja selvästi voit ajatuksesi esittää kirjoitetussa muodossa.

HELMI. Kiitos isä. Minä alan kirjoittaa heti. Luen sen sinulle sitten kun se on valmis.

HARRY. Minä en koskaan pelkää sanoa mitä ajattelen. Opettaja on sanonut, että tämä on vapaa maa missä jokaisella on oikeus julkilausua ajatuksensa.

TIETONEN. Niinhän sitä sanotaan, mutta joskus tulet sinäkin poikani huomaamaan, että ne opetukset eivät pidä paikkaansa jos ne julkilausutut ajatukset ovat ristiriidassa hallitsevan luokan etujen kanssa.

(Ulko-ovelta kuuluu liikettä.)

HARRY. (Menee ovelle). Äiti varmaankin tulee. (Avaa oven).

HELLÄ. (Pysähtyy ovelle puhuen ulos.) Jättäkää sinne eteiseen päällystakkinne ja kenkänne, minä annan teille kuivat vaatteet. (Sulkee oven laskien kantamuksensa pöydälle.)

HARRY. Äiti kuka siellä on?

HELLÄ. Siellä on eräs nälkäinen setä, mutta mene nyt valmistamaan läksyjäsi äläkä ole utelias.

TIETONEN. Kenen sinä nyt olet tuonut tullessasi?

HELLÄ. (Laskien kätensä miehensä kaulaan). Tapasin kadulla nälästä pyörtyneen miehen, hänen vaatteensa ovat riekaleina ja sateesta likomärät; toin hänet lämmittelemään ja syömään.

TIETONEN. Minusta on viime aikoina näyttänyt, että kotimme alkaa olla kuin kestikievari. Tuskin menee yhtään päivää ettei täällä ruokita ja pueta joku kulkuri; tuo sinun hyväntahtoisuutesi ja auttavaisuutesi menee liian pitkälle. Tarkoitukseni ei ole moittia sinua siitä, mutta kun elämme itsekin ahtaalla ja kädestä suuhun eikä tästäkään toimeentulosta ole varmuutta kuinka kauan se kestää, pitäisi sitäkin vähäistä käsitellä vähän tiukemmin. Auttakoon ne joilla on mistä auttaa.

HELLÄ. Mutta raskas ystävä, enhän voinut jättää avutonta ihmistä kadulle kuolemaan. Mitä olisi minun pitänyt tehdä?

TIETONEN. Sinä olisit voinut toimittaa hänet sairaalaan, tai jättää poliisien huostaan, eikä raahata kotiimme kaikkia tuntemattomia, joidenka elämästä meillä ei ole pienintäkään tietoa; eihän tiedä vaikka tuokin olisi joskus seisonut pyssyhurttana lakkolaisia vastaan ja sellais . . . (Ovelle koputetaan.)

HELLÄ. (Painaa kätensä miehensä suulle). Ole vaiti. (Kiiruhtaa ovelle avaten sen). Tulkaa sisälle lämmin tuntuu varmaankin hyvälle.

(Mynth tulee paljoin jaloin ja paitahihasillaan.)

HELLÄ. (Asettaa tuolin uunin eteen). Istukaa tähän, minä tuon kuivia vaatteita ja sitten lämmitän maitoa. (Poistuu oikealle.)

(Mynth istuu epäröiden katsellen arasti ympärilleen. Tietonen lukee lehteään lainaamatta hänelle vähintäkään huomiota.)

HELLÄ. (Tuo vaatteita). Vetäkää nämä villasukat jalkaanne ja tässä on myöskin kengät, huomasin että teidän kenkänne ovat aivan käyttökelvottomat. Tämä villapaita on myöskin teitä varten.

MYNTH. Kiitos rouva. (Vetää sukat ja kengät jalkaansa). Tämä tuntuu aivan uskomattomalta, niinkuin ihmeellinen satu. (Itsekseen). Ehkä tämä onkin vaan unta, (nipistelee itseään). Ei kyllä minä olen hereillä, mutta tällaista vieraanvaraisuutta ja hyvyyttä ei ole vielä koskaan osakseni tullut. Kuinka kodikas ja suloinen tunnelma täällä vallitsee ja tuo nainen, hän on ihanampi kuin enkeli. (Pukee villapaidan ylleen.)

HELLÄ. (On lämmittänyt maitoa, tarjoaa sitä kulkurille). Kas tässä, juokaa tämä ensi hätään, se lämmittää sisäisesti; pian joutuu ateriakin.

MYNTH. Kiitos . . . Teidän hyvyytenne lämmittää vielä enempi. (Juo maitoa. Tuon tuostakin luo katseensa vaistomaisesti pöydän luona istuviin lapsiin.)

HELLÄ. (Toimittaa ruokaa ja astioita pöytään. Kuiskaa miehelleen:) Puhu hänelle, äläkä murjota. (Poistuu ulko-ovesta.)

TIETONEN. (Lopettaa lukemisensa ja menee kulkurin luo). Hyvää iltaa.

MYNTH. (Nousee seisomaan). Hyvää iltaa. Suokaa anteeksi, että olen tullut häiritsemään teidän rauhallista iltahetkeänne; se tapahtuu aivan vasten tahtoani, olen ventovieras tässä kaupungissa ja melkein huonommassa asemassa kuin koditon kulkukoira.

(Hellä tulee, tuoden kulkurin päällystakin, ripustaen sen uunin lähelle kuivamaan.)

TIETONEN. Mistä päin maailmaa se vieras on?

MYNTH. Silloin kuin minulla vielä oli vakituinen työ asuin New Yorkissa, nyt ei minulla ole olinpaikkaa missään. Tulin tänne Boisesta viime yönä. Koko päivän olen etsinyt työtä ja ruokaa, mutta turhaan, kunnes vaimonne löysi minut kadulta melkein nääntyneenä ja toi kotiinsa Hänen hyväntahtoisuutensa on minulle kerrassaan käsittämätöntä.

TIETONEN. (Hymyillen). Minulle se ei ole mitään uutta, meidän äiti antaa vaikka ainoan hameensa tarvitsevalle.

HELLÄ. (Luo mieheensä nuhtelevan katseen. Kääntyen vieraaseen). Ei se ole hyväntahtoisuutta niinkään paljon kuin toveruus tunteen synnyttämää myötätuntoa kaikkia puutetta kärsiviä kohtaan.

MYNTH. (Hämmästyen). Toveruustunteen!

HELLÄ. Niin, me olemme luokkatovereita, meitä on miljoonia. Toiset meistä ovat vajonneet syvemmälle puutteen ja kurjuuden kuiluun, sen tähden kun ovat joutuneet tuotannosta syrjään. He eivät ole voineet myydä työvoimaansa. Sama näkyy olevan sinunkin kohtalosi, toveri.

MYNTH. (Itsekseen). Hän kutsuu minua toverikseen. (Ääneen). Rouva ei siis ajattele, että minä olisin oman kelvottomuuteni tähden joutunut näin huonoon asemaan.

HELLÄ. Ei, sitä en ajattele en edes epäile, sillä minä tiedän ne syyt, tunnen sen häpeällisen kirouksen mikä työväenluokkaa painaa. Odottakaa haluan näyttää teille jotain. (Hakee kirjahyllyltä nipun lentolehtisiä.)

Kas tässä pieni lentolehtinen, annan niitä useampia lukekaa se tarkkaan ja kulkeissanne jakakaa toisille osatovereillenne. Siinä on vastaus työttömyys kysymykseen, jota ei monikaan käsitä. Minun pieni poikani kertoi opettajansa sanoneen koulussa, että nykyistä tilannetta ei ymmärrä kuin muutamat suurmiehet jotka ovat tutkineet taloustiedettä ja että he parhaan kykynsä mukaan yrittävät päästä onnelliseen ratkaisuun. Mutta tässä pienessä lehdessä muutamin sanoin paljastetaan koko totuus ja siinä selitetään myöskin se mikä olisi suorin ja pikaisin tie päästä tästä kaaoksesta.

MYNTH. (Ottaa lehdet silmäillen niitä. Hetken kuluttua lukee ääneen:) Jos haluat auttaa itseäsi. Jos haluat ratkaista työttömyys kysymyksen. Jos haluat kuulua siihen työläisarmeijaan, joka tahtoo tehdä maailman kunnolliseksi kaikkien työläisten asuttavaksi. Jos haluat olla mukana siinä tehtävässä niin yhdy Mailman Teollisuus Työläisten Liittoon.

TIETONEN. (Keskeyttäen hänen lukunsa). Se on suora vetoomus kaikille työssä käyville ja työttömille työläisille. Oletteko te kuuluneet mihinkään työväen järjestöön?

MYNTH. Työssä ollessani kuuluin ammattialani unioon.

TIETONEN. Kuinka kauan olette ollut työttömänä?

MYNTH. Siitä on jo kaksi vuotta kun menetin työpaikkani. Sen jälkeen ei minulle ole ollut mitään vakituisempaa työtä. Kahdeksaan kuukauteen en ole ansainnut senttiäkään, ruokani olen saanut kerjäämällä.

HELLÄ. (On saanut ruokapöydän valmiiksi). Pyytäisin teitä siirtymään tänne ruokapöydän ääreen istumaan, tulkaa tekin lapset, että joudutte ajoissa vuoteeseen.

(Kaikki asettuvat istumaan pöydän ympärille. Hellä täyttää jokaisen lautasen tarjoten kulkurille ensimäiseksi.)

MYNTH. (Ahnaasti syöden). Siitä on pitkä aika kun olen ollut tilaisuudessa aterioimaan näin. Tuntuu melkein kuin olisin oman perheeni keskellä.

HELLÄ. Teilläkin on siis vaimo ja lapsia, jotka odottavat isää tulevaksi kotiin.

MYNTH. Kyllä rouva, minulla on vaimo ja neljä lasta.

TIETONEN. Missä teidän perheenne on?

MYNTH. Jätin heidät New Yorkiin. Siitä on jo toista vuotta kun olin pakotettu jättämään heidät työn etsinnän tähden, jota en ole onnistunut saamaan vieläkään, edes sen vertaa, että voisin saada kunnolliset vaatteet päälleni ja säännöllisesti syödä. (Hänen kasvonsa värähtelevät mielenliikutuksesta.)

TIETONEN. Samanlainen kohtalo on tullut niin monen työläisen osaksi. Jospa se edes avaisi heidän silmänsä ja opettaisi heitä käsittämään sen, että niin kauan kun pysymme järjestymättöminä me saamme kulkea nälkäisinä ja kodittomina. Sillä ainoastaan järjestynyt työväestö kykenee taistelemaan järjestynyttä kapitalismia vastaan.

HELLÄ. (Kulkurille). Kertokaa meille jotain elämästänne. Minä olisin halukas kuulemaan, sillä vaikka me kaikki kuulummekin samaan köyhälistölaumaan, on meillä jokaisella kuitenkin oma tarinamme mikä muodostaa henkilökohtaisen yksilöllisyytemme.

MYNTH. Minun elämässäni ei ole mitään mielenkiintoista. Se on samanlainen kuin tuhansien toistenkin pohjamudassa matelevien. Elämä oli jotakuinkin siedettävää niinkauan kuin sain tehdä työtä, mutta kun sen saanti väheni ja viimein kokonaan loppui, olen elänyt kiduttavan epätoivon partaalla.

Vaimoni onnistui saamaan paikan erääseen pesulaitokseen. Mutta vaikka hän raatoikin pitkiä päiviä oli palkka niin pieni, että se hädin tuskin riitti ruokaan ja vuokran maksuun kurjasta asunnostamme. Lähdin kodista etten olisi kuluttamassa, kun kerta en voinut mitään tuodakaan. Olen kuljeskellut paikasta toiseen vain yhden ainoan toivon kannustamana, saada työtä voidakseni auttaa kotona olevia. Ensin alussa sainkin pieniä väliaikaisia töitä ja voin hiukan lähettää rahaa, mutta nyt en ole enään pitkään aikaan antanut itsestäni mitään tietoa.

Eihän minulla enään viime kuukausina ole ollut kirjoitusvälineitäkään eikä paikkaa missä kirjoittaa. Päivät kuljeskelen ja yöt vietän missä sattuu toisten samanlaisten kanssa tyhjissä tavaravaunuissa, varastohuoneiden ja siltojen alla. Siellä on meidän mailmamme, kurjien maailma.

Siellä on nuoria, elämänhaluisia miehiä. He unelmoivat työpaikasta, puhtaasta asunnosta, kunnollisista vaatteista ja iltakävelystä lemmittynsä rinnalla. On vanhuksia työn köyristämin jäsenin, joilla ei ole lepopaikkaa eikä kotilieden lämpöä missään, ei edes unelmissakaan. Heidän mielikuvituksensa on tylsistynyt, he eivät odota enään muuta kuin kuolemaa. On perheen isiä kuten minäkin, joilta vaimo ja lapset ovat jääneet oman onnensa nojaan pirstaantuen hajalleen sinne tänne.

HELLÄ. (Pyyhkien kyyneleitä silmistään). Kuinka sanomattoman paljon kärsimyksiä, tuskaa ja kyyneleitä kätkeytyy siihen mitä olette kertoneet. Teidän sananne ovat kuin taiteilijan kynän piirrokset. Ne ovat värittäneet katseltavakseni maailman, jossa ei ole valoa eikä lämpöä, ainoastaan mustat varjot levittävät siipensä kaiken yli. Sammuttavat liekehtivät toiveet, tukahduttaen, ilon ja naurun, kasvattaen vain vihaa ja epätoivoa. (Hän painaa päänsä alas kyynelten vieriessä poskille.)

TIETONEN. (Leikkiä laskien). No, äiti ei itku markkinoilla auta.

MYNTH. Olen hyvin pahoillani...

HELLÄ. (Nostaen päänsä, keskeyttää hänet). Älkää välittäkö, kyyneleet ovat aina lähellä silmiäni, ne huuhtelevat surut mielestäni ja tuovat lievennystä.

TIETONEN. Meidän äiti iloitsee iloisten kanssa ja itkee onnettomien kanssa.

HELLÄ. (Kulkurille). Sanoitte että on kulunut kuukausia siitä kuin viimeksi kirjoititte vaimollenne. Tehkää se nyt, minä annan paperia ja kynän ja postimerkillä varustetun kirjekuoren. — (Nousee puhuen lapsille).

Puhdistakaa pöytä, niin setä voi kirjoittaa kirjeen kotiinsa jossa hänen pienet lapsensa ikävöiden odottavat isää, tai ainakin jotain tietoa hänestä. (Poistuu oikealle.)

(Helmi ja Harry alkavat tyhjätä pöytää, työnsä lomassa puhutellen vierasta.)

HELMI. Onko sedällä tyttöä?

MYNTH. (Ilostuen.) Kyllä lapseni, minulla on kolme tyttöä, nuorin heistä on pian neljän vuoden ikäinen. Hänellä on vaaleat kiharat, suuret siniset silmät ja poskilla viehkeät hymykuopat.

HELMI. Sitten hän on aivan minun nukkeni näköinen.

MYNTH. Hän on kaunis kuin nukke, sen vuoksi alommekin kutsua häntä nimellä "Nukke".

HELMI. (Naurahtaen.) Niinkö.

HARRY. Onko sedällä poikaa?

MYNTH. Kyllä. Hänen nimensä on Walter ja hän on kahdeksan vuoden vanha. Lupasin lähettää hänelle veitsen, sillä hän niin mielellään rakentelee laivoja. Mutta minä en ole voinut vielä sitä lähettää.

HARRY. Minulla on kaksi viestä, taskuveitsi ja puukko, Walter saa minun taskuveitseni.

MYNTH. Sinä olet kerrassaan hyvä poika, mutta en tiedä voinko tarjoustasi ottaa vastaan.

HELLÄ. (Tulee kynän ja paperin kanssa.) Kas tässä kirjoitusvälineet. Voitte siis alkaa kirjoittaa kauan laiminlyötyä kirjettänne vaimollenne.

MYNTH. Kiitos. (Alkaa kirjoittaa.)

HARRY. Äiti saanko lähettää taskuveitseni sedän pojalle. Hän osaa tehdä laivoja, mutta hänellä ei ole veistä eikä sedällä ole rahaa millä ostaa sen hänelle.

HELMI. (On hakenut nukkensa). Äiti saanko minä lähettää tämän nuken? Sedällä on tyttö joka on aivan tämän nuken näköinen ja hänen nimensäkin on "Nukke".

MYNTH. (Katsoen hymyillen lapsia.)

HELLÄ. Jopa te ehditten onkia tietoonne monia asioita. Tietysti te saatte tehdä lahjoituksenne. Huomena laitamme paketin valmiiksi johon panemme pienen lahjan jokaiselle heistä. Mutta menkää nyt valmistamaan kotityönne, pian on vuoteeseen menon aika.

(Lapset menevät ikkunapöydän luo ryhtyen työhönsä.)

MYNTH. Te oletten onnellinen isä ja äiti omistaessanne noin miellyttäviä lapsia. Jospa minäkin voisin olla lasteni luona. (Jää miettiväisenä tuijottamaan eteensä.)

(Hellä ryhtyy astioita pesemään. Tietonen on istunut koko ajan pöydän vieressä missä Mynth kirjoittaa, lukien lehteä.)

TIETONEN. Tässä lehdessä on uutinen, että eräs äiti New Yorkissa on tappanut itsensä ja neljä lastaan, kaasulla. Naisen nimi on Sarah Mynth.

MYNTH. (Hypähtää ylös rajulla liikkeellä kaataen tuolin.) Sarah Mynth? Voi onko siinä niin?

TIETONEN. (Hämmästynee nä). Kyllä, katsokaa itse. Siinä on myöskin lasten nimet ja ikä.

MYNTH. (Sieppaa lehden kiihkeästi, silmäillen sitä hätäisesti. Lukee katkonaisesti) —

Löydettiin... viisi — sinertävää ruumista... Sarah Mynth ja hänen neljä lastaan. Nora, kymmen vuotias, Walter kahdeksan vuotias, Mary kuusi vuotias ja Lily neljän vuoden. (Puristaen lehteä käsissään vaipuu istumaan tuolille, jonka Hellä on nostanut pystyyn). Lily minun kaunis nukkeni... Voi minua onnetonta. Voi mitä olenkaan saattanut aikaan.

HELLÄ. (Laskien kätensä kulkurin kumartuneille hartioille). Kuolema on varminta mitä ennakolta voimme laskea tulipa se sitten kutsuttuna tai kutsumatta. Se on jok'ikisen yksilöllisen olion välttämätöin kohtalo ja loppu. Se suo ihmiselle levon, suuren ja syvän hiljaisuuden, jota ei mikään voi häiritä.

TIETONEN. Toveri! Älä syytä itseäsi perheesi ennenaikaisesta kuolemasta. Ei ole syytä vaipua epätovoon. Sellaista tapahtuu joka päivä ja tulee tapahtumaan niin kauan kuin köyhälistöluokka, sinä ja minä ja ne sadat tuhannet miehet ja naiset eivät käsitä järjestymisen tarpeellisuutta. Eivätkä tunne yksimielisyyden voimaa liittyäkseen yhteen suureen unioon.

Se on ainoa keino työläisille pakottaa tuotantolaitosten omistajia hellittämään sitä huippuunsa asti kehittynyttä riistoa, joka polkee työläisen elämän osuuden nälkärajaan. Se hajottaa kodit ja särkee perheet. Se on tullut sinunkin osallesi. Vapaasta tahdostasi et jättänyt perhettäsi. Ei ollut sinun syysi ettet ole saanut työtä.

HELLÄ. Mutta yhteen rikokseen olet syypää monien muiden mukana. Se rikos on järjestymättömyys. Sen seurauksista kärsimme nyt kaikin kukin tavallamme. Ymmärrän hyvin sen pohjattoman hädän joka johdatti vaimosi niin epätoivoiseen ja kaameaan tekoon.

Kuolema on helpompi kuin puutteen ja kärsimysten painama elämä. Mutta niin kauan kuin elää on kauniimpaa ja arvokkaampaa taistella oikeuksiensa ja paremman elämän puolesta kuin ruoskitun koiran tavoin luimiskella piilossa tai muruihin tyytyen taipua iskujen alle.

MYNTH. (Nousee, ottaen liikutettuna Hellän käden). En voi kylliksi kiittää teitä sanoistanne. Kuinka kauniisti te kuvasitte kuoleman. En ole osannut ennemmin ajatella sitä sellaiseksi. Se on ystävä ja vapauttaja. Mutta niin kauan kuin elää on todellakin kauniimpaa taistella senpuolesta. Uskaltaa kaikki ja voittaa kaikki.

Tästä illasta lähtien ovat tekoni ja toimeni saava uuden käänteen. Vaimoni ja lasteni veri huutaa kostoa. Heidän muistonsa ei ole jättävä minua rauhaan hetkeksikään. Ajatelkaa... viisi sinertävää ruumista kylmän kellarikerroksen lattialla. Minun vaimoni ja lapseni.

Nälkä ajoi heidät ennenaikaiseen kuolemaan mailman rikkaimmassa kaupungissa, missä varastohuoneet ovat täynnä ravintoaineita, missä loistavat palatsit ylpeillen upeilevat, sulkien suojiinsa ylellisyydessä hekumoivat elostelijat, jotka ratsastavat kylläisyyden kukkuloilla meidän typeryytemme kustannuksella. (Nauraa katkerasti.)

(Puolisot ovat kuunnelleet hänen puhettaan ihmetyksen vallassa.)

HELLÄ. Teissä on rohkeutta ja miehuutta enempi kuin osasin odottaa.

MYNTH. Sen olette te saaneet aikaan, siunattu ymmärtäväinen työläisäiti. Te toitte minut, kurjan kulkurin lämpöiseen kotiinne. Ravitsitte nälkäni ja täytitte mieleni uusilla valoisilla tulevaisuuden kuvilla. Osoititte päämäärän, jonka saavuttamiseksi kannattaa elää ja työskennellä.

TIETONEN. Oikein puhuttu toveri. Me voimme poistaa työttömyyden ja siitä johtuvan kurjuuden ainoastaan yhdellä tavalla, se on järjestymällä aikaamme vastaavalla tavalla yhteen suureen unioon. Vasta silloin olemme kyllin voimakkaita vaatimaan lyhempää työpäivää ja korkeampaa palkkaa.

MYNTH. Kiitän sattumaa, mikä johdatti askeleeni niin, että sain tilaisuuden viettää tämän illan teidän seurassanne. Vaikka minulla ei olekaan tietoa taasen huomisen päivän leivästä, tunnen itseni henkisesti kuin uudesti syntyneeksi. Nyt lähden, olen jo kyllin kauan häirinnyt kotirauhaanne. Ehkä takkini on jo kuiva. (Ottaa takkinsa aikoen pukea sen jäälleen mutta huomaa villapaidan.) Olinpa vähällä unhoittaa tämän villapaidan päälleni ja nämä kengät. (Aikoo riisua paidan.)

HELLÄ. Ne ovat teidän jättäkää ne päällenne. (Ottaa pöytälaatikosta rahan ja pistää kulkurin käteen). Kas tässä, nukkukaa ainakin ensi yö vuoteessa.

MYNTH. (Ottaa rahan liikutettuna). Ehkä joskus valkenee sekin päivä, että voin hyvyytenne palkita. (Ottaa lentolehtiset). Hyvää yötä, minä painun takaisin tuntemattomuuteen josta tulinkin.

HELLÄ. Mutta älkää unhoittako, että suuret ja vakavat asiat lähentävät meitä toisiimme, ei ainoastaan meitä ,mutta koko köyhälistöluokkaa.

MYNTH. (Astuu lasten luo, puristaen kummankin kättä yhtaikaa.)

HELMI. Minä olisin niin mielelläni lähettänyt nukkeni sedän pikku tytölle.

HARRY. Ja minä veitseni Walterille, mutta he eivät tarvitse niitä enään.

MYNTH. (Ei voi puhua liikutukseltaan. Mennen ovelle kääntyy katsomaan taakseen, sanoen värähtelevin äänin:) Jääkää hyvästi. (Poistuu.)

HELLÄ. (Kiiruhtaa ovelle). Hyvää yötä ja parhainta onnea. (Menee miehensä luo). Vieläkö olet minulle vihainen?

TIETONEN. Sinulle ei voi kukaan olla vihainen. Minä en vaihtaisi sinua omaan painoosi kultaan, vaikka taasen lahjoititkin pois työkenkäni ja ainoan villapaitani. (Sulkee Hellän syliinsä.)

HELLÄ. Kiitos noista sanoistasi. Sinä olet parhain toveri mitä kukaan voi olla. Lapset tulkaa tänne. (Helmi ja Harry tulevat. Hellä asettaa heidät seisomaan niin että Harry tulee isänsä ja Helmi äitinsä eteen.) Ennenkuin sanomme toisillemme hyvää yötä lausumme iltarukouksemme yhteen ääneen. (Kaikki lausuvat:)

"Työväenluokalla ja työnantajaluokalla ei ole mitään yhteistä. Mitään rauhaa ei voi olla niin kauan kun nälkää ja puutetta on olemassa miljoonilla työläisillä, ja niillä harvoilla jotka muodostavat työnantajain luokan, on kaikki elämän hyvyydet."

Esirippu.

* * *

Menossa Eteenpäin

Meille suomenkieltä puhuville työläisille täällä Amerikassa on tuttua se, että seuratoimintamme kesäisten velttouksien vaikutuksista vapautuessa ja siirtyessä talventullen tiukempaan toimintamuotoon haaleillemme, me havaitsemme eloistumista kaiken yhteisen kulttuuri ja valistustyömme vainioilla. Me menemme eteenpäin. Meidän valistusvälineemme, koulumme, lehtemme ja julkaisumme, vieläpä puhuttu sanakin, menee eteenpäin.

Olemme jälleen tänä syystalvena havainneet, että tämä julkaisumme Tie Vapauteen on myös menossa eteenpäin. Siihen on aivan johdonmukaiset syynsä. Yhteistoimintamme on siirtynyt haaleille. Joukkomme kerääntyvät sinne, missä on eloa ja toimintaa. Siellä on julkaisumme asiakkailla mahdollisuus vähemmällä vaivaa tavata useampia sellaisia, joille voi tarjota Tie Vapauteen. Ja ihminen on sellainen, että se etsii aina helpoimman tien. Myyjiä saa helpommin.

Edellisen numeron asiakkailta joiltakin on jo saapunut rohkaisevia tiedotuksia, että he ovat löytäneet Tie Vapauteen ostajia helpommin kuin löysivät niitä kesän aikana. Tämä on menoa eteenpäin ja rohkaisee meitä kaikkia yrittämään parhaamme että sitä menoa riittäisi edelleen ja että vielä vauhtikin nopeistuisi. Kun voisimme samalla joukkona toimia siten, että julkaisumme sisältö elostuisi ja teroittuisi tarkoituksensa mukaan, joutuisimme nopeammin eteenpäin.

On muistettava, että mikään järjestömme valistusväline ei voi koskaan tulla niin täydelliseksi, niin kuntoiseksi, että sillä ei olisi enään tarve pyrkiä eteenpäin. Sellainen, joka olisi täydellinen, olisi uskovaisen jumala, paras mitä tunnetaan siinä piirissä, eikä siihen voi mitään lisätä. Mihin se veisi? Lukija hyvin voi itse siihen vastata. Meidän järjestömme valistusvälineillä on aina tarkoituskin sisällöllisesti paremmin joukkoja tyydyttää.

Kun onnistumme tarkoituksissamme, joihin ei ole kannustimena yksilöllinen etu, vaan koko luokkamme suuri asia ja sitä eteenpäin taistelevan järjestömme I. W. W:n asia, antaa se meille voimia yrittää. Voittaja tuntee itsensä aina uusilla voimilla varatuksi. Kun me joukkona voitamme tälle julkaisulle tuhannen lukijaa entisten lisäksi tänä talvena, tunnemme me silloin itsemme tuhannen tukea vahvemmaksi. Sellainen kannattaa yrittää, se ataa intoa elämään ja tarmoa pyrkiä eteenpäin.

INDUSTRIAL WORKERS OF THE WORLD

ELVINYILATKOZATA

A MUNKÁSOSZTÁLY és a munkáltató osztály között semmi közösség nincsen. Nem lehet béke mindaddig, amig éhség és nélkülözés található a dolgozó emberek milliói között s az élet összes javait ama kevesek birják, akikből a munkáltató osztály áll.

● E két osztály között küzdelemnek kell folynia mindaddig, mig a világ munkásai mint osztály szervezkednek, birtokukba veszik a földet, a termelő eszközöket és megszüntetik a bérrendszert.

● Ugy találjuk, hogy az iparok igazgatásának mind kevesebb és kevesebb kezekbeni összpontosulása a szakszervezeteket (trade unions) képtelenné teszi arra, hogy a munkáltató osztály egyre növekvő hatalmával felvegyék a küzdelmet. A szakszervezetek olyan állapotot ápolnak, amely lehetővé teszi, hogy a munkások egyik csoportját az ugyanazon iparban dolgozó másik csoport ellen uszitsák és ezáltal elősegitik, hogy bérharcok esetén egymást verik le. A szakszervezetek segitenek a munkáltató osztálynak a munkásokba beoltani ama tévhitet, hogy a munkáltatókkal közös érdekeik vannak.

● E szomoru állapotokat megváltoztatni és a munkásosztály érdekeit megóvni csakis olykép felépitett szervezettel lehet. melynek minden az egy iparban — vagy ha kell, valamennyi iparban — dolgozó tagjai beszüntessék a munkát bármikor, ha sztrájk vagy kizárás van annak valamelyik osztályában, igy az egyen esett sérelmet az összesség sérelmének tekinti.

● E maradi jelszó helyett: "Tisztességes napibért tisztességes napi munkáért," ezt a forradalmi jelszót irjuk a zászlónkra: "LE A BÉRRENDSZERREL!"

● A munkásosztály történelmi hivatása, hogy megszüntesse a bérrendszert. A termelő hadsereget nemcsak a tőkésekkkel való mindennapi harcra kell szervezni, hanem arra is, hogy folytassa a termelést akkor, amikor a bérrendszer már elpusztult. Az ipari szervezkedéssel az uj társadalom szerkezetét épitjük a régi társadalom keretein belül.

AMERIKAI ÜNNEPEK:
Szept. első hétfője: Labor Day. (Máj. 1. A nemzetközi munkásünnep ellensulyozására.)

1. Daugherty tiltóparancsot vesz ki a sztrájkoló vasuti mühelymunkások ellen, 1922.

2. A Progressive Miners Union megalakulása, Gillespie, Ill.-ban, 1932.

3. A nemzetközi munkásszövetség 1-ső Internacionálé kongresszusa, 1866. — A szocialista pártból kiszakadt balszárny két pártot alakit, a kommunista pártot és a kommunista munkáspártot, 1919. — Japán földrengésben 350,000 ember és sok város pusztult el, 1923.

4. III-ik Napoleon királyságának megdöntése. Kikiáltják a harmadik közrtársaságot, 1870.

5. A zimmerwaldi szocialista konferencia, a háboruellenes akció és béke előmozditására, 1915.

6. McKinley elnököt megöli az anarkista Czolgosz, 1901. — Károlyi Mihály Cegléden a megegyezéses békét sürgeti, 1918.

8. A szakszervezeti kongresszus 5,250,000 munkás képviseletében a direkt akció mellett, 1910. — Rendőrsztrájk Bostonban, 1919.

9. A felszabadult gyarmatország felveszi az Amerikai Egyesült Államok nevet, 1779. — Tolstoj Leo * 1828. (Meghalt 1910. november 20.)

1b. Dante † 1321. — E. M. Wiggins szövőmunkásnőt meggyilkolták a kapitalista bérencek Gastoniában, 1929.

15. Kepler csillagász † 1630. — A monarchia békejavaslata az összes országokhoz, 1918.

16. F. M. Bratcher, Kentucky, Harlani szénbányász harmadszori felmentése a gyilkosság vádja alól, 1932.

17. Az Egyesült Államok alkotmányát elfogadja a szövetségi kongresszus, 1878.

18. 400,000 acélmunkás sztrájkja 24 országos szakegylet (A. F. of L.) közös bizottságának vezetése alatt, amelynek Wm. Z. Foster volt az elnöke. A sztrájk három hónapig tartott, 1919. — Általános sztrájk Olaszországban, 1904.

19. Kossuth Lajos * Monokon, 1802.

21. A francia köztársaság kihirdetése, 1792.

27. Bulgária kiválik a központi hatalmak közül és külön békét kér, 1918. — Az I. W. W. Canadai adminisztrációjának első értekezlete, 1932.

28.. Népgyülés a St. Martins Hallban, Londonban, ahol az I. Internacionálé kiindult. — Jim Reynolds és Bill Burnett, Kentucky, Harlani szénbányászok három évre itéltettek, 1932.

29. Zola † 1902; 62 éves korában.

30. Szabó Ervin † 1918; 41 éves korában. — Csődöt mondott a szocialista-ellenes Bismarck-törvény 11 év után, 1890.

Egy kapitalista osztály van. Egy a munkásosztály is. Egynek KELL lenni a szervezetnek is.

1. Fulton Róbert első gőzhajója, 1809.

2. Első vasut az Egyesült Államokban, 1833. — Öt sztrájkoló szövőmunkás legyilkolása Marion, N. C.-ban, 1929.

3. William Morris, uttörő angol szocialista † 1896.

4. Megalakult a Western Federation of Miners, Butte, Mont., 1890. — Cle Elum, Wash. Gátépitő munkásainak sztrájkja az I. W. W. égisze alatt ujból győzelemmel végződött, 1932.

6. A tizenhárom tábornok kivégzése Aradon, 1849. — Általános sztrájk Pécsett, 1903.

7. Fresno-i (Calif.) I. W. W. szólászabadságharc, 1909.

8. Kossuth Lajos, Magyarország kormányzója lesz, 1848. — Batthány Lajos gróf megöletése, 1849.

12. Amerika felfedezése, 1492. — A német kormány elfogadta Wilson elnök feltételeit, 1918.

13. A chicagoi nagy I. W. W. pörben az ügyészség az I. W. W. elvnyilatkozatát találja a legfőbb vádpontnak, 17,220 törvénysértést sorol fel az I. W. W. ellen, 1918. — Francisco Ferrer kivégzése, 1909.

15. Az uj Georgiai naptár Rómában, 1582.

16. Mária Antoinette lefejezése, 1793.

18. A coloradoi nagy bányászsztrájk kezdete az I. W. W. irányitása mellett, 1927.

20. A Knights of Labornak 1,200,000 tagja volt 1888-ban; alakult 1869-ben. — Eugene V. Debs † 1926.

21. Adler Frigyes agyonlövi Stürgh miniszterelnököt Bécsben, 1916. — Németország elfogadja Wilson fegyverszünet feltételeit, 1918. — A gastoniai N. C. szövősztrájkban vádaláhelyezett 7 munkást 50 percnyi tárgyalás után az esküdtek 2-od fokon bünösnek találták Aderholt rendőrkapitány legyilkolásában és összesen 117 évre itélték el őket, 1929.

23. Általános sztrájk Oroszországban, 1905.

24. Daniel Webster † 1852. (Szül. 1782. jan. 18.) — Bethlen nyolc munkáslapot betilt, 1922.

25. Mayor McSweeney 73 napi éhségsztrájk után meghalt, 1920.

26. Charles Steinmetz † 1923.

31. Az "őszirózsás forradalom" Magyarországon: Károlyi kormányra jutása, 1918. — Tisza Istvánt meggyilkolják, 1918. — Az osztrák-magyar tengeri hajóhadat Horthy Miklós átadja a délszlávoknak, 1918.

AMERIKAI ÜNNEPEK:

Hálaadás napja a hónap utolsó csütörtökje.

1. Mussolini, az olasz fascisták élén hatalomra jut, 1922. — Egész Magyarország csatlakozik a forradalomhoz, 1918.
2. A német forradalom kezdete, 1918.
3. Spokane-i (Wash.) I. W. W. szólásszabadságharc, 1909.
5. Everett-i (Wash.) I. W. W. mészárlás, 1916.
6. A német császár lemond, 1918.
7. Bolshevik győzelem Oroszországban, 1917. — Felállitják a szovjetet. — A francia nemzetgyülés az ész vallását proklamálja, 1793. — Hittler, Ludendorff, Ulain fajvédő puccs csufos kudarccal végződött, 1923.
9. Ebert kancellár lesz, 1918.
10. Az orosz forradalmi kormány békeajánlata a központi hatalmaknak, 1917. — Az ántánt és Németország megköti a békét, 1918. — Vilmos császár és a trónörökös Hollandiába menekül, 1918.
11. Centralia (Wash.) Az I. W. W. Munkás Otthonban betörnek az American Legion parádéról; néhányan elesnek közülök. Wesley Everest-el meglincselik s később nyolc I. W. W. tagot 20-tól 40 évi börtönbüntetésre itélnek ebben az ügyben, 1919. — A haymarketi bombavetéssel gyanusitott anarkistákat, Spies és társait, ártatlanul kivégzik, 1887. — Németország aláirja a fegyverszüneti szerződést, 1918.
12. Dózsa Györgyöt, a magyarországi parasztforradalom vezérét tüzes vastrónon elevenen elégeti a magyar nemesség, 1514. — A "Vestris" gőzhajó elsüyedése, 1928. — A Bérmunkás ujból Clevelandon jelenik meg huszesztendős jubileumi számában 24 oldalon, 1931.
14. Hegel * 1831. — IV. Károly lemond a trónról, 1918. — A román megszálló csapatok kivonulása Budapestről, 1919.
15. Megjelenik az I. W. W. első magyarnyelvü lapja, a "Bérmunkás", 1912. — Hauptmann Gerhard * 1862. — Kepler csillagász † 1620.
16. Owen Róbert † 1858. — A magyar népköztársaság kikiáltása, 1918.
17. Az I. W. W. magyarnyelvü lapja, a "Felszabadulás", ujra felveszi eredeti nevét, a "Bérmunkás"-t, 1923.
19. Joe Hill, I. W. W. költő kivégzése, Salt Lake City, Utah, 1915.
21. Voltaire * 1604. — A lyoni selyemszövők fekelése éhinség miatt, 1881. — A coloradoi sztrájkoló bányászok legyilkolása a columbinei bánya előtt, 1927.
22. Babeuf * 1760. — Andre Tridon † 1922.
28. Friedrich Engels * 1929.
29. Small, Illinois állam kormányzója 20 kommunistának kegyelmet ad, 1922.

* — született; † — meghalt.

Az Industrial Workers of the World és a rendszer ujjászervezése

RALPH CHAPLIN
Az IWW hivatalos angol nyelvü lapjának szerkesztője

AZ IPAROK gyors fejlődése a termelési rendszert uj formákba kényszeritették. A napjainkban duló munkanélküliség nem muló jelenség, hanem maradandó és a társadalom minden felülépitményének ehez kell igazodni.

Hol áll az Industrial Workers of the World a jelen ujjászervezés periódusában? Él és müködik-e még a szervezet, vagy pedig az egykori hatalmas erőt és befolyást elhomályositotta egy maradandóbb, a viszonyoknak jobban megfelelő mozgalom és "modern" ideálok? Azon forradalmi ideál és cél, melyért az IWW oly kitartással és oly hosszu időn keresztül harcolt sérthetetlen-e még, vagy pedig elhomályosult és eltünt a jelenben duló ipari felfordulásban és politikai konfuzióban? Szükség van-e még ma is oly forradalmi ipari szervezetre amilyent az IWW hirdet és képvisel, vagy pedig a megváltozott viszonyok más összetételü szervezetet követelnek meg, mely uj utat nyit a munkásság számára és uj eszközökkel segiti elérni a végcélt? Ezek azok a kérdések, melyek sok munkás ajkáról hallatszanak az egész világon a jelen pillanatban.

Először is nem szabad elfelejtenünk. hogy az a tény, hogy az IWW ma létezik a csodával határos. Azon tény, hogy a szervezet funkcionált az ellene irányitott határtalan üldöztetés idején és a saját erejéből megállta a helyét az ezt követő időkben, letagadhatatlan bizonyitéka praktikus legyőzhetetlenségének. Bármely szervezet, a mely kevésbé gyökeredzik a munkás osztály szükségleteiben, már régen megsemmisült és feledésbe ment volna. Az IWW dacára a hónapokig és évekig tartó kérlelhetetlen terrornak, nem semmisült meg. Ma, bár a tagság harctépett és letört minden téren, kivéve a meggyőződés és bátorságban, sokkal nagyobb bizalommal néz a jövő elé mint bármikor a multban.

Távol attól, hogy a mult-é volna, mint ahogy ellenségei meggondolatlanul állitani szeretik, az IWW ma sokkal határozottabban érzi a felelősséget, hogy a világ forradalmi ipari unionizmusának megtestesitője és megbizható alapja. Ma sokkal határozottabb meggyőződése, mint bármikor a multban, hogy reá hárul az a történelmi szükségszerüség, hogy megszervezze a világ bérmunkásait az Egy Nagy Szervezetbe a mindennapi kenyérért folytatott harcokra és a végső harcra, a munkásosztály felszabaditására. És az IWW örömmel állapitja meg, hogy a szolidaritás üzenetét a munkás tömegek ma sokkal nagyobb megértéssel és lelkesedéssel fogadják, mint bármikor létezése óta.

Bármely tiszta gondolkozásu szemlélő megállapithatja, hogy az események igazolják az IWW helyes álláspontját. Nemcsak beteljesedett az IWW jövendölése a világháboru tragikus következményeit illetőleg, hanem az ezt követő állapotok meggyőző bizonyitékát szolgáltatták, hogy csak- litikai akciója mentheti meg az emberi is a munkásosztály IPARI és nem po- társadalmat az uralkodó osztály hatalomittas és gyülölettől elvakult pusztitásától. Ma már még a konzervativ nemzetgazdászok is elismerik amit az IWW egy negyed századdal ezelőtt megállapitott, nevezetesen — hogy csak a munkásosztály szervezett gazdasági ereje vethet véget nemcsak a

A HABOZÓKNAK

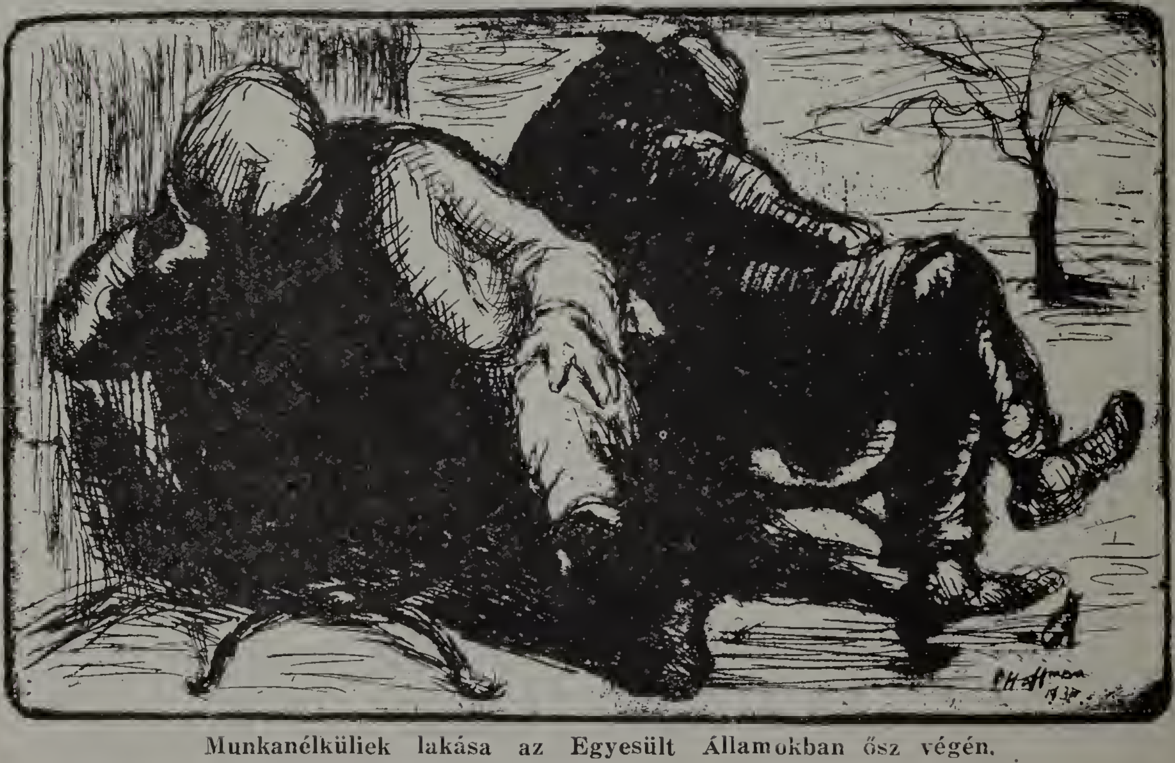
(Mondja egy habozó)

A Tegnap hiv, de vissza nem léphetek.
A Holnap csal, de nem repülhetek.
Egyik lábam előre, másik hátra huz
S mig tétovázva két parton merengek,
A Ma sodra alólam kirántja a talajt:
Rajtam áthömpölyög és halálra zuz.

jövő háboruinak és a munkanélküliségnek, hanem a kapitalista rendszernek is mely ezeket szüli. Az IWW nem szelidült meg az ellene folytatott embertelen üldöztetéstől. Ma sokkal elszántabb, sokkal határozottabb és sokkal tisztábban látó forradalmi szervezet, mint bármikor a multban. Nem csak ez áll, hanem az is tény, hogy az uralkodó osztálynak ez a kegyetlen üldözése az IWW-t a munkás milliók szivébe véste, akik bizalommal tekintenek rá, mert kiállta a tüzpróbát. Az IWW befolyása ma erőteljesebb mint valaha, mert nem alkudott meg, hanem megmaradt az egyenes uton. A jelenben bármely program, mely kevésbé radikális mint az IWW-é, nem megfelelő a munkásosztálynak.

Az utóbbi években az amerikai Kommunista Párt szövetségre lépett az IWW kérlelhetetlen ellenségeivel, azonban eddig ez a szövetség többett ártott a kommunistáknak, mint az IWW-nak. Az Egyesült Államokban a Kommunista Párt nem gyökeredzik az ipari életbe és még a jelen időkig senki sem vette komolyan. Azon kisérletükkel, hogy likvidálják és lerombolják az IWW-t és más "rivális" szervezeteket csak annyit értek el, hogy elszigetelték önmagukat ugy a konzervativ, mint a radikális szervezetektől.

A változó viszonyok között az IWW megerősödött bátorságban, tisztánlátásban és határozottságban. Tettre készségben éppen oly erős, mint valaha és éppen oly félelmetes. A végcélja — mindig is az volt és ma is; az Ipari Köztársaság és ennek elérésére még mindig a direkt akciót; a forradalmi ipari unionizmust tartja célra vezetőnek és nem az indirekt politikai vagy reform akciót. A jövő kulcsát még mindig az IWW tartja, mert összetételében van az embriója az Uj Társadalom szerkezetének.



Munkanélküliek lakása az Egyesült Államokban ősz végén.

Munkások védelme

HERBERT MAHLER

“MUNKÁSOK VÉDELME” ez a hivatása az Általános Védelmi Bizottságnak (General Defense Committee) G. D. C. hogy az izgalmas forradalmi történelmi időkben ami mostan Amerikába játszódik le. A győzelem órájában, a legsötétebb napok közepette hősiessen — drámaiasan győzelemre vigye a munkások igaz ügyét. Ez az egész története az egyszerü szavaknak “Munkások Védelme” és hogy az Általános Védelmi Bizottság mennyiben tölti be ezen hivatását. Nem találunk szavakat, amellyel kitudnánk fejezni a General Defense Committeenek az önfeláldozó müködését.

Egy pár szóval csak emlékezzünk azokról a főbb eseményekről, amelyek biztosan érdeklődést fognak kelteni.

Minden munkás küzdelembe a harcos elemek legtöbbnyire esnek áldozatul és hamis vádak alapján sok esetben a legkisebb büncselekménytől a legnagyobbik — gyilkossággal lesznek vádolva.

Mindig a kapitalisták használják a törvényszéket a munkások ellen, ha más eszközök már nem alkalmasak. Mert ők ugy látják, hogy hivatásánál fogva a törvényszékek sokkal jobban tudják szolgálni a kapitalista osztályt, mint a rendőr botok vagy katonai szuronyok.

Ahol azután nincsenek véres fejek, megsebzett, lelőtt áldozatok és erőszakosságok, hanem csak törvényileg “jogos” kivégzések a villamosszékbe ahol a biróságok hivatásuknak megfelelően végeznek el.

Ha ezek azután szabad kezet kapnak, mint egy tökéletes gépezet müködnek a munkások elnyomására.

A forradalmi munkások fölismerték, hogy milyen fontos és szükséges megvédelmezni a börtönbe került harcosokat. A munkás történelem telitve van ilyen eseményekkel, ahol sokszor megnyerték; de több esetben elvesztették a harcot a jogos védelembe. Ahogy az idők haladnak az ilyen tárgyalások napról-napra gyakoribbak, ami a védelmet még szükségesebbé teszi.

Az ügyvédek képesitve vannak, hogy harcoljanak sok esetbe a munkás ügyek megnyerésére és más sok esetben hasznos szolgálatot tettek; de egyedül nem alkalmasak.

Szervezetek szükségesek, amelyek minden támogatást nyujtanak.

A multban is mindig szerveztünk védelmi bizottságot, ha egy ügy, védelmi ügy felmerült és a tárgyalás végeztével mindig a védelmi bizottság is megszünt.

Ezek a védelmi bizottságok rendesen olyan elemekből kerültek ki, akiknek nem volt gyakorlatuk a védelem megszervezésében, a melyek azután nem tudtak megfelelően müködni sem.

Ezért alakitottuk meg a G. D. C.-t, a General Defense Committeet, amely 1917-ben lett megszervezve.

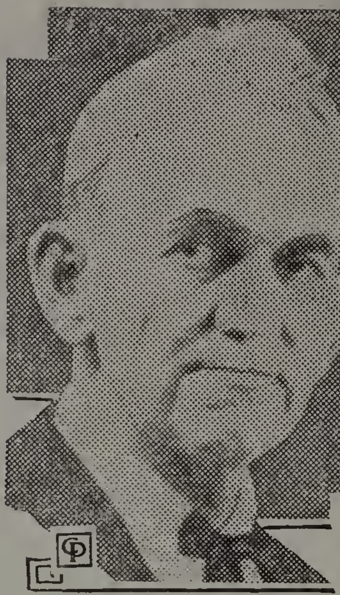
William D. Haywood volt az első pénztárnoka, e sorok irója pedig mint titkár szerepelt. Az IWW Egyetemes Végrehajtó Tanácsa mint a védelmi bizottság végrehajtó testülete szerepelt. Akiknek már gyakorlati tapasztalatuk volt amit Haywood-Moyer és Pettibone ügyben 1906-ban szereztek, ugyszintén Everett, Wash.-i mészárlásból, amely ügy 1917-ben fejeződött be.

A gyakorlattal biró védelmi bizottság müködése bevállott. Alig, hogy meg lett szervezve, a reakció minden eszközt felhasznált a forradalmi munkások elnyomására.

Munkások töltötték meg zsufolásig a börtönöket, a háborus törvények megszegésével voltak vádolva.

Az ország egyik végétől a másikig végig harsongtak a segély kiáltások. Ugy hogy három év időtartama alatt a General Defense Committee több mint háromezer munkást védelmezett.

Frank Little a G. E. B. tagját a csőcselék a brutalitás leggyalázatosabb eszközeivel kivégezték. A G. D. C. tagjait egytől egyig Leavenworth börtönébe küldték és öt évtől husz évig terjedő börtönbüntetésre itélték. Helyeiket mások foglalták el, akiknek szintén gyakorlatuk volt a védelem terén, akik tovább folytatták a munkát.



TOM MOONEY

Az első nagy tárgyalás a Chicagoi volt, ahol az IWW-istákat összeesküvéssel vádolták, ahol 166 tagját az IWW-nak Landis biró tárgyalta mint háboru elleni összeesküvőket állitották a törvényszék elé. Ugyanilyen vádak alapján Wichita, Kan. és Sacramento, Cal. nagyszámu IWW tagot hurcoltak börtönbe és itéltek el.

Ezek után következett Centraliai tárgyalás, ahol az IWW tagjait gyilkossággal vádolták, akiket szintén a G. D. C. látott el védelemmel. Az 1919 és 29 időszak között a G. D. C. több ezer munkástársat védelmezett, akik a Criminal Syndicalista törvények alapján kerültek tárgyalásra.

Richard Ford szabadlábra helyezése is a G. D. C. munkája volt, 1926-ban akit hamis gyilkossági vádak alapján életfogytiglani börtönre itélt a Californiai biróság.

A Coloradoi szénbányász sztrájkból kifolyólag elfogottakat mind szabadon bocsájtották a G. D. C. közbelépése után.

Ezek után mindig folyamatba vannak. Harlan megyébe, Kentuckyba a munkásmozgalom történetébe a legelkeseredettebb harcot vivjuk.

Ebben az ügyben 43 sztrájkoló szénbányászt vádolták gyilkossággal abból az összecsapásból kifolyólag, amely a sztrájkolók és a bányatársaságok fegyveres bérencei között volt, amely összecsapásból kifolyólag három fegyveres bérenc és egy sztrájkoló vesztette életét.

Az elépzelhető minden taktikát használták a bányabárók, hogy ezeket a munkásokat börtönbe juttassák. Első sorban a helyszinétől 200 mértföldnyire vitték a tárgyalás helyét. Ahol azután munkás ellenes farmerokból állitották össze az esküdtszéket.

Amikor a G. D. C. megnyerte az első ügyet, akkor azonnal megváltoztatták a vádat is ugy, hogy gyilkosság vádja helyett a "gyilkosságra való összeesküvés" vádját emelték a bányászok ellen. Azonban a védelem ügyvédjeinek sikerült kiharcolni, azután amikor már két bányászt életfogytiglani börtönre itéltek, hogy a tárgyalások vissza helyeztessenek Harlan megyébe.

Itten az ügyészség a fajgyülöletre alapitotta minden ténykedését és "fekete" bánya munkást tettek először a vádlottak padjára, akit el is itéltek. Azután egy fehérbőrü bányász ügyét tárgyalták, akit 11—1 ellenébe nem bünösnek találtak. A második fehér bányászt a tárgyaláson felmentették. A bányabárók nem tudtak belenyugodni az ilyen itéletbe és ismét más megyéből importáltak farmerokat az esküdtszékbe.

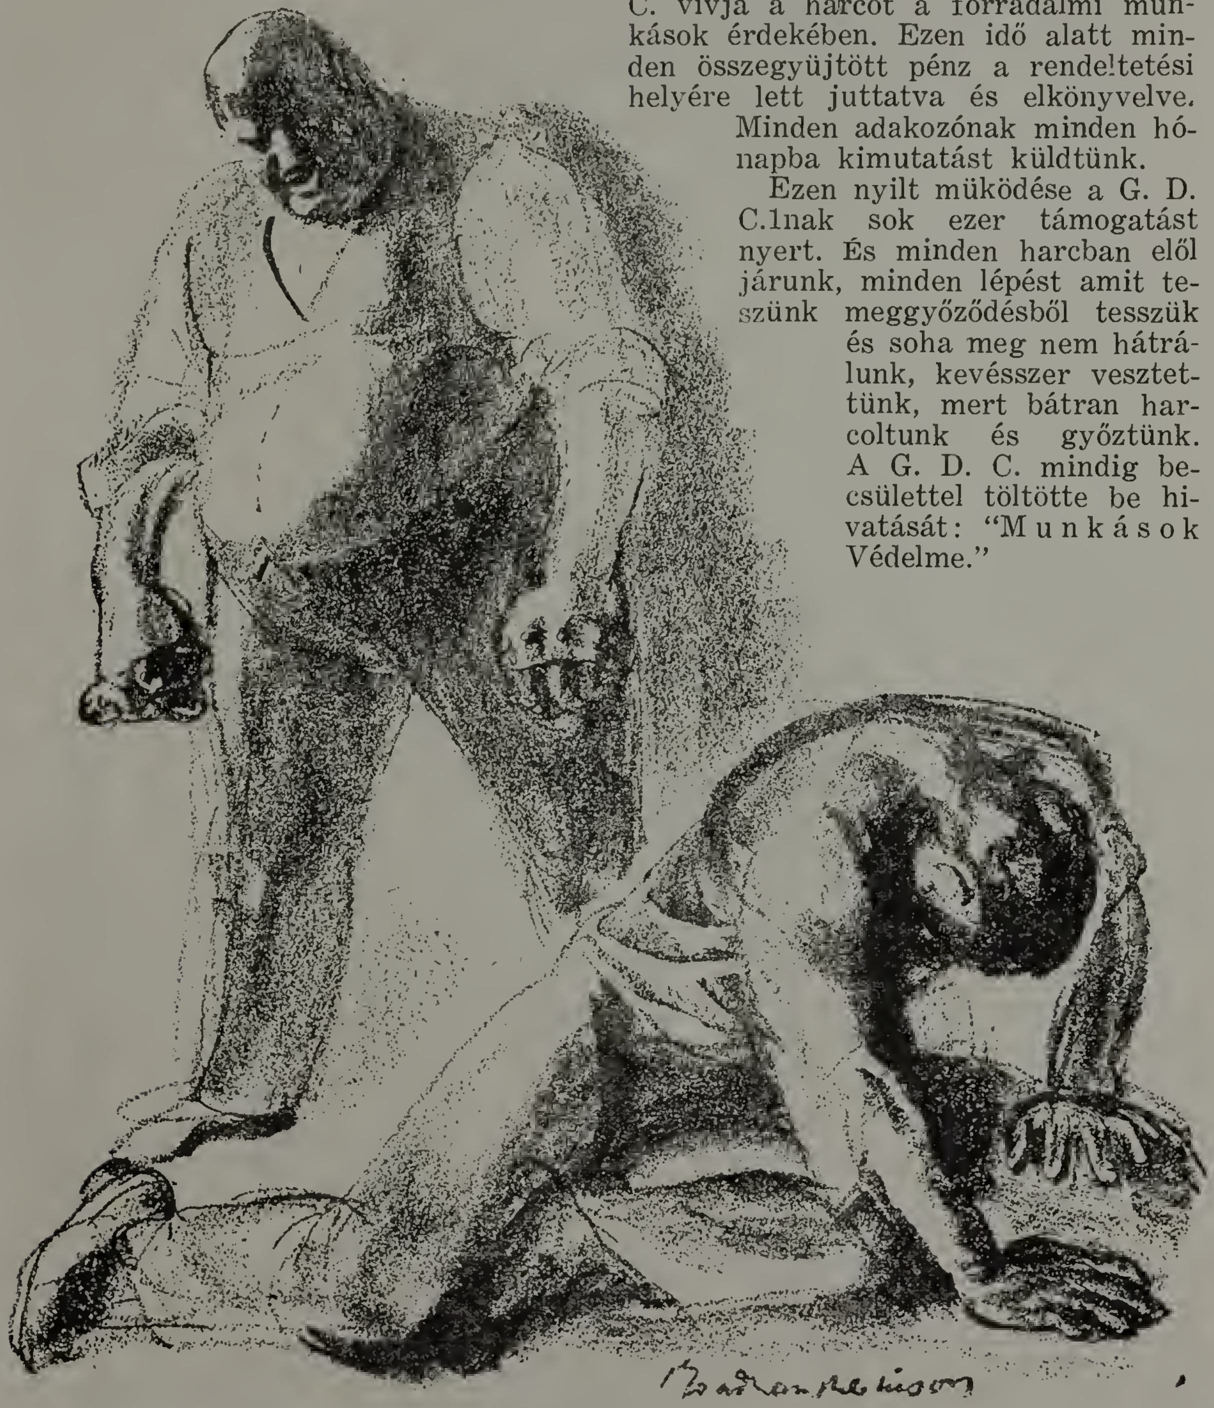
E sorok irásakor Kentuckyba a G. D. C. három bányászt mentett föl. Két esetben az esküdtszék nem tudott megegyezni, hat bányász életfogytiglani börtön büntetésre lett itélve és harminckettő még tárgyalásra vár.

A Kommunista Párt és segéd hadserege az I. L. D. nyiltan segitik a bányabárókat, hogy a bányászokat elitélhessék. Az által, hogy meggátolják mindenfelé a G. D. C. munkáját. Az

International Labor Defense sok ezer dollárt gyüjtött össze a Kentucky bányászok nevébe; de ebből az összegyüjtött pénzekből soha egy centet sem juttatott a bányászok védelmére. A kommunisták azért segitették a bányabárókat a bányászok elitélésében, hogy azután ők nyerjenek teret az általuk felállitott fake szervezet, az ugynevezett National Miners Unio részére. Az ő árulásuk nyiltan fel lett fedezve és sok ezer munkás undorodott meg ezektől az ellenforradalmi fakerektől.

Már több mint 15 éve, hogy a G. D. C. vivja a harcot a forradalmi munkások érdekében. Ezen idő alatt minden összegyüjtött pénz a rendeltetési helyére lett juttatva és elkönyvelve. Minden adakozónak minden hónapba kimutatást küldtünk.

Ezen nyilt müködése a G. D. C.1nak sok ezer támogatást nyert. És minden harcban elől járunk, minden lépést amit teszünk meggyőződésből tesszük és soha meg nem hátrálunk, kevésszer vesztettünk, mert bátran harcoltunk és győztünk. A G. D. C. mindig becsülettel töltötte be hivatását: "Munkások Védelme."



A kiéhezett, munkanélküli szervezetlen munkást leveri a tőkés, ha követel. A szervezett erő leverhetetlen.

EMLÉKOSZLOP

Dalt dallok, zengőt és erőset, mely Holnapig elél.
Vágtató orkán roppant skáláját kovácsolom márványba, hogy el ne inaljon.
Hogy el ne vesszen, meglopom a rohanó Időt;
Komor kétségbeesés sarkal erre most,
Percenként ölő és ujra éledő prometheuszi tüz,
Hogy emlékoszlopot állitsak neked;
Mindenek hőse, eget és földet átfogó rettentő cyklop,
Gyáva ebként szükölő és megsebzett vadkanként őrült vakmerő,
Mindent alkotó és mégis tunyán heverő,
Hülyeként bolyongó csapzott eszelős,
És géniusznál lángolóbb eszü,
Sárban, piszokba turó állattá aljasult —
És istennél istenebbé nemesült:
Testvérem, Vérem, Bálványom!
Gyülöletem és bámulatom Atyja,
Neked dallom e dalt, ki vagy a Mának fattya,
Tán Holnap hőse, védője, őre: Munkás.
Fáj, hogy hozzád tartozom Te reszkető gyáva,
Utállak és megvetlek, de elnem hagynálak
Ha cserébe én lehetnék a vidám élet kacagó királya.

A Ma zugva tombol, Minden habban száz halál lakik.
A vihar nyelve nyalja a hajónk és őrjöngve táncol hullámok hátán a kis ladik.
A véred hull te balga óriás,
A véred hull zuhogva, tengert dagasztva és vele az enyém.
Csak egy sejt vagyok Benned, a nagy egészben egy törpe kicsi,
De jajgatva kiáltom, számumként harsogom feléd:
Elvész az, ki föltámadását maga sem hiszi!
Egy karral fojthatnád meg a sakál hadat,
Mely dögre vártan köröttünk kering . . .
Mire vársz?! Nem látod-e, hogy hajónk már jobbra-balra ing?!
Ajkad vonaglik, félelemtől görcs rántja karod,
Mint szél a buzatáblát, reszketés borzongatja bőröd:
Előtted heggyé tornyosuló hullám, mögötted tátongó mélység;
Ne imádkozz, ki menthet meg ha nem magadnak vagy az őröd?!
Gyáva epigon, messze távolba szendergő Jövő
Arcfestő pirulással gondol majd vissza rád;
A Holnap jön — minden hiába — a vészeket törő
És átokkal illet majd a késő unokád.

Munkás, márványba kovácsolom a képed . . .
Emésztő tüzként éget a harag és mar, harap a vérbe.
Bibor fénybe öltözött a nap, fölöttem dögkeselyük szállnak;
Tükröt tartok eléd, hogy abba nézz be.
Vársz, hogy más segitsen rajtad: hej a Ma rajtad csunyán kifogott:
Munkás, gyalázatodnak emelek emlékoszlopot.

EGRI LAJOS

Miről irjak?

EGY PESTI IWW-ISTA

AMIKOR megkaptam a lapbizottság értesitését, hogy 1933-ra meg fog ujra jelenni a "Bérmunkás Naptár", amelybe Magyarországról is kellene valamit irni elkezdtem gondolkozni . . .

Nem azért, mert a gondolatot, ha papirra veti valaki azért itt kötél vagy jobbik esetben börtön jár, gondolkoztam a megirandók felett, hanem mert őszintén szólva nem tudom a sok téma közül melyiket válasszam ki.

Vajjon arról irjak-e, hogy itt az "uriosztály" és a kormányzat emberei vállukat vonogatják, de egyébként marad minden a régiben?

Vajjon arról irjak-e, hogy a munkásság itt le volt és ma még jobban le van igázva, a parasztság emberi és állampolgári mivoltából kitagadott, a városi polgárság törpe kisebbség és ennek a szerepnek megfelelően óvatos, gyáva; lapul és a vagyonát menti?

Vajjon arról irjak-e, hogy az itteni állapotokért első sorban is felelős, mint a "történelmi" osztály, a nemesi, főuri, főpapi és hivatalnoki rend. S velük együtt mint tejtestvéreik a bank és ipari kapitalizmus urai?

Vagy arról irjak, hogy immár testet öltött Bethlennek azon jelszava, amit azóta saját maguk törvényben is átültettek és amely az "intelligencia vezető szerepének biztositását" szolgálja amit legjobban igazol az, hogy a középés felsőfoku iskolákat az uri és hivatalnoki rend számára foglalták már le?

Vagy arról irjak, hogy a kereszt és embert herélő bicska révén minden sikerült eddig nekik. Övék a föld, a hivatal, a tőke, az egyház, az iskola, a hatalom minden és éppen ezért azt hiszik a naivak, hogy egy millióra menő néprétegét lehet évről-évre inség kenyéren tartani?

Vagy arról irjak, hogy elzárták a népet a földtől, kizárták az állam ügyeinek intézésében való résztvételéből és mindent maguknak kaparintottak meg és ma amikor már dübörög lábuk alatt a munkásoktól elrablott föld, karjukra sőt kardjukra hivatkoznak, mely akasztófával van spékelve?

Vagy arról irjak-e, hogy az itteni válság, válság a világválságban is azért, mert itt idejét mult termelési rend és tulajdonviszony és a nagybir-

LÁZADJ!

Korbácsolt Krisztusa vagy a véres rögnek,
mondd: nem fáj, ha igazságtalanul mellbe löknek!?
nyomorba döntve, piszokba lökve,
ha kacagnak rajtad az urak, a gazok:
nem sir fel benned: én is ember vagyok?!

Ha a buzarendet halomba rakod:
elvisznek tőled minden verejtékes magot,
mondd; nem fáj benned e tudat:
sápadt, vézna fiad éhesen zokog,
mondd: hát nem fájnak a keresztek, a botok?!

Asszonyodat ragadják ki karjaidból,
becstelen ágyakra dobálják becstelen ágyakról!
Ember meddig türöd,
hogy felserdült lányodat hasba rugdalják
a kielégitett részeg ifju paraziták!?

Lázadj! és döntsd porba az atyaistent,
ha papjai azt mondják: ugy van jól minden, ahogy van itt lent!
Lázadj! és ne kimélj urat,
ki az életeden szerzett pénzen mulat!
Lázadj! . . . Ember lázadj!

EDE EMIL

tok rendszer még meg van. Amely mezőgazdaság például nem kenyeret termel a rajta élő nép számára, hanem árat a világpiac számára. Ez a baja. A tőke szegény, elmaradott, hitelképtelen, és eladósodott és éppen ezért nem birhatja a világpiaci versenyt a tőkegazdag, gépekkel dolgozó termelőkkel?

Vagy reámutassak arra, hogy a kivitelre termelő agrárországoknak mindnek ez a sorsa. Csakhogy a mi sorsunk mindnél rosszabb, mert itt zsufoltság van, s azonkivül magunkra neveltünk egy nagyigényü hivatalnoki osztályt s ennek, meg a tulköltséges, mert nem demokratikus, nem a népre támaszkodó, hanem inkább az erőszakra, a jólfizetett emberekre épitett állam igazgatásnak a terhe is nyom bennünket?

Vagy arról irjak-e, hogy itt már egészen nyiltan beszélik azt, hogy "nincs más hátra, mint az elavult termelő rendet, a nagybirtok rendszert föl kell számolni", mert aki ha erőszakkal is ennek utját állja azon rövidesen keresztül gázol a történelem?

Vagy arról irjak-e, hogy Hajduböszörményben Zolnay Gábor bérlő földjén dolgozó aratógépeket az aratást nem kapott munkanélküliek megrohanták és összetörték miként tették volt a Luddisták?

Vagy ecseteljem azt mit jelent, ha egy oly kis helységben mint Rákospalota 8000 ember néz farkasszemet az éhhalállal a telt magtárak tövében?

Vagy arról irjak, hogy milyen kinokon kellett keresztül menni annak a 12 embernek, kik az éhezés következtében megőrültek egyetlen nap alatt (aug. 1-én) és kiket a rendőrség elmegyógyintézetbe volt kénytelen szállitani?

Vagy arról irogassak-e, hogy egész Magyarországon levő munkaközvetitő (állami) hivataloknál 240 munkahelyre 13,842 munkás jelentkezett aug. 10-én?

Vagy vegyem-e elő a statisztikát és vessem e papirra milyen változáson ment keresztül 20 év alatt Budapest? A számok keveset beszélnek, sokkal kevesebbet mint sok vizfejü pártpolitikus és éppen ezért önmagunknak lehet mindent meglátni. Mutassam be vajjon azt, hogy husz év alatt Budapest lakossága a vidékről bevándoroltakkal együtt is csak 14.3%-al nőtt meg, addig a főváros szolgálatában álló személyzet létszáma a 10,027-ről 24,740-re növekedve, csaknem 150%-al ugrott. Avagy amig 1912-ben még "csak" 85.6 millió pengő egyenes adó alatt nyögött a főváros népe, 1931-ben már harmadfélszer annyi 202.2 millió pengős adóteher nyomta a vállát. Az egy főre eső kvóta igy 94 pengőről 201 pengőre sulyosbodott. Hogy ezt miképpen vasalják be ide kell irnom, amig 1912-ben adó miatt 38,877 esetben foglalt a végrehajtó addig 1931-ben már 103,232 esetben, tették ugyanazt.

Vagy irjam ide, hogy ezen idő alatt a rendőrség létszáma a 3331-ről 5795-re emelkedett és ennek dacára a büncselekmények száma 29,506-ról 59,070-re szaporodott. Nagyon jellemző, hogy amig 20 évvel ezelőtt mindössze 8 feljelentés történt a királyi ház tagjainak megsértése miatt, most 111 kormánzó sértési pör volt egyetlen év alatt a fővárosban. Izgatás cimén 1912-ben egy pör sem volt mig az 1931 év 242-vel záródott le. Amig a nyomor miatt husz évvel ezelőtt 12,788 lopás történt addig 1931-ben 18,645-el találkozunk. A magzatelhajtás miatt ami ugyancsak a nyomorból fakad 1912-ben 65 itéletet mig 1931-ben már 485-öt hirdetett ki a biróság (persze börtönbüntetés értendő.)

Vagy arról irjak, hogy a közigazgatási személyzet 150%-os emelkedésével szemben a tanszemélyzet amig 1912-ben 8199 volt, az 1931-ben 8655-re emelkedett, ami husz év alatt csupán 5%-nak felel meg. Ezzel kapcsolatban amig a tanintézetek száma 692-ről 755-re, addig az egyházak száma 39-ről 83-ra, a Budapesten élő szerzetesek száma pedig 1618-ról 2098-ra duzzadt. Vagy vegyem elő Budapest gyomrát és állapitsam meg azt, hogy a közfogyasztásra levágott nagy marhák (kik közt félreértések elkerülése végett bár elég nagy marhák nem szerepelnek a kurzus pártpolitikusai) száma amig 1912-ben 78,980 drb. volt, addig 1931-

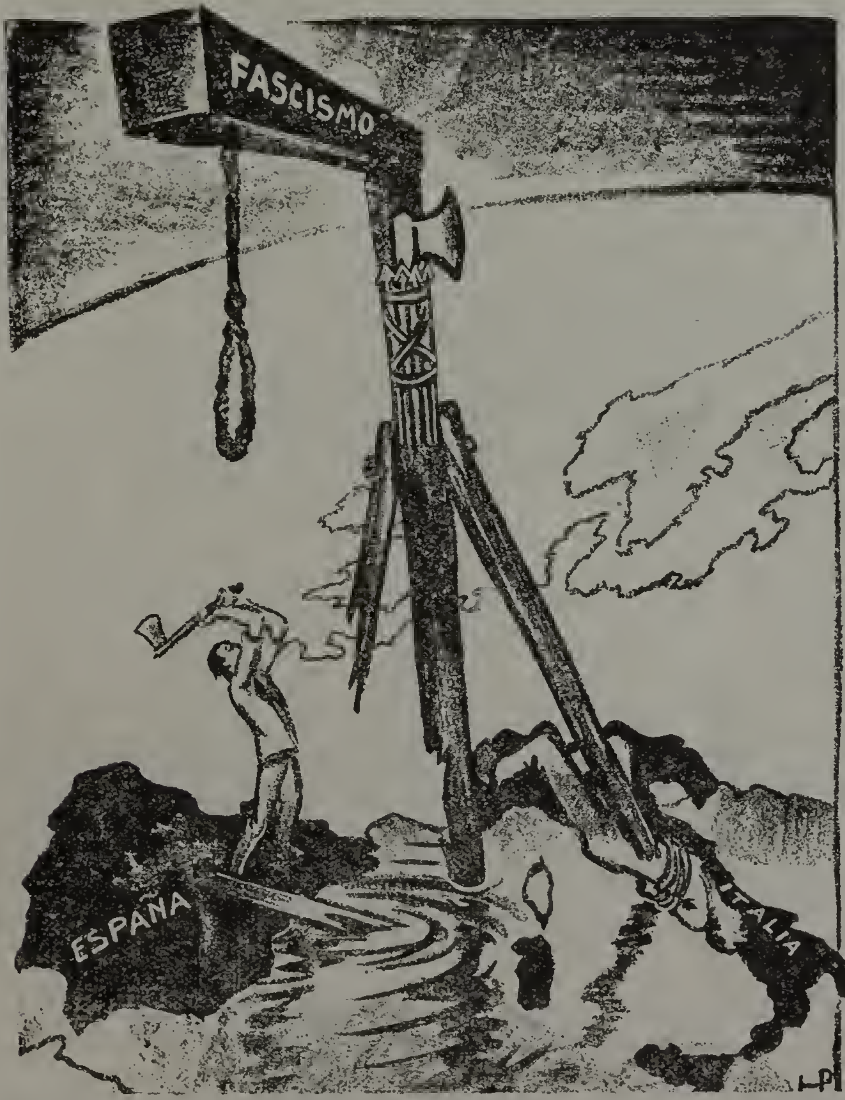
ben már ez a szám 45,371-et tett ki. De mivel őseink a rege szerint nyereg alatt puhitott huson éltek igy Budapest lakósai fazékban puhitott lóhust evett ami 14,544 mázsáról 24,208 mázsára emelkedett. Világosan, amig 1912-ben e célra 8930 lovat vágtak le, addig 1931-ben már 12,560-at.

Vagy arról irjak, hogy a közoktatás ügyi miniszter, aki jó sport ember, de a pedagógiához hat ökör, kiadott egy rendeletett, melyben megtiltotta, hogy az ő előzetes tudta és hozzájárulása nélkül, aki a sajtóba mer irni vagy a sajtó részére nyilatkozni, az a tanerő repül repülőgép nélkül.

Vagy illusztráljam a tuberkulózist, amelyben mi tartjuk minden megerőltetés nélkül a világrekordot mint pusztitja az itteni proletárságot? Irjam le, hogy a városi tüdőbeteg gondozókba ez év elején 11,102 uj beteg jelentkezett, mig ugyanezen idő alatt tüdővészben Budapesten meghalt 1429 amivel szemben 1931 év hasonló időszakában 1280-an haltak meg. Vagy a terjedését állapitsam meg, melyből kiderül, hogy amig 1929-ben, 1978, 1930-ban 2254, 1931-ben 2289 elhalálozás volt a fővárosban. Akkor az idei első fél év halálozásából következtetve ez a szám meghaladja az év végére a 2500-at. De ugyanigy vezetünk egyébb fertőző betegségek terén is, amik az 1931 évi 7281-ről 13,174-re emelkedett.

Vagy ismertessem azt, hogy amig 1931 nyarán a főváros 19,000 ingyen ebédet osztott ki a zendülést elkerülendő számitással, addig ez év nyarán 33,000 ebédet osztott ki. Hogy mi lesz itt a télen ebből már valamit lehet következtetni. Ez a szám, hogy nem nagyobb az csak azért van; mert a halálozási arány nagyobb mint a születések száma. Ez év első hat hónapjában ugyanis 6075 születéssel szemben 6421 elhalálozás történt.

Vagy azt irjam, hogy vigan megyünk tönkre. Ezt kellene irnom, ha a m. kir. kormány bőkezüségét akarnám hűen illusztrálni, amellyel az általa ide invitált olaszországi fas-



Mindenhol, ahol a gyilkos fascizmus felüti fejét, a bérmunkások összeállva — szervezkednek. A kapitalizmus szimboluma az akasztófa — akár a fascizmus, akár más politikai jelszót dob ki.

cista dallilákat és a faj gardistákat heteken át kitartotta és a magyar nép szeretetéből annyira féltette, hogy egész rendőr és detektiv hadsereg vigyázott testi épségükre a fiatal Mussolini jelölteknek. 800 ember tejben, vajban való fürösztése és szórakoztatása nem kis pénzt emésztett fel az itt eltöltött hetek alatt. De van itt pénz, mint pelyva, mindenkinek, csak a kiéhezett és vérszegény tüdőbeteg kis magyarok számára nincs. Ez is fajvédelem, de a fascista faj védelme. Olaszországba egyébként egy magyar gyermeket sem birtak exportálni nyaralás céljából.

Vagy arról irjak, hogy amig Sallai és Fürst nevü K. M. P. titkárokat a miért külföldre jelentéseket küldtek és onnan kaptak pár perces formailag ugyan megjátszott statáriális (vérbirósági) tárgyalás után a saját törvényük felrugásával egyszerüen halálra itélték és azonnal ki is végezték illetve egyszerüen legyilkolták, addig a pár nappal későbben gyilkosság miatt halálra itélt Lőrinc és Szedlacsek nevü illetőket, bár elismerték a lopás közben elkövetett gyilkosságot a kormányzó kegyelemben részesitette. Nem azért hoznám fel ezt, ha erről kivánnák irni, mintha az akasztófát reklamálnám e két munkanélküli részére, kik éhségükben — oh, szent magán tulajdon elve — éllemet loptak és csupán a lelki rokonságot festeném meg amivel e rendszer egyik az akasztófa alá állitott gyilkosokat keblére ölelni, amiért politikai ellenfelei számára, nem hogy csak kegyelem nincs, de mint a kutyák tetemeit szokták teljesen titokba éjjel földelték el ismeretlen helyen a két legyilkolt munkást, bár családja kivánságára a holttesteiket a törvény szerint kikellett volna szolgáltatniok.

Vagy az országban e kettős gyilkosság miatti felzudulást fessem le? Minek elég ha azt irnám itt le, hogy Debrecenben egy Horváth Lajos nevü kárpitos mestert, aki korcsmai borozgatás és politizálás közben kritizálni merte a vérbiróság itéletét és amint megérdemelte megmondta véleményét Töreky nevezetü vadállatról ki elnöke volt a vérbiróságnak ezért letartóztatták és börtönbe dobták.

Vagy azt irnám le, hogy szeptemberbe lesz egy éve, hogy itt Statáriummal uralkodik ez a rendszer, de napjai igy is meg vannak számlálva, amit igazol az, hogy a téltől (joggal) félnek és lázassan fegyverkeznek, páncél autókat stb. szereznek be pribékjeik a rendőrlegények számára. Hát csak csinálják, a következő telet bajosan fogják meguszni, legalább ezt itt saját maguk e rendszer urai is igy hiszik.

De nem, nem irok semmit, mert mint látják itt volna elég téma, de ha ezt mind részletessen kivánnám leirni, ugy egy naptár terjedelme ehhez kicsinek bizonyulna.

Budapesten, 1932 augusztus hó.

BIROD MÉG?

Birod még testvér a nyomort, a jármot
mely bölcsödtől mostig kitartott veled?
Birod még egyforma állati sorsod
és ütésre öklöd még nem emeled?

Birod még testvér a bus sivár ólat
amelybe laksz és hol pereg le sár életed?
Birod még asszonyod sok könnyes buját
és ütésre öklöd még nem emeled?

Birod testvér a reménytelenséget
hogy mindig igy lesz az örökös robot?
Birod nézni kis vézna cselédid
s a haragtól véred még nem vet lobot?

Tudod-e testvér, hogy a nagy világnak
minden zugában már lázadás dobál
tüzet az égre? Az alvó ébredez
s rettentő kezében villámot csóvál?

Az itélet jön! Munkás, gyere velünk!
Ébredj! Hisz Istened s a mult már halott.
Nincs mire várnod, mi a jövőbe megyünk
s velünk jöhetsz ha te is akarod.

EGRI LAJOS.

A technika csodái

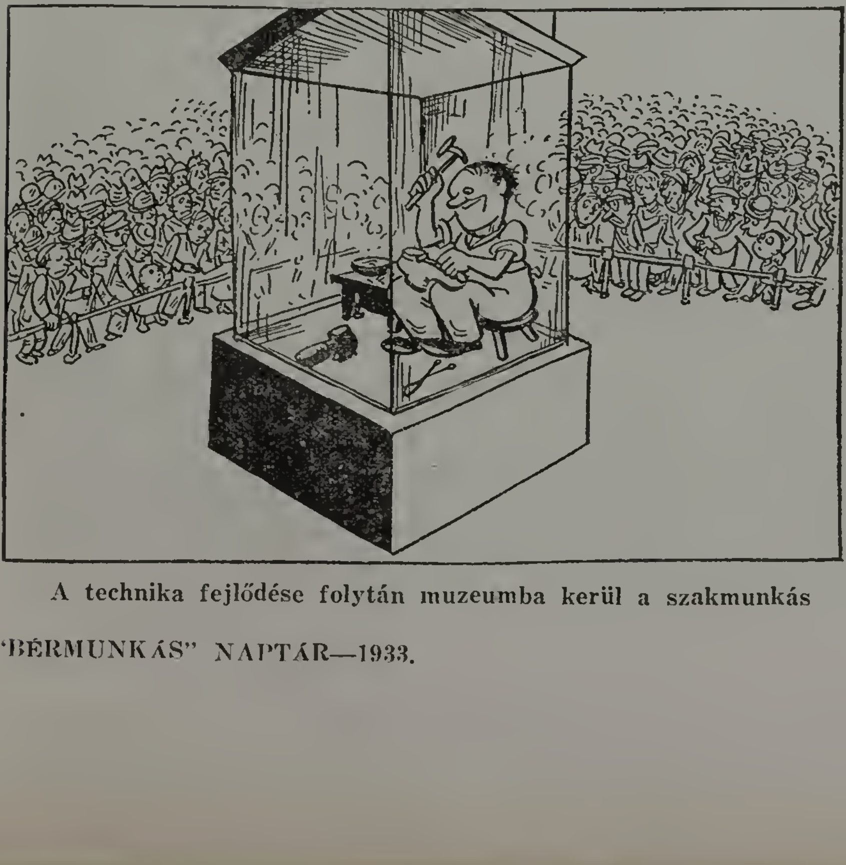
ROZIK MIHÁLY

REMÉLEM az olvasó előtt nem érdektelen, ha az ókornak és ujkornak kiváló barbár eszközeiről néhány szót fogok megirni. A kőbalta: valahol Budapesten láttam én ezt először. Megcsodáltam, hiszen nemes eszköz ez, mellyel valaha az ember ön maga számára alkotott valamit. De egyben elég primitiv eszköz is. A mai ember már csak alig veheti észre, hogy ez annak idején mi akart lenni. De balta ez mégis, egy eszköz, mellyel fát vágtak, módot nyujtott az akkori embernek, hogy munkáját megkönnyitse, hogy a természetet legyőzhesse. Mondjuk, körülbelül eddig a határ, mely a balta nemes voltát dicsőiti.

Azonban van ám a kőbaltának egy feketébb oldala is. Nem mintha az ásatáskor azon a lapján mélyebben feküdött volna a fölben és feketedett volna meg, ezen feketeség; történelmi feketeség. A vér aludt meg rajta, a vér, mely valaha embernek ereiben folydogált és ezen nemes eszköz volt az, mely eret vágott, mely más irányba kényszeritette a vérnek csörgedezését. Vagyis ha magyarán akarjuk kifejezni magunkat: fegyver volt. Emberek, embereket gyilkoltak vele. Harci eszköz volt a korabeli társaival, a kőből formált dárda heggyel és más tárgygyal együtt, melyek ma már a muzeumoknak csodálatraméltó tárgyai. Emberek bámészan állják körül, elmerengnek, lelki-szemei előtt a kőkorszaknak ideje bontakozik ki.

Kőbalta . . . van ennek még nemesebb cimborája is: a bronz-balta. Ez már áldásosabb fajta. Az ember ezzel már szebbé, csinosabbá és müvésziesebbé tudta disztárgyait tenni. És ami a legfőbb: faragott vele, még pedig sokkal könnyebben, kevesebb emberienergiát vett igénybe, mint a kőbalta. Azonban a fekete, illetve véres oldala már modernebb gyilkoló és gyilkoltató oldalnak bizonyult, mint korszakkal előbbi társáé. Természetesen e kornak harci-modorát nem akarom most ismertetni, elegendőnek tartom, ha csak megemlitem, hogy e kornak osztályai elég kemény harcot vivtak ezen eszközökkel.

Sokkal feketébb és modernebb már ezeknél a vas-balta. Ha kezembe fogok egy vas-baltát, két gondolat ötlik agyamban: vagy faragni akarok vele, vagy ha bosszus vagyok, gyilkolni akarok vele. Ha most már egy kissé józanul akarok gondolkozni, önön magamtól kérdem: mi emberek, vajjon mennyire haladtunk évezredesnek csufolt haladásunkkal a kőbaltának történetétől. Modern ember vagyok. A baltával én gyilkolni, vagy gyilkoltatni akarok: modernebb uton, élesre fenem, bajonettekké alakitom. Maradjunk



A technika fejlődése folytán muzeumba kerül a szakmunkás csak a balta formánál. Pl. a fokos még az 1914-es háboruból sem maradhatott ki. A magyar bakát vértezték fel ezzel. Kő, bronz és vas . . . balta, dárda . . . harci, gyilkoló és gyilkoltató eszköz, csak egy maradt ki e szines sorból: a kinzó eszköz! Ennél nem kell messzire mennünk, maradjunk csak a vasnál, hiszen mi modern emberek vagyunk. A mai korban is találunk szép dolgokat, mondjuk: a szöges deszkákat, vagy ha modernebbre van szükségünk: forduljunk csak a magyar kommun utáni vallatások eszközéhez, a tükör, mit körmök alá szurtak, a késhez, mellyel női melleket metéltek le, a kardhoz, mellyel száz meg száz testet szurtak keresztül és vertek össze.

De a balta? Igaz, a baltáról van szó. Ma a legmodernebb korban, midőn állatvédő ligák alakulnak, de az embert védő ligát ne felejtsük ki, ebben a korban a balta igen fontos szerephez jutott; bitót faragnak vele. Embert védő liga és bitófa, ez valahogy furcsa összeállitás, no meg aztán mindezekhez vas-balta . . . és valahogy azt találnám mondani az embert védő liga urainak, hogy badarság az, mit tesznek . . . alakitsanak inkább balta, illetve vas-védő ligát, hogy kevesebb bitót, nyaktilót és villamos-széket készitsenek az istenük által teremtett teremtés-koronájának: az embernek.

Az emberek által kevert kotyvalékról: az acélról, azután azokról a keverékekről, miből fegyver és ágyu lövedékek és ezeknek alkatrészei készülnek, minek is beszélnénk. Ezekért nem kell a muzeumokba menni, nap-nap után láthatjuk ezt a rendőrök és katonák kezében, békében és háboruban egyaránt. Pedig ma, kemény acél világot élünk. Nem tudom, e kornak muzeumát megtekintette-e minden dolgozó és ha némi betekintése már van, vagy szerzett, vajjon nem csufolja-e ki önön magát, hogy e nagy muzeum részére éppen ő, ő a modern ember, gyártja a legkegyetlenebb gyilkoló eszközöket?!

Vajjon-e nagy muzeumban tisztán látja-e minden munkás önön magát, mint megkinzott, bitóra huzott, vagy villamos-székbe ültetett martirt? Sajnos, azt kell megállapitanunk, hogy csak kevesek azok, kik a mai muzeumnak értékét teljes egészében fel tudják fogni. Mert vannak olyanok, kik a multnak barbarizmusát elitélik, de modern gondolkodásuk sajnos nem lépte át az ókor felfogásának eredeti gerincét. Vannak olyanok, kik megborzadnak a multnak barbarizmusától, de a mának kegyetlen kinzó eszközei előtt szemet hunynak . . . nem látják és nem hallják a hurkok csomózását, a szikrát, mely drótokon rohan egészen a villamos székig, hol embertársát éppen most gyilkolják le azzal a modern és áldásos eszközzel, melyet ő gyártott, fából, vasból, acélból és kotyvalékból.

Pedig ha minden munkás testvér a mának muzeumát megtekintené és mérlegelné azt, hogy modern gondolkozását majd egykor éppen fiaink fogják barbár jelzővel ellátni és éppen ugy fog megborzadni esztelenségünkön, mint ma mi őseink badarságán.

Ma még kevesen vagyunk, kik a kőbaltának és mai kornak vas-baltáit felismerjük, ismerjük a tömeg-gyilkolást, a mai társadalom minden modern kinzó eszközét és szörnyedünk el akkor, midőn tudjuk és látjuk azt, hogy nap-nap után éppen sorainkból szedi áldozatát a mi modern eszközeink. Mert ne felejtsük: a gyilok csak minket ér, mivel tudatlanok vagyunk. Mert öntudatlanul teremtünk önön magunk számára oly eszközöket, melylyel minket pusztitanak, gyilkolnak. Pedig munkás-testvérem, ha volt erőd ahhoz, hogy megteremtsd a mai kornak gyilkos eszközeit, akkor ahhoz is volna erőd, hogy mind ezt, ha már nem akarod, hogy müvednek nyoma vesszen, intő példa képpen muzeumba helyezed el az utókor számára. S hogy ezt megtehesd, fel kell ismerned azt, hogy csak szervezett erővel lehetséges mind ez, fel kell ismerned azt, ha a civilizációnak csufolt mai barbarizmust megszüntetni akarod, oly utra van szükséged, mely legyorsabban tünteti el a földnek barbárságát, oly utra, mely világosan mutatja az utat a jövő társadalom felé, s ez az ut pedig az Egy Nagy Szervezet utja.

★: Nevelés
★: Szervezés
★: Felszabadulás

LEFKOVITS LAJOS

MINT a hogy maga az Industrial Workers of the World (a Világ Ipari Munkásainak Szervezete) megalakulása a fejlődés egyik szükségszerüsége volt, ugy nem a véletlen, hogy az IWW céljának a bérrendszer eltörlésének az eléréséhez mint a legfontosabbakat a Nevelést, a Szervezést látta ahoz, hogy a világ proletáriátusa eljusson a Felszabadulásához, a kapitalista rendszer megdöntéséhez.

Huszonhét esztendővel ezelőtt, amikor az IWW zászlajára irta a három csillagot, amely kifejezője lett a Nevelés, a Szervezés és a Felszabadulás szükségességének, még elméletben is csak nagyon kevesek látták meg és tudták elképzelni az olyan időket, mint amilyenbe huszonhét esztendővel később a világ munkássága került.

A mai helyzetnél semmi sem igazolja jobban a három csillag, nemcsak szükségességét, de azok fontosságát is. Csak az emult három esztendő eseményeit kell magunk elé idézni, hogy megállapitsuk azt, hogy a Nevelés és Szervezés nélkül a munkásosztály soha sem érkezik el a Felszabaduláshoz.

A termelési eszközök, a gépek gyors iramu kifejlődése mindég több és több munkaerőt tett feleslegessé. Ennek a folyamatnak a kezdetben, sőt közel négy esztendő után is sok millió munkás ugy látja, hogy az ők munkanélküliségük csak egy ideiglenes állapot, hogy rájuk, mint az hajdan volt, szükség lesz a termelés terén. Ezek a proletárok vagy távol állottak a munkásmozgalmaktól, vagy olyan szervezeteknek voltak a tagjai, amelyekben csak egy cél állt előttük a tisztességes napi munkáért, tisztességes fizetés elnyerése és amig ezt a szervezet nekik nyujthatta, a maguk körül történőket nem figyelték, nem látták.

Az ámulattól nyitott szájjal, hangtalanul fogadták azokat a gépeket, a melyek őket fölöslegessé tették a termelésben. A bósz, a foreman azzal adta át nekik az utolsó fizetési boritékot, hogy rövidesen hivni fogják őket vissza. És csak az Egyesült Államokban sok millió munkás hitt és még ma is várja ezt az üzenetet, mert ismerik a kapitalista rendszert és annak gazdasági törvényeit.

Ezek a munkások még ma sem látják meg, hogy ők a termelésből örökre kiestek, hogy a haszonra való termelés rendszerében, a termelő képtelen megvásárolni mindazt, mit piacra vetnek, hogy az elnem adott termék állandóan szaporodik annak ellenére, hogy nem csak a munkán levők, de a sok millió munkanélküli a legnagyobb szükségét érzi azoknak a termékeknek.

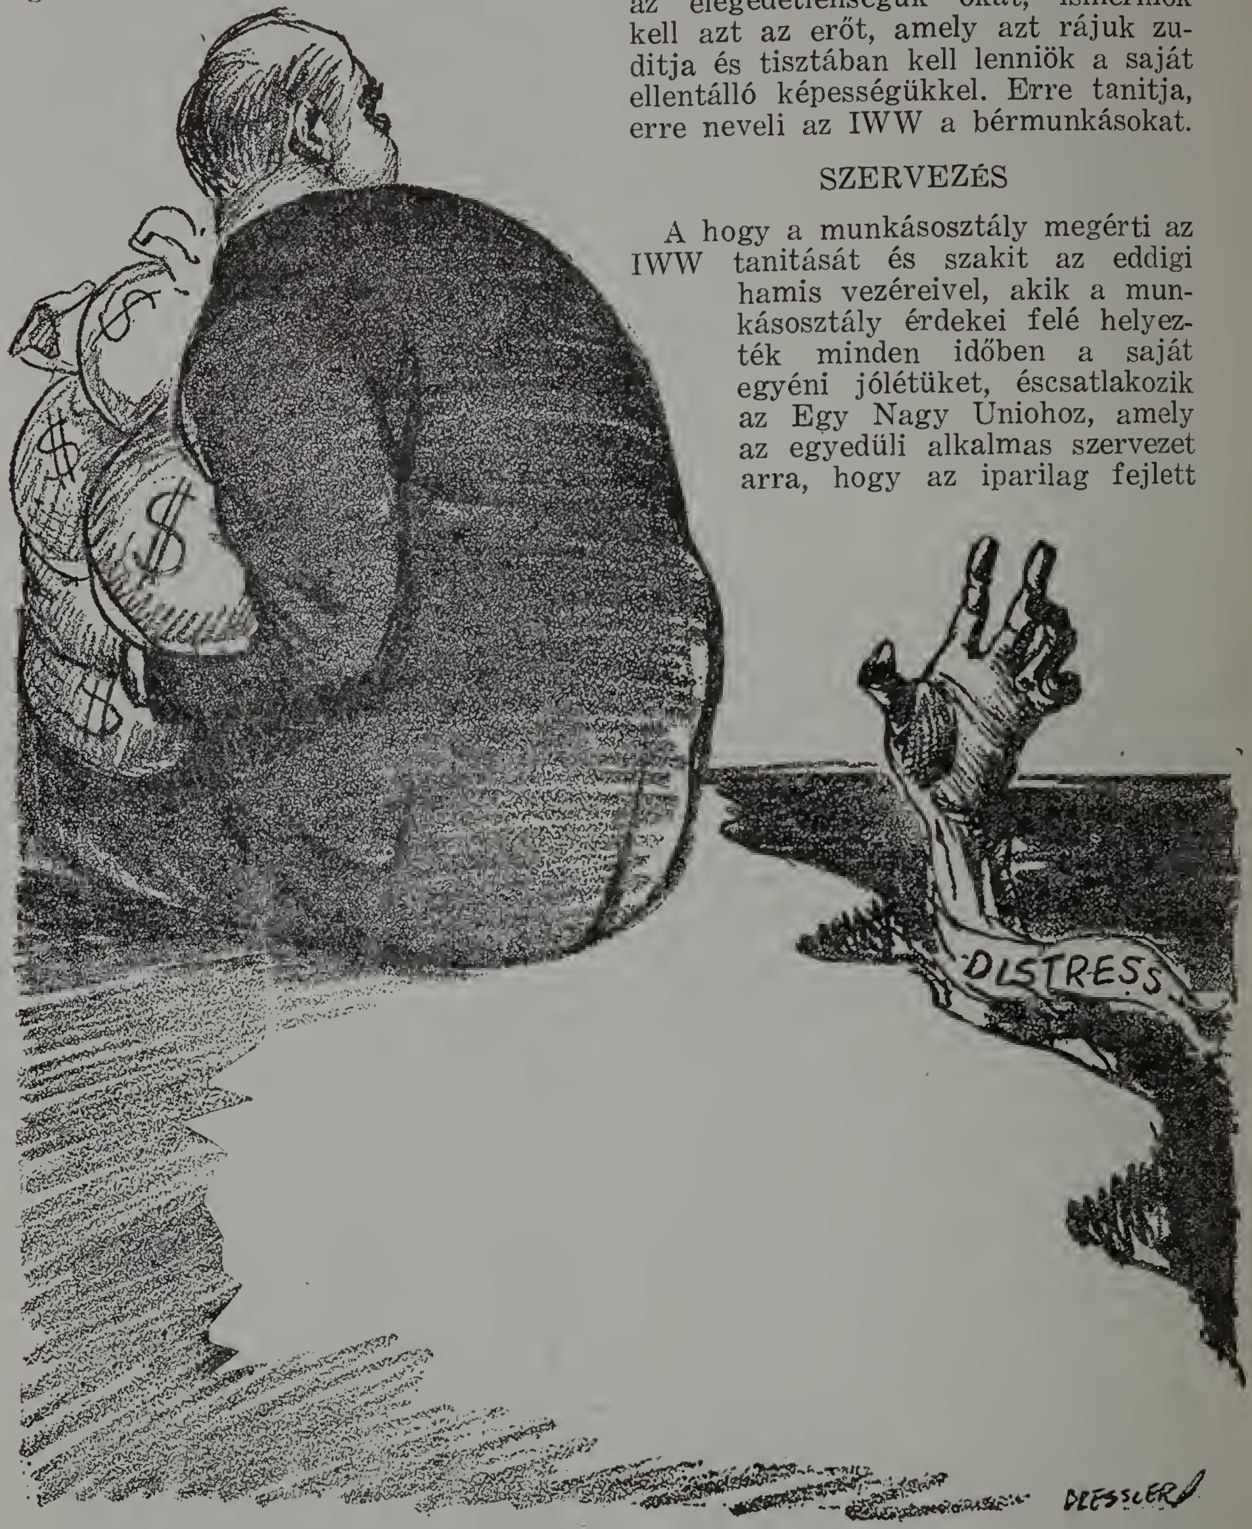
És mit láttunk ezektől a nyomorgoktól? Azt, hogy éhségük kielégitése céljából nem az élelemmel megrakott raktárakat ostromolták, de azokhoz az állami és városi épületek elé vonultak, amelyek maguk is telve vannak a legnyomoruságosabban fizetett és a legszükösebb körülmények között élő, iskolázott proletárok ezreivel. Mit kaphatott itt az éhező tömeg? Ha ügyes politikus elé kerültek igérettel hagyták el a nehéz szőnyegü tanácstermeket, ha rossz politikus szolgálta a tőkés osztályt, akkor az éhezők elkeseredését még fokozta a meg nem hallgatással, az erőszakos eltávolitással.

Ennek a kilincselésnek a kezdetén az IWW szervezete volt az első, amely szóban és irásban az éhezők, a nyomorgók elé állott és megmagyarázni igyekezett, hogy a kilincselés, a könyörgés nem módja a munkások helyzetének a megváltoztatására. Itt válik végzetessé a munkásosztályra a nevelésének a hiányossága, amit fokoz azoknak a büne, akik a munkásosztály egyes csoportjait hamisan nevelik az uj társadalom megvalósitása lehetőségében.

Az IWW megállapitása és tanitása, hogy nem elég, hogy a munkás vagy a munkások csoportjai elégedetlenek legyenek a rendszerrel, ismerniök kell az elégedetlenségük okát, ismerniök kell azt az erőt, amely azt rájuk zuditja és tisztában kell lenniök a saját ellentálló képességükkel. Erre tanitja, erre neveli az IWW a bérmunkásokat.

SZERVEZÉS

A hogy a munkásosztály megérti az IWW tanitását és szakit az eddigi hamis vezéreivel, akik a munkásosztály érdekei felé helyezték minden időben a saját egyéni jólétüket, éscsatlakozik az Egy Nagy Uniohoz, amely az egyedüli alkalmas szervezet arra, hogy az iparilag fejlett



Lopják a kapitalisták a munkások értékét, vagyonát, életét, mindenét. Éhséget, nyomort, munkanélküliséget zuditanak a proletárok millióira.

országok munkásainak az érdekét az ipari mágnásokkal szemben megvédhesse.

Ennek igazolására sem kell a messzi távoli időkbe néznünk. Csak idézzük magunk elé ujból az elmult három esztendőt és látni fogjuk, hogy egyrészt a sok milliós tagsággal rendelkező American Federation of Labor (AFofL) nemcsak, hogy nem tudta tagságának az érdekét fokozni, de a meglévő munkaalkalmat és munkabéreket egymás után veszitette el és a munkaadók követelésére adta fel. A több milliós tagsággal rendelkező szervezet tehetetlen a helyzettel szemben, mert ugy a szervezet összetétele, mint a tagság helytelen nevelése arra, hogy a tagság érdekét ebben az időkben is megvédhessék, képtelenné teszik.

Amilyen tehetetlen a rosszul szervezett milliós tömeg az iparilag szervezett tőkés osztállyal szemben, annyira megtévesztő és ártalmas a munkásosztály szempontjából a kommunisták elmélete, amely minden szervezettség nélkül, a szükségben szenvedőket a gyomor filozófia alapján vezényeli az utcára és elhitetni igyekszik az éhesekkel, a hajléktalanokkal, hogy nekik és a munkásosztálynak a mai válságos időkben egyedüli céljuk, hogy meleg étlehez jussanak az ingyen konyhák felállitása révén és hogy az állami, városi épületek felhasználásával fedett helyeken huzhassák meg magukat éjjelenként. Ezeknek állandósitására az utca összeverődött proletárjaival állami segélyezést, támogatása követelnek.

Az IWW szervezete abban az időben alakult, amikor az AFofL hivatásának legmagasabb fokán állott, amikor a szakképzett munkások élvezték a kibontakozó amerikai ipari fejlődés minden előnyét. Ebben az időben figyelmeztette az IWW Amerika és a világ munkásságát, hogy a szakszervezkedést a technika fejlődésével kell, hogy felváltsa az ipari szervezkedés, amely nem emel válaszfalakat az egy iparban egy munkán, de különböző szerszámokkal dolgozó munkások közzé. Ennek a felhivásnak a figyelmen kivül hagyása egyik alapvető oka Amerika mai több

AZ ELNEM DALOLT DALOK MEGÖLNEK

Én nem bánnám . . . csak ne fojtogatnának szavak, véresek
ne tolulnának folyton ajkamra; suhogó korbáccsá lenni;
szavak, zengők, boldog holnapot festők ne akarnának
dalba ömleni; napok mocskából, ólom fáradságból, napi
részlet halálból, hogy tudna a dal előre törni?

És igy az el nem dalolt dalok megölnek.

Szavak, genyesek, rothadók, mit ki kéne tudni vágni,
kés volna jó, pihent éles agy-penge, hogy kihasitva
az emberek arcába tudnám vágni az undorodott Tegnapot
és a fekete miséjü Mát.

De nincs idő.

De nincs erő.

És az el nem dalolt dalok megölnek.

Estére lehervadnak mik lombosan virultak bennem reggel
s ha meg is születnek már csonkák, suták; de a legtöbbször
ágyba rogyva, fekve, magamnak dadogom el sirva
mi harsogó vihar volt, hogy felzugtak rá az andesek.

Óh, ha ti egyszer hallanátok robotba tört sápadt
emberek, mit el nem dalolhatok; mert kiszivja vérem,
erőm, szép álmodásom a gyár . . .

Mikor jöttök már megváltó vörös holnapok?!

Mert az el nem dalolt dalok megölnek.

EGRI LAJOS

mint husz millió éhezője, nincstelene helyzetének.

És ha megállapithattuk, hogy a több milliós tagsággal rendelkező szervezet tehetetlen, a nevelés hiányában alkalmatlan volt a munkások érdekeinek a megvédésére, könnyen megérthetjük azt is, hogy még az ilyen laza neveléssel sem rendelkező, semmi szervezeti erőt kifejteni nem tudó utca tömegével, milyen eredményeket érhet el a kommunista "párt". Le kell itt szegeznünk azt, hogy azokon a helyeken, ahol a kommunisták követelését a gyakorlatba vitték, azt maga a tőkés osztály foganatositotta, azért, hogy a saját uralmát, életét meghosszabbitsa. Ha ezt kommunista győzelemnek lehet elkönyvelni, ugy a munkásosztály szempontjából mi azt csak gyászkeretben tehetjük.

FELSZABADULÁS

A munkásosztály felszabadulásához elengedhetetlen feltétel és követelmény amint azt az IWW megállapitja, hogy a harcban résztvevők tudják, hogy mit akarnak, de tisztában kell lenniök azzal is, hogy hogyan lehetséges a harcuk megvivása. Ehez a felismeréshez juttatja a munkásosztály minden tagját az a tudás, az a nevelés, amelyben az IWW részesiti a munkásosztály tagjait. A világháboru egyik hadvezére mondotta, hogy a harc közepette minden katona a táskájában hordja a marshal botot, amely képlet azt jelenti, hogy a helyzet felismerése és célszerü kihasználása mindenkiből vezért alkothat. Az IWW az a szervezet, a mely minden tagjából vezért kiván nevelni. Ez egyik oka annak, hogy a kérges tenyerü munkát nem ismerők intellektuel tábora benne nem talál szives fogadtatásra.

Az IWW azt tanitja, hogy a munkásosztály helyzetének a megjavitási harca, egyedül és kizárólag a bérmunkások ténykedése, müve lehet.

A bérmunkások nevelését az IWW-n keresztül maguk a bérmunkások végzik, ugy ahogy a bányák mélyén, a telepek mozgópadjai mellett vannak ugy a hogy azt a munkás megérti, nem pedig ahogy azt a szerkesztőségi asztalok mellett megállapitják.

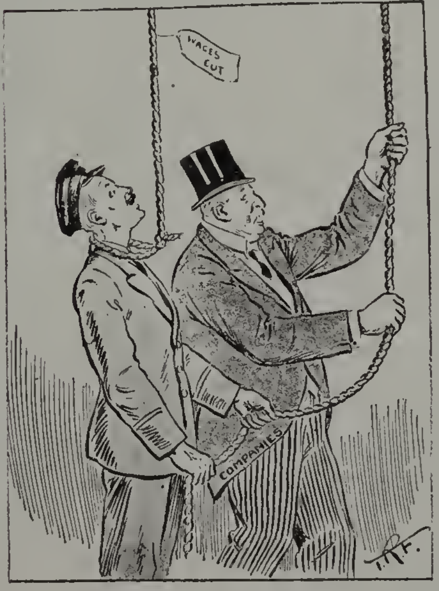
Az IWW tanitásával, az Egy Nagy Szervezet szükségességét megértő munkásokkal felépitett szervezet lesz csak alkalmas a munkásosztály kezében arra, hogy harcát a tőkésosztálylyal megvivja, hogy a bérrendszert megszüntesse és helyébe a közös termelés és egyforma élvezését, használását a termelt javaknak megteremtse.

A munkásosztálynak nem lehet értékesebb és nagyobb vágya, mint a három csillag szimbolumának az elérése, amelyekhez a szükséges fokozatokban érhetünk el.

A munkásosztály nevelésére használjuk ki elsősorban az IWW lapjait, amelyek megtanitanak bennünket arra, hogy mik az események tanulságai, hogyan fordithatjuk azokat az osztályunk javára. Az IWW irodalma bőséges oktatást ad arra, hogy hogyan épithessük fel szervezetünket, hogy az elég erős legyen a kapitalista osztálylyal a harcot megvivni.

Az IWW szervezeteiben és csoportjaiban elméleti kiképzést nyerünk, hogy a munkán, a gyakorlat terén mik a munkások teendői a saját és Munkástársainkkal szemben, de a legjobb gyakorlatot nyerjük arra is, hogy azokat, akik még nem ismerték fel azt, hogy helyük az Egy Nagy Szervezetben van, hogy erről őket is meggyőzhessük.

Sohasem volt időszerübb a munkásosztály ama célkitüzése, hogy **"csak láncainkat veszithetjük, ellenben győzelem esetén egy egész világot nyerhetünk!"**



A vallások története

VISI ISTVÁN

AMIÓTA az emberiségnél a gondolat társulás létrejött és a félelem positiv formát öltött azóta van hit, vagy vallás. Egész bátran nevezhetjük a félelmet a vallás szülőanyjának, a tudatlanságot szülőapjának, mivel félelem a tudatlanságból ered, amit nem értünk meg, azonban látjuk erejét, nagyságát attól félünk éppen ugy amint legtöbb gyermeknél a sötétségből való félelem egészen természetes, mivel nem lát a sötétségben, nem tudja mit rejthet magában igy fél tőle.

A primitiv embernek megállt az esze, — az agyvelő müködése — midőn egy kigyó megtámadta s igy tehetetlennek érezte vele szembe magát, a védelem legprimitivebb formájához fordult, behódolt a kigyónak, krokodilusnak, tigrisnek. Az ős ember nem birta megérteni, hogy az alig 3—4 láb hosszu kigyónak hol van az a nagy ereje, melynek a segitségével egy pici seb ejtésével egy pár óra alatt végez az emberrel, igy természet feletti erőnek hitte azt és a kigyót mint ilyen természet feletti erőnek a tulajdonosát Istennek, melyet imádot, azáltal akarta saját maga részére a kegyelmet — irgalmat kieszközölni. Innen ered a kigyó imádás, mely leginkább a meleg éghajlat alatt általános volt, ugy az Indiánoknál, mint az Egyiptomiaknál, Hinduknál.

Ugyancsak a félelem és tudatlanság szülte a Tüz, a Nap, Vénus, Saturnus és más égi testek imádást, melyet szemmel láttak már az ősnépek, de mivel nem értették meg a napnak, tüznek, véghetetlen hatalmát, igy azoknak is behódoltak és sok helyen a kigyó, krokodil vagy más istenség mellett azokat is imádták. A nomád állattenyésztő népeknél a nap, tüz és kigyó istenségek mellett a bika, kos, fehér ló, elefánt, kutya is az Istenek közé volt sorozva és azokat imádták áldozatokat mutattak be nekik.

A világon 8, alapvető vallások mindegyikében találunk közös jellemvonást, közös Isteneket, közös ünnepnapokat. Tudományos történelmi megállapitás, hogy egyik vallás a másikból nőtte ki magát, azáltal, hogy a nehezebben hitt isteneket dogmákat elejtették és a modernebb emberi ismeretekhez alkalmazkodva reformálták a régi hitet, régi dogmákat és más népektől átvett vallásokat, helyi viszonyokhoz és helyben régebben megrögzött hithez idomitották. A vallások története mint egy végnélküli lánc, egyik a másikban kapcsolódik, éppen ezen egyforma eredetük, de különösen egyformaságuk miatt, meglepő a modern és logikusan gondolkozó ember előtt, hogy vallás háboruk voltak és évezredeken ádáz harcot folytattak egymás ellen, a Zsidók, a Babiloniak, Assyrok és Egyiptomiak ellen, később a görög vallásból eredt Rómaiak a keresztények és zsidók ellen, majd a Mohamedánok a keresztények ellen és legutóbb a Római egyház a reformátorok és azoknak a követői ellen mint a 30 éves vallás háboru 1629—1659 között. Ezen háboruk, mind vallási egyeduralomért, az egyik vallásnak a másik vallás fegyverrel való elnyomatásáért folyt.

A hit ősidőktől fogva meg van az emberek gondolat világában, hogy teljesen megértsük azt, vissza kell menni a primitiv rendszertelen vallásokig, mikor még egyik faluban a Tüz volt a főisten, másikban a Nap, harmadikban a kigyó és igy tovább, Jupiter, Saturnus, Vénusz is istennek voltak elismerve, nagyon sok törzsnél, mely még Krisztus előtt 4—5 ezer évre vissza nyulik. Még ezen időkből maradt meg az embereknél a csillagokból való jóslás, melyet sok jámbor keresztény éppen ugy elhisz mint az egyiptomi rabszolga elhitte.

A primitiv vallások nem voltak egységesek, helyi viszonyokhoz képest változott, ahol sok volt a kigyó ottan az volt a főisten. Ahol az elefánt volt sok mint Indiában, vagy a krokodil mint Egyiptomban, ottan azokat ismerték el főistennek, bár legtöbb helyen egyforma imádásban részesitették a Napot, Vénuszt, Bikát, Kost, Tüzet, stb.

A kinai Mythologia

A legrégibb civilizációt a Kiniaiaknál fedezték fel, még Krisztus előtt 6 ezer évvel, igy a vallást is azok foglalták először rendszerbe, melynek nagy befolyása volt a Görög Római részben a Zsidó Keresztény és Mohamed vallásokra is. Bár ezen vallások mindegyike, Istentől eredőnek tünteti fel magát, de ha átvizsgáljuk a régebbi Kinai vallást valamint a vele majdnem egyidős Brahma vallást, ugy rá fogunk ismerni a leszármazottjaira.

A kinai mythologia, mely nagyban hasonlit a jobban ismert görög mythologiához szintén sok Istent hitt. A kinaiaknak öt főistenük volt, "Sárga Isten" a föld ura. "Vörös Isten" a tüz ura. "Sötét Isten" a vizek urak. A "Fa hercege" az erdők ura. "Érc anya" a fémek ura. Ezeken kivül számtalan kisebb nagyobb Isten van a kinaiak vallásában, akiket szellemeknek képzelnek el az őseik szellemei mellett áldoznak nekik, bár őseik szellemeit előnyben részesitik, nincs olyan kinai, aki nem őseinek szellemétől kérne tanácsot, utbaigazitást, védelmet, ugyszintén őseiknek szellemei előtt esküsznek bosszut.

Confucius, a kinaiak Mózesa, modern filozófus, nagyon sok szép ujitást akart a kinaiak vallásában behozni, K. e. 550 évvel. A földi életben való boldogságot, az emberek egymáshoz való viszonyát akarta javitani inkább mint az Isteneknek való hódolást. Ő volt az első kinai, aki a kinai hagyományokat feljegyzéseket először foglalta össze egy nagy könyvben, melynek a neve "Kings". Ugy a könyvet, mint őtet most félre magyarázzák. Confuciust meg tették Isten fiának, akit a Vizek ura küldött a kristály palotájából, hogy az emberiséget helyes utra vezesse. Confucius is az ősök szellemeinek mindenek feletti tiszteletét hirdette, mely a kinai népben oly mélyen gyökeredzik, az egész vallási ideologiájuk azon alapszik. (Confucius hiveinek a száma 3500 millió.)

Brahmaizmus

Ázsia déli részében, ahol a Perzsa Zsidó és Hindu törzsek éltek egész más ősvallás alakult ki a kinai vallással egyidőben, melynek legnagyobb befolyása volt a Keresztény és Mohamed vallásokra és még ezt megelőzőleg a Zsidó vallásra. A Brahma vallásban is három főisteni személy van, melyeknek a funkciója majdnem éppen ugy van beosztva mint a keresztény vallásban. Első Brahma, aki teremtett. Második Vishnu, aki emberi formát öltött és megmentett. Harmadik Siva, a két arcu Isten, aki rombol és épit, mikor milyen kedvében van. A Noé meséje is meg van a "Rig Vedasban" a brahma bibliában, valamint a világ teremtéséről való elbeszélés is nagyban hasonlit az Ótestamentomban található leiráshoz.

A Brahma vallásban is, mint a Görög mythologiában, a fő isteneken kivül még számos fiuk Isten van, melyeket imádtak és áldozatokat mutattak be nekik. Még a bibliában is, melyből a Zsidó, Keresztény és Mohamed vallások alakultak megtaláljuk az ilyen fiuk Istenekről szóló elbeszélést. Mózes első könyvének 6-ik részében olvasható (Az Isten fiai látván, hogy az emberek leányai szépek valának, feleséget választanak maguknak azok közül.) Ugyanez megtalálható a Kinai és Görög mythologiában is, valamint a Brahma vallásban. Sok más ilyen közös hit és dogma található a vallások mindegyikében. (Brahma hivők száma 230 millió.)

A Brahma vallásban is voltak reformátorok, akik jóhiszemüen akarták az emberek egymáshoz való viszonyát javitani és igy mindenek felett az emberek egymás iránti szeretetét hirdették. A Brahma vallásban leghiresebb volt Buddha, aki a Kinai Confuciussal majdnem egyidőben élt és az Istennek imádása helyett az embereknek egymás iránti tiszteletett, szeretetett akarta meghonositani. Buddha

Brahma vallásban is többet áldoztak templomok épitésére, mint a népek nevelésére és a fenti templom Hindukinában egy cseppet sem marad el a keresztény templomoktól, ugyszintén a nyomor és tudatlanság, kizsákmányolás is meg van éppen olyan mértékben, mint a fényes keresztény templomok tövében.

nem is hitte, hogy a születés, halál, nyomoruság egy istenségtől ered, ezt természetes folyamatnak tartotta, melyen az embereknek egymás iránti szeretete, tisztelete enyhit, elviselhetővé teszi. A tulvilági boldogság helyett földi boldogságot hirdetett, mivel a Brahma vallásban nincs is menyország, a tulvilági boldogság abból áll, hogy az ember igazságos élet után egyesül a főisteni szellemmel Brahmaval, nem kell neki ujjá születni, nyomorogni, szenvedni a földön. Buddhát is mint Confuciust és később Krisztust Istennek nyilvánitották halála után és mint ilyent sok Brahma szektákban imádják, áldozatokat mutatnak be neki. (Budha hiveinek a száma 150 millió.)

Budha után leghiresebb Brahma reformátor volt "NANNAK" aki Lutherral egyidőben, de teljesen külön állólag igyekezett a hitet vesztett vallásokat megjavitani, már szintén csak egy főistent ismert el, mint a Zsidó és Mohamed vallásokban, de még hisznek a szellemeik millióiban, ugy szintén a lélek vándorlásban, mely szerint az emberi lélek még állatokban vándorol halála után. Ezt nagyon sok keleti keresztény szekta is elfogadta.

Nannak bibliája "Granth" már nagyon hasonlit a keresztény bibliához, még a korrupt gazdag Brahma papság elleni harcban is nagyon hasonlit Luther mozgalmához, sok Brahma reformátor között Budha után ő volt a legmodernebb, sok hasznos módositást kivánt bevinni az ósdi Brahma vallásban, azonban éppen ugy mint Luther hivie ismét több fele szakadtak idővel a Sikhizmus, mely néven Nannak követőit ismerik, most számos szektából áll. (A Sikhizmus hiveinek a száma 114 millió.)

Egy Istent imádók

Amig a kinai Brahma, görög Egyiptomi vallásokban számtalan Istent imádtak már a Zsidó vallásban csak egy Istent ismertek el, bár nem volt teljesen mentes a Zsidó vallás sem a Görög mythologiában ismert fiuk Istenektől, amint Mózes első könyvének, fentebb idézett részlete bizonyit s az a tény, hogy állandóan várták az Isten fiát, aki hivatva lett volna őket megváltani éppen mint a Brahma vallásban a Vishnu Istenség, de a Mohamed vallás mellett még a mai napig is csak a Zsidók hisznek egy Istenben. Bár a keresztények is azt állitják, hogy csak egy isten van, vagyis Egy Istenben hisznek, de ugyanakkor elismerik Jézust, mint fiu Istent és a Szentlelket mint harmadik Isten éppen ugy mint a Brahma vallásban tanitották még 3—4 ezer évvel ezelőtt, midőn a papoktól theologusoktól magyarázatot kérünk, hogy lehet fiu és szent lélek Isten is az atya Isten mellett, ha csak egy Isten van, akkor ugyanolyan választ kapunk mint 3—4 ezer évvel ezelőtt az ilyen eretnekek, hogy az titok és abban kételkedni bün.

A Zsidó vallás ismertetését feleslegesnek tartjuk, mivel a Biblia majdnem teljes egészében ismerteti, a másik egy Istent imádó vallásról kell megemlékezni, a Mohamed vallásról, mely K. u. 600 évvel keletkezett, oly nagyon hasonlit a Zsidó valláshoz, hogy Medina vidékén lakó fél zsidó törzsek Mohamedet mint a régen várt Messiást fogadták el és teljes egészében csatlakoztak Mohamedhez.

A Mohamed vallásban szó van a világ teremtéséről, vizözönről, angyalokról és profétákról, akik között Ádám, Mózes, Noé, Ábrahám, Jézus, is el van ismerve, de mindennek fölött áll Mohamed Allah igaz prófétája. A Mohamed mennyország és pokol, valamint a keresztény és zsidó mennyország és pokol között csak számbeli külömbség van, ugyanis Mohamed ugy a poklot mint mennyországot hét részre osztotta, majdnem ugy mint Dante a poklot. A sivatagokban vándorló nomád törzsek, valamint a karavánok, akik között legyorsabban terjed a Mohamedánizmus, a menyországot éppen ugy képzelték el amint azt Mohamed leirta, ahol tejjel, mézzel és borral megtelt folyók vannak a kristály tiszta vizpatakok mellett. Hogyan is képzelte volna el másképen a menyországot, egy homoksivatagban barangoló nép, akik napokig mentek szomjan éhen, mint egy olyan helyet ahol hüvös kert közepén üditő forrás vizek vannak, mellette méz, tej, bor, melyből annyit ihat amennyi csak jól esik. Mind ehez a kivánt forrásokhoz Mohamed még egy néhány szüznőt is igért azoknak, akik őket követik. (Mohamed hiveinek a száma 209 millió).

Amig Confucius, Budha, Krisztus, békét, felebaráti szeretetett hirdetett, Mózes és Mohamed harcot hirdettek a hitetlenek ellen. És ez leginkább megmagyarázza az Izlam terjedését, melyet a kard nagyban elősegitett. Ugy szintén megérthetjük azon győzedelmes harcokat, melyet a Mohamedánok az egész ismert keresztény Európa ellen évszázadokig folytattak és különösen Magyarországon nagy rombolást végzet, a Balkánon napjainkig kinyult. A Koran szerint, mely a Mohamedánok bibliája, minden egyén aki az Izlam vallásért meghal, egyenest a hetedik menyországban megy, mi lett volna jobb a harcokban, éhezésben kifáradt Izlam harcosoknak, mint ez, ahol már hófehér karu nők vártak rá, hogy tejjel, mézzel és borral kinálják, igy halált óhajtva harcoltak a hitetlen kutyák ellen, amint a keresztényeket, zsidókat és más valláson levőket nevezték. De ezt megtették a jó katholikusok is, mikor a Reformátorok hivei ellen kellett nekik harcolni, akik ugy Jézust mint a kereszténységet magukénak vallották, csak másképen magyarázták.

Reformáció

Minden vallásban találunk, kételkedő elégedetlen elemeket, akik a régi dogmákban már nem hisznek, de még nem elég bátrak, hogy vallásuk minden tév tanitása ellen fellépjenek, csak az ujabb ismeretek által megdöntött dogmákat akarják elejteni és a modern ismeretekhez képest reformálni, hogy könnyebben hihető legyen. Ezekkel szemben vannak, akik még hisznek a régi dogmákban és az ujitók ellen mint eretnekek ellen támadnak, leginkább a zsiros ellátásban részesült papság, ellene van és igyekeznek a kételkedőket, hitetleneket, kizavarni a nyáj közül, mivel attól félnek, hogy sokat megmételyeznek és hitetlenekké válnak. Igy áll be a szakadás, az ujitókat nevezik reformátoroknak, mivel nem akarnak gyökeres változást a régi valláson csak átalakitani, reformálni, hogy könnyebben hihető legyen.

Ilyen reformátorok minden vallásban találhatók, s a keresztények között ismert reformátorokat és reformált vallásokat legjobban is merjük, mely a mai napig is állandó változáson megy keresztül és négyszáz év alatt több mint 38, általánosan ismert és 19 kevésbé ismert szektából áll. (Összesen 682 millió taggal.)

Barbár főpap a gyanusitott embernek a kezét forróvizben mártja és ha megég akkor bünös, ha nem akkor ártatlan. A keresztény papok száz évvel ezelőtt szintén a vizalá mártották a boszorkánysággal gyanusitottakat és ha megfulladt a viz alatt akkor bünös volt, ha nem akkor ártatlan.

A keresztényeknél beállott első szakadás a keleti és nyugati egyházakra való szakadás volt, melyet nem lehet reformnak nevezni, mert a kereszténység első éveiben kialakult a nézeteltérés ezen két irányzat között, ami annak tudható be, hogy a keleti egyház hive leginkább a misztikus Görög és Brahma vallások követőiből kerültek ki, akik régi hitükből is vegyitettek az uj hitükhöz mig a nyugati egyház, a kevésbé misztikus Germán, Saxon, Frank és Goth törzsek között szerzett hiveket. Több vitás kérdéseknek a megtárgyalása után 787-ben ketté szakadtak, mivel nem tudtak megegyezni. Ugy Krisztus tanitását mint a bibliában talált tételeket egymástól eltérőleg magyarázták (akár csak mostan.)

A külön vált egyházakban is tovább folyt a vita bizonyos tételekben, olyan szóvivők akadtak mint Bacon Roger, aki sok mindent kutatás tárgyává tett és modern szempontból akarta azokat megitélni s megmagyarázni, a papság ellene fordult ezen ujabb magyarázatoknak és a 4-ik Miklós pápa a papság vádjára, bár saját akaratja ellenére, 14 évi börtönre itélte Bacont. A reformációnak, helyesebben mondva a kételkedőknek követői akadtak, melyet 500 évig a legnagyobb terorral üldöztetéssel próbáltak elnyomni. Mindazokat, akik kételkedni vagy kutatni mertek, eretnekeknek nevezték el és börtönben máglyára, akasztófára jutatták őket. Ha az egyházi elnyomatást ezen sötétség korszakában teljesen megakarjuk érteni, igy tanulmányozni kell, Giordano Bruno. Campanella Tommasso, Copernicus, Kepler, Galileo, sok más kutatónak az élet történetét és hogy miért üldözték és égették el az ilyen kutatóknak legnagyobb részét? Mikor tudva van, hogy legnagyobb részben ezek még vallásos emberek voltak és mint Bruno Campanella, Copernicus, szerzetesek, a történelem szerint egyetlen bünök az volt, hogy olyat mertek felfedezni buvárkodásaik közepette, amit a hivatalos egyház nem ismert, igy azt mint isten ellenes hitetlenséget tüntették fel, mint a föld forgásáról, a csillagok a világürben való keringéséről szóló megállapitásokat, amit ma már 7—8 éves gyermekekkel is tanitanak.

A reformáció kezdete, Angliából indul ki, Wycliffe egy szegény pap, aki az egyház tilalma ellenére, még 1395-ben, mert angol nyelven a bibliából felolvasni és az uralkodó egyház ellen szót emelni, nagyon sok követőre talált bár természetes halállal mult ki, 1384-ben, de az csak azért történt meg, mert még Róma nem igen vette észre és nagyon messze volt Rómától. Azonban tanitványát, Huss János 1415-ben már máglyán égették el, valamint Wycliffnek a holttestét is kiásták és máglyára tették 1414-ben.

Luther Márton nevéhez füződik a nyilt szakadás az uralkodó egyház és a reformátorok között, 1517-ben Luther kifüggesztette a reformátorok hitvallását a Wittenbergi templom ajtajára, mely Wycliffe és Huss János elméletein épült fel és már nagyon sok országban akadtak hiveik és különösen Németországban már elég erősek voltak Luthert megvédeni a máglyától vagy a bitófától. Luthert a német királyok, hercegek fogták védelmükben a pápa ellen, kisebb nagyobb csatározások után vallás békét kötöttek 1555-ben, Augsburghban.

Amig Németországban békén hagyták a reformátorokat, Franciaországban állandóan harcot folytattak ellenük és Spanyolországban meg teljesen elnyomták őket, ezen időben esik a Szent Bertalani éjszaka, 1572-ben mikor a Párisi Notre Dame templomból éjfélkor haranggal megadott jelre az egész országban öldöklést intéztek a Calvinisták ellen, akiket ottan "Huguenuts" néven neveztek és több mint 8 ezret legyilkoltak. Ezen sikeres gyilkosságokon felbuzdulva, Morva és Csehországokban is kezdték a reformistákat üldözni, mely 1629-ben nyilt háboruba megyen át és egész Európát lángba boritja, 30 éven keresztül öldöklik egymást a keresztények, mely még az angol szigetekre is kiterjedt.

Bár csak harminc évig volt nyilt harc a katholikus és protestáns hivők között, azonban a vallási villongások, csetepaték, majdnem a 19-ik századig meg voltak és az első szabad vallás gyakorlatról szóló törvényt, csak 1785-ben hozták a francia forradalom idejében ezideig minden államnak meg volt a hivatalos vallása és más vallásuakat üldözték, elnyomták, bebörtönözték.

Confucius, Budha, Krisztus sok más philozofus, emberi szeretett, békét, boldogságot hirdetett és akart az emberek között megteremteni, igy a jószándék meg volt náluk, azonban akik a fenti béke apostolok követőinek nevezik magukat és különösen ezen harcos keresztény szekták, akik más vallás hivei ellen sokszor testvéreik ellen fegyverrel harcoltak és azzal akartak másokat is a saját hitük felvevésére, vagy a kételkedőknek vakhitre való kényszeritésére birni, kevésbbé követik mesterük példáját, mint a 4 ezer éves Brahma vallásban hivő Mindu, aki a saját elnyomatása árán is békességet, szeretetett hirdet, amint CHANDI napjainkban, gyilkos keresztény Angliával szemben.

Az IWW és a vallás

A vallásokkal, szektákkal, teljesen tisztában lehet minden ember, aki vesz magának időt azoknak a tanulmányozására, de különösen szükséges, hogy a régi Kinai, Görög és Brahma vallásokat tanulmányozza minden ember, hogy megtudja érteni azoknak a leszármazottjait, akkor megfogja érteni azt is, hogy az IWW miért nem vallás ellenes, de viszont miért nem hisz egyetlen vallási dogma csalhatatlanságában sem.

Mi tudjuk, hogy a vallási philozofiát az emberiségnek a sötétségben való tapogatódzása szülte meg, igy megértjük. Mi nem is az emberek lelki, vagy másvilági boldogságunk megszerzésével vagy keresésével törődünk, hanem itt a földön akarjuk az igaz boldogságot, egyetértést megteremteni és leginkább egyik a másika által való kizsákmányolást megszüntetni. Mi tudjuk, hogy addig nem lehet béke, boldogság az emberek között, amig éhség, nyomoruság és kizsákmányolás van, igy mi előttünk nem az a baj, hogy az egyik Katholikus, a másik Protestáns vagy Biblia tanuló, hanem az, hogy vannak emberek, akik embertársaik, igába hajtásával maguknak kényelmes megélhetést akarnak szerezni, a gazdagsági jólét annyira elvakitja őket, hogy nem törődnek mások nyomorával, éhségével, sőt kiváltságos helyzetük embertársaik megvetésére vezeti őket, éppen ugy mint Rockefeller sem tartja magát egyformának egy nincstelen nyomoruságban levő Baptista hittestvérével, sőt ha valamelyik ipar telepén egy ilyen hittestvér bérharcban menne nagyobb darab kenyérért, vagy meberségesebb bánás módért éppen ugy lelövetné őket, mint Bayon, N. J.-ben vagy Coloradoban lelövette a nagyobb darab kenyeret követelő munkásságot.

Az IWW nem a magas csillagok egében irányitja az emberek figyelmét, hanem itten a földön akarja őket saját helyzetük megjavitása véget szervezni, de nem zár ki senkit sem azért, mert még másvilági boldoságot is akar magának biztositani, ha itten a földön is harcol velünk együtt egy jobb tökéletesebb rendszerért, melyben meglehet választani az igaz felebaráti szeretetett. Az IWW az egyetlen mozgalom, mely az emberek közötti szeretetett, egyetértést nem a lelki világának megjavitásával, mellyel több ezer éve próbálkoznak a vallásokon keresztül, hanem gazdasági közösség alapján akarja megteremteni, de nem zárja ki ezen nemes törekvésből azokat sem, akik külömböző valláson keresztül is az emberek egymás közötti békességet szeretetett akarják megvalósitani, mert ugy hisszük, hogy a régi vallások próbálkozásának tanulmányozása folytán belátják, hogy gazdasági egyenlőség nélkül nem lehet béke, ahol az egyik ember kizsákmányolja a másikat, ottan nem lehet szeretett. Minden ember, aki békességre, szeretettre és boldogságra vágyik még itten a földön, az segitse azt megteremteni az IWW által hirdetett uj társadalmi rendszeren keresztül, mert csak egy ilyen tökéletes és igazságos rendszerben leszünk valamennyien testvérek és tudjuk egymást szeretni, becsülni, egymással békességben élni.

A LÁZADÓK

EGRI LAJOS.

Lábaim, harcos robotoló cselédim,
Mikor kergetett a vágy, szálltatok alattam:
Döngött a föld, ahogy szaladtam:
Mikor bánat huzott a földre — anyám ölébe:
Csökönyösen huztátok a testem —
Gondolatban már földre estem —
De ti, mint elszabadult gépek,
Trappolva huztátok a testem
És a nyitott sir üresen maradt.
Bár hasznot soha nem hozott,
Lábaim, köszönöm a hosszu robotot:
A szolgálatból, ime elbocsájtlak.

Kezeim, ti drága engedelmes cselédek,
A csoda maga, örök nagy titok,
Ujjak, fehérek és velük fogok:
Nyilnak, csukódnak, ha akarom.
A hamvas keblet tapintom vele,
Fogok szerszámot, épitek vele
S ha kell támadásra kész öldöklő karom.
Néma jobbágyak, honnan jöttetek?
E gyászos napokban tudtam meg, hogy vagytok,
Minden értéknek, mit ember kitalált:
Ti vagytok mellőzött, elfelejtett apjok.
Ujjaim, hosszu éjszakák tollfogó cselédi,
Ugye sokszor nagyon megkinoztalak?
Nem használt, hogy görcsbe rángatóztatok,
Mert ujabb iramra parancsoltalak.

És a nappalok, a szörnyü nappalok
Mikor tüzes, izzó vasat fogtatok,
A vas csattant, gőz süvitett,
Egy nagy, átkozott pokol hevitett . . .
És hányszor . . . és hányszor halálra
merevült minden ize . . .
Fáradtak vagytok, fáradtak nagyon?
Hát pihenjetek, óh én már hagyom.

Szám, pompás szavak harsonája
Én lángoló csókok biboros párnája,
Hahotázott is valaha régen . . . ?
Most csak gyülölet lobbant csóvát benne,
Minden alázatost üzve, verve.
Mert a Mind szolgasága, az én szolgaságom;
A boldogságot én hiába vágyom.
Ha a rongyok, a gyávák utamat állják,
Hiába int, hiv, csal a holnap;
Nem mehetek a tömeg nélkül
S életünk igy rohad, penészül —
És a távolban hiába égnek a máglyák.
Csitt . . . hallgass . . . némulj el szám . . .
Csak átkokat tudsz már . . .
A müezzim éjfelet kiált . . .
Nagy csönd — borulj le rám.

Szemeim, egykor ti adtátok a szincsodákat,
A napsütést, az árnyakat,
Mások vidám örömét,
Élőket és holtakat.
Szemeim, óh amit most látok, iszonyat.
Egy haldokló világ tajtékos szájjal
Maguk ássák önön sirjukat.
Szemeim, ti fáradt katonák,
Kiégett napok, hüséges őreim,
Már nem tudtok mutatni semmi uj csodát:
Hát pihenjetek,
Kiadom nektek az utolsó marsrutát.

Agyam, te szürke, nyulós pépdarab,
De ezer istennél nagyobb,
Mert érzel, tervezel és gondolkodol,
Agyam, te gyilkos kinok mühelye,
Mért adtál látni titkokat?
Mi rejtve volt a mélyben lent.
Mért üztél kutatni sziveket?
Mért szárnyaltad át a végtelent?
Csak azt tudtam meg, hogy rab vagyok
És hüvelyem a börtönöm,
Szolgák között — szolga csupán
S fájó magammal küzködöm.

De véget vetek a nagy komédiának,
Hisz a szenvedés sem lehet örök . . .
Tehát kijelentem e pillanatban —
Hogy börtönömből kitörök.
Kitörök és lerázom magamról
Ez ocsmány földnek minden bu-baját:
Mozduljatok hát még egyet, részeim —
Aztán — pihenés — jóéjszakát.

De mi ez? Szemem vadul fellobog . . .
Kezem görcsös, görcsbe ragad . . .
A lábam cölöpbe merevül . . .
Minden testrészem megtagad.
Előre hát — kiáltom én . . .
Lábam, csak még egy lépés, egyetlen egy:
Karom, utoljára még e pohárt emeld:
Szám, csak még ez utolsó kortyot lenyeld,
Aztán jön a pihenés, az örök béke.
Egy se mozdul . . . !?
Lázadón utamba állnak . . .
És eltorlaszolják utját a halálnak.

Jaj nektek, lázadó cselédek!
Ha pihenni nem akartok,
Előre hát ujabb iramra,
Uj küzdelmekre, véres csatákra,
Szenvedésre és millió bajra. És csoda . . .
A fáradt testrészek apraja, nagyja
Virgonc, frissült erővel törnek a magasba.

A munkásmozgalom

PIKA PÁL

TÖRTÉNELMI időket él az emberiség, sokan a legnehezebb gazdasági válságban is közönbösek; nem gondolkoznak a nyomasztó helyzetük mikénti orvoslása felett.

Amikor munkásmozgalomról esik szó vállvetve, könnyedén napirendre térnek felette. Nagyon sokan pedig el sem akarják magukról ismerni, hogy az ő érdekük azonosak a munkásokéval és hogy a munkásmozgalom az ő érdeküket is szolgálja.

Találgatják azon okok eredetét, a melyek olyan nehézzé teszik számukra a megélhetést; pedig a munkásmozgalom, lefektetett iránya és harci eszközei az egyedüliek, amelyek a társadalmi problémák megoldására alkalmasak. Nem látják, hogy az emberiségnek legnagyobb küzdelme semmi más, mint a létért való küzedelem és ebből a küzdelemből nem tudják és nem akarják kivenni részüket.

És ha létük fentartása küzdelmes, akkor is csak mint egyének akarnak boldogulni a gigászi harcban, abban a reményben, hogy vissza tudják varázsolni a multat, amikor még voltak esetek, hogy kapzsisággal, másoknak kárára, nem törődve az emberi önérzettel, valamivel feljebb tudtak emelkedni, de csak gazdaságilag az általános munkásság felé. Ezen időket nevezték az egyéni boldogulás korszakának és ma is sokan ezeket az időket szeretnék vissza állitani.

Vannak és voltak a nehezen dolgozó munkásosztály tagjai között nagyon sokan olyanok, akik ezeknek barátságát keresték és keresik és nem látják, hogy ezek csak a nem gondolkodó munkástömegekre alapozzák létezésüket.

A technika fejlődése feltartózhatatlanul halad a maga utján tovább. A barlang lakó emberből modern ember fejlődött ki. Az ipari fejlődés folytán az emberiség egy uj korszakába értünk, ahol már az egyéni érvényesülésről szó sem lehet.

A gépek fejlődése forradalmositotta a termelési folyamatot; ezzel szemben, maga az emberiség nagy tömege megmaradt a maradiságba és azoknak szekerét tolják, akik hosszu időkön keresztül az emberiség tudatlansága folytán uralmon vannak.

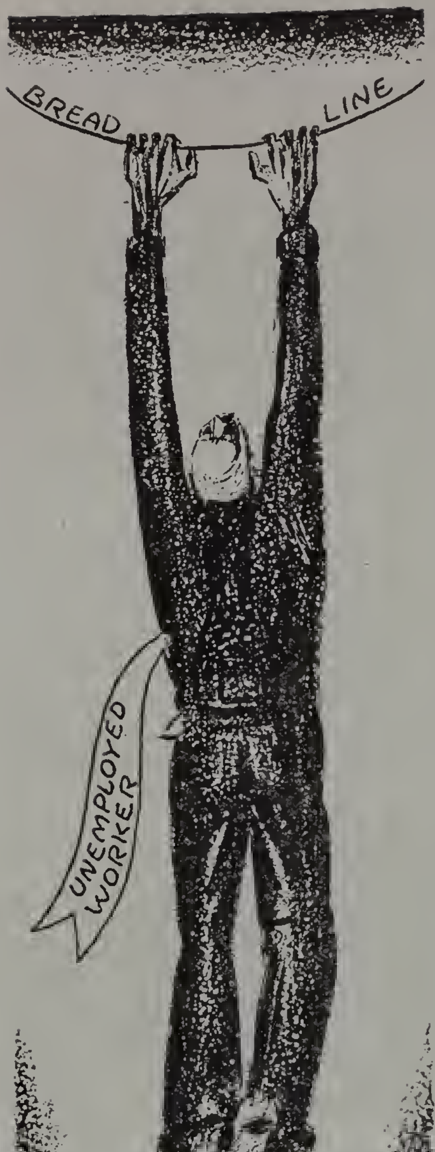
Ezer éves sérthetetlen alkotmány szerint akarják még mindig kormányozni a világot, amely alkotmányok azok által lettek lefektetve, akik akkor uralmon voltak és ezen alkotmányok az ő érdekeiknek megfelelőleg lettek megalapozva magán tulajdon mindenkori megvédésére. És mivel, ma is még a magántulajdon rendszerébe élünk ezen elavult alkotmányok még mindig védik az uralmon lévő osztály érdekét.

Sajnálatra méltó jelenség az, hogy a modern ember ugyanazon társadalmi életét mint ezer év előtt.

Azok a munkások, akik nem ismerik és távol állanak a munkásmozaglomtól szégyenkezve kell beismerni tudatlanságukat, pláne akkor, amikor a történelmi rabszolga sorsról esik szó; mert ők gondolataikban nem különböznek a maradi rabszolgák gondolat világától csak annyiban, hogy már a modern kor nem gondolkozó bérrabszolgái.

Az uralmon levő osztály csak addig tudja zsarnoki uralmát megtartani, amig a társadalmat fentartó dolgozó milliók nem fogják felismerni egységes érdeküket és mint az élet lehetőségeitől megfosztottak fel nem ismerik azt az igazságot, hogy az egyéni érvényesülés ideje lejárt, helyette egy más rendszerről kell gondoskodni, amely rendszer nem a magántulajdon rendszerének sérthetetlen, ezer éves alkotmányán, hanem a modern ember mai igényeinek megfelelő szabad, ipari társadalmi rendről lehet csak szó, ahol egyik ember nem uralkodhat a másik élete felett.

A mult tapasztalata sok példával szolgál az emberiségnek, még azok az indifferens munkások is tanulhatnak



belőle, akiket az uralkodó osztály ugy a multban, mint a jelenben is feltudott használni különböző hangzatos jelszavakkal; de mindig csak az uralmon lévő osztály megvédésére.

Millió és millió ártatlan ember vére folyt már a mai rendszer fentartásáért.

Millió és millió ember áldozta életét a "haza" szent oltárán.

Láttunk háborukat, ahol a "haza" védelmére millió életet áldoztak fel és a háboruk befejeztével azok, akiket a "haza" megvédésének jelszava alatt háboruba vittek majd a "hősies" küzdelem után a legnagyobb nyomorba jutottak, mert hazájuk még megélhetést sem biztositott a számukra, de az uralkodó osztály tovább folytatta dözsölését, a nyomorgó milliók kinszenvedésein folytatta zsarnoki uralmát.

A nincstelen milliók, akik már sokszor áldozták mindenüket a haza védelméért mostan, amikor minden szépet és jót tudnak előállitani, amikor mindenből van elég, a legnagyobb nyomorban tengetik életüket.

Miért van ez igy? Erre akarok felelni!

Mert a sok nem gondolkozó és ezer éves alkotmányt; magántulajdon rendszerét szent és sérthetetlennek tartják.

Elhiszik az uralkodó osztály kolomposainak, hogy ők a nép érdekeit szolgálják; pedig a nép érdekeit senki más csak maga a nép képviselheti.

A gazdasági elnyomatás, hosszu időkre vezethető vissza, amely az egyedüli ami a nép nyomorát okozza.

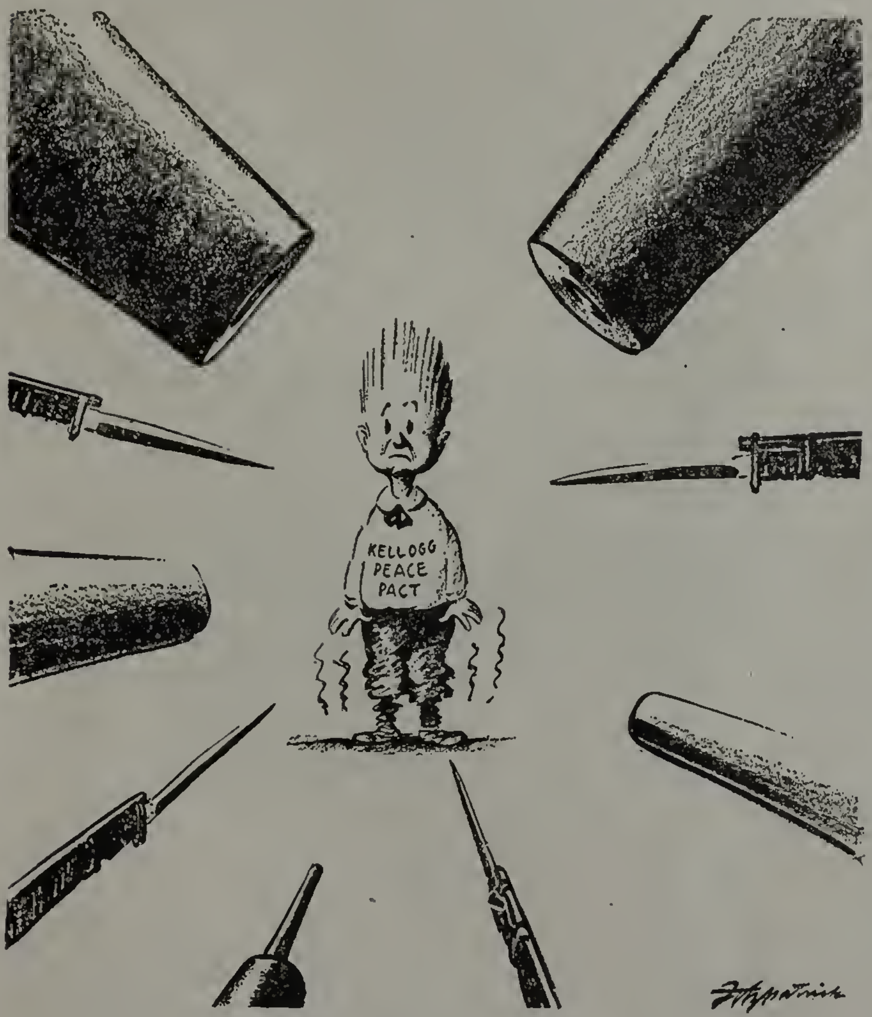
Azt tudjuk, hogy a társadalomnak bajai vannak, mert hisz érezzük annak nyomasztó hatását és a társadalmi bajok egyedüli orvoslása a munkásmozgalom felépitésében rejlik.

A munkás mozgalom semmi más mint a mai társadalmi viszonyok által létre hozott intézmény, amely az elnyomott, gazdaságilag kihasznált ember millióknak egyedüli tábora, a gazdasági egyenlőség megteremtésére jött létre.

Azok, akik orvoslást keresnek a társadalmi bajok mgeváltoztatására a munkásmozgalomba kell, hogy keressék azt. A mai társadalom a magán tulajdon rendszerén alapszik és hogy az emberiség emberi mivoltához mérten élhessen a társadalmi vagyont nem lehet, hogy egyes emberek uralják, nem lehet jólét és boldogság az emberiség számára, amig meg nem teremti a gazdasági egyenlőséget.

A munkásmozgalom pedig semmi más, mint a gazdasági ellentétek megszüntetésére megszervezett társadalmi rend, amely magába hordozza az emberiségnek szabad társadalmát.

Amikor munkásmozgalomról beszélünk, olyan munkásmozgalmat értünk alatta, amely nemcsak "munkás" jelzővel van ellátva, hanem olyant, amelynek alapja magába hordozza az uj társadalom minden épitményét és harcmodora alkalmas a gazdasági rendszer megváltoztatására. A munkásosztály magát okozhatja legjobban nyomoráért; mert nem várhatjuk azoktól az orvoslást, akik jólétben élnek.



A világkapitalizmus "világbékét" csinált. De hogy a világbékét föntarthassa, szuronyokra épitette azt.

Ha a munkások felismerik azt a tényt, hogy a társadalom hibái orvoslásra várnak, hogy gazdasági rendszer változás csak az egyedüli megoldás és éppen ugy mint az ipari fejlődés forradalmasitotta a termelést, éppen ugy kell, hogy a modern ember forradalmasitsa a gazdasági berendezkedés alapját.

A nyomorgó munkás millióknak fel kell ismerni osztály helyzetüket, fokozott tevékenységgel kell épiteni a munkásmozgalom azon táborát, amely mozgalom a társadalmi — vagy termelési rendszer megváltoztatására alakult és forradalmi gazdasági összecsoportosulása révén képes a korszakalkotó rendszer megváltoztatására.

Munkásoknak a munkásmozgalomban a helye, mert mennél tovább várunk, annál tovább fog az emberiség a nyomasztó gazdasági viszonyok között sinylődni.

A munkásmozgalom az emberiség küzdelmének a legerősebb vára, a melytől milliók és milliók boldogsága és élete függ.

Mennél hamarább felismeri a munkásosztály a forradalmi munkásmozgalom szükségét annál hamarább valósulhat meg a munkásosztály egyedüli reménye a gazdaságilag egyenjogu, egyenrangu társadalmi rend az uj társadalom.

Ezt az uj társadalmat Amerikában és az egész világra kiterjesztve épiti az Industrial Worker of the World (IWW) az Egy Nagy Szervezet felépitésével.

De mert az IWW nemcsak, hogy nem igéri, de minden alkalommal kinyilvánitja, hogy a munkások helyzete egyedül a saját ténykedésük alapján változhat csak meg, ezért szükséges, hogy az öntudatra ébredt munkások csatlakozzanak a munkásmozgalom azon csoportjához, a melynek segitségével győzelemhez is juthatnak.

A Munkás Betegsegélyző Szövetségnek

LEGYEN TAGJA

BEÁLLÁSI DIJ NINCSEN

AZ ELSŐ HAVI DIJÁT A KÖZPONT FIZETI

Harmadik havi diját az osztály fizeti a tagszerzési dijból.

300, 500, 750, 1000 dolláros haláleseti járulékok.

9, 6 dolláros heti segélyek.

Kilencszáz dolláros segélyi jog.

Kilencszáz dolláros segélyi jogon felül egy szem vagy végtag elvesztése esetén még 300 dollár.

Két szem, két végtag, vagy egy szem és egy végtag elvesztése esetén még kilencszáz dollár.

Osztályt alakitani 8 vagy több taggal lehet.

Felvilágositásért irjon a titkárpénztárnoknak:

SZEMÉLYEK: A MUNKÁS
A TŐKÉS
AZ ÖNTUDAT

(A szin sötét. Bejön a Munkás és a Tőkés. A Munkás egy nagy batyut cipel a hátán, övig meztelen, izmai mint az acélhur feszülnek. A nyakán lánc csüng, amelynek vége a Tőkés kezében van. A Tőkés aránytalanul kisebb a Munkásnál, kezében ostor. Ahogy a szinre lépnek, a Munkás nyögve összeroskad. A terhét elejtve zihálva a földön marad.)

Tőkés: (Megrántja a láncot.)
Föl, barom! Föl! Tovább!

Munkás: (Nyögve.)
Uram, kegyelmezz! Hadd pihenjek még. Nem birom tovább. Terhem szörnyen szörny nehéz. Jaj, uram, esdek a kinomra nézz.

Tőkés: Mit papolsz, ostoba állat. Lustálkodni akarsz!?
Lopni a napot semmivel. Engem meg nem csalsz, ne félj!
No, mozogj'. Egy-kettő, mert ütök!
Itt a korbács! (Megsuhitja.)

Munkás: (Odacsuszik a Tőkéshez.)
Nem. Ne bánts!
Ugy fáj a korbács!
Ütése a husba mar, éget.
És utána csattanva marjul ki a bőröm.
S nyomába zudulva piros, forró vér jön.
Uram, nagyon fáj a korbács!
Ne bánts'. Fáradt, vagyok.

Tőkés: (Fölcsattanó haraggal.)
Eh, mit hallgatlak! Csak ütni kell! És megy rendjébe' minden.

Munkás: (Sikoltva.)
Nem! Nem!

Tőkés: (Megrántja a láncot.)
Ismerlek. Nagyon megszoktad már a verést. Majd mást találok ki büntetésül, mert ez, ugylátszik, nem használ. Na, előre, állat!
Nem mozdulsz?! Ellenkezni mersz? Ne hát! . . . (Vadul csapkodja a korbácscsal.)

Munkás: (Fuldokló zokogással egészen a Tőkés lábához csuszik és a lábait csókolja. A Tőkés elrugja magától.)
Ezt tudod. Hizelkedni . . . Csókolni a lábam. Engem meg nem inditasz, kutya'. Ismerem jól álnok, alattomos természeted . . . Mozdulsz-e már? (Üti.)

Munkás: (Tántorogva föláll.)

Tőkés: Tudtam. Csak verés kell neked!

Munkás: (Rettentő kinnal fölveszi a terhet, de amikor indulni akar ujra összeroskad és élettelen nyulik el a földön.)

Tőkés: (Toporzékol dühében.)
Hát nem volt elég? Ujra kezded megint?! Ne hát! . . .
(A láncot rángatja. Belerug és üti.)
(A messzeségből velőthasitó sikoltás hallatszik. Pillanatnyi fojtó szünet.)

Munkás: (Megmozdul, rémülve.)
Mi ez?!
(Ujra hallani a tébolyitó, hisztérikus jajgatást. De most hosszasabban tart.)

Munkás: (Reszketve.)
Mi volt ez? (Felül.)

Az öntudat: (Kint élesen csattan.)
Ébredj!

Munkás: (Dideregve.)
Mi volt ez? Egy hang szólitott.

Tőkés: A korbácsom szólitott, kutya! Ha nem mozdulsz, széthasitlak.

Az öntudat: Ébredj! Közelget a hajnal.
Vakitó világgal a fény mindjárt rád esik.
Ébredj, ébredj, ébredj!
Aludtál már pár hosszu századig.

Munkás: (Rémülve.)
Ki az? . . . Ki beszél hozzám?

Az öntudat: Én vagyok, az istenült öntudat.
A lélek, az ész! Nem ismered magad?

Munkás: Nem . . . Nem ismerlek.

Az öntudat: Pedig ott voltam benned. Ott vivtam én,
A tunyasággal ádáz harcokat.
Emlékezz, testvér: hogy üztelek,
Hogy martam beléd;
Hogy jajgattam; jaj elég, elég!
És te aludtál mégis.
De én nem, nem türök tovább!
Kényszeritlek, tarts már énvelem.
És agyad, a szived, a csontod, a velőd,
Ádáz dühhel ujra megverem! . . .
Amig föl nem serdülsz az átkos szendergésből,
Amig meg nem ismered önön magadat,
Addig én meg nem nyugszom,
A husodba tépek s mint a láva
Lángolva égek, mig meg nem unod
És le nem rázod szolgaláncodat . . .
Testvér! Int felénk az élet!
Nézz körül, minden milyen szép, vidám.
Fönt a hegyen csodaszinek égnek,
Hangulat és igézet száll a szélmuzsikán.
Testvér! Ne légy már dőre!
Nem mindenütt oly sötét a táj.
Van nap is, mely szikrázva lángol.
Testvér; nézz már egyszer előre!
Munkás: (Nehezen föltápászkodik. Szemeit a messzeségek felé mereszti.)
Tőkés: Ahá! Már kiment szemedből az álom?
Az öntudat: Előre! Tied itt minden.
Tied az élet minden mámora.
Tied a föld minden büvös kincse,
Téged vár millió igéző csoda.
Munkás: (Lassan kiegyenesedik. Mintha uj élet szállna bele. A szemében eddig ismeretlen tüz villan föl. Sulyos karjai megmozdulnak.)
Az öntudat: (Buzditva, lázasan, sürgetőn.)
Előre, testvér! Te vagy a föld királya,
Te vagy a legfőbb ur: az alkotó.
Benned buzog az őserő dagadó árja,
Amelyhez a földön nincs már fogható.
Munkás: (Egy mozdulattal leszakitja a láncot. A szeme folyton előre mered. Karjait kitárja.)
(Ebben a pillanatban vakitó fénycsóva vetődik a munkásra. A távolban halkan az Internationale hallatszik.)
Tőkés: (Rémülve.)
Mit csinálsz?! . . . Miért szakitottad el a láncot? . . . Barátom, édes jó barátom, ne hagyj itt!
Az öntudat: Előre! . . . Meg ne pihenj!
Munkás: (Eltakarja a szemeit.)
Mi ez? Elvakit.
öntudat: (Ujjongva.)
A nap! A nap! Az áldott! A meleg!
Mely aranyló fényt öntöz el szerte.
A nap, mely millió kis életet nevel.
A nap, mely kacagni megtanit
És felejted az éj bus sirámait!
(Az Internationale erősödik. A hangok bugva, vértforralón csapnak az égnek.)
Munkás: Mi ez? . . . Mit hallok?!
öntudat: Az öntudat döngeti
Sötét börtönének sziklafalát.
Hozsánna élet! Ébred az ember!
Hozsánna néked, te szép csodavilág!
Hallod-e, föld? Már jön az ember!
És előre, magasra, a hegyre megy fel,
Elfoglalni ős birodalmát.
Nézzetek ide, mult évezredek!
Dobbanj meg föld, sajgó örömödben!
Zugjatok ormok, zengjetek hegyek!
Dalt harsonázz szél, erdő, berek!
Jön az ember, a régi, az erős! . . .
Munkás: (Egy lépést tesz előre. Karjait a messzeség felé tárja. A hangja fudokló zokogásba ful.)
Élet . . . Te szép . . . Te jó . . .
Megyek . . . Megyek . . .
(Lassan megindul.)
Tőkés: (Kétségbeesetten.)
Édes barátom ne hagyj itt! . . . Kérlek! . . . Könyörgök! . . .
(És megy mindenütt a Munkás után; de az magasra tartott fejjel megy és nem vesz róla tudomást.)

(Függöny)

Magyarországi Beszámoló

F. S. JÓZSEF

HA ugyan lehet beszámolni az elmult évek eseményeiről Magyarországból ugy az csak rosszabbodásról való beszámoló lehet.

A világkapitalizmus válsága itt nálunk érezhető legjobban, ahol a csökevény hübéri és kapitalista rendszer ugynevezett vadházasságban élve pusztitja a magyar népet. Az előbbi nem akar kimulni, görcsösen ragaszkodik uralmához és hogy ezt megtarthassa az ország lakósságát hozzáadva a fosztogatási lehetőséget tejlessen a kapitalisták igája alá hajtja. Köztudomásu, hogy európa legnagyobb stilü kalandora Gróf Bethlen István tizévig pusztitotta az országot. Ezen pusztitásához a szuronyokon kivül nagyban hozzásegitette a krelikalizmus is azért a koncért, amelyet a protestáns Bethlen lökött nekik. Megterhelték kölcsönök felvételével ezt a szerencsétlen országot ugy, hogy ma alapjaiban recseg-ropog itt minden.

Jelszó részükről az volt, hogy "utánnunk özönviz." Hogy a kölcsönök forrásai számukra bedugultak nem rajtuk mulott. Ha valaki azt kérdezi, hogy hova lett az a rengeteg pénz amit fölszedtek hát egyszerüen azt lehet mondani ellopták. Ugyanis semmiféle produktiv munkára egy fillért föl nem használtak. Ilyen előzmények után kellett azután Bethlen urnak megválni a miniszter elnöki széktől.

Az ország lakóssága pillanatnyilag föllélegzett. Azonban nagyon hamar jött a kiábrándulás azoknál, akik azt hitték Bethlennel együtt a fosztogató rendszer is megbukott. Hamarosan kiderült amit egyébként minden öntudatos ember előre látott ez a rendszer oly annyira beleeresztette csápjait a jobb sorsra érdemes magyar nép husába, hogy holmi kormányválság által nem hajlandó magát a nép vérének való szivásában zavartatni. Gróf Károlyi ugynevezett strohman volt csupán. A hatalom ténylegesen továbbra is Gróf Bethlen kezében maradt és kreaturája csupán azt tette, amit gazdája parancsolt. Bethlen amig látható feje volt a hatalomnak nem mert hatalma oszlopaihoz a közalkalmazottakhoz nyulni. Kreautráját azonban utasitotta, hogy ezek fizetését vágja. Ezt azóta párszor megismételték.

Kihirdették a Statáriumot.

Egy éve mult annak, hogy itt Hayman szelleme ébredt fel. A hóhér gőzerővel dolgozik. Persze csak a proletárság körébe. Megvalósitották a világon pártját ritkitó "levél kukucskálást" és a levelek "vámvizsgálatát." Azelőtt ezt nyiltan csinálták a háboru alatt és Cenzura volt a neve. A parasztok ugy élnek a falvakban mint az üldözött vadak.

A magyar kozákság amit minden magyar jól ismer ha csendőr néven is, ütik verik a népet mint a répát. A közigazgatási hatalmasságok a vidékek nyelvén az "Atyaistenek" (főszolgabirák) sanyargatják minden uton módon. Fölösleges a specialis magyar adóbehajtásról irni. Vannak falvak, amelyekből minden lábas jószágot elhajtottak, az utolsó párnáig elcipeltek mindent adóba. Az adózó soha sincs tisztába azzal mennyi adót kell fizetnie. Bármennyit is fizetett be mégis tartozik.

A legközönségesebb és legdurvább módon az egyházi adót hajtják be. Igy láthatók most már nem csak pesten, hanem vidéken is félmeztelen és zörgő csontu emberek, akik között ott jár szemforgatva a potrohásra hizott csuhás, csendőr és jegyző. Akinek azelőtt 100 hold földje volt ma napszámos volna, ha kapna munkát. Vagyonát elvitte a kamat és az adó. Vidéken, hogy az elégedetlenséget ellensulyozzák mivel rájöttek arra a csendőr golyója és szuronya már nem elegendő erre egyedül ugynevezett inségmunkát adnak. Persze nem állandóan, hanem a felváltó rendszer szerint az éhezőknek. Egy napi baromi munkáért (utépités stb.) 3 kgr. durva barna kenyérlisztet adnak. Pénzt? Minek az a parasztnak.

A munkásság teljesen leteritve és

kifosztva, azok akik ezt elősegitették kereskedők, kisgazdák, iparosok már ezek is odajutottak. Ma még jajveszékelnek, de sorsuk megpecsételtetett. Budapesten ma háromszor annyi üzlethelyiség, két és félszer annyi lakás áll kiadatlanul mint 1931-ben. Ez a szám mindennél többet beszél.

A reakció lelkiismerete sem nyugodt már. Naponta vonultatják föl a katonaságot a városban. Gyakran lehet látni a páncélautós osztagokat amint a főutvonalon vonulgatnak keresztül. Láthatják a dunai halak rémitgetésére alkalmas kis folyamőrségi hajókat, amint a vizben uszkálnak. Mindezt azért, hogy a reakció hiveit nyugtassa; mig a proletárokat figyelmeztesse jó lesz csöndben lenni.

Az előbbiek azt hiszik nincs semmi baj, az utóbbiak, akik az éhenhalás vagy a golyó közt választhatnak meg nem veszik komolyan már ezt. Igy tehát mivel Bethlen kreaturája alatt tovább romlottak a viszonyok és ami a végzetük lett, hogy a külföld nem ült fel a gózé taktikának és igy Károlyinak nem sikerült pénzt (kölcsönt) följhajtani Bethlen utilapot kötött a talpára Károlyinak. Jelenleg amikor e sorokat irom itt teljes a khaosz, politikai téren. Gömbös Gyula (van-e ki e nevet nem ismeri?) a fiók Musolini, aki ugy Bethlen, mint Károlyi kormányban a hadügyminiszter volt, áll az előtérben, ami egyben a leplezett fascista katonai diktatura helyett nyilt katonai diktaturára való áttérést jelenti. Hát annyi igaz változás, ha e cimtáblát föl is cserélik nem sok lesz.

A munkásmozgalom áttérése megállapithatjuk visszafejlődés van. A szociáldemokrata politikai és gazdasági szervezetek, amelyek minden cselekvése a pártpolitika szolgálása állandóan demoralizálódik. Igy ma a tényleges proletárság helyett inkább kiskereskedők, kisiparosok, intellektuellekre támaszkodnak. A tényleges proletárok vajmi kevesen vannak már közöttük. Egy jó részük teljesen passziv lett és nem nyerhető meg semmiféle mozgalom számára sem. Ez érthető is megcsömörlöttek attól, amit a szociáldemokraták munkásmozgalomnak neveznek. Szellemileg is elmaradottak, akik nem birnak disztingválni a mozgalmak között.

A másik részük a moszkoviták befolyása alá került és bömböli a frázis jelszavakat legtöbbjük anélkül, hogy venne magának annyi fáradságot, hogy leharapná ezekről a külső mázt és gondolkozna azok fölött amit azután látna. A Kmp. is mint minden pártmozgalom több frakcióra szakadt. Van a Sztalinista frakció, amely Moszkvából nyert korlátlan szubvenciója révén a leghangosabb, de mindezek dacára tömeg mozgalom kezdeményezésére képtelen. Van a Trotzky-féle frakció, amelyről még kevesebbet tudunk, azután a Kmp.-ból leszakadt ugyenevezett baloldali kommunisták frakciója (KAU) amely számra a legkisebb, de a pártforradalmárok között a legvakmerőbb. Persze mivel mind politikai hatalom megszerzésére utazik ezek a legélesebb harcban állanak egymással.

A szociáldemokraták nyiltan szolgálják ki a jelenlegi rendszert. Épp a napokban fordult elő, hogy az egyik párt kommunista alakulat szervezőinek név sorát adták át a rendőrségnek, kiket Pesterzsébeten azután le is fogtak. Általában az a taktikájuk a szoc. dem.-eknek ahol kellemetlenkedik nekik valamelyik más mozgalom ott a rendőrséget veszik igénybe ellenük.

Az IWW mozgalom, amely ellentétben a politikai hatalomra törtető szervezetekkel nem dobálódzik, mint ahogy nem is dobálódzhat üres frázisokkal, ha lassan is, de tért hódit. A lassuság egyik főoka az anyagiak hiánya, amely lehetetlenné teszi egy nagyobbszabásu kampány lebonyolitását és a hatalomra törtetők rágalmainak ellensulyozását. Mindezek dacára ha lépésről lépésre is, de halad előre. Amilyen mértékben ismerik fel a bérrabszolgák vezéreik és pátjaik tehetetlenségét, álnokságát ugyanolyan mértékben szervezkednek majd az IWW-be. Ma még nagy a vásári lárma és a tömeg nem gondolkozik a holnapról vagy ha igen, azt tévessen képzeli el. De azért mi a csüggedést nem ismerjük, megyünk előre a kijelölt uton harcolvá az Ipari kommunizmusért. Bátorság!

A haladás utja

BROOKS ELZA

VALAMIKOR, az ősidőkben véres harcok jelezték az ősember minden lépését. A kenyérért, a megélhetésért folyt a véres küzdelem, a harc oka egy nagyobb falat kenyér volt. De az ősember segitette egymást, mert felismerték, az összetartás erejét, hogy anélkül elpusztulnának. Ha veszekedtek is néha egymás közt, de ha a reggel jött s felébresztette őket a legelső napsugár, elindultak harcolni közös erővel, a közös ellenség ellen. Az ősember ismerte az ellenségeskedést, a gyülölködést, de ismerte az összetartás erejét is.

S később, amikor a civilizáció, a kultura bejött az emberiség életébe, s az ember kijött a vadonból, házat épitett s eljutott a mai kulturális állapotokhoz. Lassanként kiveszett lelkükből az összetartás biztos érzése s ki-ki magáért, való jelszó alatt folytatták a megélhetésért való ádáz harcot. Az emberiség többé nem közös erővel megy előre, mint az ősember idejében tette. S ezt, nagyon is megérzi az emberiség. Különösen a munkásság megérzi a közös érzés és gondolkozás hiányát.

A haladás utját vér jelzi. Embervér sir fel a modern technika legcsodálatosabb találmányában, a repülőgép berregésében. Ember-vér vonaglik át a tengeren járó hajók hatalmas testén. Ember-vér zokog fel a rádión, lázasan lüktet benne az ember-sziv, a sok elhulajtott könny, fájó panasz elfojtott sóhaj.

A vadonban élő embernek csak a vadállatok ellen kellett küzdenie. Közös erővel le is győzte őket. De mi volt az ősemeber harca, a ma emberének a harcához képest? Gyerek játék! A ma embere, a gyárak modern felszerelésü gépei ellen harcol, s milyen erővel. A kultura haladásában gyászosan, vészesen lohol az emberi-sziv, kinek türni, szenvedni és éhezni kell, mert nem akarta magáévá tenni az ősember hatalmas fegyverét az összetartást.

S az ember, a hatalmas ember szenved és tür. Eltüri, hogy háborut uszitsanak a nyakába. Tür nyomort, eltüri a nincstelenséget és még sok minden mást, de a Testvérieséget és az összetartást még sem akarja. Eltüri, hogy kihasználják, eltüri a kultur élet minden borzalmát, minden lehetetlenségét. Jaj, csak mély álmából fel ne ébressze őket senki!

Az IWW a programjába bekapcsolja a haladással együtt az emberiség jólétét is.

S hogy célját elérhesse, nem akar más egyebet, csak azt, hogy a munkásság egyesüljön a Kapitalizmus megdöntésére, ebbe a harcos a munkásságért mindig harcba szállni kész szervezetbe.

Minél előbb ezt teszi, annál hamarább ért céljához. Ma már nem lehet kétséges egyetlen munkás előtt sem, hogy más utja nincs a boldogulásának. Hiszen megpróbálta már. Mindenütt kilincselt. Mindenkit maga fölé emelt, csak ő a munkás maradt alul, éhesen, rongyosan.

AZ ŐSÖM

Kóbor lant pengető lehetett az ősöm.
Lelkében örök szép álomról álmodott
S a csinos dalokért maradékot kapott:
Bizonnyal nevettek a kopott regősön.

Lengő dus szakálla a multból visszaint
És látom a gőgös, dus porfidok körén,
Hol Sylvanus Najad áll márványkövén:
Gyülölettel ősöm föl rájuk hogy tekint.

Hahó öreg! tested bár a multban pihen,
Késő unokád el tehozzád igy izen:
Nyugodj csak békében, ne fájjon, ami fájt.

Gőgös isten a Pénz, már buvhelyet keres,
Szilaj dalt zeng lantom, az ég viharveres:
Visszafizet mindent a késő unokád.

H.P.

Gyárak, bányák, üzemek munkásai hangyaszorgalommal gyüjti a nagytőkések vagyonát. Bent izzad a munkás éhbérért, — a tőkés és családjáért, mig ő és családja elpusztul.

Ady és a forradalom

E felolvasást az októberi forradalom emlékére Fülöp Miklós tartotta a New Yorki Ady Endre Társaság 1932. október 21-iki estélyén.

A VILÁGHÁBORU rettenetes gépezete tizennégy évvel ezelőtt október havában kezdett recsegni-ropogni és Európa évszázados konstrukciójában is ekkor indult meg a szemmel is látható dübörgő összeomlás. A bulgárok kiléptek a szövetségből, Csehország proklamálta függetlenségét, Horvátország elfoglalta Fiumét, a románok Erdély és Bánát felé nyujtották karjaikat és a Magyar Szent Korona országai fátumosan hulltak el az ezeréves testről. Hullahegyek, vértengerek nyomán ujabb nyomoruságok szakadtak a magyar népre.

Ady Endre a csucsai kastélyban, olvasta, hallotta, élte és érezte az események lavinás folyását. A költőt valóságos rohamok bántják e napokban, alig lefékezhető nyugtalanság veszi hatalmába, kezei jéghidegek, a gyász és siralom apáthiája üli meg lelkét. És egy hüvös őszi estén, a román cselédleány ép akkor lép be a szobába, mikor Ady Endre reszkető kezekkel régi, kedvelt bibiliájának lapjait tépdeste ki és dobta bele a kályha lobogó tüzébe. Csak a biblia fekete fedele maradt meg remegő kezében. Ezt már nem volt ereje a tüzbe dobni. Kusza betükkel Jézus utolsó golgotai szavait irta rá: Éli, Éli Lama Sabaktani: Én istenem, Én istenem, miért is hagytál el engem? És a dátumot 1918 október 23. Ebbe az evangéliumi igébbe zokogta bele a költő: Jézus, sajátmaga és a fuldokló embermilliók tragikus életsorsát. Önmarcangoló, világsorsáért remegő, háboru alatti hatalmas versei után, e golgotai sor visszaidézésével is drámai pompájában jelenik meg látnoki zsenije, mely mindenkinél tisztábban érezte meg, hogy az isten megint, hosszu időre elhagyta a szomoru embereket.

Ady Endre külön nagy tragédiája, hogy közvetlenül a magyar és világforradalmak küszöbén testben és lélekben összetörve érte meg októbert. Arról kell itt ma beszélnem, hogyan szentelte lángoló zsenijét meg nem alkuvó szilárdsággal, félelmes elhivatottsággal októbernek, a forradalomnak, melynek azon a kis földön, ahonnan mi idekerültünk, vezére, csillaga, erőforrása, negyedszázadon keresztül Ady Endre volt.

*

Lellei, diósadi, menyői Ady Lőrincz ur és hitvese Pásztor Mária amikor első eminens Endre fiuk a zilahi református gymnáziumban leérettségezett, nagy reményekkel inditották el őt a debreceni hires őskollégium jogi fakultása felé. Kitervelték, remélték, hitték, hogy Bandi fiuk elvégzi a jogot és lesz belőle főbiró vagy alispán a hies-nevezetes hepe-hupás Szilágyságban. A reményes, rózsás terv azonban soha benemteljesülő kivánság maradt és életbeindulásáról maga, Ady Endre irta meg a következőket: “Mikor mint debreceni jogász beálltam egy ujság redakciójába, szegény martiranyámon kivül mindenki elmondta az elvégeztetett-et. Debrecenből, ahol nem igen akarták látni bennem még a Csokonai legpicinyebb öccsét sem s ahol első verses könyvem megjelent, Nagyváradra mentem ujságirónak. Ez a nyugtalan, zsidós, intelligens város sok mindent átformált bennem, amit a falu, Nagykároly, Zilah és Debrecen, tehát a falu formált meg. De viszont valami dacos cinizmus görcsölte le itt az ujjaimat: azért nem érdemes irni, hogy az emberből Kiss József legyen. Ujságot csináltam, vezércikket irtam, s nyilván elpusztulok, vagy nagyon okos életbe kezdek, ha nem jön el értem valaki. Asszony volt, egy hozzá jutott versem küldte, megfogta a kezemet és meg sem állt velem Párisig.”

Ez volt Ady Endre első külföldi utja. Politikai, irodalmi, s világnézeti harcaihoz ez a párisi tartózkodás adta meg zsenijének a kimerithetetlenül gazdag felszerelést. Dus fogamzással, szivében a nyugati kultura szerelmével érkezik meg onnan Pestre, ahol már hódoló leborulással vár rá egy illusztris csoport. Az akkor kitünően szerkesztett, haladó szellemü Budapesti Napló állandó munkatársként hivja meg és annak vasárnapi számaiban már kalászosodik a vetés, mely Uj versek cimen forradalma lett a a magyar költészetnek és a tespedő magyar horizontnak.

Petőfi óta nem született nagy póétája Magyarországnak. Régi, vájt mederben, fáradt elcsépelt gondolatokkal, megszokott és megunt költői formákban ment-mendegélt a magyar Pegazus, nem csoda hát, hogy a gazdag, cifra nyeregben ülő hivatalos irodalom az 'Uj időknek uj dalaival' érkező Ady Endrét egyre izgatottabban, egyre veszedelmesebb támadásokkal fogadta.

A feudális Magyarország urai, irodalmi csatlósai, kitartott politikusai hamarosan megérezték, megértették, hogy milyen forradalmi munkát fog Ady Endre kiskirályságuk földjén végezni, mert alighogy megjelent máris köréje csoportosultak az ifju tudósok, modern politikusok, müvészek, szocialista munkások, diákok, akik már régóta s felkészülten várták a maguk emberét. A politikában ekkor kezdődött az oligarchia magyar urak évszázados kiváltságainak s konokul reakciós uralmi rendszerének céltudatos támadása. Ezidőben kezdett szervezetbe tömörülni minden progressiv erő s komoly harcaikba ekkor indultak el a szocialisták, s mikor felcsendülnek Ady sorai, hogy: Másképen lesz holnap, másképen lesz végre, Uj harcok, uj szemek kacagnak az égre . . ., akkor indul meg a magyar társadalom maig is duló harca, melynek zászlóvivője a multban és jövőben Ady Endre, volt és marad.

Párisból érkezése után csakhamar szoros barátságot köt a szocialistákkal. Kunfi Zsigmonddal hajnalokba nyuló, termékeny vitákat folytat. Jászi Oszkár legbensőbb barátjává lesz, a Társadalomtudományi Társaság és a Galilei Kör tagjaival pedig meghitten érintkezik és nagyra becsüli őket. Révész Béla, leghivebb barátja, a Népszava akkori munkatársa, kérésére rendszeresen kezdi küldeni proletárverseit a munkások lapjába, melyekért a pénztelen költő soha dijazást nem fogadott el. Pedig Párisból, Rómából, Mindszentről, szanatóriumokból, mindenünnen küldte verseit a Népszavának s többször irta meg leveleiben Révész Bélának, hogy "mindennél többrebecsülöm, ha a szocialisták szeretnek."

Megemlitésre méltó, hogy Ady Endrét még a szocialisták se fogadták egyhangu, teljes megértéssel. Uj szavait, szokatlan költői formáit, eleinte nem értették meg a munkásolvasók. Csizmadia Sándorral élükön hatalmas támadást intéztek a szerkesztőség ellen Ady Endre verseinek megjelentetéséért. Ady Endre pedig **"Küldöm a frigyládát"** cimü versében fejezte ki a proletáriátussal való elszakithatatlan testvériségét.

KÜLDÖM A FRIGY-LÁDÁT

Szivem küldöm, ez ó frigy-ládát
S kivánok harcos, jó napot.
Véreim, ti dübörgő ezrek,
Tagadjatok meg, mégis-mégis
Én a tiétek vagyok.

Kötésünket a Sors akarta,
Nem érdem, nem bün, nem erény;
Nem szükség, de nem is ravaszság:
Helóta nép, helóta költő,
Találkoztunk ti meg én.

Bennünk nagyságos erők várnak,
Hogy életre ébredjenek,
Bennünk egy szép ország rejtőzik,
Mint gim a fekete csalitban
S lesködnek a vérebek.

Ha nem láttok testvéreteknek,
Megsokasodnak a redők
Bus homlokomon és lelkem táján,
De még mindig ifjan állok meg
Bősz Judásaim előtt.

Még csak mártir-fényt sem akartam,
Csak amiről a Sors tehet:
Odaadni magamtól, szépen,
Ezt a nem kért, kicsufolt semmit,
Forradalmas lelkemet.

Tietek vagyok, mindegy most már,
Hogy nem kellek, vagy kellek-e.
Egy a Napunk, gyönyörü égen.
Jaj, hogy elfed a Naptól néha
A gonoszság fellege.

Pár év elmultával a magyar proletáriátus tisztában volt azzal, hogy mije-kije volt nekik Ady Endre. De addig is mig a megismerés teljessé válhatott a költő az egyszerüségért üvöltőknek megirta a Népszava gyermek mellékletében **A proletár fiu** versét, mellyel megmutatta a kiabálóknak, hogy az egyszerüség se jelent okvetlen bárgyuságot.

PROLETÁR FIU VERSE

Az én apám reggeltől estig
Izzadva lót-fut, robotol,
Az én apámnál nincs jobb ember,
Nincs, nincs sehol.

Az én apám kopott kabátu,
De nekem uj ruhát veszen
S beszél nekem egy szép jövőről
Szerelmesen.

Az én apám gazdagok foglya,
Bántják, megalázzák szegényt,
De estére elhozza hozzánk
A jó reményt.

Az én apám harcos, nagy ember,
Értünk ad gőgöt és erőt,
De önmagát meg nem alázza
A pénz előtt.

Az én apám bus, szegény ember,
De ha nem nézné a fiát,
Megállitaná ezt a nagy, földi
Komédiát.

Az én apám, ha nem akarná,
Nem volnának a gazdagok,
Olyan volna minden kis társam,
Mint én vagyok.

Az én apám, ha egyet szólna,
Hajh, megremegnének sokan,
Vigan annyian nem élnének
És boldogan.

Az én apám dolgozik és küzd,
Nála erősebb nincs talán,
Hatalmasabb a királynál is
Az én apám.

A magyar vidéki elmaradtságból a párisi világosság emelte ki Adyt. Zsenije mellett is szüksége volt az ottani elmélyedésre, hasonlitgatásokra. Páris után a francia szellemi és politikai élet hatásai alá került és következésképen radikális nézőpontból itélte meg szülőföldje adottságait. Ott értette meg igazán a magyar földeloszlás veszélyes problémáját, a magyar népnevelés elmaradt nyomoruságát, az alföldi tanyák tüdővésszel szántott közegészségét, a szavazati jogból kizárt nép politikai kiebrudaltságát, a magyar parlament reakciós és a mult intézményeinek minden áron való megtartását célzó uri bitangságát. Ady Endre lángész létére is épugy szerzett ismereteket, tudást, mint más közönséges ember: olvasott és tanult. Tanulmányai alapján Magyarország sivár jelenének jobbrafordulását egy szükség szerüen bekövetkező forradalommal elkerülhetetlennek hitte és tekintette. Az osztályharc tör utat irodalmi tevékenységébe s természetes, hogy az uralkodó osztályok és lakájaik mindent elkövetnek, hogy a kor és zseni hangja ne érje el az elnyomottak tömegeit. Ady Endre élete parancsának tartotta, hogy szembeszálljon az uri hatalmakkal pedig jól tudta, hogy:

Csak hazudni kéne mennyi minden jönne
Magyar eredménnyel, sikerrel özönbe
Már elhallgatni is milyen érdem volna
De vallani mindent: volt életem dolga.

S mikor a Pesten már körülrajongott költő a koaliciónak nevezett farsangtól szivből undorodva ismét elutazott Párisba, már tisztán látta a magyarság sorsát. “Hiszem és vallom — irta már 1907 tavaszán, — hogy a forradalmi megujulás kikerülhetetlen Magyarországon. Itt van már a csodálatos, áldott vihar az ő hirnökével, szent sirályaival. Társadalomban politikában még csak a nyugtalanság sikoltoz. De irodalomban már itt van a villámtüzes bizonyosság . . . És milyen nagyszerüek, szentek, rongyosak és mégis gazdagok az ujszándéku és ujlelkü emberek. Krisztus mindegyik az ő szomoru lelkességében. Áll azonban veszedelmesen minden ujulások elébe a kis rabló csapatokon kivül két nagy landsknecht had. Persze, hogy az egyik Rákosi Jenőéké. Ez a magyar erekbe ömlött sváb veszedelem. Ezek a Szent Imre kultusz s a nemzetközi küldökszemlélés lobogójával jöttek. S ugyanők azok, akik hüséges uradalmi ispánokként marasztalják a középkort. Irodalomban s müvészetben a programos és pogromos butitás a taktikájuk. A másik hadtest lóhus-puhitó, nyilas sereg és veszedelemnek komolyabb. Tóth Bélának az akkori Pesti Hirlap főfajmagyarkodó lóhuspuhitójának, azt üzeni e cikkében: “Annyi magyarságról sohse álmodtak sehol, amennyit az én ezeréves, kisnemes, mindig parasztokkal és vajmi sokszor parasztokként élő familiám megőrzött és az én egyéniségemben lelkem kifejezett."

E rövid előadás keretében nem terjeszkedhetem ki bővebben a háborut megelőző évekre. Ady Endre maga öszszegezi a Szocializmus cimü tudományos folyóiratban, az akkori idők állapotát. Hadd idézzem a következő részletet: "Ez az uj forradalom, mely egyelőre csak nyugtalan fejek és idegrendszerek irodalmi csetepatéival jelenti be magát, komoly forradalom lesz . . . Örülök, hogy én irhatom meg véletlenül legelőször, de mindenesetre legnyiltabban, hogy az egész uj, mai irodalmi kalamajka sohse lett volna meg a szocializmus magyar fölnevekedése nélkül. Gazdaságilag a legokosabb isten se tudná, mikor szabadit fel bennünket a szocializmus, de a lelkeinket kezdi már szabadokká tenni . . . Ez az uj irodalom, ha messziről s feudális vagy polgári szemekben nem is tetszik szocialistáknak, a szocializmus által, a szocializmus révén van. Egy bizonyos és ezt már e néhány sor irója is érzi és éli: ez az irodalmi háboru gyermeke a szociális háborunak — hiszen épen ezért félnek ugy tőle . . ."

*

Ugorjuk hát át a béke vihart sürítő éveit és figyeljünk vissza arra a szarajevői revolverlövésre, mely a Nagy Lerongyosodás lavináját elinditotta. A költő Jászi Oszkárral és Biró Lajossal ép akkor volt menőben egy szatmári választási agitációs utra. Egy nagyváradi terraszon érte őket a vészhir a rónörökös pár meggyilkolásáról s feleségéhez irt levelében irja: "Minket, Jászit, Birót és engem a szó szoros értelmében megrikatott a trónörökösék drámája, képzelheted, milyen exaltáltan utaztam." A rákövetkező napokban Ady elborult, szótlan, ideges, lázas beteg lett. De azért a gyorsan pergő eseményeket remegve figyeli. A nagy francia szocialista Jean Jaurés meggyilkoltatásának hallatára igy zokog fel:

Fáj a szivem s nehéz üzennem
És mindeneket meg nem mondhatok
De nagy halott, ölt testvérem bennem
Ugy él, mint a Gondolat igaza.

Tudjuk, hogy mialatt a vértenger egyre dagadt, Ady Endre kinban, lázban irta meg hatalmasabbnál-hatalmasabb lázongó, sejtő, vérző, prófétás verseit. 1917-ben végre forradalomba megy az orosz nép. Nyomában megmozdul minden hadviselő ország munkássága. Ady Endrére végtelenül hatottak a reményes, izzó hetek, de mikor a Kerensky kormány a háboru folytatását határozta el, mikor a pár hétre elülő Téboly uj erőre kap; s mikor az Osztrák Magyar Monarchia feldarabolása először jelenik meg pozitiv formában, mint az entente egyik legfontosabb hadi célja, akkor irta meg a régi megsejtéseit bekövetkezni látó Ady egyik legnagyobb háborus versét:

EGY NAGY TIVORNYÁN

Teritve a Föld: lakni tessék,
Tombolj, Világ, most szabadult el
Pokloknak minden pokla rajtad,
Ha akartad vagy nem akartad,
Hollókkal és kóbor kutyákkal
Kész a lakoma, kész az egység.

Véres bor koponya-pohárban,
Hajtsd föl, Világ, idd ki fenékig,
Idd ki hősiesen és bátran:
Most már mindegy, most rohanj végig,
Végig a Téboly zöld-vér-utján.

S Téboly, most már ne szemérmeskedj,
Szakadnak a vásznak, szakadnak.
Eljött az álmodt minden-mindegy,
Esküdjünk a mindent-szabadnak,
Bőrünk ugyis ördögök bőre:
Lakomázzunk s aztán — előre.

Ha tivornya, legyen tivornya,
Olyan mindegy, élni, nem élni
S gyáva-e az ember vagy hérosz,
Olyan mindegy: van-e tán még rossz
S van-e még tán megbecsülendő?

Herold-csizmám egy kicsit sáros,
De jövök vigság-hirdetéssel:
Ordits, kapu és kiálts, város,
Kárhozzatok, most van a napja
S akinek van még virradatja,
Ne haljon meg kárhozás nélkül.

Egész világ szőttje kibomlott,
S én egy nyomorék fonál hurkán
Még mindig csak bénán zsibongok?
Mit törődjünk elmultak voltján?
Teritve a Föld, lakni tessék:
Éljünk dögig e nagy tivornyán.

De ki hallja meg a kétségbeesett próféta szavát mikor az ágyuk dörögnek. Ujabb halálszerszámok feketednek a fronton, amikor Amerika is átmegy a harctérre. Husz millió ember még nagyobb intenzivitással tépi-öli egymást, levegőben, vizben, lövészárkokban.

Már csufja minden állatoknak
Isten hires sarja az Ember
Még mélyebb Pokol, még több Nincsen
S a próféták is csak makognak.
Ezt add Hires, ezt add, Te Isten.

Az ujabb rettenetek között fizikuma vészesen gyengül. Idegileg még jobban leromlik, félelmetes álmatlanságban és étvágytalanságban szenved. A test és lélek ernyedni kezd, szerveinek funkciói akadoznak, kihagynak. De ösztönös, jövőbe látó szemekkel, még ebben az állapotában is, hetekkel előre érzi és invokálja a közelgő forradalmat:

ELÉGEDETLEN IFJU PANASZA

Páris, Peking . . . London vagy Róma?
Be unalmas város ez a Föld,
Egyazon város és falu: semmi.
Már menni
Sehova se érdemes:
Valami más,
Valami nagy riadal vóna.

Ki birja még e szürkeséget,
Ki hazugokat tündököl?
Már jöjj, ököl:
Boruljon föl e nem jó Élet
S jöjjön a Halál, e nagy orvos,
S a Halál után ébredések,
Borzalmak,
S jöjjön valami más,
Óh forradalmak, miért késtek?

Vér, vér, vér,
Be meg fog szépülni az Ember,
Ha vérben jól megmosdik egyszer
S be megjavul.
Óh jöjj, trombitás angyaloddal,
Föltámadás,
Óh, jöjj milliónyi hadakkal.
S ifjitsd meg ezt az unalmas
Golyóbist,
Jöjjön a megváltó fegyver,
Amen.

Részére nem volt a forradalom se aggodalom, se meglepetés; egész élete, tiz kötete hirdette annak eljövetelét. A nincstelen paraszt sorsa fáj neki a legkeservesebben és 1914-ben irta e versét:

EGYSZER VOLT CSAK

Egyszer volt itt lakodalom,
Nagy, igazi lakodalom,
Mikor ez ország vőlegénye
Dózsa György volt
S egy-egy hős tavaszon-hajnalon
Ezer helyütt lángolt öröm-tüz.

Egyszer volt vulkán ez a föld,
Erő és láva ez a föld,
Mikor a harag, bosszu és cél
Összeállott
S itéletes viharba tört
S Dózsák, nem császárkák, üzentek.

Egyszer volt itt a Hit merő,
Moldvától Rómáig merő,
Mikor becsülettel és irtva
Támadt, végzett
Minden becsületes erő
Hurkot tépve, csóvákat vetve.

Egyszer volt itt a Sors kegyes,
Bukásban is nagy és kegyes,
Mert azt üzentük a világnak,
Mit ma kéne
S mit azóta nem érdemes,
Mert holt vulkán a régi vulkán.

Egyszer volt itt forradalom,
Hites, igaz forradalom,
Rendet, igazságot csináló,
De Dózsákkal
S azon a hősi hajnalon,
Mikor gőgösen nem alkudtunk.

Egyszer volt itt egy kis remény,
De véres és tüzes remény.
Jönnie kell uj Dózsa Györgynek
S fog is jönni.
Jaj, félek, meg nem érem én,
S ti se, drága, csüggedt bajtársak.

Addig irogatta, addig jósolgatta a magyar katasztrófát mig nem elkövetkezett. Dózsa szivvel fogadta Októbert s a földreform tervezetről az volt a vélemény, hogy KEVÉS.

Október utolsó napjaiban, betegen, elgyötörten ment fel Csucsáról Pestre. Állapota a lakásához kötötte, mégis lázas figyelemmel kisérte, hogy vonul a pesti ucca százezres tömege a Bécsből visszatérő Károlyi Mihály fogadására. A Nemzeti Tanács kiáltványban fordult a néphez és költőnknek a második pont tetszett legjobban, mely arról szólt, hogy "nagyszabásu, népet földhöz juttató, birtok és szociálpolitikai reformokkal kell az elnyomottak életsorsát javitani.

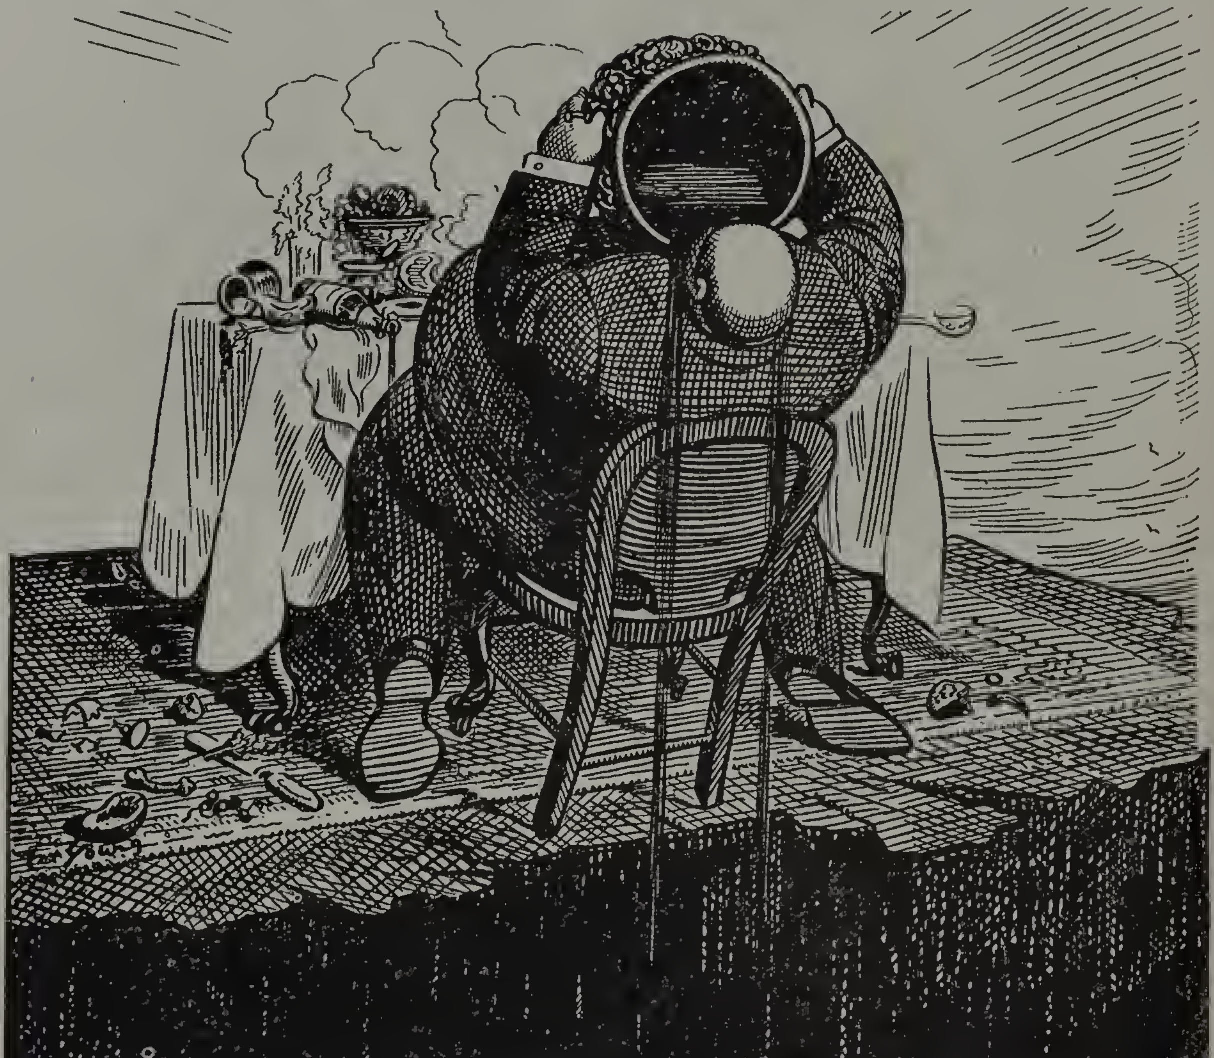
Megtörtént, hogy a Térparancsnokságot ostromló tömeg meglátta a szomszédházban lakó Ady Endrét, aki az erkélyről nézta a katonaság felvonulását. Ujjongó üdvözlés és virágok emelkedtek a költő felé, akit hosszan és mámorosan éljenzett a nép. Könynyekig meghatotta öt az ujszavu ünneplés.

Az előző napokban alig mozdult ki a szobájából, de a Forradalom napján kivánta az uccát s elvegyülést a nép közzé. Felvonszolta magát az Astoriába, onnan a városházára s amerre jár mindenütt lelkesen ünneplik. Az izzó események minden részlete érdekli. A forradalmi események rohanó árja idegzetét még fokozottabban teszi próbára s a sors rendelése szerint végleg megroskad az irtó terhektől.

A forradalom első napjaiban szélhüdés éri. Dadogva tud csak beszélni és ez állapotán az orvosi tudomány nem tud többé segiteni. De még igy is részt kér a forradalom dicsőségéből és kivánja a szereplést. Reklamálja a látogatókat és dolgozni akar a forradalomért. Ebben a bénuló-dacoló helyzetben kereste fel Ignotus s arra kérte a költőt, hogy irna egy alkalmi verset. Az összeomló, dadógó Ady Endrét izgalom kinozta, hogy szellemi megrokkanásának is hire terjed és teljesitette Ignotus kivánságát. Megakarta neki mutatni, hogy ő még mindig a régi Ady Endre s kikelve betegágyából reszkető kezekkel irta meg:

ÜDVÖZLET A GYŐZŐNEK

Ne tapossatok rajta nagyon,
Ne tiporjatok rajta nagyon,



A tőkés dözsölése a bérmunkás munkája után.

Vér-vesztes, szegény szép szivünkön,
Ki, ime, száguldani akar.

Baljóslatu, bus nép a magyar.
Forradalomban élt s ránk hozták
Gyógyitónak a Háborut, a Rémet
Sirjukban is megátkozott gazok.

Tompán zugnak a kaszárnyáink,
Óh, mennyi vérrel emlékezők,
Óh, szörnyü gyászoló kripták,
Ravatal előttetek, ravatal.

Mi voltunk a földnek bolondja,
Elhasznált szegény magyarok,
És most jöjjetek, győztesek:
Üdvözlet a győzőnek.

A győzők nem hallgattak a kuszairású költő esdeklő-prófétás könyörgésére, melynek ákombákomos kéziratát sehogyse akarta a kezéből kiadni. Mikor a látogatóban nála járó Móricz Zsigmond, aki talán arra gondolt, hogy ez lesz a költő legutolsó üzenete, arra kérte Adyt, hogy adja neki a kéziratot: Ady ránézett könnyező barátjára, arcán megvillant egy értő, szomoru mosoly, a verset összetépte és tüzbe dobta. Élete utolsó nagyverse Csinszka másolatában került a nyomdába.

Még e szörnyü testi-lelki összetörtségében is szinte óráról-órára várta a hireket. S mikor az Aradról visszatérő Jászi Oszkártól megtudta, hogy nemzetiségi politkáját kudarc érte; Ady Endre sirva fakadt és azt zokogta: Késő, késő, későn történt . . .

A köztársaságot november 15-én kiáltották ki. Ady Endre ott akart lenni a kikiáltáson és kikelve betegágyából el is ment arra. Hatvany Lajos igy irja meg a költő megjelenését:

"A kupola teremben álltam a dobogón, a Nemzeti Tanács küldöttei között, amikor körültekintek s a terem egyik sarkában egy oszlop alján látom ülni Ady Endrét. Az emberek, a forradalom résztvevői, még a legjelesebbek, a vezérek is csak törpék, tünetek. A szellem, a lényeg, a démon, a rendeltetés itt ül. Milyen gyönyörü, megkapó, arc. Ahogy intek neki, felismer, vissza int felém. A ceremónia után beszélni akarok vele, de röstelli, hogy dadog, a nyilvánosság előtt nem akar igy beszélni. "De mégis elment, hogy lássák öt, hogy le ne maradjon az eseményről, hogy ne mellőzzék."

Három nappal később a Nemzeti Tanács és a kormány elhatározta, hogy együttes deputációt küldenek Ady Endre lakására egy müvészi album alakjában elkészitett hódoló irat átadására. Hat órára tüzték ki a tisztelgést és a Költőt Hajnal Jenő ujságiró utján értesitették, hogy küldöttség fogja felkeresni. Ady Endre sápadtsárga arca kitüzesedett s büszke öröm fogta el. Felesége segitségével feketébe öltözött. Aztán Hajnal Jenő emlékeztette, hogy jó volna megirni előre a választ, amit a tisztelgőknek mondani fog. Ady papirost, ceruzát kért s odaült iróasztalához, hogy válaszbeszédét megfogalmazza.

Révész Béla legkitünőbb és ma este sokszor felhasznált Ady könyvéből szószerint idézem az ezután történteket.

"Ült a papiros előtt, melyre ráirta az első szót:

— Dadogva . . .

Az első percekben derülten, mosolyogva ült Ady Endre az iróasztal mellett, gyönyörü szemeit a magaságba emelte, GONDOLKOZOTT, PERCEKEN ÁT IGY révült az ötletért, gondolatért, aztán lehajtotta a fejét és a leirt szónak valóságával eldadogta:

— Nem megy . . . Nem megy . . .

Fészkelődött, felizgult és rászólt Csinszkára:

— Ülj le, te, ide, majd diktálok . . .

Ady fölkelt az asztal mellől. Csinszka leült, Ady gondolkozott, földultan kereste a mondani valóját, egy szót még kiszakitott magából:

— . . . gyáván . . .

és füldultan kimondta a legkeservesebbet:

— Nem tudom . . .

Percek mulva érkeznie kellett a küldöttségnek, Ady megtörten tétlenkedett, mignem a mentő, siralmas ötlettel fordult az ujságiróhoz:

— Ird meg, te, helyettem . . .

Hajnal Jenő imádta Ady Endrét és persze, hogy megrettent a feladattól, de Ady ránézett, könyörgött, ismételten unszolta, biztatta fiatal hivét, a helyzet olyan volt, hogy az ünnep zavartalanságáért valamiképen el kellett takarni Ady szerencsétlenségét és Hajnal Jenő rászánta magát a szentül való-csaló kegyességre. A könyvszekrényhez ment, kiemelte onnan "A halottak élén"-t, föllapozta a könyvet, a grandiózus vers állott előtte:

"Ember az Embertelenségben" . . .

A próbára kiszemelt Hajnal Jenő odairta Ady Endre két szava mellé a többit, ugy, amint itt következnek:

"Dadogva, gyáván, de mégis némi büszkeséggel mondok köszönetet Önöknek, a forradalmi magyar nemzet tanácsának, aki eljött a költőhöz.

Betegen és meghatottan, hálásan szorongatom a felém nyujtott kezeket. Dadogva, mert életemben sokat kiabáltam, — dadogva is mondom, milyen jól esik nekem, ez a mindennél nagyobb kitüntetés. Ugy érzem, hogy való és bekövetkezett az én forradalmam."

A mentő sorok elkészültek és Hajnal Jenő rájuk emelte a fellapozott versből a koronát:

Ékes magyarnak soha szebbet
Száz menny és pokol nem adhatott,
Ember az embertelenségben,
Magyar ez üzött magyartalanságban,
Ujból élő és makacs halott . . .

Csöngettek.

A küldöttség megérkezett. Hat óra este volt, minden csillár égett a deputánsok félkör alakban körülfogták az álló Ady Endrét és Hock János elmondta üdvözlő beszédét. Hock értett az előadáshoz és amit mondott, áhitattal emelte a hangulatot.

Ady kigyultan hallgatta az orációt, fölemelte sápadt arcát, igy maradt a szónoklat végéig, fénylő szemei leárulták az értő, nagy megindulást.

A beszéd elhangzott, éljenzés-taps a nyomán, templomi csönd, Ady Endre kezében a papiros, a válaszát várják.

A tragédia megmutatja magát . . .

Ady kezébe vette a papirost és megkisérelte felolvasni a szöveget.

Első szava már eltörik . . . dadog . . . nem mozdul a szó, nem megy a beszéd.

A fájdalmas élménytől valamenynyien megrendültek.

Hatvany Lajos, Ady háta mögött a vállára hajolt és helyette felolvasta a választ.

Ady elnémultan nem ellenkezett, elfogadta szegény, hogy helyette irják, elmondják a beszédet . . .

*

A forradalom vihara süvitett tovább . . . Ady Endre egyre üszkösödő nagy alakja pedig egyre fogyóbb erővel mendegélt a magyar Parthenon legmagasabb csucsai felé. Onnan néz le a mostba, mely még mindig forradalmas folytatása annak, ami Ady Endre életében elkezdődött.

Egyszer majd vége lesz annak is örökre. Hittel hisszük, hogy az uj nemzedék megértéssel olvassa el a következő sorokat.

TÁVOLRÓL A MOSTBA

Ugy ötven évről nézhetni a Mostra.
Be boldog lesz, ki majd megmosolyogja
Vergődő, zürös, mai életünket
S ugy látja, ahogy látni kellene:

Feltörni indult, tébolyos zene,
Lelkek nagy csődje, jövők szomjusága.
Be boldog lesz, ki majd messziről látja
S szól majd felőlünk bölcsen, hidegen.

De ma szenvedünk mind-mind idelenn,
Magyarul pláne még különösebben,
Ki több jóságban, ki több őrületben,
De élni semmiképpen sem vidám.

Hát eloldalak, béklyós paripám,
Szaladj bele a meg nem ért Jövőbe:
Ugy fáj a Most és én ugy fájok tőle.
Be jó volna visszatekinteni,

Ugy ötven évről nézhetni a Mostba.

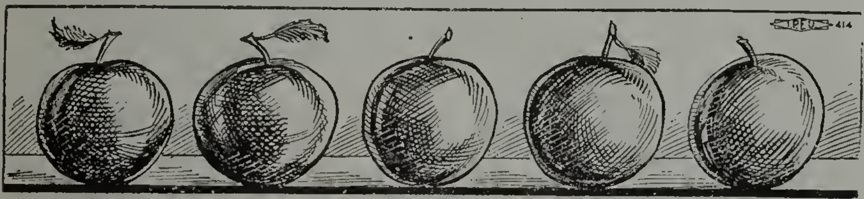
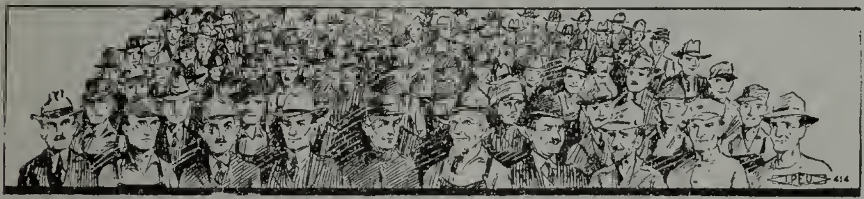
Az alkoholnak káros hatása

Egy kis gyüjtemény orvosi
és iskolai könyvekből.
Összerakta: BULIK M.-NÉ.

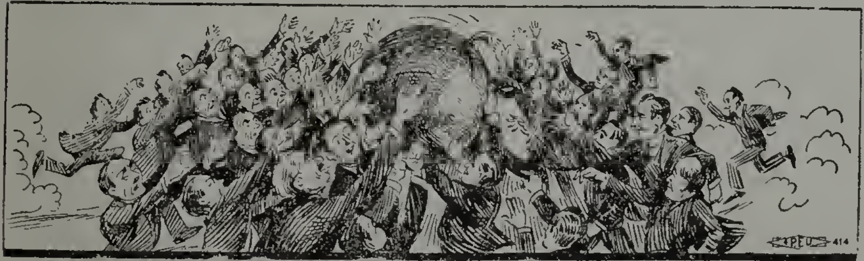
MÁR a régi görög korban az értelmesebb emberek észre vették az alkoholnak káros hatásait, s szigoruan tiltották a nemzést akkor, ha egyik vagy másik fél ittas állapotban volt. Hogy a tilalmat szigoruan ellenőrizhessék, megbiztak embereket, kiknek az volt a teendőjük, hogy mikor egy csecsemő született, azt megvizsgálták, hogy elég erős vagy egészséges-e. Ha a csecsemőt gyöngének találták kivitték azt a hegyre és ott hagyták éhen pusztulnia. Ezt azért tették, hogy erős és egészséges fajt neveljen a görög nép.



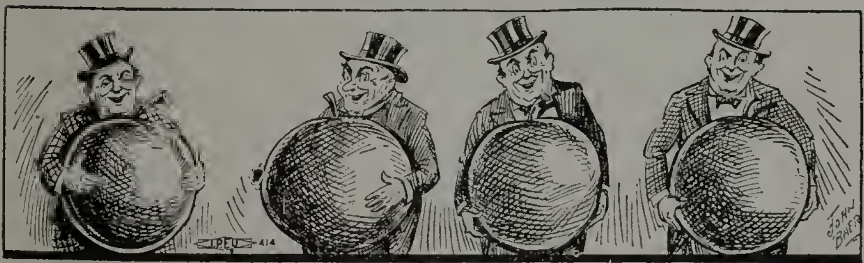
Az Egyesült Államok "nemzeti" vagyonát képviseli ez az öt alma.



Ezek képviselik az Egyesült Államok népességét.



A népesség 96 százalékának egyetlen alma jut és —



A négy almát pedig négy dusgazdag család kaparintja magához. A bérmunkások szervezett erejétől függ, hogy ezt a négy almát is megszerezze.

A régi görögök ilyen formán ellenőrizték a faj egészségét. A mai civilizált emberiség közt, a nagyobb többség, nem akarja észre venni, hogy az alkohol mily rettenetes pusztitást visz véghez az emberek közt.

Itas állapotban megfogamzott embrio mikor megszülik vizfejü vagy angolkóros. Ha a nő terhes állapotban alkoholt fogyaszt, az nagy kárára van a magzatra, mert az alkohol a magzatból azt a tartalmat kiveszi, mely az erejét képezi. Az ilyen csecsemő mikor megszülik nagyon gyönge szervezetü. Hajlamos mindenféle betegségre. Szivük gyönge, s a legkisebb megerőltetés szivbajt idéz elő náluk.

Magyarországon egy családot volt alkalmam több éven keresztül meg figyelni, hol az asszony nagyban fogyasztott alkoholt. Mikor gyermeket szült, azok mindig orr nélkül, meg egy darab az ajkról hiányzott. Az első gyerek a szülés után majdnem egy hónapig élt. A másik egy hétig, mig a harmadik csak néhány órát élt. Az első gyerek mikor megszületett annak még volt egy darabja az orrból, mig a harmadiknak se orr, se ajk nem volt. Elhajtotta az alkohol. Ugyanilyen csecsemő született itt Harvey, Ill.-ban egy lengyel származásu nőtől, ki beismerte, hogy terhes állapotban nagyban fogyasztott alkoholt. A gyerek itt is meghalt.

Az alkohol nem csak az embrióból veszi ki az erőt, hanem a felnőttekből is. Az orvosi kisérletezés folytán, mikor az emberi csontot spirituszba bizonyos ideig áztatták, olyan puhává vált, mint a gummi, hogy csombékot kötöttek vele.

A gyerek elhalálozás az alkoholt fogyasztó szülőknél mindig nagyobb, mint az alkohol elleneseknél. Az Egyesült Államok kimutatása szerint az 1848 évi kolera járvány alatt az alkohol fogyasztoktól a járvány elvitt 92 százalékát, mig az alkoholt nem fogyasztóktól csak 18 százalékot.

Az alkohol fogyasztó gyermek szellemileg gyönge

California államban az egyik iskolában megfigyelték a gyerekeket. Azt tapasztalták, hogy azok a gyerekek, kik néha alkoholt fogyasztottak, szellemileg gyöngék és a tanulás nehezükre esik. Valamennyien egy két évet visszaestek — megbuktak. Mig ellenben azoknál a gyerekeknél, kik alkohol helyett tejet fogyasztottak a tanulás nagyon könnyen ment. Ugyan ilyen megfigyelés történt Bécsben (Ausztriában, hol a tanulók sört fogyasztottak. Ott bebizonyitották az orvosok, hogy milyen hibát követnek el azok a szülők, kik ebéd vagy vacsora után sört kinálnak a gyermekeknek, hogy az megkövéredjen. A sör nem kövériti a gyereket csak a bőrét fölfujja. Bár a sör csak 12 százalékos alkoholt tartalmaz mégis gyöngiti szellemileg a gyereket. Mert az alkohol némileg elaltatja az agyvelőt, s ez által a tanulónak a tanulás nehezére esik.

Svédországban, a katonai körökben, megfigyelték az itas katonákat. Rájöttek arra, hogy tüzelés közben, csak minden hatodik vagy nyolcadik golyó talál célt.

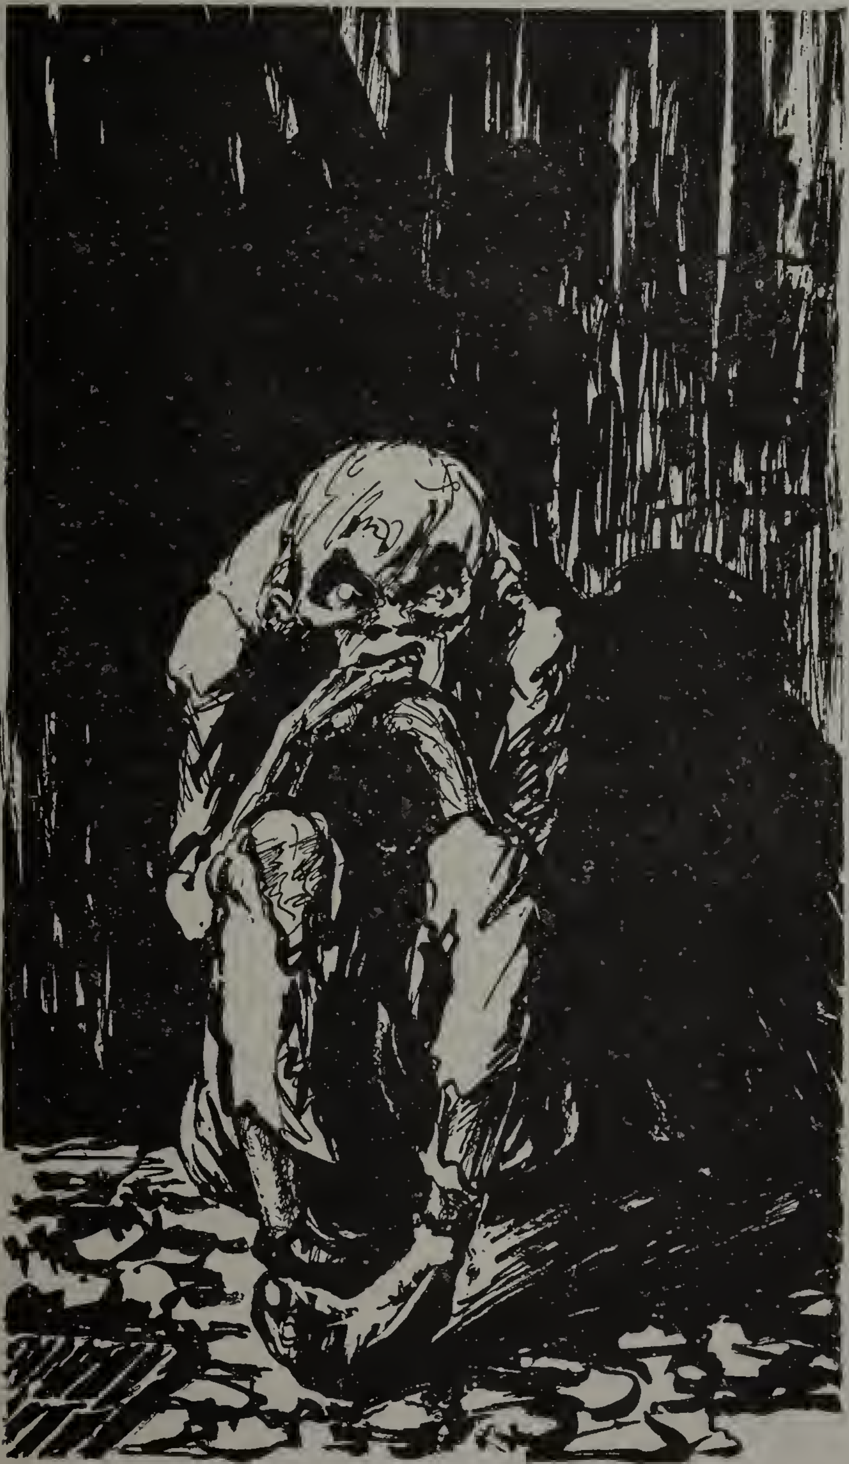
Boston városban, Massachusetts államban egy rendőrt az orvosok megfigyelték, ki az italt nagyban fogyasztotta. Az ő gyermekeinél azt vették észre, hogy az első gyermekük okos volt, a többi gyönge elméjü, mig a nyolcadik gyerek egész hülye. A gyerekek azért születtek mindig gyöngébb gondolkodással, mert a rendőr apa mindig nagyobb mértékben fogyasztotta az italt és testét az alkohol teljesen elmérgezte. Mérges vérét átadta gyermekeinek.

Ilyen hülye gyerekeket nagyon sokat lehet látni, kik az alkohol bélyegét egész életükön keresztül magukkal kell, hogy hordják s a város vagy a falu bolondját, kell, hogy adják, csak azért, mert az anyának vagy apának, jól esett, hogy az alkohol csiklandozza a torkát. Vannak családok, kik sokszor több generáción át viszik az alkoholtól elmérgezett vért.

Az alkohol gátolja a gyereket a növésben

Azok a gyerekek, kik az alkoholt nagyban fogyasztják a növésre kicsinyek. Arcuk sápadt és öreges. Természetük durva. Egy ilyen gyereket láttam Slovensko egyik falujábban. Mikor a faluba tértem egy gyerek hang megütötte a fülemet, mely azt mondta tótul; ne igyál te, adjál nekem is. Oda nézek, hát látom, hogy egy tót nyelvü család ül a ház előtt és pálinkát fogyasztanak. Az anyának az ölében egy öreges arcu gyerek ült, mely termetre nem volt nagyobb nővésü, mint a husz vagy 24 hónapos gyerek. És ez a gyerek volt az, kinek hangjára fölfigyeltem. Hozzájuk megyek s megkérdezem a gyereket, hogy mi a neve. Tisztán kiejtette; hogy Józsi a nevem. A gyerek nekem nagyon megtetszett, hogy olyan tisztán tud beszélni. Mikor az időm megengedte megint legyalogoltam a faluba, hogy meglátogassam a gyereket. De akkor ugy határoztam, hogy cukorkát viszek neki. Betérek a házba és néven szólitom, hogy jöjjön hozzám. És az anyja azt mondja, hogy ő még nem tud járni. Hozzája megyek és megnézem a lábait, melyek ijesztő vékonyak meg görbék voltak. Át nyujtom a gyereknek a cukrot. A gyerek utána nyul és nagy meglepésemre, egész erővel a földhöz vágja és azt mondja: máskor hozzál nekem pálinkát, nem cukorkákat. Én az anyához fordulok és megkérdezem tőle, hogy hány éves. Ő azt mondja, hogy hat éves lesz. Erre én meghökkentem, hogy szóhoz sem tudtam jutni. Elköszöntem és többé feléjük sem néztem. Hat hónap elteltével egy heti vásáron, hallom, hogy valaki utánam szól. Megállok és látom, hogy annak az eltorzult gyereknek az anyja. Tudatja velem sirva, hogy Józsika már meghalt. Megölte a pálinka. Én meg fiatal lánykoromra, jobbnak találtam, hogy meg halt, sem mint torzként éljen.

Egy másik alkalomkor egy fehér kis kutyát láttam, egy csapat fiuval. Ez a vézna kis kutya mindent, ami a foga alá ért széjjel szakitott és rettenetesen vonitott. Hasonlitott a veszett kutyához. Hozzájuk megyek és figyelmeztettem a fiukat, hogy legjobb lesz, ha vigyáznak, mert ez a kutya meg van veszve. Az egyik gyerek arra egész nyugodtan azt mondja; hogy annak a kutyának nincs semmi baja. Csak pálinka után vágyódik — amiért egy fiut el is küldtünk. Ott maradtam, mig a gyerek eljött a tállal és benne egy kis pálinka. Mikor a kutya azt megitta lecsöndesedett. Én meg megkérdeztem a fiukat, hogy miért szoktatták meg a kutyát pálinkára. Erre azt mondta az egyik, hogy próbára akartuk tenni, hogy csak ugyan igaza van a tanitónak, hogy az alkohol vissza tartja a gyereket a növésben. És én kérdeztem, hogy meggyőződtek-e? Arra azt válaszolták, hogy igen. Ez a kis virgonc kinézésü kutya már teljesen ki



A szervezetlen munkás jutalma öregségére.

van nőve. Holott az apja meg az anyja rendes erős kutyák. És az udvarról mindjárt elő is hozták őket, hogy lássam. Az a kis kutya még a fele sem volt az apjának vagy anyjának.

Az itas állapotu egyén olyas valamit cselekszik, amit józan állapotban képtelen volna megtenni.

A University of Chicagoban kipróbálták a diákokon, hogy mikor végeznek több munkát. Itas vagy józan állapotban. Mikor az idő letelt azt vették észre a megfigyelők, hogy a mámoros diákok sokkal több munkát végeznek. Voltak diákok, kik majdnem kétszer annyi munkát elvégeztek, mint józan állapotban lettek volna képesek. Ez azért van, mert az alkohol elaltatja azt a részt az agyvelőben, mely tudtára adja a testnek, hogy az fáradt. Igy a fáradtságot nem érzi és tovább dolgozik.

Nagyon sokszor hallottam már, hogy azt mondják, ha fáradt vagyok, beveszek egy kis italt és mindjárt jobban érzem magamat. Az nem igaz. Mert a test éppen olyan fáradt mint előbb volt, csak az agyvelő nem tudja neki tudtára adni, mert az alkohol gáltolja azt.

Itas állapotban az emberek nagyon sok hibát követnek el. Mert vannak egyének, kik mikor mámorosak nem tudják, hogy mit csinálnak. Ilyen emberek már nagyon sokszor végeztek gyilkolást. Egy ilyen eset történt Magyarországon, mikor egy fiatal férj fejszével agyon vágta a feleségét, kit nagyon szeretett. Mikor kialudta magát, nem tudta, hogy miért van a börtönben. Mikor megmondták neki, elkeseredésében öngyilkosságot akart elkövetni. Egy másik ilyen esetet hallottam, mikor a férj kijózanodott és látta, hogy a kis vagyonát, a néhány butor darabot, hogy összevagdalta, a fejét többször a szoba falához ütötte mérgiben, természetesen nem halt bele.

Végeredményben, ha az alkoholnak káros hatásait megtudjuk, akkor mi hálásak vagyunk ama orvosoknak, kik az ők tudományaikkal csak jót akarnak tenni az emberiségnek. De ha a másik oldalát megfigyeljük, akkor azt vesszük észre, hogy a mai kapitalista társadalomban, nem olyan könnyü dolog az orvosok tanácsát betartani. Nagyon sok ember azért iszik, mert olyan nehéz munkát végez, mit józan ésszel képtelen volna elvégezni. Mások meg azért isznak, hogy az éhséget, nyomort

VISSZATÉRŐD NINCSEN

Ember! te kergült balga Ember,
azt hiszed, keresztjáró utad véget ért?
A fájdalmak, gyötrelmek, rabláncod csörgése,
a sebek, mit Élet-bitorló uraid vájnak testedbe,
nem kényszeritenek még mindig a helyes utadra?

Ember! ha egyszer látnád magad,
ha egyszer önnönmagadra néznél:
sirnál, mint ahogy én sirok!

Ember! mondd, Ember vagy te?
Nem látod az utat, mely előtted huzódik,
mely könyörög, hiv, csalogat: előre,
sem viharod nincs, mely felkorbácsolná véred,
éhen-szomjan huzod az élet-hajóját.

Vagy azt hiszed talán,
könyörületes lesz majd a halál
és eltörli szenvedéseidet?
Hiszen ha te el is mulsz,
némán, szótlan dőlsz majd siri-ágyadra,
nem gondolsz arra, utánad évezredek Embere jön?
nyugodtan pihenhetsz-e majd a sirban,
ha fölötted gyermeked rablánca csörög?

Nézz magadra! én nem tudom minek nevezzelek!
csontváz vagy, szemeden könnycseppek tengere,
ha ajkadat jajszó hagyja el néha.
jajszó, mit sebeid csikarnak ki belőled,
mely tép, mely kinoz, mely gyötör:
senki, nincs senki, ki meghallgatna.

És még mindig nem lázadsz?
Mi tart torkon ragadva,
hogy egy tiltó szavad sincs bitorlóid ellen?
félsz? . . . mit veszthetsz?
Vagy bitófa lesz osztályrészed,

vagy elkeseredést néhány órára elfelejtsék.

A fönti cselekvésekkel a munkás osztály nem megyen messzire. Mert ama bünökért a mai kapitalista rendszer a hibás, mely csak nyomort és szenvedést ad annak a munkás népnek, mely az iparokat olyan magas fokra kiépitette.

Az orvosi tudományt csak akkor fogják tudni érvényesiteni a munkások, ha majd arra a tudatra ébrednek, hogy szervezkedniök kell az IWW szervezetbe, mely szervezet erejével kiépitik az ipari társadalmat, hol minden ember egyformán fogja élvezni a munka gyümölcsét.

De azért ajánlatosnak tartom, hogy fékezzük magunkat a mennyire lehet, az alkohol ivásban. Ha poharat emelünk egészségünkre, akkor nem a magunkéra, hanem annak az alkohol gyártónak, vagy ha magunk készitünk, akkor a gyümölcs kereskedőnek, mert azok profitot préselnek rajta. Mig ellenben az aki issza, az agyvelejét gyöngiti. Az alkohol ivással hadat üzenünk ama várnak (a koponyának) és ama vár urnak (az agyvelőnek), mely az életünket vezényeli és tudatja velünk, hogy hol fáj és melyik testrészünk fárad.

EDE EMIL

vagy szenvedésed és nyomorodat hagyod hátra!
. . . Mi kedves néked e gigászi küzdelemben?

Ember! nevezzelek Embernek?
Hiszen szádon a szó elveszett,
megtagadtad önnönmagad
és lemondón, Ember! lemondón állsz
türve és mitsem bánva egy hamis itélőszék előtt.

Pedig Ember vigyázz, visszatérőd nincsen!
Nincs szánalom, kegyelem, ereidet orgyilkosok metszik,
bitót állitanak, Krisztust nyomnak az orrod elé,
hogy sorsod sorsával egyenlő, mondják:
látod, ő is szenvedett és meghalt.
. . . Hát az Élet-joga csupán az övék?
Mondom Ember! visszatérőd nincs a keresztről!

A fájdalmad napról-napra nő, készül a Dózsa-trón,
milliók kárhoznak minden elveszett percért,
minden eltitkolt fájdalmad: milliók fájdalma,
minden lánc-szem csörgése millió testvért gyilkol,
minden elhullott vércsepp kárba vész: balgaságodon.

Ember! mondom visszatérőd nincs! egy a menhelyed:
büszkén, felemelt fővel nemet mondani.
Hiszen Ember vagy, ha karod csak egyet sujt:
gyémántos trónok hullnak a porba;
eltörpül előtted minden, mit most balgán hiszel,
ami nyügöz, halottá varázsol és vérzel alatta.

Csak egy hangot hallj meg, hangot,
mely tüzel, mely lázit az igaz felé,
s mutatja gyehennából az utat a boldogság felé.
Csak egyszer mondjad: Elég volt! és a varázs-ige száll,
megnyilnak előtted a mindenség kapui
és ekkor nézz körül, Ember! és mondom:
Onnan visszatérőd nincsen! . . .

*

Naptárunk fedőlapjának utolsó oldalán felhivjuk az amerikai magyar munkásokat a Bérmunkás rendszeres olvasására és általában a tanulásra, mert az egyedüli, amit tőlünk senki el nem vehet az a Hatalom, amelyet a Tudással megunknak megszerzünk, kivivunk.

A tudással rendelkezők minden esetben tudni fogják, hogy mik azok, amik a szervezetükre haszonsak és mik azok, amik a szervezetre káros hatással vannak.

Az IWW nem vezet külön harcokat a mai rendszer egyes káros kinövései ellen, hanem a nevelés és tanitás minden eszközével magát azt a rendszert igyekszik megdönteni, amelynek egyik eszköze a népek kizsákmányolásában az alkohol.

Hasonló butitó eszközei számosak vannak még a tőkés osztálynak, amelyek mind elveszitik élüket és hatásukat, ha a munkás milliók szakitanak eddigi nemtörődömségükkel és szervezkednek.

Tanuljunk! Tanitsunk, hogy mielőbb testben és szellemben egészséges emberiséget lássunk.

A Munkás Betegsegélyző Szövetség

1906 Március havában alakult és 1906 Május havában kapta meg müködését engedélyező szabadalmi levelét.

A Munkás Betegsegélyző Szövetséget, öntudatos és osztálytudatos munkás emberek alakitották meg.

Ezek a munkás emberek tudatában voltak annak, miszerint munkás emberek baján csak munkás emberek segithetnek. Együtt munkálkodva egymást támogatva tudnak csak helyzetükön javitani.

Egymás támogatására és a munkás osztály támogatására alakult tehát a Munkás Betegsegélyző Szövetség.

Egymás támogatását betegsegélyezéssel érték el. A Munkás Betegsegélyző Szövetség fennállása óta sok százezer dollár segélyt fizetett ki beteg tagjainak és igy a sok ezer heti segély sok munkás családnak hozta meg a szükséges segitséget.

A Munkás Betegsegélyző Szövetség kifizetett betegsegélyekben:

1906-ik évben	600.21	1915-ik évben	18,729.63	1924-ik évben	112,264.64
1907 " "	4,418.08	1916 " "	16,608.30	1925 " "	130,836.00
1908 " "	6,192.30	1917 " "	18,429.63	1926 " "	148,401.00
1909 " "	5,609.72	1918 " "	27,904.06	1927 " "	154,301.00
1910 " "	12,823.03	1919 " "	23,974.64	1928 " "	169,422.00
1911 " "	10,972.18	1920 " "	28,066.40	1929 " "	156,953.00
1912 " "	10,190.96	1921 " "	38,764.18	1930 " "	98,178.00
1913 " "	12,986.34	1922 " "	50,053.03	1931 " "	92,519.17
1914 " "	17,826.95	1923 " "	68,063.64	1932 Aug. 31-ig ..	59,580.50
				ÖSSZESEN:	1.494,668.59

Ha összehasonlitják a Munkás Betegsegélyző Szövetség összkiadását az ügykezelésre más betegsegélyzőkkel sőt más munkás betegsegélyzővel is, ugy látni fogják, hogy a Munkás Betegsegélyző Szövetség ügykezelése olcsó. Csak a fele annak, amit egy másik, magát munkás betegsegélyzőnek nevező testületnél, fizetnek a tagok.

Ami pedig az ügyek becsületes kezelését jelenti, a Munkás Betegsegélyző Szövetség minden cent bevételéről és kiadásáról ellenőrizhető kimutatást ad ki. Addig egy más magát munkás betegsegélyzőnek nevező testület az utóbbi időben már csak azt mutatja ki mit fizet ki betegsegélyre és halálesetekre, de azt nem, hogy mit fizet ki ügykezelési és vegyes kiadások cimén.

A Munkás Betegsegélyző Szövetség EGYMÁS TÁMOGATÁSÁNAK ELVÉN ÁLLVA, KIFIZETETT MÁSFÉL MILLIÓ DOLLÁR BETEGSEGÉLYT TAGJAINAK.

Továbbá a Munkás Betegsegélyző Szövetség az elhaltaknak tisztességes temetést, a hátramaradottaknak pedig valamennyi azonnali segiséget biztositott..

A Munkás Betegsegélyző Szövetség fennállása óta kifizetett halálesti járulékokban 1906 Március havától 1932 Augusztus végeig 418 ezer 900 dollárt.

E mellett az egymást támogató munka mellett a Munkás Betegsegélyző Szövetség, munkás lapokat is támogatott. Támogatott és támogat azért, mert ezek nevelő eszközei a munkás osztálynak. Ezek ébresztik a munkásokat öntudatra, osztálytudatosságra. Ezek mutatják meg a munkásoknak mily utat kell követniök, ha helyzetükön javitani akarnak és ha végcélban felakarják magukat szabaditani a bérszolgaság járma alól.

Évekkel ezelőtt a régi mozgalomban, a Munkás Betegsegélyző Szövetség a Népakarat munkás lappal müködött össze a munkás osztály érdekében folytatott felvilágositó munkában. Később más munkás lapokat is támogatott. Jelenben erejéhez mérten támogatja a Bérmunkás lapot, mint olyant a mely nem csak a munkásság nevelésével érdemli meg a Munkás Betegsegélyző Szövetség támogatását, de azért is, mivel a Munkás Betegsegélyző Szövetség megvédéseért, mindég harcolt, mindég tevékenykedett.

A fentiekből minden öntudatos osztálytudatos munkás embernek látni kell miszerint a Munkás Betegsegélyző Szövetség kiérdemelte minden munkás ember támogatását. Aki tehát jó munkás betegsegélyzőbe akar tartozni lépjen be a Munkás Betegsegélyző Szövetségbe.

Magyarok Kanadai Bevándorlása és Társadalmi elhelyezkedése

SEBESTYÉN DÉNES

HA a magyarok kanadai bevándorlását és társadalmi elhelyezkedését akarjuk olvasóinkkal ismertetni, nem volna egész a kép, ha azt a nagy differenciálódott viszonyokat kihagynánk, melynek következtében (Árpádföldjét) Árpád unokái, földmüvesek és iparosok ezrei cserélték fel Columbus földjével.

Mint ismeretes a világháboru, mely tulajdonképpen a kapitalizmus legvétkesebb terméke a hullahegyekké lövetett proletáriátus hátrahagyottjainak teljesen feldulta a békéjét, mellyel egyidőben meztelenségig rombolta le a népek gazdasági erejét. A magyar proletáriátusnak, bár tétlenül, de kétizben pottyant kezébe a felszabadulásának fegyvere, melyhez nem értve, gyerekes prédaként dobott vissza az ellenforradalom kormányának kezébe. A dicső magyar tanácsköztársaság bukásával a legnehezebb napok vártak, ugy a kevés holddal rendelkező kisgazdákra, mint a proletáriátusra.

Az adófizetés legmagasabb fokra való csigázása mellett az annyira hangoztatott és törvényekkel védett személyi szabadságot fenekestől felrugta az ellenforradalmi kormány. Zaklatások és üldözések soha nem ismert sorozataira feküdt és ébredt a szabadságát prédaként eljátszott magyar kisgazda és e vétkes tévedésétől megiszonyodottan, ugy az iparos, mint a földmüves szegény, de még a kisgazda sem tudott egyébre gondolni, mint a menekülésre. Ez időben a kanadai kapitalizmus technikai fejlődésének utolsó rohama munkáshiányt mutatott, melyre a profitmágnások felnyitották kapuikat az európai bevándorló munkásság előtt. A hajós társaságok teljes szabadkezet kaptak a bevándorlók behozatalára, az ügynökök százai, az adott alkalmat megragadva valóságos édeneket varázsoltak a mindenükből kifosztott és üldözött vadéletet élő magyar iparos és földmives szegények elé. A bevándorlás megindult. Egyes vidékekről szinte ijesztő számba özönlött ki a szorgalmas magyar földmives szegény nép kanada kietlen földjére, melyet már az első szempillantásra is elhagyott volna a bevándorló, ha a kis házacskáját és pénzét fel nem emésztette volna az utazás, de mivel mindenökből kifogytak, felvették az élni akarás küzdelmét, ugy a nyelv nem ismeréssel, mint az elhelyezkedés végtelenné vált problémáival.

A nyelv és a viszonyok nem ismerése sok esetben az elmegyógyintézetekbe vezették a bevándorolt, más esetekben pedig a lehetőleg legalacsonyabb fizetések mellett is, csak rövidebb időtartalmakra tudtak elhelyezkedni. A profitmágnások és kisebb zsarnokok elejével kissé idegenkedtek a nyelvet nem ismerő idegenektől, de a profithajtó ereje csakhamar megértette velök a kedvező alkalmat.

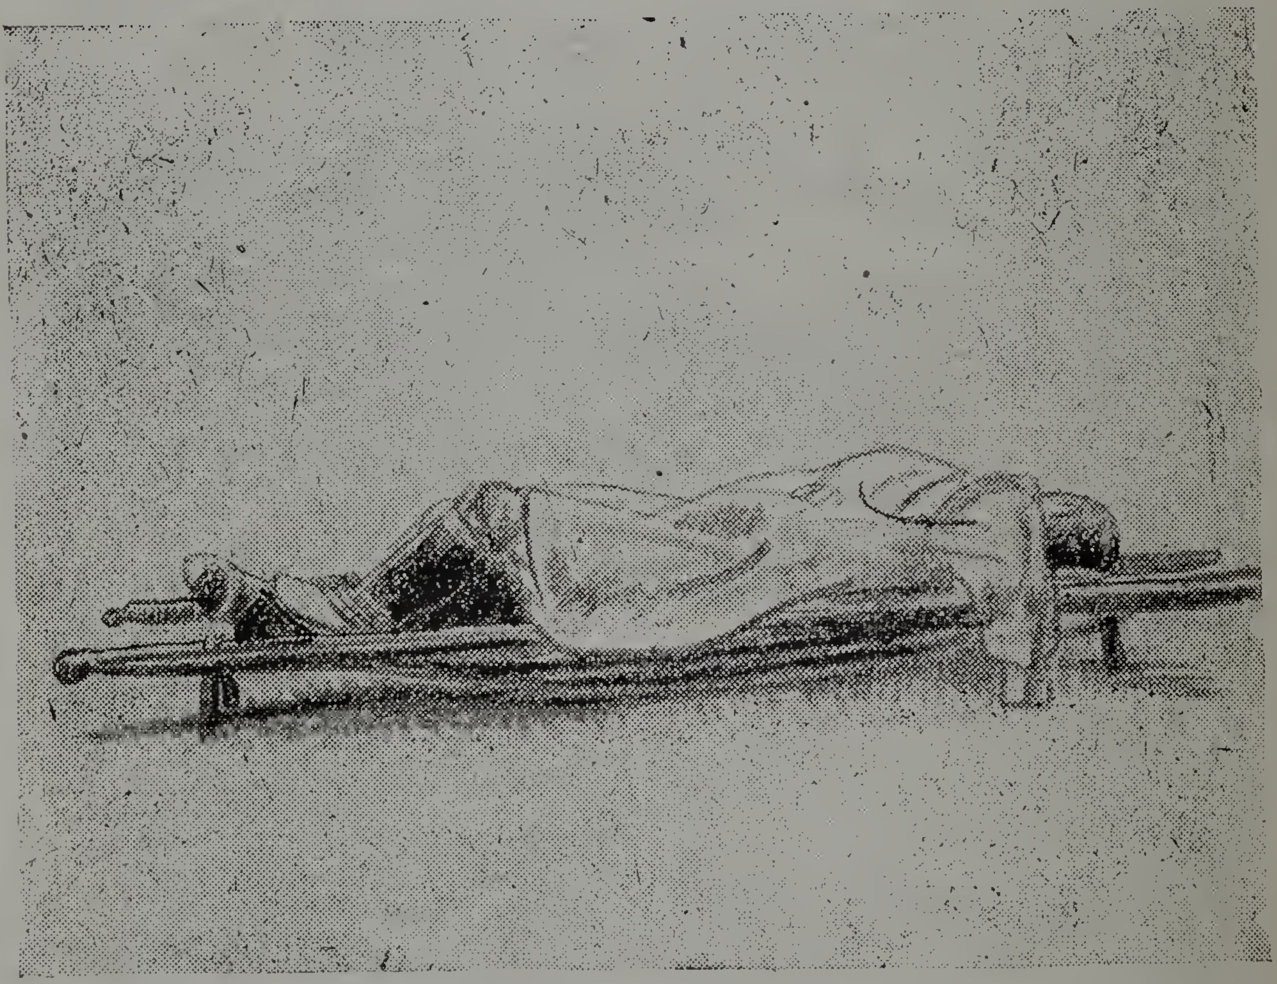
A mindenáron elhelyezkedni akaró középeurópai bevándorló, ha a nyelvet nehezen is, de a munkát testben-lélekkel megragadta és ugy a profitmágnások, mint a kisebb zsarnokok idegenkedését a legjelentéktelenebb idő alatt a patriarchalis mosoly váltotta fel, mellyel egyidőben le is mondottak "a nemzeti kötelességükről" az általában magasabb bérekért dolgozó angol munkásoknak megkezdték a munkákról való lefizetését, ami persze a rosszul, vagy egyáltalán szervezetlen kanadai munkások közt könnyen ment, bár az angol bevándorlókból amugy is kevesen dolgoztak a primitiv munkákon, mert amennyi angol bevándorló volt, azok könnyen elhelyezkedtek a vasut, posta, telefon, táviró és villamos jármüveknél, valamint nagyobb üzletek, jólfizetett iparok és állami hivatalok, szolgálatok, mind-mind az angol bevándorlókból nyert betöltést is igy a középeurópaiak első évek bevándoroltjainak kezeibe kerültek az erdei fejszék, cementes és malteros ládák, la-pátok és csákányok, homok, kő és szén bányák. Azonban a kapitlaizmus politikájának (a kizsákmányolás) csufos csődje, először csak alig érezhetően, majd tömegesen fosztotta meg munkás testvéreink százezreit, ugy a primitiv, mint a modern szerszámok használatától.

A magyarok társadalmi elhelyezkedése

A magyar földmives szegények beözönlésével egyidőben az ellenforradalmi kormány is meginditotta sisere hadát a kivándorolt proletáriátus után, kik először a lélek és nemzet mentés szinjátékát használták álarcul, azonban a bevándorolt proletáriátusban szórványosan élt osztályöntudat előtt a fehérhóhérok hamarosan feltüntek eredeti formájukban. Hiába öltöttek papireverendát, hiába változtatták cégtábláikat. A herélő kés mindenhonnan kilátszott.

A magyar proletáriátust nem lehetett többé megtéveszteni, sem szentelt vizzel, sem pedig hazaszeretet cimén a Horthy véres zsámolyára hasaltatni.

Az elhelyezkedés örökös problémája miatt, bár lassan, de biztosan megindult a kanadai proletáriátus osztálytudatos megszervezése. A kanadai magyar proletáriátus 5 év alatt kiépitette osztályharcos szervezeteit az atlanti oceántól a csendes oceánig. A kanadai magyarságnak: Kanada minden számottevő városában meg van szervezve a betegsegélyzője és munkás klubja, melyek bár a kapitalizmus féktelen terrorja alatt lassan, de a többi más nemzetek proletáriátusával, vált-válba vetve célkitüzötten halad a felszabaduláshoz vezető uton.



Meddig szunnyad még a megkötözött munkásság.

A profitért és kenyérért

KIPETY KÁROLY

A BÁNYA szirénája élesen sikolt a reggeli levegőben. Komor füstöt ereget a gép, száll a füst, elboritja a fenyveseket, amely mintha gyászfátyollal lenne leteritve. Lent a völgyben bányászbarakok terülnek el. Az ajtók előtt nyüzsgés, a szénfejtőknek serege mozog, mert a sziréna hangja nekik szól: figyelmezteti a leváltásra. Uj erőt követel a tárna. A nyüzsgő bányászok között egy-egy "istent" szór a bányabáróknak fizetett pribékje. E megszokott modort szótlanul hagyják. Ki ruhájával, ki lámpájával foglalatoskodik inkább, hogy minél előbb a tárna szájához érjenek.

Névsorolvasásra várnak. Arra a névsorolvasásra, mely még életet számol és azután, ha a robotnak vége, ki tudja, kerül-e ismét sor rája. Áll komoron a piszkos gunyáju sereg, tegnapi fáradalmaikat még ki nem pihenték. Állnak és szótlanul várnak. Még egyet sikolt a halál szirénája, s lent a tárnában megszünik a csillék dübörgése, a pokol gyomrának moraja, gépek kattogása: szünetel a munka. Csak pillanatnyi szünet ez: egy perc mulva már ujabb mozgás, dübörgés támad, egy perc mulva már uj erők rengetik meg a földet. Csak egy pillanatnyi szünet ez: most cseréli föl egymást a bányászok fekete serege. Fáradtan, már alig mozogva, fölőrölt hadsereg dul a kijárat felé. Lélekzetük ziláltabb, gyorsabb, szénpiszkos arcuk, melyet verejték csikozott végig, most valami ujjongást fejez ki: a tárna szájában vannak ujra élve a felszinen és az égnek azurtavában füródhetnek ujra. Midőn a tárnának fénnyel boritott nyilásához érnek, eltakarják szemüket, mintha megszégyenültek volna a hatalmas nap-isten előtt. Azután lassan megszokják a fényt, örömben uszik a robottól elcsigázott arcuk.

Az utolsó is elhagyta a tárnát, az ajkáról elröppenő utolsó üdvözlés jelzi — megindulhat az uj erő a profit érdekében. Megindulnak. Valami halotti csönd honol most az induló sereg között, csak a gyujtó sistereg még, amivel lámpájukat gyujtogatják. Majd megszünik a sercenés, csak a bakancsok koppanása jelzi, hogy a kripta felé, vagy ahogyan a bányász mondja, a pokol felé uj élet indul.

Lent az örvény fenekén, mint hajós a vizeken, jár-kel a fekete sereg. Nem kell kalauz, sem kormányosra nincs szükség, a poklok birodalmában minden alkalmazott tudja a maga helyét. Kezdődik ujra az élet-halálharc a profitért és a kenyérért.

Midőn kirendelt helyünkre megérkeztünk, félmeztelenre vetkőzve fogtunk munkánkhoz. Négyen voltunk. Kettő a lehullott széntömeget csillézte, ketten pedig robbanás után a köveket vizsgáltuk. Robbantás után megrepedt tömbök ásitva lógnak fejünk fölött s csákányunkkal kell azt lefejtenünk. Alatta állunk, fölöttünk a halál terjeszti két karját és minden leszakitott tömbnél vigyorog ránk, hogy élünk, hogy nehezedő két karját kikerültük, mellyel minden percben torkon ragadhat, széttiporhat, vagy péppé préselhet a fekete gyémántkriptában.

Lefejtés után ujra a furáshoz fogtunk. Kézzel furtunk. Munkánkat, mint mindig, szótlan-némaság kiséri, csak az ütéseknek nehéz ritmusa tombol, mit változatosabbá keblünk zilálása tesz. Ezen egyhangu ütéseket társunk szakitja meg, aki a csillével visszatért:

— Halló! Halló!

Lehet, hogy pihenni akartunk, vagy arcunk verejtékét akartuk letörölni s ezért álltunk meg, de álltunk és önkénytelenül tapadt szemünk a csillén fölakasztott fényre, mely imbolyogva közelgett felénk.

— Halló! Halló!

— No, mi ujság?

— Baj van, a 17-esben egy tömb szakadt le s egy embert zuzott agyon.

Ráncolt homlokkal néztünk össze és szótlanul vártuk, mig társunk egészen közel nem ért a csillével.

Majd megállitotta a csillét, megkezdett beszédét folytatta és befejezte:

— Nem tudom, testvérek — szólalt meg Feri bácsi, aki mellettem dolgozott — én ma már huszonöt éve dolgozom a bányában, de még eddig minden bajt, szerencsétlenséget megsejtettem, vagy, hogyis mondjam no, bizonyos megfigyeléseim vannak ezen a téren. Nem akartam reggel szólni, hogy az egerek kifelé tartottak. Én, mint öreg bányász, tudom, hogy ezek megérzik a veszedelmet. Ugye igy van mégis? Igaz, nektek, fiataloknak, ha ezt reggel megmondtam volna, kinevettetek és vén babonásnak kereszteltek volna.

Mi még mindig szótlanul álltunk és hallgattuk a vén apostolt. Hirtelen és váratlanul egy irtózatos légnyomást kaptunk, mely a szénréteghez vágott kegyetlen erővel. Lámpánk kialudt, sötétség borult ránk.

— Halló! Halló! — kiáltott megrémült hangon az öreg. — Éltek még?

Föltápászkodtam, keresni kezdtem a gyufát, majd halkan életjelt adtam magamról.

— Élek, élek, Feri bácsi, de nem tudom, hová lett Lajcsi. Csak már megtalálnám a gyufát.

— Csak gyufát ne! Nem lehet tudni, vajjon nincs-e gázömlés? Pedig akkor nekünk is végünk van.

Minden szaglóérzékemet összeszedem, de semmiféle szagot nem érzek. Előveszem mégis gyufámat, igy sötétben nem lát az ember semmit. Na végre mgtaláltam a gyufát...... Egy sercenés és következő pillanatban már pislog is a lámpám. Körülnézek. Feribácsi a csille mellett fekszik, Lajos ájultan összerogyva fekszik a földön.

— És Pali hol van? — kérdeztem megrémülve.

.... ő még kint van a csillével — nyögte Feri bácsi

Mit tegyek most? Lábaim gyökeret vertek, nem tudtam megmozdulni. Feribácsi a fény láttára föltápászkodott a csille mellől és oldalát tartva jött felém. Ijedt szeme tágranyilt, én reám, majd pedig ájult testvérünkre tévedt a szeme. Azután halkan, fájdalmasan szólt hozzám:

— Testvér, végünk van! Gyorsan vizet...... vizet......!

Őrültként rohantam a közeli kimélyitett hely felé, ahol bányalé volt összegyülve. Vittem a vizet s az öregnek adtam.

— Kedves fiaim — szólalt meg ujra Feribácsi. — Végünk van......!

Izgatott lettem.

— De Feri bácsi, miért mondja ezt? Hiszen élünk!

— Jó jó, fiam — volt a keserü válasz — de...... de te nem is sejted...... élők vagyunk...... de most még százszorta borzasztóbb a helyzetünk........ élőhalottak lettünk. Csuszamlás történt valahol és ugy érzem, élve nem látjuk a napvilágot...... kifelé nem mehetünk, örökre lezárult előttünk.

Megborzadva néztem a tárna alagutján végig, mely komoran, feketén, mint a kripta szája huzódott a végtelenbe.

— Nem, nem lehet...... — lüktetett agyamban őrülten e gondolat. Fölugrottam helyemről. Meggyujtottam társam lámpását és az enyémet kezembe kapva a fekete kriptának rohantam, hogy mindent megtudjak. Igaz lehet-e, hogy nincs kiut?

Rohantam. Mellettem egerek tömege futott versenyt. Kiakartam jutni e pokolból, levegőt szivni, látni ujra a napot, vagy hirt vinni, vagy tudom is én mit, csak rohanni...... rohanni...... O, a lámpám fénye hirtelen megtörik a messze kigyózó feketeségben...... Világit a lámpánk...... A beomlott kijáratot világitotta meg. Megálltam, majd ujra rohanni kezdtem...... Ut...... ut......! Nincs kiut......! Élőhalottak lettünk...... Megöl a profit......! A kenyér!

—

Nem tudom, másnap vagy harmadnap volt-e, hordágyon feküdtem. Nehéz álomból ébredtem, a tündöklő napsugár nyaldosta arcom. Körülöttem gyermekek és asszonyok serege jajgatott. Körülnéztem, hordágyak serege vett körül, társaim feküdtek rajta véresen, holtam vagy eszméletlenül......

(Csehszlovákia)

Uj világ felé

SOMLÓ LIPÓT

A VILÁGHÁBORUS okok s okozatok tragédiájának utjait járjuk. Az imperializmus halálfejes tornája s a rettentő csődtömeget jelző mérlege, az ujjáépitő problémák régi és uj koncepcióju megoldási törekvései, a régi uralom öncélu tovább-uralkodni-akarása és a megtépett öreg világrend ölében vajudó ujvilág kormányzására hivatott osztályerők viadala dübörögteti az uj tartalomba, az uj formába bontakozó társadalmi szinteret.

A társadalom-gazdasági szükségszerüségek állapota a továbbfejlődés irányába eső beteljesedésre vár. A társadalmi sorsot formáló gazdaság, a technikai és a kulturigények kielégitése az osztályok sorsát is átformálván: kiélesedett osztálytörekvések, mozgalmak és harcok gyupontjaként jelentkezik.

Az anyagi, a technikai termelőerők fejlettsége a termelési, az osztály, az ideológiai, az etikai, a morális és a müvészi viszonylatokban lázas, megváltoztató erővel kiegyensulyoztatását keresi.

Régi kereteiken tulnőtt és tulkivánkozó gazdasági egységek ellenállhatatlanul feszegetik szük burkaikat, hogy a nagyobb gazdasági egység megfelelő termelési és társadalmi viszonylataiban tovább fejlődhessenek.

Tul az elhibázott jóvátételi sarcok katasztrófális tárgyain, a ma és a legközelebbi holnap igazi problémája: a politikailag elhatárolt sok, kisebb gazdasági és politikai egységnek óriási egységekbe való összefoglalása. Olyan óriás egységekbe, amilyeneket a mai anyagi termelőerők organikus fejlettsége és fejlődő tendenciája előir.

A tőkés termelőrendszer gazdasági fejlettsége már a háboruelőtti állapotában tulnőtte magát az adott politikai elhatárolásokon. Borotvaéles, szük politikai és szük gazdasági korlátok közt vergődve, nemzet- és osztályelnyomatások lázaitól hajtva: világcsatatereken kereste a teljes kibontakozásához, az egyensulyához szükséges tágabb kereteket és az uj fogyasztó piacokat.

Föl kell végre ismernünk e látszólag rejtett, de világot formáló nagyhatalom kiutat követelő jelenlétét, célbatörekvését. A politikai összeütközések, surlódások és fegyveres bizalmatlanságok állandó jelenléte eltakarja előlünk e nagyhatalom sorsdöntő szerepét. De az el-nem-sülyeszthető termelő-gazdasági zavaraival is éles osztályharci jelmutatásaival folyton figyelmeztet nagy kielégitetlenségére! Ha egyszer (mi hisszük, hogy nemsokára) a világ munkásosztályának kulturtudatába férkőzik igazi arca: rohamlépésekben fogjuk a politikai és a gazdasági fejlődés utjait szabaddá tenni. (A cikkiró munkástársnak nincs módja állitását a gyakorlattal alátámasztani, mert a politikai mozgalom és akció, melyet itt elgondol, még győzelme esetén sem szolgálta, vagy szolgálhatja a munkásság végcélját.) Ennek a nagy mozdulatnak első nagy stációja lesz az Európai Egyesült Államok, hogy nyomon kövesse a legynagyobb gazdaság-politikai egység: a Világ Egyesült Államai. **De ezeket az uj fejlődési lehetőségeket, az uj nagy emberi állomásokat nagy káoszban végelgyengülő kapitalizmus, hanem a felülkerekedett nemzetközi munkásosztály szervezett akaratából fogjuk elérni.**

A kapitalizmus átformálódási processzusának mikéntje most azon fordul meg, hogy a tőke és politikai pártjai idejében fölismerik-e az idevezető utakat. **A kaptalista rendszer teljes válsága tombol a földekerekség minden táján. A munkásság százmilliói várják megmentésüket.** A kizsákmányolás körforgása és a technikai erők profitszolgálata a munkásság millióit taszitja a munkanélküliség árkaiba, az elpusztulásba. **Az anyagi termelő-**

erők gátfeszitése azt a tábort szolgálja, amelyik utját szabaddá teszi.

A munkásosztály utja: a **szocializmus utja, az igazi demokrácia utja.** Ez az ut párhuzamosan halad a lehető legnagyobb gazdasági egységek utjával. Neki csak arra kell ügyelnie, hogy nyitott szemmel lássa a szükségszerüségekből eredő cselekvési, alkotási teendőit, hogy sohase tévessze szem elől a termelési erőknek és az osztályviszonyoknak folyton változó ujabb parancsait, melyek változó, uj sakkhuzásokat, ujabb meg ujabb matt-lépéseket, ujabb és változó mozgalmi fölvonulásokat igényelnek. Ez a végső harcok utja. Ezek a harcok és az elvárt sikerek lehetősége megköveteli, hogy zárt sorokban, egyesült szervezett tömegekben vonultassuk föl osztályerőinket, tagozatainkat Ezekben a harcokban minden fölhasználható erőre és eszközre szükségünk van. Nem nélkülözhetjük a munkásosztály többségének győzelmet biztositó hitét és akaratát, ha az ipari demokrácia mozgalmunk és harcaink végcélja.

Hogy jól lássunk s biztos kézzel teremtsünk: föl kell szabaditani látásunkat az elsorvadt és élettelen dogmák halottidéző hatása alól.

A nagy halottainknak kijáró tisztelet és hála örökzöld virágait hordozzuk mindig szivünkben, ismerkedjünk meg hüségesen tanitásaikkal, de a **Jimmie Higginsek** szent, áldozatos, döntő szerepe megköveteli, hogy tudásunkat, alkotó szerszámainkat a fejlődés s a változások valóságos ütőereivel hozzuk összhangba. Ha ezt elmulasztjuk, akkor a régi meglátások fetisimádata mindig elgáncsolja életes tennivalóinkat.

Marx és Engels szerény tanitványai vagyunk. De éppen alapvető tanitásaik nevében kell kikövetelnünk a szervezett munkásság szembenálló táboraitól: ne legyetek dogmaimádók.

HÁBORUKÉSZITŐK

Miként sátánok a szennyes poklok mélyén:
röhögnek, vérben gázolnak,
vérszopókként élősködnek a népek emlőjén!
Szennybetorzult arcuk ujabb gyilkos tüzben ég,
agyuk ezer és ezer pokoli tervet sző,
s miként dühöngő égből a romboló mennykő:
földre csap e vér-mondat: "Éljen a háboru!"

Miként őrültek a fojtogató csapda alatt:
ordit, bőg, sikolt belőlük a véres szándék,
karmaikban minden Tisztaság széjjelszakad
s a konferenciázó őrült-horda csak dühöng,
csak tereget vérbeázott térképeket:
vágóhidra szán ismét megroppant bus népeket,
s üvölti a feszült légbe szerteszét: "Éljen a háboru!"

Miként egy örjöngő lény, mely már pusztulásra érett:
milliók testét rágja, mint ezernyi ronda féreg,
csakhogy tovább dühönghessen bennük az ocsmány élet,
mert férges lelkük véres trónért üvölt, kiált,
s e trónnak szilárd alapja csak ugy lehet,
ha fekély-lelkü rabló banda milliókat temet:
s ezért vér-hangon zengik szerteszét: "Éljen a háboru!"

Szolgák és lakájok megvadult tömege,
rádiók, szinházak és mozik,
s a tinta-kuliknak barom-agyu serege
harsogja a vérszemü éneket,
s a világ csak vonaglik, csak remeg,
jaj! . . . fölötte már véres zászlók lengenek
s róluk őrjöngőn száll e szörnyü dal: "Éljen a háboru!"

De a megőrült világ előtt mi szétvetjük a lábunk;
s miközben öklünkre már keleti testvéreink
vére fröccsen: a gyilkos tüzben megállunk,
kezünkben a Lázadás szent korbácsa megsuhog
és zugó hangunkra gyilkos-őrültek szive remeg:
hej, él a hadsereg, de az uj, a forradalmi Sereg,
hej, végül már bakó-urak ellen ropognak a fegyverek!

BÁNADY SÁNDOR

Mentől több dogma miatt tépjük egymást, annál nagyobb a tőkésosztály öröme és annál biztosabban ül a nyeregben, annál később érjük mi el céljainkat. **Széthuzásunk: a vereségek tragikus utja. Egységünk: győzelmeink legnagyobb, legértékesebb záloga!**

A Marx és Engels halála óta bekövetkezett fejlődés tényei s tendenciái, a szocialista rendszer felé épülő utak mai tennivalói okvetlen megkövetelik, hogy **doktrináinkat a ma mérlegére tegyük.**

A társadalmi viszonyaink váltakozó mozgási hullámvonalát alig győzzük napjainkban fölrajzolni. Világterjedelmü osztályharc-hullámok tornyosodnak egymás fölé és ujabb nemzeti állam berendezkedések görgetik elkülönitő szikláikat. Folyamatban a kikorhadt romok eltakaritása és az uj termelőviszonylatok, az uj ideológiák, uj erkölcsi és müvészeti akarások oszlopcövekelései...... Minden ujabb oszlop lecövekelése előtt tudnunk kell: milyen talajba helyezzük, milyen terhet milyen formában akarunk ráépiteni. A szocialista világszemlélet megmérő tudományát igénybe kell vennünk, mint ahogy a technikai tudomány áldásait is kisajátitjuk, de éppennyire használnunk kell az egyszerü, a common senses munkás-eszünket is, melyet a környező élet avat utánozhatatlanul jó praktikussá.

—

Munkás vagyok testben, lélekben. Nem érdem, csak osztályhelyzet és a fölvilágosultságom tükre. Egyre bővülő gondom megértetni munkástársaimmal, hogy ahogy van, ugy rosszul van és másként kellene itt lenni sok mindennek. Szeretném, ha e sorokból is kiéreznék a munkásosztály szolidaritása utáni vágyódásom; osztályom egységtelenségét fájlaló magatartásom. Szeretném, ha amerikai munkástársaim mielőbb megéreznék és megértenék a történelemcsináló napjaink intő és hivogató szózatát. Szeretném, ha mindnyájan tanulnánk a közelmultak nagy hibáin és mulasztásain. Szeretném, **ha az egyre fenyegetőbbé váló és az egyre közelgő fascista háborus fergetegek láttára fegyverszünetet kötnének osztálytudatos táboraink,** hogy vállvetetten állnánk ki a letiporni kész ellenség: **a történelmi veszedelem visszaverésére,** a mának, a holnapjaink, az osztályharcos eredményeink, intézményeink biztositására.

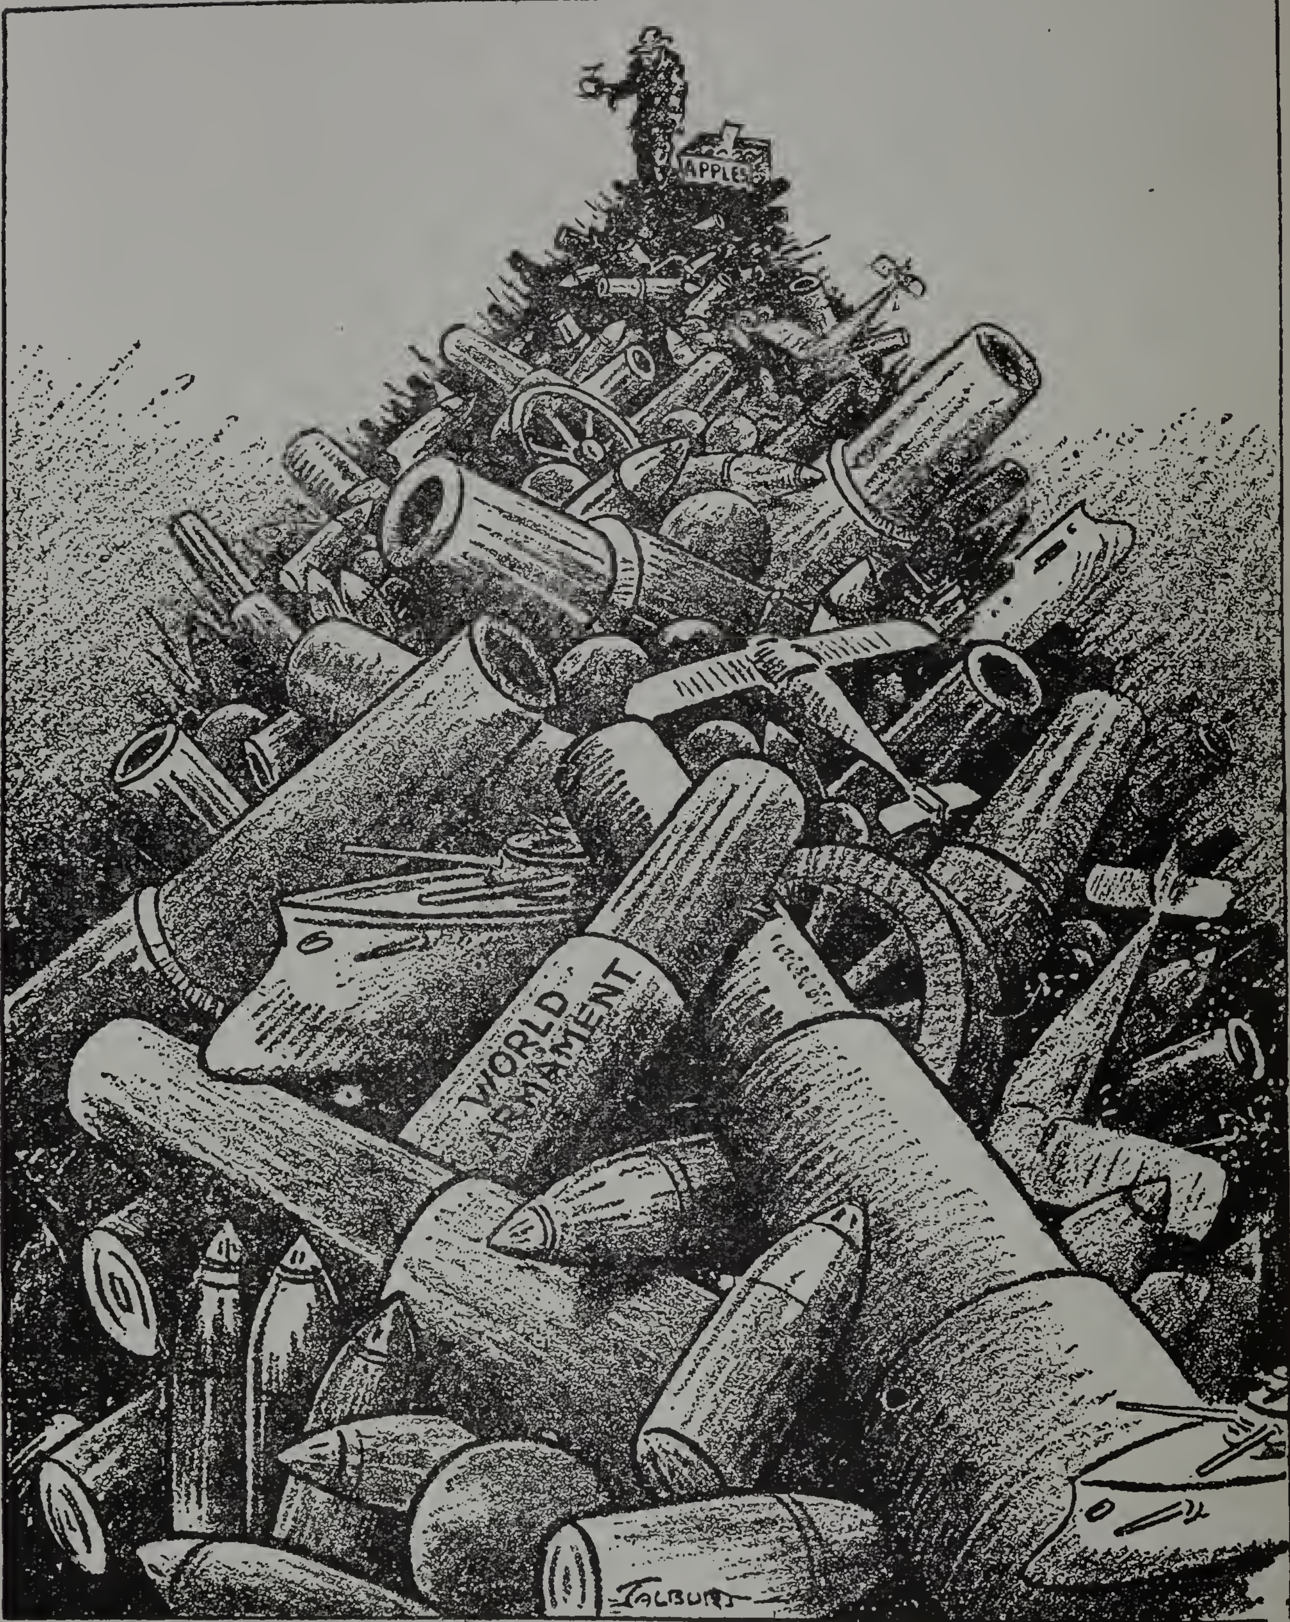
Ezért szeretném, hogy ne lenne pusztába kiáltott szó ez a kis irás, melyet forradalmi üdvözlettel küldök a másik munkástáborban küzdő testvéreimnek.

—

A magyar IWW-isták és a Bérmunkás olvasói egyik fölbecsülhetetlen jó tulajdonsága, hogy a mozgalomtól még távolállókkal szemben a legnagyobb türelmességgel vannak, hogy azokat nem legyőzni, hanem meggyőzni törekszenek, hogy mint az Ipari Egy Nagy Szervezetet megismerők kerüljenek a munkásmozgalomba.

Akik ugy érzik, hogy föl kell hagyniok a multak dogmatikus ragaszkodásához, hogy az ujabb termelési viszonyok uj formákat, uj utakat jelölnek a munkásosztály részére is, hogy évszázados küzdelmét győzelemre vigyék, azoknak erre az utra RÁ kell lépni, tekintet nélkül, hogy a mellette és körülötte levők is elérkeztek-e ehhez a fölismeréshez és ha ezt már ma teszik, az egy munkásosztályt siettetik az EGY táborba való harcának megvivására. (Szerk.)

* * *



APPLES
WORLD ARMAMENT
TALBURT

A kapitalista világhatalom “leszerel.” Torony-magasságra gyártatja a munkásokat legyilkoló eszközöket. Előkésziti a legközelebbi világháborut — az utolsót.

Ti bérrabszolgák

A VILÁG kitagadott, nincstelen bérrabszolgáinak osztálytudatra ébredését a társadalom fejlődése irányitja. A mai csodálatosan fejlett ipari államok elnyomott férfi és női bérrabszolgáinak ideje volna már, ha egy napon egymást megértve, saját érdekükben összeülnének, szervezkednének. Ugy néz ki, hogy a világ kerekeinek mozgását üzemben tartók minden csodás alkotásra képesek, csak a saját érdekeikben való gondolkodásra és cselekvésre nem. A munka, amely rabszolgájává tette a földet s annak természeti kincseit. Uralkodik a földön, a levegőben, a vizen s a társadalomban, mégis a legalsóbb, a legelnyomottabb szerep jut számára osztályrészül. Elnyomatásában mindig azok nyargalnak a hátán, mindig azok osztják a szöges korbács legirtózatosabb csapásait, a kiknek sikerült a munka teréről a termelés szinteréről a kizsákmányolás polcára kapaszkodni. John D Rockefeller fiatal korában füszeressegéd volt s ma a világ leghatalmasabb trösztjének a feje ,egyszersmind a világ legkegyetlenebb, legirgalmatlanabb kizsákmányolója. A szénbányák — Ludlow, Calumet, Columbine — vérrel áztatott rögei be borzalmas szenvedéseket rejtenek magukban az elnyomatás és kizsákmányolás részéről Rockefeller telepein.

Henry Ford, az automobil mágnás, lakatossegédből cseperedett föl. A kizsákmányoló osztály kegyetlen urai közé tartozik. Profitjának, hatalmának megvédése érdekében, halomra löveti bérrabszolgáit és ti, rabszolgák, megalázkodtok előtte, ugy vélekedtek, hogy senkinek sem lehet hatalma csak akkor, ha gazdag, ha kizsákmányoló. Arra tanitott bennünket a kizsákmányoló osztály, hogy a dollár az isten, a mindenható és lenyeltük azt szőröstől-bőröstől. Ama tévhitet is elhitették velünk, hogy a "szegényeké a mennyeknek országa", hogy "halálunk órájától kezdve boldogok leszünk". De ők itt a földön kivánják azt. Elhitették velünk, hogy egy felsőbb hatalom, egy mindenható rendeletére van szegény és gazdag, kizsákmányoló és kizsákmányolt. Az uralkodó osztály prostituált közegei: a sajtó, a pap, a politikus megmételyezik agyunkat és mi, mint engedelmes bérrabszolgák, tizezrével, százezrével kivánjuk a megváltó halált.

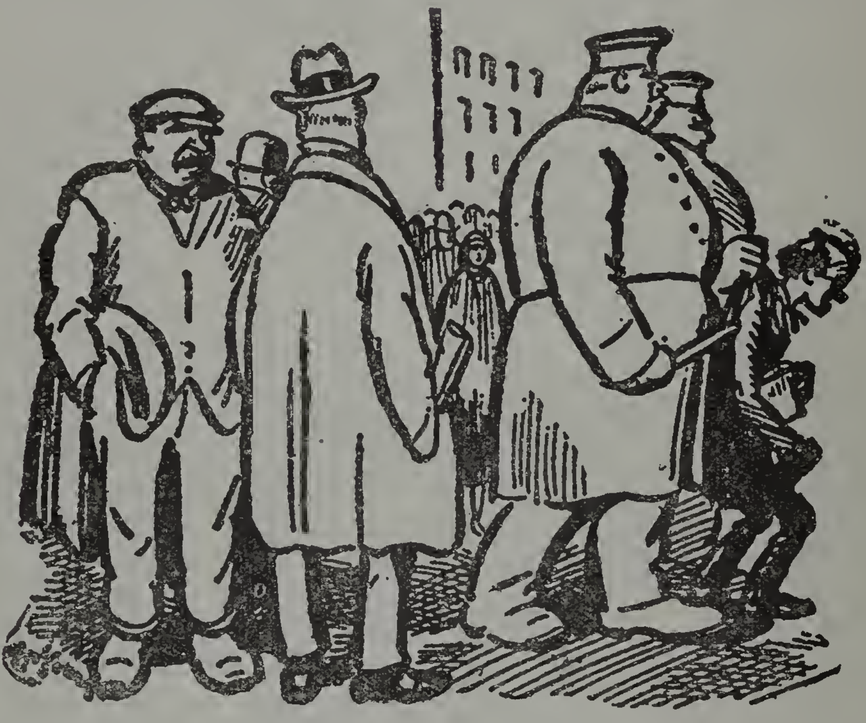
Ezzel az ósdi fölfogással szakitania kell a munkásosztálynak, hogy a szabadság utjára léphessen, hiszen ő az, aki a társadalom haladásának az egyetlen lüktető ereje; ő az, aki munkájával nemcsak hogy föntartja a világot, hanem fokozatos munkálkodásával csodákat müvel és folytonosan előbbre viszi annak fejlődését. Ő az, aki szellemi és fizikai munkájával halmazában állitja elő a termelés és szétosztás legcsodásabb gépeit, mozgásban tartja azokat. Az élelem, lakás, ruházat előállitása szédületes gyorsasággal folyik kezei között. Életének, egészségének kockáztatásával dacol a természet zord viharai fölött, mindennek és mindenkinek ura — csak sajátmagának leigázott rabszolgája.

A munka, a bérrabszolgák munkája, tartja mozgásban a vasutakat a nap minden percében s ott leselkedik rájok az irgalmatlan halál, amelynek okozója a profit. Évente négy, ötezer vasuti munkás fizet életével és más tiz-tizenötezret megcsonkitott, hasznavehetetlenné tett a profit, a mai társadalmi rendszer.

A bányászok százezrei minden félelem nélkül szállnak le a föld gyomrába és hozzák felszinre a tüzelésre, fütésre szolgáló szenet, hogy a világ termelő gépezetét mozgásban tarthassák, hogy az emberiséget a tél hidege ellen óvják s a társadalom eme nélkülözhetetlen érrabszolgái évente százával, ezrével pusztulnak el a profit szent nevében széngáz, tüz s robbanások alkalmával. Feleségeiket, gyermekeiket az éhség rettenetes kinjai gyötrik.

A gyárak és ipartelepek férfi és női bérrabszolgáinak tiz- és százezrei jutnak korai halálba a "speed-up" rendszer, a büzös levegő, a tüzfészkek lángjai között. Igy kivánja ezt a mai civilizált társadalmi rendszer — a profit istene.

Életünket, egészségünket áldozzuk föl annak az osztálynak, amely a kutyáját is többre becsüli, mint föntartóját, a munkásosztályt és mi mégis, amint fölöslegessé válunk a termelésben, gyárról-gyárra, bányáról-bányára járunk s az ember, a munka nagy alkotója megszégyenitő módon esdekel, hogy eladhassa munkaerejét, hogy a profit érdekében leméssároltassa magát. Eme megszégyenitő megalázkodásból van menekvés az emberiség számára. Meg van a mód arra, hogy ura, parancsolója legyen, nem embertársai, hanem a termelés és szétosztás eszközei fölött. Nem nagy áldozat kell hozzá, csak munkástársaival kell, hogy egyesüljön a termelés és szétosztás szinterén. Egyesülni egy közös célért a bérrendszer eltörléséért, a termelőeszközök birtoklásáért. Egyesülni, szervezkedni, hogy megváltoztassuk eme társadalmi rendszert, amelyben nyomor, szenvedés és éhhalál jut számunkra osztályrészül. Megváltoztatni egy oly társadalmi rendszerré, amelyben a munka birtokolja a természet gyönyöreit, kincseit, a termelés és szétosztás eszközeit. Amikor ennek elérésére kiépitette Egy Nagy Szervezetét a munkásosztály az egész világon, szin, faj és nemzetiségre való tekintet nélkül, akkor majd tulajdonába veszi a földet és megszünteti a nyomort, a szenvedést és élvezni fogja munkájának teljes gyümölcsét. Ez az Ipari forradalom, az Ipari Demokrácia lesz, amelyet embriójában hord ez a társadalmi rendszer. Ehhez szükséges az, hogy a bérrabszolgák milliói osztálytudatra ébredjenek.



A tőkés rendszer erőszakszervezete "megmenti" a kapitalizmust.

Ne álljatok levett kalappal, remegő inakkal mestereitek előtt, mint a megkorbácsolt kutyák, hanem mint ember, mint a természet büszke koronája szervezkedve, szolidaritást vállalva a munkásosztály fölszabaditásáért, az Ipari Demokráciáért.

A társadalom fejlődése

KÖHLER SÁNDOR

A TÁRSADALOM fejlődésében hosszu évezredeken át az ember megfeszitett erővel volt kénytelen elemi szükségleteit, élelmét, ruházatát, lakását előállitani. Az ősember vadászattal és halászattal foglalkozott saját szükségleteinek kielégitésére. Szerszámok hiányában mindezeket puszta kézzel volt kénytelen előteremteni. A kőkorszakban, amikor már az ember egy lépéssel tovább haladt, kőből csiszolt szerszámokkal állitotta elő szükségleteit, de csak mindig annyit termelt, amennyi napi szükségleteit kielégitette. A társadalmi fejlődós a kőkorszakból rettenetes lassusággal haladt, amig elérte azt a fokot, ahol már fából és vasból készitett szerszámok állottak rendelkezésére, melyekkel szükségleteit kényelmesebben, gyorsabban állitotta elő. Az elmult korszakoknak a legnagyobb problémája mindig a szállitás és közlekedés volt. Az ősember, ha valamije volt, vagy ha halat vagy vadat ejtett zsákmányul, azt lakóhelyére a hátán volt kénytelen szállitani. Gyalogszerrel közlekedett. Lakhelye a tavak környékén a hegyoldalba vágott üreg volt és évszázadok, évezredek multak el, mig a tavakon közlekedni tudott, mig a csónakot föltalálta. A csónakot éles kőszerszámmal egy darab fából vájta és égette ki és az volt a szállitás és közlekedés első mestermüve. Ma hatalmas hajók, páncélóriások szelik az óceánokat rémitő gyorsasággal, óriási terhekkel megrakva az egyik világrészből a másikba.

A szárazföldi szállitásnál az ember első segédeszköze valószinü a szánkó volt, amelyen kényelmesebben huzta zsákmányát, később állatokat szeliditett, melyeknek hátán végezte a szállitást, mig később a rómaiak föltalálták a kereket és azok segitségével két, később négykerekes kocsikat gyártottak és a terhet az állatok hátáról azokra tette át, mely által gyorsabban és nagyobb mennyiségü árut szállitott. A szállitás és közlekedés forradalmasitása 1803-ban történt, amikor James Watts föltalálta a gőzkocsit, amely 5—6 mérföld sebességgel közlekedett. 1830-ban sinekre tették át, mely által 10—12 mérföld sebességgel szállitottak, mindig több és több árut. Az emberiség folytonos törekvése a gőzgéptől a gázgéphez vezetett s ma a gőzgépek vasuti mozdonyok 60—70 mérföld sebességgel óriási rakománynyal száguldanak hatalmas területeken keresztül. A gázgépek 350—400 mérföld szebességgel közlekednek. A szállitás és közlekedés tette lehetővé az emberiség számára a társadalom rohamos fejlődését. A kőkorszakból kifejlődött a vaskorszak s a vaskorszakból a gépkorszak s ma a munkás, a vasember segitségével szédületes gyorsasággal állitja elő a szükséges javakat.

Az Egyesült Államok Ipari Fölülvizsgáló Bizottságának jelentése szerint az Egyesült Államok területén ma egy billió lóerőt képviselő áramot képesek előállitani, fejleszteni, amely tiz billió ember munkáját volna képes elvégezni, vagyis éppen ötszörösét a világ népességének. 1869-ben egy lóerő áram esett egy munkásra, ma 5 esik.

Az 1830-ik év termelő eszközeivel 6 millió emberre volna szükség, hogy az Egyesült Államok 1929-ben termelt buzához a földet megmüvelje. Ma a gőz- és gáz-ekékkel négyezer ember elvégzi azt.

1904-ben, az automobil ipar kezdetén, egy kocsi előállitásához 1291 órára volt szükség, 1913-ban már csak 303 órára, 1932-ben 72 óra szükséges, hogy egy automobilt előállitsanak és a ma előállitott automobilok minden tekintetben fölülmulják az eddigi gyártmányokat.

1919-ben 606 millió 410 ezer munkaórára volt szükség, hogy 1 millió 600 ezer automobilt gyártsanak. Tiz év mulva, 1929-ben, 521 millió 469 ezer óra alatt előállitottak 5 millió 600 ezer automobilt.

Az acéltelepeken a vasolvasztó kemencéknél hét ember végzi ma hatvan ember munkáját. A vasuti kocsikba a nyersvasból két ember ugyanannyit rak föl, mint 1919-ben egyszázhuszonhat munkás. Ma, 1932-ben, 3 ezer acélipari munkás, gépek segélyével, képes annyit termelni, mint 1929-ben, tehát három évvel ezelőtt 28 ezer acélipari munkás.

A fürészmalmi telepeken 45 ezer munkás végzi 292 ezer ember munkáját. 1929-ben 750 ezer szénbányász termelt annyi szenet, mint ma 420 ezer, pedig csak három esztendő a különbség. Ez mutatja a géprendszer, a vasember rohamos fejlődését. A cipőgyártásnál 81 ezer ember végzi 200 ezer ember munkáját. 1929-ben három és fél millió mezőgazdasági munkás többet termelt, mint 1919-ben 8 millió.

Az épület-tégla épitését ma száz munkás egy féltucat égetőben annyit képes termelni, hogy az Egyesült Államok téglaszükségleteit fedezi. Ma a gép segélyével kilecezerszerte több villanylámpát gyártanak, mint néhány év előtti módszerrel.

A kenyérsütődékben két munkás ma százezer kenyeret képes kiadni, jobbat, izletesebbet, mint bármikor ezelőtt.

A bizottság jelentésének legérdekesebb része, amelyben kimutatja, hogy a mai fejlett géprendszerben az Egyesült Államok népességének jólétben tartására a munkásoknak évi 650 órai munkaidőt kellene dolgozniok, hogy valamennyien alkalmazáshoz jussanak, vagyis, heti 12 és fél órát.

A társadalom fokozatos fejlődésén az emberiség rettenetes küzdelmeken ment át, de sem a kőkorszakban, sem a rabszolgaságban, sem a feudalizmus rendszerében nem volt oly kitagadott, jogfosztott, megrabolt, mint ma, a bérrabszolgaság idején. Ma, mikor a termelést szédítő gyorsasággal végzi, ma, amikor a gépek segélyével a természet áldásait megsokszorositotta, hatalmas felhőkarcolókat emel a kényelem minden gyönyöreivel és az árok parton piheni ki fáradalmait, hogy holnap tovább huzhassa az igát. Az élelem és ruházat szükségleteit óriási mennyiségben halmozza föl és annak tövében az éhségtől, a hidegtől megdermedve pusztul el. Az ember a csodák csodájának alkotója, a primitiv, az ősembert megszégyenitő módon közömbös saját magával szemben. Amit elmulasztott a társadalmi forradalom fejlesztése terén, szervezetlensége folytán, azt előállitotta akarata ellenére is a gép, a vasember fejlesztésével.

Ma a géprendszer fejlettsége állitotta az embert a társadalmi forradalom legfelső lépcsőjére, amelyről visszaut nincsen és bármennyire habozik is, az egyetlen mentség számára az Egy Nagy Szervezet, az Ipari Demokrácia.

A BÉRMUNKÁS GYŐZNI FOG

KIPETY KÁROLY

Csak nem elmerengni a történtek felett,
nem sajnákozni a dolgok felett,
nem sirni, nem sóhajtozni rajta,
mert ma itt, holnap amott csillan a szurony.

Akasztófák árnyéka vetődik ránk,
fényes puskacsövek merednek felénk,
szivünket szurony döfi keresztül . . .
az eszménkért meghalni készek vagyunk!

Hátunkon gummibotnak nyoma látszik,
durva rendőrcsizma rug belénk,
kiömlő vérünket vérebek nyalják:
lássátok ime: nem félünk mégsem!

Kezünkre durva bilincs szorul,
ütlegektől arcunk vérbe borul,
börtönök falához szoritjuk kinzott testünk;
. . . nem türünk, . . . nem türünk!

Kereszt az egyik kézben, a másikban pallos,
naponta ezreket gyilkoltok, martok,
. . . hiába minden börtön, bilincs,
győzelem a miénk, a bérmunkás győzni fog!

A szobrász

BULIK M.né

LASSU léptekben halad a tágas folyosón s megállt a lépcső följáratánál. Szemeivel végigmérte a tizenhárom lépcsőt és aztán nagynehezen fölfelé ment rajtuk. Mikor fölért, levegő után kapkodott. Ugy érezte, mintha a kora reggeltől késő éjszakába járó munka egészen kifárasztotta volna. Balra fordult, hogy a mühelybe térjen, mely a világosságot a tetőn keresztül kapta. Mikor bent volt a mühelyben és meglátta alkotását, egy müvésziesen elkészitett kőszobrot, a fáradságot egészen elfelejtette és mosoly jött az ajkára.

A szobor még nem volt teljesen kész. Mert a müvész, a szobrász, itt-ott talált egy kis simitani, csiszolni valót. Néha-néha abbahagyta a munkát és gyönyörködött keze ügyességében. Ahogy ugy bámészkodva állt, a telefoncsengetés megzavarta. Oda siet. A kagylót leemeli és vig hangon beleszól:

— Halló! Halló!

A beszélgetésből csak a szobrásznak válaszát lehetett hallani, ami annyiból állt: “Igen, igen, a szobor ma elkészül és holnap eljöhetnek érte”. Aztán letette a kaglót s nagy örömében a szoborhoz sietett. Azt jól szemügyre vette, hogy nem talál-e valami hibát rajta. Többször körüljárta azt, de semmi munkát már nem talált rajta. A szobor teljesen kész volt.

Leült a székre a szoborral szemben és dörzsölni kezdte kezeit, amelyek azt a müvészies szobrot előállitották és hangosan igy szólt:

— Holnap, igen, holnap eljön a bizottság a szoborért, mely a főtéren lesz fölállitva. És vasárnap kora reggel már a nép gyülekezni fog, hogy ünnepeljen. Tiz óra tizenöt perckor leveszik a lepelt róla és aztán az ottlevők látni fogják az én müvészies alkotásomat, a szobrot. A dalárda megnyitja az ünnepet. A zene szólni fog. A szónokok ajkairól szebnél-szebb ünnepi beszédek hangzanak el. Mindenki a szobromat fogja nézni. Ez lesz az én legboldogabb napom. Ünnepelni fog a város népe......

S itt a szobrász elszomorkodik, mint ha valami bántaná és halkabb hangon mondja: “Ünnepelni fog a város népe. De kit? Az én faragványomat, mely egy nagyurat ábrázol. Szerintük nagy hős, mert a háboru rettenetes gyilkolásában neki is van része. Az ő parancsára a háboruban, sok serdülő ifjut lemészároltak és annál többet nyomorékká tettek egész életükre a Haza nevében. Ahová ő seregét parancsolta, abban a városban vagy faluban kőkövön nem maradt. Vitték a pusztitást meg gyilkolást, mint a barbár népek. És ezt nevezik ők civilizált kornak. És ennek a hősnak a részére rendeltek el vasárnapra ünnepet, hogy az ő cselekvéseit ünnepeljék.

Erre a gondolatra a szobrász, aki percekkel ezelőtt olyan büszke volt az ő szobrára, lesütötte szemeit és mély gondolkodásba esett. Majd ujból megszólalt:

“Ki örökitette meg azoknak az elesett katonáknak fájdalmait, szenvedéseit? Azoknak az anyáknak, özvegyeknek és árváknak a jajkiáltásait, akik fiaikat, férjeiket és apáikat elveszitették? Azok részére nem rendeznek ünnepeket. Azokkal nem sokat törődik a nép. Csak a nagyurak legyenek kiemelve?”

Fölállt a székről és föl-alá járta a mühelyt, majd megint leült és imigy szólt:

“Ha végigfutok gondolataimmal az egész világon, tengerparttól tengerpartig, akkor is csak kevés müvészre találok, akik a szegény népnek a képmását faragták vagy festették meg, vagy annak nyomorát, fájdalmait örökitették meg. Ha visszamegyek kondolataimmal hatezer évre, Egyiptomba, ahol a civilizáció kezdődött s megkérdezném a történelem tudósait, mik voltak a nevei azoknak, akik a pirámisokat épitették, azt a választ kapnám, hogy nem tudják. Azok csak rabszolgák voltak. De a fáraóknak, a királyoknak a neveit megörökitette a történelem. A testüket haláluk után erősen bebalzsamozták, hogy hat-hétezer év mulva is épségben megmaradtak. Azokat a mumiákat minden nagyobb muzeumban látni lehet. Mintha azt mondanák: itt vagyunk teljes testben ezer évek után is, hogy lássátok, kik voltak az ókori uralkodók és milyen rabságban tartottuk a dolgozó népet. A szegényebb népet, ha be is balzsamozták, csak fék-balzsamot használtak, hogy mennél hamarabb elrothadjanak, hogy nyoma se maradjon meg nekik".

Ugyanaz történt a régi görögökkel is. A görög élő isteneknek, istennőknek a képmásait ezerszámra mutatják a szobrok. Az ő hatalmukat dicsőitik könyvek milliói, mely nem állt másból, mint kegyetlen, durva, zsarnoki cselekvésekből.

Kik voltak azok a görög épitészek, akik véres verejtékkel fölépitették azokat a gyönyörü szinházakat meg templomokat? A nevük ismeretlen, mert csak munkások voltak, akiknek csak nyomor és szenvedés járt ki kezük ügyességéért. Mi volt a nevük azoknak, akik gyönyörü szobrokkal szépitették a régi görög kort? Ismeretlenek azok. A történelem itt is csak a volt élő isteneknek a királyoknak, udvaroncaiknak a neveit jegyezte föl...... És igy végigment gondolataival a multakon és visszanézve a mai korig és szemügyre véve a mai társadalmat, amelyben élt, igy szólt:

"Semmi ujat nem látok a rendszerben. Minden ugy megy, mint ezer évvel ezelőtt. A szegény nép akkor nyomorgott és szenvedett és most is nyomorog és szenved.

"A régi korban kiemelték a fáraókat, királyokat, élő isteneket, akik zsarnoki hatalommal rendelkeztek a szegény nép fölött. A mai rendszerben is csak a nagyurakat emelik ki, akik bérrabszolgaságban tartják a dolgozó népet. És ez a munkásnép tür és szolgamódra meghajol előttük.

"És ha most idáig eljutottam, meg kell magamtól kérdezni: hogyan éltem én, hogy csak harmincéves korombban vettem észre, milyen társadalomban élek? Vak voltam-e, vagy szemeimet fátyol boritotta, vagy az agyam volt megmételyezve, hogy ezt a rendszert nem láttam? Vagy idáig kellett eljutnom, hogy e szobor kifaragása után lássam meg benne mindazt tisztán, amit eddig nem vettem észre....?"

S most rápillant a szoborra. Fölugrik a székről, hol több mint egy órát ült elgondolkodva. Közelebb megy a szoborhoz és arcát jól szemügyre veszi. Most látta csak tisztán zsarnoki kifejezését és ugy vélte látni, mintha az vigyorogna rá. Mintha azt mondaná: Te szegény munkás, aki engem kifafaragtál, te akarod, hogy kezed ügyességét megörökitsék? Ha-ha! Hát te nem tudod azt, hogy abban a társadalomban, melyben élsz, csak azok lesznek kiemelve, akik a pénz-istennek hódolnak......

Itt a szobrász már teljesen kikelt önmagából. Arca elvörösödött. Melle zihált. Fölemelte a nagy kalapácsot és összezuzta a szobrot.

S teljes megelégedéssel tette le a kalapácsot. És szólt: "Az én kezem ügyességével zsarnokokat faragni többé nem fogok".

◆

Szomoru tapasztalatok

NÉMETH JÓZSEF

AMIKOR leéltük az 1931-ik évet, a hiszkeny rétege a munkásosztálynak bizalommal fordult a jövő fejleményei elé. A bizalmat fokozta az 1932-ik évben ujból lezajlandó elnökválasztás, mert a mult történelmében az elnökválasztást megelőzőleg mindig több munkaalkalom mutatkozott az iparokban.

A mult föllendülés mesterkéltségét nagyon kevés szavazati joggal biró munkásember ismeri, csak azok, akik a politikai boszorkánykonyhákba be tudnak látni. Azok pedig tartózkodnak a szavazásoktól, mert a politikai cécókat a munkásosztály becsapásának és szükségtelen energia pocsékolásnak tartják.

Az 1931-ből 1932-be nyuló tél nagyon enyhe volt, ami nagyban hozzájárult a hajléknélküli, éhező, rongyfoszlányokban járó munkások sok millióinak nyomora enyhitéséhez és életben maradásához, amit a szeretetkonyha néven ismert, mosogatóvizet megszégyenitő kotyvalékok gyártói is maguknak tartanak.

Az év elején a Kentucky bányászharcot kivéve, számottevőbb munkásmegmozdulás nem volt. Amit a nyomor és nélkülözésszülte nemtörődömségnek lehet betudni. Az agyonéheztetett munkanélküliek teljesen beleestek az apáthiába és a még dolgozók oly nagyon félnek, illetve féltik a munkájukat a munkanélküliek 13—14 milliós táborától, hogy még a véleményüket sem merik nyilvánitani a folyó eseményekre vonatkozólag.

Nem mintha azok, akik még abban a kivételes szerencsében vannak, hogy dolgoznak, megvolnának elégedve a sorsuk folyásával, hiszen olyan alacsony bérek mellett kénytelenek robotolni, hogy a legelemibb szükségleteiket is alig birják megszerezni. De a szervezetlenségük, amely betegségben ugy a munkán levők, mint a munkanélküliek szenvednek, irigyekké, illetve féltékenyekké teszik a különben egy sorsra kárhoztatott munkásmilliókat. Azok, akik még munkán vannak, féltékenyek, féltik a kizsákmányolt sorsukat azoktól a millióktól, akik munkakeresés céljából róják napról-napra a város utcáit. De a szervezkedés helyett várakozó álláspontra helyezkednek és csodáktól várják sorsuk jobbrafordulását.

A kapitalista osztálynak nem érdeke a munkásosztály jobb életszinvonala, mert az gerinces munkásokat nevel és szószólója és harcosa lesz a munkásokat megillető termelt javak igazságos szétosztásának. Azok az emberek, akik nyomorban élnek, elvesztik a józan emberi gondolkozásukat és megszünnek a kapitalista rendszer megszüntetésének harcosai lenni. Legfőbb céljuk a gyomorkérdés, amit emberi mivoltuk megszégyenitése árán könyöradományért koldulva, szereznek meg. Seregszámra látunk ép, erős, mukabiró embereket, akik házról-házra járnak segitségért könyörögni, hogy életüket föntarthassák, természetesen csak a munkásnegyedekben. A gazdag negyedek a koldulók serege elől el vannak zárva, a rend éber őre azonnal fülön csipi, ha egy kivételesen bemeri tenni a lábát tiltott területre.

Vannak, akik ezeket az embereket, akik helyzetük megváltoztatásának helyes irányát nem ismerték föl, — saját céljaik elérésére használják föl és politikai céljaik mögött az ő telhetetlen zsebeik megtömése huzódik meg.

A politikai pártok ez évben nagyon hiányosak, ami csak természetes, miután 1932-ben az Egyesült Államok elnökválasztása zajlik le. A kommunista párt, hüen a régi szokásaihoz, utcai lármákat és cirkuszi mutatványokat rendez az elnökválasztással kapcsolatban és legfőbb célja a tőkegyüjtés és a pártvezérek feneketlen zsákjai tömése.

Az éhező tömegeket ilyen haszontalan cécókra még föl lehet használni, hisz a politikusok hangzatos ígéreteiben és ebben látják sorsuk javulását. A képzettségük még nem jutott el ahhoz a ponthoz, hogy fölismernék a politikusok tehetlenségét, az ipari bárók és fejedelmek gazdasági szervezetével szemben.

Az iparfejedelmek szervezett erejét utcai tüntetésekkel, Washingtonba való marsolással, munkanélküli segélykövetelésekkel megtörni nem lehet. Azt csak Ipari Szervezkedéssel lehet megtörni.

Az I. W. W. már több mint 26 éve hirdeti az ipari szervezkedés szükségességét, ami egyedüli kivezető ut a mai ipari anarchiává sülyedt társadalmi rendszerből.

A politikai pártok vezérei az I. W. W.-t, illetve az ipari szervezkedést nem jónak és nem kivihetőnek jelentették ki a multban. Most már azonban frontot változtattak, azt állitják, hogy az I. W. W. jó volt a multban, de nem a jelenben. Persze, állitásukat nem tudják alátámasztani.

A kapitalista rendszer inog. Hogy teljesen összedüljön, ahhoz az ipari munkások Egy Nagy Szervezetének kiépitése szükséges, mely felöleli az összes iparokban dolgozó munkásokat, kivétel nélkül, hogy milyen szerszámmal dolgozik, milyen nyelvet beszél, milyen a szine, vagy milyen a vallása.

A munkásosztály érdeke egy, tekintet nélkül, hogy abban a szerencsés helyzetben van-e, hogy még dolgozik, vagy már évek óta munkanélkül van. Ennek a társadalomnak egyik éppen olyan kitaszitottja, mint a másik. Ha dolgozik, oly emberfölötti munkát követelnek tőle, ami idő előtt rokkanttá teszi és a sirba kergeti, családja pedig a nélkülözésből a teljes nyomorba jut. Ha nem dolgozik, ki van téve az éhhalálnak és annak, hogy oly alacsony bérért kell esetleg munkát vállalnia, ami sok ugyan az éhenpusztuláshoz, de kevés a megélhetéshez.

Az ily bánásmódokat a munkásosztállyal szemben csak fokozza a gépek fejlődése. Az utolsó tizenöt évben a gépek bevonásával és tökéletesitésével megsokszorozták a termelést. Nem egy ipartelepen, ahol 4000 emberrel végezték a termelést, 400 ember van alkalmazva és a legtöbb esetben még többet is termelnek ezek. Ilyenformán nagyrésze a munkásoknak szükségtelenné vált az iparban.

Ezen csak szervezett erővel lehet változtatni, még pedig olyanformában, amint azt az I. W. W. tanitja. Szervezett erővel lefoglalhatja a proltariátus a termelési eszközöket és azt továbbfejlesztheti az emberiség javára. Azért mondja az I. W. W. az elvi nyilatkozatában: A termelő hadsereget nemcsak a tőkésekkel való mindennapi harcra kell szervezni, hanem arra is, hogy folytassa a termelést, mikor a bérrendszer már elpusztult.

Futball és nyomor

EDE EMIL

Róma: Panem et circenses!
XX. század: Futballt és kenyeret!

TEMPÓ!...... Tempó!...... A biró füttye szól: goal!...... Gyönyörü lövés volt! Éljen! Éljen!...... Tempó!...... Tempó!...... A huszadik században fölujult Róma: Cirkuszt!.... Cirkuszt!...... Róma, ez Róma: kenyérnélküli Róma!

A futball-pályáknak lázas tempója viharszárnyakon futja az utját, lázba boritja a felnőtteket és a csecsemők táborát. Csoportokba verődve állnak s tárgyalják a "világot megváltó" futball-eredményeket. Igen, ennek igy kell lennie, ma már a nap hőse az, akit koponya- és bordatöréssel szállitanak az arénából, a futball pályákról a kórházba. A nap hősét nem sajnálat, hanem üdvrivalgás és harsonazsongás kiséri az arénákról a kórháznak fehér falai közé. Cirkuszért bömböl az egész tömeg, vért akar látni ujra, vért, mely szökőkutként fröccsen a nap felé, vért, mely piros és meleg! A vérnek lázitó szaga lázba boritja a tespedt agyakat, a vér a toroknak démoni erőt kölcsönöz; hatalmas harsonaként zug, morog a tömeg: Tempó!...... Tempó!....

Róma, te örök város! Nem halsz meg soha! Letünt arénáid helyébe ujak jönnek........ Vért és cirkuszt Róma uj népének......! Régi Néródnak helyét kegyetlenebb "Nérók" foglalják el. Te, uj Rómának legujabb Nérója: öntudatlan tömeg, ha előtted halállal vivódik arénádnak szemefénye: egy futballista, hüvelykujjadat földre szegezve, tajtékzó dühvel bömbölöd: dögöt ki a pályáról!

Róma, Róma! Ha földig dőlne is örök falad, — erkölcsöd, az még ma is él!......

A kapitalista társadalom uj tempója: Cirkuszt az éhező tömegnek! A gazdasági krizisnek nyomorába kényszeritett tömegeknek nem szabad észrevennie a nyomort, a piszkot, amelyben él; cirkusztneki ujra, mint egykor Róma népének.

A technikának őrült irama millió és millió munkáskezet tesz fölöslegessé a kapitalista rendszerben; milliók és milliók nyögnek a napi kenyérnek igája alatt, kivert kutyaként kóborolnak az utcán: te bódult tömeg, észre ne vedd a fényt, a pompát, amelyben hóhéraid élnek, cirkuszt kaptok, gyönyörüt és fényeset, melynek csillogása szemeitek fényét veszi el; ne lássátok, — ahol fény van, árnyék is létezik ott! Midőn a kapitalisták az életnek gyönyörmámorában élnek, ti ugyanakkor piszokba és nyomorba döntve éhenhaltok! Emberek, ne lássátok: cirkuszt kaptok, hogy mulassatok!

Munkanélkül éltek már évek óta, koplaltok kóbor kutyákként, lépésteket a kapitalista rendnek őrei gumibottal és kardlappal kiséri. Ember, föl ne lázadj: cirkuszt rendeznek számodra, cirkuszt, melyben isteni zsolozsma zeng; cirkuszt, hol vadit a vér! Cirkuszt kapsz a templomnak falai közt; agyadnak szüleménye; isten előtt térdre borultatnak; cirkuszt kapsz: — futball pályát, hogy imádd az erőt, mely benned él, hogy imádd a vért, mely ereidben csörgedez, hogy szeresd az életet, melyből kitaszitottak; hogy örülj a fénynek, melytől megraboltak! Ember, valahogy föl ne lázadj! Cirkuszt kapsz, melyben erős és élet, fény és pompa létezik.

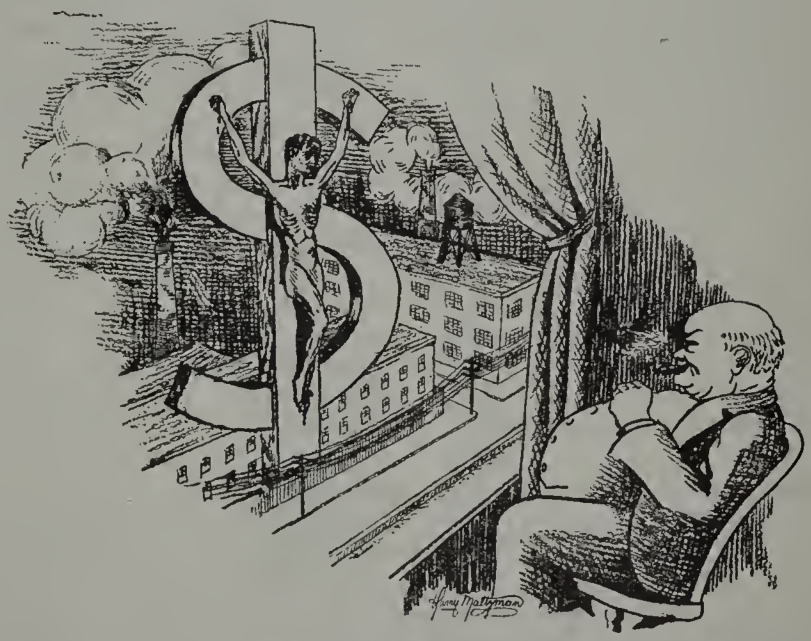
Ember, erkölcstelen mocsár a hazád! Éhes vagy, munkád nincs, feleségedet félholtra vered — enni akarsz! És másnap már lesz ennivalód: feleséged pénzért más karjába hullt!......

És másnap már van pénzed, hogy uj cirkuszt láss. Tudom, te bódult tömeg, cirkusz kell néked, cirkusz és semmi egyéb!

A kapitalista rendszer nap-nap mellett ujabb és ujabb cirkuszt rendez...... Vajjon miért? A proletariátus nyomorát akarja palástolni ezzel. A nyomorgó tömeget, ha magára hagyják, ha időt engednek neki, hogy nyomora fölött töprengjen, lázongó volna. Mint ahogy az egyháznak jelszava bevált, először szegénnyé a népet és csak azután katholikussá. Éppen igy a kapitalista rendszernek jelszava is: a nyomorgókat őrültté tenni, igen jó eszköznek bizonyul, hogy az öntudatlan tömegeket a futball-őrület őrültjeivé tegyék, hogy ezáltal elteritsék attól a gondolattól: embernek nem igy kell élnie, mint ahogy élnek, nyomorban és nélkülözésben halállal vivódva. A kapitalistáknak igazuk van: könnyebb cirkusszal jóllakatni az öntudatlan tömeget, mint kenyérrel. Könnyebb cirkuszi játékba fullasztani a lázadás csiráját, mint éhező tömegek megmozdulását fegyveres erővel elfojtani.

Cirkuszt, futball-őrületet kap az öntudatlan tömeg és ezeken rágódik napokon és heteken keresztül, nem látva az uj háboru előkészitését, nem hallva a fegyverek csörömpölését s ágyuk bömbölésést, melyet a kapitalista társadalom a proletariátus ellen készit, hogy vérbe fojtson minden kenyérharcot, ha egyszer tán megelégeli a tömeg a cirkuszi játékot és lázadásra gondol. A futball-őrületnek eredményein töpreng a munkanélküliek százezrei és közben a tömeg nem veszi észre egyoldalon a szertelen duhaj kedvet, másoldalon saját nyomoruságát. Nem veszi észre a tömeg, hogy a futball-őrületet, mint cirkuszt, csak azért dobják közéjük, hogy ezen rágódva nyomorukat, melyben élnek, egy bizonytalan ideig elfeledjék és hogy ezen idő alatt a kapitalista rendszer elegendő fegyveres erőt gyüjtsön az eljövendő háboruira — a Tőke és Munka között. Mert eljön az uj háboru. A Tőke fegyveres erővel akarja majd a Munka erejét ártalmatlanná tenni; jaj lesz a munkásságnak, ha erejét szétforgácsolva találja a Tőke háboruja; jaj lesz a munkásságnak, ha az arénáknak őrjöngésében éri utól a Tőkének gyülölt fegyvere!

Tömeg, te hatalmas ember, mikor veszed már észre, hogy cirkuszt adnak, ha kenyeret kérsz!? Mikor veszed már észre, hogy a futball-őrületnek leple alatt ágyukat vontatnak ellened!? Ember, mikor lázadsz......! Mikor......?!



Krisztus és társait a gazdagok keresztre feszitették. A kapitalizmus uralma alatt a kereszt dollárrá fejlődött; a sztrájkoló munkás meggyilkolását kéjes élvezettel nézi a tőkés.

Orvosi kislexikon

Dr. Madzsar József egyetemi magántanár
Enciklopédia R. T. kiadásában megjelent
"Orvosi Tanácsadó" nyomán

AGYHÁRTYAGYULLADÁS, az agyvelőt boritó burkok heveny, genyes vagy inkább krónikus megbetegedése. — Oka: vagy az A. sajátos kórokozója, vagy a gümőkor, esetleg a vérbaj baktériumai. Járványosan lép fel és erőssége szerint 30—100%-ban halálos. Tünetek: Láz, nyugtalanság, hányás, fejfájás és nyakszirtmerevedés. Gyógykezelés: A geny sebészi uton való levezetése, a gerincvelő-folyadék megcsapolása és széruminjekciók.

ÁJULÁS, az agyvelő hirtelen vérszegénységének következménye, amit vérveszteség, tulerőltetés, rossz levegő, ijedtség stb. okozhat. A betegnek friss levegőre van szüksége, a testet szoritó ruhadarabokat el kell távolitani, vagy fel kell gombolni, a legfontosabb azonban nyomban a hátára fektetni és a feje alá semmiféle támasztékot nem tenni. Bőrmassage különösen a talpon és tenyéren, továbbá a szivtájék nedves ronggyal való ütögetése gyakran használ. Makacs esetekben, mig az orvos megérkezik, mesterséges légzés!

AKNE, genyes foltocskák a bőrön, melyek különösen a pubertás idejében lépnek fel és szeretnek az arcon, tarkón, háton és mellen jelentkezni. Gyógykezelés: Napfürdők, friss levegő gimnasztikával egybekötve, fehérjében és zsirban szegény koszt, sok gyümölcs; szabályos anyagcserére, székelésre ügyelni!

ALKOHOLIZMUS. E név alatt foglaljuk össze mindazokat a betegségi tüneteket, melyek az alkohol nevü méreg élvezésének következtében fellépnek. Az alkohol mérgezés enyhébb alakja a mindenki által ismert alkoholmámor, amely azonban egyes esetekben mint "beteges mámor" halálos veszedelemmé fajulhat. Tünetek: Kipirult arc, kidülledt szem, izgalmi tünetek, melyek tombolásba mehetnek át és indokolatlan romboláshoz vezetnek, péld. gyujtogatás, vagy ellenkezőleg: eszméletlenség, hideg veriték, alacsony hőmérséklet, görcsök. Gyógykezelés: Előbbi tüneteknél a közveszélyes beteget ártalmatlanná kell tenni, utóbbiaknál: jól betakarni, meleg helyen lefektetni; erős feketekávé vagy tea, dörzsölés, esetleg mesterséges légzés. A krónikus alkoholizmus tünetei: Vörös arc, remegés, gyomor hurut, reggeli bányás, jellemváltozás. A beteg brutális, hazudozó, érzelgős, akaratgyenge és feledékeny lesz, ostoba és kiméletlen vicceket gyárt. Gyógykezelés: Teljes lemondás az alkoholról. Ha a beteg erre képtelen, akkor gyámság alá kell helyezni és alkoholista-kórházba vagy más zárt helyre internálandó. A krónikus alkoholizmus további következménye a delirium tremens és az alkohol-téboly. Tünetek: Az előbbieken kivül üldözési mánia, féltékenységi és félelmi rögeszmék, nagyfoku feledékenység.

ANGOLKÓR, a gyermekek helytelen táplálásának betegsége. Tünetek: Fejizzadás, rendellenségek a koponyacsontokon, u. m. homlok dudor, könnyen benyomható, vékony csontok, későn és szabálytalanul jelentkező fogak zománc hiányokkal, megvastagodások a bordákon, tyukmell, O és X lábak stb. Gyógykezelés: Csukamájolaj, nyers tej, friss főzelék, nyers főzeléklé, friss gyümölcs, nemkülönben napfény és jó levegő.

ARANYEREK, a végbélnyilás környékének vizerei kitágulnak, csomósak lesznek, egyik-másik megpattanhat és vérzés keletkezik, mely a gyakran igen kinzó fájdalmak enyhülésével jár (innen az elnevezés: értékes, mint az arany, mert enyhiti a fájdalmat). Ok: Tultápláltság, hus, feketekávé, alkohol és fűszerek tulzott élvezése, ülő foglalkozás. Az A. gyulladásba mehetnek át és komolyabb következményekkel járhatnak. Gyógykezelés: Meleg ülőfürdők, lágy székeletről gondoskodni! Vérzésnél legalább egy órán át ugy kell feküdni, hogy a medence magasabban feküdjön, mint a váll. Gyulladásos jelenségek esetén hideg borogatás és nyugalom. Orvosi vizsgálat szükséges, mert laikus nem tudja megállapitani, hogy a tünetek nem más betegség (pl. rosszindulatu béldaganat!) okozza-e.

ASZTMA, a légcsövecskék betegsége, mely főként korosabb férfiaknál lép fel. Tünetek: A tulajdonképeni roham előtt rossz közérzet, gyomornyomás, viszketés a gégében, ásitozás és néha tüsszentgetés lép fel. A roham főként éjfél felé tör a betegre, akit, minthogy a légcsővecskék hurutos váladéka és görcse következtében nem tud kilélegzeni, heves légszomj fog el, mell kasa fel van fuvódva, ajka elkékül és nyomosztó félelmi érzések közt görcsösen igyekszik friss levegőhöz jutni, miközben — hogy a légzéshez nagyobb erőt fejthessen ki — az ágy szélébe vagy az ablakfába kapaszkodik. Gyógykezelés: Roham esetén, meleg lábszárfürdő (15—20 percig) és ezt követő hideg lábszárpakolás (30—40 percig), vagy ugyanaz a hason. Sulyosabb esetekben görcsoldó gyógyszereket adnak injekció (astmolysin, morphium) vagy belégzés (meggyujtott asztmapor vagy belladonnatartalmu asztmacigaretták) alakjában. Egyébként szisztematikus bőr- és testápolás légzőgimnasztikával egybekötve. Minthogy az A. gyakran jellegzetesen idegbetegség képét nyujtja, idegorvosi kezelés szükséges lehet.

AVITAMINOZISOK alatt azokat a betegségeket értjük, melyek bizonyos táplálékokban megtalálható és az egészség fenntartásához feltétlenül szükséges fehérjeszerü anyagok — a vitaminok — hiánya következtében lépnek fel. Ide tartoznak: skorbut, vérzéses betegségek, angolkór, lágycsontuság, a ritkább beriberi, vizkór, pellagra, sőt ujabb kutatások alapján bizonyos mértékben a rák és sok más betegség is. Tünetek: a hiányzó vitamin és az illető betegség szerint különbözők. Gyógykezelés: Gyógyszerekkel való próbálkozás előtt az életmód és táplálkozás megváltoztatásával többnyire célt érünk. Suly helyezendő a friss főzelékre, salátára, gyümölcsre. Esetenként fontos a csukamájolaj, citromlé, vaj és a teljes, forralatlan tej.

BÁRÁNYHIMLŐ, gyermekeknél előforduló kiütéses, ragályos, de többnyire könnyü lefolyásu betegség. Tünetek: A 2—4 hétig tartó lappangási időszak után könnyü láz és bágyadtság, majd rendszerint az arcról kiinduló, de mihamar az egész testet ellepő rózsaszinü, sürü bőrkiütés. A foltok egy része hólyagokba megy át, ezek kb. egy hét alatt beszáradnak és 2—3 hét alatt az egész bajnak vége van. A kiütés viszket, felkaparása esetén fertőzésveszély! Gyógykezelés: Szabályos székletre ügyelni, gyümölcs és főzelék-koszt, naponta 8—10 percig meleg lábfürdő, majd hideg pakolás. Viszketés ellen: ecetes vizzel (1 evőkanál ecet 1 liter vizre) lemosni, utána puder.

BASEDOW-KÓR, rendesen a pajzsmirigy fokozott müködésének következménye. Tünetek: Kidülledt, nedvesen fénylő szem, kevés szemrebbenés, kicsiny, de szapora pulsus, izzadásra való hajlam, emésztési zavarok, szapora légzés, idegeskedésre és remegésre való hajlandóság, néha meg nagyobbodott pajzsmirigy és soványodás. Gyógykezelés: Nyugalom, a megszokott környezetből való eltávolitás, lehetőleg hegyi levegő, esetleg brom megnyugtatásul és arzén erősitőül. A B.-os beteget nem kell evésre erőltetni, különösen nem eleinte. Az orvos különböző szervi-gyógyszereket rendelhet, esetleg operációt vagy Röntgen-besugárzást ajánlhat.

BÉLBETEGSÉGEK. A gyakoribb B. és tüneteik: Felfuvódásnál a táplálék bomlásakor keletkezett gázok nem tudnak távozni vagy a bél eltömődése miatt, vagy mert a gázok nem tudnak felszivódni. Gyógykezelés: A bél eltömődését, esetleges bélhurutot megszüntetni, gázképző ételek kerülése, petrezselyempárlat, kamillatea. Hasmenésnek két közvetlen oka lehet. Gyakoribb a fokozott bélmüködés, amely a táplálékot nem hagyja nyugodni a bélben, hanem kihajtja, máskor ellenkezőleg valóságos bélhüdés van jelen, ugy hogy a bél nem képes a táplálékot "tartani." Gyógykezelés: Ha a has egy helye fájdalmas, vagy láz: ágyba feküdni, orvos! Ha csak átmeneti: koplalás, üres tea, egy késhegynyi rhabarbara. Székrekedés a leggyakoribb panaszok közé tartozik. Ha többnyire valamilyen bélbetegség tünete is csupán, mégis önálló betegségként vagy mint ideges betegség is előfordulhat. Gyógykezelés: Különösen krónikus székrekedésnél hosszadalmas és türelmet igényel. Többnyire az egész addig követett táplálkozási mód és szokások megváltoztatását kell kivánni. Ha a rekedést görcs okozza, akkor azt kell atropinnal vagy belladonnával feloldani. Ellenkező esetben hashajtó adandó, mely ismét a baj székhelye (vékony v. vastagbél) szerint változik. (Rhabarbara, ricinus, keserüvizek, áloe stb.) Masszázs, villanyozás, gimnasztika, olajbaöntés is alkalmazható. Bélhurut a bél nyálkahártyájának a gyulladása. Tünetek: Hasfájás, gyengeség, hányinger, főfájás, esetleg sárgaság. Gyógykezelés: Könnyü koszt. Az első 2—3 napon csak tea, nyákleves, kétszersült. Először hashajtó, azután csersavas vagy ópiumos készitmények. Krónikus bélhurutnál könnyü, nem izgató diéta, kevés cukor, esetleg mesterséges gyomornedv. Vakbélgyulladás. Bélfekélyre ugyanaz vonatkozik, mint a gyomorfekélyre. Bélgümőkór. Tünetek: Eleinte mint a hurutnál, majd véres széklet, nagyfoku lesoványodás, esetleg kitapintható krónikus daganat vagy végbélsipoly. Gyógykezelés: Általános gümőkórkezelés, sebészi beavatkozás, diéta. Bélelzáródás (ileus) különböző okokból kifolyólag állhat elő. Rendkivül veszedelmes állapot. Tünetek: Szék- és szélrekedés, felböfögés, hányás, a hányadék sulyos esetekben bélsártartalmu (u. n. miserere), a hasfal feszes és nyomásra fájdalmas. Gyógykezelés: Többnyire csak operáció segit, ha még nincs késő. Mig az orvos jön: nyugalom, semmiféle hashajtó, meleg hasborogatás.

BŐRBETEGSÉGEK vagy valóban a bőr saját betegségei, vagy a szervezet egy más betegségének csupán tünetei. Utóbbi lehetősége miatt bőrtünet fellépésénél orvos tanácsát kell kérni. A gyakoribb B. és tünetek: Viszketésnél az alapbajt kell kezelni, tüneti enyhitésként nap- és meleg fürdők, ecetesvizzel való lemosás, puder. Csalánkiütések többnyire helytelen táplálkozás következményei. Gyógykezelés: Diéta, hashajtók, karlsbadi kura. Övsömör (herpes zoster) mindig egy ideg lefutása mentén lép fel hólyagocskák alakjában, gyakran heves fájdalmaktól kisérve. Gyógy kezelés: Félóránként hideg borogatás, éjszakára vazelinnal bekenni. Ekcéma a bőrre huzamosabb ideig ható sértés vagy emésztési zavar következtében fellépő összefolyó kiütés. Gyógykezelés: Nem vakarni, vizzel nem hozzáérni könnyü koszt, főként gyümölcs. Fagyás. Furunkulozis.

CUKORBAJ (Diabetes) elnevezés alatt azokat a kóros tüneteket foglaljuk össze, melyek azon anyagcsereforgalmi zavarból állnak elő, hogy a szervezet a felvett cukrot képtelen feldolgozni, ugy hogy az a vizeletben vagy a vérben, vagy mindkettőben kimutatható. A legkülönbözőbb okokra vezethető vissza. Tünetek: Eleinte ideges levertség, álmatlanság, fejfájás, szédülés, emésztési zavarok. A C.-ra irányitják a figyelmet: elég jó étvágy ellenére lesoványodás, valamint feltünő szomjuság és vizeletbőség. Sulyos esetekben eszméletlenség lép fel sajátságos mély légzés és rendkivül alacsony hőmérséklet által kisérve, mely többnyire halálosan végződik. Gyógykezelés: Szigoru orvosi étrend, insulin-kezelés.

CSONTGYULLADÁS, mint csaknem minden gyulladás, baktériumok által okozott fertőzés következménye. Tünetek: A Cs. helyén heves fájdalom, a bőr megvörösödik, esetleg tályogképződés, rázóhideg és láz fellépésével. Gyógykezelés: Az orvos érkezéséig — aki az alapokat megállapitja, a tályogot felvágja és általános kezelést vezet be — alkalmazhatunk 50 százalékos alkoholos borogatást (föléje Billroth-battiszot és flanelkendőt) és a csont teljes nyugalomba helyezendő.

EGYIPTOMI SZEMBETEGSÉG (Trachoma) a kötőhártya ragályos megbetegedése, mely türelmes, szakszerü kezelést igényel, különben a látás elvesztését vonhatja maga után. Napoleon katonái hurcolták be Egyiptomból, kórokozója még ismeretlen. Tünetek: A szemhéj belső felületén kisebb-nagyobb gömbök lépnek fel, a szemhéj egészen feldagadhat, genyesedés, fénykerülés állhat be. A gömbök hegekbe mehetnek át, melyek a szemhéjakat össze-vissza huzzák és egyéb komoly bajokat okozhatnak. Gyógykezelés: Kamillateás vagy bórvizes borogatás, tisztaság! A szakszerü kezelés a gömbök lemarásában vagy más módon való elpusztitásában áll.

EKLAMPSIA (Rángógörcs) Terhes, szülő vagy ritkábban gyermekágyas nőknél fellépő heves görcsökben mutatkozó betegség, mely a terhes szervezet belső önmérgezésében leli okát. Hasonló görcsös rángások gyermekeknél is felléphetnek. Gyógykezelés: Azonnal orvost! Addig: azonnal ágyba, csak folyékony koszt, meleg fürdő. Gyermekeknél: Mustárlisztpakolás a mellen, meleg fürdő, hideg borogatás a fejre.

ELHIZÁS. Többnyire a tulzott táplálkozás, kevés izommunka, általában bizonyos "lusta" és "kényelmes" életmód következménye. Ugynevezett belső elválasztásu mirigyek működésbeli betegségének kifejezője is lehet. Tünetek: Zsirlerakódás elsősorban ott, ahol a nem elhizott emberen is van zsir, tehát a bőr alatti kötőszövetben, hasfalban, csipőben, tarkón, valamint a különböző szervekben, májban, izomzatban, szivben stb. Legkülönbözőbb vérkeringési, légzési és egyéb szervi komplikációk. Gyógykezelés: Észszerü táplálkozás és életmód. A különböző fogyókurák csakis orvosi előirás szerint követendők. Szakszerü torna!

EPEHÓLYAGBÁNTALMAK név alatt foglaljuk össze az epehólyagnak és a máj epelevezető utainak megbetegedését, melyek között az epehólyaggyulladás és az epekövek a leggyakoribbak. Tünetek: Epehólyaggyulladásnál bágyadtság, étvágytalanság, emésztési zavarok, néha viszketés és többnyire enyhe sárgaság, mely csak nappali világitásnál fedezhető fel. Epeköveknél heves kólikás fájdalmak, melyek a hátba és a jobb vállba sugároznak ki. Gyakran láz és rázóhideg, az esetek 50 százalékában sárgaság is. Gyógykezelés: Karlsbadi kura vagy operáció, addig is adjunk a betegnek jó sok fodormentateát inni és pakoljuk be melegen. A beteg cipőben felhuzott lábakkal feküdjön és koplaljon.

EPILEPSZIA (népszerü néven: nyavalyatörés, nehéz kórság) többnyire elmebajban vagy elhülyülésben végződő betegség, melynek okai nem tisztázottak még. A betegség kezdetekor heves, később rendszerint enyhébb epileptikus roham tereli a betegségre a figyelmet. A roham tünetei: A beteg felkiált és összeesik, miközben sulyosan megsértheti magát. A test megmerevedik, remeg, majd a remegés rángásba megy át és a beteg többnyire kimerülten elalszik. A roham 2—3 percig tart, az arc előbb sápadt, majd elkékül. Gyógykezelés: Ha a beteg megérzi a roham közeledését, igyon egy negyedliter vizet, melyben egy evőkanál só van feloldva. A roham alatt csak arra kell ügyelni, hogy ne sértse vagy üsse meg magát nagyon. Az E. gyógyitása hosszadalmas, különböző és nagy türelmet igényel.

ÉTVÁGYTALANSÁG. Nem szabad önálló betegségként kezelni, hanem az alapokot kell megtalálni, mely lehet gyomor-, máj-, bél-, ideges- vagy türőbetegség. A beteget nem kell evésre kényszeriteni, kevés meleg citromlé cukor nélkül kedvezően hat.

FAGYÁS nemcsak nagy hidegben érheti az egyes testrészeket vagy az egész testet, hanem ha nincs is dermesztő hideg, de a test vagy az azt boritó ruhák nedvesek, heves szél jár, vagy a szervezet kimerült, elgyengült. Gyógykezelés: Cipőt, ruhát stb. lehuzni, de nem erőszakosan, mert a fagyos testrészek törékenyek. A testet lassan kell felmelegiteni, esetleg hüvös fürdőben, melyet fokozatosan melegitünk. Ha a beteg eszméletnél van, forró kávé vagy forralt bor. Tiszta, nem szoros kötés. Fagyhólyagokat kifőzött tüvel felszurni.

FEJFÁJÁS. A legkülönbözőbb beteges állapotok (éhség, kimerültség, fertőző betegségek, idegbajok, orr-, fül-, szembetegségek, rheuma stb.) kisérője lehet. Gyógykezelés: Meleg vagy hideg borogatás a fejre, forró babkávé citrommal, ha sürübben lép fel, orvos!

FELFEKVÉS (decubitus). Hosszu ideig tartó betegágy komplikációja. Különösen ott, ahol a lesoványodott beteg bőre a csont és az ágy nyomása közé kerül (ülőgumó, keresztcsont, lapocka, sarok tájékán), a bőr megvörösödik, majd rendkivül makacs és sulyos következményekkel járható fekély lép fel. Gyógykezelés: Megelőzésül: Kinos tisztaság, az ágyalátét teljesen sima legyen, helyzet változtatás, spirituszos lemosások. Ha a fekély már fellépett ujjnyi vastagon borvazelin.

FOGBETEGSÉGEK. Fogideggyulladás, a fogszu következménye. Ezt nevezik közönségesen fogfájásnak. Tünetek: Szuró, kisugárzó fájdalmak, különösen ha hideg, kevésbé, ha meleg vagy cukornemü ér a foghoz. Gyógykezelés: A fogorvos előli az ideget és betömi a szuvas fogat. Enyhitésül fájdalomcsillapitó por és a szuvas fogüreget chloroformos vattával eltömni. Foggyökérgyulladás más néven gyökhártyalob. Tünetek: A fog hidegre nem, de érintésre, nyomásra (pl. harapásnál) nagyon fáj. A betegnek az az érzése, mintha a fog meghosszabbodott volna. A foghus és az arc megdagadhat, genyesedés lép fel. Gyógykezelés: Az egészséges oldalon a két fogsor közé zsebkendőt teszünk, hogy a beteg oldalon megakadályozzuk a fogak összeérését. Meleg kamillateával öblögetni.

FÜLTŐMIRIGY GYULLADÁS, (mumps). A fültőmirigy vagyis parits fertőzés okozta lobja. Tünetek: 17—20 napos lappangási időszak után könnyü láz, a fültő környéke egyre jobban megdagad, a bőr feszes és fényes. Néha heregyulladás is fellép. Gyógykezelés: Könnyü koszt, a láz ideje alatt ágyban feküdni, a daganatot meleg olajjal bekenni, föléje vattát és kendőkötést. Heregyulladás esetén: heréket felkötni, hüsitő borogatás.

GÁZMÉRGEZÉS. Mint a széngőzmérgezés esetében is, a szénoxyd a tulajdonképeni méreg. Tünetek: Fejfájás, émelygés, hányás, majd görcsök, bénulás és eszméletlenség. Gyógykezelés: A beteget gyorsan el kell távolitani a mérgezett levegőjü környezetből, le kell fektetni és élesztgetni, mint az ájultat.

GOMBAMÉRGEZÉS. Tünetek: A mérges gomba evése után órákkal, néha napokkal gyomor- és bélfájdalmak, hasmenés, hányás, esetleg görcsök, eszméletlenség. Gyógykezelés: Erélyes hányatás és hashajtás, meleg pakolás.

GUTAÜTÉS. Agyvérzés következménye, rendszerint véredényelmeszesedés, anyagcserezavarok vagy vesebaj kifolyásaként. Tünetek: A beteg eszméletét veszti, összeesik, arca vörös és verítékes. A vérzés kiterjedésének megfelelőleg két- vagy féloldali bénulás. Gyógykezelés: Első segélyként nagyon óvatosan lefektetni, fej magasan! Kávét, alkoholt nem szabad adni. Azonnal orvost!

GÜMŐKÓR (tuberkulozis), ismert kórokozóju fertőző betegség, mely a legkülönbözőbb szerveket támadja meg, ha mindjárt a tüdő-G. a leggyakoribb is ("tüdővész"). Nem örökölhető, leg feljebb a G.-os megbetegedésre hajlamos testalkat veleszületett. Tünetek: A szerint, hogy a szervezet melyik részét támadta meg, igen különbözőek. Általában bágyadtság, csökkent munkaképesség, testsuly csökkenés stb. Tüdőfolyamatoknál már korán feltünik a hőmérséklet egyenetlensége, pl. ebédutáni órákban csekély hőemelkedés, nemkülönben izzadás, különösen éjszaka. Az u. n. tüdőcsucshurut már később lép fel és az orvos által könnyebben kikopogtatható és kihallgatható. Igen veszedelmes a csont-G. is, mely főleg fiatal korban szedi áldozatait. Gyakoribbak még: a bőr, gyomor s bél és az agyhártya G.-os gyulladásai. Gyógykezelés: Az észszerü kezelés célja a szervezet ellenállóképességének emelése. Erre szolgálnak: széruminjekciók, napfény, levegő, besugárzás, pihentetés, megfelelő koszt.

GYERMEKÁGYI LÁZ. Az anyaméh nyálkahártyájának fertőzés okozta gyulladásából kiinduló és általános vérmérgezéssé fajulható heveny betegség. Tünetek: Hirtelen magas láz, gyakran rázó hideggel, fájdalmak a has tájékán, melynek fala merev, nyomásra igen érzékeny. Véres, genyes kifolyás. Gyógykezelés: Teljes nyugalom, hüvely mosás lysoformmal, sublimátoldattal vagy kamillával. Sürgősen orvos, aki fém-, fémsó-, vagy széruminjekciókat ad, esetleg operál.

GYOMOR BETEGSÉGEK. A gyakoribb Gy.: Gyomor hurut, a gyomor nyálkahártyájának gyulladása nagyon meleg vagy hideg vagy romlott ételek élvezése után, esetleg más betegségek kisérőjeként. Tünetek: Émelygés, hányás, gyomorégés, rossz szájiz, lepedékes nyelv. Gyógykezelés: Hánytatószer vagy gyomormosás, egy-két napon át csak nyák leves vagy tea, további néhány napon át is gyenge koszt. Gyomormelegitő. Idült (krónikus) gyomorhurut. Előbbi folyománya, gyakran alkoholistáknál lép fel. Tünetek: Gyomornyomás, étvágytalanság, felböfögés, gyomorégés, gyakran szédülés, bágyadtság, szivdobogás. Gyógykezelés: Óvatos, könnyü diéta, nikotintól, alkoholtól tartózkodni. Az esetleg fennálló más szervi baj kezelése. Gyomor égés. Oka a gyomor sósavtermelő mirigyeinek tulmüködése. Többnyire csak más gyomorbetegség kisérője, de önállóan is felléphet. Tünetek: Tüzes érzés a gyomorban és garatban, savanyu szájiz és felböfögés. Gyógykezelés: Husszegény koszt, késhegyni szódabikarbona étkezés előtt vagy közvetlenül utána, savanyu ételtől tartózkodni. Orvosi vizsgálat, minthogy más betegség tünete lehet. Gyomorfekély. Valószinüleg a gyomorfal pathologikus gyengeségének és gyomorsavtultengésnek a következménye. Tünetek: Heves, égető, a hátba kisugárzó fájdalmak, véres széklet, vérhányás. Gyógykezelés: Szigoru diéta, esetleg operáció. Ha a fekély nagyobbodik és mélyül, végül átfuródás és gyomorvérzés állhat be; ennek tünetei: deszkaszerüen meleg hasfal, heves fájdalom, megsemmisülés érzése, sápadt, beesett arc. Gyógykezelés: Teljes nyugalom, gyomormelegités, azonnal orvost.

HASHÁRTYA GYULLADÁS. A hashártya fertőzése többnyire sebesülés, gyomor- vagy bélfekély átfuródása következtében, vagy női szervek gyulladásából kiindulóan. Tünetek: Hastájék heves fájdalmassága, a beteg felhuzott lábakkal, mereven fekszik, mihamar hányás, nehéz légzés lépnek fel, a pulzus szapora és alig tapintható, a nyelv száraz, kinzó szomjuság, beesett arc, az orr sajátságosan hegyes. Gyógy kezelés: Sürgősen orvos, addig teljes nyugalom, esetleg óvatos hasmelegités.

HAVIVÉRZÉS ZAVARAI. Nem önálló betegség, hanem a különböző altesti szervek, nemkülönben a vér betegségeire és fertőző betegségekre vezethető vissza. Tünetek: A menstruáció nem a szokott időben áll be, feltünően erős vagy gyenge, fájdalmas stb. Gyógykezelés: Nyugalom, nagy fájdalmaknál forró kamillatea, széklet szabályozása, inkább folyékony koszt.

HIMLŐ (fekete himlő). Ismeretlen kórokozóju, igen ragályos betegség, mely a himlőoltás bevezetése óta alábbhagyott pusztitásával. Tünetek: Körülbelül 14 napos lappangási időszak után rázó hideg, láz, fejfájás és heves keresztfájdalmak lépnek fel. Száraz nyelv, étvágytalanság, néha hányás. Mihamar kiütések jelentkeznek, először többnyire a combon; kis piros foltok, melyek rövidesen elhalványodnak, majd az arcon és a törzsön mutatkoznak. A foltok csomócskákba és hólyagokba mennek át, melyek elgenyesednek. A láz hol esik, hol emelkedik, a nyálkahártyákon kis fekélyek mutatkoznak s a legkülönbözőbb, többé-kevésbé sulyos kisérő betegségek. Gyógykezelés: A beteg azonnal elkülönitendő, eleinte koplalás, később szigoru diéta, fürdők és pakolás. Azonnal orvost hivni, aki a mellékbetegségeket megelőzni igyekszik és széruminjekcióval gyógyit.

HISZTÉRIA alatt orvosi értelemben sulyos idegbajt értünk, melynek oka azonban valószinüleg nem a fizikumban (idegrendszerben), hanem kizárólag a lélekben rejtőzik. Tünetek: A legkülönbözőbb extravagantiákban nyilvánulnak és a beteg a hisztérikás rohamban kiszámithatatlan elvágódásokat, görcsöket stb. produkál, melyeknél azonban — szemben az epilepsiás rohammal — sohasem sérti meg magát s nem veszti eszméletét. Gyógykezelés: A környezet magatartása gyakran csak rosszabbitja a bajt. A betegnek hosszas, türelmes és megértő lelki kurára van szüksége.

HŐGUTA. A nagy melegben (napsütés, gépház) folytatott, forszirozott izom munka következménye, különösen ha a test nem képes felesleges melegét leadni, tehát zárt s nehéz ruházat esetén, vagy ha a levegő telitve van párával, ugy hogy az izzadság nem párologhat el. Tünetek: Eleinte kimerültség, káprázás, nagy szomjuság, majd hirtelen eszméletlenség, esetleg görcsök. Gyógykezelés: Levetkőztetni, hidegvizes lemosás, esetleg sósvizes beöntés (fél evőkanálnyi só egy liter vizre).

HUSMÉRGEZÉS (hal, sajt, kolbászmérgezés, botulizmus). Romlott ételnemüekben tenyésző baktériumok okozzák. Tünetek: Hányás, hasmenés, esetleg véres széklet és vizelet, lábszárfájdalmak. Kinzó szomjuság, hideg verejték, izombénulások, eszméletlenség, a mérgezés erősségéhez képest. Gyógykezelés: Azonnali gyomormosás, esetleg széruminjekciók.

INFLUENZA, fertőző betegség, mely többnyire a légiutakat támadja meg és járványszerüen lép fel. Tünetek: Két-háromnapos lappangási időszak után láz és hidegrázás lép fel, jellegzetes fej, hát és tagfájdalmakkal. Sulyosabb esetekben tüdő-, mellhártya- és agyvelőkomplikációk. Gyógy kezelés: Ágybafeküdni, forró teával stb. izzasztani.

IZÜLETI CSUZ, az izületek fertőzés okozta lobos megbetegedése. Tünetek: Láz, rázó hideg; egy vagy több izület megdagad és mozgatásra hevesen fáj. Gyógykezelés: Ágybafeküdni, az izület párnával alátámasztandó, félóránként váltakozó meleg és hüvös borogatások, izzasztás. Azonnal orvost hivni, hogy az esetleges mellhártya- és szivkomplikációnak elejét vehesse.

KANYARÓ, többnyire enyhe lefolyásu fertőző gyermekbetegség, mely alig kerülhető ki. Tünetek: Eleinte nátha, kötőhártyagyulladás, köhögés, emelkedő láz; először a száj könyékén fellépő, majd az egész testet elboritó aprópontu, halvány veres kiütés. Gyógykezelés: Elkülönités, szobát jól szellőztetni, tejdiéta.

KELEVÉNY (furunkulus, furunkulozis). Ha egy akne vagy valamely más felületes bőrfertőzés a bőr mélyebb rétegeibe is behatol és nagyobb genyes gócot alkot, akkor K.-ről beszélünk. Furunkulozisnak nevezzük az erre való különös hajlamot, mely többnyire anyagcserezavaron alapszik. Gyógykezelés: Egyes K.-t célszerü minél előbb többnyire anyagcsere zavaron alapszik. Gyógykezelés: Egyes K.-t célszerü minél előbb felvágatni, furunkulozisnál az alapbaj (pl. cukorbetegség) kezelése, esetleg injekciók.

KÓLIKA. Igy nevezzük, ha valamely csöves szerv (bél, hugylevezető cső, epevezeték) gyulladás vagy kő következtében elzárul, mire görcsös összehuzódások és heves fájdalmak állnak be. Gyógykezelés: A meleg enyhitően hat, tehát száraz, meleg borogatás és fürdő; kamillatea; esetleg meleg beöntés. A medence feküdjön magasabban a törzsnél.

KOSZ (favus), a fejbőr és a haj élősdi okozta makacs megbetegedése. Tünetek: Az élősködő gombák a fejbőr szarurétege alatt telepednek meg, sárgás szinüek, majd áttörik a szaruréteget is és sárgás-barnás korongalaku pörkösödéseket hoznak létre, melyek mindegyikének központjából egy hajszál áll ki. A haj kihullik és a bőr heges lesz. Gyógykezelés: A hosszas és nagy türelmet igénylő kezelés a lerakodásoknak meleg borogatások segitségével való meglágyitásából és a beteg haj eltávolitásából áll. Ezután jódtinkturával vagy kátránnyal beecseteljük a fejbőrt. Nagyon hasznos a Röntgen-kezelés.

KÖHÖGÉS, a legkülönbözőbb betegségek (többnyire a légiutak betegségeinek vagy vérkeringési zavaroknak) tünete, esetleg ideges jellegü. Gyógykezelés: Ha a beteg láztalan: izlandi zuzmóból készült tea. Lázas köhögésnél: ágybafeküdni, meleg tej.

KÖSZVÉNY (podagra), egy vagy több izület hevesen kezdődő, majd idültté váló megbetegedése, mely az izületekben való hugysavlerakódásban leli közvetlen okát. Tünetek: A K.-es roham többnyire a láb nagyujjának első izületében kezdődik hasogató, tüzes fájdalmakkal e helyen. A roham több napig tarthat, más izületekre is átterjedhet és a legkülönbözőbb szervi komplikációkkal járhat, aszerint, hogy a hugysav milyen szervekben rakódik le még. Gyógykezelés: Táplálkozási és diaetetikus szabályok pontos betartása (hus, szárazfőzelékek kerülendők). Rohamnál: Ágybafeküdni, forró fürdő, iszappakolás, hust megvonni, háromóránként hat csepp colchicum-tinktura.

KÖTŐHÁRTYA GYULLADÁS (konjunktivitis). Az egyszerü, heveny K. tünetei: A szemgolyó is, de különösen a szemhéj kötőhártyája vörös; nyálkás, esetleg genyes váladék képződik, reggel a szemhéjak össze vannak ragadva; könnyezés és viszketés a szemben, melyet a világosság bánt. Idült gyulladásnál a szem szine inkább sárgásvörös. Gyógykezelés: Poros, füstös, meleg levegőt kerülni; naponta három-négyszer zsábateával borogatni, majd 50 százalékos faolajból és 50 százalékos lanolinból álló kenőccsel bekenni. Szemet nem lekötni. Könnyü koszt.

KÖZÉPFÜL GYULLADÁS, közvetlen fertőzés ("meghülés") következménye, vagy garatgyulladás és egyéb fertőző betegségek kisérője. Tünetek: A kifejezett K.-nál hirtelen fellépő rendkivül heves furó, szaggató, a fej különböző részeibe kisugárzó, éjszaka elviselhetetlenné fokozodó fájdalmak. Sulyos esetekben szédülés, hányás, görcsök, félrebeszélés. Láz Gyógykezelés: Ágybafeküdni, forró lábfürdő, váltakozó meleg és hüvös borogatás. Azonnal orvost hivni, aki többnyire a dobhártya átszurásával a gennyet leengedi és a rendkivül veszélyes továbbterjedésnek elejét veszi.

LÁZ, a legkülönbözőbb betegségeknek tünete lehet. Néha éppen annak a jele, hogy a szervezet erélyesen védekezik az őt ért támadással szemben, mint például a legtöbb fertőző betegségnél. Gyógykezelés: 38 fokon felül okvetlenül ágyba feküdni, husmentes, könnyü, folyékony koszt. Székelésre ügyelni (vakbél és hashártya gyulladásnál azonban óvakodni kell a hashajtóktól), hideg borogatás, hideg pakolás. Legfontosabb a láz okát megtalálni és az alapbajt kezelni.

LÉGCSŐHURUT (bronchiális katarrhus), különböző mérveket ölthet és elhanyagolva idültté válhat. Tünetek: Hőemelkedés, esetleg erős láz, köhögés, mellyel egyidejüleg a szegycsont mögött, vagy mélyebben fájdalom lép fel, nehéz légzéssel egybekötve. Gyógykezelés: Amig a láz tart, ágybafeküdni, a szoba jól szellőzött, de meleg legyen. Izzasztás, inhalálás, mikor is az inhalálandó vizbe késhegynyi sót vagy néhány csepp fenyőolajat tegyünk.

LESOVÁNYOSODÁS, elégtelen táplálkozás következménye vagy valamilyen betegség tünete, és pedig: cukorbaj, rosszindulatu daganat, gümőkór, a vér különböző betegségei, idegbajok, Basedow-kór stb. Az alapbajt az orvosi vizsgálat állapitja meg és azt célszerü hizókurával karöltve kezeli. A lesoványodott embert hiába kényszeritik evésre, ha étvágytalanságának mélyebben fekvő oka van.

LUDTALP ugy jön létre, hogy a láb csontjai és izületei gyengék ahhoz, hogy a testsuly okozta meg terhelést elbirják. Tünetek: Az egészséges lábon látható boltozat ennek következtében ellaposodik, eltünik, a talp mindenütt érinti a földet, a sarkcsont kissé kifelé fordul, a lábujjak nyujtottak (s nem kissé behajlitottak), a lábszáron viszértágulások lépnek fel és jellegzetes láb, néha lábszár és térdfájdalmak jelentkeznek, melyek igen hevessé válhatnak. Gyógykezelés: Megfelelő vitamindus táplálkozással a csont és szalagrendszer erősitése s igy a L. megelőzése. Szakszerü járási gyakorlatok és lábtorna. Az elterjedt lábbetétek, ha nem a legpontosabban mértékre készülnek, inkább ártanak, mint használnak. Pihentetés, meleg lábborogatás és fürdő.

MALÁRIA (váltóláz), egy nálunk kevésbé előforduló szunyogfajta által okozott vérbetegség. Tünetek: Hidegrázás, fej- és keresztfájdalmak, magas láz, mely 6—36 óra mulva leesik és ugyanannyi idő mulva ujra jelentkezik. Igen hosszu ideig tart ez igy, mig a szervezet lesoványodik és el gyengül. Gyógykezelés: A láz tartama alatt ágybafeküdni és csak folyékony koszt. Chinin injekciók alakjában vagy porban, többnyire naponta 4-szer 0.3 g.

MANDULA GYULLADÁS. Ha a kinyitott szájba benézünk és a nyelvet leszoritjuk, akkor a garatban kétoldalt két nyálkhártyaiv között látjuk a szivacsszerü mandulának nevezett szerveket, melyeknek gyulladása különböző veszélyességü kórokozóknak bennük való megtelepedésétől keletkezik. Tünetek: A gyermekkorban gyakori hurutus tipusra nézve. 1. torokgyulladás. Vannak genyes formák is, melyek többnyire magas lázzal és az alsó állkapocs alatti mirigyek megdagadásával járnak. Komplikációk lehetősége a vesékben, középfülben, szivben, izületekben! Gyógykezelés: Sósvizes, zsábateás vagy hidrogénsuperoxidos toroköblités, izzasztás, vizes borogatás, esetleg a mandulák eltávolitása.

MEGHÜLÉS voltaképpen fertőzés következtében áll elő s többnyire a légiutak nyálkahártyájának heveny lobjaként jelentkezik, de tagadhatatlan, hogy a fertőzésre a hőmérséklet hirtelen változása s a test hirtelen lehütése teszi hajlamossá a szervezetet — különösen a kevésbé edzettet. Tünetek: 1. légcsőhurut, nátha. Gyógykezelés: Láz esetén ágybafeküdni és a tünetekhez képest kezelni.

MELANKÓLIA, ha kifejezetten lép fel, az idegrendszer legsulyosabb megbetegedései közé sorolandó. Tünetek: A beteg egyre magábazárkózottabb és komorabb lesz. Indokolatlan önvád, lelkiismeretfurdalás, üldözési mánia gyötri, a mely örjöngésig fokozódhat és öngyilkosságra vezethet. Gyógykezelés: A környezet ne igyekezzen a beteget “felviditani vagy mulattatni,” ez csak növeli a lelki fájdalmait. Mindenféle öngyilkosságra alkalmas szerszámot stb. el kell távolitani a beteg közeléből s őt magát lehetőleg szem előtt kell tartani. Ha egyáltalában van remény javulásra, ugy azt csakis szakképzett idegorvos türelmes és hoszszas munkája hozhatja meg.

MELLHÁRTYA GYULLADÁS, rendszerint különböző tüdőbetegségeknek a komplikációja. Tünetek: A száraz M. a lélegzésnél heves fájdalmakat okoz. Sulyosabb ennél a savós M., mely többnyire tüdőgyulladás következménye. A mellhártya két lapja között savós folyadék van, melynek mennyisége a két litert is elérheti. Többnyire köhögés és láz jelentkezik. Gyógykezelés: Ágybafeküdni, könnyü koszt, a beteg oldalra hideg borogatás vagy jégtömlő. Az esetleg elgenyesedő váladékot szükség esetén mütéttel kell eltávolitani. A fennálló tüdőgyulladás vagy tüdőgümőkór stb. kezelendő.

MEREVGÖRCS (tetanus), heveny fertőző betegség, többnyire nyitott sebeknek kerti földdel vagy egyéb tisztátalansággal való fertőzésének kövekezménye. Tünetek: Az átlagban 6—14 napi lappangási időszak után fejfájás, hideglelés, majd bizonyos feszesség, merevség érzése, eleinte az arc és a nyakszirt, később a has és a hát izomzatában. Görcsös szájzár, általános görcsroham, mely alatt a gerincoszlop előregörbül, ugy hogy a beteg háta és fekhelye között kényelmesen át lehet tolni a kart. Hőemelkedés. Gyógykezelés: Megelőzés céljából minden sebet tisztán tartani, esetleg jódtinkturával fertőtleniteni! Ha M.-fertőzésre gyanu van, azonnal orvos, aki védőszérum-injekciót ad. Ha a betegség már fellépett a beteg sötét és teljesen nyugodt szobába viendő és minden zajtól, izgatástól óvni kell.

MIGRÉN, a fejfájás egyik formája, mely az agyvelőt ellátó vérerek betegségére (görcsére?) vagy a belső elválasztásu mirigyek müködési zavarára vezethető vissza. Tünetek: Heves fejfájási roham, mely a fejnek csak féloldalára szoritkozik. Gyakran émelygés, hányás, fénnyel és hangokkal szemben való tulérzékenység kisérik. Gyógykezelés: Nyugalom, tej- és növényi diéta, forró lábfürdő. Orvos!

NÁTHA az orr nyálkahártyájának heveny gyulladása, mely hajlam és “meghülés” által elősegitett fertőzés következménye. Kémiai szerek, melyek izgatóan hatnak (pl. ammoniák) is okozhatják. Tünetek: Tüsszentés, orrváladék, esetleg hőemelkedés stb. Gyógykezelés: Néha elfojtja a kezdődő N.-t, ha a beteg egy csepp jódtinkturát cseppent egy pohár vizbe és kiissza. Erős náthánál kenjük be az orrlyuk tájékát vazelinnel, ha az orr el van dugulva, célszerü meleg tejet vagy faolajat felszivni.

NEURASZTENIA, veleszületett vagy a helytelen nevelési metódusok, esetleg szellemi tulerőltetés következménye. Tünetek: A legkülönbözőbbek lehetnek, u. m. hypochondria, kényszerképzetek, ingerlékenység, munkaképtelenség, esetleg szervi tünetek a szivben, gyomorban stb. Gyógykezelés: Ha lehet pihenés környezetváltozás, hosszas és türelmes lelki gyógykezelés.

NIKOTIN MÉRGEZÉS. Heveny N. tünetei: Lassu pulzus, ájuldozás, nyálfolyás, hányás. Sulyos esetekben eszméletlenség, merevgörcsszerü rohamok, a pulzus és légzés kihagynak. Gyógykezelés: Erős feketekávé vagy tea, hideg borogatás a fejre, esetleg gyomormosás. Idült N. tünetei: Szivdobogás, emésztési és látási zavarok, álmatlanság. Gyógykezelés: Dohányzást abbahagyni.

ORBÁNC. Rendszerint a bőrön vagy az orr nyálkahártyáján keresztül történő fertőzés következménye. Tünetek: Az egy-három napig tartó lappangási időszak után rázó hideg láz, a bőr vörös, duzzadt és feszes, majd hólyagos lesz. Sulyos agyvelő-, vese-, szivburok-, mellhártya- és egyéb szervi komplikációk léphetnek fel. Gyógykezelés: Azonnal orvos, aki a továbbterjedést, szükség esetén “tüzzel-vassal,” tehát kiégetéssel és mütéttel stb. igyekszik meg gátolni, esetleg széruminjekció.

RÓZSÁSKIÜTÉS, könnyü lefolyásu fertőző gyermekbetegség. Tünetek: Mérsékelt hőemelkedés, eleinte az arcon és homlokon, majd az egész testen fellépő apró rózsaszinü foltocskák. Gyógykezelés: Ágybafeküdni, könnyü koszt.

SÁRGASÁG, különböző betegségek tünete lehet. Többnyire máj-, epevezeték vagy vérbetegségről van szó, amit csak orvos tud megállapitani. Tünetek: Először a szem fehérje, majd az egész test többé-kevésbé erős sárga szint ölt. Gyógykezelés: Ágybafeküdni, meleg pakolás, folyékony koszt.

SÉRV, ugy keletkezik, hogy többnyire a hasfal egy kevésbé ellenálló helyén keresztül valamelyik zsiger- (tulnyomóan bél-) részlet a bőr alá vándorol. Ez esetleg tulzott megerőltetéskor hirtelen történik meg. Rendkivül veszélyes a sérv kizáródása, mikor a kivándorolt zsigerdarab nem tud többé visszahuzódni a testüregbe. Gyógykezelés: Forró fürdő, a sérv nagyon óvatosan visszahelyezendő. Babkávé. Ha a visszahelyezés — melyet nem szabad erőltetni — nem sikerül, azonnal orvos, operáció.

SZAMÁRKÖHÖGÉS, ismeretlen kórokozóju fertőző betegség, mely a gyermekeket támadja meg és makacsságára ugylátszik lelki tényezők is hatással vannak. Tünetek: 7—10 napig tartó lappangási időszak után könnyü lázzal járó légcsőhurut, majd a jellegzetes köhögési roham, melyet szorongási érzés és nyugtalanság előz meg. Rövid köhintések lépnek fel s aztán mély, hosszu belégzés, mely a félig zárt hangszalagok miatt a szamár orditására emlékeztet. Gyógykezelés: Friss levegő, télen meleg, de jól szellőzött szoba, napfény. Kisgyermeket a rohamban felültetni. Orvos.

SZIV BETEGSÉGEI. Általában a Sz. a következő tünetekkel járnak: Szivdobogás, nyomás érzése a sziv tájon. A beteg könnyen kifárad, esetleg nehéz légzés lép fel, a végtagok megdagadhatnak, az arc nyálkahártyái sápadtak, vértelenek, vagy a viszerek pangása folytán ellenkezőleg elkékülnek. Gyógykezelés: Alkohol, nikotin, tea, kávé megvonandó. Hirtelen sziv gyengeségnél Hoffman cseppek, babkávé, forró kéz- és lábfürdő. Szivgörcsnél friss levegő, kényelmes fekvés magas fejjel, forró kéz- és lábfürdő, mustár-tapasz. A szivtájékot ecettel dörzsöljük.

TÁLYOG (abscessus). Ha a test valamely részén a fertőzés következtében fenn álló genyes gyulladás olyan mértéket ölt, hogy a geny egy körülirt területen a beteg szöveteket teljesen beolvasztja, T.-ról beszélünk. A T. fel is fakadhat s igy a gyülemlő geny utat tör magának. Többnyire láz. Gyógykezelés: Nyugodtan feküdni, láz esetén ágyban. Ha a T. még nem fakadt fel, feléje Billroth-battist, flanelkendő. Ha felfakadt, a geny által bepiszkitott kéz és fehérnemü alaposan fertőtlenitendő.

TOROK GYULLADÁS többnyire a garat s a mandulák környékének “meghülés” okozta hurutja, de sulyos betegségek kezdete (torokgyik!), vagy kisérője (vörheny!) is lehet. Tünetek: A garat, nyelv, szájpadlásiv, mandulák pirosak, lepedékesek; nyelési fájdalmak, láz, meghülési jelenségek. Gyógykezelés: A beteg elkülönitendő. Ha lepedék és erősebb fájdalmak jelentkeznek: orvos, a torokgyik lehetősége miatt. Különben sós vizzel toroköblités, nyakra vizes borogatás, erre Billroth-battiszt és flanellkendő. Eleinte csak folyékony koszt.

TOROKGYIK (difteria, difteritis), különösen 1—10 éves gyermeket megtámadó, sulyos következményekkel járható fertőző betegség, melynek ismert kórokozója többnyire a mandulákba fészkeli be magát. Tünetek: A 2—7 napig tartó lappangási időszak után hirtelen fej- és törzsfájdalmak, bágyadtság, étvágytalanság, nyelési zavarok. Száj és garat nyálkahártyája lobos, a mandulákon fehér vagy sárgás lepedék. A szájból jellegzetes rossz szag árad ki. Magas láz. E tünetek a T. erőssége szerint fokozódhatnak, majd a lepedék idővel leválik és javulás áll be. Esetleg komplikációk a sziv, vese és gége részéről. A betegség tetőfokán fulladozás és bénulások léphetnek fel. Gyógykezelés: Azonnal orvost hivni, aki széruminjekciókat ad. A beteget el kell különiteni, magas láz esetén hideg pakolás, könnyü koszt, bénulásoknál masszás, villanyáram.

TÜDŐ BETEGSÉGEI. A leg gyakoribb heveny fertőző tüdőbetegség és tüdőgyulladás. Ennek tünetei: Váltakozóan magas láz, nyálkásgenyes köpet. Nagyon különböző lefolyásu lehet s ehhez képest különböző komplikációk is léphetnek fel a vese, sziv és agyvelő részéről. Gyógykezelés: Ágybafeküdni, folyékony koszt vagy koplalás. A sziv óvása céjából minden megerőltetés kerülendő.

TIFUSZ (hasi hagymáz), ismert kórokozóju fertőző betegség, mely a bél nyálkahártyáján vérző fekélyeket okoz. A fertőzés a gyomron keresztül, tehát a táplálék utján történik. Tünetek: Kb. 2—7 napi lappangási időszak után lassan emelkedő láz, fejfájás, étvágytalanság, szédülés, gyakran székrekedés. Különösen a hasfal bőrén apró rózsaszinü foltocskák, majd hasmenés lép fel. A beteg második hetében állandó magas láz, de a pulzus nem szapora, a beteg félrebeszélhet, önkivületbe eshet. Gyógykezelés: Rendkivül óvatos diéta, gyógybeöntések lemosások. A sulyos betegséget, mely tiz százalék halálozással jár, csak orvos gyógyithatja ki.

VAKBÉLGYULLADÁS (appenciditis), többnyire a vakbél u. n. féregnyulványának fertőzés következtében fellépő heveny gyulladása. Tünetek: Láz (néha hiányzik), fájdalmak a has jobboldalán, ugyanitt merev hasfal. Ha a gyulladás genyes, a bélfal átfuródhat! Gyógykezelés: Ágybafeküdni, semmiféle hashajtó! A beteg állandóan a hátán feküdjön és legfeljebb folyékony táplálékot vegyen magához.

VÉRHAS (dysenteria), sulyos fertőző bélbetegség. Tünetek: Hirtelen tör ki. Hig és gyakran véres hasmenés, láz vagy ellenkezőleg abnormisan alacsony hőmérséklet. Gyógykezelés: Forró borogatás a hasra, koplalni, esetleg üres tea.

VÉREDÉNY ELMESZESEDÉS (aretriosclerosis). Legveszedelmesebb, ha az agyvelő vagy a sziv vérereiben lép fel, amelyeknek fala degenerációs gyengülésen megy át, esetleg mész rakódik le benne. Tünetek: Igen különbözőek. Az a szerv, melynek véredényeit a V. megtámadta, hamar kimerül, megbetegszik s ily módon sok és sulyos szervi komplikáció léphet fel. Többnyire magas vérnyomás áll fenn. Gyógykezelés: A betegséget csak orvos ismerheti fel. Megerőltetések kerülendők. Gyógyszerek közül a jód hasznos.

VESE BETEGSÉGEI, vagy fertőzés okozta gyulladás, vagy a vese tulterhelése, vagy a vesére különösen ártalmas mérgek (krónikus alkoholizmusnál pl.) okozzák. Rosszindulatu daganatok is felléphetnek és különösen a jobboldali vese az azt tartó zsir- és kötőszövet kóros gyengesége következtében elmozdulhat a helyéből (vándorvese). Tünetek: A vizelet vegyi összetétele elváltozik, amit laboratóriumi vizsgálat derit ki. A vizelet szine, mennyisége és gyakorisága is eltérő. Fájdalmak a vese tájékon. Gyógykezelés: Vesefájdalmaknál ágybafeküdni, tejdiéta, forró fürdő.

VERONÁL MÉRGEZÉS. A veronál nevü divatos altatószerből 4—8 gramm halálos lehet! De már kisebb dozisoknál is bőrkiütések, általános rosszullét, émelygés stb. léphet fel. A sulyos V.-nél a beteg nem kelthető fel többé álmából.

VITUSTÁNC, gyermekeknél lép fel. (A szülő nők vitustánca hasonló, de sokkal sulyosabb természetü betegség.) Tünetek: A beteg izgatott, arcát fintorgatja, ide-oda mozog, lőkésszerü mozdulatokat tesz. A valódi V. fertőzés következménye és szivbillentyü-, valamint izületi gyulladásokkal van egybekötve. Gyógykezelés: A beteget ekülönitett szobában ágyba kell fektetni. Meleg fürdők. Arzénkura, salycilsavas készitmények.

VÖRHENY (sarlach, skarlatina), többnyire a gyermekkor fertőző betegsége. Tünetek: Az egy hétig tartó lappangási időszak után hirtelen láz, hányás, bágyadtság lép fel. Apróponttu, élénkvörös bőrkiütés, mely az arcot rendszerint szabadon hagyja a többnyire a mellkasról indul ki. Gyógykezelés: A beteg elkülönitendő, csak tejet vegyen magához.

Izom és Ész

E KÉT dolog szükséges ahhoz, hogy a javakat előállitsuk. A föld népessége rá van utalva, hogy az ember munkája után éljen. A természet kincseinek a föld szinére hozatalát, a föld müvelését, a házak épitését, az élelem, ruházat előállitását s azok széjjelosztását az emberi erő és tudás végzi. A multban hatalmas, emberfölötti munkát végzett, melyet fölváltottak a különböző találmányok láncolata, amelyek hatalmassá fejlesztették az iparok minden ágát. Minél hatalmasabbá, minél tökéletesebbé fejlesztette a termelés és szétosztás eszközeit, annál jobban elnyomta, kizsákmányolta azok előállitóit. Az elnyomott és kizsákmányolt nincstelen bérrabszolga a politikai pártokban tömörült ügyvédek, papok, doktorok s az intellektuelek minden fajtájától vár orvoslást. Lassan ébred tudatára, hogy saját sorsának intézését sajátmaga kell, hogy végezze. Az Ipari Szervezetekben az Egy Nagy Szervezetben tömörült bérrabszolgák történelmet alkotó hivatást kell, hogy betöltsenek a mai társadalmi rendszer keretein belül. Ebben a társadalmi rendszerben körül vagyunk zárva a munkásosztály kül- és belellenségeivel, az alattomos, ugynevezett forradalmi politikai pártok akarnokai, a kizsákmányoló osztály bérencei egyttesen támadnak ellenünk, szervezetünk ellen. Sajtóik hiénamunkája folyton-folyvást öltögti mérges fullánkjait a munkásosztály jogos és egyetlen igazságos harcunkban, annak rohamos előbbre vetésében szükségünk van az öreg, kipróbált harcosokra, akik ideig-óráig pihenőt vettek. Szükségünk van uj erőkre, hogy a fölszabadulás utját folytassák — amikor mi már kidőltünk az élők sorából — a világ munkásságának fölszabaditása érdekében. Ma az öreg a fiatal harcosokkal egyetemben vállvetve kell, hogy munkához lássanak, ebben a munkában az első és legfontosabb teendőnk a sajtó, a lap, a Bérmunkás kiépitése, nagygyá tétele az egész világ magyarnyelvü bérrabszolgái között. Szükség van erre, hogy a tizenkettedik órában, amikor eme rothadt társadalom vajudik, ne korcsszülöttet, hanem egy egészséges társadalmat, az Ipari Demokráciát szülje az emberiség számára.

Lapunk, a Bérmunkás hatalmassá tétele legyen válasz ellenségeink ádáz munkájára. Hatalmas, erős sajtóra van szükségünk, amely az ipari szabadság fáklyáját lobogtatja, amely megvilágitja az utat a világ magyarul olvasó bérrabszolgái számára, amely visszaveri azt a vipera tanitást, melyet a munkásosztály nyilt és alattomos ellenségei propagálnak. A Bérmunkás az egyetlen magyar lap, mely tisztán és kizárólagosan a munkásosztály ipari szabadságáért küzd. A Bérmunkás az egyetlen, amely a más elveket, fölfogást valló becsületes munkások tiszteletét, bizalmát kiérdemelte. Huszonegy esztendős fönnállása biztositék arra. De még mindig nem az a Bérmunkás, aminek mi szeretnénk látni. Jobbá, nagyobbá, hatalmasabbá kell azt tennünk és ennek elérésére szükségünk van minden osztálytudatos forradalmárra. Mi történne, ha az Egyesült Államok magyarul beszélő bérrabszolgáinak fele előfizetővé, olvasóvá válna? Próbáljuk meg és meglátjuk! Nem lehetetlenség. Az osztályharc igaz, elszánt harcosai, ésszel, energiával sokkalta nagyobb dolgokat produkáltak. Rajta hát, minden oztálytudatos bérrabszolga! Az előfizetés félévre egy dollár, két dollár egy esztendőre. A társadalom eme válságos idején osztálytudatosan nevelt harcosokra van szükség. Ma és nem holnap az ideje, hogy munkához lássunk.

Amiért én IWW-ista lettem

ÜRGE LÁSZLÓ

A KOMMÜN bukása után, amikor ezer és ezer munkásember vált bujdosává a "fehér terror borzalmai elől", igy nekem is meneklüni kellett. Az én bünöm annyiból állt a megingatott kapitalizmus tanyájával szemben, hogy mint vörös katona harcoltam a csehek és románok ellen, azután pedig munkámmal segitettem a proletárdiktatura bölcsőjének az összeállitásában.

Tehát mindezért kellett nekem is menekülni.

Ugy kerültem ide az igéret földjére. Mikor aztán New Yorkban megmutatták a "szabadság" szobrát az igazságot mérő mérleggel, ugy gondoltam, hogy sok viz folyik le a Dunán, mire itt megjön a proletárdiktatura. De tévedtem, mert négy-öt napi philai tartózkodásom után véletlenül a még akkor nem olyan nagyon harcos lapunkat, vagyis az Uj Előrét láttam meg először életemben. Amikor átolvastam azt a lapot, azonnal megváltozott az első napi véleményem és magamban "bünbánó" bocsánatot kértem az egyetlen harcos pártunktól. Ez után a lap után itélve az amerikai helyzetet, még csak napok kérdése lehet és megszületi itt is a proletárdiktatura.

Most már boldogan magam elé képzeltem, vörösbe öltöztetve a Szabadság-szobor igazságmérő nőjét. Mindezen számitásomban megerősitett a másnapi Uj Előre és boldogan előkerestem ládámból a magammal hozott proletárdiktatura pénz, amit, mint emléket, eltettem magamnak. Harmadnap kissé idegeskedni kezdtem, amiért még nem találtam kapcsolatot a philai pártvezetőséggel. Negyedik nap még jobban idegeskedtem, mert féltem, hogy lekések a proletárdiktatura bölcsőjének a ringatásáról; az ötödik nap már azért voltam ideges, hogy vagy én számitottam rosszul, vagy a lap informál rosszul bennünket.

Igy teltek a hetek, de azért én még mindig számitottam és közben számolgattam a magammal hozott emlékpénzemet. De nem felejtkeztem meg a new yorki viharvert, piszkos ruháju igazságot mérő nőről sem. Hónapok teltek. Lapunk mindennapi egyformasága (már lassan kezdtem megszokni), kezdett közömbössé válni előttem, történetesen eljutottam a philai IWW csoport egyik piknikjére. Bár lapunkból olvastam már arról a hárombetüs munkásszervezetről és igy tudtam, hogy szociálfascisták, amiért végtelenül haragudtam rájuk. Nem tudtam elgondolni, hogy munkások lehetnek-e a kapitalisták szekértolói.

Itt kaptam kezembe először a Bérmunkást. Nagy kiváncsisággal olvastam, hogy mit is irhatnak ezek a szociálfascisták? Nagyon meglepett a kemény és határozott kifejezésü szavak, amit természetesen nem vártam. Később aztán beszédbe bocsájtkoztam a Bérmunkást osztogató elvtársakkal, hogy megismerjem közelebbről tudásukat. Beszélgetésünk alatt észrevettem azon őszinteségüket, amit a munkásosztály fölszabadulásával éreznek. Bár nagy bünnek tartottam, hogy az ilyen gondolkodó emberek a mi pártunkat nem ismerik el, a politikát kizárják, ami még nagyobb bün —a munkásosztállyal szemben.

Ezek után lapunkra gondoltam és tényleg látni kezdtem bennük a szociálfascistákat és arra törekedtem, hogy pártunknak megnyerjem őket. Ebből aztán nagy vita fejlődött. Én védtem pártunkat körömszakadtáig és bizonyitottam pártunk "őszinteségét" és "harciasságát", ami fölött ők mosolyogtak. Az egyik elvtárs azt a megjegyzést tette, hogy én nem ismerem a munkásmozgalmat és azért ajánlja, olvassam azt a hárombetüs munkásirodalmat. Én erre kissé bosszus lettem. Már hogy én, aki 15 éven át tagja voltam a szociáldemokrata pártnak, harcoltam a proletárok hazájáért, nem ismerem a munkásmozgalmat?!

Valahogyan ilyen zavarosan végződött ez a mulatság. Azonban gondolkozni kezdtem és éreztem, hogy most egy olyan munkásszervezetet ismertem meg, amely felől ezideig sosem hallottam. De a szivem mégis csak az egyedüli harcos pártunkhoz huzott.

Kezdtem foglalkozni az IWW irodalommal; megismertem szervezeti összetételét s lassan kezdtem látni a különbséget az Ipari Szervezet és a kommnuista párt között, az IWW-ban ismertem föl a munkásosztály igazi orvosát. Ki nem kivánja gyógyitani a rothadó kapitalizmust? Az IWW-ban ismertem föl az egyedüli szervezetet, mely a természetes fejlődéssel tart párhuzamot lépésről-lépésre, aminek célja az egyéni jogosultság és nem a kivételes hatalommal való fölruházása egyes, jeles személyeknek. Az IWW-ban ismertem föl a szólásszabadság jogát és értékét, ami a kommunista pártnál ismeretlen fogalom. És ahogy ezt fölismertem, kezdtem eltolódni az amerikai kommunista párttól, a jövő társadalom guzsbakötőitől.

A kommunisták vallási dogmatikába vezették a munkásságot, egy kis szoci-keverékkel a vezérek örökös uralkodási joga, ami a vallásnál ugyanaz, a kommunistáknál az utcai fölvonulások, a vallásnál a templomi körmenet. A vallásnál a szent sirokhoz való zarándoklások, könyörgések a mindennapi kenyérért — a kommunistáknál az éhség-marsok ugyancsak könyörgések a kenyérért, egy kissé más szinbe burkolva. Tehát

LÁZADJ ÉS TÁMADJ

Ha testvérednek barrikádon ömlik ki
lázadó vére, ha testedbe vérfolyót hasit
a csendőr szurony s ha asszonyodat
vérbe-fagyba látod:
könnyezés helyett, mint egy szörnyü Messiás: támadj!

Ha piszokban, szennyben fuldokolva,
betaposva kinok büzhödt mocsarába, sárba:
ha millióknak torzult arcát látod
s ha millióknak siró hangját hallod:
könnyezés helyett, mint egy láng-oroszlán: támadj!

Ha gyermeked könnyezve, könyörögve kenyeret kér,
s ha neked csak nyomorod, csak rongyod minden kincsed;
ha éhségtől-ájuló fiad végül Életért kiáltva kitör:
s ha cafatos melléből véres szurony szörnyed feléd:
könnyezés helyett, mint egy bőszült isten: lázadj!

Ha embereknek csufolt páriák sikoltva,
bemocskolva, könny-tengerben vergődve,
tépett testükön ezer vér-daganattal:
ha siró, sikongó arcukkal rád merednek:
könnyezés helyett, mint egy szörnyü messiás: támadj!

Ha anyádnak élet-adó méhébe rugnak,
ha atyádat hörgő cafattá marják, ha kerékbetörik,
ha teste a veréstől vonagló hullává dagad
s ha gyilkosok lángoló agyát bunkóval széjjel verik:
könnyezés helyett, mint egy bosszu-isten: lázadj!

Ha a megőrült világ bitófákat állit
s rájuk millió lázadó testvéredet huzza;
ha a könnyes földet örjöngők bandája lepi el
s kampóskeresztekkel vernek fejbe;
ha minden zugból csak hóhér, csak halál ordit feléd:

Lázadj és támadj, mielőtt agyonvernek,
rohanj és fegyvert ragadj, mig benned egy szikrányi erő,
s véres bakókat: diplomatákat gyilkolj, csak gyilkolj,
hogy vesszen a sötét gát a Jövő elől,
Proletár! mig nem késő: addig lázadj és támadj, csak támadj!

BÁNADY SÁNDOR

az egész kommunista vezér-mozgalomban megtaláljuk a vallás kezdőlegességét, ami idővel aztán ugyanugy rothadni kezd a jövő társadalom nyakán és gyermekeinknek majd sokkal nagyobb véráldozatot kell hozniok, hogy a vezéreket lerakhassák nyakukról, mint amilyen véráldozatot mi hozunk ma a kapitalizmussal szemben.

Jaj annak a szegény munkás embernek, akit egyszer ezek a hipnotizőrök megközelitenek. Ha a szeme előtt a megszédités boszorkány-piros kendőjét ellebbenthetik — az a munkásember aztán tényleg elveszett — legalább egy időre. Nem tud aztán gondolkozni és azt sem látja meg, hogy ő a politikusok szekerét huzza, amely kátyuba sülyedt és mindig mélyebbre sülyed.

És ezt nevezik a politikus-vezérek osztályharcnak. Ők még azt is osztályharcnak mondják, mikor valakivel le akarják nyeletni a saját fogait, mert a vezérek fejére olvasta azt a sok gazemberséget, amit a megszéditett munkástestvéreinkkel szemben elkövetnek, ami ellen kötelességünk szembeszállni még a "kékvérü", de pirosba bujt és minden emberi érzésből kivetkőzött selyemfiukkal is. Ezek a selyemfiuk csak akkor látták, mennyire tévednek. Hiába volt a piros szin mutogatása, mit sem használt; még a vezéri állásra való hivatkozás sem. A vezérek megismerték a direktakciót. De micsoda sirásra fakadtak, amikor "huszfontos kalapáccsal" verte őket fejbe az IWW "nemlétező szelleme." (Pedig a szellem állitólag sokkal erősebb, mint az élőlény. Aki kételkedik, menjen a papokhoz vagy a pártvezérekhez bővebb fölvilágositásért.)

De képzeld, kedves olvasó, milyen szellem lehetett az, amelynek fejét még "huszfontos kalapáccsal" se lehetett szétütni?!

Csak az ilyen üres fejjel rendelkezők között kamatoztathatják a vezérek — és szinte az egyedüli megélhetésükké vált az orosz proletariátus sajátos feltörekvése a háboru következtében összedőlt orosz nemesek országának bérrabszolgái helyzetét.

De Oroszország nem Amerika.

Oroszországban ma épitik az ipart és amiben még hiányt szenvednek, kárpótolják a diktaturával. Nálunk hiányt más semmiben sem szenvednek. Ezértt nekünk csak az iparok átvételére kell szervezni a munkásságot, hogy azután minden vezéri diktátorság nélkül éljünk boldogan és megelégedettségben.

Tehát van-e szüksége politikára az osztály öntudatos munkásságnak?

Nincs, még pedig azért, mert a politika — ami drága nyelvünkre forditva — huncutság. Politikusok nem egyenes emberek. Politikai harc, akár parlamentben, akár más téren — a a könnyü és biztos pénzszerzés harca. (A "politika" szó fönti értelmét megtaláljuk az Idegen Szavak Szótárában.) Tehát mit várhat az osztálytudatos munkásság a politikusoktól, köztük a kommunista párttól? De a politikusoknak szükségük van a munkásosztályra. Mert minél nagyobb tömegeket birnak megszerezni a maguk céljaira, annál biztosabb az ő parazita életük. A megszerzett tömegtől kétoldali támogatásban részesülnek: a tagsági járulék, a pártadó. De ezenkivül még ezer más cimen is kiszedik zsebükből a pénzt. Azután jön a kapitalistáktól a tiszteletbeli honorárium, aszerint, hogy milyen mértékben képesek tompitani a munkásosztály forradalmiságát. Ennek a valósága fölött nem kell sokat gondolkozni, csak meg kell figyelni a pártok tevékenységeit. A legtisztábban kimagaslik a kommunista párt az ő világ-pénzes egyesületével. Ez a párt csak annyi forradalmi, nagyon harcos, vagy tulharcos pártot alakit, amennyi vezért el akar helyezni vagy akiktől semmiképen nem tud megszabadulni.

De mit szólna Marx, ha ma fölébredne és egy kis szemlét tartana a mi "legharciasabb pártunknál"? Nem ragadna-e tüzes kardot, amiért az ő nagy eszméjét valósággal utcanővé tették, hogy koldulni járjanak vele, hogy a vezéreknek szabad rablást, biztositsanak.

De mit szólna **még akkor,** ha látná azokat az óriási károkat, amiket ezek a minden emberi érzésből kivetkőzött szélhámosok véghez visznek ugy az indifferens, mint a már gondolkodni kezdő munkásság sorai között.

De mindazideig, amig a munkásosztály nem ébred annak tudatára, hogy az ő legszentebb fölszabadulási ügyét csakis önönmaga, a csontig kizsákmányolt rabszolgahad vivhassa meg — az ezer évek óta közénk tolakodó politikus pártvezérek nélkül. Addig, mig le nem rázza a munkásság nyakáról a tolakodó politikusokat, addig ne is gondoljon a teljes fölszabadulásra.

És éppen ezért alakult az IWW. Ezért hivja megalakitása óta zászlaja alá a bérrabszolgákat és hirdeti a jövö társadalom legtisztább alapvonalát. Az IWW megalakitói tisztában voltak azzal, hogy a kapitalista társadalmi rendszer pusztulásra van kárhoztatva, vele együtt az egész társadalmi gépezet. Midezért nem viv külön küzdelmet a kapitalista társadalom egyes kinövesei ellen, hanem gyökerestől akarja azt megdönteni.

Természetesen mindazideig nem tud átalakitó munkát végezni, mig ahhoz nincs meg az ereje. Hogy az IWW-nak helyes ezen nézete, erre ott van bizonyságul a magyarországi vezéri diktatura szégyenteljes bukása, amit csak azoknak köszönhetünk. Bár alkalma és ereje meg volt a munkásságnak ahhoz, hogy megtartsa azt, de ott volt a politikus-vezérek fő akadálya. Végeredményben nekik köszönhetik a magyarországi munkások azt a borzalmas vérfürdőt, amelyet aztán a fehér-terrorista politikusok rendeztek az ártatlan munkások között.

Éppen ezért, az IWW örökösen figyelmezteti munkástestvéreit a másik oldalon: jól gondolják meg, hogy föl ne üljenek és félre ne hagyják vezetni magukat a kapitalisták által fölbérelt pártvezérektől. Még akkor sem, ha ők adnak rá alkalmat és szivárványos szinben emlegetik a jövő boldogságát.

Az IWW a tudás fegyverét használja a kapitalista társadalom megdöntésére. Szüntelen hirdeti a tanulás szükségességét. Mert minden ember csak akkor tud, ha meg tudja állapitani, hogy a másiknak mennyi a tudása. És mint ahogy a vallásos ember nem tudja meglátni a vallás káros hatását, éppen ugy nem képes a magát öntudatos embernek nevező, de politikai fékereket támogató belátni azt, hogy mennyire meghosszabbitja a mai aljas társadalmi rendszer életét, ha vakon támogatja a politikai vezérek önző zsebcéljait.

Ahogy a multban a vallásfelekezetek rengeteg harcot folytattak egymás ellen a vezérek érdekeiért, ugyanezt teszik ma a szenvedő munkássággal a politikai pártvezérek, hogy zsebük érdekében fölhasználják a köréjük édesgetett munkásságot. Egymás ellen uszitják. A mi természetes, mert emberek milliói ugy a vallásban, mint mai politikában képtelenek megegyezni. Ezt minden tisztán gondolkodó munkás embernek be kell látnia. De ha iparilag szervezkedünk gazdasági helyzetünk javitására csupán és ugy szervezkedünk, ahogy azt az IWW tanitja, megszünik a világ munkássága között minden ellenségeskedés. Mert senki sem lehet ellensége a saját és a közösség érdekének és a jövő kényelmes, minden bőségben való élésnek.

Azonban ezt az utóbbit csak ugy érhetjük el, ha félreteszünk mindenféle ellenségeskedést vallás, szin, fajra való tekintet nélkül s kidobjuk magunkból a sokféle politikai nézeteket és csak gazdaságilag szervezkedünk — az IWW-ban vagyis: a Világ Ipari Munkások Szervezetébe. Ott azután közösen előkészithetjük az ipari forradalmat, amely hivatva van megdönteni a mai társadalmi rendszert és helyébe a világ munkásai nagy szövetségét fölépiteni.

De mindenekelőtt szervezkedjünk. Szervezkedjünk, hogy a jövő harcára megerősödjünk. Szervezkedjünk az IWW-ba, mert az IWW az, amely a világ munkásságát a boldogság utjára vezeti.

Én hiszek a Világ Ipari Munkások Egy Nagy Szervezetében.

Ezért lettem én IWW-ista.

A Mult és a Jövő

VARGA KÁROLY

TI VILÁG bérrabszolgái, akik velem együtt végigharcoltátok s szinpirosra festettétek a harcok mezejét, óh, de hamar fátyolt vetettetek a multra. Nem törődve a járommal, a rozsdás láncokkal, mely évszázadok óta a nyakatokon csüng. Ujra hamis vezérekre bizva sorsotokat, várjátok a járomtól való megszabadulást.

Elfelejtettétek? Amikor az általános választójog helyett fegyvert, golyót, gázt és lángot kaptatok, melyekkel hosszu éveken keresztül testvér-testvért mészárolt le? Miért? Mert a burzsoáziának ugy tetszett.

Ti világ bérrabszolgái, emlékezetetekben fog maradni 1919 juliusa, amig a világon lesztek. Örömujjongva vittétek a bőrötöket a szerbiai határszélre, ahol napok alatt vöröspirosra festettétek a Dunát és a Drávát Belgrád és Zimony között. Megtudnátok-e mondani, munkástestvéreim, hogy miért festettétek pirosra saját véretekkel Szerbia minden talpalatni földjét?

Erre nincs válasz! Emlékeztek-e a felejthetetlen doberdoi fensikra? Ez a fensik milliónyi proletár életét kívánta. Emlékezzetek a tiroli felhőkarcolókra, melyeket hasoncsuszva, éhen szomjan másztátok. Emlékezhettek a Kárpátok hegyeire, amelyeket papirból készült cipőben másztatok meg. Ahol minden nap ezer és ezer magyar proletár hagyta ott a kezét, lábát, mert lefagyott.

Munkástestvéreim! Nem akarok hosszadalmasan foglalkozni ezen leirhatatlan megtörténtekkel. Csak ami a legfontosabb, arra akarok rámutatni. Emlékeztek az Olaszországban bömbölő Piavára, amelyet 1918 novemberében pirosra festettek. A Piava több mint egy millió magyar bérrabszolga életét oltotta ki negyvennyolc óra leforgása alatt.

A háborut befejezettnek láttátok és megindultatok hazafelé éhen, szomjan, rongydarabokba burkolva, azzal a tudattal, hogy az igéretek most beválnak, mert a háboru elejétől végéig — mindig igértek. Aki iparos, az szerszámot és házat kap. Aki földmives, az földet és házat kap. És nem hogy házat, de a lábaitok helyett még mankót sem kaptatok. Azt mondták a hires pribékek, hogy "kifogyott az erdő — nincsen bot". Ti világ bérrabszolgái, hazajöttetek, de nem tudtátok, hogy mire; hazajöttetek egy készületlen forradalomra, amelyet fölváltott egy ál-kommunizmus. Azután ujra fehérpribékek kezébe került sorsotok, mely ujra ezrével szedte áldozatait. Ismét bedültetek a koholmányoknak, az igéreteknek, hogy ujonnan sült vezéreknek jó megélhetést biztositsatok. Ti pedig tömörültök a szemétdombokon, ahol a legyek-beköpte ételhulladékokra vagytok utalva, amitől az ártatlan kis gyermekeitek ugynevezett tifuszban pusztulnak el.

Ti, világ anyái, kik szültök és nem tudjátok, hogy kit neveltek és nem tudjátok mire. Vigyázzatok, hogy az uj generációt osztálytudatosan neveljétek.

Ma előttetek van következménye e helytelen nevelésnek, a nélkülözők és nyomorgók nagy tábora, amely velünk lesz mindaddig, amig nem ismeritek föl az osztályharcot és szervezkedtek osztályotok szervezetébe, a kapitalizmus és a háboruk eltörlésére.

A munkásosztály történelmi hivatása eltörölni a kapitalizmust, háboruival és minden nyomorával együtt. Amit csak ugy érhet el, hogyha mint osztály szervezkedik a kapitalista osztállyal szemben, a saját osztályszerszervezetében, az I. W. W.-ban és elkészül az utolsó háborura: az osztályháborura és elsöpri a kapitalizmust a föld szinéről, megteremtve az Ipari Demokráciát.

Részlet az Illinoisi Bányász Harcból

A MUNKÁSMOZGALOM történetében följegyzésre méltó az a harc, mely a mult év folyamán folyt le az illinoisi szénbányák vidékén. A harc a bányatársulatok által keresztülerőszakolt bérlevágás elleni tiltakozásként tört ki, azonban később két irányba folyt, amennyiben a United Mine Workers of America bányászszervezet tisztviselői — melyhez a harcoló bányászok eredetileg tartoztak — a bányatársulatok mellé álltak és igyekeztek rávenni a bányászokat a bérlevágás elfogadására. Igy a harc a kettős ellenség ellen irányult — a bányavállalatok és szakszervezeti basák ellen — melynek eredményeként a bányászok nagyrésze kiszakadt a U. M. W. A. szervezetből és független szervezetet alakitottak.

A harc egyike volt a legelkeseredettebb munkásharcoknak. A bányászok ezres és tizezres tömegekben piketelték a bányákat a sztrájktörők távoltartására. A munkáltatók a U. M. W. A. tisztviselőivel egyetemben minden eszközt felhasználtak a sztrájkolók letörésére. Az állami milicia és a gunmenek ezrei gépfegyverekkel felszerelve őrizték a bányákat és az erőszakosságok minden fajtáját követték el a sztrájkolók és családjaik ellen. A harcnak számos sebesültje és néhány halottja volt.

Az alanti kép a számos gyülések egyikén lett fölvéve West Frankfortban, amikor Pat Ansboury, a harcoló bányászok lelkes vezére, kitartásra buzditja a sztrájkolókat.

Ne harcoljunk másokért

WIENER ANDOR

HÉTKÖZNAPI eseteket kell itt csokorba kötnünk. Mert már éppen ideje, hogy kicsavarjuk a féltéglát kezéből mindazoknak, akik heptikásra verték a mellüket, a másokért lefolytatott nagy harcokról való dicsekvésben. Eltekintve attól, hogy: ki, mit tett, mennyit és milyen áldozatot hozott, a cselekvésekkel való dicsekvése azokkal sorozza egy táborba, kik soha semmit sem tettek, sőt nem is akarnak tenni, mert......

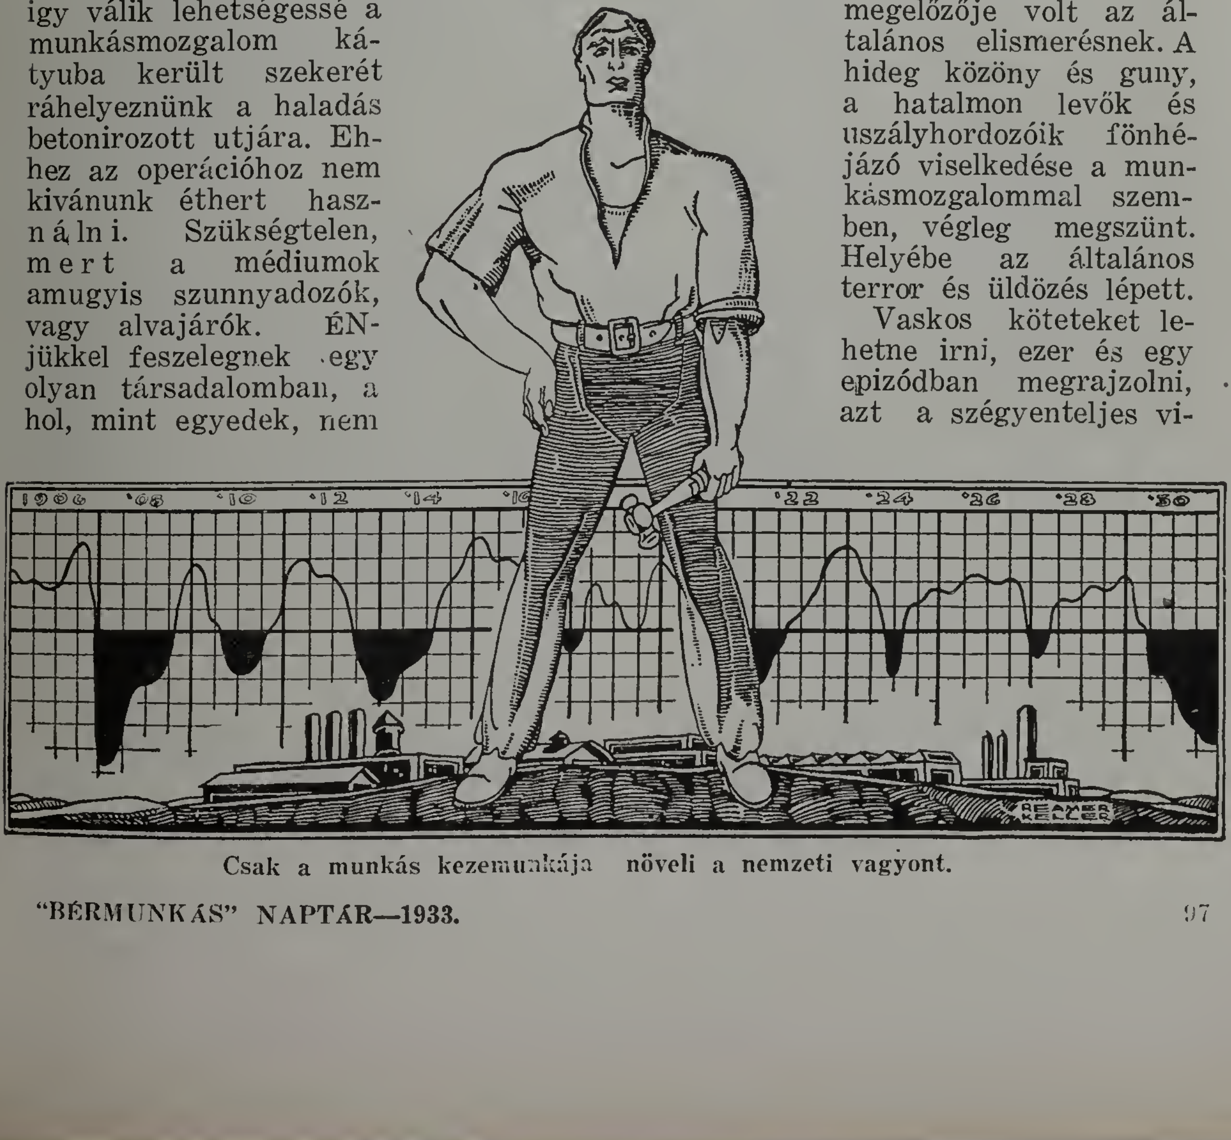
Jönnek a megokolások, melyeknek valamennyije egy kaptafára készült. Sablonos egyformaság, a polgári társadalom lagymatag, semmitmondó hipokratizmusa. A tenni-nem-akarás, a gyávaság palástolása egyik szélségtől a másikig. Az ugynevezett elveket valló emberektől egészen az elvtelenekig, avagy megforditva.

A haladásnak ezt a Verdun-ját el kell takaritanunk utunkból, mert csak igy válik lehetségessé a munkásmozgalom kátyuba került szekerét ráhelyeznünk a haladás betonirozott utjára. Ehhez az operációhoz nem kivánunk éthert használni. Szükségtelen, mert a médiumok amugyis szunnyadozók, vagy alvajárók. ÉN-jükkel feszelegnek egy olyan társadalomban, a hol, mint egyedek, nem csak hogy semmi szerephez nem jutnak, de könyörtelenül felmorzsolódnak.

Évtizedes munkálkodásunk alatt gyüjtött tapasztalatunk albumában lapozgatva, jött tollhegyre ez a téma. Irnunk kellene valamit: maradandót, hasznosat, a közért, mindannyiunk okulására. Olyasféle leltározást késziteni, évvégi beszámolót, mely egyben utmutatóul is szolgál jövő cselekvéseinkben, a mozgalom épitésénél. Mert erről van szó. Minket, forradalmárokat, elsősorban és mindenek fölött, a munkásmozgalom haladása érdekel.

Könnyebb megértés szempontjából elsősorban azt kell megállapitanunk, hogy az ugynevezett fegyverszünet aláirásával, a munkásmozgalom második fázisa vette kezdetét. A munkásmozgalom, mint olyan, végleg beléhelyezkedett a köztudatba: befejezte az irtózatos és áldozatos küzdelmet, mely megelőzője volt az általános elismerésnek. A hideg közöny és guny, a hatalmon levők és uszályhordozóik fönhéjázó viselkedése a munkásmozgalommal szemben, végleg megszünt. Helyébe az általános terror és üldözés lépett.

Vaskos köteteket lehetne irni, ezer és egy epizódban megrajzolni, azt a szégyenteljes vi-



Csak a munkás kezemunkája növeli a nemzeti vagyont.

selkedést, melyet a kapitalista nevelés következtében a munkásság, a munkásmozgalommal és a pionér agitátorokkal szemben tanusitott. Egyik az istenét, másik a vallását, templomát, a harmadik a nemlétező házát és vagyonát, mit és mit nem féltett a feltörekvő munkásmozgalomtól. A tudatlanabbak, a kézzelfogható anyagiasságokat; a tudálékosak pedig "gyönyörü" kulturánk, "szeplőtlen" erkölcsünk, házassági intézményünk; az egyéni érvényesülés lehetőségeinek védelmezőiként, mint megannyi fonográf lemezek próbáltak szembeszállni, hadakozni a szocializmussal.

E téren nincsen kivétel: a tudatlanság rengetegében a tudással felszerelt forradalmár egyforma ellentétre talált. Legfeljebb annyi mégis van, hogy amig a magyarok a magyar agitátorokat megbicskázták, addig az amerikaiak ököllel és lincseléssel intézték el. Európában a rendőrkard, csendőrszurony, golyó és puskatus; Amerikában gumibot, forró szurok és kozákgolyó. Frame-up és börtön. Az amerikai munkásmozgalom pionér idejéből örök emlékezetemben maradt egy gunyolódó vicc, amellyel a nyárspolgárok a szocialista "osztozkodást" szokták karakterizálni.

Schenectady városkában, Lun (szocialista) polgármester másodszori meg választásáért heves kampány folyt. Itt hallottam a következőket:

"Hát mi is az a szocializmus? Mit akarnak azok a szocialisták? — kérdi (gazdám) a farmer, egy városban lakó rokonától, aki egyébként a General Electric Co. főpénztárosát személyesitette meg. — "Well, hogy mi a szo-
— "Beszélget két olasz munkásember;
ci-aliz-mus? Hát, kedves barátom, ez: — mondja a pay master vontatottan az egyik szocialista, a másik nem. És mondd, te igazán megosztanál velem mindent, amiből neked kettő van? — Igen — mondja a szocialista. — Hát ...... ha két házad volna, nekem adnád az egyiket? — Igen — volt a felelet. — Hát ha két telked volna, nekem adnád az egyiket? — Igen — volt a felelet. — Hát ha két kecskéd volna, nekem adnád az egyiket? — kiváncsiskodik tovább az egyik olasz. De a másik, a szocialista, megvakarja a fejét és pirultam mondja: — Nem, azt már nem, mert hiszen van két kecském......"

Természetes, hogy az iparok társadalmasitásának elmélete körül ma is élénk viták folynak. Taktikai eltérések vannak a párt-szocialisták és az ipari unionisták fölfogása között. De a tudatlanság kérgét mégis csak sikerült annyira feltörni, hogy az átlagos munkás ma már meg tudja különböztetni az iparokat két kecskétől, vagy két pár lyukas cipőtől.

E köztudatba helyezett felismerőképesség határozza meg éles vonallal a munkásmozgalom első fázisát, illetve annak befejezését. A kisebb-nagyobb méreteket öltő bér-osztályharcok szele egyszer-másszor már megcsapta az amerikai munkások nagy többségét, de különösképen azon részét, amelyek az alap- és nehéziparokban nyertek munkakört. Bár ha ezzel korántsem kivánjuk azt állitani, hogy a tudományos szocializmus bölcseletével jött tisztába az amerikai munkásság. De teljes határozottsággal merjük kinyilatkoztatni, hogy a nagy átlag és épeszü bérmunkásnak alig van ellenvetése és ha az agitátorral szemtől-szembe kerül, elismeri a szervezkedés, a munkásmozgalom szükségességét, annak helyes voltát.

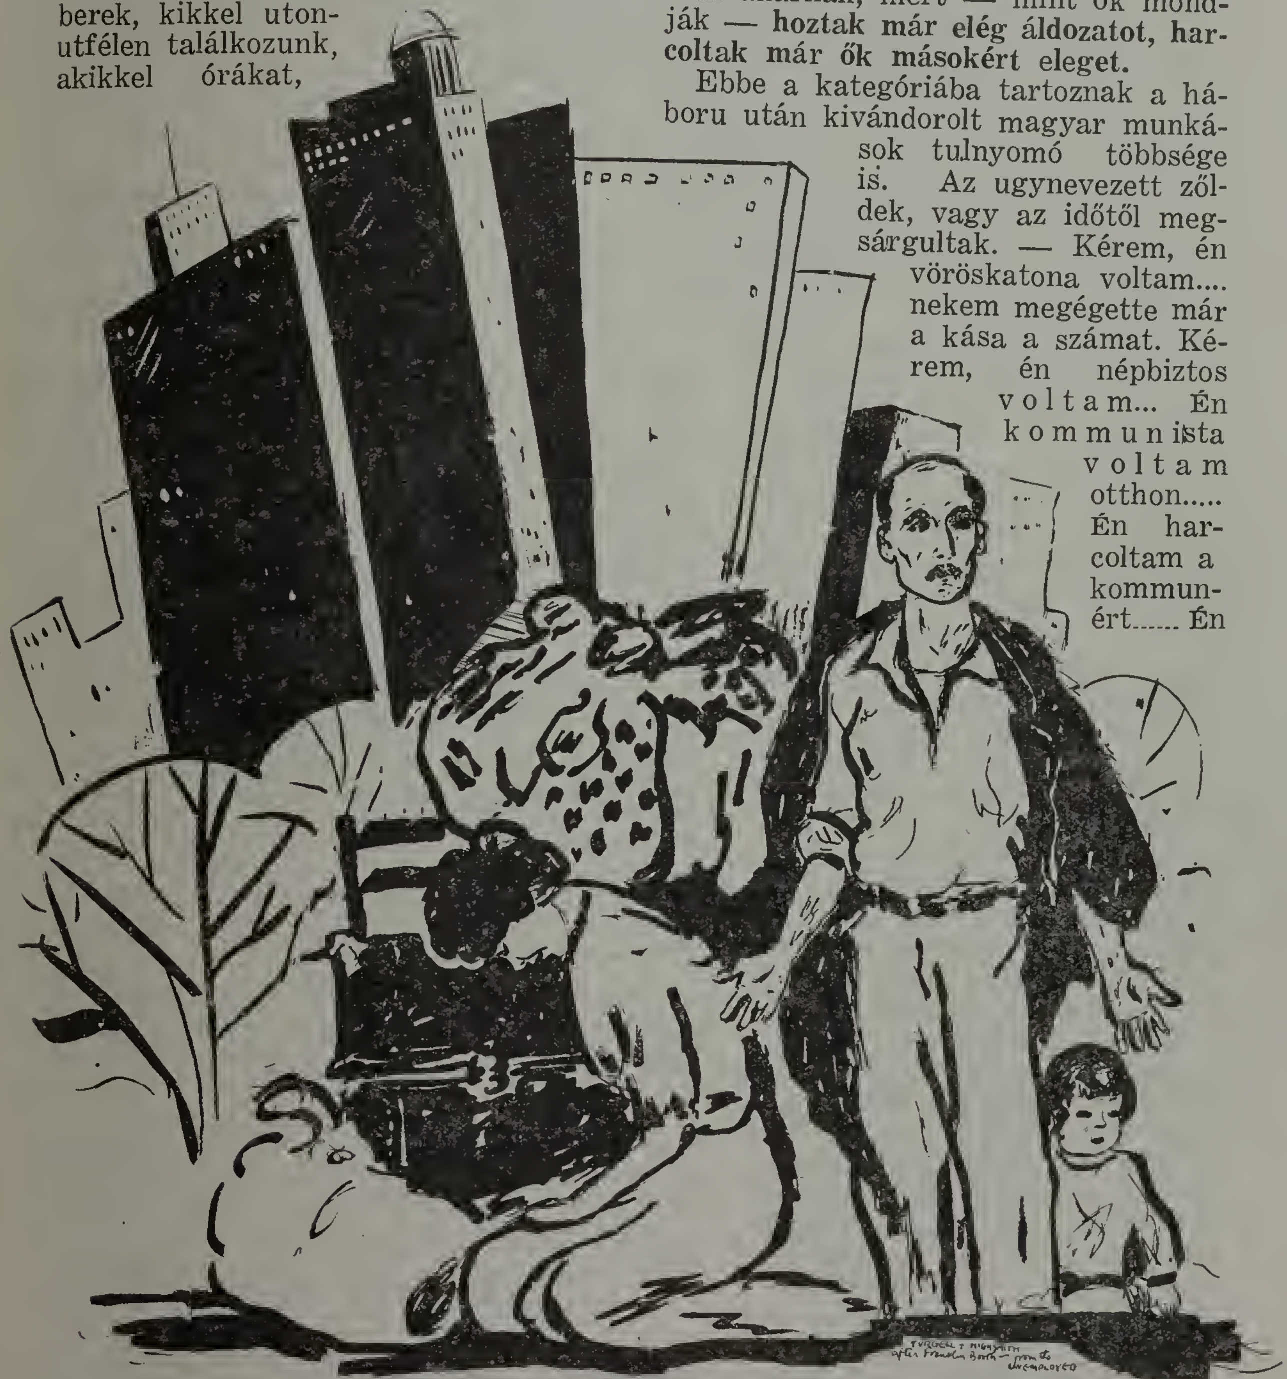
Itt önmagától vetődik föl a kérdés: miért van akkor ilyen megdöbbentően gyönge állapotban a munkásmozgalom szerte a világon? Hiszen, ha az eddigi megállapitásunk helyes — és határozottan az — akkor éppen az ellenkező helyzetnek kellett volna bekövetkezni. Mielőtt e kérdést megválaszolnánk, vagy pszichológilag elemeznénk, jó lesz ugy magunk között egy kis seregszemlét tartani.

Nehéz volna számot adni arról, hogy hányan vannak olyanok, kik rövidebb-hosszabb müködés után kimaradtak a mozgalomból, önmagukat megtagadták, de osztályukat nem, mert hiszen megmaradtak a munkásosztály tagjainak. A távolmaradásnak számos oka és indoka lehet. Nem ritkán a személyi surlódás, viszálykodás.

Az ilyesmi azonban nem tartós. Mert az osztályöntudat nem ruhanemü, amit cserélni, avagy eldobni lehet. Az ilyen elmaradások tehát nem jelentenek veszteséget, sem a mozgalom gyöngülését, mert csak ideiglenesek, átmenetiek.

Ellenben más elbirálás alá kerülnek azok a munkásemberek, kikkel utonutfélen találkozunk, akikkel órákat, napokat, heteket, sőt hónapokat is elbibelődünk — minden eredmény nélkül. Akik mindent "tudnak", akik minden szónokot "ismernek". Akik a különböző elméletekkel "tisztában" vannak, de...... a lapot nem hajlandók előfizetni, a védelmet nem hajlandók támogatni, tagokká válni és tenni nem akarnak, mert — mint ők mondják — **hoztak már elég áldozatot, harcoltak már ők másokért eleget.**

Ebbe a kategóriába tartoznak a háboru után kivándorolt magyar munkások tulnyomó többsége is. Az ugynevezett zöldek, vagy az időtől megsárgultak. — Kérem, én vöröskatona voltam.... nekem megégette már a kása a számat. Kérem, én népbiztos voltam... Én kommunista voltam otthon..... Én harcoltam a kommunért...... Én



"Mindent mi épitünk — semmink nincs de mindent megszerezhetünk a szervezkedéssel."

segitettem az orosz forradalom megvivásában...... Kérem, én ezt, kérem, én azt, meg amazt csináltam, de kérem, itt nem teszek, nem tehetek semmit... Nekem elég volt odaát mindig csak másokért verekedni......

Hát, kérem ide, kérem oda, tetszik avagy nem, de mi ugy a kéremezőket, mint azokat, "akik már olyan sokat harcoltak másokért", gyáváknak és gerincteleneknek tekintjük. Tudatlan dilettánsoknak, kik annyit sem tudtak megtanulni, hogy sem sokat, sem pedig eleget tenni a munkásmozgalomban nem másokért, hanem önmagunkért, osztályunkért, a munkásosztályért harcolunk. A munkásosztálynak pöffeszkedő, hencegő, gyáva, zsugori, egoista mártirjai nincsenek. Mártirjaink egy része emlékként a munkás otthonok falain csüng, a másik a börtönökben köpi a tüdejét. De kint......? Hát aki önmagáról ilyesmit állit, azt egy specialistához kell vinni, kérem.

Mint emlitettük volt, hosszu, nehéz és göröngyös utján eljutott a munkásmozgalom odáig, hogy helyes voltát a munkások széles rétege elismeri. Leküzdötte az ellenszenvet, az ellenvetés fegyverét kiütötte az épelméjü és jóakaratu munkás kezéből. A tudományos szocializmus mély, kiirthatatlan gyökeret eresztett maga alá és tartogathat számára bármit is a jövő, állni fogja a sarat az erjedő társadalmi viharokban, mint az uj társadalom alap-bölcselete.

Midőn azonban a szocializmusról, mint társadalmi tudományról beszélünk, nem szabad összetévesztenünk az elméletet a párt-szocialistákkal, vagy a politikai pártokkal, melyekkel foglalkozni ezen cikk keretében nem kivánunk. Megemlitésük csupán azért szükséges, mert **állitólag** azért nem szervezkedik nagyobb arányokban a munkásság, mert sok a párt és sokféle az ugynevezett munkásszervezet.

A munkásmozgalom fejlődésének és kialakulásának második periódusával kapcsolódik egybe ez az okoskodás, mely éppen ugy, mint a vad gyülölet és az ellenszenv, a kapitalista nevelés, illetve butitás következménye. A megfélemlités propagandájának az eredménye. Tudatlanság 's kishitüség a melegágya. A fegyverszünet utáni általános üldözésnek a terméke, csak kibuvásra alkalmas. Vagy ugy is mondhatjuk, hogy a gyávaságnak egy másik formában való jelentkezése.

Azok a munkások, akik a munkásmozgalomtól való távolmaradásukat, a sokfajta szervezetre való hivatkozással indokolják meg — egyiket sem ismerik. Ők legföljebb csak próbáltak

MIK VAGYUNK MI?

Mik vagyunk mi, férgei a földnek?......
Elneveztek minket csőcseléknek.
Eltiporva, sanyargatva élünk,
Nincsen jogunk nem szabad beszélnünk......
Ajkaink ne nyiljanak panaszra,
Ha sanyargat a gőgös mihaszna,
Kebleinkből ne törjön ki jajjunk,
Ha családunkkal együtt éhezünk, koplalunk.

Nézitek a gőgös, gazdag urat,
Ő is nézi a munkát, mikor arat.
Elveri azt gaz könnyelmüséggel
Mit ez teremt véres veritékkel.
Mig az, aki az élelmet megszerzi
Koplal, mert hisz nincs neki mit enni......
Addig a sok bünös haszonleső
Kéjjel mulat, hogy teljék az idő........

Ó, a hitvány, nyomorult pária,
Hisz neki az élethez nincs joga.
Nem is az az isten teremtette
Nem a szabad' emberek istene,
Hanem az eltipró Zsarnokság alkotta
Hogy legyen értelmes, de aljas szolgája........
Hogy az egyik: éltét henyélve tölthesse
Nem átall másikat megalázni érte

A pap is csak azért tanit imádkozni,
Hogy ő a dologtól tudjon szabadulni......
Az isten nevével csupán azért fenyit,
Mert azzal keresi füszeres kenyerét......
És amikor az embert egyenlőnek mondja —
Hazudik, mert akkor nem lehetne szolga......
Csal, amikor mondja, hogy adj a szegénynek,
Mert a szegénytől csal bálvány istenenknek........

És amig templomokra áldoz milliókat,
Addig lakás nélkül hagy sok nyomorultat —
Oszd meg a szegénnyel amid van, tanitja,
Ő meg a szegénytől is elkaparintja
Dolgozzatok, ugymond, és imádkozzatok......

a kényszer hatása alatt, de még nem tanultak meg önmagukért harcolni, még nem ébredtek osztálytudatra, mely röviden abból áll, hogy fölismertük társadalmunkban két ellentétes osztály létezését és azt, hogy mi a munkásosztályhoz tartozunk. Hogy jóban-rosszban össze kell tartanunk, mert a zsarnokság leigáz, megaláz, kizsákmányol bennünket és ha már nincs ránk szüksége, eldob, mint egy kifacsart citromot.

De azért mi csak türelmetlenkedjünk tovább. Legyünk elkeseredettek még akkor is, ha tudjuk analizálni, önmagunknak megmagyarázni az okokat, amiért nem erősödünk, fejlődünk gyorsabb tempóban, nem gyarapodik táborunk. Ilyennek kell lenni. Elégedetleneknek. Az öntudatos munkások forradalmi tábora az elégedetlenek szervezte. Azért tömörülünk Ipari Szervezetekbe, mert unjuk a szolgaságot. És hangsulyozzuk ki nyomatékosan, hogy: **nem azért, mert mások unják.**

Azért szervezkedünk, mert a kizsákmányolás ostorcsapásai alatt felismertük s megtanultuk, hogy a szervezett kapitalizmussal szemben, mint egyedek, elveszünk, elpusztulunk, idő előtt összeroskadunk a terhek alatt Mert felismertük, hogy egymásra vagyunk utalva. Mert a társadalmasitott termelés és a részmunkák végzése megtanitott bennünket az együttmüködésre. Mert a mind gyakrabban megismétlődő és huzamosabb ideig tartó munkanélküliség érezteti velünk, hogy egyedül nem számitunk, sőt immár csoportokban sem.

A munkásosztály egy tekintélyes, számottevő részének szervezett erejére van szükség ahhoz, hogy a mai állapotokat megváltoztassuk, hogy önmagunknak és családunknak jólétét és boldogulását biztositsuk. Ezért a csekélységért az előharcosoknak rendőrbot, börtön és gyilok a jutalom a tőkések részéről.

De ez már igy volt tavaly is és igy volt ez még ezer évekkel ezelőtt is.

És aki fél a viztől, az ne ugorjék bele, várjon, mig beletaszitják.

Annyi bizonyos, hogy egyre jobban és jobban siklik a föld a munkásnép alatt és ha azt a szervezkedésével alá nem támassza, menthetetlenül az özönviz módjára pusztul el, ugy, hogy még kimondója sem marad. Ezt ölbetett kézzel csak a gyávák várják be, az öntudatos proletárok gyüjtik erejüket az Egy Nagy Szervezetbe, hogy e társadalmi átalakulást, a munkások szabad és boldog rendszerévé vezessék le.

L. HORVÁTH

ő csak imádkozik — a dolog maradhat,
Böjtöt szab másokra, hogy "bünüket" bánják,
ő meg ötször-hatszor váltatja tányérját......

S ahelyett, hogy isten remekét mivelné,
Az emberi nemet egyenlővé tenné
Világositaná agyát a butának
Felelne igy meg az ő föladatának —:
Gyóntat, butit, ahol csak szerét teheti,
Fenyeget pokollal, az istent emlegeti........
És amit az isten remeknek teremtett —
Aljas gaz szemétté butitja az embert........

Avagy talán aki biborban született
Nyerhet az istennél csupán becsületet......?
S akit a szegénység bélyeggel jelezett
Csupán szolgatartó ur zsoldosa lehet......?
Akkor a mindenség, a meny és a pokol
Istenséget benne nem találunk sehol......
Mert mig ezt a nagyság ördöge furdalja,
Amazt az irigység ellene sarkalja......

De hogyha egy istent hinne minden ember
És a bálványokat ellökné — neki az nem kell!
Nem kellene fegyver, amivel gyilkoljunk,
Meg lenne kimélve életünk, fájdalmunk......
Dolgozni, szeretni — mindeniknek mindet:
Szeretni az embert...... emberben az istent......
Dolgozzon hát, aki ember akar lenni
s ne tartson szolgát itt e földön senki......!

És a hitre, amit a papok tanitanak
Ne hallgasson senki, mert bálványt imádnak.
Magukat nevezik isten szolgájának......
Nem lehet az isten, akit ők szolgálnak,
Óh, mert az istenség egy fenséges eszme —
A szolgaság meg az istenség ördöge......!

Dolgozz tehát! S tanulj, hogy megismerd magad!
Benned van az isten, ember — csak ne tagadd!
(Detroit, Mich.)

Az uj csillagon

THYMAR

SZÓVAL utópisztikus regény? — kérdezte a szocialista lap szerkesztője és homlokára tolta föl a szemüvegét.

A fiatal iró lámpalázzal küzdve nézett erre a gondszántá arcra, amely magán viselte annak a mélyről jött utnak minden fáradságát, amelyen át a gazdája följutott a megismerés magasságában. A magaslatra, ahol az öntudatosság gránitkockából hordott erőditményében az osztályharc vezérkara figyeli és irányitja a jövendő hadoszlopait.

A fiatal iró nem tudott megszabadulni attól a gondolattól, hogy a redős homlokon csillogó két üvegprizma valami agyvelő-szemüveg, amin keresztül ez a törékenynek látszó, de az élet minden viharával és forgandóságával szemben törhetetlenül szilárd ember az ő gondolatait fürkészi.

Határozottan zavarban volt, mert eszébe jutott néhány irása, amelyeket ő maga is szeretett volna meg nem történtnek venni. De aztán — ahogy ez az uj világszemléletre ébredte óta még mindig gyakran történt meg vele — eszébe jutott a biblia példázata az elveszett és megkerült bárányról, melynek szerfölött örül a gazdája.

— Igen — igy erősitgette tétovázó bátortalanságát —, én, aki sötétségben nevelkedtem s nem a magam hibájából kaptam meghamisitott világképet: én már ismerem az emberiség igazi világosságának a napját és ez az uj s örökkévaló égitest termel ki ezentul belőlem minden szellemi gyümölcsöt, ami a gondolat ágyékából megfogant agyamban és ezeket az üditő, erősitő gyümölcsöket fogja ezentul a tikkadt és uj életre szomjas emberek asztalára tenni a kezem.

Büszkén és eltökélten szoritotta meg szikár kezével a vaskos kézirat-nyalábot, amellyel szemben egy pillanattal előbb még sulyos aggályai voltak.

Aggályai, hogy vajjon csakugyan olyan emberi irás-e ez az ő uj regénye, aminő a Kutató Sámuel vagy Az ács fia és mindaz a remekmü, amelyekből semmi megemészthetetlen üledék nem marad vissza, akár komplikált gondolatvilágu tudós, akár az élet együgyü és sötétben hagyott mostohagyermeke issza az igazság forrásvizét belőlük.

Ugy érezte, hogy bátran, a megalkuvások hinárjától megtisztultan, a jövendőre szegezett szemmel mondott el ebben a regényében minden gáncsot a mai élet borzalmairól s nem kell szégyenkeznie a rangsor miatt, amit a jobb és emberibb jövőt keresők harccsapatában szerez majd ezzel az irásával.

— Szóval utópisztikus regény? — ismételte meg kérdését a szerkesztő s aztán jóindulatuan tette hozzá: — Igaz, hogy H. G. Wells után kissé bajos olyant mondani ezen a téren, ami kibirja a kritikát és főként az összehasonlitást. De lehet, hogy magának sikerült. Lehet, mondom, mert tehetségesnek tartom, bár kissé még gyakorlatlanul mozog a mi világunkban.

— Biztosithatom, elvtárs, hogy ez egy egész bátorhangu, mindent a maga nevén megnevező irás. Cime: Az uj csillagon.

— El fogom olvasni és örülni fogok, ha közölhetem. Milyen korszakban játszódik le a maga története?

— Az uj csillagon.

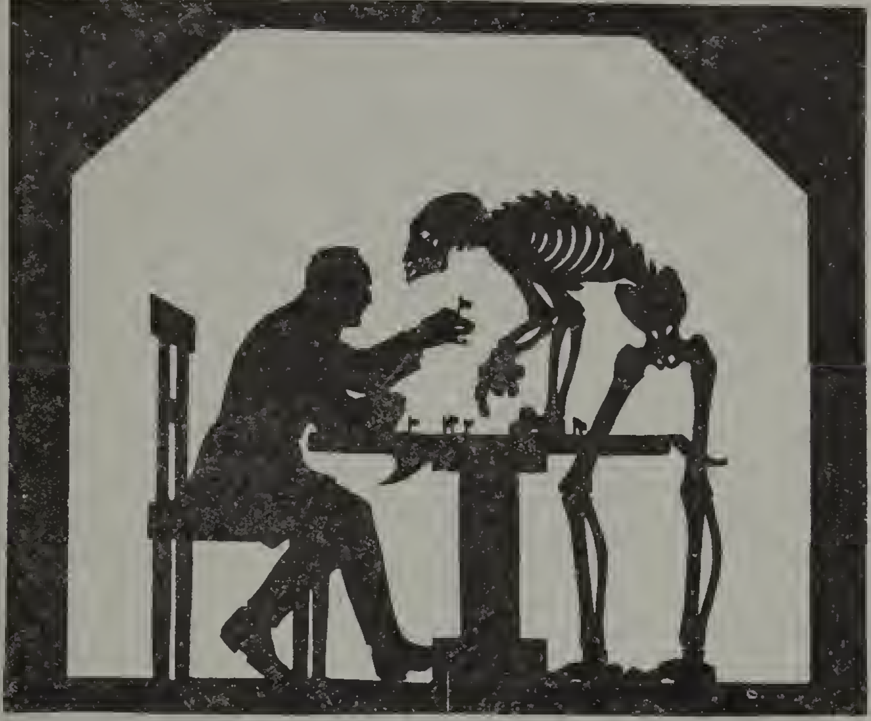
— Szóval jó hosszu idő mulva......?

— Eltalálta. Abban a korban, amikor a földet ki kell üriteni, mert az emberfajta számára lakhatatlanná vált. Az első rész......

— ......a kiüritésről szól — vágott közbe a szerkesztő — s a második rész, ha nem csalódom, az uj csillagon az uj emberi társadalom berendezkedéséről...... Ha vannak emberi mondanivalói erről a kérdésről, nagyon érdekes lehet ez a regény.

— Remélem, hogy az is, elvtárs.

— Azt akartam mondani önnek, hogy hagyja itt a kéziratot és jöjjön két hét mulva, de most azt mondom, hogy látogasson meg holnap. Még ma



Tervszerüen határozza meg a militarizmus a nép fiainak csoportos pusztitását a demokrácia nevében.

éjjel elolvasom a regényét. Izgatja a fantáziámat.

A fiatal iró boldogan rázta meg a szerkesztő kezét s az egész világot magához ölelő érzés fanfárján harsonázta:

— Barátság!

— Barátság s a holnapi viszontlátásra.

A szerkesztő fáradtan ment haza éjszakai robotjából. Lefeküdt, nyujtózkodva megropogtatta csontjait, aztán rágyujtott egy cigarettára, fölhuzta a térdét a paplan alatt, nekitámasztotta a vaskos kéziratköteget és olvasni kezdett. És olvasott...... olvasott...... olvasott......

A cigarettahamu halomba gyült az éjjeliszekrény réztálcikáján, a roló résein a fekete vonalak opálosra, majd ragyogó világosra festődtek át; az első villamoskocsi nyüszitve és csilingelve kanyarodott be az ablakai alatt az utcasarkon, tejesszekerek zötyögtek, a bádogkannák harsány csörömpölését görditve tova.

Végre a regény utolsó mondatát is elolvasta. Valósággal lázban volt. Az érdekes bonyodalmu, bátor regény valami hipnózis varázslatával töltötte meg.

Alig birt kibontakozni a gigászi perspektivából, amelyet a tudomány mindent legyőző fejlődésének korszakában bonyolódó, fantasztikus történet nyitott meg a szemei előtt.

— Keménykötésü ez a kölyök........ Van fantáziája és van mersze, hogy ezt a fantáziát röpülni hagyja...... És mégis...... mégis ez a vakság...... Hiába! Az árvaház, a mühely és a tömeglakások sokszögletü világát kell ismernie annak, aki egy igazi proletárregényt mer végigálmodni...... De majd kinyitom a szemét! Ki én, mert lehet belőle faragni valamit, ha megtanulja a mi ábécénket.

— Nos, tetszett?

— El vagyok tőle ragadtatva......

— Ugye, az a részlet, amikor a kapitalisták nagytanácsa elhatározza, hogy ugy menekül a kihülő bolygóról, hogy az elégedetlen tömegeket cserbenhagyja a halálraitélt földön.

— Igen, ez pompás képe a mai tőkés erkölcsnek. Hiszen ma is külön világban élnek és hekuba nekik a nyomoruságnak az a másik világa, amelyen a tömegek szenvednek.

És az intellektulek rajza? Azé a százezeré, akiket a tizezer tőkés magával visz az uj csillagra az ő rakétahajóraján, hogy legyen, aki kényelmesre párnázza az ő uj csillagukat az ő drágalátos és kiváltságos lényük számára. Ugye, nagyszerüen van megirva, hogyan lázadnak föl az uj gulaépitők rabszolgaságuk ellen. A mérnök, kinek acélt kell öntenie és pörölyt forgatnia, a vegyész, aki maltert keverni kényszerül a gazdagok uj palotái számára az uj csillagon s a trösztbárók egész sleppje, amelynek őserdőt kell irtania, a fegyveresek, akik sosem látott uj állatszörnyetegekkel kénytelenek hadat viselni, behemótok ellen, amelyeknek páncélirhájáról visszapattan a robbanó golyó s amelyek ugy tapossák el a tankokat, mint holmi szardiniásdobozt.

— Igen. Ebben van lendület és életigazság is. Ez az uj munkásrend — mert hiszen a földgolyót evakuáló tőkések azzá akarják őket nyomoritani — nem türi, hogy rabszolgákká deklasszifikálják őket, amikor hajcsárok voltak eddig.

— És a befejezés?

— Amikor az uj csillag rakétaflottái utrakelnek, hogy fölhozzák az uj csillagra a földön cserbenhagyott munkások millióit, akik nélkül ők, a kiválasztottak nem élhetik régi, kényelmes, kiváltságos hereéletüket?...... Igen, ez is szinesen és vizionáriusan van megirva...... Csak azt nem értem, fiatal barátom, akinek le vagyok kötelezve, mert néhány órán át a kedvem szerint és jól elszórakoztatott, csak azt nem értem, hogy aki ilyen pompásan látja a társadalmi forrongások nagy szinjátékát, hogy lehet annyira vak, mint egy vakablak........

— Hogy én...... hogy ugy gondolja, hogy vak vagyok?

— De vak ám...... és nem tudja megitélni a fejlődés tempóját sem...... Főként az időpont körül van hiba...... De ez persze a regényben valami előre nem látott, de hirtelen az események előterébe lépő katasztrófa beiktatásával áthidalható.

— Nem értem önt, szerkesztő elvtárs......

— Pedig igazán egyszerü, amit mondok. Mindez, amit megjósol ebben az érdekes regényben, nagyon könnyen bekövetkezhetik, de nem kétszázezer év mulva.

— Miért nem akkor?

— Hát csak nem képzeli, hogy kétszázezer év mulva még a kapitalista világrend nyomoritja az emberiséget. Ha ismerné a fejlődés menetét, akkor tudná......

— Mit tudnék, szerkesztő elvtárs?

— Azt, fiatal barátom, hogy a földön történő átalakulást, a kapitalista termelőmód katasztrófáját sokkal közelebb kell helyeznie a mai napokhoz, hogy Az uj csillagon cimü utópiája valószinü legyen.

— Közelebb? S mennyivel közelebb?

— Mondjuk: 1950-re.

— Tizenkét évnyire a mához?

— Igen — fejezte be irodalmi tanácsát a szocialista lapszerkesztő — és azt hiszem, már ezzel is bőkezü voltam. A problémák megfejtése ennyi időt is bajosan várhat...... De ha a kozmikus katasztrófát elhihetően be tudja állitani holnaputánra a regénybe, a rakétahajók akkorára már megoldódott problémája nem fogja hátráltatni azt, hogy az uj csillag uj lehetőségeire kényszerülő, de akkorára már minden társadalmi problémáját megoldott emberiség átrepülhessen az uj csillagra, ahol a régi életet éppoly kevéssé lehet folytatni, mint ahogy az sokáig nem folytatható az öreg földgolyóbison sem...... Szóval egy kicsit át kell irni a regényét, kedves fiam.

A fiatal iró nagy zavarban volt és fogadkozott, hogy majd megpróbálja. Mindenesetre már holnap hozzáfog.

ELISMERÉSÜNK mindazoknak, akik Naptárunk megjelentetéséhez munkájukkal hozzájárultak.

Külön emlitjük meg EGRI KÁROLYT, a Naptár boriték lapjának a rajzolóját, ugyszintén KATONA PÁLT, aki ügyes elgondolásában rajzban ad kifejezést a politikai fellegvár tarthatatlanságának a szervezett munkaerő idejében.

A Naptár többi rajzait a New Yorkban megjelenő NEW LEADER szivességéből volt alkalmunk használni.

EGRI LAJOS, az amerikai proletár-költő, ezuttal is gazdagitja Naptárunkat több versével és egy allegorikus elbeszélésével.

Magunk csak forradalmi kötelességet teljesitünk a Bérmunkás Naptárának az összeállitásával és az amerikai magyar munkások közötti elterjesztésével.

A BÉRMUNKÁS LAPBIZOTTSÁGA

Jegyzetek egy naplóból

EDE EMIL

HAVAS és esős márciusi nap volt. Vakitóan fehérlett a Montegrappa hófedte csucsa és a völgyet hóval vegyült eső látogatta meg. Fáradtan, lucskosan és sárosan pillantottam meg e festői tájat abban az időben, midőn az őrület tombolt, midőn az embereket, mint akaratnélküli állatokat egy láthatalan hatalom az ágyutüzek robajába kényszeritett. Mert háboru volt s én, mint halálba dobott áldozat, katonaruhában voltam. Arzéba érkezett ezredünk. Midőn e kis városkának utcáiba értünk, érezni lehetett, hogy előttünk voltak már olyan emberek ott, mint mi vagyunk, vagyis, katonák. Kirabolt üzletek, égő házak s az utcákon félelem-akkordba törő állatok mindazt bizonyitották, hogy már itt is voltak olyan emberek, mint mi vagyunk. A városka lakói, az ugynevezett civilek, a házaknak négy fala közé szorulva sirva s a félelemtől halálraváltan várták és fogadták megjelenésünket. Vajjon mit hoztunk mi? Megváltást, vagy ujabb poklot? Mit hozhattunk mi az ittmaradt civilekre? Elég, ha azzal válaszolok: katonák voltunk. De mit akarnak itt a civilek? Itt, ahol a katonáknak brutalitása tombol, itt, ahol az ágyuk és bombák a felsőbb akaratnak engedelmeskedve temetnek házakat, sikoltó nőket és csecsszopó gyermekeket. Miért türik végig e kalváriát, ahol minden pillanatban a bombák karjai marhatják szét testüket? Miért nem menekültek a távozó katonákkal? Menekültek is, de ezek itt maradtak. Ezeknek mindegy, hisz gyermekek még, vagy nagyon vének, akik itt maradtak; s kik itt maradtak anyák, gyermekek és vének: szegények, proletárok, akiknek családföntartójukat állami ruhába bujtatták s valahol, tán éppen most éri őket a golyó-halál. Egy kiáltás szorongatta torkomat: proletárnak mindegy, ha ágyu bömböl, vagy ha békés napokban korbácsütésektől hullnak el. Éreznem kellett ekkor, hogy azon érv, mely e civileket itt marasztalta, nem volt más, mint a nincstelenség, mint a nyomor. Felsőbb osztályok szülöttjeiből ma már nincs e városkában senki és akik itt maradtak, azok az alsóbb rétegből valók.

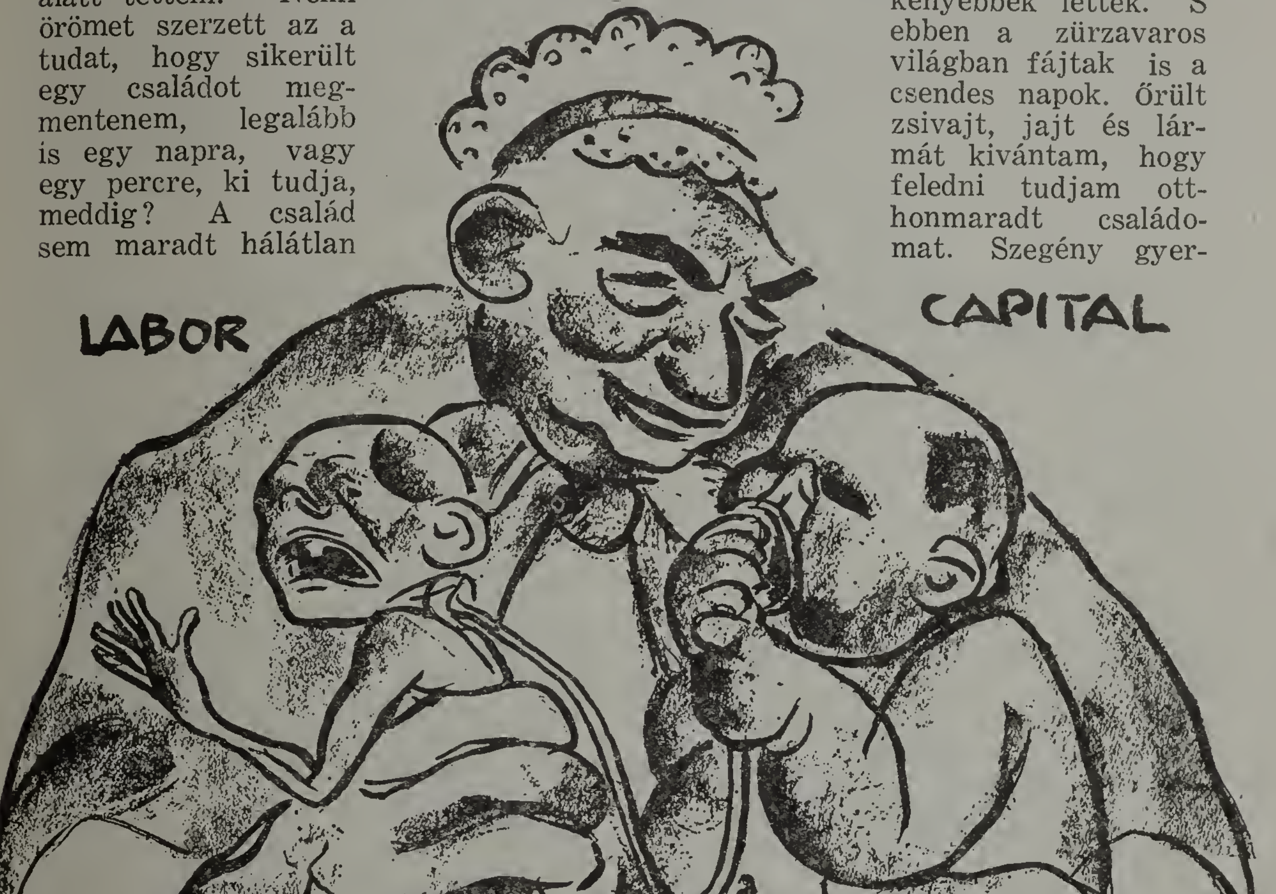
E napon nem sok elmélkedni való időm volt, inkább az elszállásolás teendői foglaltak el. Az elszállásolás nemsokára meg is történt, mint ahogyan az már a katonáéknál könnyen megy. Egy félemeletes házban osztottak be. A szoba, melybe többedmagammmal kerültem, az emeleten volt. Egyébként is csak az emeleten lehetett lakni, mivel a háznak földszintjén istálló foglalt helyet még békeidőben is. A szoba teljesen üres volt, kivéve azt a törött villanytartót, amely egy drótszálon lógott a mennyezet közepén. Legelső dolgunk az volt, hogy fekhelyet készitsünk, jobban mondva szalmát szerezzünk. Azonban ez nem sikerült olyan könnyen, mint azt elképzeltük, mivel e vidéken még a szalmának is busás ára van, éppen ugy a szőllővenyigének is, mivel a vidéken ezzel tüzelnek. Tüzelésről szó sem lehetett, mivel egy szegényebb házba kerültem, ahol kályha vagy más tüzhely nem volt, csupán a konyhában volt a szabad kémény, melynek közepén egy lánc lógott, melyre annak idején réz főzőedényeket akasztottak. Hogy maga a ház milyen állapotban volt, azt nem is kell leirnom. Egyébként az ott maradt emberek jobban érdekelnek, mint maga a ház. Ugyanebben a házban, vagyis, a szobámmal átellenben egy kisebb család huzódott meg, három gyermek, egy nő és egy hetvenéves aggastyán. A családfő katona volt, még hozzá ő is fronton, éppugy, mint én, azzal a különbséggel, hogy ő az ugynevezett ellentáborban volt. Mindegy: olasz, osztrák, vagy magyar katona-e az illető, éppen ugy szállitották el őt is a halálba, a gépfegyver, vagy az aknavető elé, mint engem. Az én szemszögemből nézve, őt is halálraitélték, mint engem, mint százunkat. A hadvezetőség szemüvegén nézve azonban az itt maradt családot, mint ellenség családját tekintették, jobban mondva, nem csak ez az egy család, hanem a városban maradt minden élő civil — ellenség volt s ezzel megbélyegezték sorsukat. Ellenség és készen van. Hogy mennyit jelentett az ottmaradottakra e szó, azt később látni fogjuk.

Vészjelzés a katona-őrhelyről

Őrült kapkodás, eszeveszett lótásfutás tört ki közöttünk. Vészjelzés a jelen pillanatban repülő, gáz vagy egyszerü bombatámadást jelenthetett. Az óvatosság szempontjából társaim a gázmaszkot igyekeztek fejükre erősiteni. Én mint katona, szintén ilyen védszerrel voltam ellátva, magam is őrült kapkodással huztam fejemre ezt a halál-elleni orvosságot. Alig mult el egy pár pillanat és már én is rohantam a lépcsókön lefelé, hogy a vészjelzés okát megtudjam. Nem messzire kellett mennem a háztól, már is robbantak a röpülőről ledobott gázbombák. Most már tisztán láthattam, hogy a vészjelzés oka gáztámadás volt. Sötét utcán álltam, nem sok időm volt gondolkozni, máskülönben ez oly hétköznapi dolog volt előttem, hogy ügyet se vetettem rá. Azonban fedezék után kellett néznem, vagy pedig menekülnöm erről a helyről. Hát mit? Gázzal lőnek? Ölő gázzal? E e pillanatban villámcsapásként érintett egy gondolat: meneküljek innen? Hisz ezt megtehetem. Hisz nem messzire kell futnom, hogy kiérjek e városkából valami szikla alá, ahol a bombák robbanása nem árthat annyira. Meneküljek? Ölő gáz......! S agyam őrülten tombol...... Ölő gáz...... Három gyermek, egy s egy aggastyán......! Őrület! Ölő gáz...... Nem! Nem lehet, hogy elpusztuljanak......! Őrült gyorsasággal rohantam föl ugyanazon lépcsőn, melyen az imént társaimmal jöttem le. Társaim valahol már messze járhattak a háztól, mert tudták, mit jelent a gáz...... Minél magasabbra kell mennünk......! Valami jól fedett helyre, ahol a bomba nem érhet. Meggyujtott villamos lámpával a kezemben rohantam föl, fölfelé. Egyedüli célom az volt, hogy fölfelé jussak. A család haldokló képe üzött, kergetett föl, föl. Tenni kell, tenni...... De mit? Nem tudtam. Fölértem...... Kopogtam. Miért, nem is tudom magyarázatát adni. Hiszen az ajtó nem volt kulccsal bezárva. Tán e kopogás még a hazai szokásból maradt rám, mert nem is volt szükség, hogy e ceremóniát betartsam. Kopogtam...... Hiába.... Nem jött senki, aki az ajtót kinyissa........ Berugtam az ajtót és berohantam a szobába. Megdöbbentő kép tárult elém, annak ellenére, hogy éj volt, egyikük sem aludt. A három apróság egymás kezét fogva, édesanyjukkal egy sarokba huzódva és az öreg pedig az ágyon ülve sirdogáltak. A véletlen kedvezett — a gáz még nem emelkedett idáig; lent hömpölygött a földön, tán a köd nem engedte föl idáig a gázt. A családnak minden tagja élt. Nem tudom, milyen rongyokat találtam az adott pillanatban, de találtam és egy egész halmazt dobtam a vizesedénybe. Minden egyiknek orrára és szájára nyomtam egy adagot belőle. Rájuk mutattam, hogy tartsák ott. Ugyanebben a pillanatban ujabb robbanás zaja tódult fülembe. A robbanás közvetlen a ház közelében történt. Minden pillanatban ujabb és ujabb cselekvés előtt álltam. Rájuk parancsoltam, hogy előttem menjenek. Az öreg is akarva-nem akarva, lejött az ágyról, ugy, ahogyan azon az estén ágyba feküdt, rohantunk le a lépcsőkön, mivel öltözködésre időnk már nem volt. Igyekeztem, hogy minél előbb kijussunk azon területből, mely gáz alatt állott. A legkisebb gyermeket én vittem és tartottam szájánál a vizes rongyot, mivelhogy erre az anyja képtelen volt. Vállalkozásom sikerült. Egy családot mentettem meg a gáz-támadás őrült barbarizmusától.

Csöndesebb napok

A gáztámadás véget ért. Számtalan civil vesztette el életét ebben az őrületben. Megindult a temetkezés, minden részvét nélkül. Gödröt ástak, négyöt embert dobtak egymásra, hasukra néhány lapát földet dobtak...... Ezzel minden készen volt. Többet nem tudtam tenni, mint amennyit a támadás alatt tettem. Némi örömet szerzett az a tudat, hogy sikerült egy családot megmentenem, legalább is egy napra, vagy egy percre, ki tudja, meddig? A család sem maradt hálátlan érte, tán megmentőt véltek bennem vagy tán már nem is katonát láttak bennem, hanem jóakarójukat. Közlékenyebbek lettek. S ebben a zürzavaros világban fájtak is a csendes napok. Őrült zsivajt, jajt és lármát kivántam, hogy feledni tudjam otthonmaradt családomat. Szegény gyer-



Az iparbárók millióit hizlalják a munkások véréből.

mekeim tán e pillanatban a halállal vívódnak.

A megmentett családnak közlékenysége igen jó hatással volt rám. Hiszen oly régen nem voltam emberek között. Igaz, szivüknek teljes kitárását megnehezitette az a körülmény, hogy én nem a legjobban tudtam olaszul. A legszükségesebbet azonban mégis meg értettem; a meg nem értetteket és az el nem mondottakat emberismeretemmel pótoltam.

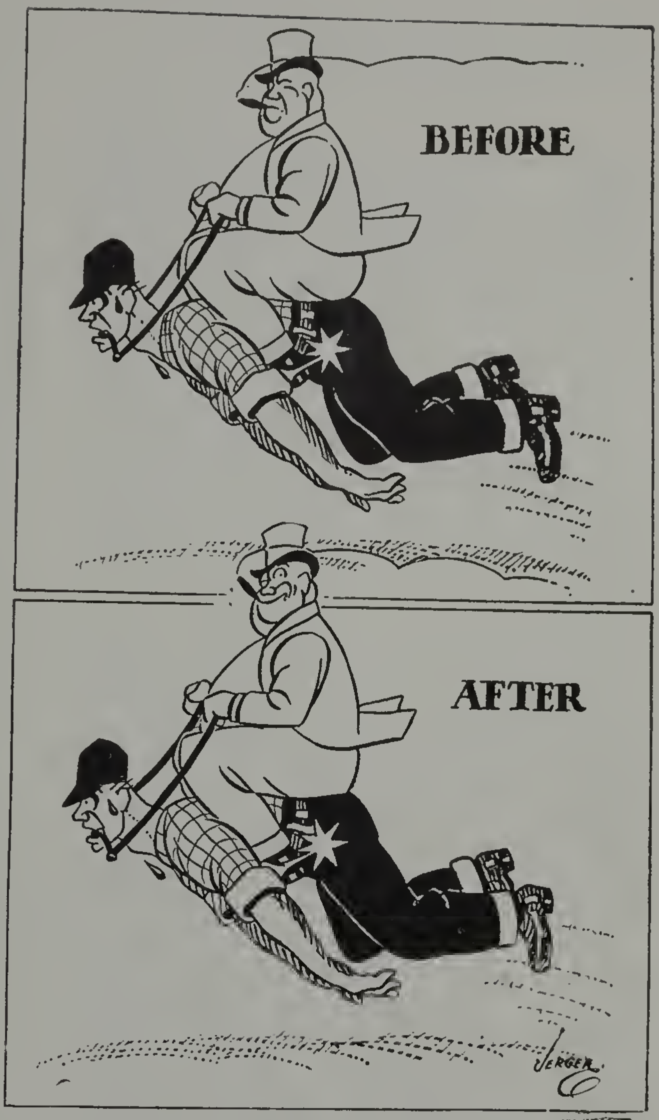
A támadást csendesebb napok követték. Hogy meddig tart ez, azt senki sem tudta, minden pillanatban várhattunk egy ujabb támadásra, egy ujabb őrületre. Még ma élek, ki tudja, hogy holnap nem-e én esek össze némán hangtalanul. Őrjitő volt az a homály, amelyen éltünk. Csak azt tudtuk, hogy élünk, de azt is tudtuk, — holnap már hullák lehetünk.

Magam sem tudom hogyan, de ellenállhatatlan vágyat éreztem, hogy kihasználhassam az őrületet követő nyugodtabb napokat. Igyekeztem ezen idő alatt a legjobban kihasználni azt. Elvegyültem az ellenséges területnek civilei közé, tudni kivántam, hogyan élnek ezek, vajjon mit hozott ezekre az emberekre a háboru? Hogy mit hozott? Őrületet....! Még ma is vádolom önmagamat és átkozom azt a pillanatot, melyben megfogant agyamban az a gondolat, hogy az ágyutüz alatt álló területek civileinek sorsával foglalkozzam. Még ma is bánt az a tudat, — miért nem éltem én is olyan tompán, bután és érzéketlenül, nem gondolva csak arra, hogy még élek, mint a többi társaim.

Egy napon délben, a ház tornácán ebédeltem. A tornác e vidéken elmaradhatatlan disze volt minden háznak. Ebéd közben tán az otthon maradt családomra gondoltam, mert az evést sehogysem birtam tovább folytatni. Kezemben tartottam ebédemet, mely holmi "Hindenburg-keverék"-ből és egy darab lóhusból állott. Gondolataim messze kalandoztak és bámultam a távolba. Merengéseimből egy kis gyermek tipegése riasztott föl. Megáll előttem, kinyujtja kis kezét és gyermeki hangon szólt: "Kenyeret adjál"! A messze vándorló gondolataim egy pillanat alatt eltüntek és most a gyermeket megmagyarázhatatlan szinben láttam magam előtt. Nem tudom, milyen érzés fogott el, de gyermekemet, aki odahaza maradt, láttam ebben a gyermekben...... Az én gyermekemet! És éreztem, ha három napig nem is eszem, kell, hogy e kis gyereknek ennivalót, a magam adagja legnagyobb részét adjam.

Fölvettem a gyermeket, mint akkor éjjel, midőn a halál karjaiból mentettem meg. Etetni kezdtem. Nagyon éhes volt. Annak ellenére, hogy tán ilyen zagyvalékat sohasem evett, most nem győztem a szájába tenni. Teljesen lekötött e kis gyermek. Észre sem vettem, hogy ezalatt az édesanyja másik két gyerekének kezét tartva, az ajtóban állt. Csak véletlenül vettem észre őket és ugyanakkor észre kellett vennem azt is, hogy a gyermekek kezét azért tartja, nehogy hozzám jöjjenek. Tán haragra is gyultam e pillanatban, intettem, engedje hozzám a a gyermekeket. Eleresztette őket. Szinte rohanva jöttek felém. Megálltak s éppen ugy, mint a legkisebb, kenyeret kértek.

Szegények, ezek is éhesek. E pillanatban nem tudtam megállapitani éhségük okát...... Éhesek voltak, nem törődtem azzal, mennyi élelmiszerem van, hanem szétosztottam közöttük.... Egymásmellé telepedve fogyasztották a komisz katonakosztot. Mig a gyermekek falatoztak, anyjukhoz mentem. Szörnyü vád égett bennem. Kérdőre akartam vonni. De hogy mit akartam tőle kérdezni, nem tudtam. A kérdőre vonás is elmaradt. Könnyező anyát láttam magam előtt. Tört olasz nyelven igyekeztem megtudni, miért sir.... Kérdésemre egy ideig nem válaszolt. Ujra kérdeztem. Azt felelte, hogy négy nap óta nem ettek semmit. A legkisebb gyermeke, akit az imént etettem, mellét szopta anyjának. Szemeim akaratlanul is odatévedtek. A melle csupa seb volt. A gyermek szivta az anya mellét, de tej nem szivárgott belőle. Nem volt teje, hiszen négy nap óta önmagát sem táplálta...... Kezeim összeszorultak. Ölni szerettem volna, ölni! Azokat, akik e szenvedéseket okozták. Segiteni ujra, ez lebegett előttem. De hogy segitsek én, akinek semmije nincs, aki magam is az éhhalál előtt állok? Honnan vegyem azt, ami most a legfontosabb, — az életet, a kenyeret?! őrült kacajba törtem. Élet és kenyér...... Itt kisértett három gyermek halálvivódása. Az összes kenyeret, ami nálam volt, oda kell adnom. Akkor meg magam pusztulok el. Az élet és halál harca küzdött agyamban. Hiszen mindegy, ma vagy holnap...... mindegy, mindegy...... Magamat nem sajnáltam. A kicsi gyerekek, a jövő emberei jutottak eszembe. Ha most egy kis időre meg is mentem őket, mi lesz azután velük?



A szakszervezeti harcok eredménytelenségének szimbóluma.

Azután meg az én gyermekeim jöttek elém. Ha én pusztulok, mi lesz azokkal? őrültség...... Ha én elpusztulok, ők is velem pusztulnak. Három gyermekélet. Kenyér és élet...... Kenyeret kér mind, mind, aki itt maradt e kis városkában. Három gyermekélet! Egy adag kenyér...... És száz és száz kétségbeesett gyermekjaj...... Kenyeret! Kenyeret! Hány részre kellene osztanom kevés kenyeremet, hogy valamennyinek jusson belőle? Hogy el ne adják utolsó rongyaikat a kapzsi tiszteknek egy darab kenyérért......? Hogy egy falat kenyérért tizenhatéves lányok le ne feküdjenek a kéjenc tiszteknek......? Rémes......! Miért nem segélyezi ezeket a gonosz hadvezetőség, amely dőzsöl a jól védett háttérben és duskál minden jóban, mig a munkásmilliók pusztulnak gyermekestől......? Rémes...... És ezek ellenségeim......? Az ártatlan gyermekek, a végtelenül szenvedő anya...... Én adjak ennivalót a három gyermeknek és a többi ezernek? Én, én, aki rothadó lóhust zabálok...? Pfuj! Rothadt hus, száraz kenyér...... Mindenben nyüzsgő pondró...... És én adjak ennivalót......? Én tartsam meg őket az életnek......? Erkölcsöt mentsek......? Szamárság......! Bolond vagyok...... őrült...... őrült......

Itt, ahol a halál szintén kiterjesztette karját, nincs más hátra, mint lázitani, mint forradalmat gyujtani, mely elsöpri e piszkos rendszert, mely barbarizmust, éhhalált és teljes lezüllést hint a népmilliók közé. Itt nem használ az én néhány kenyérdarabom. Mit ér az, ha három gyermeknek megmentem az életét egy bizonytalan időre, ha a többi ezer meg ezer gyerekre éhség és halál vár......

Az Ipari Unionizmus

ZÁRA JÁNOS

AZ IPARI Unionizmus elmélete oly egyszerü, hogy közepes képzettséggel biró munkás is könnyen megértheti. De mindennek ellenére, annyi félremagyarázás történik e téren, hogy még a jóakaratu munkásembereket is gyakran tévutra vezeti. Ennek egyik oka az, hogy oly egyének próbálják az Ipari Szervezkedés eszméjét magyarázni, akik nincsenek tisztában ennek elméletével; a másik ok pedig az, hogy rosszakaratu magyarázók, bármi célból, igyekeznek meggátolni ezen üdvös eszmének a terjedését.

Napjainkban itt az Egyesült Államokban van néhány szervezet, melyet ipari szervezetnek igyekeznek föltüntetni, azonban ezek csak annyiban ipari szervezetek, amennyiben ilyen jelzővel látják el, mert a valóságban éppen olyan messze állanak az ipari szervezettől, mint a kimondott szakszervezetek. Ilyen szervezetek többek között: a United Mine Workers of America, az Amalgamated Clothing Workers és a Trade Union Unity League. Ez utóbbit a kommunista párt alakitotta csak azért, hogy a hiszékeny munkásokat félrevezessék; hogy a valódi Ipari Unionizmus terjedését akadályozzák. Mindezen félremagyarázások ellensulyozására, a gondolkodni akaró munkások tisztánlátásának elősegitésére az alábbiakban az Ipari Unionizmus eszméjét kivánjuk ismertetni.

Az Ipari Unionizmus eszméje az Egyesült Államokban született. Hogy miért az Egyesült Államokban, annak természetes oka van. A termelőeszközök fejlődése, mely létrehozta az Ipari Unionizmust, az Egyesült Államokban kezdett leghamarabb kibontakozni, igy természetes, hogy a munkásság gondolkodó elemei itt tapasztalták leghamarabb az idejét multa szakmai szervezkedés hátrányainak, fejlődés kényszeritő hatása alatt itt kezdtek legelőször gondolkodni a termelési folyamatnak megfelelő szervezetről.

A modern termelési folyamat annyi különféle szerszámmal dolgozó munkást vont össze egy-egy ipartelepre, amennyit egy bizonyos tárgy előállitása megkövetel. A telefon előállitásánál például foglalkoztatva vannak öntők, kovácsok, asztalosok, bádogosok, gép- és szerszámlakatosok, különféle gépkezelők és szerelők, mérnökök, rajzolók és egyéb irodai alkalmazottak. Ugyanezen állapotokat találjuk a vasuti szállitásnál, az acéltelepeken, az élelmezési és nyomdaiparban, a bányászatnál, stb. iparokban. A szakszervezkedés szerint ahányféle szerszámot használnak, ugyanannyi külön szervezetbe volnának széttagolva. Eszerint a telefonkészitésnél a vágóhidakon, az acélgyártásnál stb. helyeken foglalkoztatott lakatosok egy szervezetbe volnának szervezve, elkülönitve a telefongyártásnál vagy az acéltelepeken foglalkoztatott többi munkásoktól. Ugyanez áll a többi szakmunkásokra is, ugy, hogy egy bizonyos áru gyártásánál tiz, vagy még ennél is több, egymástól független szakszervezetbe volnának széttagolva és még akkor a szakmanélküli munkások, akik legnagyobb számmal találhatók a modern ipartelepeken, szervezetlenül maradnak, amennyiben a szakmanélküli munkások részére nincsen szakszervezet.

Az Ipari Unionizmus lényege abban van, hogy nem a használt szerszámok, hanem a termelt áruk szerint csoportositja a munkásokat; vagyis, a telefongyártásnál foglalkoztatott valamennyi szak és szakmanélküli, fizikai vagy szellemi munkás mind szervezetbe csoportositandó. Minthogy azonban a telefongyártásnál foglalkoztatott munkások csak egy kis részét képezik a fém- és gépiparban foglalkoztatottaknak, igy tehát a rokonáruk gyártásánál foglalkoztatott munkások is ugyane szervezetbe szervezendők.

Az Ipari Szervezkedés eszméje az Industrial Workers of the World megalakulásával került a munkásmozgalom gyakorlati platformjára. A név már magában kifejezi a szervezet formáját is, mely a Világ Ipari Munkások Szervezete. Az IWW ugy csoportositja a munkásokat, ahogy azok a legsikeresebben harcolhatnak az azonnali követelésekért, mint: rövidebb munkaidő, magasabb munkabér és általában jobb munkaviszonyokért.

Az IWW osztályharc alapján álló forradalmi szervezet s mint ilyen, végcélja a bérrendszer eltörlése. Az összetétele olyan, hogy a szervezet fejlődésével épül a jövő társadalom szerkezete, mely el fogja foglalni a bérrendszer helyét, mely nem lesz más, mint az Ipari Demokrácia.

Az IWW a termelés és szétosztási rendszert hat Ipari Departmentbe foglalja össze.

Minden Ipari Departmenten a rokon ipari szervezetek csoportosulnak a következőképen:

100 földmüvelési osztály

110 a Földmunkások Ipari Szervezete.

120 az Erdei Munkások Ipari Szervezete.

130 a Halászok Ipari Szervezete.

140 a Virág- és Gyümölcskertészeti Munkások Ipari Szervezete.

200 bányászati osztály

210 Ércbányászok Ipari Szervezete.

220 Szénbányászok és Kokszkemencéknél Alkalmazott Munkások Ipari Szervezete.

230 Olaj, Gáz és Petróleum Munkások Ipari Szervezete.

300 épitészeti osztály

310 Vasutak, utak, hidak, csatornák és alagutak épitésénél alkalmazott munkások Ipari Szervezete.

320 Hajóépitő Munkások Ipari Szervezete.

330 Ház és épületeket Épitő Munkások Ipari Szervezete.

400 általános Ipari termelési osztály

410 Szövő és Ruhakészitők Ipari Szervezete.

420 Famunkások Ipari Szervezete.

430 Vegyiárukban Dolgozó Munkások Ipari Szervezete.

440 Fém- és Gépipari Munkások Ipari Szervezete.

450 Nyomda és Kiadóhivatali Munkások Ipari Szervezete.

460 Élelmezési Munkások Ipari Szervezete.

470 Bőráru gyártással foglalkoztatott munkások Ipari Szervezete.

480 Üveg és agyagáruk készitésén alkalmazott munkások Ipari Szervezete.

500 szállitási osztály

510 Vizi szállitásnál alkalmazott munkások Ipari Szervezete.

530 Táviró, telefon és szikratávirónál alkalmazott munkások Ipari Szervezete.

540 Városi, közuti, szállitó munkások Ipari Szervezete.

550 Légi szállitásnál alkalmazott munkások Ipari Szervezete.

600 közszolgálati osztály

610 Házimunkát végzők Ipari Szervezete.

620 Községi alkalmazottak Ipari Szervezete.

630 Parkok és utak gondozásán alkalmazott munkások Ipari Szervezete.

640 Nevelőintézetek alkalmazottainak Ipari Szervezete.

650 Általános Áruelosztási Munkások Ipari Szervezete.

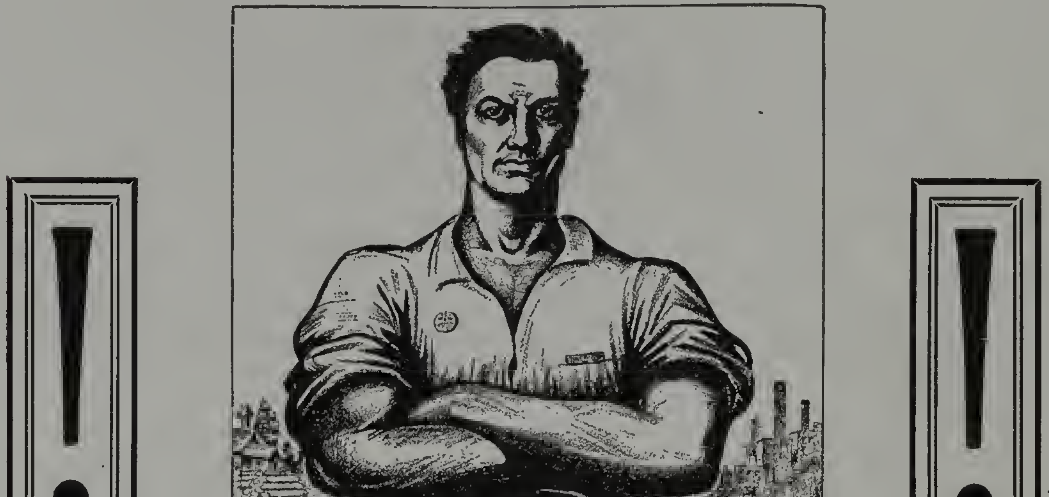
660 Szórakoztató Intézetek Alkalmazottainak Ipari Szervezete.

Az Ipari Departmenteket a százas számok jelölik, mig a Departmentekben csoportositott rokon Ipari Szervezeteket a tizes számok.

Az IWW által képviselt Egy Nagy Szervezetnek alapja az iparokban van. A munkások mühelyszervezeteket alkotnak; a különböző mühelyszervezetek alkotják a városi csoportokat. A városok csoportjai az Iperi szervezeteket alkotják és a rokon Ipari Szervezetek az Ipari Departmentet. Az Ipari Departmenteket a központ egyesiti, ahol az ügykezelés összpontosul. Az Ipari Szervezetek összessége alkotja tehát az Egy Nagy Szervezetet. Azok tagsága százas összeköttetésben van egymással.

A szervezet egyforma kötelezettséget ró minden tagjára és egyforma jogot élvez minden tag. Amely munkás tagjává válik valamely Ipari Szervezetnek, az szervezett munkás minden iparban. Ezen jogot az egyetemes transfer-rendszer biztositja.

A Ipari Unionizmus eszméje ma már az egész világ munkásságát foglalkoztatja. Mindenfelé érzik, hogy a szakszervezkedés alkonya elkövetkezett. A gépek fejlődése a szaktudást feleslegessé tette és a munkagépek mellett a szakmanélküli munkások foglalták el a helyet. A munkásság ezt tudja és mindhangosabban hallik az Ipari Szervezkedést követelők hangja. Szervezetek alakulnak és mulnak ki, mert ma már csak oly szervezet létezhet, mely megfelel a kor követelményeinek. Az IWW ennek minden tekintetben megfelel. Ipari szervezet, mert az egy iparban foglalkoztatott minden munkást EGY szervezetbe tömörit. Az IWW nemcsak egy ipar munkásait szervezi, hanem az összes iparok munkásait a megfelelő Ipari Szervezetekbe, melyeknek összessége alkotja az Egy Nagy Szervezetet. Forradalmi szervezet, mert végcélja a bérrendszer eltörlése és ennek elérésére minden eszközt igazoltnak tart. Szerkezete a jövő társadalom szerkezetének embriója és amint a szervezet növekszik, ugy nő a jövő társadalom a réginek keretein belül. Az IWW már ma késziti elő a javak termelésének és szétosztásának irányitását. Ezt csak az Egy Nagy Szervezet utján érhetjük el és amikor ezt elérjük, csak akkor ér véget a munkásmilliók szenvedése, amelyet fölvált a minden dolgozó számára az élethez egyenlő jogot biztositó IPARI DEMOKRÁCIA.



A létra meg az emelet

FARKAS ANTAL

I.

A NAGYSÁGOS urat sürgönnyel verte föl az inas ugy délfelé, amikor a nagyságos ur legédesebb hajnali álmát aludta. A leghivebb kortese sürgönyözött neki:

— Azonnal kerületbe jönni, baj van.

Micsoda baj volna? Reggelig koccintgattak a Pesten időző főispánnal, aki megnyugtatta:

— Amig engem látsz a főispáni székben, addig mindig a magad kezében látod a kerületed mandátumát is.

A főispán nem tréfás még hajnalban sem. Tisztában van az ő kötelességével általános képviselőválasztások idején és tudja, mit jelent a hivatalos jelölt elbukása. Igaz, szándékában volt a leutazás, de nem ilyen sürgősen. Van még idő az ilyesmire. Tudja a nagyságos ur, hogy neki az a programbeszéd se árt, se használ.

Ő nem sokat törődött a kortes figyelmeztetésével, de azért mégis csak leruccant a kerületébe. Ment egyenesen a sürgönyküldőhöz.

— Mi a baj, Marci bátyám?

Marci bátyám megvakarta a füle tövét.

— Baj még egyáltalán nincs olyan nagy, de annyi mégis van, hogy baj lehet.

— Ugyan mi lehetne?

— Az, hogy a cucilisták erősen dolgoznak.

— Hát aztán?

— Az ellenzéki jelölt is megmozdult és szorit bennünket.

— Hadd szoritson; majd elereszt, ha szolgabiró uraimék a körmére koppintanak.

— Mind elhiszem, nagyságos uram, de mégis igazság marad az, hogy szétszéled a nyáj szamár nélkül.

A nagyságos ur nevetett.

— Hát csak nem szamárnak telegrafált Marci bátyám ide?

— De bizony annak, hogy egy kicsit tartsuk össze a nyájat, amelyik a mult választás óta nem igen látta a vezetőjét. Azt mondja a paraszt, hogy nagyságos uram nem a nép embere, mert csak akkor látja meg, amikor hasznát akarja venni. Különben is most mérges, mert olcsó a buza, aztán elsült a kukorica.

— Jó, jó, de ennek nem a kormány az oka.

— Hát kit hibáztasson a nép? Mindig csak azt, aki az adót szedi. Ajánlom nagyságos uramnak, hogy egy kicsit mozogjon, barátkozzék a kerületben. A hivatalos uraktól se lehet mindig csodát várni. Egyszer már megeshetik olyan is, ami voltaképpen máskor is megesett már: kirántják alólunk a pokrócot.

A nagyságos ur belátta, hogy Marci bácsinak igaza van: egy kis eszem-iszom, barátkozás sohasem ártott meg az embernek választások idején.

II.

Járta a falukat a nagyságos ur. Minden szavazó házába beköszönt, de ritka helyen ismerték meg, annyira elfelejtették öt év alatt a fizimiskáját. Ő se ismerte meg szeretett szavazóit: egyforma volt neki minden János bátyám, Zsuzsa néném, Pista öcsém, Panna hugom. Össze is cserélgette őket, hiába oktatta ki névre és állapotra a vele járó kortes.

— Hogy van, kedves Zsuzsa néném?

— Köszönöm kérdését, de nem vagyok én Zsuzsa.

— Sára nénémet akart mondani a nagyságos ur — magyarázta a kortes.

— Hát nem azt mondtam? Sára nénémet ismerem. Lehet, hogy rosszul hallották, István bátyám hol van?

— Nem lakik olyan ennél a háznál.

— Péter bátyámat kérdezi a nagyságos ur — javitotta ki a kortes.

— Persze, hogy Péter bátyámat. Furcsa volna, ha nem ismerném. Hát a gyerekek hogy vannak?

— Nincsenek itt gyerekek.

— Uristen, csak nem haltak meg?

— Nem ám, mert meg se születtek — mosolyog Sára néni. — Mi járatban vannak az urak? — érdeklődik aztán kellő komolysággal a jó asszony, valami rosszat sejtvén, hogy adó végett jöttek a nyakára, mert hiszen Marci bácsi olyan hivatalos emberféle, a kő üsse meg a dolgát!

A nagyságos ur most már erősen rázza a Sára néném kezét.

— Üdvözletet hoztam Pestről. . A feleségem tiszteli, csókolja Sára nénémet.

— Köszönöm, köszönöm. Tessenek helyet foglalni.

Leülnek.

— Hát Péter bátyám?

— Egy kis dolga akadt a padláson. Majd leszólitom.

Egyszer-kétszer fölkurjant Sára néném a padlásra:

— Péter! Apjuk! Nem hallja? Gyüjjön kend le, keresik!

De bizony, Péter nem nagyon igyekszik lefelé onnan a magasságos falusi emeletről, mert voltaképen aludni mászott oda. Jó hüvös ilyen forró nyári időben, ebéd után az öreg, nádas tetejük ház padlása. A suba is ott van. Sára nénémnek rossz a lába, el is nehezült asszonyság már, aki nem tud a létrán mászkálni.

A vendégek elunják a várakozást, aztán meg még sok látogatás van hátra.

— Lehivom én Péter gazdát a padlásról — ajánlkozik Marci bácsi.

— Ne zavarjuk a dolgában. Fölmegyek én hozzá — pattan föl a nagyságos ur és ugy tesz, ahogy mondja: fölmászik a létrán a padlásra, ahol addig botorkál, tapogat, amig megbotlik a lába az igazak álmát alvó Péter gazdába.

Fölpattan ám Péter is a subáról.

— Ki vagy, az apád!

— Volt képviselőjük, most meg a hivatalos jelöltjük, Péter bátyám.

Péter csakugyan emlékszik.

— Az ám, a nagyságos ur. Aztán, hogy kerül ide? De tessék már leülni a subára.

— Köszönöm, csak éppen tiszteletemet óhajtottam tenni Péter bátyámnál és arra kérem, hogy a mostani választáson ismét......

Péter agya kivilágosodik: vagy ugy?!

Egyszerre ömlik belőle a szó, a politika: ez sem jól van, az sem jól van.

— Ez is jó lesz. A buza árát fölemeljük, a csizmáét leszállitjuk. Valamennyi adósságot elengedjük. Mi kell még? Ha valami kell, csak jöjjön hozzám Pestre, Péter bátyám, elintéztetem a miniszter urakkal egy-kettőre.

Paroláznak, lemásznak a padlásról, még egy pohár bort is isznak egymás egészségére.

A vége az, hogy a sok Péter bátyám ujra megválasztja a nagyságos urat képviselőnek egy kis hivatalos támogatással.

Ez a fejezet már nagyon rövidre szabatik. Csupán az mondatik el benne, hogy Péter bátyámnak komoly baja támad a pesti bankfiskálisával, aki licitációval fenyegeti meg.

Fölruccan Pestre a nagyságos urhoz. A nyelve kilóg, amikor fölér hozzá az emeletre. No, majd kiszuszogja magát a nagyságos urnál.

— Ki maga és mit akar? — kérdi tőle az előszobában utját álló inas.

Péter bácsi megmondja a nevét, a baját. Leültetik az előszobában. Az inas eltünik és pár perc mulva viszszajön.

— Azt üzeni a nagyságos asszony, hogy a nagyságos ur elutazott fürdőre és nem is lesz itthon, majd csak ősszel, ha összeül az országgyülés.

Péter bácsi máris lent van a kapu alatt, ahonnan mégegyszer fölnéz oda, ahol járt, aztán káromkodik egyet:

— Krisztusa ne legyen a nagyságos ur inának. Több szerencsével mászta nálam a padlást, mint én őnála, szakadjon meg......!

Marasztalás

GERGELY GYŐZŐ

NEW YORK egyik milliomosa, az amerikai gyermekrablásokkal kapcsolatban, nagy föltünést keltő elhatározásra jutott. Egyetlen gyermekét, három éves kis fiát Angliába vitte, itt helyezte el és a lapok tudósitói előtt kijelentette, hogy a kis Jamest naturalizáltatja, angol állampolgárnak nevelteti. Az amerikai biztonsági viszonyokkal indokolta meg ezt az elhatározását azzal a hozzátevéssel, hogy “Amerikában nem maradhat meg becsületes ember”. Ennek a nyilatkozatnak nagy visszhangja támadt. Sorra megszólaltak Amerika gazdagjai és azonositották magukat nyilatkozó társukkal. Kijelentették, hogy otthagyják Amerikát, mert hát igaz, ami igaz: “ott tartunk, hogy Amerikában a gangsterek miatt nem maradhatnak meg a becsületes emberek”.

Ezek közül az egyik kapta a következő levelet:

— Tisztelt uram, atyaura Mr. John Surely megbizásából végzett munkám közben megsebesültem. A konkurrens gyár gépét kellett egy kis ekrazittal megetetnem, de majdnem rajtavesztettem. Menekülnöm kellett és eközben ért az a sérülés, mely miatt most ágyba kell maradnom. Igy tehát ráérek. Elolvastam az ön figyelemre méltó nyilatkozatát és elgondolkoztam rajta. Tehát ön is, ifju milliomos ur, itt akarja hagyni Amerikát, mert azt mondja, hogy idehaza már nem lehet megmaradni a gangsterek miatt. Bevallom, ez az olvasmány őszinte, mély fájdalommal töltött el. Olyasvalami érzés fogott el, mint mikor valamilyen kedves hozzátartozója az embernek jelenti ki, hogy nagy megvetést érez iránta és nem óhajt többé vele egy födél alatt lakni. Ön bizonyára megütközik ennek az együvétartozásnak a hangoztatásán és őrültségnek bélyegzi azt. Azonban azt hiszem, hogy ha figyelemmel kiséri pályatársaim élete folyását, bármennyire nehezére is esik ez, ugyancsak erre a megállapitásra jut. Tisztelettel alulirott ugyancsak gangster, azaz a pénzért mindenre kész gonosztevő bandából való vagyok. Semmivel sem jobb és semmivel sem rosszabb, mint a többi.

Ugy kezdtem, mint a többiek és ők ugy kezdték, mint én. Legföljebb a származás, kor és egészen alacsonyrendü részletek tekintetében van közöttünk különbség. Alabama-ban töltöttem kölyökkoromat és itt cseperedtem legénykorba. Már itt jöttem rá arra, hogy mindenki a saját szerencséjének kovácsa. A többiek gyárba, mühelybe, mezőre jártak dolgozni, mig én szoros összeköttetésbe kerültem azzal a tiszteletreméltó társasággal, amely Ku Klux Klan elnevezés alatt végzi garázdálkodását. Azt is elmondom, miképen sikerült ezeknek az uraknak figyelmét magamra vonnom. Elintézni való ügyem támadt néhány hozzámhasonló koru fickóval. Egyikük nyápic, vékonydongáju legényke, maga előtt guritotta a lapdáját. Nagyon szép lapda volt, kiérdemelte a tetszésemet, elgáncsoltam tehát a fickót és elvettem a lapdáját. Ez vissza akarta venni. Szabályszerüen kiálltunk és hamarosan elbántam vele. Ekkor azonban ott termett ellenfelem barátja, egyet intett, hogy meg akar velem mérkőzni és vele is meg kellett küzdenem. Uj ellenfelem azonban erősebb volt. Egy-két ütésére már éreztem, hogy forogni kezd velem a világ. És ekkor benyultam a zsebembe és kivettem a bicskám. A körülállók fölháborodva pfujoztak, az egyik rácsapott a kezemre. De ekkor egy ur galléron fogott és kivezetett a csoportból. No, gondoltam magamban, most következik a hadd-el-hadd. De, hogy kikerültünk a sokaságból és befordultunk a legközelebbi utcasarkon, az illető jól szemügyre vett, megveregette a vállam és azt mondta, hogy legény vagyok a talpamon és hogy közéjük való vagyok.

Ez az ur a Ku-Klux-Klan vezetőségi tagja volt és azon tul ez a társaság vett pártfogás alá. Nekik teljesitettem szolgálatot. Tulbuzgóságomban azonban nem tartottam be a határokat. Müködésemben nem szoritkoztam négerek, katolikusok és zsidók bántalmazására, hanem aszerint, ahogy alkalom adódott, ezt a jeles és jövedelmező foglalkozást ilyen mellékes szempontokra való tekintet nélkül, másokkal szemben is gyakoroltam.

Alabamaból menekülnöm kellett.

Igy kerültem — számos viszontagság után — New Yorkba. Itt aztán bő tere nyilt annak, hogy megmutassam mit tudok. Erős karjaim, széles vállaim és mindenre való készségemet eláruló arcom voltak az ajánló levelem, amelynek révén csakhamar bekerültem Pinkertonhoz. Különös mulatságomra szolgált uj mesterségem.

Ebben a minőségben jutottam kapcsolatba tisztelt atyja urával, majd később önnel. Atyjaura érdekében kellett a tényállással homlokegyenest ellenkező tanuvallomást tennünk az emlékezetes Smell-ügyben. Majd pedig hasonló szolgálatot teljesitettem becses családjának a hires Trock-féle rágalmazási pörben. Önnek házassága előtt pedig én szereztem vissza szerelmes leveleit Miss Helene Treetstől.

A legtöbb megbizást azonban akkor volt szerencsém önöktől kapni, amikor külön saját kazemre dolgoztam és magam neve alatt szerveztem "irodát". A szociális ügyek egyik specialistája lettem. Jó orrom volt, mert ez a foglalkozás kitünően bevált. A háboru után nagyon mozgolódtak a munkások. Olvasmányaik és agitátoraik hatása alatt szervezeteket alapitottak, bérmozgalmakra, sztrájkokra és más hasonlókra vetemedtek. Nekünk kellett rácáfolnunk arra a téves fölfogásukra, hogy emberi jogaik vannak. Hát bizony, mélyen tisztelt milliomos ur, ez ugyancsak zajos kis munka volt, melyben a jövedelmen kivül sok tapasztalatot szereztem és eléggé föl nem becsülhető értékü edzettségre tettem szert.

Igen, mélyen tisztelt uram, ezen a téren hasonlithatatlanul sulyosabb cselekmények elkövetését vállaltuk s hajtottuk végre az önök megbizásából és az önök érdekében, mint amilyenek most arra késztetik önöket, hogy elhagyjanak bennünket.

Nem volt hét, hogy rajta ne kellett volna ütnünk egy-egy ilyen agitátoron. Minduntalan el kellett szállitanunk autónkon azokat a szerencsétlen vakmerőket, akik fölvették önökkel a harcot. Mennyi gyülést robbantottunk szét büzbombáinkkal, bunkóinkkal és revolvereinkkel.

Azután emlékszik arra a vasuti merényletre, amelyet klubjuk vezetősége megbizásából kellett megrendeznünk s ugyanakkor eskü alatt vallomást tennünk arról, hogy a merényletet az önök ellenfelei követték el? Az pedig már egészen alacsonyrendü tömegmunka volt, amikor a bányatelepeiken sztrájkoló munkásokat kellett kilakoltatnunk. Ekkor szoktuk meg az aszszonyi jajveszékelést és a gyermeksirást. Még most is érzem annak a kis, ötéves pöttömnyi legénykének keze szoritását, ahogy belecsimpaszkodott a karomba, amikor az apját a hajánál fogva a földön vonszoltuk, mert nem akarta bevallani vezetőjük kilétét.

Igen, igen uram, mi az önök neveltjei, hozzátartozói, az önök fényes társaságának függvénye vagyunk. És ahogy nem egyszer megtörténik, hogy a gazembert a saját jószága tapossa meg, ugy megtörténhetik, hogy a milliomost a saját közegei zsarolják meg és hozzák sulyos helyzetbe. Ebből azonban nem következik, hogy most már valamennyi gazdag otthagyja a jószágát és nem következik, hogy önök itthagyjanak bennünket. De hiába is hagynak itt. Mert ahol gangster van, még nincs okvetlenül milliomos, de ahol gazdag ember van, ott föltétlenül kell gangsternek is lennie. Aztán lehet, hogy igazuk van abban, hogy Amerikában már nem maradhat meg becsületes ember. De ettől, uram, önök is, mink is egészen jól megmaradhatunk Amerikában.

Ne menjenek el tehát, ne hagyják itt árván ezt a maguk képére teremtett világot.......

Az Industrial Workers of the World alapszabályainak magyar függeléke

AZ INDUSTRIAL Workers of the World az ipari unionizmust képviselő s tanitó munkáskásszervezet, amely a munkásokat ipari foglalkozásuk szerint szervezi abból a célból, hogy a termelési eszközöket kisajátitsa, a bérrendszert megszüntesse, miáltal egyenlő jogokat teremt a társadalom minden egyes tagja részére.

Ezt a célt csak ugy érheti el a munkásosztály, ha EGY szervezetben tömörül. Az IWW minden nyelvü és minden szinü bérmunkást az Egy Nagy szervezetbe tömöriti. Ezért szükségtelennek tartja a külön nyelvi vagy faji csoportokat, mert ahogy az iparban együtt dolgozik minden nemzetiségü, vagy szinü munkás, ugy a munkán történő kizsákmányolás ellen is együtt kell a harcot fölvenni és küzdeni.

Ehhez a tanitáshoz egyik legalkalmasabb eszköz a sajtó. És mivel minden bérmunkás az anyanyelvén jobban megérti az IWW tanitását, az IWW különböző nyelvü lapjaiban hirdeti az Egy Nagy Szervezet szükségességét.

Az IWW magyar sajtója, bár szorosan az Egyetemes Központ ellenőrzése alatt áll, annak terjesztése és fentartása a magyar bérmunkások kötelessége.

Ebből a célból agitációs bizottságokat létesithetnek, ahol a magyar lap fejlesztését szolgáló ügyeket beszélik meg.

Az agitáció sikeresebb kifejtése céljából legalább egyszer évente értekezleteket tartanak és ha szükségét látják, országos értekezletre jönnek öszsze. Ugy a kerületek, valamint az országos értekezletek határozatait a magyarajku agitációt végző IWW tagok hagyják jóvá vagy vetik el.

A magyar lap ügyeinek intézésére az agitációs csoportok egy szerkesztőt, egy titkár-pénztárnokot s egy hét tagból álló bizottságot választanak egy évi időtartamra, mely bizottságnak föladata őrködni, hogy a lap IWW szellemben iródjék, hogy a lap körüli munkák elintézést nyerjenek, hogy a lap s igy az ipari unionizmus eszméjének terjesztése a magyar munkások között a legszélesebb körben történjék. E célból odatörekszik, hogy a magyar lap állandó tanitómunkája mellett szervezők is fölkeressék a magyarlakta területeket.

A magyar lap bevételeiről és kiadásairól, valamint a nevelést elősegitő céljairól havonta jelentést készit a lapbizottság és azt az agitációs bizottságok titkárainak, a delegátusoknak s a Bérmunkás lapkezelőinek megküldi.

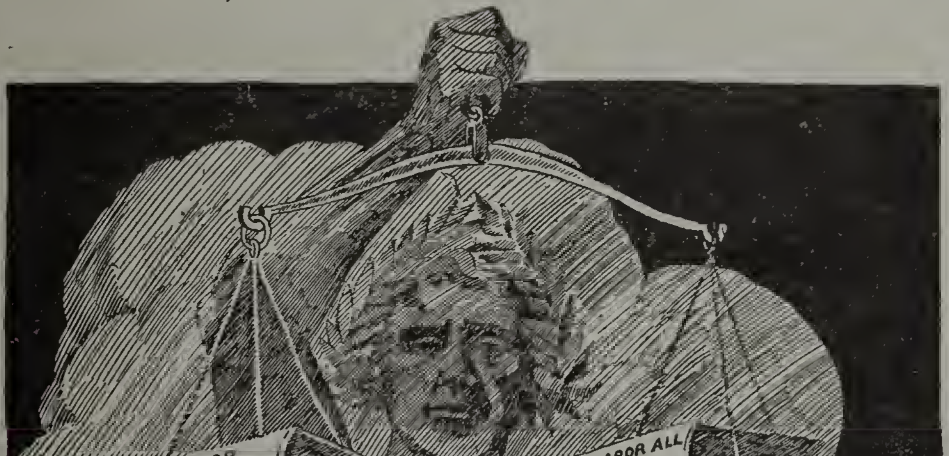
Az utolsó vacsora

RÉVÉSZ BÉLA

AZ ISTEN mennyei birodalmából nyugodalmas nyájas estét küldött le a jámbor borügynök hajlékába. A kicsiny szoba ablakai ki voltak tárva és szabadon szállhatott be ide a nyári alkonyat minden igézete. A szigeti sétányok ecetfái a csendes szellőben bólogattak sárga fejükkel és mintha ők is vigadni akarnának a borügynök családi eseményén, fürtjeiket meg-meglibbentették és füszert, ünnepi alkalomhoz illő szagosságot kergettek a szobácskába, mely közelükben, éppen a Duna mellett kandikált a világba. Benn, a négy fal között, méla napsütésben, a család bucsuzkodott. A fiut, Sándort, küldték a nagyvilágba.

Sándor anyjának a jelleméhez tartozik, hogy tulajdonképen és egyedül csak ő küldte a fiut a nehéz utra, próbálni, dolgozni, emberré lenni Pesten, mert maga a borügynök már inkább filozófusan gondolkozott az életről és



LABOR CREATES ALL WEALTH
TO LABOR ALL WEALTH RIGHTFULLY BELONGS

AZ IGAZSÁG MÉRLEGE: A munka teremt mindent. A munka gyümölcse a munkást illeti.

nem ritkán komoly perpatvar keletkezett a házasfelek között a kemény kérdés körül, hogy lehetnének szerencsésebbek a gyermekek. A családfő e harcok folyamán mindig egyformán s igy szentenciázott:

— Iparosok vagy kereskedők legyenek a gyerekek. Azoké ma a világ. Járjanak négy normált, aztán oda kell adni őket inasnak. Három év mulva fölszabadulnak és megkeresik a kenyerüket. Emberek lesznek olyan korban, amikor még mint diákoknak koplalniok kellene...... Aztán ha felnőttek, parthiet csinálhatnak és önállósitani fogják magukat......

A borügynök gyenge vitatkozó volt, pedig mélyen érezte az igazságait, ám a Sándor anyja szóval, szigoru fellépéssel annyira állotta a harcot az ura ellenében, hogy a derék ember dühében a nagy vitákat rendszerint káromkodással, székcsapkodással és egyéb izgalmasabb zenebonákkal fejezte be, de igaza azonban mégis csak az asszonynak volt, akinek az akarata e családi hajlékban törhetetlen parancs volt appelláta cselekedetei ellen, amikor egymásután küldte gyermekeit, föl, föl, a nagyvárosba, ahol az érettségit, diplomákat osztogatják.

Sándor anyja rajongott a müveltségért. Ez egész másfajta tulajdonsága volt az ő lelkének; nem olyan, ami más embereknél kimerül a tudás után való vágyakozásban és a célnál van, ha az okoskodás utjára rátalált. Sándor anyja irni sem tudott és az ünnepnapokon, ha imádkozni kellett, valamelyik fia olvasta föl neki az imádságot, amit ő áhitatosan utána mondott, ám vak, korlátolt gondolatvilágában, mint démoni erejü fantom ott ringatódzott a csökönyös, egyetlen kialakult gondolat:

— A gyerekek tanuljanak, müvelt emberek legyenek........

A szikár asszony fanatikusa lett ez életprogramnak és forró anyai szivét nem egyszer komor drámák rázkódtatták meg, mikor törte, épitette fiainak az utat, a nagy országut felé, ahol tanult emberek kergetik a szerencsét. A legidősebb fiuval még könnyen ment a dolog, amikor Pestre küldték a tanitóképzőbe, mint ők mondották, a preparandiába. Akkor ősszel még vidám arcuak voltak a hegyek és millió-millió szőllőszem kacélkodott a borügynök felé, aki ilyenkor szüret idején, mintha minden mustot ő ivott volna meg, mámorosan, szinte támolyogva hágott a bércre, szállott a völgybe és a buzgó emberek nagyszerü megelégedésével kötögette jobbra-balra a kitünő üzleteket. Dezsőt, az elsőszülött fiut, még elláthatták minden jóval, a borügynök maga kisérte a gyereket Budapestre és ott jó pénzért kosztba adta. A hegyek azonban egyszer csak kikezdtek a szorgalmas emberkével. Ujra eljött a szüret és a szenzál megint ott szaladgált a völgyek mentén, a hegyoldalak utjain, de a szőllővenyigék kopáran álltak elébe, a fakó hegyek — akárhogy kémlelte is őket — immár nem mosolyogtak reá, de zordonan hajoltak föléje és a filokszéra könyörtleneül belemart az ő életébe. Jöttek az éhes csaták, a verejtékes töprengések, a borügynök a kopó nekivadultságával szimatolta mindenfelé a kis pénzeket, amivel tartozott a családjának — ez a szive legfájdalmasabb mélységéig érezte — de a nyugalom, a boldogság immár végképp elröpült mellőle, kidőlt, mint odafenn a hegyen a megsebzett szőllőtőkék. Dezső, a preparandista, megakadt a pályáján, de mivel a tanitás tudományaiba már eléggé beavatott volt, elment falura nevelőnek, ahol pénzt is, kosztot is kapott, a diploma tündére eltávolodott ugyan tőle, de Dezső azért nem volt csüggeteg fiu és a jövőt, a nebulókat, a katedrát mindennap frissen megálmodta.

A borügynök ebben az időtájban lett filozófus természetüvé. És megirigyelte az asztalosokat, a divatárukereskedőket, akik könnyen élnek és diszes táblákat aggattak a boltjuk fölé, pedig nem tanultak soha annyit, mint ő, annak idején Pozsonyban, a talmud-iskolában........ Agyvelejében minden bölcseség megfordult, amiket valaha tanult és amikre maga ébredt és minden gondolata a filokszéra-csapás óta odamélyedt, hogy csak ugy lehet emberségesen élni, ha az ember a két kezével keresi meg kenyerét s nem rontja meg az eszét tudománnyal, ami fölemeli az embert a földről és a levegőben kalimpál a lábaival A nyomoruság perpatvarait mind sürübben takaritották az izgalmas viták, amikben, mint mondottuk, az ügynök maradt mindig a gyöngébb és dühösebb fél. Az asszony az merev, hajthatatlan volt. Talán még jobban megedzette a nagy szegénység gyökeres érzését, hogy a fiai tanult emberek legyenek, süket volt a füle, mikor az ura lelkesedve beszélt az iparospálya gyönyörüségeiről, az esze elüzte az ügynök igazságait, amiket az szaporán hajigált a familia közé és szivós eréllyel magához ragadva a nevelés jogait, a fiukat sorba mind beigazitotta Pest felé...... Az egyetlen, terebélyes gondolata volt, — mely az elhatározás pillanatában minden más aggódó, óvatoskodó mellékgondolatot elboritott, — hogy müvelt emberek lesznek a gyermekei........

Ez a fanatikus anya hozta meg azért a legértelmesebb és legnagyobb áldozatokat gyermekeiért. Mikor a második fiut, a Lajost, küldte a fővárosba, nevetgélt és cirógatta a fiát:

— Csak szorgalmas legyél, fiacskám, dolgozz, iparkodj, ember lesz belőled...... a szegény gyerekekre vigyázz az isten........

A bátoritó szavak mögött azonban ott vonaglott az anya palástolt szenvedése megrebbent előtte a komor bizonyosság, gyermekének küzdelmei, még a könnyes arca is...... Mikor aztán már vitte a vonat a fiut, az asszony szabadjára eresztette visszafojtott fájdalmát, jajongott, sirt és szidta az urát, miért vette el őt, miért akart gyermekeket, ha nem tudja őket tisztességesen fölnevelni. A szomoru éjszakákon annyiszor nézte, az ágyában felülve, gyermekeit, a sötétség fátyolait keresztülfurta a szeme és a kicsiny szobából ellátott Pestig, az embererdőben kereste a fiát és a sóhajtása rezgett a könnyektől:

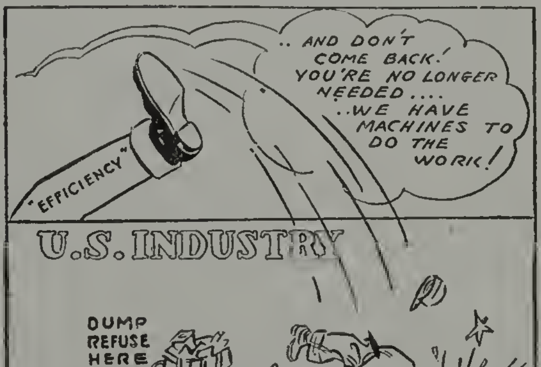
— Mit csinál most a fiu? Talán tanul? — talán nem tud — mert éhes......

A borügynök a sötétségben mindig bátrabb volt, mint nappali világitásban és merészen kimondta a szót, ami mindig a nyelvén volt:

A te raplidnak az áldozata......

A néma éjszaka a tanuja, hogy ilyenkor mi történt. Ujabb szóharc, ujabb verekedés keletkezett, a gyerekek fölijedtek álmukból, leugráltak az ágyukról és sirva körülállták az apjukat, az anyjukat, akik ha egymással szemben álltak is, a tekintetük mégis lesiklott egymásról és a szemük, a szivük csak a pesti gyereket látta; bukdácsoló utjában, éber gonddal őrt állottak mellette......

Lajos eközben az állatklinikán komolyan boncolt, még a ló patáját is szigoruan szemügyre vette és fürkészte mindenütt az anatómiai, gyógyitási rejtelmeket, amik ha megnyilnak előtte, állatorvos lesz Egy téli nap a klinikára behoztak egy lovat. Nagyon elcsigázott volt, a szolgák ugy támogatták be a szegény párát a kórodába. Mikor az orvosok melléje álltak, hogy megvizsgálják, a jámbor állat fáradtan összeroskadt........ Ez volt Lajosnak az utolsó klinikai emléke, ami később igen sokszor az eszébe jutott. Mert Lajost is kiszemelte az isten, hogy nevelje az emberiséget és egyszerre csak elkobzott tőle minden lehetőséget,



.. AND DON'T COME BACK! YOU'RE NO LONGER NEEDED.... ..WE HAVE MACHINES TO DO THE WORK!

A géptermelés a munkásságot a munkanélküliek szemétdombjára kényszeriti. Az orvoslás: szervezett erőnkkel leszállitani a munkaidőt az elvégzendő munkát egyenlő arányban beosztani.

hogy a vizsgadijakat, beiratási pénzeket megszerezze és a jó, puha, kakastejjel, varjuvajjal sütött kenyeret egy másik faluban kinálta neki, ahová bizony elment és immár Lajos is nevelősködött, ugy, mint a bátyja, a Dezső, pedig neki soha se volt pedagógus képzettsége. Amiben azonban nincsen semmi különös...... Ugy érezzük, hogy az öreg Pestalozzi nagy szeretettel és megelégedéssel néz alá az égből a szegény gyerekekre.

A vén, kitünő tanitómester is bizonyára tudja, hogy az igazi pedagógusok a szegény diákokban rejtőznek és gyönyörüen értenek a nevelés mesterségéhez, anélkül, hogy erre diplomás szabadalmat kapnának. Bizonyára látja a magasságból a nyüzsgő hadat, a kicsi és nagy diákokat, ahogy a bölcseségüket falvakban, városokban, szobákban, aranyos szálákban beléplántálják a gyöngébb emberkékbe, akik rendszerint gazdagok, annyira gazdagok, hogy olcsó pénzen megvásárolhatják az okosságukat a nyomorgó szegény gyermekektől. Igy lett nevelő Dezső, aki preparandista volt és igy vette föl a nevelés emelkedettebb hivatását Lajos is, dacára annak, hogy állatorvosnak készült.

A pedagógiai érzék különben is nagyon erősen kifejlődött a borügynök családjában. Például Sándor, mióta kinőtt a rövid nadrágból, soha többé nem találkozott a neki törvényesen kiszabott vakációval. Tekintélyes, gyémántos uri asszonyok keresték föl Sándor anyját, hogy a fiut elhóditsák a mermekeik mellé nevelőnek a vakációra és komoly versengés indult meg az urnők között Sándorért, amit a messzire előrelátó fiu minden esetben ugy oldott meg, hogy a felajánlott gyermekeket minél nagyobb számban maga köré sorakoztatta és elment velük sétálni a szigetre, a gesztenyefás utakra. Mindenképen ünnepélyes volt a jelenet, amint a legnagyobb gyerek, komoly ábrázattal, a hivatás önérzetével, a kezüknél fogja, a kabátja szárnyának segitségével huzta maga után a kisebb gyerekeket és meséket mondott nekik; a tündérregékbe pedig belétüzdelte titkos gondolatait...... lesz pénz a beiratásra...... lesz pénz az iskolakönyvekre......

A sétálva tanitás utjain érkezett el a kis bölcs a nagy állomáshoz is, hogy Pestre mehet diákoskodni. Az utolsó napok kedvesen, szeliden perdültek le a családi hajlékban. Az izgalmas nap közeledésével, hogy Sándor Pestre utazik, a borügynök szivéből elillant a harag és mert minden háboruság végén rábukkant a bus tapasztalatra, hogy utóvégre neki is szót kell fogadnia, mint a család többi tagjainak, ellágyult és aggodalma, szomorusága fölolvadt a nagy igyekezetben, hogy a gyerek bizakodó, jókedvü legyen, amikor kiröpül közülük. Az igézetes nyári este pedig, amikor a familia összeült a bucsuvacsorára, a szeretetnek meleg hullámai hömpölyögtek az asztal körül. A nap lecsuszott az ég peremén, mikor Sándor anyja behozta a vacsorát. Ugy tetszett, hogy az égi vándor csak azért sietett robot-utjában, hogy lássa, mit eszik Sándor, hogy fekszik neki a pompás ennivalóknak, amikre egészséges gyomra szomjuhozott. A nap egész arcával bebámult a kis ablakon és nagyon tetszhetett neki a vacsorázó társaság, mert legszebb és legszelidebb szineit kiváltotta szivéből és ráhintette a derék Sándorra, az anyjára, az apjára és testvérkéire. A villák, a kanalak zörögtek, de ez mostan zene volt és a nagy csöndben a tányérok, poharak ünnepélyesen csörögtek, a boros üveg pedig kacagva megcsendült, valahányszor Sándor érte nyult. Egy jó darabig beszélgetés nélkül vacsorázott a család, de mégis soha annyi gondolattal, érzéssel nem ölelték meg egymást az asztal körül ülő emberek, mint ezen az estén. A néma diskurzusban benntorlódott lobogó sziveknek minden meghatottsága, forró hangulatoknak ábrándos reménysége, mig végül is érzés, gondolat kicsordult a lelkükből és ekkor mohó versengéssel cserélgették ki egymással mondanivalóikat.

A borügynök igy szólt:

— Sándor, Pista bácsit, a doktort, keresd fel, mondd meg neki, hogy tisztelem...... ő bizonyosan felkarol majd téged......

Pista doktor, a pesti orvos, gyöngéje volt a borügynöknek és ha beszélgetett róla, mindjárt belékezdett a rokoni viszony elmagyarázásába, mely oda konkludált, hogy Pista doktornak ő az egyetlen, még életben levő nagybátyja.

— A Pista! — hangsulyozta önérzetesen a szenzál — nagy tudós, egyszer egy olyan grófot mentett meg az operációjával, akiről Billroth is lemondott. A Pester Lloydban egy gyönyörü cikket irt erről az operációról és ezóta igen nagy a prakszisa........ Mondd meg neki, Sándorkám, hogy én csókoltatom őt és elvárom, hogy segiteni fog rajtad......

Az anya is kitanitotta fiacskáját, hogy mit csináljon Pesten:

— Menj el Rezső bácsiékhoz és a Lina nénihez, mind a két helyen kérjél "napot"...... biztosan fognak adni. Mondd el nekik, szégyenkezés nélkül, hogy nekünk nagyon rosszul megy és azóta, hogy Pestről visszakerültünk, még jobban rászorulunk segitségükre. Semmi mást nem kérünk, csak téged el ne hagyjanak....

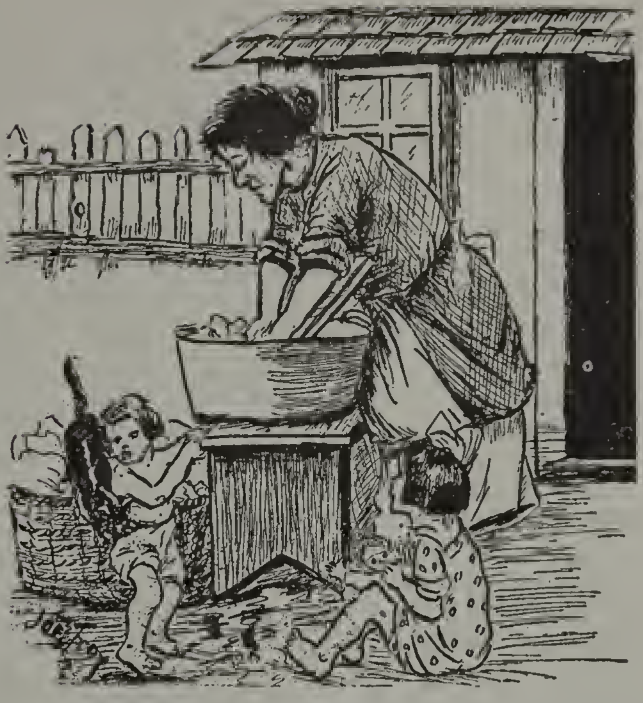
Sándor derekas étvággyal fogyasztotta a cukrászsüteményt, ami az ünnepi lakomának tulajdonképpeni eseménye volt s beszélgetés közben evett, mindig evett:

— Pista bácsihoz biztosan elmegyek. Emlékszem, mikor Pesten laktunk, egy szer barackot nyomott a fejembe........ azt hiszem, ő szeret minket......

— A Lina néni szegény, hogy adhat ő napot......? Mikor náluk voltunk, sirt......

A jövendő előfeltételeit ez estén mind sorra vették és elhitették önmagukkal, Sándorral, hogy bőven fog napokat találni, a negyven forinttal pedig, amit a vakációban keresett, bátran lemehet Pestre, sok szegény gyereknek még annyi sincsen és nem szabad félni, leckéket kell keresni, a beiratásnál pedig oda kell állni szépen az igazgató ur elé és megmondani neki:

— Nagyságos igazgató ur, én szegény gyerek vagyok, legyen szives engem diákok mellé tanitónak ajánlani....



A munkás család tragédiája. Mig az apa munkát talál a családfentartása az anyára hárul.

Ez a komoly ötlet a Sándor anyjáé volt, aki világosan megmagyarázta a bucsuzó diáknak, hogy Pesten meg lehet élni, csak akarni, dolgozni és tanulni kell. A borügynök pedig a pesti küzdelmek körülményeinek megvitatásánál nem feledkezett meg a másik két fiuról, Dezsőről és Lajosról sem s biztatta Sándort:

— Néha-néha aztán majd ők is küldenek neked valamit......

Ilyformán a meghitt, hangulatos órákban, a család tisztán, élesen látta megnyilni maga előtt az utat, melyre Sándor bátran ráléphet és mert a legsötétebb tekintetü ember szemében is fölragyog a fordulatos pillanatokban a szivárvány, a reménységek délibábja, most a lágyszivü borügynök volt a legvérmesebb, a napok, az ennivaló napok dolgában és különösen a Pistát, a doktort, emlegette sürün, akinek Sándorral azt is megüzente, hogy majd egyszer lemegy hozzá, a jobb lábából sehogy sem akar kimenni a köszvény, majd vele megvizsgáltatja, kikuráltatja...... Az alkonyat odakünn szépségében megnövekedett és hüvös árnyaival besuhant a családhoz; az ecetfák megszabadultak a nap tikkasztó ölelésétől, teli tüdővel lélegzettek és szagosságától a barna levegőben beusztatták egyenesen a dunamenti szobácskába, ahol most már tüzes, nemes borok kerültek az asztalra. A borügynök sorra vette a bormustrákat, amiket jeles cégek rábiztak, csináljon üzletet velük, ha tud. A buzgó férfiu azonban ilyen irányban, már régóta meddő volt és évenként egy-két hektoliter bornak eladásánál tovább nem jutott, igy, hogy a mustrák értéktelenül el ne heverjenek nála, a családjával megidogálta azokat, ha pediglen kifogytak, ujra rendelt a cégeknél, akik a nagy forgalom nevében mindig utnak inditották a kedves, kicsi üvegeket a borügynök hajlékába. Igy történt aztán sokszor, hogy finom borok mindig voltak odahaza, ha melléje a hus, de még a kenyér is néha-néha disszonánsan hiányzott.

A borügynök pislogott. Ez rendes jelenség volt az ábrázatán, ha nemes borokat izlelt. A birálata, a szakértő megelégedés lebbent meg szempilláin, kitünőeknek találta az italokat. A családfő mind sürübben hunyorgatta a szemeit és koccintgatott a feleségével, Sándorral. A borok aztán halkan, áhitatosan behajókáztatták a családot a jövendőbe, amikor Sándor könyvelő lesz, bőrös-hátu könyvekben fogja igazgatni a világ dolgait, érettségije lesz, nem fog három évet szolgálni és aranyláncot, aranyórát fog hordani bizonyosan......

Minden szegény ember költő, ha egy kicsit beborozott. Szomoruság, komorkodó árnyék elillan mellőle és a képzelet tündéri sétára viszi a nyomor gyermekét. Semmi bizonyosság előtte, de fantómok rajzanak körülötte, amelyek betöltik hittel a lelkét és megverik a szemét káprázatos sejtelmekkel. A bucsuzó család szivét megcsókolták a jövendő álmai és a borügynök lehajtotta az asztalra nehéz fejét. Énekelni kezdett. Egy bus német dalt, a két gránátosról, akik siratják a császárt, a császárt.......

A hangja reszketett az izgalomtól, amint vitte-vitte a borongós dal hullámain a két gránátost Franciaország felé és megcsuklott az éneke, aláesett a hangja, mikor a gránátos lehorgasztotta a fejét, idegen világban, gyászos Németországban. Soha ugy ember még nem busult Napoleon imperátor bukásán, mint a jámbor borügynök, aki lelke minden titkos siralmát beléfonta a tragikus nótába.

Ki tudja, mi szakadt föl a szivéből, mi cikázott át agyvelején ez érzelmes pillanatokban? Igy nem lehet tudni, miért hullott a könny énekéből és miért temette arcát a két kezébe, mikor kimondta, dallamosan elzokogta:

— Der Kaiser, der Kaiser gefangen...

A szobácskában fölgyujtották a lámpát, az alkonyat elbucsuzott Sándortól — mi sejtjük— a vacsora és minden jó ennivaló szintén komolyan bucsuzkodott......

Ám Sándor gyomra most boldogan duzzadt és egészséges testét, az estén, az egyetlen, gyönyörüséges érzés ölelte át, hogy jóllakott és az utolsó éjszaka, amit odahaza töltött, az is kegyelmes volt hozzá, mert álmaiban ujra az asztal mellett ült és evett, evett, mindig csak evett......

A könyv fejlődése a nyomdászatig

SZABADY ISTVÁN

A KÖNYV a tára mindazon tudásnak, melyet az emberiség hosszu élete folyamán fölhalmozott. A könyv az, amely lehetővé teszi az élő emberiségnek, hogy régen elmult korok életébe, szokásaiba bepillantást nyerjen. A könyv az, amelynek révén hozzájutunk azon ismeretekhez, melyek a mai és a jövő emberiség boldogulásához, jólétéhez fölhasználhatók.

A "könyv" szónál, közel ötszáz esztendeje, a nyomtatott könyvre gondolunk, mert ugy a legrégibb, mint a legujabb irások nyomtatásban állanak rendelkezésünkre. Csakhogy a könyv sokezer éves multjához képest, ez az ötszáz esztendő elenyésző semmiség. Sokezer esztendő pergett le addig, mig a nyomtatásnak átadott roppant tömegü örökség, régibb korok másfajta könyvei révén fölhalmozódott.

A jelenkor nyomtatott könyveit, a középkor "kódex" könyve, a kódex könyvet a klasszikus ókor-tekercs könyve, ezt az őskorban használt irásos fa- és agyagtáblák előzték meg. De még a fa- és agyagtáblákra való irást is megelőzték a történelemelőtti idők ismeretlen messzeségben szokásos falföliratok.

Ez az a véghetetlen kor, melynek homályában a könyv legfontosabb föltétele: az irás, keletkezett. Nem a megbizhatatlan emlékezőtehetség, hanem az irással megörökitett gondolat tette lehetővé, hogy az utódok a régiek tudását örökölhessék. A leirt gondolat megmaradt a jövő számára. Századokon és ezredeken keresztül viszi a könyv az emberiség egyre duzzadóbb és mélyrehatóbb tudását az ismeretlen messzeség forrásaiból szedve, az ismert korokon keresztül napjainkig. Összeköt bennünket a multtal, a mult tapasztalatait egyesitve mutatja a jelen és utókor emberei számára az utat a boldoguláshoz.

A könyv történetének kezdetét nem tudjuk. A multba visszamenve, eljutunk egy bizonyos határig, melynél a tudás megáll, ahol már csak mélytudásu emberek, hosszu tanulmányozás után képesek rájönni, mit jegyzett föl a mult krónikása. Igy azután a kort is, ahonnan ered, meg lehet határozni. A tudósok a legrégibb kőtáblákat is — fáradságos munka után — el tudják olvasni, sőt a korát is meghatározzák. De ezideig értetlenül nézzük a reánk maradt kőkorszakbeli karcolásokat, melyek látszatra irások. Ki tudja, ezek is milyen fokozatos fejlődés eredményei.

Annyi bizonyos, hogy a kultura a történelemelőtti idők homályából árad elő.

A könyvnek kezdettől fogva két fő alkotó eleme volt: a szöveget rögzitő irás és az erre való alkalmas anyag, mely idők folyamán mindig más és más volt. Ugy az anyag, mint az irás változott. Az anyaggal együtt változott a könyv alakja és a mód, mely az irást anyagra alkalmazta. Ezért a könyv történetét az anyag változása osztja korszakokra. A kőkorszak embere falra, sziklára, stb. rakta jeleit, hogy gondolatait, vagy megfigyeléseit társaival és utódaival közölhesse. De e feliratos emlékek még nem könyvek. A könyv felé való fejlődés a feliratnak a falról, a szikláról való leválásával kezdődik, mikor kisebb, hordozható anyagra kezdtek irni azért, hogy a leirt szöveg messzebbre is terjedhessen, hogy ne csak az olvashassa, kit utja a felirat felé vitt. Igy a felirat több olvasóhoz juthatott el, mint olvasó a felirathoz.

A könyv eleinte merev anyagokból készült, valószinü, a legelsők fatáblák voltak, melyekből emlék nem maradhatott számunkra, mert idők folyamán a fa elporladt. De a reánk maradt kő- és agyagtáblákra irt szögletes jelek azt engedik hinni, hogy az irásjelek szögletességét a fa rostos felülete szabta meg és e jeleket használták a sima kő- és agyagtáblákra is. Az anyag merevsége az irást is merevvé tette. Az ujabb korok simulékony anyagai: a papyrusz, pergamen és a mai papir használatával az irásjelek formája is változott. A könyv alakja is az anyag természetétől függ. A merev anyagok könyvalakja, a tábla volt, melyet kapcsokkal vagy kötelekkel fogták össze, a simulékony anyagok könyvalakja a tekercs, a kódex és a nyomtatott könyv.

A több méter magasságba növő papyrusz beléből gyártották az irópapirt. A belet a szárból kihámozták, hosszában vékony szeletekre vágva, nedves deszkákon egymásmellé fektették, rájuk keresztben ugyanolyan másik réteget raktak, vizzel leöntötték, a kettős réteg péppé olvadt, ezt préselték, kisimitották, a széleit egyenesre vágták és a sima leveleket egymáshoz ragasztották. Irásra azt az oldalát használták, melyen a rostok keresztben feküdtek, mert a másik oldalon az irónád a hosszában fekvő rostokon botorkált. Összehajtogatni, rostjai törékenysége miatt, nem volt tanácsos, de összegöngyölni nagyszerüen lehetett. Igy született meg a könyv hosszu évezredekig fönnálló tekercsalakja.

Egyiptomi képeken látható az irnok, miként ir a földön ülve, a térdén fekvő iródeszkán, a könyvtekercs egyik-egyik vége tekercsben lóg le a deszka oldalain. Tintája enyvesvizben föloldott szines festék.

Ugy az egyiptomi, mint a görög és latin tekercs egymástól némileg különböznek. Az egyiptomi tekercs diszesebb a görög és latin tekercsnél. A görög szintén elüt a latintól, nem használ annyi képet, mint a latin.

A krisztus utáni negyedik században a papyrusz-korszak a vége felé jár, mert Egyiptom arab kézre került, a papyrusz sorompói lezárultak. Uj irásra alkalmas anyagnak kinálkoztak bizonyos állatbőrök. A papyruszt fölváltja a pergamen. Pergamenre másolták a középkori szerzetesek az ókor klasszikus müveit is. Tehát a müveket az utókor számára a szerzetesek mentették meg, mert a papyrusz kényes anyaga a nedvességet nem birja, néhány század alatt elporlad. Ami a papyrus irásokból még meg van, azt a Vezuv hamuja és Egyiptom száraz homokja mentette meg az elpusztulástól. Innen került a meglévő néhány darab a muzeumokba.

A pergamen nagy előnye, hogy irásra mindkét oldala alkalmas. E nagy előnyt kihasználva, a tekercsről áttértek a füzetes leveles Kódex formára. A ránkmaradt müvekből látható, hogy a kódex a szegények, az őskeresztények könyve, a gazdagok ragaszkodtak a roppant drága anyagu tekercshez. Ahová eljutottak a keresztények, eljutott a kódex is. A biblia minden kézirata kódexben maradt meg.

Érdekes, hogy e korból maradt szobrocskák az ó-testamentumi prófétát tekerccsel a kezében, az evangelistát kódex-el a kezében ábrázolják. Egy-egy ilyen szobrocska szemléltetően mutatja az átmenetet az ókorból a középkorba.

A római birodalom bukásával minden csupa rom; az intelligencia elszegényedett, a müveltség elhanyatlott, csupán a papság és néhány kivételes szellemü ember tudott irni-olvasni. Ők irták a könyvet és ők olvasták is. A régi és uj irásokat a kolostorok szerzetesei másolták és igy a könyv is a kolostorba szorult.

Ami ma a nyomda, az volt a középkor számára a kolostori másolószoba. A fiatal bárányok és gidák bőréből készült pergamenre irták a diszesebb müveket; az öregebb juh, kecske, borju vastagabb pergamenjét a közönségnek szánt müvekre használták. A szakadásokat lószőrrel összevarták. (Az apácák finom selyemfonalat használtak.) Az összefüzött kéziratokat két erős fatábla közé kötötték. E kötéstől kapta e könyv a kódex nevet.

A finomabb munkákat erős disznóbőrbe burkolták, sárgaréz sarkokkal és kapcsokkal látták el. Amennyiben a pergamen sulyos, igy a kötésnek erősnek kellett lenni.

A nagyon drágán megfizetett müveket az anyaméhből kivágott báránykák bőréből készült szüz pergamenre irták, drága kövekkel diszitett elefántcsont táblácskákba kötötték.

A tudomány teljesen a kolostor falai közé szorult. A világ tudatlan embereit szinte óvták a betütől. Amit a népnek tudnia kellett, azt papjai nemzeti nyelvén élőszóval magyarázták.

A 12-ik század vége felé azonban ez kezd megváltozni. A világi embert kezdik a nép között élő kolduló barátok irni-olvasni tanitani. A gazdag szerzetesektől a szellemi vezetést elragadják. A nép számára irnak, nem latinul, hanem az ország nyelvén. A könyv terjesztésével terjed a tudás, a felvilágosulás — az uj kor szülője. Vajudása három évszázadig tart. Ekkor jön a könyv előállitásának uj módja: a nyomdászat. Megnyilnak a szellemi sötétség ablakai, a szellem friss levegőhöz, világossághoz jut. Ahogy a lőpor fölrobbantotta a feudalista rendszert, az iránytü a tengeri ködöt győzte le, — a nyomdászat az egyház szellemi irányitását törte meg. Érdekes, hogy mindhármat Kina adományozta.

Európa a könyv minden elemét, az irást, az irásra alkalmas anyagot és azok természetes alakját — Ázsiából és Afrikából kapta.

A papir is, a nyomdai sokszorositás eszméje is Kinából származott. A papir utját nyugat felé nyomról-nyomra tudjuk követni. Keresztül jött vad hegyi és sivatagi karaván utakon, három egymással harcoló világ akadályain: a kinai falon, a mohamedánság és kereszténység határövén.

Kina irásanyaga a fa- és agyagtáblák helyett a bambusz-szelet, később a selyemtekercs volt. De a nagyon termékeny kinai irodalom számára nem volt elég selyem, mely igy azt nagyon költségessé tette. Olcsóbb anyagok után kellett nézni.

Krisztus előtt 105-ben már van papir, amelyet vizben rothasztott szövetrongyokból gyártottak.

Századok mulva, mindenféle akadályokon keresztül, végre eljut a papir Európába is. Majd később a nyomdászat kezdetleges formája: a tábla-nyomat, mely szintén kina eredetü. Ebből lassan-lassan a betü mozgathatóságának fölfedezése után, az első kezdetleges nyomdászat.

Amilyen hosszu fejlődés vezetett az őskor emberének kezdetleges rajzaitól a szótagjeleken át — a betü irásáig, éppen olyan hosszu fejlődés vezetett az agyagtábláktól a papyrusz szöveten át az iró-papyruszig, a kinai selyemtekercstől a rongypapirig, a bélyegzőtől a szedés-nyomásig, mely a civilizáció számára az utat megnyitotta. Azon haladva ért a mai emberiség a kulturának jelenlegi magasságára.

Az IWW lapjai

INDUSTRIAL WORKER, angolnyelvü hetilap. Egy évre $2; egyes szám ára 5 cent. Megjelenik 555 West Lake St., Chicago, Ill.

IL PROLETARIO, olasz hetilap. Egy évre $2; egyes szám ára 5 cent. Megjelenik Brooklyn, N. Y., Box 24, Sta. 1

GOLOS TRUZENIKA, orosz havi folyóirat. Egy évre $1; egyes szám 15 cent. Megjelenik 555 W. Lake Street, Chicago, Ill.

BÉRMUNKÁS, magyarnyelvü hetilap. Egy évre $2; egyes száma ára 5 cent. Megjelenik Cleveland, O. Box 3912 S. S. Sta.

TIE VAPAUTEEN, finn havi folyóirat, 32 oldalas; $1.75 egy évre; egyes szám 15 cent; májusi és decemberi példány 48 oldal, 25c. Megjelenik 555 W. Lake Street, Chicago, Ill.

INDUSTRIALISTI, finn napilap. Egy évre $4.50, fél évre $2.50, három hónapra $1.50. Egyes szám 5 cent. Megjelenik Duluth, Minn., Box 446.

JEDNA VELKA UNIE, csehszlovák hetilap. Egy évre $2; egyes szám 5c. Megjelenik 11314 Revere Ave., Cleveland, Ohio.

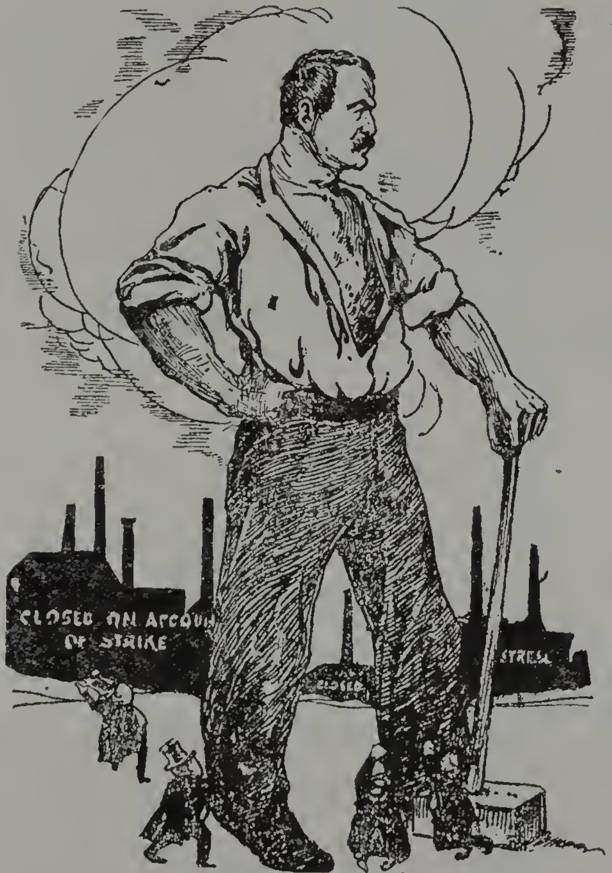
SOLIDARIDAD, spanyol félhavi lap. Egy évre $2; egyes szám ára 5 cent. Megjelenik New York City, N. Y. Box 32, Station D.

A gyáripar

L. KOVALIK

FÁRADT, fehér falak, kialudt kemencék és az égbe nyuló kémények jelzik, hogy itt, vagy ott valamikor gyár volt. Csak volt, mert ma már a helyiségek gép nélkül állnak, vagy ha van is bennük még gép, azt a rozsda marja. Nem csak egy országban, mint például Csehszlovákiában, hanem az egész világon találunk ma már becsukott gyárkapukra. Világszerte áll a gép s vele szünetel a munkáskéz is. Az őrült profit annyira egyhelyre koncentrálta a technikát, hogy ma már nem törődik kisebb gyártelepek rozsdamarta gépeivel.

Ha gyáriparát s ugyanekkor Csehszlovákia belpolitikáját figyelemmel kisérjük, ugy a gyarmatpolitikának eredményét látjuk a gyárak kiépitésében. Állnak a gyárak, azt hinné valaki, — Csehszlovákiában a legjobban élünk, szükségünk már semmire sincsen és lám, utca-hosszat munkát kereső robotosokkal találkozunk, kiknek lapos a gyomruk, halálvirágos az arcuk, rossz cipőben, vagy egyszerüen cipő nélkül járnak.



Csak egy pár évet kell visszafelé haladnunk, hogy a gyarmatpolitika kezdetére jussunk, ahonnan kiindulva, szemünk előtt záródnak le Csehszlovákia egyik részének: Szlovenszkónak gyárkapui.

Szlovenszkó egyik legrégibb gyára udvarán egész legelőt és kóróerdőt találunk.

"Nem kell szövet, nem kell üveg, semmi sem kell, nem fizetődik ki, mivel a munkások nagyon magas bért követelnek......" Érdekes! És mégis munkát kérnek, bármilyen összegért is hajlandók volnának eladni munkaerejüket. És még sincs munka. Igaz, mi már tudjuk, miért nincs munka és mit jelent az: "Nem kell semmi!" És azt is tudjuk: nem is juthatunk munkába e társadalmi rendszerben. Nem azért láncolta le gyáraknak a kapuit a tőkésosztály, hogy azt egyhamar ki is nyissa.

Az üres gyárak figyelmeztessenek minden munkástestvért az egész világon arra, hogy a világ minden országában, nem csak Csehszlovákiában, elvonják a munkástól a megélhetési lehetőséget és az utcára kerülve, a nyomorba taszitják.

Ha ezen segiteni akarunk és ha a gyárakat elzáró lakatokat végérvényesen összetörni akarjuk, ugy szervezkedjünk iparilag az egyetemes szervezetbe: az IWW-ba.

Mert az IWW az a szervezet, amely az iparokban dolgozókat egy szebb, biztosabb jövő felé irányitja.

BÉRMUNKÁS NAPTÁR 1935

AZ
INDUSTIRAL WORKERS OF THE WORLD
ELVINYILATKOZATA

A MUNKÁSOSZTÁLY és a munkáltató osztály között semmi közösség nincsen. Nem lehet béke mindaddig, amig éhség és nélkülözés található a dolgozó emberek milliói között s az élet összes javait ama kevesek birják, akikből a munkáltató osztály áll.

● E két osztály között küzdelemnek kell folynia mindaddig, mig a világ munkásai mint osztály szervezkednek, birtokukba veszik a földet, a termelő eszközöket és megszüntetik a bérrendszert.

● Ugy találjuk, hogy az iparok igazgatásának mind kevesebb és kevesebb kezekbeni összpontosulása a szakszervezeteket (trade unions) képtelenné teszi arra, hogy a munkáltató osztály egyre növekvő hatalmával felvegyék a küzdelmet. A szakszervezetek olyan állapotot ápolnak, amely lehetővé teszi, hogy a munkások egyik csoportját az ugyanazon iparban dolgozó másik csoport ellen uszitsák és ezáltal elősegitik, hogy bérharc esetén egymást verik le. A szakszervezetek segitenek a munkáltató osztálynak a munkásokba beoltani ama tévhitet, hogy a munkáltatókkal közös érdekeik vannak.

● E szomoru állapotokat megváltoztatni és a munkásosztály érdekeit megóvni csakis olykép felépitett szervezettel lehet, melynek minden az egy iparban — vagy ha kell, valamennyi iparban — dolgozó tagjai beszüntessék a munkát bármikor ha sztrájk vagy kizárás van annak valamelyik osztályában, igy az egyen esett sérelmet az összesség sérelmének tekinti.

● E maradi jelszó helyett: “Tisztességes napibért tisztességes napi munkáért,” ezt a forradalmi jelszót irjuk a zászlónkra: “LE A BÉRRENDSZERREL!”

● A munkásosztály történelmi hivatása, hogy megszüntesse a bérrendszert. A termelő hadsereget nemcsak a tőkésekkel való mindennapi harcra kell szervezni, hanem arra is, hogy folytassa a termelést akkor, amikor a bérrendszer már elpusztult. Az ipari szervezkedéssel az uj társadalom szerkezetét épitjük a régi társadalom keretein belül.

A BECSTELEN KENYÉR

Kenyér! Ki megirná egyszer az éneked,
Istennek époszát, emberek romlását
Zengené világhasgató orkán sipjain,
Gyáva lesz általad aki erős,
Vakon merő a sunyi tolvaj,
Gyilkolni, rabolni, hazudni tanitasz.

Éhes száju sirok tömkelegében
Megfojtó barázdák kin ásta nyomán,
Büntudat pórázán hajtod az éhest.
Aprózod a szivét minden falatért
Rablasz egy álmot, ültetve helyébe
Kigyófejü, méreg fogas ostort.

Drága kenyér posványba kerültél
S fertőbe kerited aki keres.
Ne irja addig éneked ember,
Amig nem tisztulsz és ki nem irtod
Templomostól a bünfiadzót,
Hogy öröm sava légy, élet kenyere!

Megváltott apostol, idvezitők,
Nektek egyébb csába meséket
Zeng a kenyér, — a tiszta kenyér.
Nincs szebb e meséknél. . .
Ember a hőse, emberebb mint mi:
Embernevelő, bálványtalan ember.

Fényes Samu.

Az IWW szintiszta ipari programja

Irta: Ralph Chaplin

az Industrial Worker szerkesztője.

AZ IWW programja az egyetlen szintiszta, kifejezője az ipari unionizmusnak. Forradalmi munkásszervezet, melynek semmi közössége nincs az ugynevezett “forradalmi” politikai pártokkal egyetlen pont kivételével, melyszerint azok is elismerik, hogy az osztályharc a munkásság életének alapvető tényezője.

Elvinyilatkozatunk első szakasza szilárd alapra helyezi lábunkat, ami a munkásosztály problémájának megközelitését illeti. Nem az IWW találta fel az osztályharcat, nem is a szocialisták, kommunisták, szindikalisták, vagy anarchisták. Az osztályharc a legfontosabb tényező azon férfiak és nők életében, akik a körülmények által arra vannak kényszeritve, hogy a mindennapi kenyeret azáltal szerezzék meg, hogy másoknak — a kapitalista osztálynak — könyörögjenek munkáért.

Sokféle elmélet van forgalomban az osztályharcot illetőleg, azonban ezeknek legnagyobb része nem-munkás és nem-termelő — a különféle “forradalmi” politikai pártokhoz tartozó filozófus és theoretikusok elméjének szülöttjei. Ezeknek némelyike ellentmondó, sok pedig reménytelenül haszonleső. A gyakorlatban valamennyi megtévesztő, mert a munkásság különböző frakciókra való szaggatását szolgálják.

A hátránya ezen nem-termelő “forradalmi” philosophiának az, hogy a munkásságot sok különböző irányba vezeti, — egyik zsák utcából ki a másikba be. Más ok nem is volna, hogy az IWW elfogadja a “forradalmi” politikai pártok theoretikus és filozófusainak ideálját, mint hogy ezzel együtt elfogadná a “forradalmi” politikusok vezetését is. A multak tapasztalatai bizonyitják, hogy helytelen volna még kifejezéseiket és jelszavaikat is elfogadni ezen nemtermelő radikális szektáknak. Az IWW még mindig képes volt a saját lábán megállni és müködni nélkülök. Látva azt az irtózatos zagyvalékot, amit a politikusok csináltak Európa és más országok mozgalmaiból, az IWW egyáltalán nem kockáztathatja meg, hogy tőlük kölcsönözzön harci módszert.

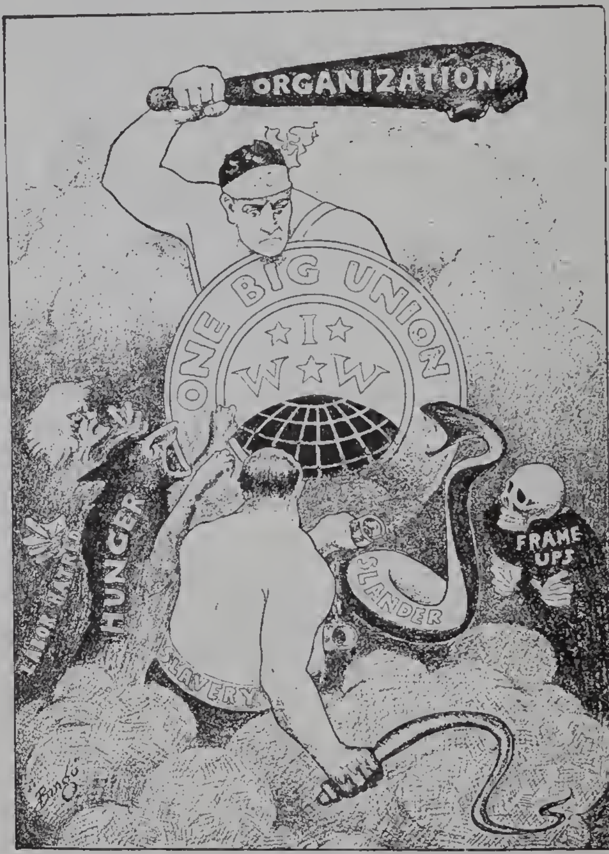
Szavak, mint “proletáriátus,” “burzsoázia,” “kis burzsoázia,” “parlamentarizmus,” “gazdasági meghatározás” és még egész garmada a hasonló sallangoknak, bár még mindig használatban vannak, azonban oly régiek élettelenek, jelentőségtelenek és elavultak, hogy az agitátort, aki használja ezeket, szélhámosnak, vagy csalónak tüntetik fel. Aki kételkedik ezen állitásban, próbálja meg ezen elavult szólamok használását az átlagos gyári munkás, vagy szakszerevezeti tagság előtt. Az IWW törekvése — és mindig is az volt, — hogy helyettesitse ezen nem megfelelő szavakat olyanokkal, amelyeket az átlagos munkás is könnyen megért. Az IWW által kiadott “Little Red Song Book” (angol verses könyv) nagyobb elterjedtségnek örvend és többen olvassák mint a “forradalmi” politikai pártok bármely, vagy valamennyi verseit és az oka ennek, hogy ezek egyszerü nyelvezettel vannak megirva.

Az IWW irányát és célját illetőleg, sok megtévesztő felfogás van forgalomban. Még a saját szónokaink is, akik különböző “forradalmi” politikai pártok neveltjei, kétségtelenül akaratuk ellenére, elkövetik azt a hibát, hogy elmulasztják kiemelni a szintiszta, semmi mással össze nem hasonlitható, kizárólagos ipari programját az IWW-nak. Ennek eredményeként a munkások, akik az IWW irodalmát olvassák, vagy szónokait hallgatják, oly véleményt táplálnak, mintha az IWW valami felhigitott szocializmus, kommunizmus, anarchizmus, vagy kitudja milyen izmus lenne. Az igazságtól misem állhat távolabb, mint ily felfogás. Az IWW szerkezete, harcmodora és végcélja meghatározott és különbözik minden más radikális szervezetétől.

Ha bárki kételkedik ezen kijelentésben, tegye fel önmagának a következő kérdést: Ha a szocialisták megszereznék a politikai állam kormányzatot, vagy a kommunisták az állam hatalmat és holnap felállitanák a Soviet diktaturát, mily hatással volna ez az IWW programjára? Ha a kérdező elfogulatlanul őszinte önmagával szemben, el kell ismernie, hogy akár szocialista, vagy kommunista kormányzás alatt, az IWW kényszeritve volna folytatni az agitációt az ügyeknek a munkások által való irányitásáért az ipari szervezeteken keresztül, éppen ugy mint ma. A fenti eshetőségek közül bármely következne be, az IWW célja nem teljesülne és a céltudatos szervezett propagandára éppen oly, vagy még nagyobb szükség volna, mint a multban. Az is feltételezhető, hogy az IWW iránti ellenszenv a politikusok és komiszárosok részéről nagy volna, talán nagyobb mint ma. Kétséges, hogy a teljhatalmu állam, miután a különböző munkásnyuzó intézményeket egy hatalmas rablótestületté összpontositotta, kevesebb joggal, vagy irigységgel őrködne hatalma felett, mint a magán érdekeltségek által irányitot korporációk ma. Minden eshetőségben, a politikusok mellőzését célzó propaganda a szervezett és müködésre alkalmas termelő hadsereggel, a politikusok és komiszárusok szemében, nem sok elnézésre számithatna. Elképzelhető, hogy mi történne egy IWW szónokkal, ha Moszkva, vagy Leningrádban felállna beszélni az utca sarkon, a Stalin diktatura alatt. Az Ipari Demokrácia még mindig az elérhetetlen "égimanna" a Munkások hazájában élő "felszabaditott" proletariátusnak.

Az IWW azt valja, hogy az állami épületeken a zászló kicserélése — egyik csoport politikusnak a kirugása és másik csoportot tenni a helyükbe — még nem jelent forradalmat. Az IWW állitja, hogy a forradalom nem lehet teljes, amig a kányafészket, amit politikai államnak ismerünk (és a haszontalan parazitákat és kányákat, akik azt benépesitik) megnem semmisitjük és a termelők tudományosan felépitett adminisztrációjával nem helyettesitjük, mert félrevezetés a rendszer változást illetőleg forradalminak nevezni bármit, ami ennél kevesebb. Ezért a szocialista kormányzás alatt az IWW-nak több eshetősége volna a börtönbe jutni, mint a jelenben.

Az IWW ipari union szerkezete, vázlata az Uj Társadalomnak. E tekintetben, sem a szocialistáknak, sem pedig a kommunistáknak nem sok igérni valójuk van. Mindkét esetben, amikor ipari unionizmusról van szó, ugy a szocialisták, mint kommunisták ipari



Ideje, hogy szétüssünk köztük.

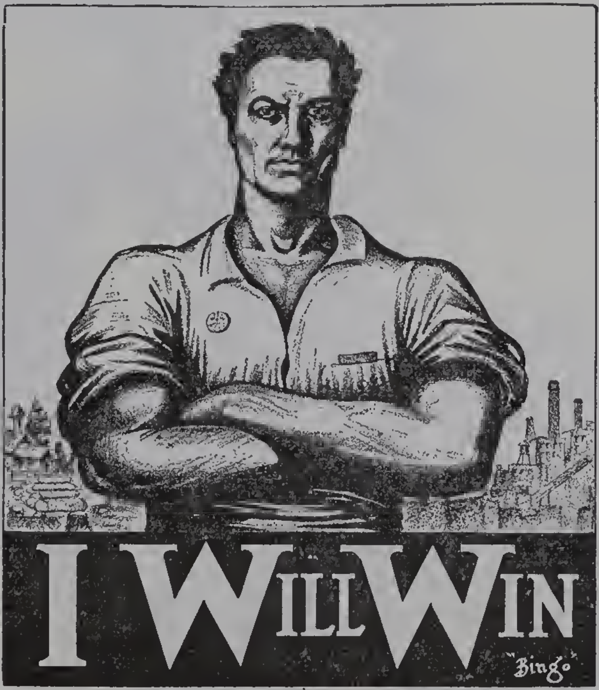
szervezetének minden időben a politikusok karmaiban kell lenni — és csak uszálya lehetne a politikai sárkánynak.

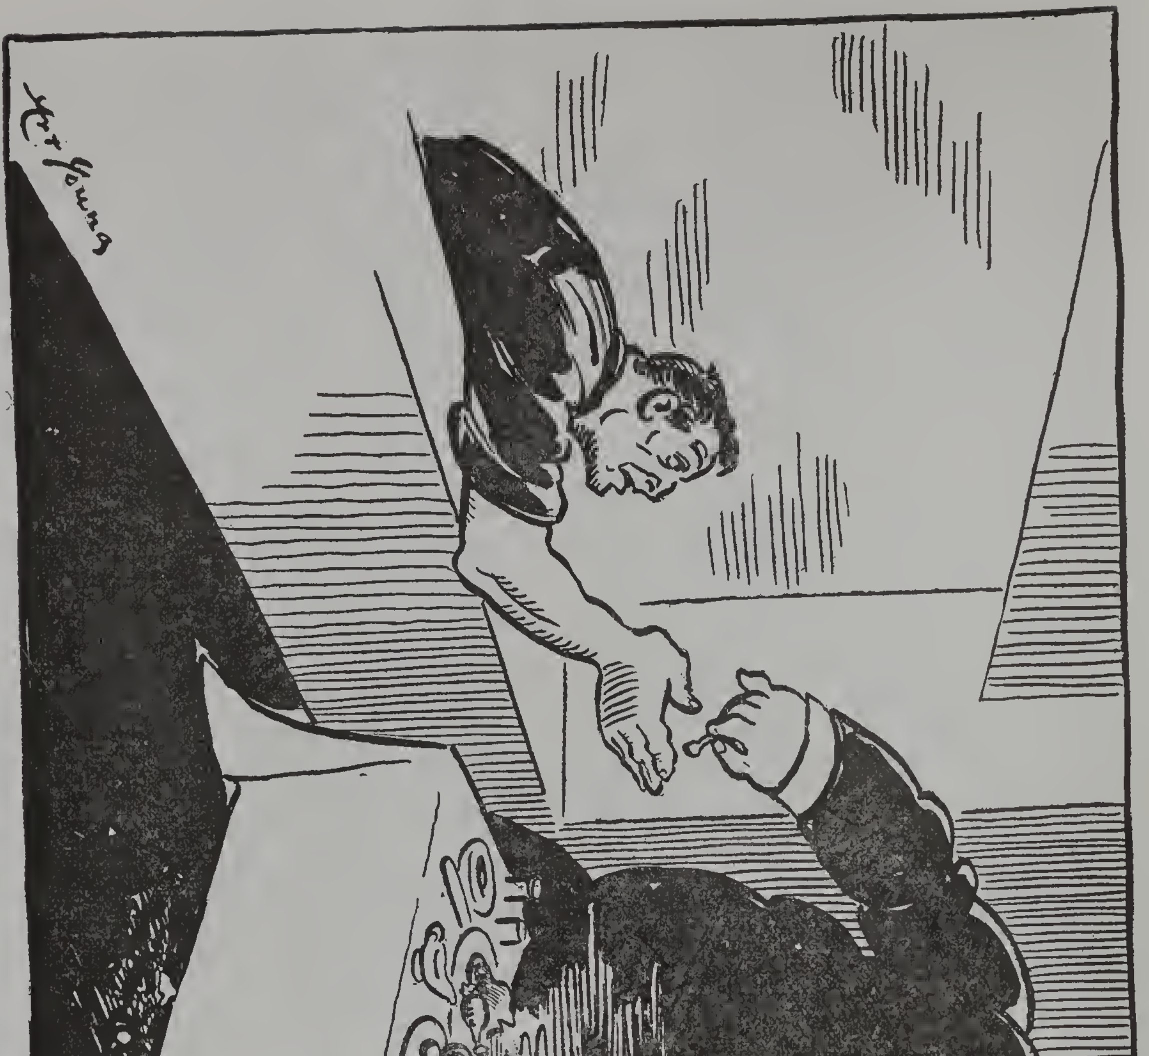
A szigoruan ipari, direkt akció, — **sztrájk és általános sztrájk** — taktikája az IWW-nak, alapjában külömbözik a "forradalmi" politikusok taktikájától, akik ennek használatát kizárólag a politikai párt előmozditása érdekében hirdetik. A szavazatfogdosó politikai cécók; az állami épületek előtti demonstrációkkal az IWW mint céltudatos ipari mozgalom, kevés szimpáthiával viseltetik. Még kevesebbel a szerencsétlen és gyermekes tervvel, hogy a munkásság utcai harcokat rendezzen a cél elérése érdekében.

Az IWW harca a végcélt illetőleg — a tudományosan irányitott Ipari Társadalom — alapjában különbözik az állam által irányitott, politikusok által uralt társadalmi tákolmánytól, melyet a szocialisták és kommunisták kinálgatnak. Mind a kettő sikra szállt megdönteni az ugynevezett kapitalizmust; mind a kettő szeretné a profit rendszert megszüntetni, de egyiknek sincs még távolról sem szándéka megtámadni az alap okot; a BÉRT. Az Egyesült Államokban, például, amikor a kapitalizmus már felbukott és az állam veszi át a kapitalisták, bankárok és tőzsdések funkcióját, a gazdasági szerkezet érintetlen marad, annak kivételével, hogy "Forradalmi" vörösre lesz festve. Ez történt Oroszországban, ahol a profit rendszert elejtették, de a bérrendszer még mindig uralkodik.

Az IWW elvinyilatkozata félreérthetetlenül kimondja, hogy a forradalmi munkásság végcélja a BÉRRENDSZER eltörlése. Következetesen, a bérrendszer nem lehet eltörölve azáltal, ha a munkásokat az állam "fizeti" a magán munkáltatók helyett. Nem szabad elfelejteni, hogy a marxi meghatározás a munkások teljesitő képességének megmérésére a szocializmus alatt emberi órákban még mindig tág fogalom. Az IWW nem követi ezt, először: mert nem válik be a modern ipari rendszerben, másodszor; mert egy másik módja a bérrendszer folytatásának, melynek eltörléséért az IWW sikra szállt. Ez természetesen azt jelenti, hogy a pénz, mint csereérték teljesen megsemmisül — **és örökidőre.** A fő funkciója a tudományosan irányitott Ipari Társadalomnak a termelés és a JAVAK SZÉTOSZTÁSA.

Az IWW nyiltan szakit a régi, haldokló társadalmi rendszerrel. Ezen lépés megnemalkuvó álláspontot jelent az UJ érdekében. A bőség érájában, melyet a modern technológia tett lehetővé, az IWW ketté vágja a "forradalmi" gazdasági és anyagi bonyolultság górdiusi csomóját. Nem kevesebb, mint a magas termelőképességü, állandóan fejlődő, részben automata gépkorszak által elérhető tökéletes rend, amiért az IWW harcol. Ezt a régi szólásmódot — melyszerint "a munkás az általa termelt javak teljes értékére jogos" nevetségessé teszi **A javak termelése és szétosztása a munkások által, a saját intézményeik, — az Ipari Szervezetek segitségével. Ez elég.** És ez az egyetlen alkalmas módszer. Minden másnak a számontartása szükségtelen és haszontalan idő és energia fecsérlés.





A termelt javakból a munkásnak is jut.

A kapitalizmus betöltötte a hivatását

Irta: Wágner József

az IWW központi titkár-pénztárosa.

MIUTÁN betöltötte a történelem által reárótt dicső hivatását, a kapitalizmus a halállal vivódik. A valóságban és minden gyakorlati ok szempontjából a kapitalizmus már régebben halott és csak az élet látszatát tartották a hullában mesterséges eszközökkel; a kukacok és férgek a különböző politikai kalandorok és diktátoroskodni akarók formájában, fertőzték a rothadó tömeget, mely egykor a virágzó kapitalizmus volt. Amig a férgek emésztik a rothadó tömeget azt a látszatot keltik, hogy él és mozog. Ezen folyamat alatt az emberiség, de különösen a munkásosztály példátlan nyomor és éhhaláltól szenved a bőség közepette.

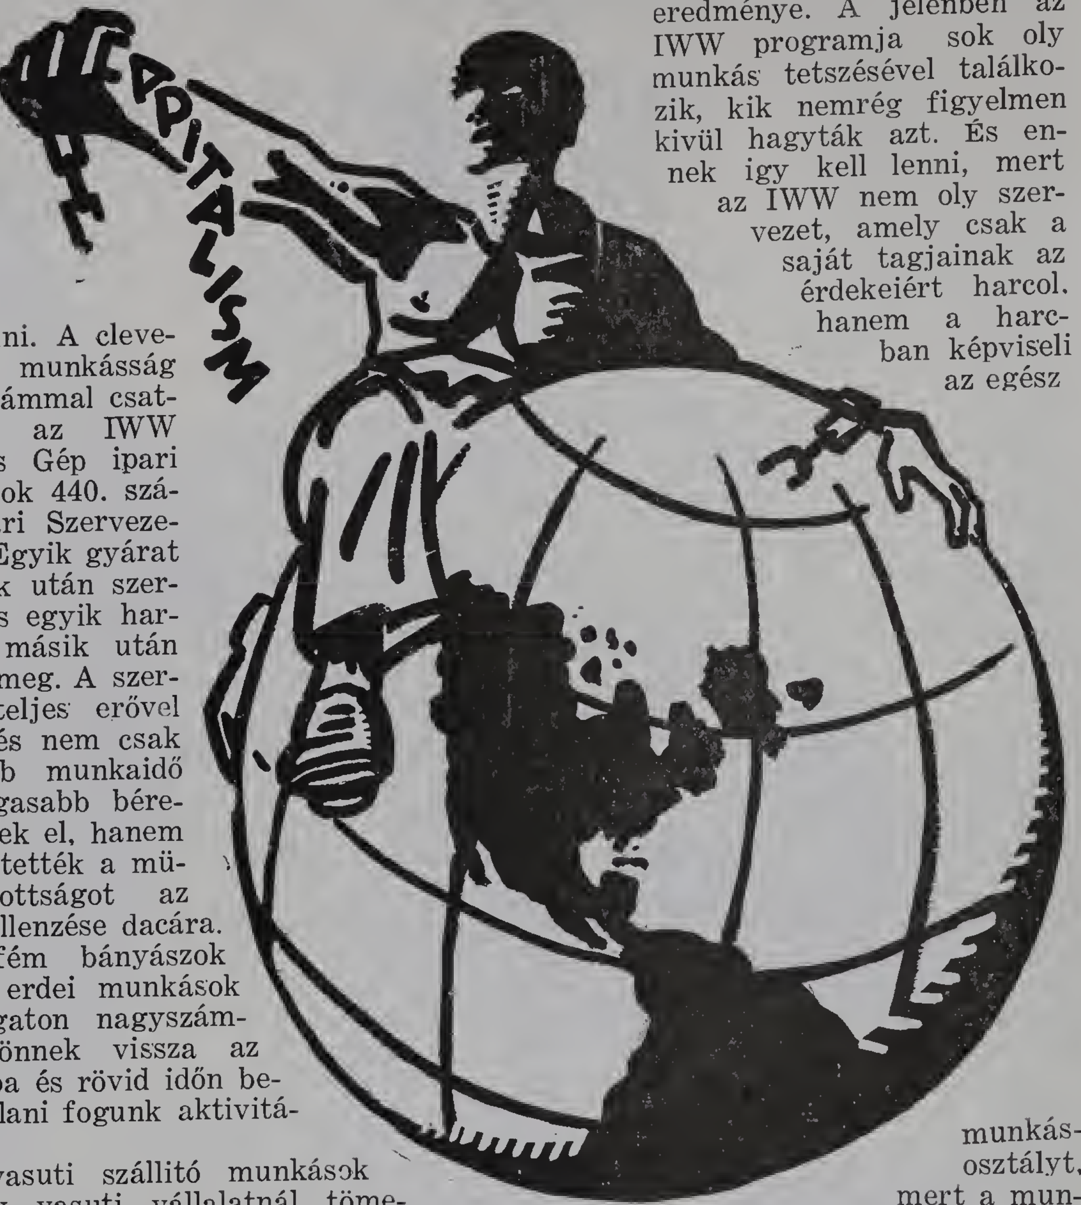
Tagadhatatlan, hogy a jelen rendszer ily kháosz szerü kialakulásáért senkit sem terhel a felelősségnek oly része, mint magát a munkásságot, de különösen azon rétegét a munkásosztálynak, amely már közel egy századdal ezelőtt többé-kevésbbé felismerte a jelen rendszer osztály jellegét és az ily rendszerrel velejáró osztályharcot.

Ezeket terheli a felelősség legfőbbképen, mert nemtörődömségük és hanyagságukkal tespedni és elgyengülni engedték a forradalmi munkásmozgalmat, vagy át engedték a munkásosztály tevékenységének arénáját a politikai kalandorok és a munkásságot félrevezetőknek.

Csak néhány rövid éve, hogy a munkásság nagyrésze — közöttük azok is akiknek hosszu gyakorlatuk van a munkásmozgalomban — egy időre megbarátkozott a kapitalizmussal, engedték magukat elbüvölni az ideiglenes kapitalista prosperitástól és elfelejtették az osztályharc létezését, vagy kényelmesen a polcra helyezték azt. Ez oknál fogva a bekövetkezettekért a munkásságot jobban terheli a felelősség, mint bárki mást, mert nem készitették elő a gépezetet, amely elfoglalja a réginek a helyét, amikor — mint az a jelenben áll — a régi felmondta a szolgálatott, vagy haldoklik.

A hosszu évekig tartó példanélkül álló munkanélküliség és nyomorra volt szükség, hogy végre kiábránditsa és felrázza a munkásságot a kábultságából és a leplezetlen valóság meglátására birja, mellyel szemben állunk. De szerencsére jött az ébredés és a történelem fokozott sebességgel törtet előre. Nem volt még példa Amerika munkás történetében, hogy a dolgozók oly nagyszámmal mentek volna harcba, mint a jelenben és az IWW elvét és programját a nagy tömegek sohasem fogadták oly készséggel, mint ma. Szerencsétlenségre, az IWW harcos, nevelő és szervező gépezetét is elhagyták gyengülni; használatlanul heverni a képzelt kapitalista "prosperitás" idején és ennek következtében az IWW nem volt oly helyzetben, hogy a kedvező alkalmat kellő mértékben kihasználhatta volna, mint az esetben, ha gépezete az előbbi hatásos állapotban lett volna. A IWW összetételénél fogva képes a helyzet magaslatára emelkedni, amig a harc ténylegesen és teljes erővel folyik.

Az IWW eredményesen és ismételten megtette ugyan ezt a multban és ezt teszi a jelenben is. A jelenben is nagyszerü harcokat vezet számos fronton és ugyan akkor növekszik számarányban, elismerésben és erőben. A szervezők nagyszáma dolgozik a különböző területeken és a füzetek és röpiratok nagymennyiségben jelennek meg. Az utolsó két évben a tagság szaporodása a legvérmesebb képzeletet is felülmulta és ez csak a kezdet. Amint a mozgalom fejlődik tekintélyben, következetesen elvárható, hogy a közel jövőben sokkal gyorsabban fog



növekedni. A clevelandi munkásság nagy számmal csatlakozik az IWW Fém és Gép ipari munkások 440. számu Ipari Szervezetéhez. Egyik gyárat a másik után szervezik és egyik harcot a másik után nyerik meg. A szervezés teljes erővel folyik és nem csak rövidebb munkaidő és magasabb béreket értek el, hanem elismertették a mühelybizottságot az NRA ellenzése dacára.

A fém bányászok és az erdei munkások a nyugaton nagyszámmal jönnek vissza az IWW-ba és rövid időn belül hallani fogunk aktivitásukról.

A vasuti szállitó munkások néhány vasuti vállalatnál tömegesen csatlakoznak az IWW Vasuti Szállitó Munkások 520. számu Ipari Szervezetéhez és belátható időn belül saját adminisztrációval fognak rendelkezni.

A vizi szállitási ipar rabszolgái megelégelték a szakszervezetek árulásait és készek csatlakozni a harcos és megbizható IWW-hoz, mely az egyetlen szervezet, amely képes javitani helyzetükön. Ez irányból is jelentékeny hireket várhatunk a közel jövőben.

Mind ez az IWW fáradtságot nem ismerő tagsága munkálkodásának és munkásságának az IWW programja iránti szimpathiának az eredménye. A jelenben az IWW programja sok oly munkás tetszésével találkozik, kik nemrég figyelmen kivül hagyták azt. És ennek igy kell lenni, mert az IWW nem oly szervezet, amely csak a saját tagjainak az érdekeiért harcol, hanem a harcban képviseli az egész munkásosztályt, mert a munkásosztály, érdekein kivül a szervezet nincs másban érdekelve.

A kapitalista osztály betöltötte hivatását és a kapitalizmus haldoklik, ha még valóban nem halott. A kháosz és szenvedés folytatódni fog és még a barbarizmushoz való visszatérés is jönni fog, hacsak a munkásság nem szervezkedik osztály szervezetében az Egy Nagy Szervezetbe és hamarjába át nem veszi a földet és termelő eszközöket, megteremti a profit nélküli rendszert, ahol a termelés az összesség javára fog folyni, nem pedig profitra.

Az emberiség sorsa

Irta: Pika Pál

E TÉMA, amelyet próbálok boncolgatni, az emberiség nemtörődömségét tükrözi vissza. A társadalom amelyben élünk és amelyet minden embernek ösmernie kellene, — de sajnos nem igy van. Habár milliók ajkáról hangzik el naponta a feljajdulás: "Meddig lesz ez igy." Ezen feljajdulás mindent megmagyaráz.

A természetes ösztönszerü kifakadások, milliók elégedetleségét tükrözik vissza; de ez a megnyilvánuló elégedetlenség nem változtat semmit az emberiség sorsán. Mert az ösztönszerü feljajdulás, nem elegendő a társadalmi bajok orvoslására. A szellemileg megmételyezett és gondolkozni nem tudó — vagy sok esetben nem akaró ember, felületesen birálja meg a helyzetet. Ezen sok milliók közzé tartoznak azok, akiknek a rabszolgaság járma még nem teher. Felületes ősrégi szokássá vált mondással vélik megnyugtatni önmagukat. "Hiszen ez mindig igy volt és igy is fog maradni."

Más milliók pedig abban a reménybe ringatják magukat, hogy ha a szerencse fog kedvezni nekik, majd idővel gondnélküli megélhetést fognak biztositani a saját számukra. Egyéni boldogulásban látják az emberiség sorsát. Nem törődve embertársaikkal, nem látnak tovább mától-holnapig. Igy él az emberiség nagy tömege gonddal telitett nélkülözések között, arra egyáltalába nem gondolva, hogy a fejlődés meghozta a maga gyümölcsét.

Az emberiség legnagyobb kényelembe, jólétbe élhetne ha megértené a jelenlegi társadalmi berendezkedés helytelenségét. A dolgozó milliók, akiknek egyebük nincsen munkaerejüknél, akik valójában a társadalom fenntartói, még gondolni sem mernek arra, hogy ezen változtatni lehetne.

Milliók vannak olyanok, akik saját sorsukat másokra bizzák, abban a reményben, hogy mások majd gondoskodnak az ő jövőjükről. Gyáva, rabszolga lelkü az, aki saját boldogulását másokra bizza.

Igy azután a mai fennálló rendszer könnyü szerrel folytathassa tulkapásait, az emberiség nagy tömegének róvására. Minden igyekezete a közvéleményt ugy irányitani, hogy minden esetben saját osztályérdekeiket védelmezze és ugy tüntesse fel a mai társadalmi rendszert, mint a legjobbat, legmegfelelőbbet. Ez ideig sikerült nekik az emberiség nagy tömegét saját — osztály érdekeik megvédésére az oldalukon megtartani. Sok milliók, kiknek a mai rend fennállása csak nyomort és nélkülözést jelent, mégis görcsösen ragaszkodnak hozzá, sőt elitélik a munkásmozgalom azon csoportját, akik felösmerték és harcot folytatnak, a jelenlegi uralkodó osztály ellen. A kapitalista tanitás és nevelés annyira megmetélyezte őket, hogy egyenesen saját osztályuk ellen foglalnak állást.

Ezzel megnehezitik azoknak feltörekvő munkáját, akik tisztába vannak a mai társadalmi rend összetételével. Az emberiség jólétének biztos alapot tudnának teremteni, ha a munkástömegek nagy része felösmerné, hogy a nyomor és nélkülözés azonnal megszünik, amikor a magántulajdon rendszerét egy társadalmasitott uj rendszerrel cseréljük fel. Az ellenvetések itten hangoznak el a legjobban, itten igyekszik a mai fennáló kapitalista rend, azt a téves hitét elhitetni az emberiség azon rétegében, akik csak felületesen gondolkoznak, hogy a magántulajdon rendszere egyedüli az emberiség boldogulására, hogy az a rendszer, amit a forradalmi munkásosztály igyekszik megvalósitani, nem keresztül vihető és nem megfelelő az emberiség számára. Ők nem törődnek az emberiség sorsával; csak görcsösen ragaszkodnak a mai fennálló rendszerhez — hiszen érthető is, hogy azok, akik jó létbe, gondnélkül élnek, nem lehet érdekük a változás. De csodálkozni lehet azokon, akiknek számára a mai rendszer a megélhetés legszükségesebb élelmét sem biztositja, mégis továbbra óhajtják a jelen rendszer fennmaradását.

Ezek az elemek annyira befolyásolva vannak a kapitalista tanitás által, hogy gondolkozni képtelenek. Millió és millió ezeknek száma a nyomorgó munkások között. Nem tudják azt, hogy az ő szük látásuk és nemtörődömségük az igazi oka az emberiség nyomorának. Szük látó körük távoltartja őket a munkásmozgalomtól; de nem csak, hogy nem vesznek részt a munkásmozgalomban, hanem egyenesen ellenségei minden munkás megmozdulásnak.

Sőt még arra is kaphatók, hogy segédkezet nyujtanak sok esetben a jobb megélhetésért harcoló munkások letörésére.

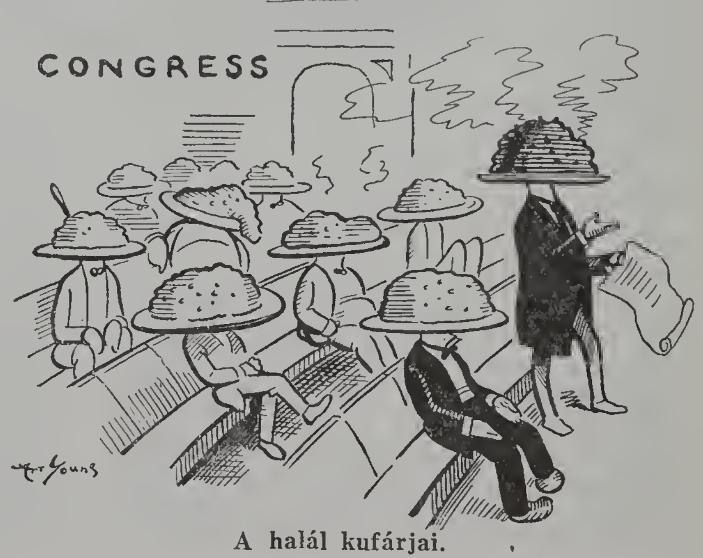
Ezen cselekedeteikkel nem csak, hogy megakadályozzák a jobb megélhetésért küzdőknek biztos sikerét; de tudatlanul saját létezésük ellen törnek. A munkásmozgalomtól távolmaradó munkás milliók tétlensége és azon ferde felfogás, hogy a munkásmozgalomba való résztvevést idővesztességnek tartják, ez mindent megmagyaráz. Akarva nem akarva; de rájuk kell ütni a tudatlanság bélyegét.

Az ember már természeténél fogva szereti a társas életet. Igy a munkásmozgalomban részt nem vevőknek megvannak az ő társas körei, amely intézmények fenntartása tényleg időfecserlés; mert semmi tekintetbe nem segitik előbbre vinni sem a társadalmi tudományt sem az emberiség jobb jövőjének érdekébe nem tesznek, sőt nem is akarnak tenni semmit. Habár küzdelmet folytatnak a megélhetésért, sóhajtoznak, keseregnek, nehéz napi munkával keresik meg a megélhetés legelemibb szükségletét. A munkahelyek elhagyása után pedig megfeledkeznek saját magukról ugy annyira, hogy egyszerüen bojkotálják azon helyek látogatását, ahol munkásérdekek megvédelmezéséről van szó. Nagyon sok ilyen szük látókörü ember van a munkás milliók között és még a legtöbb esetben ők tesznek szemrehányást a munkásmozgalomnak, hogy ugysem képes hivatását betölteni.

Ezek a szemrehányások a legjobban igazolják, hogy a munkásmozgalomtól távol álló munkásoknak milyen szük látó körük van, hogy egyáltalában saját sorsukat sem ösmerik és a munkásmozgalomtól való távol maradásukkal azt is igazolják, hogy egyáltalában halvány fogalmuk nincsen a társadalmi berendezkedésről. Sok esetben szégyenlik egyéni mivoltukat is beösmerni, hogy ők "munkások."

Magatartásuk a társadalmi életben igazolja, hogy nem mernek még jogot sem formálni az élet javaihoz, hanem egyszerüen rábizzák sorsukat a mai társadalmat önkényesen uraló kapitalista osztályra. Pedig csak kizárólag a munkásmozgalom az az intézmény amiből az emberiség szebb jövője kiépül.

Munkások és munkásnők, nagyszámban vannak olyanok, akik csak keserves küzdelem árán tudják életüket egyik napról a másikra tengetni, mégis türelmesen türik a megaláztatást. Ilyen esetben nyilvánul meg a kapitalista érdekeket szolgáló vallási tanitás, ami béketürésre ösztökéli azokat,



A halál kufárjai.

akik vakon hisznek benne. Ezáltal elterelik a nyomorgók figyelmét attól, hogy fölismerjék azon tényeket, amelyek tényleg az emberiség nyomorának előidézőjei.

A hazifiság kérdése amelynek említése sokakat megharagit amikor arról próbálunk beszélni, hogy a nincstelen proletárnak a világ bármely részébe egyforma a sorsa. A hiba nem abban keresendő, hogy más darab földterületnek vagyunk szülöttei — hanem abban, hogy amely föld területen kénytelenek vagyunk tartózkodni, meg van-e ottan a lehetőség arra, hogy megélhessünk.

Nagyon sok esetben ahol a munkásnép odukban kénytelen lakni — vagy fejlettebb ipari államok hatalmas városai felhő karcolóinak sötét, nedves pincéibe kénytelenek meghuzódni — "otthonnak" nevezni. De ha a kapitalista osztály harciriadója megszólal a "haza" védelmére az odukból és pincébe meghuzódókkal azt is ellehet hitetni, hogy a külső ellenség az ő "hazájukat" akarja elfoglalni.

Ezzel a hazafiságra való ösztökeléssel sokaknak figyelmét eltudják ismét tériteni, attól az igaz ténytől, hogy az embernek ott van az ellensége, ahol valóságban megfosztják, a megélhetés lehetőségétől.

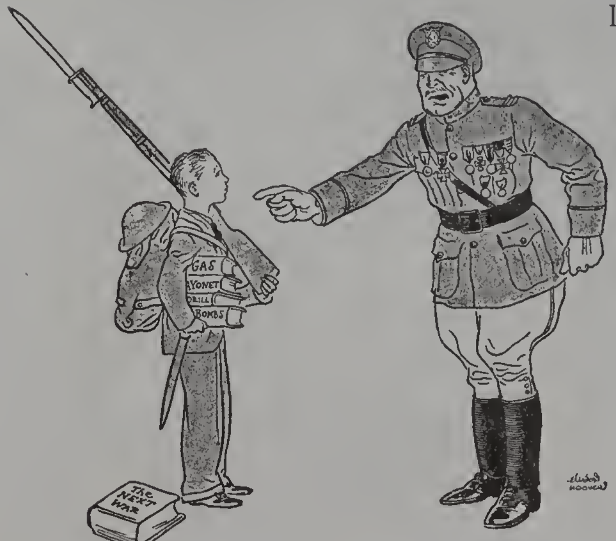
Az emberiség sorsa a mai körülmények között a lehető legrosszabb. De nem az összes emberiség él nyomorba, hanem csak azok, akik akár szellemi, akár fizikai munkájuk által keresik meg a megélhetés lehetőségét. Az emberiség egy kis csoportja a legnagyobb nyomor közepette is jólétbe, gondnélkül él; de azok róvására, akik nyomorognak.

A társadalmi berendezkedést nem ösmerő, a munkásmozgalomtól távol állók azok, akik akaratlanul is hivei és éltetői a mai kapitalista rendszernek, amely az igazi okozója milliók nyomorának, szenvedésének.

A munkásmozgalom az egyedüli, amely milliók gigászi harcát vivja. A munkásmozgalomtól távol álló munkás milliók egyszer majd szégyenkezni fognak azért, hogy a multban megpecsételték az emberiség sorsát az által, hogy távol állottak attól a harctól, amely az ő érdekeikért folyt, az emberiség szebb jövőjéért.

Az emberiség jobb sorsa és boldogsága már holnap bekövetkezhetne — ha az a sok millió munkás, akik távol vannak a forradalmi munkásmozgalomtól felösmernék a társadalom hibáit, levetnék magokról a kapitalista tanitás és nevelés mérges burkolatát, nem felületesen — ahogyan mostan teszik — birálnák meg helytelenül a munkásmozgalmat — hanem mint a munkásosztály tagjai, akiknek jövőjük és létezésük csak a munkásmozgalom kibontakozásától függ. Nem várnának tovább egy percig sem tétlenül és tudatlanul, hanem elsősorban igyekeznének megösmerni azt a problémát, amelytől az emberiség sorsa függ. Ezek megösmerése után biztosan a munkásmozgalomban használnák fel azt az energiát, amit ma polgári körökben, vagy sok esetben a munkásmozgalom ellenes csoportokban próbálják lekicsinyelni, magát a munkásmozgalmat és annak minden ténykedását.

Pedig józan eszü munkás nem lehet ellensége a munkásmozgalomnak akkor, amikor mindannyian kivagyunk téve annak a bizonytalanságnak, hogy ma — vagy talán holnap nem leszünk már képesek meg-

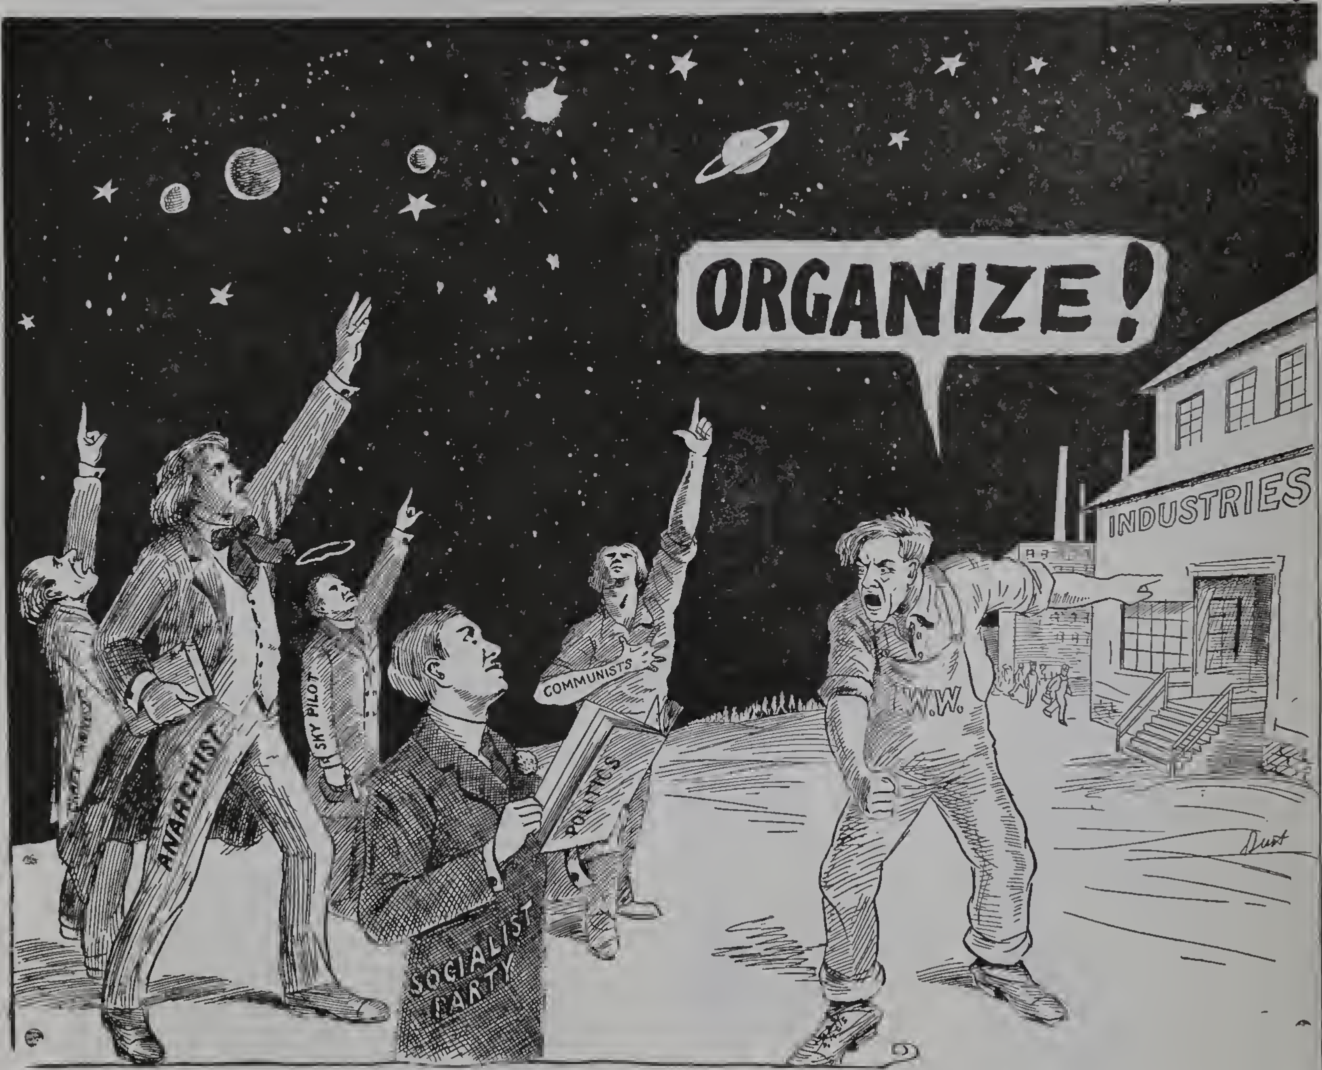


Erre neveljük a gyerekinket.

keresni, még akkor sem — ha bármilyen erős munkabirók vagyunk is — még a mindennapi életünket sem. Ez nem azért van igy, mert nincsen mindenből elég — hanem azért mert a jelen társadalmi beosztás olyan, hogy néhányan rendelkeznek az élet javai felett.

A munkásmozgalom már megvan, készen felszerelve a társadalmi változás végrehajtására. Csak tirátok várunk még a munkásmozgalomtól távol álló sokakra, akiknek sorsa azonos a mi sorsunkkal. Az emberiség jövője; csak tőletek függ akik még mindég távolról figyelitek a mozgalmunkat — vagy mint tudatlanul álló ellenfelei a munkásmozgalomnak. Ti meg a munkásmozgalomtól távol állók késleltetik egy szebb kor eljövetelét; mert nem tudjátok saját magatokban felösmerni az embert, hanem gyáván alamizsnára vártok! Azoktól várjátok a jobb lét eljövetelét; akik letaszitottak a mélységbe. Az emberiség jövője pedig csak kizárólag azon forradalmi munkázmozgalom kibontakozásától függ, amely harci zászlajára a "bérrendszer" eltörlését tüzte ki.

Ha munkás vagy, egy ut van számodra épiteni a munkásosztály Egy Nagy Szervezetét és ha még a fent elolvasottak után sem szervezkedel egy táborba mivelünk; akkor nem érdemelsz egyebet, mint azt, amit a mai rendszer ad a számodra.



Ne álmodozzatok, ne könyörögjetek Szervezkedjetek a munka helyén.

A renegátok csoportjából

ALÁN CAITÓL szabadulni kinvánó proletár küzdelem neveltjei ezek. Csak néhány kimagasló alakot mutatunk itt be. Ha csak megközelitőleg akarnánk is bemutatni ezeket az alakokat, sok, hoszszura nyuló leirásokat venne igénybe.

Élettörténetükhöz, pályafutásukhoz mindegyiknek hozzá tapad, s szinte elválaszthatatlan a külömböző országok munkásmozgalmának külömböző fázisaiban való részvétele, a fontosabb események, melyek a mukásmozalom emlőjéről leszakitva azzal homlokegyenest állitva őket szembe.

Sok volna elsorolni a véreik ellen elkövetett bünüket, a rengeteg vért, mely kezükhöz tapad, melynek fokozata csupán az eseményekbeni részvételük közvetlen vagy közvetettségében váltakozik.

Mondhatná valaki például: tulzás egy Briandot vagy egy Brount a munkásság hóhérjai közzé sorozni, — erre nyugodtan válaszolhatnánk, — a munkástömegek vérpadra küldése, előkészi-

Aristide Briand
Upton Sinclair
George R. Lunn
Heywood Broun
Ramsay MacDonald
Benito Mussolini
Walter R. Lippman
Fiorello LaGuardia
Viscount Snowden
Georges Clemenceau

tése vagy aktuális kivégzése egy és ugyanaz. Clemencau, Briand a multé. Vérrózsákkal szegélyezett pályájukat megfutották. Zsarnoki hajlamaikról tetteik beszélnek. A többiek még élnek. Anglia munkássága nagy árat fizetett és fizet a Torivá vedlett McDonald és Snowden követéséért, kik a hétköznapi emberek tülekedésébe keveredve, majd élükre állva épitették saját önző céljaik várait.

Nem külömb a véreskezü Mussolini, ki miután letarolta az olasz proletárság mozgalmát, annak romjain a világ zsarnokainak vezetőjévé tolta fel magát.

Vagy nézzük az amerikai csillagokat. Az egyetemi élet tulzott radikálisa, Lippman testestől lelkestől a Wall Street szolgálatában, Lunn és LaGuardia aktiv közremüködése a roskadozó kapitalista épitmény fenntartásában, vagy Broun, a különc iró, ki kitünő tollának varázsával milliókat tart az ingadozás örvényében, naponta megjelenő hol radikális, hol reakciósnál reakciósabb kommentárjaival csapolva le a helyzet összhatása szülte ébredést és —, Upton Sinclair. Őt utoljára hagytuk, mint aki a beérkezés stádiumában van.

Egész könyvtárra menő irodalmat irt. Müveiből sok található a civilizált világ külömböző nyelvére forditva. Tagadhatalan szociologiai értékkel birnak.

Ha a felsorolt ál-prófétták letünt vagy folyamatban levő ténykedéseit vesszük alapul, (melyet történelmi adatok erősitenek meg) ugy Sinclairnek uj térre való lépése a modern munkásébredés legnagyobb árulásának lehetőségét hordja magában.

* * *

Csak a nemzetközi méretekben kiemelkedett renegátok arckép csarnokának egy kis részét mutatjuk itt be. Természetesen ezeken kivül minden ország, minden nemzet proletáriátusa hordoz a hátán egy nagy csomó kisebb vezért, akiknek nem sikerül magukat a kapitalista osztállyal észrevétetni és igy megmaradnak a munkásokból élősködőknek.

Nevük nem fontos, annál ártalmasabb szerepük a munkásosztály felszabadulási törekvésében. Az amerikai magyar munkások is egy légióját kénytelenek a reá csimpaszkodóknak kitartani, akik munkásmozgalomnak minősitik az eltartásuk törekvését. A politikai mozgalom nevében huzódnak meg ezek a kis alakok, akiket az utolsó esztendőkben sohasem az általuk irányitott "tömeg" helyezett az állásokba, de önmaguk, barátilag osztották azokat fel egymás között.

* * *

E rövid vonásokban vázolt kép annál rikitóbban hozza elénk a történelmi materializmus meghatározását: A munkásosztály felszabaditása csak a munkásosztály müve lehet. A dolgozó proletárré. Kinek vállain nyugszik a civilizáció. Eme felszabaditó munkájában folyton figyelemmel tartva eddig szerzett tanulságait. S ha technikai összetételeiben követni fogja az Ipari Szervezet formáját, cselekvési körének meghatározását, ugy a felsorolt "zsenik," vagy a hozzá hasonlóknak fizikai lehetetlenség lesz a kolosszális népbolonditás, munkásárulás és ugyanakkor rövidebbre hozza az Uj Társadalom megszületésének nehézségeit.

Gondolkozás

Irta: Sebestyén Pál

TALÁN nincs termékenyebb pillanata az emberi életnek, mint az a kis időszakasz, mikor valaki leül és elgondolkozik, meghányja-veti környezete benyomásait, ok és okozatokat; kiválasztja azokból az érdemesnek látszó anyagot, hogy gondolatraktárába osztályozza, elhelyezze azokat.

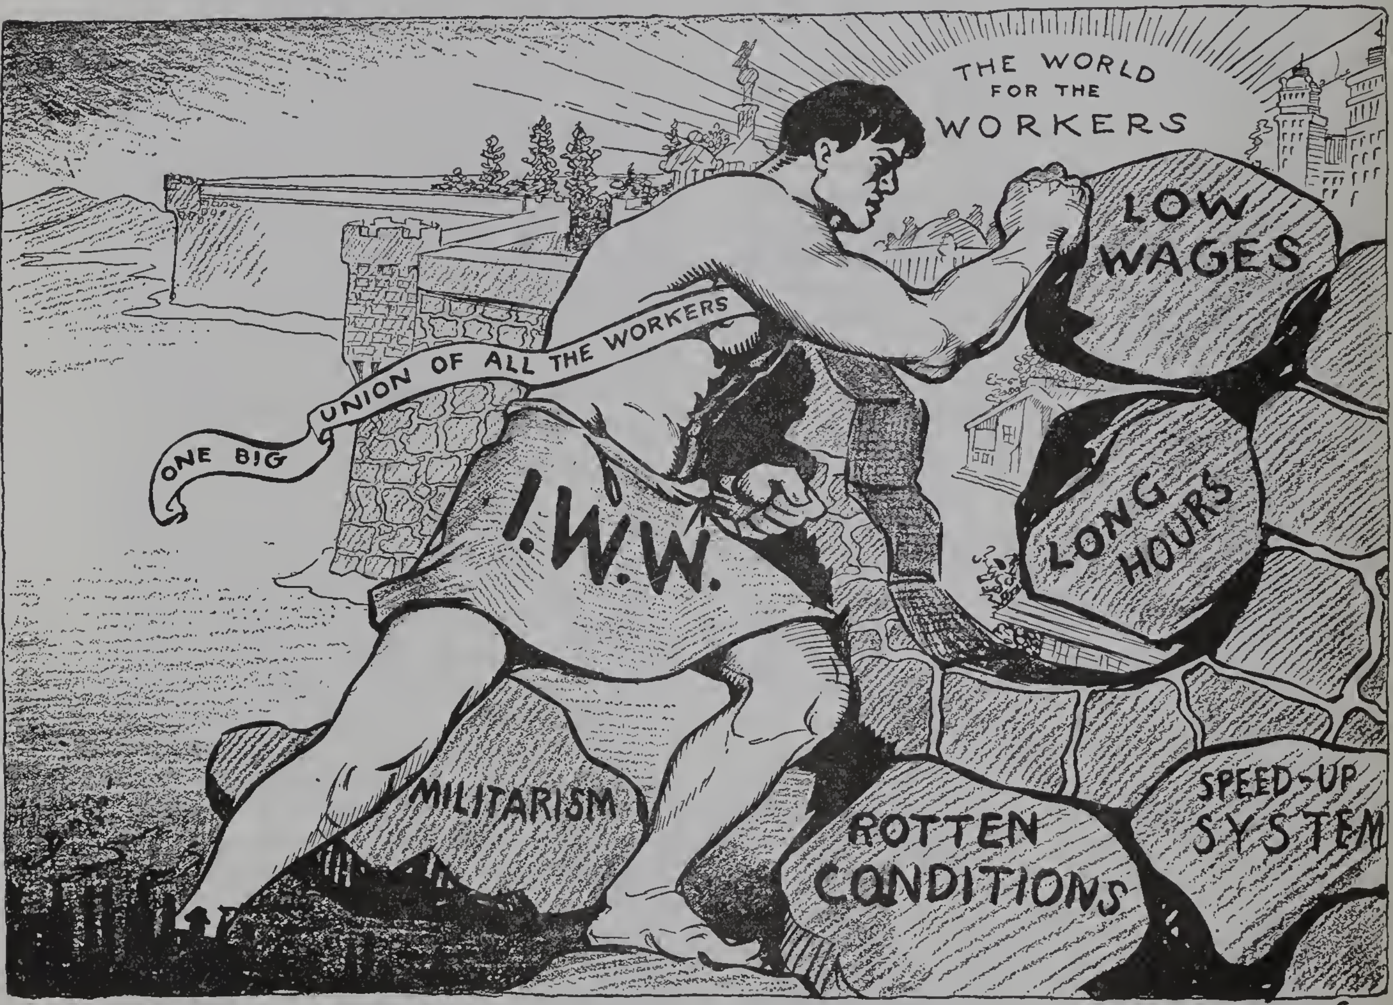
Waldo Emerson, a mult század fejlett amerikai bölcsésze egy müvében, — minekutána bejárta Európa és Amerika kultur terrénumát, közvetlen érintkezés, megfigyelés és tülekedéstől fáradtan visszatérve szerettei körébe s az ismert röghöz, hol bölcsője ringott, hol valamikor gyerekes élvezettel kergette a lepkéket, — ilyenformán beszél: minden élőlénynek, ki tudatos résztvevője kiván lenni az őt körülvevő életnek, szüksége van időközönkinti zavartalan pillanatokra, hogy elzárva önmagát a külvilág zajától, számot vessen önmagával, megvizsgálva önmagát, multját, az elmult napban történt élet megnyilatkozásait, szentenciát mondva jó és rossz tettei felett, előkészithesse magát a holnap problémáihoz, hogy abban való részvétele jobban megközelithesse a tökéletes ember megfontolt, megokolt ténykedését. “Ezt a morál kódekszet mindjárt alkalmazva is önmagára, vissza utasitott meghivásokat külömböző egyetemekről s jó ideig minimumra szállitván emberekkel való érintkezéseit elvonult mint későbben bevallá “a nagy természet ölébe, a sürü erdőkben csöndesen folydogáló patak szélére, figyelvén a nagy természet vastörvényeit hüen követő jelenségeket, azoknak egymásra való hatását, keresve ezekben az állatvilág legtökéletesebb fajtájának, az embernek alárendelt szerepét s a helyet, melyet hivatva van betölteni.”

Ebből a nyugodtan megalapozott nézőszögből, kiindulva, hosszantartó megfigyelésének tárházából született a később megjelenő levelek, füzetek, könyvek, előadások; maró kritikával ostorozva a félszegségeket, mely az embernek a nagy természethez és egymáshoz való viszonyát tarkitják. És bár sok esetben nem egyezik mai világfelfogásunkkal számtalan következtetései, korának legnagyobb bölcsészévé verekedtet fel magát, kinek tollától és nyelvétől rettegtek a kevés őszinteségü lebzselők; munkája nyomot hagyott a 19-ik század kialakuló társadalom bölcséleti világfelfogásban s mint aki gyönyörü élesmeglátásu megállapitások sorozatával lepte meg a világot, befogadtatott a szalon körökbe, iskolák, egyetemek tankönyvnek avatták fel müveit, rágódznak, kérődznek rajta.

Ha Emerson felkelne sirjából ma, egész bizonyosan szétütne a tunya utánzók, majmolók seregében. Mert, mig az ő ostora végig suhant az erénycsőszök gondolatnélküli tömegén, kritikája — mint önmaga is élreérthetetlenül mondá — nem az örökkévalóságnak iródtak; az akkori ma szögeskorbácsa volt, hogy ezzel ébredésre, gondolkodásra birja a gondolat kialakuló mestereit, hogy azok hozzá hasonlóan uj gondolatokat, uj meglátásokat, uj utakat törjenek az őt követő korokban.

Az az ember, ki éji pihenése után felkelve megpillantja a felkelő napot fürdik éltető sugarában, automata módjára lemorzsolja napját, jobbra-balra taszitva embertársait az életasztalától; embert, állatot elgázolva a gyomrát megtöltő tápanyag beszerzéséérti törekvésében anélkül, hogy egy pillanatra is megállna s keresné a dolgok menetének összefüggéseit, nem látja meg, nem érti meg a hozzá hasonló formáju emberalakok életcéljait, bambán, érzéketlenül, mint a levegőben uszó milliónyi parányok csak vannak, vegetálnak, de nem tudnak számot adni létezésük okáról, rendeltetéséről. Ebből a tunya, semmittevő vegetálásból származnak mindazok a társadalmi visszásságok, melyek ezt a termékeny földtekét pokollá avatják az érző, a gondolkodó emberfaj számára. Ha megállnánk időközönkint, ugy mint Emerson ajánlotta és gyakorolta, megvizsgálnánk a nagy természethez s egymáshoz való viszonyunkat, lehetetlen, hogy tetteinkbe ne csuszna be egy parányival több megértés s ez a kis parányi megértés csodákat müvelhetne egész társadalmi berendezkedésünkben. Nem kellene az aranysugarait kibontó napban csak egy ujjabb szenvedésteli napot látnunk; füleink nyitva volna az emberi élnivágyás sóhajainak befogadására, hogy halló érzékünkön keresztül szivünkhöz, agyunkhoz jusson a körünket betöltő parányok rezgése s ezen tudomásvételünk meginditsa bennünk a létezését megértő embert magát harmóniába hozni a világegyetem folyton mozgó rendszerével, hogy egyéni erőnket latba vessük másik embertársaink egyéni akarásával, összeegyeztetve, egymásba kapcsolva az egyedek harmónikus élettörekvéseit, rengeteg erőforrásunk céltudatos kihasználásával, gyümölcsöztetésével menyországgá varázsoljuk e sártekét minden emberfia részére.

Hogy igy legyen: gondolkozzunk!



Mienk lesz a világ, ha őt követjük.

Élet, anyag és erő pazarlás

Irta: Visi István

HA AZ emberiség száz év multán vissza tekint a mai termelési és szétosztási rendszertelenségre, melyben semmi észszerüség nincs, mely az őrültséghez hasonló pazarlást visz végbe minden cselekvésében, bizonyára nagyon lenéző véleményt fog alkotni rólunk.

Ha a pazarlásokat, anarkiát, rendszertelenséget számokkal kimutatjuk és fáradságot veszünk azokat tanulmányozni, boncolgatni, megállapithatjuk, hogy ugy az emberi, mechanikai és természetadta energiát mint értékes, pótolhatatlan természeti kincseket, anyagot billiós számokban pazarlunk el évente, a mellett éhség, nyomoruság van sorainkban.

Hogy jobban megértsük a pazarlás káros hatását, tegyük fel, hogy három városi munkás egy őserdőbe megy ki nyaralni. Mikor megérkeznek az egyik egy nagy csomó fát szed össze és meggyujtja, amelyet nem bir kontrolálni, igy erdőégés következtében millió öl fa pusztul el.

A másik meg gombát szed anélkül, hogy megnézné, megvizsgálná, vagy értene is hozzá, hogy melyik milyen és hogy ehető-e, ezt társaival egyetemben elfogyasztja, mely által mind gomba mérgezésben megbetegszenek.

A harmadik meg elővenne a táskájából mindenre használhatónak és jónak hirdetett patent orvosságot, azzal próbálná a társait és önön magát a gomba mérgezéstől gyógyitani, ami persze nem sikerül.

Ugye ezekre rá mondanánk, hogy bizony bolondul cselekedtek. Még is ugyanezt cselekszi az emberiség nagyban és állandóan a mai rendszer keretein belül. 750 millió tonna szén, 1 billió hordó olaj, 5 billió köbláb fa pazarlódik el évente, amint a példának felhozott ember is vadul elpusztitotta az erdőt.

Amint a második ember mérges gombát szedett és etetett — meg társaival, ugy mi is sok millió tonna hamisitott élelmiszert gyártunk és árusitunk el ember társainknak, akik ha nem is azonnali betegségben, de előbb-utóbb mérgezésben, a testi szervek elsatnyulásában pusztulnak el, az ilyen hamisitott élelmiszerek használata következtében, mint a nagyon finomitott liszt, sok utánzatok, éretlen gyümölcsök, minden tápanyagtól kifagyasztott hus, stb.

Akkor jön a harmadik ember az ő patent orvosságával, mely talán nem árt, de nem is használ, legkevésbbé képes a hamisitott élelmi cikkek által okozott kárt helyre hozni, vagy az elpazarolt élet erőt pótolni, helyre hozni. Ez a mai rendszer gazdálkodása.

Egy kicsit száraz a téma, melyet ezen cikkünkben felkaroltunk, de mivel a Bérmunkás Naptár a gondolkozni tudó munkásság részére készül, igy nagyon célszerünek véltük, hogy az életben előforduló energia és anyag pazarlásról irjunk mely ha nem is okozna olyan nagy nyomoruságot, nélkülözést a dolgozó milliók között, még akkor is, minden gondolkozni tudó munkásnak igyekezni kell annak megszüntetésére szervezkedni, cselekedni, mert az anyag és erőforrás, melyet olyan őrült módra pazarlunk el, nem kiapadhatatlan, nem végnélküli és nagyon sok esetben nem pótolható, amint az adatok alapján látni fogjuk.

HIRDETÉSEK.

Legelőször is az iparokban előforduló pazarlást fogjuk bemutatni, melyet még a mai profit rendszer alapján is könnyen kilehetne küszöbölni. Ezek között van a tulságba vitt hirdetések.

A direkt hirdetések, melyek lapokban, plakátokon, magazinokban és más nyomtatványokban jelennek meg, évente 1.284.000.000.00 dollárt és 600.000 emberi munka erőt vesz igénybe, vagy is ennyit pazarol el évente.

Ezen hirdetésekben nem foglaltatnak a közvetett, vagyis indirect hirdetések amint a vignetták, a dobozokra, üvegekre valamint más tartányokra nyomtatott név, cégek cimjei és használati utasitások, melyek szintén legalább 200.000 ember munkáját veszik igénybe évente.

De lényeges itten megemliteni, bár más helyen is lesz szó róla, a patent orvosságok hirdetését, mely Amerikában nagy mennyiséget tesz ki, több mint 50.000 külömböző patent orvosság van, melyből alig van 50-nek igazi gyógyértéke, a többi szükségtelen sok esetben káros patent orvosság, melyet csak a fentebb emlitett nagymértékü hirdetések folytán képesek elárusitani.

FÉNYÜZÉS.

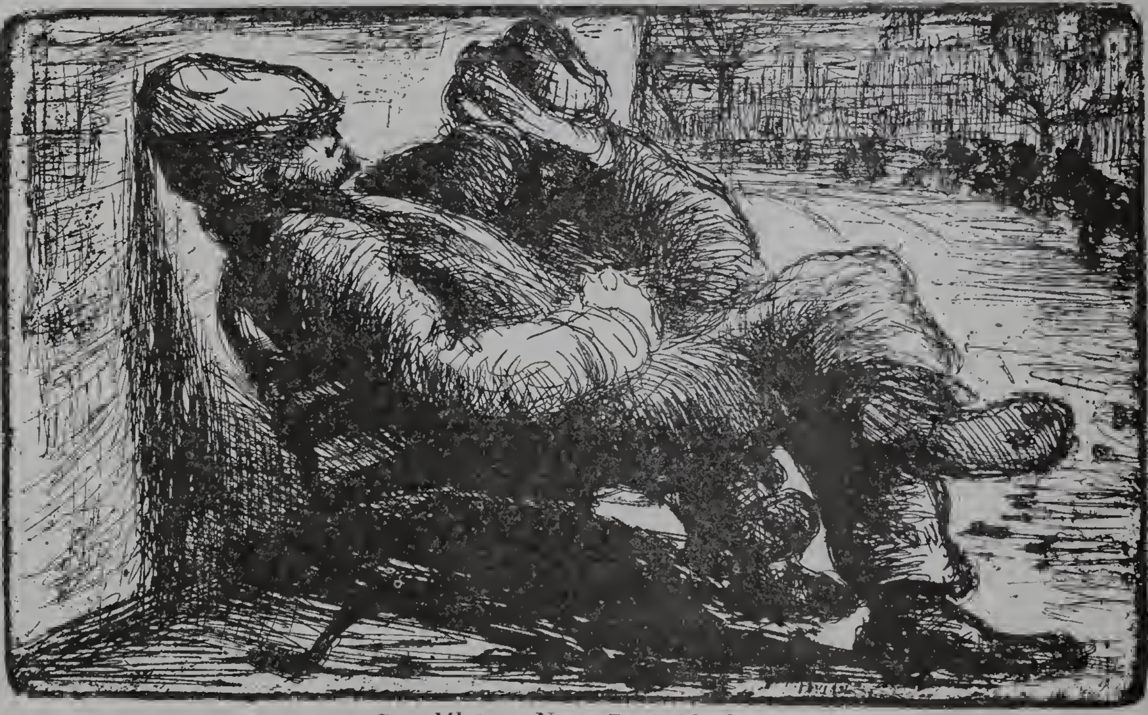
Itten csak a tulságba vitt fényüzésről van szó, amint a több millió dolláros kéjhajók, paloták, több ezer dolláros estélyi ruhák, stb., mely több mint 6 millió embernek a munkáját emészti fel évente, de még ehez nincs hozzá számitva a cselédségnek egy része, mely személyi szolgálatokat tesz, akik minden percben állnak gazdájuk parancsát teljesiteni.

Nem jön számitásba a rádio, automobil melyeket mi munkások tartunk nagy fényüzésnek, bár már a több ezer dolláros gépkocsikat oda kell számitani.

BIZTOSITÁS.

Ezen kimutatásban sem vettük alapul az egész összeget, melyet a biztositás cimén felhajtanak, mivel egy részét vissza fizetik a károsultaknak. Azonban az ilyen kifizetett összegen felül, melyet mint tiszta hasznot könyvelnek el a biztositó társaságok, 1.500.000.000 forgalmat csinálnak, mely legalább is 800.000 embernek a munkáját veszi igénybe.

Itt számitásba kell venni azt a tényt, hogy ugy a betegsegély illetve halálozási, mint a tüz biztositások révén még sok milliós károkat okoznak, mert ki ne hallott volna a gyujtogatásokról, hogy a biztositási összeget felvehessék, vagy a gyilkosságokról, ön-



Csendélet a New Deal idejében.

gyilkosságokról? Melyek mind ennek a káros lehetőségeknek a kinövései.

SZABADALMAK.

Csak azon szabadalmakról van itten szó, melyeket nagy társaságok megvásároltak és eltemettek, hogy mások ne használhassák, mert az adott társaságnak annak a használatából csak kára volna, igy kivonják a forgalomból, ezek az eltemetett szabadalmak is sok embernek a munkáját tennék feleslegessé, a mellett, hogy nagyon sok szabadalom van, melyet a feltalálók, tudósok nem hoznak forgalomba, mert csak nagyobb munkanélküliséget, nyomort és nélkülözést idézne elő, amint azt Steinmetz, a villanyszakértő mondta még 1920-ban. Nagyon sok patent van melyből az emberiségnek csak haszna volna, de egyes társaságoknak nem, amelyek a kezükben tartják az ilyen eltemetett szabadalmakat.

HAMIS RÉSZVÉNYEK.

Melybe foglaltatik azon részvényeknek nagy mennyisége is, melyet nem egészen hamis szándékkal de a vissza fizetés lehetetlenségének tudatában adnak ki, vagy is olyan bizonytalan vállalkozásokba fektetett részvények, melyek biztos bukásnak néznek elé, ezen a cimen évente egy billó dollárt szednek össze és 500.000 embernek a munka erejét pazarolják el.

MÉTER RENDSZER.

Melyik európai munkás nem ütközött volna meg azon, hogy Amerika, valamint Anglia még ma sem a méter rendszer, vagyis a tizedes törtek alapján rendezte be mérték rendszerét? Melyik technikus, mérnök vagy szakmunkás, ne itélné el azt a 64-edes, 1.16, ...8-os beosztásokat. Ezt a fajta mérték rendszert használja Amerika ugy a száraz, ür és köb mértéknél mint a hosszmértéknél is.

A technikusok számitása szerint, csak a méter rendszer Amerikában való elfogadása alapján, évente 800.-000.000 dollárt, illetve 400.000 ember munka erejét volnánk képesek megspórolni.

SZÉTOSZTÁS.

Az ipari pazarlások között legutoljára hagytuk a szétosztás körül előforduló nagyszerü pazarlást, melyet a legkevesebbet gondolkozó egyén is őrültségnek fog bélyegezni. Valóságban nem kevesebb mint 1.500.000 embernek a munkaerejét pazarolja el évente.

Bár ez az egyetlen tényező is elegendő a mai anarkisztikus rendszernek az átkos voltát, bebizonyitani, mégis egy kicsit bővebben fogunk vele foglalkozni.

Jelenleg 2 és fél millió ember van a szétosztás terén foglalkoztatva, holott ésszerü beosztással nagyon elég lesz 750.000 ember, a többi mint ügynök, házaló és a felesleges számban levő üzletekben a vásárlókat leső olcsó jánosokat számitjuk felesleges munkásoknak a szétosztásnál.

Ma minden 25 családra esik egy üzlet, holott elegendő volna minden száz család részére egy szétosztó állomás.

A szétosztás őrültségét legjobban bizonyitja az a vizsgálat, melyet Rochester, N. Y.-ban tartottak a tej szétosztásával kapcsolatban, 1912-ben. 3 ezer otthont, 27 külömböző tejtársulat látott el tejjel, naponta összesen 447 mérföldet kellett hajtani a kocsisoknak, hogy itt, ott, egy-egy kvart tejet letegyenek. Ugyanis minden külön tejtársulatnak az egész várost keresztül-kassul kellett utazni minden reggel.

Ésszerü beosztással, csak 40 mérföldett kellett volna utazni, melyet négy kocsi a 27 helyet, fele idő alatt képes lett volna megtenni.

Egy másik őrültség, melyet nem számitanak ugyan a pazarlás közzé azonban az uj társadalmi rendszerben szükségtelen lesz. Ma 25 millió külön főzőkályha és ehez szükséges 25 millió külön konyhai felszerelés, 15 millió fütésre alkalmas kályha és 14 millió külön álló Furnace-ban kell tüzelni külön-külön, mely óriási pazarlást idéz elő csak a szénben, valamint, azt, mind külön-külön kell gondozni, kezelni.

NYERS ANYAG PAZARLÁS.

Szén. — Az emberiségnek nagy hasznára vált a szén melyet évmilliók hoztak létre és melyet nagyon nehezen tudna az ember mesterségesen előállitani, tehát az uj generáció elleni bün annak szándékos elpazarlása. Még is évente 750 millió tonna szén pazarlódik el.

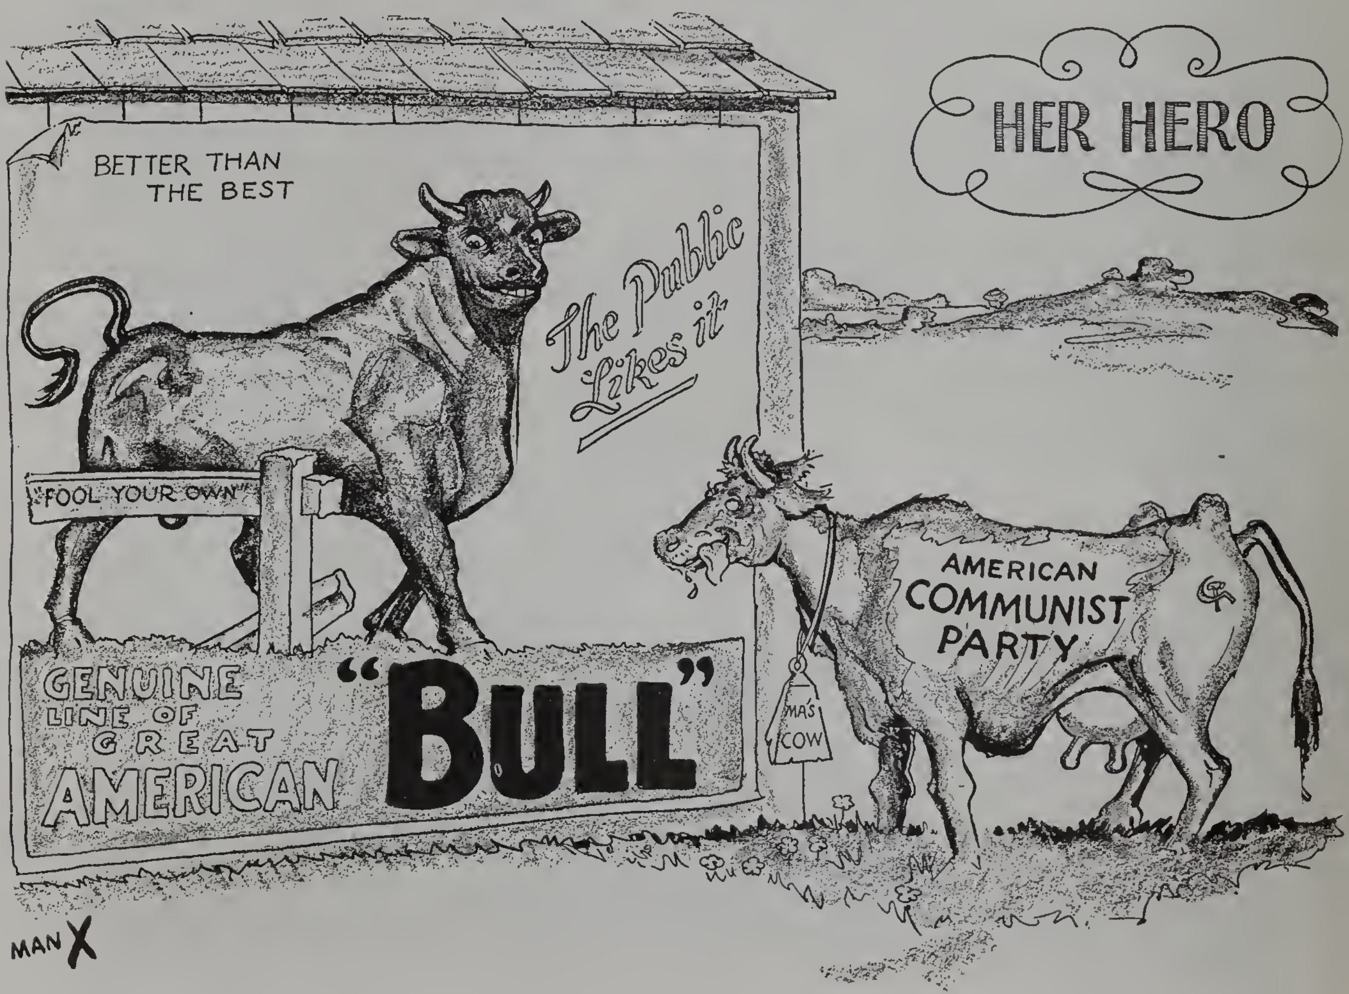
A szénnél elmondhatjuk, hogy elpazaroljuk az erőt, meleget, hogy elronthassuk egészségünket, szépséget, tisztaságot az által, hogy a füstöt, mely másképpen értékes mellék terményeket tartalmaz a levegőbe eresztjük, hogy azt mentől nagyobb mértékben megfertőzze. a helyett, hogy azt ipari cikkekre használnánk fel.

Ha észerüen használnánk fel a szenet, akkor egy tonna szénből kapnánk: 8.000 köbláb légszeszt, 10 gallon benzint, 20 font Ammonia sulfate, (mütrágya,) 30 gallon könnyü kátrányt, 10 quart olajat, 10 font kenőcsöt, a mellett, hogy a kokszból is megkapnánk annyi meleget mint a szénből kaptunk volna.

FA.

Amerikában még a konzervative nemzet gazdászok is sokszor feljajdultak azon nagymérvü pazarláson, melyet az ország erdejében famennyiségében vittek véghez a profitéhes paraziták.

Dacára, hogy több évtized kell a fa megnövéséhez, még sem gondoskodtak arról, hogy a népesség közös tulajdonát képező famennyiséget pótoltassák azokkal, akik a maiból nagy hasznot huztak. Millió és millió aker erdőt irtottak ki, de soha nem pótolták a nemzet kizsarolójai. A fa nagyon



hamar kifog fogyni igy. Ha még ma nem is, de a közel jövőben a fából a következő anyagokat fogják kivonni, melyet most a levegőben engednek füstbe.

Egy négyszögöl fából kapnánk: 50 font faszenet, 11.500 köbláb légszeszt, 25 gallon kátrányt, 10 gallon faszeszt, 200 font Acetate mészt (mütrágya.)

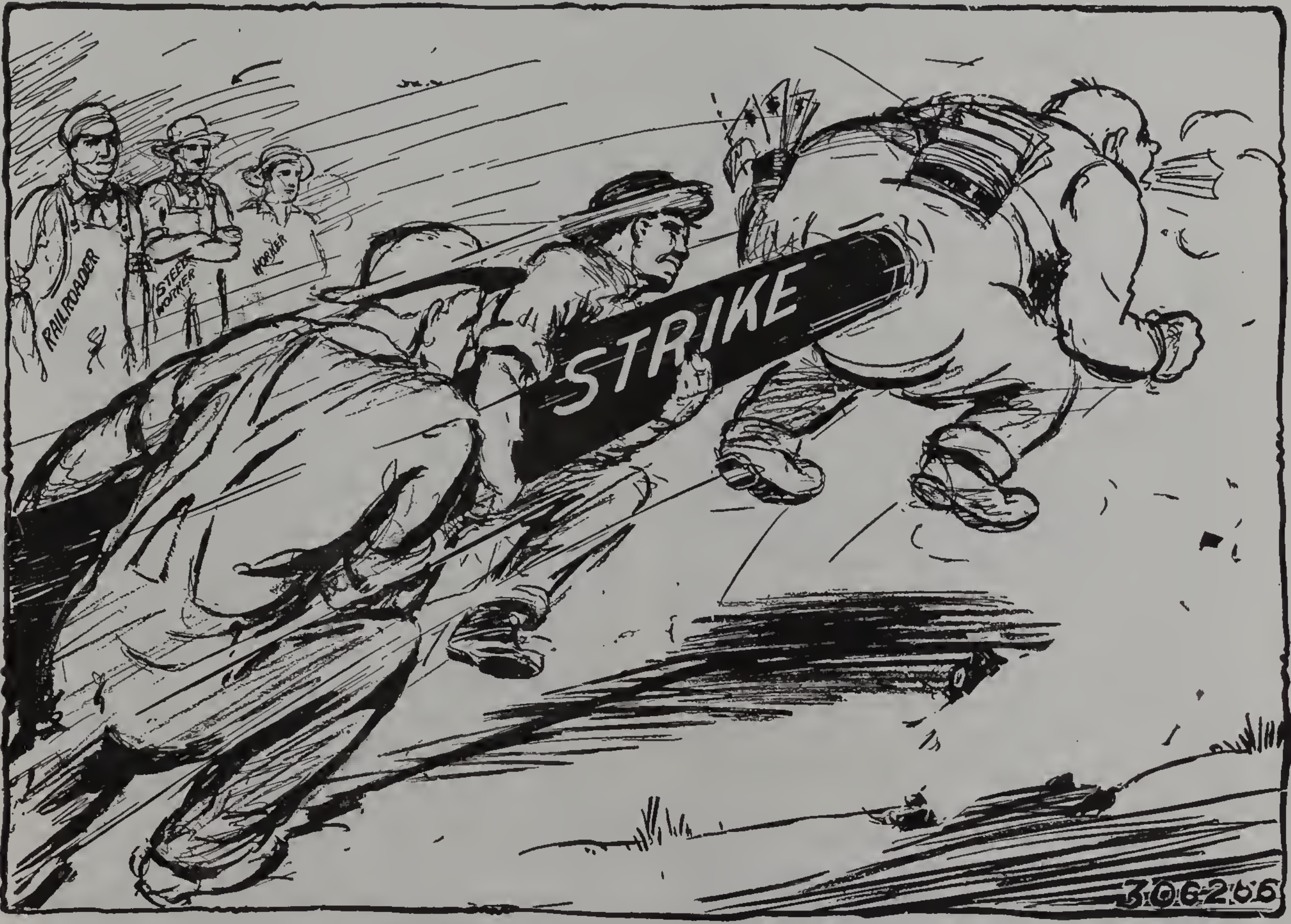
Még meg kell emliteni, hogy a jövő generáció erdő állományát nagymértékben pazarolják a sok hirdetésre felhasznált papirosok gyártására, valamint a sok különböző de mind hirdetésekkel telitett magazinok, napilapok, melynek 1.5 része elegendő volna, azonban erről nem teszünk kimutatást, mivel nem szorosan tartozik ezen tárgyunkhoz.

OLAJ.

Amint az ipari téren a szétosztás, ugy a természeti kincsek pazarlásánál az olajnál történik legnagyobb visszaélés, ott végeznek legnagyobb kárt a profitszentségét imádó tőkések. Azért erről is bővebben kell irnunk.

Az olaj kutaknál a kapzsiság a legnagyobb oka az olaj veszteségnek, hogy ezt megérthessük, szükséges az olajkut furásáról ismereteket szerezni, mely megérdemli, hogy erre vonatkozólag könyveket, cikkeket kutassunk fel és tanulmányozzuk. Azonban röviden, az olaj veszteségnek legnagyobb oka az, hogy ahol egy kut elegendő volna, oda hármat furnak, hogy mentől hamarabb kivegyék a földalatt levő természeti kincset, az olajat.

A föld alatt levő olaj medencék rendszeresen hosszukás kiterjedésüek, a medence felső részén nagymennyiségü természetes gáz van összegyülve, melynek a nyomása következtében az olaj nagy erővel tör felszinre, valamint ez a természetes gáz is. Igy az egymással versenyző olajkut tulajdonosok sietnek, hogy mentől több kutat



A háboru meghizlalja, a munkabeszüntetés megrémiti a tőkét.

furhassanak, hogy versenytársukat megelőzzék, vagyis az olaj medencéből mentől több olajat lophassanak el a másiktól.

Ezen hiába furt kutaknak a révén nagyon sok természetes gáz szökik meg, mielőtt az olajat kiaknáznák, igy az olajnak is egy nagy része bent marad, mivel a gázkiszökése folytán a feszültség megszünik a medencében sok helyen a homokos tető beomlik elzárja az olaj utját, hogy később még pumpával sem lehet az olajat felszinre hozni, holott ésszerü gazdálkodással, a természetes gáz azt mind felszinre tolta volna, valamint későbben azt a nagymennyiségü természetes gázt is fel lehetett volna használni.

Azért van egy billió hordó olaj veszteség évente, valamint 600 billió köbláb természtes gáz veszteség, melynek nagy részét a levegőbe engedtek és nagyrészt a föld gyomrában hagyják, lehetetlenné teszik annak az ujabb felnyitását.

Mindez csak azért történik, hogy az olajkut bitorlói, mentől hamarabb, mentől nagyobb hasznot csináljanak, nem törődve azzal, hogy a jövő generációtól pazarolják el a természeti kincseket, őrültséghez hasonló gazdálkodásukkal. 1913-ban, csak egyetlen kutnál a “Mid Continental Oil Co.” mezején 1.500.000.000 köbláb természetes gázt engedtek elszökni, nagy mennyiségü olajjal egyetemben, mivel hiányosan voltak felkészülve, hogy a nagy nyomásu gázt megfékezzék.

A kormány vizsgálata szerint, az olajmezők kincseit, 2.3 részben elpazarolják, a jelenlegi, “aki meri az nyeri” rendszertelenséggel, mert legtöbb olajkutat csak találomra és a hozzá nem igen értőkkel, hiányos felszereléssel furják.

A kormány vizsgálatok alapján a következő adatokat kapjuk:

Elpazarlódik	évente:	750.000.000	tonna gáz.
”	”	600.000.000	köbláb természetes gáz.
”	”	5.000.000.000	köbláb deszka és famennyiség.
”	”	50.000.000.000	lóerő energia kihasználható vizesésekben.
”	”	1.000.000.000	hordó olaj a rossz gazdálkodás következtében.

Ezeken felül nagy mennyiségü pazarlás megy végbe a termőföldek, állat állomány, fém, érc anyagoknál, melyről tiszta kimutatást nem adhatunk, azonban tiszta képet alkothatunk, ha számitásba vesszük, a kiirtott erdők hegyes, dombos vidékeit, ahol mivel a védő fa ellett távolitva, igy ki van téve a felső termékeny talaj a viz, szél rombolásának, melyet a lapájok, vizmedencék, folyók mentére hordott le, a dombokat terméketlen sivatagokká tette ahol az ujabb befásitást is lehetetlenné tették.

Másik oka a termény földveszteségnek a hiányos gazdálkodás, mely által nagy területeket kiaknáztak, terméketlenné tettek, az által, hogy ki igyekeztek venni belőle mindent, de nem pótolták azt trágyával. Ezeket is csak több évi rendszeres gazdálkodással lehet csak, ujból gazdaságossá tenni.

Nagy energia és anyag pazarlás megyen végbe a sok hiába való áru gyártás miatt, mint például Amerikában 994.840 külömböző fejsze, illetve baltát gyártanak, mely minőségben, mértékben külömbözik egymástól, de csak 40 félére volna szükség.

Férfi kalapoknál 66.845 féle szin, forma és nagyságban gyártanak, hozott 2.000 féléből is nagyon szép választék volna és nincs is többre szükség.

Azonban a következő ábrázat erről a pazarlásról hü képet ad:

Árucik neve:	Ma ennyi féle van.	Elegndő volna
Utca kövezethez tégla	66.	5.
Vas ábra vakolathoz	125.	24.
Drót sövény	552.	69.
Aszfalt vegyülék	88.	9.
Tetőre való pala táblák	60.	30.
” cserép ”	36.	19.
Durva épitkezési tégla	39.	1.
Sima ” ”	36.	1.
Reszelők, ráspolyok	1.325.	496.
Viz melegitők	130.	13.
Ágyhoz való rugany	78.	4.
Kovácsolt szerszám	665.	331.

Csavar és csavarházaknak, 40%-át kikellene küszöbölni.

Nem csak az árutermelésnél, hanem a termeléshez szükséges szerszámgépek, valamint gyártelepeknél is óriási pazarlás megy végbe. Ennek a megértésére legcélszerübben felhozhatjuk a cipő ipart, ahol egy-egy gyár háromszor annyit volna képes gyártani, mint amennyit elbir adni, ami által csak az év egy harmad ideje alatt vannak a gépek és az üzem használatban.

Egy gyár mely naponta 1.750.000 pár cipőt képes előállitani, de ha az egész évre felosztjuk a termelt mennyiséget, naponta csak 977.000 pár cipőt állit elő, mert nagyrészben csak részidőt dolgoznak, helyesebben csak szezon munkát.

Az Egyesült Államokban 290.000.000 pár cipőre van szükség évente, melyből minden emberi lénynek két pár jutna és még fenn marad 40 millió pár azon csámpások részére, akik évente több mint két párt nyuznának el. Mivel a jelenlegi gyárak és gépek segitségével, a mai munkásokkal 600 millió pár cipőt birnánk előállitani, de mivel csak 200 milliót birnak eladni, igy a cipőgyári munkások csak egy harmad rész időt dolgoznak évente. Még az uj rendszerben is csak fele gyárra és szerszámgépekre lenne szükség, amidőn 300 millió cipőt adnának ki évente.

Még meg kell emlitenünk azon emberi és energia pazarlást, mely a mai profit rendszernek a kinövése, részben ennek az átkos anarkisztikus rendszernek a védelmére van életre hiva. Mintha olyan nagy baj volna, hogy a fenti pazarlásokat végző, csak romboló, kizsákmányoló rendszert elakarnák pusztitani. Ezt nem, hogy védeni kellene az elpusztulástól, hanem siettettni az elseprését.

Ezen felesleges emberi anyag pazarlásában első helyen áll a hadsereg, melyet csak a békeidőkre számitunk be, nem a háborus őrültség idejére amidőn csak az Egyesült Államokban több mint 12 millió munkás volt lekötve a hadseregben és azoknak az ellátásában.

Az Egyesült Államok béke hadsereg állománya, a milliciát beszámitva 1.500.000 ember, melyhez hozzá számitva az ilyen haszontalan munkát végzők ellátására szükséges társadalmi anyag pazarlást, áru készletet 8 billió dollár évi kiadást, pazarlást jelent.

Van egy másik hadsereg, mely a mai rendszernek a szülöttje és azt csak a rendszer megszüntetésével lehet feloszlatni, a rablók, tolvajok hadserege, persze csak a kis tolvajokat számitjuk ezek közzé, akiket elitéltek, mert csak kicsiben üzték az üzleteiket, ez a hadsereg évi átlagban kitesz 320 ezret.

Ezekkel a bujócskásdit játszó rendőrség, börtönőrök, biróság létszáma 400.000 ember. Ezek közzé nincs bele számitva a rendőrségnek fele, melyet mint forgalmi rendőrséget hasznosnak ismérnek el.

Még az elpazarolt életek közzé kell sorozni a prostituáltakat, akiknek a számát nem lehet pontosan megállapitani, csak az elfogottak és igy nyilvántartásban kerülteknek a száma 250.000-t tesz ki, de a szám sokkal nagyobb. Még ezekhez lehetne számitani a prostituált iróknak, tanárok számát is, azonban a statisztika azt nem mutatja, igy mi is kihagyjuk a számitásunkból. Pénzben a prostituáltak 700.000.000 forgalmat csinálnak évente.

Ezeket a statisztikai adatokat, 1924-ben szedték össze és nagyon is konzervativ számitásokat tettek, hogy a rendszert védő álszenteskedők, álprofesszorok megne támadhassák, igy egész biztosan elfogadhatjuk, sőt ha az igazsághoz akarunk ragaszkodni, 10 százalékkal meg is lehetne a számadatokat toldani. Azonban az összegezésnél eszerint is igy állunk:

Ezen iparokban elpazarolva:	Emberi erő:	Pénzben:
Hirdetésekben	600.000	1.284.000.000
Patent orvosságokban	400.000	800.000.000
Hamis és bukott részvényekben	500.000	1.000.000.000
Tulzott fényüzés	6.000.000	11.000.000.000
Biztositásokban	800.000	1.500.000.000
Vissza tartott szabadalmakban	400.000	800.000.000
Szétosztás körül	1.500.000	3.000.000.000
Katonaságnál	1.500.000	8.000.000.000
Prostitució révén	250.000	500.000.000
Rablók, tolvajok	320.000	700.000.000
Rendőrök, börtönőrök	400.000	750.000.000
Összesen:	12.670.000	29.334.000.000

1934-ben munkanélkül van	14.000.000	
Összesen nem, vagy részben dolgozik	26.670.000	ember.
A munkaképes munkásság száma	42.000.000	
Hasznos munkát végez, csak:	15.330.000	ember.

Ezen számarányon nem változtat a mai munkanélküliség, mely nem volt olyan nagy mértékü 1924-ben amikor ezen adatokat össze gyüjtötték, mint ma, de az ha változtat is, csak a paraziták számát, illetve a tolvajok, prostituáltak, házaló ügynökségeket és nagyobb mérvü hirdetési kampányt tette szükségessé hogy a 15 millió hasznos munkát, termelést végző emberek az áru készitményét eltudják adni.

Ezt az őrültséggel határos pazarló rendszert akarja az IWW elpusztitani, megsemmisiteni. Helyébe felépiteni az Ipari szabadság rendszerét, ahol mindent tervszerüen, mentől kevesebb energia és anyag pazarlással termelünk, nem haszonra, hanem szükségletre, igy 4 vagy 5 száz órai munka mellett évente minden egyén aki dolgozik, vagy a társadalom által munkamentesnek van elismerve, mint az aggok és gyermekek, megkapja az élethez szükséges ruhát, élelmet, lakást, szépmüvészetet, tudományt, mindent ami ésszerü, egészséges és a civilizált embernek szükséges.

Egy kicsit nehéz téma volt, de a munkásságnak ezeket tanulmányozni kell, hogy megérthessük, valamint másokkal is megtudjuk értetni az ilyen pazarlást, vagy is az orvoslást is tanulmányozni kell, azt az uj társadalmi rendszert, melyet az IWW ajánl, az Ipari szabadság rendszerét. Ha a munkásság már ezt tanulmányozza — megérti — akkor holnap csatlakozni fog az IWW-hoz, hogy mentől hamarabb képesek legyünk az ilyen nagy mérvü pazarlást megszüntetni, a boldogságot, gazdasági egyenlőségen, testvériségen alapuló ésszerü, tudományos rendszert megvalósitani.

Ez a kötelessége minden öntudatos munkásnak.

LÁZAS A GYERMEK

— Anyám, adj egy kis kenyeret! —
nyöszörög vackán a gyermek.

Az anya ránéz szótlanul
és sóhajtása csókba ful.

— Nem adsz? Az éhség ugy belém
mar. . .
Talán akad egy kis kenyérhaj?

Az anya könnye megered,
ahogy kérencsél a gyerek
és mint a szive, hangja lágy:
— Lesz kenyér, fiam, hoz apád.

— Hol van most apám, mond, anyám?
Hogy éhezem, nem tudja tán
s nem siet haza a kenyérrel?

— Siet, de csak most veti még el
a magját kint a buzaföldön
és várja, hogy kalászba szökjön,
aztán levágja, kiaratja,
de, hogy lisztté legyen a magja,
malmot is épit, hol a henger
elbánik minden buzaszemmel.
De lásd, a hengert bányamélye
rejtegeti előle félve.
Lefur a mélybe, mint vakondok
s az ércet is fölhozza onnat
kohóba dobja s ha a hámor
kiönti, ő addig kovácsol,
amig a kalapács alatt
megszületik egy gépdarab.
Majd gépet épit, óriásit,
aminek szája rá is ásit
és kezét, lábát beharapja,
de ám ő még sem hagyja abba:
őröl a malom, lesz kenyér
és apád mindgyárt ideér

Az anyját hallgató gyerek
szeme az ajtóra mered
és várja haza édesapját,
aki majd hoz tán egy falatkát. . .

Este, mikor a láz, az éhség
legjobban kinozza szegénykét;
egy óriást lát: apja tért meg,
de hire sincs a friss kenyérnek.

A piros arcu lázbeteg
az óriásra rámered:

— Hát hol a kenyér, mondd, apám,
ugy-e, a mások asztalán?
Bár te vetetted, te arattad,
te őrölted, — nem jut magadnak,
nem jut anyámnak, a fiadnak,
mi koplalunk és te miattad,
mert gyáva vagy, bár óriás vagy:
téged kifosztanak, leigáznak,
habár erős vagy, de hiába;
mert gyáva vagy te, gyáva!

Az anya, apa összenéznek,
nem kérdenek, nem is beszélnek,
de a szemükben ül a válasz:

— Lázas szegényke, lázas. . .

BIZTOSABB EGYLETET NEM TALÁL!

ALAKULT 1906-BAN

LÉPJEN BE

A MUNKÁS BETEGSEGÉLYZŐ SZÖVETSÉGBE!

A MUNKÁS BETEGSEGÉLYZŐ SZÖVETSÉGNEK a törvények által előirt tőkéje nem csak hogy megvan: de feleslege is van.

A MUNKÁS BETEGSEGÉLYZŐ SZÖVETSÉG az egyedüli a nagy magyar egyletek között, amelynek nincsen elértéktelenedett papirokban befektetése. Igy a MUNKÁS BETEGSEGÉLYZŐ SZÖVETSÉG áll a legbiztosabb pénzügyi alapon.

A MUNKÁS BETEGSEGÉLYZŐ SZÖVETSÉG az American Experience Táblázat biztos befizetési rendszerének alapján biztosit 300, 500, 750, 1000 dolláros haláleset járulékra. Ennek a táblázatnak multja bizonyitja, hogy ennek alapján müködő egyletek jövő fizető képessége biztositva van. Ne azt nézze ön tehát, hogy valamely egylet valamivel olcsóbb, hanem azt, hogy biztos-e. Biztositás csak akkor ér valamit, ha biztos az, ellenkező esetben nem ér egy hajitó fát sem.

A MUNKÁS BETEGSEGÉLYZŐ SZÖVETSÉG jelenleg fizet hat dollár heti segélyt nyolcvan cent havi dijért és 9 dollár heti segélyt 1 dollár 20 cent havi dijért. Összesen háromszáz napra egész segélyt, háromszáz napra félsegélyt és ezen felül csonkulási dijakat is. A munkaviszonyok javulása után tizenkét dolláros heti segélyeket is fog megint fizetni.

BELÉPÉSI DIJ NINCSEN. Első és második havi diját a központ fizeti. Három éves tagság után kölcsönre van joga, igy ha munkanélkül lesz, nem kell töröltetni magát, hanem a kölcsönével fizetheti havi diját.

AZ IFJUSÁGI OSZTÁLYBAN havi tiz centért 100-tól 200 dollárig terjedő haláleseti járulékot fizetünk, minél tovább tag, annál többet. És egy évben csak kilenc hónapban kell a havi dijat fizetni, a másik három el engedtetik.

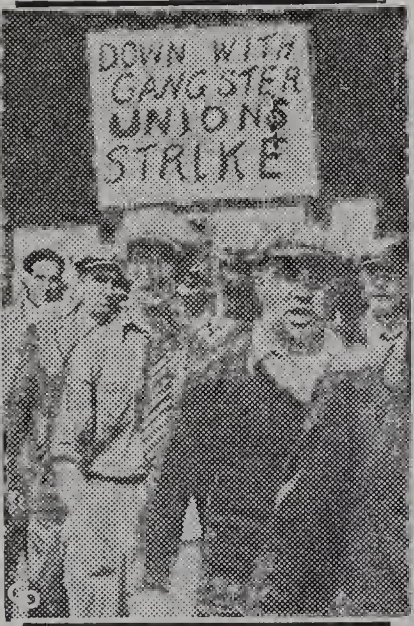
Sok mindenféle egylet van az Egyesült Államokban. Sok mindenféle utazó ügynökkel, akik mindenfélét összebeszélnek és sok lehetetlenséget állitanak és olyan tagsági kötvényeket adnak el, amelyek olcsóbbak, de nem érnek semmit sem. Legyen óvatos. Csak jó egyletbe lépjen be. Ilyen egylet a MUNKÁS BETEGSEGÉLYZŐ SZÖVETSÉG. Amely munkás emberek egymásbeli támogatására alakult.

Ha van osztálya Szövetségünknek abban a városban ahol ön lakik lépjen be abba. Ha nincs próbáljon alakitani uj osztályt nyolc vagy több taggal. Ez utóbbi esetben irjon nyomtatványokért a következő cimre:

B. VITÁLIS titkárpénztárnok.

Box 1180 East Pittsburgh, Pa.

A san franciscoi általános sztrájk képekben



A sztrájkolók tiltakoznak a company uniok ellen.

Élelem hiányában megtámadták és kifosztották ezt a füszer üzletet.

A "nemzet" őrség torlaszok mögül várja a parancsot a sztrájkolók megtámadására.

John Mooney, Tom Mooney öcscse kerekes korcsoján megy villanyos hiján.

Tar Borcsát citálták

Irta: Szentmiklósi József

A SZOLGABIRÓ — penészes koponyáju, régi vágásu ember, egykori pandurkomiszáros — ki szörnyen meg volt elégedve magával, mikor az itéletet lediktálta. És mert még egyszer gyönyörködni akart ragyogó judikaturája gyöngyében, rárikkant a vékonybélü irnokra:

— Kérem, Vandlik, olvassa föl! Nem akarom, hogy valami szamárság tévedjen bele.

A közigazgatás inasa gyönge jércehangon belevágott az olvasásba és a járás atyaistene pipaszó mellett élvezte végig ismételten az endrődi patikus tanulságos históriáját, aki ugy hágott ki a legutóbbi követevési cécónál, hogy abcugolni merészelte a kormánypárt jelöltjét, megháboritván ilyeténképpen a szent és sérthetetlen közcsendet. Taksálta pedig a szélbali patikus eme passzióját az itélet ötszáz koronára, vagy ötven napi elzárásra, sulyosbitó körülményül hozván föl az indokolásban, hogy “bár a terhelt a kormánytól kapott patikajogot, mégis a kormányjelöltjét abcugolta.”

Miután csakugyan nem csuszott be semmi badarság a leirásba, a szolgabiró elégedetten veregette meg a vállát az ambiciózus Vandliknak. Közben nyikorgott az ajtó és a sujtásos hajdu alázatal jelentette, hogy Tar Borcsa megjött.

— Lássuk!

Az asszony kissé bátortalanul állitott be a hivatalba. A dagasztást hagyta félbe, hogy elegett tegyen a magas parancsnak. Csak éppen a szopós gyereket kapta ölbe.

A főbiró ráorditott. Süket volt a szerencsétlen és igy az orditozás nyavalyája volt.

— Tudja-e mért hivattam?

— Ha megmondja a tekintetes ur...

A tekintetes ur megmondta. Azzal kezdte, hogy nem tartja becsületes asszonynak. Ha becsületes asszony lenne, nem élne Tar Istvánnal, aki egyebet se tesz, mint folytonosan izgat az urak ellen. Mintha bizony a paraszt megélhetne, ha ur nem volna, aki munkát adjon a parasztnak!

Az asszony jámboran hallgatta az orditozást. Mikor aztán megunta a sok zagyvaságot, közbeszólt:

— Az uram dolga. . . Tudom, hogy a lelke hajtja; tudom, hogy senkinek se árt; de asszonynak nincs is efélébe beleszólása.

A szolgabiró rácsapott az asztalra:

— Maga rosszabb, mint az ura. Hát van szeme, egy lázitóval egy födél alatt lakni?

Az asszony rántott egyet a vállán s a kurta, néma felelet — még jobban dühbe guritotta a járás közigazgatás főcsőszét. Sorra szedte Tar István egész bünlajstromát és kiszinezte az asszony előtt a jövőt, mely börtönnel várja az izgága embert és nyomorusággal a párját, meg a kicsi fiát. Tromfnak hagyta a tegnapi esetet, a népgyülést, melyet ugy elhuzott gonosz elvetemedettséggel Tar István a vörös pódiumról, hogy a délutáni istentiszteletet nem lehetett megtartani.

A pulykaember megint felpofozta az asztalát:

— Hát ez is semmi?! Ebbe sincs magának beleszólása?! Ez már csak istentelenség! A káplán ott várja a templomban a népet és a maga mákvirágja kiállt a piacra szónokolni és tartja szóval a falut estig, nehogy valaki is eljusson a templomba. . .

Tar Borcsa nem tudta hirtelen, mit válaszoljon a méregdudának. Valahogy aztán kibökte:

— Pedig szolgabiró ur, már ezután igy lesz. . . Eleget próbáltuk a templommal, nem volt foganatja. Pbáljuk templom nélkül. . .

— Nem féltek a pokoltól?

— Nem. . . Megszoktuk mi már a poklot a földön.

A szolgabiró más hurokba kapott. Kérlelni kezdte az asszonyt szép szóval. Hagyja ott az urát, vagy próbáljon becsületes embert faragni belőle. Nem lehet boldogságos az élete olyan semmiházi fráter mellett, mint Tar István. Ha nem akar megtérni, föl is ut, le is ut. A szélesutcai ház a Borcsa jussa, parancsolja ki belőle a szájas naplopót.

Az asszony keserüséggel hallgatta végig a párja ócsárlását.

— Csak ezért tetszett hivatni?

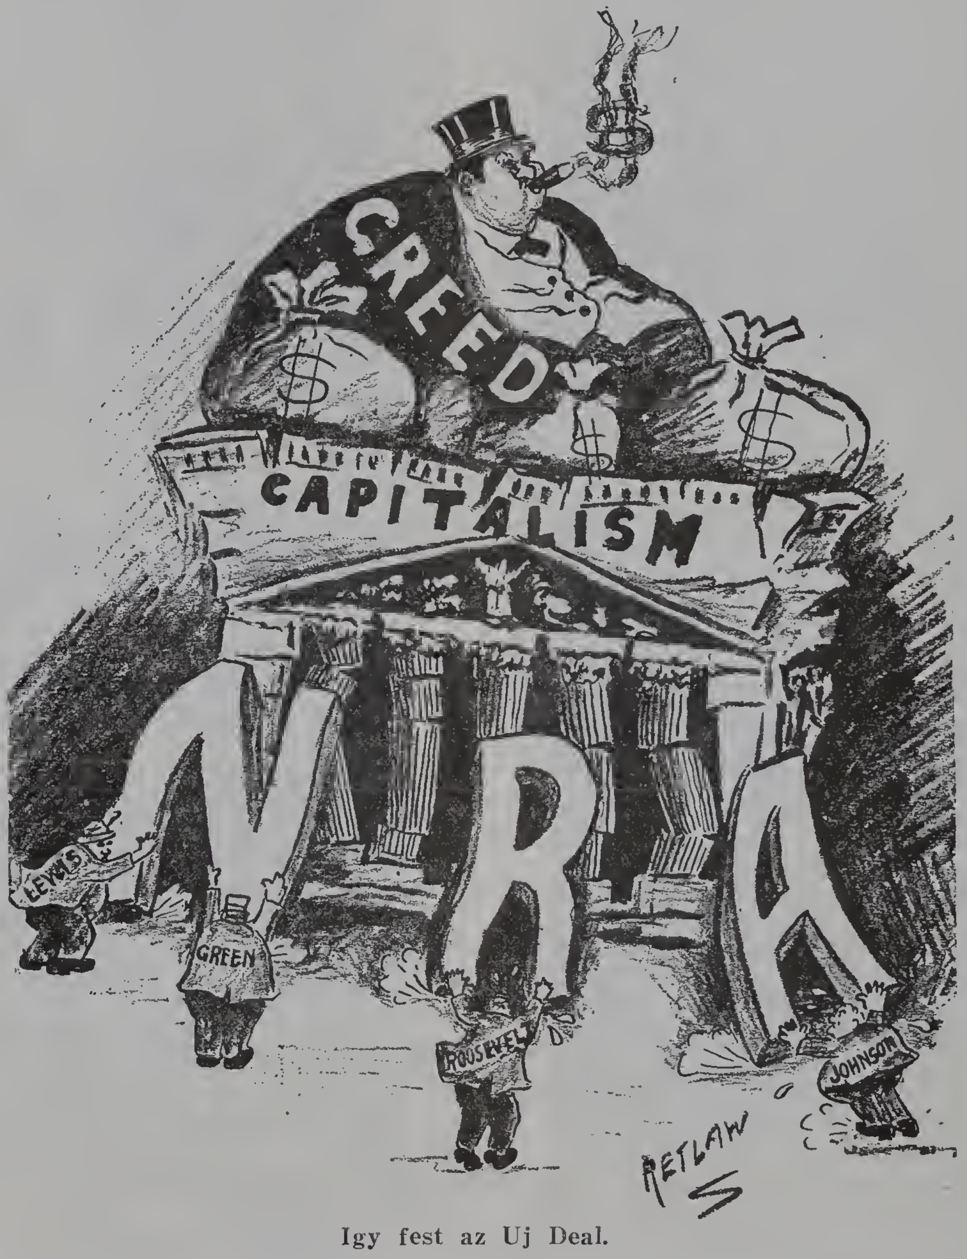
— Ezért.

Tar Borcsát elfutotta a vér és nehezen birt ura maradni magának. Állt némán, Szótlanul. Egy kicsit a sirás is környékezte.

A nyakig zsinór szolgabirósági hajdu megint bedugta a fejét az ajtón.

— Alássan jelentem, Tar István.

A sokbajszu biró kellemetlenül érezte magát, de nem volt mit cselekedni. Tar István már ott állott a másik pillanatban az asszonya mellett, aki boldog volt, hogy jött a védelmezője, a lecke embere, akit menél inkább gyaláznak, annál jobban szeret.



Igy fest az Uj Deal.

Tar István megölelte az asszonyt.

— Minek hivattak?

Az asszony nem felelt. Féltette az urát, hogy bajba sodorja az indulat. Remegve ölelte magához a kicsi pólyáséletet és a tekintetével akarta megnyugtatni a háborgó lelkü embert, akit utána kergetett a tudniakarás, aki el nem tudta képzelni, hogy mit akar az asszonyától a szolgabiró.

Néhány másodpercre megnémult a hivatali szoba. Mikor aztán Tar István ráunt a gyötrő tapogatózásra, ugy találta odanézni a szolgabiró szeme közé, hogy a hatalmas urnak — kissé dadogva, de megerdt a szava:

— Én akartam beszélni vele. Hogy vagy téritse kendet jó utra, vagy legyen lelke — és ne maradjon egy ilyen izgató, hazátlan senki felesége. . .

— Instállom, hát ahoz mit tetszene szólani, ha én meg a tekintetes asszonyt bizgatnám efélére?

A szolgabiró ugy tett, mintha nem hallaná. Dühöngve folytatta azzal a rettenetes vitézséggel, amely csak akkor üt ki a fajtáján, ha tulontul biztonságba érzi magát.

— Igenis, hazátlan senki kend, aki nem érdemli meg ezt az asszonyt. Mit lármázott már tegnap megint a népgyülésen az urak ellen?!

— Nem volt az lárma. . . Csak megmondtam ápertén — ami igaz is, hogy az ármentesités körül is gazemberek voltak a tizezerholdasok és gazság az a sok ármentesitési adó is, amit megfizettetnek a koldus kisemberekkel hiába. . . Mert a sok gátnak, csatornának, szivattyunak más sem veszi hasznát, csak az uraság. Azt mondtam, hogy hajdanta az árviz csak talán-talán nyomoritott meg bennünket, de most biztos nyomoruság — az ármentesitő társulat.

— Kis ember kend ahoz, hogy az urak dolgát értse. Csak karattyolni tud, meg ágálni a papok, meg az urak ellen.

— Nem is az urak dolgát akarjuk mi érteni, hanem a magunk teendőit, hogy az urak rablásának végét vessük azzal, hogy a sötétben botorkáló kizsákmányolt társainkat fölvilágositjuk, hogy szervezkedjenek és szervezett erejükkel ellentállhassanak minden huncutságnak.

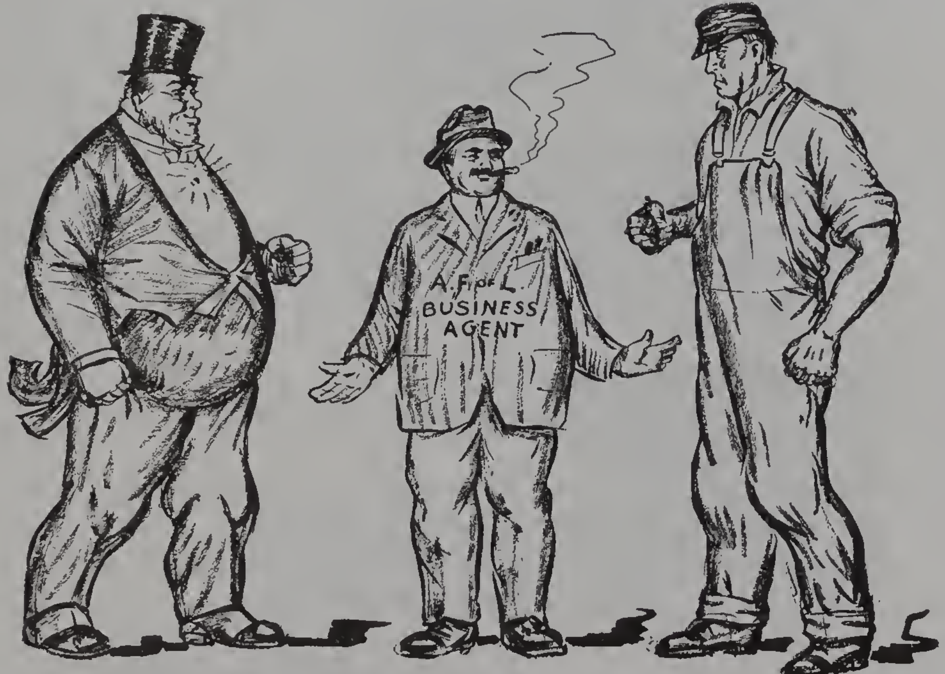
A szolgabirót megint a zsinóros legény zavarta: "Toloncokat hoztak!"

— Elmehetnek Tar. . . Annyit azonban megigérek, hogy nem fog kend munkát kapni nyárára. Vagy innen pusztul. Itt nem dózsázunk.

Tar István megfogta párja kezét és indultak. Az ajtóból szólt vissza a szolgabirónak:

Hiszen, hogy a szolgabiró ur, meg az uriosztály haragszik rám, azt én jól tudom. De, hogy a munkám ne kelljen — attól igazán nem félek. Annyira sosem haragszik meg az ur a parasztra, hogy dologra fanyalodjon helyette.

Ezt kellene a munkásoknak megérteni.



AFofL kártyakeverője.

A LÁMPAGYUJTÓ

Ráborul az utcára az éjszaka,
a szemvakitó, a tilalomfás éjszaka. . .
Minden alszik, de tompa zsibongás. . .
Az élet fekete bakacsinban is él,
A vakondok menzedéke sötétben is
Vakondok, . . . tur, tur s előretör.

Köd belül, ködös homály szerteszét.
. . . De im kigyul egy-egy csillag itt-ott,
Villám és gázcsillagok.
Világ szürődik a világtalanokra,
Lopott csillagok napocskamimelők. . .

Apró, sejtelmes alakok tolongnak,
Sötétbe burkolva, észrevétlen,
Névtelenül: — a lámpagyujtók.
Mire csillant a fény, tovaoson már,
Nyoma nem látszik, csak a csillag ég,
Melyet fénye gyujtott. . .

Örökösen a sötétben bolyong
Ki világot gyujt,
A névtelen a névteleneknek.
S ha nappallá gyult az éjszaka,
Eltünnek ők, — a lámpagyujtók.

Ki ismeri őket? Melyiknek a neve
Kél ki az éjszakából?
Mégis minden fény a kietlen éjben
Őket dicsőiti, a suhanó névteleneket,
E napot lopó csillagmimelőket. . .

Irigyellek lámpagyujtogató!
Névtelenül, láttatlanul világot gyujtani,
A sötét éjszakán! . . .
Nappal se bérem, se dolgom,
Az éjszaka surranó munkása vagyok,
Láttatlan maradva, mikor lábom nyomán
Kigyul egy világ az én sugaramtól! . . .

Fényes Samu.

Magyarországi beszámoló

Irta: **F. S. József**

KEZDJEM talán ott, hogy az ország "öröklés utjáni" miniszterelnöke Gömbös Gyula egyik amerikai lapban nyilatkozott arról, hogy a mi kies honunk az egyetlen sziget Európában ahol rend van? És ez a magyar nép öntudatának köszönhető.

Hát ami a rendet illeti ez azután igaz, hogy van. De ez a rend hasonlatos ahoz a rendhez miket rendezett temetőkbe lehet találni. Ahol csendesség honol és a halottak szép sorjában azaz rendekbe sorakoznak egymás mellett.

Demokráciáról is regélt Gömbös. Hát ez is van. Ennek tudható be például az, hogy hivatalosan nem tiltották ki Magyarországból az amerikai BÉRMUNKÁST, ellenben egyszerüen már közel egy éve rendszeresen elsülyesztik ahelyett, hogy a cimzetteknek lekézbesitenék.

Ugyanigy a demokráciához tartozik az is, hogy a Bérmunkás naptár 1934. éves számát 90%-ban ugyancsak elsülyesztették, még mielőtt a póstai szállitás jogát megvonták volna. Előfordult, hogy az akinek mégis lekézbesitették az megkapta a naptárnak az egyik felét, ugyanis szétszakitották és csak a felét kézesitették le. Valószinüleg a Hitler imádat váltotta ki pártatlan kormányférfiainak eme intézkedését. Levél cenzura is vigan virul. Előfordult legutóbb is, hogy Pestről Debrecenbe cimzett levél tartalmát előbb olvasta el a hatóság, mint a cimzett.

Az ipari és kereskedelmi élet katasztrófálisan romlott az utóbbi időben. Nézzük csak minden foglalkozási ág éltető elemét az épitő ipart.

Ha az utolsó három év adatait nézzük láthatjuk, hogy amig 1932. év első felében 711 uj épitkezésre adtak ki engedélyt addig 1933. év hasonló szakában 491-re és 1934 évben már csak 306-ra. (Budapestre vonatkozó adatok. 1932-ben 3.140 lakást nem béreltek ki, addig 1934-ben ez a szám már 12.843-ra emelkedett és 4.822 üzlet helyiségre rugtatott fel.

A szoba konyhás lakások havi 40—50 pengő. Igy 16.137 ember szükséglakásban (jó részben földbevájt lyukakban a kiserdőben.) 1.751 ember az éjjeli menedékhelyeken lakik.

Találtak 7.778 szobában 6 embert, 1816 szobában 8 embert kik együtt laktak. A kormány, hogy a lakások "árát" fenntarthassák a háziurak, az épitkezést ugy megnehezitette, hogy az épitkezni szándékozóknak element ettől a kedvük. a munkás ma már heti 10 pengőt sem keres. De azért itt rend van. A rendről gondoskodik a szurony és géppuska.

Ez azonban sok, sok pénzbe kerül. Mit tesz ilyenkor egy zseniális politikai felülépitmény? Azok kiknek kezén van az ország vagyona, földje és kik mint Marci hevesen ugy élnek, életet és vért szivesen adnak e honért, azonban zabot illetve adót vagy egyáltalán semmit vagy jobbik esetben alig valamit fizetnek, miből az ő társadalmi rendszerüket a pribékek védelmezik, birja fizetni a kormány.

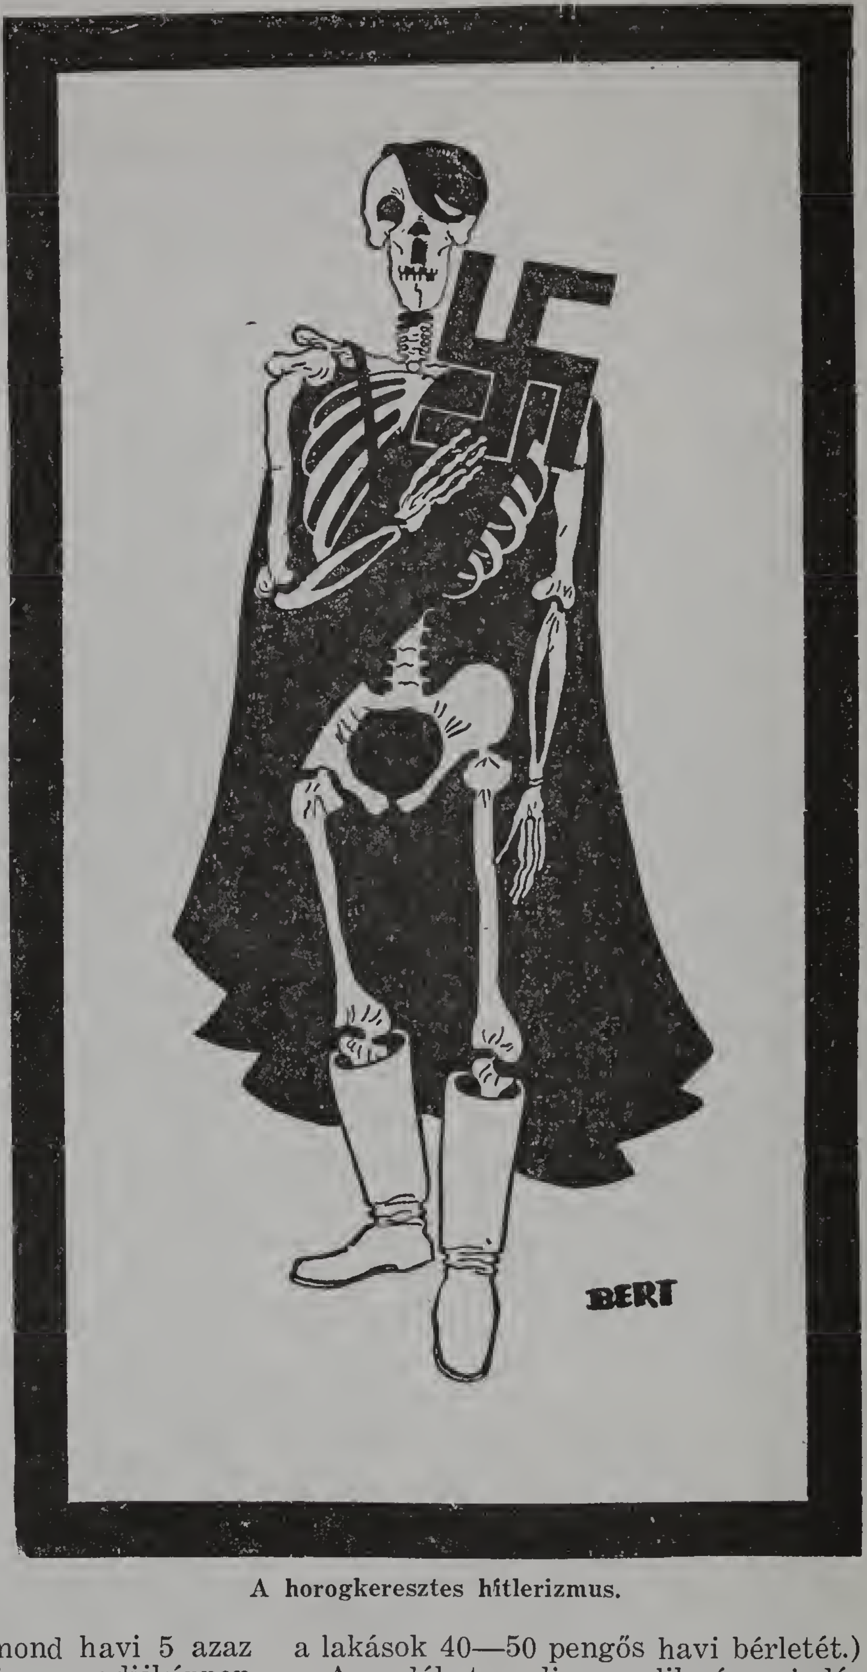
Azért van itt ez a hazátalan bitang proli banda (tartják ők,) hogy ez izzadja ki a poroszlók fizetését, meg annak a fegyvernek az árát, mivel a rendet garantálják.

Megadóztatnak mindent amit csak a tömeg fogyaszt. Igy a buzánál az ár 47 százalék, krumplinál 50 százalék, lisztnél 67 százalék, sertés husnál 68 százalék, kenyérnél 72 százalék, cukornál 80 százalék adó, mely a kincstárt illeti meg. A lisztforgalom egy év alatt 50 százalékkal esett vissza. Ha a zsebrák szellem a kenyeret nem adóztatná meg kilónként 24 fillérrel ugy 9 fillér volna egy kgr. kenyér ára. De a legtöbb kenyeret a prolik fogyasztják és igy 34 fillért kell fizetniök egy kgram kenyérért. Mivel a keresetből kenyérre is alig futja a prolik lassan lemondanak a kenyérevéshől és ez igazolja, hogy a liszt forgalom felére csökkent egy év alatt.

Budapesten mindennek dacára állandóan csökken az adóbevétel (a vidék már rég nem fizet.) Az állami adók julius végéig 3.533.718 pengővel csökkentek a mult év hasonló időszakában befizetett adókkal szemben. A fővárost illető adókból is 4.8 millió kevesebb bevétel volt.

Lovas nemzet vagyunk l.érkednek vele az uraink, igy természetes, hogy a lóhusra sem telik már. Ezt igazolja, hogy amit tavaly az év első felében a budapesti prolik még 1.848.000 kilógramm paripa hust fogyasztottak, addig 1934 év hasonló szakában csak 1.573.000 kilóra jutott már.

"A haza (értsd az uri osztályt) hálás lesz hőseinek." Ezt bömbölte 1914-ben minden csuhás és politikus. A prolik bedőltek nekik és mentek a vágóhidra, most pedig e hála közlegényeknél a 75 százalékos rokkant havi 32 pengőt tiszteknél 64 pengőben nyilvánul meg. A hadiözvegyek kik férjeiket veszitették el e hála révén ird és mond havi 5 azaz ÖT pengőt kapnak nyugdijképpen ami egy évben 60p. (lásd ezzel szemben a lakások 40—50 pengős havi bérletét.)



A horogkeresztes hitlerizmus.

Az adókat pedig emelik és mindég kreálnak ujjabbakat, természetesen olyan adókat melyeket kiváltképpen a prolikon lehet bevasalni. Most a legujjabb adó (Budapest fürdő város javára lett kreálva.) Minden szódaviz fogyasztás 1 fillér adót fizet. Ezekből az 1 fillérekből befutó összeget a fürdők kifejlesztésére forditják. Luxus fürdő van elég már eddig is ahová csak azok a prolik birnak bemenni kik ott a szenny eltakaritását végzik. A belépő dij ugyanis mindenütt oly magas, hogy egyszeri fürdés ezekben a fürdőkben egy munkás heti keresetéből nem telik ki. Olyan fürdő ahova munkások zsebéhez viszonyitva belehet menni mindössze kettő van Budapestnek. Lesz tehát a prolikon bevasalt uj adóból ujabb fürdő nem is egy, de majd azok élvezik azt is akik eddig is élveztek a luxusfürdőket.

A Gömbös kormány melynek nincs pénze az éhség csökkentésére és amely a demagóg 95 pontjával, mely a fejlődés terén gyorsvonati tempót igért szorosan követi a Bethlen rezsim utjait. A munkásság jobban levan ma tiporva mint valaha. Az alábbi kimutatás világosan igazolja azt a hatalmas eltolódást mely a népesség foglalkozásában bekövetkezett:

	Foglalkozás:	1910-ben	1920-ban	1930-ban.
1.	Őstermelés (földmüvelés)	4.256.172	4.449.104	4.499.814
2.	A.) Bányászat	86.980	117.344	112.693
	B.) Ipar	1.530.158	1.522.309	1.884.688
	C.) Kereskedelem	350.294	407.020	470.077
	D.) Közlekedés	307.466	356.126	338.378
	Összesen:	2.274.898	2.402.799	2.805.836
3.	Közszolgálat	303.445	372.166	435.919
4.	Véderő	63.164	124.600	72.905
5.	Napszámosok	178.015	97.469	122.513
6.	Nyugdijasok, tőkepénzesek	145.510	196.825	359.904
7.	Háztartási alkalmazottak	214.979	175.461	196.563
8.	Egyéb foglalkozás	170.788	161.719	194.865
	Összesen:	7.606.971	7.980.143	8.688.319

Egyfelől az IPAROSODÁS érezteti hatását, mert tiz évvel ezelőtt az őstermeléshez tartozó népesség még háromszorannyi volt, mint az iparból élők száma. Most azt látjuk, hogy az 50.000 lélekkel gyarapodott őstermelő osztály már csak két és félszer akkora, mint a 362.379 fővel közel 2 millióra szaporodó ipari munkás csoport. Husz év alatt az állami tisztviselők a (bürokraták) száma 303.445-ről 435.919-re hatalmasodott el, ez megmagyarázza miért van itt minden agyonadóztatva. A legmegdöbbentőbb növekedés a nyugdijasoknál van. Itt 150 százalékos az emelkedés. (Ezen nem lehet csodálkozni, mert minden panamista és sikkasztó politikus, miniszter stb. ha a rendszert segitette és meneszteni kellett a panamák miatt börtön helyett nyugdijazták.)

Ezekben a számokban van a gyökere tehát e kurzusnak. Ezt az erőt teljes erejével segiti a katolicizmus, mely a harácsolásban semmivel sem marad el Gömbösék mögött.

A munkásság sorait a munkanélküliség tizedeli: Elég ha a szakszervezetek statisztikáját nézzük. E szerint a famunkások 38.9 százaléka, az épitők 34.4 százaléka, a vasmunkások 34.4 százaléka, a nyomdászok 32.4 százaléka, a könyvkötők 29.1 százaléka, a szállodai munkások 21.4 százaléka, és igy tovább van munkanélkül. A szakszervezetek tagsága közül Budapesten 13.520, mig vidéken 9.328 tag van munkanélkül. Ezek az adatok a szociáldemokrata szakszervezetek tagságára vonatkozik, mely tehát elenyésző százaléka az iparokban dolgozó vagy onnan kiszorult egyébb felfogásu munkások számához viszonyitva. De igy is eleget beszélnek ezek a számok.

A vidéki helyzet sokkal siralmasabb országos átlagban 16—20 fillér kereset jut egy-egy lélekre hetenként és igy elképzelhető, hogy a nincstelen földmunkásság sorsa és életnivója mélyen a kinai kulikén alul van.

Egész vidékek lakósai golyvásak mert nincs egészséges ivóviz. A Gömbösék 40.000 pengőt vettek fel a költségvetésbe a vidék ivóvizének megjavitására. Ugyanakkor 150.000 pengőt költött el a katolicizmus Szent István napjának rendezésére. A katolikus ünnepek állami szubvencióban, kedvezményes támogatásban részesülnek. Az iskolák melyek az ő kezükben vannak és az ő irányitásuk alatt (vidék) hónapokon át nem fizették tanitóikat dacára a kegyetlenül behajtott egyházi adók hatalmas összegének, melyet elnyelt a feneketlen papzsák. Most rásózták a tanitóik fizetését is az államra, de ezenfelül az államnak semmi köze az iskoláikhoz nincs.

Sok templom nagy sötétség és még nagyobb nyomor bizonyitéka. Ez a közmondás ezerszeresen igaz. Templom van minden utca sarkon már és körülöttük tizezrével éhező emberek.

A katolicizmus, mely Magyarországból JEZSUITA államot csinált ennek dacára mind mohóbb (evés közben jön meg az étvágy.) Ma azt lehet bátran mondani, hogy a nemzeti vagyon nagyobb része kezükben van és mivel az általuk harácsolt vagyonról elszámolni nem tartoznak, hogy ez hova jut azt rajtuk kivül senki sem tudja. Már előzőleg az alsópapságot az állam tartotta el részben és most teljes egészében a tanitóik mintájára ezek eltartását is az állam nyakába akarják sózni (és sikerülni is fog nekik.)

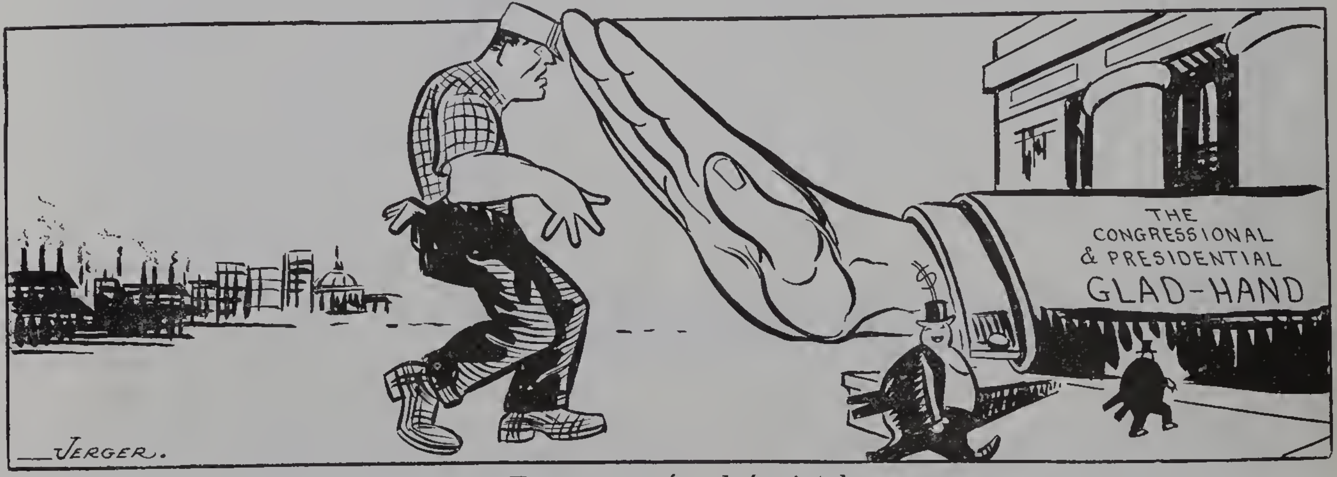
A magyar falusi lakósság helyzetét talán illusztrálja egy kis statisztika.

Egyik statisztikus 96 családot vizsgált meg és megállapitotta, hogy:

Csak 82 családnak volt baromfija	14-nek nem
” 23 családnak volt hizó disznója	73-nak nem
” 14 családnak volt tehene	82-nek nem
” 5 családnak volt anyasertése	91-nek nem

Általában egy család évi jövedelme az állattartásból összesen 30 pengő volt.

A munkásmozgalom izekre szaggatva vajudik. A legnagyobb és legtehetetlenebb ma még a szociáldemokrata mozgalom mely legális. Éles ellenzéke van az u. n. SZAKSZERVEZETI ELLENZÉK fából vaskarika féle alakulat. Ez az alakulat, mely a KMP befolyása alatt van legfőbb hivatásának tartja az erők szétforgácsolását. Nem egy ujabb szervezeti formáért, hanem hatalmi kérdésért. Évek óta tart ez az áldatlan harc és eredménye a munkásságnak megcsömörlése minden mozgalomtól. Szakszervezeti ellenzék mely valóságban a régi bürokraták helyé-



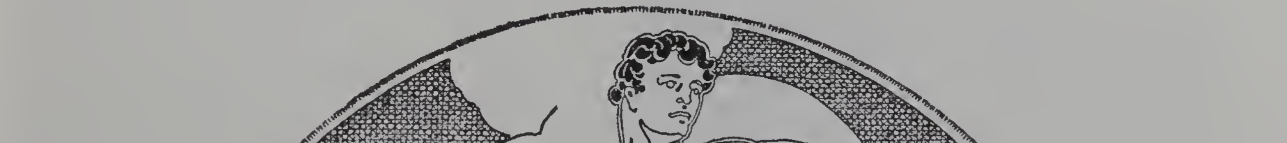
Ez a szavazó polgár jutalma.

be saját bürokratáinak elhelyezése körül forog teljesen téves utra vitte magát az osztályharc elméletét is.

A munkásság energiáját felőrőlik a személyi harcok és igy a sztrájkok sorozatos elbukása következik be. Ez a béka-egér harc azonban igen egyoldalu. Most legutóbb a cipészmunkások sztrájkja alkalmával a szoc. demszakszervezet vezetősége és a szakszervezeti ellenzék vezetősége kooperált. A szakszervezet a cipészmunkások között, gyüjtést inditott a sztrájkolók javára, mig a SZAKSZERVEZETI ELLENZÉK külön listán cselekedte ugyanezt, csak azzal a külömbséggel, hogy nem csak a cipészek, de általános gyüjtést rendezett tagjaik között. Az eredmény siralmas. A nagyhangu ELLENZÉK a szakszervezet által gyüjtött összegének mindössze NYOLC százalékát birta az egész tagjai között szakmára való tekintet nélkül összehozni, mig 92 százalékot a szakszervezet hozott össze csak egy szakma keretében. Ez a szám igazolja az u. n. szakszervezeti ellenzéknek a jelentéktelenségét gyakorlatban. A legérdekesebb ebben a kooperativ harcvezetésben az, hogy az ellenzék látva a kudarc közeledtét egy röpiratot adott ki, melyben gyalázatosan hátbatámadta azt a vezetést melyben ő is benne volt. Suttogó hirek szerint az ellenzék az általa gyüjtött sztrájk segély összeget alaposan megdézsmálta és ennek leplezésére támadta hátba a vezetést.

Frakciók alakulnak és mulnak el. Rózsaszinü jelszavak után mint pillangók mennek a hiszékenyek és lassan el is hullanak. Forradalmi szervezkedésre, mert ez komoly dolog és kockázatos még ma igen kevesen kaphatók. És igy a jelenlegi feneketlen nyomoruságnak nem kis részben a demagókon kivül a munkások saját maguk az okai.

Reméljük egyszer ennek is vége lesz és a munkásság a kapitalista élősdiekkel együtt a munkásmozgalom élősdieit is lerázza nyakáról HA NEM AKAR NYOMORULT ÉS GYÁVA MÓDON ELPUSZTULNI. . .



MARHASORS

Tiz évig tehén volt,
borjat, tejet adó,
béketürő jószág,
kérődző, hallgató.

Később csak marha lett
igahuzó barom,
ekét, boronát vont
szerte az ugaron.

Most meg vágóállat,
kötélen vezetik
a vérszagu hidra
s darabokra szelik.

Megnyalja a tőkét,
nem is gondol rosszra,
szelid bizalommal
néz a mészárosra.

Aztán sujt a tagló,
vége az egésznek,
vérespiros husán
legyek legelésznek.

Combját, tarját rakják
fagyos jégverembe,
urak eszik este
fényes étterembe'.

Bőréből bőrönd lesz,
csattos, lakkos, barna,
dámák utaznak el
véle tengerpartra.

Szarva kürt lesz, melyből
riadók riadnak
szabadulásakor
az elnyomottaknak.

(Budapest) **Korvin Lajos.**

Városok szerepe a kapitalizmus kezdetéig

E KIS tanulmánynak nem az a célja, hogy a városok történetét adja, sem az, hogy az emberiséget küzdelmeiben végig kisérje, inkább az, hogy kimutassa, hogy az emberiséget gazdasági érdekei kényszeritették bizonyos intézmények létesitésére és az intézmények mennyi oltalmat s biztonságot nyujtottak számára, és mennyire szolgáltak jövő életének fejlesztésére.

Ilyen intézményei között a városok voltak azok, melyek életküzdelmeiben és fejlődésében a leghatásosabb segitséget nyujtottak számára.

Azért azt hisszük, hogy nem végzünk hiába való munkát, midőn a városoknak ebbeli szerepéről, ha nem is teljes részletességgel, de legalább főbb vonásokban, a Bérmunkás Naptár olvasói számára tájékozást nyujtunk.

Városok alapitásának inditó okai.

Ugy az ókorban, mint a középkorban körülbelül azonos okok vezettek a város alapitásához, azért kiindulási ponttul a középkori gazdasági állapotokat vesszük.

Az államok e korban a leglazábban voltak egymáshoz füzve. Nem voltak egyebek, egymással ellenséges érdekek, vad tülekedésénél. A kicsi faluközösség legföljebb, egy néhány egymás mellett fekvő falut foglalt magába. Aki nem volt tagja a falu közösségnek, mindenütt idegenként kezelték. Minden ami más faluközösséghez tartozott, idegen világhoz tartozott. Még a nyelv sem tudott egybehozni egyes tartományokat. Ahány falu, annyi nyelv és dialektus választotta el őket egymástól. Minden egyes országban ezer féle nyelven és dialektusban beszéltek. Csak legnagyobb szükség idején hozta össze közös érdekük az egymáshoz közelfekvő falukat. Ennek elmulásával, ismét szétfutottak.

Ezt az állapotot a kor gazdasági alapja határozta meg. Ez a kor alig ismerte a pénzt, nem is volt rá szükség, mert a termékek gazdaságán alapult. Mindent a maga és a saját használatára termelt mindenki. Az emberek tevékenységi köre a család, a faluközösség és mindennekfölött a hübér ur volt, kinek a termékből járadékát be kellett szolgáltatnia. A hübér ur biztositotta ellenség ellen a védelemről, ezért fizetett neki minden termékből bizonyos hányadot. A földmüves a maga termesztette élelmiszerből élt, a kézmüves, — aki félig földmüves volt, — a maga falujának, vagy uraságának dolgozott. Nem volt semmi kereskedelmi kapcsolat az elszigetelt községek és kastélyok között. Országutak sem voltak, mert ennek épitésére nem serkentett a társadalmi szükséglet.

Ez az állapot örökké még sem tarthatott, meg kellett változnia. Meg is változott, mihelyt fennállásának ellenséges elemei — melyeket magában kifejlesztett — egy bizonyos fejlődési fokhoz érkeztek. Ezek egyike, az egyszerübb formákra törekvő munkamegosztás, mely kifejlesztette az önálló kézmüvességet. Az önálló kézmüvesipar termékei hamarosan tulhaladták az egyéni és faluközösség szükségleteit, kényszeritővé vált, hogy a fölösleget más csoportokkal cseréljék ki. Ez a kereskedelemhez vezetett, a kereskedelem pedig vásárok, piacok létesitését igényelte. Ezek a forgalom természetes csomópontjain helyeződtek el. Azok az értékek, melyek ilyen helyeken fölhalmozódtak, kisértésbe hozták, nemcsak a környék, hanem idegen népek kincssóvárgását is, amelyek pedig hajózható vizek mentén feküdtek, a kalózokét is. Igy a rablótámadások ellen való biztositás is szükségessé vált. Tehát meg kellett kezdődnie a falu megerősitett várossá való épitésének.

Ugy szintén, a fejedelem, hatalmasabb ur, vagy püspök székhelyén nagyobb embertömeg gyült össze a fejedelem, vagy nagy ur fegyvereseiből, várjobbágyaiból, kézmüveseiből stb. Ennélfogva élelmiszerek és kézmüves cikkek is nagy mennyiségben halmozódtak itt össze. Ennek megvédésére, fallal keritették körül a helyiséget. A fal, a vár épités tette várossá a falut.

Ez a városok kialakulásának kezdete mindenütt és mindenkorban.

Amilyen mértékben a gazdasági élet fejlődött, amilyen mértékben a lakosság a nomád életről a földmüvelésre tért át, ugy növekedett a termelés és vele a földmüvelő és kézmüves fölöslege és a fölöslegnek az árubabocsájtása.

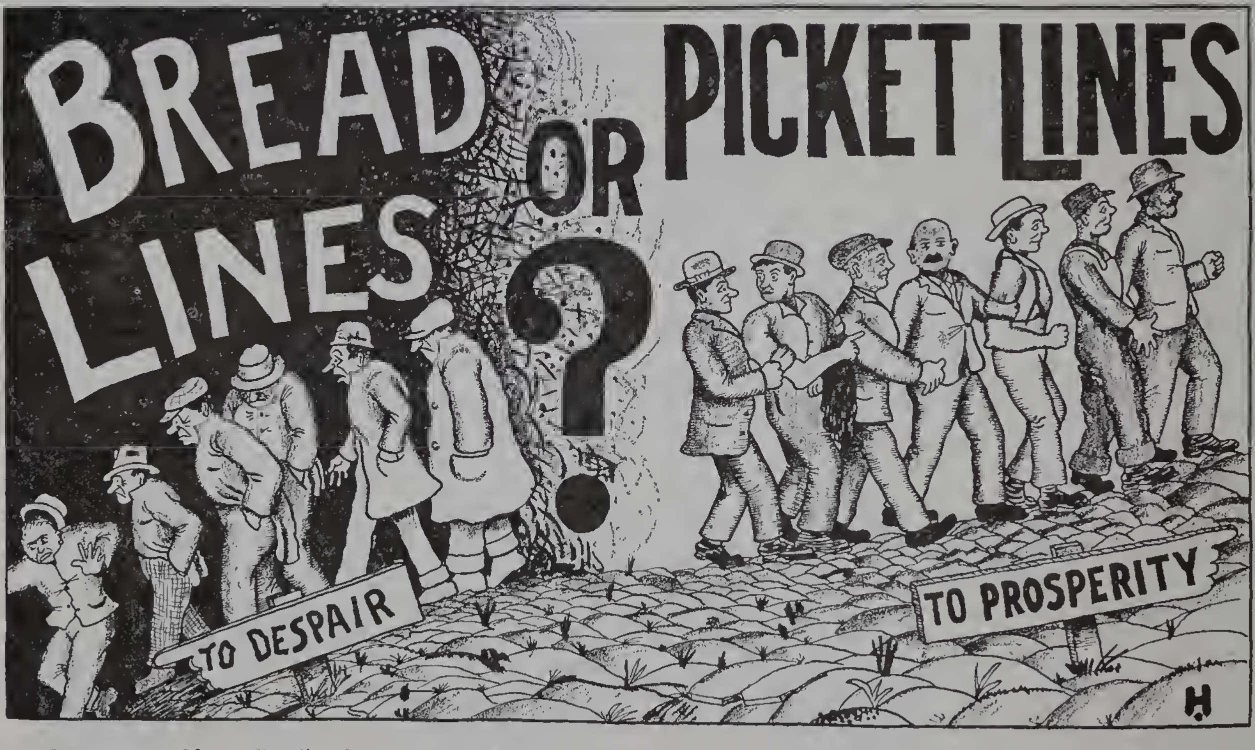
A fallal körülvett város a falunál nagyobb biztonságot adott a rabló urak és vad nomádok támadásai ellen, igy egyre több ember és áru gyült a város falai mögé. Tehát egyrészt, a fölhalmozott áru megvédésére, mint várra, másrészt ezen termékek adásvételének lebonyolitására, mint vásárra, volt szükség a városok megalapitására.

A munka fokozódó termelőképességével odajutottak a dolgok, hogy ezután már csakis a kereskedelem számára termeltek. Ez lett ezután az egyedüli fontosság, ezzel lépett ujra a világ szinpadára, az eddigi idők legforradalmibb tényezője: a pénz. Mennél inkább fejlődtek a városok és velük az árucsere, annál nagyobb hatalommá lett a pénz.

A városokban fejlődtek ki az árutermelő és az áruval kereskedő osztályok. A városok fejlődésével olyan termelési mód jutott a történelembe, mely a társadalom alapjának nem csak egyes részét aknázta alá, hanem léte egészen uj alapokra került általa. Ez az uj gazdasági mód először csak megbolygatta, azután szétrobbantotta a hübéri termelési módot.

A városok fejlődésének első szakában a kezdetleges árucsere csak szük határok közt mozgott, mert semmi nem ösztönzött a kiterjedésre, de a termelés fejlődése és a pénznek a kereskedelembe való bevonulása a világkereskedelem meginditásához vezetett.

A világkereskedelem legkorábban, a délolaszországi városokból indult ki. Ott keletkeztek Európa és a kelet kö-



Szolgai megadás, könyörgés, alamizsna vagy harc. Nézd a meghunyászkodó koldus sereget s a harcias picketelőket. . .

zött az első kereskedelmi összeköttetések. A tengerentuli kereskedelem is ekkor kezdődött, legelsőnek Konstantinápollyal. A délolasz városokat követték: Spanyol, Francia, Németország és a Földközi tengermenti országok városai.

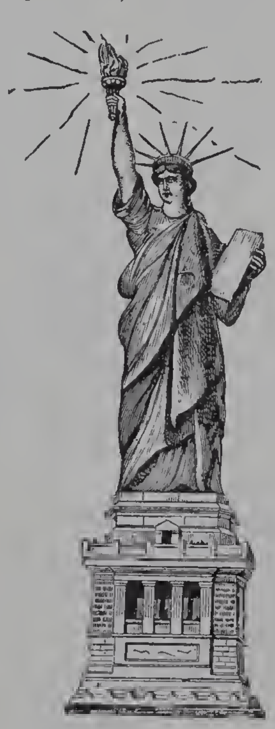
A városok fejlődésével a szükségletek, mindenhol az árutermeléshez vezettek, mig a kereskedelem végül, mindenhol világkereskedelemmé fejlődött. Ezután már, az emberiség sorsa nem azon fordult meg, hogy mit határoztak a rendi országgyüléseken, vagy a püspökök és hübérurak kastélyaiban, hanem azon, hogy miként alakultak az árak a városok kereskedelmi piacain. Alább megfogjuk látni. hogy a városok által kifejlesztett árutermelés és kereskedelem óriási forgataga mint változtatta át a hübéri gazdasági termelést árutermeléssé; és mint formálta át a jobbágy és földes ur egymásközti viszonyát. A paraszt forradalmak inditó okai is a városokból keltek utra.

A városok küzdelme a függetlenségért.

Mindenek előtt tudni kell, hogy a városok fejlődésük elején az egyházi, vagy világi hübérurak fönnhatósága alatt voltak. És minél jobban gazdagodtak és minél több vagyon halmozódott föl bennük, a hübérurak és egyházfejedelmek annál inkább szerették volna a városok lakosságát a hübéri uralom alatt tartani. A városok főtörekvése, ellenben az volt, hogy minél előbb kikerüljenek e befolyás alól. Igy állandó harcot folytattak a városok vagyonára éhes főurak és főpapapokkal szemben. A mennyiben a városoknak ez közös érdekük volt és hogy a harcot jobban állják, egymással szövetségi viszonyba léptek, hogy kiverekedjék önállóságukat és azt megvédjék a feudális országgal szemben. Ezért alakultak ki a városszövetségek.

A fejedelmek érdekei szintén ellentétben állottak a főurak érdekeivel szemben, igy a városokban hatalmas szövetségesre találtak.

A fejedelmeknek a külső és belső ellenség ellen katonaságra volt szüksége, ezek eltartása pénzbekerült, ennek előteremtéséről pedig nekik kellett gondoskodni. Pénz pedig nem volt máshol található, mint a városok gazdag iparosainál és kereskedőinél. Amennyiben a fejedelmek rávoltak utalva a városok pénzbeli segitésére, ezeket ennek fejében a hübéri kötelékek alul mentesitették, ugy, hogy kiváltságok és szabadalomleveleket állitottak ki számukra, melyek értelmében szabadon, minden főuri beleszólás nélkül, ügyeiket a fejedelmekkel intézhették el. A városok küzdelme egy percre sem szünetelt, mig a hübéri járom alól föl nem szabaditották magukat.



A Wall St. hivatalos jelvénye.

A kereskedelmi tőkének az érdekei központositott védelmet igényelnek, ennél fogva, a széthuzó hübéres nemesség érdekeivel ellentétben, a központi nemzeti állam kialakulását minden áldozat árán is előmozditani igyekeztek. A fejedelmek hatalmi érdeke ugyancsak ez. Igy találkoztak össze a városok és fejedelmek létérdekei.

A kereskedelmi tőke profitja annál inkább fokozódott, minél erősebb központi hatalom állt mögötte. a fejedelem annál inkább érvényt tudott szerezni hatalmi érdekeinek minél több és minél gazdagabb város állt pártjára. A saját és a város közös érdekeinek igy győzni kellett minden vonalon.

Amennyiben az egyházi és hübéri nemesség a tulhaladott gazdasági módot képviselte, a városok kifejlesztette árutermelés és kereskedelem, fejlődöttebb erejével szemben el kellett buknia. Ez volt a történelmi logika.

A nemzeti államok kialakulásával az országok nyelve is inkább egységessé vált. A nagy városokból a legerősebbek voltak, innen kellett e nemzeti nyelveknek is kiindulni. Onnan is indultak utjukra. A király és a városok szövetsége a hübérurak ellen, a nemzeti államok kialakulásának legerősebb eszköze volt. Hogy e szövetkezésből miként kerültek abszolut hatalomra egyes fejedelmek és ennek következményeit ugy a városi polgárság, mint a köznép mennyire megszenvedte, annak tárgyalása kivül esik e tanulmány keretén.

A városok hatása a föld népére.

A városok jelentékeny lakosságát eleinte, az uralkodó társadalmi osztályokkal ellentétes gazdasági érdekeket képviselő elemek képezik: A letelepedett és bevándorolt kézmüvesek, szabad parasztok, a földesuri hatalom alól menekült jobbágyak, és az adás-vevésből élő kalmárok, csak kis számban voltak a birtokos háztulajdonosok és nagy tőzsérek.

A lakosság a város fejlődésének első szakában arra törekedett, hogy a várost minél több ember szemében vonzóvá tegye. Aki a városban letelepedett, teljes jogu polgár lett, egyben szabad emberré is emelkedett. A legtöbb város ingyen telket is bocsájtott rendelkezésére, melyet az beépiteni tartozott. E cselekvésre a városok lakosságát késztette: a munkáskéz utáni kereslet, a városi védelem, a hübérurak erejével szemben való számbeli gyarapodás szükségessége és az adók terheinek nagyobb számra való elosztása. Tehát szivesen látták a városok a munkában és teherben résztvenni akarók szaporodását. Ezért nyitották meg kapuikat a hübéri uralom alól elmenekült jobbágyaknak is. Ez volt egyik fő oka a városok és hübérurak közti ellenségeskedésnek. Ez kényszeritette a földesurakat, hogy jobbágyaikkal emberségesebben bánjanak, különösen a városokhoz közelfekvő uradalmakban. Tehát a városok jótékony hatása a falakon kivül élő köznépre is kiterjedt.

Ahogy a városi ipar és kereskedelem fejlődött, határa a mezőgazdasági termelést is befolyásolta. Mig a feudális ur gazdasági szükségleteit a jobbágyok természetbeni és személyes szolgáltatása kielégithette, nem volt pénzre nagy szüksége. De a városi kézmüves ipar és a manufakturák kifejlődése és a kereskedelem térhóditása a mezőgazdaságot is érintette. Nyers anyagot az ipar részére — bőrt, gyapjut stb. — onnan vásároltak, viszont mezőgazdasági szerszámokat és egyébb ipari cikkeket a földtulajdonosoknak a városokból kellett beszerezni — pénzért. Az adót is pénzben kellett fizetniök, igy nekik is minél több pénzre volt szükségük. Mig a kereskedőket rabolni lehetett, hozzá is jutottak. De a városok és fejedelmek szövetkezése folytán szervezett állami és városi zsoldos katonaság ezt lehetetlenné tette. Kénytelenek lettek a földbirtokosok is árutermelőkké válni. Ezzel aztán egy csapásra megváltozott a hübérur és jobbágy viszonya.

Ezentul nem több jobbágyra: több földre törekedtek. A birtokokról törvényes és törvénytelen eszközökkel elüzték a parasztot. Tökéletesebb szerszámokkal, kevesebb számu munkással kezdték a földmivelését. A sok apró jobbágybirtokot egybevonták. a termelés vezetését felügyelőkre, igazgatókra és később bérlőkre bizták. Mig azelőtt a jobbágy fizetett termékéből hányadot a földesurnak, ezután a földesur fizetett **bért** (inkább természetben mint pénzben) a kevesebb számu cselédségnek. Igy váltotta föl a robotot a bérmunka.

A városok legtöbbje szintén jelentékeny földbirtokhoz jutott, melyeket eladósodott földesuraktól, vagy lovagoktól vásárolt össze. A városok is igy részben földesurakká váltak, a jobbágyaknak a városokban való letelepedését e gazdasági érdekből, ezután már nem kivánták. Ehhez járult akkori időben való céhek elzárkózása is az idegen elemek elől, amig a céhek fölvették sorraikba a jövevényt, vagy ezek fiait, mindenfelől tömegesen vonultak a szabad városokba. De ezek elzárkózása után nem tudtak ott megélhetést találni. Eddig a földesurral harcát a jobbágy ugyis megtudta vivni, hogy a kizsákmányolás elől a városba menekült, most menekülésének ez az egyetlen utja is bezárult előtte. A földről elüzték, a városba nem menekülhetett, aki még a földön maradt, még nagyobb szolgaságba jutott. Nem csoda, hogy lázadás-lázadást követett. Sajnos azt mind vérbefojtották!

Tehát a parasztlázadások hajtó ereje is a városokban született meg. A hübéri rendszer bomlását meginduló ipar és árutermelés robbantotta azokat ki.

A városok belső alakulása.

A városok a hübérurak és patriciusok ellen szakadatlan küzdelemben lettek naggyá és virágzóvá. Első idejükben a lakosságot vagyoni egyenlőtlenségek nem nagyon választották el. A kézmüveseknek a céhekben való tömörülésével a városok kormányzása teljesen a kezükbe került. A céhszervezet, mely a tagok közremüködésének tág teret engedett, az önkormányzat szellemét kifejlesztette bennük. Ahogy a hübéreknek megvolt az önkormányzatuk a megyékben, ugy e gazdasági érdekből kifejlesztett szellem megteremtette az önkormányzatát a város lakóinak is a városban. Érdekeit meg tudta védeni a városon belül. Legfontosabb országos ügyeit is, közvetlen a fejedelemmel intézte el.

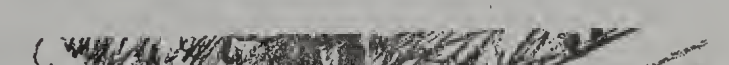
A nemesség és oligarchia fő jövedelmi forrása az ingyen jobbágy munka (robot) és a rablás volt, a városi polgáré pedig az állandó szakadatlan munkát és szorgalmat igénylő tevékenység. Tehát semmi féle közössége az ország uraival nem volt. Ennélfogva semmi érdeke, vagy ügye, nem tartozott a megyei, vagy országgyülés elé. Valóságos külön városi országgyülést teremtett magának. Nem a városok igazodtak az országhoz, hanem a városok sajátságos érdekeihez volt kénytelen az ország is alkalmazkodni.

Az emberek társadalmi tömörülésének is a városok vetették meg első szerves alapját. Ez a céh szervezet, mely eleinte vallási szinezetü segélyző egyesületekből fejlődött. Későbbi célja: a verseny kizárása és a fogyasztó közönség megfelelő kiszolgálása. Szabályaikban a legszigorubban elitélték a verseny minden fajtáját; rendelkezései kiterjedtek a jogi életre, a gazdasági forgalomra, sőt a tagok magáncselekvésére és erkölcsi életére is.

Eleinte örömmel vettek soraikba minden jövevényt. Arra törekedtek, hogy minél több tagjuk legyen, hogy számbeli és hadi erejük gyarapodjon. Az általuk fejlesztett ipar és keresekedelem és szervezett erejük sulya, később a városokban teljes hatalomra juttatta őket. A patriciusokat a kormányzásból kiszoritották, a mesteremberek kormányzását vezették be.

De mihelyt uralomra jutottak és a városok egyre szabadabbak lettek, megváltozott tendenciájuk, megindult elzárkózásuk. Mig harcolniok kellett, örömmel látták, ha többen telepednek le a városba, de a hatalomra jutás után elzárkózva egyedül akartak uralkodni.

A virágzó ipar és kereskedelem lassan vagyoni egyenlőtlenségre vezetett: uj harc indult meg a céheken belül is. A legények és mesterek harca, amely még — ha más formában is — egyre



Az acéltröszt rabszolgái.

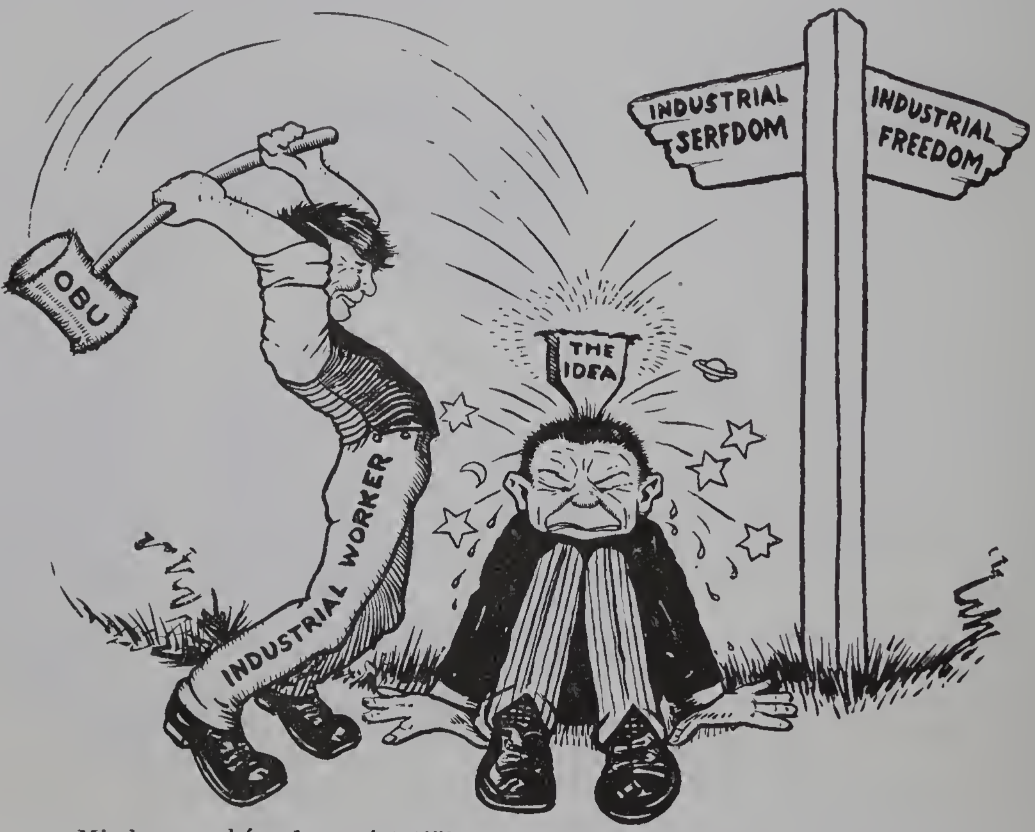
tart. (Ennek a tárgyalása szintén kiesik e fejtegetés keretéből.)

Az árukereskedelemből, uj világrészek felfedezése következtében kicsirázó kapitalizmus érdekének a kis üzem nem felelt meg. Megkezdődtek a nagyobb munkatelepek (manufakturák) létesitései. Ezek elhatalmasodását a céhek, minden eszközzel megakarták akadályozni. Erőlködésük hiába való volt. Csupán Németország és a tőle keletre eső országok városaiban tudták uralmukat tovább tartani. Ennek oka keleten a török hódoltság, mely a fejlődést 300 évvel tartotta vissza, Németországot pedig részben a harminc éves háboru, részben a keletindiai utnak a felfedezése, mely Németországon keresztül képezte a világkereskedelem főutját a másik utra terelte át.

A mindinkább erősbödő pénztőke lett az urrá a városokban. A gyárépületek mellett eltörpültek a kézmüves műhelyek, a paloták mellett a kis lakóházak, a hatalmas szállodák mellett a kis korcsmák, az országutak mellett a szekérutak, a nagy könyvtárak mellett az olvasókörök,a nagybankok mellett a kis uzsorás, a vásárcsarnokok mellett a kis piacok, a vizvezeték mellett a gyakran kiszáradó kutak, az egyetemek és főiskolák mellett a kis felekezeti iskolák, a központi fütés, világitás mellett a cserépkályha és a mécs, később az indóházak mellett a kocsiszin, ugyszintén a gőzzel hajtott gépek mellett a kézi szerszámok. Ledőltek a városokat körülvevő falak, hogy egy egész országot várossá tegyenek.

A városok kifejlesztették minden föltételét az emberi közös társadalomnak, kifejlesztették mindazon intézményeket, melyekre ezek alapul szolgálhatnak.

Nem a városok hibája, hogy ez a társadalom nem szerveződött meg, hiszen a népesség legnagyobb számban bennük él, csupán észre kellene térniök és a várost hasznos intézményeivel együtt az egész társadalom szolgálatába állithatnák.



Minden munkással megértetjük az Egy Nagy Szervezet szükségességét.

Ausztriai szemlélődés

Irta: H. Schrőder, Wien

AZ 1934 év meghozta az osztrák fascizmus erősödését is. Ez az erősödés nem Dollfusék érdeme, hanem a "DEMOKRATA" szociáldemokrata kezelőinek gyávasága. A mindenkor szavazatokat számláló szociáldemokrata rezsim, bár a Heimwehr-féle fascista csőcselék szervezkedését még kezdeti stádiumába lebirta volna szerelni ez év februárjáig állandóan deffenzivába volt ahelyett, hogy már türelmetlen és aránylag jól felszerelt véderőség mozgositását rendelte volna el. Szó nélkül türték, hogy a védőrségnek fegyverei után kutassanak a heimweristák, azokat elhurcolják, mert nagylelküséget számitottak Dollfustól.

E folytonos taktikázás és tanácstalanság vérszemet adott Dollfuséknak és februárban elérkezettnek látták, hogy megsemmisitsék a demokráciának utolsó magvát is. Dollfus ur mielőtt akcióba fogott, lerándult Budapestre ahol Gömbös és Horthyval folytatott tanácskozásokat és kért tanácsokat miképpen volna lehetséges radikálisan elbánni rebbellisekkel a kik ugyan akkor még a jó fiu szerepben tetszelegtek maguknak. E tanácskozások révén valószinüleg kellő kioktatásban részesitették Dollfust, mert ahogy repülőgépen hazajött pár napon belül nekifogtak a szociáldemokraták megsemmisitésének. A vezérek még mindég tanácskoztak, még mindég reméltek, hogy békéssen megférhetnek Dollfusékkal a husos fazék mellett.

A munkásintézményeknél vad házkutatások vették kezdetüket, melyek egyben rombolások is voltak. A Linz-i véderősség, bár a Wieni pártvezérek szigoru tilalmat bocsájtottak ki, mely az ellentállást megtiltotta, látták, hogy itt feltétlen megsemmisités előtt vannak. A hősi halált választották, de a zászlójuk becsületét megkisérelték

Wien XXI. Schlingerhof

Bécs egyik főutcája a gépegyverek elhallgatása után.

megmenteni. Jól tudták, hogy késő győzelemről ábrándozni, a harc eleve eldőlt, mégis a harcot választották. A munkásotthonba betolakodó Heimwehr csőcselékkel szembe szálltak és kitört a harc. Ennek hatása futó tüzként terjedt el és pár órával később, már itt Wienben, még mielőtt a védőrség felocsudhatott volna Dollfus katonaságot vonultatott fel a munkás épületekhez teljes hadi felszereléssel. A védőrség tagjai közé ékelték be magukat, a vezéreket jó részben összefogdosták és e csapatok hiányos felszereléssel egységes irányitás nélkül guerilla védelmi harcot folytattak s minden megállapodás nélkül harcot kezdtek a katonasággal.

Itt is eleve eldőlt a harc sorsa. A lakósság csupán szinpatizált a védőrség hősi küzdelmével, de aktivan nem avatkozott bele. A lapuló és fegyverzett kommunisták örömükben a nácikkal együtt röhögtek a véderősség kétségbeesett küzdelmén, mert azok azt hitték, hogy majd a gyümölcs az ő ölükbe hull végül.

Miután a véderősségi tagok küzdelme minden reményt felülmult és már ugy látszott, hogy a Heimwher, hadseregi és rendőrségi egyesitett karhatalmát kifullasztja, felvonultatták a nehéz tüzérséget ágyu és aknavetőikkel eggyütt. Ezek kezdték bombázni azután a véderősség által védett munkáslakóházakat. A házakban nem csak a harcban álló munkások, de asszonyok és gyermekek tömege volt, melyet Dollfusék nem engedtek eltávozni. (Hadd dögöljön meg belőlük minnél több annál jobb.)

A Marx ház-nál a gyermekek a kertben játszottak és ugyszólván senki sem vette észre oly hirtelen vonult fel a tüzérség a gyönyörü épület komplesszumhoz. Minden felszólitás nélkül tüzelni kezdtek és itt a gránátok és kartácsok irtózatos pusztitást vittek végbe a hancurozó gyermekek sorába. Az anyák tébolyult kétségbeeséssel rohantak ki az épületből megmenteni gyermekeiket, sok anya amint kilépett, máris huscafatok formájában feküdt a játéktér porában. Az épület bolthajtásai alá aknavetőket vontattak és felfelé lőtték be a la-

Egy szétrombolt lakás a bécsi zavargásból.

kásokba a gránátokat. Minden bolthajlás kapott 5—6 ilyen gránátot mely az emeleteken bent a lakásokban explodált, holott a véderősség a kapukat és háztetőt tartotta. A harcban első pillanatokban 20 gyermek testét tépte cafatokká a keresztet viselő dollfusi rezsim ágyuinak lövedéke. A Klaus gasse 28 szám alatti ugyancsak hatalmas és gyönyörü épülete mely két utcára nyilik és a Wieni munkások székháza volt valósággal szitává lőtték az ágyukkal, még áprillis végén is elzárva tartották a fegyveres heimwehristák az utcának ezt a szakaszát és oda senkit, de főleg külföldi érdeklődőket be sem engedtek. Ennek a háznak a másik oldala a Kreitner gasse 29 számu ház, ahol egy mozgószinház is volt, ugyanolyan állapotban mint a másik oldala. Ezt a gyönyörü épületet melyben a munkások laktak is 30 gránát lövés érte,

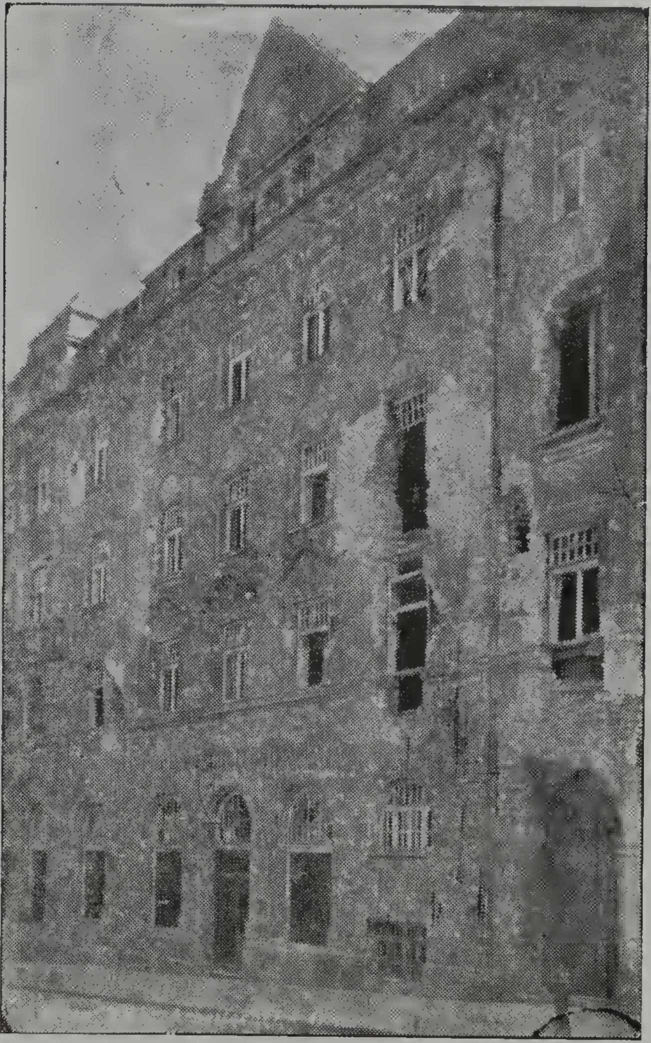
A Goethe-hof amely a duna mellett terül el egy hatalmas épülettömböt foglal el.

Csak a duna felőli részén 35 gránát érte az épületet. A lakások közfalait összerombolták, a benne levő butorok forgácsokká váltak, a lakásokban tartózkodók huscafatokká. A legrettenetesebb pusztitást itt végeztek Dollfus brigantjai. A Dunára néző fronton egyetlen üzlethelyiség, sem lakás épen nem maradt. Az épület egyik részén a legfelső emeleti lakással együtt valósággal letarolták a gránátok a háztetőt.

A harc megszünésével egyidejüleg rögtön állványokat huztak fel, és neki fogtak "alkotó munkáik" nyomát eltakaritani, legalább külsőleg de a pusztitás oly nagy mérvü, hogy még áprilisban sem lettek készek vele. Az épületeket és a környéket töltött fegyverü heimwheristák őrzik és különösen külföldiek számára lehetetlen oda bejutni szétnézés végett.

Az ellentállás leverése után a krelikális papság hálaadó diszmiséket mondott, megáldotta a brigantikat és fegyvereiket. Ez a papság, melynek a haja szála sem görbült meg a szociáldemokrata uralom alatt volt egyik ellenforradalmi szövetségese Dollfusnak és Dollfus ezek anyagi segitségével szervezte meg a Heimwher csőcseléket.

A harc leverése után szélcsend állott be a felszinen. A kommunisták rájöttek, hogy végtelen hiba volt a szociáldemokrata véderősségnek kétségbeesett harcát röhögve nézni,, mert a gyümölcs nem hullott ölükbe magától jó részben passzivakká váltak és lapulnak. Kisebb része most rágódik és keresi a kákán a csomót, hogy mik voltak a védelmi harc hibái. Ez mindenesetre könnyebb, mint harcba és esetleg mártirrá lenni. Tömeges letartóztatás, a letartóztatottak nyomorékká verése, megölése, kivégzése, ki-



Dollfus katonái elvégezték feladatukat

sérte a heimwher és a papság győzelmének utját. Még ezek el sem ültek az egyik titkos kárörvendő csoport a hitleristák elvesztették türelmüket és mivel látták a gyümölcs nem hull magától ölükbe akcióba kezdettek. A lázadásuk sokkal jobban volt előkészitve, mint a védőrségnek önvédelmi harca, felszerelésük itt tökéletes volt, összeomlásuk oka a védőrség hosszu napokig tartó harcával szemben azért következett be főleg Wienben (Bécs) mert 90 százalékban zsoldosok és nem elvi emberekből állott táboruk. A lakósság itt is passziv volt sőt ellenséges velük és akciójukkal szemben. És leverték őket akciójukkal együtt ágyuk nélkül is. Dollfust a tömegyilkost, csuhás és kapitalista bérencet elérte a végzete. A lázadó nácik egyetlen komoly cselekedete Dollfus láb alóli eltétele volt. Érdekes, hogy Fey alkancellár ki a nácik embere volt, hogy látta a puccs fiaskóját lépre csalta elvtársait. Állitólag Dollfust kit két lövéssel teritettek le, mivel a lázadók revolvereiből csak 1 golyó hiányzott, a második golyóval Fey végezte volna ki. Illetve lesből lőtt rá. Mindenesetre Fey, ki a készülő lázadásról fél nappal előbb értesült, mint közbiztonsági miniszter semmit nem csinált a kancellár életének megvédésére. Ma is miniszter. Ujra letartóztatások, nyomorékká verések, kivégzések, és a papság hálaadó miséi, hogy a lázadást sikerült leverni, töltik be Wien ezidei cselekvéseit.

Ausztria idegen forgalomból él. Bár a hivatalos urak szivvel-lélekkel a Németországgal való egyesülés mellett vannak, ezt nem teszik, mert ez esetben a volt antant kapitalistái nem hosszabbitják meg uralmi rendszerük életét. Már pedig Németország, mint bojkotált ország Ausztriától kapni és nem adni akar.

A munkásintézményeket itt is kifosztották, bár kevesebb eredménnyel mint Németországban, mert a szociáldemokraták a készpénz vagyont Prágába és Svájcba vitték az utolsó percben ki, mig ingatlanaik jórészét jóval előbb külföldiek nevére iratták át.

Az osztrák proletárság a kommunistákat kivéve hitet tett meggyőződése mellett, ennek védelmében fegyvert ragadott, és életét is kész volt feláldozni.

Nem hagyta magát csak ugy egyszerüen mint német, olasz és Magyarországon a reakció által lehengerelni. Számontartja szövetségeseit, ellenségeit, a munkásmozgalom árulóit és készül a közeli leszámolásra.

Jelenleg illegalitásban vagyunk, de szervezkedésünk a Dollfus és a papság uralma ma táborunkba szoritja politikájával azokat a tömegeket is melyek februárban szemlélői voltak kétségbeesett védelmi harcunknak.

Itt Ausztriában a Heimwher és papság uralma, nem lesz olyan hosszuéletü, mint olasz, német és Magyarországon.

Bécs, 1934 február. Ez a dátum örökre emlékezetes lesz a világ munkásságának történelmében. A bukó kapitalizmus előretolt védnökei itt törték pozdorjává a politikus szocialisták fellegvárait. Hangos figyelmeztetés a külömböző országok proletáriátusának hogy szilárd ipari alapokra kell épiteni mozgalmát.

* * *

A monogamia keletkezése és alapja

Eduard Fuchs nyomán

EZERFÉLE kisugárzásával és ezer vivmányával együtt, egész kulturánk alapja a magántulajdon intézménye. A magántulajdonra épült föl minden, vele egybeszövődik minden, az emberi szellem legmagasztosabb megnyilatkozása nem kevésbbé és nem lazábban, mint a napi élet közönségessége és kicsinysége.

A magántulajdon tendenciái teremtették és határozták hát meg a nemi morál alapformáját is. Ez az alapforma pedig a monogámia, az egypárosság.

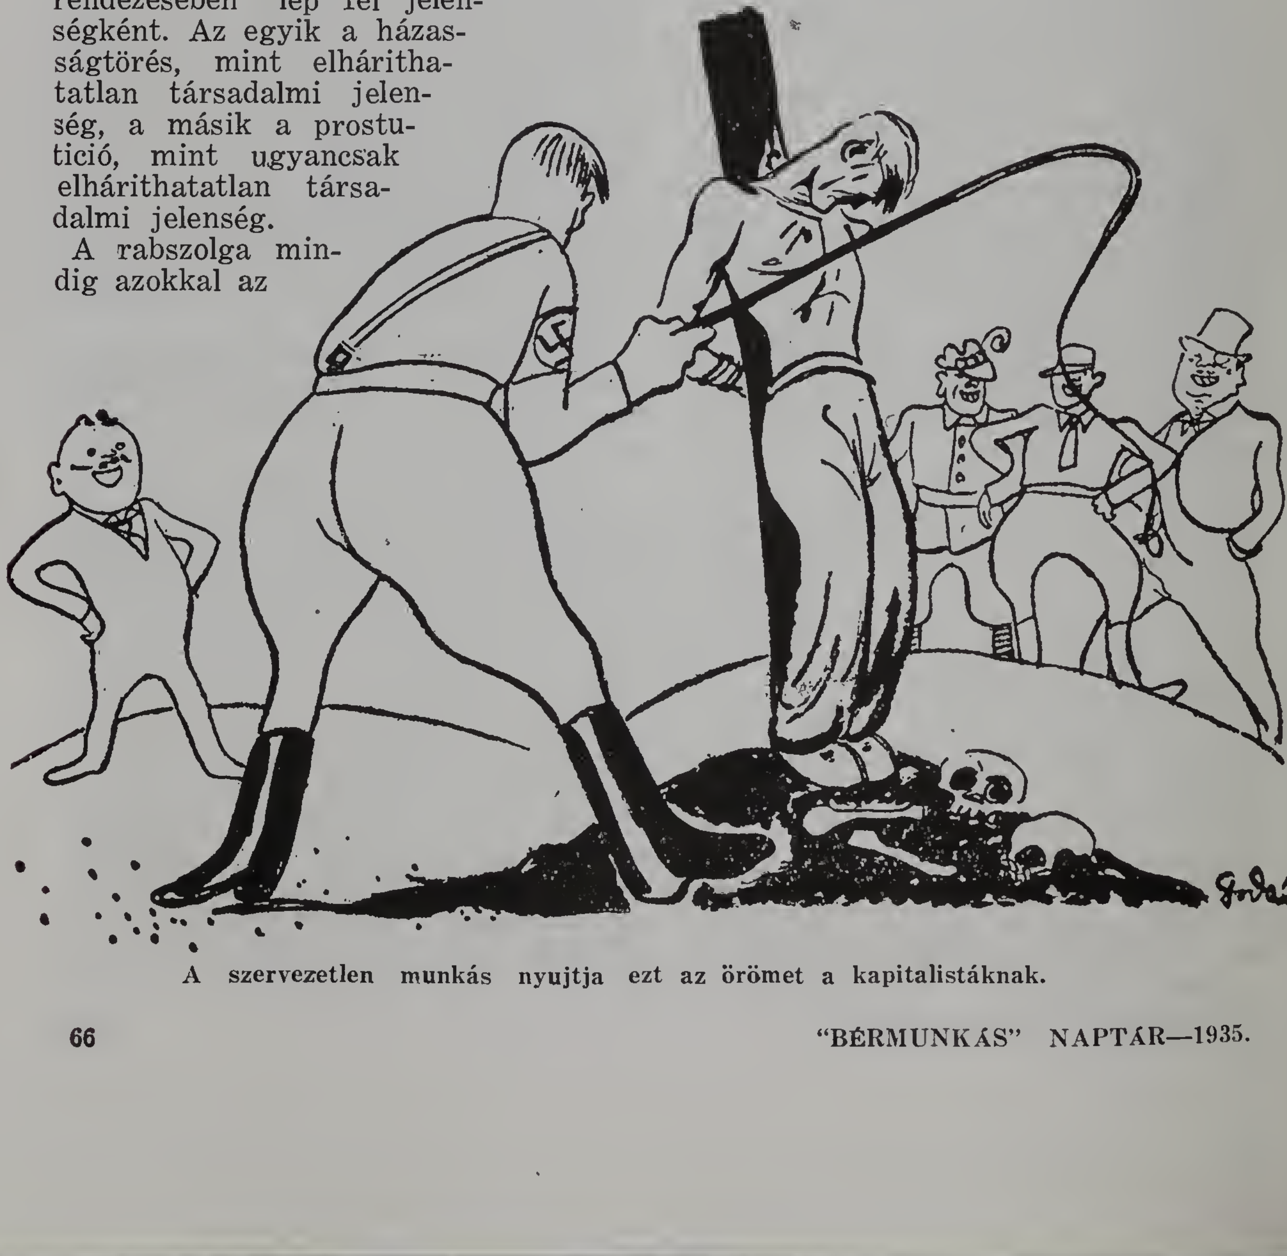
A monogámiát nem csak azelőtt, hanem általában ma is az egyéni nemi szerelem gyümölcsének tekintik. Ez pedig alapos tévedés, mert a monogámiának ezzel, sem a principiumában, sem a céljában, soha legkevesebb dolga nem volt. Hogy az egyéni nemi szerelem legyen a monogámia alapja, — ez legföljebb az az ideál, amelyre a monogámia mint intézmény törekszik, amit megérlelni azonban sohasem tudott, elérni, pedig mindezideig csak átmenetileg, legföljebb, ha egyik-másik osztálynál ért el. A monogámia egészen más kultureredményekből és egészen más társadalmi szükségletekből eredt. Eredt pedig, mint Leuis H. Morgan a "család fejlődésé"-ről szóló történeti munkájában kimeritően bebizonyitotta, a nagy vagyonoknak egy kézben, még pedig a férfi kezében — való koncentrálásából és abból a szükségletből, hogy ezt a vagyont a férfi gyermekei (és senki más) örököljék. Első és utolsó és évszázadokig egyetlen célja: a törvényes örökösök. Az asszony szüljön gyerekeket, akik kétségen kivül biztonsággal egyetlen férfitől eredjenek. A görögök akiknél a monogámia először fejlődött ki, leplezetlenül elismerték ezt a kizárólagos célját. Éppen ezért, — amit nyomban le kell szegeznünk, — a monogámia nem az asszony és férfi harmónikus egyesülésének az eredménye, nem is a legfelsőbb házassági forma, hanem, amint látni fogjuk, a "nemek összeütközésének az emberiség egész élettörténetében eddig ismeretlen proklamációja."

Ez a monogámia alapja és végcélja. A nemi tevékenység szervezeti formájának belső logikája tehát ezekhez a követelésekhez vezet: A kölcsönös nemi közlekedésnek egy férfinak egy nővel és egy nőnek egy férfival való közlekedésére kell szoritkoznia és pedig kizárólag a kettő között kötött házasságon belül. Ennélfogva tehát, ugy a férfi, mint a nő részéről, abszolut érintetlenség a házasság alatt. Ez lenne a logikus következmény, amit a monogámia intézménye az embertől megkövetel. Igaz, hogy ezt a törvényt hivatalosan is felállitották, de hajlithatatlan merevségében mindig csak a nőre volt érvényes, a férfire ellenben mindenkor legföljebb csak hivatalosan vonatkozott.

Ez feltünő és nyilvánvaló ellenmondás. De ez az ellenmondás éppen nem megoldhatatlan, sőt éppen — amint azt nyomban beláthatjuk — tényleg "a dolgok természetes rendje." Mert a monogámia nem az egyéni nemi szerelemből született, hanem konvención alapult olyan családi forma, mely nem természetes, hanem gazdasági föltételeken épül. De mivel ezek a gazdasági föltételek kizárólag a férfi gazdasági érdekeitől függenek, — igy kezdettől fogva az következett, hogy az egyik nem mindig leigázta a másikat, vagyis, hogy a házaséletben a férfié volt az uralom, ami természetesen a másik félnek, az asszonynak elnyomatásával járt. A magántulajdon keletkezése tehát csak azért követelte a nők monogámiáját, mert ezzel teljesült a cél, a törvényes örökösök elérésére. A férfiak nyilt, vagy titkos poligámiájának ellenben mi sem állt utjában. És mert a házasságban a férfi képviselei a fölényt, az asszony az alárendeltet, igy mindig a legszigorubban megkövetelte a nő érintetlenségét és épp oly gyakran a legnagyobb bünnek pecsételte az asszony hütlenségét, ugyanakkor azonban mindig magától értetődőnek találta, hogy a saját vágyai elé csak a leglanyhább korlátokat emelje. Mindez, ugyszólván, nem több és nem kevesebb, mint a dolgok belső szükségessége és éppen ezért "a dolgok természetes rendje."

E meghasonlás alapján azonban van még természetesen valami más is, valami, amit kevésbbé akartak, ami pedig szintén a dolgok "természetes" rendje: — az erőszakolt természet bosszuja. A természetnek ez a bosszuja két elhárithatatlan, a kulturánktól egyaránt elválaszthatatlan társadalmi berendezésében lép fel jelenségként. Az egyik a házasságtörés, mint elhárithatatlan társadalmi jelenség, a másik a prostitució, mint ugyancsak elhárithatatlan társadalmi jelenség.

A rabszolga mindig azokkal az eszközökkel bosszulja meg magát, amelyekkel legyőzték és leigázták. Az asszony férjén kivül férfival hajlékát meg nem oszthatja és testét másnak nem adhatja, — igy határozza a törvény, melyet a templom, állam és társadalom serdülésétől fogva lépten-nyomon, minden nyelven és ezer formában — formulában, egész életén át a nő elé tart, — a nő bosszuja pedig minden időben és minden népnél az volt, hogy más férfiakkal is megosztották hajlékukat és birták a testét és hogy a biztos apaság legföljebb erkölcsi meggyőződésen alapul. És hiába volt a társadalmi megvetés, ha egyszer a ballépés kiderült és hiába volt a kemény és gyakran barbár büntetés, amellyel az asszonyok bosszuját mindig megfenyegették. Elnyomhatatlan a hütlenség, mert a házasság alapja mindaddig természetellenes amig konvención nyugszik. Ugyan ez áll a pros-

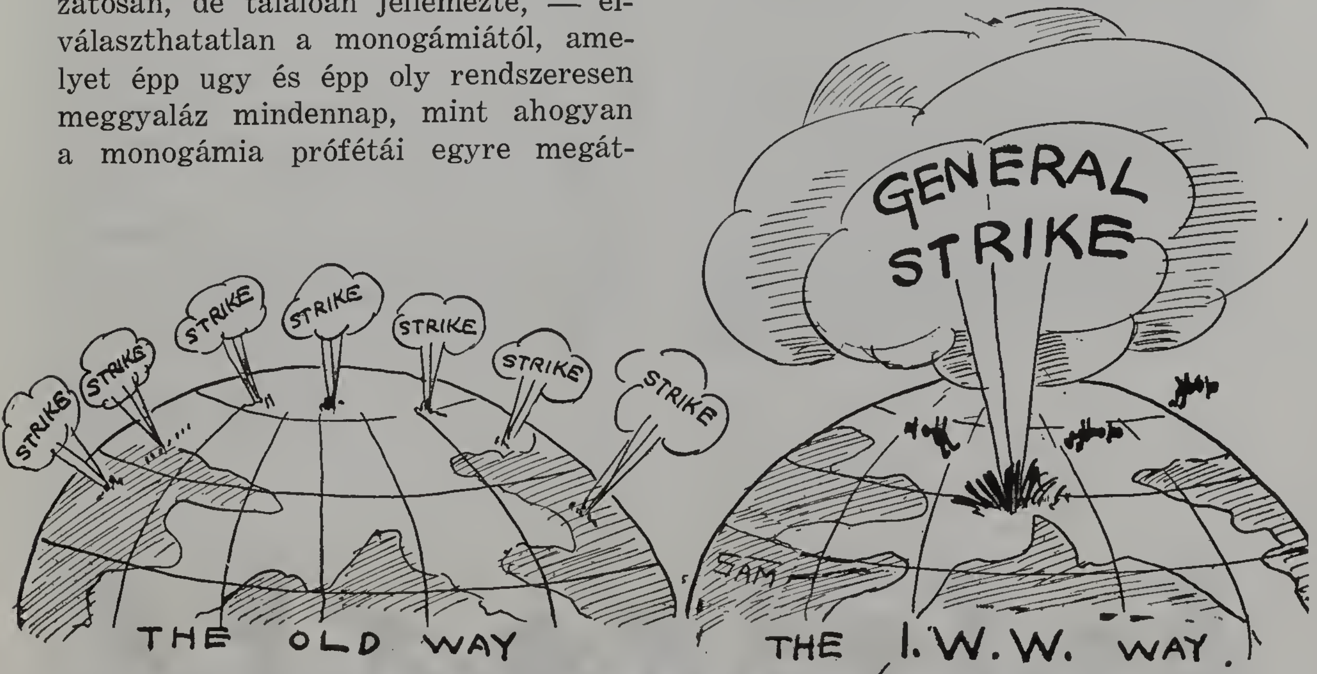


A szervezetlen munkás nyujtja ezt az örömet a kapitalistáknak.

titucióra is, a házasság szurrogatumára. Egyetlen törvény sem tudta valaha is elnyomni. Papnőinek még oly brutális megvetése sem tudta akár egyetlen napra az eleven társadalmi életből kiirtani. A prostituciónak, legfeljebb, ha néha napján bujdosnia kellett, amit néha meg is tett, de az utat rejtekhelyéhez mégis mindig minden érdekelt megtalálta. És ez az elpusztithatatlanság teljesen logikus is. A magántulajdon intézménye, a kereskedelem felé való gazdasági fejlődésen alapul és mindennek valami árujelleget adott, minden dolgot a maga pénzügyi viszonyaira vezetett vissza. A szerelem éppen azért ugyanolyan árucikk lett, mint akár a ruha. És éppen ezért a házasságok nagy részétől szinte elválaszthatatlan a közönséges kereskedelmi üzlet karaktere és amint a prostitució — a szerelemnek bérben való megfizetése, az egésznek akkorában való elintézésével ellentétben, ahogyan a cinizmus a prostitució és a házasság külömbségét gyalázatosan, de találóan jellemezte, — elválaszthatatlan a monogámiától, amelyet épp ugy és épp oly rendszeresen meggyaláz mindennap, mint ahogyan a monogámia prófétái egyre megátkozzák, éppen azért, mert végül mégis csak a prostitució az a biztonsági szelep, amelyre a monogámiának okvetlen szüksége van, hogy főcélját, a törvényes örökösöket valahogyan biztositsa. Szóval tehetünk akármit és ha még oly bosszantó és kinos is a dolog: házasságtörés és protitució elkerülhetetlen társadalmi jelenségek.

Hogy megváltozik-e ez az állapot valaha? ugy felelhetünk rá: hogy ha a magántulajdonra épitett társadalmi rendszer megváltozik, illetve megszünik, a házasság intézménye is a megváltozott gazdasági rendhez idomul.

Az uj gazdasági rendszer megvalósitására kizárólag a forradalmi munkás mozgalom van hivatva, amely a mai rendszert nem foltozgatni akarja, az intézményeket nem uj vezetőkkel ellátni törekszik, de az egész rendszert minden káros intézményével megszüntetni és helyébe az Ipari Demokrácián alapuló intézményeket helyezni el, amelyek tisztán és kizárólag a nép érdekét szolgálják.



Elavult és uj módszerek a munkásharcokban.

AZ OSZTÁLYHARC HŐSEINEK MA

A lét bitófájára vonszolt életek vére
csobogva lecsorog a pocsolyába, s
az ökrök, birkák vérmocskos patája
vadultan gázol a sáros utakon.

Feltornyosult jajjok járnak az égbe;
átkok morajlanak bárgyu lagerokból,
aknákat termel ma a világ,
osztály-akarások lávája sistereg.

Az ember-gép betört bordája bolond
szilánkokkal mered a mechanizmusra;
hájas agyak a multját pörlik vissza:
kisértetek kacarásznak az ormokon.

Kimult kulturák hiu halálhada
keresztre feszíti a riasztó Mát,
s a megállapitások hiuság-várfokán
véres fejjel vagdalkozik a Mult.

öreg bigottságok cifra uj köntösben
a döglődő ma sebeit takarják;
Krisztus föltámadt s visszafeszült:
lázas apostolok ujra tritgetnek.

Világ-emberség fénye vakit a térben,
dolgoknak arcán már uj sugárzás,
de széthullt láncok, tört ágyutorkok
ujra falankszolják a Tegnapot.

Tröszt-bálnák falják a munkásokat,
óriás testükben az elsikkadt kultura;.
a telhetetlen vágyuk egymást is vájja,
ha gyomruk romlik: gyilkot okádnak.

Malmok és bősz bányák poklában
ember, gép, genius profitot kotor
és az izzadságok mély tavai alatt
kráteres morajok szüntelen üzennek.

Korbácsolt szolgák tunyán tanyáznak
profit-uradalmak zsoldos ugarán
a megroggyant inuk sorsosan bukik
a kibérelt robot mohó gödreibe.

A gyermek-élet csak éji lepkehad:
szerteszét szőnyegzik az uton,
és sok millió kis zászló integet
a tévedt cél gép-zsoldosainak.

Tépett emberek sujtanak egymásra;
ujra a "hazáért," mely a másé;
alig-tegnap, még a "demokráciáért,"
mely körmükre ége az uraknak.

Ma keresztes-háboruk rosszsebü öle
csirázza ujra dögletes csipőjét
és tizedelt népek, tizedelt kulturák
temetője tárul a tőkés sivatagban.

De megrendül majd a pokol szive is,
ha az elvetélt Élet döngeti ajtaját,
ha az uj szabadság konok martirjai
beverik az istenek ablakait.

Ma borzalmak erdei őrzik a kaput,
amelyen tul vár egy uj világ,
virág és uj élet Munkás-birodalma —
a Mont Blankot áttörő hősökre.

SOMLÓ LIPÓT.

A debreceni Téglavető riport

Irta: Bajomi Endre

HA AZ idegen Debrecenbe jön, büszkén mutogatják neki a város uj épitkezéseit. Kiviszik a Nagyerdőre, ahol a modern egyetemi épületeket megtekintheti, a gyönyörü strandfürdőt, a monumentális stadiont. Az idegen álmélkodik és fejét csóválja. . . nem érti. . . hogyan lehet a válság éveiben ilyet alkotni? Nem tudjuk, hogy az idegenvezetők miképen felelnek erre a tapintatlan kérdésre, mi azonban megmondjuk az igazat. Hát hogyan? Inségmunkával! Ez az a varázsszer, amely olyan csodálatos hatást tud elérni. Egyrészt szép parkokat hint a földre, hogy legyen hol játszani a frauleinos urigyerekeknek, stradfürdőt épit az erdő közepébe, hogy legális uton elégitse ki élemedett urak szekszuális kiváncsiságát, stadiont teremt a sportrajongóknak, krematóriumot az enyészetnek. Másrészt e pozitiv alkotásokon kivül ennek a mesebeli varázsszernek, az inségmunkának másik, negativ haszna is megvan: lecsapolja a szociális erjedést, morális segélyt nyujt a munkanélkülieknek, nem ugy, mint egyes barbár nyugati államokban, ahol erkölcstelen munkanélküli segéllyel korrumpálják a munkásságot, nem is szólva a szovjetpokolról, ahol se inségmunka, se munkanélküli segély és — mellékesen megjegyezve — munkanélküliség sincs.

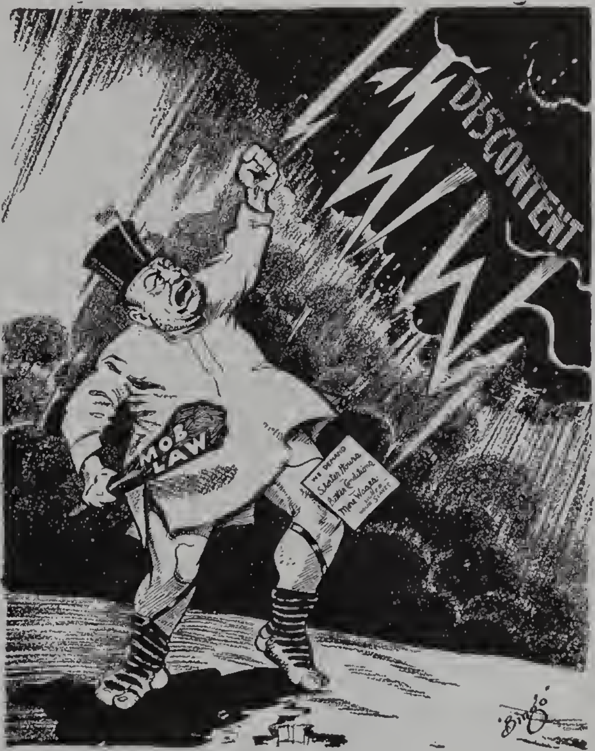
No de ne értekezzünk annyit az inségmunka szociális hatásáról, szerepéről és jelentőségéről. Minden elmélkedésnél bizonyitóbb erejü: az élet. Keressük fel az inségmunkások egyik telepét és majd meglátjuk, hogyan élnek ők maguk, az alkotók, a teremtők, akik a két kezük munkájával varázsolták elő azt a sok szép épületet, fürdőt és parkot.

Az inségmunkások nagyrésze a Téglavető nevü telepen lakik. A Téglavető a várostól három km.-nyire, északnyugatra levő téglagyárak mellett keletkezett. A sorompók után még jön egy kis üres térség, mezők, kaszálók, amely mint egy demarkációs zóna választja el a várost a teleptől. Bár a város szivétől kifelé haladva, természetesen fokozatosan romlik a kép, nő a szegénység, de ez a párszázméteres köz, amely elválasztja a várost a Téglavetőtől, mégis olyan óriási szakadékot jelent, olyan hirtelen ugrást, amelyet csak a legnagyobb fantáziával lehet elképzelni.

A poros országuton tartva, már távolról kibontakozik a 3000 lakosu, tehát egy jó magyar falu létszámával rendelkező település képe és már innen megállapithatjuk, hogy bizony sokkal kisebb területet foglal el, mint egy hasonló lélekszámu falu. Ugynevezett "határa," amely alatt a faluhoz tartozó, a falu lakossainak tulajdonát képező földet értik — egyáltalán nincs.

A Téglavető lakosai csak azt a földet birják, amely közvetlenül a talpuk alatt terül el és azért is a gazdag, a hires, tágterületü Debrecen városának 1.20 pengőt kell fizetniök négyszögölenkint. Aki 5 év alatt nem fizeti ki a telek árát, azt irgalmatlanul kitelepitik. Elvégre ingyen nem lehet adni ezeknek a nyomorultaknak ezt az óriási földterületet, amely majdnem akkora, mint a — stadion!

Amint a telep széléhez érünk, az országut mellett közvetlenül két hatalmas szemétdombot pillantunk meg, amelyeket legyek és asszonyok lepnek el. Hirtelen döbbenettel, egész nyomoruságos mivoltában jelenik meg előttünk a téglavetői élet egy jellemző epizódja. Melegen süt a nyári nap, orrfacsaró büz terjeng a levegőben, de ezzel mitsem törődve sürögnek-forognak az asszonyok a szemétdombon. Közelebb érve, látjuk, hogy a gyermekek zsákot tartanak és az anyák abba szedegetik össze a különféle ócska holmikat és néha a sok lim-lom közül, mint valami gyémántlelet, kerül elő egy használt vaskályhacső vagy valami kiderithetetlen növényi eledel, amit fel lehet használni a konyhán, vagy ami jó a kecskének. Felénk sem szagolnak, se nézéstől, se fényképezéstől nem zavartatják magukat, egészen belemerültek a dologba. Ez számukra a munka. Évezredeket csuszva visszafelé, a nomád életen is tul, a primitiv gyüjtögető életmódhoz kényszerültek folyamodni. Magukhoz véve egy foltos vén zsákot, járnak a szemétdombra és járnak a rétre füvet tépni a kecskének. Mint megtudtuk, a kecske itt a legfőbb háziállat, akárcsak a kietlen hegyvidékeken, mert kevéssel beéri és mégis ad tejet, turót és a gyerekek is elbánnak velük, istálló sem kell, szóval van sok előnye. Egy kecske itt körülbelül 15 pengőt ér.



Az elégedetlenség nyilai.

Az országutra letérve, a Téglavető főutcájára jutunk, amelyet igen találóan, méltó nevén Gödrökköz utcának hivnak. Ha végigmegy rajta az ember, elámul szeme-szája a nagy csodálkozástól. Csodálatos és fönséges a naprendszer óriási bolygóival, millió kilométeres távolságaival, nagyságával és gyorsaságával. Még csodálatosabb az ellenkező végtelenség piciny világa, az atom mikrokozmosza, millimikronos parányi távjaival és elektron-rendszerének elképzelhetetlenül kicsiny pontosságával. Szép és csodálatos a Rue de la Paix, az Unter den Linden, a Kaerntnerstrasse vagy az Andrássy-ut, de mik ezek a Gödrökközutcához képest!

A Gödrökköz-utca a nyomor változatosságát mutatja. Ez a nyomor nem egyhangu és nem szintelen. Van rajta mit nézni és van rajta mit csodálni. Ahány ház, annyiféle változata a kunyhóknak, oduknak, lyuknak, gödörnek. Ahány tető, anynyiféle fedőanyag. Szalma, zsup, kukoricakóró, cserép és semmi! (Mert van tetőnélküli ház is.) Hát még a keritések! Általában ugyan nincs semilyen, de néhol van ócska hordóabroncsból, van rozsdás drótsövényből, van fából, bádogból, papirból, szőnyegből. Kémény van lábasból, pléhből, semmiből. Konyha áll ódon sparhertből, 3 összetapasztott téglából, 2 téglából, semmiből. Ablak van még faspalettás is! Némelyiken gyanus eredetü csipkés függöny diszeleg. Van azonban olyan, amelyen nincs üveg, csak keret, van emelyiken nincs keret, csak egy lyuk és van olyan "ház," amelyiken nincs ablak, csak ajtó és van olyan, ahol ajtó sincs, csak egy bejáró lyuk, amelyet talán egyesitett ajtóablaknak lehetne nevezni. A Gödrökköz-utca a nyomor ilyen szines, változatos világát nyujtja.

A telep mintha kihalt lenne. Csak az állatok és gyerekek szaladgálnak össze-vissza. Lógó nyelvü kutyák éhesen kódorognak valami hulladék után, kiálló bordáikon rengeteg léggyel van tele a lelógó bőr. Az utcák girbe-görbe szakadozotsággal térnek el az eredeti irányvonaltól. De nem csak horizontálisan, hanem függőlegesen is erősen szeszélyes az utca: mély gödrök tégla- és egyébb törmelékekből álló halmokkal váltakoznak. A házak nem nagyobbak egy rendes szobánál, mellettük van ól, kut (a földbe vájt 4—5 méteres gödör, oldala betonozva, tetején fedél természetesen nincs) és távolabb az árnyékszék. Egy jellegzetes téglavetői W. C.-t láttunk rögtön az országut mentén: háromoldalu vályogfal, belül egy deszka-ülőke, elől nincs ajtó, de van egy szakadozott zsák, amely felülről lefele lóg és körülbelül elfedi a bentülő fejét, de ezt csak a felnőttek használják, a gyerekek ott végzik el a dolgukat, ahol éri őket. Szóbaállunk egy gyerekkel, illetve csak azt hisszük, hogy gyerek, 10—12 évesnek néz ki. Mint kiderül: 15 éves. Hosszu parasztnadrágban van, ócska leventesapkával a fején. Jobb válla alatt kis pup domborul. Nyakán hosszu forradás. Bizalmatlan, halkan beszél:

— Apám nyolc évig dolgozott szénbányában. Most otthon fekszik. Munkaképtelen. Anyám nincs. Nekem kellene eltartani. De nincs munka. 15 éves vagyok. Hust, tésztát emlékezetem óta nem ettem. Kéregetni, lopni gyáva vagyok, tulnehéz munkát végezni gyenge. Apám rövidesen meghal. Aztán én is. . .

Mindezt nagynehezen lehet kihuzni belőle. A lakást nem akarja megmutatni. Nem tudja, mifélék vagyunk. Csak — ugy látszik — nincs bizalma bennünk. Hangja végtelenül panaszos, de nem lázadó. Fiatal fiunál ilyen letargikus pesszimizmust még nem tapasztaltunk. (Imrédy, mint legutóbb kijelentette: optimista.)

Megyünk tovább. Egy keritésen ilyen felirat lóg: "EZ A TELEK ELADÓ." Megtekintjük a "telket." Csupa gyom. A giz-gazban egy fiatal férfi fekszik. Feltápászkodik.

— Mennyi ez a telek?

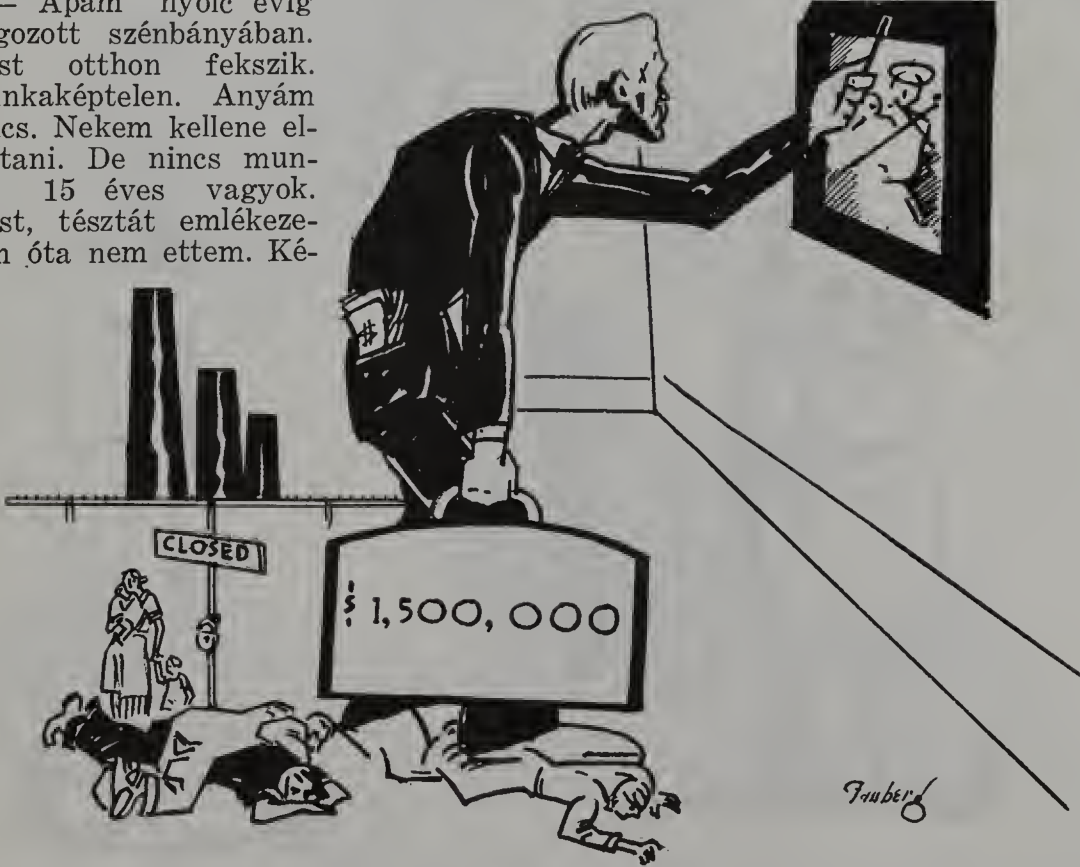
130 pengő.

— Hiszen akkora sincs, mint egy nagyobbfajta sirhely!

— De házzal együtt annyi.

— Ház? Hol van?

A hátunk mögé mutat. Meglepetten látjuk, hogy csakugyan van ott vala-



A termelt áruk helyszinén pusztul el a szervezetlen munkás család.

mi földbevájt viskó. Ajtaja nincs. Be lehet látni: légy, legyek, piszok, limlomok és ócskaságok halmaza.

— Van ól is! — mondja az ember. Egy, a háztól nem sokban különböző lyukra mutat. A "ház" és az "ól" egyformán piszkos, egyformán egészségtelen, a különbség mindössze annyi, hogy az egyikben emberek, a másikban állatok laknak. Egyébként néhol ez a különbség is elsimul, ott t. i., ahol a ház és ól együtt van.

Füszerkereskedés. Cégtábla, üzlethelyiség nincs. Csak egy kalyibára van irva: "Kenyér kg. 20 fillér." Persze itt a kenyér — füszer, lukszus, minden. Feltünő, hogy sok helyen ki van irva a lakó régi foglalkozása: cimfestő, kovács, stb. Mindez persze csak emlék, mert itt minden férfi munkanélküli.

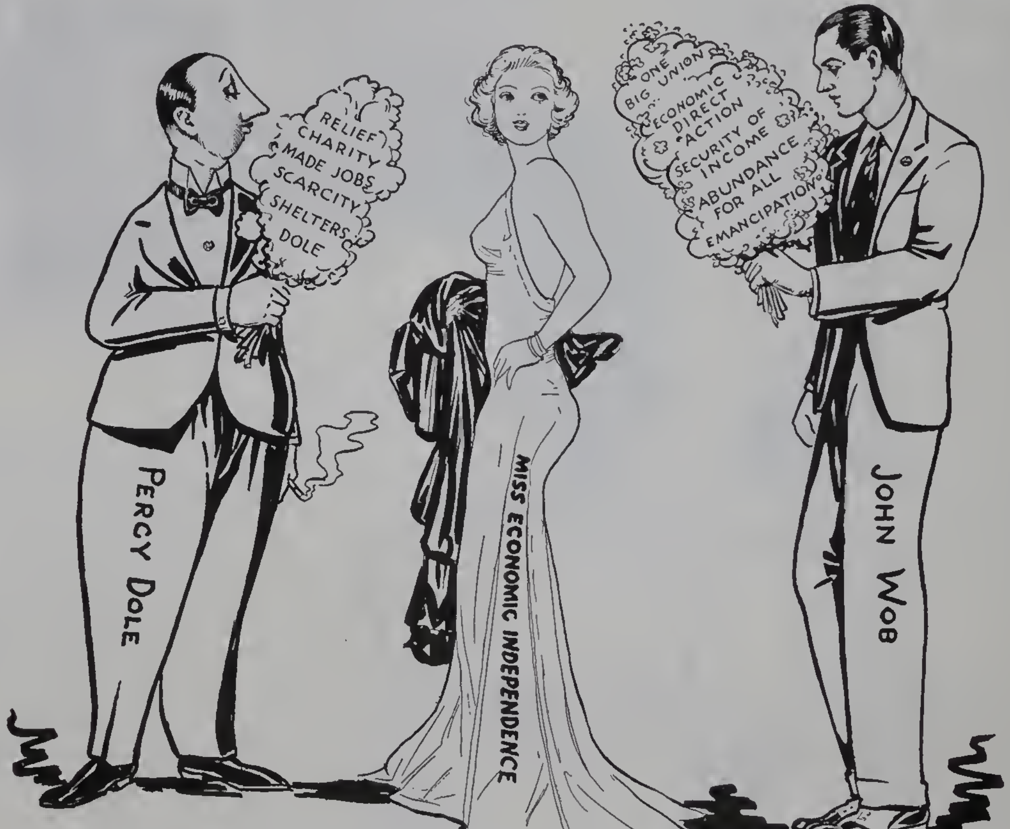
Benézünk egy átlagos kinézésü házba. (Félbenmaradt cseréptető, ajtó itt sincs, csak egy rothadt zsák, mint függöny.) A ház, illetve szoba, jobbanmondva lakás közepén teknő, benne egy gyerek kergeti magáról a legyek felhőit. Piszkos. Két szék. Törött. Egy asztal, egy ágy, egy szalmazsák, petróleumlámpa. A falon két kép: egy elegáns iparos fényképe és egy régi ujságból kivágott Ferenc Jóska. Körülnézünk. A gyerek elvisitja magát. A szomszédból egy férfi jön át. Meg egy másik. Köszönés.

— Meg lehet nézni a lakást? — kérünk utólagos beleegyezést.

— Meg! — feleli olyan hangon, mint akinek semmije sincs titkolni való és semmi, amit veszithetne.

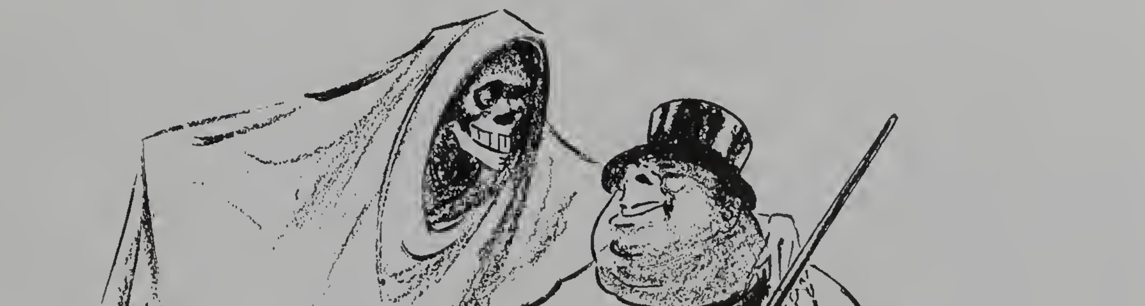
Eleinte bizalmatlan. De a másik teltszáju proli. Hónapos szakálla le-fel remeg, mikor beszél. . . beszél, csupa elnyomott erő, csupa elfojtott elégedetlenség. Lassan belemelegedik a beszédbe. Jól esik neki. Vastag sugárban buzog, sőt patakzik fel belőlük a nyomor borzalmas siráma:

— Évek óta vagyunk munka nélkül. Egész évben csak az inségmunka ke-



Az amerikai demokrácia gyakorlatban.

retében dolgozunk egy pár hétig. Persze, a keresetet rögtön feléljük. Hogy mégis megvagyunk: valóságos csoda. A városba sem járunk be. Nem érdemes. Ugy sincs semmi. Az "embervásárba" sem járunk. Városi napszámos nem kell. A parasztnak mégis van valami enni, ő olcsóbban elmegy aratni. Nem birjuk a versenyt. Nincs bennük semmi öntudat. Pár fillérért dolgoznak hajnaltól napszállatig, mint a barom. Mink meg itt rohadunk. Etetni kell a gyerekeket. Fizetni kell a telek diját. Azért ide is eljönnek beszedni az urak. Nem biznak semmiben. — Négy évvel ezelőtt elmentünk munkát, kenyeret követelni. Piros cédula volt a kalapunknál. Engem ugy hátbavágtak egy kardlappal, hogy na. Azóta sem tüntettünk. Nem szervezkedünk. Ujságot nem olvasunk. Politika nem érdekel. Igy is rossz, ugy is rossz. Szegény ember fogja be a száját. Van egy imaház, vasárnap eljárunk oda beszélgetni. Egyszer összehivott bennünket Benke Tibor tiszteletes ur, cigarettával kinált és kérte, hogy támogassuk Vásáry polgármestert, mert nagyon furják. Na, hogy mi támogassuk! Mink! Akiknek ilyen telepet méltóztatott adni. Ilyen szép tetőkkel! (A félbehagyott fedélre mutatott.) De még ezt is elveszik felőlünk. Ma reggelire kenyeret ettem. Mi birjuk az éhezést, de a gyerekek rinak. Iskola? Persze, könyv kellene. Irka, világitás kell. Télen cipő kell. Aki kimarad, azt szigoruan megbüntetik. Jaj, a tél! Betegség, hideg! Fogadom, hogy egy egészséges ember sincs itt. Télen a heptika, nyáron a tifusz arat. Tüdővész, tifusz, tüdővész . . . El vagyunk-e keseredve? Fene



Az utcán lármázók tömege a legbiztatóbb látványa a tőkésnek és a halálnak egyaránt.

tudja, megszoktuk. Egész napi semmitevés: unalmas! Néha kártyázunk. Olykor nevetünk is. Ha asszonyaink nem volnának: egy-kettőre éhenvesznénk. A piacra járnak, vagy mosni mennek. Foltoznak, varrnak. Bezzeg, ők is az urak, ők hordják a kalapot. Nem sokra becsülik a férfiakat. A lány, akárhogyis, legrosszabb esetben kereshet a testivel. De mink? Mivelünk mi lesz?

Letörten hallgatnak el. Semmivel sem biztatjuk őket. Nem ér itt semmit a vigasztalás. Elbucsuzunk. "Mi lesz velünk," — zug fülünkbe a kérdés. A kérdés, amelyet nem lehet elfelejteni.

———

Gyerekek játszanak a porban. Főzőcskét. Az egyik kislány kavicsokat rakosgat.

— Ez a hus, ez kenyér, ezt megtörjük, vizbe öntjük, veres bor lesz belőle. Terka, te mit szeretnél enni?

———

Messzebbről csunya szitkok hallatszanak: egy apa szidja ringyó lányát, mert kevés pénzt hozott haza. (A Ferenc József-ut 62. szám alatt egy apa azt mondja a fiának: Remélem, nem fogod nőkre költeni!)

Visszaérkezünk a városba vezető ut mellé. Gyerekek jönnek zsákkal, viszik a füvet a kecskének. Asszonyok jönnek a városból, hangosan társalognak. Szófoszlányok: "Öt pengő. . két napig dolgoztam ingyen a rühesnek. . . 48 fillér. . . harisnya. . . 16 fillér. . . kenyér. . . hogy a nyavalya törje ki. . ."

———

Félóra mulva a városban vagyunk. A Bika előtt két urforma beszélget:

— . . . hidd meg, kérlek, egy észszerü földreform, talán az még segithetne.

— Á, fenét, kérlek, nem ér az semmit. Gyökeres változásra van szükség. Vagy visszatérünk a régi jó idők liberális gazdaálkodására, hogy fellendüljön a vállalkozói kedv, a kezdeményező erő és az egyéni iniciativa, vagy elpusztulunk, mint a férgek. . .

Botjával nyomatékosan veri az aszfaltot, lesujtóan dobja el kiszit cigarettáját.

A cigarettavég a járda mellé hull. Öt perc alatt elhamvad. Félóra mulva biztos jön egy proligyerek, szájába veszi és fütyörészve megy tovább. . .

* * *

A munkanélküliek elhelyezése, mint látható épp oly probléma a kis Magyarországban, mint nagy Amerikában. Itt kicsikét késve, de már pengetik az inségtelepek alapitását. Ezt be sem várva hatósági közbenjárás nélkül szervezték meg a debreceni inségtelepekhez hasonlók ezreit, mely a folyók és tavak partjait, vasutak mentét tarkitják szerte Amerikában. Felnőttek és gyerekek, aggok és árvák az életszinvonalnak nehezen leirható, még nehezebben érthető, szinte csodás mélységben vegetálnak a társadalom söpredékévé redukálva.

Szerk.

Jézus Krisztus sikkasztott

Irta: **Farkas Antal**

A FŐTISZTELENDŐ ur a két káplánnal együtt jött haza a temetésről. Zsiros temetés volt. A megboldogult hárompapos ceremóniát rendelt meg a maga számára és az ágya körül szomoru képpel üldögélő örökösöknek meghagyta, hogy a temetésért kerek száz forintot fizessenek a plébános urnak, aztán tegyenek a lelkeüdvösségére vagy ötszáz forintos mise-alapitványt.

A megboldogultat ugyanis kinos érzések gyötörték. Uzsorás volt világéletében és akit betudott csapni, becsapott. Mikor érezte, hogy itt kell hagyni ezt a virágző üzletet, mely annyit juttatott koldusbotra s oly szép vagyont hozott neki, eszibe jutott, hogy lehet ám más világ is. A papok mindig erről prédikálnak, az iskolában is ezt tanitják; hátha igazuk van?

Ha történetesen igazuk van, akkor megette a fene a dolgot. Amiért a földiigazságszolgáltatás nem csiphette nyakon, majd elbánik vele a tulvilági. Az a néhány öngyilkosságba hajszolt hitelező már a másvilág kapujában torkon ragadja:

— Itt vagy, vén gazamber, Csató András! Gyere csak az uristen elé, majd leszámolunk!

Az uristen menten rápipakodik:

— Hogy mersz elébem jönni vén disznó? Százhusz percentre dolgoztál ugye?

Csató András lelke tagadni próbál.

— Hadd el, most nem a járásbiróság előtt állsz. Hamis tanuk itt meg nem menthetnek. Örökéltig tartó purgatóriumra itéllek. Most a pokolba!

Csató Andrást megfogják az ördögök. Olyan barackokat nyomnak a feje bubjára, hogy csak ugy füstöl bele. Aztán forró vizzel telt üstbe nyomják, szurokba mártják, meggyujtják, sütik-főzik, vasvillával forgatják és ez a mulatság mindaddig tart, amig az uristennek tetszik, mig Csató András lelke meg nem tisztul a százhusz percentes bünöktől.

Csató András ezt mind elgondolta a betegágyában. Elhivatta a papot, aztán tanácskozott vele. A pap beszédéből Csató András tehát meggyőződött arról, hogy a pénz igen hasznos portéka. A földi igazságszolgáltatást is meg lehet vele venni, de a tulvilágit is ám. Ha szép temetése lesz, ha nem sajnálja a pénzt a miseköltségekre, hát az ur Jézus Krisztus szivesen közbejár a másvilágon az ő lelke érdekében. Szól az atyaistennek, hogy Csató Andrással kiméletesen bánjon, aztán igy hamarább megszabadul a purgatóriumbeli gyötrelmektől.

Csató András azt gondolta magában:

— Lám még a másvilágon is huncutok vannak. A pénzzel ott is lehet boldogulni. Az ördög sajnálja azt a kis költséget, ugy sem veszem semmi hasznát, ha egyszer kiszáll belőlem a szusz, Kenjük meg a Jézus Krisztust, igy majd szivesebben protezsál. Ha pedig nincs másvilág, ha a papok hazudtak, akkor ugyis mindegy. Semmi kellemetlenségem nem lesz többé.

Csató András igy jutott hárompapos temetéshez és a plébános ur igy jutott mise-alapitványhoz. A főtisztelendő ur igen örült neki. A temetésért kerek száz pengőt kapott az örökösöktől, akik azt igérték, hogy a mise-alapitványt is behozzák még a héten.

A főtisztelendő ur a temetésiköltséget bezárta az iróasztala fiókjába, aztán levetkőzött és leültek kártyázni.

A nagyobbik káplánnak csunya szerencséje akadt. Nyert, folyton nyert. A plébános ur hiába szivta a körmit, a nagyobbik káplán minden bankot besöpört. Már bekellett menni pénzért a szobába. A Csató András temetési költségét akarta kihozni az asztal fiókjából.

Kinyitja a fiókot, keresi, kutatja a pénzt, de nem találja sehol. Irgalmatlanul káromkodik, de ez sem használt.

A pénz nem volt az asztalfiókban. Már a csendőrökért akart küldeni, hogy megmotoztatja a szolgálót, meg a kocsist, mikor az iróasztalon egy kis irást pillantott meg. Azt mondja az irás:

— Kedves pásztorom! Igazán szép beszédet mondtál arról a vén uzsorásról. Magam is majd elhittem, hogy ugy van, ahogy te mondod: Csató András becsületes ember volt, kitünő hazafi, buzgó egyháztag. Hanem az én privát értesülésem mást mond. Csató András gazember volt, még pedig akkora gazember, hogy a magam reputációja megőrzése arra kényszerit, hogy az én Atyám előtt kegyelemre ne ajánljam. Még ezért a száz forintért se, amit az én nevemben megkerestetek, amit az én egyházam céljaira adtak. Tudván azt, hogy ti apostoli egyszerüséggel megáldott emberek vagytok, akik lelketek mélyéből megvetitek a világi vagyonnak e hitvány termékét, a pénzt, ami külömben is engem illet és nem titeket, a száz forintot köszönettel fövettem tőletek azzal a jó szándékkal, hogy a Csató András áldozatai között szétosztom. Ezzel a jócselekedettel tan tudok segiteni a Csató András lelkén.

Kiment a káplánhoz és az irás fölmutatása mellett elmondta a csodát.

— Ez nem illik a Jézus Krisztustól! Tetszett volna kölcsön kérni, vagy itt bankot adni. A pénzszerzésnek ez a módja beleütközik a büntető paragrafusokba. Jelentsük föl a rendőrségnél.

A kisebbik káplán türelemre intette őket.

— Hátha a Jézus Krisztus csak tréfál. Ne kompromittáljuk az isten fiát a falubeliek előtt. Ha hitelét veszti, igazán nehéz lesz az ő nevében üzleteket kötnünk. A nyugtát megőrizzük s annak idején bemutatjuk a püspök ur ő eminenciájának, ha megakar bennünket számoltatni. Játszunk tovább!

A plébános ur egész éjszaka nem tudott aludni. Nagyon sajnálta a száz forintját. Megeshetik, hogy a Jézus Krisztus a saját céljaira használja föl. A mai romlott világban minden megtörténhetik.

A mise-alapot másnap behozták az uzsorás örökösei. A plébános ur az ötszáz forintot belehajtogatta a tárcájába és a tárcát a reverendája belső zsebébe dugta.

— Igy csak nem viszi el a Jézus — gondolta magában.

Akkor nap misét is mondottak Csató András uram lelke üdvéért. Este a jegyzőéknél vacsorázott a plébános ur és éjfél után hangos jókedvében bezörgetett a falu legszebb menyecskéjének ablakán. akinek az ura külföldre vándorolt és akire a plébánia szakácsnéja igen haragudott, míg meg nem érkezett a nagyobb káplán ur

A reverendát itt levetette a főtisztelendő ur és világos hajnalban vette magára. Mindjárt a tárcáját nézte. A pénz nem volt sehol, hanem a helyén ez az irás állott:

— Tisztelt pásztorom! Igazán haragszom rád, hogy ide fárasztottál. Én a keritésen való átugrálásokat nem szoktam meg. A kapun hiába zörgettem volna, ugysem eresztettetek volna be, azt hivén. hogy Cifra Péter érkezett haza külföldről. A dolog igen sürgős, mert Csató András lelke nagyon jajgat a pokolban. Elhatároztam, hogy megmentem, hiszen te is nagyon kértél erre a reggeli misén. Leghatásosabb eszköznek mutatkozik az öngyilkosságba kergetett szerencsétleneken való segités. A mise-alapitványt kiosztom köztük. Ez ugy is engem illet, nem titeket. Arra a célra adódott, hogy Csató András lelke megmentődjék. Az én egyházam már olyan gazdag és azok az özvegyek és árvák olyan szegények. Béke velünk! Éljetek apostoli egyszerüségben. Ne kártyázzatok! Ne lumpoljatok! Ne kivánjátok a ti felebarátotok vagyonát és házastársát! A miséket alapitvány nélkül is elmondhatod, az én nyugtám ellenében.

Dicsértessek én, a Jézus Krisztus.

A főtisztelendő ur nagyot káromkodott.

Én?! Pénz nélkül misét mondjak?! Hát ha az ördög elviszi annak a vén huncut gazembernek a lelkét!

Egyenesen a csendőrökhöz ment és az egyházi pénzek elsikkasztása miatt följelentette a Jézus Krisztust.

A BOSSZU

Irta: **Csehow Antal**

EGY alkalommal kártyázgatott egy barátjánál aki a nevenapját ünnepelte Savitsch Turmanow Leo, egy átlagos nyárspolgár, akinek szép összeg pénze, kopasz kobakja és csinos felesége volt. Pechje volt a kártyában és közben eszébe jutott, hogy jó lenne egy korty konyakot inni. Felkelt a kártyaasztaltól, lábujhegyen imbolygó léptekkel kisompolygott. Utjában a szalonon keresztül, ahol a fiatalság táncolt, leereszkedően mosolygott és atyailag megveregette egy fiatal patikussegéd vállát és végre elért a büffé terembe. Itt egy kerek asztalkán álltak a konyakos üvegek. Mellettük hagymával és zöld petrezselyemmel garnirozott hideg sültek között buslakodott egy megkezdett hering. Savitsch Turmanow Leo konyakot öntött egy pohárkába, egyet csettentett nyelvével, hősies állásba vágta magát mintha egy beszédet akarna tartani és leöntötte a konyakos pohár tartalmát az elég bő torkába, közbe savanyu képet vágot akár egy vértanu. Azután egy villát ragadott és elszántan bökte a buslakodó heringbe. . . de hallva a szomszéd szobában mintha beszélne valaki. . . Rendben van, hallatszott egy merész és élénk női hang, de mikor és hol fogunk találkozni?

Hisz ez a feleségem! gondolta Savitsch Turmanow Leo aki felismerte felesége hangját, kivel beszél az asszonyka? Amikor akarod szivecském, hallatszott egy mély baszus hang, ma már alig lesz alkalom, holnap pedig egész nap el vagyok foglalva.

Hisz ez Dechtarjew! mormogta Turmanow, aki a basszusban felismerte egyik barátja hangját. Ez a bitang is ilyen dologban sántikál. Ez a csapodár asszony már Dechtarjewet is horogra kapta. Igazán ez a nyugtalan természetü asszony, nem talál nyugalmat. Egy napot nem tud átélni kaland nélkül. Igen, holnap el vagyok foglalva folytatta a basszus hang tulajdonosa. Ha akarsz irj nekem holnap. . . Végtelen örömet szerzel nekem, boldoggá teszel.

De tudod szivecském a levelezésünkre egy biztos módot kell kieszközölnünk. Valami ügyeset. Postán nem tanácsos ilyen leveleket küldeni.

Ha én irok neked, a te vén gunárod elveheti a levélhordótól. Ha te irsz nekem libuskám, megtörténhet, hogy az én öregem kezeibe kerül, és ha én esetleg nem vagyok otthon egész biztosan felbontsa.

Hát hogyan csináljuk a dolgot?

Valami ügyes módot kell kigondolni. A cselédnek nem tanácsos egy ilyen levelet a kezébe adni, mert az a vén komondor férjed bizonyára regulában tartja a cselédséget. . . Most egész biztosan kártyázik.

“Igen folytonosan kártyázik az a vén tökfilkó” és mindig veszit. Talán a szerelemben több szerencséje van, felelte Dechtarjew nevetve. Jó ötletem jött mókuskám.

Holnap este pont hat órakor a hivatalból hazamenet a városi sétakerten megyek keresztül, mert a főkertésszel kell beszélnem. Igyekezz tehát szivecském holnap este még hat óra előtt egy levelecskét a szőlőlugastól balra lévő márvány tartályba tenni. . . “Ó az nagyszerü, rendben van.” Tudod ez valami uj, folytatta Dechtarjew, ennek titokzatos és regényes ize van. Erre sem a te potrohosod sem az én sárkányom nem gondol. Ugy-e megértetted cicuskám?

Savitsch Turmanow Leo leöntött még egy konyakot és visszasompolygott a kártyaszobába. Amit most fölfedezett nem volt neki valami ujdonság, nem igen csodálkozott fölötte és legkevésbbé sem izgatta. Az az idő már rég elmult amikor ilyen dolgok miatt felizgult, a feleségét összeszidta vagy meg is verte. Idővel rájött, hogy legjobb szemet hunyni kedves életepárja szerelmi kalandjai fölött. De a ma hallott dolog mégis kellemetlen volt neki. Gunár, komondor, potrohos stb. jelzők egy kicsit sértették önérzetét. Ez a Dechtarjew mégis egy gazfickó gondolta magában, mialatt a veszteséget számitgatta. Ha az utcán találkozom vele, ugy tesz mintha ő lenne a legjobb barátom, vigyorog rám, a pocakom simogatja; most látni milyen hazug fráter! Szembe barátjának nevez, hátam mögött meg gunárnak, potrohosnak és komondornak titulál.

Minél többett vesztett annál jobban bántották a csufolódások. Ez a tejfelesszáju gondolta magában és dühében a krétát elpattantotta a kezében, no megállj te zöldfülü majd megmutatom én ki a komondor! Te gazember!

A BÉKÁK

(Goethe.)

Egy nagy tó befagyott a télen,
S a sok békát bántotta mélyen,
Hogy már nem kurutyolhat.
S mind esküvé — álmába tán,
Hogy danol, mint a csalogány,
Mihelyt a jég megolvad.
S a jég olvad, tavasz legyint,
A béka partra tör megint
És — dehogy is danoltak!
Megint csak kurutyoltak.

A vacsoránál nem tudott Dechtarjewnek barátságosan a szemébe nézni, dacára, hogy ez folytonosan kérdéseivel zaklatta, mennyit nyert? miért oly szomoru? Sőt annyira szemtelen is volt, annyira élt a házibaráti jogával, hogy jól összeteremtette Turmanow feleségét, mert szerinte az nem ügyel kedves férje egészségére. Az asszonyka pedig, mintha misem történt volna, szerelmes pillantásokkal ostromolta férjét, folyton nevetgélt, vigan csevegett ugy, hogy magának az ördögnek sem jutott volna az eszébe, hogy szarvakat rak férje ura fejére.

Amikor hazaért ugy érezte Savitsch Turmanow Leo mintha borjusült helyett egy pár gumicipőt evett volna vacsorára. Mindent megbocsájtott volna folyton nevetgélő és csevegő feleségének, ha nem jutottak volna a gunár, potrohos jelzők az eszébe.

Megérdemelné, hogy jól fültövön vágjam ezt a gazfickót, gondolta magában, no majd megkapja a magáét, morfondirozott tovább. Legjobb lesz ha jól elpáholom. . . vagy párbajra hivom és nyomorékká lövöm. . . vagy megfosztani az állásától. . . az lenne a cifra ha a márványtartályba valami jó büdöset tennék. . . mondjuk egy döglött patkányt. Az sem lenne rossz a felesége levelét kivenné a márvány tartályból és helyette egy jó zaftos verset beletenni "a téged forrón szerető Leokádiád" aláirással, szóval ilyes valamit.

Sokáig járkált föl-alá a hálószobában és valóságos mámorban uszott amikor ezekkel az ördögi tervekkel foglalkozott, egyszerre csak megállt, mutatóujját a homlokára tette. . . nagyszerü! megvan! vigyorogta, valósággal kéjelgett tervén. Na megállj majd lesz neked nemulass!

Amikor a felesége elaludt, az asztalhoz ült, elferditett kézirással és szándékos helyesirás hibákkal a következő levelet irta:

"Igen tisztőt Dulinow kereskedő urnak: —

"Igen tisztőt uram, hogyha maga máma östvére hat órakkor nem tész kétszáz rubelt az városi sétáló kert márvány kütartályba, abba amelik balkézre van az szöllőlugastul, hát maga agyon lesz lüve, meg osztán a bőrős boltját a lebegőben lesz robantva, hogy még irmagnak sé marad belüle semmi." Amikor Savitsch Turmanow ezt a levelet bevégezte kitörő örömmel ugrott fel az asztaltól.

Ezt nevezem aztán remek gondolatnak! mormogta és boldogan dörzsölte kezeit. Remek gondolat. Ennél ördögibb bosszut maga Lucifer sem eszelhet ki. Természetesen ha ez a hülye boltos ezt a levelet elolvassa ugy megijed, hogy azt sem fogja tudni, hogy fiu-e vagy leány, rögtön tudatni fogja a rendőrséget. A rendőrök persze elfognak bujni a bokrokban és amikor

Dechtarjew urfi belenyul a márványtartályba. . . Püff neki a rendőrbácsi nyakon csipi az ipsét.

Mintha látnám már hogyan fog ez a tejfelesszáju uriember habagni az ijedtségtől. Amig a dolog teljesen kiderül lesz majd nemulass!

Valószinü, hogy egy pár napra dutyiba kerül ez a kalandvágyó fickó! Nagyszerü eszme!

A levélre bélyeget ragasztott és személyesen vitte a postára. Boldog mosollyal ajkán aludt el és már régen nem aludt olyan nyugodtan. Másnap reggel szokása ellenére vigan dudolgatott és annyira megelégedett és boldog volt, hogy még tréfálkozott is hütlen életepárjával. Hivatalba menve folytonosan mosolygott és maga előtt látta Dechtarjew halálra ijedt arcát amikor majd csapdába kerül.

Pont öt órakor elment a hivatalból és egyenesen a sétakertbe ment, hogy saját szemeivel gyönyörködjön ellenségének kétségbeejtő helyzetén.

Ahá! jól kezdődik, mondotta amikor egy rendőrt látott a közelben.

A szőlő lugas közelében elbujt egy bokorba szemeit várakozóan a márványtartályra szegezve várt. Bozasztó izgatott volt.

Hat órakor pontosan megérkezett Dechtarjew.

A fiatalember jó hangulatban volt. Cilindere merészen hátrabökve ült a koponyáján, felöltője kigombolva és Turmanownak ugy tetszett mintha Dechtarjewnek nemcsak a mellényét de a szivét is látta volna.

Egy dalt fütyörészett, közben egy szivart pöfékelt.

Na megállj! nemsokára eszedbe jut a gunár meg a komondor! gondolta Savitsch Turmanow kárörvendően. Megállj csak!

Dechtarjew a márványtartályhoz lépett és egykedvüen belenyult. Savitsch Turmanow Leo egy kissé fölállt és epedve várta minden mozdulatát. A fiatalember egy kis csomagot vett ki a tartályból. Megnézte jobbról-balról és a vállát vonogatta, azután felnyitotta a csomagot.

Arcáról határtalanul örömteljes csodálkozást olvasott le Savitsch Turmanow.

A csomagban két százrubeles bankó volt.

Dechtarjew sokáig és csodálkozva nézte a két százrubeles bankjegyet. Azután egyett rántott a vállán, zsebrevágta mindkettőt és hangosan kiáltotta ugy, hogy Turmanow is hallotta; köszönöm szépen!

A szerencsétlen Turmanow az est beáltával órák hosszat ácsorgott Dulinow boltja előtt.

Mindkét keze dühösen ökölbe szorult és folyton suttogta; gy-á-á-á-v-a! rőflovag! országos marha! gy-á-á-á-v-a kutya! ó te hájfejü göböly!

Nem éhbért, a munkám teljes gyümölcsét!

Osztályharcok a régi Rómában

Irta: Vlasits Márton

A RÉGI kulturnépek történetéről a modern kornak elég bő ismeretei vannak. Elismert tény, hogy a Rómaiak története a régi birodalmaké között a legismertebb. A könyv nyomtatás modern technikája ma már lehetővé teszi mindenki számára a könyvolvasást. De az olvasásnak csak akkor van az osztálytudatos munkásnép részére értéke, ha azt ellemezni és forradalmi birálattal megitélni tudja. Ehez szükséges, hogy a forradalmi érzésü munkás a történelmi tényeket mindig a történelmi materializmus szempontjából gondolja át. Abból a szempontból, hogy ugy a multban mint a jelenben az emberiség történelme az osztályharcok szakadatlan láncolata. Föltétlenül tudnunk kell, hogy államok, birodalmak és az egész emberiség történetét a különböző társadalmi osztályok egymáselleni harcai, a munka és termelési szerszámok használata, a gépek és ennek kapcsolatán a termelés fejlődése befolyásolták. A történelem olvasásnak semmiféle, különösen az osztálytudatos munkásság részére értéke nincs, ha az akkori termelési erőket, gazdasági viszonyokat és osztálytagozódásaikat figyelmen kivül hagyjuk, mert ezek nélkül a történelem nem más, mint egy mindennapi, átlagos és semmitmondó regény, vagy dajkamese olvasása.

> "És lázadó? . . . ha lázadás az,
> Midőn az ember érzi és kimondja,
> Hogy ő is ember mint bárki más,
> Ugy büszkén mondom lázadó vagyok.
> S, tudnám csak mindazt, amit érzek,
> Ugy, amint érzem, kimondani,
> Föllázadnának milliók velem,
> S, reszketne a világ,
> Mint Spartacustól Róma reszketett,
> Midőn eltépett láncaikkal
> Verték falát a gladiatorok!"
>
> Petőfi, AZ APOSTOL, IX Rész

Róma város alapitása körülbelül 700 esztendővel a mostani számitás előtt történt. A monda szerint a Trojai háboruból visszajövő görögök alapitották. Erről nagyon kevés történelmi bizonyiték van és az irók csak a hagyományokra és legendákra támaszkodnak. Kezdetben a királyság intézménye állott fenn. Az uralom abszolutisztikus, magyarul, önhatalmu és senkinek felelősséggel nem tartozó volt. A királyság idejében Róma uralma csak magára Rómára és annak közvetlen környékére szoritkozott. A király az alattvalóinak élete, halála és vagyona fölött rendelkezett.

Formailag a várost szenátorok kormányozták, akik a gazdag emberekből kerültek ki. Ezek viszont mint családfők szintén a családon belül élet és halál fölött rendelkeztek. Az alacsonyabb rendü munkát rabszolgák végezték, akik az összefogdosott hadifoglyok voltak.

A királyság intézménye körülbelül 250 évig állott fenn. A királyt elkergették és helyébe a konzulátus intézményét vezették be. A konzulokat a szenátorok választották egy évi időtartamra. Konzulnak csak szenátort lehetett választani, tehát csak az uralkodó osztály tagjait. Szenátor pedig csak patricius mint az elnevezés is mutatja a születési nemesség tagja lehetett.

Ebből látni, hogy az uralkodó osztály már két és félezer esztendő előtt gondosan ügyelt arra, hogy a hatalmat megtartsa.

Nagyon természetes, hogy a patricius családok egyes tagjai többféle körülmény folytán elszegényedtek, vagy a család kiközösitette őket magából. Továbbá voltak olyanok, akik a környékbeli telepekről jöttek be a városba mint munkások vagy mesteremberek. Ezeknek a száma idővel megnőtt és ezek képezték az ugynevezett plebs néposztályt.

A királyság idejében ezeknek semmiféle jogaik nem voltak. Nem voltak rabszolgák, tehát a patriciusok nem rendelkeztek fölöttük, csak a király. Földbirtokot akkor még nem is vásárolhattak. Háboru esetén azonban sokszor nagy szolgálatot tettek a gazdagoknak. Ha a király valamely ellentétbe került a gazdag nemességgel több esetben fölhasználta a nép szolgálatát. Később a konzuli vagyis a köztársasági uralom alatt ezeknek már földbirtokot is volt szabad vásárolni és közülök sokan meg is gazdagodtak. A vagyontalan plebs-eket proletároknak, vagy mint a szószerinti forditás mondja, gyermeknemzőknek nevezték.

A rómaiak vallása nagyszerüen és hüen beleillett az államrendszerbe, mert a könnyenhivő nép józan észt megzavaró, az az butitó hatást gyakorolt. Polybios görög bölcs szerint a római vallási ceremóniákat azért üzik, hogy a tömeget elszéditvén, ne tudjon józanul gondolkozni.

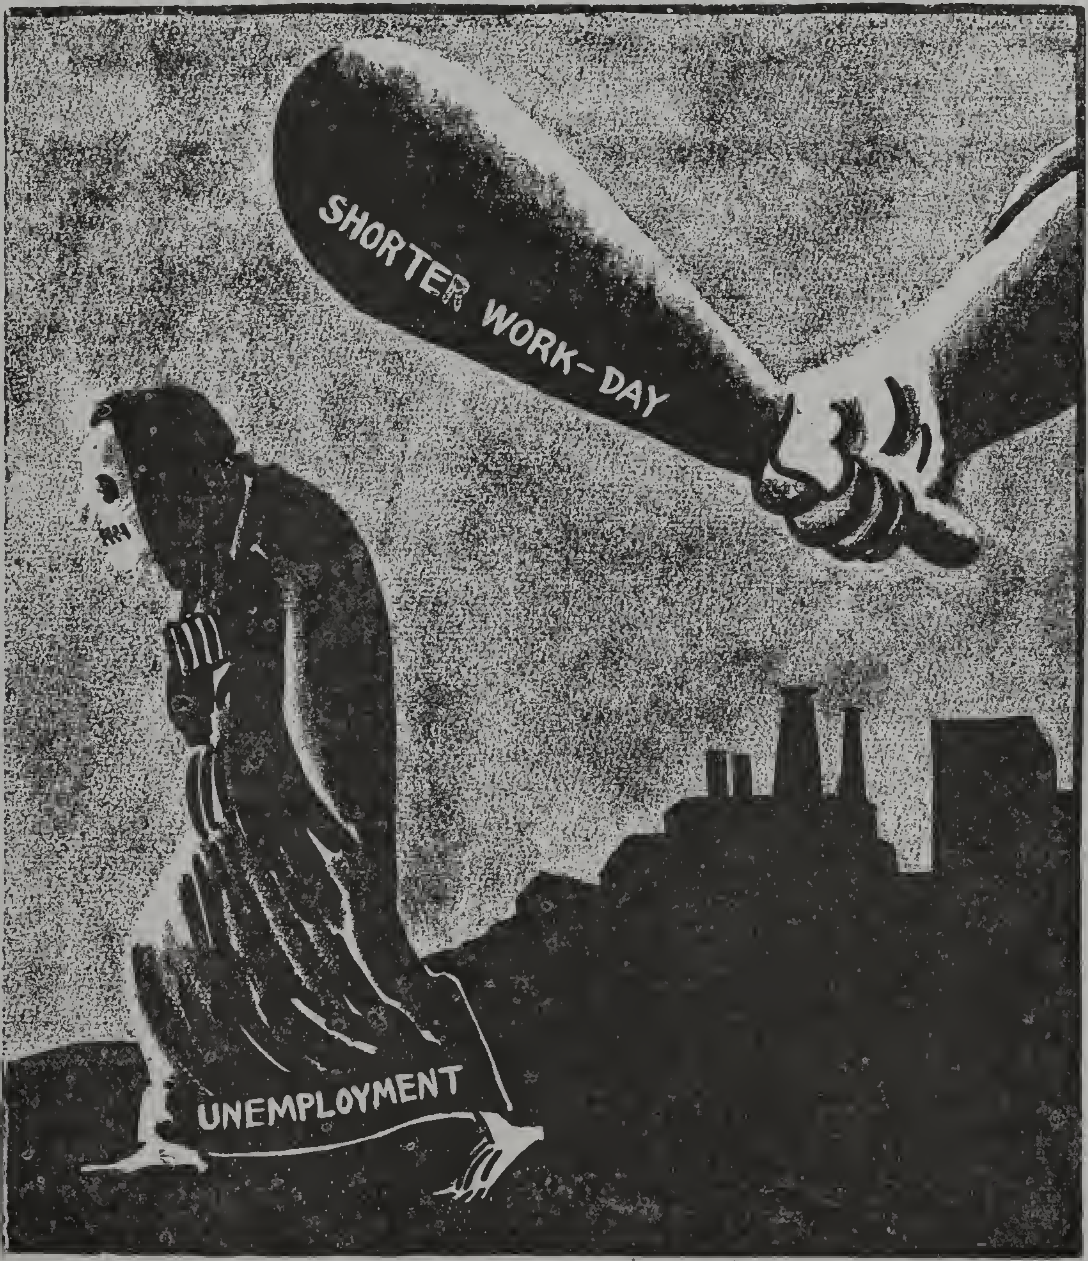
A római vallás papjai akiket augaroknak (jóslóknak) neveztek, a madár repülésből, vagy az áldozati ökör beleiből jövendöltek. Ez a gyakorlat és butitás annyira elfajult, hogy valahányszor két augar találkozott, mindig egymásra nevettek.

Tehát a római társadalom tagozódása a következő volt: Először a főnemesség amely a születési és vagyon arisztokráciából állott. Másodszor a plebs, a nép akik bár szabadok, de nem részesültek azon jogokban mint a nemesség. Az államéletre és a közügyekre bár nem nagy, de volt befolyásuk. Harmadszor a proletárok akik nem voltak ugyan rabszolgák de sorsuk csak abban különbözött azokétól, hogy uraik nem rendelkeztek életük fölött, nem lehetett eladni őket. Végül a rabszolgák akiknek a sorsa csak akkor különbözött az igavonó barométól, ha emberiesen érző urra akadtak. Ura a rabszolgát eladhatta, kinozhatta, megölhette, anélkül, hogy ezért valakinek felelősséggel tartozott volna.

A római uralkodó osztály a rabszolgát beszélő állatnak nevezte. Nem tekintette embernek.

Az uralkodó osztály történetirói a római társadalmat civilizáltnak és magasrendünek jellemzik. A római jog a kapitalisztikus termelési törvénynek és rendszernek alap forrása. De az egész római birodalom történetében nem találunk olyan embert aki komoly kisérletet tett volna a rabszolga intézmény eltörlésére. A rabszolgaság intézménye nélkül a római birodalom nem lehetett volna azzá ami volt. Az uralkodó osztály nem fejthette volna ki azt a pompát és fényüzést amely bámulatba ejti még a mai embert is. Az akkori uralkodó osztály részére a rabszolga életszükséglet volt. Aristoteles aki görög filozófus lévén a rabszolgaság intézményét föltétlenül szükségesnek tartotta és szerinte csak akkor lehet eltörölni ha majd minden szerszám magától dolgozik. Pedig tudvalevő, hogy Görögországban a rabszolgák sokkal emberiebb módon lettek kezelve mint Rómában.

Hogy az osztályok között állandó verseny és torzsalkodás volt, az nagyon természetes, Róma fölfelé törekvő hatalom volt. Állandó háboruban volt a szomszéd területek lakóival és lassanként az egész apennini félszigetet, a mai Olaszországot elfoglalta. Állandóan háboruskodott. Háboruban a nép vitte a bőrét a vásárra. Több izben csak ugy volt hajlandó a vágóhidra menni, ha neki igéreteket tettek. Az igéretek azonban csak igéretek maradtak. Végre ezt a nép megsokalta és amikor ismét háboruba vonulásról volt szó, azt a fegyvert használta a nép, amelyet ma a munkásság használ. Kimondotta a sztrájkot. A nép tömegesen kivonult a városból, a város közelében fekvő ugynevezett "Szent Hegy"-re. Egy hadvezért választott és megindult a város felé, hogy a szenátust emlékeztesse azon igéretekre amelyet már többször tett amikor a népre szüksége volt. Az volt az igéret, hogy a kiuzsorázott nép terhein könnyiteni fog. A nép még nem adta át a fegyvereket amelyeket az utolsó háboruban használt és igy a szenátusnak volt elég oka a rettegésre. A nép hadsereg megindult, és ekkor egy küldöttség jelent meg a szenátus küldöttsége. Menenius Agrippa szenátor egy beszédet mondott, amelyben elmondotta a gyomor és a többi testrészek közötti harcot. Ez a példabeszéd amelyet még ma is használnak, körülbelül igy szól: Az összes emberi testrészek igen elégedetlenkedtek az miatt, hogy a gyomor csak élvezi mindazokat a jókat amelyet a többi testrészek beszereznek és megteremtenek. Elhatározták tehát, hogy ezentul nem adnak semmit sem a gyomornak. A következmény az lett, hogy az egész emberi test felmondotta a a szolgálatot. A gyomor, Menenius Agrippa szerint a szenátus, az az a gazdag emberek voltak. Ha ők, a nép, nem adják meg a gazdagoknak a jót, az élvezetet, ugy az egész társadalom romba fog dőlni mint ahogy az emberi test felmondta a szolgálatot. Ezt a példabeszédet még a mai uralkodó osztály is találónak tartja. A rövid



A munkanélküliség orvossága: rövid munkaidő.

értelme az akar lenni, hogy szükség van a gazdagokra, mert azok nélkül a szegény embernek nem lenne munkája és nem tudna élni. Ez a filozófia akkor sem volt helyes és ma sem az.

Mindamellett a nép bedőlt ennek a félrevezetésnek és nem semmisitette meg a hitszegő államhatalmat. Csak annyit ért el, hogy az uzsoraadósságok el lettek egy időre törölve és a szenátust kényszeritették egy törvény elfogadására, amely biztositotta a néptribunátust. Tudniillik a két, a szenátus kebeléből választott teljhatalmu konzul mellé a nép választott a konzuli hatalom ellensulyozásaként két népvezért. A két választott népvezérnek a törvények alkotására vonatkozólag kevés hatalma volt. Körülbelül annyi mint a mai "nép képviselőknek." Mint birák már szélesebb hatáskörrel birtak, mert a plebejusok, a nép ügyeiben csak ők itélkezhettek. Itéletüket csak az egész város népgyüléséhez lehetett megföllebbezni. Joguk volt a konzulokat is maguk elé idézni.

Látszólag a néptribunátus intézménye demokratikus, de osztályjellegü volt. A két államfőt, a konzulokat csak is a főnemességből lehetett választani. A két népvezért a nép választotta, tetszése szerint. A néptribunoknak csak annyi döntése lehetett, hogy a meglevő törvények eltörlését megakadályozhatta, de uj törvényeket nem hozhatott. Az uralkodó osztálynak az érdeke pedig mindenekfölött az volt, hogy a meglevő törvények megmaradjanak. Ha ezek már tarthatatlanok voltak, ugy néha belegyezett valamelyes reformokba vagy foldozásokba.

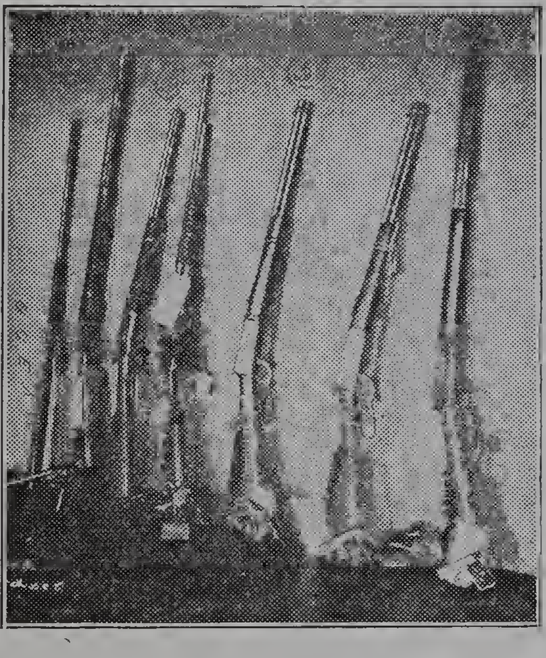
Nem lehet azon csodálkozni, hogy a nép által választott néptribunok és a szenátorok mint a gazdagok képviselői között állandó harcok folytak. Megtörtént ugyan az is, hogy a konzulok előbbrelátók voltak mint a néptribunok. Amikor az egyik konzul egy törvényt terjesztett elő, melynek értelmében az elfoglalt területek termőföldjét Róma birtoktalan polgárai között osszák föl, maguk a plebejusok voltak ellene, mert az illető konzul nem csak Rómában lakó hanem minden római polgárt beleértett.

A szenátus és a tribunok ellenezték a törvényt, de a konzul a népgyülés elé vitte. A vége az lett, hogy a konzult vád alá helyezték és mint hazaárulót végezték ki. A vád az volt ellene, hogy királyi hatalomra vágyott. Igéretet tettek a népnek, hogy majd kidolgoznak egy földosztási törvényt. De az igéret csak igéret maradt. Genucius néptribun több izben sürgette a földosztási törvény megvalósitását. Orgyilkossággal hallgatták el az igéret beváltását sürgető néptribunt. Általában véve az uralkodó szenátorok szokásukká tették azt, hogy ha a néptribunok a körmükre néztek, vagy visszaéléseiket ellenőrizték a hazaárulás vádját ellenük felhozni. A hazaárulás vádja már akkor is szokásban volt, mert ezzel lehetett a népet legjobban bolonditani. Az arisztokrácia és a nép között a harc mindinkább kiélesedett és az osztályharc jellegét vette fel. A harcnak gazdasági okai voltak és a hatalomért folyt. Az arisztokrácia látta, hogy a plebejusok általános elszegényedése Róma városán belül, reá nézve veszedelmes, beleegyezett a telepitésekbe. Mint már emlitém Róma aránylag rövid időn belül elfoglalta az egész mai Olaszországot. Hogy a népnek a folytonos hadbavonulását valamennyire izletessé tegyék megkezdték az elfoglalt területeknek római polgárokkal telepitését. Az igaz, hogy itt is mindenkelőtt a jobb földeket és a zsirosabb falatokat az uralkodó osztálybeliek foglalták el, de a forradalmi hangulat lecsapolására elég jó eszköznek bizonyult. Az eredmény azonban csak az lett, hogy a birodalomban több nagyobb város alakult, ahol a szegény és gazdag közötti ellentétek éppen ugy mint Rómában, kiélesedtek.

Nem kis szerepük volt az uzsorásoknak a római közéletben. Sokszor megtörtént, hogy egy uzsorást elitéltek. Hogy a népet megnyugtassák időrőlidőre megtiltották a kamatvevést általában. De azt már nem merték a törvényből kiküszöbölni, hogy az adós kényszeritve volt adósságainak meg nem fizetése esetén magát az uzsorásnak átengedni és neki éveken át ingyen dolgozni. Ezen törvény életben tartása jó fegyver volt az arisztokrácia és az uzsorások kezében, mert több esetben lehetett a nekik kellemetlenkedő plebejusok valamelyikét a szolgaságba alacsonyitani.

A korrupció, a hivatalnokok megvesztegethetősége, a jóbarátok és pereputyok előnyberészesitése, éppen ugy szokásban volt ott is mint a mai kapitalista államrendszerben. A néptribunok mint a középosztály és a nép képviselői a parlamentben éppen ugy mint ma, tüzes beszédeket vágtak ki az általános közéleti romlottság ellen. De azért minden a régiben maradt. Az akkori kornak egyik nagy embere, Cato, Mondotta: "ha valaki egy polgártól lop, életét láncraverve börtönben végzi be, de ha valaki a közvagyont dézsmálja meg bibor palástban járhat és aranyban duskálhat."

Hogy az uralkodó osztály a nép figyelmét a csalásaiktól és rablásaiktól elterelje gondoskodott arról, hogy Rómában a kenyér a körülményekhez képest olcsó legyen. Igy ha a hadsereg valamely területet leigázott az első dolga az volt, hogy az ott levő gabonakészletet lefoglalta és Rómába küldte, miáltal a nép olcsó kenyérhez jutott. A különféle és sokszor megtartott nyilvános népünnepélyek és pompával kifejezett zajos játékok pedig a városi csőcselék szája ize szerint lettek lerendezve, ugy, hogy a "Cirkuszt és kenyeret" jelszóvá lett. Ezt a kort és szokást Cato igy jellemzi; A nép bendője ha teli van nem hallgatja meg az okos szót; A hasnak nincsenek fülei, tehát nem hall. A politikusok "saját költségükön" mulattatták a csőcseléket. A választásoknál az volt a nyertes aki zajosabb vagy nyersebb élvezetet adott a lumpenproltáriátusnak. Nagyon természetes, hogy vagyontalan embernek alig volt esélye magát megválasztatni és igy a politikai hatalmat csakis a gazdag emberek, arisztokraták és plebejusok bitorolták. Az általános közéleti romlottságot Mommsen a neves történetiró igy jellemzi: Ez a kor a szélcsend kora volt a vihar előtt, a politikai középszerüség kora. Akárhova nézünk mindenütt a bomladozó és összedülni készülő épitményt látjuk. Az épületet támaszszák és foldozzák jobbról-balról. De alapos át vagy ujjáépitésre senki sem gondol, bár tudják, hogy az egész rendszer romba fog dőlni, csak azt nem tudják, hogy mikor.



A legujabb felfedezés szerint az örök békét a fegyverekre épitik.

Mint már jeleztem a római birodalom társadalmi összetételét a pariciusok, a plebejusok, a proletárok és a rabszolgák képezték. A három elsőről már elég volt és most a rabszolga intézményről lesz egynehány szó.

A rabszolgák száma a királyság idejében amikor Róma a hatalmának csak a kezdetén volt aránylag csekély. De abban az arányban ahogy a birodalom hatalma nőtt a számuk szaporodott. Tekintetbe kell még venni, hogy rabszolgát csak nagyon ritkán szabaditottak fel. Továbbá azt is, hogy a szaporodásukat az uralkodó osztály ugyszólván kötelezővé tette, amennyiben azon rabszolganőt aki 4 egészséges fiugyermeket szült felszabaditotta. Természetes, hogy a gyermekek rabszolgák maradtak, az anyát fel lehetett szabaditani, hisz már ugy sem soká élvezhette a "szabadságát." Hozzájöttek még a hadifoglyok akik szintén szaporitották a rabszolgák számát. Ezeket egy-egy háboru végén ezrével hajtották láncraverve a római rabszolgavásárra, ahol árverés utján lettek eladva.

Amikor Róma a mai Sardinia szigetet, amely igen népes volt, Carthagotól elfoglalta és a sziget népét mint rabszolgákat a vásárra hajtották, az áruk annyira lement, hogy szálóige lett ez a mondás hogy: "Olcsó mint a sardiniai rabszolga."

A római arisztokrata vagy a gazdag plebejus igen kedvelte a fényüzést, a pazarlást és a dőzsölést. A rabszolgáit azonban minden képzeletet felülmuló barbár sorsban tartotta. A római arisztokrata és plebejus féltette a szabadságát, de a rabszolgáját állandóan megláncolva tartotta éjjel-nappal, még munkaközben is.

Megszökés esetén vérebekkel hajszolták fel őket. Ahol nagy számban voltak a birtokokon, szokásban volt őket tüzes vassal megbélyegezni. Mivel a zendülések napirenden voltak, még éjjel is amikor nyugovóra tértek fegyveres őrök vigyáztak reájuk. Gazdag rómaiak éppen ugy kereskedtek rabszolgákkal mint állatbőrrel. Nem volt abban semmi lealacsonyitó még Cato a nagy római bölcs és népszónok részére sem, hogy rabszolgavásáron spekulált. Hisz nyiltan kérkedett zsiros üzleteivel melyeket egy-egy rabszolga adás-vevésen kötött. Hogy ilyen körülmények folytán ur és rabszolga halálos ellenségek voltak talán fölösleges emliteni is. Hogy maguk a rabszolgák között minden megegyezést vagy megbeszélést megakadályozzanak szokásban volt többféle nemzetiségeket összevegyiteni, hogy egymást meg ne értsék. Gyakorlatban vol a nemzetiségeket egymás ellen lázitani és izgatni. "A Divide et Impera" az az uszitsd őket egymás ellen és uralkodj fölöttük jelszó, abból a korból származik.

A rabszolgákat azonban nemcsak nehéz testi és produktiv, termelő munkára használták, hanem a tulhajtott élvezetektől elpetyhüdt testü, és a kicsapongásoktól megromlott idegzetü semmittevők mulattatására és szórakozására is. Mint már emlitettem Róma uralkodó osztálya, hogy a néphangulatot egyensulyban tartsa, gondoskodott arról, hogy a népet különféle ünnepélyekkel szórakoztassa.

Ezekhez a gladiator vagy vivójátékok is tartoztak, melyekre csak rabszolgákat használták. Ezek a vivójátékok rendszerint halálos végüek voltak, hisz éles tőr, vagy kard volt a fegyver. Ezeket a rabszolgákat jól táplálták, hogy képesek legyenek ezeken a nyers és veszélyes játékokon magukat produkálni.

Nagyon természetes, hogy ilyen körülmények között és ilyen brutális uralkodó osztállyal szemben a rabszolgáknak más utja nem maradt a felszabadulásra mint az erőszak, a fegyveres fölkelés. A plebejusokat és a nem rabszolga szegénységtől az uralkodó osztály nem félt annyira mint a rabszolgáktól. A városi plebejusok részére a "törvényes ut" nyitva volt, de ezt csak akkor tudták igénybe venni, ha valaki a nemességből az ügyüket felkarolta. Egy ilyen eset volt, amikor Tiberius Grachus felkarolta a polgárság ügyét. Ez azért emlitendő külön, mert az illető arisztokrata tényleg önzetlenül küzdött a nép érdekében. A nép azonban annyira félrevezethető volt, hogy a kritikus pillanatban cserben hagyta a vezérét. Tiberius Grachus az életével fizetett a nép ügyéért.

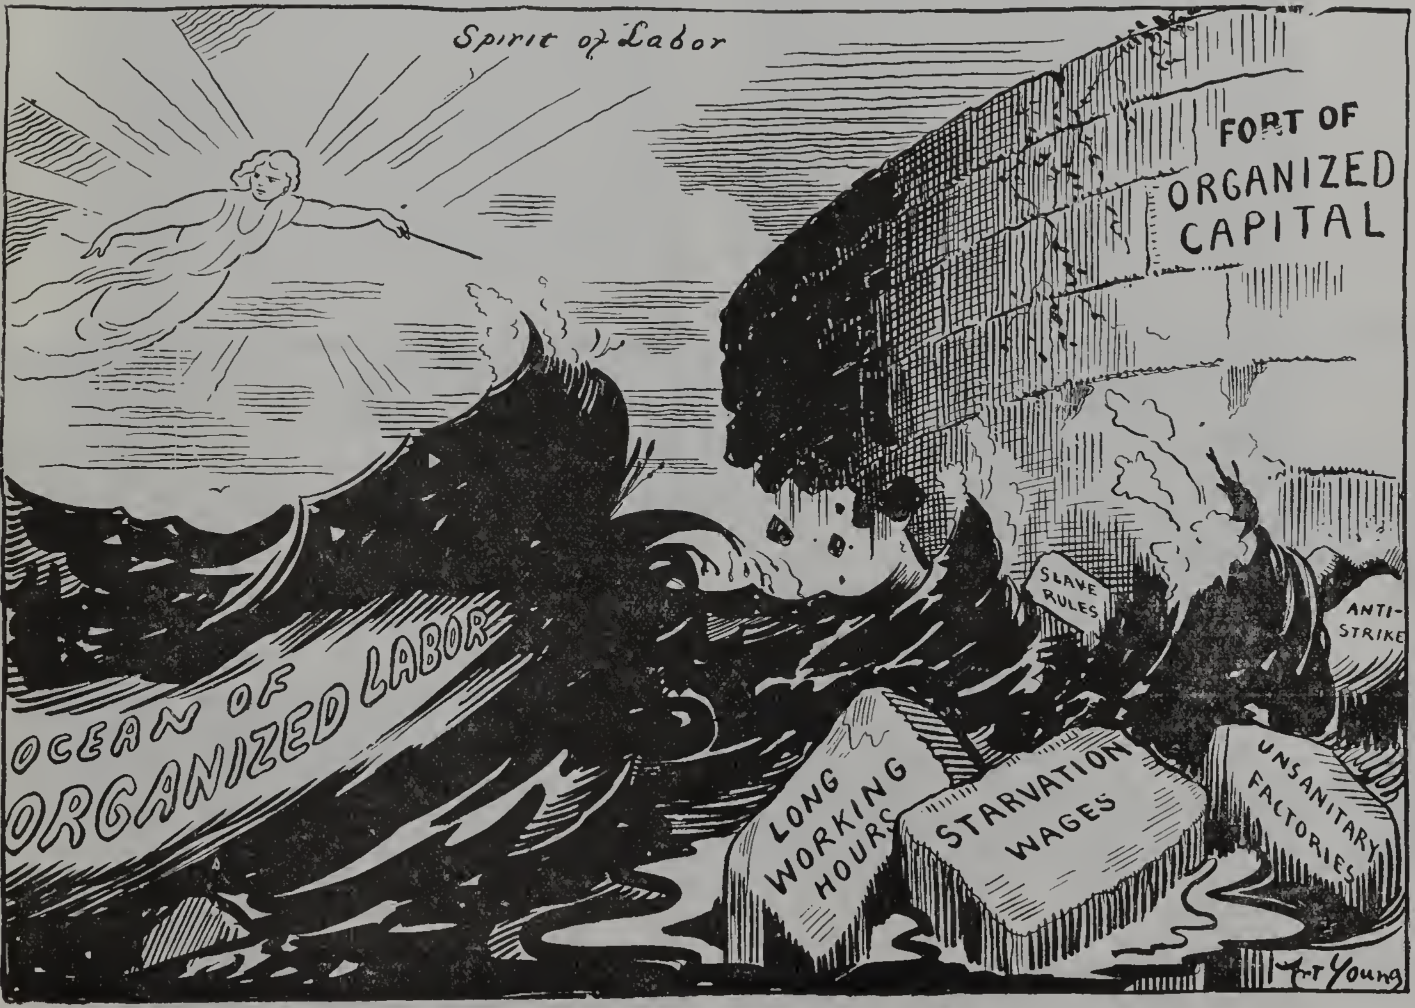
A rabszolgák sorsának javitására vagy pláne fölszabaditására nem találkozott az arisztokraták soraiból senki sem. Ezeknek tehát maguknak kellett a küzdelmet fölvenni. Az első rabszolgazendülés Rómában tört ki, melyet azonban a légiók (katonaság) segitségével már a kezdetén elfojtották. Az uralkodó osztály itt igen elővigyázatos volt. Tulnyomó katonai erővel rendelkezett és igy a rabszolgák nagyon is béklyóba voltak verve.

Nem volt azonban a hatalom Szicilia szigetén ugy fölkészülve mint Rómában. Szicilia sziget már akkor igen népes és a természettől igen megáldott föld volt. Itt a rabszolganyuzás olyan mértékben divott, hogy maga a római szenátus többször közbelépett, mert azt a kegyetlen sanyargatást amiben a sziciliai rabszolgák részesültek még a szenátus is megsokalta. Egy csoport elmenekült rabszolga lefegyverezte Enna város katonaságát és felszólitotta a rabszolgákat a csatlakozásra. A fölkelés futótüzként terjedt az egész szigeten. A sziget katonai parancsnoka erős haderővel támadta meg őket.

A rabszolgák erélyes ellenállást tanusitottak. A felkelők mindenütt visszaverték a légiókat és itt azt a hibát követték el, hogy minden katonát futni engedtek aki a fegyverét átadta. Ezt később megkeserülték, mert a futni engedett katonák ismét fölfegyverkeztek. Ez megnehezitette a rabszolgák állapotát.

De annak dacára a sziget nyugati partjain egy erősebb zendülés tört ki, melynek vezére Kleon egy volt görög katona, igen jó hadvezér és adminisztrátor volt. Ha hadba vonult a légiók ellen, csak a volt, harcedzett katonákat vette maga mellé. A többit a föld megmunkálására fogta és igy sikerült neki megverni a római légiókat és egyidejüleg az élelmezésről és jólétről is gondoskodott.

Tryphon szintén egy volt görög rabszolgának sikerült a pásztorkodó rabszolgákat maga köré gyüjteni és ezekkel együtt Kleonhoz csatlakozott aki az Athenion nevet vette föl. Sziciliában már akkor tekintélyes városok voltak, melynek nincstelen polgárai a proletárok szintén a rabszolgákhoz csatlakoztak. A római szenátus bajban volt. Lukullius hadvezért küldte igen nagy számu hadsereggel a rab-



A szervezett munka folytonos ostroma alatt bomladozik a kapitalizmus bástyája.

szolgák ellen. Ezt követte Servilius is de mindketten vereséget szenvedtek. A római szenátus mindkettőt halállal büntette. Végre több mint három évi nagy küzdelem után sikerült az első rabszolga fölkelést elfojtani.

Mint már kimutattam, a római birodalom gazdasági ereje a rabszolga és proletár dolgozók munkáján nyugodott. De mert ezek a mérhetlen kizsákmányolás miatt állandó harcban álltak az uralkodó oszállyal folyton ingadozott. Ha a rabszolgazendüléseket a hatalom elnyomta, egész biztosan lehetett a szegény polgárság és proletariátus fölkelésével számolni.

Mint már láttuk a római szenátus nem volt hajlandó az elfoglalt italiai városok és területek polgárainak azokat a politikai jogokat megadni, amelyeket a római polgárok élveztek. Márius, egy szegény földmives gyermeke, aki szorgalmasan tanulmányozván a nagy római népvezér, Grachus történetét volt az aki Róma népét a hatalmasok ellen vezette. Márius mint fiatal ember a katonai pályára lépett. Részt vett az ibériai félszigeti (a mai Spanyolország) harcokban. Itt gyorsan emelkedett a katonai ranglétrán. Szép vagyont gyüjtött, később egy gazdag polgárleányt vett feleségül, miáltal megnyerte a politikai pályára lépés alapföltételeit. Végre megválasztották konzulnak. Mint konzul egy törvényt fogadtatott el, miszerint mindenkinek lehetővé vált a katonai pályán fölemelkedni tekintet nélkül származására, vagy vagyoni állapotára. Ezért a nép igen megszerette és hallgatott szavára. mikor azt a törvényt terjesztette a római nép elé mely szerint azok a katonák akik Róma háboruiban szolgáltak ingyen földet kapjanak. Az arisztokraták heves ellenállást fejtettek ki. Ez nem sokat használt, mert a nép egyöntetüen pártolta a törvényjavaslatot. Saturninus tribun vezette a tanácskozásokat. A leszavazás előtt az égboltozat elsötétült és heves villámlás reszketette meg a levegőt. Ekkor a szenátorok az augorokkal együtt a népgyülés föloszlatását követelték, s mert mint mondották ez annak a jele, hogy az Istenek ellene vannak a törvénynek.

Nem baj! mondotta Saturnius ha menydörgés van, mert arra rendszerint vihar következik. A vihar tényleg be is következett, de olyformán, hogy a nép a szenátorokat akik nem szaladtak el alaposan elverte és a törvényjavaslatot törvényerőre emelte.

Ezzel a törvénnyel tényleg az elfoglalt területek polgárai egyenjoguságot nyertek a római polgárokkal. Az igaz, hogy ezeket a törvényeket az arisztokrácia több izben hatályon kivül akarta helyezni. A polgárság azonban mindig ellenállt és sokszor véres összetüzések voltak emiatt. Több izben a polgárság a rabszolgák segitségét is igénybe akarta venni, de ezek mivel nekik ezekből a törvényekből semmiféle előnyük nem származtak, nem voltak hajlandók a polgárság részére a gesztenyét a tüzből kikaparni.

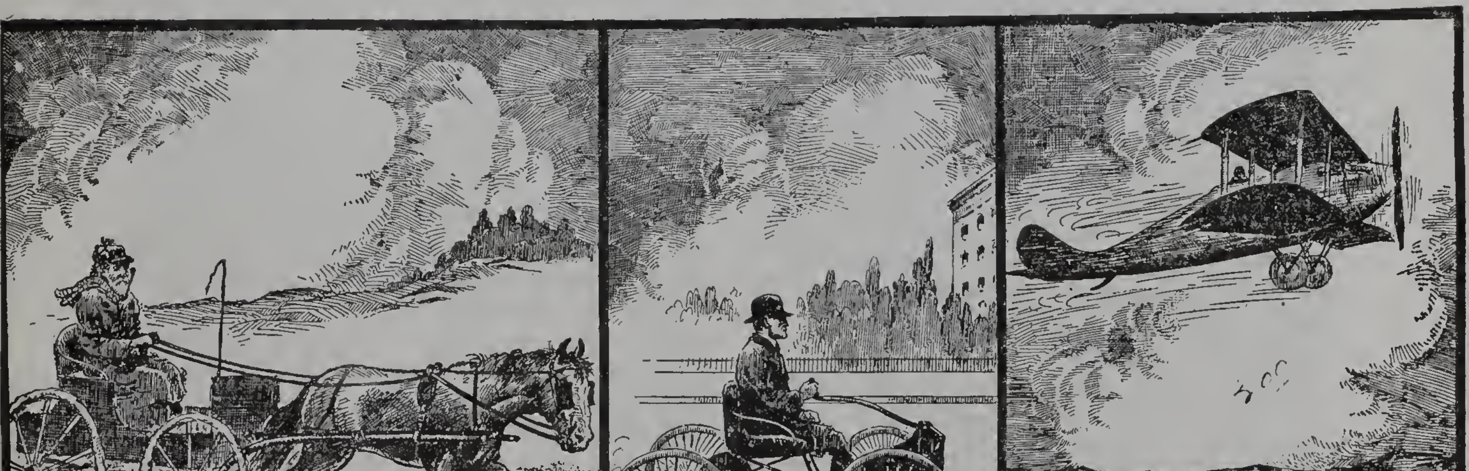
Ilyenformán a római birodalomban minden ugynevezett szabadon született polgár egyenjogu volt. Mindenkinek nyitva állt az ut az érvényesüléshez, persze csak papiron. Ma is ugy van ez papiron. De ugy akkor mint ma, a gazdasági elnyomás volt és van. Pénzért mindent lehetett szerezni, persze politikai hatalmat is. Plutarch a legnevezetesebb római történetiró szerint a római választásoknál sátrak voltak fölállitva, ahol a polgárok nyiltan adták el szavazatukat annak aki legtöbbet igért, vagy adott. Bár politikai szabadság volt, de mellette gazdasági rabság, tehát az osztályharc a különféle társadalmi osztályok között annál hevesebb lett. Ezekben a harcokban a rabszolgák keveset vettek részt. Ezek egy ideig némán türték szenvedéseiket, mig egyszerre kirobbant az a rabszolgalázadás, amelyet a gladiatorok szabadságharcának vagy Spartacus fölkelésnek nevez a történelem.

Mint már emlitve volt, a római uralkodó osztály a legdurvább és nyersebb vivójátékokban szeretett gyönyörködni. A szereplők az az a vivók élet-halál harcot vivtak ilyenkor egymással és az Afrikából szállitott vadállatokkal. Ezek a vivók rabszolgák voltak, akiket az erre berendezett vivó vagy gladiator iskolákban képeztek ki. Egy ilyen iskola volt Capuában egy olaszországi városban. A kiképeztetésben ezeknek a rabszolgáknak emberfölötti fájdalmakat és megaláztatásokat kellett eltürni. Egy alkalommal hetvenhárom rabszolga kitört az iskolából. Utközben egy fegyverszállitmányt zsákmányoltak. Egy egész ezred katonaság vette őket üldözőbe. A Délolaszországban fekvő Vezuv tüzhányó hegy oldalán elsáncolták magukat. Vezérüknek Spartacust, egy thráciai görög rabszolgát választották. Két alvezér is volt mellette kelta származásu Krixos és Oenanaos.

Ez a kis elszánt csapat eleinte ügyesen kikerült minden nagyobb összeütközést a római rendes katonasággal. A Vezuv közelében levő arisztokrata kastélyokat fosztogatták. Az arisztokraták jajveszékelésére 3.000 római katona vonult ellenük, akik a Vezuv tüzhányó hegy minden szorosát és utját elzárták. A terv a rabszolgahad kiéheztetése volt. Ez sikerült volna, ha a rabszolgák Spartacussal élükön meg nem támadták volna őket. A támadás oly heves és váratlan volt, hogy a római rendes katonaság eszeveszetten menekült, hátrahagyva élelmiszereket és fegyvereket. A közeli vidék nincstelen parasztsága erre tömegesen csatlakozott hozzájuk, ugyszintén nagy számu rabszolgák.

Hiába küldte a római szenátus a legjobb katonaságot a gladiatorok ellen. Azok a katonák akik csak egyszer is összetüztek a jól kiképzett rabszolgákkal másodszor már nem voltak hajlandók. Tömegesen dobálták el fegyvereiket és menekültek. Ilyen körülmények folytán a rabszolgahadsereg rövid idő alatt negyvenezerre szaporodott, ami az akkori időben óriási számot jelentett. Spartacus terve most már az volt; átvonulni Olaszországon, átmenni az Alpeseken, Galliát, a mai Franciaországot felszabaditani. A rabszolgák azonban ellene voltak a tervnek, ők Olaszországban akartak maradni. Spartacus meghajlott a többség akarata előtt. Elfoglalta Délolaszországot. A kedvező éghajlat, a föld dus termékenysége igen sok római arisztokratát idecsalt. Ha ezek a rabszolgák kezeibe kerültek, bizony nem volt jó dolguk. A rabszolgák ezeket kényszeritették ugy harcolni vagy egymást ugy szétmarcangolni, mint ahogy ezek azt a rabszolgákkal tették.

Spartacus győzelmei Rómát páni fé-



Egy század fejlődése a közlekedésben.

lelemmel töltötték el. Tenni kellett valamit. A szenátus a régi cselhez folyamodott. A divide et impera módszerhez. A rabszolgahadba elküldték a kémeiket, akik ügyesen elvetették az egyenetlenség magvát. A kémek rábeszélték a kelta vezéreket Krixost és Oenanaost, hogy ne engedelmeskedjenek a thráciai Spartacusnak. A két kelta vezér különvált Spartacus hadseregétől és igy sikerült ezeket a rómaiknak megverni. Borzasztó vérfürdőt rendeztek közöttük. De nem volt könnyü Spartacus hadseregét legyőzni. Ez átvonult Olaszországon és magát Rómát is fenyegette. Nagyszámu lovasságot szervezett. A kikötővárosokban a kalózoktól nagymennyiségü vasat és rezet vásárolt és tervezte magát Róma várost a birodalom gazdasági és politikai központját megrohanni és hatalmába keriteni. De a római arisztokraták pénze és kémjei sem aludtak. Sikerült a délolaszországi kikötők és vizek kalózait megvesztegetni. Spartacusnak nem voltak hajói. A kalózok segitségével át akarta a seregének egy részét Sziciliába vinni, ahol remélte a sziget lakosságát a rabszolgaság ügyének megnyerni. A kalózok azonban cserben hagyták Spartacust. Ez azonban nem adta fel a rabszolgaság ügyét. Crassus római hadvezér seregét kiüzte Lukania tartományból. Itt azonban sikerült a római ügynököknek a germán és kelta rabszolgákat Spartacustól elvonni, mert mint ezek vezérei kijelentették, nem akarnak engedelmeskedni neki mert ő thraciai. Igy a hadserege igen meggyengült. Crassus kihasználta a rabszolgák egyenetlenségét bekeritette a germán és kelta rabszolgahadat és egytől-egyig leöldöste őket.

Az igy megfogyott rabszolgahadat sikerült Crassusnak bekeriteni, Spartacus az utolsó leheletéig harcolt. Azokat a rabszolgákat akik nem estek el a harcban, foglyul ejtették. Mint az egykori történetirók irják, a Capuából Rómába vezető uton hatezer kereszt állott amelynek mindegyikén egy rabszolga volt kifeszitve. A római birodalom italiai tartományában csend lett, a temető csendje.

A Spartacus féle lázadás leverése után nem volt több olyan méretü rabszolga fölkelés. Az uralkodó osztályok ezután még kegyetlenebb szigorral nyomták el a rabszolgák esetleges mozgolódását. Ami ezután következett az a plebejusok és az arisztokraták harca volt a római birodalom politikai irányitásáért. Ezen harcnak a vége a Cézárizmus diktaturája lett. A római arisztokrácia diktaturát választotta a dolgozó nép fölszabaditása helyett. A római birodalom elérte hatalmának csucspontját. Hatalma kiterjedt az akkor ismert világrészek minden országára. De egyidejüleg a rothadás magva is megérett benne. Aránylag rövid idő mulva rohamosan hanyatlott. A császárok közül kevesen haltak meg természetes halállal. A császárok által kitartott gárdák küldték "szeretett" uralkodójukat a másvilágra. Róma rabigába görnyedt, de vele együtt megszünt a rabszolgaság intézménye is.

* * *

Jelen irásommal melynek anyagát "Mommsen Tivadar a római birodalom története" és Most János proletár iró, Társadalmi harcok a régi Rómában" cimü munkákból vettem. Megakartam ismertetni munkástársaimmal és a "Bérmunkás Naptár" olvasókkal azt, hogy amióta magántulajdon létezik, osztályharcok voltak. A patricius sanyargatta a rabszolgát, a nemes lenézte a jobbágyat, a kapitalista kizsákmányolja a bérmunkást. Ez az állapot mindaddig tart, amig a munkásnép fölismerve osztályhelyzetét megvalósitja a szocializmust az osztályok nélküli dolgozó nép társadalmát.

A Magyarországi Általános Munkásszövetség megalakulásának hiteles története

Elmondja Tóth István

A magyarországi munkásmozgalom történetében óriási fordulatot jelent az "Általános Munkás Szövetség" megalakulása, amely dokumentum arra, hogy a munkásság szakitani kiván az eddigi hagyományos felfogásával. Változtatást akar a szervezeti életben olyformán, hogy az elavult szakszervezetek helyett, egy korszerübb szervezetet teremt meg és a "gép" korszakhoz viszonyulva a modern kapitalizmus ellen, szakmakülömbségnélküli egységes "Ipari" szervezett erővel veszi fel a harcot, a kiméletlen gazdasági elnyomatás ellen.

Már a világháboru előtti utolsó éveiben észlelhető volt e megnyilvánulás, amely igen nagy fontossággal bir, a magyarországi munkásmozgalom számára annál is inkább, mert az "egységes" gazdasági szervezet megalakulásáért való törekvések, ezekre az időkre vezethetők vissza. Ezekben az időkben a munkásság között, nagy nyugtalanság és elégedetlenség volt, a szakszervezeti életben. Az érdekelt vezetők sejtették is, hogy valami belső eltolódás készül, valami uj gazdasági szervezkedés, amely uj perspektivát fog nyitni a munkásság számára, ami csak a világháboru kitörése miatt, nem következett be.

A szakszervezetekben már az akkori időkben is elég ok volt a nyugtalanságra, amely okok még ma is megvannak sőt fokozódtak. Az átalakulási törekvések ma sem szüntek meg és mind addig nem is fognak megszünni, mig a háboruk által szünetelt orientálódás teljes befejezést nem fog nyerni, ami a szakszervezetek teljes bukását fogja jelenteni. Ezekben az időkben volt egy lelkesedő kis csoport, amely propagandát kezdett egy uj szervezet létesitése érdekében, mert történelmi szükségszerüségnek látta azt, hogy a meglévő szakszervezeteket egy szakmakülömbségnélküli gazdasági szervezet váltsa fel.

Magyarországon 1911-től, 1914-ig, a világháboru kitörése előtt született meg az a gondolat, hogy egy korszerübb gazdasági szervezetet létesitünk és ennek a propagálására lapot fogunk kiadni. a szervezetnek telesen ujjszerünek kell lenni és semmi esetre sem lehet szakszervezet. Ekkor vetődött fel a szakmakülömbségnélküli szervezkedés gondolata, amely gondolat mellett szivósan kitartott az a kis csoport és az "Ipari" szervezet megvalósitását határozta el, amit akkoriban a szakszervezeteknél "Szindikalista" törekvéseknek neveztek el.

A csoport vegyes társaságból állott és hetenként kétszer jöttünk össze. Szabó Ervin, aki egy összejövetelkor felszóllalásában világosan kifejtette, hogy a munkásmozgalomban történelmi átalakulásnak kell bekövetkezni melyet az ipari fejlődés és a gazdasági változások fognak elő idézni. A csoport a Rózsa utca és a Jósika utca sarkon lévő vendéglő külön termében tartotta összejöveteleit és mint szabad szervezet müködött. A csoportban ismertem több munkástársat, többek között a következőket: Szabó Ervin, Répánszki J., Csikós F., Bőhm H., Ferencz F., Takács J., Guttmann A., Bellért J. Iszkuljev, Krausz, Mosolygó, Hargitai, Bitteva, Goldesz, Bizdevi, Botka stb. stb. A szervezet megvalósitását és a lap kiadását azonban az 1914-ben a világháboru kitörése megakadályozta. A csoportnak minden tagja bevonult katonának, akik a hosszu háboruk és forradalmak alatt teljesen széjelszóródtak. A fentnevezett munkástársak egyrészével a háboruk és forradalmak lezajlása után találkoztam, akik teljesen elvoltak fásulva mint akik reményüket veszitették örökre. Egyrészük jómagam is, visszamentünk a Szociáldemokrata párthoz és a szakszervezetekbe, egyesek pedig szétszórva kitudja hol talán még most is várják a jobb idők kialakulását.

A háboruk és forradalmak után, a történelem legvéresebb és legsötétebb napjainak lezárása után, az "Ipari" szervezet megvalósitását néhány munkástárssal ismét megfontolás tárgyává tettük. Visszatérve az előbbeni tervekhez melyet a munkástársakkal ismertettem amit nagyban helyeseltek. A munkásság a kezdeményezést mindenhol rokonszenvel fogadta, a szakszervezetekben azonban, ahol értesülve a dolgokról nyugtalanságot idézett elő ez a megmozdulás és ellenünk meginditották a hajszát.

Ezekben az időkben még tagja voltam a szakszervezetnek, az agitációt azonban ahogy megkezdettem kiméletlen támadásoknak voltam kitéve. Levonva tehát ennek tanulságait és elhatároztam, hogy az uj szervezet éppen ugy mint ahogy ezt a háboru előtt is akartuk, csak a szakszervezeteken kivül valósulhat meg, mint szakmakülömbségnélküli "Egységes" gazdasági szervezet. Ez volt 1921 és 1923 között ezekben a sulyos időkben, amidőn ebbeni törekvésemet intenzivebb erővel kezdettem meg és elsősorban is Fekecs Sándor munkástársat kerestem fel, hogy szándékaimat ismertessem. Fekecs munkástárs teljesen magáévá tette ebbeni törekvéseimet és a megbeszéléseink után együtt, fáradtságot nem ismerve hozzá fogtunk a "Szövetség" megalakitásához. Az agitációnk később visszhangra talált a többi szakmai munkásság között is amely a megalakulást csak siettette. Azok a munkástársak, akik általunk felismerték az "Egységes" szervezkedés fontosságát bizalmatlanságot tanusitottak a szakszervezetekkel szemben és segitő társaink lettek. A propaganda irányitást én és Fekecs munkástárs végeztük, Garai Miklós, aki azóta elhalt szintén nagyban segitkezett, ugy, hogy számithattunk a legnagyobb sikerre.

A szaktanács és a szakszervezetek érdekelt vezetősége sem maradtak azonban tétlenül. Engemet és Fekecs munkástársat kizártak a szakszervezetből és többeket választott biróság elé akartak állitani, hogy a munkásságot megfélemlitsék. Ezekben az időkben párhizamosan a politikai irányban is kiterjedt az uj orientációs mozgalom igy a szociáldemokrata párt és a szakszervezetek igen agresziván léptek fel azokkal szemben, akik szükségesnek látták azt, hogy a viszonyokhoz képest kell a meglévő gazdasági szervezeteket át csoportositani. A kizárásokat tehát, a legnagyobb erővel fojtatták, ugy a politikai mint a gazdasági szervezetekben. Azok a munkástársak, akik nem tudták elnézni a szaktanács és a szociáldemokrata pártnak ezt az aljas munkáját, ezrével és ezrével hagyták ott a szakszervezeteket ami részünkre igen kedvező alkalmat nyujtott, hogy a szövetséget megalapitsuk. Igy jutottunk el odáig, hogy a munkástársak is belátták azt, hogy az egységes szervezetet a szakszervezeteken kivül lehet megvalósitani, nem pedig a szakszervezeteken belül.

A földmunkásoktól Ignat Tivadar munkástárs több társával együtt csatlakozott hozzánk, azonkivül különböző szakmabeli munkástársak támogattak bennünket, hogy a szövetséget minél előbb megvalósithassuk. Az alakuló gyülést 1924 március hóban tartottuk meg, Rózsa utca 34. szám alatt a Lévai-féle vendéglő külön helyiségében. Az alakuló gyülés simán folyt le, a a szövetség a "Magyarországi Általános Munkás Szövetség" nevet kapta az én előterjesztésemre melynek alapszabályát az alakulás után, nyomban fel is terjesztettük a belügyminisztériumhoz jóváhagyás végett. Ez az első kisérletünk azonban nem valósult meg, mert az alapszabály jóváhagyását valakinek sikerült megakadályozni, egy meghasonlott személyen keresztül és igy az első alapszabályt jóváhagyás nélkül visszakaptuk.

Ezek után a propagandát hatványozottabb erővel fojtattuk. Közben a szakszervezeteknél teljesen kiéleződött a helyzet és azokat a munkástársakat akikkel a munkásság összpontositásán fáradoztunk mindenhol iparkodtak lehetetlenné tenni, amely csak fokozta az elhatározásunkat. Rövid idő mulva a megbizhatatlan személyek kihagyásával uj csoportositást kezdeményeztünk, hogy a “Szövetség” alapszabályát ismét felterjeszthessük. Érintkezésbe léptünk különböző szakmabeli munkástársakkal, ugy, hogy ismét abban a helyzetbe kerültünk, hogy a “Szövetség” alapszabályát ismét felterjeszthettük.

Az épitő munkások közül érintkezésbe léptem Berke József munkástárssal aki készséggel segitségünkre volt. Azután Zigler Tamás munkástárs több társával csatlakozott hozzánk és együttesen fogtunk hozzá az aktiv munkához, hogy minél előbb összehivhassuk az uj alakuló közgyülést. Később a cipész munkások részéről Holové János, Ispánki J. és többed magával szintén megértették a dolgot és ugy az épitő munkások mint a cipész munkások segitségünkre voltak a többi szakmabeli és más munkástársakkal együtt. Erre az alakulásra teljesen uj alapszabályt dolgoztam ki, amit nyomtatott füzetekben is megjelentettünk, melynek első oldalán, hogy a propagandát ezzel is megkönnyitsük, közöltem egy rövid felhivást. Az uj alakuló gyülést a régi képviselőház nagytermében tartottuk meg. 1926 május 9-én, melynek az előadója én voltam. A gyülésre 1000 darab meghivót készitettünk amit csak a legismertebb munkástársak között osztottunk ki. Erre az óvatosságra szükség volt, mert a “Szocialista Munkáspárt” által kiadott “Szocialistamunkás” cimü időszaki lap 1926 május 1-én, megjelent számában támadást intézett az alakulóban lévő “Magyarországi Általános Munkás Szövetség” ellen, hogy az által az alakuló gyülést megakadályozza.

Ez a párt az ugynevezett “Vági” párt volt és mi jól tudtuk, hogy ennek a támadásnak ki a mozgatója. Ez bennünket nem hátráltatott meg és a támadást egy “Nyilt Levél” kiadásával vertük vissza. Az alakuló gyülésen az egybegyültek az alapszabályt egyhangulag elfogadták amit az ideiglenes vezetőség a belügyminisztérimhoz felterjesztett jóváhagyás véget. Az ellenünk intézett intrikák lassan elmaradtak, de az alapszabály igen soká nyert jóváhagyást. Végre majdnem két évre rá, 1927 november hó végén visszakaptuk az alapszabályt jóváhagyva, cim változtatással és bizonyos módositásokkal kiegészitve. A cim változás ugy történt, hogy a “Magyarországi Általános Munkás Szövetség” helyett “Magyar Általános Munkás Szövetség” cimre módositották a minisztériumban.

Az alapszabály jóváhagyása után azonnal érintkezésbe léptem Bartha Lajos munkástársal az amerikai Ipari szervezet külföldi levelezőjével és kértem, hogy az amerikai munkásság legyen a segitségünkre, amit a munkástárs legnagyobb készséggel magáévá is tett. Később Kozsán munkástárs, aki szintén minden igyekezetével elősegitete Szövetségünk fejlődését. Egy bizonyos idő után ezek a kölcsönös kapcsolatok megszakadtak, azóta a Szövetségünk igen nagy viszontagságon ment keresztül, mégis az vigasztal bennünket, hogy bármi is történik a közel jövőben annyi bizonyos, hogy az egész világon az “Ipari” szervezeté a jövő.

Az “Általános Munkás Szövetség” megvalósitásáért való törekvésem ezzel befejezést nyert. Akik ezekben a sulyos időkben segitségemre voltak, hogy a “Szövetség” megvalósuljon óriási szolgálatot tettek a magyarországi munkásmozgalom története számára.

A munkásságnak történelmi hivatása a bérrendszer eltörlése. Nem nézve tehát azt, hogy ki milyen szerszámmal dolgozik, hanem szakmanélküliségnélkül, egy hatalmas “Ipari” Szövetségben a helye, mert csak igy tudja megvivni osztály harcát, hogy elérhesse végső célját, a saját felszabadulását.

Fel tehát a küzdelemre. “Világ munkásai” egyesüljetek.

SZILÁNKOK

Faragja: Sebestyén Pál

A KÖVETKEZŐ elbeszélést ugy adom le, a hogy hozzám jött B. S.-től. Anyaga érintetlen; nyelvezete kissé kisimitva. Mig szerzőjének, esetleg az olvasónak próbálok szolgálatot tenni közlésével, felmentve érzem magam a "Bérmunkás"-ban megjelenő "Szilánkok"-hoz hasonló anyaggyüjtés és feldolgozástól, melyet a Naptár részére megigértem. Ugy vélve, hogy az itt elmondandóknál jobbat, tanulságosabbat aliha tudtam volna találni.

KINT A JÉGEN.

Hosszukás arcu, kiálló pofacsontokkal, bozontos szemöldök alól sandán néző kis patkányszemek, Napoleonra emlékeztető jókora orr alatt hiányos fogsorokat takaró nyilás, mértelen, majdnem szánalmasan lecsüngő szájszél, nyakszirthez siető ajak, szóval olyasmi, mely sok kivánni valót hagy a természet koronájának alsó alkotmánya befejezéseül.

Nem is láttam volna mindezeket meg mintahogy nem szokásom az embert külső anatómiója alapján elbirálni. Elvégre az alak, a külső forma sok ezeroldalu körülmények, átöröklés, mindennapi élésmód, klima és a jó ég tudja, mi minden szülötte és müve. Köztünk, munkások között különösen ujságszámba megy az, ha telt arc, kifejlett izmok, testalkat birói is vannak. Lévén osztályrészünk az élet mostohaságának legmostohábbsága.

Mondom: az élet kegyetlensége szántotta vonalak megtépázott külsőség lidércnyomását a később leirt irónikus helyzet nyomta rám. Nem tudok tőle szabadulni: hosszu idők utáni viszontlátás a keserü kiábrándulás. . .

Váratlanul, minden előkészültség nélkül bukkantam rá egykori játszótársamra, valamikori bajtársomra: Keserü Jánosra.

* * *

Együtt szőttük gyerekes álmainkat, együtt kerültünk a zajló élet — visszásságok elleni lázadók mozgalmába; együtt szerveztük meg az első Ifju Munkások egyletét, együtt szenvedtünk a kezdeményezésünkért s együtt indultunk az óhazai szakszervezetek és Párt által kijelölt göröngyös utakon, hogy aztán az idők haladásával két külömböző világrészben, két külömböző világnézettel megéretten, a középkort meghaladó ötven felé közeledő évszámokkal terhelve lássuk viszont egymást. Csoda-e ha megláttam tetőtől talpig, különösen azt a részét, amit költői nyelven a lélek tükrének neveznek.

Hogy én hova fejlődtem, az mellékes vagy mondjuk: szóra sem érdemes, mert ha volt valaki ezen a kerek világon aki észrevett, az többnyire magam voltam. Forradalmakban, csatározásokban nem vettem részt; itt-ott egyegy elejtett szóval talán ugy néha-néha juttattam másoknak is az énemet tüzelő ideákból, talán egy-két sor, melyet nagy akarással megirtam, hagyott is nyomot az olvasó gondolatvilágában, mindez azonban nem helyezett a tömegek élére s ami ebből érthető a felelősség ami ebből származott, nem sok, ezért járom életutamat az átlagember szürke ösvényén, amely ha nem is ad diadalrózsákat, de ápolja a nyugodt lelki folyamatot.

Nem igy keserü barátommal:

Ő a magasságokban szárnyalt. Napokatélt át, mely minden a fejlődés taktusát sürgetőt megbocsátható irigységgel tölt el. Ott volt az intenziv agitációnál, a barikádoknál vivta harcait ifju álmunk ideáljaiért, szóval a forradalmár teljes életét élte. Ott volt, — na de ha ezt én mondom el, az nem adhatja tükrét egy kiforrt forradalmár életének oly hüen, mintha azt ő maga mondja el. Be kell vallanom magam igazolására, hogy az imént emlitett megokolt irigység rajtam is erőt vett, igy kellettlenül és duzzogva bár, de kész vagyok a szót átengedni.

KESERÜ JÁNOS BESZÉL.

"Ezelőtt huszonkét évvel szerveztem meg az első antimilitarista mozgalmat, irtam meg az első antimilitarista röpiratot. Huszonegy évvel ezelőtt ismét irtam egyet, melyért és a "Társadalmi Forradalom"-ban megjelent irásaimért királysértés, lázitás és izgatással vádolva álltam a biróság előtt, hol három évi államfogház büntetést szabtak ki rám, melyből a váci fogházban huszonhét hónapot ültem le."

Nem akartam Keserü barátomat zavarni közbeszólásaimmal, még kevésbé kérdezősködésekkel, Csak figyeltem és emlékeztem. Vörösödő fülek, valami kimondhatatlan fény kezdett jelentkezni amugy bágyadt szemében; hajlott háta a lehetőséghez mérten kezdett kiegyenesedni, az átszellemülés jeleit éreztetvén suta gesztusaival. S én ezalatt emlékeztem.

Végig futott szemeim előtt a magyarországi szakszervezeti és pártélet hagyományosan korrupt világa, hol a királysértés, lázitás és izgatást időközökben hideg számitással helyezték el lapjaikban, a röplapokban, amint azt a reklámhajhászásban megnyilvánuló politika megkivánta. Rokonok és barátok névlistája várt a szerzői felelősség vállalására. Igy épitették Bokányi, Pelcéder, Veltner, Frankl Jakab s magát Csizmadia Sándornak is karrierjét. A magasabb hivatalok százpercentes martiromságának előföltételei voltak ezek. Egy-két évi váci fogház nélkül reménytelen volt a pályázat. Igy a mozgalomban való előrejutás valamilyen személyes szolgálat, vagy rokoni köteléken alapult. Ezt csupán tévedés elkerülése végett szurom ide.

"A csepeli tölténygyár főbizalmija voltam 1911-től 14-ig, későbben ugyane kerület párttitkára és képviselőjelöltje." Ez utóbbi kijelentését a megszokot parlamentáris gesztus kisérte. Hm. hm. node csak hagyjuk. Most jön a java.

"A Károlyi forradalom ideje alatt tagja voltam a forradalmi katonatanácsnak és vezetője voltam a budapesti ezredeknek." Nini: a stratégikus! ki hitte volna.

"A Népbiztosok Tanácsa rám bizta egy teljes hadosztály szervezését a diktatura kitörésekor. Megbizatásomnak eleget téve bácskai és alföldi magyar fiukból rövid idő alatt megis szerveztem négy gyalogezredet és két tüzérezredet, kiknek hősies harca a bukás utáni időkbe nyulott." Stratégiai géniusz barátom bizonyára elfelejtette a lefujást.

"Majd Bécsben telepedtem le, hol a "Kommunisták Magyarországi Pártja" és a "Balkáni Federáció" vezetőjeként müködtem, majd a "Magyar Párt" titkárává neveztek ki engem s Ludas Jenőt.

"Az Internacionale megnagyobbitott Végrehajtó Bizottságának gyülésére engem küldtek Moszkvába 1922-ben. Ott felismerve szervező képességem és jó hirnevemet az "Internationale Politikai Bizottsága" engem ajánlott Ruthenberg figyelmébe, mint aki alapos felkészültséggel birok az "Amerikai Párt" kitatarozására. Szóval az "Amerikai Párt" költségén ide kerültem 1923 elején." (Faképnél hagyva a bécsi "Magyar Párt"-ot, a Federációt, stb.)

"Amint látod, huszonhét évig voltam a munkásmozgalomban mindig mint vezér. Ezen idő alatt jól megismertem a börtönviszonyokat: Svájc, Jugoszlávia, Ausztria és Németországban — mozgalommal kapcsolatban."

Mégegyszer szemügyre vettem Keserü barátomat. Ez utóbbi szárnyat adott képzeletemnek.

"Huszonhét év alatt csak három évig huztam fizetést a mozgalomból." (Majdnem kiböktem "hát honnan a többit?")

A "LEHETŐSÉGEK HAZÁJA."

"Tragikusan győződtem meg a szemenszedett alakokból álló vezérkar áttekintésénél a fennti megállapitás igazáról. Mindazonáltal egy évig titkárja voltam a Kommunisták Magyar Szövetségének. A tatarozási szándék azonban hajótörést szenvedett a burzsoa párttagok és a párt bürokrácia egységfrontján."

Igy huszonhét éves multu viharedzett vezér a "lehetőségek hazájának" lehetetlen problémáival birkózva egyszerre lecsuszott magas piadesztáljáról, külső alakja is szinte összeroskadva állt előttem folytatva mind keservesebbre hajló litániáját, belekeverve a magyar kommunisták szócsövét, az "Uj Előré"-t, szerksztőit, a "taknyos zsidó kölyköket," a Munkás Betegsegélyzőket, a Verhovayit, Bebricset, Neményit, mindazt a helyet és csoportokat, kik között és ahol óhazai vezérségével járó felkészültsége fiaskóval végződött. Sehol, egyetlen szavából nem éreztem ki a dolgozó munkás bajaival való törődését csak olyan mértékben, ahogy az utóbbi kihasználása mértékadó volna a vezetések, a vezérségek megalapozásánál. Mint ilyen állt előttem egykori ifju munkás bajtársam hosszukás arccal, kiálló pofacsontokkal, bozontos szemöldök alól sandán néző patkányszemekkel, ki elbeszéléséből itélve soha nem alvadt bele a feltörekvők lelkivilágába, ki a munkásmozgalomnak mindig csak az élénél volt vagy akart lenni, ezerféle furfanggal élvezni annak dicsőségét vagy anyagi javait. Most igy megtörve, minden áthaladt hidat maga után felégetve ődöng kint a jégen.

Tanulság: az álpróféták büntetése a sanyaru számkivetés, melyet az illető mindig, minden esetben saját kezével készit elő.

SANYI ÉS MARCSA.

Sokszor halljuk ezt a szót előadóktól, sokszor találjuk irodalmi müvekben, tudományos értekezésekben, sőt mindennapi nyelven, társalgásban is használják. Ezuttal nem terjeszkedünk ki a szó jelentőségére technikai, orvostudomány, vagy más specializált ágak meghatározásaira, mindegyiket különvéve rengeteg anyagot ölelne fel és annyi helyet igényelne, amennyit ezen szerény kis rovat nem birna el. Kezdjük tehát és megis maradunk a hozzánk oly közel eső, általunk oly jól ismert munkásnál, az átlag munkásnál. S hogy még ezt is könnyebben kezelhessük, a forma kedvéért Sanyinak hivjuk. És nem fogunk elmenni Sanyinak bölcsőjéig vagy serdülő ifju koráig, megelégszünk azzal, hogy nyakon csipjük 24 éves korában.

SANYI MEGNŐSÜLT.

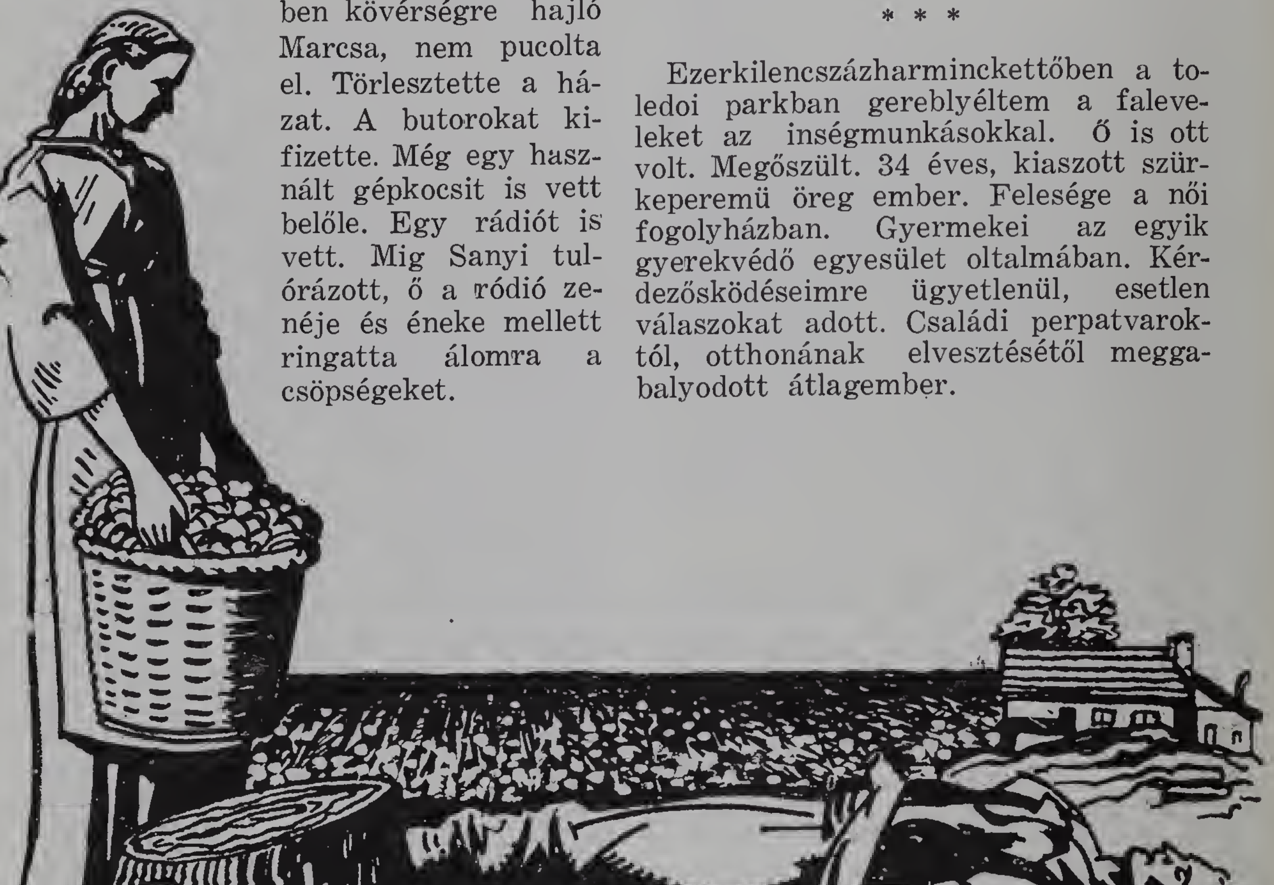
Huszonnegyedik évét töltötte be 1922-ben. Külseje amolyan hétköznapi emberé volt. Rendes. Sem testalkata, sem öltözködése nem volt feltünő. Észjárása, munkástársaihoz való alkalmazkodása sablonos. Templomba elment néha, de nem volt hü egyháztag. Ha barátjai egy-egy "good time"-ot rendeztek, ott volt és eliszogatott, de nem ment tulzásba. Sablonos neveltetése iskolája volt jövő életének.

Néhány száz dollárt takaritott meg otthon alapitásra. Marcsával együtt még egybekelésük előtt kiszemelték a szépen felszabdalt kültelken fekvő diszfákkal, virágokkal szegélyezett kert közepén szerényen meghuzódó ötszobás házikót. Lefizetésre beszerezték lakásberendezésüket; lefizetésre megvették a házat s a törvény követelményeinek megfelelően aláirták a házassági szerződést, a ház és butor adósleveleit. Sanyinak volt munkája; dolgozott. Marcsa, ki csak rövid idő előtt hagyta el a felsőiskolát, nyakába vette a várost, rövidesen elhelyezkedett egy szövőgyárban. Vállukat összevetve, szabad óráikban szeretkezve kezdték meg a kilenc ezer dollárhoz közeleső adóssággal való birkózást. Frissen. Üdén. Sanyi már betört; Marcsa az iskolában belecsöpögtetett baksiremény, baksi lelkesedés tüzével. Teltek a hetek, hónapok. Marcsa üde arcáról egyenkint tüntek el a vonalak, melyek oly gyönyörüen összeolvadva diszitették lányos ajkait. Aztán uj életmódjának velejárója: az anyaság jelentkezett.

Marcsa boldog volt. Sanyi is. Ezután még szorgalmasabb, még odaadóbb volt Marcsához, a kis otthonhoz s főleg munkaadó gazdájához. Utóbbi már azért is szükségszerü volt, mert a kis jövevény bezárta Marcsa előtt a szövőgyár kapuit.

Ha agitátorok jelentek meg a gyár előtt vagy az utcasarkán, bolondok paradicsomának nevezvén a fejetlen termelési és szétosztási folyamatot, támáskodva hallgatta őket. Mint a többiek: némán távozott.

Közben jött a második, harmadik, negyedik és az ötödik gyerek. Bolondul ment a munka. Sanyi figyelemmel kisérte az előmunkás születésnapját s ezen figyelmességéért tulórázás járt ki. 50—60 dolláros hetifizetését boldogan szorongatá a közben kövérségre hajló Marcsa, nem pucolta el. Törlesztette a házat. A butorokat kifizette. Még egy használt gépkocsit is vett belőle. Egy rádiót is vett. Mig Sanyi tulórázott, ő a ródió zenéje és éneke mellett ringatta álomra a csöpségeket.



Sanyi fáradtan, ványodtan nyomta apai csókjait a kis alvók homlokára. Még aludtak a kicsikék, mikor már ő ismét ment. Mindennap. Vasárnap is. Növő fizetésénél gyorsabb ütemben nőttek elkerülhetetlen kiadásai. Mig egyszer 1929 decemberében minden megállt. A tulórázás a rendes napi munkával együtt.

* * *

Évekig dolgoztam vele együtt. Megszoktam. Jó fiu volt. Józan. Kicsikét bátortalan. Különösen a feljebbvalókkal szemben. Fájt az elbocsátása. Soha nem felejtem szivfacsaró, lelketrázó kétségbeeső tekintetét. Mintha utólszor bucsuztunk volna el. Nem hiszem, hogy volt életének jelentősebb eseménye ezideig.

* * *

Ezerkilencszázharminckettőben a toledoi parkban gereblyéltem a faleveleket az inségmunkásokkal. Ő is ott volt. Megőszült. 34 éves, kiaszott szürkeperemü öreg ember. Felesége a női fogolyházban. Gyermekei az egyik gyerekvédő egyesület oltalmában. Kérdezősködéseimre ügyetlenül, esetlen válaszokat adott. Családi perpatvaroktól, otthonának elvesztésétől meggabalyodott átlagember.

Naptárunktól Naptárunkig

A clevelandi szervezési munkálatokról

Irta: Lefkovits Lajos

NAPTÁRUNK, amelynek hivatása a munkások kezébe egy ismeretterjesztő és nevelő könyvet juttatni ugyszólván annak előállitási árában, nem lenne teljes a cél szolgálatában, ha a mult évi naptárunk megjelenésétől ez évi naptárunk nyomtatásáig az IWW-nak Clevelandon való zászlóbontása és terjeszkedésének külön fejezetet nem adnánk.

Ha az emberiség történelmét a szerszámok és termelési eszközök korszakokra osztották, állitjuk, hogy az IWW clevelandi szervezési munkálatai és eddigi eredményei uj állomáshoz juttatta nem csak az IWW harminc esztendős mozgalmát, de magának az Egyesült Államok bérért dolgozó munkásainak nagy küzdelmét az élet szükségleteinek a megszerzésében.

Amig az amerikai tőke piacot talált a termelt áruk elhelyezésére és a szakszervezetek munkaalkalmakat tudtak biztositani tagjaiknak az IWW szervezési munkálatai nagyobbrészt a "tanulatlan" munkások között mozoghatott, mert az ugynevezett szakmunkások szervezeteikkel egyetemben nem csak mint külön osztályt kezelték a dolgozóknak ezt a nagy tömegét, de sok esetben a munkaadónál is lealázóbb elbánásban részesitették őket a munkatelepeken.

Az IWW harmincesztendős történelme gazdag azokban a harcokban, amelyeket ezeknek a munkásoknak a védelmében megvivott.

Az amerikai tőke, amely a géptermelési rendszerének a bevezetésével hamar felismerte az IWW szerepét és befolyását a termelés jövő munkáskezeire nemkülönben a munkás agyakra, nem fukarkodott az eszközök használatától, amellyekkel a szervezetet megsemmisiteni igyekezett. A háborus őrületet vélte erre a legjobb alkalomnak, hogy a szervezetért agitálókat börtönbe juttassa.

Tagadhatatlan, hogy az aktiv IWW-isták százainak egyidőben való börtönökbe való juttatása, egy időre meggyengitette tevékenységét az IWW-nak, de éppen a clevelandi események mutatják, hogy ahová az IWW nem vihette el a tanitását, ott ezek a birósági tárgyalások "szenzációi" nyitották fel az agyakat az IWW megismerésére.

Mert a clevelandi harcok majdnem valamennyijében találunk munkásembereket, akik még nem voltak tagjai a szervezetnek, nem voltak hiveik a politikai pártoknak sem és amikor az IWW szónokát szemtől-szembe látták és hallották, az előbbeni ismeretük révén magyarázói és hirdetői lettek maguk is az Egy Nagy Szervezet eszmélyének.

A tizhónapos szervezési munkálatokban egyik felismerésünk az, hogy az IWW harminc esztendős tanitása nem a pusztába veszett szó és a megnem értett irodalom elfecserlése volt, mert a dolgozók ezreiben él az ipari unionizmus eszmélye és mint a clevelandi események igazolják, adott alkalommal azért harcolni is tudnak.

A városi szervező bizottság, amelynek gerincét a magyar munkások képezték, mert hiszen ők rendelkeztek hosszu esztendőkön keresztül ugy a szervezeti élettel, mint állandó helyiségekkel, még a tél folyamán kezdte meg a gyáraknál való agitációt. Az általános gazdasági helyzettel, a munkások kereseti viszonyával foglalkozó röpiratok tizezrei kerültek a gyárakból kijövő munkások kezeibe. Az ezen uton megszerzett cimek ezreit keresték fel a lakásukon és bővebb ismereteket adtak az IWW törekvése és szervezetéről.

Közel öt hónapig tartott az agitálásnak ez a módja, amikor április elején az **Ohio Foundry zománcozó osztályának** munkásai keresték fel az IWW Metal and Machinery Workers Industrial Union No. 440 szervező bizottságát, kérve a gyárban uralkodó rossz viszonyok elleni harcukban a segitséget. Ugy a szervező bizottság, mint az IWW valamennyi clevelandi tagjai összefogtak, hogy ez a munkás megmozdulás sikeres legyen.

Ebben a gyárban az öntő munkások néhány hónapja az AFofL kötelékébe léptek, bár az unio még nem tett semmit a munkások helyzetének a megjavitása érdekében, ragaszkodtak az uniohoz és a telep többségi munkásának harcát nem voltak hajlandók szolidaritásukkal támogatni. A sztrájkolók megalkották az erős picket vonalat, amelyet napi 24 órákon át tartottak fenn és annyira megértették és gyakorlatban alakalmazták az összetartást, hogy tiz napi harc után meg nem félemlitve sem a gyáros, sem az AFofL által GYŐZELMESEN VEHETTÉK FEL A MUNKÁT megjavitott fizetéssel, a darabszám munka eltörlésével és a hajcsár rendszer kiküszöbölésével.

Ebben az időben bontakozott ki országszerte a kék sasos kormány akció, amely tudvalevően alátámasztéka lett a döglőfélben levő szakszervezeti mozgalomnak, amely országszerte egymás után veszitette el minden megmozdulását. Igy az Ohio Foundry munkásainak győzelme az IWW vezetésével annál nagyobb beszéd tárgya lett az egész városban.

Ennek a győztes harcnak a hirére május első hetében az **Accurate Parts Manufacturers Co.** 60 munkása kereste a kapcsolatot az IWW szervezetével és 36 órás munkabeszüntetéssel a gyár vezetősége által is ELISMERTETTE a Metal and Machinery Workers Industrial Union No. 440-t, mint a munkások szervezetét. A munkások összetartása fokozatosan lehetővé tette itt is a munkabérek megjavitását.

Május 12-én, a **Draper Manufacturers Co.** 140 munkása a gyár vezetősége által meghonositani akart kompany union helyébe 9 órai munkabeszüntetéssel az IWW szervezetét vitte be 10 százalékos béremeléssel.

Ezek az egymás után követett megmozdulások és azoknak sikeres befejezésükre nem csak Cleveland dolgozói figyeltek fel, de az ország minden részében az IWW-t épitő munkástársak Clevelandba igyekeztek és csakhamar több mint egy tucat szervező volt itt, akik mint méhrajok támadtak a gyáraknak, hogy a bemenő és kijövő munkások előtt ismertessék az IWW-t és a munkásokat a szervezkedésnek megnyerjék.

Ezeknek a szervezőknek a tanitásai révén több gyár munkásaival kerültünk összeköttetésbe akik tömegesen veszik ki az IWW vörös kártyáját.

Május 24-én, a **Permold Co. zománcozó munkásai** a szervezettségük erejével nyujtanak be a gyár vezetőségéhez 10 százalékos bérjavitást, mely követelésüket meg is nyerik.

Május 26-án, a **Draper gyár munkásai** bizva szervezettségük erejében öt centes órabér javitást követelnek, amit a gyár vezetősége teljesit.

Az emberi gyarlóság és tudatlansággal magyarázható csak meg, hogy ott, ahol rövid idő alatt a munkások a szervezethez való csatlakozásukkal kétszeri béremeléshez jutottak, ahol a munka menetében a munkások javára nagy előnyöket nyertek, akadtak emberek, munkások, akik a szervezetet hátba akarták támadni és az IWW szervezete helyet a kompany uniot akarták a gyárba behozni. Ez történt a Draper hordógyárnál és ezt az akarást az IWW-t megismert munkások nagyrésze csak ugy tudták megakadályozni, hogy ismét sztrájkot mondtak ki és junius elején ujból leállitották a munkát és a telepet picket alá vették.

Ennek a harcnak a részleteiről nem kell, hogy itt megemlékezzünk mert hiszen hétről-hétre beszámoltunk arról a Bérmunkásban. Tudjuk, hogy annak szálai elnyultak Clevelandon kivülre is, amikor a sztrájk bizottság megtudta, hogy a Draper munkákat más városban készitik. Még az éjjel az autók sorai hatvan sztrájkoló munkást vittek az illető gyár elé, akik meggyőzték a gyárban dolgozókat, hogy munkástársaik ellen cselekszenek és akik igéretet is adtak, hogy a Draper hordókon a munkát beszüntetik.

A Draper harc mellett junius 23-án, az **American Stove Company** telepeivel lép összeköttetésbe a szervező bizottság. A munkások nagy számban csatlakoznak az ipari szervezethez és a bátrabbak végzik a szervezés munkáját a gyár falain belül. Két ilyen, a szervezetért agitáló munkást a gyár lefizet, mire a Company két telepén a **New Process** és a **Reliable** munka helyeken a munkások beszüntetik a munkát és 24 órás szolidaritás sztrájk után a gyárvezetősége vissza állitja az elbocsátott két munkást a munkába.

Ezen sikernek a hatása alatt a Company harmadik telepe a **zománcozó munkások** százszázalékik csatlakoznak a szervezethez és a shop committeet elismertetik a gyárvezetőségével is.

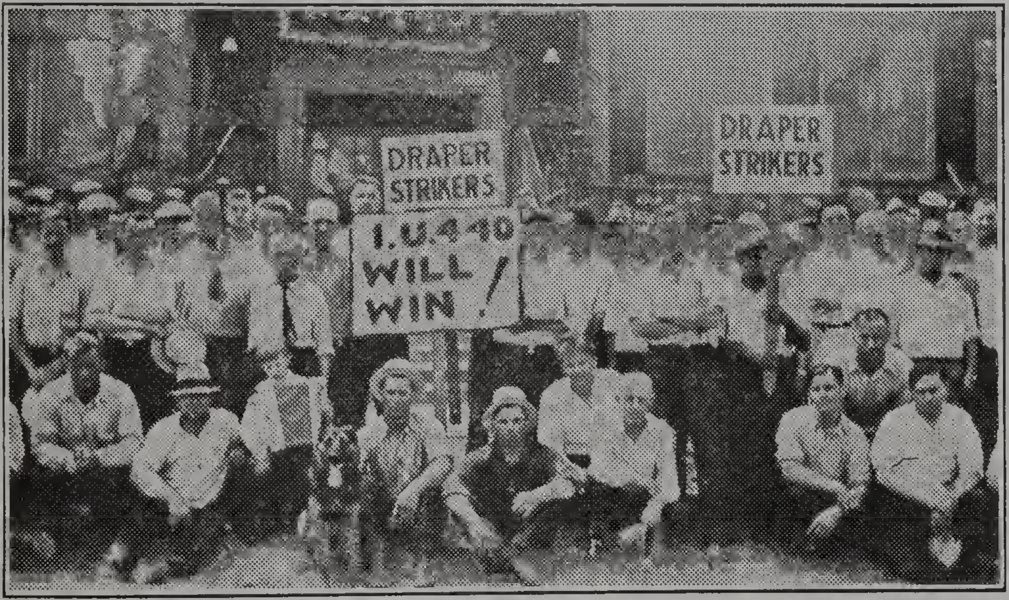
Junius végén az American Stove Company negyedik telepe a **Dangler** is csatlakozik a szervezethez, amiáltal ennek a társulatnak 1200 munkása az IWW vörös kártyájával rendelkezik.

A Metal and Machinery Workers Industrial Union No. 440 szervező bizottsága ujabb és ujabb gyárak előtt tart gyüléseket a déli órákban. Ezek közül a **Virden** lámpa gyár munkásai között nyer a szervezet tagokat. Cleveland egyik számottevő munkatelepe a **National Screw and Manufacturing Co.**, ahol a munkások nagy százalékban magyarok. Ez a munkatelep sem mentes az IWW propagandájától. Több mint fél ezer munkás hordja itt is az IWW vörös kártyáját és csak erősebb munkaalkalmat várnak arra, hogy a munkabérek megjavitásáért harcba mehessenek.

Szeptember 10. Tizennégy hetes harc után a **Draper** hordó gyár munkásai győzelmesen veszik fel a munkát. A gyárat 100%-os IWW shoppá teszik. A munkabéreket megjavitják. A munkások kitartása az AFofL többszöri beavatkozását, a National Labor Board kisérletét, hogy ebbe a sztrájkba befolyjon, mind-mind sikeresen távoltartotta és ma ennek a gyárnak a munkásai nem csak erőssége a clevelandi megmozdulásoknak de a három hónapos sztrájk alatt annyi és olyan ismeretet szereztek az IWW felől, hogy most a gyár több munkása aktivan veszen részt a szervező bizottságnál a más munkatelepek megszervezésében.

Szeptember 20-án, a **Cleveland Wire Spring Co.** munkásai csatlakoznak az IWW-hoz.

Szeptember 30-án, a **Reliable Brass Co.** munkásai is csatlakoznak az IWW-



A Draper gyár sztrájkoló munkásai a gyárelőtti szabad területen hallgatják az IWW előadóit akik erősitik, hogy az összetartásuk megfogja hozni a győzelmet.

hoz és mindjárt harcba is lépnek a munka alkalom rendesebb elosztásáért. Három napos sztrájkkal követelésük teljesitéséhez jutnak és a munkát ujból felveszik.

Október elsején az **American Stove Company** egyik telepén egy előmunkásnő tetlegesen bántalmaz egy segédmunkást. A munkások követelik a magáról megfeledkezett előmunkásnő elbocsátását. A gyárvezetősége ezt megtagadja, mire a Company valamennyi telepének munkásai beszüntetik a munkát.

Az egész város munkás történetében az első eset, hogy 1200 munkás tegye le a szerszámot az "egyen esett sérelem orvoslásáért." Tiz napos harccal a munkások elérték, hogy a brutális munkavezetőnőt a gyár megrendszabályozta.

Október 5. **A Cleveland Wire Spring** 1600 munkása husz százalékos bérjavitásért és százszázalékos szervezett mühelyért sztrájkba lép. A gyár vezetőségének sikerült egy pár gyengébb jellemü munkást az IWW szervezete ellen állitani, akik a picket vonalakon keresztül törve a gyárba bejutnak. A gyár tiltó parancsot eszközöl ki a biróságtól a szervezet ellen. E naptár nyomás alá kerülésekor itt a harc a birói rendelet ellenére folyik, a munkások a gyár valamennyi kapuját picketelik és mivel a mechanikusok százszázalékban a sztrájkolók között vannak a győzelem itt sem lehet kétséges esetleg a harc lesz az eddigieknél is élesebb.

Október 26. **Az American Stove Companynál** a foreman személye elleni harc ugylátszik összehozta az előmunkásokat, akik a maguk sorsát látták meg a munkáról elhelyezett társuk esetében és a gyár valamennyi munkásához levelet intéztek, felszólitva őket, hogy lépjenek ki az IWW szervezetből és alakitsanak kompany uniont.

A munkások e levelek birtokában egy nagy közös gyülést tartottak és ujból kimondották, hogy ők az IWW szervezetével meg vannak elégedve. Ezt a határozatukat elviszik a gyár vezetőségéhez, megtoldva a gyártelepnek zárt, IWW szervezeti mühelyekké való tevése valamint husz százalékos fizetés javitást követelve.

A gyár vezetősége a munkások követelésére egy párnapos halasztást kért, mivel a gyár főirodája St. Louis, Mo.-ban van és az itteni igazgató még az nap utazik St. Louisba e követelések elintézése végett. A munkások hangulatának a megnyugtatására, hogy ők nem akarnak kompany uniont elrendelte, hogy a telepek valamennyi time clockjára függesszék ki, hogy a Company által elismert egyedüli szervezet az Industrial Workers of the World.

* * *

A tiz hónap győzelmes harcainak papirra vetésekor azokról a munkásokról emlékeztünk csak meg, akiknek ezek a szervezett megmozdulások magasabb munkabéreket, könnyebb munkaalkalmakat biztositanak, mert hiszen az IWW elmélete szerint ezeknek a munkásoknak kellett azokat kiharcolni. És a gyakorlat azt mutatja, hogy igy is van ez helyesen, mert ezáltal a munkások nem csak a sztrájkok tartama alatt tartják a szervezet kártyáját, de ahoz ragaszkodik azután is.

* * *

Kell, hogy az IWW clevelandi kibontakozásának az ismertetésével kapcsolatosan egy-egy névvel is megismertessük naptárunk olvasóit, azokkal a munkástársainkkal, akiknek tevékenységéhez füződik a tiz hónap sikerének nagyobb része. Ezek egyike Frank R. Cedervall a Metal and Machinery Workers Industrial Union No. 440 szervezője, aki fáradtságot és időt nem ismerve veszi ki a részét az IWW ipari szervezetének az épitéséből. A szervezési ügyek intézésében órapontossággal van mellette Fred Lundberg mtárs az IWW kis ipari szervezeteinek országos elnöke. A 73 esztendős, de fiatal hévvel naponta 3—4 beszédet tartó Jim Corrigan mtárs és a hosszabb-rövidebb időket itt tartózkodó angol munkástársak, valamint a már ismertetésünk elején emlitett magyar munkások nagy tömege, akiknek az elmult tiz hónapban lakásuk inkább a szervezet helyisége, a gyári gyülések voltak, mint a családjuk köre.

Hogy neveljük a munkásokat

Irta: Carl Keller

a Work People's College gazdasági tanára

A MEGELÉGEDETT bérrabszolgák némán tanuskodnak, a munkások nevelésének szükségessége mellett. Az iránytévesztett cselekvések, minden esetben igazolják, hogy a munkás osztály harcias csoportjainak, a jelenben lefolytatott kenyér és szabadság harcaiban is hiányzik a helyes nevelés.

Midőn állástfoglalunk e helyen, olyan irányitott nevelési mozgalom mellett, melynek karöltve együtt kell haladnia a céltudatos és forradalmi unionizmussal, nincsen szándékunkban értékében alá becsülni és fontosságában kissebbiteni, a nagybecsü tapasztalatokat, melyek a mindennapi küzdelmekből fakadnak. Elismert dolog, hogy amit a munkás a szervezeti gyüléseken és a picket vonalon tanul valódi alapul szolgál osztályismereteinek gyarapodásához. De ugyanakkor nem szabad felejtenünk, hogy a munkásság összessége — mint olyan — sem a multak tapasztalatain nem okul sem a más országok munkásságának tapasztalatait nem gyümölcsözteti olyan mértékben, mint a sajátját. Mert ha ez másként volna, jogosan feltételezhetnénk, hogy a kapitalizmus zsarnoksága, már régóta lehetetlenné kellett volna váljék.

Tény az, hogy egy osztály a szó szoros értelmében, mint osztály sohasem tanulhat. Az egyén igen. És amig az osztály megmarad, az egyén elpusztul anélkül, hogy az osztályharcban szerzett tapasztalatait, vagy azok egy kevés hányadát is átruházta volna, az utókorra.

Az utóbbi kilencven esztendő alatt, mintegy harminc általános sztrájk folyt le világszerte. És az utóbbiakban, a legelsőkben elkövetett hibák egy részének megismétlődését kell látnunk. A széleskörü munkásnevelés hiányának következtében, a jelen generációnak nem adatott meg az alkalom arra, hogy elődeinek tapasztalatából okulhasson.

Seattle városában is volt egy általános sztrájk 1919-ben. Bátran mondhatjuk hogy ha a jelenben egy hasonló sztrájkot vivna e város munkássága, csak alig tizenöt év leforgása alatt, a multban szerzett tapasztalatok annyira elhomályosultak, hogy a jelenre az akkor szerzett gyakorlat vajmi keveset jelentene. A sztrájk hullám, mely ez évben végig seperte az országot, sok olyan harcost ragadott magával, akik a multban számos ilyen küzdelmekben már részt vettek; és amennyiben állandóan fenn tartották kapcsolataikat a munkásmozgalommal, az ilyen öreg harcosok szolgálatai a sztrájkokban, felbecsülhetetlenek. De a legtöbb esetben ők csak az elenyésző kisebbséget alkotják. A mai időkben, a gépek vasfoga, könyörtelenül őrli fel a husból-vérből való embert. Az utóbbi másfél század alatt a ki-kiujuló harcok a munkásság ismételt lázadásai a kizsákmányolás ellen, olyan munkásokat vonultattak harcba, akik előtt az osztályharc nagyobb részben, azelőtt ismeretlen volt, hol a rank and file (össztagság) gyakorlat és tapasztalat hiányában kellett harcba szálljon.

De a multak, valamint a tőlünk távol eső országok munkásásgának tapasztalatai bizonyos tekintetben hozzáférhetők részünkről. Könyvekben, füzetekben és jegyzetekben vannak elraktározva. Ezeknek felkutatása, részekre bontása, a fontosabb részeknek egymás mellé illesztése olyként, hogy az osztályharc valódi képét kitükrözze, a munkás osztály oktatóinak feladata. A fiatal munkás világszerte lefolyt osztályharcok taktikáiból valamelyes tanulságot kell levonjon, melyet jelen harcainkban valamint jövő törekvéseiben gyümölcsöztethet; mert enélkül, a multak hibáit megismétli és sok drága időt pazarol el, hogy ismét felfedezze, amit a nagyapái már tudtak.

A multban használt módszerek és taktikák megismerése mellett sok más dolgot is elsajátithat a munkás tervszerü neveléssel anélkül, hogy lassu és fájdalmas gyakorlati hibákon és botlásokon keresztül kellene felismernie. Az ipari unionizmus előnyös volta a szakszervezeti mozgalommal szemben és a parlamentárizmus számos hibái, épp ugy sőt sokkal gyorsabban megérthetők az elméletek tanulmányozása által, mint a gyakorlatból.

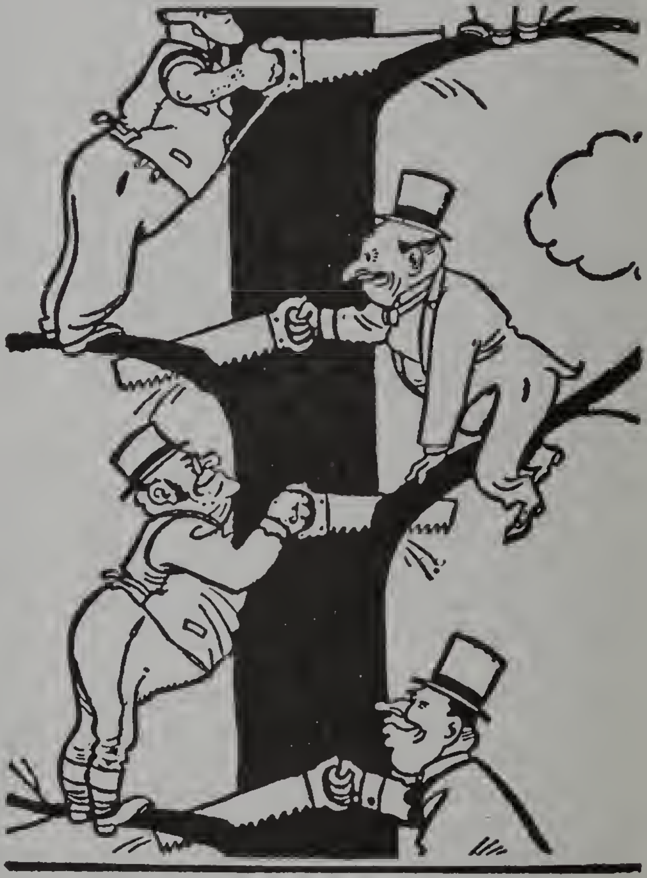
Viszont vannak olyan dolgok is, amelyek csakis tanulás utján sajátithatók el. Mint például az osztályharc alapját képező elviálláspontok, a történelmi materializmus és a kapitalista rendszer összetétele. Nevetséges volna azt állitani, mintha minden munkásnak megismernie kellene a forradalmi mozgalom filozófiáját, hogy harcossá vállhassék; de elvégre egyszer s mindenkorra tisztába kell jönnünk azzal, hogy valódi, alapos tudással felvértezett munkásemberekből a jelen számarányhoz viszonyitva sokkalta többel kell rendelkezzen a munkásosztály, mielőtt győzelem koronázza törekvéseit.

Az emberiség nem ösztönszerüleg épiti társadalmát, mint a méhek és a hangyák. A kapitalista rendszer, a vagyontermelés fölötti irányitás megszerzésének, a kapitalisták céltudatos törekvésének a terméke. A kapitalisták kezéből ez irányitás kicsavarásához, a munkásság részéről is céltudatos törekvést követel meg. A társadalom, nem fog magától az ipari köztársaságba sodródni sőt még vak véletlenségből, az elkeseredett tömegek forradalma sem fogja ebbe az irányba vinni.

Vannak gazdasági hajtóerők, melyek fölött egyetlen osztály sem rendelkezik, melyek ugyszólván napjában változtatják a világot, amelyben élünk. Ezen erőket nem uralják, de irányitják s amint a jelek mutatják, nem a szabadság irányába, hanem fascizmusba terelik az uralkodók. Történjék bármilyen változás az ipari életben és a materiális viszonyokban, mindaddig, amig a munkásság saját szolgaságát jóvá hagyja, amig csak jobban táplált szolgaságot kiván, az uralkodók fognak utat — módot — találni arra, hogy szolga-hajcsár minőségben megmaradjanak.

Több munkást kell osztálytudatra ébresztenünk és még többet történelmi hivatásának teljes és céltudatos megértésére képeznünk. Ehez azonban nem elég, a mindennapi egyszerü aktivitás sőt az egyszerü sztrájkmozgalmak sem. Ezek elkerülhetetlenül szükségesek és fontosak de ki kell pótolnunk alapos nevelő munkával.

Mindez mégsem jelenti azt, mintha a munkásokat vissza kellene küldeni az iskolai padokba, hogy ott megszerezzék a gazdasági és társadalmi kiképzést. Mert ha mi versenyezni akarnánk ilyen alapon azokkal az intézményekkel, melyeket a kapitalisták fenn



Önmaga alatt vágja a fát a telhetetlen tőke.

tartanak és támogatnak, a munkások félre nevelésére, nevetségessé válnánk. Amit mégis lehet és csinálnunk kell: hatványozottabb mértékben folytatni azt munkát amit az Industrial Workers of the World megalakulásával megkezdtünk. Röplapokat, füzeteket, könyveket kell adni a munkások kezébe, elhelyezni otthonaikban. Alkalomadtán, alakitsunk át, minden szervezeti helységet iskolákká és minden beszédünkben arra törekedjünk, hogy elhangzott szavainkban ne csak a szervezkedésről hanem a forradalmi szervezkedésről is beszéljünk.

Emellett szükség van munkás iskolákra és rendszeresen vezetett tanfolyamokra is. De a munkásmozgalom ezirányu törekvése, hogy ugy mondjuk, még csak a gyermek cipőjében van. Az IWW-nak van egy ilyen iskolája, a Work Peoples' College Dulluth, Minnesota-ban és egy néhány van ezen kivül is — más szervezetek fenntartásában. Mindezen intézményeknek megvannak az előnyösségei s ami a támogatást illeti, hiányosságai is.

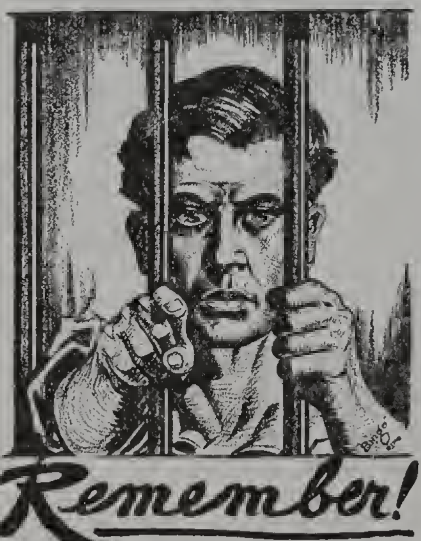
A Work Peoples' College-ról annyit mondhatunk, hogy mint pionér intézmény, nagyszerü multra tekinthet vissza. Tizennyolc éven keresztül az Ipari Unionizmus szolgálatában állott, amint azt az IWW hirdeti. Jó és rossz időkben egyaránt, évről-évre teljesitette feladatát és bocsájtotta utjukra, ki az életbe, a férfiakat és nőket, telitve friss lelkesedéssel, bátorsággal, tudással, hogy ki-ki a maga helyét, az osztályharc frontján elfoglalja. Kezdetben, a munkásmozgalom Finn nyelvü részének végezte a szolgálatot, miután a finnek alapitották és tartották fent. De az utóbbi években, az angol tanfolyamok lettek dominálók. Célja természetesen nem az, hogy a munkásokat a jelen rendszerhez való ragaszkodásra, vagy a környezethez való idomulásra nevelje: hanem éppen az ellenkezője. Megtanulják a tanulók, hogyan fejezhetik ki legjobban tiltakozásukat, lázadásukat a rendszer ellen. Ez kellene célja legyen, minden munkás nevelésnek.

Bármilyen felvilágositással szivesen szolgálnak a Work Peoples' College-ból az érdeklődőknek és levélre is szivesen válaszolnak. Box 39 Morgan Park Sta. Dulluth, Minn.

NEM FELEJTÜNK. Osztálytudatunkban állandóan ott el, hogy TI, bátor szó szólói a munkásosztály felszabadulási törekvésének a harc tovább szitásától, a még tudatlan munkások nagy táborának a felvilágositásától erőszakosan elvagytok zárva.

Nem elégszünk meg azzal, hogy ezt látjuk és hogy rátok gyakran gondolunk, hanem az ipari forradalmárok leghatalmasabb eszközével a szervezet állandó erősitésével kovácsoljuk börtönötök ajtajához a megnyitó kulcsot.

Ma Cleveland, holnap Philadelphia és sorjában az egész ország dolgozói megértik az "egy mindért, mind egyért" magasztos jelszót és harcba szállnak értetek, magukért, mert hiszen nektek sem nagyobb a bünötök mint nekik, mint nekünk, akik támadjuk a magántulajdonon épült rendszert a legfájdalmasabb helyen — a profit csökkentése által.



TI nem csüggedhettek, mert a tábor egyre szélesedik, a harcolók szelleme élesedik és meglátják, hogy a napi harcok mellett kötelezettségeik vannak veletek szemben is.

Ezt a felismerést és általa az akciót mindennappal közelebb viszi a megvalósuláshoz az IWW, mert MI NEM FELEJTÜNK!

KÉTSÉGEN felül álló tény, hogy az ember fogantatása pillanatától egészségét és életét is fenyegető kártevéseknek van kitéve, tehát nyilvánvalóan egyéni érdek, hogy ezen kártevések lehetőségeit csökkenteni és azokat természetüknek megfelelő módon elháritani igyekezzünk. Hogy e törekvés eredményes legyen, szükséges, hogy lehetőleg mindenki ismerje e veszedelmeknek eredő forrását és igy tudjon ellenük védekezni. Ez a cél volt előttünk, amikor az előző esztendők Bérmunkás Naptáraiban kis lexikonját közöltük a gyermeket, az embert megtámadó betegségek felismerésének a lehetőségéről.

Ez évi naptárunk az "Élet fejlődéstörténetét" közli a tudományos világ egyik legalaposabb ismerőjének Bölsche Wilhelm irása nyomán olyan népszerü nyelvezettel megirva, ahogyan csak erről a tárgyról munkásoknak irni lehet.

Kutatók, mint jelen munkájában Bölsche Wilhelm lépésről-lépésre mutatják ki a fejlődésnek évezredes történetét, amit a természet "koronája" az ember egy fejrázással intéz el a minden bizonyiték nélküli természet feletti dolgoknak minősitve a létezőt.

Ismertetésünk célja a kutató tudomány oldalára állitani ebben a kérdésben is a tanulni és tudni vágyó bérmunkások ezreit.

A Bérmunkás Lapbizottsága.

Bölsche: Az Élet Fejlődéstörténete

EGY bájos képe van előttem a természetnek. Ablakaim alatt smaragdzölden vonul a fiatal mező a völgy felé. Mint aranyos és viola-kék lángocskák emelkednek ki belőle a számtalan oroszlánszáj és harangvirág. Egy szürke gránitfal, ősidők tanuja, zárja be a vidám életnek ez eleven hullámát. Mint valami szürkéskék kulissza, tünik föl mögötte a közeli hegyoldalak fenyvese. És messze tul fölötte, mintha valami mélyebb árnyék folynék össze az ég lágy kékségével, a nagy hegygerinc. A napfényben csillogó hófehér felhő tünik most föl mögötte, tulnan az ismeretlen messzeségből jőve. Mindent ez a napfény von be, virágos mezőt, gránitot és erdőt, — átszellemülten pihen minden ebben a nagy egységben.

Most távoli hangokat hallok. A szürke sziklatömbök mögötti ösvényen emberek mennek. Idegen emberek. Nem látom őket. Mi minden lehet elrejtve az ilyen távolról hallatszó hangban, — jó és rossz! Mily végtelen sok különbözőséget jelent ez a szócska: ember, mennyi nemeset és fenségeset — és mennyi durvaságot! És mégis azt gondolom, hogy e gyönge léghullámok, melyek ama hangokat idáig hozzák, megreszketnek a természetnek arra az egyszerü tanitására, hogy minden ember, kivétel nélkül, testvérem. Annyira tehát mégis előhaladt már a kulturánk, hogy ezerötszázmillió embernek e sokfejü tömegébe a közösségnek, a közösség szentségének eszméjét oltotta be e fogalommal "ember!" Egyetlen egységet alkotnak ezek az emberek, egy nagy családot, melyen belül megtalálták egymást, készen arra, hogy büneiket együtt viseljék el és megbocsássák, örömeiket közösen élvezzék, karonfogva járják meg a világ e nagy rejtélyes völgyének utját.

De ama határozatlan hangok közé egy világosabb, erősebb hang vegyül, még szavak nélkül. Egész kicsiny gyer- ez az egyhangu sirdogálás, mely oly tehetetlen és mégis oly sok szeretetet vált ki. Mindnyájan ilyen gyermekmek hangocskájából, ilyen kis beszélni nem tudó embersarjból nőttünk föl és fejlődtünk ki! És tekintetem megint a zöld mezőn siklik végig. Mindezek az aranyos oroszlánszájak és kék harang-virágok is egyetlen sarjból lettek. E növények mindegyike egy jelentéktelen csirából került föl a napfényre. És elgondolom, hogy közülök egyik sem nélkülözheti a napot: sem a kis rózsás ember-sarj a bölcsőben, sem e mezei virágok barna durva sarjügye. Ha az a nap ott, mely tőlünk százötven millió kilométernyire magánosan kering a éghideg térben, ma kialudnék, az emberiség csakugy elpusztulna, mint ez apró mezei virágok népsége.

És az emberiség lelkének mélységeiből, onnan, ahonnan a természet tanitásai is jöttek, benső fülemet egy másik hang is megüti. Az a hang, mely a régi indusok bölcsességében szólalt meg először és itt azt mondja, hogy a közösségnek és testvériségnek a köteléke nem szünik meg az embernél, sőt inkább mindent felölel, ami létrejött ezen a földön, mindent, ami a nap sugaraiból a szentséges világtörvények hatalma alatt kisarjad és kifejlődik. Azonos ez azzal az egyszerü tanitással, mely azt mondja: az állatot se kinozd haszontalanul, a virágot se tépd le fölöslegesen, mert a természet megfoghatatlan nagyságban ezek még mindig — testvéreid; az a virág s benne a csillogó bogárka épp oly tehetetlenül állanak előtted, mint egy siró kis gyermek; de ebből a gyermekből ember lesz; ki tudja mi lehet még ebből a virágból, ebből a rovarból, vagy mivé lettek is már évmilliók előtt a hozzájuk hasonlók.

Ilyen érzések hatása alatt, amilyenek jobb pillanatainkban mindnyájunkat elfognak, kellene — gondolnom — megközeliteni "az ember származásának" nagy kérdését.

Ameddig az emberi részvét elér, addig szégyen és félelem nélkül elmehet megismerésének isteni ösztöne is. Akiben van annyi szeretet, hogy az az állatra is kiterjed, tiszta lelkiismerettel átadhatja magát szelleme ama kérdésének is: vajjon a vérrokonság, mely őt a többi emberekkel bizonyosan összeköti, nem megy-e még tovább, — vajjon ő maga is nem az állatból fejlődött-e? És határozott pillantással ismerheti föl, hogy erkölcsileg ez a tény nem jelent rosszabbat, mint az a másik, melyet minden anya szeretetének mély ösztönével mindennap ezerféleképpen ujra megerősit és szentesit: hogy a legnagyobb ember is csak ugy lesz egy sarjszerü, fejletlen gyermekből, mely még sem beszélni, sem járni nem tud, egyelőre csak a természet sötét rendjében csirázik, mint ahogy ott künt a nap forró csókja alakitja a kék harangvirágot. Igy lesz az egyes ember. Miért ne keletkezett volna egykor ugyanezen a módon az egész emberiség?

— — — — — — — — — — — —

Kerek egy millió ével ezelőtt volt. Ha valakinek akkor módjában lett volna, hogy dobozzal a kezében mint vidám vadászember járja be mai kultur-földrészünket, Európát, az ugyancsak furcsa országot látott volna maga előtt. A mi fogalmaink szerint okvetleül azt kellett volna hinnie, hogy a tropikus Afrikában van. Hetekig járhatta volna Dél-Európa beláthatatlan füves sikságait, melyeket csak ittott tarkitott egy-egy sürübb pagony. E zöld fütengerben az antilópoknak, a vad lovakhoz hasonló állatoknak és a zsiráfoknak ezernyi seregeit riasztotta volna föl. Holdvilágnál a forrás mellett tanyázva, látta volna, amint kolosszus-kolosszus után inni vagy fürdeni jön, mint valamikor látták az első vadászok, akik a Fokföldről Afrika belsejébe hatoltak: mindenféle elefántokat, két vagy négy agyarral, sőt esetleg lefelé forditott rozmár-fogakkal, tekintélyes orrszarvukat és félelmetes vizilovakat; mögöttük oroszlánoknak, tigriseknek és a füreszfogu óriásmacskáknak az orditása hallatszott volna. Aztán megint, inkább észak felé vonulva, a jelenkor legélénkebb kulturvidékeire, áthatolhatatlan őserdőkbe jutott volna, mint amilyenekben Stanley Afrika szivében, egy abszolut vad tropusi vidék merész meghóditásának minden borzalmait megismerte. A fölszini növényzet vastag sürüségéből pompás pálmák emelkedtek ki. Tarka papagályok rikoltoztak. A lombozatból hirtelen egy nagy, a mi gorillánkhoz hasonló, emberszabásu majomnak élesen kutató ábrázata nézett a vakmerő betolakodóra. Mindenek fölött izzott a meleg égöv forrósága. De hogy meg lett volna lepve vándorunk, ha a mai térképet az utjával pontosan összehasonlitotta volna! Ahol ma a Földközitenger kék tükre oly derülten terül el, ahol a hajó számára az utolsó part a horizont alá sülyed, ott száraz lábbal mehetett volna át, az égbolt egyik felétől a másikig még füves rét zsiráfokkal és bozót-erdő majmokkal. És ahol ma a hegyi ösvényen a zöld glecserjég fölött szédită magasságban virit a vörös alpesi rózsa, ott csak erdős dombvidéket talált volna, melyen a geologiailag iskolázott szem észrevehette volna a lassan, de föltartóztathatatlanul haladó emelkedés nyomait. És ahol ma csak a nap süt forrón a kopasz hegyoromra, (mint Franciaország szivében) ott éjjel, messziről odaérkezve, véresen vörös tüzfényt láthatott volna: tüzhányó hegyek forrongó láváját.

Egy idegen világ a rettentően távoli időben!

Mert egymillió esztendő valami rettentő dolog nekünk, akik a mi emberi kulturtörténetünket irott okmányokkal csaknem egészen hatezer évig tudjuk visszafelé követni. Egész könyvtárakat meg lehetne tölteni azzal, a mi velünk, emberekkel csak egyetlen ilyen évezredben történt. És most rakjunk egymás után ezer ilyen évezredet. Ki is csodálkozhatnék rajta, ha a kutatás tükrében, mely őt ez ősnapokba visszavezeti, egy egészen más Európát lát, ha a tengert és szárazföldet, hegyet és éghajlatot megváltozva látja?

A föld történetirója négy nagy korszakot különbözött meg, ha a növényi és állati élet ama változásaira és egymásutánjára gondol, amelyek a föld sok millió éves multjában mutatkoztak. Az egyszerü latin sorszámok megadják a neveket: primus az első, secundus a második, tertius a harmadik, quartus a negyedik. Itt van az első kor, a legelső, melyben a föld élő lakóiról valamit megtudtunk. Azok az erdők zöldeltek akkor, melyeknek megkövült maradványaiból a mi kőszenünk lett, és árnyékukban valami furcsa páncélos gyikok mászkáltak; a tengerben, melynek partjai körül ezek a fák zizegtek, ma rég kimult halak és rákok uszkáltak. Következik a másodkor, melyben az ichthiosaurushoz hasonló óriási borzalmas hüllők tették bizonytalanná a tengert és szárazföldet. De most jön, mint harmadik nagy korszák, éppen az a harmadkor, mikor Európa éghajlata és állatvilága olyan volt mint Afrikáé, zsiráfok, elefántok és majmok tanyáztak benne. Es csak mikor ez a korszak is elmult, jött a negyedkor, mely magában foglalja az ember egész történetét és amelyben még most is élünk. Tekintetünk csak ebben a negyedkorban érzi magát otthonosan. A föld fölülete olyan lesz, mint amilyennek megszoktuk; minden közeledik hozzánk. Ami megelőzi, az idegen, mint valami elmult világ, mint egy idegen bolygó álma.

És mégis: abban a harmadkorban már élt az ember.

Sem dal, sem hősmondák nem beszélnek erről. De ahol a hagyomány szava, az öntudatos emberiség krónikája hallgat, ott beszélnek — a kövek.

Az emberi hagyomány még a negyedkoron belül kialszik. Elérünk egy végső pontig, ahol a kinaiak, babyloniaiak és egyiptomiak fölirásai is elnémulnak. Az irás eltünik s ezzel az emberiség bölcsőjének önmagáról szóló legutolsó szava is. Azonban ezen tul, de még a negyedkoron belül egy másik fontos esemény is végbemegy a földön, melynek nyomai a kőzeteken világosan láthatók. A nagy jégkorszak ez. Európa és Északamerika fölött sok ezer éven át tornyosultak föl a glecserjég roppant tömegei. Mammutoknak (nagy, a hideg ellen vörös gyapjuval védett elefántoknak) seregei legeltek e glecserek szélén, mint ma a mósusz-ökrök és rémszarvasok fönt a sarkkörüli vidékeken. Nos, ezekből a napokból az ember félreismerhetetlen nyomai maradtak fönt.

De azt hiszem, gondolatban sem követhetjük a dolgokat idáig anélkül, hogy egy másik kérdés is föl ne merüljön és pedig az az egyszerü kérdés: nem lehet-e az ember még sokkal idősebb is? Ha elfelejtette a jégkorszakot, a németországi és franciaországi elefántharcokat, a harmadkori magnolia- és pálmaerdőt, — ki tudja, mi mindenen ment keresztül még azelőtt, amit éppen ugy elfeledhetett!

Annyi bizonyos: az igazi közös ősnek, mely legalább is a koponya és a lábak alkatában rendkivüli mértékben hasonlithatott a Pithecanthropushoz, már a miocénkorszak előtt, tehát a harmadkor első harmadában léteznie kellett. Az akkori "'e'm'ber" volt ez, egy lény azzal a képességgel, hogy belőle kifejlődjék az igazi ember, sőt azzal a képességgel, hogy a gibbont, csimpánzot, gorillát és orángot is létrehozza. Bizonyára testének tulnyomó részén szőrös volt, ugy ahogy ezt a mai emberszabásu majmok, az ő igazi "Ézsaui," megtartották. Ha a mai meztelen "Jákob" embernél a test legtöbb helyén e szőrözetnek már csak finom maradványát találjuk, akkor is teljes utbaigazitással szolgál az ősapa felől az a mély tanulság törvény a fiatalkori alakok hasonlóságáról: az anyatestben az ember testét is eleinte teljesen beboritja egy sürü gyapju-réteg. Sőt az arcát is szőr fedi, amit ma már az emberszabásu majmoknál se találunk, és csak a lábak és kezek belső fölülete marad szabadon: mert ezek bizonyosan kopaszok voltak már annál az ősnél is, melyet ez az emberi magzat most még egyszer lemásol. Csak közvetlenül a születés előtt tünik el az embernek ez az Ézsau-ruhája, de egyes megfigyelt esetekben makacsul megmaradt az egész életre és igy keletkeztek a hires kutya-emberek, melyeknek olyan szőrözetük volt, mint egy kutyának.

De kitől eredt maga az ős? Milyen alakba burkolózva tünik el visszafelé?

A rendszerben a négy emberszabásu majom után a többi alsóbb majmok következnek. De ez a rovat megint legalább is három különböző csoportot foglal magában. Egyiket képezik Ázsiának és Afrikának mai farkos majmai, a tengeri macska, pávián stb.; ezek szolgáltatják az állatkertjeinkben oly népszerü majom-csapatok nagyobbik részét. A második kizárólag Amerikában él, példaként fölemelitjük az okos kapucinus-majmot. A harmadik, szintén Amerikában korlátozva, egy csomó kisebb majmot foglal magába, melyeknél a kéz- és lábujjakon körmök helyett karmok vannak és igy majdnem inkább a mókushoz, mint valódi majomhoz hasonlitanak. Ide tartozik például a selyemmajmocska.

Ezt a három csoportot épp oly kevéssé lehet világos fejlődési sorozatba elrendezni, mint a négy emberszabásu majmot egymás között. Mindamellett is tisztán bonctani okokból az a határozott érzésünk van, hogy az ember legközelebbi alsóbb állomásának valahol itt a közelükben kell lenni.

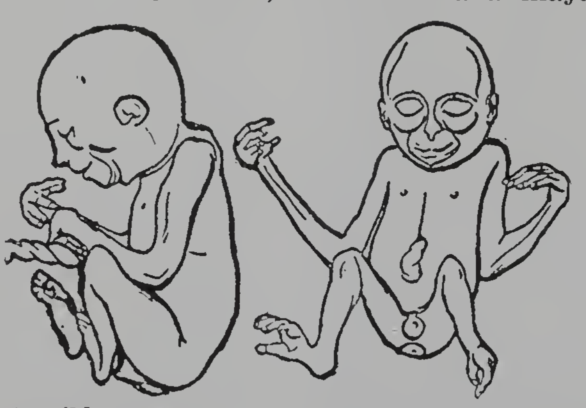
Már az első állatbuvároknak, akik a a gibbont leirták, föltünt, hogy ez a gibbon, a többi emberszabásu majmokhoz és az emberhez való erős kapcsolatai mellett különös módon éppen a tengeri macskaszőrü farkas-majmokhoz is bizonyos tatározott kapcsolatokat mutat. Ezeket csak az ősalakból örökölhette és ennél ismét csak mint örökség szerepelhettek még előbbről: egy olyan állapot idejéből, mikor az ős általában még jobban hasonlitott a majmok tömegéhez.

Maga az ember bizonyitja, hogy volt valaha egy őse, melynek még hosszu külső farka volt. Nemcsak hogy megvannak még felnőtt állapotában is az elsatnyult, kivülről persze nem látható farkcsigolyák (sőt nála még jobban vannak kifejlődve, mint az emberszabásu majmoknál,) hanem az anyatestben lévő magzatnál — mindig ama mély törvény hatása alatt — egy külsőleg erősen kiálló farkat láthatunk még; kivételes esetekben megmarad ez a "magzati farok" a felnőttnél is és igy képződik a "farkos embernek" gyakran kétségbe vont, de ma már biztosan megállapitott abnormitása, mikor a felnőtt korban is megvan az ülőrész fölött a majom-farok; az persze nem igaz, hogy volna valahol a földön egy egész nép, mely csupa ilyen farkos emberekből áll, mint azt a geográfusok régebben mesélték.

Semmi sem áll utjában annak, hogy olyan ősökre gondoljunk, melyek ilyen farokkal birván, külsőleg csakugyan inkább hasonlitottak a tengeri macskához. A kövült csontmaradványok bizonysága szerint a mai óvilági csoportnak a farkos majmai meg voltak már a harmadkor közepén, amikor már az ember és az emberszabásu majmok is mutatkoztak. Egyik faj (a mesopithecus) nagy tömegben élt akkor Görögországban, ahol számtalan csontját találták. Ennek a görög majomnak egészen rendes farka volt. Amellett az orrának az alkotásában és a szemek állásában több hasonlatosságot mutatott az emberhez, mint mai farkos rokonainak az egész laza népsége együttvéve.

Viszont vannak e népség között minden emberi formától annyira eltávolodott, azt mondhatnánk egyoldaluan "bestializált" alakok, mint a szélső példát képező páviánok (gondoljunk csak a furcsa mandrilra,) amiből arra kell következtetnünk, hogy itt is egy, az emberi családfához eredetileg közeli ág teljesen oldalt hajlott el, igy hozva létre Ázsiának és Afrikának élő majmait. Tehát megint egy olyan ősalakra kellene gondolnunk, amelyből most mint nem egyforma fiak egyrészt az ember és az emberszabásu majmok őse fejlődött ki, másrészt ama görög mesoithecus és azután többfelé ágazva a többi afrikai-ázsiai farkos majom. Természetes, hogy ez az ősalak jóval régibb. Legkésőbb a harmadkor első harmadában élhetett. Külsőleg bizonyára valódi majomnak tartanánk s csak a bonctani sajátosságairól tudná meg a hozzáértő, hogy itt még nem a későbbi ágból származó majommal, hanem még csak olyannál van dolga, melyben visszafelé számitva a harmadik fokozatban rejtőzik a leendő ember.

Érdekes, hogy a harmadkor első harmadából csakugyan vannak maradványaink majomszerü állatoktól. Ameghino spanyol buvár találta őket Patagóniában, — olyan kőzetrétegben, mely minden valószinüség szerint még az első harmad vége előtt keletkezett. Ezt az első harmadot eocen-korszaknak, magyarul az uj kor hajnalának nevezik. Mikor Ameghino első izben vizsgálgatta egy ilyen meglehetősen kicsiny patagóniai majomnak a koponyáját, annyira egy kis emberi kisérletnek tünt föl előtte, hogy “Homunculusnak” keresztelte el. Ugy látszik azonban, hogy a hasonlóság az emberhez itt se sokkal nagyobb, mint a kapucinus-féle mai amerikai majmoknál, melynek csoportjában ezek az eocenkori majmok is tartoznak. Nem tagadható, hogy a kapucinus-majom testileg is, szellemileg is sok hasonlóságot mutat az emberhez. Neki is vannak titkos kapcsolatai a gibbonhoz és igy a pithecanthropus-tájéki őslakóhoz. És igy van valami abban az ujabb föltevésben, hogy végül is ezek a csinos, szelid és kétségtelenül magas intelligenciáju amerikai kapucinus-majmok állanak legközelebb az embernek ahhoz a valódi “majomformájához” (mely éppen az eocénkorszakba esnék!,) — közelebb, mint a most élő farkos óvilágiak.



A gibbon-magzat az anyatestben a fejlődés előhaladottabb fokán. Feltünő az emberi magzathoz való nagy hasonlatossága.

Viszont az apró mókusszőrü selyemmajmok teljesen elütő oldalágat képeznek; ugy látszik egészen egyoldalu, különleges délamerikai alkalmazkodás voltak.

De ha már ennyire vagyunk, kétségünk sem lehet a legközelebbi kérdés felől. Ha az ember oly mélyen összebonyolódik a majmok törzsével, akkor visszafelé is csak ezeknek a közös sorsát oszthatja. Ahonnan általában a majom származott, onnan származik az ember is. Mindkettő ugyanazon ősformában rejtőzködik.

Az emlősök szokásos rendszere a majmok alatt megint mint egy nagy hágcsón halad tovább. Következnek a félmajmok, bőregerek, rovarevők (például a sündisznó,) ragadozók, rágcsálók, a patásoknak sokféle ágazó nagy csoportja és igy tovább. De ez a hágcsó csak látszólag történelmi. Nem boldogulna, aki azt akarná kimutatni, miként ment valaha az ember keresztül mindezeken az elváltozásokon. Ha teszem azt egy nyulnak a fogzatát egy majomszerü állatéval összehasonlitjuk, nehezen tudnánk belenyugodni a gondolatba, hogy utóbbi a nyultól származott le. Ha a majomszerü emlősök fogazatának ideális tipusával az emberét vesszük, akkor ugy vagyunk vele, mintha a müvészetben valami egészen egyszerü, nemes épitőstilust, valami bizarr, modoros stilussal hasonlitanánk össze; senki sem fogja elhinni, hogy az egyszerü alakult ki a modorosból. Igy az embernek a fogsora is mintha valami egyszerü templomépület nemes stilusa lenne, melyben minden szépen, egységesen van kiképezve. Ellenben egy nyulnak, lónak vagy akár macskának a fogazata az emberé mellett ugy tünik föl, mint amaz egyszerü témának a modoros változata, itt kihagyásokkal, amott tulhajtásokkal.

Természetesen tarthatatlan az ellenkező gondolat is, — hogy mindezek az emlős csoportok ilyen majomszerü emlősökből fejlődtek volna ki. Ellene mondanak a legegyszerübb történeti okok. Az ősvilági állatok csontmaradványai nem mutatják azt, hogy például először csupán patások, aztán, mondjuk, rágcsálók, majd ragadozók és végül majmok léptek volna föl, —

de arra sem tanitanak, hogy az összes magasabbrendü emlősök közül legelőször a majmok lettek volna meg és csak azután apránként a patások, rágcsálók stb. Ez azt a benyomást kelti, mintha mindezek a csoportok bizonyos időben egyszerre jelentek volna meg a porondon.

De ezekből az egymásnak ellentmondó gyanitásokból mégis csak kivezetett egyszer a kihalt emlősöknek mindinkább mélyülő ismerete.

Mindazok az emlőscsoportok még a harmadkor első harmadában föllépnek, a már többször emlitett eocén-, vagy hajnalkorban. Maguk a majmok is, amint láttuk, megvannak, már ekkor. Ha tehát e dolgok eredetétől valamit meg akarunk tudni, akkor még hátrább kell keresgélnünk, ugy körülbelül az eocén-korszak kezdetén.

Ma is él még a Szunda-szigeteken, tehát ott, ahol a gibon és oráng laknak és valamikor a pitsecathropus kóborolt, egy furcsa kis teremtmény, mely félig kis majomhoz, félig a guggoló ugró-egérhez hasonlit és egész külsejében annyira kómikus, hogy az emlősök leveli békájának nevezték el. Koboldmaki (tarsius spectrum) a hivatalos neve e kis erdei kisértetnek. Ez a koboldmaki a rendszerben a félmajmokhoz tartozik. Ide tartozik még néhány, átlagosan macskanagyságu állat melyeket az állatkertjeinkben "makiknak" neveznek és valamennyi Madagaszkárból ered, azután az ugynevezett galagók Afrikából, a részben délafrikai, részben délázsiai lori-k és az egészen különös, szintén madagaszkári ujjas állat. Régebben voltak Madagaszkár-szigetén olyan maki-fajták, melyeknek nagysága megközelitette az emberét.

A kis koboldmakinak van egy tulajdonsága, mely őt a legszorosabb kapcsolatba hozza a valódi majmokkal és pedig közelebbről az amerikai kapucinus-majommal. Akinek volt már alkalma egy ember születésénél jelen lenni, az emlékszik arra az erősen véres képződményre, mely a szülés után jön ki. Ez a "magzatlepény" vagy placenta. Mig a kis ember, mint magzat az anyatestben tartózkodik, ez a magzatlepény az ő legfontosabb szerve, mert ezen keresztül kapja a magzat teste a táplálékot az anya véréből. Már most ez a magzatlepény, mint a test egyéb berendezései is, közös az embernél és az összes magasabb emlősöknél. De abban a közelebbi módozatban, ahogy a magzatlepény az anyatestben képződik, jelentékenyen eltérnek egymástól a magasabb emlősök egyes csoportjai. Az ember és az emberszabásu majmok magukban egy különleges módszert képviselnek — ez megint kitünő példa az ember és az emberszabásu majmok összetartozandóságára, és e szempontból jelentékeny vivmány volt, mikor a már emlitett Selenka a gibbonnál és orángnál is kimutatta (az egész állatországban csak az embert jellemző) közös módszert. Más módszerük van a tengeri macskához hasonló farkos majmoknak és megint más, teljesen eltérő és eredeti az amerikai majmoknak. A magzatlepényképzésnek ez utóbbi módjához érdekesen csatlakozik a koboldmakié, mig a valódi makik főtömege megint más és saját módszereket követ. Minthogy Amerikában már nagyon régi, a középharmadkorból való koboldmaki-maradványokat találtak, mind valószinübb lesz, hogy az amerikai majmoknak a koboldmakihoz hasonló félmajmok voltak az elődei. Ez volna egyszersmind a legközelebbi állomás az ember családfájában. Bizonyára a középső harmadkornak ezek a koboldmakijai képviselik történetileg (a fentebb mondottak értelmében,) a cernay-i és ujmexikói állatnépség ama részének továbbfejlődését, mely a törzsalaktól már a félmajmok felé kezdett eltérni. Tudományosan ma többnyire "Lemur"-oknak nevezik e félmajmokat és ezért nevezték amaz ősi előfutárokat pachylemuridaknak.

A harmadkorból visszafelé menve a másodkorba, mintha hirtelen eltünnének az összes magasabb emlősök, még a cernay-i és ujmexikói törzsalakok is. De mindenütt, ahol egyáltalán emlőscsontok előfordulnak, föllépnek helyettük az alsóbb emlősök egy egész határozott csoportjának a képviselői, — az ugynevezett "erszényes állatok."

Az erszényes állatokat igy nevezik egy olyan sajátságukról, melyet az állatkertben a gyermekek is megismernek a kengurunál: az anya a nagyon éretlen állapotban megszült, azt mondhatnánk rendesen koraszülött fiát egy ideig egy védő bőrzacskóban, az ugynevezett "erszényben" magával hordozza. Ebben az erszényben találja meg a kölyök az emlőt is, melyen emlősszokás szerint táplálkozik. Egyenesen erre a célra berendezett szivó-szája mintegy odaköti az emlőhöz, mig az egyidejü lélegzés (mely csak az orron keresztül történhetik) a légcsőnek és a tüdőnek különleges berendezését teszik szükségessé és a mellső lábak erős karmokkal ellátott kapaszkodó szervekké alakultak ki, ellentétben az eleinte satnya és tökéletlen hátulsó lábakkal. Teljes joggal nevezték "lárvá"-nak ezt az erszényes-kölyköt, mely részben különleges, később megint eltünő szerveket fejleszt ki az erszényben való tartózkodás idejére, mintha csak egy emlősállat "békaporontya" volna. Az erszényes állatoktól följebb egyetlen magasabb emlősnél sem találunk még csak hasonlót sem ehhez a csodálatos "erszényes lárvához." De ezeknél a magasabb emlősöknél is megtaláljuk az erszénynek egy nagyon jellegzetes maradványát egy kétségtelenül ehhez tartozó záró-izomban. Ez egész biztosan mutatja, hogy az egész magasabb emlős-népség, az embert is beleértve, őseiben átment az erszényesállat fokozaton. Hogy pedig ez a fokozat szorosabb kapcsolatban volt a ma élő valódi erszényesekkel, kitünik az utóbbiaknak egy másik sajátságából, melyre csak ujabban lettek figyelmessé. Megint a föntebb emlitett magzatlepényről van szó. Még eddig csak ugyanazon magzatlepény különböző alakjairól hallottunk, ugy látszik, hogy az élő erszényesek megállottak azon a fokon, ahol a magzat-lepény egyáltalán fejlődni kezdett.

Lehet, hogy a jura-korszakot követő kréta-korszak folyamán, a magzatlepény-képzés kezdeteit mutató valamelyik erszényes-csoportnál ment végbe az a fejlődés, mely a cernay-i és ujmexikói magasabb törzscsoportokhoz vezetett. Emellett tekintetbe kell vennünk, hogy az elálló hüvelykujjakkal biró ötujju láb, amit a félmajom, majom, emberszabásu majom és az ember kezük alkatában máig hiven megőriztek, már az erszényesek mászó fajainál, főleg az amerikai erszényes patkánynál vagy opossumnál is előfordul.

Még mielőtt az anyatestben lévő emberi magzatnál a külső emlőbimbók kifejlődnének, keletkezik a bőrben a tejmirigy. Ha arra a "biogentikai alaptörvényre" gondolunk, az a benyomásunk, mintha bizonyos fokon az ősöknél is meglett volna már a tejmirigy, még mielőtt a külső emlő kifejlődött volna. Épp ugy látunk az emberi magzatnak egy korai fejlődési szakán egy sajátságos képződményt a hátsó testnyiláson: a vizelet és a ivartermékek csatornája a végbélbe nyilik, ugy hogy mindhárom dolog: az ürülék, vizelet és az ivari termékek számára kezdetben csak egyetlen nyilás van. Csak a harmadik hónapban képződik a leendő emberke végbelében egy válaszfal, mely azután e váladékokat két cső (két nyilás) között osztja meg: egy vizelet és ivarvezeték és a végbél között. Ez az egymásután annak megfontolására indit bennünket, vajjon nem-e itt is valami ősi vonatkozással van dolgunk. Voltak-e csakugyan valaha olyan embert rejtő emlősök, melyeknek már voltak tejmirigyeik, de emlőik nem, és amelyeknek a vizelet, ivartermékek és váladékok kiüritésére csak egy nyilásuk volt?

Még ma is vannak ilyen emlősök! Ezek a hires ausztráliai csőrös állatok. A szárazföldi csőrös emlős vagy echidna egy nagy südnisznóhoz hasonlit, ő is erős tüskékkel van fölszerelve. Az ausztráliai szárazföldön, Tasmániában és Ujguineában fordul elő. A vizi csőrös emlős a szőrözetét és életmódját illetőleg inkább a mi vidránkhoz hasonlit, igen jól uszik s az ausztráliai szárazföld kisebb folyóiban és tavaiban lakik. Egyik csőrös állatnak sincsenek külső emlői, de vannak szabályszerü tejmirigyei; a bőrnek egy tányérszerüen bemélyedt és átlikgatott helyén keresztül csöpög a tej a fiatalok szájába.

A test hátulsó részén is egész életén át csak egyetlen nyilás van az ürülék, vizelet és ivartermékek eltávolitására; ezt a nyilást "kloakának" és eszerint a csőrös emlősök egész csoportját "kloakás állatoknak" nevezik.

Ugy látszik, hogy ez a csőrös állat, mely virágzása idején kortársa volt a hüllő-saurusoknak, egyenesen e hüllőkhöz vezet, anélkül, hogy a madarakat érintené. A mi régi rendszerünknek az egyszerü sorozata: emlős, madár és csak azután a hüllő, itt tévutra vezet. A madárról egészen biztosan tudjuk ma, hogy a hüllőnek külön fejlődött egyoldalu hajtása, melynek nyilvánvalólag semmi köze az emlős kialakulásához.

Igaz, hogy a madár vére is állandó hőmérsékletü, mint az emlősé és ez a hasonlóság közel is hozta őket egymáshoz a rendszerben. Sőt még valamivel "melegebb vérü," mint mi. Ez azonban csak olyan tulajdonság, amely egészben véve magasabb fokot jelöl ugyan meg, de az egyes csoportok teljesen önállóan, egymástól függetlenül is megszerezhették. Igy például egymástól nagyon távoli állatcsoportok: legyek, méhek, szitakötők, lepkék (tehát a rovarok,) aztán halak (repülő halak,) békák (a szundaszigeti repülőbéka, mely az ujjai között kifeszitett bőrrel repked,) gyikok (az ausztráliai repülő-gyik,) aztán maguk a madarak és az emlősök közül a repülő erszényesek, bőregerek és a repülő mókusok, mind külön sajátitották el a repülést. Ezekben az esetekben szó sem lehet arról, hogy egyik állatcsoport a másiktól örökölte volna a szóbanforgó képességet, — mindegyik a körülmények kényszeritő hatása alatt, mint alkalmazkodást, külön "találta föl." A kihalt régi hüllők egy részénél (sok dinosaurusnál és a repülő sárkányoknál) sokféle okból valószinünek tehetjük föl, noha határozott bizonyiték nincs rá, hogy már ők is melegvérüek voltak. Bizonyos, hogy egyes kigyóknál (a python óriáskigyónál) még ma is időleges melegvérüség lép föl, és pedig akkor, mikor a tojásaikat lerakták és ezeknek a kiköltéséhez szükségük van bizonyos állandó hőfokra. Igy elég közelfekvő dolog volt, hogy ezt a tulajdonságot a madár, mint a hüllők sarja, élethossziglan megszerezte. Az archeopterix nevü furcsa keverékállat kövült maradványa bonctanilag félreismerhetetlen átmeneti alakot szolgáltat a gyikok általános tipusától a jurakorbeli madárhoz, egy olyan formához, amely sok tekintetben már igazi madár, de még egész csomó jellemző hüllő-tulajdonsága is van, például a hosszu gyikfark. Viszont semmiféle átmenetünk nincs a madártól az emlőshöz.

Kétségtelen, hogy a kétéltüek egyes élő képviselőinél pontosabb vizsgálat mellett találunk igen fontos olyan részleteket, melyek egyenesen az emlősök törzsére utalnak. Sok békánál és varangynál meglepetéssel vesszük észre az utódokról való gondoskodás kezdeteit, legalább abban az értelemben, hogy majd a him, majd a nőstény magával hurcolja a tojásokat. Sőt a mi honi "bábavarangyunknál" ugy történik ez, hogy a him a nősténytől elveszi az egész petevezetéket, a hátsó lábai köré csavarja és hüségesen magával hordozza. Viszont a délamerikai pipa-békánál a nőstény hordja a hátán a petéket és pedig a bőrén kis zsebek keletkeznek, melyben a tojások megérnek s a fiatalok kibujnak belőlük. Az orrmányos varangyoknál és zsákos békáknál a kis zsebecskékből nagy költőzsákok és erszények lesznek, melyben a tojásokat és a fiatalokat éppugy magukkal hordozzák, mint a szárazföldi csőrösök és az erszényesek. Ugyanezeknél a kétéltüeknél fontos szerepük van a bőrmirigyeknek. Mindenki ismeri ezeket a varangynál, ahol a mirigyek védelmül maró folyadékot lövellnek ki. De ugyanezen mirigyeknek szerepük van a pipa-béka zsebképzésénél is, s nem nagyon messzefekvő gondolat, hogy abban a mirigyzacskóban felnövekvő kölyök elkezdi egy ilyen mirigynek a nedvét (melynek nem kell éppen mindig marónak lenni) állandóan mint tápfolyadékot szopogatni. De ezzel már ott is volnánk a csőrös állat fokán levő "emlősnél," ahol a tojásból kikelt kölyök szintén nem tesz egyebet az erszényben, minthogy egy izzadságmirigynek a kicsepegő nedvét nyalogatja.

De másrészt épp oly kevéssé tagadható, hogy éppen ennek a csőrös állatnak az egész bonctani szerevezete, amennyiben későbbi különleges alkalmazkodások meg nem változtatták, félreismerhetetlen hüllő-hasonlatosságokat mutat és pedig nemcsak a csontvázában, hanem a puha részekben is, például a szivben és az agyvelőben. Azonban a csontváznak egyetlen egy bélyegében a csőrös állat a többi emlősökkel együtt határozottan eltér ugy a hüllőktől, mint a kétéltüektől és pedig abban a módban, ahogy az alsó állkapocs a koponyához izül. A fogakkal ellátott alsó állkapocs a fölfelé hajló ágával közvetlenül a koponyához izül. Ellenben az összes hüllőknél és kétéletüeknél a tulajdonképpeni állkapocs előbb hátul egy több csontból álló izületi készülékhez kapcsolódik, amely csontok egyike alulról emelkedik a koponya felé, mig fölülről egy másik áll vele szemben és csak ez van többé-kevésbbé szilárdan egyesülve a koponyával. Ebben a pontban tehát ugy a hüllönek, mint a kétéltünek jelentékenyen át kellett alakulnia, hogy emlőssé — ha mindjárt csak csőrös állattá is — lehessenek.

Ezekben a bonyodalmakban megint csak a kövült őslények vizsgálata igazit el bennünket. Mert amennyire jogosult volt annak idején a ma élő állatokkal szemben, hogy az állattan a hüllőt és a kétéltüt szigoruan elválasztotta: — a távoli ősnapokban, hiszen ránk nézve most ez a fontos, a rendszertani határ kezd megint eltünni, — hüllő és kétéltü megint mind jobban közelednek egymáshoz.

Az a kor, melyben a legrégibb csőrös-állatszerü emlős a legközelebbi alatta álló törzsalakból kifejlődhetett, körülbelül az elsőkor és másodkor határvonalai, tehát a kőszénkorszaktól az első nagy hüllőkorszakig, ama triászkorig, melyben az ős-csőrösöknek első fogait találták. De az éppen e korból való kövült maradványokból a következőket tudjuk meg.

A kétéltüek mai képviselői: a szalamandrák, gőték és békák, akkor valószinüleg nem éltek még, ezek bizonyára csak későbbi hajtásai a kétéltüek törzsének. Helyettük, mint már mondottuk, számos furcsa, többé vagy kevésbé szilárd csontpáncéllal ellátott, olykor krokodilusnagyságu kétéltüt találunk, melyek sok tekintetben annyira hüllő-jellegüek, mintha itt a kétéltüek ága már közvetlenül átmenne a hüllőkébe.

Azonban a hüllőnek és kétéltünek éppen ezen a keveredési határán látjuk az állatoknak még egy igen különös társaságát föllépni, mely ma teljesen kihalt, — állatokat, melyek részben erősen a hüllőkhöz huznak, de amellett félreismerhetetlen jellemvonásokat mutatnak — az emlősöktől. Ezeket a terményeket együttvéve teromorpháknak nevezik, ami magyarul "emlősködőket" jelentene. A legtöbb csontmaradványukat Délafrikában a Fokföldön találták. Vannak köztük nagyon groteszk legények, például nehézkes csuszó-mászó állat két hatalmas rozmár-foggal egyébként fogatlan szájában aztán olyanok, melyek kemény csontsugarakból való óriási fésüket hordottak a hátukon és sok másféle "sárkányalak." Később egyesek kiváltak a sorból, mert ezekben állapitották meg a teknősbékák őseit. Ami azonban kezdettől fogva leginkább fölkeltette a szakemberek csodálkozását, bizonyos csontvázrészeknek és különösen a fogaknak az emlősökkel való hasonlatossága volt. A buvárok nagy része azonnal ama nézet felé hajlott, hogy itt közvetlenül az emlősök keresett őseivel van dolgunk. Bár ezt más oldalról ugyanolyan élénkséggel cáfolták, de éppen az utóbbi időben igen illetékes szakemberek megint csak ebben a biztosan el nem dönthető dologban még oly óvatosan nyilatkoznak, bizonyosnak tekinthető, hogy a hüllő és kétéltü határon mutatkozó ingadozáshoz, ama kritikus ősnapok kövült maradványaiban még egy ingadozás járul a hüllő és emlős között. Azt hiszem, hogy a helyes következtetés ez lesz.

Semmi különös akadálya nincs, hogy ezeket az emlősöket, melyek nyilvánvalóan legtovább — egész az emberig

— vitték, tekintsük megint a törzscsoport központi ágának vagy koronasudarának. A leértelmesebb ág bizonyára ők voltak, ők lehettek tehát testileg a legjobban fölszerelve, ők voltak a nagy közös gyökerének szélsőségekbe legkevésbé elaprózott hajtásai.

Bizonyos, hogy ezek a föltevések, a rendelkezésünkre álló adatokra épitve, a logika szempontjából kifogástalanok. Annak a föltételezett vegyes csoportnak a kövült maradványait eddig még nem lehetett kétségtelenül kimutatni. De nem szabad elfeledni, hogy szemlélődésünk most mind jobban és jobban a földtörténet hajnalkori szakaszaiban vész el, ahol általában minden lazává és ingadozóvá lesz már. Ezen a határon tul fokozódó mértékben kell folyamodnunk a többé-kevésbbé finom következtetési bizonyitékokhoz. Nem várhatjuk többé, hogy az összes fokozatok külön-külön és az összes bonyodalmak élesen kifejezésre jussanak, — meg kell elégednünk a logika adta megközelitő fővonallal. De ehhez még most is elég utmutató adat áll rendelkezésünkre.

Bejutottunk immár, mint mondottuk, a nagy hüllő-korszakon tul az első (primaer) korba. Közeledünk a legrégibb korszakokhoz, melyekből a föld egykori életéről a kövületekből közvetlenül megtudhatunk még valamit. Roppant kőzettömegeket találunk itt, melyek a tenger iszapjából rakódtak le valamikor, most pedig legföljebb halak kövületeit találjuk bennük, melyek akkoriban — ugy látszik — az egész gerinces-népségnek még egyedüli képviselői voltak.

Az a benyomásunk, mintha az első kortól visszafelé minden magasabb, a kétéltütől és hüllőtől az emberig, egyszerüen a hal-ban rejtőzött volna — hiszen más gerinces nem is volt még.

Ez a történeti tény pontosan megegyezik az elfogadott rendszerrel, mely a hüllők és kétéltüek után a halakat állitják oda a legközelebbi alsóbb gerinces osztálynak.

A halat a felnőtt szalamandrától és békától, a gyiktól vagy teknőstől, a madártól vagy emlőstől és az embertől testileg az első pillanatban megkülönbözteti a lélegzésmódja. Az előbbiek mind tüdővel lélegzenek a szabad levegőn. Ellenben a hal tökéletes alkalmazkodás a vizi életmódhoz. Mivel a lélegzéshez neki is levegőre van szüksége, egy olyan szerve fejlődött ki nála, mely mindig a vizzel érintkezvén, képes a vizben oldott levegőt fölvenni és földolgozni: ez a hal nyakán elhelyezett ugynevezett kopoltyu.

De azt meg minden iskolásgyerek tudja, hogy a mai kétéltüinknek, tehát a szalamandrának, békának és gőtének a tojásaiból először ugynevezett poronty-lárva lesz, amely halacska módjára teljesen a vizben él. Kezdetben ez a poronty is rendes kopoltyukkal lélegzik. Csak mikor kifejlődik a béka vagy a szalamandra s elhagyja a lárva-állapotot, áll be a tüdő-lélegzés, a kopoltyuk tönkremennek, mint ahogy a gyermeknek a tejrogai kihullanak. De az ilyen poronty semmi egyéb, mint szabadba helyezett magzat. Ama törvény értelmében, mely szerint a magzat sok tekintetben az ősök alakulásait ismétli meg, ilyen föltünő esetből csak arra következtethetünk, hogy a szalamandrák és békák olyan teremtményektől származnak, melyek kopoltyukkal lélegzettek, — tehát, mivel a gerincesek közül nincs más választásunk, a halaktól.

Viszont ha a szalamandrák és békák, az előbbi föltevésnek megfelelően, csak annak a törzscsoportnak egyik kiágazása, melyből mint másik ág az emlősök is eredtek, akkor nem marad más hátra, minthogy ezt az egész törzscsoportot és vele együtt a mi emberi családfánkat is ugyancsak halszerü vizi állatoktól származtassuk le.

Akármilyen magzatot nézzünk meg, a valódi gyikét, kigyóét, krokodilusét, az ujzélandi hidasgyikét, a teknősbékáét, — vagy akár a struccét, gólyáét, tyukét vagy kanári madárét —vagy végül a csőrösét, erszényespatkányét, bálnáét, tengeri malacét, lóét vagy a majomét, mely sokkal közelebb van az emberhez — magzat a fejlődés bizonyos fokán mindig félreismerhetetlenül világos nyomait fogja mutatni a poronty- vagy hal-állapotnak. Ott vannak a nyakán a kopoltyuivek, ott mélyednek be a jellemző kopoltyuréssel, melyeken keresztül a vizben lélegző halnál a viz keringve megnedvesitheti a kopoltyuk lélegző fölületét. Az ezen a fokon felépülő végtagok még határozott uszonyformát mutatnak; mint kerekded lemezek nőnek ki, melyekből csak végtelen átalakulások után lesz később itt a bálna uszonya, ott a ló csüdje a patával, végül amott a madár szárnya, a bőregér repülő keze, vagy a szárazföldi teknősbéka nehézkes lába. Ha egyáltalán volna szükség még valami szigoru bizonyitékra ahhoz, hogy mindezek a magasabb gerinces állatok történetileg egyetlen közös őscsoporthoz tartoznak, kézzel foghatólag nyujtaná ezt az ősi örökségként föllépő kopoltyus és uszonyos magzat. De éppen ezek a kopoltyuk és uszonyok azt mutatják, hogy ez az őscsoport legvégül egy kopoltyu- és uszony-állatban fut össze, — más szóval a halban.

Itt volna még az utolsó kérdés: hogyan áll ez a dolog magánál az embernél? Minden bonctani tankönyv megadja a választ. Bizonyos fokon az ember magzatánál is megtalálhatók a kopoltyu-nyilások a nyakon és azok az uszonylemezkék a későbbi karok és lábak helyén. Ez oly bizonyos, mint Kopernikusznak az a tétele, hogy a föld kering a nap körül. Senki sem tagadhatja ezt, aki csak kissé is tiszteli az igazságot. Igaz, hogy olyan emberek, akiknek kényelmetlen a fejlődéstannak ez a megkapó bizonyitéka, többször megkisérlették, hogy azt "hamisitásnak" bélyegezzék. Minden tankönyvben, mely a leendő orvos kezei közt van és amelynek tételeiből állami hatóságok előtt vizsgázik, benne van ez az egyszerü tény és ha a diák a vizsgán ezt le akarná tagadni, meggyülhetnék a baja az állami vizsgáztatókkal. Aki ennyire elvitázhatatlan és tudományosan sehol többé kétségbe nem vont tényeket hamisitásoknak mond, az az igazság kutatásának erkölcsi föltételein tulteszi magát.

Igy hát az ember is benne volt egykor a halban!

De ha kérdjük, hogyan volt lehetséges és mi adta hozzá a külső ingert, hogy a távoli ősnapokban a kopoltyukkal lélegző halakból végre tüdővel lélegző szárazföldi állatok lettek, akkor most megint egy élő állatalak szolgáltatja a legjobb utbaigazitást. Az ausztráliai szárazföld keleti részének néhány kis folyójában egy teremtményt födöztek föl, amely külsőleg, a pikkelyeiben, uszonyaiban és kopoltyuiban teljesen egy nagy lazachoz vagy potykához hasonlit. De ha megvizsgáljuk a belsejét, azt találjuk, hogy egészen rendes és használható tüdeje is van. Ha az életmódját is kutatjuk, rájövünk, mi a logikai célja ennek a viszontbiztositásnak. A száraz évszakban annak a vidéknek a folyói teljesen kiszáradnak. Csak néhány rosszvizü mocsár marad vissza, melybe nyüzsögve szorul össze a halak népsége és egymás számára szinte lehetetlenné teszik a lélegzést. Az ilyen sanyaru időkben a felületre uszik a mi nevezetes állatunk, levegőt nyel a tüdejébe és igy az igazi légbeli állatok módjára lélegzik, mintha egyáltalán szüksége sem lenne többé vizre.

Ezt a paradox legényt, mely tetszése szerint élhet hal vagy gőte módjára, "gőtehalnak" keresztelték. Latinul ceratodus a neve. De ezt a nevet eredetileg olyan halszerü lények megnevezésére találták ki, melyeket kövült maradványaikban, mint hosszu fejlődési sorozatot a legrégibb első korig követhetünk visszafelé és amelyekre nagyon jellemző, hogy a szájpadjukon sajátságos fogaik vannak. Pontosan ilyen fogai vannak az élő ausztráliai gőtehalnak is. És igy bizonyára jogos a következtetés, hogy a kettős lélegzés sajátságos módját is az ősnapokból őrizte meg: azon lények igazi utódainak tartják őt, melyek az átmenetet képezték a kopoltyuval lélegző ősvilági halaktól az első ősvilági tüdőlégzésüekhez, tehát a kétéltü, hüllő és emlős föntebb föltételezett vegyes csoportjához, és igy amaz ősvilági ceratodus-rokonok maradványait éppen ezen átmeneti csoport maradványainak tartják.

Az ausztráliai ceratodus mindenesetre világosan mutatja, milyen kényszerhelyzetben fejlődhetett ki a "tüdő:" mikor ugyanis a viz nagyon kevés vagy levegőben nagyon szegény lett. Afrikában él még egy közel rokon gőte-hal, a protopterus, mely tüdőlégzésével egy ideig azt is kibirja, ha a viz teljesen kiszárad.

Persze most megint azt kérdezhetnők, honnan teremtődött elő az uj szerv éppen a kellő időben, mint a varázsló megteritett asztala. A természet varázslata sohasem jön csak ugy a semmiből, mindig logikusan kapcsolódik valamihez. Pontos vizsgálatnál kitünik, hogy a gőtehal tüdeje is csak az igazi hal egyik már meglevő szervének átalakulása: az ugynevezett uszóhólyagnak. Ez az uszóhólyag a haltestben olyan levegővel telt léggömbfélét képez, mely eleinte csak arra szolgál, hogy a hal fajsulyát csökkentse, a hal sulyát "egyenlővé" tegye a vizével. A föl-és leszállásnál nagyon hasznos volt, hogy a léggömböt szükség szerint egy szelep szabályozhatta; sok halnál tehát az uszóhólyag megtartotta a béllel és a szájjal való nyilt öszszeköttetést, hogy levegőt vehessen magába és bocsájthasson ki. A tápcsatornának ez a tetszés szerint megtölthető vagy kiürithető légzsákja használtatott föl arra, hogy falának a véredényeit oxigénnel lássa el, és — ha már meg volt, szükség esetén helyettesithete a vizből kifogyott kopoltyukat is. A továbbiak folyamán ez az uszóhólyag teljesen átvette a helyettesithette a vizből kifogyott kopoltyu tönkre mehetett egész addig a kis maradványig, ami a magzatnál mutatkozik — és meg volt a szárazföldi állat. E nagy utra visszatekintve elmondhatjuk: hogy ezzel az ember is fölszabadult a hal-állapot vizhezkötöttsége alól.

Mikor igy a gőtehalat mint "élő hidat" látjuk magunk előtt, szeretnénk természetesen a másik hidfőt is látni, — azaz megtudni, miféle halakból alakult ki ez a hid. Mert hal és hal között óriási a különbség.

Az avatatlan persze e szónál az asztalra kerülő halak alajaira gondol, mert a népmüvelésügy mai állása mellett ezek ismertebbek, mint a finom állattani különbségeket mutatók. Ott tulnyomó többségben, sőt majdnem kizárólagosan az ugynevezett "csontos halak" szerepelnek, a tulajdonképpeni szálkás halak, többé vagy kevésbé szilárd vázzal. Az összes európai folyami halak ide tartoznak, a pisztráng és a csuka, a potyka és az ángolna és a tengeri halak közül is legismertebbek: hering, szardella, tőkehal stb.

De ha ezekkel együtt egy kis hordócska pompás kaviár kerül az asztalra, vagy a költséges inyencség koronájaként egyenesen orosz sterlet-et szolgálnak föl, akkor már a halak egy másik egészen eltérő szervezetü csoportját látjuk: az ugynevezett zománcos halakét (ganoidei.) Legbüszkébb képviselőjük a tok, melynek petéi szolgáltatják a kaviárt. E zománcos halak vagy tok-félék főleg abban különböznek a többiektől, hogy vannak közöttük olyanok, melyeknek már csak egészen puha porc-vázuk van.

Ez a porc-váz állandó jellegü lesz egy harmadik csoportnál, mely ugyan nem kerül az asztalunkra (csak a kinaira,) de amelyet mégis elég jól ismernek — a cápáknál.

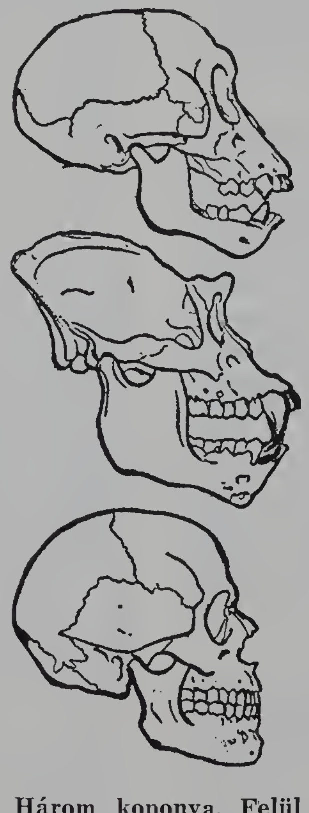
Azonban a hüllőnek és kétéltünek éppen ezen a keveredési határán látjuk az állatoknak még egy igen különös társaságát föllépni, mely ma teljesen kihalt, — állatokat, melyek részben erősen a hüllőkhöz huznak, de amellett félreismerhetetlen jellemvonásokat mutatnak — az emlősöktől.

Valamennyi ismert élő állat között, a lándzsahaltól lefelé, csak egyetlen kis csoport van, mely némi nyomát mutatja a "gerincoszlopnak" és pedig az ugynevezett zsák-állatok (ascidia.) Tengeri állatok, melyek fához hasonló anyagból készült köpenybe, mintegy zárt csigaházba, vagy zsákba vagy bőröndbe vannak bujtatva. Testalkatuk után inkább a férgekhez sorolnánk őket, egy és más emlékeztetővel a lágytestüekre. Nos, ezeknél a zsákállatoknál, a legtöbbnél csak a lárva vagy magzati alakban, de néhánynál élethossziglan, kialakul a testben egy finom porc-rudacska, mely legalább egy darabjában teljesen ugy helyeződik el, mint a lándzsahalnak ama háthurja. Meg kell tehát engednünk annak valószinüségét, hogy ezek a zsákállatok mégis csak valami közvetlen vonatkozásban állanak a gerinces törzsel. Egyik oldalon a féregszerüségükkel még mélyen alatta állanak a lándzsahalnak. De a másik oldalon már megvan a háthurjuk, tehát a valódi gerincoszlop első nyoma, amit semmi más gerinctelen állatnál nem találunk meg. Abból, hogy a legtöbbnél csak a magzat-korban mutatkozik a háthur, arra következtethetünk, hogy az őseiknél még erősebben volt kifejlődve, tehát azok közelebb is állottak a gerincesekhez, mint a fajnak most élő nyilvánvalólag elsatnyult képviselői. A lándzsahalat és a zsákállatott tehát ugy foghatnánk föl, mint annak a közös őscsoportnak két ágát, melynél először lépett föl a háthur. De ugyanakkor föl kell tennünk, hogy ez az ősalak minden egyébben még teljesen féregszerü volt, mert máskülönben nem tudjuk belőle a zsákállatot leszármaztatni. Eljutottunk hát az emberrel — a féregig.

“A féreg” szó ismét a rendszertani dolgoknak roppant tömegét foglalja magában. Százával vannak az egymástól alapjában eltérő féregcsoportok. Vannak köztük magasabbak, melyeknek már vérük, érzékszerveik és rendes központi idegrendszerük van. Persze, hogy ezekből szeretnénk a gerinceseket levezetni. Elgondolunk egy olyan férget, melynek — ellentétben a lándzsahallal és orsóhallal — még nincs háthurja, de már van egy idegkötege, melyből később a hal gerincvelője lehetett; alatta gyomorral, mely mint cső feküdt a testtömlőben, elől a szájban, hátul a végbélnyilásban végződve; az egésznek még nincsenek láb-uszonyai, még teljesen féregalaku. néhány élő magasabbrendü féreg tényleg megfelel ennek a mintának.

Viszont még most is vannak alsórendü féregcsoportok, melyek sokkal alantabb állanak, melyeknek még nincs bonyolult idegkészülékük, nincs véredényrendszerük, nincs alfelnyilásuk. Gyanitjuk, hogy ezek egy igen régi képet mutatnak be nekünk, magának a féregtörzsnek is egyik alsóbb fokát. Igy a férgen belül előttünk volna az ember több fokozatban is, többféleképpen elbujtatva, folyton lejebb és lejebb haladva valami egészen egyszerüig.

Ehhez azonban még valamit meg kell jegyeznünk. A rendszertanban a gerincesek mellett legalább három nagy csoport gerinctelen állatot találunk, melyeket testalkatuk szerint szintén a férgek fölé helyeznek, noha gerinctelenek. Ilyenek a rákok, pókok és rovarok, azután a puhatestüek (csigák, kagylók, (tintahalak) és végül a tüskebőrüek (tengeri csillag, tengeri sün és ezek rokonai.) A legmerészebb bonctani fantázia se volna képes arra, hogy e három csoportot egymásból leszármaztassa és az sem fog sikerülni, hogy a gerinces állatokat bármelyikkel is kapcsolatba hozzuk. Elképzelhetetlen volna, hogy egy lándzsahal a tengeri csillagból vagy tintahalból fejlődjék ki. Elméletben megkisérelték a halat a ráktól leszármaztatni, de csak olyan szalto mortaleval lehetséges hogy a gondolkodásom sehogy se tud belényugodni; az az érzésem, hogy itt a legmélyebb ür tátong. De milyen különös; egész jól el lehet képzelni, hogy mindazok a csoportok külön-külön szintén a gasabbrendü féregből indultak ki. Az a féreg (a pióca és giliszta,) melyhez a rákok és rovarok vonala csatlakozik, maga is megint na-



Három koponya. Felül a fiatal gorilláé, középen az öreg gorilláé, alul a mai emberé. A fiatal gorilla koponyája sokkal hasonlóbb az emberéhez, mint az öregé.

gyon különbözik egy zsákállattól. Nyilvánvaló, hogy már a magasabb féregnépségben sok mindenféle különvált és önállóan fejlődött ki. De ennek a képnek mégis csak nagy szuggesztiv ereje van: a "féreg" egy magasabb fokon elkülönült rovarra, puhatestüre, tüskebőrüre és gerincesre, mint a további fejlődésnek négy "lehetőségére," melyek közül persze csak a gerinlesek jutottak el a koronáig — az emberig; de ez a féregfokozat maga is az alsóbb férgekből indult ki, melyek tehát az összes féreg-unokák közös ősalakját képviselnék és igy — az embert is.

Ha most képet akarunk magunknak alkotni egy ilyen legmélyebb fokon álló féregről, akkor valami igazán csodálatosan egyszerü dologhoz jutunk el. Gondoljuk el, hogy egy embert darabról-darabra, szervről-szervre szétszedünk, — karokat és lábakat, koponyát, gerincoszlopot, végül magát a gereincvelőt és véredényrendszert, a gyomor és bőr közötti összes részeket elveszszük, — végül csak ez a bőr, a belül hozzá simuló gyomor maradtak meg. Gondoljuk, hogy az alfelnyilás, mely a magasabb féregnek a csőalakot adja, szintén be van nőve, csak egy nyilás maradjon, amelyik száj is, alfel is egyszerre.

És tényleg, a féregnépség legalsó határain vannak nagyon egyszerü teremtmények, amelyek körülbelül ilyenek. Bizonyos meduzákban élősködik egy parányi teremtmény, a pemmatodiscus gastrulaceus, melyet Monticelli 1895-ben fedezett föl: betüszerinti értelemben csak egy ilyen bőrből és gyomorból álló kettős serleg és mégis ez alakjában is teljes állatnak látszik, mert igy szaporodik. De édesvizeinknek egy nagyon ismert állatkája is alig emelkedik ezen tul: az ugynevezett hidrapolip vagy édesvizi hidra. Ennél a serleg alól oda van nőve valamihez, a száje körül finom fogókarjai vannak és a részletekben egyikmásik dolog valamivel "tovább" van. Tehát egész idáig érne le az ember?

Olyan emberről beszélünk, aki csak "bőrből és csontból áll." De ez még mindig gerinces-állat ember volna. E két szervben lappang minden, az emberi testet később megtöltő oly fenséges rendszer: idegrendszer, véredényrendszer, bélrendszer, nemi rendszer stb. Már sokan találták merésznek e föltevést, noha igen egyszerü rendszertani szemlélődés rávezet. Végül mégis csak a hidrapoliphoz érkezünk, ha az egyszerü mögött mindig a még egyszerübbet keressük. E logika elől nincs menekülés, ha már egyszer ide merészkedtünk a "következtetési bizonyitás"-nak ebbe a szögletébe, — akkor ez a legközelebbi logikai következtetés. De van egy másik is és nagyon fontos, hogy ez is ugyanoda vezet.

Egy idő óta nem beszéltünk a magzatról. De most megint őt kell tanuként megidéznünk.

Bonctanilag elgondolható (hiszen e szélső dolgokat csak az "elgondolhatóságuk" bizonyitja,) hogy az ilyen polipszerü bőrgyomorállatokból, a féregállomáshoz vezető másik vonal megkerülésével, közvetlenül le lehetne vezetni a valódi gerincteleneknek még egy utolsó csoportját: és pedig a szivacsokat, a magasabb polipokat és a meduzákat. Ezzel le volna zárva a gyürü: amaz alacsonyrendü bőrgyomor-állatokon tuli minden magasabb dolog egyetlen eredetre volna visszavezethető, és pedig a bőrgyomor-állatra magára. De jusson csak eszünkbe megint az a törvény, hogy a magzat-fejlődésnél sok minden ősi dolog még egyszer napvilágra kerül. Hogy ez a következtetési bizonyitás igazolva legyen, a meduzáktól a gerincesekig az összes állatok magzati fejlődésében látnunk kellene annak az állapotnak a visszatérését, amikor a magzat még csak egy bőrből és gyomorból álló, egyszerü szájjal ellátott kettős serleget képez, annak a pemmatodiscusnak vagy esetleg a hidrapolipnak mását És itt megint hiába szörnyüködünk. Tényleg ezt a magzati alakot látjuk föltünni az összes magasabbrendü állattörzsek minden sarkában és végében. Ez az a fokozat, melyet Haeckel bőrgyomor-álcának (gastrula) nevezett el. Nem vagyunk képesek eltérőbb dolgokat kigondolni, mint egy meduzát, egy magasabb férget, egy tengeri sünt, egy rákot, egy csigát kifejlett állapotban; és mégis ezek mindegyikénél megtaláljuk a jellemző bőrgyomor-álcákat. Sok, és lefelé mind több esetben fordulnak elő, a csupán gyomorból, bőrből és szájból álló, szabadon uszó serleg-magzatnak tiszta alakjában. Más esetekben valamivel bonyolultabb a dolog, mindenféle elváltozásokat találunk. De hiszen már mondottuk, hogy ez a törvény nem zárja ki az ilyen eltolódásokat. A lényeg azon van, hogy a legmerészebb elváltozásokban is mindig fölismerhető a bőrgyomoralakhoz való vonatkozás: ha nem képződik igazi serleg, akkor is két sejtréteg alakul ki, melyekből a későbbi test fölépül, — az egyik a bőrgyomor-alak bélfalának, a másik a külső bőrnek felel meg.

Ezek a dolgok nem szünnek meg a gerinces foknál se, sőt ellenkezőleg. A zsákállatnál és lényegében a lándzsahalnál is megvan még a tipikus bőrgyomor-álca, a bőrből, gyomorból és szájból álló szabadon uszkáló "ősporonty." De az említett finomabb vonatkozások a dolgok változó folyásában is kézzelfogható világossággal megmaradnak a magasabb és legmagasabb gerinces állatok, sőt az ember magzatéletében is Még az emlősnél is beszélhetünk a "bőrgyomor-állapotról," noha a dolog külső képe kissé eltérőnek mutatkozik, és gondos tanulmányozást követel.

Madnem félszázada, hogy Haeckel először gondolt arra, hogy a bőrgyomormagzat e makacs visszatérésének a magasabb állatoknál ez az értelme: valamennyi ilyen állat, a meduzától az emberig, a családfának egyik igen mélyen fekvő ősalakjától származott le, amelyik egész életében csak ilyen bőrgyomoralak volt. Hogy ócsárolták eleinte ezt a gondolatot! De azután egymásután belátták az állatbuvárok, hogy ez a "gastrula"-fogalom milyen pompásan használható vezérfonál gyanánt. Mindenütt elfogadták a Haeckel rendszerét, — a szó és dolog ma a fejlődéstani leirásokban mint maguktól értetődő dolgok szerepelnek, a bőrgyomor-alak ott van minden tankönyvben; különösen az emlősök gastrula-képződéséről nagy irodalom van, és egészen elfogulatlanul, mint elfogadott és bizonyitott szakkifejezés használják a "gastrulaio" megjelölést a majomnál és embernél is.

És a következtetéseknek most már csak rövid láncolata van hátra. Egy utolsó izzó csucs látmezőnk hajnalpírjában, mielőtt a szürkületi köd fehér függönye mindent elzárna.

A magzatfejlődés az összes állatoknál azzal indul meg, hogy a petesejt sok sejtre oszlik. De ez ugyanaz a mód, ahogyan ma azon élő egysejtüek óriási tömege szaporodik. Ha ilyen lény szaporodni akar, egyszerüen két, négy vagy husz darabra oszlik, melyek mindegyikéből egy uj egész sejt, tehát uj egyén is lesz. Igy tettek, gondolja Haeckel, azok az ősi egysejtüek is. Szaporodtak. Ha az utódok valahogy együttmaradtak, létrejöttek az első nagyobb sejthalmazok. Ismerünk a mai egysejtüek között is néhányat, amelyek igy csinálnak. Eleinte csak egyszerü nyers halmazok, annak idején bizonyosan szintén csak ilyenek voltak. De még az ősnapokban kialakult e sejttársaságokban valami szorosabb társas viszony. Bizonyos mértékü munkamegosztás érvényesült. Mindez egészen magától történt, a viszonyok egyszerü kényszeritő hatása alatt.

A gomolyag sejtjeinek mindegyike — a maga jóvoltáért — táplálkozni akart. Tehát, ahogy a gomolyag a vizen uszott, valamennyi kifelé igyekezett. A gomoly igy egyenlőre hólyaggá alakult át, valamennyi sejt a golyó felületére került s a belseje üres maradt. Aki az "igyekezett" szót nagyon erősnek találja, az tiszta darwini értelemben igy mondhatja: hosszu időn keresztül mindig csak a felület sejtjei maradtak meg, mert csak ezek jutottak táplálékhoz, mig a többiek tönkre mentek; az elhelyezkedési ösztön valahogy öröklődött és igy későbbre is megmaradt valami akarat azok számára, akik ezt egészen mechanisztikusan fogják föl.

Az ehhez a fokhoz vezető utat, mint élő példa, igen szemléletesen mutatja egy csillószőrös golyócska, a magosphaera planula, a norvég tengerekben élő sejtkolónia.

De igy is megvan annak a lehetősége, hogy a tagok részesedése egy kissé eltolódjék.

Ezzel csak azt akartam mondani, hogy az utat körülbelül igy is gondolhatjuk. Misztikus elem semmi esetre sincs a dologban. A bőrgyomor-állat volt: az egysejtü ősállattól az első leges sejtállam, melyben a sejtek együttélése bizonyos munkamegosztást hozott létre.

De ha ez kezdetben, az állati fejlődés ősnapjaiban, mindegyikre érvényes volt, — akkor bizonyára érvényes volt az emberre is. Az első utja is ez volt: az egysejtü ősállattaól az első többsejtü, bőrből és gyomorból álló tömlő-állatig, amely a tengeri rózsának, a meduzának, a gilisztának vagy tengeri csillagnak jóval alatta állott, de annak lehetőségével, hogy ilyenekké legyen, sőt több: lándzsahallá, cápává és szalamandrává és csőrös állattá és ősmajommá — és emberré.

Az egysejtü ősállat alakjában az ember körülbelül az ismert életnek a végső határán van. De ilyen élő magános sejtekből, az állatokkal párhuzamosan vezethetők le a növények is. Még ma is vannak ilyen egysejtü teremtmények, amelyek már más élőlényekből tartják fönt magukat és mellettük vannak mások, amelyek közvetlenül szervtelen nyers anyagokból táplálkoznak, szinte "köveket" esznek, nem pedig hust és kenyeret, mint amazok. Amazokban már ott van az állat, emezekben a növény. A logika értelmében csak azt tehetjük föl, hogy előbb voltak meg a növényi módszer képviselői s a másik, az állati módszer, csak mintegy másodkézből, mint valami amazok bőrére menő élősködés fejlődött ki. A növényi szervezet tisztán földet és levegőt vett föl s a napfény segitségével kenyeret sütött azokból, tápláló növényi anyagot; ebből a fejlődés folyamán ugy jött létre az állati, hogy egyesek a társaik fölfalására vetették magukat és igy a "kenyerüket" kész állapotban kapták. Ennek már az egysejtüeknél meg kellett történnie. Azontul a növények fejlődése a saját külön utjain haladt. Az állat továbbra is a növényt használta ugyan táplálékul, kivéve azon eseteket, mikor magához hasonlókkal táplálkozott; de a további fejlődésük egymástól tökéletesen függetlenül történt. De ráutalunk arra, hogy legeslegalól az ember összeolvad a növényekkel. Hiszen még ma is ezekből táplálkozik.

Csak egy kérdés volna még hátra. Az ember már ott rejtőzött a földi élet legegyszerübb kezdetében, melyet ismerünk. Ő is megy, ahová az élet megy, — ugyszólván le az élet atomjáig. Vajjon nem lehetne az életet általában, mint egészet, valami "másból" levezetni?

E kérdéssel kissé részletesebben kell foglalkoznom. Ez ugyanis igen sok emberre nézve, akik általában gondolkodva foglalkoztak nemük eredetével, mindig a válaszut kérdése volt és a tudománytól távolabb álló körökben szándékosan ilyenül állitották oda. Észreveszik és rámutatnak, hogy a darwinisztikusan iskolázott gondolkodás képviselőinél is sajátságos habozások, ingadozások és eltérések mutatkoznak. Olyanok, akik az ember állati származásának biztos talaján állanak, e végső határkérdésben lényegesen eltérnek egymástól. És az elfogulatlan szemlélőnek legalább is az a benyomása, hogy az élet őseredetét illetőleg igazi tudományos vélemény ez idő szerint még nem alakult ki.

Igy ezt a védtelen pontot hamarosan kihasználják. Elfogadják, hogy idáig a természetes fejlődés mellett szólnak az érvek; de itt még "minden lehetséges." Az "első élet" "teremtés utján" is keletkezhetett, vagyis más szóval: keletkezhetett minden okozati összefüggés, minden logikai alap nélkül.

Már magának ennek a "teremtés" szócskának a dolga is elég különös. Ha én, mint ember, valamit "teremtek," az semmi esetre sem történik ok nélkül. Mindenki tudja, hogy nem lehet a földből hadseregeket csak ugy előteremteni, vagy egy buzatáblát a tenyerünkből elővarázsolni. A kis fiu, aki fából egy kis hajót farag, tudja, hogy ehhez fára, késre, ujjainak erejére és egyéb dolgokra van szüksége. És tényleg mindnyájan, egész gyakorlati életünkben át vagyunk hatva az okozatosságnak ettől a képzetétől, attól, hogy minden, amit cselekedni akarunk, az okozatok láncolatától függ. Ha tehát a teremtésnek ezt a megszokott fogalmát alkalmazzuk az emberre és magára az életre, egy kissé világosabb gondolkodás mellett ez teljesen fedni fogja a dolognak fokról-fokra való természetes fejlődését! Ha az alapvető természeti erőt olyasvalminek gondoljuk el, ami fölfogásunk értelmében teremteni tudott és végre az embert hozta létre, akkor éppen a saját tapasztalataink alapján a teremtésnek semmi más lehetőségét nem látjuk, mint az egyszerü lépésről-lépésre való haladást az okozati kapcsolatok kényszeritő hatalma alatt. A következetes darwinizmus és az a "teremtés" éppen nem zárják ki, sőt az ut egész tartama alatt teljesen fedik egymást. Ebben a fölfogásban a "fejlődés" csupán a logikai vonal a teremtésben, a "teremtésnek" belső logikai módszere.

De nem igy vélekednek a gondolatnak azok a képviselői, akik azt mondják, hogy az "élet első kezdeténél" hirtelen "megszünik" a darwinizmus és helyébe lép a "teremtés." Ezek olyan teremtésre gondolnak, melyre nézve, hacsak a kulturemberiség gondolkodása a varázslatot általánosan el nem fogadja, nincsen semmi tapasztalati példánk: — nevezetesen egy okozati öszszefüggések nélküli, föltételek nélküli és alap nélküli kezdetre, eredetre. Azt mondják, hogy az élet a legeredetibb formájában valami "csoda" által keletkezett. Igen sokan vannak, akik azt hiszik, hogy ezzel egy egész világfölfogást mentettek meg, — a legalább ezen az egyetlen ponton igaznak vett csodával. Ezek közül a legtöbben azt hiszik, hogy a fejlődéstanba és az embernek az ősejtig visszavitt állati származásába is belenyugodhatnak egy második, későbbi csoda fejében. Amiképpen egészen alant az első sejt, ugy egészen fent az első igazi öntudatnyilvánulás, az első igazi embernél, megint minden alap nélküli csoda által történt legyen, függetlenül a máskülönben érvényes, logikai kapcsolatokon alakuló fejlődésfokoktól Ez utóbbi nézet önmagában is, de ama szempontból is csakugyan fölösleges. Véleményem szerint a tudat alapténye már minden egyszerü érzésben benne van. Valamit ilyennek vagy olyannak, világosnak vagy sötétnek, kellemesnek vagy kellemetlennek érzek, — ebben már benne van, azt hiszm, az öntudat legegyszerübb alapformája. De kétségtelen, hogy a legegyszerübb érzés alapjelenségei már annál a legősibb élő sejtnél is meg voltak; az összes jelek, hasonlóságok és következtetések erre mutatnak már az élet legalsóbbrendü ismert formáinál; sőt ez a mai tudomány szempontjából elengedhetetlen alaptulajdonsága mindennek, amit "élőnek" nevezünk. Természetes, hogy az egysejtü ősállat, egy sugárállatka vagy egy amőba, nem mutatja a mi emberi öntudatunknak végtelenül finom gondolkodásjelenségeit De ennek az alapeleme ott van már az ő egészen egyszerü érzésében, mikor a fényt kerüli, vagy érintésre összehuzódik. Ebben, ha nem is tudatosan, de intuitive ott van az "én."

De most az a kérdés, hogy az ilyen "csodát," bár csak ama legelső egyetlen alkalommal is, elfogadhatjuk-e a gondolkodás kibuvójának, hogy vajjon — hiszen csak ezt akarják — az egyébként darwinisztikusan következtető természettudomány elfogadhatja-e legalább föltevésnek? A magam részéről hangsulyoznom kell, hogy hosszu évekig komolyan fáradoztam, hogy e kérdésben ne itéljek elfogultan. Ismételten komolyan kérdeztem magamtól, nem volna-e lehetséges, hogy itt egy kis engedékenységgel a világnézeteknek rendkivül kinos, korunk kulturmunkáját minduntalan megzavaró perpatvarát leszereljük és kibékitsük a pártokat, melyek mindegyikének egy csomó tiszteletreméltó, erkölcsileg kifogástalan, a lét problémáinak utvesztőjében eligazodás után sóvárgó képviselője van. Azt a leplezetlen vallomást kell tennem, hogy minden megfontolás vaskövetkezetességgel mindig ugyanazzal az eredménnyel járt, — egy határozott nemmel. Nem is lehet másképp. Aki hisz az embernek az egysejtü őslényből való okozati kapcsolatokon alapuló, azaz természetes fejlődésében, az a logika szempontjából nem érezhet hajlandóságot arra, hogy az őssejt keletkezésénél teljesen más módszert alkalmazzon és az okság elvét hirtelen ugrással a csoda elvével cserélje föl. Annyi volna ez, mintha a mi, teljesen az okosság elvén fölépült logikai gondolkodásunk, a saját gondolatláncolata számára megkivánná a csodát, — itt, ma, bennem, minden kutatóban. De ma sehogy sem akar ez a csoda megtörténni és bizonyára hiába vártak volna rá annak idején is.

A helyzet ugyanis egyáltalában nem olyan, mint ahogy azt a csoda védelmezői gyakran előadják, — nem oly abszolut kilátástalan az oksági magyarázatra való további törekvések szempontjából. Sőt egész sora van az okozati, a csodától mentes lehetőségeknek, melyekkel az őssejt eredetét megmagyarázni próbálták. Igaz, hogy egymásnak ellentmondanak, egymást kölcsönösen kizárják: — de megvannak és nagyobb részben elég szilárd támpontul szolgálnak, amit nem szabad elhallgatni.

Mondották, hogy az élet történetileg nem okvetlenül ott kezdődött a földön, ahol ma a legrégibb kövült maradványait találjuk. Már évmilliókkal előbb kellett léteznie, hogy elérjen azokhoz a fejlődési fokokhoz, melyek ezekben az első kövületekben mutatkoznak. Közvetlenül semmi sem áll utjában, hogy ezt az ősteret gondolatban tetszés szerint kiterjesszük egészen addig, amit mi emberek az időmértékünkkel örökkévalóságnak nevezzük. A föld már végtelen idők óta rejtegethetett legalsóbbrendü élő lényeket, talán egysejtü amőbákat vagy baktériumokat vagy növényeket, amelyek csak azután, egy későbbi időponttól kezdve, valami különleges időbeli októl indittatva, léptek az emberiség vivő magasabb fejlődés utjára. E föltevés ellenében logikailag semmit sem lehet fölhozni. Az élő őssejt egy örök forma volna a földön ugyanazon értelemben, mint ahogy minden fizikus a melegről ugy szokott beszélni, mint a mindenség erejének örök formájáról. Azonban e gondolat ellen szól egy tisztán természetrajzi érv a geologusoknak a föld történeti sorsára vonatkozó, ma általánosan elfogadott véleményéből kifolyólag. Igen fontos okok szólnak amellett, hogy a föld nagyon régi ősnapokban egészében izzó, rendkivül forró, saját fényével világitó test volt, mint amilyen a nap még ma is, mely anyagi összetételében nagyon hasonlit a földhöz, de mindezeket az anyagokat fehéren izzó és valószinüleg valamennyit még gáz állapotban tartalmazza. Ez okok épületéből ma már letöredezett egy és más. De az alapzat egy része még ma is érvényes és az igazi geologiai szakértők között igen kevés van, aki ne tételezné föl, hogy a föld is valamikor napszerü állapotban volt. De ezzel a föltevéssel megváltozik a helyzet az élet kérdésében. Még ha az évmilliók egész sora előzte is meg a legrégibb kövületet: egyszer mégis csak az izzó földhöz jutunk vissza és a nap hőmérséklete mellett, melyben az összes fémek izzó gázokként lebegnek, nem élhet meg többé és nem élhetett az amőba. Vannak növények, melyek melegforrásokban élnek, s 80 fokos hőmérsékletet elbirnak, száraz baktérium-spórák pedig még magasabb hőfokot is, anélkül, hogy elpusztulnának. De teljesen lehetetlen gondolat, “élő” állapotban elképzelni az amőbát olyan világban, ahol még viz sem jöhet létre, mert a hőség az összes elemeket gázalakban tartja meg, ugy hogy még a vas is ilyen fémgőzt képez. Csak mikor a földgolyó a hideg világürben annyira lehült, hogy létrejött a szilárd kéreg az első vizlecsapódásokkal, élhettek meg az első legegyszerübb élő lények. De még ez a követelés se proklamálja a “csoda” jogát.

Azonban egészben véve még ennek a föltevésnek elfogadására sincs szükségünk, hogy a természetes oksági láncolatot megmentsük. Van még egy másik, melynek mindig sokkal több követője volt, és még több lenne, ha mindig ugy fogalmazták volna meg, ahogy tényleg meg kell fogalmazni, hogy minden durvább ellenvetéssel szemben megállja a helyét.

Már Darwin megkisérlette, hogy a fejlődésnek egy világos törvényét jelölje ki, olyan törvényt, mely nemcsak azt magyarázza meg, hogy az élő lények egymásból származtak le, hanem azt is, hogy miért. Magától értetődő, hogy e törvény az embert is magában foglalná és — ha helyes — megmondaná, miért kellett neki is kifejlődnie. Darwin alapgondolata a következő:

Ime egy egyszerü, ősi állatfaj. A tulajdonságaiban annyira alkalmazkodott a külső viszonyokhoz, hogy életképes, föntarthatja magát és szaporodhatik. De hosszabb idő telik el. Ennek az állatfajnak a helyén egy másikat találunk, amelyik sokkal jobban alkalmazkodott ugyanazokhoz a viszonyokhoz: Sőt: esetleg közben maguk a viszonyok változtak meg s csodálkozunk az uj állatfajon, mely sok dologban még hasonlit a régihez, de amellett az uj viszonyok szerint rendezkedett be, ezekhez alkalmazkodott. Mi történt itt? Ez a kép, mondja Darwin, elvben az egész fejlődés képe. A "nagyobb mértékü" alkalmazkodottság fogalmához tartoznak az agybeli, szellemi haladások is. Igy vezethetett az ut az amőbától az emberig, — tehát az egész előttünk lévő családfán át. Ezt megmagyarázni, annyit jelent, mint az amőbától az emberig való lépést megmagyarázni. És Darwin meg is kisérli a magyarázatot.

Az az első törzsalak utódokat hozott létre. Ezek az utódok — akármilyen okokból — nem voltak teljesen hasonlók. Egyénileg mind különböztek egymástól egy kissé — mint ahogy a testvérek még ma is különböznek egymástól, mint ahogy a növénysarjak változnak, mint ahogy a házinyulnak egyszerre szült fiai különféle szinüek. Nos e különbségekben adva volt egy kis plusz vagy minusz a törzsalak átlagos szinvonalához képest. Egyes utódok tulzások voltak, a szülői szinvonal nagyszerü emelései, a faj zsenijei, mások az átlagot mutatták, ismét mások hitványak. Ezek az utódok harcba kerültek egymással a külső életföltételek miatt, és harcba magukkal a föltételekkel, hogy egy összefoglaló szóval nevezzük, beállott "a létért való küzdelem" közöttük. A sorsuk különböző lett. A zsenik, a legjobban alakalmazkodottak a legjobban állták a harcot, bőségesebben és biztosabban jutottak szaporodáshoz, — az átlagosak és a gyengék elhullottak. Igy végül csak a legjobbak maradtak meg. A családfa további hajtásait csak ezek hozták létre Az ő utódaik közül megint csak a legjobbak maradtak meg. S igy tovább. A nemzedékek során át el kellett következnie az állandó javulásnak, a mind tökéletesebb alkalmazkodásnak és életképességnek.

De ime egy másik lehetőség. A külső viszonyokban változás állott be, mely egyszerre egészen uj irányu követelményeket támasztott. Akkor nem a szülői alkalmazkodást tökéletesebben mutató utódok voltak előnyben, hanem az utódok ama változatai, melyek meglehetősen eltértek a szülőktől, de éppen az uj követelmények irányában. Például megváltozott az éghajlat. Az előbb barna sikságot állandóan hó fedte be. A barna felszinen barna nyulak éltek. Eddig azok az utódok maradtak győztesek a létérti küzdelemben, amelyek legbarnábbak voltak, mert a leselkedő ellenségek a barnát a barna környezetben legkevésbé látták meg. Most hirtelen a fehér lett az ütőkártya. Ha egyéni változatként néhány fehérebb nyul született, ezeknek a védelmi esélye volt a legnagyobb, — megmaradtak, szaporodtak, fokozódó menynyiségben hoztak létre fehér utódokat, melyek közül mindig fehér ülte fehérrel a menyegzőt, — évek mulva az egész nyul-népség fehér volt: alkalmazkodás a hóhoz.

Darwinnak e gondolatmenetében kényszeritő logika van, mihelyest elfogadjuk, hogy az egyéni eltérések mindig elegendő anyagot szolgáltattak a kiválogatódáshoz, hogy mindig volt elegendő "zseni" s esetleg alkalmas "tehetség" is az uj utakhoz. A többi aztán egy matematikai példa, a malomnak őrölnie kell. De a zseni és tehetség dolga a mélyebb kérdések egész bonyodalmát rejti, — ezt már maga Darwin is fölismerte. Mi határozta meg a zsenik és tehetségek számát, ki felel azért, hogy mindig megvannak? E pont körül azóta is állandó vita van, melynek még nem láthatni a végét.

Elgondolható-e, hogy a szülők magaviseletéből szükségszerüen következik bizonyos fajtáju zseniknek a föllépése gyermekeik között? Ha egész életemben erősen üzöm a labdajátékot: — valószinü-e, hogy gyermekeim között született labda-zseni akad?

Kivezető ut gyanánt ez szolgált. A szülők gyakorlata mindinkább egyengeti a talajt a gyermekek számára. Ez lassanként abba az irányba visz, melyet Lamarck már jóval Darwin előtt fölismert. A képesség puszta fokozásához nem is kell többé a létért való küzdelem válogatása: zsenik lesznek az összes utódok a szülőktől nyert iskolázottság alapján. Eltekintve attól, hogy ez nem magyarázza meg a másik esetet s amugy is sokszer fölmondja a szolgálatot (például a föntebbi esetben hogyan fokozzák vagy változtatják meg a szinüket a nyulak "gyakorlás" által?,) nagy nehézségekkel szolgál e gondolat éppen a legfontosabb pontban. Kétségbe vonták, hogy a szülőknek a gyakorlás által szerzett tulajdonságai öröklődhetnek. Ha harminc évig játszom is labdát s ha izmaim és idegeim mind be is vannak erre gyakorolva — és azután gyermeknek adok életet, lehetetlennek mondják, hogy e gyermek testalkata inkább alkalmas a labdajátékhoz, mint akármelyik másiké. Weismann Ágoston egész a szélsőségig vitte az ebben való kételkedést. Nem is mondhatjuk, hogy teljesen bizonyitani tudnánk. De ez az ellenvetés legalább rámutatott, hogy a legegyszerübb tényeken is mily nehéz itt eligazodni.

Más oldalról de Vries Hugo akarta kimutatni, hogy a természetnek ez a változékonysága, zseni- és tehetségképzése, az eredeti értelemben még sokkal nagyszerübb, hatásosabb, mintsem Darwin sejtette, — akármi legyen is az oka. De Vries azt hiszi, hogy az utódok egy egyszerü apró kis változásai mellett még egy nagy és időszakosan föllépő folyamatban mennek át a fajok, melynek következményeképpen időnként az uj és tökéletesebb, öröklékeny formáknak óriási tömegét hozzák létre. E nagy áldásból aztán a létért való küzdelem csak az alsóbbrendüt vagy az egyenlőre értéktelent irtja ki, és igy keletkeznének a mindjárt kész uj fajok. (Mutáció-elmélet.) Ez sincs még eléggé tisztázva, noha kétségtelenül igen jelentős uj szempont. Igy ingadoznak a vélemények, mivel nyilvánvaló, hogy a logikai és ténybeli lehetőségeknek egész tömege van még Darwin alapgondolatain belül és azokon tul is. Bizonyos, hogy "az ember származása" szempontjából a "hogyan"-nak ezek a problémái is rendkivül fontosak. De ezek kivül állanak a családfa kérdésén, ahogyan ezt itt kifejtettük, és nem is kell ezeknek a külön magyarázatát megvárnunk. Itt is, mint az ősterműdés kérdésében, a megismerésnek egy ideiglenes határát érintjük, de ez nem tarthat vissza attól, hogy az e határig már meghóditott terülentek ne örüljünk.

És ilyen meghóditott terület ma az ember származása, — itt nem használ többé semmi panasz és kétkedés. Csak az segit, ha elszántan szembenézünk a dolgokkal. Amellett az ember az marad, a mi. Ezt senki sem veszi el tőle. Megmaradnak az összes ideáljai. Akinek a legmélyebb vallásos érzületében csakugyan életerő, eleven lélek van, az nem fog azon fönnakadni, hogy anynyi meg annyi beláthatatlan idő előtt az őse nemcsak bozontos állatbőrt hordott meztelen válla védelméül, hanem valamikor neki magának is ilyen állati bundája volt, a saját testére ránőve. A költészet sem szünt meg attól, hogy a nap valóságban nem keleten kel föl, hanem a föld fordul vele szembe, sem attól, hogy mi ezt tudjuk. Valójában az igazi vallásos érzés sokkal emberibb valami, a legnagyobb és legelevenebb értelmében, semhogy megtörhetnék az ember történetének szürke valóságán. A mi mai emberi erőnk diadala, hogy az évmilliók sirjába temetkezett multját össze tudjuk állitani. Ez a fölemelő e régi képekben. De érdemetlenek volnánk e diadalra, ha nem volna meg az erőnk ahhoz is, hogy a Mester nyugalmával idézzük föl e szellemeket, aki szeliden mondja: várjatok, — tiétek a kiküzdött mult; de én vagyok, és felettem az én csillagaim vannak!

Magyar Függeléke az IWW Alapszabályainak

AZ INDUSTRIAL Workers of the World az ipari unionizmust képviselő s tanitó munkásszervezet, amely a munkásokat ipari foglalkozásuk szerint szervezi abból a célból, hogy a termelési eszközöket kisajátitsa, a bérrendszert megszüntesse, miáltal egyenlő jogokat teremt a társadalom minden egyes tagja részére.

Ezt a célt csak ugy érheti el a munkásosztály, ha EGY szervezetben tömörül. Az IWW minden nyelvü és minden szinü bérmunkást az Egy Nagy Szervezetbe tömöriti. Ezért szükségtelennek tartja a külön nyelvi vagy faji csoportokat, mert ahogy az iparban együtt dolgozik minden nemzetiségü, vagy szinü munkás, ugy a munkán történő kizsákmányolás ellen is együtt kell a harcot fölvenni és megküzdeni.

Ehhez a tanitáshoz egyik legalkalmasabb eszköz a sajtó. És mivel minden bérmunkás az anyanyelvén jobban megérti az IWW tanitását, az IWW különböző nyelvü lapjaiban hirdeti az Egy Nagy Szervezet szükségességét.

Az IWW magyar sajtója, bár szorosan az Egyetemes Központ ellenőrzése alatt áll, annak terjesztése és fenntartása a magyar bérmunkások kötelessége.

Ebből a célból agitációs bizottságokat létesithetnek, ahol a magyar lap fejlesztését szolgáló ügyeket beszélik meg.

Az agitáció sikeresebb kifejtése céljából legalább egyszer évente értekezleteket tartanak és ha szükségét látják, országos értekezletre jönnek öszsze. Ugy a kerületek, valamint az országos értekezletek határozatait a magyarajku agitációt végző IWW tagok hagyják jóvá vagy vetik el.

A magyar lap ügyeinek intézésére az agitációs csoportok egy szerkesztőt, egy titkár-pénztárnokot s egy hét tagból álló bizottságot választanak egy évi időtartamra, mely bizottságnak föladata őrködni, hogy a lap IWW szellemben iródjék, hogy a lap körüli munkák elintézést nyerjenek, hogy a lap s igy az ipari unionizmus eszméjének terjesztése a magyar munkások között a legszélesebb körben történjék. E célból odatörekszik, hogy a magyar lap állandó tanitómunkája mellett szervezők is fölkeressék a magyarlakta területeket.

A magyar lap bevételeiről és kiadásairól, valamint a nevelést elősegitő céljairól havonta jelentést készit a lapbizottság és azt az agitációs bizottságok titkárainak, a delegátusoknak s a Bérmunkás lapkezelőinek megküldi.

AZ IWW EGYETEMES KÖZPONTJA

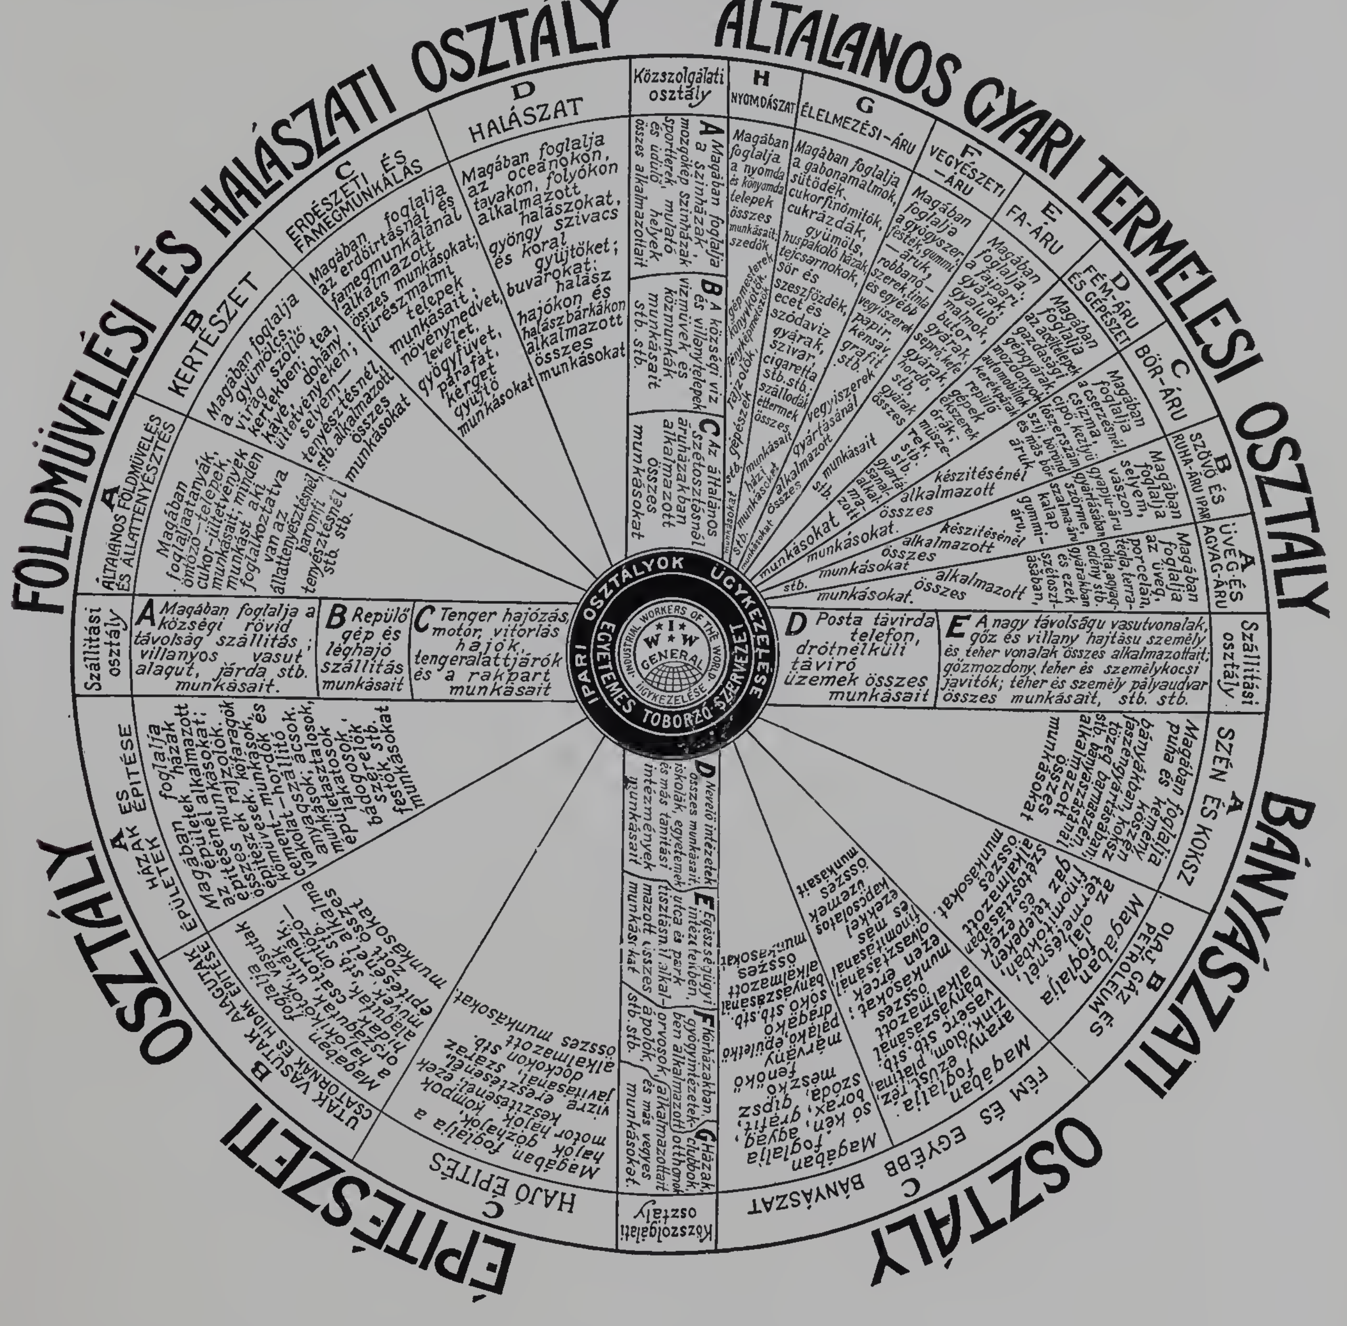
EGY NAGY SZERVEZET
INDUSTRIAL WORKERS OF THE WORLD



FÖLDMÜVELÉSI ÉS HALÁSZATI OSZTÁLY
A ÁLTALÁNOS FÖLDMÜVELÉS ÉS ÁLLATTENYÉSZTÉS
Magában foglalja a öntözö—telepek, cukor-ültetvények, munkásait; minden munkást aki foglalkoztatva van az állattenyésztésnél baromfi tenyésztésnél stb. stb.
B KERTÉSZET
Magában foglalja a gyümölcs, virág, szöllö kertekben; tea, kávé, dohány ültetvényeken; selyem— tenyésztésnél, stb. alkalmazott összes munkásokat
C ERDÉSZETI ÉS FAMEGMUNKÁLÁS
Magában foglalja az erdöirtásnál és famegmunkálásnál alkalmazott összes munkásokat; fürészmalmi telepek munkásait; növénynedvet, levelet, gyógyfüvet, parafát, kérget gyüjtö munkásokat
D HALÁSZAT
Magában foglalja az oceánokon, tavakon, folyókon alkalmazott halászokat, gyöngy szivacs és korál gyüjtöket; buvárokat; halász hajókon és halászbárkákon alkalmazott összes munkásokat
Közszolgálati osztály
A Magában foglalja a szinházak, mozgókép szinházak sportterek, mulató és üdülö helyek összes alkalmazottait
B A községi viz és villanytelepek vizmüvek és közmunkák munkásait stb. stb.
C Az általános szétosztásnál áruházakban alkalmazott összes munkásokat
ÁLTALÁNOS GYÁRI TERMELÉSI OSZTÁLY
H NYOMDÁSZAT
Magában foglalja a nyomda és könyomda telepek összes munkásait; szedök gépmesterek könyvkötök, fényképmetszök, rajzolók, gépészek stb. munkásokat
G ÉLELMEZÉSI-ÁRU
Magában foglalja a gabonamalmok, sütödék, cukorfinomitók, cukrázdák, gyümölcs, huspakoló házak, tejcsarnokok, sör és szeszfözdék, ecet és szódaviz gyárak, szivar, cigaretta stb. stb.; szállodák éttermek összes munkásait házi munkásokat
F VEGYÉSZETI —ÁRU
Magában foglalja a gyógyszer, festék, gummi —áruk, robbanó— szerek, tinta és egyébb vegyiszerek papir, kénsav, grafit stb. vegyiszerek gyártásánál alkalmazott összes
E FA-ÁRU
Magában foglalja a faipari gyárak; gyaluló malmok, butor gyárak, sepro, kefe gyárak, hordó, stb. gyárak összes munkásait stb.
D FÉM-ÁRU ÉS GÉPÉSZET
Magában foglalja az acéltelepek gazdasági gépgyárak, mozdonyok automobilok kerékpárak repülö gépek ékszerek órák; müsze- rek, stb. stb. gyártásánál alkalmazott munkásokat
C BÖR-ÁRU
Magában foglalja a cserzésnél, a csizma, cipö, keztyü, lószerszám szij, börönd és más bör áruk készitésénél alkalmazott összes munkásokat.
B SZÖVÖ ÉS RUHA-ÁRU IPAR
Magában foglalja selyem, vászon gyapju-áru gyártásában szörme, szalma-áru, kalap, gummi- áru, készitésénél alkalmazott összes munkásokat
A ÜVEG ÉS AGYAG-ÁRU
Magában foglalja az üveg, porcelán, tégla, terra- cotta, agyag- edény stb. gyárakban és ezek szétoszt- ásában, stb. alkalmazott összes munkásokat.
Szállitási osztály
A Magában foglalja a községi rövid távolság szállitás; villanyos vasut alagut, járda stb. munkásait.
B Repülö gép és léghajó szállitás munkásait
C Tenger hajózás, motor, vitorlás hajók, tengeralattjárók és a rakpart munkásait
D Posta távirda telefon, drótnélküli táviró üzemek összes munkásait
E A nagy távolságu vasutvonalak, göz és villany hajtásu személy és teher vonalak összes alkalmazottait; gözmozdony, teher és személykocsi javitók; teher és személy pályaudvar összes munkásait, stb. stb.
Szállitási osztály

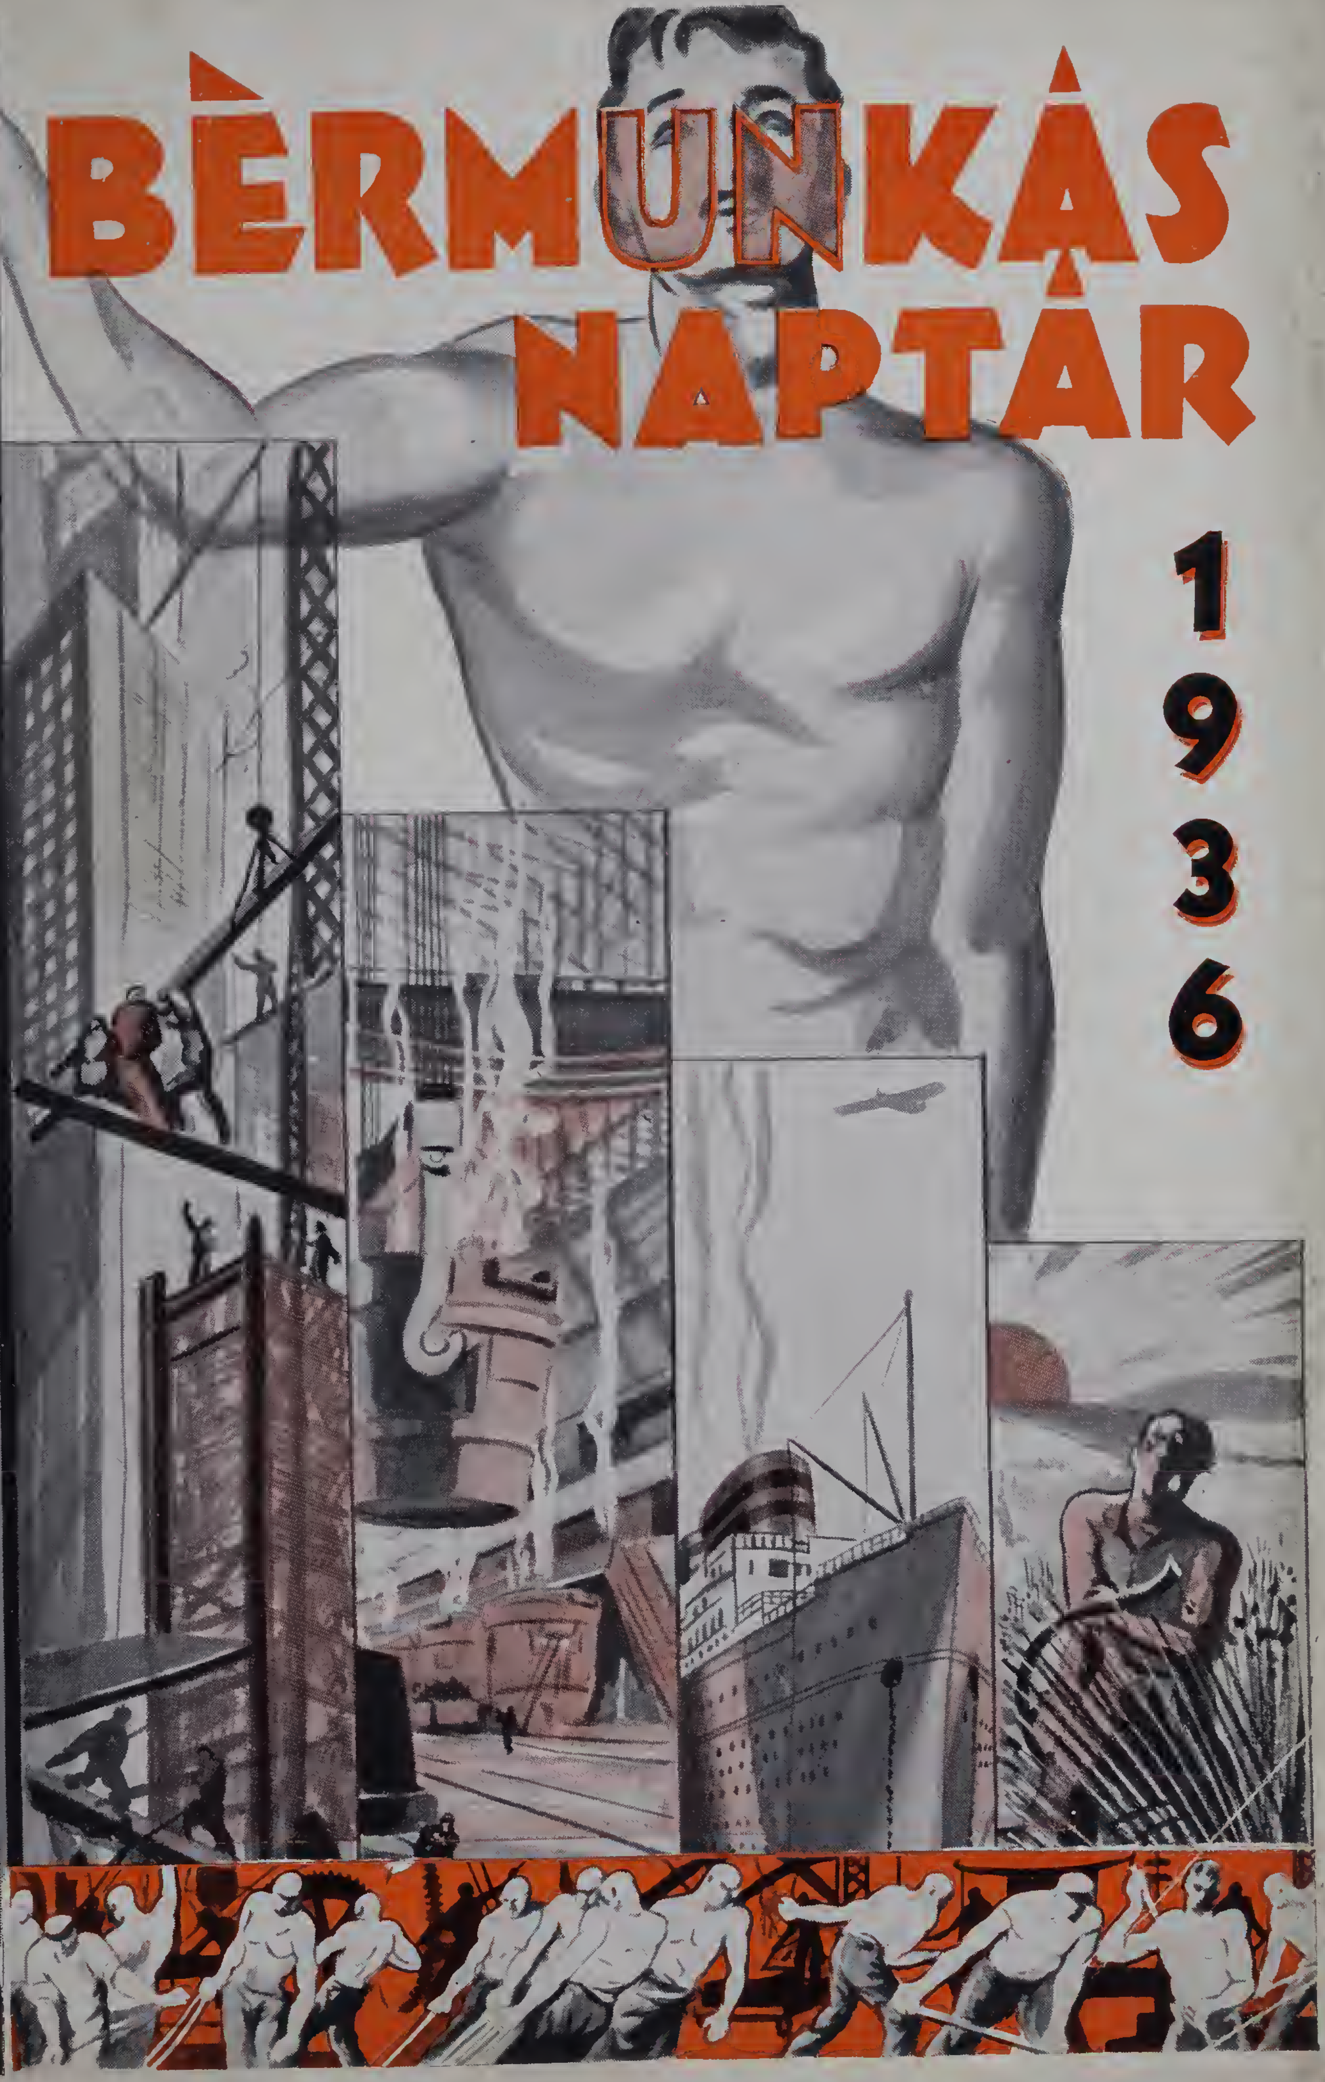
BÉRMUNKÁS NAPTÁR

1936

I.W.W.

IPARI DEMOCRACIA



AZ
INDUSTIAL WORKERS OF THE WORLD
ELVINYILATKOZATA

A MUNKÁSOSZTÁLY és a munkáltató osztály között semmi közösség nincsen. Nem lehet béke mindaddig, amig éhség és nélkülözés található a dolgozó emberek milliói között s az élet összes javait ama kevesek birják, akikből a munkáltató osztály áll.

- E két osztály között küzdelemnek kell folynia mindaddig, mig a világ munkásai mint osztály szervezkednek, birtokukba veszik a földet, a termelő eszközöket és megszüntetik a bérrendszert.

- Ugy találjuk, hogy az iparok igazgatásának mind kevesebb és kevesebb kezekbeni összpontosulása a szakszervezeteket (trade unions) képtelenné teszi arra, hogy a munkáltató osztály egyre növekvő hatalmával felvegyék a küzdelmet. A szakszervezetek olyan állapotot ápolnak, amely lehetővé teszi, hogy a munkások egyik csoportját az ugyanazon iparban dolgozó másik csoport ellen uszitsák és ezáltal elősegitik, hogy bérharc esetén egymást verik le. A szakszervezetek segitenek a munkáltató osztálynak a munkásokba beoltani ama tévhitet, hogy a munkáltatókkal közös érdekeik vannak.

- E szomoru állapotokat megváltoztatni és a munkásosztály érdekeit megóvni csakis olykép felépitett szervezettel lehet, melynek minden az egy iparban — vagy ha kell, valamennyi iparban — dolgozó tagjai beszüntessék a munkát bármikor ha sztrájk vagy kizárás van annak valamelyik osztályában, igy az egyen esett sérelmet az összesség sérelmének tekinti.

- E maradi jelszó helyett: "Tisztességes napibért tisztességes napi munkáért," ezt a forradalmi jelszót irjuk a zászlónkra: "LE A BÉRRENDSZERREL!"

- A munkásosztály történelmi hivatása, hogy megszüntesse a bérrendszert. A termelő hadsereget nemcsak a tőkésekkel való mindennapi harcra kell szervezni, hanem arra is, hogy folytassa a termelést akkor, amikor a bérrendszer már elpusztult. Az ipari szervezkedéssel az uj társadalom szerkezetét épitjük a régi társadalom keretein belül.

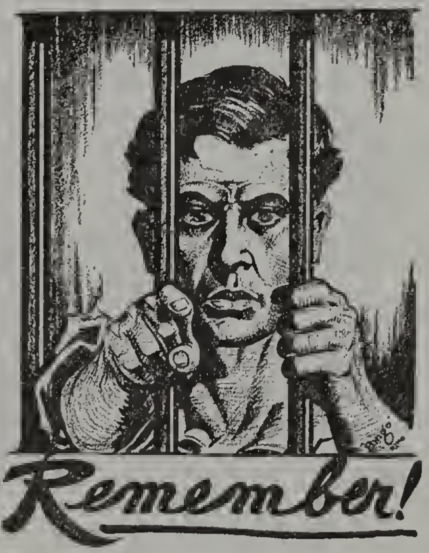
AZ 1935-ös esztendő elkeseredett harcokkal köszöntött az ipari unionistákra. A clevelandi Terminal Towert takaritó munkásnők harcából kifolyólag szilveszter este orozva megtámadták az IWW két szervezőjét és a szenvedett sérülések több mint egy hétig a kórház ágyához kötötték Tor Cedervall mtársat. A takaritó munkásnők 6 hónapos sztrájkja és a National Screw ellen folytatott harc sok tanulságot nyujtott nem csak e harcok közvetlen résztvevőinek, de minden gondolkozni tudó munkásnak, hogy az iparilag kifejlett országban a munkásság legkisebb bérkövetelésénél is nem egy gyár vagy műhely munkaadójával találja magát szemben, hanem a munkáltatók országos szövetségével amely hatalmas tőkével rendelkezik abból a célból, hogy a munkások egy nagyobb darab kenyérért inditott harcát leverjék.



A munkások szolidaritásának a megbontása, az osztályához hü munkások kegyetlen üldözésére nem válogatós az eszközeiben ez a szövetkezet, amely csak Clevelandon 272 munkást és munkásnőt hurcolt a rendőrség börtönébe. Ezek között Mike Lindway magyar munkást, akit frame-up-al 1-től 20 esztendeig terjedő időre küdték Columbus, O., hirhedt fegyházába. Amikor ezen sorokat irjuk, sikerült Lindway mtársat 8 hónapot elszenvedett börtönéből kiszabaditani, de az állam ügyésze felsőbb utasitásra ujabb vádat kovácsolt a profit ellen harcoló mtársunk ellen. Más államok börtöneiben is találunk munkásembereket, akiknek egyedüli bünök, hogy emberi érzékük és értelmük fellázadt a határt nem ismerő kizsákmányolás ellen.

19-ik esztendeje a Saint Quentin börtön lakója Tom Mooney, aki csak röviddel ezelőtt tett bizonyságot arról, hogy ma is ipari forradalmár, az IWW törhetetlen hive.

A Kentucky bányabárók is ugy hiszik, hogy a rozsdának adhatják azokat a börtön cella kulcsokat, amelyek Hightower, Johnes és a többi életfogytiglan elitélt bányamunkásokat tartja fogva hamis vádak alapján.

Egyetlen munkás sem állithatja, hogy ő maga mentve van attól, hogy hasonló helyzetbe kerüljön, mert hiszen az emlitettek mindegyike is a legszentebbet akarta a családja és munkástársai érdekében cselekedni. Azt, amit minden munkásnak tenni kell.

Mit tennél te, mit tene a családod, ha te kerülnél hasonló helyzetbe?

Csak azt és csak annyit kérünk tőletek az osztályharc martyrjai részére. Ahol megfordultok, hirdessétek azok ártatlanságát és segitsetek anyagi alapot teremteni ügyük igazságának bizonyitására. Minden támogatás General Defense 2422 N. Halsted St. Cchicago, Ill. küldöndő.

A munkásosztály martyrjai csak a munkásoktól várják szabadulásuk napját. Dolgozzunk, cselekedjünk az érdekükben, hogy a munkásmozgalomnak csak harcosai, csak épitői legyenek, akik az egyen esett sérelmet az összesség sérelmének tekintik.

"...ÉS HA NINCS, HÁT MIÉRT NINCS?"

IRTA:

WAGNER JÓZSEF

TÖBB MINT KÉT évtized pergett le 1914 óta, amikor is Szerajevóban egy szikra lángba boritotta az imperialista puskaporos hordót és az emberiséget a világháboruba sodorta. A háboruskodó országok munkásainak nagy része szervezve volt jól fegyelmezett politikai pártokba és szakszervezetekbe, amelyeknek programjában volt a nemzetközi munkásság szolidaritása, a kapitalizmus megdöntése és a szocializmus keresztül vitele. Mindennek dacára képtelenek voltak meggátolni vagy még csak elódázni is a kitörését a történelem legborzasztóbb vérfürdőjének. Éppen ellenkezőleg, szervezeteik gépezete katonai sorozó és háborus propaganda ügynökséggé alakult. Hogyan lehetett ez?

Az elmult husz esztendőben, — amióta a világháboru befejeződött, — óriási halmaz könyvek, füzetek és cikkek jelentek meg és az előadások végtelen sorozata folyt le, melyekben magyarázták az okait amely kényszeritette ezeket az "osztálytudatos szervezeteket ebbe a ferde helyzetbe. Amint a háboru veszedelme fenyegette őket, éppen az ellenkezőjét kellett cselekedniök, mint amire az elmult félévszázadon át készülődtek.

A szocial demokraták magyarázata és védekezése az igazságnak megfelelőleg a következőképpen foglalható össze. "Azon hosszu idő alatt, amig ezek a szervezetek felépültek, nemzetközileg béke uralkodott, ennélfogva amig ezek a szervezett munkások bőséges gyakorlatot szereztek, hogy hogyan kell harcolni a reformokért, mühely viszonyokért, a háboru hiánya folytán, azon idő alatt minden tényleges, gyakorlat hiányában állottak a háboruval szembeni védekezések eszközeinek, igy aztán teljesen készületlenül meglepettve estek az imperialista csapdába, amikor a háboru már folyt, a védekezés teljesen lehetetlenné vált."

Ugyanakkor, amikor eme sorokat irjuk messze Afrikában az ágyuk bömbölnek, a levegő mérges gázokkal telve, s a védtelen nők és gyermekek testét marcangolja halálra, és több mint valószinü, hogy egy ujabb világháboru kitörésének előestélyén állunk, amely hatalmasabb pusztitást fog végbevinni, mint az elmult világháboru. Ujból felvetődik a kérdés, hogy a munkásosztály 1935-ben, amikor még az elmult háboru borzalmai élénk emlékezetében van és 21 éves tanulás és megvitatás után, jobban van-e felszerelve egy ujabb világháboru megakadályozására, mint az elmult világháboru kitörésekor volt? És ha nincs, hát miért nincs?

Az első kérdésre vonatkozólag minden osztálytudatos egyén tisztában van a válasszal. A második kérdést illetőleg, amiért a munkásosztály ujból készületlen maradt, köszönheti a régi szocialdemokrata vezetőség taktikája és ideológiájának, minek után teljesen diszkreditálta magát azon nyomorult cselekvéséért, melyet az elmult háboruban követett el. Azóta ujból sikerült nekik az európai országokban a munkásosztály nyakára ülni és most, éppen ugy mint 1914-ben taktikájuk és ideológiájuk érvényesül a munkások szervezeteiben. Ne értsük félre, ebben a szociáldemokrata tömegben belevannak kapcsolva az ugynevezett kommunisták, vagy bolshevikiek is teljes számban.

Mellékes az, hogy a bolshevikik és a szocdemek mennyire gyülölik egymást, mennyire harcolnak egymás ellen, egy és ugyanazon anyagból vannak gyurva, egy és azon jó madarak, a munkásosztály kérdéseiben álláspontjuk egy és ugyanaz. Végelemzésben mindketten egyenlően **ellene vannak, hogy a munkásosztály saját magát szabaditsa fel.**

Az igazi tervük a munkásosztály feletti uralom, hogy diktálhassanak felette. Külömböznek a módszerek használatában, céljuk elérése érdekében, de céljuk egy és ugyanazok, a munkásosztály feletti diktatura. A bolshevikiek módszere a nyilt, kegyetlen diktatura, a szociáldemokrácia feldisziti a diktaturát "demokráciával." A szocdem előkelősége karöltve kiván uralkodni a burzsoáziával; a bolsheviki komiszárok pedig egyedül kivánnak uralmon lenni. Egyiknek a programja sem foglalja magában a munkásosztály felszabaditását a bérrabszolgaság alól. Mellékes az, hogy melyik jut uralomra, az ő győzelmeik nem a munkásosztály győzelme; a munkásosztály számára még mindig megmarad a feladat, hogy felszabaditsák magukat és megteremtsék az osztálynélküli társadalmat.

Állj meg! Gondolkozzál! És rá jössz, hogy szervezkedned kell.

A BOLSHEVIKI URALOM TELJESITMÉNYE.

Az elmult 18 esztendőben a világ egyik leghatalmasabb országában a bolshevikiek kormányoznak. Uralomra jutottak, amikor az orosz cári kormány a hosszadalmas háboruviselés nyomán, — valamint az uralkodó osztályok — elveszitettek minden bizalmat s a kormány összeomlott s eme hatalmas ország anarhiával állott szemben. Az egyetlen szervezett tömeg — akik kihasználták a kedvező alkalmat — a szocialista pártok és az általuk kontrolált szakszervezetek voltak. Oroszország ipari hátramaradottsága folytán ezek a szervezetek sem voltak kifejlődve s ezek a fejletlen kis szervezetek is két részre voltak oszolva s különkülön programmal szervezték az orosz népet.

A mérsékelt szociáldemokraták azt kivánták, hogy a széjjel züllött burzsoázia maradványait hozzák össze és emeljék őket uralomra s támogassák őket mindaddig, amig a kapitalizmus hivatását be nem fejezte "mert amig ez meg nem történik nem jöhet létre a szocializmus."

A bolshevik párt pedig ugy gondolkodott, hogy a kapitalizmus Oroszországban összeomlott, ami azt jelenti, hogy "hivatása befejeződött" ennélfogva a szocialista uralmat kell felállitani a megválasztott munkások, parasztok és a katonák szoviet tanácsa által.

Következetesen e két párt programja nem volt összeegyezhető, ennélfogva bármelyik is jutott volna uralomra, az egyiknek pusztulnia kell.

A szoviet oldal győzedelmeskedett és minden más össze lett törve, az adott viszonyokhoz mérten, s ez nem is történhetett másképpen. De ne tévesszünk szemelől egy nagyon fontos tényezőt. A szoviet kormány megalakulásakor a munkások, parasztok és az egyenruhás katonák szervezeteinek képviselete volt. A kiváltságos idők következményeképpen az országban polgárháboru dult, az idegen nemzetek beavatkozása, az iparok összeroppanása sokféle határozatokat szőttek, de azért mindenki meg volt elégedve s reménykedtek, hogy ezek mind megszünnek, amint a termelés és a béke helyre áll.

És éppen az ellenkezője történt. Amint a bel- és külügyi helyzet fokozatosan javult és az állam intézményei megerősödtek, a munkásosztály ugyanoly mértékben veszitette jogait. Amig ma, 18 év multával a szoviet uralom megalakulása után nem maradt semmi egyébb számára mint a név — SZOVIET.

A munkásoknak nincsen joguk véleményeiket nyilvánitani; a munkások szakszervezeteit a kormány felügyelete alá vették, s a munkásoknak annyi joguk sincsen, mint az amerikai company uniok tagságának. A munkások bérrabszolgák, akik külömböző bérekért dolgoznak, a fizetési mennyiséget a kormány komiszárjai, döntés utján szabályozzák. A munkások sztrájkra való jogait elkobozták, s minden kisérletet sulyos büntetés mellett nyomnak el, a munkások kizsákmányolása teljesen kapitalista mintára folyik.

Igy vitte keresztül a bolsheviki párt a programját! A bolshevikiek Páris, London, Moszkva, Chicago, New York, Tokió, Róma, Belgrád, Berlin vagy Budapesten biztositanak bennünket, hogy ami végbemegy ma Oroszországba, ők ugyanazt kivánják végrehajtani mindenütt s a mai Szoviet Oroszország példája követésre méltó, minden más ország által. Bármint is kérkednek programjuk felől, amint azt Oroszországban végrehajtották, egész biztosan nem vezet a proletáriátus felszabaditása felé.

SZOCIÁLDEMOKRÁCIA.

A mérsékelt szociáldemokraták megbélyegzik a bolshevizmust és semmi közösséget nem vállalnak vele és biztositanak bennünket arról, hogy az ő programjuk teljesen az ellenkezője, mert ők a **demokrácia** hivei, s meghatározatlan időkre a burzsoa demokrácia követői és szociáldemokráciát kivánnak a messze jövő számára.

A szociáldemokrácia kimagasló egyénei Kautzky, Bauer, Adlertől Garamiig megegyeznek ezen a ponton. Garami a "Forrongó Magyarország" cimü füzetében nagyszerüen beszámol a magyarországi 1917—19-es forradalmi korszakról. Ebben a munkájában többszörösen felemliti, hogy a szociáldemokrácia hivatása megteremteni a kapitalista, burzsoa-demokráciát és a szociáldemokratáknak meghatározatlan időre támogatniok kell az uralmon levő kapitalista demokráciát, amig az "betöltötte hivatását." Garami éppen ugy, mint a többi kimagasló szociáldemokrata próféták elfelejtik nekünk megmagyarázni, hogy hogyan határoznak, amikor a kapitalistaosztály hivatása "beteljesült." Elkeseredetten ellenzi a bolshevizmust. Garami azt állitja, hogy a fehér terror és a fascizmus Magyarországon a reakciós Kun Béla vörös terrorja nyomán keletkezett s ha nem lett volna vörös terror nem juthatott volna Horthy diktárosághoz Magyarországon. Bizonyitékul felhozza Ausztriát, Németországot, ahol nem sikerült a kommunistáknak a forradalmat kisajátitani, ahol a szociáldemokraták betöltötték "hivatásukat" és a bukott burzsoáziát visszahelyezték az uralomra. Ezekután biztositottak bennünket, hogy ebben a két országban a békés demokratikus burzsoázián keresztül fejlődnek át a szocializmusba. Garami Ernő 1920-ban irta könyvét s ma mind a két becézett ország népe fascista uralom alatt nyög.

A fentebb elmondattakból itélve

tisztán látjuk, hogy a szociáldemokrácia eme két intézménye nem vezet bennünket, a munkásosztály felszabaditásához a bérrabszolgaság alól. Nem is lehetnek segitségére a munkásosztálynak a háboru megakadályozásában, mert ténylegesen ma mindkét rész a háborut dicsőiti. Nekik hivatásaik, kötelezettségeik vannak, amelyek egy cseppet sem a munkásosztály hivatásai. Amig a munkásosztály a politikusok karmai között marad, addig egész biztosan elárulják, kiszolgáltatják őt az iperializmus számára. A munkásosztály felszabaditását csak a munkásosztály maga valósithatja meg, saját szervezetein keresztül.

Az IWW a munkásosztály szervezete. A programja kizárólagosan a munkásosztály programja. Az IWW tagjai nem sajátitják ki a magukszámára a szervezet programját, az összmunkássággal egyetemben élvezzük annak gyümölcsét.

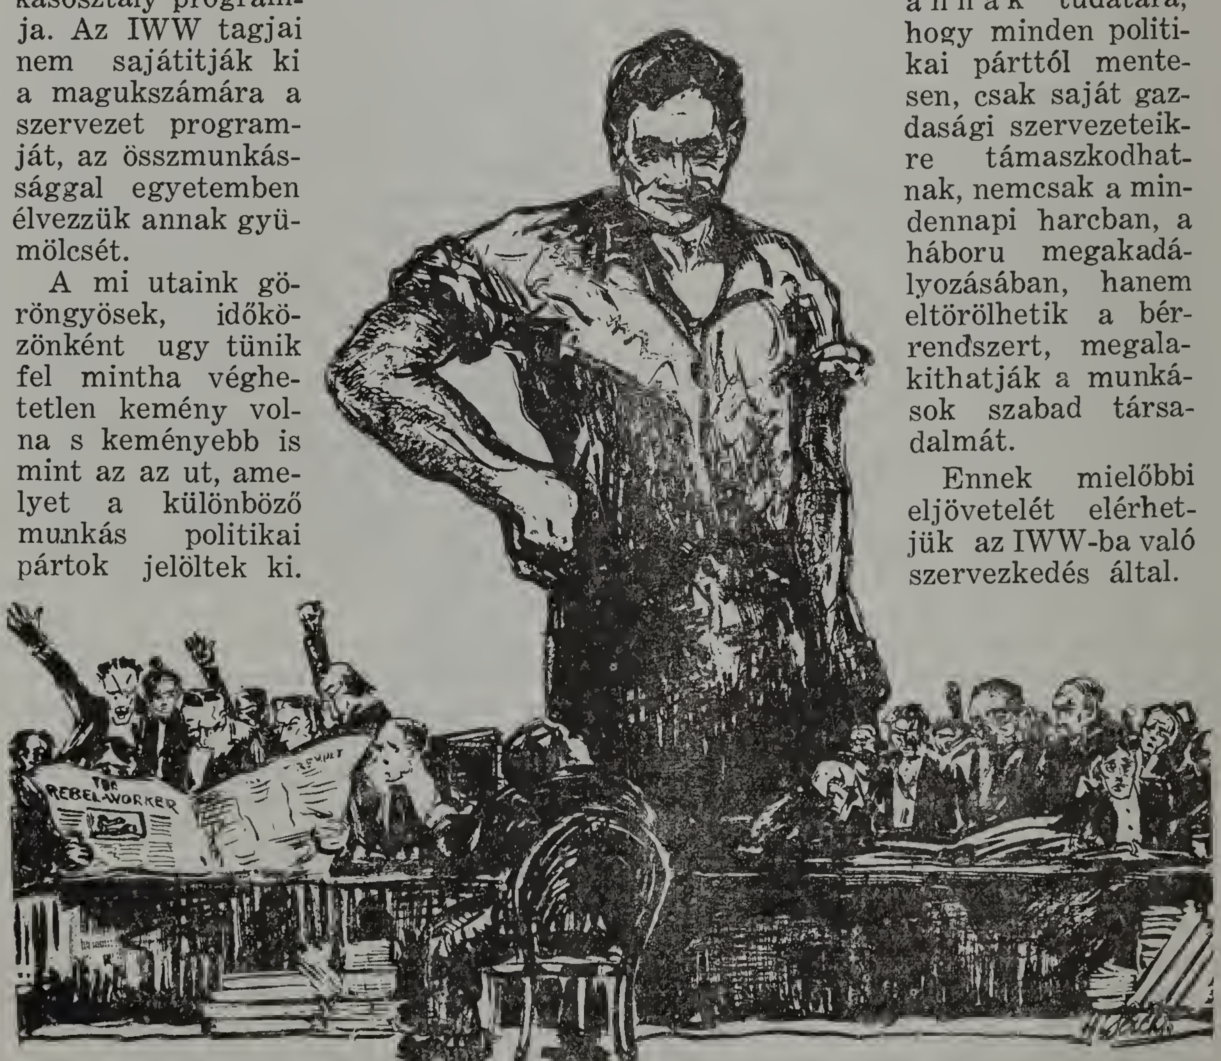
A mi utaink göröngyösek, időközönként ugy tünik fel mintha véghetetlen kemény volna s keményebb is mint az az ut, amelyet a különböző munkás politikai pártok jelöltek ki. De bármily kemény legyen is az, ez az egyetlen ut a munkásosztály kitüzött céljának elérésére.

Mindnagyobb azon munkások száma, akik tudatára ébredtek a politikai pártok tehetetlenségének s folytonosan mindnagyobb számban lépnek osztályszervezeteikbe az IWW-ba.

A vas és fémmunkások után az erdei és fürészmalmi munkások jönnek vissza az IWW-ba. A mult hónapban — szeptember — több mint egyezer lépett be, s ez csak a kezdet. Amint egy iparban emelkedik a tagok száma, más iparok munkásait serkentik a belépésre.

Ugyanezen a folyamaton megy keresztül a többi országok munkássága is. Mindig több és több bérrabszolga jön annak tudatára, hogy minden politikai párttól mentesen, csak saját gazdasági szervezeteikre támaszkodhatnak, nemcsak a mindennapi harcban, a háboru megakadályozásában, hanem eltörölhetik a bérrendszert, megalakithatják a munkások szabad társadalmát.

Ennek mielőbbi eljövetelét elérhetjük az IWW-ba való szervezkedés által.



Tanulás. — Szervezkedés. — Harc. A munkásosztályt mindenek fölé helyezi.

NÉPMOZGALMAK A REFORMÁCIÓ KORSZAKÁBAN

IRTA:

VLASITS MÁRTON

A REFORMÁCIÓ fogalom alatt átalakitást vagy javitást értünk. Jelen irásom azon korszakról fog szólni, amikor a pápaság és a katholikus klérus által rabigában tartott lelkiismereti szabadság első csirái mutatkoztak. Általában a reformációt hitujitásnak is nevezik ha csak arról a koról beszélünk, amikor a hitujitási harc tényleg megkezdődött. De nem az a szándékom, hogy ezen a helyen hitujitásról vagy vallási dogmákról irjak. Nem ide valók ezek. Szándékom az, hogy amennyire tőlem telik megismertessem azokkal akik még nem ismerik a reformáció előtti és korabeli társadalmi és gazdasági viszonyokat. Ha ezt megismerik és megértik az olvasók, ugy meg fogják érteni azt is, hogy miért volt reformáció és miért volt szükség a "hitujitásra."

Ha a történelemben előforduló eseményekről hallunk vagy beszélünk, föltétlenül szükséges annak a kornak a társadalmi és gazdasági viszonyait ismerni. Ezeknek az ismerése nélkül a történelmi események egyszerü elbeszélések vagy mesék. Szórakozásból meg lehet a mesét is hallgatni, vagy az elbeszélést elolvasni. De ha mint öntudatos munkások tanulni és okulni akarunk, a történelmet sohase olvassuk annak a kornak ismerése nélkül, mert az nem tanulás, legfölebb szórakozás.

Amikor a római birodalom a kereszténységet államvallássá nyilvánitotta a római püspöknek nem volt nagyobb hatásköre mint akármelyik püspöknek a római birodalom keretein belül. Csak akkor amikor a római birodalom felosztott a belső gyengesége és kivülről való nyomás folytán kezdtek a római püspökök minél nagyobb jogokat és hatalmat maguknak vindikálni. Róma lévén, dacára a birodalom összeomlásának a szellemi élet központja, ha ugyan szellemi életről az akkori időkben szólni lehet. Az irás és olvasás tudományával csupán a felsőbb papság rendelkezett. Tény az, hogy nagy Károly (Charlemagne) császár nem tudott irni, vagy olvasni. A keresztény egyház egyik föladatának tekintette, hogy mindent amit a görög bölcsészet, szobrászat, a római irodalom, müvészet és épitészet alkotott az akkori korral elfelejtessen. Lehet mondani, hogy a kereszténység megalapitásának első ezer esztendejében az emberiség szellemi haladása sok ezer esztendővel visszafejlődött.

Ilyen körülmények folytán nem csoda ha a papság, amely már ekkor egy hatalmat képzett, a keresztény vallást, amely a józan észen és az emberszereteten alapult, a saját céljainak megfelelően átformálta sőt eltorzitotta. Ez a korszak volt a csodák, a jelenések és a legtökéletesebb babonák korszaka. A katholikus egyház által formált és beiktatott ugynevezett csodatevő "szentek" majdnem mind ebből a korból valók. Méltán nevezi a történelem ezt a kort az emberiség legsötétebb korszakának. Nem lehet azon csodálkozni, hogy a papság hatalma ebben a korban igen megerősödött, ugy befolyásban mint gazdaságilag. Mérhetlen vagyonok ura lett. A klastromok és alapitványok gombamódra szaporodtak. A keresztény vallás megalapitójának a mondása, hogy "könnyebb egy tevének a tüfokán átmenni mint egy gazdagnak üdvözölni" érvénytelenné vált. Mert az egyház gazdag volt, nagyon természetes, hogy egyes alkalmakkor káprázatos pompát fejtett ki. Birtokaikon éppen ugy szipolyozták a népet mint a világi urak. Hatalmuk annyira megnőtt, hogy csak olyan világi uralkodó volt lehetséges aki jó viszonyban volt a felsőbb papsággal vagy a pápával. Ha valamelyik az uralkodók közül mégis ujat mert huzni a pápával ugy ennek az lett a következménye, hogy a pápa az illető uralkodót kiátkozta. Ami annyit jelentett az akkori időben, mint ma a sztrájktörő az osztálytudatos munkások között.

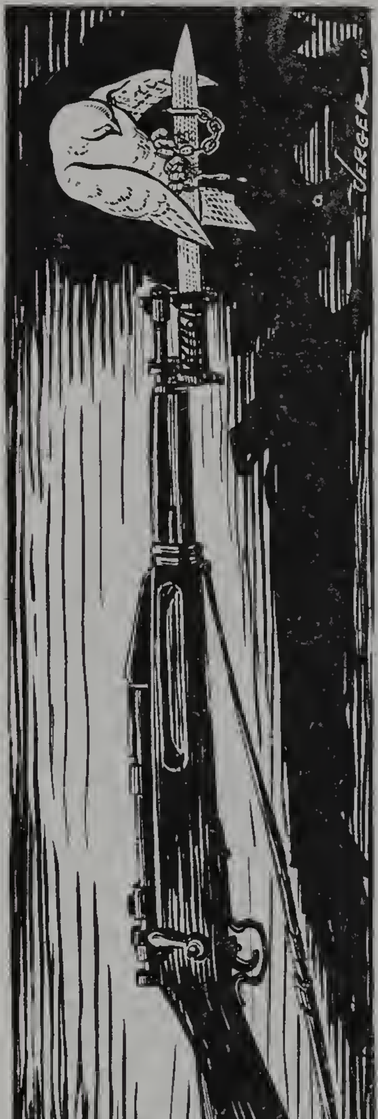
Ezeken az állapotokon évszázadokon át alig történt változás. Az idő kerekei akkor még igen lassan forogtak. A papságnak sikerült az ókorban virágzó görög és római müvészet, irodalom és müvelődés minden emlékét elfelejtetni. Mellette éber figyelemmel őrködött, nehogy valahol egy uj eszme, vagy gondolat fölszinre kerüljön.

Mi tudjuk azt, hogy a szólás és sajtószabadság jelentőségét csak azok értik meg, akik azt gyakorolják. A nem gondolkodó és alacsony szellemi fokon élő embert hidegen hagyja a szólás és sajtószabadság megnyirbálása vagy megvonása. Nem törődik vele. hogy a papság ilyenformán való uralkodása lehetséges, hogy az akkori világi uralkodó osztály nem tudta felfogni annak a jelentőségét, és ha igen, még akkor sem volt bátorsága ellene harcolni. Maga a nép alig vehető tekintetbe, azon oknál fogva, mert állati sorsban élt, szellemi élete nem volt. Ugy az egyházi mint világi urai igyekeztek tudatlanságban tartani. A reformáció gondolata nem is a népből indult ki. Kétségkivül voltak már a reformáció előtt is népmozgalmak vallási jelleggel, de hamar el lettek nyomva, mert az idő nem volt érett, vagyis a világi uralkodó osztály egy rétege sem vállalt velük közösséget, azon oknál fogva, hogy a nemesi osztályban nem élesedtek ki az ellentétek a gazdag és az alsóbb nemesség között. Egy ilyen mozgalom először Csehországban tört ki hatalmas erővel a 15-ik század első felében amelyet a történelem Huszita mozgalomnak és háborunak nevezett el.

A polgári történelem ezt a mozgalmat ugy magyarázza, hogy Husz János, az akkor már virágzó prágai egyetem tanára másképpen magyarázta a keresztény vallás lényegét mint a katholikus papság. Husz János emiatt felelőségre vonatott, majd a konstanzi zsinat elé lett citálva, hogy tanait vonja vissza. Ezt Husz megtagadta, amiért Husz Jánost máglyán elégették. E miatt zavargások törtek ki, amelyek fél Európát lángba boritották.

Az olvasó az előbbiekből azt a tényt olvassa ki, hogy fél Európa lángba borult Husz János elégetése miatt, mert ő például a katholikus egyházban divó vallási szertartást megváltoztatni akarta. De ne igy fogjuk fel a történelmet.

Csehország ahonan ez a mozgalom kiindult akkor már Európának iparilag egyik legelőrehaladottabb országa volt. A gazdasági viszonyok általánosságban olyanok voltak, mint Európa más országaiban, például Olasz, Francia, Angol vagy Németországban. A



A kapitalista rendszerben a békegalamb csak a szuronyok erdejében pihenhet meg.

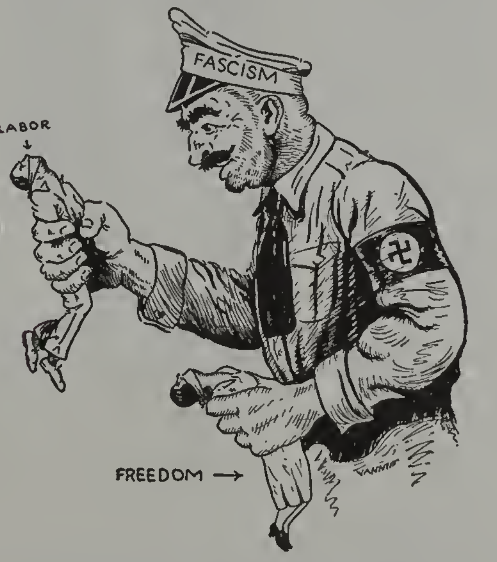
legelőrehaladottab mégis Olaszország volt. Most már azt lehetne kérdezni, hogy miként van az, hogy Olaszország mentes volt a reformációtól vagyis ott nem akartak vallásujitást. Egyszerüen azért, mert Olaszországnak anyagi haszna volt abból, hogy a fejedelmek és az uralkodó osztályok a pápának adóztak. A pénz Olaszországba vándorolt. Olaszország kivételével minden országban voltak zavargások a reformációval kapcsolatban. De térjünk vissza a huszita mozgalomhoz.

Csehország nyugati részén fekvő Kuttenberg város környékén az akkori időkben ezüst bányákat fedeztek fel. A bányák kiaknázására nagy számu munkaerőre volt szükség. A környék jobbágysorsban görnyedő parasztsága munkát talált a jól jövedelmező ezüst bányákban. Ugynevezett "szabad" munkás lett. Kiszabadult a jobbágysorsból. Munkadiját nem természetben, hanem pénzben kapta. Mi sem természetesebb mint az, hogy a surlódás és ellenségeskedés gyakori volt a gazdag bányatulajdonosok és munkások között. Amig a jobbágy, a földmivelő, a cserekereskedésből élt nem kivánt és nem is tudott meggazdagodni, de amikor pénzt kapott megváltozott a dolog. Hozzájárult a surlódásokhoz még az a tény is, hogy a bányatulajdonosok kizárólag németek, mig a munkások csehek és morvák voltak. Azonkivül az uralkodó, német lévén sok német nemest telepitett meg ott, ami kiváltotta a cseh alsóbb nemesség féltékenységét a németekkel szemben. Ekkor lépett fel Husz János aki szintén cseh volt és aki tanaiba beleszőtte a vallási nyelvek és szertartásoknak a latinból a nemzeti nyelvre való átültetését. Igy alakult a gazdasági okokból kiinduló huszita mozgalom, nemzeti és vallási jellegüvé. A parasztból lett ipari munkás a munkaadója, az alsóbb cseh nemesség a német nemesség, és végül az alsóbb papság az egyházfejedelmek az az a felsőbb papság ellen. Egy szóval, osztályharc. A mozgalom katonai vezére Ziska János cseh köznemes, rendkivüli katonai tehetség volt. Munkásokból és parasztokból alakult hadseregével rövid időn belül egész Csehországot elfoglalta, mert a nép tömegesen követte és csatlakozott hozzá. Európa leghatalmasabb uralkodójának a német császárnak sok bajt okozott. Felsőmagyarország szláv és magyar lakossága is tömegesen csatlakozott a huszita hadsereghez. Ezt bizonyitja azon tény, hogy a nagyszombati Balázs szerzetes huszita községeket alakitott. A magyar nemességet és felsőbb papságot rettegés töltötte el. Bizonyitja még az is, hogy a huszita forradalom fölhivásai magyar nyelven is voltak hirdetve, amelyben az elnyomott magyar jobbágyokat a földesuri iga lerázására hivja föl. Érthető volt a magyar és a többi urak félelme.

A huszita mozgalom nem csak Cseh és Magyarországon hóditott tért. Átcsapott Szászországba is. Ott már akkor igen élénk bányaipar volt. A bányamunkások tömegesen csatlakoztak a huszita mozgalomhoz. Akármilyen dynamikus erejü is volt a huszita forradalom, mégis magába hordta már kezdettől fogva a bomlás csiráját. Két irány volt benne képviselve. Az egyik az alsóbb nemesség és papság törekvése amely hajlandó volt megalkudni a császárral és a római pápával. Ezeket Calictinusoknak nevezték mert az akkori pápával Calixt-tal egyezkedtek. A másik a radikális irány volt a Taboriták iránya. Nevöket Tabor várostól vették, ahol megalakitottk az őskeresztény kommunista községet. Addig amig Ziska a császár ellen harcolt a taboriták szabadon gyakorolhatták kommunista tanaikat. De amikor kibékült a császárral a taboriták ellen fordult. De essék egy-két szó a taboritákról és azok tanairól is.

Tábor városban akkor virágzó szövőipar volt. Lakosai szegény szövőmunkások voltak akik eléggé megismerték az uralkodó osztályok zsarnokságát. Mozgalmukba belevonták a környékbeli parasztságot is. A termelés csak szükségletre lett berendezve. Mindenkinek kötelessége volt a munka. A termelt javakat összehordták amelyből mindenki szükséglete ki lett elégitve. Nem létezett az enyém és tied fogalma. Az ur és szolga intézmény megszünt. Elvük volt, hogy senkinek sem kell szolgálni. Nincs bün és bünhődés. Nincs király, tehát nincs alattvaló. Nem lehet senkinek vagyona. Aki embertársaitól elvon valamit ami neki van, halálos bünt követ el, és aként lesz büntetve. Fizetett papjaik nincsenek, valamint a papok és tanitók között nem létezik rangkülönbség. Mindnyájan egyenlő testvérek és nővérek vagyunk. Természetes, hogy nem volt érdekházasság ilyen körülmények folytán. Amikor Ziska megalkudott a császárral, a taboriták ellen fordult, akik tudták, hogy mi vár reájuk. Elsáncolták és halálmegvetéssel védték magukat. Végre Ziska bevette a várost. A vezetőket hordókba szegeztette és ugy égette el. Bár a taboriták őskeresztény kommunista községei mint intézmények meg lettek semmisitve a fölszabaditási eszme még tovább élt a lakosságban. Még ma is vannak a taborita hitközségeknek maradványai. Jelentőségük alig van. Kizárólag vallási dolgokkal foglalkoznak. Az Egyesült Államokban mint **Moravian Brethren** ismeretesek.

A huszita fölkelés a reformációnak ugyszólván az előhirnöke volt. Tudjuk, azt, hogy minden korszakalkotó találmánynak a szükséglet az előmozditója. A primitiv ember a kivánságát vagy akaratát jelekkel vagy beszéddel fejezte ki. Az előrehaladottabb már festés vagy képfaragás utján is akart hatni embertársára. A 15-ik század közepe táján, tehát a huszita háboruk idejében volt a könyvnyomtatás föltalálása. Ami azt jelentette, hogy a gondolat és eszmeterjesztés, lett légyen az akármilyen irányu, igen meg lett könynyitve. Bár az irás és olvasás mesterségét a lakosságnak még kevés hányada birta, az eszme és gondolatterjesztés utja járhatóbb lett mint azelőtt volt. Erre az időre esik ugyszintén a Renaissance a megujhódás korszaka.



Még a panaszát is elfojtják a munkásnak a fascista uralom alatt.

Amint már emlitve volt, a katholikus egyház mint olyan az uralkodásának első századaiban ellensége volt minden fényüzésnek és pompának. Később amikor már nagy vagyonnal rendelkezett föladta az egyszerüséget, bár az épitészet és a müvészet terén csak vallási tárgyakat állitott elő. A 15-ik század közepén a müvészet különösen Olaszországban hatalmas lendületet vett. Most már nemcsak a papság volt az amely a müvészeket foglalkoztatta, hanem az uralkodók és a gazdag nemesség és polgárság. Ugyanekkor a gondolkozó emberek gondolatvilága is kezdett átformálódni. A középosztály a papságban és annak intézményéban akadályt látott a további fejlődéshez. A tudósok és kutatók kezdtek nemcsak elvont dolgokkal, de társadalmi és fejlődési problémákkal foglalkozni. Ez volt a humanista világfelfogás korának a kezdete. A katholikus egyház hatalmi terjeszkedését és tulkapásait kezdték mint helytelent és fejlődésellenest kritizálni. Különösen az ókori görög fölfogás és iskola kezdett fölülkerekedni ugy a tudomány mint a müvészet terén. A csillagászat és mathematika terén Copernicus, a bölcsészetben Rotterdami Erasmus, a müvészetben pedig Rafael Leonardo da Vinci és Michael Angelo voltak ezen előretörtető korszak legjelesebbjei.

Eddig még csak a középosztály egy nagyon kis része vette ki a részét ebből az ideológiai mozgalomból. Az uj müvészetet pártolta a katholikus klérus, mert gyönyörködhetett benne, de ellene volt az uj bölcsészetnek mert féltette tőle hatalmát. Ugyszintén harcolt Copernicus tana ellen is. Az egyház fölfogása és tanitása szerint a föld tányéralaku volt. Copernicus állapitotta meg a napirendszert, és a föld gömb alakját. Tanai csak halála után lettek kiadva.

Mint már emlitve volt, a müvészet különösen Olaszországban virágzott, lévén az a leggazdagabb. Töméntelen kincs vándorolt Olaszországba, hisz egész Európa adófizetője volt a pápának. De, hogy az egyház még gazdagabb legyen és pazarolhasson, a pénzszerzésnek egy igen agyafurt módját eszelték ki. Ez abból állott, hogy a pápa általános bünbocsánatott hirdetett mindenkinek pénzért. Ki mennyi pénzt adott annyi büne lett megbocsájtva. Templomokban, bucsujáróhelyeken és városokon nyilvánosan üzérkedtek a bünbocsánattal. Dél és Közép Németországban Tetzel János szerzetes dolgozott a bünbocsánati üzletben. Hogy minél többet harácsolhasson népszerü verseket is irogatott, melyek közül az egyik ilyen formán hangzott:

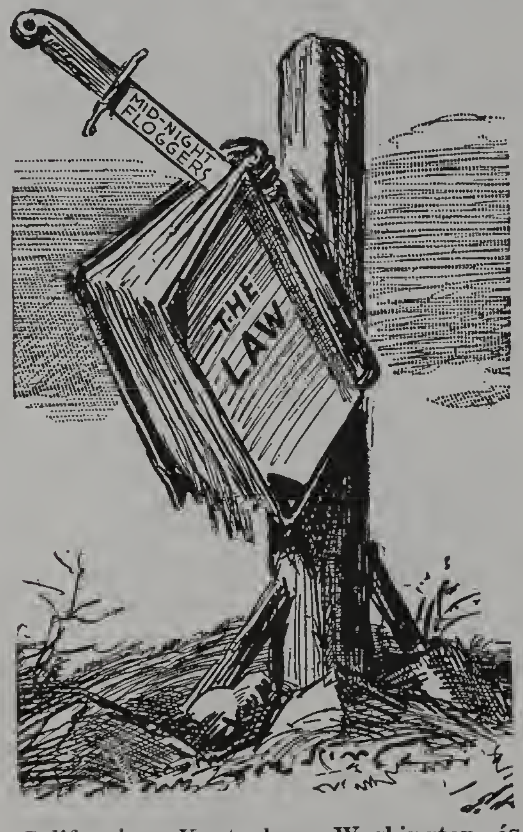
Amikor pénzed a perselyben csendül.
Lelked a pokolból kilendül.

Luther Márton ágostonrendi szerzetes, aki már előzőleg is kritizálta az egyház romlottságát, nyiltan kikelt ezen visszaélés ellen. Több iratban ostorozta a tévtanokat. Az alsóbb nemességhez folyamodott segitségért. Föllépése katholikus pap létére, bátor és határozott volt. Az alsóbb nemesség soraiban követőkre talált. Természetes is, hiszen éppen ez az osztály félt legjobban a papi hatalom tultengésétől. A papi birtokok amelyek az akkori Németország majdnem kétharmadát képezték, komoly veszedelemmel fenyegették a közép nemesség létezését. Másfelől az elnyomott parasztság is adófizetője volt, ugy a világi mint az egyházi uralkodó osztálynak. A városi iparos és kereskedő osztály sem barátkozott a papi uralommal, szintén gazdasági okok folytán. A sok egyházi ünnepek lényegesen csökkentették a mesterlegényeket foglalkoztató mesteremberek profitját. Ehez hozzájárult az is, hogy akkor már különösen Közép és Nyugat Németországban számottevő bányaipar volt. Itt már a bányatulajdonos a bányással állt szemben. A mai modern osztályharcnak már akkor mutatkoztak az előzményei.

Luthert tartja a polgári társadalom a reformáció legnagyobb alakjának. Tény az, hogy ő volt a többi kritikusok között az első aki nyiltan föllépett a bünbocsánat hirdető csalások ellen. Az uralkodó osztálynál, a középnemességnél keresett segitséget és talált is. A dolgozó népre nem számitott. Ő csak a vallási formákban talált hibát. A vallást reformálni akarta, amennyiben ostorozta a visszaélést. Hogy nem volt a nép barátja bebizonyitotta a német parasztforradalomban, amikor nyiltan a nemesség pártjára állt és a jogaikért és kenyerükért harcoló népet gyalázta.

Luther föllépése egyellőre csak vallási vitákban nyilvánult meg. Luther hivei és a régi egyház papjai között az evangélium magyarázata volt a legfontosabb. De amikor a német parasztság vezetői szintén az evengéliumra hivatkoztak és a jobbágyrendszert keresztényellenesnek találták, az uralkodó osztályok megbánták a vallási viták megkezdését. Tény az, hogy már jóval Luther föllépése előtt volt a délnémet parasztságnak egy titkos szövetsége, melynek összejövetelein a parasztok a sorsuk javitásáról tárgyaltak. A vallási viták folytán ezek a szövetségek is a nyilvánosságra léptek. Délnyugaton egy-két nemesi és papi birtokot lefoglaltak. Zászlójukon egy bocskort mint az elnyomatás jelképét festették. Könnyebb megértés kedvéért meg kell jegyeznem, hogy a jobbágynak csak bocskort volt szabad mint lábbelit viselni. Csizma. vagy cipő viselés tiltva volt. Vezérük eleinte Götz lovag volt. de ez hamar cserben hagyta őket. Rothenburg, Weinheim és Helbrom jelentős városokat elfoglalták. A nép ezrével csatlakozott hozzájuk. Vezérük később Geyer Florián nevü nemes lett. Ez mindvégig hü maradt a parasztság ügyéhez, akkor is amikor ugy az óhitü mint az ujhitü papság Lutherrel az élén, szóval az egész uralkodó osztály ellenük fordult. Nagy hadisikereik is voltak mindaddig mig Geyer Florián vezette őket. Németországban is volt Dózsa György. A parasztok mindaddig emberségesen bántak az elfogott nemesekkel, mindaddig mig az egyik követüket nem gyilkolták le. Erre ennek a gyilkosságnak a megtorlásaként Weinberg várába beszoritott nemeseket kardélre hányták. Közvetlen ezután Geyer Floriánt egyik rokona orozva meggyilkolta. Vezérük halála után a hadiszerencse elhagyta a parasztságot. Az egyesült császári és papi hadsereg tulerőssé vált, aminek nem tudtak ellentállni. A nemesség véres bosszut állt rajtok. Ezrével ölték le őket. Rothenburg város falait a saskeselyük lepték el. Bőven lakmároztak a legyilkolt parasztok holttestein.

A német parasztforradalomnak nem volt olyan kimondottan vallási jellege, mint ugyanabban az időben lefolyó foradalmi megmozdulásnak amelyet Münzer Tamás vezetett. Ez a mozgalom Németország már az akkori időben igen kifejlett ipari vidékén a mai Thüringiában játszódott le. Münzer Tamás egykoru volt Lutherrel. Vele egyidőben lépett fel a katholikus egyház visszaélései ellen. Münzer szintén katholikus pap és tudós volt. Közötte és Luther között azonban lényeges különbség volt. Luther csak a vallást akarta átformálni a német nemesség és gazdag polgárság szája-ize szerint, mig Münzer a gazdasági és termelési formákat is megakarta gyökeresen változtatni.



California, Kentucky, Washington és több más államban igy néz ki a törvény.

A régi huszita tanok még élénk emlékezetben voltak Szászország és Thüringia bányászai és takácsai között. Münzer ezt a vidéket választotta müködési teréül. A bányász és takács munkás proletárok képezték a Münzer által vezetett mozgalom magvát. Meg kell emlitenem két hü munkatársát Karlstadt András és Pfeifer Henrik volt katholikus szerzeteseket. Az előbbi komoly tudós és reformátor, az utóbbi jeles népszónok volt. A reformáció megindulása idején Münzer, Zwickau már akkor jelentős iparváros papja volt. Az első dolga volt, hogy a munkások közül választotta a prédikátorokat. A munkásokat nemcsak a vallás ferdeségei, hanem a gazdasági igazságtalanságokról is fölvilágositotta. Munkájának eredménye is volt, mert Zwickauban a zendülések és forradalmi megmozdulások egymást érték. A szász herceg aki Luthernek barátja és védője volt, fegyverrel nyomta el a bányászok és takácsok harcát. Münzernek menekülni kellett. Csehországba ment. Innen azonban mint az uralkodó osztály részére veszélyes egyént kiutasitották. Visszatért ismét Németországba. A Thüringia állami Mühlhausen bányavárosban telepedett le, ahol rövid időn belül megszervezte a város dolgozó népét, valamint a közeli mansfeldi bányászokat. Ezekből jelentős hadsereget szervezett és képeztetett ki. Arra tanitotta a munkásokat, hogy őket, és csak őket illeti meg a munkájok teljes gyümölcse és mert a város a kezében volt aszerint rendezkedett is be. Ő volt az első aki a fülgyónást nem csak kárhoztatta mint Luther, de tényleg el is törölte. Voltak olyan gazdag polgárok is akik csatlakozni akartak a mozgalmához, de ő csak abban az esetben fogadta be őket, ha vagyonukról a köz javára lemondtak, mert szerinte Istennek is Mammonnak (a pénz istenének) nem lehet egyszerre szolgálni. Luther minden befolyását latba vetette, hogy Münzer irásai ne jelenhessenek meg. Egy nyomdászt aki irásait ennek dacára kiadta, védnöke a szász herceg által birsággal és börtönnel sujtotta.

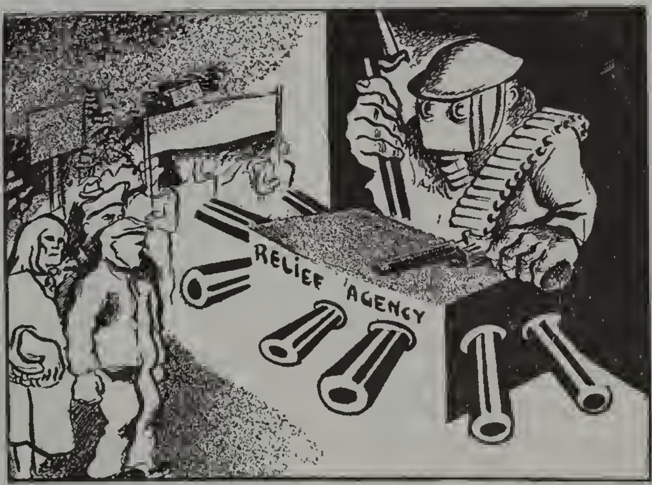
Münzer müködése mindinkább veszélyes volt ugy Luther mint az uralkodó osztály részére. A szász nemesség hatalmas hadsereget gyüjtött ellene. Münzer szintén szervezett egy munkáshadsereget, de itt hiányzott a kellő katonai fölszerelés. A két tábor Frankenhausen város közelében ütközött meg. A csata a munkások vereségével végződött. Münzer barátai és szervezői nevezetesen Karlstadt és Pfeifer elmenekültek. Münzer a vérpadon halt meg. Testét felnégyelték és Frankenhausen város négy sarkára állitották ki. Münzer kétségkivül egyik legnagyobb alakja volt a reformációnak. Szilárd jellemü ember és igaz barátja a dolgozó népnek. Ezt még ellensége és történetirója Melanchton Fülöp is elismeri, Melanchton szintén reformátor, Luthernek jóbarátja és hive volt.

Münzer mozgalmának leverésével a reformáció népies — radikális iránya nem szünt meg. Ötödik Károly német császár fanatikus katholikus lévén tüzzel-vassal pusztitotta az uj eszme követőit. Azon tartományokban ahol a kisebb fejedelmek és a középnemesség elfogadták a hitujitást, nem igen volt hatalma azt tenni, de ahol az egyházi fejedelmek voltak az urak, ott mindent megtett a mozgalom letörésére. Németország nyugati részén a gazdag nemesség ellene volt a reformációnak mert féltékeny volt az előrehaladott városi polgárokra akiknek a reformált vallás előnyöket hozott. Igy Nyugat Németországban csak a városi polgárság és a már akkor nagy számu bérért dolgozó iparos legénység voltak a reformáció hivei. A mai Hollandiában amely akkor a német császársághoz tartozott élénk népmozgalom volt a reformáció mellett. Hollandia Leyden városában Bockhold János szabómunkás hidette a Münzer Tamás tanait. E miatt őt Lydenből kiutasitották. Westfáliában Münster városában telepedett meg. Münster városban igen élénk ipar és kereskedelem virágzott. Bockhold akit röviden Leydeni Jánosnak neveztek Münsterben rövid idő alatt igen népszerü lett, szervezői képessége és ékesszólása folytán. Dacára, hogy a város érseki székhely, és az érsek kezében nemcsak az egyházi hanem a világi hatalom is összpontosult, a polgárság és a munkáság a várost és annak igazgatását átvette. A gazdag polgárság csak akkor bánta meg, hogy Leydeni János müködését a reformáció tele után a nagy vagyonokat egyszeren a közösség javára kisajátitotta.

Az eredmény az lett, hogy a gazdag polgárok hanyat-homlok menekültek a városból. Maga az érsek is egy közeli városban ütötte föl a tanyáját. Leydeni János müäödését a reformáció történetirói nem tárgyalták pártatlanul, sőt rágalmazták. Többek között azzal is, hogy a városban az egy évig tartó ostrom alatt a házasság intézményét megszüntette. Tény az, hogy a házasságot igen könnyü volt felbontani, az az nem alkalmazták az egyház hanem a józan belátás és a természet törvényeit. A város elfoglalása utáni nagy pörben az összes vádlottak tagadták a a nőközösség vádját. A városban egy teljes évig az őskeresztény kommünista rendszerben éltek. Nem volt gazdag sem szegény, mert magántulajdon nem létezett. Mindenkinek dolgozni kellett a közszükségletre. Az ostromló hadsereg ellen hősiesen védekeztek, tudva, hogy mi vár reájuk. Az ostromlók már nem az uj vallás, hanem egy uj gazdasági rendszer hivei ellen viseltek háborut, mutatja ezt az is, hogy a város ostromában a katholikus érsek vezetése alatt az uj vallásra áttért nemesek is résztvettek. Egy évig tartó ostrom után az egyesült hadsereg árulás utján elfoglalta a várost. Az érsek parancsát követve a katonák sem aggnak, sem gyermeknek nem kegyelmeztek. A vezetőket elfogták és válogatott kinzások után végezték ki őket.

A reformáció hatása természetesen egész Európára kiterjedt. Legerősebben Németországot rázkódtatta meg. Onnan indult ki és ott volt a legnagyobb ellenállás. Olaszországban, mint már emlitve lett nem volt reformáció, mert erre gazdaságilag nem volt meg a nyomás. Franciaországban a középosztály karolta föl. Igy volt ez Magyarországon is, ahol a középnemesség és a Habsburgház ellenes főnemesség voltak az uj vallás zászlóvivői. Spanyolországban a reformáció nem tudott gyökeret verni, mert a papi befolyás alatt levő uralkodóház a nemességgel egyetemben minden kigondolható módon irtották az uj vallás követőit. Svájcban ahol már akkor nem volt császári befolyás, a városi polgárság magáévá tette az uj tanokat, még pedig ezek radikálisabb irányát, amelyet Calvin János hirdetett. De a parasztság hü maradt a pápához. Az Európa északi és északnyugati államai teljesen magukévá tették a reformáció eszméjét. Az uj vallás és a régi rendszer közötti harcban szakadt el Hollandia a német császárságtól. A világ kereskedelme és gazdasága a Földközi tengerpartjairól az Atlanti tenger felé terelődött. Az ok egyszerü, és abban található, hogy Amerika fölfedezése folytán az Atlanti tenger lett a világkereskedelem központja. Megkezdődött a fölfedezések kora. Ennek folytán a hübéri, a jobbágy rendszer az előrehaladott államokban nevezetesen Angliában és Hollandiában végnapjait élte. Meg kellett szünnie ott, ahol már akkor mutatkoztak a kapitalisztikus termelés első csirái.

A reformáció korszakát a történelem a lelkiismereti és gondolatszabadság korszakának ismeri el, bár még két évszázadon át folyt a harc a vallásszabadság kivivásáért. Meg kell emliteni azt a tényt is, hogy az uj vallás uralkodó osztálya, amikor már biztosnak érezte magát, éppen ugy igyekezett minden uj irányt megakadályozni mint a régi vallás hatalmasai tették előzőleg. A gondolatszabadság meg volt, de az igazi haladás utja még járatlan volt, mert ennek járhatóvá tételéhez szükséges a gazdasági fölszabadulás. Fölfedezések, találmányok, a tudomány és a technika terén előresegitik az emberiség haladását, de nemtehetik boldoggá az összességet ha azoknak a használatából és élvezéséből a dolgozó nép kivan zárva a gazdasági egyenlőtlenség folytán. A gazdasági egyenlőséget létrehozni a modern munkásmozgalom feladata. A reformáció feltörte a gondolat és lelkiismeret utját, a modern forradalmi munkásmozgalom megfogja változtatni a kapitalisztikus termelési rendszert és megvalósitja az ipari szabadságot, az ipari demokráciát.



A közsegély irodája — megerősitve.

MIRE MEGVÉNÜLÜNK

IRTA:

MOLDOVÁN ANNA

PFÁRADTAN vonszolta magát. Öreg volt. Arcán mély barázdák huzódtak. Ősz haja kócosan hullott a homlokára lyukas kalapja alól, Csizmája, amelyet vastagon lepett be az országut pora, ólomsullyal nehezedett a lábára. Fáradt volt és éhes. A majorban, ahol legutóbb megpihent, sorba járta az ajtókat, de az eredmény nagyon sovány volt. Egykedvü arcokat látott mindenütt. A legtöbb házban ezt a választ kapta:

— Nincs nekünk semmink, nem tudunk adni, mi is éhezünk, még akkor is éheznénk, ha az uraság megkétszerezné a kommenciót.

Egy helyen kapott két főtt krumplit.

— Fogja — mondta az asszony —, mi is ezen élünk hónapok óta.

Mohón kapott utána és megette ugy hajason, azután tovább ment az ispán lakása felé. Nyitva találta a kertajtót. Belépett.

A kertben egy gyerek — talán az ispán fia — játszott egy nagy barna kutyával. Amikor meglátta az öreg koldust, nagyott kiáltott:

— Cézár, fogd meg!

A kutya dühös morgással iramodott neki, alig maradt annyi ideje, hogy a kertből kilépjen és a kaput becsukja maga után.

Keserü gondolatok közt fordult ki az utra. A majort messze maga mögött hagyta és most azt sem tudta, milyen messze van a legközelebbi falu. Erősen tüzött rá a nap, a torka kiszáradt és rettentő szomjuságot érzett, ami elfeledtette vele az éhséget is.

— Mégis csak kár volt elindulnom a majorból, ott kellett volna maradnom éjszakára is — dünnyögte magában. Csüggedten nézett el az ut mentén elterülő buzatábla fölött. Sehol egy ház, de még csak egy csőszkunyhó sem, ahol egy korty vizet remélhetett volna. Megállt.

— Nem birom tovább — suttogta hangtalanul.

Torka ugy égett, mintha parazsat nyelt volna. Nyelve, mint egy darab tapló, aszottan tapadt a szája padlására. Tántorgott. Rémülten gondolt arra, hogyha elesik, nem tud majd fölállni és ott pusztul az ut szélén. Lassan erőt véve magán, tovább ment. Szeme révetegen pihent meg egy dombocskán, amely jobbról elzárta előle a kilátást. Óráknak érezte, amig elérte.

Szomjusága pokoli módon kinozta. Szeme előtt fekete karikák táncoltak, ugy érezte, nem birja tovább. Eszelősen nézett körül. A dombot már maga mögött hagyta és a dombbal együtt elmaradtak a vetések is. Előtte nagy sik legelő terült el. Amikor szeme tétován végignézett. Nem akart hinni a szemének. Az országuttól alig egy kődobásnyira gémeskut ágaskodott az ég felé. Ujjongani szeretett volna, de csak rekedt hangok törtek elő a torkából. Letért az utról és a kut felé indult. Minden erejét össze kellett szednie, hogy a rövidke utat megtegye. Számolta a lépteit.

— Még öt lépés . . . már csak három . . . na végre!

Ott volt a kutnál. Nekidőlt a kut deszkakorlátjának és belenézett.

Lent a mélyben ott csillogott a hüs viz. A kutostor végén ott himbálódzott a vödör. Utánanyult és remegő kezével lassan lenyomta a kutba. A vödör féloldalt dült és szinültig megtelt vizzel. Aszott karja reszketve emelte feljebb-feljebb, már csak néhány arasz és eléri a vödröt, aztán . . . Aztán ihatik.

Sovány nyakán kidagadtak az erek, szeme fátyolosan nézte a vizet. Lélegzete elakadt, kezéből lassan kicsuszott a rud. Megtántorodott. Ősz feje nagy koppanással vágódott a kemény agyaghoz. A vödör hangos csobbanással esett vissza a kutba.

A FORRADALMI MUNKÁSMOZGALOM LASSU ELŐHALADÁSÁNAK OKAI

IRTA:

ZÁRA JÁNOS

HA A FORRADALMI munkásmozgalom lassu előhaladásának okait akarjuk kikutatni, először azzal kell tisztába lennünk, hogy a munkásmozgalom gyüjtő név alatt szereplő különféle szervezetek és politikai pártok közül, mely irányzat és miért forradalmi, viszont a többi miért **nem** forradalmi, bármely hangzatos jelszavakkal és lármával igyekeznek is bizonyitani forradalmi mivoltukat.

A forradalmi munkásmozgalom célja és utja határozott. A cél nem lehet más, mint: a profit; a bérrendszer eltörlése. Az utat melyen haladni kell a mindenkori termelési viszonyok szabják meg. Nem vitás kérdés az, hogy a társadalom hasznos tagjai — a munkás milliók — szenvedésének és nyomorának kutforrása a bérrendszer és ha a munkásosztály fel akar szabadulni a kizsákmányolás alól, el kell törülni azt a rendszert, amely lehetővé teszi, hogy a termelő eszközök tulajdonosai — a kapitalisták — profitot csináljanak a termelő eszközök használóin.

Az a megállapitás sem képezi vita tárgyát, hogy a kizsákmányolás a termelés szinterén, az ipartelepeken történik, ahol a bérmunkások foglalkoztatva vannak. Minthogy a kizsákmányolás a termelés szinterén történik, csak természetes, hogy annak megszüntetése is ott kell történjen és a kizsákmányoltak által.

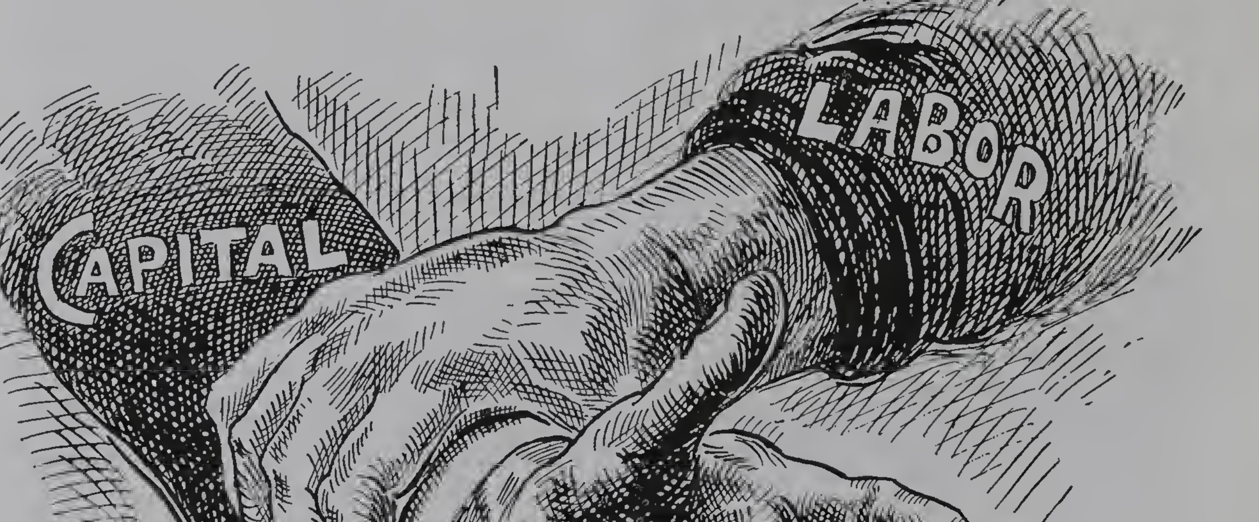
A termelés ma nem szükségletre, hanem profitra történik. A termelő eszközöket a tulajdonosok csak addig tartják üzembe, amig a termelt árun hasznot csinálnak. Hiába nélkülöznek milliók bizonyos szükségleti cikket, ha nincs pénzük megvásárolni, a kapitalisták nem fogják ezen bizonyos szükségleti cikket gyártani. Ennek megváltoztatása csak ugy történhet, hogy a termelőeszközök köztulajdonba mennek át és üzembetartásuk nem attól fog függni, hogy a termelt áru hasznot hoz-e, hanem, hogy a társadalom minden tagjának legyen belőle elegendő.

Hogyan érhetjük el a termelő eszközök köztulajdonba helyezését? Csakis ugy, ha a munkások, akik a termelő eszközöket használják, szervezkednek azok lefoglalására. Ebből természetesen az következik, hogy a szervezkedésnek a termelés szinterén kell történni és nem másra mint a termelő eszközök lefoglalására.

Miután ezeket megállapitottuk, vegyük bonckés alá a jelenben müködő szervezeteket és pártokat és lássuk, hogy melyiknek a programja jár legközelebb a helyes uthoz, mert csak igy leszünk képesek megállapitani, hogy mely irány képviseli a forradalmi munkásmozgalmat. Amerikában élünk és fejtegetéseink a lehetőség határáig az itteni viszonyok és szervezetekre szoritkozik, elkerülendő az esetleges zavart, mely előfordulhatna, ha más országok **más** viszonyait alkalmaznánk bizonyitásra.

A legrégibb és taglétszámban a legnagyobb szervezet Amerikában az American Federation of Labor. Ezen szervezet a munkásosztály felszabadulási harcában, — mint segitő tényező — teljesen számitáson kivül esik, amennyiben nem osztályharc alapján álló; a tőke és munka testvériségét hirdeti és jelszava: Tisztességes napimunkáért, tisztességes napibért." Hive a bérrendszer örök időkig való fentartásának; vezérei — akik magas fizetéseket huzó intelektuelek — a legádázabb ellenségei a forradalmi munkásmozgalomnak. A forradalmi gondolkodásu munkásság ellen elkövetett árulásaik visszanyulnak egészen a szervezet megalakulásáig és végig vezet dicstelen müködésükkel egészen napjainkig. Szervezett formája még ma is — a modern ipari termelés korában — a céh-rendszerben bevált szakmai szervezet és a szervezet élén állók görcsösen ragaszkodnak annak megtartásához. Harcaik az elavult szervezeti forma következtében legtöbb esetben kudarccal végződnek és sikert csak oly esetekben könyvelhetnek el, ha követeléseiket harcnélkül teljesitik a munkáltatók. A vezérek diktátori hatalommal rendelkeznek a tagság felett és a munkáltatókkal folytatott tárgyalásaik rendesen zárt ajtók mögött történik a munkásság kizárásával. Saját önző érdekeik minden időben előbbre valók, mint a tagságé, akiket képviselnek. Ha az osztályharcban egyáltalán számitásba jön, csak mint a felszabadulni óhajtó munkásság ellensége, — a kapitalizmus védbástyája emlithető.

A fenti szervezkedési forma elavultsága az Egyesült Államokban már az elmult század utolsó tizedében nyilvánvalóvá vált. A termelő eszközök tulaj-



Az öntudatos munkás igyekszik munkája gyümölcsének elrablását megakadályozni.

donjoga mindig kevesebb kézbe összpontosul és a szaktudást igénylő kézi termelést az összevont ipari — tömeg termelés váltotta fel. A helybeli munkáltatót — aki a multban a termelést vezette — az ipartelepektől távol élő tőkés — részvényes — váltotta fel és ezzel egyidejüleg a kizsákmányolás is állandóan fokozódott. A munkásság tiltakozásul, az akkori szervezetük horderejéig, munkabeszüntetéssel felelt, mely sztrájkokat a kapitalisták a legkegyetlenebb eszközökkel fojtották vérbe. Ily események kapcsán mutatkozott a szakszervezkedés káros volta, mert a munkásságnak a szakszervezkedési forma szerint csak egy kis töredéke volt szervezve és képtelenek voltak a termelést megállitani. A termelők megélhetése mind nehezebbé vált bár a javakat nagyobb mennyiségben termelték.

Sok vesztes harc után a munkásság gondolkodó elemei kutatni kezdték a sikertelenség okait és azt természetesen a megfelelő szervezet hiányában fedezték fel. Mérlegre tették az iparizált termelési folyamatot és a munkásság szervezetét és az utóbbi nagy hiányt mutatott. Igy alakult ki az Ipari Szervezkedés eszméje. Nem egyes egyének szeszélyeinek szüleménye, hanem az iparizált termelési rendszer égető követelményeként.

Az ipari szervezkedés eszméjének első propagandistái állandóan széleskörü agitációt fejtettek ki és 1905-ben az eszme formát öltött az Industrial Workers of the World megalakulásával. Az IWW-t olyképpen tervezték, hogy a szervezet a munkásság minden követelményének megfeleljen. Osztályharc alapján álló Ipari Szervezet, melynek végcélja a bérrendszer megdöntése. A munkásságot olyképpen tömöriti, amint a termelésben foglalkoztatva vannak. Egy bizonyos ipartelep munkásai nem a használt szerszámok szerint tagolódnak, hanem valamennyien EGY gyári szervezetbe tömörülnek. A gyári szervezetek a városban levő hasonló ipartelepek munkásaival EGY szervezetbe, melyek aztán az egész ország területén levő csoportokkal alkotják az Ipari Szervezetet. A különböző Ipari Szervezetek egymással szoros összeköttetésben alkotják az EGY NAGY SZERVEZETET. Amely munkás tagjává válik valamely ipari szervezetnek, ugyan akkor tagja lett valamennyi ipari szervezetnek. Ha a körülmények ugy kivánják, hogy más iparban kénytelen munkát vállalni, ezt minden akadály nélkül megteheti, ugyan azzal a tagsági könyvvel, minden ráfizetés nélkül, csak az áthelyezés lesz bejegyezve. A szervezet összetétele olyan, hogy ha bármely ipartelep valamely osztályában sztrájk vagy kizárás történik, ez automatikusan érinti a telepen foglalkoztatott összes munkásokat, sőt ha a szükség megkivánja az egész ország területén levő ugyanazon ipar összes munkásait, vagy ha kell az összes iparok munkásait.

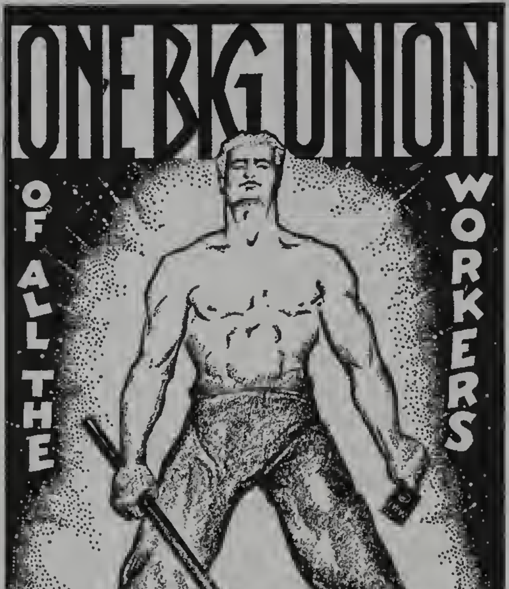
AZ IWW az egyetlen szervezet az egész világon, amely a legésszerübben tömöriti a munkásságot nemcsak a tőkésekkel való mindennapi harcokra, hanem ara is, hogy a termelést és szétosztást fennakadás nélkül intézhessük, amikor a bérrendszer már elpusztult. Az egyetlen szervezet, amely nemcsak a bérrendszer megdöntését hirdeti, hanem tervezetet nyujt az uj társadalom irányitására. Az IWW által hirdetett szervezkedési formával nem állhat be anarchia a bérrendszer közvetlen elpusztulása után, mert a termelő hadsereg készen fog állni a termelés és szétosztás irányitására és végzésére. Az osztályharcban minden szközt igazoltnak tart,e mlyeket a viszonyok reá kényszeritenek a harcoló munkásságra. A harcot nem a rendszer kinövései — fascizmus, nácizmus és különféle demagógizmus, nem az állam és annak különböző szervei — hanem a kapitalizmus ellen irányitja. A leghatásossabb harci eszköznek az Általános Sztrájkot ismeri el, de nem ugy mint sokan értelmezik, hogy a munkásság kivonul az ipartelepekről, hanem éppen ellenkezőleg, bevonul oda és lefoglalja a termelő eszközöket és ezen lépéssel megteremtik az Ipari Demokráciát.

A szervezetben, a legtökéletesebb demokrácia uralkodik és a döntő szó a tagságé. A tisztviselők csak végrehajtói a tagság akaratának.

A munkásmozgalomban az emlitetteken kivül még egy számottevő irányzat van, melyet meg kell vizsgálnunk, hogy tiszta képet nyerjünk és ezek a politikai "munkás" pártok. Létezésük, a polgári politikai pártok utánzata és azon felfogásból ered, hogy a feltörekvő munkásságnak elsősorban az állam "hatalmat" kell meghóditani. Kimondott céljuk a szocialista — kolektiv társadalmi rendszer megalakitása.

Ennek elérésére a különböző "munkás" pártok — mert van belőlük bőven — irányai között meglehetős eltérés van. Némelyek kizárólag a szavazó urnára támaszkodnak, azt hirdetve, hogy a munkásságnak legfontosabb teendője a szavazás, a jelenlegi törvényhozó testület tagjait helyettesiteni kell szocialista törvényhozókkal és azok majd megszavazzák a szocialista államrendszert.

Egy másik irányzat — a kommunista pártok — bár szintén a bársonyszékek felé kacsingatnak, de mintha ők maguk sem biznának abba, hogy a munkásosztály felszabaditása ily módon elérhető volna, a fegyveres felkelés szószólói. Ezt oly formán értelmezik, hogy a munkásság fegyveres erővel üzze ki a bársonyszékekből a jelenlegi törvényhozókat és helyettük ültesse oda a kommunista komiszárosokat, akik aztán az ugnevezett "proletár" — de valóban a proletárok feletti — diktaturával fogják intézni a társadalom sorsát. A munkásságra csak azért van szükségük, hogy a jelenben kiüzzék a nyeregben ülőket és őket ültessék oda, a jövőben — ha álmuk valóra válik — legyen kinek diktálni.



Mi a kifogásod az Egy Nagy Szervezet ellen?

A politikai "munkás" pártok általában nem munkás elemek irányitása alatt állanak és mivel legnagyobb részük soha termelő hasznos munkát nem végzett, meg sem érthetik a forradalmi munkásmozgalom hivatását. A munkásmozgalombani müködésük a polgári ideológiát tükrözik vissza és vezetésük alatt álló pártok mind reformokért küzdenek és mint ilyenek nem lehetnek forradalmiak, hanem éppen ellenkezőleg a forradalmi munkásmozgalom fejlődésének akadályozói. Igéretiket a nem gondolkodó, hanem mindent hivő munkásság készpénznek veszi és ezáltal tartják vissza a munkásságot a forradalmi utra való téréstől.

A politikai pártok élén álló vezérsereg számitással tartja vissza a munkásságot a helyes ut felismerésétől, hiszen létkérdés részükre a munkásság hiszékenysége és tudatlansága. A jó fizetéseket élvező vezérek soha nem végeztek termelő munkát és részükre az ipari szervezetekben nincsen hely. A társadalomban levő minden hasznos munkás részére megvan a hely az ipari szervezetbe, azonban paraziták ipari szervezete nincsen és igy tagjai sem lehetnek. Az esetben, ha az ipari munkásság felismerné a valóságot, megtanulná, hogy felszabadulásának egyetlen módja az ipari szervezkedés és csatlakozna ahoz, megtörténhetne, hogy a politikusok, akiknek egyedüli érdemük, hogy a munkásság nyakán élősködnek, támasz nélkül maradnának és vagy valamely hasznos foglalkozás után kellene nézniök, vagy elpusztulni. Ebben a magyarázatban találjuk meg a forradalmi munkásmozgalom lassu előhaladásának legfőbb okait.

A fenti fejtegetéseinkben kimutattuk, hogy a társadalom alkotó erői mint vannak széttagolva a különféle gazdasági szervezetek és politikai "munkás" pártokba. Vázoltuk röviden ezen egyedeknek a célját és a cél elérésére alkalmazandó eszközöket. Bár az emlitetteken kivül még nagy számmal vannak helyi és független szervezetek, ligák és egyesületek, melyek szintén akadályozói a forradalmi munkásmozgalom előhaladásának, azonban nagyszámuknál fogva helyünk nem engedi meg, hogy részetesen foglalkozzunk velük. Ezek valamennyiének létezése egyáltalán nem a szükség követelménye, hanem egyes egyének, vagy korátolt csoportok érdekeinek előmozditását szolgálják.

A három fő irányzat közül az első, az American Federation of Labor, idejét multa, a letünt korszak maradványa, amely szeretné a fejlődés kerekét visszafelé forditani ha lehetséges volna. Kimondottan konzervativ és a munkásság, mint ilyent ismeri. Felszabadulást ettől nem vár és tagjai közül akik felismerik az osztályharcot, ott hagyják. A tagság tulnyomó része osztálytudatlan és ezért maradnak tagjai. A fejlődés előbb-utóbb elsöpri teljesen, de amig létezik számottevő akadályát képezi a haladásnak.

A politikai "munkás" pártok már sokkal veszedelmesebb szerepet játszanak a fejlődés akadályozásában. Sajnos, ma még a munkásság soraiban nagyon kevés a gondolkodó elem, de annál több a könnyen hivő. Csak igy lehetséges az, hogy a munkásság elfogadja a politikai "munkás" pártokat, azok igéreteit a munkásosztály felszabaditási harcát illetőleg. A munkásság az a része, akik már megunták a jármot hordani és szeretnének változást látni, örömmel veszi a politikai pártok azon ajánlatát, hogy felszabaditja őket a bérrabszolgaság alól és különösen ha "forradalminak" tüntetik fel előtte azt a bizonyos pártot. De vajjon lehet-e a politikai párt forradalmi?

A politikai pártok élén álló egyének kivétel nélkül arra törekednek, hogy a városi, megyei, állami és szövetségi hivatalokba bejussanak, hogy ezáltal gondatlan élet részesei legyenek. Hivatásuk a törvényhozó testületekben a jelen rendszer — a magántulajdon — védelmére törvényeket alkotni. A "munkás" pártok politikusai is csak ezt tehetik és mást soha megsem kiséreltek, mert amikor odajutnak, célukat elérték és elfelejtik, hogy a munkásság valamit vár tőlük. De ha az akarat meg volna bennük, akkor sem tehetnének mást, mint amit az ország urai diktálnak. A düledező rendszer foltozására itt-ott reformokat hoznak, mely által meghosszabbitják annak életét. A munkanélküli és aggkori biztositás egyike ezen reformoknak, melyért a "munkás" pártok széleskörü agitációt fejtenek ki és ugy tüntetik fel ezt, mint forradalmi követelést. Pedig éppen ellenforradalmi, mert a munkásság nagyrészét bizalommal tölti el a jelen rendszer iránt és ahelyett, hogy harcba szállnának a bérrendszer eltörléséért, kényelmesen várni fogják a munkanélküliséget, vagy aggkort, hogy "élvezhessék" a törvény által biztositott alamizsnát.

Ellenforradalmi minden oly előny, melyet a kapitalista osztály törvényhozó testülete révén ad a munkásságnak, mert azért adja, hogy a lázadás szellemét lekenyerezze — elfojtsa.

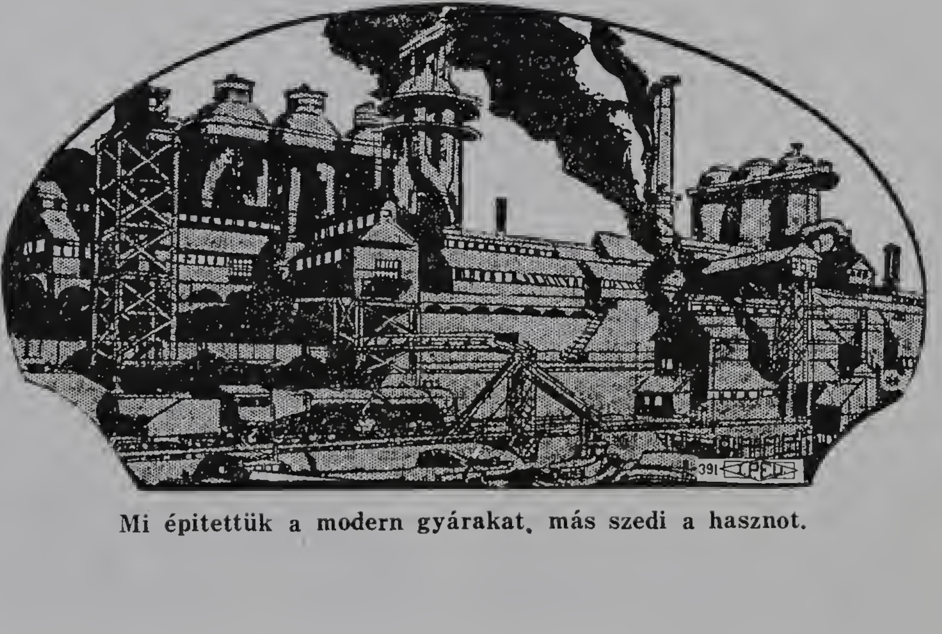
Forradalmiak azon előnyök, melyeket a munkásság szervezeti erejének nyomása alatt kényszerül a kapitalista osztály megadni. A politikai pártok forradalmi előnyöket nem vivhatnak ki, mert ott nincs szervezett erő, csak a vezérek által vezetett nyáj. Erőt, csak a termelés szinterén az Ipari Szervezetekbe tömöritett munkásság produkálhat és a kapitalista osztály csak ily erő előtt hajlik meg, mely hatalmasabb és félelmetesebb az övénél.

A politikai pátok a jelen rendszerben csak az uralkodó osztály érdekeit szolgáltatják és a bérrendszer megdöntésével — a magántulajdon megszünésével — létjogosultságuk megszünik. Ha ez igy van, mi értelme van annak, hogy a munkásság energiáját haszontalan politikai pártok épitésére fecsérelje? Mily teljesitményt végezhet egy politikai párt, amit a munkásság forradalmi Ipari Szrvezetbe tömörülve végre nem hajthatna, hogy arra szükséges a politikai párt épitése?

Az iparok igazgatását a termelő munkásság végezheti legtökéletesebben az Ipari Szervezeteken keresztül. Az ipari munkásság ésszerüen szervezett ereje minden előnyt képes kikényszeriteni, amit egy politikai párt meg tudna tenni, sőt oly előnyöket is, melyeket emez nem, mert kezében tartja a társadalom ütőerét — a javak termelésének módját. Az ipari munkásság szervezeti ereje kormányokat buktathat meg, trónokat dönthet le, félelmetes diktátorokból cirkuszi bohócokhoz hasonló nevetséges páriákat csinálhat anélkül, hogy egy fegyver dördülne el. A forradalmi Ipari Szervezetekbe tömörült munkásság Általános Sztrájkja esetén a képzelt politikai hatalmasságok térdre kényszerülnek a munkásság előtt. Nem üres állitás ez, mert ennek bizonyitására a történelem példákkal szolgál. 1919-ben Seattle városban lezajlott általános sztrájk idején a “Nation” cimü folyóirat tudósitója, ki a helyszinen volt, a következőkép ir: “A sztrájkbizottság előtt az üzletemberek hosszu sora — a polgármesterrel az élükön — jelentkezett, nem fenyegetésekkel, hanem az állapotok megbeszélésére és a bizottság jóváhagyását **kérni** ez, vagy amaz lépésükhöz.

Ma már vitán felül áll azon megállapitás, hogy a munkásosztály felszabadulási harcának legtökéletesebb fegyvere a forradalmi Ipari Szervezet — az IWW. A jelenben létező összes pártok, ligák, egyesületek és gyülekezetek csak akadályozzák a forradalmi munkásmozgalom gyors fejlődését és ha ezek nem volnának, a kapitalista osztály alakitatna ilyeneket. Ki tudná bizonyitani, hogy mind ezen akadályok, nem felülről jövő rendeletre alakultak? Semmi bizonyiték nincs arra, hogy a munkásság akaratából léteznek, mert létezésük semmivel sem viszik előbbre az osztályharcot, de a rombolás, melyet véghez visznek, ezen állitást látszanak igazolni.

A bérrendszer csak addig állhat fenn, amig a munkásság tudatlansága tart. Mennél tovább támogatja a munkásság a haladás ezen kerékkötőit, annál tovább tart szenvedése. Az Ipari demokráciához vezető legrövidebb ut az egyenes ut, melyen a forradalmi Ipari Szervezet halad.



Mi épitettük a modern gyárakat, más szedi a hasznot.

EGY "BOLOND" — IGAZ TÖRTÉNET

IRTA:

VISI ISTVÁN

MR. SCHWARTZ a visszavonult ruhagyáros sok üres órájában, melyhez nem volt hozzászokva, nem tudott mit csinálni, tehát sétálgatott. Egy szép verőfényes szeptemberi napon, éppen a bolondok háza felé vette utját. Miután már ott járt, gondolta tesz egy látogatást közöttük, megvigasztalja őket.

Ahogy szemlélgetve sétált köztük meglátott egy embert, aki a könyvbe mélyedve észre sem vette, amig mások részben ismerték is és hódolattal fogadták leereszkedő köszöntését és egymás között sugdosva magyarázták, hogy milyen nagy és gazdag ember és most viszavonulva az üzleti élettől kényelmes életet él.

Mr. Schartz kiváncsi volt erre az emberre, aki még a bolondok házában is olyan mélyen eltud merülni az olvasásba, igy közelebb ment és barátságos hangon szólt hozzá. — Szép idő van — bocsánat, remélem nem zavarom és már le is ült a padra a bolondnak nyilvánitott olvasó mellé.

Az ember, akit leghelyesebben Kutató Jánosnak lehetne nevezni, mert hát akiket a bolondok házába záratnak, azoknak nem fontos a nevük, helyet csinált illetve egy kicsit odébb huzódott de bizony nem hazudta a gyáros ur nyájas szavait, hogy nem zavarja az olvasásban, hanem kurtán válaszolt, hogy "az idő is szép és a könyv is érdekes" és tovább ovasott.

Schwartz ur, mive a kiváncsiság nagyon bántotta igy bele-bele kukucskált a könyvbe és meglepődve vette észre, hogy sok gazdasági statisztikai adatokkal van a könyv telitve s megnézte az iró nevét és látta, hogy Stuart Chase-nek a "Pazarlás" cimü könyvét olvasgatta a bolond olyan elmélyedve.

Hogy megnyerje ez ember barátságát, dicsérőleg nyilatkozik a könyvről és irójáról, amire már felfigyelt a bolond és lassan összezárja a könyvet és kérdezte.

— Olvasta már, ismeri?

Ez bár kedvező volt a gyáros részére, mivel igy a társalgást megkezdhette amire éppen vágyott, de bizony a kérdés nagyon fogas kérdés volt, mert bizony neki fiatalabb korában sem ideje sem kedve nem volt ilyen száraz számtani adatokkal telitett könyveket olvasni, most meg már türelme sincs hozzá. No meg hát minek, neki ilyesmire nincs szüksége. De a hiuság megadta neki a választ, részben azért, hogy a saját nagyságát bemutassa ennek a szerencsétlen embernek, részben, hogy kimentse magát, okot adjon, hogy miért nem olvasta azt a könyvet. Megmagyarázta, hogy bizony neki nem volt rá ideje, mert egész életében nagyon sokat dolgozott, szaladgált fáradt, hogy öregségére egy kis vagyont szerezhessen, de hát hallott a könyvről és mindenki dicsérte.

Mr. Buvárkodó, egy kicsit meglepődött, hogy a gyáros ur dicsért valamit amit nem is igen ismert, csak hallott róla, de, hogy az ismereteit pótolja elkezdett magyarázni a könyv tartalmáról. Mr. Schwartznak. aki eleinte türelmesen hallgatta. Többek között számadatokkal bizonyitotta, hogy a nemzeti munkaerő fele és az anyag és erőnek háromötöd része hogyan van elpazarolva, és hogy ezt józan ésszel, logikus beasztással, adminisztrációval mind meg lehetne akadályozni . . .

Mr. Schwartz csodálkozva hallgatta ezen intelligens magyarázatot és részben, hogy kiváncsiságát kielégitse részben, hogy a száraz számadatok felsorolását továbbra elzárja, megkérdezte Mr. Buvárkodót: "Hiszen maga nem is elmezavarodott, hát miért csukták be ide a bolondok közzé?"

Azért, — feleli Mr. Buvárkodó, — mert a bolondok, akik a mai termelést és szétosztást irányitják, megvannak szervezve és többen vannak mint mi, akik kritizáltuk őket. Jobb beosztást ajánlottunk, tehát, hogy a további kritikát kikerüljék a bolondok közzé zártak bennünket.

Hiszen ez borzasztó! — kiáltott fel Mr. Schwartz, miért nem tiltakozott ellene? Ez majdnem lehetetlenség, hogy valakit azért a bolondok házába zárjanak.

Eleinte tiltakoztam, — válaszolt Mr. Buvárkodó — de most már belátom, hogy jobb társaságba vagyok, mintha Amerika legnagyobb bankjának az igazgatói között volnék.

Hogyan értsem ezt? — kérdezi a gyáros ur.

Ugy, hogy itten sokan vannak ilyenek, akiket azért zártak be, mert megmerték mondani az igazat, kimutatták a mai rendszer őrültségeit.

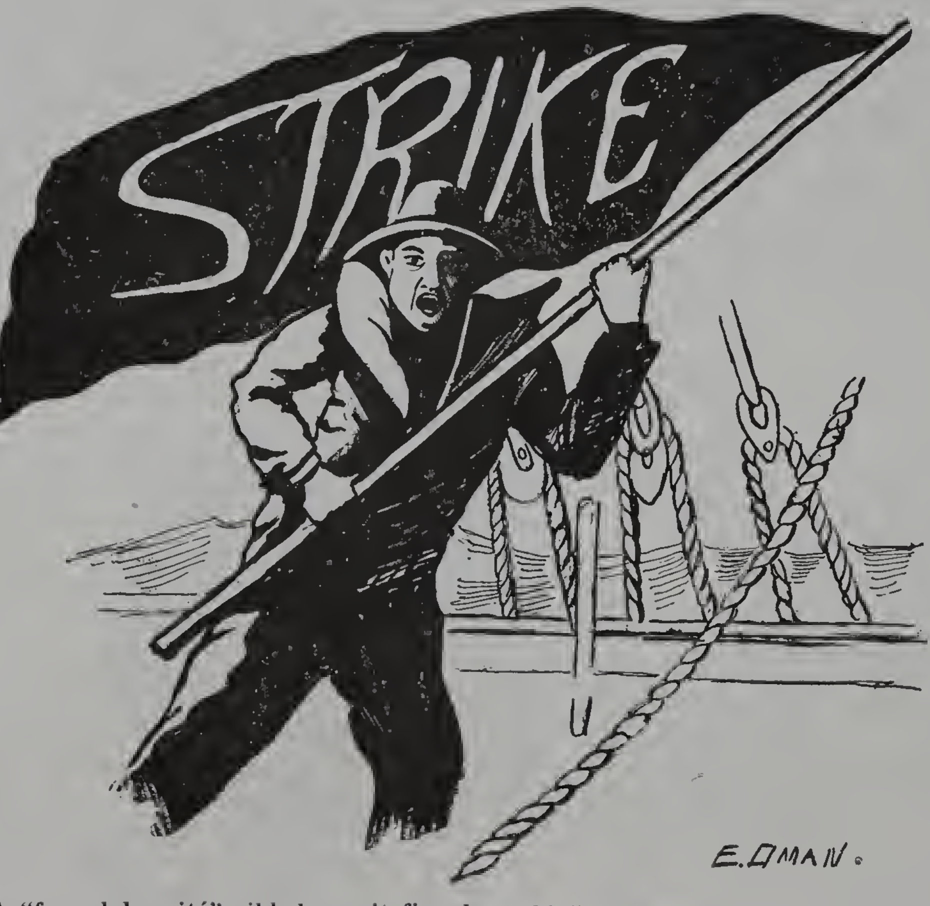
De kérem! ha ez igaz is, de azért vannak itten igazi bolondok is, akikkel nem valami kellemes együtt lenni — vág vissza a gyáros.

Miért nem? mondja csendesen Mr. Buvárkodó, akik itt vannak ha őrültek is, de becsületesek, beismerik, hogy őrültek, de ezen őrült rendszer bolond urai, vezetői ezt nem ismerik be, sőt azokat nyilvánitják őrülteknek, akik számadatokkal, tényekkel tudják bizonyitani a mai rendszer és azok intézőinek az őrültségét.

Mr. Buvárkodó, nekem tetszik a maga beszéde és csakugyan nem tudom megérteni, hogy miért tartják itten, hiszen vannak ujságirók, meg más gazdasági tudósok, akik szintén kritizálják a mai rendszert, de azért nem zárták be őket a bolondok házába, — mondja a gyáros ur.

Nézze, én befolyásos ember vagyok és anyagilag is tudnék áldozatott hozni, hogy innen kiszabaditsam, — folytatja Schwartz — csak mondja meg a körülményeket, legyen bizalmas velem, én szeretnék magán segiteni, mert nem birom elhinni, hogy valakit azért zárjanak a bolondok házába, mert meri kritizálni a mai rendszert, pláne, ha még azt számadatokkal is bizonyitani tudja. Mondja meg mit tegyek az érdekében.

Legjobban teszi ha békét hagy nekem, — mondja Mr. Buvárkodó. Én elég jó helyen vagyok, legalább itten



A "forradalmasitó" cikkek ezreit figyelmen kivül hagyja a kapitalista osztály, de azonnal tudomást vesz arról, ha a munkások a munkabeszüntetés eszközét veszik igénybe helyzetük megjavitására.

békében olvasgathatok, tanulhatok, nem kell a szellemi táplálékot feláldozni a testi táplálék megszerzése érdekében.

De még is, ez szörnyüség, ilyen lángeszü embernek itt lenni a bolondok házában. Én minden követ megfogok mozgatni, hogy innen kiszabaduljon.

Kár volna engem kizavarni innen, hogy ismét a munkanélküliség, nyomoruság kálváriáját járjam. Fekete listában, üldöztetésben, ennél is rosszabb börtönökbe zárjanak, — tiltakozott Mr. Buvárkodó.

De szabad ember lesz és tudásának hasznát veheti, mondta Mr. Schwartz. Ismét gyanakodó szemmel kezdett nézni Mr. Buvárkodóra, mert talán mégis csak bolond, hogy nem akar innen kimenni. Gyanakvóan kérdi. — Mégis milyen alapon zárták be ide, valamilyen okot csak kellett adni, jobbat mint az, hogy a mai rendszert kritizálni merte? Csak legyen velem bizalmas, én segiteni akarok magán.

Ha elmondom, hogy miért zártak be, akkor maga is azt fogja mondani, hogy igazán bolond vagyok — válaszolt lehangoltan Mr. Buvárkodó.

Óh dehogy, már ne gondoljon ilyent rólam, tiltakozott Mr. Schwartz, én látom, hogy maga intelligens, tanult ember . . .

Akkor elmondom, ha már minden áron tudni akarja — azért zártak be, mert megtudtam, hogy hol van egy elhunyt uzsorásnak a pénze és ékszerei elásva, de nem akartam a testvéremmel megosztozkodni rajta, inkább engedem, hogy örökre eltemetve maradjon.

Hát miért nem egyedül vette birtokába, ha tudja, hogy hol van? Kérdi mohó érdeklődéssel Mr. Schwartz

Mert minden lépésemet figyelték, azzal az ürüggyel, hogy bolond vagyok, mig végre ide bezártak, innen nem mehetek ki, mert még itten is erősen figyeltetnek, magyarázta Mr. Buvárkodó.

No látja, tehát ha kiszabaditom innen, akkor már nem kellene nyomorogni, és ha velem igazán bizalmas lenne, megmagyarázná, hogy hol van a vagyon, akkor kevés részesedés mellett én is kiásom magának és annak a segitségével innen kiszabaditom . . .

Ha éppen annyira akar kiszabaditani innen, hát szabaditson ki és akkor közösen kiássuk, — egyezett bele Mr. Buvárkodó.

De nézze kérem, magát vigyázzák és ha szabadon lesz is még jobban fogják vigyázni, de ha megmagyarázza nekem, hogy hol találom, akkor én kiásom, mert hát tudja kérem, hogy a kiszabaitása is pénzbe kerül és abból arra is telne, . . . közbe Mr. Schwartz örömtelt szivvel számitotta, hogy ha még át is ad valamennyit ennek a bolondnak belőle, de bizony az nem tudja mennyi volt és nem muszáj mindről beszámolni, hátha a kiszabaditása sem lesz olyan költséges, mint amennyit azért is beszámithat . . .

Nem bánom, én bele megyek, csak ne, hogy engem okoljon a bajokért, mely esetleg önt is érheti. És halkabban kezdte magyarázni. Rajzban mutatta meg, hogy merre van az emlitett pénz és ékszer elásva.

Mr. Schwartz alig várta, hogy teljesen tiszta képet kaphasson ezen nagyszerü üzleti fogásról. Mikor teljesen megértette a magyarázkódást, meleg barátsággal bucsuzott el Mr. Buvárkodótól, igérte neki, hogy mentől hamarabb ismét szabad lesz, valamint hüséges segitségéről, barátságáról igyekezett őt biztositani.

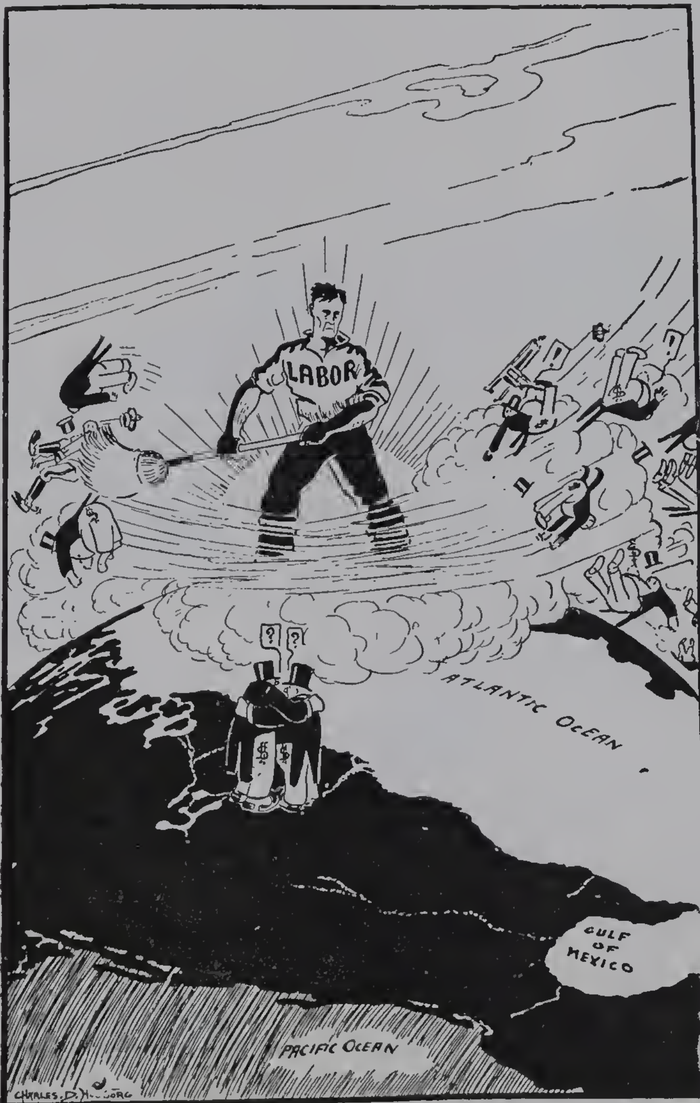
Amint hazaért, azonnal kocsiba ült és kihajtott a megmagyarázott helyre, hogy még a napfénynél szemlét tarthasson bár tudta, hogy csak éjjel kezdhet az ásatáshoz, melyet bizony neki személyesen kell majd végezni, mert hát erre nem fogadhat fel munkásokat, ezt másnak nem szabad megtudnia.

Még vissza ment a faluba, mely közel volt és telefonált családjának, hogy nem megyen haza majd csak későn és ne aggódjanak miatta, akik bizony nem igen aggódtak volna a figyelmeztetés nélkül sem.

Este tizenegy órára ott volt és a kocsit jó messze hagyta ne hogy még az is gyanut keltsen a szükséges szerszámmal elgyalogolt a jól megismert helyre és lázassan fogott a munkához.

Ásott szorgalmasan, már hat lábbnyira leásott és még mindég nem talált semmit, csak köveket, melynek a megkoppanása már-már örömmel töltötte el, és bánta, hogy miért nem kérdezte meg, hogy körülbelül, milyen mélyen lehetett elásva, vagy talán az a bolond sem tudta, gondolta magában.

Még egy pár lábbnyira leásott, de aztán kezdett ujból számolni, hátha mégis valamit eltévesztett, nem jól számolt, akkor ugy emlékezett, hogy Mr. Buvárkodó délkeletet mondott attól a bizonyos nagy fától és ő talán nem éppen délkeletnek ment, tehát szükséges, hogy még oldalt ásson. Nagy igyekezetébe nem is vette észre az idő gyors haladását még vagy tizlábbnyira ásott oldalvást, mikor látta, hogy kezd hajnalodni és még mindég nem találta meg a pénzt.



Csak az ipari szervezet erejével végezhetjük el azt a közmondásos "nagytakaritást," mely megszabaditja az emberiséget a heréktől, a ingyenélőktől.

Ujból számitott de mégis csak itt kellene neki lenni, hátha mégis bolond az az ember én belőlem is bolondot üzött és nagy mérgesen vette fel az ásót, lapátot ment vissza a kocsijához, mert már ugy sem áshatott volna tovább, meglátták volna.

Holtfáradtan ért haza, még ilyen erősen soha nem dolgozott életében, minden izma, csontja, testrésze fájt, és minden evés és magyarázkódás nélkül feküdt le, de alig tudott elaludni, azon gondolkozott, hogy fogja összeszidni azt a bolondot, aki őtet igy bolondá tette, de mégis elszunyókált percekre, és akkor is csak az ásásról álmodozott, kereste a pénzt, az aranyat.

Mire az ujabb látogatási óra ideje megérkezett, már az elsők között volt a bolondok házába és kereste Mr. Buvárkodót, akit ismét a könyvbe elmerülve talált meg. Mérgesen támadt rá. Maga igazán bolond . . . hiszen ottan nem volt semmi elásva . . . kiáltott még messziről, minden köszönés nélkül . . .

Én vagyok bolond? — kérdi Mr. Buvárkodó.

Nincsen ottan semmi, csak felültetett.

Honnan tudja, hogy ottan nincsen semmi? — kérdi nyugodt hangon Mr. Buvárkodó.

Hát felástam vagy 250 köbláb földet és nem találtam semmit, mondja Mr. Schwartz mérgesen.

Ha-ha-ha, — nevetett Mr. Buvárkodó és még a könnyei is kicsordultak nevetésében . . . és maga én rám mondja, hogy bolond vagyok . . . Haha-ha. Én csak mondtam, hogy ottan pénz van elásva, de maga kapzsiságában még azt el is hitte és órák hoszszat ásott hiába és mégis engem tartanak bolondnak.

Én vagyok bolond . . . mert megláttam, hogy maguk egész életükben egymást tiporták, marták, kizsákmányolták, hogy nagyobb, nagyobb, nagyobb vagyonra tegyenek szert, és még az sem volt elég, még most remélt, hogy ujabb könnyü pénzszerzeményhez jut, mert hát a bolondnak ugy sem kellett volna elszámolni . . .

De én egész becsületesen vettem fel a dolgot. Ne tételezzen fel ilyesmit rólam, vágott közbe Mr. Schwartz.

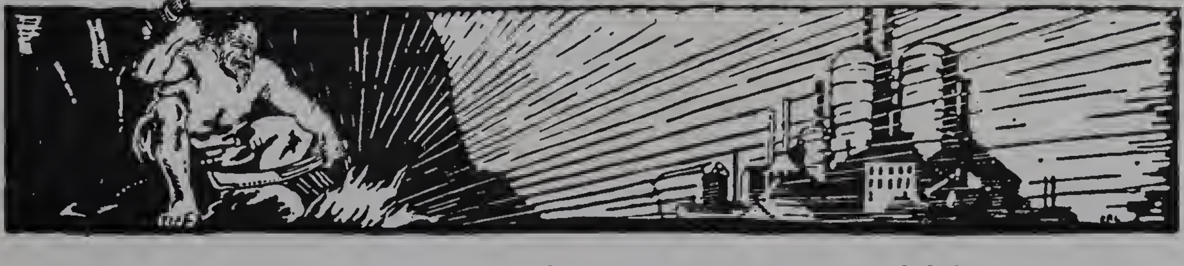
Én nem tételezek fel magukról semmit, mert én tudom minden számitásukat, lelkivilágukat. Miért kimélt volna meg engem, mikor évtizedekig, gyermekeket kizsákmányolt, egy pár dollárért dolgoztatta őket szakmányba, még zsenge korukba tönkretette őket, sokakat elnyomoritot. Mégis én vagyok a bolond . . . Nem elégedett meg azzal a vagyonnal melyet össze harácsolt mások kizsákmányolásán, hanem bolondnak hitt emberek jóhiszemüségét is kiakarta használni.

De . . . akart közbevágni ismét Schwartz. Mr. Buvárkodó teljesen tüzbe jött és már nem engedte, hogy évekig visszafojtott vádjait, támadásait most megszakitsák . . .

A kormány statisztikája szerint is a nemzeti vagyon 70 százalékát elpazarolják, egymást millió számra gyilkolják, telt raktárak mellett éhen halnak ezrével. Eladják fiatalságukat, életerejüket éhbérért, a jó élelmet megsemmisitik, hamisakat gyártanak, hogy több hasznot hajtsanak. De én vagyok a bolond . . . Ezt mondja ön, aki éjjel-nappal robotoltatott, ideje sem volt, hogy az igaz életett megismerje, nem csak másokat hanem önön magát is kizsákmányolta, mindég az üzlet után szaladgált és azon töprengett, aggódott, hogyan tudna olcsóbban kapni munkásokat, és másoktól az üzletet ellopni.

Én vagyok bolond . . ., az meglehet . . ., azért zártak ide, de nemis akarok az olyan okosok között élni mint maga és társai, még látni sem akarok olyan okosokat . . . No mit bámul rám, legjobb ha megyen innen, menjen vissza okos barátaihoz, csalják, lopják, gyilkolják egymást . . . Ne szóljon . . . nem vagyok kiváncsi bölcs mondásaira, akadályozta meg Mr. Buvárkodó a meglepődött gyárost a védekezésébe . . . Menjen, menjen, mert az ápolókat hivom és erőszakkal viszik el innen, — és tuszkolta is a kapu felé a visszavonult gyárost.

Mr. Schwartz, még soha nem hallott ilyen beszédet, de védekezni sem tudott másképpen, csak azt morogta magában, "bolond ez, bolond" és szégyenkezve ballagott a kapu felé.



Sok ember van még a modern városban ősmeber észjárásával.

A M

AMERIKA EGYIK LEGJOBB VAGYONI ÁLLAPOTTAL BIRÓ BETEGSEGÉLYZŐJE

A Munkás Betegsegélyző Szövetség

ALAKULT 1906-BAN.

AZ AMERICAN EXPERIENCE TÁBLÁZAT BIZTOS FIZETÉSI RENDSZERÉNEK ALAPJÁN NYUJT:

300, 500, 750 és 1000 dolláros haláleseti járulékot és heti 7 dollár betegsegélyt folyósit 300 egész és 300 fél napra.

Ezen felül csonkulási dijakat, szülési segélyeket és tagdij kölcsönöket ad a tagjainak. Ha most belép, akkor két havi diját a központ elengedi.

IFJUSÁGI OSZTÁLYA

Havi 10 centért 300 dollárig menő haláleseti járulékra biztosit egytől 16 éves korig.

A LEGKISEBB DIJÉRT A LEGNAGYOBB JÁRULÉKOT NYUJTJA.

MAGYARORSZÁGI BESZÁMOLÓ 1935-BŐL

IRTA:

F. S. JÓZSEF

PKEZDJÜK TALÁN ott, hogy az 1935. év semmi javulást nem hozott a magyarországi gazdasági viszonyok terén. — Sőt.

Gömbös éra, amely immár 3-ik esztendeje (hiven Gömbös germán származásához) irtja, pusztitja a magyar népet, igyekszik tökéletes munkát végezni. A nép még mindég ott tart ahol Caraffa és Kollonich idején a szabadság dolgában. Ma mintha iránytüje lenne a Gömbös érának Kollonich érsek mondása: "A magyarokat előbb koldussá, azután németté teszem." E hirhedt mondás, amelyet Caraffa és az eperjesi hóhér annak idején aktivan is végzett, első részben már megvalósult. A 8 milliónyi magyarból 3 millió az ő megállapitásuk szerint is koldus sorsra jutott. Szomoru az a sorsüldözött és jobb sorsra érdemes magyar népre. Ma már elkoptak azok a frázisok, amelyekkel több mint egy évtizeden keresztül leplezték munkájukat. Ma már nincs senki e kis országban aki látva az értékek harácsolását, a nyomor okakénti magyarázatot, elfogadná Trianont, mint hosszu időn keresztül ezt elhitték. Igaz, hogy már az egyébként gazdasági téreni analfabéta kormányférfiak sem hivatkoznak reá. Az utóbbi éveket a kapitalizmus centralizációja és ezzel parallel a nép fokozottabb kizsákmányolása jellemzi. Ma soha nem látott hatalmakká nőttek ki természetesen kormánysegitséggel a trösztök, kartellek. Minden termelési ágban csöndes társként látjuk a Gömbös érát is. Láthatjuk ezt adózás, de láthatjuk ezt "kincstári haszonrészesedés" alakjában is. Világos tehát igy az is, bár a népet ezzel széditik miért nem mer és bir a kormány föllépni a trösztök és kartellek hatalmával szemben.

Az állami gazdálkodás is élénken mutatja azt, hogy az állam az adóprés gyilkos és kegyetlen alkalmazásával dolgozik, szivja, szivattyuzza a gazdasági élet vérkeringését, de a kiszivattyuzott érték csekély százalékát forditja az ország, a nép javára. Ilyen adóztatás mellett ami itt van nagyokat lehetne alkotni az ország és nép javára . . . és nem történik semmi.

Az az mégis történik: Gömbös felfogásával és főleg származásánál fogva kacérkodik a barna és fekete fascizmussal. Ugy látszik Európában amint 1909 óta ugy ma is egy cél van Magyarország "hivatalos" világa előtt. Az ország szekerét a germán hatalomhoz kötni. Mit számit nekik az, hogy a nagy háboru vértengerében ez a szekér kátyuba jutott és apró részeire hullott szét. Mit számit nekik, hogy ma kizárólag e miatt csonka ez a szerencsétlen ország. Semmit. Ugy hazardiroznak az ország érdekével mint a főnöke pénzével alkalmazottjai, aki lóversenyre viszi azt ki, rendeltetési helye helyett. Szomoru de való. A lakájszellemü sajtó, mely itt találahtó tussol, ken, ferdit mindent. Egy része ezt teszi a szubvencióért mit Gömböséktől élvez a központi pénztárból. A másik része (alig van ugyan) teszi félelemből. A lapok fölött a ma is érvényben levő "háboru esetére szóló sajtótörvény" tenyerel reá. Igy fejük fölött állandóan Demokles kardjaként lóg a betiltás, megszüntetés és kolportázs jog megvonásának veszélye, amelyekkel a kormány sakkba tartja tehát őket. Arról talán kár beszélni, hogy a magyar ember nem azt olvashat amit akar, hanem amit Gömbösék megengednek neki. Igy fordulnak elő a külföldi sajtótermékektől az emberek eltiltása, azok elkobzása és a postai szállittási jog megvonása tőlük. Gömbösék folytatják tehát elődjük Bethlen stb.-ek munkáját a nép sötétben tartását.

Ha Budapestet nézzük, lépten nyomon beleütközünk kiadó üzlethelyiséget, lakást hirdető plakátokba. A családok, ismerősök összébbhuzódnak, a lakbérek horibbilis volta miatt. Elképzelhető milyen viszonyok között élnek emberek, ha átnézzük a részleges statisztikát:

1179 szobát találtak 9 lakóval.
618 ” ” ” 10 ”
767 ” ” ” 11 ”
207 ” ” ” 12 lakóval.

Találtak azután olyan szobákat is ahol 15—16-an “laknak.” Ezt a számot azomban kimutatni nem merték. Azt gondolnánk a népességnek ilyetén való összezsufolódása szaporitja is azt. Éppen ellenkezője történik. A nyomoruság miatt fogy az egyébként még mindég vezető fővárosi lakosság, (a vidék nem különben.) 1935 január 1-től, 1935 junius 30-ig 8133 halálozás és 7995 születés történt, mig 1934 január 1-től, 1934 junius 30-ig 7525 halálozás és 8151 születés történt. 1935. évben tehát növekedés 608, csökenés 156. Végeredményben a főváros lakossága 764 fő veszteséget szenvedett, tehát többet mint 100-at havonta. Ebben nagy része van az éhezés és hajléktalanság mellett a testet ölő kizsákmányolásnak is. Ugy gondoljuk szerencsések közé tartoznak akik dolgozhatnak. Ne beszéljünk a 24 filléres “szak” munkások órabéreiről, most (1 liter tej 32 fillér és egy villamosjegy 24 fillér.) Nézzük csak a munkaidő mértéket:

	Heti munka órák:
Könyvkötő munkásoknál	48
Bőröndös ” ”	56
Kőmives ” ”	60
Asztalos ”..(7 nap óta)	48
addig 60—100	
Szobafestő ” ”	50
Szabó ” ”	60
Pék ” ”	72
Szállodai és éttermi..”	72
Borbély ” ”	78
Vas és fém, gép ”	72
Nyomdai ” ”	36
Kádár ” ”	48
Ács ” ”	70
Fuvarozó ” ”	72— 96
Szállitó ” ”	48— 72
Magántisztviselők és kereskedelmi alkalm.	
Füszerkereskedelmi	80
Élelmiszer ” ”	84—108
Áruházi eladók ”	52
Irodai tisztv. (Ker.-ben)	57
Irodai tisztv. (Bankoknál)	48

Ezekben a számokban van a munkanélküliségnek az oka is. A kormány becikkelyezte a genfi Munkaügyi Hivatal 48 órás munkaidőre javasló ajánlatát. A törvénytárba megvan thát, csak a gyakorlati életben nincs.

A gyáripar racionalizál ez a mai kifejezése a trösztösitésnek. E kis statisztika itt beigazolja a már megemlitett csöndestársi viszonyt is, miért is kell, hogy érdekeljen bennünket.

*** A gyáripari termelés értékéből:**

	A tőke szolgálatára fennmaradt összeg: Millió	Mit állami adók és más állami terhek összeg: Pengőben
1925-ben	489	45.5
1926-ban	587	50.4
1927-ben	753	75.4
1928-ban	805	71.9
1929-ben	817	83.1
1930-ban	757	74.8
1931-ben	633	70.0
1932-ben	564	85.7
1933-ban	532	104.0

Megdöbbentő, hogy az állam “résesedése” 1925-ben amig csak 9.5%-lék volt. 1933-ban pedig már 17.7%ra rugott.

A kézi ugy nevezett szakmai termelésnek gépipari termeléssé való átalakulását is szemléltetően láthatjuk:

	* Erőgépek lóereje:	*Teljesitett munka napok:
1925-ben	931.800	54.323.000
1926-ban	952.900	55.679.000
1927-ben	1.028.400	66.159.000
1928-ban	1.076.400	68.542.000
1929-ben	1.152.800	68.343.000
1930-ban	1.237.700	60.259.000
1931-ben	1.309.900	53.625.000
1932-ben	1.305.300	46.956.000
1933-ban	1.357.000	48.884.000

1927-től 1933-ig a magyar gyáripar termelőképessége 20.1 százalékkal nőtt, átlagossan tehát évi 3.3 százalékkal a kapacitás kiterjedése. Amig 1925-ben egy lóerő hasznositásához 58 munkanapra volt szükség, addig ezt 1933-ban már lerendukálták 37 munkanapra. Ez pedig 36.2 százalékos racionalizálásnak felel meg.

---

* Dr. Varga István “adalékok a magyar gyáripar helyzetének konjunkturális alakulásához” cimü könyvének statisztikai adataiból.

Ha ezt az eredményünket összevetjük a termelés értékének a tőkeszolgálatra jutó részével (profit.) ami 9 év alatt 489 millióról 532 millióra növekedett, akkor láthatjuk világosan egyhészt a szakmai termelés kihalási folyamatát, másrészt a kizsákmányolás növekedésének egész nagyságát. Nem csodálni való tehát az, hogy egyrészt a munkanélküliség a gépesités fejlődésével évről-évre növekszik. A szakmai munkásság ezzel arányba szorul ki a termelésből. Ma még nem "akarják" ezt tudomásul venni ugyan a "szak" munkások, ami azomban a tényeken nem változtat semmit.

Budapesten 1935-ben ha csak a szakszervezeti tagavatási ünnepélyeket (ála Céh módszer) és zászlószenteléseket nem nézzük, leszámitva a dupla választási cirkuszt, komolyabb munkás esemény mindössze négy volt. Az első részleges sztrájk a textiliparban tört ki — 90 százalékban elbukott. A második az ujpesti "asztalos" sztrájk volt. E sztrájkban nem csak a munkások, de a kisiparosok is harcoltak kooperative. Eredmény a 48 órás munkahét és minimális órabérek megállapitása (erre szóló miniszteri rendelet a napokban jelent meg ezernyi kibuvó lehetőséggel spékelve.) A harmadik a cipész sztrájk volt, amely csak egyes mühelyekre terjedt ki és csendben kimult. Végül a legvehemesebb volt az ugyancsak e hét folyamán (augusztus 19-én,) csufosan elbukott "Általános Épitőmunkás Sztrájk." Mondanunk sem kell, hogy ezeket a sztrájkokat amig az első kettőtt a szakszervezeti vezérkar irányitotta, addig a másik kettőbe a KMP is aktivan vett részt a vezetésben. Az épitőmunkás sztrájk igényli a fölboncolást tüzetesebben. Egyrészt azért, mert a legnagyobb tömeget mozgatta meg, másodszor pedig azért mert ilyen csufossan még nem bukott el Magyarországon egy ilyen nagy sztrájk. Kezdjük ott, hogy ez az "Általános Sztrájk" csak amolyan fából vaskarika volt. Résztvettek benne ugyan: A szociáldemokraták, kommunisták, keresztény szocialisták, IWW-isták, NEP-isták és a hitlerista fölfogásu munkások, tehát olyan tömegmegmozdulás volt ami Magyarországon még soha, azomban a sztrájk vezetését a Szocialdemokraták és a KMP kaparintották kézhez együttessen. Minden erőlködés hiábavalónak bizonyult és megtört a vezérkar ellentállásán, amely azt célozta, hogy valóban Általános Sztrájk legyen belőle. Már a sztrájk kiindulása is rávallott a két balkezes vezetésre. Ugyanis nem terjedt ki például a festők, mázolók, kőfaragók, burkolók, parkettázók, kályhások, cserépfedők, épületbádogosok és vizvezetékszerelők és mindezek segédmunkásaira stb. Ezek dolgoztak zavartalanul az épületen, leadtak a sztrájkolók részére pár fillért, és letörték a sztrájkot. A sztrájkolók gyülésein szólásszabadsága volt minden felfogású csoport emberének, még a hitleristáknak is. De az IWW-istákat ettől elütötték. Igy képtelenség volt a sztrájkot tehát Általánossá fejleszteni és beigazolódott, hogy az IWW-isták álláspontja volt a helyes, mely a tömeg között rámutatott már az első napokban, ha nem terjesztik ki a sztrájkot ugy bukása biztos. Ez egyéni agitációra a vezérkar röpiratban igyekezett ellennyomást gyakorolni, melyben fölhivta a sztrájkolókat, hogy csakis az ő utasitásait kövessék és tartsák be, mert ellenkező esetben elveszitik a harcot. Hát betartották és mégis elvesztették. Sőt pontosabban éppen ezért veszitették el. (Körülbelöl 6 évvel ezelőtt az IWW vezetése mellett győzelemre vitték a sztrájkjukat és 1 p.-ős órabért vivtak ki. A kommunista párt és szakszervezeti furások nem áltak ellent, hagyták az egységüket fölmorzsolni és még körülbelül 40—50 százalékos bérveszteséggel dolgoznak, ezt köszönhetik a kommunista párt és szakszervezeti vezérkarnak az épitőmunkások.)

Az ország egész lakóssága szimpatizált a sztrájkkal, (nagy szó ez itt) és sietett a sztrájkolók segitségére. A hivatalos világ a kapitalisták mellé állott, mint rendszerint itt szokás. Ezt mindenkor megtették, de talán sohasem ilyen nyiltan és szemérmetlenül. Nem csak a rendőrség, csendőrség és kormánylapok dolgoztak a sztrájkolók ellen, (egyik mtársunk kezéről két ujját vágta le a rendőrkard,) de maga a közigazgatás egész apparátusa. Vidéken HIVATALOSAN toborozták a sztrájktörőket, sőt nem csak toborozták, de kényszeritették is a munkanélküli épitőmunkásokat az ingyen moslék megvonásának terhe mellett, hogy Pestre jőjjenek dolgozni. A községeknek, amelyeknek egész Magyarországon az Anya és Csecsemővédelemre csak 300.000 pengőjük jut; most jutott arra, hogy a barom módjára fölhajszolt sztrájktörők utiköltségeit is fedezzék a köz-pénzéből. Az épületeket rendőrök őrizték, kerékpáros és motoros rendőrhadsereg cirkált, ezen kivül a környékükön, hogy megakadályozzák a sztrájkolókat abban, hogy megközelitsék az épületeket. A picketelőket elfogták, (ma is sokan vannak bent) és durván bántalmazták, mert odamertek menni. A MÉMOSZ aho a sztrjktanya volt rendőrségi és detektivek megszállása alatt az egész környékkel együtt. A vasmunkások sztrájkba akartak lépni, szakszervezetük leszerelte, árulás a vezérek részéről siettette a sztrájk elbukását. Körülbelül 15—20 ezer pengő folyt be a MÉMOSZ pénztárába és hangok hallaszanak, hogy 8 de 5 biztosan ezresekben elsikkadt a vezérkar kezein. Annyi tény, hogy nyilvános elszámolást a sztrájk befejezése után a gyüjtött hatalmas összegről nem adtak. (A gyüjtési kimutatásban az az 5 gyüjtőiv összege sem szerepel amit mi adtunk be a vezérkarnak.) Ugy hir-

lik nem is adnak. Egy az bizonyos a MÉMOSZ vezérkara szanálta magát is meg a mémosz-nak ingadozó pilléreit, ennyire volt jó a sztrájk. Egy kis virágot tüzök ide az olvasó elé, hogy lássák milyen "PÁRTATLAN" is itt a közigazgatás. (Szerényebbet választottam.

(Pestszentlőrinci Hirlap 1935 augusztus 10-iki számának 3-ik oldala.)

A munkanélküli lőrinci épitőmunkások figyelmébe!

Pestszentlőrinc község előljárósága.

27710/1935 szám.

FELHIVÁS!

A budapesti épitőmesterek, kőmüvesmesterek és Épitési Vállalatok Szövetsége azzal a kérelemmel fordult előljáróságunkhoz, hogy a budapesti épitőmunkások sztrájkjára tekintettel hivjuk fel a pestszentlőrinci munkanélküli épitőmunkásokat, hogy az emlitett szöveség munkaközvetitő intézete (Budapest VIII., Német utca 22.) korlátlan számban felveszi a jelentkezőket. Órabér 24 fillértől.

A munkanélküliek figyelmét a magunk részéről is felhivjuk erre!

Pestszentlőrinc 1935 augusztus 8.

Az előljáróság.

Elég ékesen beszél ugyebár ez a hivatalos hatósági irat. Vajjon a "pártatlan" közigazgatás ugyanilyen készséggel publikálta volna a munkás szervezet fölhivását is, hogy "sztrájk van a nagyobb kenyérért épitőmunkások Pestre ne jöjjenek." Alig hisszük. (Én egyáltalán nem hiszem: a szedő.)

Ha már a közigazgatásnál tartunk térjünk reá, hogy ezt a "pártatlan" közigazgatást vajjon kik tartják el. A kapitalisták? Óh dehogy. Azokat szolgálják. Azok parancsait teljesitik, de a néppel tartatják ki magukat. Hát ez csak logikus nemde?

A magyar adózási rendszer, mely Európa legantiszocialisabb adórendszere a községek (közigazgatás) kiadásainak fedezésére az állami elég magas adón kivül N. N. pótadót szednek. (Mi az, hogy szednek? irgalmatlanul bevasalják, ha a paraszt bele is pusztul: a szedő.) Ez a pótadó az állami adónak Magyarország 3348 községébe 40—150 százalékig nyomja a lakósságot. Községekben 5.803.229 ember él Magyarországon. Ezek egészségügyét 957 (nagy szám ugye?) községi és körorvos szolgálná, ha birná. Egy-egy orvosra kereken 6000 ember egészsége fölötti őrködés jut. Ugyanekkor a közigazgatást 3628 jegyző, 21.169 községi tisztviselő, — 24.797 firkász intézi. A bürokrácia tehát amint látható polip karjaival szoritja magához a népet. Csanádmegyében van egy kis falu Gyála. — Térképen is alig fedezhető fel. Na ez a kis falu alaposan nyöghet. Lelkenként 94 pengő évi pótadó jut minden lakósra beleértve az ujszülötteket is. (Magyarok szaporodjatok.) Hévizszentandrás sem panaszkodhatik, Keszthely mellett mert ott viszont "csak" 55 pengő a fejenkénti porció. Van aztán az országban 13 olyan boldog falu is, ahol 4 pengő a porció és 1 darab Vágáshuta ahol 1 pengőt tesz ez ki évenként. Félreértés ne legyen évenként értendő.

A 3348 község között azért összesen van 11, ameyiknek a kiadásait fedezik a bevételei. A többi 3337-nek 25 millió pengővel több a kiadása és ennek a hiánynak fedezésére kell a pótadó. A kiadásaik igy oszlanak meg:

A "Pártatlan" közigazgatás tisztikarának eltartása elmegy *	57.7%
Tanügyi és Testnevelés (Leventézés) szükségletekre	13.1%
Közlekedési, (a jegyző ha kocsizik) köz és állategésségügyre	7.--%
Közmüvelődés és egyházakra	3.5%
Szegény ügy és Népjólétre	3.1%
Tüzrendészetre	4.--%
Adókezelésre *	1.6%
	100%

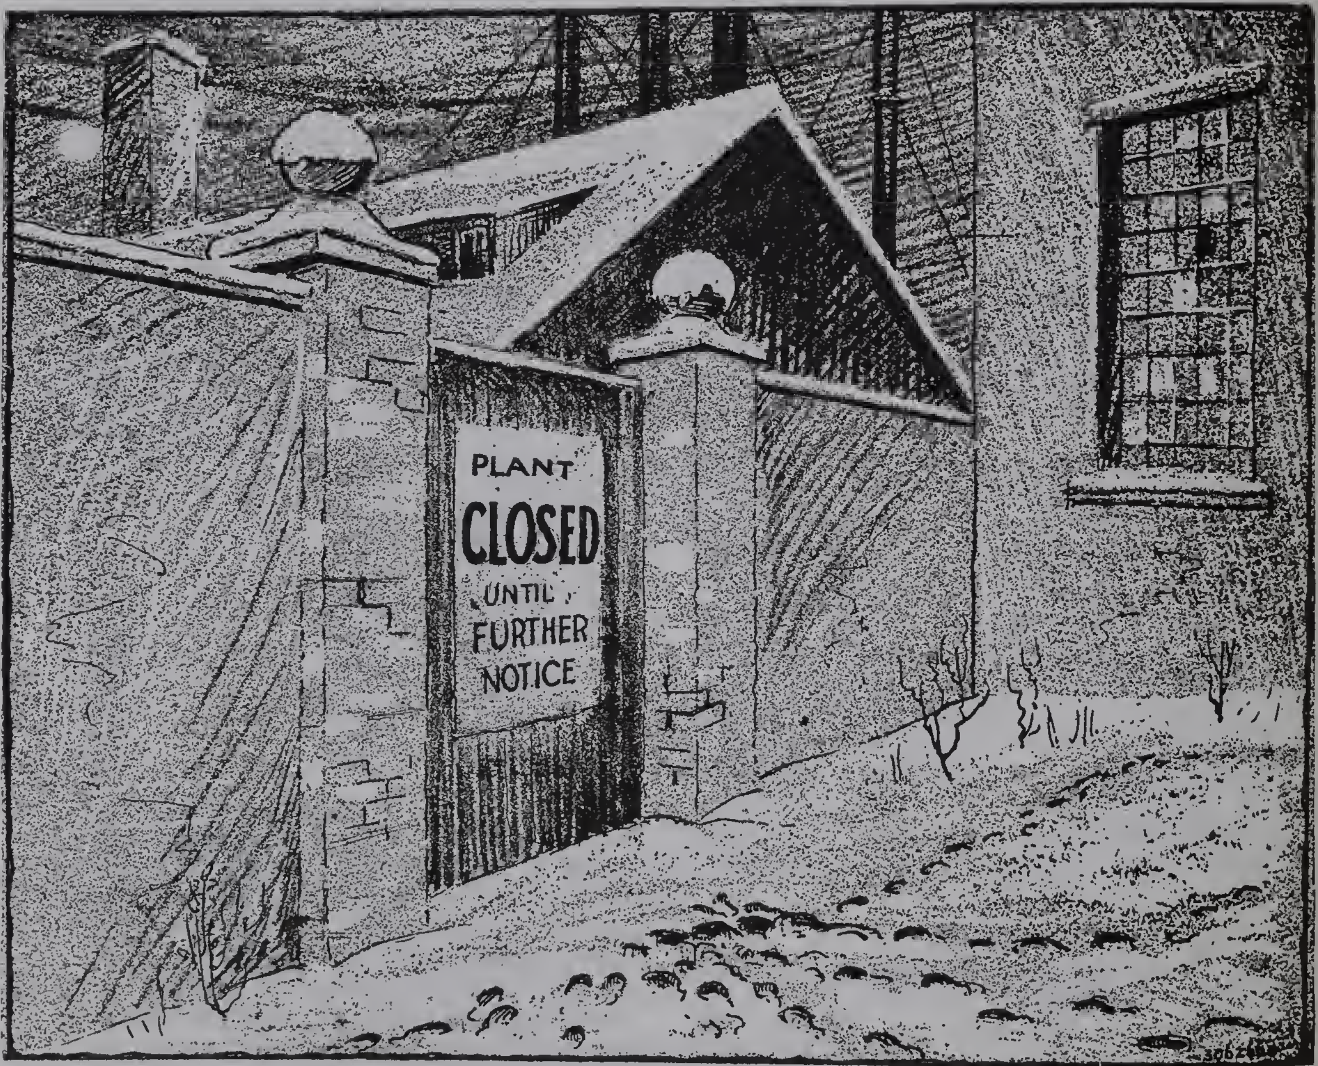
Az embernek a haja az égnek áll ha végignézzük kik tartoznak a községi akalmazottak soraiba. Mennyi here! Jegyzők, segédjegyzők, számtisztek, kataszteri nyilvántartók, irodatisztek, végrehajtók, kezelők, iktatók, kiadók, adóellenőrök, adótisztek, pénztári ellenőrök, rendőrbiztosok, rendőrvezetők, (nem hivatásos spiclik?) és rendszeresitett dijnokok. Lehetnek ezeken kivül, bár nem mindenütt tartják őket, minek csak fölösleges luxus nemde? Községi orvosok, állatorvosok és mérnökök is a községek szolgálatában. Most azután ha összegszerüségre bontjuk fel a községek pótadóit, hogy mennyit és mire forditanak megtudjuk, hogy a 3348 község összesen és együttvéve.

	Pengőt.
Járványkórházakra fordit egy év alatt	100.000
Fertőtlenitőszerekre	200.000
Anya és csecsemővédelemre	300.000
Hazafias és társadalmi egyesületekre	500.000
Felekezeti iskolák tanitóinak fizetésére	2.200.000

A községek szükséglete évi 74.2 millió pengő volt 1934-ben.

Azt hiszem az itt ismertetett 5 tételhez szükségtelen magyarázatot füzni. A számok beszélnek önmagukért. Jellemző csupán az, hogy amig a községek lakósai nyögik a felekezeti iskolák terheit, addig a felekezeteké a felügyeleti és rendelkezési jog, bár egy fillért ahoz nem adnak.

Ennyi volna az elmult 1935 évről a beszámolóm. Hiszem azt, hogy nem végeztem hiába való munkát . . .



A munkások szervezkedésén mulik, hogy a gyárak kapui megnyiljanak.

RÖVID BESZÁMOLÓ AZ IDEI NYÁRRÓL

IRTA:

VERES PÉTER

P AZ UJSÁGOKBAN képek: fürdőruhás hölgyek apró gyerekeiket uszni tanitják. Hosszu tudósitások arról, hogy a hőhullám megállitja az életet és aki teheti, menekül a vizbe és a fák alá.

Más: Hirek és beszámolók arról, hogy Indiában, Kinában, Japánban 8—10—12 éves gyermekek dolgoznak a gyárakban napi 10—12 órát.

Más: Folyóiratban, ujságokban, könyvekben és parlamentekben arról folyik a vita, hogy melyik jobb, a kisüzem-e, vagy a nagyüzem. Az érvek és a szempontok sokfélék. Köztük ott van az is, hogy a kisbirtok több munkaalkalmat ad a családtagoknak, mint a nagybirtok. De jellemző, hogy ugy a kisbirtok prófétái, mint a nagybirtok iródeákjai elfelejtették érvül, illetve ellenérvül fölhasználni, hogy elég baj az, hogy a kisbirtokon dolgozó 8—10 éves gyerekek nem köszönik ezt meg a szüleiknek s anak a rendnek, amely a szüleiket arra kényszeriti, hogy felnőtt munkás helyett a saját apró gyerekeiket kinozzák a nem nekik való munkával.

De lássuk a tényeket.

* * *

Az idei buzatermés jobbacskán mutatkozott. A nagy hőség azonban hirtelen “leérlelte.” A miniszter ezért felfüggesztette a vasárnapi munkaszünetet, ami azt jelenti, hogy nem ugy volt, mint eddig, hogy törvénytelenül arattak vasárnap, hanem most — törvényesen. S nemcsak maguknak, mint ősidők óta, hogy az arató, akinek magának is volt egy-két hold buzája, azt vasárnap vágta le, hogy az uraságnál meg ne rövidüljön, — hanem “szabályosan” a gazdáknak is, már aki ezt akarta. Éppen csak, hogy tisztát váltottak, az asszonyok kimosták a szükséges rongyokat és mentek vissza a munkába. Igy az aratás ideje — ez már évek óta igy van, de az idén a csucspontra lépett — összeszorult pár hétre s egyuttal már folyik a cséplés is. Még aratnak, de már a másik végét csépeltók. Ezen a pár héten aztán ugy összeszorult a munka, hogy a szegény földmunkás majd belefulladt. Sietnie kell, hogy sokat markoljon.

Kétségbeejtő ellentmondás!

Az egész világon, még Magyaországon is az iparban állandó folyamat a munkarövidités és szinte már törvény a hétvégi pihenő, a vikend és ugyanakkor a magyar Alföldön meghosszabbodik a munkaidő és meggyorsul a munkatempó egészen a kibirhatatlanságig.

* * *

Egy asszony meghalt hőgutában az uradalomban és mindenfelé sokan megbetegedtek, részint a hőségtől, részint a nehéz munkától és a rossz táplálkozásból eredő gyengeségtől.

“Sietni kell, mert ülhetünk a jövő nyárig otthon” — ez a jelszó.

* * *

De nemcsak erről akartam beszélni, ez csak bevezetés az igazi mondanivalóhoz.

Az uradalmak különböző ipari növényeket is termesztenek, amióta a buza “nem járja ki magát.” Eleinte aratókat szerződtettek rá, de most jobbnak látták napszámosgyerekekkel elvégeztetni, — mivelhogy teli van a falu munkanélkülivel. Mármost, amire a buza megérett, a borsót is nyüni kellett. Én nem tudom, próbáltak-e rá felnőtt munkást szerezni, de lehet, hogyha próbáltak volna is, csak rendes arató napszámért kaptak volna, Ehelyett hát kihirdették a faluban, hogy apró gyerekeket, 8—10—12 éveseket vesznek föl munkára, napi 50 fillérért. Emellé még kapnak 30 deka kenyeret és egy félliter tejet ebédre. Este, reggel pedig szekérrel hozzák-viszik őket.

Meg kell adni, az uradalom “humánus" volt, mert ezen a tájon sohasem adtak a napszám mellé még enni is. s sohasem adtak szekeret a 8—10 kilométerre gyalogoló gyerekek és emberek alá, akik az egész tavaszon már kijártak kapálni és gyomlálni. Nem is ez az egészben a megdöbbentő és nem is az, hogy a hatóságok ezt a gyermekmunkát elnézték, hanem az, hogy olyan nagy volt a tolongás, hogy a beküldött szekerek sohasem győzték fölvenni a jelentkezőket. A gyerekek maguk is igyekeztek, hogy pénzt keressenek, szerintük, kartonruhácskára, fejkendőre és kiskötényre, anyjuk szerint sóra, paprikára, krumplira,mivelhogy az apák aratni vannak és pénzt nem látnak, mert buzából részesednek, de majd csak a végén.

Kilencéves kislányom estéről estére sirt az anyján, hogy de kora hajnalban keltse föl, mert ő megy napszámra. El is mentek a 11 éves fiuval talán három vagy négy hajnalon, de egyszer sem tudtak bejutni, annyian voltak. Pedig már hajnali félháromkor föl kellett kelniök s szaladniok a kastély udvarára, a nagy lapos falu messzi utcáiból, ahonnan aztán kivitték őket 8—10 kilométerre. Este féltizkor jöttek haza. Számitsák ki a japán dömpingen felháborodók, hány óra ez? Mellékesen 34—36 fokos melegben borsót cibáltak, ami nem is olyan tulnyomóan könnyü munka, mert némelyiknek erős a gyökere tizéves gyerekek kezéhez.

Az egészben az a szomoru, hogy hamar vége lett, keveset tudtak keresni és azt is csak kevesen. És az még szomorubb, hogy ezt kell sajnálniok. Hogy anyák és gyerekek olyannyira törik magukat az után a pár fillér után. S ez ugyanakkor, amikor a 30 órás munkahétről beszélnek s a gyermekmunkát törvény tiltja az egész világon, sőt éppen azokban a napokban, amikor a genfi Nemzetközi Munkaügyi Hivatal a gyermekmunka eltiltásáról tárgyalt. És ugyanakkor, amikor még a már pihenni készülő reformparlamentben a leghangosabban szónokoltak a magyar jövőről. De mit várhatnak attól a magyar nemzedéktől, amelyik 10 éves korában borsót nyüni jár napi 18 órai, ha nem is munkával — ami kibirhatatlan —, de strapával, ami majdnem ugyanaz.

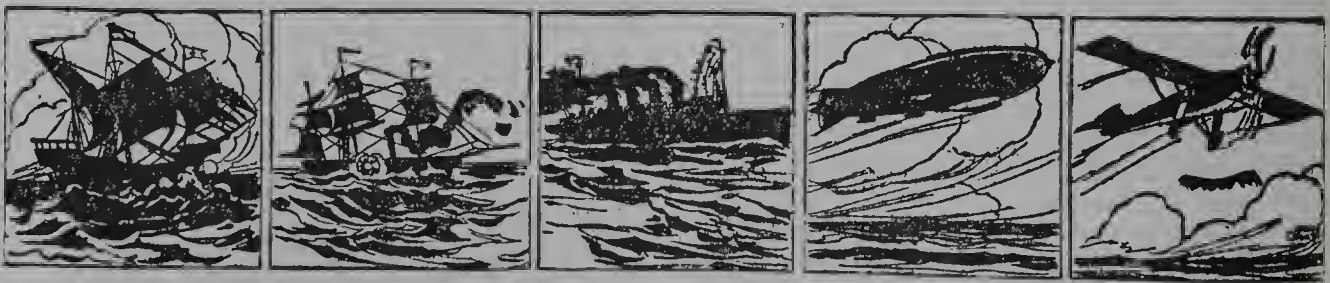
* * *

Mi ebből a tanulság?

Az, hogy nem henceghet már a kisbirtok védője, hogy itt a gyerekek is kapnak munkát, mert a nagybirtok ezen a téren is tulhaladja, ha komolyan akarja. S miért ne akarná, ha lehet? A tőke nem szentimentális.

A másik pedig az, hogy az agrárkapitalizmus, ime, nem adja fel a versenyt. Ha gépekkel nem birja, akkor — gyermekmunkával próbálja meg, hogy elérje az egyedüli célt, a rentabilitást, a hasznot.

Nemzetvédelem? Szociálpolitika? — Akinek fáj a foga, tartsa rajta a nyelvét.



A közlekedés fejlődése erősiti a nemzetköziség szükségességét.

A MUNKÁSOSZTÁLY FELSZABADULÁSÁNAK AKADÁLYAI

IRTA:

SCHÖPF SÁNDOR

P MINDAZON munkások, akik csak egy kevéssé is tisztában vannak, a munkásosztály harcával, tudják: a munkásosztály felszabadulásának kérdése, nem egy ország, egy kontinens, hanem az egész föld kerekségén élő billiós dolgozó tömegeié.

A munkásosztály felszabadulásának akadályai

Minden gondolkozni tudó munkás előtt elvitathatatlan tény az, eltekintve az apró, mint faji, nemzetiségi vonástól, a világ mind a négy sarkában, csupán csak kétféle emberfajt ismerünk. Az egyik fél a dolgozók, a termelők serege, a másik fél pedig az, a melyik eltulajdonitja a termelt javaket. Másszóval az óriási tömegek folyton csak termelnek, s a hasonlithatatlanul kisebb csoport pedig csak élvezi a termelt javakat bárhol is termelték azokat a föld kerekségén és csak anynyit juttatnak a termelőknek, hogy fizikai létüket egyik napról a másikra tudják táplálni. Ez a nagy ellentét sok felkelés és forradalmat idézett fel — mégis képtelen volt a dolgozók osztályát felszabaditani, a kizsákmányolás alól. Az okok, melyek akadályai a munkásosztály felszabadulási lehetőségének, általános az egész világon.

Elsősorban a régi tradició, a hagyományhoz való ragaszkodás, a szabadulni nem tudó és egyben könnyen befolyásolható gondolkozásmódja a munkás tömegeknek, okozta azt, hogy a termelőeszközök gyors fejlődésével nem tudott lépést tartani az osztályharc terén. A különféle vallási nézetek, amelyek anyáról gyermekre szált, melyről Gorkij mondja: "Az egyházak az anyák emlőire vannak épitve," és a munkásság még felnőtt korában sem tudja levetni, sőt irtózik mindentől ami uj és ésszerübb a saját részére. A másik a patriotizmus, a hazafiság, melyet már az ovodába belénk nevelnek és az a nagy tömegeknél még az iskola elhagyása után is megmarad, dacára a szemünk előtt lejátszodó események ellenére is, melyek naponta igazolják, hogy a tőkések mit sem törődnek az országhatárokkal, más országokba, világrészekbe kötnek mindenféle üzleti ügyet, ruhát, élelmet sőt fegyvereket szállitanak messze tul az ország határokon.

E két hagyományos tanitások méltó fegyvertársa a **sajtó**, amelyet a tőkésosztály irányit a saját érdeke szerint. S a hagyományoktól átitatott munkásagyak elhiszik a tőkés ujságok, folyóiratok és könyvek hazugul beállitott cikkeit és irodalmait, azt hiszik, mivel ezek a sajtó termékek, nyilvánosan és nyomtatásban látnak napvilágot, tehát igazaknak is kell lenniök.

Pedig itt a tévedés, a tőkés sajtó jól tudja, hogy a munkásosztály nagy többsége még nem tudott a hagyománytól megszabadulni, nem tud szabad, tiszta és egészséges véleményt alkotni, befolyásolható gondolkozásmódja befogadja, a rosszindulatu és romboló hatásu hazugságokat.

Munkástömegek hosszu évtizedek alatt igy tanultak meg **hinni** bizonyiték nélkül, sőt sajnos hiszik még ma is, hogy a termelőeszközök tulajdonosainak teljes joguk van a munkásosztály kizsákmányolásához, megrablásához, a melyet elősegit a tőkés osztály érdekében alkotott törvények is. Ezek együttesen és egész biztosan beleviszik a hiszékenyek tömegeit az egész világon, a negyedik csapdába a **"politikai akcióba."** Minden politikai akció a sajtón keresztül közeliti meg a tömegeket, irtózatos pénzek, a legjobban fizetett ujságirók, a legravaszabb politikusok kiállnak a nyilvánosság elé, szóban és irásban ajánlják a munkásosztálynak, hogy helyzetének javitására, sőt felszabaditásának érdekében, lépjen az urnához és adja le szavazatát a bizonyos jelöltre, s ha az bejön, meg lessz oldva a várva-várt munkáskérdés. Azonban a történelmi tények ennek épp az ellenkezőjét igazolják. Ott van a munkáspolitikus kormány MacDonald, Mussolini, a néhai Ebert és Stalin.

Nincs külömbség köztük, legyen az fekete, vörös, tulipiros vagy kupikék. Egyben valamennyi közös és ez a **"Diktatura."** Minden diktatura elnyomatáson alapszik, bárhol legyen is az a világon . . .

Igen ám, ha mindez igy van és nem jól, hát mit kell tenni arra, hogy jó legyen és a munkás osztály felszabadulhasson végre?

Csak egy munkásszervezet van, mely elméletben épp ugy, mint gyakorlatban igazi munkás szervezet. Harminc esztendő óta tanitja a munkásosztályt a saját lábán való járására, a saját fejével való gondolkozásra. Szervezi a bérmunkásokat, szinre, fajra, nemre való tekintet nélkül egy közös nagy ipari unioba. Ez a "Világ Ipari Munkásainak Szervezete."

Célja: a termelés eszközeinek a dolgozók által való lefoglalása, hogy a földmivelés, halászat, bányászat, épitészet, ruha, butor és a közszolgálati ipar mind együttvéve azok kezébe legyen, akik azokban dolgoznak, s az ezekkel termelt javak senki másé nem lehetnek, csak kizárólag a dolgozóké.

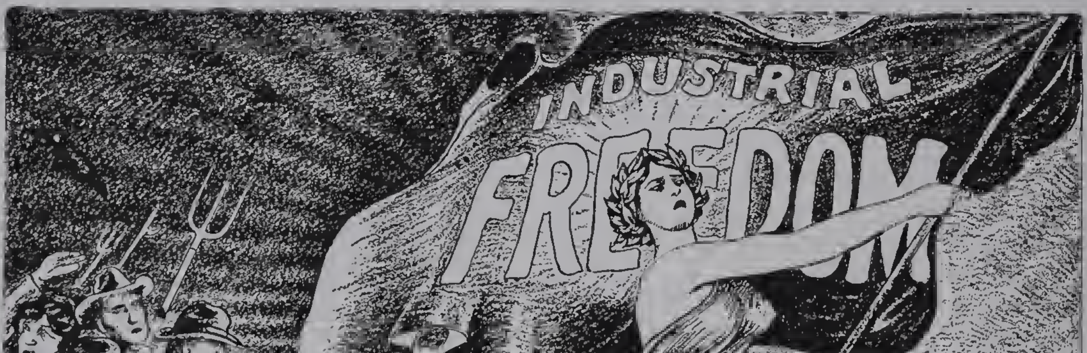
Ez nem vallási, nem hazafias és nem politikai — hanem ipari szervezet.

Fegyelmezett ipari csoportok végzik a **termelést** és a **szétosztás** müveletét is, nem bizzák azt másokra és eltörlik a minden nyomor, szenvedés, könny és vér okozóját a **bérrendszert.**

Ezzel egyidejüleg megváltoztatják az egész emberi társadalmat.

E szervezet ajtaja nyitva van minden bérmunkás számára, hogy együttes, válvetett munkával elháritsunk minden akadályt a munkásosztály felszabadulásának utjából, mert nem Messiások, nem Megváltók sem politikusok nem fogják ezt helyettünk elvégezni.

Az igazi szabadság, emberszeretet, világbékesség és boldogság megteremtése, a munkásosztály történelmi hivatása, itt ezen a földön.



Kövesd az ipari szabadság zászlaját.

"SEGITS MAGADON!"

IRTA:

SOMLÓ LIPÓT

PAZ EMBER gyermeke védekezni kényszerül — a bölcsőtől mindhalálig — a természet mostohasága, az időjárás veszedelmei és a társadalom bajaival szemben.

Erre az önvédelemre kényszerült az évezredek primitiv barlang-lakója és önvédelemre kényszerül a modern idők civilizált apartment-lakója is. A primitiv, "barbár" — társadalomban primitiv eszközökkel és szokás-módokkal védte magát az ember-fia, a civilizált világ komplikált, "civilizált" eszközökkel, kisérleti tudományokkal és fejlett társadalmi rendszerrel védelmezi lakóit.

A ma embere jobb védelmi eszközökkel könnyebben megbirkózik a természettel, az életfentartással és az élete megőrzésével járó veszedelmekkel. **A fejlett társadalom védő intézményeket épitett a keretében élő ember számára.** A védelmi eszközök fejlettsége, a védelmi intézmények eredményessége: fokmérője ma minden civilizált ország kulturájának.

Az ujabb századok fizikai ember-csodái: a gépek, rendkivül megkönnyitették az emberi szükségleti cikkek tömeges előteremtését és a velük járó munkafolyamatok elvégzését. A vegyészet tüneményes leletei és az orvostudomány tapasztalatai, vizsgálódásai, hosszabbitják az emberi léthatárt és sorra legyürik az ember ősellenségeinek: a bacillusoknak kórokat és járványokat okozó támadásait. De mégis és mégis: millió és millió embertársunk válik a korai halál áldozatává ma is.

Millió és millió munkástársunk válik évente munkaképtelenné, beteggé és rokantá. A kórházaink, a szegény emberek kórházai mindig zsufoltak. Minden tudományunk és mindenféle fejlett intézményünk dacára is: pusztitanak még a betegségek, az időelőtti elhalálozások és a modern gyáriparral és technikával versenytfutó szakmai betegségek, csonkulások, sérülések, balesetek.

A fejlett szociális törvényekkel rendelkező országok munkást-védő eszközöket követelnek meg a rohanó gépek mellé. Részben azért, hogy az üzemi baleseti károkat csökkentsék és részben azért is, hogy a gépeket kezelő munkásokat kevesebb rizikóval hajszolhassák a többtermelésre. Minden fejlettebb ipari államnak vannak ma már ugynevezett szociális törvényei, szociális intézményei, amelyeknek céljuk és rendeltetésük, hogy a modern ipari termelés munkását valahogy védjék és kárpótolják az életét és egészségét állandóan fenyegető speedelt gépek és ártó vegyi behatásokkal szemben.

Az állami beavatkozások védelmi intézményeket hoznak létre mindenütt, hogy a profitért lihegő kapitalista társadalmat balancirozzák. Különösen az erős munkás szervezetekkel rendelkező államok alkottak többféle "munkásbiztositó" intézményeket és törvényeket, mert szükségük volt rájok. Ezekben az államokban: az állam, a munkáltatók és munkások pénzéből tartják a munkásbiztositó pénztárakat; kórházakat, szanatóriumokat, stb. Ezekből az alapokból nyujtanak betegsegélyeket, baleseti járulékokat; ilyen alapon szervezték legtöbb helyt az aggkori és a rokkant biztositásokat is.

Ilyen mintára tekintve, alkotta meg Mr. Roosevelt kormányzata vérszegény aggkori és munkanélküli törvényeit. Ezek a törvények itt is segitenek enyhiteni a kapitalista termelés és jövedelem eloszlásból származó állandó nagy bajokon. De csak enyhitenek.

A munkásmilliók állandó életbizonytalansága: a munkanélküliség réme, a kizsákmányolás átka, a gépek és a nélkülözések ezer veszedelme, — védelmi szervezetek és intézmények épitésére serkentik a védelmet igénylő munkás kezeket. E végből tömörülnek a munkásság milliói, a különböző munkás szervezetekbe és **evégből teremtettek maguknak betegsegélyző szervezeteket is.**

A betegsegélyző intézményekre nálunk fokozottabban van szükség, mivel itt nincsennek államilag szervezett és támogatott betegsegélyző intézmények. Amerika munkásai önerejükből, önvédelmükre szervezték meg a betegsegélyző, balesetbiztositó és temetkezési járulékot nyujtó intézményeiket. Ezekre még akkor is nagy szüksége volna, ha az állami intézményekkel enyhitenék nyomorát.

A kapitalista rendszer szükségszerü intézményei. Kellenek a betegségek és balesetek keserü napjaiban, hogy egzisztálhassunk és kellenek, amikor — a rendszer jóvoltából — családunkról kell gondoskodni a legsötétebb napjainkban.

A munkás betegsegélyzők a munkásság önvédelmi szervezetei. "Hiszen vannak kapitalista vállalatok, amelyekben biztosithatja magát a munkás" — mondják sokan. De vannak company unik is! Mégsem ajánljuk a munkástársainknak, hogy a bószaink uniónjában igyekezzenek sorsukon, osztályhelyzetükön javitani; hanem azt tanácsoljuk, hogy a saját — maguk — alkotta, osztályharcos szervezetekbe tömörüljenek napibérük és munkaviszonyaik javitására és a holnap társadalmának a kivivására.

A munkásosztály a maga-alkotta, demokratikus szervezetekben és intézményekben megtanulja társadalmi életének rendszeres kormányzását; az összetartásból, szolidaritásból fakadó erejéből és hasznából táplálja önbizalmát, tudását, amelynek segitségével képessé lesz sorsának formálására. **Már a jelen társadalmában kifejleszti önmagában azokat a képességeket, amelyek alkalmassá teszik a jövő társadamának a megalapozására és a demokratikus önkormányzatra.**

Minden tényleges munkásszervezet egyik iskolája és láncszeme a holnap társadalmi szervezetének. Éppen ezért válnak rendkivül fontosakká a munkásság osztály szervezetei; még a betegsegélyzői is.

A "testvéri alapon" szervezett munkás betegsegélyzők nem roppantak össze a gazdasági válság mélypontján sem. Sőt jobban kiállták csapásait, mint a profitcsinálásra épült kapitalista biztositó vállalatoknak nagyrésze. A demokratikus ellenőrzéssel igazgatott munkás-intézmények haszna és tőke-fölöslege az intézményük tagságának sietett segitségére; nem igy a kapitalista részvényesek biztositó intézményei, amelyeknek profitjai a gazdag részvényeseik és igazgatóik zsebeibe vándoroltak, — a biztositottak róvására.

A munkás betegsegélyzők nem oldják meg a kapitalizmus problémáit; nem is vállalkoztak erre. De megoldják az önvédelemre szükséges napi életnek egy és más kérdését. Annyira, amennyire a mai rendszeren belül lehetséges az önmaguk-alkotta szegényes és korlátolt eszközökkel. Olyanok, amilyenekké a mai rendszer és a benne tömörülők ereje és tehetsége teszi őket. De szükségszerüek. Ezért ismételjük ujra és ujra:

"Munkástárs, segits magadon!......"

TISZÁNTULI RAJZOK

IRTA:

VASAS ALBERT

P HAJDUBÖSZÖRMÉNY, 1935 október. Őszi táj, őszi szinek. A határ üres és kopár. A nyári aszály nyomait csak az mutatja, hogy a tanyákon csak a sárguló levelü fák, a vedlett házak, a meszeletlen falak látszanak, de a “lóger,” a takarmánykert majdnem üres. A csutkakupok már bekerültek a tarlóról, de nem állanak sürü sorokban, mint máskor, a szalmakazlak kicsik s azok is többnyire tavalyiak, a töreket már régóta eszi a ló, mert nem állanak nagy, kerek lucernaboglyák és hosszu kazal verestökök a tanyák mellett. A górékon is átlátni, nincsenek tele tengerivel. Ha volt is jó tengeritermés az országban, de itt nem volt. A kései vetésüek itt-ott még künn vannak, de már nem lesz belőlük tengeri, legföljebb takarmány, annak is gyönge, mert megcsipte a dér. Elvette az izét és a szinét.

A szántást-vetést már többnyire elvégezték, ki is keltek a buzák, de a szárazság miatt megint ritkásak és soványak. A határban már alig vannak, itt-ott tavaszi alá szánt egy-egy iga, vagy takarmányépát szedeget néhány asszony és gyerek. Nemsokára befejeződik minden munka, pedig de soká lesz még tavasz. Beülhetnek a parasztok a sutba és zsoltáros öregasszonyok elénekelhetik a hüvös őszi estéken, hogy “Tüz mellé házba szorulunk, Uram, im hozzád fordulunk,” az emberek pedig ujra kezdhetik a reménykedést a jövő termésig, hogy hátha majd jobban sikerül, amikor pedig majd nyilván megint kiderül, hogy az sem ér semmit. Ha terem, az se, ha nem terem, még annyit se.

* * *

A város igazi város. Nemcsak azért, mert előkelő, komoly városháza van, nemcsak azért mert előtte rendőr igazitja a rendet, nem is csupán azért, mert parkjai vannak (amelyek, igaz, nem valami gondozottak, de miért lennének gondozottak, ha a lakosok házai vakolatlanok és meszeletlenek?) közepükön szoborral, hanem főleg azért, mert rengeteg üzlet, mühely s utcaszámra terjedő polgári, parasztnyelven “gazda-” és “uri” házai vannak.

Ezekről a házakról aztán beszélni lehet. Nem sok helység lehet a Tiszántulon, ahol ilyen észszerütlen, sem a tájhoz, sem az idájáráshoz, és főleg a rossz épitőanyaghoz, a gyenge vályoghoz és rossz, porlós téglához nem illő épitkezés volna. Középkori német városok csucsos, oromzatos, mohospatinás kőházainak az eltorzitott utánzatai ezek a házak s bizonyára valamikor idehozott s ittmaradt német épitőmestereknek a munkája nyomán terjedtek el. Most persze sorjában meszeletlenek és omladozó vakolatuak, mert rossz vályog és tégla nem állja a vakolatot s mivel nincsen ereszetük, az eső hamar leveri. A rendbehozás, az őszi betakaritás persze sokba kerülne, nem olyan egyszerü, mint az igazi parasztházaknál, ahol a vályogfalat betapasztják és bemeszelik fehérre. Kitelik az asszony erejéből. Erre pénz kellene, de kinek van ma pénze? Csak kenyérre és sóra legyen.

Vannak azért gondozott házak is. Ezek biztosan fixfizetéses embereké, akiknek még mindig van pénzük. A szegénynegyed házai ugyanerre a mintára épültek, csak nagyon keskenyek, szinte szembántóan szükek, de a téglaoromzat ezeken is, többrészén megvan. Másutt lapos és alacsony a proletárkunyhó, itt meg szük.

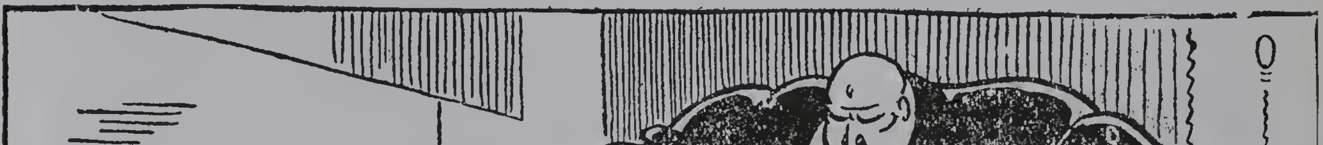
Egyébként Hajduböszörmény pontosan jellemzi az egész Magyarországot: félbenmaradt ipar, félbenmaradt, elaprózódott, szinte atomizált kiskereskedelem, önmagába roskadó mezőgazdaság és minden irányban nagymértékü eladósodottság, amelybe éppen az ilyen polgárosodni kezdő, kapitalizálódó, üzleti szellemmel telitett, de szük lehetőségek közé szoritott népek estek legjobban bele, mert hiszen ezek azok, akik a polgári boldogulás utján fölfelé akartak menni. Kispolgárból burzsoá, törpebirtokosból kisgazda: — most az egészbe "beleszeladt a madzag."

* * *

A birtokeloszlás pedig majdnem kifogástalan s éppen ezért érdekes, jellemző és elgondolkoztató Hajduböszörmény sorsa. Harmincezerkörüli lakosára majdnem 60.000 hold föld van, többnyire jó fekete televény és barna homok. Kevés legelő és szikes rétes földje van, de azok is termők. Nagybirtok egyáltalán nincs, néhány százholdon fölüli kisgazda mindössze, a többi törpe- és kisbirtokos. Persze ezek nem mind maguk munkálják a földjüket. Mert az egyik része a parasztoknak csak tulajdonosa a földnek (ezek az Imrédy pipázó parasztjai,) a másik rész pedig munkálója, bérlője. Éppen ezért a földek rosszul vannak kihasználva, mert a bérlet drága, a bérlő szegény, nincs jószága, nincs trágyája, nincs pénze. Ma pedig a föld már nemigen birja el, hogy a munkálóján kivül még másokat is eltartson.

A fentiekből következik, hogy nincs igazi földmunkásság. Csak szegény emberek vannak. De ezek aztán csakugyan szegények. Még az igazi földmunkásoknál is szegényebbek. Kisbirtokosvidéken ritkán van napszám rendszeresen, csak nagyon esős időben, tehát a szegény embereknek mindenféle módot meg kell próbálniok, hogy megélhessenek. Van szőlő is és kevés erdő, de a szőlőt maguk munkálják a tulajdonosok, az erdő meg olyan, mint minden alföldi erdő, néha egy kis gallyazás, tüzrevaló kerül belőle, de pénz nem.

De nincs rendes aratás és cséplés sem. Párnapi aratás, párheti cséplés, ennyi az egész nyári munka. A munkamódszerük, mint általában a nem beidegzett földmunkásoké, hajszás és rendetlen. A korai polgárosodás követ-



Ha kérsz, csak morzsákat kapsz. Servezkedj, hogy minden a tied legyen amit termelsz.

keztében tulságos sok cséplőgép van s ezek most "ölik egymást." Éjjel-nappal erőltetik a munkát s még eddig azt semmiféle hatóság nem akadályozta meg. A szomszéd falubeli ipari földmunkások tréfásan azt mondják, hogy a böszörményiek "kettőből vacsoráznak," vagyis munkaközben esznek mégse keresnek. Kubikosok kevesen vannak, cukorrépamunkára messze nagybirtokra járnak, mert itt, bár ez kitünő föld erre a célra, nem nagyon termelnek. A szegények egyrésze ezenkivül krumpli-, káposzta-, gyümölcs és főzelékkereskedéssel foglalkozik. Ők közvetitik a nyiri homok- és szigföld között a terményeket. Sokan vannak dinnyések is. Egy-egy öreg és rossz lovon és rozoga szekéren folyik ez a krajcáros kereskedelem, de ebből bizony senki sem vesz emeletes házat, sem tanyaföldet.

Általában a böszörményieket ugy jellemzik, hogy "élelmes emberek," ami alatt az errevalók sok mindent értenek. Egyébként, hogy ki ne felejtsük, tényleg a Bocskai "szabadságszerető" és "vitéz" hajduinak az ivadékai, de ez a megjelölés ma már nem sokat mond. Mert melyik paraszt nem szabadságszerető és vitéz, ha erre rákerül a sor? Az is közismert dolog, hogy ezek a hajduk bizony eredetileg Kelet-Nyugat marhahajtói voltak (innen ered a nevük: hajtó — hajdu) s csak a török világ kényszeritette őket arra, hogy ha élni akarnak, szabadságszeretők és vitézek legyenek.

* * *

Ipar, kereskedelem, amint emlitettem, szokatlanul nagy. Fél vármegyére elég volna. Pedig környék nincs, legföljebb a tanyán.

Gyára is van. Egy harisnyagyár. Munkáslétszáma 200 körül váltakozik. Csupa leány. Persze szervezetlenek. A munkaidő reggel 7-től este 6-ig. Munkabérről és munkaviszonyokról mit is beszéljünk hát ezek után, ha még a pesti gyárakban is "ázsiai állapotok" vannak.

Ezek a leányok, szegények, nemcsak ezért a haldokló magyar élet áldozatai. Egy ilyen vidéki városban, ahol nincs ipari munkásság, nincs kialakult munkásosztályszellem és osztályöntudat, okvetlen el kell sorvadniok. Ott hervadnak el a szövőszék mellett. Ki vigye férjhez őket? A gazdalegényeknek nem kellenek, azok a leány mellett szeretnek a földön és a lovakon is végignézni. A kisiparos- és kiskereskedőifjuság, ha egyáltalán nősülhet, kispolgári helyzetének és gondolkodásának megfelelő "benősülés"-ről ábrándozik. Egy mühelybe, egy boltba, vagy legalább egy cégtáblába. A napszámos- és szolgalegényekhez vannak napszámos- és cselédleányok, a gyári leányokhoz tehát gyári munkásfiatalok kellenének. Ugy mégis, ha két proletárveréb összebujhatna, összetenném, amijük van, a harmadiknak, negyediknek is juttathatnának egy kis életmeleget. Igy bizony jórészük elhervad a szövőszék mellett. Amihez nem is kell olyan sok, mert kevés köztük a testes, trabális, igazi parasztleány, jórészük vékony proletárleány. Ugy néznek ki, mint a szegény negyedek házai, keskenyek, de kivülről mutatósak. Szépek, üdék, tiszták. Csak itt-ott egy-egy hervadozó arcon látszik a puder nyoma s némelyiknek a mozgásán, a járásán, a testtartásán a kölcsönkért "Délibáb" és "Szinházi Élet." A nagy többség még egészséges, de az ut az előbbiek utja. Faji szociológusoknak ajánlhatók ezek a körülmények a földeritésre. Vizsgálják meg a kapitalizmus hatását a fajta egészségére és népesedési viszonyaira. Ez többet ér, mint az egykéről való siránkozás.

* * *

Szellemi élet? — Néhai Kálmán király megmondta: "boszorkányokról pedig, mivel nincsenek, ne is essék szó." Épugy mint a többi vidéki városban, itt sincs semmi. Ha csak a helyi lapot ide nem számitjuk. Itt-ott egy-egy elszigetelt, magányos intellektuel les keresztül a határokon. Párizs, Moszkva vagy mind a kettő felé, de ezt nem tudja senki. Végzi a dolgát és éli a maga vakond-életét.

Politika? — Az sincs. Ellenben van politizálás. Igazi malomalatti. Pártok vannak, amelyek semmi egyebet nem csinálnak, mint egymás ellen intrikálnak. Ugyanezt csinálják a tagok egymás közt. Nincs politikai közvélemény. Nincs osztálytudat. A legigazibb kisgazdáknak van valamelyes, de az passziv, tagadó, politikaellenes. Akik a nemzeti egység és a független kisgazdapárt nevében politizálnak, azok jórészt nem igazi kisgazdák, illetve nem igazi parasztok. hanem a parasztok ügyvédjei (kispolgárra, kisparasztra jellemző a sok "ügyvédkezés," van itt egy félvármegyére való) és afféle városi félparasztok. Jellemző, hogy mennyire nincs tájékozott politikai közvélemény, hogy ebben a tulnyomóan református, tehát "pogány" városban 1920-ban egy fajvédő kereszténypárti kapott mandátumot, nem pedig kisgazdapárti.Igaz, hogy Bethlennel szemben. Mondják is tréfásan, hogy a böszörményiek az okai a nyilt választójognak, amiért a titkossal megbuktatták Bethlent. Ezért lettek "éretlenek" rá.

* * *

Ezek után már világos, hogy miért nincs munkásmozgalom. Egyes elszigetelt szocialisták, öreg harcosok és fiatal munkások végzik itt-ott szerény eszközökkel az osztály öntudatositását. Sem egyesület, sem más eszköz nem áll rendelkezésükre, Igy aztán időnként ha föllobban is a mozgalom, de a politikai levegő lecsöndesedése után elhal megint. Az azonban bizonyos, hogyha nincs is mozgalom, de a világnézet, a szocializmus tudatos vállalói rohamosan szaporodnak. S a kellő időben ott lesznek az ország többi munkásával. Ha nem is mind, de éppen elegen ahhoz, hogy irányt szabjanak a spontán kitörő népmozgalomnak.

Gyermekkorom virágai

Irta: SEBESTYÉN DÉNES.

Te Lajcsi pajtás, te mészáros inas!
És te Lacikám, te csiriz keverő!
Óh Fercsikém! te asztalos tanonc.
Ti minden inasok:
Ma mesterek vagytok!
Ugyan, ugyan . . .
Ma müveltek-e nagyot . . . ?
Összeszedlek beneteket, csokorba kötve.
Kik ez átkozott jövőről merengtünk
A pápai iparos körbe.
Most nálatok merengve: röpisztlek titeket
E konokul kihalt idegenségbe
Hogy is volt az fiuk . . . ?
Marx, Bebel és Engels . . .
Jött Füstös
És mondotta Muli:
Muli bátyánk szegény . . .
De elvitt Devecser
Proletár hőshöz méltón
Magához vett Marx, Bebel és Engels.

VAN-E KOMMUNIZMUS VAGY KAPITALIZMUS OROSZORSZÁGBAN?

IRTA:

KÖHLER SÁNDOR

A VILÁG osztálytudatos munkássága között még ma sincsen teljesen tisztázva, hogy tulajdonképpen mi van Oroszországban a kommunizmus, a mukásosztály reménye valósult-e meg. Cikkekben vázolják azt a jólétet, boldogságot, amelyben az orosz munkásság részesedik. Fényképes folyóiratokban, vetitett és mozgószinház vásznain, mutatják be azt a bámulatos haladást, az iparok terén, amelyet még eddig soha egyetlen ország sem volt képes elérni. Ezekután könnyen hihető és jogosan feltételezhető, hogy ama bámulatos gyors fejlődés a munkásosztály szabadságát, jólétét mozditja elő.

Vizsgáljuk meg mi az igazság. Eme közlemény nem frázisokon, képzelődéseken, hanem hivatalos oroszországi jelentések, Oroszországban nyomtatott, a kormány által kiadott lapok, folyóiratok és megbizható forradalmárok szavahihető jelentéseinek alapján iródott. Melyek azok az utak, amelyen az orosz forradalom halad, amely oly fenségesen kezdte meg utját az 1917. évben, hogy a világ elnyomott osztálya ujjongot, lázadt s annak követésére minden áldozatot meghozott. És milyen az a társadalmi élet, amely ma az orosz nép között megvalósul?

A társadalom fejlődésében nem tényező az, hogy miben hisznek egyes munkás vezérek vagy pártok, Az osztályharcok története nem egyesek akaratán vagy kivánságán zajlik le, hanem az adott körülmények szabják azt meg.

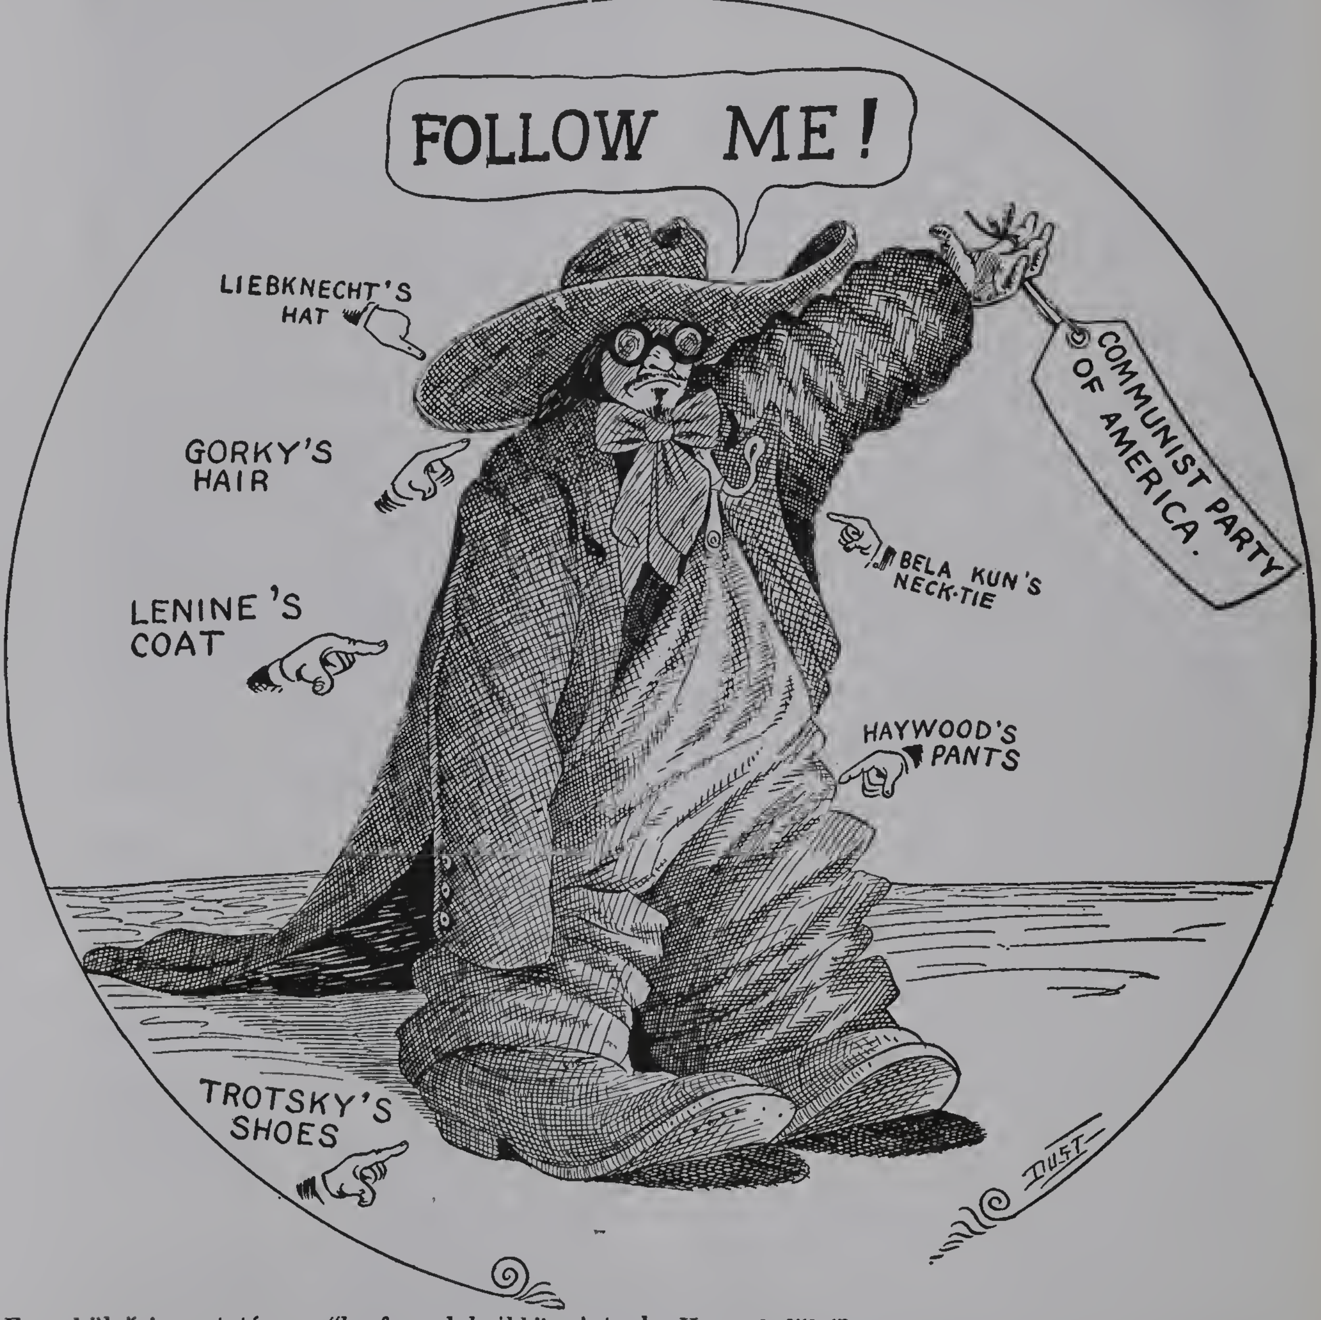
Ha megkérdeztük volna a francia forradalom hőseit, Robespiéereét, Maratot vagy a nyaktiló körül táncoló népet, amikor az arisztokrácia fejei hullottak ők is, azt mondották volna, hogy épitik a szabadság, egyenlőség, testvériség társadalmát. És mivé fejlődött a hatalmas francia forradalom? Először megszülte azt a hatalmas hadsereget, amelynek vezére Napoleon lett, majd kifejlődött a bankárok, az ipari mágnások hatalmas láncolata. Ez többékevésbbé az orosz társadalmi forradalom sorsa is, azzá teszi a vak vezérek, a diktátorok esztelen taktikája.

Az 1917-es társadalmi forradalom, tagadhatatlan tény, hogy eltörölte az akkori arisztokráciát, megszüntette a kezdődő kapitalizmust. A szó szorosértelmében Oroszországban nincsen kapitalista osztály, nincsenek ipari mágnások, akik a magántulajdon szent nevében irányitják a termelést, nincs burzsoa osztály, nincsenek bankárok, akik hatalmas pénzösszegekkel rendelkeznek és irányitják a társadalom hullámzásait, nincsenek magántulajdonban sem nagy, sem kisüzletek, nincsenek egyének, akik részvények, kötvények, kölcsönök kamatjaiból élnek. Nincsenek kis és nagy földbirtokosok, nincsenek háziurak, akik a lakbérből élnének parazita életet, nincsenek arany, ezüst, réz, vas, szén és más bányák vagy olaj források magántulajdonban.

Oroszországban a törvény szigora tiltja annak létezését vagy keletkezését. Senkisem vehet vagy épittethet bérpalotákat, házakat, — kivéve kis lakóházakat saját használatra — szóval a természet kincsei és a termelt javak nem hajtanak hasznot egyes egyének számára. És ez az egyetlen bizonyitéka annak, hogy Oroszországban megszünt létezni a kapitalizmus, abban az értelemben, amelyben mi amerikai bérrabszolgák ösmerjük a kapitalista osztályt.

De ez még mindig nem jelenti azt, hogy Oroszországban megszüntek az osztályok. Még mindig vannak gazdag emberek, akiknek még mindig van bőven pénzük, ékszereik, vagy más pénzre beváltható áruik. A pénzel rendelkezők nem fektethetik azt semmiféle üzembe, nem használhatják azt az életszükségleteik bevásárlására, nem élhetnek fejedelmi módon. Oroszország népe a pénzt csak a fogyasztásra használja.

Felvetődik a kérdés, hogyan bonyolitják le a termelést s a kereskedelmet. Vegyük először a kereskedelmet külországokkal, Amerikával. Szoviet Uniónak minden számottevő ipara központositva van. A szövőipari osztály, a bányászati osztály, szállitás és közlekedési osztálya, az élelem, ruházat árusitók osztálya, az acél, az olaj termelés stb. stb. osztályai, amelyek valamennyije az állam tulajdonát képezik. Minden egyes ipari osztály saját maga szerzi be a feldolgozandó nyers anyag szükségletet. Vegyük például



FOLLOW ME!
LIEBKNECHT'S HAT
GORKY'S HAIR
LENINE'S COAT
COMMUNIST PARTY OF AMERICA.
BELA KUN'S NECK-TIE
HAYWOOD'S PANTS
TROTSKY'S SHOES
DUST

Ez a külső ismertetése a "legforradalmibb" pártnak. Hogy belülről, hogy néz ki? erről Abesszinia népe többet tudna mondani.

a szövő ipari osztályt. Vegyük, hogy ennek az osztálynak szüksége van egy millió tonna gyapotra, de a termés csak fél millió volt, akkor a szövő ipari komiszár a külkereskedelem komiszárjához fordul engedélyért, hogy egy félmillió gyapotat importálhasson. Az engedélyt elküldik 261 Fifth Ave. New York, City USA, ahol "Amtorg" név alatt Oroszország kereskedelmi irodája van. — "Amtorg" rendelett szó, ami annyit jelent, hogy "Am" — Amerika "torg" pedig kereskedelem. — Ennek az irodának aztán a kötelessége, hogy a szükséges gyapotat itt ebben az országban beszerezze. Amig ez történik addig a külkereskedelem komiszárja arany rubelben továbbitja a gyapotért járó összeget az Amtorg vagy valamely bank cimére.

Ugyanez az iroda végzi tegyük fel a szövő ipari osztálynak van egy millió rőf vászna eladó, annak értékelését ugyan ugy intézik. Ez az iroda fenállása óta több mint háromezer külömböző üzletet bonyolitott le 650 millió dollár értékben. Tehát Oroszország termelésének, kereskedelmének minden ágát maga az állam bonyolitja le. Ezzel aztán igazolva van, hogy tényleg megszünt az orosz kapitalista osztály.

Most aztán kötelességünk megvizsgálni, hogy van-e kommunizmus Oroszországban?

Ennek a megértéséhez szükséges, hogy tisztába legyünk aazzal, hogy mi a kommunizmus! A kommunizmus kérlelhetetlen szabályai kimondják a magántulajdon és vele együtt a kapitalista osztály eltörlését. Ez megtörtént Oroszországban. De ez még nem kommunizmus **A kommunizmus a magántulajdon eltörlése által a termelés és szétosztás eszközeit nem az államra ruházza át, hanem a társadalomra, amelyben a termelés nem az állam javára, hanem a társadalom szükségletére történik. Ez a tiszta kommunizmus, amelynek alapja nem a kommunista pártban, hanem az ipari demokráciában gyökerezik meg.** Az, hogy a termelés és szétosztás eszközeit az állam ellenőrzi vagy kezeli, még nem jelent kommunizmust, hanem kizárólagosan állam kapitalizmust. Ennek alátámasztására az olvasó figyelmébe ajáljuk Oroszország termelési viszonyait. A kommunista társadalmi rendszerben nincsenek osztályok, amelyekben elnyomók és elnyomottak élnek. A termelés társadalmasitása az összesség javára folyik, amely által a termelők nem nyomorban, szenvedésben, nélkülözésben és önfeláldozásban tengődnek, és az emberiség legelemibb jogai a — "burzsoa demokrácia" — szólás, gyülekezés és sajtó szabadság biztositva van. Ez Oroszországban a legnagyobb mértékben elvan nyomva. 1924 óta az orosz bérrabszolgáknak az iparok igazgatásában egy parányi szavuk sincsen.

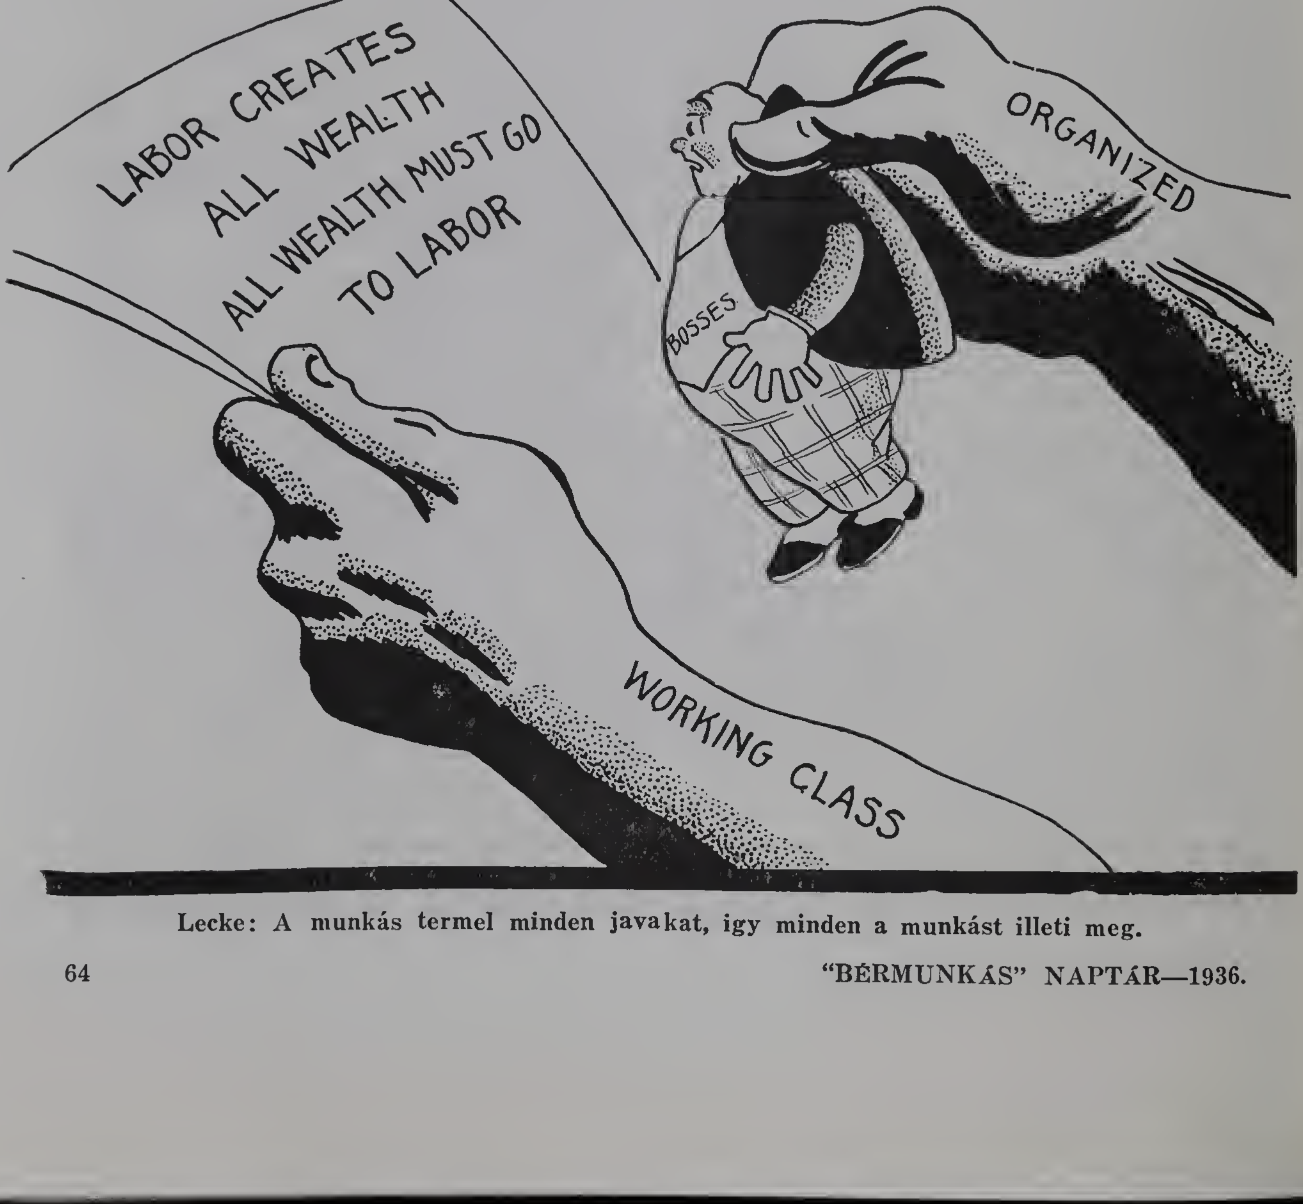
A kommunizmus az emberiség legmagasabb kulturájának lépcsője, amelyen elér abba a társadalmi rendszerbe, amelyben szabadság, egyenlőség, testvériség uralkodik. De szabadság, egyenlőség, testvériség, szolidaritás nyoma sincsen az orosz kommunista párt uralma alatt élő tömegekben, még csak nem is törekszik arra a kormány, a párt, hogy azt megtestesitse.

Azt mondják a kommunista párt hatástvadászó szónokai, irói, hogy Oroszországban kommunizmus van, hogy a munkásosztály mesebeli paradicsomban él, palotákban lakik, megszünt a szenvedés, a nyomor, a nélkülözés. Egyenlőség, testvériség, szabadság van. Mások, akik igazságosabbak Oroszország és a munkásosztállyal szemben azt mondják, hogy a kommunizmus, a szülés, a megvalósulás stádiumában van. Nézzük meg mennyiben felel ez meg a valóságnak.

Nem beszélünk tovább egyenlőségről, szabadságról, mert az csak haszontalan időfecsérlés. Minden osztálytudatos munkás tudatában van annak, hogy oroszország népe a kommunista párt komiszárjai kénye-kedvének van kiszolgáltatva, amely párt teljes egészében Stalin diktátorsága alatt áll. Tekintsünk el még a burzsoa demokrácia által biztositott "jogoktól" a politikai szabadságoktól és vizsgáljuk meg Oroszország népének gazdasági és társadalmi helyzetét, amelyet a kommunista eszméket hirdető komiszárok és diktátorok teremtettek, amelynek révén kivánják a kommunista társadalmat létrehozni.

Mi az orosz munkásság helyzete a társadalmi és gazdasági átalakulásban? Az oroszországi nincstelen proletár éppen ugy bocsájtja áruba munkaerejét az állam rendelkezésére, mint bármely más kapitalista állam bérrabszolgái. Az orosz munkás darabszám munkán kénytelen dolgozni. Bevan vezetve a prémium és a bónusz rendszer, amely rendszer ellen az egész világ — nemcsak az osztálytudatos, hanem a reakciós szervezetek is — elkeseredett harcot vivnak. Versenyeket rendeznek, ki tud gyorsabban termelni és a nyertesek kitüntetésben, magasabb bérben részesülnek a gyöngébbek kenyérre, halra is gyöngén keresnek. A munkásoknak a munkatelep igazgatásában, az uralkodó viszonyok megváltoztatásában vagy a termelés mennyiségében semmi szavuk nincsen, éppen ugy mint a kapitalista államok munkásainak nincs, azzal a külömbséggel, hogy a magán kapitalista üzemben jogainak kivivása érdekében — magasabb bér, becsületesebb bánásmód — harcolhat, sztrájkba léphet, de az állam kapitalizmus fegyveres hatalma ellen teljesen tehetetlen. Az orosz munkás nem választhatja meg a várost vagy a munkatelepet, ahová a komiszárok helyezik ott kell munkát vállalnia.

Az orosz munkásság helyzete nemcsak politikailag, hanem gazdaságilag is guzsba van kötve. Semmi jele kommunizmusnak, társadalmi forradalomnak. Sokan azt mondhatják, hogy ez fegyelem, hogy ez átmeneti szükséglet és megfog változni a helyzet. Azok akik figyelemmel kisérik az elmult években az oroszországi eseményeket tudatában vannak annak, hogy az ellenkezője felel meg a valóságnak. A diktátorok keresztre feszitették az orosz bérrabszolgák politikai és gazda-



Lecke: A munkás termel minden javakat, igy minden a munkást illeti meg.

sági szabadságát és minnél tovább áll fenn ez a diktatura, annál sulyosabb lesz az orosz munkás helyzete.

Az orosz munkás megélhetési viszonyai szinte hihetetlenek, keresete rémségletek árai hihetetlen magasak. A ségletek áraihi hetetlen magasak. A petroleum, amelyre minden orosz munkás családnak szüksége van főzés vagy világitásra, literje 65—70 kopek — egy kopek egy századrésze a rubelnek az orosz szoviet olajtermelési osztályának jelentése szerint a petroleum literjének előállitása az ország bármely részébe való szállitása 2 kopekbe kerül, hová megy hát a 63 kopek? felemészti az ugynevezett "Nalog Soborota" (fogyasztási adó.) Az állam a földmivesnek 2 rubelt fizet egy "Poud" 16 kiló krumpliért és ugyanazon a napon elárusitja azt Leningrad, Moszkva vagy más városok munkásainak kilóját 2 rubelért a többi 15 kiló krumpli vagyis az abban foglalt 30 rubel mint fogyasztási adó szerepel.

Ugyancsak az állam a földmivesnek 65 kopekot fizet egy poud rozslisztért, amelynek eladását 30 rubelben szabja meg. Itt megint csak a fogyasztási adó szerepel. Egy félkiló só 1 rubel és 20 kopek. Cukor fontja 1 rubel és 40 kopek. Ugyanazt a cukrot, amelyet Oroszország cukortermelő vidékén Kievben, termelnek, Perzsiában 10 kopekért árusitanak és még azt sem adta el haszon nélkül az orosz kormány.

1935 évben egy ujabb fogyasztási adó jövedelmét vezette be a kormány az által, hogy eltörölte a kenyér mennyiségére szóló engedélyt. Grinkó oroszpénzügyi komiszár 1935 február 9-én, a moszkvai "Izvestia" nevü folyóiratban tett jelentése alapján a kormány eme intézkedése évente 24 billió rubelt jövedelmez az állam kasszának. Az alkoholra kivetett fogyasztási adó hat billió rubel. 2 billió 200 millió rubelt jövedelmi adóból vesznek be. Ezen adó minden munkásra kötelező, tekintet nélkül, hogy mi a keresete.

Ha egy munkás naponta csak 2 rubelt keres, köteles a kormánynak adó fejében havonta 7 rubelt fizetni. Hogy miért van ez a rettenetes adózás, azt könnyen megérthetjük ha figyelembe vesszük, hogy a szoviet kormány a "munkások kormánya" a világ minden állama között a legnagyobb költségvetést rendelte el az 1935—36-ik esztendőre, kerek száz billió rubelt. A szoviet kormány az elmult hét (7) esztendőben 40 billió rubelt költött az iparok fejlesztésére. Ez a 40 billió rubel, arany rubel volt az 1926-os évekből, amelynek vásárló képessége 35—40-szerte nagyobb volt mint az 1935-ös rubelé. A kormány 1934-ik év május havában kiadott jelentése szerint az ország arany készlete 747 millió rubel, amelyet évente uj arany bányászása folytán százmillió rubellel képes emelni.

Tehát, hogy az állam behozhassa a száz billió költségvetést, többféle eszközökhöz kellett folyamodnia. Az első, amint látjuk a munkások leigásásai. Minden eszközt felhasználnak arra, hogy a munkást ösztökéljék az emberölő gyors munkára, annak fejében a lehető legalacsonyabb bért kapják. A megélhetés szükségleteire hihetetlen magas fogyasztási adót vetnek ki, hogy minnél kevesebbett vásárolhasson, hogy minél több árut tudjon a kormány más államnak aranyaiért piacra vetni, s végül kereseti adót nyomnak a nyakába és ezt nevezik a "munkások hazájának, a munkások kormányának."

Az ötéves terv megkezdésekor a komiszárok elhatározták, hogy minden esztendőben 250 millióval több papir rubelt hoznak forgalomba, de ez a terv csütörtököt mondott, mert már az első esztendőben 670 millió papir rubelt volt kénytelen forgalomba hozni, amire csak száz millió arany rubelt volt képes termelni. A második évben már 1 billió 621 millió papir rubelt hoztak forgalomba az arany készlet megint csak száz millióval szaporodott. Beállott az infláció. Nyolc esztendővel ezelőtt, amikor megkezdték az első ötéves tervet a szoviet "Chervonietz" — tiz rubelos papir pénz — öt amerikai dollárt ért, ma 1935 év szeptemberében egy amerikai dollárért 50 rubelt lehet vásárolni, pedig 1927 óta az amerikai dollár értéke is esett 45 százalékkal.

A kommunisták, meg a szocialisták

is az egész világon a fogyasztási adó, a munkások jövedelmének megadóztatása ellen a legelkeseredettebb harcot vivják és a saját kormányuk a "proletár haza" minden elképzelhető módon zsákmányolja ki az elnyomott orosz bérrabszolgát, és ezt nevezik kommunizmusnak, proletár diktaturának.

Távol áll tőlem a szándék, hogy feltételezzem azt a szoviet komiszárokról vagy Stalin teljhatalmu diktátorságáról, hogy rossz szándékkal vannak a proletáriátusnak a kommunizmusba való vezetése terén. Nem. Jóakarattal vannak irányába, de az a jóakarat nem elegendő ahoz, hogy a kitüzött célt el is érjék.

Bennünket IWW-istákat nem az a kérdés foglalkoztat, hogy mit tüztek ki célul, mi az akaratuk, hanem az, hogy mely irányba haladnak, s melyek azok az eszközök, amellyel a kitüzött célt elérni kivánják. A szoviet kormány, a "proletár diktatura-' cselekvései, meghatározott eszközei és utai, nem a kommunizmus irányába halad, hanem az állam kapitalizmus legkegyetlenebb formáját árulja el.

Ennek az elérésére az orosz kommunista párt komiszárjai, teljhatalma diktátora, Stalin az orosz forradalmárok azon részét, akik rövidebb és biztosabb eszközökkel és utakon kivánták elérni a munkásosztály felszabaditásának társadalmát, sokakat örökre elhallgattattak, s ma több mint százezren, Oroszország internáló barakjaiban vannak a vörös katonák szuronyainak hegye beléjük folytja a szót.

Demokrácia eszközei melyet a diktatura is jónak talál.

Tagadhatatlan, hogy Oroszország ipari városaiban, telepein vannak, mindenre kész elszánt önfeláldozó harcosok, de ezek óriási kissebbségben vannak a falvakból berendelt földmives munkásokkal szemben, akiket iparizálni kiván a kormány. Ezeknek fogalmuk sincsen a kommunista eszméket illetőleg és az a bánásmód s a munkaviszonyok nem kommunistákká, hanem a kommunizmus legádázabb ellenségévé teszi őket. Mindenütt szigoru katonai fegyelem uralkodik s a munkásoknak csak engedelmeskedni szabad.

Az orosz paraszt annál is inkább elégedetlen mert az állam rettenetes alacsony árban vásárolja össze termékeiket, amelyet kényszeritve vannak átszolgáltatni. A parasztok siratják vissza az 1921-es rendszert, amelyet Lenin iktatott be, melyben a parasztok szabadon termelhettek.

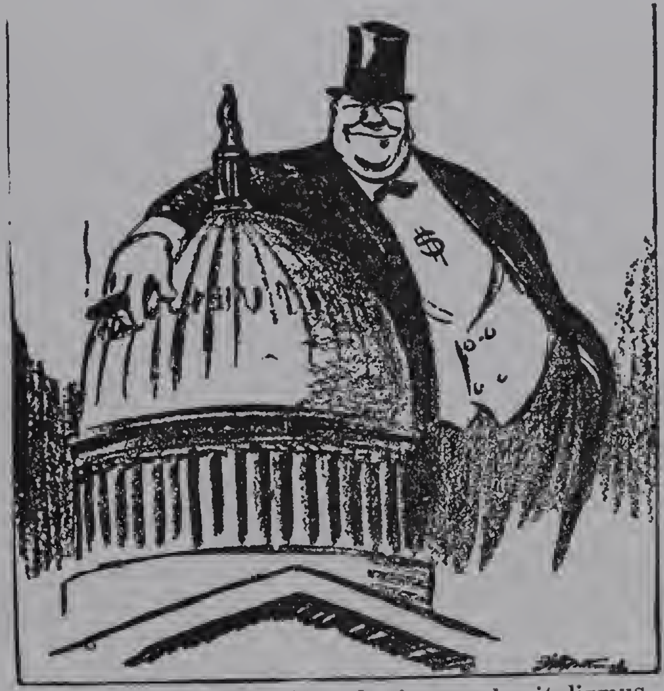
* * *

Bemutattuk csak dióhéjban a munkások és parasztok sorsát a "proletár hazában" abban a hazában, amelyben nincsennek osztályok. Még egyett be kell, hogy mutassunk és ez az intelektuelek, az állami, politikai és ipari osztályok hivatalnokainak, vezetőinek helyzete a kommunizmus alatt. Stalin uralkodásának utóbbi éveiben egy teljesen uj osztály alakul ki, amely osztálynak tagjai a fentnevezett hivatalnokok, komiszárok, iparok vezetői, munkavezetők stb. stb. Ennek az uj munkás arisztokrata alakulatnak megvan engedve, hogy saját házaikban lakhatnak, gyermekeik számára külön iskolát tartanak fenn, ahol bőséges ellátásban figyelmes, orvosi kezelésben részesülnek, minden kényelem meg van eme uj alakulat számára. Ebbe nem tartozhatnak be a párt tagjai, akik csak közkatonaként szerepelnek. Azok az egyének, akik még a párthoz sem tartoznak, naponta két hétórás munkaidőt kell a gyárban tölteniök és nem jut nekik több mint, hogy családjaikkal egyszobás lakásban a legnagyobb nyomorban huzódnak meg.

Igy fest a "proletár haza" osztálynélküli társadalma. Felvetődik a kérdés, hogyha nincsen kapitalizmus, nincsen kommunizmus Oroszországban hát akkor mi van? A válasz világos, érthető. Oroszországban az állam kapitalizmus fejlődöt ki, amelynek élén áll egy csapat — führerek, igazgatók, parancsnokok, diktátorok és még magasabb állásu komiszárok, a kommunista párt vezetői, akiknek élén áll Stalin a minden oroszok teljhatalmu diktátora.

Ezek képezik a kollektiv kapitalizmust, ők uralkodnak az állam felett, ők rendelkeznek a termés és termelés felett, ők uralkodnak az orosz nép felett a legnagyobb abszolutizmussal, és ennek fejében kiváltságokat élveznek. Oroszországban nem a kommunizmus, hanem a szoviet aristokrácia fejlődött ki, amely teljhatalommal uralkodik a munkásosztály felett. Az orosz kommunista párt vezérei, Stalinnal az élén nem a kommunizmus utján haladnak s eme tévedésükre sürün mutat rá a világ forradalmi munkássága, amelyért aztán a kommunista pártok vezérei, szónokai, irói, érvek helyett ellen forradalmároknak, szociálfascistáknak árulóknak bélyegzik azokat. A komiszárok, a diktátorok helytelen s a munkásosztály társadalmi forradalmára káros eszközökön és utakon haladnak. Oroszország gyors tempóban való távolodása a kommunizmustól világosan mutatja az utat a világ forradalmi munkásságának a számára s szomoru tanulság a politikai pártok s azok vezéreinek a társadalmi kérdések feletti vergődése.

A világ munkásságának nem állam kapitalizmusra vagy állam szocializmusra van szüksége, hanem Ipari Demokráciára, amelynek utját a napnál világosabban jelöli meg az IWW Egy Nagy Szervezkedési formája. Ez a szervezkedési forma az, amely céljául tüzte ki a mai társadalmi rendszer megdöntését a bérrendszer eltörlését a termelés és szétosztás eszközeinek átvételét a világ munkásosztálya számára. Ehez szükséges a tanitás, szervezés, felszabadulás.



A törvényhozó testület feletti ur a kapitalizmus.

Dráma a tárnánál

Néha-néha egy mélabus
Dallam, jut az eszembe,
Arra szőttem-e versemet,
Ez — de szomoru zene;
A tőke áldozatai,
Adták meg e dal árját,
Az itt meg irt szenvedések
Jelentik ezt a drámát.

Robaj! — tüz! egy szénbányában,
Melyben százak dolgoztak,
A kiket megüszkösödött
Hustömegként felvontak,
A felszinen sorba rakták,
A megsült tetemeket,
Szivet marcangolóbb látvány,
Szodoma sem lehetett.

Hirtelenné lett özvegyek,
Árváikkal kórusban,
Az őrjöngő zokogásuk,
Gyászuk, leirhatatlan.
Nagy távolból volt hallható
A szivettépő sirám,
Sok el is ájult lgoettan,
Fájdalmukat nem birván.

Elmult a tömeg temetés,
De a gyász állandósult,
Mely az özvegyek és árvák
Sokasságára borult.
Lakhelyükből is kiüzték,
Mert ugy szólt a rendelet,
Lakást itt csak azok kapnak,
Kik termelik a szenet.”

Vándorbotot ragadtak hát,
Az elárvult családok,
Más tájakra mentek szerte —
Maradtak az uj sirok;
Mely hantok alatt nyugosznak
A volt édes jó apák,
Kikben kenyér hozóikat
Vesziték el az árvák.

De ifjak is porladnak ott,
Volt szerelmes legények;
Kik után lány szemekből
Sok könny gyöngyök gördülnek,
Mert ez is egy tartozéka
Az ilyen nagy drámának,
Mely tetőzi fájdalmukat,
Sok szerető anyáknak.

Ti! kik téli fagytól védve,
Jól fütöt otthonokban;
Gondoljatok tisztelettel,
A tüzelő kik által van? —
De ez nem mind.” mert azoknak,
Ennél több az érdemük,
Tartozunk, hogy életüket
A szörnyektől megvédjük.”

Fel a bányászok ügyéért!
Szálljunk sikra emberül
Minden bánya vész ment legyen.”
Bár mennyi pénzbe kerül.
Kiáltsuk ki . . . ! minden bánya!
A bányászoké legyen . . .
Az azokban szörnyet haltak,
Testvéreik jogcimen!”

Mars a bányák tulajdonból —
Ti százszoros gyilkosok!
A kik márvány palotákban
Áljogokon trónoltok.”
Ki üzzünk a világból is —
Ha önként nem kotródtok,
Lesz gondunk, hogy ördög hátán,
A pokolba nyargaljatok — . . .

PÁVAY LŐRINC.

A TISZA KÁLMÁN TÉR,

AMELYBEN A MAGYAR FŐVÁROS EGÉSZ TÜKRÉT MEGLÁTJA AZ IDEGEN.

P VANNAK talán szebb és elegánsabb terek, de érdekesebb életü tér nincs Budapesten, mint a Tisza Kálmán tér. Nincs még egy olyan tér, amelynek élete annyira változatos és amellett annyira rendszeres legyen. Nincs a napnak olyan órája, amelyben szüneteljen itt az élet és nincs az életnek olyan funkciója, amely ne bonyolódott volna már le a születéstől a halálig, a szerelemtől a gyilkosságik, a játéktól a verekedésig ezen a téren.

Mintha csak parcellázva lenne, külön helyük van itt az öregeknek, külön a gyermekeknek. Külön a szerelmeseknek és külön a játékosoknak, külön a vidékieknek, külön szegényháziaknak, külön az anyáknak és külön a cédáknak, külön az andalgóknak és külön a hangoskodóknak. Csak véletlen, ha ezek összekeverednek és abból mingyárt baj is van: hangos veszekedés, vagy szurkálás vagy egyéb rendellenesség.

REGGEL.

Minden órának, minden napszaknak megvan itt a maga élete. Reggel hét és nyolc óra körül a tér átlós utjai bonyolitanak le nagy forgalmat. A Rákóczi ut és a Népszinház utca irányába siető emberekkel telnek meg az utak, viszont a padok ilyenkor a legüresebbek és a legcsendesebbek. Néhányan ugyan még alszanak a padokon, jobbára kezdő hajléktalanok, akik az éjszaka sötétjében még nem mernek a padon elaludni, mert félnek a rendőrtől és csak hajnalban nyomja el őket a fáradtság. Nyolc órára azonban ezek is eltünnek. Ki tudja, hová. És félkilenckor már kint vannak az első gyerekek és az első kutyák. A gyermekek a játszótérre mennek, a kutyák azonban csak a tér széléig merészkednek jól nevelt állatok ők, tudják, mivel tartoznak gazdájuk és a szobatisztaság követelményeinek. Vannak idősebb kutyák, amelyek közben körül-körültekintenek, mintha el is gondolkoznának és szinte ugy tünik föl, mintha rosszaló véleményük lenne azokról, akik még a mai világban és a mai modern lakásokban is kutyák helyett gyermeket nevelnek és lehozzák játszani a térre.

DÉLELŐTT.

A délelőtti órákban szabályszerü elosztásban már ott ülnek a munkanélküliek a padokon. A Rákóczi ut felöli részen inkább vidékies külsejü emberek pihenik itt a munkátlanság gyötrelmeit, elszórtan közöttük néhány a környező házakból hüsülni és olvasni idetelepedett ember ül. A népszinház-utcai oldalon a menház öreg lakóin kivül a reménytelen emberek ülnek ilyenkor. Azok, akik hosszu munkanélküliségük során már lerongyolódtak és akik már nem várnak semmi jót az élettől. A játszótér nagy négyszögének padjain a gyermekek kisérői ülnek és olvasnak, fiatalemberek sakkoznak, vagy malmoznak, vagy egyéb szerencsejátékot játszanak és néhány öreg ember görnyedik a kisleányok meztelenségében. A Városi Szinház környékén nagyobbacska gyerekek játszanak saját találmányu labdajátékot, amely a futball egyes részjátékának felel meg. A még nagyobbak pedig a vonalas, vagy közismert néven "snur" nevü játéknak hódolnak nagy buzgalommal és még nagyobb izgalommal. Vannak azonban olyanok is, akik egyszerüen kődobálással szórakoznak. Mondjuk egy fa törzsét kell eltalálni, vagy a Városi Szinház falán egy bizonyos pontot. Ha járókelőt találnak el, az nem érvényes.

DÉL.

Délben már telve vannak az összes padok. Itt látszik, hogy Budapesten hányan és hányan nem ebédelnek. A nem-ebédelésnek is különböző fokai vannak. Az öt deka töpörtyüsöket nem számitjuk be, sem azokat, akik a fogukat szivják. Az igazi nem-ebédelés az akasztófahumorral kezdődik. Azzal, hogy a padon megtárgyalják, hogyan kell a rizses csirkét tökéletesen elkésziteni, vagy azzal, hogy mi a különbség az alföldi és a tengerész-rostélyos között és azzal végződik, hogy valamelyik megszólal:

— Hagyjátok abba, már undorodom az evéstől!

A következő fok, amikor a térdükre könyökölnek és nézik a kavicsokat és még tovább tartanak azok, akik a padra hajtják a fejüket és ebéd helyett — alszanak.

DÉLUTÁN.

Délután ismét a gyermekeké a tér, azoké, akik délelőtt iskolába járnak és azoké a kisebbeké, akikkel délelőtt nem jöhetett le az édesanyjuk, mert főzni kellett.

Délután több a nő, a "háztartásbeli," akik délelőtt nem érnek rá és a késő délutáni órákban megjelennek az öregek, a nyugalmazott vasutas, a kiöregedett kereskedő, a tönkrement korcsmáros, a nyugalomba vonult ószeres és az öreg hordár, akit gyermekei már nem hagynak dolgozni. Az öregeknek megvan a maguk törzspadja, éppen ugy, mint a kávéházi törzsasztal. Két-három padot foglalnak el, pipáznak, beszélgetnek és tréfálkoznak. A térnek ez a legvidámabb sarka. Itt lehet hallani a legjobb Móricka-viccet és a legsikamlósabb tréfákat. Itt lehet látni a legszebben kiszivott tajtékpipát és itt lehet a legjobb orvosi tanácsokat kapni.

Sötétedéskor fölszedelőzködnek. Mindegyik igyekszik minél egyenesebben járni, mindegyik igyekszik eltitkolni a másik elől reumáját és hasogatásait. Mindegyik büszke arra, hogy makkegészséges és ha hetvenéves, legalább is nyolcvannak mondja magát.

ESTE.

Este a környező házakból a házmesterek asztalt hoznak ki a tér szélére, körülülik és máriást vagy snapszlit játszanak. Kijönnek a környékbeli mühelyek és boltok munkásai, a meleg estéken a környező házakból egész családok jönnek le a térre csakugy háziasan, a mama slafrokkban, a papa ingujjban, a kisasszony lányuk harisnya nélkül, házicipőben és kissé boglyasan. A fiuk az elhagyatottabb részek felé sétálnak és riogatják a türelmetlen szerelmeseket, akik már korán összeölelkeztek, vagy akiknek különben is sietni kell, mert kapuzárás előtt otthon kell lenniök.

ÉJSZAKA.

Tiz óra után megváltozik a tér képe. Az éjszaka emberei beszélgetnek a padokon, ki tudja, miről tárgyalnak. Megjelennek a hajléktalanok és "puha" padot keresnek, részegek dülöngélnek és felriasztják az alvó madarakat, szerelmesek sóhajtoznak vagy hangtalanul ülnek a padon, egy-egy elkésett ember siet végig az uton és aggódva tekintget jobbra-balra, aztán egy kiáltás, valaki fut:

— Fogják meg! Fogják meg!

Mindenki a hang irányába szalad, összecsoportosulnak, néhány óvatos ember elmegy a térről, izgalom, csak a szerelmes párok szorongatják továbbra is egymást, mintha rajtuk kivül nem volna élet a világon.

— Rendőr! Rendőr!

Ujra kiáltás, futkosás. Valaki káromkodik:

— Az egész téren nincs egy rendőr!

Aztán ujra csend lesz, rendőr nélkül is.

És mire a nap fölkel, nincs más a téren, mint néhány üres pad, egy csomó padonalvó és — a madarak énekelnek.

MÄRY ÉS MARIS

IRTA:

VÁRNAI DÁNIEL

NEM ERŐLTETTEM, nem csináltam ezt a történetet. Ugy mondom el, ahogy láttam. Nem szenzáció. De hiszen egy cserebogár életrezzenése vagy sebes röpte a koratavaszi alkonyatban is megvillant néha valamit . . . Valamicskét abból az óriási óceánból, amit ugy is szoktunk mondani: emberek élete.

* * *

Hogy honnan is jött a cserebogár, vagyis a Maris? Nem nagyon kérdeztük, csak jött, aztán itt volt . . . Lehetett ugy tizenhat-tizennyolcéves, de nem látszott többnek tizennégynél. Ezt mingyárt észrevettem rajta, hogy délben benyitottam az előszobába s ott láttam a Marist, amint nagy belefelejtkezéssel szánkázott a parketten. Szőke vot, mint az idei kenderkötél, az arcán nagy foltokban piroslott valamelyik távoli vidéknek az egészsége a szeme meg kéken és vidáman nevetett, mint napsütésben a mennybolt a fejünk fölött. És milyen akkurátus volt mingyárt! Nem volt félénk egy cseppet sem, sunyinak meg éppenséggel nem látszott. Megnézett egy kicsit, aztán, ahogy csálére forditotta fejét, csendesen rámvicsoritotta a fogát, hogy ki vagyok én és mit akarok? Amikor illedelmesen bemutatkoztam, hogy én vagyok az "ur," aki itt lakom ebben a különszobában, ni, gyorsan rámondta, hogy ő meg a Maris, az uj háztatási alkalmazott.

— Én vagyok az uj cseléd, kérem — igy mondta. — Ugy hivnak engem, kérem, hogy Maris.

Egy kicsit megcsendesedett.

— . . . De odahaza a második apám ugy szokta mondani, hogy Mariskám. Vagyis Karabinski Mariska vagyok én teljes nevemen...

Hát igy indult a cserebogár röpte, azaz hogy a Maris szereplése egy egyszerü lakás falai között. Tiszta volt ő, kontyos és gömbölyü — és szapora beszédü, de nem nyelves, minden titkának s motoszkáló, csepp gondolatainak gyors kikottyantója. Igy tudtuk meg elég hamar, hogy azt a szép piros egészséget, ami az arcán viritott, nem valami messzi vidékről hozta, hanem innen csak a városból, valamelyik távoli, külső utcából. ott élte a második apjánál, vagyis a mostohájánál az árvák igazi életét; ez azonban csak materiális értelemben értendő, mert hát ami a lelkieket illeti, azon a soron a "második" elég csendes bánásmódban részeltette. Ahogy Maris többször is leirta, kis sovány ember volt ez a második, rettentően beretválatlan arcu, nagy szőrökkel és kevés egészséggel, sok küszködéssel és kevés kedéllyel, — de az sokáig nem jutott eszébe, hogy Marist kiinditsa a nagyvilágba.

Minek az?

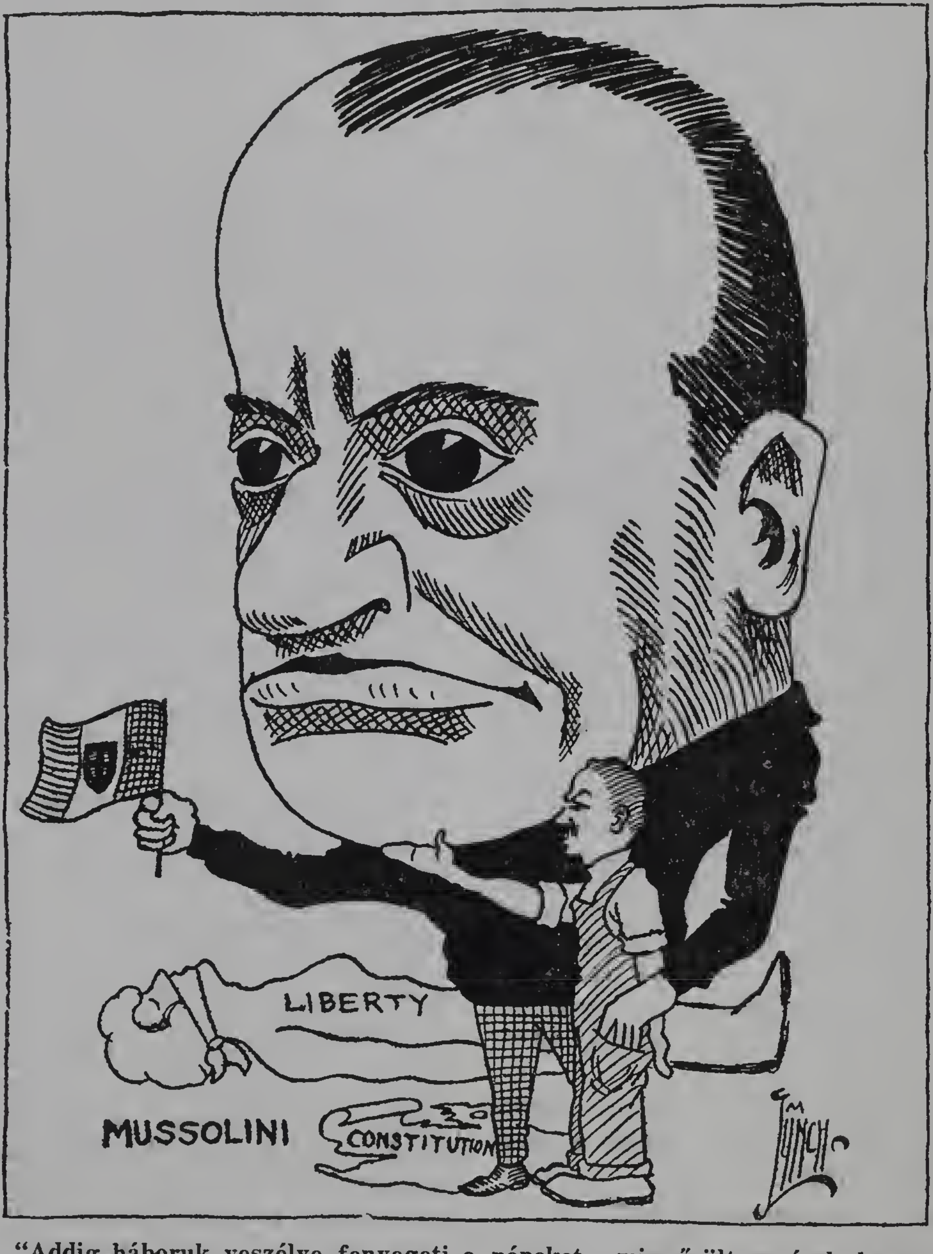
Megéltek, eltengtek-lengtek valahogy . . . már ahogy az irodalom mellékösvényein lehet. Tudniillik, a kis ember ujságot árult a köruti sarkon, meg könyveket imit-amott és heti revüket is. Vékonyka érben, de csak csurrant-cseppent a megélhetés — hát Maris otthon is el lehetett valahogy.

A változás nagyon hirtelen jött.

Egy este csak azt mondja a kis ember, hogy Mariska fiam, te meg elmégy szolgálni, mert én szépséghiba lettem. (Igazán mondom, kérem, itt nagyon elmosolyodtunk Marisunkon, mert ahogy ott állt előttünk haptákban és csillogott a szeme, olyan komolyan s olyan őszinte bánattal modta, hogy a mostohája "szépséghiba" lett . . .) S hogy szépséghiba lett, kezd az üzlet rosszul menni, most már igazán keveset hoz a hirlapirodalom, egy ember se tud belőle megélni, nemhogy kettő. Tudniillik rendőrségi emberek állapitották meg, hogy az ujságárusitás a köruti sarkon, a nagy ivlámpa alatt — szépséghiba; az ujságárus a halom ujságjával városszépészeti szempontból nem kivánatos tényálladék, körülbelül olyan, mint szemölcs egy sima ábrázaton és mingyárt le is kozmetikálták onnan, sietve rendet is csináltak . . . A "szépséghibát" eltávolitották a sarokról és beljebb tették vagy tiz méterrel, beljebb, de olyan helyre, ahol ugyan már nem volt szépséghiba, azonban, kisebb lévén a forgalom, üzlet sem volt már a hirlapüzlet. Igy mondta aztán egy este a kis keszeg ember, hogy baj van, fiam, Mariskám, neked szolgálni kell menned, de igyekezz ám, mennél hamarább.

Igyekezett is Maris.

Hamar meglett az első állás. És persze, nem mondható, hogy egyszeribe megtetszett neki az uj élet. Dehogy is tetszett . . . Leginkább akkor tetszett nagyon nehezen, amikor kora reggelenként ott állott tiz darab egész cipő előtt, s mindegyiket gyorspasztával tiszta fényesbe kellett tennie. Olyankor a



"Addig háboruk veszélye fenyegeti a népeket. amig őrült vezérek kormányozzák."

csipőjére tette a két kezét, megállt egy percig a sáros gléda előtt és csak egy hosszu, mély sóhajtás után fogott bele ebbe a kéményseprő-munkába. Dehát . . . a dolognak ez a könnyebbik, hogy ugy mondjam, az anyagi része.

A nehezebbje, az más!!

Mert a nehezebbje, az már az az ugynevezett lelki rész. És azért ez a nehezebbje, mert nem nagyon akarják észrevenni, hogy az efféle cserebogárnál ilyen rész is van. Éppen ugy, mint másnál. S annál jobban van annál erősebben és érzékenyebben van, mennél inkább nem akarják tudomásul venni . . .

Maris csak élte a maga egyszerü életét egy darabig. A nyugalom és a nyugtalanság, a derü és a lehangoltság hullámvonalain mendegélt, mint minden más ember és egyszerre csak el kezdte nyeldesni a létezés keserübb cseppjeit, mint nem minden más ember.

Ó, hiszen annyi baj van a világon!

És ebben az otthonban a háztartás urnője körül felhőzött ez a sok baj leginkább.

Ez az urnő, az a bizonyos Märy, ha szabad azt mondani s ha szabad, akkor is csak sugva mondom, amolyan festői romhalmaz volt már — legalább is az idegeiben nagyon is az volt. S mélységes sóhajtásai, amelyek minduntalan egy hanyatló jólét nyugalmát és korlátlan szabószámláit siratták, néha olyan szaporasággal gyültek össze, hogy sivító szélvész, tipró, vad förgeteg lett belőlük.

Ilyenkor szorult aztán a cserebogár Maris.

Hiszen ő volt az egyedüli célpont, amit hölgyünk villámai ellenállás nélkül csapdoshattak. A javából mindig ő kapott. Ilyenkor nem volt jó semmi. Baj volt, ha a kenyér friss volt; baj volt, ha nem volt friss. Baj volt, ha jött; baj volt, ha ment. Ha szorgoskodott: baj volt. Ha riadtan megtorpant: baj volt. Ha esett az eső: Maris kapott. Ha sütött a nap: akkor is.

Kezdett elfeketülni a cserebogár vidám kedélye. Maris erősen elkomorult. Vagyis hát minek huzzam-toldjam ezt az egész ügyecskét, hiszen olyan egyszerü, olyan mindennapi . . . csak rátérek már végre, hogy Marisba egy este ugy beleesett a halálvágy, mint bárányba a métely.

Éppen egy perccel azután történt ez, hogy az urnő őfelsége megmondta neki:

— Maris, ide hallgass! Reggel nyolc óra tizenöt perckor befütesz a fürdőszobába. Fürdésre fütesz, nemcsak mosdásra. Érted, Maris? Amikor már jó meleg lesz, a kádat félig telebocsátod vizzel. Harmincöt fok Celsius legyen, egy fokkal se több. Harmincöt Celsius, huszonöt Reaumur . . . Akkor aztán felköltesz, de nem hamarább, egy perccel sem.

Märyke illatosan és szigoruan elviharzott és kékszemü Maris ott maradt a beleesett sötét gondolattal. Nem, ezt ő nem birja tovább . . . A fene essen abba a Celsiába, de abba a Remirába is, mit tudja ő, hogy hol vannak azok, meg kifélék azok . . . nem lesz abból a fürőből semmi, nem bizony, mert ő hajnalban nekimegy a gázrezsónak és akkor vége lesz itt mindennek . . . Akkor majd pucolhat más, szaladhat, hallgathat, nyelhet más . . . Hogy mit szól majd a kis szőrös emberke, a szépséghiba? Hát majd szól, amit akar s különben sem fog szólni semmit, mert csak sir majd, ha sir . . .

Apró bárányfelhők gyülekeztek Maris lelkében s reggel felé ez már sötét borulattá vastagodott.

Órákig viaskodott. Hol megingott, hol kiegyenesedett, zugott a feje és sipitott a torkán a szusz és vert elül a szive, mintha egy nagy bunkóval csinálta volna . . . S a végén szörnyen megijedt a cserebogár . . . Hát hogyne! Mert mi lesz itt, micsoda dörgés, micsoda villámlás — ha félkilencre nem kész a fürdőszoba . . . ?

* * *

Mehalni nem mert, de élni: ahhoz volt kurázsija. Ahhoz tehát kétség sem fér, hogy nagyobb volt embernek, magasabban álló és valódibb volt mindennek, mint az a nevezetes Märy. Én legalább igy látom!

A Munkás Betegsegélyző Szövetség Betegsegély Táblázata

Az alanti táblázat mutatja, hogy a heti 7 dolláros segélynél miképp kell kiszámitani a betegivek segély összegét.

Egész segély.				Fél segély.			
1	napra	1.17	dollár	1	napra	0.58	dollár
2	napra	2.33	dollár	2	napra	1.17	dollár
3	napra	3.50	dollár	3	napra	1.75	dollár
4	napra	4.67	dollár	4	napra	2.33	dollár
5	napra	5.83	dollár	5	napra	2.92	dollár
6	napra	7.00	dollár	6	napra	3.50	dollár
7	napra	8.17	dollár	7	napra	4.08	dollár
8	napra	9.33	dollár	8	napra	4.67	dollár
9	napra	10.50	dollár	9	napra	5.25	dollár
10	napra	11.67	dollár	10	napra	5.83	dollár
11	napra	12.83	dollár	11	napra	6.42	dollár
12	napra	14.00	dollár	12	napra	7.00	dollár
13	napra	15.17	dollár	13	napra	7.58	dollár
14	napra	16.33	dollár	14	napra	8.17	dollár
15	napra	17.50	dollár	15	napra	8.75	dollár
16	napra	18.67	dollár	16	napra	9.33	dollár
17	napra	19.83	dollár	17	napra	9.92	dollár
18	napra	21.00	dollár	18	napra	10.50	dollár
19	napra	22.17	dollár	19	napra	11.08	dollár
20	napra	23.33	dollár	20	napra	11.67	dollár
21	napra	24.50	dollár	21	napra	12.25	dollár
22	napra	25.67	dollár	22	napra	12.83	dollár
23	napra	26.83	dollár	23	napra	13.42	dollár
24	napra	28.00	dollár	24	napra	14.00	dollár
25	napra	29.17	dollár	25	napra	14.58	dollár
26	napra	30.33	dollár	26	napra	15.17	dollár
27	napra	31.50	dollár	27	napra	15.75	dollár

Heti segélynél annyi napot kell számitani, ahány munkanap van egy héten. Egy teljes hóra annyi napot kell számitani, ahány munkanap van egy hóban. Leghosszabb hóban 27 munkanap van, ennélfogva egy betegivre csak ennyit fizethetünk. A betegiveket az osztály titkáron kivül az osztály elnöknek, avagy helyettesének is, (bámely tag is lehet,) alá kell irni, hitelesités végett. Ezt a központi ellenőrzés követeli.

KECSKEMÉT TÖRTÉNETE— ADOMÁKBAN

PA KECSKEMÉTI muzeum vezetője, Szabó Kálmán. "A hirös város anekdotakincse" cimmel összegyüjtötte és az Első kecskeméti hirlapkiadó és nyomda rt. könyvben kiadta a Kecskemét multjára vonatkozó adomákat. Az anekdótakincs legnagyobb része találó s ötletes kiegészitése annak a képnek, amelyet a történelmi monográfiák vázolnak a nagy alföldi városról. Néhány müvelődéstörténeti szempontból jellemző anekdotont mutatóba itt közlünk.

A VARJAK NÉPSZÁMLÁLÁSA.

Csilléry jogakadémiai igazgató, mielőtt Kecskemétre került, Pest megye egyik községében volt jegyző az abszolut korszak vége felé. Mint beszélte, egy alkalommal a megyefőnöktől azon utasitás érkezett, miszerint a községben lévő varjak megszámlálandók. Többször sürgették a választ, mire megmérgesedett és azt kérdezte levélben, hogy a varjuszámolás adatait felekezetek szerint csoportositva kell-e felterjeszteni, mert a községben kétféle varjak vannak, pápista varjak és kálomista varjak.

Felülről nem sürgették többet.

FÖLDMÉRÉS.

Századokkal ezelőtt a puszták felmérése, a telelők, tanyaföldek kiosztása ugy történt, hogy egy kocsit odaállitottak a felmérendő föld megjelölt határpontjára, a kocsi mindkét első kerekére jelzőket (szalmacsóvát vagy kötelet) kötöttek. A kocsit ugy állitották, hogy a jelzők a kiindulási ponton álljanak. Két ember ült a kocsiderékban, az egyik a bal-, a másik a jobboldali kerék fordulásait számolta s minden 10, vagy 100 fordulatot feljegyzett. Igy egyuttal ellenőrizték is egymást. Még a tizennyolcadik század közepén is kocsifordulással mérték a földeket. Nagyritkán megtörtént persze, hogy a "mérnökök" odaszóltak a kocsisnak:

— Hajts, Pista, mert a nemzetes urét mérjük.

Mire a Pista a lovak közé vágott, s bizony meglehet, hogy nem egészen potosan tudták számolni a gyors fordulatokat.

A TISZTELETES UR ÉS AZ ESŐ

Luteránus nagytiszteletü urunkkal történt, hogy egy hosszu, kánikulai nyár közepén, amikor bizony már hetek óta nem esett az eső, a hivatalban a káplánja azzal a kérdéssel fordult hozzá:

— Nem volna-e jó már esőért imádkoznunk?

A nagytiszteletü ur kinézet az ablakon, s látva, hogy a nap százágra süt, felhőcskének még nyoma sincs az égen, igy válaszolt:

— Fiam, még nem blamáljuk magunkat!

KECSKEMÉT ÉS A NÉMET ORIENTÁCIÓ.

A törököktől és a törököt kiüző némettől egyaránt sokat szenvedett Kecskemét. Lehet, hogy a "felszabaditók" még rosszabbak voltak. Legalább is erre mutat az, hogy amikor Hornyik János, városunk történetirója megkérdezte a Biró Mihály kecskeméti birtokos polgárt a régi időkről, az igy felelt:

— Nagyatyámtól hallottam, hogy a török alatt boldog volt Kecskemét, de a német egyik csöcsét sem hagyta fejetlenül a tehénnek.

KECSKEMÉT ÉS AZ OLASZ ORIENTÁCIÓ.

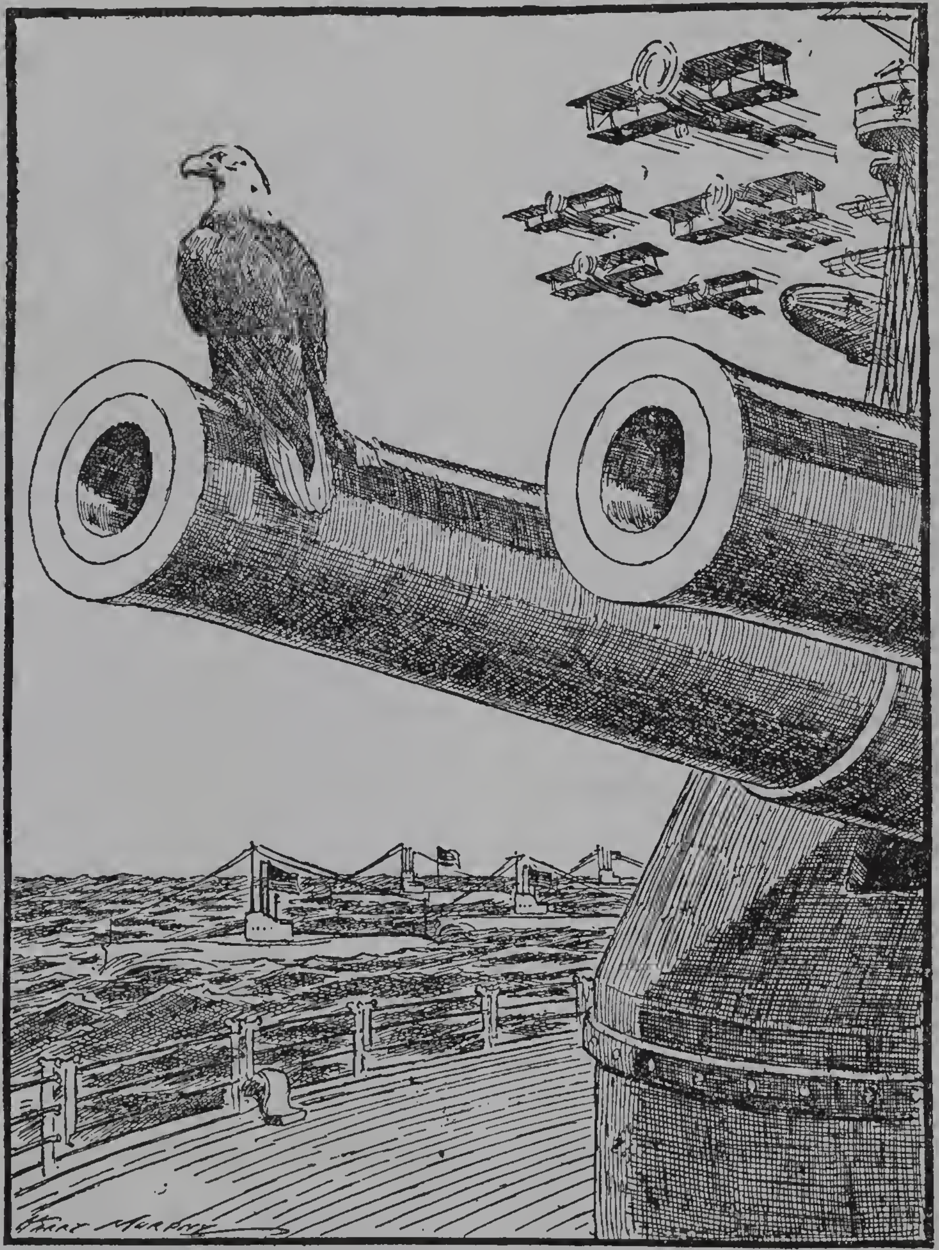
Berlini lapok egy esettel kapcsolatban sokat élcelődtek Kecskemét hatósága felett. Az állitólagos eset az lett volna, hogy egy olasz szinházvállalkozó arra kérte a kecskeméti tanácsot, engedje meg, hogy a városban néhány olasz nyelvü előadást tarthasson. Az egykori tanács állitólag azzal az indokolással utasitotta el a kérelmet, hogy a város lakossága a szigoru tél folyamán ugyis eleget szenvedett.

MÜÉLVEZET.

A Katona szinházban a 900-as évek elején történt. Ünnepélyes előadás volt, a "Bánk bán" operát adták s a főszerepekben kiváló budapesti müvészek remekeltek.

Amikor a pesti müvésznő a nagyáriát énekelte s a közönség legnagyobb része — az ünnepélyes pillanatnak megfelelően — halotti csendben élvezte az előadást, az egyik páholyból egy hölgy félhangosan átszólt a másikba (ám e pillanatban éppen elhallgatott a zene és ének s igy az egész nézőtér hallotta:)

— Oszt mennyi ecetöt tösző bele?



A dögkeselyüket emberi testtel tápláló technika ismét bőségesen arat.

MUNKÁSPOLITIKA.

A “Bozó harangja” kifejezés eredetét képező igaz história még manapság is forog a nép ajkán.

A tizennyolcadik század első felében volt a városnak egy erélyes főbírája: Bozó István. Nevét leginkább a “Bozó harangjá”-nak hire tartotta fönn. Amidőn ugyanis a napi bért keveslő kaszások nyári hajnalon munkára menni nem akartak, napdéli harangszóig a piacot “kaszáltatta” velük. Vagyis a piac puszta homokja fölött kellett nekik kaszálni a semmit, a levegőt, mintha künn a buzatáblán aratnának. A “munka” végét jelentő déli harangszó volt a “fizetség,” innen a “Bozó harangja.”

AKÁRCSAK MA.

Gubacsi Pál öreg bugaci juhász felkerült egyszer Pestre és bejutott a képviselőházba is. A folyosó márványfala mentén az oszlopdiszek tetején szobrok jelzik a magyar ipari és mezőgazdasági foglalkozási ágakat. Van ott cserzővarga, kovács, szürszabó, magvető, arató stb. Nézegeti Gubacsi Pál juhász az aranyos cifrázatokat, márványfalakat s végre megakad a szeme a szobrokon is. Szemmellátható nagy érdeklődéssel gusztálja sorra, de végül elkedvetlenedve legyint:

— Haj, haj! Mindenféle szent van itt, csak juhász nincs!

MIKOR LESZ MÁS VILÁG?

Dömötör István gazda istállóját tapasztani egy cigányt fogadott. Hosszu alkudozások után megegyezett vele.

Pár év mulva ugyanazt a cigányt fogadta meg ugyanahhoz az istállóhoz s mikor megkérdezte, hogy mit kér, a cigány azt mondta:

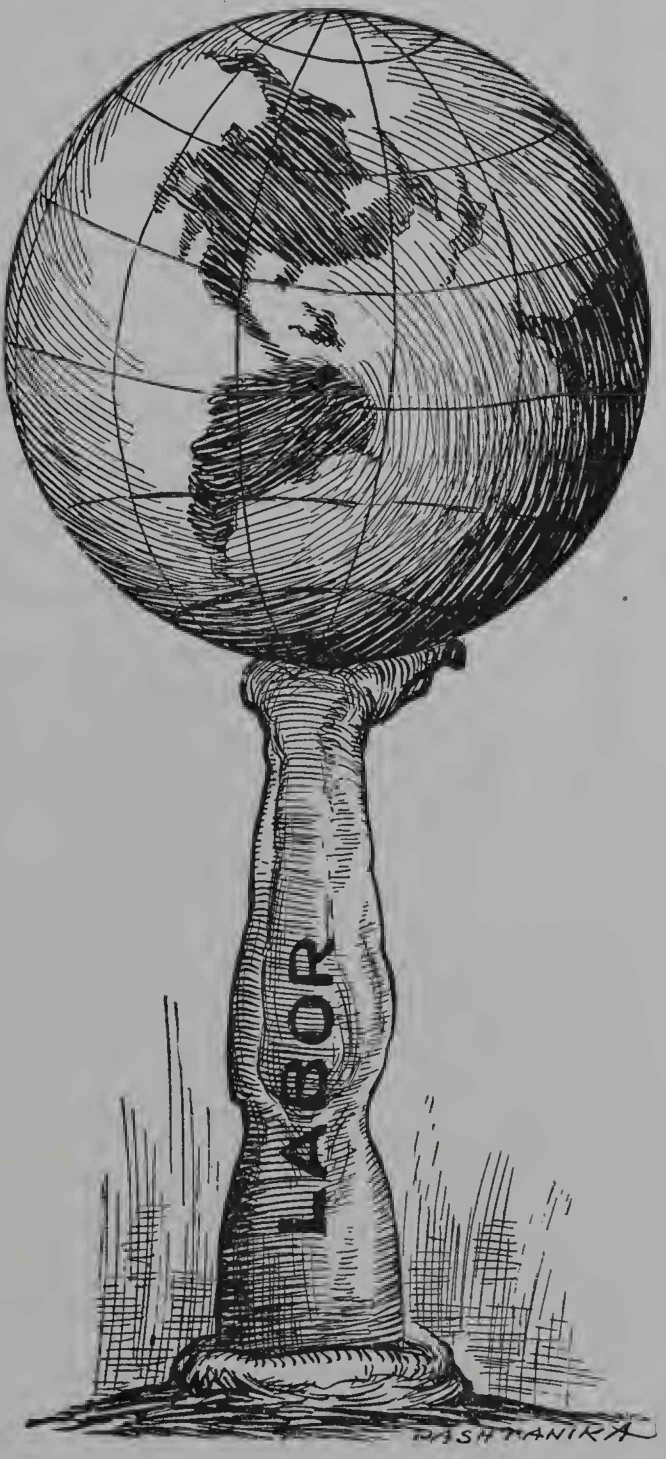
— Hát csák ánnyit, mint máskor, kenyergem álásan.

Dömötör uram alkudozni próbált, de a cigány nem akart engedni.

— Ejnye, fiam — magyarázta neki Dömötör —, azóta olcsóbb a gabona, a bor, más világ van már.

Azt felelte ám erre a cigány:

Ákkor les más világ, há á némzétés ur fogja tápástáni ázs in istállómat.



Az emberiség napi szükségletét, jólétét a munkás kéz teremti elő, nélküle nem volna élet.

A PROLETÁR KÖLTŐ

Irta: BÁNADY SÁNDOR.

Ha én szólok:
szavaimban a proletárok elfojtott krátera zug,
ha én beszélek:
a rabszolgák elcsuklott forrogó hangja bug,
ha én irok:
a megalázottak zokogó keservei öltenek tettest,
ha én zokogok:
a koldusok millióinak pokoli fájdalma jajjong,
ha én vágyódom:
millió ember lelkét ölelem magammal
a megdicsőült Holnap arany-testére,
ha én kiáltok:
a szenvedők égető sebei háborognak,
ha én gyujtok:
a dolgozók kizsákmányolt hadát kovácsolom acél-tömbbé,
ha én lázitok:
a megköpködöttek szent Vágyait forrasztom Lázadássá,
ha én lángolok:
a proletáriátus herkulesi Ereje lobbant bennem lángra,
mert én vagyok a látnok,
én vagyok az eltaposott sziveknek Istene,
én vagyok a munkásosztály lázadó szive s lelke,
én vagyok minden korban a fölmagasztosult Forradalmár!
Az én borus hangomban egy zokogó világ
siró fájdalma viharzik,
az én kacajomban egy uj-Nép jó kedve tomból,
az én karjaimban a rabszolgák izma feszül,
mert bennem összpontosul minden Érzés! . . . . . .
Szavakba fonom a proletáriátus
fájdalmának könnyes-szálait,
hogy kancsukává szövődjenek a szavak szallagjai,
mert akkor szent, akkor dicső a költészet is,
ha a valóság, a világ, az Igazság
viharzik benne müvészi akkordokban . . . . .

Az én anyanyelvem a minden fájdalmak szókincse,
az én anyanyelvem a dolgozó milliók bánata és keserve,
az én anyanyelvem a világ forrongó szózata,
az én anyanyelvem a proletáranyák
igába taszitott és járomba fult beszéde,
az én anyanyelvem a legfájdalmasabb,
a legszomorubb, de a legharcosabb, a legszentebb,
a legforradalmibb emberi hangok egysége,
mert az Uj-Világ szózatai harsognak benne!!!

SZINTÉN KENYÉR...

IRTA:

SEBES ÁRPÁD

PÁTKY SÁNDOR nem volt destruktiv iró. Konstruktiv se. Már ami a politikai szempontokat illeti. Egyszerüen iró volt. Nézte és meglátta az élet szépségeit, de nem tért ki az élet árnyoldalainak szemlélése elől sem. És ha már meglátta, meg is mutatta azokat. Sőt itt-ott, szinte nem is tudatosan, nem keresve és kiélezve, de a mélyebben rejtőző okokra is ráhibázott.

Iró volt, egyszerüen volt az, jóhiszemü és igyekezett irásaiban is embernek megmaradni. Mindezek azonban nem olyan dolgok, amelyek egy mai iró karrierjének utját simává kövezik.

Talán ezért is, talán azért is, mert több lehetőségre és levegőre vágyott a kenyérhajsza hosszu évekkel ezelőtt kikésztette Németországba.

Nem. Német iró sohasem lett. Megmaradt egyszerüen csak irónak. Abban az időben ez még elegendő volt arra, hogy megadja kenyerét a sors önkéntes számüzöttjének. Az 1925-ös évek Németországának kulturcentrumai, virágzó napilapjai és müvészi folyóiratai ellátták őt is, megadták néki is, mint annyi ezernek, munkája ellenértékét. Igy volt ez mindaddig, mig a politikai átalakulás folytán a napilapok, folyóiratok egyrésze át nem vedlett irodalmi mezbe burkolt politikai és faji orgánummá, másrésze pedig, amely ezt az utat nem óhajtotta megtenni, önként vagy nem önként, be nem szüntette müködését.

Nem, Pátkyt nem vitték internálótáborba, sőt ki sem utasitották. Igazolta, hogyha nem is árja, de legalább turáni leszármazott s igy joga volt maradék pénzét kint elkölthetni. Miután pedig elköltötte, hát istenem! Mert a kenyérkereseti és életlehetősége azért éppugy megszünt, mintha a hivatalosan alacsonyrendünek bélyegzett fajból származott volna. A totális állam ugyais irodalmi szempontból is önellátásra törekedett és rendezkedett be. Éhenhalni azonban Pátky nem óhajtott idegenben. Hazasietett tehát.

Legelőször egy nagy, ugynevezett konstruktiv lap szerkesztőségébe kopogtatott be.

— Né, mondta a főszerkesztő titkárnője, aki egyuttal a lap munkatársa is volt — mert mondani sem kell, hogy az iró a párnázott ajtó mögé nem jutott be —, Ön is hazajött?

— Én is — mondta kényszeredetten Pátky, elértve a megjegyzést.

— Sajnálatos — forgatta az kezében kéziratát —, de nem tehetünk semmit. Egyenesen el vagyunk árasztva irásokkal. Szigoru utasitásom, hogy egyelőre semmit se vegyek át. Épp ezért nem engedhetem be az öreghez se. Tudja, olyan vajszive van, senkit se képes elutasitani, ezért hát rám bizta ezt a dolgot.

— Kár — mondta Pátky és habozott, elmondja-e, milyen nagy szüksége lenne arra a pár pengőre honoráriumra is, amit a novella közlése jelentene számára.

Félszegen állt ott, ugyhogy a titkárnő végül is megsajnálta.

— Na, hagyja itt azért — mondta. — Elbeszélés? — pillantott bele és elhuzta az orrát. — Halomban álltak ott a kéziratok. — Ezek csak a visszautasitott novellák. Másfél évre el vagyunk látva. De azért kivételesen hagyja csak itt. Majd meglátjuk. Ha jó, tekintettel a tekintendőkre, majd megnyomjuk egy kissé a dolgot.

Pátky arra gondolt, hogy nem is olyan régen odakint látatlanba és előre fizették már ki irásait. Most mégis örült. Mit tegyen? Tudta, hogy itthon elölről kell kezdenie mindent.

Ez novemberben történt. Decemberben bátorkodott megérdeklődni a novella sorsát.

Az irás jó, nyugtatta meg a titkárnő, ő pártolóan továbbterjesztette. De végeredményében, sajnos, mégsem ő dönt.

Két villamos ide, kettő vissza, mondta magában a lépcsőn lefelémenet az iró, de aztán legyintett: rezsiköltség.

Januárban márcsak telefonálni mert. Különben is ez olcsóbb. A titkárnőnek azonban éppen a főszerkesztő ur diktált, nem jöhetett a készülékhez.

Februárban szerencséje volt, beszélhetett vele.

— Mit szól hozzá, csicseregte a telefónba, elfogadták! Persze egy kicsit én is segitettem. Kérem, ne köszönje, nem azért mondtam. Hogyne, tudom, szüksége van a pénzre, nemsokára jön is.

Mégis csak kedves ez a nő, tette le Pátky a kagylót és elküldte neki dedikálva eddig megjelent munkáit. Portóköltség 64 fillér.

Márciusban nem jött. A novella se, a titkárnő se a telefónhoz. Köszöni a könyveket, bocsánatot kér, üzente a szerkesztőségi altiszttel, de nem tud kijönni, sokan vannak nála. Egyébként az irás már a nyomdában van.

Persze, bosszankodott az iró. Tulsokat zavarom. Megutáltam magam. Egyébb dolga is van, mentegette a nőt, hogy ne bántsa annyira a megszégyenités.

Áprilisban azonban, amikor nagyon szorongatta a cipész, kapóra jött, hogy sikerült egy barátja révén a nyomdaigazgatóhoz összeköttetést találni.

— Hogyne, kérlek, igérte ez meg barátjának, utánanézek és az éjjeli szerkesztőt megkérem, hogy minél előbb közölje.

Májusban ismét és feltétlenül megigérte, hogy juniusban lejön. Dehát annyi van készen, kiszedve, hogy — be kellett látnia — nem könnyü a dolog. Ez nem is volt igazság hiján.

Lejött! Juliusban lejött. A legjobbkor. (Ugyan, irónak mikor nem a legjobbkor jön a pénz!) A szobabérhez hiányzott egy pár pengő, amit már sehonnan se tudott volna összeszedni, pedig háziasszonya már a köszöntését is alig fogadja. Berobogott a kiadóba a pénzért.

— Sajnos, hütötték le örömét, az az ur, aki az utalványokat kezeli, szabadságra ment. Az aláirt utalványok között nincs. De, sugta egy jóakaratu alkalmazott, menjen föl a főszerkesztő urhoz, már történt az évek folyamán olyan eset is, hogy az öreg soron kivül utalt.

Hát persze. Hiszen ugyis föl kell mennie, hogy a titkárnőnek, már csak a jövő reményében is, ismételten megköszönje szives pártfogását. Meg is köszönte. De hogy az öreghez?! Mit gondol? Ilyen dolgokkal csak nem foglalkozik a főszerkesztő ur. Különben is nagy politikai megbeszélések folynak bent. A neves kormányférfi van nála. De a kiadóban el kell, hogy intézzék. Mondja, hogy én üzentem.

A nyomdaigazgatót nem találta ott. Másnap bent találta — mindössze két órát előszobázott — s miután hálájáát kifejezte, protekciójára a kiadóhivatali igazgató kedvesen, de határozottan fölvilágositotta, hogy a kiutalások "kivétel nélkül" a hó tizedike és huszadika közt intéztetnek el. Azonban, hogy ne kelljen fáradnia, igéretet tett, hogy az első lesz, akinek postán elküldeti a pénzt.

Legalább a villamospénzt megtakaritom, vigasztalta magát keserüen az iró.

Tizenhetedikén meg is kapta a tizenhat pengőjét.

Elgondolkozott. Három hónapig élt benne a téma és foglalkozott vele. Egy délután megirta. Később néhányszor elővette és javitgatta, majd amikor kifogástalannak találta, legépelte. A gépelést átnézte. Elköltött négy villamost á 24 fillér, az 96 fillér, 3 telefónra 60 fillért, a portóköltség 64 fillér volt. A papirt, géppapirt, ceruzát nem számitja, bár az sincs ingyen. Eltöltött a szerkesztőségben egynéhányszor féldélutánt — viszont tudja, hány vonala van az előszobai tapétának alulról fölfelé és haránt —, a kiadóban egynehányszor féldélelőttöt, az idegeiből meguzsonnázott és megtizóraizott közben pár métert, kapott végül 16 pengőt. Ha ebből levonja, amit elköltött, akkor keresett, keresett . . .

Mit is keresett?

Kenyeret. Mert állitólag ez is kenyér.

A TEA TERMESZTÉSE ÉS GYÁRTÁSA

PSOK-SOK MILLIÓ ember iszik naponta teát, főkép a hideg téli hónapokban izlik az aranysárga ital, mert . . . melegit. De csak a fehér embert melegiti, a szinesbőrüek, a barna benszülöttek a sárga kinaiak és japánok leginkább a legforróbb trópusi napokon élvezik a teát, mert . . . hüsiti őket. Az ezernyi ellentét a fehér- és szinesbőrü emberek között még a tea élvezetében is megnyilatkozik. Az egyiket melegiti, a másikat hüsiti.

A sok millió teát ivó ember közül aránylag csak igen kevés tudja, hogy "mi fán terem" a tea. Egy rövidke cikk keretében nem lehet megirni a teatermesztés és a teagyártás ezernyi csinyját-binyját. Erről már egész könyvtárakat irtak össze és még most is szorgalmasan irnak. Az utolsó szót még nem mondták ki a teáról, bár a kinaiak már több ezer év óta termesztenek teát.

HOL TEREM A TEA?

A termesztés és gyártás nemcsak világrészek, de még vidékek szerint is változó. Oroszországban például préselt teakockákat árulnak, a kinaiak csak zöld és viráglevelekkel illatositott teát isznak. A beduinok vajat és sót kevernek a durva, nagylevelü teáikba. Az európaiak csak a fekete ceyloni és jávai teát isszák, leginkább többfajtát összekeverve. De akárhányféle módon termelik és gyártják a teát, a lényeges vonások változatlanok, akár kézzel készül a tea, egyszerü kinai üzemben, akár milliós tőkével rendelkező európai teagyárban készül az illatos tea.

A teacserje vagy teabokor, mint köztudomásu, csak a trópusi vidékeken terem. De nem az alacsony, mocsaras tengerpartokon, hanem csak a magasabb hegyeken. Minél magasabb hegyen terem a tea, annál jobb, illatosabb és drágább. Kétezer méter magas hegyeken terem a legfinomabb tea. Itt néha még fagypont alá is száll a hőmérséklet: ez persze már sok a jóból; ilyenkor elfagynak a levelek és egy-két hónapig nem lehet a teát leszedni, meg kell várni, amig uj hajtások nőnek a cserjén, mert csak a friss hajtások hazsálhatók. Egy-egy ág végén kibujó friss zöld levélkékből csak a legkisebb három levelet szedik le. Ebből a három levélkéből is csak a középső kicsiny még fejletlen levélke adja a legfinomabb ezüstszinü teát. Az ugynevezett kuliteához persze a negyedik, ötödik és hatodik teljesen kifejlett tealevelet is felhasználják, ebből készül az olcsó, de kesernyés tea, amely már nem is kerül az európai piacra.

A leveleket asszonyok és leányok szüretelik. Egy-egy asszony naponta sok-sok százezernyi levelet szed le. A leszedett leveleket a gyárba viszik, ahol régi kipróbált és gyakran féltve őrzött előirások szerint készitik elő a fogyasztásra.

A TEAGYÁR.

A gyártási folyamat nagyjában a következő: A friss zöld leveleket tüllre vagy finomabb dróthálókra teregetik szét, amelyre meleg levegőt fujnak a szétteregetett tealevelek közé. Itt két-három óra hosszat marad a tealevél, ez alatt az idő alatt a levelek elfonnyadnak. A friss, ropogós, törékeny levelek fonnyadni kezdenek, élénk zöld szinük megsötétedik, a levelek puhák, hajlékonyak lesznek, ha összehajtja az ember, akkor nem törnek meg, hanem összecsavarhatók, mintha puha papirosból lennének. Ezeket a félig fonnyadt leveleket egyenként összsze kell sodorni, mint a cigarettapapirost. Ezt a müveletet egyszerü kis üzemekben kézzel végzik, modern gyárakban sodrógépek vannak, amelyek bizonyos nyomás mellett összesodorják a leveleket.

A sodrás után már barna szine lesz a levélnek és a nyomás folytán a levél nedvének egy része kipréselődik. Ezután következik a gyártás legkényesebb része, a levelek "fermentálása," élesztése vagy érése. A sodrógépekből kikerült teát lapos ládákba teszik és nedves levegővel telitett sötét kamrákba helyezik, itten — gyártási módszerek szerint — 20—30, vagy 50 percig marad a tea, ez alatt az idő alatt a tealevelekben igen bonyolult kémiai folyamatok mennek végbe. Ekkor kapja a tea az izét, zamatját, illatát. A kamrák hőmérséklete, a levegő páratartalma, a fermentálás ideje mind igen fontos körülmény, amitől a tea minősége függ. A fermentálás után a tea szine sötétbarna, olyan, mint a kifőzött teáé. Ezután következik a száritás, az 50—60 fokos hatalmas száritókemencében, ahol a tea végnélküli szalagon ötször-hatszor megy keresztül. Ha a száritókemencéből kikerült a tea, akkor a szine már fekete és a gyártási folyamat befejeződött.

AZ OSZTÁLYOZÁS.

Ezután már csak az osztályozás és a csomagolás van hátra. A tea osztályozása, minőség szerint való szétválasztása még nem is olyan régen csupán kézzel történt. Ujabban gépek végzik ennek a munkának jelentős részét, a kézimunkát azonban még a legmodernebb üzemekben sem sikerült teljesen kiszoritani. A teát a gépek ugyanis átszitálják, a különböző nyilásu sziták elválasztják egymástól a finomabb és durvább leveleket, de a levelek szára, amely fogyasztásra alkalmatlan még, átcsuszik a szitán. Ezt csak kézzel lehet kiválasztani és a gyakorlott asszonyok keze alatt boszorkányos gyorsasággal folyik ez a munka. Szitálás helyett süritett levegővel is osztályozzák a teát; a különböző nagyságu tealeveleket egyszerüen szétfujják, de ez a módszer nem tudja nélkülözni a kézzel való utószortirozást. Aki egy marék teát jól megnéz, az látni fogja, hogy sok különféle alaku levél van egy ilyen marék teában. Ez azonban nem a szortirozás hibája, mert a gyárból csak egyforma áru kerül ki. A különféle fajta teákat az importőr, vagy a nagykereskedő keveri össze aszerint, amint ezt a fogyasztóközönség izlése és pénztárcája kivánja.

TEAKóSTOLóK.

A teát faládákba csomagolják, amelyeket belül vékony ólomlemezekkel bélelnek, hogy megvédjék a teát a nedves és sós tengeri levegőtől. Ha a tea nedves lesz, megdohosodik, vagy legjobb esetben elveszti a zamatját és illatát. Régebben, amikor még nem tudták a tealádákat megvédeni a tengeri levegő behatásától, Indián keresztül karavánok szállitották Európába a teát. Ez volt a hires karaván-tea, amely mindig jóval drágább volt, mint a tengeren szállitott áru. Ma már nincsen karaván-tea. Az európai piac főhelye London, de Amsterdamba és Hamburgban is van teatőzsde. Itt a teát minősége, szine, szaga és ize szerint vásárolják. Igen magasfizetésü teaszakértők állapitják meg egy-egy láda tea minőségét. A szakértők munkája valóságos müvészet és sok tekintetben hasonló a borkóstoláshoz.

Amig a trópusi hegyekről a tea eljut a fogyasztó szamovárjába vagy teáskannájába, sok-sok kézen megy keresztül és sok-sok százezer embernek ad kenyeret. A tea napjainkban az élvezeti cikkek sorából már a közszükségleti cikkek sorába jutott. A kávé és cukor mellett a tea egyik legjelentősebb világkereskdelmi cikk lett.

◆ ◆

A VILÁGEGYETEM A PLANETÁRIUMBAN

P “ÉPITS EGY olyan szinházat, amelyben a csillagászat titokzatossága eltünik, de ugyanakkor feltárul maga a teljes tündöklő égbolt. A csillagok ugy tündököljenek, mint az igazi égboltozaton. Tedd lehetővé, hogy az időben előre és vissza mozoghassunk, s hogy ily módon bemutathasd az eget, amilyen volt és amilyen lesz. Az előadó olyan könnyedséggel mozgassa a csillagokat és bolygókat, mintha egyetlen gép irányitásával kontrolálhatná valamennyit. A csillagászat olyan érdekes legyen, mint egy izgalmas játék...”

Ezeket a gondolatokat tolmácsolta néhány évvel ezelőtt Prof Max Wolf, a heidelbergi egyetem tanára, Dr. Oskar von Millernek, a müncheni Deutsches Museum igazgatójának. Ezek a gondolatok — a csillagászat dramatizálását és leegyszerüsitése — im formát öltöttek. Ma már 22 városban találunk Planetariumokat. Ezek közül négy ebben az országban van: Chicago, Los Angeles, Philadelphia és New Yorkban.

Oktatási és müvelődési szempontból a Planetárium szerepét nem lehet tulbecsülni. Mindannyian tanulunk valamicskét a csillagokról az iskolában, de ezt épp oly hamar el is felejtjük.

Az iskolázatlan ember, aki a szabad ég alatt él, többnyire többet tud az égboltozatról, mint az elfoglalt városi ember, aki még az eget is ritkán láthatja. Az acél és cement várakból kitekintő ember, akinek szeme előtt megcsillannak a csillagok és feltünik a sápadt hold, nem is tudná elmondani, hogy valójában mit látott. Még kevésbé tudná megmagyarázni, hogy a csillagok hogyan és miért mozognak, vagy hogy az évszakok hogyan változnak.

Ilyen és eféle kérdések egész sorozatára válaszol a Planetárium. A szemlélő itt egy szinházban találja magát, ahol igazi “csillagok” lépnek fel. Amikor az ember belép a tető-boltozat egészen fehér. A szinház közepén található az óriási projektor aminek olyan formája van, mint valami mesebeli sulyzónak. Az előadó elfoglalja helyét a pódiumon és a fény lassanként kialszik, épp ugy, mint a szinházban, amikor felhuzzák a függönyt. Amikor végre körömsötétség lesz, az előadó bekapcsolja az áramot és a csodák-csodája im, egyszerre előtünik. Az üres fehér boltozat helyét most a valóságosnak tünő csillagos égbolt foglalja el. S mindez egyetlen gombnyomásra! Most látjuk az ismert tejutat ezer és ezernyi csillaggal. Még a képzett csillagászokat is megragadja a csudálatos kép, aminek drámai hatása a beavatatlan számára szinte leirhatatlan. Az előadó egy hosszu fénykézzel most a Vénusra mutat és megmagyarázza a csillag egyszerü mozgását. Az évszakok változásával változik a mü-égboltozat is.

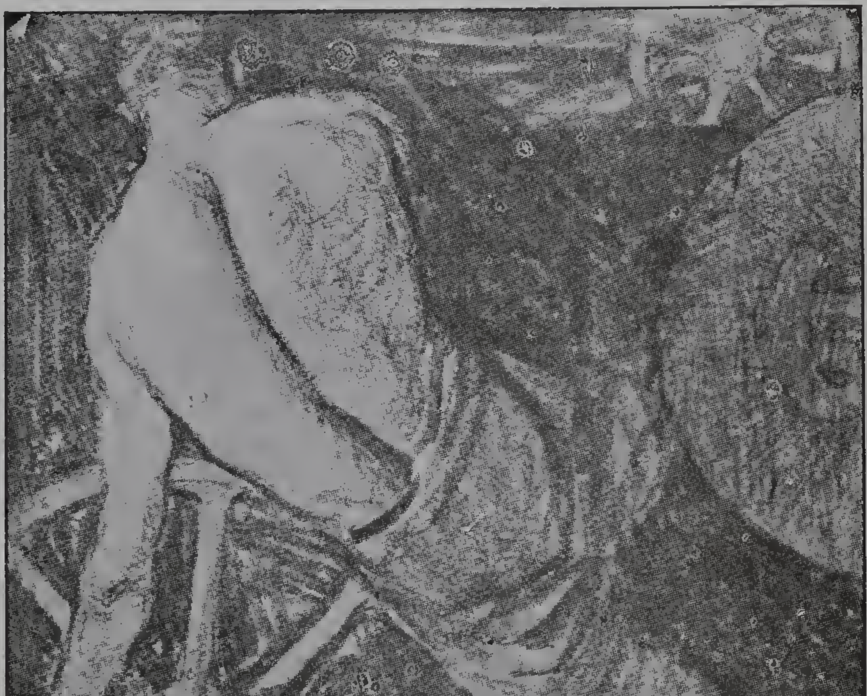
Érdekes dolog, hogy mig a puszta szem egy tiszta csillagos égboltozaton csak körülbeüll 3000 csillagot tud megszámolni, akár az egyenlitőtől északra, akár a délre eső égbolton, addig a Planetáriumban nem kevesebb, mint 9000 csillagot tudnak a mü-égre projektálni. Éveket lehet igy percekbe tömöriteni és hónapokat másodpercekbe. Ez a csodálatos titka a nagyszerü müszernek.

A hatalmas vetitő készülék segitségével annyiféle csillagászati problémát lehet megmagyarázni, hogy szokásos egy évre kiterjedő csillagászati kurzust levezetni. Hosszu órákra és figyelmes vizsgálatra van szükség, hogy a végtelenül komplikált müszer mozgását és a velejáró magyarázatokat pontosan követhessük.

Az első Planetáriumot ebben az országban Chicagoban épitették. Ez a Planetárium egy félszigeten foglal helyet, amely mélyen benyulik a Michigan tóba. A hires Lake Shore Driven mértföldes távolságokból fel lehet ismerni kupoláját.

A példát rövidesen követték Philadelphia és Los Angeles. A philadelphiai a Franklin Instituteban foglal helyet. Csak néhány nap előtt nyilt meg a new yorki Planetárium (Hayden) a Museum of Natural History tőszomszédságában. A new yorki Planetárium épitését két adomány tette lehetővé. Az egyiket, 150.000 dollárt Charles Hayden adta a vetitőgépre, a hiányzó 650.000 dollárt pedig a szövetségi kormány kölcsönözte.

Még egyszeri látogatás is értékes felvilágositást és élvezetet nyujt a szemlélőnek. Nem érdektelen dolog például látni, amint a hold keresztül halad a csillagos égboltozaton fogyatkozva és ismét kibontakozva. Ha az ember legalább egyszer havonta felkeresi a Planetáriumot — amikor is a csillagok helyzete változik — a csillagászat alapvető problémáit megismeri. A copenhágai Prof Stromgren találóan jegyezte meg: "... sosem volt részünk szórakozásban, amely ennyire instruktiv ... és sosem szólt annyi emberhez ... A Planetárium egymagában egyesiti az iskolát, a szinházat és a mozit ..."



Szervezkedj! Harcolj! Hogy az élet hajóját a Te részedre is "csendes vizekre kormányozhasd.

VAN MÉG ÁLLÁS!

IRTA:

G. HERMAN IVÁN

PMOS PEDIG Önön a sor, uram — halottam a nevemet. És betámolyogtam a megnyilott ajtőn. A méltóságos, mindenható vezérigazgató ur magas szine elé.

— Foglaljon helyet, mérnök ur, de miért olyan sápadt, talán rosszul van? Kár. Igazán sajnálom, mérnök ur, de Ön olyan, mint az alvajáró. Ugylátom, nem felel meg a várakozásomnak. Pedig őszintén megvallom, nagy, nagyon nagy céljaim voltak Önnel. Az Ön munkájával, az Ön tehetségével kacsolatban. Ismerem egynéhány elgondolását. Egy-két kitünő tervét a szaklapokból.

— Nem felelek meg? — kérdem a hatalmas urat. — Én? Nem felelnék meg Önnek? . . . Önöknek?

De hiszen akkor ugy is mindegy! — gondolom.

— Na, hallja kérem . . . igazgató ur . . . Én? Én, a multimilliomos new yorki sörgyárosnak, Trommersnek a veje? Én? . . . Hogy éppen én nem felelnék meg önnek? . . .

És legyintettem egyet a kezemmel.

— Hogyan? Hogyan mondja a mérnök ur? A new yorki Tommersnek a veje? A nagy sörgyárosnak? Akivel összeköttetésben is vagyunk? Ó, pardon . . . bocsánat . . . mille pardon, uram . . . Ha ez igy van, akkor . . . nos . . . akkor természetesen egészen más véleményen vagyok. Ez teljesen más világitásba helyezi az ön általam mindig igen nagyra becsült személyét. És az ügy uj megfontolást kiván . . . Részemről . . . Majd mérlegeljük . . . Mérlegelem. És értesitéssel leszek. A viszontlátásra, kedves fiam, pardon, igen tisztelt mérnök uram.

* * *

Este. Kilenc óra. A háziasszonyom kopog.

A szomszéd telefónjához hivatták a mérnök urat.

Köszönöm. Azonnal jövök.

— Halló? Ki beszél?

— Halló? Mérnök ur? Van szerencsém. Alázatos tisztelettel. A titkár. Igen, a méltóságos vezérigazgató ur magántitkára. Igenis kérem alázatosan A méltóságos vezérigazgató ur legszemélyesebb megbizásából bátorkodom. Bocsánat, hogy ilyen későn. Ennyire szokatlan időben. De a dolog nekünk égetően sürgős. Nem tür haladékot. Igen. Holnapra várjuk az igen tisztelt mérnök ur szives látogatását. Igen, már reggel. Ha nem tulterhes, már egynegyed tizre. Hogyne. Pontosan rendben lesz minden. A szerződést éppen most bátorkodom a gépbe diktálni. Két igazgató urunk még ma éjjel ellenjegyzi. Holnap már csak a mérnök urnak kell aláirnia. Ó. Igen. Azt hiszem. Remélem, meg lesz elégedve, mérnök ur, a feltételeinkkel.

— All right — mondtam a kagylóba —, ott leszek.

— Alázatos tiszteletem, mérnök ur. A viszontlátásra. — Szólt még a hang.

Visszaakasztottam a hallgatót a villára. És lerohantam az utcára. Végig az Andrássy uton. Azután a Körúton. A Keleti előtt megálltam egy másodpercre.

— Megérkeztem — kiálltottam be a nagycsarnok ajtaján. Azután visszafutottam a Dunapartra. Átloholtam a Lánchidon. Felnyargaltam a budai hegyekbe.

Éjfélután egy telefonfülkére bukkantam. Feltárcsáztam egy számot.

— Ki az? És mit akar? . . . Igy éjnek idején?

— Semmit. jó uram. Semmit. Csak azt akarom mondani, hogy állásom van, állásom van, uram és . . .

— Szemtelen őrült . . . — volt a dühös válasz. Lecsapták a kagylót.

Azt sem tudom, hogyan kerültem vissza a hónaposszobámba.

* * *

Másnap reggel. Elémtolták a kész szerződést. Aláirtam.

— Csak annyit áruljon el — kértem a titkárt, amikor magunkra maradtunk — hogyan tudtak New Yorkból ilyen gyorsan választ kapni?

A titkár fontoskodva és sokatsejtően szája elé tette az egyik ujját.

— Amig engem lát, ne féljen semmit uram, kedves kis mérnököm. Csak a fizetésének a husz százalékát hozza be nekem. Minden elsején. De pontos legyen ám! Addig nem érheti semmi baj sem nálunk. — És jóakaratuan megveregette a vállamat.

— Alázatos tiszteletem, kedves mérnök uram — szólt a nyitott ajtóban és mélyen hajlongott előttem.

* * *

LÉGGÖMB

Négyévesforma kislány lép be egy nagy áruház forgóajtaján. Karbunkulusnál is ragyogóbb, fekete kiváncsi szeme röpködve lopakodik a rengeteg soh'se látott kincsen. Tarkabarka selymek, szövetek, ruhák, halványszines fehérnemüek, kalapok, köpenyegek, gusztusos ennivaló gulákban, mazsola, mandula, dióbél, krémes sütemények, ó, micsoda fölfoghatatlan együttese a kiapadhatatlan gyönyörüségnek!

Betetőzésül elérkeznek anyjával a játékterembe. Itt már szinte repülne a kislány. Szeretne odabujni minden egyes babához, fehérselymes bocihoz, sárga- és vörösszinü mackóhoz, a főzőedényhez és bababutorokhoz, hogy mindegyik fülébe sugja azt az édes és fájdalmas titkot, hogy mennyire szereti . . .

És vakmerő akarattal már rángatja is ki apró kezecskéjét anyja szoritó tenyeréből: Hopplá! Anyja tenyerének izmai azonban megfeszülnek, összébb szorul az anyai hurok a kis kéz fölött: Nem szabad! Maradj veszteg! S a tilalomfa keserüsége, közvetlen közelből megsimogatni ezeregyéjszakai tündérmesének valamennyi álmát-vágyát: nehéz, forró könnycseppeket facsar ki az elborult gyermekszemekből.

A viharfellegeket sebtében elkergeti a napsugár. Egy kedves, mosolygósszemü elárusitónő kezében száz és száz léggömb ficánkol. A szivárvány minden szinében. Vörös, zöld, kék, lila, sárga, fehér, valamennyi árnyalata! A kislány olyan rimánkodó szemmel néz anyjára, annyi boldog vágyakozást, megkivánó áhitozást sürit bele még könnyes szemének csillagaiba, hogy anyja nehéz sóhajjal kapirgállja elő kopott bugyellárisának rejtekéből a kevés filléreket, ötször is megszámolja egymásután, mig végül is nem tud ellenállni és kiszurkolja a tiz fillért.

A kislány mohó örömmel nyul a léggömbcsomó után. Első csalódása, amikor kiderül, hogy abból a léggömberdőből csak egyetlenegy darabocska az övé, mégpedig a kisebb fajtából való. Mert a nagyobboknak 20 fillér az ára. A legkeserübb választás: Melyiket szeresse? . . .

Amikor igy egycsomóban olyan gyönyörüszépek, de egyenkint olyan nehéz a választás: legyen a sárga, a zöld, a piros, a fehér vagy a halványlila? . . . Végül is a vörösre esik választása. Hiába, a vörös szin tüzeli föl legjobban a fantáziát.

Kilépnek a kapun. A kislány örömrepesve feszíti meg karját, hogy a büszke léggömbmadár minél dasosabban, minél magasabban szálljon fölfelé a kék azur kifürkészhetelen régióiba, amikor egyszerre csak . . . ó, irtózat! . . . egy kis lazulás a parányi ujjak között és a léggömb kiszabadul a szoritásból és tempós akaratossággal kezd fölfelé szállni, el a végtelenségbe . . .

A gyermek az első riadtságban nem tudja, mi történt, még nem eszmél a fölfoghatatlanra, tágranyilt kerek, nagy gyermekszemével csak bámul az ég felé . . . azután hirtelen, mint durva fejszecsapás, rázuhan a valóság: A léggömb elrepült, örökre elrepült . . .

A körülállók hiába akarják csitítgatni, vigasztalni: rug és kapálódzik és szörnyü nagy bánatát jelzi, amint könnyeitől szóhozjutva, végre kirobban belőle a mondhatatlan fájdalom:

— Jaj, az én első léggömböm . . .

Bors.

AMIT MINDEN MUNKÁS TANULJON JÓL MEG

AMERIKA POLITIKAI PÁRTJAINAK ÉS GAZDASÁGI SZERVEZETEINEK ÁLLÁSPANTJA ÉS TÁRSADALMI KÖVETELÉSEI.

IRTA:

A. K.

P DIÓHÉJBAN közöljük az Egyesült Államok polgári és "munkás" pártjainak valamint gazdasági szervezeteinek célját. Szolgáljon eme rövid ösmertetés utmutatóul azoknak, akik a mai társadalmi rendszer elleni küzdelemben önzetlenül munkálkodnak.

REPUBLIKÁNUS PÁRT: — A kapitalizmus kérdésében annak fentartását védelmezi. A **nagy ipari vállalatok** magántulajdonának hive minden állami beavatkozás nélkül. A **kisüzletemberek** vagyis a középosztály részére szabad verseny. **Szállitás, közlekedés,** villany, gáz kérdéseben, a magán tulajdon hive. Földmivelés kérdésében a magas árak fentartása. **Munkásügyekben** a társaságok által felállitott szervezkedési formának hive. **Demokrácia** ügyében semleges. **Pénz** és **pénzintézetek** ügyében, arany valuta, s magán tuladon hive. Az **adó** és **költségvetés** kérdésében a fogyasztási adó és meghatározott kiadás. A **társadalmi helyzet** és biztositás ügyében, az egyéni fentartás, megélhetés hive. A **külügyekben** a vámtarifa és gazdasági fenhatóság. **Taktikája** a konzervativ vagyis a maradi ellemekhez való folyamodása, ezen platform 1934-ben 13 millió szavazatot kapot.

DEMOKRATA PÁRT: — A **kapitalizmus** fentartását védelmezi. A **nagy tőke** magántulajdon hive állami ellenőrzés mellett. **A kis üzletesek** harmonikus együttmüködése a nagy kapitalizmussal. Szállitás, közlekedés, villany, gáz, magán tulajdon, az állam szabályozása mellett. Mezőgazdaság kérdésben, szabályozott termelés és könnyü kamat melletti kölcsön. **Munkáskérdésben** az American Federation of Labor támogatása. **Pénz és pénzintézetek.** A dollár meghatározása, a bankok állami ellenőrzése. Az **adó és költségvetés** ügyében. Évi öt billió dollár kölcsön, állami épitkezésre. **Társadalmi** ügyben. Társadalmi biztositás öregek és szegények számára. **Külügyekben** a nemzeti gazdászat növelése. **Taktikája** a liberális, reformista és középosztály felkarolása. Ezen platform 1934-ben 15 millió szavazatot kapott.

FATHER COUGHLIN HIVEI: — **Kapitalizmus** kérdésben a reformálásnak hive. **A nagy tőke** részleges köztulajdonba tevése. **A középosztály** védelmezése. **Szállitás-közlekedés,** villany gáz. Városi és állami kezelése. **Mezőgazdasági** ügyben az alacsony kamat melletti kölcsön és a termelés értékének biztositása. **Munkás ügyben.** A munkás védelmezése a hatalmas tőke kizsákmányolása ellen. **Demokrácia** és **polgári jogban.** Hive a vallás szabad gyakorlásának. **Pénz** és **pénzintézetek** ügyében. Uj pénzek határtalan forgalomba hozatala, állami ellenőrzés mellett. **Adó** és **költségvetés** 18 billió dollár nyomtatása az állami kötvények vissza vásárlására. A **Társadalmi biztositás** terén a kormány legfőbb törekvése a szegények támogatása. **Külügyekben.** Semmiféle közösség idegen államokkal. **Taktikája** a középosztály felkarolása. 1935-ben 8 és fél millió egyént vallanak követőul.

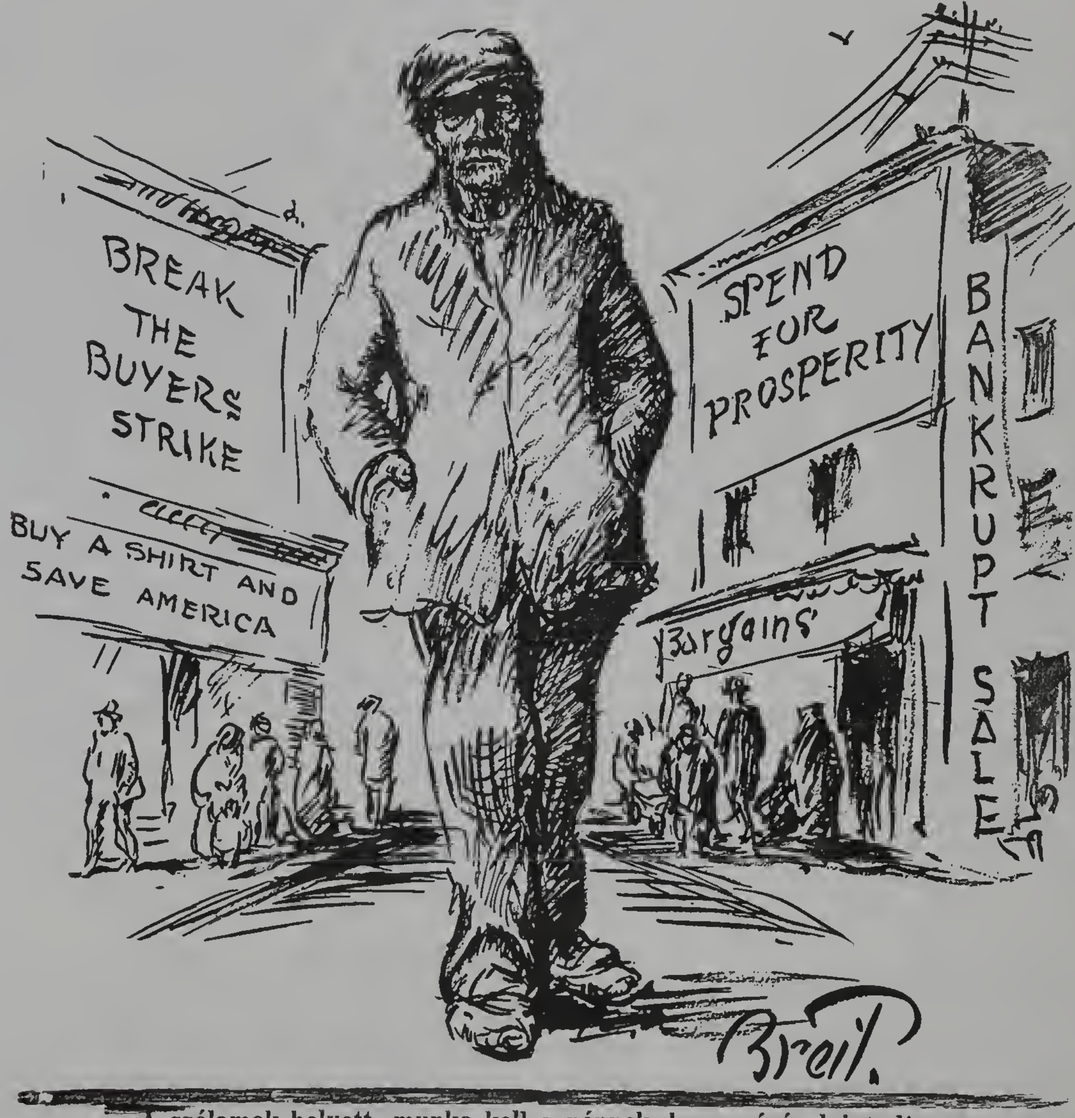
A SZOCIALISTA MUNKÁS PÁRT.

Az Egyesült Államok legöregebb pártja, amely a termelő eszközök társadalmasitását tüzte ki céljául, 1874-ben alakult s a Szociál Demokrata

Munkás Párt nevet vette fel. Három évvel később nevet cserélt, amelyet mind a mai napig fentart. 1892 óta minden elnökválasztásban részt vesz s szavazóiak száma 13 ezertől 36 ezerig terjedt. A Szocialista Munkás Párt az ipari szervezkedés hive és az ipari szervezetek kiépitése által kivánja a társadalmat irányitani. Azon esetben ha a Szocialista Munkás párt jelöltjei jutnának többségre megszüntetnék a parlamentet, feloszlana mint politkai párt és minden hatalmat a munkások ipari szervezeteire ruházna át. Az uj társadalom további intézését az általános ipari szervezeti tanács utján kivánja intézni.

A SZOCIALISTA PÁRT.

Alakult 1901-ben megalakulásakor Morris Hillquit a szocialista munkás párt nagy részét kiszakitotta és Debs mellé csatlakozva uj elméletek alapján kivánták az amerikai munkásosztályt szervezni a társadalmi forradalomra. A Szocialista Párt a második Internacionáléval tart fen kapcsolatot. A párt hatalmas fejlődésnek indult egészen a világháboru kitöréséig, taglétszáma meghaladta a 150 ezret. A párt háboru ellenes állásfoglalása sok belviszályt idézett elő. 1919-ben a balszárny elszakadt, akik a kommunista mozgalmat inditották meg. A folytonos belső sulródás a pártot teljesen a megsem-



A szólamok helyett, munka kell a népnek, hogy vásárolni tudjon.

misités utjára vitte ugyannyira, hogy 1924-ben képtelen volt elnök jelöltet állitani és La Follettét mondotta ki jelöltjéül, aki a Progresszív Party név alatt szaladt. A Szocialista Párt a gazdasági szervezetek közzül az AFofL vagyis a szakszervezkedés és a belülről való furás hive. Törekvésük elfoglalni a szakszervezetek hivatalait, a tagságot pedig a párt tagjává, szavazójává megnyerni. Hatalomra jutásához az alapvető iparokat kivánja államositani.

1934-ben tartott országos kongresszusukon kimondották, hogy azon esetben ha a kapitalista rendszer teljesen letörik a szocialisták foglalják el a hatalmat tekintet nélkül arra, hogy többségben vannak-e vagy sem. Háboru vagy fascista diktatura esetén az Általános Sztrájkot kiálltják ki. A párt taglétszáma 1934-ben 25 ezer körül volt.

A KOMMUNISTA PÁRT.

Az orosz Bolsheviki Párt 1917 októberi sikeres forradalma és a harmadik Internacionálé 1919 tavaszán való megalakulása a világ szocialista pártjainak balszárnyát szakadásra késztette, akik a kommunista pártokat alakitották meg. Amerikában két párt alakult. A Kommunista Párt és a Kommunista Munkás Párt akik mint titkos szervezetek müködtek, 1921-ben a Munkás Párt nevet vette fel és mint nyilt szervezet kezdte meg müködését, amely később aztán a mai Kommunista Pártá alakult és a harmadik Internacionálénak lett az amerikai szerve. A Kommunista Párt választások, reformokért való harcok, mint a munkanélküli biztositás, a kisbirtokosok támogatása, sztrájkok, lázadások, utján véli a hatalmat elérni. Az amerikai Kommunista Párt 1934 április 2—8 tartotta 8-ik kongresszusát amelynek kiáltványában ez áll:

"Az uj állam hatalma a munkások forradalmi demokráciája, amely egyszersmind a könyörtelen diktatura a kapitalista osztály és annak intézményei ellen. A kommunisták meggyőződése, hogy kizárólagosan a diktaturán keresztül épülhet csak fel a szocialista társadalom. A kommunisták hatalomra jutásukkor lefoglalják a nagy pénzintézeteket, a gyárakat, a vasutakat, a bányákat és a nagy földbirtokosok földeit. Minden magántulajdon jog érvénytelenné válik a termelés eszközére. Tartozások és kölcsönök eltörlendők, földet a földnélküli parasztoknak, a déli négereknek önálló jogot. A kommunista párt alapelvében különbözik a szocialista párttól, amely megengedi, hogy kebelében különböző vélemények érvényesülhessenek, a kommunista párt kizárja mindazokat kebeléből, akik nem vetik magukat alá a párt szabályainak.

A kommunista párt minden munkás mozgalmat, amely nem követi esztelen taktikáját s vezéreinek parancsát, a legmesszebbmenő denunciálásban részesiti és "szociál fascista" "ellenforradalmár," "árulć"-nak tartja. A kommunista párt forradalmiságának tetőfokán hive volt az ipari szervezkedés formájának. Ennek bizonyitékául megszervezték a TUUL-t. Ma az AFofL átformálásának hive. A kommunista párt taglétszáma 1929-ben 15 ezer körül volt, 1931-ben leesett 8 ezerre. 1934-ben magaslatának tetőfokára szökött fel 22 ezerre Wm. Z. Foster, mint elnökjelölt 1924-ben 33 ezer, 1928-ban 49 ezer, 1932-ben 103 ezer szavazatot kapott.

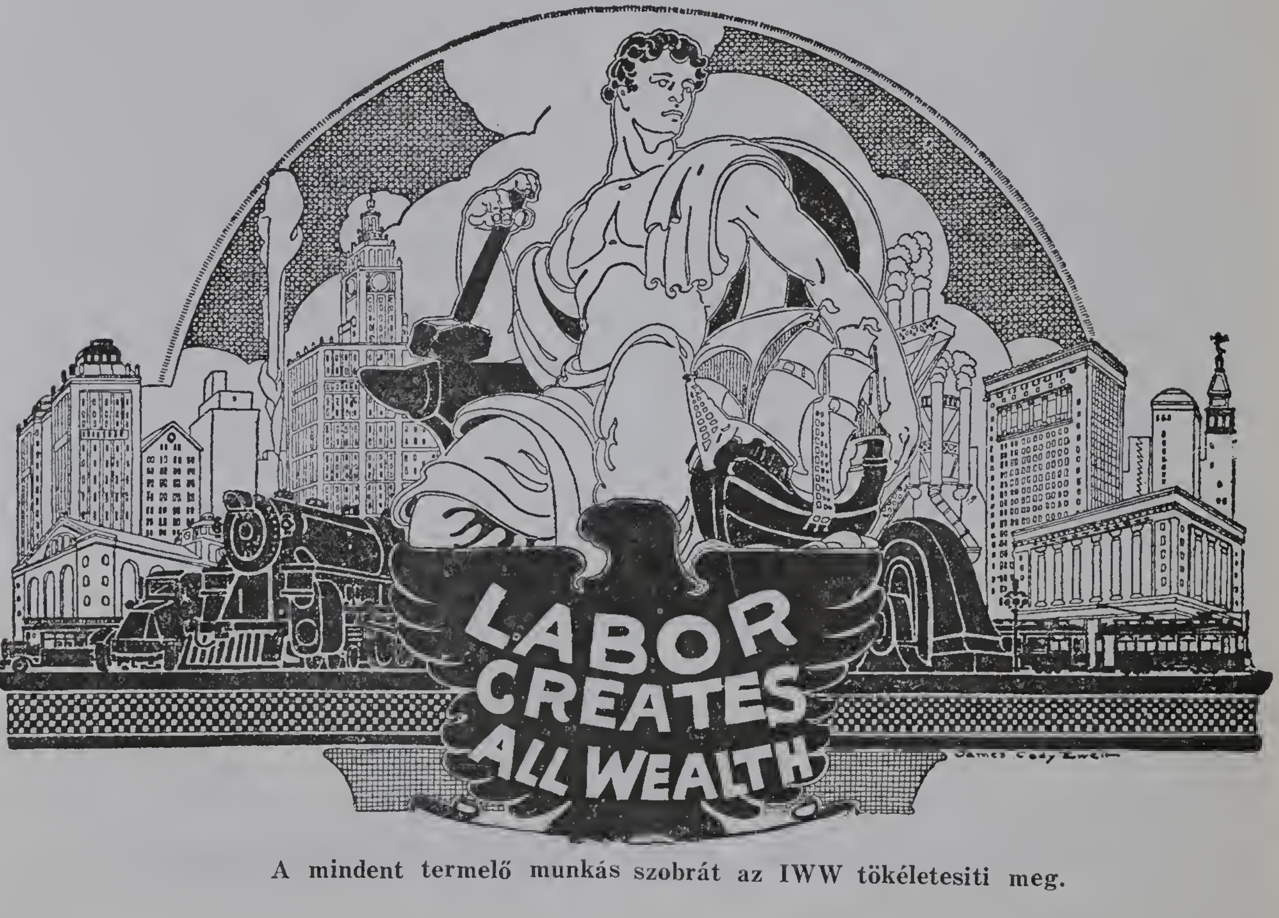
A Lovestone vezetése alatt álló kommunista párt, amely 1929-ben alakult, amikor az anyapártból kizárták őket — kizáratásuk oka a párt taktikájának folytonos kritizálása volt. — Lovestone kommunista pártja nem politikai párt, nem állit fel jelölteket választások alkalmával, a fősulyt a tagok forradalmi nevelésére forditja. A szocialista párt balszárnyától csak anynyiban különbözik, hogy amig a Lovestone-isták arra törekszenek, hogy a harmadik Intenrnacionálét reformálják a balszárnyu szocialisták ugyanazon törekszenek a második Internacionáléval elérni.

Trotzky — eszmélyét hirdető kommunista párt, amelyet szintén 1929-ben zártak ki az anyapártból, kizáratásuk oka a párt taktikájának kritizálása. Azt állitják, hogy az orosz kommunista párt javithatalanul bürokrata, a harmadik Internacionálé intézkedéseit figyelmn kivül hagyják s gy negyedik Internacionálé alakitását tüzték ki. Feltétlenül hivei a világ forradalomnak, erősen elitélik az orosz kommunista pártot, a harmadik Internacionálét, amiért nemzeti alapokra fektették a kommunizmust.

Workers Party 1933-ban alakult A. J. Muste vezetése alatt. Teljesen egyezik a Lovestone és Trotzky pártok elveivel, taktikai eltérés közöttük szintén lényegtelen. Az Egyesült Államok területén egy uj mukáspárt alakitását szorgalmazzák, elitélik a második és harmadik Internacionálét reakciós taktikájuk miatt. A gazdasági szervezetek terén a szakszervezetek hive. A háboru ellen tömeg akciót sztrájkot, szabotázst és szervezést ajánl, ha ez nem vezetne sikerre ugy a harcot, az imperialista háborut folytató kapitalista kormány ellen kell irányitani, hive a parlamentárizmusnak.

AZ AMERICAN FEDERATION OF LABOR.

Szakmák szerinti szervezkedés hive, szolgáljon például a szállitás és közlekedési munkások szervezkedési formája. A mozdonyvezetők, fütők, kalauzok, váltóőrök, toronyőrök, távíró és telegráfok, a vasuti pályatest épen tartó munkások, a személy és teherszállitó munkások külön-külön szervezése, a vasuti javitó mühelyek munkásainak szervezése, kovácsok, kazán kovácsok, lakatosok, szerelők, vasesztergályosok, szerszám lakatosok, ácsok, bőröndösök, festők, üvegezők, villany szerelők, ablak mosók, tisztogatók stb. stb. külön-külön szakmai szervezetekbe tartoznak. Ezen szakmai mun-



A mindent termelő munkás szobrát az IWW tökéletesiti meg.

kások valamennyi, külön időközökben lejáratu szerződéseket köt, melynek következménye képpen ha az egyik szakma munkásai sztrájkolnak, a másik szakma munkásai scabelnek. Teszik ezt a szakmai munkások szerződéseinek szent nevében.

A szakszervezetek tagságának minden joga a busásan fizetett tisztviselők kezében van. Nekik van joguk bérharcokat elrendelni vagy lefujni sokszor a tagság tudta és beleegyezése nélkül, mely intézkedéseket vakon kell követni, ellenesetbe azon szakma szervezet, amely a tisztviselők rendeleteinek ellenszegül szigoru büntetés alá kerül.

A tisztviselők számára a szakszervezeti forma egy jól jövedelmező üzlet. A nagy beiratási és tagsági dij, valamint a külön kivetések magas jövedelmet biztositanak a tisztviselők számára, akikek nagy része városi vagy állami hivatalokat is tölt be. Részt vesznek munkásbékéltető bizottságokban, vezéri szerepet töltenek be politikai pártokban és a legtöbbett igérőnek adják el a munkások harcait és szavazatait. Ha valamely szakmában a tagság a tisztviselőség határozatának ellenére cselekszik, megszervezik a munkások szószólóinak orvtámadását, vissza vonják a Chartert és ujjászervezik a szakmát. A beálló tagoknak uj kártyát adnak és elfoglaltatják velük a lázongó, sztrájkoló munkások helyeit. Ennek bizonyitására számtalan példa áll előttünk az AFofL történetében.

Az AFofL fentartja és tagjaiba neveli azon tévhitet, hogy "tisztességes napi fizetés — tisztességes napi munka fejében," hive a mai társadalmi rendszernek. Ellensége minden oly megmozdulásnak, amely a munkásosztály szabadságára törekszik, amely eltörli a nyomort és szenvedést.

Szervezkedési formája, szervezeteinek összetétele, a munkásosztály széjel tagozására van alkotva. Melegágya a fascizmusnak s ennél fogva világosan érthető, hogy a "New Deal" kormány minden hitét az AFofL szervezkedési formájába veti, ezért törvény paragrafusok védelme alá veszi a munkáltatókkal szemben. Az AFofL szervezkedési formája az, amely meggátolja a munkásosztály törekvését egy jobb egy szebb társadalmi rendszerért. Ennélfogva időpazarlás, mindama kisérlet, amely a szakszervezeti forma reformálására vagy forradalmasitására törekszik.

Az AFofL összetételénél fogva a mai fejlett gazdasági rendszerben, nem megfelelő a munkásosztály gazdasági harcainak eredményes irányitására. A szocialista és kommunista pártok tagsága évek hosszu során át a belülről való 'furás" eszközeivel kivánják forradalmasitani eme maradi, ósdi szervezkedési formát, minden eredmény nélkül.

AZ EGY NAGY SZERVEZET AZ IWW.

Ipari szervezkedési formájánál fogva egy és ugyanazon ipar munkásai egy ipari szervezetben és valamennyi Ipari szervezet munkásai Egy Nagy Szervezetben tömörülnek. tekintet nélkül milyen a szinük, vallásuk, nemzetiségük. Nem köt semmiféle szerződéseket a kizsákmányoló osztállyal, amely által lehetővé teszi az összesség együttes harcát, a kizsákmányoló osztály ellen. Meggyőződése, hogy "a munkásosztály és a munkáltató osztály között semmi közösség nincsen. Nem lehet béke mindaddig, amig éhség és nélkülözés található a dolgozó emberek milliói között s az élet javait ama kevesek birják, akikből a munkáltató osztály áll."

A szervezet hatalma a tagság kezében van. Sztrájkok vagy kizárások esetén minden intézkedést a tagság együttesen végez, amely teljesen kizárja a hütlen tisztviselők létezését vagy érvényesülését. A szervezet tagságának nevelése, az osztály öntudatra, egyik legfőbb feladata. Kimondja, hogy "E két osztály — munkásosztály és a munkáltató osztály — között küzdelemnek kell folynia mindaddig, mig a világ munkásai mint osztály szervezkednek, birtokukba veszik a földet, a termelő eszközöket és megszüntetik a bérrendszert."

Az Egy Nagy Szervezet tagsága tudatában van annak, hogy a szervezet tisztviselői csak végrehajtó közegei a tagság akaratának. Ezen tisztviselők csak meghatározott ideig lehetnek alkalmazásban és fizetéseik az iparokban foglalkoztatott munkásokénál nem lehet magasabb.

Az Ipari szervezkedési forma egy hatalmas fegyver a munkásosztály számára, magasabb bér, rövidebb munkaidő, jobb munkaviszonyok kivivására. Az Egy Nagy Szervezet, amelyben az összes ipari szervezetek departmentenként egyesülnek, társadalmi kérdések érdekében folyó harcok kivivására, az elvinyilatkozat megállapitja: "Ugy találjuk, hogy az iparok igazgatásának mind kevesebb és kevesebb kezekbeni öszpontosulása a szakszervezeteket képtelenné teszik arra, hogy a munkáltató osztály egyre növekvő hatalmával felvegyék a küzdelmet. A szakszervezetek olyan állapotokat ápolnak, amely lehetővé teszi, hogy a munkások egyik csoportját az ugyan azon iparban dolgozó másik csoport ellen uszitsák és ezáltal elősegitik, hogy bérharc esetén egymást verik le. A szakszervezetek segitenek a munkáltató osztálynak a munkásokba beoltani ama tévhitet, hogy a munkáltatókkal közös érdekeik vannak."

Az Egy Nagy Szervezet ipari csoportjai törekszenek arra, hogy a szervezet minden egyes tagja képezze magát a társadalmi kérdések minden ágában, hogy bérharcok, társadalmi kérdések itélésében tisztán, az osztályharcot felölelő formában cselekedjen. Tudatában kell, hogy legyen a mai társadalmi rendszer kegyetlen formájának, amelyek megváltoztatására megállapitja, hogy: "E szomoru állapotokat, megváltoztatni és a munkásosztály érdekeit megóvni csakis olykép felépitett szervezettel lehet, melynek minden az egy iparban — vagy ha kell valamennyi iparban — dolgozó tagjai beszüntessék a munkát bármikor ha sztrájk vagy kizárás van annak valamelyik osztályában, igy az egyen esett sérelmet az összesség sérelmének tekinti. E maradi jelszó helyett: "Tiszteséges napi bért, tiszteséges napi munkáért," ezt a forradalmi jelszót irjuk zászlónkra: "Le a Bérrendszerrel."

Az Egy Nagy Szervezet összetétele, harci eszközei és taktikája a munkásosztály szolidaritását váltja ki közvetlen cselekvése által. A világ bérrabszolgáinak együttes cselekvése megszünteti a kapitalizmust vele együtt a fascizmust, nacizmust, háborut, nyomort, szenvedést.

Ennélfogva az Egy Nagy Szervezet tagsága nem fecsérli idejét szekták elleni harcra, hanem kizárólagosan annak előidézőjét, szülőanyját a kapitalizmust támadja.

"A munkásosztály történelmi hivatása, hogy megszüntesse a bérrendszert, a termelő hadsereget nemcsak a tőkésekkel való mindennapi harcra kell szervezni, hanem arra is, hogy folytassa a termelést akkor, amikor a bérrendszer már elpusztult. Az ipari szervezkedéssel az uj társadalom szerkezetét épitjük a régi társadalom keretein belül."

Ezzel a meghatározással és céllal szervezi az IWW a bérért dolgozókat egy jobb rendszer felépitésére.

VIDÉKI FOTOGRAFIÁK

I. A TEKINTETES UR SZINEVÁLTOZÁSA.

PA PARLAMENTI többség legénységi állományának a toborzásakor önként jelentkezett mandátumvállalásra, hivatkozván politikai érdemeire: még nem deresedik a feje, egyévi különitményi szolgálata is van, jogi tanulmányai közben a kilengőkhöz tartozott, nevéhez a politika terén szüzi ismeretlenség füződik, a reformeszmékért él-hal, de ha nem kap mandátumot, éhenhal, mert már évek óta állástalan diplomás.

Több volt az eszkimó, mint a fóka: Béla öcsémnek még csak jelöltség sem jutott. Ha már Pestre fuvaroztatta magát, ha már megvan a költség, a fáradság: szerencsét próbál a legitimistáknál, ahol elpanaszolta, hogy ő Habsburghiányban szenved, adjanak neki mandátumot, hogy Ottót trónra ültethesse.

— Sajnos, magunk is mandátumhiányban szenvedünk. Tessék tán legközelebb . . .

Mikor a kisgazdák kirugtak a hámból, a helybeli Piac téren, mérgében tapsolt Eckhardtéknak és az általános, titkost éltette.

— Bélus, belőled még szocialista lesz — mondták a barátai.

Bélus elkeseredetten sóhajtott egyet:

— Hát tudjátok, ha nem nézném a familiámat . . .

Az ám, a familiát nézni kellett, mert az uri familia volt, ha mingyárt hitelben is, de olyan uri, amelyről a parasztikus jellemzés igy mondja:

— Kicsit esznek, de szépen járnak.

Hozzá még Bélát is ez az uri familia tartotta.

Nem lehetett hát szégyent hozni erre a derék családra azzal, hogy Béla elkeseredésében nagyot üt az asztalra, egyett káromkodik és fölcsap szocialistának. Világért sem.

És mit szólna ilyesmihez az apósa, már mint a leendő apósa, Kátai Szücs uram akinek egyetlen lányát pár száz holddal meg 6 ökörrel már régebben eljegyezte. Bélus és az após meg Zsuzsika csak azt várják, hogy a tekintetes urnak csak akkora állást adjon a vármegye vagy a város, amiből magát el tudja tartani, ha az asszonyt nem is.

Az állás késett, az apósék türelmetlenkedni kezdtek:

— Hát mi lesz már? A lány nem választópublikum: nem lehet azt folyton igéretekkel tartani.

Szent igaz, hát csináljanak valamit, no! Politizálásból nem mindenki élhet meg.

A vármegyénél éppen most kergették nyugdijba az öreg Szalay bácsit, hogy friss erőt ültessenek helyébe. Próba, szerencse! Meg kell pályázni ezt az állást is. Nem sokat ér, de mégis valami. Kátai Szücsék már nem várnak. Zsuzsika is nagyon türelmetlen. A főispán ur kezében van az uj pár sorsa.

Jövendő boldogságuk érdekében kopogtatott valaki az alispán urnál:

— Ha volnál szives, méltóságos uram, Bélus érdekében szólni a főispán urnak.

— Szivesen, de tudod, hogy ez a Bélus szélsőséges ellenzék: a kisgazdáknál exponálta magát. Legalább lépjen ki a pártjukból. Az uj főispánt én nem ugrathatom olyasmibe, amiért fönt orrot kaphat.

— Igazad van, méltóságos uram. Még ma intézkedünk.

A másnapi kormánypárti sajtó publikálta a Béla nyilatkozatát, hogy a kisgazdapártból kilépett.

Harmadnap a kisgazdapárt elnöke nyilatkozott az ellenzéki sajtóban:

— Tőlünk lépett volna ki a tekintetes ur? Lehetetlen, hiszen a mi portánkra be se tette a lábát, csak az ablak alatt éljenezett, tapsolt.

Az alispán urnak mutatták ezt is, azt is.

— Lásd, méltóságos uram, tagja sem volt a kisgazdáknak.

— Elhiszem, de tag-e nálunk, a Nep-nél? Erről mutasson pecsétes irást.

Bélus rohant az élharcos Neptitkárhoz.

— Kérlek, tag vagyok én nálatok? Igazán nem is tudom . . .

— Én tudom: nem vagy.

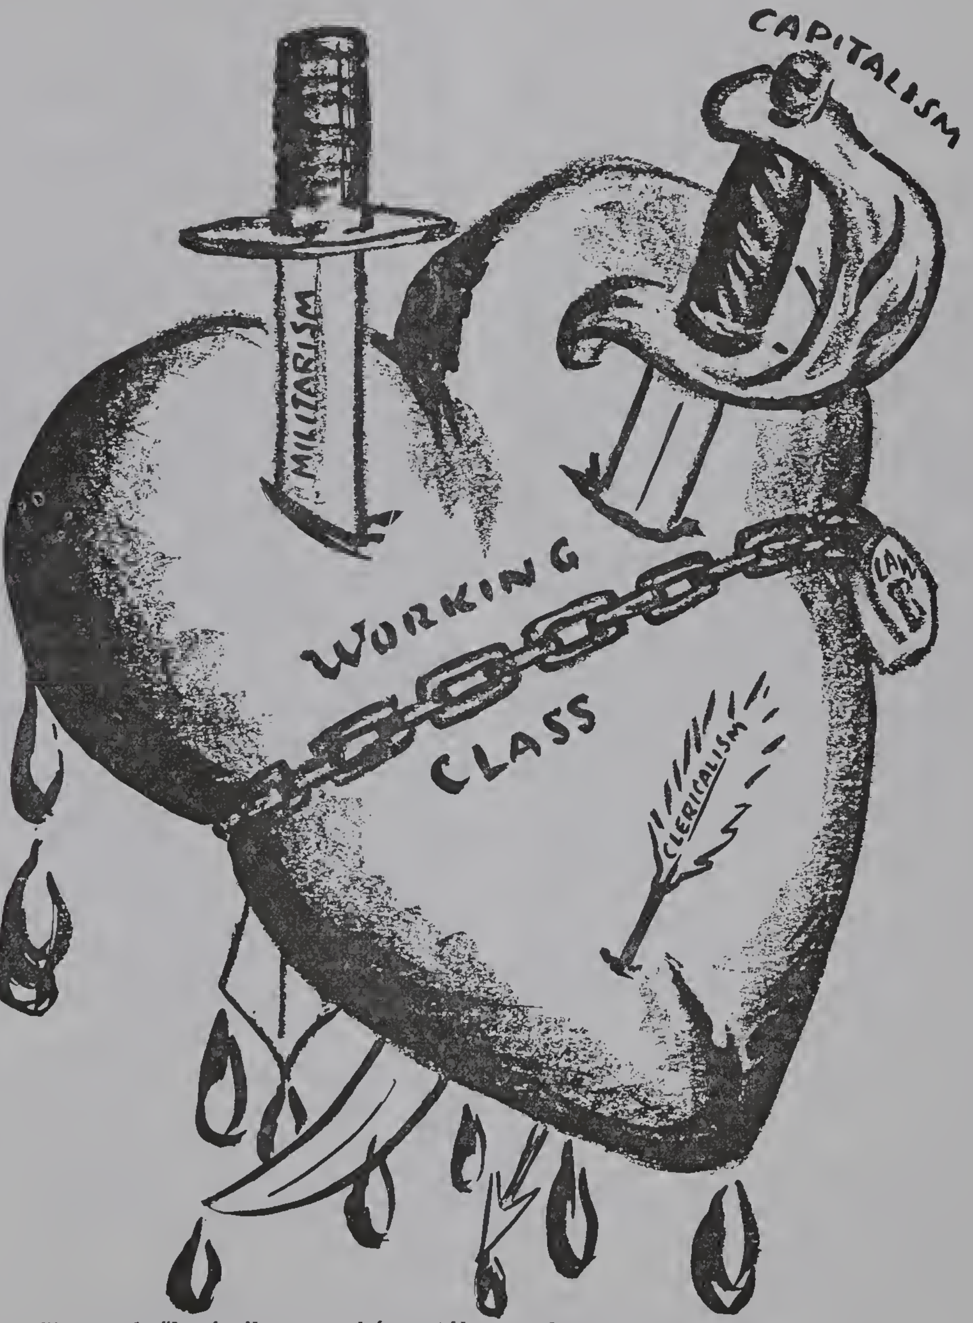
— Akkor légy szives, könyvelj be.

— Sajnálom, de központi utasitásra félévig nem vehetünk föl uj tagokat.

A kinevezés a kutba esett a házassággal és a hat ökörrel együtt. Béla mérgében nyilvános helyeken igy nyilatkozik:

— Tudjátok, miért szünetel félévig a Nepnél az uj tag felvétele? Azért, mert észrevették, hogy pártjukban sok az éretlen ember, aki azt sem tudja, hogy miért lépett ebbe a pártba?

Mától kezdve feltünően olvassa nyilvános helyen a nyilaskeresztes sajtót . . .



Ezer sebtől vérzik a munkásosztály, amely mindenkiért harcba száll, csak önmagáért és osztálytársaiért nem teszen semmit.

EGYSZERÜ RUHA VÁSÁR

IRTA:

HAMVES SÁNDOR

PMIUTÁN a pénzt hosszas takarékoskodás után összehozták, ugy határoztak, reggel megveszik a ruhát, hogy mind a ketten pontosan nyolcra beérjenek a hivatalba.

S most itt a reggel . . . Belépnek egy üzletbe. Elől az asszony, utána a férfi. Aktatáskáikat görcsösen szorongatják a hónuk alatt. A kereskedő és a két segéd köszönnek. Az asszony rendelkezik, vékony hangja betölti a boltot:

— Azt a sötétszürke ruhát kérem, ami a kirakatban van! — Halkan hozzáteszi: — Az uramnak! — Oldalról végigpillant rajta: milyen kopott! Csak most látja igazán, itt, a sok uj holmi között. Valami a torkát szorongatja . . . krákog . . .

Szembenáll a nagy tükörrel s látja önmagát . . . ő is kopott, neki is kellene ruha . . .

— Tessék parancsolni! — hallja s már ott a sötétszürke ruha.

Megkezdődik a próbálgatás. Ennek az öltönynek a kabátja nem jó, a másiknak a mellénye szük, a harmadiknál a nadrág valahogy nem jól fekszik . . . Végtére is a férfi tisztviselő valamit adnia kell magára . . . Hanem a negyedik öltöny kifogástalan. Jó. Nem éppen mintha "rászabták" volna, de jó. A szine is szép, szolid, nem feltünő.

A kereskedő ekkor int az egyik segédnek s az kiakaszt a rekeszből egy félig kész ruhát.

— Vagy talán ezt, nagyságos asszonyom? A szine ugyanaz, de a szövet minősége jobb. És pontosan testhez fog állni — beszél a kereskedő.

Az asszony tiltakozik, a férfi azonban megrántja a vállát:

— Na, lássuk! — És fölpróbálja a félig kész ruhát . . . Mindketten meglepődnek: igazán, ez olyan, mintha a férfira öntöttek volna. Már semmit sem kell igazitani rajta. És milyen jó a szövet?! Gyürögetik ezt is, azt is: ez kiugrik, az gyürött marad. Egész lázba jönnek, el vannak ragadtatva, a férfi felpróbálja a nadrágot is s az irodára gondol: ha ebben a ruhában mehetne be?!

A kereskedő és a segédek beszélnek: — Legalább öt évre való ruha! S az árkülönbség csekély, majdnem semmi — tiz pengő!

A férfi az asszonya tekint s az asszony visszanéz: — Nem!

— De szivem, inkább valahonnan bespóroljuk . . . értsd meg, hiszen spórolunk vele! Hol lesz már az a másik, amikor ez még mindig ruha lesz? — sugja titokban a férfi.

Az asszony szeme csillog, ő is szeretné ezt a ruhát az urának, de mit tegyen, csak annyi pénze van, amennyi a másik öltönyre kell. Titokban sugja vissza az urának: — 36 pengő van nálam!

A férfi leveti a félig kész öltönyt, belebujik a másik uj ruhába s mintha dacoskodna, mondja: — Ez mingyárt rajtam marad!

Az asszony bólint, az egyik segéd becsomagolja a régi öltönyt, a kereskedő a kasszához lép, kihuzza a fiókot. Az asszony fizet, a márványra teszi a 36 pengőt és elfordul.

— A kereskedő azonban utánaszól: — Bocsánat, ez kevés! Még négy pengőt kérek . . . A ruha negyven pengő! — Hozzáfüzi: — Nálam szabott árak vannak.

Az asszony elpirul: — Hogy-hogy negyven? Hétfőn még harminchat volt!

A férfi is emlékszik. Hogyne emlékezne! De a kereskedő sem tagadja:

— Feljebb mentek az árak a textilben is. — S mintha védekezne: — Nem én drágitottam, bizományárum van . . . és mindennek feljebb megy az ára . . . beszél. A harminchat pengő szerényen hever a márványon . . .

A férfi arca tüzben ég . . . az asszony kicsomagolja a régi ruhát . . . a segédek arrább huzódnak s az egyik azt lesi, hogy mikor kapja kézbe az uj öltönyt. A kereskedő már sejti, hogy a vevőknek nincs több pénzük . . . á, itt már nem lesz üzlet!..-. de azért még kisérletezik:

— Ugyan, nagyságos asszonyom, hát négy pengő miatt itt hagyják?

— Itt — mondja kurtán az asszony és várja, hogy a kereskedő szóljon: — De tessék elvinni, legközelebb behozzák a négy pengőt!

A férfi is várja, a kereskedő azonban nem mondja ezt, mélyen hallgat: hisz oly megbizhatatlan külsejük van!

És vége a vásárnak . . . bár vehetnének olcsóbb ruhát is, de az nem kell . . . és mindketten, a férfi is és az asszony is elhagyják az üzletet. Köszönés nélkül távoznak, az üzletben sem köszönnek el tőlük . . . lassan lépkednek a járdán, pedig már nyolcfelé jár az idő. A sarkon elbucsuznak egymástól . . . az asszony szemében könny csillog. A férfi ekkor fölkapja a fejét:

— Ne sirj! Azért a vacak ruháért nem érdemes sirni! Majd veszünk jobbat! Neked is, a gyereknek is . . . hidd el, egyszer majd alaposan beruházkodunk!

◆

FÖLSZÁLLOTT A PÁVA

Irta: ADY ENDRE.

"Fölszállott a páva a vármegye-házára,
Sok szegény legénynek szabadulására."

Kényes, büszke pávák, Nap-szédítő tollak,
Hirrel hirdessétek: másképpen lesz holnap.

Másképpen lesz holnap, másképen lesz végre,
Uj harcok, uj szemek kacagnak az égre.

Uj szelek nyőgetik az ős magyar fákat,
Várjuk már, várjuk az uj magyar csodákat.

Vagy bolondok vagyunk s elveszünk egy szálig,
Vagy ez a mi hitünk valósággá válik.

Uj lángok, uj hitek, uj kohók, uj szentek.
Vagy vagytok vagy ismét semmi ködbe mentek.

Vagy láng csap az ódon, vad megyeházára,
Vagy itt ül a lelkünk tovább leigázva.

Vagy lesz uj értelmük a magyar igékeknek,
Vagy marad régiben a bus, magyar élet.

"Fölszállott a páva a vármegye-házára,
Sok szegény legénynek szabadulására."

A SZÁMOK TANITANAK

EGY KIS SZEMLÉLŐDÉS A NÉPESSÉG, ÉLETKOR ÉS EGÉSZSÉGI VISZONYOKRÓL AZ EGYESÜLT ÁLLAMOKBAN ÉS MÁS ORSZÁGOKBAN.

PAZT HISSZÜK nem lesz unalmas a Bérmunkás Naptár olvasóinak egy keveset a népességi viszonyokról is egyet-mást tudni. Ezen a téren sajnos, munkáskörökben nincs nagy érdeklődés. Nem tartjuk helyénvalónak ezt, mert foglalkozván a munkásmozgalommal, tájékoznunk kell magunkat a népességi viszonyokról is, mert ezek egymással szoros összeköttetésben vannak. A térszüke nem engedi meg, hogy ezzel az igen fontos dologgal oly részletesen foglalkozzunk, mint ezt a nagyobb statisztikai munkák teszik. Csak nagyobb körvonalban óhajtjuk olvasó munkástársainkat tájékozni.

Az Egyesült Államok népessége 1934 julius elsején 126.425.000 ember volt. 1920-ban a lakosság 105.710.620 volt, tehát 15 év alatt közel 21 milióval szaporodott.. A lakosság szaporodása államokra fölosztva legerősebb volt Californiában ahol 67 százalék volt a szaporodás. Utána következik Florida 51 százalékkal, Michigan 32 százalék, Texas 24 százalék, New York 21 százalék és végül Illinois 17 százalékkal. Minden állam lakossága szaporodott bár nem olyan nagy mértékben mint az előbb emlitetteké. Csupán egy állam lakossága fogyott és ez Montana állam, amelynek népessége 2 százalékkal csökkent. Az Egyesült Államokban 93 olyan város van amelyek lakossága meghaladja a 100.000-et. Ezek között 5 város meghaladja az egy milliót is. Ezek a városok New York, Chicago, Philadelphia, Detroit és Los Angeles. 900.000-től 500.000 ezer lakossal biró városok Ceveland, St. Louis, Baltimore, Boston, Pittsburgh, San Francisco, Milwaukee és Buffalo, összesen nyolc város. Továbbá még nyolcvan város 500 ezer lakostól 100 ezerig. Az államok között a 100 ezer lakost számláló város legtöbb van Massachusetts államban még pedig kilenc. Utána következik Ohio állam 8 várossal, New York állam 7 várossal, New Jersey 6 várossal, Pennsylvania, California, Texas és Indiana 5 város, Tennessee 4 város, Michigan, Connecticut, Minnesota, Washington és Florida három várossal. Illinois, Missouri, Oklahoma, Virginia 2 várossal. Alabama, Colorado, Delaware, Georgia, Iowa, Kansas, Kentucky, Louisiana, Maryland, Nebraska, Oregon, Utah, Rhode Island és Wisconsin 1 várossal. Arizona, Arkansas, Idaho, Maine, Mississippi, Montana, Nevada, New Hampshire, New Mexico, North Carolina, South Carolina, North Dakota, South Dakota, Montana, Vermont, West Wirginia és Wyoming államokban nincs olyan város amelynek lakossága eléri a 100.000-et.

Az öt világrészben 31 olyan város van, amelynek népessége meghaladja az egy milliót. Ezek közül öt van az Egyesült Államokban, 3 van Angliában, 2 van a Soviet Unioban, 2 Németországban, 2 Indiában, 5 Kinában, 2 Japánban, 1 Franciaországban, 1 Magyarországon, 1 Olaszországban, 1 Spanyolországban, 1 Ausztriában, 1 Ausztráliában, 1 Lengyelországban, 1 Braziliában, 1 Argentinában, 1 Egyiptomban.

Az erős ipari és kereskedelmi fejlődés következtében a lakosság zöme a városokba költözött, vagy sokszor pusztaságokból vagy kicsiny falvakból, nagy ipari és kereskedelmi központok alakultak ki. Az Egyesült Államok 48 legnagyobb városa, melyek közül New York hét millió lakossal a legnagyobb és Scranton, Pa. 143 ezer lakossal a legkissebb. Ezek az utolsó hatvan évben óriási módon szaporodtak. Hosszadalmas lenne mind a negyvennyolc város népességi statisztikáját itt közölni. Csak a tiz leggyorsabb fejlődésü várost emlitem itt meg. Ezek között Seattle, Washington államban a leggyorsabban fejlődött, mert 1870-ben 1107 lakossa 365.583-ra szaporodott vagyis 330-szor lett népesebb mint ezelett 60 évvel volt. Utána következik Los Angeles amelynek 216-szor annyi lakossa van most, mint 60 évvel ezelőtt. Birmingham, Ala. 84-szer, Denver, Colo. 64-szer, Portland, Ore. 36-szor, Minneapolis, Minn. 35-ször, Houston, Texas 31-szer, Dallas, Tex. 25-ször, Detroit, Mich. 20-szor és San Antonio, Tex. 19-szeresen növekedtek népességi tekintetben. A föld népességét kettő ezer millióra becsülik. A földrészek között a legnépesebb Ázsia 950 millió emberrel, utána következik Európa 550 millióval, Észak és Délamerika 230 millióval, Afrika 150 millióval és végül Ausztrália 7 millióval. A föld népessége évente 30 millióval szaporodik ugy 66 év alatt éppen megkétszereződik.

Az állam neve:	A lakosság száma.	Hanyadik helyen áll területileg?	Hanyadik helyen áll népesség dolgában.

A nagy kéz törvénye

Irta: ADY ENDRE.

Látjátok, feleim, ti busak,
Vigadók, harcosak, levertek?
Egy tréfás kéz felirta az égre:
"Ember pajtások, erre gyertek."

Bolond nagy kéz, iromba betük:
Tiz öltő szeme belefáradt.
S mire az irást jól kibetüzik,
Már el is futott néhány század.

S mi táncolunk a nagy Kéz alatt,
S mennyi jóság hal meg kevélyen,
Véres fejjel és mennyi ős-szépség.
Mert betüket látunk az égen.

S a Kéz, a nagy, tréfás kéz, figyel.
Van még itt lenn hivő Pietró?
Mert betüket látunk az égen,
Ő letörli s uj betüket ró.

Születési és halálozási arányok az Egyesült Államok 28 legnagyobb városában. Az alábbi táblázatból látható, hogy a születési arány legmagasabb Washingtonban, Bostonban, Pittsburghban, Newarkon és Houstonban. A halálozási arány pedig szintén Washingtonban, Bostonban és Cincinnatiban. Az egy éven aluli gyermekhalandóság a legnagyobb arányu Columbusban, Buffaloban, Louisvilleben és Jersey City-ben. A halva született gyermekek arány száma legnagyobb Baltimoreban, St. Louisban, New Yorkban és Washingtonban. Az egy éven aluli gyermekhalálozások arányszáma a fölsorolt városokban tizezrenként 527, a halvaszületett gyermekek arányszáma pedig szintén tizezerenként 403.

A város neve:	Születési arány 1000 lakos után számitva.	Halálozási arány 1000 lakos után számitva.	Gyermek halandóság 1000 születés után.	Halva született gyermekek 1000 születés után.

Főbb halálozási okok, azok növekedései vagy csökkenései 1912. évtől 1932-ig. Alapul 100.000 (egyszázezer) lakos veendő. A számitások az Egyesült Államokra vonatkoznak.

Év:	Tüdővész.	Influenza.	Rákbetegség.	Cukorbaj.	Agylágyulás.	Szivbaj.	Más tüdőbajok.
1912	1250	103	771	150	775	1599	163
1932	564	308	1210	219	794	2091	45

Év:	Malária.	Tifusz.	Vörheny.	Szamár hurut.	Csecsemőkori hasmenés.	Tüdőhurut.	Vesebaj.
1912	30	210	89	113	704	193	1032
1932	21	37	21	45	120	36	872

Év:	Autóbaleset.	Vakbélgyulladás	Diphtéria.	Balesetek.	Öngyilkosság.	Gyilkosság.	Máj bajok.
1912	29	116	182	795	160	66	135
1932	219	142	45	496	174	92	72

Az előbb fölsorolt 28 amerikai legnagyobb városban a halálozások a következő okokból voltak.

A számitásoknál százezer lakost kell alapul venni. Kivéve a csecsmőkori betegségeknél ahol egyezer veendő alapul. A számok átlagosak.

Influenza.	Tüdővész.	Rákbetegség.	Cukorbaj.	Szélhüdés.	Vérbetegség és más szervi baj.	Vesebaj.	Végelgyengülés.	Tüdőgyuladás.	Légcsőszervi betegségek.	Csecsemőkori betegségek.	Öngyilkosság.	Gyilkosság.	Autószerencsétlenség.	Más balesetek.
104	561	1268	265	524	2932	783	4239	879	124	308	198	97	215	421

Életkor dolgában az Egyesült Államok államai közül Wisconsin vezet. Ott tudniillik minden 54-ik ember eléri a 75 éves életkort. Utána következik California, ahol minden 59-ik ember éri meg azt az időt. Legutolsó helyen áll Louisiana, ahol csak minden 92-ik éri el a 75 évet.

A különböző országok népessége közül ausztráliai népek érik el legmagasabb életkort. Ennek a megmagyarázására álljon itt a következő táblázat. Vegyük ugy, hogy minden országban száz ezer ember születik. A táblázatból látjuk aztán, hogy minden százezer egy év életkort elért ember közül hányan élnek egy éves, 20 éves, 40 éves, 50 éves és 60 éves korukban.

Ország:	Egy éves férfi.	Egy éves nő.	20 éves férfi	20 éves nő.	40 éves férfi.	40 éves nő.	50 éves férfi.	50 éves nő.	60 éves férfi.	60 éves nő.
Ausztrália ..	90490	92047	84493	86459	75887	78001	68221	71945	56782	63247
Dánia	87933	90229	82207	84180	74773	76341	68284	70990	57639	62958
Németorsz.	79766	82952	70645	73564	62598	65283	55340	59812	43807	50780
India	71002	71540	43833	44828	27136	28139	18658	19714	11229	12165

Látható tehát, hogy az átlagos legmagasabb életkort az ausztráliai és a dániai ember, a legalacsonyabbat az indiai ember éri el, mert 100.000 közül csak 12 ezer marad életben a 60 éves korban.

És most még egy kis tájékozás ami a magyar nyelvü munkásságot érdekelni fogja. Arról van szó, hogy melyik amerikai nagy városban van a legtöbb magyar. Ha itt a felelet South Bend, Ind. lesz, ugy kérem ne nevessenek, mert tényleg, akarom mondani aránylag a legtöbb magyar van South Bendben a lakossághoz mérten. Ezen állításom igazolására álljon itt a következő táblázat:

Város neve:	Lakosainak száma.	A magyarok száma.	Milyen hányadát képezik a magyarok?
New York	6.930.446	59.883	115
Chicago	3.376.438	15.337	220
Philadelphia	1.950.961	7.102	274
Detroit	1.568.662	11.162	140
Los Angeles..........	1.238.048	3.055	405
Cleveland	900.429	19.073	47
Milwaukee	578.249	3.789	152
Bridgeport	146.716	3.983	36
South Bend	104.193	3.049	34

Amerika farmlakossága 1934 végén 32.779.000 egyént ölelt fel. Az ország történetében nem fordult elő, hogy a farmlakosság ilyen hatalmas létszámmal dicsekedjen. Nem kevesebb mint 270.000 egyénnel jeleztek többet, mint egy év előtt. Ez a szaporulat nem anynyira a farmokra való telepités mozgalmának sikerét jelzi, mint inkább azt, hogy a születési létszám sokkalta magasabb volt a halotti létszámnál.

Egyébként az év folyamán sokkal többen hagyták el a farmokat, mint ahányan elfoglalták. Számitások szerint, tavaly 783.000 egyén költözött ki a farmokra a városokból és falvakból. ugyanakkor viszont 994.000 egyén költözött be a farmról a faluba és a városba.

Ezek szerint tehát 211.000 lélekkel fogyott a farmerek száma, viszont 481.000 volt a születési szaporulat s igy a mérleg ismét helyrebillen.

A Bureau of Agrecultural Economics még hozzáfüzi, hogy amig 1934-ben a farm lakosság létszáma az előbbeni évhez viszonyitva sulyosabb változást nem szenvedett, feltünőbb külömbségek észlelhetők, akkor, ha a nagyobb és fontosabb földarjzi csoportok adatait hasonlitjuk össze.

NÉHÁNY ADAT AZ AUTOMOBIL IPARRÓL

Az automobilok tömegtermelése az Egyesült Államokban az 1900 évben kezdődött. Az első négy évben főleg személyszállitási célra termeltek. Az ipari célra termelt automobilokról az első négy évben nincs kimutatás. Alább látjuk az automobil termelés fejlődését 5 éves időközökben. Ugyszintén kimutatjuk a termelt áruk átlagos vételárát.

Év:	A termelt kocsik száma személyszállítási célokra.	A termelt kocsik összértéke.	Az egyes kocsi átlagos ára.	Az ipari célra termelt kocsik száma.	Az ipari célra termelt kocsik száma értéke.	Az egyes kocsi átlagos ára.
1904	22.419	23.682.492	1063	411	946.947	2304
1909	127.731	159.918.506	1252	1500	2.550.000	1633
1914	543.679	413.859.379	761	23.375	45.098.464	1777

Összesen:	5.010.988	5.621.715	3.042.096	2.682.886

Ha már tudjuk, hogy hány erővel hajtott jármü készült az Egyesült Államokban, ugy érdekes azt is tudni, hogy az ország egyes államaiban és vidékein milyen arányban vannak a lakosság számához mérten használatban. Az alábbi kimutatásból kitünik, hogy az iparilag előrehaladottabb vagy mezőgazdasági tekintetben fejlettebb államokban az automobil használók száma aránylag nagyobb mint a különösen mezőgazdaságilag elmaradt államokban észlelhető. Tekintetbe kell venni továbbá az egyes vidékek földrajzi és a helységeknek egymás közötti távolsági viszonyait is.

Az automobiltulajdonosok és használók arányszáma a legmagasabb California és Nevada államokban és District of Columbiában az az Washington városában. Ezeken a helyeken átlag minden harmadik személynek van automobilja. A második helyen állnak: Colorado, Idaho, Indiana, Iowa, Kansas, Maine, Minnesota, Nebraska, New Hampshire, New Mexico, North Dakota, Ohio, Oregon, Washington, Wyoming és South Dakota államok, ahol minden negyediknek van automobilja. Minden ötödiknek van a következő államokban: Arizona, Connecticut, Delaware, Florida, Illinois, Maryland, Massachussetts, Michigan, Missouri, Montana, New Jersey, Rhode Island, Texas, Utah, Vermont és Wisconsin. Minden hatodiknak van: New York és Pennsylvania államokban. Minden hetedik lakos Virginia és West Virginia államokban autotulajdonos és minden nyolcadik Tennessee államban. Minden kilencedik lakos Georgia, Kentucky és Lousiana államokban rendelkezik erővel hajtott jármüvel. Minden tizedik lakos North Carolina és Arkansas államokban autotulajdonos és minden tizenegyedik South Carolina államban. Mississippiben már csak minden tizenkettedik lakosnak jut egy autó és végül Alabama állam következik amelyik az ABC sorrendben az első, de automobil tulajdonjogban az utolsó helyen áll, mert ott csak minden tizenharmadik lakosnak van esetleg egy öreg Lissy-je, vagy egy Limousine-je.

Nézzük most már az automobilhajtásnak és birtoklásnak az árnyoldalát is. Beszéljünk az autószerencsétlenségekről. Számaink az 1933. évből valók.

A baleset oka:	A balesetek száma.	Hányan haltak bele.	Hányan sérültek meg.
Gyorshajtás	125.930	5.640	143.930
A nem helyes oldalon való hajtás	61.270	2.270	71.220
A jelzés elleni hajtás	118.400	2.320	143.650
A haladó kocsik közzé hajtás	18.760	340	22.270
Elhaladás az álló villanyos kocsi mellett	3.100	110	3.630
Kanyarodás vagy dombra való hajtás	5.420	140	5.530
A nem helyes uttesten való hajtás	7.880	210	9.430
A jelzés elmulasztás	35.760	380	44.480
A kocsit a hajtó nem tudta ellenőrizni	3.740	210	3.960
Az utról való lesiklás	58.900	3.260	53.240
Vigyázatlan hajtás (ittas állapotban)	31.670	1.250	30.090
Különféle okok	21.670	800	25.670
Összesen:	492.500	17.200	558.100

Ezekből a számokból látható, hogy az 1933. évben egy millió hatszáz hetvennyolc (1.678.000) személy volt a autóbalesetek áldozata. De ezek közvetlenül a hajtók, vagy a kocsiban ülőkre vonatkoznak. A gyalogjárók, vagy a közelben tartózkodók is kivették a részüket.

Ugyancsak 1933. évben 257.710 ember volt autóbaleset áldozata. Ezek közül 13.440 halott és 262.270 sebesült vagy megsérült. Summa-summárum 1.619.220. Egy millió hatszáz tizenkilenc ezer és kétszázhusz ember az áldozat.

Az automobil statisztikán meg kell még emliteni, hogy az amerikai farmokon és mezőgazdasági üzemekben közel 6 millió erővel hajtott jármü volt. Ezek közül 4.134.675 személyszállitási és 900.385 üzemi tracktor és teherszállitási célokra lett alkalmazva.

(Folyt. a 127-ik oldalon.)

KAPITALISTA JÓTÉTEMÉNY.

Gyáros: Mama, gratulálhatól nekem, ma jót cselekedtem egyik munkásommal.

Feleség: Az nagyon szép, örvendek egyszer már ezt is hallani, mond el, hogy mi volt az?

Gyáros: Az egyik munkásom béremelést kért, azon jogcimen, hogy megakar nősülni, melyet csak magasabb bér mellett tehetne meg.

Feleség: Nos megadtad neki?

Gyáros: Dehogy adtam, nem akartam, hogy öngyilkosságot kövessen el.

SZÉP AJÁNLAT.

Vándor munkás. Asszonyom, legyen szives valami ennivalót adni.

Asszonyság: Mindjárt hivom a férjemet.

Vándor munkás: Köszönöm, abból nem kérek, nem vagyok kanibál.

BÜNTETÉS.

Fiu: Uram a kedves leánya megigérte, hogy feleségem lesz.

Apa: No és mostan hozzám jön szimpátiáért. Megérdemli a büntetést, miért járt a nyakunkra hetenkint öt este is.

AZ ÉRDEKLŐDÉS.

Péter: Miért minden nő azt mondja, hogy nincs nekik mit felvenni?

Pál: Azzal akarják a férfiak érdeklődését megnyerni.

KÖVETKEZTETÉS.

AFofL-ista: Ha több nagy ember volna, kevesebb sztrájk lenne.

IWW-ista: És több árulás.

AKINEK VAN.

Ifju ur: Jó állásu ruhád van barátom. Nem adnád meg a szabód cimét?

Ficsur: Megadom, ha igéred, hogy az én cimemet nem adod meg a szabómnak.

SPÓROLÁS.

Az ember: Mama, meglehet, hogy nem tudok hazajönni vacsorára.

Feleség: De hogyan tudjam azt biztosan?

Az ember: Majd felhivlak telefonon, de ne válaszolj, akkor visszakapom a nickelt.

ROSSZ VISZONYOK KÖZT.

Te hallottad a hirt, hogy Mariska férjhez megyen?

Nem. Ki az a szerencsés ember?

Az apja.

SOK, AMI SOK.

Hallottam, feladod a szobádad, sokat kértek érte?

De még mennyit, hetenkint háromszor is.

VIGYÁZAT.

Azt mondják, a csók legveszedelmesebb reggelfele.

Meglehet, de akinek esze van nem marad reggelig.

NEM MINDENKI BOLOND.

Feleség: Ugylátszik minden ember bolond.

Férj: Nem, vannak nőtlenek is.

A GŐGÖS.

Az én őseim a Mayfloweron jöttek át Amerikába.

Szerencséjük, manapság nagyon megválogatják a bevándorlókat.

MAGYAR FÜGGELÉK AZ IWW ALAPSZABÁLYHOZ

AZ INDUSTRIAL Workers of the World az ipari unonizmust képviselő s tanitó munkásszervezet, amely a munkásokat ipari foglalkozásuk szerint szervezi abból a célból, hogy a termelési eszközöket kisajátitsa, a bérrendszert megszüntesse, miáltal egyenlő jogokat teremt a társadalom minden egyes tagja részére.

Ezt a célt csak ugy érheti el a munkásosztály, ha EGY szervezetben tömörül. Az IWW minden nyelvü és minden szinü bérmunkást az Egy Nagy Szervezetbe tömöriti. Ezért szükségtelennek tartja a külön nyelvi vagy faji csoportokat, mert ahogy az iparban együtt dolgozik minden nemzetiségü, vagy szinü munkás, ugy a munkán történő kizsákmányolás ellen is együtt kell a harcot fölvenni és megküzdeni.

Ehhez a tanitáshoz egyik legalkalmasabb eszköz a sajtó. És mivel minden bérmunkás az anyanyelvén jobban megérti az IWW tanitását, az IWW különböző nyelvü lapjaiban hirdeti az Egy Nagy Szervezet szükségességét.

Az IWW magyar sajtója, bár szorosan az Egyetemes Központ ellenőrzése alatt áll, annak terjesztése és fenntartása a magyar bérmunkások kötelessége.

Ebből a célból agitációs bizottságokat létesitenek, ahol a magyar lap fejlesztését szolgáló ügyeket beszélik meg.

Az agitáció sikeresebb kifejtése céljából legalább egyszer évente értekezleteket tartanak és ha szükségét látják, országos értekezletre jönnek össze. Ugy a kerületek, valamint az országos értekezletek határozatait a magyarajku agitációt végző IWW tagok hagyják jóvá vagy vetik el.

A magyar lap ügyeinek intézésére az agitációs csoportok egy szerkesztőt, egy titkár-pénztárnokot s egy hét tagból álló bizottságot választanak egy évi időtartamára, mely bizottságnak föladata őrködni, hogy a lap IWW szellemben iródjék, hogy a lap körüli munkák elintézést nyerjenek, hogy a lap s igy az ipari unionizmus eszméjének terjesztése a magyar munkások között a legszélesebb körben történjék. E célból odatörekszik, hogy a magyar lap állandó tanitómunkája mellett szervezők is fölkeressék a magyarlakta területeket.

A magyar lap bevételeiről és kiadásairól, valamint a nevelést elősegitő céljairól havonta jelentést készit a lapbizottság és azt az agitációs bizottságok titkárainak, a delegátusoknak s a Bérmunkás lapkezelőinek megküldi.

RHETORIKAI ISMERETEK

A RHETORIKA FOGALMA

PA RHETORIKAI tanfolyamok csaknem oly régi keltüek, mint maga az emberi civilizáció. Maga a "rhetorika" szó görög eredetü. A régi görögöknél "rhetor," később pedig "orator" névvel illették azt, aki nyilvánosság előtt beszélt. Ilyen beszédekre alkalmat adtak az istentiszteletek, a politikai gyülekezetek és a törvénykezések: Az ó-görögöknél minden polgár a saját védőügyvéde lehetett a törvényszéki tárgyalásoknál. A közönséges polgár azonban a védelmet nem tudta ugy ellátni, mint akinek ez hivatásszerü foglalkozása volt. A védekező beszédeket tehát ilyen professzionális védőkkel készitették, akik mindjárt be is tanitották az illetőket arra, hogy a beszédeket hatásosan tudják elmondani. Ez adott alkalmat a rhetorika, vagy szónoklatok kifejlesztésére.

TANULNI ÉS TANITANI!

Egyedül az IWW-nak célja és törekvése, hogy tagjai önmaguk, minden külső beavatkozás nélkül vivják meg harcaikat a munkásosztály minden ellenségével.

Ez a törekvés csak ugy lehet eredményes, ha nemcsak ismerjük a munkáltató osztály és a munkásosztály között levő ellentéteket, de azokat másokkal is megtudjuk értetni.

Ezt a célt szolgálja Naptárunk rehtorikai része, amelyet a "Forradalmárok könyve" alapján közlünk itt le, annál is inkább, mert a könyv már alig található a piacon.

Rhetorika, vagy szónoklattan tehát a nyelv használatának tudománya abból a célból, hogy a hallgatókra bizonyos kivánt hatást gyekoroljunk. Vannak azonban olyanok, akik a rhetorikát a beszéd müvészetének is mondják. Mint tudjuk, tudomány és müvészet között lényeges különbség az, hogy amig a tudományt minden normális agyu ember elsajátithatja kellő szorgalommal, addig a müvészetek elsajátitásához bizonyos születetett képesség kell. Igy például a mathematikai tudományokat mindenki megtanulhatja, ha kellő időt szán rá. Itt legfeljebb aról lehet szó, hogy az egyik ember felfogó képesége gyorsabb mint a másiké, azonban szorgalommal a felfogó képesség hiányát pótolni lehet. A müvészetek azonban a születetett képesség nélkül nem sajátithatók el. Akinek nincs zenei érzéke, abból soha sem lesz jó zenész, bármennyit tanul is.

Ha a rhetorikát ebből a szempontból vizsgáljuk, akkor azt látjuk, hogy a rhetorika tudomány is, meg müvészet is. Ez azt jelenti, hogy soha nem lesz jó szónok abból, akinek nincs meg a szónokláshoz megkivánt képessége.

A fenti okoskodás nem fedi a valóságot, nem pedig azért, mert egy háboru kitörése és az általános sztrájk mint az egyetlen ellenszere a munkások fontos gyülekezetein folytonosan a munkásmozgalom előrelátó kisebbsége által, azonban a szociáldemokraták hadvezéreinek állandóan sikerült elütni a napirendről. Engedjük meg egy percre, hogy ez a védekezés érvényes, jogos volt az 1914-ben történtekre. És most a kérdés felvetődik, hogy hogyan állunk 1935-ben?

Másrészről azonban hiába vannak meg a természetadta feltételek, ha az illető tudatlan. Tudomány és születetett képeség együttesen alkotják a jó szónokot.

A jó szónoknak tehát első sorban bizonyos foku általános müveltséggel kell birnia. Csak az a szónok érheti el a kivánt hatást, **aki értelemben, tudás-**

ban fölötte áll hallgató közönségének. Éppen azért szónoklattant csak a középiskolák magasabb osztályaiban vagy az egyetemeken tanitják, amikor a tanulók az általános müveltségnek már bizonyos fokát elérték. A munkások részére rendezett rhetorikai tanfolyamoknak tekintettel kell lenni arra, hogy a munkások legtöbbjének nem volt alkalma ezen ismeretek elsajátitására. Azért nem elegendő a rhetorikai szabályok egyszerü felsorolása és betanulása, hanem igyekezni kell arra, hogy a tanulók elsajátitsák legalább az általános müveltséghez tartozó legelemibb ismereteket. Azért a munkások részére rendezett ily tanfolyamoknak a beszéd mechanikai és technikai készitésének tanitásán kivül magában kell foglalnia a beszéd anyagának ismertetését és az általános ismeretek gyarapitását is.

AZ ELŐADÁS.

A hang.

A beszéd a gondolatközlésnek az a neme, amelyet akkor használ az ember, ha közvetlen közelében levő embertársaival akarja magát megértetni. A gondolatközlésnek azonban a beszéd nem az egyetlen módja. Az ember a sok százezer éven át tartó fejlődés alatt arra a fokra jutott, hogy már nemcsak a legegyszerübb érzelmeket tudja kifejezni, — amire az állatok is képesek, — hanem müveltségének megfelelőleg szövevényes gondolatokat is. Azonban annyi bizonyos, hogy valaha az ember is csak a gondolatközlés legelemibb módjait, a testmozdulatokat alkalmazta érzelmeinek és gondolatainak kifejezésére.

A testmozdulatokkal való gondolatkifejezés nem veszett el teljesen az idők folyamata alatt. Ma is számos gondolatot ki tudunk testmozdulattal fejezni. Ilyen testmozdulatok például a bólintás, fejrázás, az arcjáték, (mosolygás, megvetés kifejezése, stb.,) legyintés kézzel, toppantás a lábbal, stb. A szövevényes gondolatok kifejezésére azonban az ember a beszédet, később az irást fejlesztette ki. A modern ember gondolatait a beszéd vagy irás utján közli embertársaival. A kettő közül az irás az ujabbkori és ezt akkor alkalmazzuk, ha a távollevőkhöz szólunk.

Van a gondolatközlésnek még egy másik neme is, — a müvészetek. Ez azonban korlátolt, noha egyes gondolatot vagy érzelmet sokkal jobban ki lehet igy fejezni, mint a beszéddel, vagy irással. A fájdalom vagy öröm, vigság érzelmeit a zenével jobban kilehet fejezni, mint szavakkal. Igy egész általánosságban azt mondhatjuk, hogy a gondolatközlés történhetik **testmozdulatokkal, a beszéd vagy irás utján és végre a müvészetek által.**

A beszéd anyaga **a hang,** amely lényegében valamely anyagnak bizonyos formáju rezgése. Azonban az ember csak akkor vesz róla tudomást, ha a rezgés valamely anyag, pl. a levegő közvetitése révén a hallószervhez, — a fülhöz jut. A fül dobhártyája átveszi a rezgéseket és a halló csontokon keresztül továbbitja a fül belső részében végződő idegszálakra. A beszédhez tehát szükséges egy hangadó és egy hangfelfogó készülék.

Az ember hangadó szervei a **hangszalagok,** amelyek a gégefőben vannak elhelyezve. Ezekmegnyujtható, illetőleg a nyelv elhelyezésével a rezgéseket módositani tudjuk s ezzel átveszi a torok és a szájüreg levegője. A száj formálásával, megröviditheto izompálcikák, amelyeket a mellkasból kiszoritott levegővel rezgésbe hozunk. — A hangpálcikák rezgéseit a hangoknak egész sorát, — ugynevezett **skáláját** tudjuk létrehozni. A hangok ily módon való formálását **artikuláció**-nak mondjuk. **A hangok tudatos artikulációjára csak az ember képes,** miért is azt mondják, hogy csak az ember fejezi ki gondolatait artikulált hangokkal.

A hangok artikulációjára szolgáló szervek egyének szerint különbözők. Ennek tulajdonitható be, **hogy a hang minden emberre jellemző.** Valószinü, hogy nincs két teljesen egyforma beszédü ember a világon. A hang annyira jellemző az egyénre, hogy magáról a hangról felismerjük azokat, akiknek hangját megszoktuk, noha szemünk-kel nem is látjuk az illetőket. Ugy a hangadó, mint a hangfelfogó szerveket bizonyos gyakorlatokkal tökéletesiteni lehet. A hibás artikulációt kellő gyakorlattal meg lehet javitani, azért igen fontos, hogy akiknek kiejtése nem tiszta, annak megjavitására nagy gondot forditsanak.

A hangok kombinációja révén **szavakat** alkotunk. A szavak egyes fogalmaknak a megegyezés révén létrejött jelei. Valószinü, hogy egyes szavaknál, amikor azok forgalomba kerültek, a szó és a fogalom között valami rokonság lehetett. Például ez a szó: "pattog," kifejezi magát a cselekvést, amit jelent. Később azonban, amidőn az emberi müveltség már magasabb fokot ért el, ujabb és ujabb szavak kerültek forgalomba, ekkor aztán már a fogalom és az azt jelentő szó között megszünt a rokonság. A hosszas gyakorlat azonban képessé tette az embert arra, hogy midőn az általa ismert szót hallja, akkor a szó fogalmának képe megjelenik az agyában. Például midőn ezt a szót hallom: "könyv" képzeletemben azonnal valami könyvet látok.

A szavak kombinációja adja a **beszédet.** A beszédnek legismertebb faja a közönséges beszéd, vagy társalgás, amit az életben lépten-nyomon használunk. Mi az alábbiakban a beszédnek nem ezzel a fajával akarunk foglalkozni, hanem az olyan beszédekkel, amelyeket nyilvános hallgatóság előtt mondanak el és valamilyen közérdekü dolgot tartalmaznak. Az ilyen beszédet **szónoklat-nak** vagy **szép-beszéd-**nek mondják.

Minden beszéd (szónoklat, oráció, mübeszéd) lényegében két részből áll. **A tartalomból** és az **előadásból.** Ez utóbbi alatt azt értjük, hogy miként mondja el a szónok a mondanivalóját. Egyes szónokokról gyakran halljuk azt a birálatot, hogy érdekes dolgokról beszélt, de nem tudta hatásosan elmondani. Máskor a szónok "jól beszél," noha semmi értékes dolgot nem mond. Ennek megfelelőleg a rhetorikai tanfolyamoknak külön kell foglalkozni az előadás szabályainak ismertetésével és aztán külön a beszéd szellemi részével.

Olvasási gyakorlatok.

A beszédek hatásos előadásának begyakorlására az olvasási gyakorlatok szolgálnak. Ez alatt verseknek, beszédeknek vagy valamilyen más szépprózának a hangos olvasását értjük. A rhetorikai tanfolyamok első pár hónapja alatt a tanulónak olvasási gyakorlatokat kell folytatni. De igen nagy hasznát veszi az ilyen gyakorlatoknak az is, aki otthon végzi azokat. Az ilyen olvasás azonkivül, hogy a helyes kiejtésre és a hatásos előadásra tanit bennünket, uj ismeretek szerzésére is képesit, hozzászoktat bennünket a szép szavak és kifejezések használatához, továbbá uj és idegen szavakkal gyarapitja szótárunkat. (Valamely egyén szótárát, vagy szókincsét az általa ismert szavak összessége alkotja.)

Az olvasási gyakorlatnak tehát kettős célja van. 1. **A helyes hangsulyozás begyakorlása.** 2. **Uj ismeretek szerzése.** Az olvasás természetesen lehet hang nélküli is, ugynevezett "magában való olvasás," amely azonban legfeljebb csak az uj ismeretek szerzésére szolgálhat. Mi itt olvasás alatt mindig a hangos olvasást értjük. Az olvasónak mindig abban a tudatban kell lenni, hogy nagy hallgató közönségnek olvas. **Olvassunk sokat és olvassunk mindég hangosan.** Azonban mindig figyelmesen olvassunk, mert különben csak elpazaroljuk az időnket.

Az olvasási gyakorlatra vonatkozólag általában a következő szabályokat tartsuk szem előtt:

1. Mindig ugy olvassunk, mintha közönség hallgatná.

2. Olvasás előtt meg kell nézni a könyvet (papirt,) hogy rendben van-e. Az olvasást nagyon megzavarja az, ha az olvasónak keresni kell a következő lapot és ezért meg kell szakitania az olvasást. Sőt megtörténhetik az is, hogy nem a megfelelő oldalon folytatja a szöveget.

3. Olvasásnál a könyvet (papirt) balkézben kell tartani és a jobbal lapozzunk. A gyakorlatlan olvasó gyakran cserélgeti a kezét s eltéveszti az

olvasást. Máskor idegesen babrál ujjaival és összegyüri a lapokat.

4. A szem egy-két szóval előbb járjon a szájnál. Forditani kell a könyvben, mielőtt a lap utolsó szavát kiejtenénk. Igy el lehet kerülni, hogy a lap végén megtörjük az olvasást.

5. A hangos olvasásnál ügyelni kell az artikulációra, amit a száj megfelelő nyitásával és zárásával lehet elérni. Aki a száját nem nyitja ki teljesen, az **"elharapja"** a szavak végeit.

6. Sem tul sebesen, sem tul lassan nem szabad olvasni. A tul sebes olvasást a hallgató nem képes követni; ha tul lassu az olvasás, akkor a hallgató figyelmét nem köti le és a gondolatai elkalandoznak.

7. Ügyelni kell a hangsulyra. A helytelenül alakalmazott hangsuly a mondat értelmét megváltoztatja. Mindig a mondat legfontosabb részét kell erősebben kiemelni.

.8 Vigyázni kell a lélegzetvételre. A leghelyesebb az, ha gyakrabban veszünk lélegzetet. A ritka lélegzetvételnél egyszerre sok levegőre van szükségünk és az ilyen lélegzés rendesen zajjal jár.

9. Olvasás közben nyugodtan, természetesen kell állni. Nem szabad izegni, mozogni, de azért merev se legyen az olvasó, hanem természetes. Nem szabad gesztikulálni azzal a kézzel, amelyben a könyvet (papirt) tartjuk, mert eltévesztjük, hogy hol tartunk.

A hangsuly.

Minden mondatban vagy szócsoportban egyes szavak, szóképek fontosabbak a többinél. Ezeket a beszédben vagy olvasásban ki kell emelnünk. A kiemelés a hangsulyozás segitségével történik. A hangsuly változásával képesek vagyunk a mondat értelmét is megváltoztatni. Nézzük például ezt a mondatot: "Liebknecht mondotta, hogy a tudomány hatalom." Hangsulyozzuk először a mondat első, majd a második, a harmadik és végre a negyedik szavát és figyeljük meg, hogy a hangsulyozás mennyire megváltoztatja értelmét.

1. **Liebknecht** mondotta, hogy a tudomány hatalom. Ha igy hangsulyozom a mondatot, akkor ezzel azt mondom, hogy **Liebknecht** mondotta ezt az állitást a tudományról és nem Marx, Bebel vagy valaki más.

2. Liebknecht **modotta,** hogy a tudomány hatalom. Ez a mondat igy hangsulyozva azt jelenti, hogy Liebknecht **mondotta** és nem irta, vagy gondolta, stb. ezt az állitást.

3. Liebknecht mondotta, hogy a **tudomány** hatalom. Vagyis a **tudomány** a hatalom és nem más, nem a hadsereg, stb.

4. Liebknecht mondotta, hogy a tudomány **hatalom.** Most azt állitjuk, hogy a tudomány **hatalom** és nem élvezet vagy jog valamire, stb.

Ime igy váltakozik meg a mondat értelme a hangsuly áthelyezésével, dacára annak, hogy a mondaton egyáltalában semmi változást nem ejtettünk. Ezért olyan fontos az, hogy a hangsulyt arra a szóra fektessük, amelyikre kell, különben mást mondunk, mint a szerző mondani akart. Igy az olvasás tárgyát gondos tanulmányozás alá kell venni. Ki kell keresni a hangsulyozandó szavakat és azokat aláhuzva gyakorolhatjuk a hangsulyozást. Erre természetesen csak addig van szükség, amig a tanuló kellő gyakorlatot szerez a hangsulyozásban, azután már a figyelmes átolvasás után egyszerre képes helyesen hangsulyozni. Vegyük például Farkas A. "Husvéti pásztorlevél" cimü versének alábbi sorait és emeljük ki a hangsulyozandó szavakat:

Irjak husvéti pásztorlevelet?
Elmondjam benne, hogy **ne higyjetek,**
De tudjatok, testvéreim, emberek!

Sebesség.

Már itt meg kell jegyeznünk, hogy a legtöbbje azon szabályoknak, amelyeket az olvasásra adunk, érvényes a szavalásra és a szónoki beszéd elmondásánál is. Mondottuk, hogy az olvasás vagy a beszéd ne legyen tul sebes, de ne legyen lassu sem. Az előbbi esetben a hallgató nem tudja követni az eléje tárt gondolatot, az utóbbiban pedig időt adunk neki arra, hogy gondolatai elkalandozzanak. Sebesség tekintetében általában megkülönböztetünk **gyors, mérsékelt** és **lassu** olvasást.

Az olvasás általában **mérsékelt.** Ez az alaphangja minden olvasásnak. A szöveg kivánalmainak megfelelőleg azután egyes helyeken átmegyünk gyors, illetőleg lassu olvasásba. Emelkedik az olvasás sebessége, amidőn könnyebben megérthető gondolathoz jutunk, vagy ha élénk szinekkel festünk valamely drámai jelenetet, stb. A nagyobb sebesség az élénkség kifejezésére szolgál. Lassitjuk az olvasást, amikor nehezebben érthető gondolatokat tartalmazó részhez jutunk. Lassan olvassuk a szomoru, a megható részeket is. Általános szabályt természetesen az olvasás sebességére nem lehet adni, mert azt minden egyes alkalommal maga a szöveg szabja meg.

A már idézett "Husvéti pásztorlevél" cimü versben például mérsékelten kell olvasni az első 8 sort. Sebesebb olvasást kiván ez a rész: "Nézd, lomb zöldül, rög mozdul, rügy kihajt" . . . Lassan olvasandó: "Irjak husvéti pásztorlevelet? Elmondjam bene, hogy ne higyjetek, de tudjatok, testvéreim, emberek! . . ."

Szünet.

Az olvasás sebességét szünettel szabályozzuk. A szünetek helyes alkalmazásának rendkivül fontos szerepe van az olvasás vagy a beszéd hatásossága tételében. Szünetre általában véve szükségünk van:

1. **Lélegzetvételre.**
2. **Mondattani okokból.**
3. **Hatás kedvéért.**

Miután az embernek levegőre van szüksége, olvasás vagy beszéd közben kénytelen egy pillanatra szünetet tartani, hogy lélegzetet vegyen. Ez a legrövidebb szünet. Azonban ez a szünet is elég hosszu arra, hogy ha szorosan egymáshoz tartozó szavak között vesszük, akkor megzavarjuk vele az olvasást. Szokjunk hozzá, hogy inkább gyakrabban és kis lélegzetet vegyünk, mint ritkán, ne mély lélegzetet, mert az esetleg szuszogást eredményez. Hibás például az ilyen szünet:

Nagy / köhögésbe fulladt / a beszéd és azt / követte hosszu / hallgatás.

Helyesen:

Nagy köhögésbe / fulladt a beszéd / és azt követte / hosszu hallgatás.

Valamivel hosszabb szünetet tartunk ott, ahol mondattani okokból kell megállnunk. Itt rendesen vesszőt, pontot vagy valamilyen más irásjelet találunk a szövegben. Pl.:

A titkár, // karcsu, // izmos papi ember. //

A vén főpásztor rábólint. // Gyerünk. //

Leghosszabb szünetet tartunk akkor, amidőn valamely nagyon fontos dolgot mondottunk, vagy valamely drámai jelenet hatását várjuk. Hosszu a szünet akkor is, ha nehezen megérthető gondolatot közöltünk a hallgatókkal. A hosszu szünettel időt kell arra adni, hogy a hallgatók megértsék a gondolatot. A drámai jelenet leirásánál az elképzelésre kell a hosszu szünet. Szóval itt várni kell a hatás kifejlődésére.

Példázza, / aki most röpit bennünket, //

Az a zubbonyos ember, /// ez a gép. ///

Ez a jövő, /// ez a feltámadás! ///

Hangfestés.

Az értelem és az érzések kifejezésére a beszédben vagy olvasásban a **hangfestés**-t (modulació) használjuk. A hangfestés abból áll, hogy az előadó a hangját felemeli, megnyomja, gyorsitja, lassitja, szóval változtat hangján a kivánalmak szerint. Ha az előadásban nincs hangfestés, akkor azt mondjuk róla, hogy **egyhangu** (monoton.) Az ilyen előadás unalmas és kárbaveszett.

A hangfestés ugy jön létre, hogy az egymásután következő szavakat, esetleg szótagokat különböző hangnemben mondjuk ki. A hangfestésnek ezt az elemi részét **hangtörés**-nek (inflekció) mondjuk, Ez lehet sokféle. Lehet **emelkedő, eső, hirtelen törő,** stb.

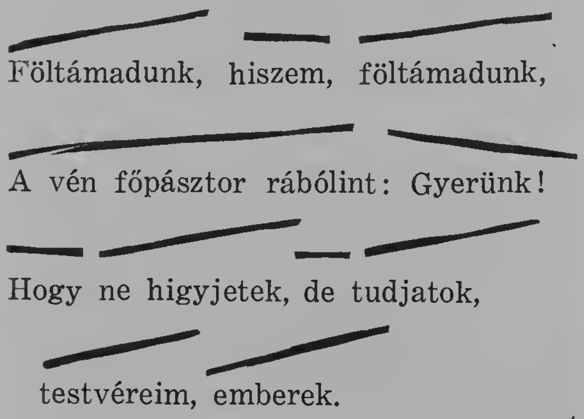
Emekedő pl. az infláció ebben a

sorban: Feltámadunk, hiszem, feltámadunk.

Eső: A vén főpásztor rábólint: Gyerünk!

Hirtelen törő . . . hogy ne higyjetek, de tudjatok, testvéreim, emberek!

Valamely szöveget a helyes olvasás szempontjából ugy analizáljuk, hogy előbb megjelöljük a szüneteket a fentjelzett módon, vonalkákkal, azután a szöveg felett huzott emelkedő vagy eső vonalakkal jelezzük a hangfestést; ilyenformán:



Föltámadunk, hiszem, föltámadunk,

A vén főpásztor rábólint: Gyerünk!

Hogy ne higyjetek, de tudjatok,

testvéreim, emberek.

Ajánlatos, hogy a tanulók minél több ilyen analizálást végezzenek és az igy kijelölt szöveget többször olvassák el a szünetek és hangfestés begyekorlására.

A hangfestésre sem lehet határozott szabályokat adni, mert nemcsak a szövegtől, hanem az előadó képességétől is függ. Itt lép előtérbe az előadó müvészi érzéke. Ugyanazon költeményt például különböző módon is lehet szavalni. A különbséget a szavalónak az egyénisége szolgáltatja. Némely darabot, illetőleg szerepet a különböző színészek különböző módon játszanak meg és mindezek dacára mindegyik lehet tökéletes. Ugyanezt látjuk a zenészeknél is. Ugyanazt a darabot különböző módon játszák és mindegyiknek a játéka jellemző magára a játékosra. Igy van ez a beszédben vagy az olvasásban alkalmazott hangfestéssel is. A hangfestésre általában csak azt jegyezhetjük meg, hogy annál tökéletesebb, minél inkább képes kidomboritani a szövegben kifejezett érzelmeket vagy gondolatokat.

A szavalás.

A szavalás alatt általában költeményeknek betanulás után való elmondását értjük. Külömbözik annyiban az olvasástól, hogy itt a kiválasztott dolgot betanuljuk és igy szabadon adhatjuk elő. Ebben hasonlit a szónoklathoz is. Azonban mig a szónok (rendesen) a saját maga szerkesztette beszédet mondja el, addig a szavaló a mások által irt költeményt (esetleg széppprózát) adja elő, kivévén azon esetet, amikor a szerző maga szavalja a szerzeményét. A szavalásnál figyelembe ajánlott szabályok tehát többé-kevésbbé érvényesek ugy az olvasásnál, mint a szónoklásnál. Szavalásnál általában a következő dolgokra figyeljünk:

1. **Megválasztás.** Szavalásra olyan költeményt válasszunk, amely a) érdekli a közönségünket; b) és amelynek hangszinezésével meg tudunk küzdeni. A megválasztásra nagy gondot kell forditani, mert még a legjobban elszavalt költeménnyel sem érhetünk el sikert olyan közönség előtt, amelyet a költemény nem érdekel. Például az osztályharc alapján álló munkásszervezetek tagjai előtt a hazafias, soviniszta költeményekkel még a legjobb szavaló sem érhet el lelkesedést, sőt ellenkezőleg, haragot idézhet fel maga ellen.

2. **Átérzés, megértés.** Ahoz, hogy valaki hatásosan szavaljon el valami költeményt, első sorban is az szükséges, hogy az illető maga megértse a költeményt és átérezze az abban lefektetett érzelmeket. Nem kell külön magyaráznunk, hogy ha a szavaló nemérti a költeményben kifejezett gondolatokat, másokkal még kevésbbé tudja azt megértetni. Ugyanez áll az érzelmekre is. Csak azon érzelmeket tudjuk kifejezésre juttatni, amelyeket mi magunk is érzünk. A szavalóknak tehát nemcsak meg kell tanulni a verset, de **meg is kell értenie** és az abban kifejezett érzelmeket **át kell éreznie.**

3. **Illuzió.** A szavalat akkor jó, ha a szavaló képes a hallgatók figyelmét magával ragadni. A hallgatók elfelejtik, hogy csak szavalnak előttük, ugy hiszik, hogy ott vannak a költemény szin-

terén, az események előttük játszódnak le. Látják maguk előtt a költeményben szereplő egyéneket, a leirt tájakat; tanui az eseményeknek. Szóval aféle csalódásban, illuzióban élnek a szavalat hatása alatt. Ilyenkor azt mondjuk, hogy a szavalónak sikerült a költemény **légkörének** a megalkotása (atmoszféra kreálás,) ami a szavaló egyik legfontosabb feladata.

4. **Jellemfestés.** A szavalónak arra kell törekednie, hogy necsak a költeményben leirt eseményeket, de a szereplő személyek jellemeit is megismertesse velünk, hogy azokat magunk elé tudjuk képzelni. Ezt nevezik jellemfestésnek. Az iró maga megalkotja szereplőinek jellemét, de azt a szavalónak kell kidomboritani. Ugyanez áll természetesen az eseményekre és a leirásokra is. Csak ebben az esetben képes a szavaló kifejezésre juttatni a költeményben elhelyezett alapgondolatot.

5. **Alaphang.** Ha a költemény alapgondolatát megtalálja a szavaló, akkor ennek megfelelő alaphangot kell alkalmaznia a költemény elszavalásánál. Ilyen alaphang lehet **közlő, érzelmes, hősi (forradalmi,) gunyos, kétkedő, naiv,** stb.

6. **Erő.** A jellemfestés és az események kidomboritása, a kivánt atmoszféra megteremtése még mindig nem elegendő, ha a szavalatnak bizonyos **erőt** nem kölcsönzünk. Ez a szavalásnak és a szónoklatnak is, hogy ugy mondjuk, a lelke. A szavalásnál vagy olvasásnál alkalmazandó erőre sincs általános mérték, amennyiben ez is függ ugy a szavalat tárgyától, mint a szavaló egyéniségétől.

7. **Gesztusok.** A szavaló ne alkalmazzon tul sok gesztust. A gesztikulálásra különben az az egyetlen szabály, hogy **természetes** legyen. Az erőltetett szinészkedés rossz hatást kelt.

8. **Lámpaláz.** Lámpaláznak nevezik a szavaló vagy szónok azon zavarát, amely elfogja akkor, midőn a közönség elé lép. Ettől azonban kevés gyakorlattal mindenki megszabadulhat. A gyakorlott szavaló nemcsak a lámpaláztól mentes, hanem élesen figyeli a közönséget és uralkodik fölötte. Szemével vagy hangjának az irányitásával figyelemre kényszerit mindenkit.

9. **Siker.** A szavalónak, vagy szónoknak célja mindig a **siker.** Ennek kell tehát mindent alávetni. Sikert azonban csak ugy arathat, ha ugy a tartalom, mint az előadás a tökély bizonyos fokát éri el. Nem lehet sikert aratni értéktelen költemény elszavalásával és még a legjobb költeményt is hatástalanul szavalja el a kezdetleges szavaló. A szavalónak arra kell törekednie, hogy hallgatói vele érezzenek, vele gondolkozzanak. A hallgatók aggódjanak a hős sorsáért, a szavalóval együtt kövessék a szerencsés vagy szerencsétlen bonyodalmakat, vele fontolgassák az érveket és együtt vonják le a következtetést. A siker nem a véletlen müve, **hanem az alapos készülés, a tanulás és a tudás eredménye.**

10. **Kritika.** Ajánlatos, hogy a rhetorikai tanfolyamokon a tanulók minél többet szavaljanak. Az ilyen szavalatokat aztán a tanulók birálják felül. Az ilyen birálatok célja egyrészről a szavalás szabályainak begyakorlását könnyebbiti meg, másrészről hozzászoktatja a tanulókat a rövid önálló beszédek elkészitéséhez.

Valamely szavalat vagy olvasás elbirálásánál első sorban is azt kell néznünk, hogy a szavaló a költeményt képes volt-e megértetni velünk. A költeményben leirt érzelmeket átérezte-e, jobban mondva átéreztette-e a hallgatókkal. Eltalálta-e az alaphangot, milyen volt az általános fellépése. Csak az ilyen általános birálat után térünk át a részletek, mint például az egyes helyeken alkalmazott hangfestés, a sebesség, a szünetek, artikuláció, a gesztusok, stb. birálatára. A birálat azonban nemcsak abból áll, hogy a hibákra rámutatunk, de az **érdemet** is el kell ismerni, ahol annak helye van. A kritikának nemcsak **romboló,** de **épitőnek** is kell lennie. A kritikánál az irányadó mindig az legyen, hogy lehet jobbat, tökéletesebbet produkálni a bemutatottnál.

A SZERKESZTÉS ELEMEI.

A szerkesztés általános szabályai.

Midőn beszédet szerkesztünk, vagy valamilyen irásos müvet készitünk (például hirlapi cikket) első sorban is a nyelvtani szabályok betartására kell ügyelnünk. A munkások részére rendezett rhetorikai tanfolyamoknak a nyelvtani szabályok ismertetésére, különösen pedig a helyesirás elemeinek tanitására is ki kell terjeszkedni, mert a munkásoknak nem volt alkalmuk ezeket az elemi iskolákban elsajátitani. Az ily szabályok felsorolásának azonban itt nem sok értelme lenne, miután azokat a gyakorlati alkalmazás utján lehet legjobban tanitani. A tanfolyamok vezetőinek tehát erre is ki kell terjeszkedni. A tanulók készitsenek házi feladatokat és a vezető azokon jelölje meg a hibákat. Itt tehát mellőzzük a nyelvtani szabályokat. Azonban a szerkesztésre vonatkozólag adhatunk több olyan általános szabályt, amelyek többé-kevésbbé függetlenek a nyelvtantól. Ezek a következők:

1. Irásos dolgozatok készitésénél ügyelni kell a kézirásra, hogy az tiszta és olvasható legyen. Az elhányt irás rossz benyomást kelt.

2. Lapok részére küldött kéziratoknál csak a papir egyik oldalára kell irni, a másik oldal üresen marad. Fontos azonban, hogy mielőtt kiadnánk kezünkből a kéziratot, **mindig nézzük át.** Az átnézésnél számos hibát kijavithatunk, amelyet az irás alatt nem vettünk észre.

3. Ügyelni kell a mondatokra és a bekezdésekre. Irjunk rövid és értelmes mondatokat. A kezdő iró belezavarodik a hosszu mondatokba. Minden gondolatcsoport külön szakaszt képez és azért ilyenkor uj bekezdést kell alkalmazni. Ugyancsak vigyázni kell a pontozásra és a nagybetük használatára is.

4. Magyar fogalmazványban lehetőleg mindent magyarul irjunk, a magyar neveket is magyarosan. Irjuk tehát Kovács Pétert és ne Péter Kovácsot. Idegen nevekben azonban megmaradhat a forditott sorrend, pl. Karl Marx. Általában kerüljük az idegen szavakat és az idegen kifejezéseket, mint például az "egy" határozatlan indokolatlan használata. Ilyen az u. n. passziv forma is, pl.: "Meg lett mondva neki." Ezt helyesen igy kell mondani: Megmondották neki.

5. Kerüljük a tájszavakat és tájkiejtés szerinti irást. Mindig a müvelt ember által használt köznyelvet kell követnünk. Kerüljük a prózai müvekben a rimeket is, mert azok az ilyen irásokban kellemetlenül hatnak.

6. Ügyelni kell arra, hogy a fogalmazvány ne legyen **zavaros.** Vigyázni kell, hogy ne maradjon el a mondatnak egy-egy része, ami aztán értelmetlenséget okozna.

7. Legyen a fogalmazvány **szabatos.** Ez alatt azt értjük, hogy ne legyenek benne fölösleges dolgok. Ne használjunk benne több szót, mint kellene. Ha tulsok szót használunk, akkor az ilyen irás **pongyola** vagy **vizenyős,** lesz. De nem szabad kevesebb szót sem használni, mint amennyire szükségünk van, mert ezzel ártunk az értelemnek. Lehet az irásmü **tömör,** de ne legyen szükszavu.

8. Minden irodalmi müben **egységnek** kell lenni. Egység van a müben akkor, ha csak egy tárgyról szól és nem kalandozik el. A mü azon részét, amely nem tartozik szorosan a tárgyhoz **kitérések** vagy **epizódnak** mondjuk. Az epizódnak csak akkor van helye, ha a tárgy valamilyen megvilágitásra szolgál.

9. Legyen a müben **haladás,** vagyis fokozatosan haladjon a kitüzött probléma megoldása felé. Ne mondja előbb azt, amit utóbb kellene mondani, vagy forditva.

10. Kerüljük az **ellentéteket.** Ellentét akkor van a müben, ha utóbb megcáfoljuk, amit előbb mondottunk.

11. Legyen a mü **teljes,** vagyis oldja meg teljesen azt a problémát, aminek megoldására készitették, ne hagyjon ürt maga után.

Midőn valamit közölni akarunk embertársainkkal akár az irás, akár az élőszó vagy a müvészetek által, először is meg kell gondolnunk, hogy mit akarunk kifejezésre juttatni, vagyis kigondoljuk a közlés tárgyát, az alapeszméjét. Más szóval ezt ugy mondjuk, hogy megválasztjuk tárgyunkat. Midőn a tárgyat megválasztottuk, akkor összeszedjük a tárgyra vonatkozó ismereteinket. Ezen ismereteket aztán elrendezzük és csak akkor foghatunk hozzá a kidolgozáshoz.

A szerkesztés tehát lényegében három részből áll: **1. kigondolás, 2. anyaggyüjtés és elrendezés, 3. kidolgozás.**

Kigondolás.

A **kigondolás** vagy **feltalálás** a mü keletkezésének első mozzanata. Az iró vagy szónok fejében megszületik a mü eszméje. Ez az eszme költi fel mindazon ismereteket, amelyeket aztán közölni kiván a közönségével. A jó szónok csak akkor beszél, a jó iró csak akkor ir, ha van valami mondanivalója, ha van valami eszméje, amit közölni akar embertársaival és amiről feltételezi, hogy közérdekü. Nem kell tehát irni vagy beszélni csak azért, hogy szerepeljünk, ha nincs semmi mondani valónk.

A kigondolás függ az iró vagy szónok érzékenységétől. A látott és hallott vagy olvasott dolgok az emberre hatással vannak és uj gondolatokat váltanak ki belőle. Ez azonban mindig függ az egyéntől. Azért mondjuk, hogy az egyik ember **feltaláló**, vagy **invenció** képessége nagyobb, mint a másiké.

Az emberre hatással vannak ugy a **térbeli**, mint az **időbeli** dolgok. Ezeknek némelyike az értelemre, másika a képzeletre vagy az érzelmekre hat. A kigondolásnál tehát az **értelem, képzelet** és az **érzelem** szolgáltatják azt a forrást, ahonnan merithetünk.

Az **értelem** a külső világ eseményeinek a felfogója, számontartója. Az értelem alkotja meg az ismeretek rendszerét, amely mint tárház áll rendelkezésünkre a mü elkészitésénél. A **képzelet** leginkább akkor szolgál a kigondolás forrásául, ha a mü célja a szórakoztatás. A regényirodalom és a költészet a képzelet forrásából merit legtöbbet. Az **érzelmek,** mint például a lelkesedés, a szeretet, gyülölet, hála, stb. szintén gyakran szolgálnak a kigondolás forrásául.

De bármi is szolgáljon forrásul a mü alapeszméjének kigondolásánál, mindig figyelembe kell vennünk a következőket:

1. A megválasztott tárgy érdekelje a közönségünket, vagyis a kigondolásnál számitásba kell venni azt a közönséget is, amelyhez szólni kivánunk.

2. Magunk is kedveljük a megválasztott tárgyat. Nem elég az, hogy csak a közönséget érdekelje, hanem az irót vagy a szónokot is, különben képtelen azzal ugy foglalkozni, hogy a közönséget kielégitse.

3. Kellő ismeretünk legyen a tárgyról. Ez azt jelenti, hogy ne vállalkozzunk olyan tárgy ismertetésére, amelyet mi magunk sem ismerünk eléggé.

4. Olyan legyen a tárgy, hogy a rendelkezésünkre álló időben vagy helyen ki lehessen meriteni. Nevetséges dolog volna például félórás előadásban, vagy két hasábos cikkben az emberiség történetét ismertetni. Vigyázni kell arra is, hogy a tárgyunkat élesen körvonalozni lehessen. Igy például ez a tárgy "A civilizáció" nagyon tágkörü. Meg kell mondani, hogy milyen szempontból kivánunk az ilyen tárggyal foglalkozni. Pl.: "A civilizáció hatása a termelésre." Ez már szükebb körü.

5. Legyen a tárgy ujszerü és ne elcsépelt, amit már mindenki ismer és mindenki megunt.

Anyaggyüjtés és elrendezés.

Didőn a tárgyat megválasztottuk, akkor összeszedjük a tárgyra vonatkozó ismereteket, vagyis **anyagot gyüjtünk.** Az anyaggyüjtés történhetik **kivülről,** vagy **önmagától.**

a) Kivülről való anyaggyüjtésnek nevezzük az olvasást, a szakkönyvek tanulását, előadások hallgatását, vitatkozást, stb. Szóval azon eseteket, amidőn másoktól nyerjük az ismereteket.

b) Önmagunkból nyerjük az ismereteket a megfigyelés, gondolkodás és a következtetés révén.

A kivülről való anyaggyüjtésnél első sorban is a tárgy szakirodalmához kell fordulnunk. Ma már alig tudunk olyan tárgyat kigondolni, amelynek ne volna meg a maga terjedelmes irodalma. Az egy tárgyra vonatkozó könyvek, füzetek és cikkek összességét a tárgy **bibliografiá**-ja névvel jelöljük. Igy pl. az IWW-ról irt könyvek és füzetek adják az IWW bibliografiáját. Brissenden a "The IWW" cimü müvében több mint 400 könyvet és füzetet sorol fel az IWW bibliografiájában. A nagyobb enciklopédiák (lexikonok) minden fontosabb tárgy után felsorolják a tárgy bibliografiájának jelentősebb müveit. Éppen ez teszi az enciklopédiákat értékessé.

Ha már összegyüjtöttük az anyagot, akkor annak elrendezéséhez (dispozició) fogunk. Az összeszedett anyagból ki kell választanunk azt, amire szükségünk van és az igy kiválogatott anyagot megfelelő sorrendbe kell raknunk. Ebben a munkában az **itélet** és **izlés** vezetnek bennünket. Az itélőképességünknek kell eldönteni, hogy az összegyüjtött anyagban mi a fontos, mi a lényegtelen. Azonban, hogy valami jó, helyes, illő, vagy nem illő, stb. afölött az izlés dönt.

A tulajdonképeni elrendezés abból áll, hogy az anyagot a mü három főrészébe osztjuk be. Ezek a részek a **bevezetés, tárgyalás** és **befejezés.** A kész müben a feltalálás mint a mü **alapeszméje** jelentkezik. Az elrendezést a **szerkezetben** látjuk és a kidolgozás eredménye az **előadás.**

Kidolgozás.

A kidolgozás (kompozició) az előadás nemének a megválasztása, a stilus megszabása, stb. A kidolgozás módja az, ami az olvasó vagy a hallgató előtt érthetővé teszi a müvet. A kidolgozás első feltétele az, hogy a szorosan egymáshoz tartozó dolgokat egymás mellett soroljuk fel. Ezzel a münek bizonyos **tagoltságot** adunk.

Minden irásos müben vagy szónoklatban megkülönböztetünk **bevezetést, tárgyalást** és **befejezést.**

a) Bevezetés.

A bevezetés, mint maga a név is mutatja, a münek a legelső része, (Szépirodalmi müveknél kivételt képezhet.) A bevezetés tájékoztatja a közönséget, hogy a müben miről is lesz szó, megadja a mü alapeszméjét. A jó bevezetés felkölti az olvasó (vagy hallgató) érdeklődését és biztositja azt a tárgyalás részére. A szónoknak különösen nagy gondot kell forditani a bevezetésre, mert a hallgatcság rokonszenvét már ezzel biztositania kell, hogy a későbbi mondanivalóját érdeklődéssel hallgassák.

A bevezetés legyen rövid, érdekes, figyelmet keltő. Ne legyen benne semmi fölösleges, de azért ne legyen tulságos rövid sem. Ne legyen mesterkélt, hanem természetes. A jó bevezetés simán, alig észrevehető módon megy át a tárgyalásba. A bevezetés a következő részekből állhat:

1. **Megszólitás.** Ez mindössze pár szóbcl áll, amelyben a szónok a közönség iránti tiszteletének ad kifejezést. Ezt azonban igen sok esetben el is hagyják.

2. **A tárgy időszerüségének ismertetése.** Elmondja, hogy mi késztette a szónokot (irót) arra, hogy a szóbanforgó tárggyal éppen most foglalkozzon.

3. A tárgy rövid **definiciója,** szabatos magyarázata.

4. Ismerteti pár szóban a **tárgy történetét.**

5. Megadja a **mü célját.** Megmondja, hogy mi a célja a beszédnek, vagy az irásos münek (értekezéseknek.) Ennek megfelelőleg korlátozza a tárgyat, vagyis körvonalazza a mü kereteit. Megmondja, hogy a szóbanforgó kérdéssel milyen szempontból kiván foglalkozni.

6. **Átmenetet nyujt** a második részhez, a tárgyaláshoz.

b) Tárgyalás.

A mü tulajdonképpen azért készül, hogy elmondhassuk azon dolgokat, amit ez a rész tartalmaz, igy tehát a tárgyalás a mü legfontosabb része.

A tárgyalás a beszéd középső része, amelyben előadjuk a tárgyra vonatkozó összes fontosabb ismereteinket.

Ezeket azonban bizonyos rendszerbe kell foglalnunk. A tárgyalás tehát a tárgy rendszeres és részletes ismertetését tartalmazza. Ennek a résznek a megszerkesztése adja a legnagyobb gondot. Tartalmazhatja általában a következő dolgokat:

1. A tárgyra vonatkozó **általános ismereteket,** szóval azon dolgokat, amelyeket a közönség is ismer már.

2. A tárgyra vonatkozó **uj adatok.** Ezek azon uj adatok, amelyekkel a szónok (vagy iró) járul hozzá a tárgy ismeretkörének tágitásához.

3. A különösen fontos dolgok felsorakoztatása. Felsorolása mindazon érveknek, amelyek az előbbi pontokban megtett állitásokat bizonyitják. Az értekezésekben és a szónoklatban ezen részt tekinthetjük a legfontosabbnak.

4. **Az ellenérvek** ismertetése és azok lerombolása. Az ellenezők véleményének ismertetése és azoknak megnyugtatása, illetőleg megnyerése.

5. **A szaktekintélyek,** autoritások megszólaltatása.

6. **Példák** és **párhuzamok** felsorolása.

7. **Átmenet a befejezéshez.**

Ez a sorrend természetesen változik a mü természete és az előadó vagy iró egyénisége szerint. Nem is találjuk meg mindenütt az itt felsorolt pontokat, de a kezdő szónok vagy iró helyesen teszi, ha jó ideig betartja azokat. Azonban akár figyelembe vesszük ezen pontokat akár nem, minden esetben arra kell ügyelnünk, hogy a tárgyalás **rendszeres legyen.** Ne ugorjunk át egyik gondolatról a másikra, mig az előbbit teljesen be nem fejeztük. Ügyeljünk arra, hogy a legfontosabb gondolatnak adjunk legtöbb teret. A tárgyalás meritse ki teljesen a tárgyat, nehogy mikor már befejeztük ezt a részt, akkor álljunk elő azzal, hogy ezt vagy azt kifelejtettük. Ne keverjünk a tárgyalásba olyan dolgokat, amelyek nem tartoznak a tárgyhoz, vagyis ne kalandozzunk el csak azért, hogy a tárgyalást nyujtsuk. És végül vezessen a tárgyalás természetesen a befejezéséhez.

c) Befejezés.

A befejezés munkánk eredményét törekszik biztositani. Éppen azért erre is igen nagy gondot kell forditani. Általában a következő részeket tartalmazza:

1. **összefoglalja** röviden a legfontosabb érveket.

2. Kimondja a **következtetést** (konkluzió.) Megmondja, hogy valójában mit is akartunk ezzel a müvel.

3. Az értelemre vagy az érzelmekre apellálva **befejezi a müvet.** Miután megmondottuk, hogy mit akarunk, mi a célunk, a közönséget a cselekvésre szólitjuk annak érdekében, ha a tárgyunk ilyen természetü.

A bevezetésnek, tárgyalásnak és a befejezésnek egymáshoz arányosnak kell lenniök. Ezt az arányt természetesen pontosan megadni nem lehet, mert az a tárgy természetétől függ. Azonban szokásban van, hogy ugy a bevezetés, mint a befejezés körülbelül egy hatoda vagy egy nyolcada legyen az egész münek. Eszerint az egy órás beszédben elgendő a 7—8 perces bevezetés és az ugyanilyen, vagy még rövidebb befejezés. A befejezés lehetőleg legyen rövid. Nagyobb müveknél a bevezetés és a befejezés egészen különálló részeket is alkothatnak, az értekezésnél és a beszédeknél azonban csak egy-két szakaszt foglalnak le.

ÁLTALÁNOS SZABÁLYOK.

A beszédről általában.

Az eddigiekben részletesen ismertettük mindazon szabályokat, amelyek a kezdő szónokot elősegitik. Nyomatékosan hangsulyozni kivánjuk, **hogy az itt elsorolt szabályok a szónok segitségére és nem korlátozására valók.** Mondottuk, hogy a szónoklat a müvészetek körébe is számitható. Már pedig közismert tény, hogy a müvészetek nem ismernek szabályokat. Ez azonban korántsem jelenti azt, hogy aki a szabályokat nem ismeri, már kész müvész, vagyis a mi esetünkben kiváló szónok csak azért, mert a szónoklat szabályait nem tanulta meg. A jó szónoknak már nincs szüksége szabályokra. Maga alkot szabályokat és ahol áthágja a régi szabályokat, ott tökéletesebbet alkot. **A kezdő szónokot azonban az itt tárgyalt rhetorikai ismeretek segitik ugy a beszéd elkészitésében, mint hatásos elmondásában.**

Az eddig felsorolt szabályok és tanácsokon kivül a beszédre vonatkozólag még a következőkre kivánjuk felhivni a kezdő szónok figyelmét:

A kezdő szónok mindig készitse el a beszédét teljesen, tanulja be és ugy mondja el. Sőt még az elmondást is gyakorolja. Aki igy kezd hozzá ahoz, hogy önmagát szónokká képezze, azt a kezdetnél tapasztalható csalódások nem fogják visszariasztani és végre is boldogul. A beszéd készitésénél ajánlatos a szerkesztés szabályainál adott tanácsok figyelembevételével a vázlat elkészitése. A gyakoroltabb szónoknak már elég, ha egyszerüen a vázlatot késziti el és a részletes kidolgozást előadás közben is végezheti. Azonban még az ilyen szónoknak is azt tanácsoljuk, hogy ne térjen el a vázlattól. Csak nagyon kevés az oly szónokok száma, akik értékes rögtönzött beszédeket tudnak mondani.

A szónoknak első feladata legyen, hogy a tárgyat alaposan tanulmányozza át. Különösen a munkásmozgalmi kérdésekkel foglalkozó szónoknak kell erre nagy gondot forditani, mert a munkásgyüléseken szokásos a szónokhoz kérdéseket is intézni. Vannak egyes emberek, akik hajlandók bármiféle tárgyról minden előkészület nélkül is beszélni. Az ilyen szónok nem ád semmi értékeset. Mint mondani szokás, csak "hasból" beszél és a saját, meg a közönségnek idejét lopja. Csak az a szónok számithat elismerésre, akinek a beszéde nem üres, hanem van benne valami értékes gondolat is.

A beszédnek legyen mindig valami alapgondolata, valami "magja," aminek a megvilágitása a szónok célja. Nem szükséges, hogy a tárgy "eredeti" legyen, azonban a szónok a tárgykörhöz uj gondolattal is járuljon hozzá. A szónok átdolgozhatja mások gondolatait, de szószerint mások irásait vagy beszédeit ne mondja el. Ha valamit idéz, akkor nevezze meg az idézet szerzőjét, vagy a forrást, ahonnan veszi.

Az előadásban sem kell más, ismertebb szónokokat utánozni. Leghelyesebb a természetes viselkedés. Általában ugy viselkedjen a szónok, hogy a közönség kellő tiszteletet mutasson iránta. Ha tulságosan szinészkedik, vagy nagyon erélytelen, félénk, akkor a közönségben nem tudja felkelteni azt a tiszteletet, amely okvetlenül szükséges ahoz, hogy kellő érdeklődéssel kisérjék a szavait.

A beszéd hosszára nem lehet határozott szabályt adni, mert az függ a tárgytól és azon körülményektől, amelyek közt a beszédet el kell mondani. A tulságos hosszu beszédet azonban minden körülmények között kerülni kell. Inkább legyen a beszéd rövid, mint hosszu. Munkásgyüléseken szokásos ugyan másfél órás beszédeket is mondani, de az egy órás beszédeket szivesebben veszi a hallgatóság. Az a szónok, aki tulhosszura nyujtja beszédét, visszaél a közönség tehetetlenségével és ahelyett, hogy megnyerné céljainak a közönséget, ellenszenvet támaszt maga és gyakran az általa hirdetett eszme iránt is.

A beszédeket rendesen a közönség megszólitásával kezdjük. A polgári szónokok nagy sulyt helyeznek a megszólitásra, mert ezzel mintegy a közönség kegyeibe akarják magukat behizelegni. A munkásgyüléseken azonban "émelygősen" hangzanak a hosszas és alázatos megszólitások. Az egyszerü "elvtársak" vagy "munkástársak" teljesen elegendő és megszokott megszólitások.

A beszéd befejezésére elő kell késziteni a hallgatókat. A mikor aztán elmondottuk a befejezésre szánt szavakat, ne folytassuk tovább a beszédet azon ürügy alatt, hogy valamit előbb "elfelejtettünk." Az elfelejtett dolgoknak a beszéd végén való elmondása sokkal többet árt, mint használ. A beszéd vázlatának elkészitésénél a következő sorrendet követhetjük:

1. Megszólitás.
2. A tárgy időszerüsége.

3. A tárgy definiciója.
4. A tárgy története.
5. Az előadás célja.
6. Általános ismeretek a tárgyról.
7. Uj adatok.
8. A legfontosabb érvek.
9. Ellenérvek és azok cáfolatai.
10. A szaktekintélyek idézése.
11. Példák és párhuzamok felsoro lása.
12. Öszefoglalás.
13. A konkluzió kimondása.
14. Az értelemre vagy az érzelmekre való hivatkozás.

BESZÉD VÁZLAT.

Az alábbiakban bemutatjuk egy beszédnek a vázlatát. A beszéd cime:

Ipari szolidaritás.

Megszólitás. Tisztelt Munkástársak!

Időszerüség. Mindannyian élénken emlékszenek még az angol bányászok sztrájkjára, amely rémületbe ejtette nemcsak Anglia, de az egész világ kapitalistáit. A nagy rémületre az adott okot, hogy a bányászokal szolidaritást vállaltak a velük szövetségben álló szállitó munkások és a vasuti alkalmazottak is. A nagy rémület azonban egyszerre nagy ujjongás váltotta fel, amikor a szállitó munkások és a vasutasok vezetői e két szervezet nevében a szolidaritás feladására határozták el magukat. Igy tehát tisztán láttuk, hogy az ipari szolidaritás milyen fontos szerepet tölt be a munkásság harcaiban és azért megérdemli ez a tárgy, hogy bővebben is megismerjük.

Története. **A szolidaritás** fogalma nem uj dolog. A munkásmozgalom résztvevői már nagyon régen ismerik. Szolidaritás alatt a munkások eddig nagy általánosságban azt értették, hogy szolidaritást vállaltak azzal a munkással, akit sérelem ért a munkáltató részéről. Megtörtént néha, hogy nem egyes munkással, hanem munkáscsoporttal vállaltak szolidaritást.

Definició. Ha magunkévá tesszük azt az igazságot, hogy a munkásosztály érdekei azonosak az egész világon, akkor a szolidaritás fogalmát az egész munkásosztályra kell értenünk. Miután az is közismert tény, hogy a munkásság ereje a munkaerejében nyilvánul, és miután a munkások iparok szerint dolgoznak együtt, a munkásság erejének az **ipari szolidaritás** utján adhat kifejezést.

Cél. Ezen előadás meg fogja önöket győzni arról, hogy az ipari szolidaritás az a fegyver, amellyel a munkásosztály megvivhatja a felszabaditásáért folyó küzdelmet. De egyben az ipari szolidaritás fegyverével küzdhet legsikeresebben a mindennapi előnyökért folyó harcaiban is. Ezért a munkásságnak olyan szervezetekben kell egyesülni, amelyek az ipari szolidaritás fegyverével küzdenek.

Általános ismeretek. Az ipari szolidaritás fegyverének hatásos volta ma már nagyon természetesnek látszik. Azonban mindezek dacára még ma is tekintélyes számu taggal rendelkező szervezetek azt tartják, hogy a munkások szolidaritását korlátozni kell. Ily korlátok gyanánt megjelölik a vallást, a bőr szinét, a nemzetiséget, a nemet, de leginkább a szerszámot. Az ilyen szervezetek, (szakszervezetek) azt tartják, hogy a munkások csak akkor vállaljanak szolidaritást egymással, ha azonos szerszámokkal dolgoznak. Sőt még az azonos szerszámmal dolgozók közül is megtagadták a közösséget azokkal, akiknek más szinü bőrük volt, vagy más vallás hiveinek mondották magukat. De megtagadták a szolidaritást azoktól is, akik nem voltak képesek lefizetni a magas felvételi dijakat. Az ilyen munkások aztán kénytelenek voltak sztrájktörőkké lenni. A szakszervezetek tehát nem a munkásosztály szolidaritását, hanem legfeljebb csak szakmai szolidaritást hirdettek és még azt is korlátozták.

Uj ismeretek. Az ipariszervezetek, mint pl. az IWW is, egyetlen nagy **osztályszervezetbe** tömöritik a munkásokat, tehát az ipari szolidaritás igazi kifejezői. Hogy az IWW megalapitói milyen tisztán látták az ipari szolidaritás fogalmát, az kitünt az 1912-ben folytatott lawrencei sztrájknál, amelyben a legkülönbözőbb nemzetiséghez tartozó, egymás nyelvét nem értő, szaktudással nem rendelkező munkástömegek vettek részt. Itt a jelszó az azóta közismertté lett "Egy mindért és mind egyért" volt. Az ipari szolidaritást tehát nem korlátozták, hanem az alatt az összmunkásság szolidaritását értették.

Hogy az IWW is ilyen módon értelmezi az ipari szolidaritást, annak több izben is kifejezést adott. 1920-ban a tagság helyeslése mellett kizárta azon philadelphiai rakodó munkásokat, akik municiót raktak hajókra az orosz ellenforradalmárok részére. Az angol bányászok sztrájkjával kapcsolatban pedig szolidaritásra szólitotta fel Amerika munkásait.

Az ipari szolidaritás hivei tudományos alapon állanak, mert maga az ipari szolidaritás a megfigyelés által szerzett tapasztalatok eredménye, ez pedig szigoruan tudományos módszerre vall. Az ipari szolidaritás hirdetői megfigyelték az iparok fejlődését és a szemük előtt folyó eseményekből azt következtették, hogy minden modern ipari államban a politikai hatalom csak árnyékává lett a gazdasági hatalomnak. A modern ipari államokban az igazi hatalom nem a politikai kormányok, hanem az ipar- és a pénzfejedelmek kezeiben van és ezt a hatalmat a munkások kizsákmányolásával tartják fenn, amire a termelő eszközök tulajdonjoga képesiti őket. Ezért a hatalmuk megtörésére az egyetlen ut a termelő eszközök felszabaditása a magántulajdonból, vagyis köztulajdonba vétele a munkások által. A termelő eszközök lefoglalása azonban csak a termelés szinterén mehet véghez, tehát **ipari akció** utján, amihez elengedhetetlen a munkások ipari szolidaritása.

Ellenérvek. Vannak, akik a munkásság felszabaditásához elegendőnek tartják a politikai állam meghóditását. Ezek azzal érvelnek, hogy a politikai állam meghóditása után a megszerzett politikai hatalommal a kizsákmányolást meg lehet szüntetni. Láttuk azonban, hogy több európai országban a szociáldemokrata pártok hatalomra jutottak és még sem tudták megszüntetni a kizsákmányolást, sőt éppen ellenkezőleg, annak védőivé lettek.

Szaktekintélyek. Már Marx és Engels kimondották a "Kommunisták Kiáltványá"-ban, "Világ proletárjai egyesüljetek!" Ez világos felhivás az ipari szolidaritásra.

Fontos adatok. Valójában azonban a munkásságnak nem a termelő eszközökre, hanem a **termelvényekre** van szüksége. Csak a termelvények elkészitésének céljából kellenek a gépek. A gép azonban még nem elegendő a termeléshez. Nem elegendő a gép a munkaerő együttvéve sem. A termelvények előállitására szükségünk van a termelő szervek bizonyos szervezettségére. A termelő szerveket ma a kapitalizmus a profit érdekében tartja munkában, vagyis a profit érdekében a kapitalizmus kifejlesztette azon munkaszervezeteket, amelyek bizonyos termelvényeket előállitanak. A munkásoknak át kell venni ezen munkaszervezeteket, hogy a termelést irányitani tudják. A munkásoknak azonban nemcsak egy műhelyben, hanem az egész iparban, sőt az össztermelésben is kooperálni kell. **Mással érvényt kell szerezni az ipari szolidaritásnak a legtágabb értelemben.** Ilyen ipari szolidaritás nélkül hiába vesszük birtokunkba a gépeket, a termelést nem tudjuk folytatni. Csakis az iparok szervezése, a tudatos s rendszeres termelés, másszóval az ipariszolidaritás képes meghozni azt a jólétet, amely nélkül a munkásság felszabaditása nem érne sokat.

Összegezés. Az ipari szolidaritásra tehát szükség van a nemzetközi munkásmozgalom szempontjából. Szoviet Oroszország és annak idején a Magyar Tanácsköztársaság is ezt kérték a világ munkásságától. De szükség van az ipari szolidaritásra ugy a mindennapi bérharcoknál, mint a termelőeszközök lefoglalásánál is. Miután a termelő eszközöket a termelés szinterén kell lefoglalni, azt csak az együtt dolgozó munkások szolidaritása estén lehet keresztül vinni és megint csak a teljes ipari szolidaritás az, amely erőt ad ahoz, hogy a termelő eszközöket meg is tudjuk tartani.

De legfőképpen szükség van az ipari szolidaritásra azért, mert csak ez tesz képessé bennünket a termelő eszközök hatásos használatára. Csak az ipari szolidaritással tudjuk előállitani azon javakat, amelyekre a társadalomnak szüksége van és a bérrabszolgaság megszüntetése csak akkor válik a munkásság javára.

Konkluzió. Az Egyesült Államokban, — sőt nagyitás nélkül mondva, talán az egész világon az Industrial Workers of the World (Világ Ipari Munkásai) szervezet fejezi ki legtökéletesebben az ipari szolidaritást. Elvinyilatkozata, szerkezeti formája, harci taktikája, mind az ipari szolidaritás kifejezésére törekszenek. És miután az uj társadalom lényegét az képezi, hogy az emberek milliói az ipari szolidaritás alapján termelik meg szükségleteiket az IWW már most épiti az uj társadalmat, mert épiti azokat az ipari szervezeteket, amelyek az ipari szolidaritást érvényre juttatják.

Felhivás. Az IWW tudatában fontos missziójának hivja fel a világ összes bérmunkásait, hogy csatlakozzanak ipari szervezeteihez és siettessék azt a társadalmat, a melyet nem a profit, hanem az ipari szolidaritás fog irányitani.

A vita.

Vita alatt az olyan beszédeket értjük, amelynél két vagy több ellenfél bizonyos kérdésben az igazságot akarja megállapitani, illetőleg mindkét fél az általa elfoglalt álláspontot védi, vagyis az igazát bizonyitja. Az angol nyelvü országokban a viták sokkal népszerübbek, mint Magyarországon. Amerikában is igen gyakoriak a közérdekü kérdések felett rendezett nyilvános viták. A vitáknál természetesen a szónoknak minden képességét igénybe kell venni, sokkal jobban, mintha csak egyszerü beszédet tartana. Vitánál a következő általános szabályokat vehetjük figyelembe:

1. Először is meg kell állapodnunk a tárgykörben. Ennek olyannak kell lenni, hogy ugy a közönséget, mint a vitázó feleket érdekelje. Tegyük fel, hogy a kiválasztott tárgykör a halálbüntetésre vonatkozik.

2. A tárgykörből kiválasztjuk a vita **propozicióját,** a vita kérdését. Ennek élesnek kell lenni ugy, hogy arra az **igen** vagy **nem** szóval válaszolni lehessen. Ha a vita propozició nem éles, akkor a vitázók más és más szempontból szólnak a tárgyhoz és vitázás helyett "elmennek egymás mellett," — mint mondani szokták. Tegyük fel, hogy a vita a halálbüntetés tárgyköréből folyik, de minden élesebb propozició korlátozása nélkül. Ebben az esetben az egyik vitázó a halálbüntetés erkölcsi hatásáról, a másik esetleg a halálbüntetés szükségességéről beszél és egyáltalában nem lesz vita. Ha azonban ebből a tárgykörből megszabják ezt propoziciót: "A halálbüntetés eltörlendő." Ebben a vitatkozónak csak arról lehet beszélni, hogy eltörlendő-e vagy sem. Szóval a vita élessé lesz.

3. Az első szónok késziti elő a közönséget a vita anyagának ismertetésére. Azért ez hosszabb bevezetést nyujt. A bevezetésben ismerteti a vita propozicióját és korlátozza a vita tárgyát.

4. A vitakérdés mindkét oldalát (pozitiv és negativ) ismertetjük.

5. Nemcsak a saját érveinket mondjuk el, hanem igyekezzünk az ellenfél érveit lerombolni. Azért a vitázónak el kell készülnie ugy, hogy a vitakérdés mindkét oldaláról felhozható érveket ismerje.

6. A befejezésnél összefoglaljuk ugy a saját, mint az ellenfél által adott érveket és a közönség itéletére, esetleg érzelmeire apellálunk.

A vitázónak még a szónoknál is nagyobb szüksége van arra, hogy vázlatot készitsen. Ebben a vázlatban helyet kell adnia az ellenkező oldalról felhozható érveknek is. Az ellenfél érveinek megcáfolása csaknem olyan fontos, mint a saját adatai igazságának a bizonyitása. Az előbbi vita propozicióra ilyenforma vázlatot készithetünk.

VITA-VÁZLAT.

A halálbüntetés eltörlendő.

Bevezetés. Midőn a mai társadalom kialakult, szükségesnek látszott, hogy valami büntetést alkalmazzanak azokra, akik a közönség érdekei ellen vétenek. A különböző büntetteknek elbirálása nagyon változóvá alakult, de egyes büncselekményeket már a legrégibb időkben is halállal büntettek. Ily bűntények voltak a gyilkosság, hazaárulás, erőszakos fosztogatás, hajó felgyujtása a nyilt tengeren, stb.

Definició. Kezdetleges társadalmaknál a gyilkosságot rendesen az áldozat rokonai vagy barátai megbosszulták. Ma ezt "vérbosszu" néven ismerjük. Azonban valamely bűnténynek ily módon való büntetését nem nevezzük halálbüntetésnek. Halálbüntetés alatt értjük a bűnténynek valamely állam törvényei nevében hivatalos fórumok által halállal való büntetését.

Története. A halálbüntetés eredete az ősidők homályába vész el. Az ókori leletek között talált iratok bizonyitják, hogy a halálbüntetést már az egyiptomiak, a babiloniaiak és a többi ókori népek alkalmazták. Az évezredeken át való használata révén az embereknek ma ugy tünik fel, mintha egészen természetes volna. Az uj idők azonban uj eszméket hoztak. A szabadabb gondolkodás, amely a civilizáció jellemző tulajdonsága, magával hozta a halálbüntetés elleni agitációt is. De mint az már magától értetődik, a konzervativ gondolkozásuak ragaszkodnak a régi intézményekhez, igy a halálbüntetéshez is. Most tehát vita kérdésévé lett, hogy vajjon a halálbüntetést megszüntessék-e vagy sem.

SZABÁLYOK A GYÜLÉSEK VEZETÉSÉRE.

A gyülés szervezése.

Bármi legyen is a gyülés célja, eredményes munkát csak ugy végezhet, ha a gyülést az általánosan elfogadott **parlamentáris szabályok** szerint vezetik. A munkásgyüléseken igen sok esetben nagyon kevés munkát végeznek, mert nem ismerik a szabályokat. Az olyan gyüléseken, ahol sem a gyülésvezető, sem pedig a tagok nem ismerik a gyülések vezetésénél alkalmazott parlamentáris szabályokat, az időt értéktelen vitákkal pazarolják el. Az ily szabályok ismerete tehát egyrészről az ülés sima menetét biztositja, másrészről pedig sok haszontalan pazarlástól óvja meg a gyülekezetet.

A gyülés szabályszerü vezetéséhez elsősorban is a gyülekezet szabályszerü szervezése szükséges. Ha a gyülés tagjai első izben jöttek össze, akkor az egybehivók valamelyike nyitja meg a gyülést. Ebben az esetben az ülés megnyitójának csak pár szóval kell megemliteni, hogy mi célból hivták egybe a gyülekezetet és fel kell hivnia a megjelenteket arra, hogy elnököt ajánljanak a gyülés vezetésére. Az elnök (gyülésvezető) megválasztása után megválasztják a többi tisztviselőket is.

Ajánlatos, ha minden gyülekezet választ a gyülésvezetőn kivül még egy **jegyzőt** is. aki a tárgyalások menetéről **jegyzőkönyvet** vesz fel. Szokásban van egyes helyeken **ajtónállót** is választani, aki a gyülésvezető részére szánt üzeneteket közvetiti és igy elejét veszi annak, hogy a tagok vagy a bebocsájtást kérő egyének (küldöttségek) a gyülést zavarják. Néha alelnököt is választanak, aki átveszi a gyülés vezetését, ha arra szükség van.

Állandó szervezeteknél, mint például gazdasági szervezetek, politikai pártosztályok, betegsegélyzők, stb. amelyek állandó tisztikarral rendelkeznek, a gyülést a tisztikar hivja össze. Amerikában a radikális munkásszervezeteknél rendesen a titkár hivja össze a gyülést és ő is nyitja meg, de azonnal felhivja a tagokat az ülésvezető megválasztására és csak azután kezdik meg az érdemleges tárgyalást.

Nagygyülések (konvenciók) megnyitásánál szokásban van egy **korelnök** megválasztása, miután ekkor még nem lehet tudni, hogy a gyülés a delegátusok közül kit fog igazolni. Ugyancsak ily módon választanak egy **korjegyzőt** is, aki ideiglenesen vezeti a jegyzőkönyvet. E két ideiglenes tisztviselő megválasztása után nyomban megválasztják az igazoló bizottságot, akik átnézik a delegátusok megbizó leveleit és jelentést tesznek arról a konvenciónak. A delegátusok igazolása után aztán megválasztják az állandó tisztviselőket. Egyes helyeken a gyülésvezetőt csak egy ülésszakra, másutt azonban a konvenció egész tartamára választják.

A tisztviselők megválasztása után veszi kezdetét a tulajdonképpeni gyülés. Előbb azonban ajánlatos, ha a gyülésvezető megállapitja, hogy a gyülekezet határozatképes-e. Nem volna észszerü tárgyalásokat kezdeni akkor, ha a gyülekezet nem hozhat az egyesületre kötelező határozatokat. Amerikában a radikális munkásmozgalomban csak a legritkább esetekben korlátozzák a gyülés határozatképességét. Rendesen a megjelentek számára való tekintet nélkül határozatképesek.

Az ülésvezető csak vezeti a gyülést, de a vitákban való részvételtől, amenynyiben lehet, tartózkodnia kell. Szavazatijogát is csak egyenlő szavazat esetén használja. Kivévén azon eseteket, amikor külön be akarja jelenteni, hogy mely oldalon foglal állást. Azonban vigyáznia kell arra, hogy a szónokok a tárgyhoz beszéljenek. A gyülés elé kell vinnie minden olyan levelet, üzenetet, stb., amelyet kivülről (nem a szervezet tagjai) a gyülés elé kivánnak terjeszteni. Szavazás alá kell bocsájtania minden olyan inditványt, amelyet szabályszerüen beterjesztettek és alá kell irnia minden olyan okmányt, amelyet a gyülekezet nevében adnak ki.

A gyülés menetéről a jegyző (jegyző-titkár) vesz fel jegyzőkönyvet. Bár a jegyzőkönyv helyes felvétele igen fontos, mindazonáltal csupán a jegyzőre van bizva, hogy a gyülésen elhangzott dolgokról mit örökitsen meg. Egyes fontos dolgoknál külön inditvány utján lehet rendelkezni, hogy valamely dolog bekerüljön illetőleg ne kerüljön be a jegyzőkönyvbe, amint azt a gyülés kivánja.

Az ügyrend.

Midőn az elnök (ülésvezető) megnyitja a gyülést, megállapitja a határozatképességet, előterjeszti az **ügyrendet.** Ezt az ügyrendet rendesen a titkár késziti el. Az állandó szervezeteknél az többé-kevésbbé azonos állandóan, a konvencióknál azonban a különleges viszonyokhoz alakul. Az amerikai radikális munkásmozgalom gyüléseinek gyakori ügyrendje a következő:

1. A gyülés megnyitása.
2. Az előző ülés jegyzőkönyvének felolvasása és hitelesitése.
3. Levelek felolvasása.
4. Tisztviselők és bizottságok jelentései.
5. Uj tagok felvétele.
6. Az előző gyülésről elmaradt ügyek. (Régi ügyek.)
8. (Ha az idő engedi) Szórakoztató vagy tudományos előadás.
9. A gyülés bezárása.

A vita vezetése.

A legtöbb gyülekezet azzal veszit sok időt, hogy a tagok cél nélkül vitáznak egymással. Mindenki szeretné keresztülvinni az akaratát és azért gyakran megfeledkeznek a szóbanforgó dologról. Ezt, vagyis a szóbanforgó dolgot rendesen a tisztviselők vagy bizottságok, esetleg valamely tag hozza szőnyegre, — mint mondani szokás. Tegyük fel, hogy valamelyik tisztviselő, vagy bizottság beterjeszti a jelentését. Ekkor az ülésvezető megkérdezi a gyülést, hogy mit kiván tenni a beterjesztett jelentéssel. A vita csak a gyülésvezető ezen kérdése után indul meg.

Minden tagnak, aki a tárgyhoz hozzá kiván szólni, jelentkeznie kell. **Beszédét csak akkor kezdheti meg, ha az ülésvezető erre felszólitja.** Ez a legelemibb rendszabály minden gyülekezetnél. Ennek helyességét maga a józan ész megmagyarázza, hiszen ellenkező esetben egyszerre többen is beszélnének. A jelentkezéseknek a különböző egyesületeknél különböző módjai vannak. Egyes gyüléseknél kézfelemeléssel, másutt azonban irásban jelentkeznek. Szokásban van az is, hogy a személyes jelentkezésnél a gyülésvezető csak annak ad szót, akit először vesz észre. Ezen szónok beszéde után mindenkinek ujból kell jelentkezni, aki beszélni akar. Másutt azonban a jelentkezőt a jelentkezés sorrendjében feljegyzik és az ülésvezető ugy szólitja fel őket. Az amerikai magyar munkásgyüléseken ez utóbbi szokás divik.

Nagyon fontos az, hogy a gyülekezet egyszerre csak egy dologgal foglalkozzon. Másképpen el sem képzelhető intelligens tárgyalás. Ezért kérdezi az elnök, hogy a gyülés mit kíván tenni a szőnyegre hozott tárggyal. Itt van a helye az első **inditványnak.** Az első felszólalónak tehát valamilyen inditványt kell tennie, pl.: "Ajánlom a jelentés tudomásulvételét." Vagy ha a jelentésben valamilyen ajánlat van, akkor abból kell megszövegezni az inditványt. **Csakis ilyen inditvány feltevése után lehet hozzászólni azután tovább is a tárgyhoz.**

Sok helyen egyenest kimondják, hogy **inditvány nélkül nincs tárgyalás.** Ez természetes is, mert ha nincs inditvány, akkor esetleg a szónokok mindegyike másról beszél és semmi határozatot nem lehet hozni. Az ülésvezetőnek tehát a jelentések után nem szabad megengedni semmiféle felszólalást, mielőtt valaki inditványt nem tesz. Ennek a pontnak a betartása nagyon sok időmegtakaritást jelent a gyülés számára.

Gyakorlatlan ülésvezető alatt, aki nem figyel erre, megesik, hogy a tagok egészen másról beszélnek és más dologra vonatkozólag hoznak határozatot, mint azt a jelentésből várni lehetett volna. Tegyük fel, hogy a könyvtárnok jelentésében a könyvtár kibővitését kéri. A gyülésnek ebben az ügyben kell határozni és igy az első felszólalónak azonnal indiványozni kell, hogy a könyvtárt ki kell bőviteni, illetőleg nem kell, már amint éppen az illető jónak véli. A további felszólalók aztán mind ehez az inditványhoz szólnak. Pártolják, illetőleg ellenzik azt, kiki a saját véleménye szerint és elmondják mindazon érveket, amelyekkel álláspontjukat védelmezik. Ha azonban az ülésvezető gyakorlatlan, megeshetik, hogy az ilyen könyvtári jelentés után a tagok azt határozzák, hogy a volt elnöknek diszoklevelet kell adni, vagy valami ilyesfélét, aminek semmi köze sincs a szóbanforgó tárgyhoz.

Egy másik igen fontos dolog az, hogy **az ülésvezető ne fogadjon el másik inditványt addig, amig az első fölött nem döntött a gyülés.** Az inditvány benyujtása történhetik szóval vagy irásban. Erre nézve minden gyülekezetnél megállapodott szokások az irányadók. Azonban az irásban benyujtott inditványt mindenütt szivesebben fogadják, mint a szóbeli inditványokat. Igen ajánlatos, ha az eredeti inditványokat (amelyek uj dologra vonatkoznak) irásban adjuk be. Nem tekintik eredeti inditványoknak az ülés felfüggesztésére, a napirendre való térés, stb. inditványokat.

Bármilyen is az inditvány, azzal csak akkor foglalkozhat a gyülés, ha annak **pártolói** is vannak. A legtöbb helyen elegendő egy pártoló, néhol azonban két pártolót kötnek ki. Az inditvány megtétele után tehát az ülésvezető megkérdezi, hogy pártolja-e valaki az inditványt. Az inditvány tárgyalását csak akkor lehet megkezdeni, ha a kivánt pártoló jelentkezik. Azon esetben, ha az inditványnak nem akad pártolója, akkor az automatikusan elesik és azzal a tagság nem foglalkozik.

Az inditvány és módositások.

Ha az inditványnak pártolói is vannak, akkor az tárgyalás alá kerül. Az ülésvezető tehát felteszi a kérdést, hogy ki kiván hozzászólni és a jelentkezőknek megadja a szót. Az inditványt fel kell olvasni a gyülés előtt. A tagok bármelyike a tárgyalások folyamán ujra felolvastathatja az inditvány szövegét, ha előzőleg azt nem értette meg.

Valahányszor a tagok valamelyike valami információt akar az inditványra vonatkozólag, azt mindig a gyülésvezetőtől kéri. Abban az esetben, ha az elnök a kért információt nem tudja megadni, az inditványozót vagy az arra hivatott tagot szólitja fel a felelet megadására.

A szabályok könnyebb megértésére egy példán kivánjuk bemutatni az inditványozást és a fölötte való tárgyalást. Tegyük fel, hogy a könyvtárnok uj könyvek vásárlását ajánlja. A jelentés tudomásulvétele után az egyik tag inditványozza, hogy a gyülés adjon felhatalmazást a könyvtárosnak uj könyvek megvásárlására. Az inditványt pártolás után a gyülésvezető tárgyalás alá bocsájtja. A tagoknak most alkalmuk van hozzászólni, akár ellenzik, akár pártolják az inditványt. Vannak azonban olyanok, akik egyelőre nem tartják időszerünek az inditványt. Az ilyenek megtehetik azt az inditványt, hogy az eredeti inditvány fölött később (pl. a pénztári jelentés után, vagy az árak beszerzése után) tárgyaljanak. Az ilyen inditványnak, amely az eredeti inditvány tárgyalásának idejét ki akarja tolni, helye van amennyiben az ügyrendi inditványnak tekinthető. Nincs helye azonban semmiféle más inditványnak, amelynek szelleme nem egyezik meg az eredeti inditvány szellemével.

Megesik azonban igen gyakran, hogy a tagok általában helyeslik az inditványt, de egyes részletekben változtatni kivánnak azon. Ebben az esetben **módositványt** nyujtanak be. A módositvány azonban nem lehet olyan, hogy az eredeti inditvány értelmét teljesen megváltoztassa. Például az előbbi inditvány esetén nem lehet elfogadni azt a módositványt, hogy az uj könyvek helyett uj könyvszekrényt vásároljunk. Ellenben elfogadható módositvány az, hogy 100 darab könyvet vásároljunk, amelyből 50 szépirodalmi és 50 tudományos munka legyen.

Midőn valamely tag módositványt vagy helyettesitő inditványt nyujt be a gyülésvezetőnek döntenie kell afölött, hogy elfogadható-e az, vagy sem. Tegyük fel, hogy az egyik tag benyujtja a könyvszekrény vásárlására szóló inditványt. Az elnök erre ugy dönt, hogy a módositványt nem fogadja el, miután az ellenkezik az eredeti inditvány értelmével. A módositvány benyujtója vagy megnyugszik a döntésben, vagy megfelebbezi a tagsághoz. Ebben az esetben a gyülés vezetését a titkár (esetleg az alelnök) veszi át. A módositvány benyujtója röviden elmondja, hogy miért nem tartja helyesnek az elnök döntését. Utána az elnök megindokolja eljárását. Ehez senki másnak nincs szava. A tagoknak nyomban szavazni kell, hogy helyeslik-e az elnök döntését, vagy sem. Megjegyzendő, hogy azon esetben, ha a tagsag nem hagyja jóvá az elnök döntését, ez nem jelenti azt, hogy az illetőt a gyülés vezetésére alkalmatlannak tartja. **Az elnök tehát tovább vezeti a gyülést és csupán abban az egy pontban a tagság döntéséhez kell igazodnia.** (A fenti példa esetén tehát a könyvtár-szekrény vásárlására vonatkozó módositványt tárgyalás alá kellene bocsájtani.)

A tárgyalás folyamán az ülésvezetőnek ügyelnie kell arra, hogy a felszólalók szigoruan az inditványhoz beszéljenek. Ha a szónok eltér a tárgytól az ülésvezető figyelmeztetheti, sőt ha a figyelmeztetés nem használ, meg is vonhatja tőle a szót. A szónoknak azonban minden alkalommal jogában áll a gyüléshez fellebbezni az elnöki döntés ellen, Abban az esetben, ha az ülésvezető el hagyja kalandozni a felszólalót, bármely tag szót kérhet az ügyrendhez." Ekkor bejelenti, hogy szerinte a felszólaló nem a tárgyhoz beszél. Az elnöknek ilyen esetben döntenie kell. Döntését azonban ugy az eredeti szónok, mint a felszólaló megfelebbezheti a tagsághoz.

Megesik az is, hogy valamely inditványhoz nem is egy, de számos módositványt nyujtanak be. Tegyük fel, hogy a fenti indiványunk esetén az egyik tag csak ötven könyv megvásárlását helyesli, mig a másik nem is százat, de százötven könyvet akar vásárolni. Ebben az esetben az első ugy kivánja módositani az inditványt, hogy kevesebb könyvet vásároljanak, mig a másik módositványa több könyv vásárlását célozza. Az utóbbi módositványt **"messzebbmenőnek"** mondjuk. Szokásban van, hogy előbb a messzebbmenő inditványok és módositványok fölött szavaznak. Ebben az esetben tehát az ülésvezető előbb azt szavaztatja le, hogy az egyesület vásárljon-e százötven könyvet? Ha ezt a gyülés elfogadta, akkor a második módositvány már automatikusan elesik.

Általános elfogadott szabály az is, hogy először a módositvány felett szavaznak és csak akkor szavaznak az eredeti inditvány felett, ha a módositványt elvetik. Igy például, ha a gyülés elfogadta, hogy 150 könyvet vásárolnak, akkor már nem is kell az eredeti inditvány fölött szavazni. Azonban ha a gyülés például elveti a módositványokat, még mindig fennáll az a kérdés, hogy akar-e egyáltalában uj könyveket vásárolni. Ennek eldöntésére le kell szavaztatni az eredeti inditványt.

Némely inditvány nagyon összetett és nemcsak egy, de számos ajánlatot (propoziciót) tartalmaz. Az ilyeneknél ajánlatos, ha részekre bontjük és minden propozició felett külön szavaz a gyülés. Elfogadott szabály az is, hogy az inditványozónak a szavazás előtt "zárszó"-hoz van joga, amelyben válaszolhat az elhangzott ellenvéleményekre. Az inditvány benyujtása és kellő pártolása után rendesen maga az inditványozó beszél hozzá először és igy kellőkép megmagyarázhatja. Az inditványokra és módositványokra általában a következő szabályokat kell megjegyeznünk:

1. Ha az inditvány több egymástól független, vagy lazán összefüggő propoziciót tartalmaz, akkor minden egyes propozicióval külön kell foglalkozni.

2. Minden olyan módositvány, amely az eredeti inditványon lényeges változtatást akar eszközölni, maga is módositható. Módositvány módositványának azonban már nem lehet további módositványa. Ily esetben előbb a második módositvánnyal kell foglalkozni, azután az elsővel és végre az eredeti inditvánnyal.

3. Inditvány vagy módositvány elfogadása után azon csak ujabb inditvány segélyével lehet bármit is változtatni.

4. A módositvány törülhet valamit az eredeti inditványból vagy hozzáadhat valamit, de lényegében meg kell egyezni az eredeti indivánnyal.

Ügyrendi viták.

A viták elsekélyedését gyakran azzal akasztják meg, hogy a vita, vagy a szónoki lista bezárását inditványozzák. Elfogadott szabály, hogy **ilyen inditványt nem tehet az, aki már hozzászólt a tárgyhoz,** mert akkor a felszólaló egyszerüen elmondaná a véleményét és nyomban inditványozná a vita lezárását. Ezzel elejét tudná venni annak, hogy az ellenfél is elmondja a nézetét. Azért a vita bezárását vagy a szónoki lista lezárását csak az inditványozhatja, aki még nem szólt hozzá a tárgyhoz, vagy midőn mindenki hozzászólt és már másodszor beszélnek. Szokásban van az is, hogy addig másodszor nem szólhat senki, amig vannak olyanok, akik először akarnak felszólalni a szóbanforgó kérdésben.

A vita berekesztése annyit jelent, hogy a tárgyhoz több szónoknak már nincs joga hozzászólni. Az ily inditvány elfogadása után nyomban következik a szavazás. A szónoki lista lezárása esetén azonban még a szólásra jelentkezettek valamennyije elmondja a mondanivalóját, sőt az inditványozónak joga van a zárszóhoz. Ugy a vita bezárására, mint a szónoki lista lezárásra vonatkozó inditványok ügyrendi inditványok, **amelyekhez mindkét részről csak egy felszólalót engednek meg** a legtöbb helyen. Egy tag beszélhet mellette s egy ellene. Azután nyomban dönt a gyülés szavazás utján.

Szavazás közben senki nem beszélhet. A szavazás elrendelése előtt azonban a tagoknak joguk van információt kérni. Általánosan elfogadott szabály az is, hogy az inditványt pozitiv formában kell feltenni szavazásra. A mi példánk esetén tehát a kérdést igy kell feltenni: "A szervezet vásároljon uj könyveket, aki mellette van az szavazzon kézfelemeléssel" (esetleg ingennel, kártyafeltartással, stb.) Némely esetben titkos szavazást szoktak kérni. A különböző szervezeteknél eltérő szabályok vannak arra, hogy a titkos szavazást mikor kell elrendelni. Azonban minden esetben áll az, hogy ha maga a gyülés kivánja, akkor el kell rendelni a titkos szavazást. Igy tehát a gyülésvezető helyesen jár el, ha a titkos szavazásra vonatkozó kérelmet ügyrendi inditványnak tekinti és erre vonatkozólag leszavaztatja a gyülést. Ebben az esetben bizonyosan a többség akaratát fogja érvényesiteni.

Ha valamelyik tag ugy találja, hogy az elnök nem pártatlanul vezeti a gyulést, vagy képtelen annak vezetésére, akkor kifogást emelhet az elnök ellen és inditványozhatja az elnök elmozditását. Ez az inditvány is közönséges ügyrendi inditványnak tekintendő, amely kellő pártolás után azonnal tárgyalás alá kerül. Abban az esetben, ha az elnök elmozditására vonatkozó inditványt kellő módon pártolták, az elnöknek nyomban át kell adnia helyét a titkárnak, (alelnöknek vagy valamelyik más tisztviselőnek,) aki az ülést vezeti addig, amig ezen inditvány sorsa felett nem dönt a gyülés. Ily esetekben az inditványozó megokolja az inditványát, a kifogásolt gyülésvezető válaszol reá és a tagság nyomban szavaz. Másoknak ehez az inditványhoz nincs szavuk. Abban az esetben, ha a gyülés elveti az inditványt, a kifogásolt elnök ujból átveszi a gyülés vezetését. Ha azonban a tagság az ülésvezető eltávolitása mellett dönt, akkor az ideiglenes elnök nyomban felszólitja a tagokat ujabb gyülésvezető ajánlására és megejtik a választást. Az ülésvezető elmozditása és az uj ülésvezető megválasztása közötti időben semmiféle érdemleges dolog nem kerülhet elintézés alá.

Az ülés berekesztését vagy felfüggesztését valamely szónok beszéde közben nem lehet kérni, illetőleg az ülésvezetőnek az ilyen inditványt nem szabad elfogadni. Zavaros ülések alkalmával azonban az elnök felfüggesztheti a gyülést a kedélyek lecsillapitására. Minden szónok nagyon helyesen teszi, ha nem él vissza a tagság türelmével. Ha az idő már előrehaladott, akkor ugy sincs valami sok értelme a hosszu beszédeknek. Általában a felszólalóknak alkalmazkodniok kell a gyülés hangulatához.

Ha az elnök hozzá kiván szólni a tárgyhoz, azt megteheti bármely szónok után, azonban ecélból ő sem szakithatja félbe egy felszólalónak sem a szavait, ha már egyszer megadta neki a szót. Az ülések sima lefolyása azonban korántsem függ magától az ülésvezetőtől, habár nagyon sokban hozzájárulhat, hanem magától a tagságtól. A tagoknak vigyázni kell arra, hogy ne használjanak olyan kifejezéseket, amelyekkel a hallgatókat megsértik vagy felingerlik.

Minden felszólalónak ügyelnie kell arra, hogy a gyülés méltóságát ne sértse meg illetlen szavak használata által. Tartózkodnia kell a személyeskedéstől. Aki ezen elemi szabályokat nem tartja be azt az elnök rendreutasithatja, sőt ismétlés esetén megvonhatja tőle a szót, esetleg ki is utasithatja. A gyülésnek természetesen ilyen esetben is joga van az elnöki intézkedést megváltoztatni, illetőleg jóváhagyni.

Az itt ismertetett szabályok betartása nemcsak a gyülések sima lefolyását, de az eredményes munka elvégzését is biztositják.

A SZÁMOK TANITANAK

(Folyt a 102-ik oldalról.)

Az automobil iparban az 1929. évben 530.711 munkás volt alkalmazva, mig 1931-ben már csak 334.674. Az autóipari munkások a statisztika összeállitásánál három csoportba osztandók. Még pedig motor az az gépmunkások, body munkások és végül a gummi munkások csoportja.

Év:	Gép vagy motor-munkások átlagos hetibére.	Body munkások átlagos hetibére.	Gumi munkások átlagos hetibére.
1929	$16.30	$16.51	$15.26
1931	$11.62	$12.86	$12.83

AZ ÉN ASSZONYOM

Irta: ADY ENDRE.

Mit bánom én, ha utcasarkok rongya,
De elkisérjen egész a siromba.

Álljon elõmbe izzó, forró nyárban:
"Téged szeretlek, Te vagy akit vártam."

Legyen kirugdalt, kitagadott, céda,
Csak a szivébe láthassak be néha.

Ha vad viharban átkozódva állunk:
Együtt hoskadjon, törjön össze lábunk.

Ha egy-egy órán megtelik a lelkünk:
Üdvöt, gyönyört csak egymás ajkán leljünk.

Ha ott fetrengek lenn, az utcaporába:
Boruljon rám és óvjon átkarolva.

Tisztitó, szent tüz hogyha által-éget:
Szárnyaljuk együtt be a mindenséget.

Mindig csókoljon, egyformán szeressen:
Könnyben, piszokban, szenvedésben, szennyben.

Amiben minden álmom semmivé lett,
Hozza vissza õ, legyen õ az élet.

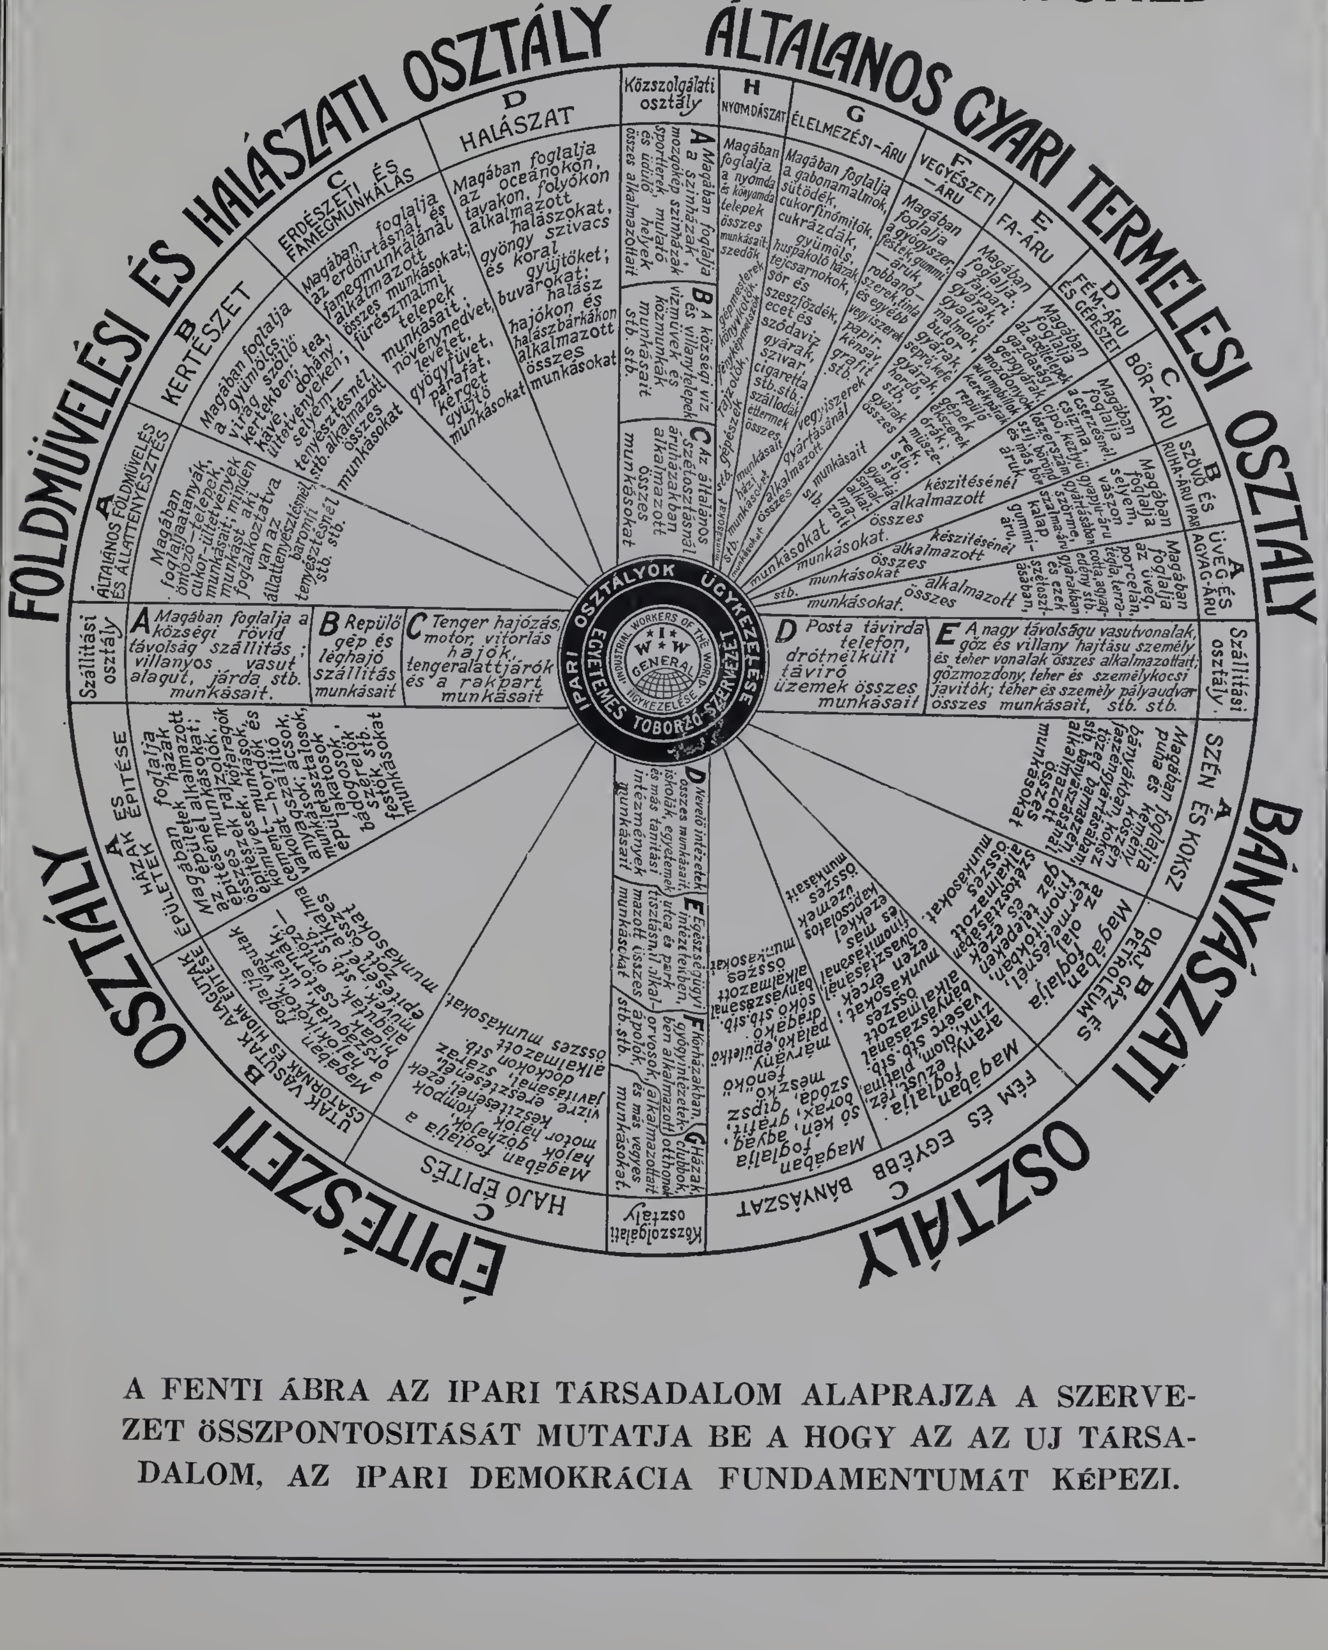
Kifestett arcát angyalarcnak látom:
A lelkem lenne; életem, halálom.

Szétzuzva minden kõtáblát és láncot,
Holtig kacagnók a nyüzsgõ világot.

Együtt kacagnánk végsõ bucsut intve,
Meghalnánk együtt, egymást istenitve.

Meghalnánk, mondván:
"Bün és szeny az élet,
Ketten voltunk csak tiszták, hófehérek."

EGY NAGY SZERVEZET
INDUSTRIAL WORKERS OF THE WORLD



FÖLDMÜVELÉSI ÉS HALÁSZATI OSZTÁLY
A ÁLTALÁNOS FÖLDMÜVELÉS ÉS ÁLLATTENYÉSZTÉS
Magában foglalja a tanyák, öntöző-telepek, cukor-ültetvények munkásait; minden munkást aki foglalkoztatva van az állattenyésztésnél, baromfi tenyésztésnél stb. stb.
B KERTÉSZET
Magában foglalja a gyümölcs, virág, szőllő kertekben; tea, kávé, dohány ültetvényeken; selyem-tenyésztésnél, stb. alkalmazott összes munkásokat
C ERDÉSZETI ÉS FAMEGMUNKÁLÁS
Magában foglalja az erdőirtásnál és famegmunkálásnál alkalmazott összes munkásokat; fürészmalmi telepek munkásait; növénynedvet, levelet, gyógyfüvet, parafát, kérget gyüjtő munkásokat
D HALÁSZAT
Magában foglalja az oceánokon, tavakon, folyókon alkalmazott halászokat, gyöngy szivacs és koral gyüjtőket; buvárokat; halász hajókon és halászbárkákon alkalmazott összes munkásokat
Közszolgálati osztály
A Magában foglalja a szinházak, mozgókép szinházak, sporttérek, mulató és üdülő helyek összes alkalmazottait
B A községi viz és villanytelepek, vizművek és közmunkák munkásait stb. stb.
C Az általános szétosztásnál áruházakban alkalmazott összes munkásokat
ÁLTALÁNOS GYÁRI TERMELÉSI OSZTÁLY
H NYOMDÁSZAT
Magában foglalja a nyomda és könyvnyomda telepek összes munkásait: szedők gépmesterek könyvkötők fényképészek rajzolók stb. gépészek stb. házi munkásokat
G ÉLELMEZÉSI-ÁRU
Magában foglalja a gabonamalmok, sütődék, cukorfinómitók, cukrászdák, gyümölcs, huspakoló házak, tejcsarnokok, sör és szeszfőzdék, ecet és szódaviz gyárak, szivar, cigaretta stb. stb.; szállodák, éttermek összes munkásait
F VEGYÉSZETI-ÁRU
Magában foglalja a gyógyszer, festék, gummi-áruk, robbanószerek, tinta és egyébb vegyiszerek, papir, kénsav, grafit stb. vegyiszerek gyártásánál alkalmazott összes munkásokat
E FA-ÁRU
Magában foglalja a faipari gyárak, gyalulómalmok, butor gyárak, sepró, kefe gyárak, hordó, stb. gyárak összes munkásait stb.
D FÉM-ÁRU ÉS GÉPÉSZET
Magában foglalja az acéltelepek, gazdasági gépgyárak, mozdonyok, automobilok, kerékpárak, repülő gépek, ékszerek, órák, müszerek, stb. stb. gyártásánál alkalmazott összes munkásokat.
C BŐR-ÁRU
Magában foglalja a cserzésnél, csizma, cipő, kesztyü, lószerszám, szij, bőrönd és más bőr áruk készitésénél alkalmazott összes munkásokat.
B SZÖVŐ ÉS RUHA-ÁRU IPAR
Magában foglalja selyem, vászon, gyapju-áru gyártásában, szőrme, szalma-áru, kalap, gummi-áru készitésénél alkalmazott összes munkásokat
A ÜVEG ÉS AGYAG-ÁRU
Magában foglalja az üveg, porcelán, tégla, terra-cotta, agyag-edény stb. gyárakban és ezek szétoszt-ásában, stb. alkalmazott összes munkásokat.
Szállitási osztály
A Magában foglalja a községi rövid távolság szállitás; villanyos vasut alagut, járda stb. munkásait.
B Repülő gép és léghajó szállitás munkásait
C Tenger hajózás, motor, vitorlás hajók, tengeralattjárók és a rakpart munkásait
D Posta távirda telefon, drótnélküli táviró üzemek összes munkásait
E A nagy távolságu vasutvonalak, gőz és villany hajtásu személy és teher vonalak összes alkalmazottait; gőzmozdony, teher és személykocsi javitók; teher és személy pályaudvar összes munkásait, stb. stb.
IPARI OSZTÁLYOK ÜGYKEZELÉSE
EGYETEMES TOBORZÓ SZERVEZET
INDUSTRIAL WORKERS OF THE WORLD
I W W
GENERAL
ÜGYKEZELÉSE
BÁNYÁSZATI OSZTÁLY
A SZÉN ÉS KOKSZ
Magában foglalja puha és kemény szén bányákban, koksz-gyártásban, tőzeg, barnaszén stb bányászásánál alkalmazott összes munkásokat
B OLAJ GÁZ PETROLEUM ÉS
Magában foglalja az olaj, gáz termelésnél, az finomitókban, telepeken és ezek szétosztásában alkalmazott összes munkásokat.
C FÉM ÉS EGYÉBB BÁNYÁSZAT
Magában foglalja arany, ezüst, réz, ólom, platina, vasérc, zink, stb. stb. bányászásánál alkalmazott összes munkásokat; ezen ércek olvasztásánál, finomitásánál és más ezekkel kapcsolatos üzemek összes munkásait
Magában foglalja só, kén, agyag, borax, grafit, gipsz, szóda, mészkő, fenőkő, márvány, palakő, épületkő, drágakő, sókő stb. stb. bányászásánál alkalmazott összes munkásokat
Közszolgálati osztály
D Nevelő intézetek összes munkásait, iskolák, egyetemek és más tanitási intézmények munkásait
E Egészségügyi intézetekben, utca és park tisztásnál alkalmazott összes munkásokat
F Kórházakban, gyógyintézetekben alkalmazott orvosok, ápolók, stb. stb.
G Házak, clubbok, otthonok alkalmazottait és más vegyes munkásokat.
ÉPITÉSZETI OSZTÁLY
A HÁZAK ÉS ÉPÜLETEK ÉPITÉSE
Magában foglalja házak épületek alkalmazott épitésénél alkalmazott munkásokat; épitészek, rajzolók, kőfaragók, összeszerelők, munkások és épitőmesterek, kőmüvesek, hordók, ácsok, cement-, anyagszállitók, vakolók, munkások, asztalosok, bádogosok, épületlakatosok, festők, szerelők stb. munkásokat
B UTAK VASUTAK ALAGUTAK CSATORNÁK ÉS HIDAK ÉPITÉSE
Magában foglalja a hajókikötők, vasutak, országutak, utcák, hidak, csatornák, alagutak, öntöző-müvek, stb. épitésénél alkalmazott összes munkásokat
C HAJÓ ÉPITÉS
Magában foglalja a hajók, gőzhajók, motor hajók, kompok készitésénél, ezek vizre eresztésénél, javitásánál, szárazdockokon stb. alkalmazott összes munkásokat.

BÉRMUNKÁS NAPTÁR 1942

AZ
INDUSTRIAL WORKERS OF THE WORLD
ELVINYILATKOZATA

A MUNKÁSOSZTÁLY és a munkáltató osztály között semmi közösség nincsen. Nem lehet béke mindaddig, amig éhség és nélkülözés található a dolgozó emberek milliói között s az élet összes javait ama kevesek birják, akikből a munkáltató osztály áll.

● E két osztály között küzdelemnek kell folynia mindaddig, mig a világ munkásai mint osztály szervezkednek, birtokukba veszik a földet, a termelő eszközöket és megszüntetik a bérrendszert.

● Ugy találjuk, hogy az iparok igazgatásának mind kevesebb és kevesebb kezekbeni összpontosulása a szakszervezeteket (trade unions) képtelenné teszi arra, hogy a munkáltató osztály egyre növekvő hatalmával felvegyék a küzdelmet. A szakszervezetek olyan állapotot ápolnak, amely lehetővé teszi, hogy a munkások egyik csoportját az ugyanazon iparban dolgozó másik csoport ellen uszitsák és ezáltal elősegitik, hogy bérharc esetén egymást verik le. A szakszervezetek segitenek a munkáltató osztálynak a munkásokba beoltani ama tévhitet, hogy a munkáltatókkal közös érdekeik vannak.

● E szomoru állapotokat megváltoztatni és a munkásosztály érdekeit megóvni csakis olykép felépitett szervezettel lehet, melynek minden az egy iparban — vagy ha kell, valamennyi iparban — dolgozó tagjai beszüntessék a munkát bármikor ha sztrájk vagy kizárás van annak valamelyik osztályában, igy az egyen esett sérelmet az összesség sérelmének tekinti.

● E maradi jelszó helyett: "Tisztességes napibért tisztességes napi munkáért," ezt a forradalmi jelszót irjuk a zászlónkra: "LE A BÉRRENDSZERREL!"

● A munkásosztály történelmi hivatása, hogy megszüntesse a bérrendszert. A termelő hadsereget nemcsak a tőkésekkel való mindennapi harcra kell szervezni, hanem arra is, hogy folytassa a termelést akkor, amikor a bérrendszer már elpusztult. Az ipari szervezkedéssel az uj társadalom szerkezetét épitjük a régi társadalom keretein belül.

A náci uj világrend szimbóluma.

GERÉB JÓZSEF

I. W. W.

I.W.W. — Ez három betü egy munkásszervezet angol nevének röviditése. A szervezet teljes neve: **Industrial Workers of the World.** — magyarul: **A Világ Ipari Munkásai.***

A munkásoknak szervezkedése, — UNION, (egyesülés) nem uj keletü dolog. Adataink vannak arra, hogy az őskori Görögországban az Athen város környéki ezüst bányákban a munkások Krisztus előtt 413-ban összebeszéltek és sztrájkba mentek. **összebeszéltek,** vagyis egyesültek, szervezetet alkottak és együttesen cselekedtek.

Minden munkásszervezetnek ez a lényege: **összebeszélnek és együttesen cselekszenek.** Más szóval UNION-t alkotnak, bizonyos szabályokat, törvényeket hoznak saját számukra és azok értelmében **együttesen járnak el.**

Azonban munkás unionokról valójában csak a modern iparok kifejlődése óta beszélhetünk. Régente egész természetes volt, hogy minden iparos bizonyos idő multán mester lett, aki aztán tanulókat és legényeket alkalmazott. Eleinte a munkás és a mester között bizonyos családi kötelékhez hasonló viszony állt fenn. Igy az iparosok szervezetei, amelyek egyes országokban "Céh" név alatt voltak ismeretesek, ugy a mester, mint az alkalmazottak érdekeit védték. Az iparok fejlődése folyamán azonban az ily szervezetek mindinkább csak a mesterek érdekeinek védelmére szoritkoztak. És mert a munkáltatók érdeke a munkabérek lenyomását követelte, a mesterek szervezkedése a szervezetlen munkások végtelen elnyomásához és kizsákmányolásához vezetett.

A munkáltatók szervezete segitette a mestereket abban is, hogy az egymás közötti versengést az árak korlátozásával mérsékelte. Lassanként aztán a munkások is rájöttek, hogy nekik is össze kell beszélni, meg kell egyezni, hogy milyen áron adják el azt, amiből élnek, — MUNKAEREJÜKET.

Ettől aztán már csak egy lépés volt a valódi munkásszervezetek, az union-ok megalakitása. Elősegitette az ily szervezetek felépitését a magántulajdon szentségébe vetett évszázados hit is. A munkás is ilyen magántulajdonnak tartotta az ő szaktudását, melyet individuálisan, egymással versenyezve árultak. Most szövetkeztek és a munkaerejeük árát közösen szabták meg. Hogy milyen sikeres volt ez az eljárás, következtethetünk abból, hogy Angliában már 1800-ban törvényesen büncselekménynek mondták a munkások ilyen gazdasági egyesülését.

Szakszervezetek.

A munkás uniok azonban minden üldöztetés dacára is tovább fejlődtek. És mint mondottuk, SZAKTUDÁSUKAT VITTÉK ÁRUBA, SZAKTUDÁSUK ÉRTÉKÉNEK EMELÉSÉRE SZÖVETKEZTEK, azért az ily unionokat SZAKSZERVEZETEK névvel jelölték. A szakszervezetben minden szakmának külön unioja van, melyek között legfeljebb csak valami laza szövetség jött létre.

Egy ideig az ilyen szervezkedési forma elegendő is volt, mert a különböző iparok között csak nagyon kevés összeköttetés állt fenn. Csaknem minden mühelyben elkészitették a teljes ipari cikket és éppen azért a munkásoknak nagy szaktudásra volt szükségük. Az iparcikkek, ruházat, háziszerek, épületek, stb. általában egyszerüek voltak és igy természetszerüleg az ipar szakmákra oszlott. A szakmák szerinti szervezkedés tehát elegendőnek mutatkozott, mert bérharcok esetén a munkáltatók nem fogadhattak fel a szakmán kivül álló, tehát szakmai tudással nem rendelkező munkásokat.

---

*Mielőtt a szervezetet részletesebben ismertetnénk, meg kell jegyeznünk, hogy ezen szervezettel kapcsolatban az "ipar" szó fogalmát nem ugy értelmezzük, mint azt a magyar nyelvben megszoktuk. A magyar nyelv szerint a kőmüves, a gépész, az ács, stb. iparosok; ellenben a födmüvelő, a kereskedő, a tanitó, stb. nem tartoznak az iparosok közé. Az IPAR fogalma alá veszünk MINDEN TÁRSADALMILAG HASZNOS MUNKÁT, vagyis olyan munkát, ami az általános életszinvonal fenntartásához és fejlesztéséhez hozzájárul. Eszerint az arató munkás a földmüvelő iparban dolgozik, a tanitó a nevelésügyi iparban, az orvos a közegészségügyi iparban, stb.

Az iparok azonban rohamos fejlődésnek indultak. A mindinkább tökéletesebb gépek a munkát megosztották, a szakmai tudás leapadt s ma már a legtöbb nagyiparban szükségtelenné vált. Ma a nagyobb iparteleepeken a nagy tömeg munkásnak nincs szüksége szakmai tudásra, csupán egy kisebbségnek, akiket viszont számtalan szakmából válogatnak együvé. Egy nagy automobil gyárban például legalább 50 különböző szakmáju munkást találhatunk a nagy tömeg szakma nélküli munkás mellett. Mármost egész nyilvánvaló, hogy ha ezen munkásokat szakmáik szerint külön-külön szerveznénk, akkor jó részüket egyáltalán nem lehetne szervezetben egyesiteni, a többieket pedig számos, egymástól független, egymással mit sem törődő unionokban csoportositanánk és bérharcok esetén mig az egyik csoport sztrájkol a másik tovább folytatja a munkát és igy az egyik csoport segit leverni a másik csoportnak a harcát.

Az ipar öntudatos munkása.

Most már ez olyan nyilvánvaló, hogy mindenki látja. Éppen azért nagy dicsérettel kell megemlékeznünk az I. W. W. megalakitóiról, akik az ipari fejlődésnek ilyen menetét már 1905-ben látták és azért kimondották, hogy a MUNKÁSOKAT NEM SZAKMÁK HANEM IPAROK SZERINT KELL SZERVEZNI.

Kimondották, hogy a szakszervezkedés már nem szolgálja a munkások érdekeit, hanem éppen ellenkezők, utját állja annak. Olyan unionra van a munkásoknak szükségük, melynél bérharcok esetén, ha kell, a kérdéses ipar összes munkásai sztrájkba menjenek és ne segitsék letörni, hanem támogassák egymás bérharcait. De mert az amerikai nagy munkás szervezet, az American Federation of Labor **makacsul ragaszkodott, sőt ragaszkodik ma is a szakmai szervezkedési formához, szükségesnek tartották egy ipari szervezetnek, az Industrial Workers of the World szervezet megalakitását.**

A szakszervezetnek azonban az emlitett hibáin kivül más, igen lényeges hátrányai is vannak. A szakszervezet a mai állapotokat örökositeni igyekszik. Szakszervezeti elgondolás szerint a munkáltatóé minden termelvény és abból csak valamivel többet igyekszik szerezni a munkások számára. A szakszervezet valóban csak a munkaerőt ÁRULJA és igy fenn akarja tartani a mai rendszert, HOGY VEVŐ IS LEGYEN.

Ezzel szemben az I.W.W. megalapitói a marxizmus, illetőleg a tudományos szocializmus alapján állva kimondották, a munkások SZERVEZKEDÉSÉNEK VÉGCÉLLAL KELL BIRNIA. EZ A VÉGCÉL A BÉRRENDSZER MEGSZÜNTETÉSE.

A marxizmus továbbvitele.

Marx és társai kimutatták, hogy az a módszer, miként az élethez szükséges javakat előállitjuk, — termeljük, mint ezt a marxi irásokban mondják, állandóan fejlődik, változik. Az a rendszer, amiben most élünk és amelyet tőkés termelési rendszernek, avagy bér-rendszernek is neveznek, nem öröktől fogva létezik és nem is fog örökké tartani. Marx figyelte a társadalom fejlődését és észrevette ezt a változást. A mai társadalmi rendszer tehát nem azért változik meg, mintha Marx és társai valami formát gondoltak volna ki egy uj rendszer számára és aztán a követőik ezen rendszert szeretnék megvalósitani, hanem csak a fejlődés irányát figyelve kimutatták, hogy miként az előbbi feudális, vagy hübéri rendszert felváltotta a mai tőkés termelési rendszer, ugy ezt is egy fejlettebb rendszer fogja követni, **amelyben a termelés irányitása a dolgozók kezében lesz és nem a profitért fognak termelni, hanem, azért, mert az ipari termelvényekre szükségünk van** és igy a mai nagy szükséget az ipari termelvényekbeni bőség fogja felváltani.

Marx és társai azonban nem mondották ki, hogy a munkásság miként fogja átvenni a termelést. Éppen azért neveztük őket tudományos szocialistáknak, hogy nem bocsájtkoztak jövendölésekbe. És az ő korukban ez csak jövendölés lett volna. Azonban félszázaddal később az I.W.W. megalakitói már tisztábban láthatták ezt a dolgot és kimondották, hogy a munkásság átveheti az iparokat, ha iparilag szervezkedik, mert az ipari szervezetben meg van mindazon erő és tudás, ami az ipar folytatásához szükséges. Igy az I.W.W. ÁLTAL KÉPVISELT FORRADALMI IPARI UNIONIZMUS A MARXIZMUSNAK EGY LÉPÉSSEL VALÓ TOVÁBBVITELE.

Az I.W.W. megalapitói marxi felfogásukról adtak bizonyitékot, midőn az elvinyilatkozatban ezt mondották:

ELVINYILATKOZAT

A munkásosztály és a munkáltató osztály között semmi közösség nincsen. Nem lehet béke mindaddig, amig éhség és nélkülözés található a dolgozó emberek milliói között s az élet összes javait ama kevesek birják, akikből a munkáltató osztály áll.

E két osztály között küzdelemnek kell folynia mindaddig, mig a világ munkásai mint osztály szervezkednek, birtokukba veszik a földet, a termelő eszközöket és megszüntetik a bérrendszert.

Ugy találjuk, hogy az iparok igazgatásának mind kevesebb és kevesebb kezekbeni összpontosulása a szakszervezeteket (trade unions) képtelenné teszik arra, hogy a munkáltató osztály egyre növekvő hatalmával felvegyék a küzdelmet. A szakszervezetek olyan állapotot ápolnak, amely lehetővé teszi, hogy a munkások egyik csoportját az ugyanazon iparban dolgozó másik csoport ellen uszitsák és ezáltal elősegitik, hogy bérharc esetén egymást verik le. A szakszervezetek segitenek a munkáltató osztálynak a munkásokba beoltani ama tévhitet, hogy a munkáltatókkal közös érdekeik vannak.

E szomoru állapotokat megváltoztatni és a munkásosztály érdekeit megóvni csakis olykép felépitett szervezettel lehet, melynek minden, az egy iparban — vagy ha kell, valamennyi iparban — dolgozó tagjai beszüntessék a munkát bármikor, ha sztrájk vagy kizárás van annak valamelyik osztályában, igy az egyen esett sérelmet az összesség sérelmének tekinti.

E maradi jelszó helyett: "Tisztességes napibért tisztességes napi munkáért," ezt a forradalmi jelszót irjuk a zászlónkra: "LE A BÉRRENDSZERREL!"

A munkásosztály történelmi hivatása, hogy megszüntesse a bérrendszert. A termelő hadsereget nemcsak a tőkésekkel való mindennapi harcra kell szervezni, hanem arra is, hogy folytassa a termelést akkor, amikor a bérrendszer már elpusztult. Az ipari szervezkedéssel az uj társadalom szerkezetét építjük, a régi társadalom keretein belül.

Elérkezett az idő.

Minél fejlettebbek lettek az iparok, annál inkább kitünt, hogy az I.W.W. megalakitóinak igazuk volt. Kitünt, hogy a magántulajdon jogra épitett kapitalista termelés csődöt mondott. Csak óriási méretü pangások és gigászi világháboruk során át tartotta magát az utóbbi évtizedekben. Most már világszerte hirdetik, hogy ha rövidesen el nem pusztul ez a rendszer, akkor vele pusztul az emberi civilizáció is.

Nyilvánvaló lett hogy a termelést észszerü módon szabályozni kell. A kapitalista rendszerben fennálló rendszertelenséget, őrült versenyt, fel kell váltani a tudatosan irányitott TERVEZETT TERMELÉSNEK. Az utóbbi évtizdek alatt kitünt, hogy az emberiség legfontosabb kérdései: mennyi élelemre, ruhára, lakásra, nevelésre, szórakozásra, stb. van szükségünk? És hogyan lehet ezen szükségletet a leggazdaságosabban és a legnagyobb bőségben kielégiteni?

Az észnélküli versenyző, csak a

profitot néző és kereső anarchisztikus tőkés termelés nem tud feletetet adni ezen kérdésekre. AZ EDDIG ZABOLÁTLAN TERMELÉST TERVSZERÜEN IRÁNYITANI KELL, HOGY A NÉPMILLIÓK SZÜKSÉGLETEIT KIELÉGITSÜK. **De ki fogja az iparokat irányitani?** Az utolsó évtized azt a kérdést tolta előtérbe, mert azt, hogy irányitani kell, már nyilvánvalóvá lett.

Az I.W.W. megalakitói kimondották, hogy a termelést CSAK MAGUK A MUNKÁSOK IRÁNYITHATJÁK ÉS KONTROLÁLHATJÁK SIKERESEN IPARI SZERVEZETEIK SEGÉLYÉVEL. Az első világháborut követő forradalmak során Oroszországban sikerült a termelés irányitását kivenni a BIRTOKOSOK kezeiből, de a kontrol nem a munkásság, hanem a forradalmat irányitó politikai párt kezébe ment át. Mindazonáltal a termelést birtokló tőkésosztályt világszerte rémületbe ejtette és készségesen segitették a fasizmus minden fajtáját, amelyek révén kiváltságaikat remélték megtartani.

A fasizta terror-szervezetek azonban olyan erőre tettek szert, hogy fegyveres hatalmukra támaszkodva saját maguk részére követelték az iparok fölötti uralmat. Ellensulyozásukra az ugynevezett demokrata államokban egy uj középosztály került hatalomra, amely a termelés részleges kontrolálását követelve a munkástömegekre támaszkodik, hogy hatalmukat megtarthassák és tovább fejlesszék.

Az Ipari Állam.

Ezekkel szemben az I.W.W. AZT HIRDETI, HOGY A MUNKÁSSÁG. HA IPARILAG SZERVEZKEDIK, KÉPES AZ IPAROK IRÁNYITÁSÁRA, A TERMELÉS ÁTVÉTELÉRE DIREKT, MINDEN KÖZBEESŐ MÁS OSZTÁLY SEGITSÉGE NÉLKÜL. Nincs szükségünk semmiféle politikai szervezetre, bürokrata csoportra, még kevésbé kalandorok által vezetett terrorszervezetekre, amelyek szerepe társadalmi életünkben ugyanis csak ideiglenes lehet és csak a népmilliók szenvedéseit fokozzák.

Az I.W.W. azt tartja, hogy minden dologképes férfi és nő, bizonyos korhatárok között, kell, hogy HASZNOS MUNKÁT VÉGEZZEN. Másszóval mindenki, aki más emberek munkatermelvényeit használja fel élete fentartásához, kell, hogy SZINTÉN HASZNOS MUNKÁVAL FIZESSEN AZON JAVAKÉRT, AMIT ÉLVEZ. És aki hasznos munkát végez, az valamely ipari szervezetben megtalálja helyét.

Az I.W.W. felfogása szerint az összes hasznos munkákat felölelik a következő ipari departmentek: 1, földmüvelés; 2, bányászat; 3, épitészet; 4, általános gyári termelés; 5, szállitás; 6, közszolgálat. Ezen departmentek aztán ujra alosztályokra oszlanak. Természetesen az iparok fejlődésével a beosztás is megváltoztatható, ha arra szükség lesz.

Már most könnyen érthető, hogy egy ilyen department központi tisztviselői vannak arra hivatva, hogy megmondják, mennyi termelvényre van szükség és hogy annak előállitására mennyi nyersanyag, munkás, stb. kell. És mert EZEK AZ IGAZÁN FONTOS KÉRDÉSEK, A PARLAMENTEK ÉS EGYÉB POLITIKAI INTÉZMÉNYEK MINDINKÁBB ALÁRENDELTEBB SZEREPET FOGNAK JÁTSZANI, MIG AZTÁN VÉGLEGESEN MEGSZÜNNEK.

A jövő IPARI ÁLLAMÁNAK parlamentjében tehát nem politikai pártok kiküldöttjei lesznek, hanem az IPAROKNAK A KÉPVISELŐI. Az I.W.W. hiveinek ezt a megállapitását sokan tévesen POLITIKA-ELLENES MAGATARTÁSNAK MINŐSITIK. Valójában azonban ez csak kifejezése annak, hogy a fejlődési menetet miként látják. És amennyiben ez a fejlődés azt mutatja, hogy a munkásságon kivül álló politikai rétegekre a jövő ipari államában nincs hely, a politikai pártokkal és intézményeikkel nem törődve hirdetik a forradalmi ipari unionizmus eszméjét, **hogy az uj társadalom szerkezetét már most épithessék, a régi társadalom keretein belül.**

● ● ● ● ●

Amerikai városok között a legkevesebb halálozási arányt Denver Colorádó tartja.

VISI ISTVÁN

AMERIKA TERMELÉSI ÉS FOGYASZTÁSI SZÜKSÉGLETE

MINDEN gondolkozó munkás tudja, hogy meg tudnánk termelni a teljes szükségletet Amerikai lakossága részére, még a mai haszonrendszer keretein belül is, ha az üzemek urai megengednék, hogy azokat teljes üzembe tarthassuk. Azt is megállapithatjuk, hogy sokkal többet tudunk termelni, mint a fogyasztási lehetőség, még akkor is, ha minden családnak 2000 dollár minimális évi jövedelme volna, nem ugy mint jelenleg, amikor 19 millió családnak évi jövedelme alul van, még az 1.500 dolláron is.

Amerika 1929-ben érte el az üzem teljesitmény tetőfokát, ezen évben termeltek 81 billió dollár értékben, vagyis a termelési és más szolgálati pénzforgalom kitette a fenti összeget. De a külföldi befektetések utáni haszon és a spekulációkon nyert összegekkel kapcsolatosan 92 billió dollár forgalmat mutatnak ki, az 1929-s évre, azonban mi csak az első, azaz a 81 billió dolláros forgalmat vesszük alapul, melyben benne van a haszon, kamat, adó és más forgalom, mely a mai rendszernek fontos alkatrészei.

Persze, hogy a 81 billió dollár értékü termelvényt nem tudtuk visszavásárolni, 1929. évben amikor még legtöbben dolgoztunk is, ami azért történt, mert fizetések fejében csak 65 billió dollárt kaptunk vissza, melyben még a nagy korporáció elnökeinek fél millió dolláros fizetései is benne vannak. Tehát 16 billió dollárt haszon és kamat fejében vontak ki a forgalomból, ami előidézte azt, hogy a raktárakban maradt az áru, nem birtuk viszszavásárolni.

Az állami vizsgálatok, reportok szerint, melyet a Brooking Institution két könyvben foglalva adott ki, még ezen legjobb évben 1929-ben is, csak átlag 70%-ban voltak az üzemek termelőkepessége kihasználva. Tehát ha teljes mértékben használtuk volna az üzemeket és szerszámokat, 100 billión felül termelhettünk volna. Viszont, hogy elhasználhassuk amit termelhettünk volna, föltétlen szükséges, hogy legkevesebb 2000 dollár jövedelme legyen minden családnak és hogy az esetleges 20 billió dolláros hasznot ujabb befektetésekbe tudják tenni a kapitalisták. Amire kilátás nincsen, sem egyik sem másik föltétlen szükséges követelményre, mely még esetleg lehetővé tenné a mai rendszer további normális funkcióját.

Csak egy kis szemléltető példa, hogy mennyit termeltünk és mennyit tudtunk volna termelni:

	1929-ben	képesség
Áram klwt. ..	91,700.000	200,000.000
Automobil	5.621,715	8.562,758
Cement	209,600.000	257,487.000

Ezt lehetne folytatni sok más lékben használják a meglevő üzemeket fejlesztési ipar, ahol ma alig 38 százalékban használják a meglevő üzemeket és mégis az előállitási költség háromszorosát számitják a fogyasztásért, mely nagyban csökkenti a villany használatát minden felé.

Eltekintve attól a közismert ténytől, hogy a verseny rendszer alapján leginkább a "boom" évben 1929-ben, a munkánk, üzemeink és szállitási eszközeink energiáját, teljesitő képességét 40 százalékban elpazarolták, a hirdetések, ügynökségek, a szétosztási rendszer duplikációja és az ország egyik részéről a másik részére való szállitások olyan cikkeknek, melyet ottan is gyártanak, például Chicago vidékéről New York vidékére és viszont.

Fogyasztási képességünk.

Elegendő volna a 100 billió dolláros évi termelés elfogyasztására, ha egy-egy családnak legalább két ezer dolláros évi jövedelmet, fogyasztási lehetőséget adnának, melyet most 23 millió családtól megtagadnak. De ezek között 8 millió családnak még az évi 750 dolláron aluli összeg áll fogyasztásra. A kormány beismerése szerint a 8 millió család lassu éhinségben szenved, rosszul táplált, minden betegségre hajlamos gyermekeket nevelnek, melyet a mostani kényszersorozás adatai fényesen bizonyitanak.

Tehát csak elméletben számithatjuk, hogy 100 billió dollár értékü árut eltudnánk fogyasztani. Ez átlag véve a szükségleti cikkeknél tenne nagy különbséget, mint az élelem, ruha és hajlék, melyek nagyobb mértékben és jobb minőségben a következő formában emelnék az évi fogyasztást:

Élelem, 3.100 millió; Otthon 4.700; Ruhanemü 2.200; Vegyes szükségletre 5.400, tehát összesen 15 billió 400 millió dolárral több mint 1929-ben a legjobb évben elfogyasztottunk.

Egyes családnak, hogy élvezhesse az amerikai életszinvonalat, a következő mennyiségben kellene használni a szükségleti cikkeket: Évente élelemre 770; otthonra 690; ruhára 350; vegyes szükségletre 240 dollár, összesen 2.450 dollár. Ez a szükséglet az 1929. évi árakhoz van szabva, mely az egész cikk alapja képen van elfogadva, mint legjobb éve az amerikai termelési és fogyasztási adatoknak.

Ezt még a prosperitás legjobb évében sem tették lehetővé 23—24 millió család részére, akiknek évi bevétele a megkivánt összegen alul volt még a legjobb évben is. Tehát csak üres frázis, az amerikai életszinvonal, legfeljebb csak, vagy hat millió család élvezheti azt, az Amerikában élő 29 millió család közül. Ez az arány mindég a szegényebb családok szaporodását és a gazdagabb családok kisebbségét idézi elő, amint a vagyon mindég kisebbedő osztály kezébe kerül, amig a szegénység mindég többeket érint. Ez megváltoztathatatlan törvénye a kapitalista rendszernek.

Az összehasonlitás kedvéért, megemlitjük, hogy miből mennyit fogyasztott el az olyan család, amelynek évente 10.000 dollár állt rendelkezésére: Élelemre 1.060; otthonra 2.290; ruhára 900; vegyes szükségletre 2.500 dollárt, mely mennyiséget nem sokkal mulják felül a sokkal több jövedelemmel rendelkező családok évi fogyasztásai, mert egy ember csak egy ember helyett tud enni, ruházkodni. Legfényesebb életmód tehát 7.290 dollárba kerül, melyet még nem nevezhetünk pazarlásnak. Ezen felüli összeget vagy elpazarolják, vagy ujabb befektetésekbe teszik, hogy még nagyobb jövedelemre tehessenek szert és még több befektetéseket eszközölhessenek.

Az alábbi statisztikai kimutatást száraznak, de szükségesnek találjuk, hogy ezeket a horribilis számokat, jobban az eszünkbe véssük és tudjunk számadatokat idézni, amidőn ezekről beszélgetünk, tanácskozunk.

Egyes ember termelőképességének emelkedése százalékokban az 1900. évet véve 100 százaléknak: 1922-ben 115; 1929-ben 136 százalék, tehát egy ember 36 százalékkal többet termelt, mint 1900. évben. Ezt átlag véve alapul, belefoglalva a mezőgazdaságot is, mely nem haladt lépést az ipari termelés fokozásával, vagyis, amig némely iparban egyes ember termelő képessége a 200 százalékot érte el, a mezőgazdaság alig emelkedett 15 százalékot az 1900-as évhez viszonyitva.

Bevételek a termelő és szétosztási intézmények és munkásainak:

	Végösszeg	Munkásoknak	Üzemek száma	Üzemek haszna
1900. évben	$17,035.	$ 9,650.	6,080.	....
1910. évben	27,726.	15,090.	7,263.	$ 4,077.
1915. évben	35,200.	19,361.	8,489.	5,233.
1920. évben	67,325.	42,283.	15,335.	8,310.
1925. évben	75,918.	46,855.	15,960.	10,252.
1929. évben	81.940.	53,350.	14,188.	12,164.

(A dollárok milliókban értendők)

VINCE SÁNDOR

EMLÉKEZÉS EGY NYÁR-ÉJSZAKÁRA

“Az égből dühödt angyal
Dobolt riadót a szomoru földe . . . .”
Ady.

FORRÓ agusztus volt Pesten 1919-ben.

A vörös hadsereget a románok már julius vége felé szétszórták a Tiszánál. A vesztett háboru után a munkásság ép ugy elvesztette az ország feletti hatalmát, mintahogy az uri osztályok elvesztették hatalmukat, amikor az ő hadseregüket verte szét a szövetségesek ereje az Isonzónál 1918-ban.

A népbiztosok — a szabad elvonulás feltétele alatt — átadták az ország kormányzását a Peidl Gyula elnöklete alatti szakszervezeti kormánynak.

A kötést a szovjetkormány nevében Weltner Jakab és Bőhm Vilmos csinálták Bécsben a francia Allizée és az angol Cunningham megbizottakkal.

A Bécsben tartózkodó magyar arisztokraták és tőkések, élükön a ravasz Bethlen Istvánnal nagyon örültek a kötésnek, koncentrációs kormányt szorgalmaztak, udvaroltak a szociáldemokratáknak és siettek az első gyorsvonattal Pestre azt gondolva, hogy egy-kettőre visszaállitják a régi nemes Magyarországot.

Hát olyan gyorsan a dolog nem ment, ahogy ők elképzelték, tévedtek, mert kihagyták a számitásból a háboru utáni lumpenburzsoáziát és annak főhadiszállását a pesti Sörház uccát.

A Sörház uccában székelt az Ébredő Magyarok Egyesülete és az egyesületben ott szónokolt már éjjel-nappal Friedrich István fiatal magyar-sváb gépészmérnök.

Ez a lelkiismeretlen kalandor, valamikor a Károlyi párt tagja volt és a háboru kitörése után Mátyásföldön “A Nép” cimen lapott adott ki, melyben barátjával, Csizmadia Sándorral, a később teljesen elzüllött, árulóvá lett proletár-költővel bátor háboru ellenes cikkeket irt.

A háboru végső vonaglásának sorsdöntő napjaiban, mikor a Nemzeti Tanács még nem merte kikiáltani a forradalmat — Friedrich István már megszimatolta, hogy vége van a Hapsburg dinasztiának, megszervezte az uccát, megostromolta a Lánchid őrségét és parázs kis csatával vezette be a hamarosan kitörő forradalmat. A forradalom kitörése után bement a hadügyminiszterium épületébe, elfoglalta az államtitkári szobát és kinevezte önmagát hadügyi államtitkárnak. Nekem még ebben a minőségben adott telefonon utasitásokat Kolozsvárra különféle katonai természetü dolgokban.

A Károlyi kormány néhány hét mulva kidobta az államtitkárságból megalázta és megbélyegezte — mondván róla, hogy megbizás nélkül, stréber kalandorként ült be az államtitkári székbe.

A forradalomból kizavart embernek csak két utja lehet az életben. Vagy a teljes visszavonultságba, — vagy az ellenforradalomba vezető. És Friedrich az utóbbit választotta. Bement a Sörház uccai tanyára és élére állt a söpredéknek. Tehetségesebb bátrabb és lelkiismeretlenebb lévén a többi ott összeverődött kalandornál, — csakhamar ő lett a vezér.

Friedrichet a bécsi paktum és a grófok nem érdekelték. Egy csapat rendőrrel és egy szakasz kölcsönkért román katonával megint megrohamozta a Lánchidat, amelyen most már akadálytalanul jutott fel a miniszterelnöki palotába. Felérkezve — az ellenforradalom jogára és erejére hivatkozással — letartóztatta a szakszervezeti kormányt, kinevezte önmagát miniszterelnöknek, barátait minisztereknek átvette Magyarország kormányzását és elinditotta a fehér terror furiáit!

A zsidó és munkás gyülölet volt az uj politikai rend, az ugynevezett “keresztény kurzus elvi alapja. A vérontás, börtönzés, a kibacsök és a herélőkés voltak az “eszmeterjesztés” eszközei. Egy minden hatalmat kiszolgálni kész, gyáva hivatalnok-sereg, a hivatását nem tudó papság, a javaiért reszkető és az adófizetéstől irtózó polgárság és egy dologtalan életet veszélyben látó katonatiszti kaszt voltak a segitői és hatalomra juttatói a történelem eladdig legsötétebb gazfickóinak!

Megnyilt a magyar história leggaládabb fejezete: a fehér terror korszaka, Horthy Miklós uralma!

Pár hét mulva a magyar urak kezdték visszanyerni a bátorságukat. A bolseviki ördög veszedelme is mulóban volt már. Ugy látták, hogy miután a sváb-magyar gépészmérnök megmentette számukra a hazát — legjobb lesz, ha most már eltünik a balfenéken. Nem kellett már nekik ez a nagyszáju és üres parvenü, hát ki akarták rugni. De Friedrich már nem volt olyan könnyen kirugható, mint forradalmár korában. Hosszu és nehéz harca volt vele a magyar uri világnak, amig ki birta végezni. És végül is csak Garami Ernő segitségével sikerült ez nekik!

Érdemes feljegyezni a fehér terror történetét kutatók okulására, hogy ez hogyan történt.

—

Szeptemberre már elég erősnek érezték magukat a grófok, hogy megrohamozzák az első Friedrich kormányt. Egy-két vásárolható alakot könnyen megvettek maguknak Friedrich táborában, — a többit a magyar politika öreg hamiskártyásai már a szokott politikai intrikákkal intézték el. Megjött az első kormányválság, amikor az ellenforradalom még alig három hónapos volt csupán! Friedrich megérezte, hogy honnan fuj a szél; — bátor lépésre határozta el magát. A szociáldemokratákhoz fordult segitségért a közös ellenség legyürésére!

Egy éjjel megjelentek Nyul uccai buvóhelyemen a temesvári Roth Ottó, az aradi Varjassy Lajos és Preusz Mór, a Typographia szerkesztője. Ironbridge angol generális kocsiján és az ő tudtával jöttek és közölték, hogy Friedrich sürgősen tárgyalni akar a szociáldemokratákkal és ajánlatot akar tenni a kormány ujjászervezésére. Közölték azt is, hogy Friedrich — tett igérete szerint — véget akar vetni a terrornak és a szociáldemokratákkal akar összemüködni.

TIZENNÉGY ÉV

(Ady emlékéhez)

Zilah, Debrecen, Várad és Páris..
A gyorsvonat az éccakában fut.
Koporsó zárja, szemfedő fedi —
Valaki még ma csillagokba jut.

Valaki mindent elsirt, ami fájó,
Valaki öklöt rázott vakmerően,
Valaki szivárványt vetett az égre
Izzadságos, rossz magyar mezőn.

Illés szekerén ragadták az égbe,
Rongyos, szomoru, paraszt angyalok.
Tizennégy éve teritették testét —
Azóta folyton élő a halott.

Él, prédikál, dalol és követel
Csákok házára tüzcsóvát hajit,
Dózsa Györgyöknek koldus éhes népe
Igy még szívébe nem zárt valakit.

A história százszor megtaposta,
De él a föld s két uj paraszti rendje,
Nagy, számonkérő akaratok gyulnak
Te gyujtod őket, urunk, Ady Endre!

Pajzsunk, reményünk, bátor bizodalmunk
Ezernyi szörnyü véres poklon át,
A sirod partján állók felkiáltnak
Egy kemény, harci Jézus-Máriát.

Vezess Ady Endre!

Góra Lajos

A pesti rendőrség cellái és az összes pesti börtönök már zsufolásig tele voltak akkor a legjava szervezett munkásokkal. Az embereket a megvadult rendőri fenevadak ütötték, verték, kinozták. A párttitkárság zsufolva volt panaszkodó asszonyokkal, akiknek hozzátartozóit a rendőrök és katonai különitmények válogatás nélkül tartóztatták le és hurcolták el. Szörnyü időket éltünk át a párttitkárságban nappal — és még szörnyübbeket a bujkálásban éjszaka.

Természetesen nagyon örültem, hogy Friedrich egyszerre frontot akar változtatni és boldogan csatlakoztam Preuszhoz. Éjfél után értünk fel a várba az angol lobogóju kocsin. Friedrich már várt ránk és bevezetett a hires vörös szobába. Ott tárgyaltunk.

Amikor asztalhoz ültünk elmondta magát és azt mondta, választójogot, kal és az egész ellenforradalommal. Az októberi forradalom hivének vallotta magát és azt mondta, választójogot, közszabadságokat, köztársaságot és békét akar. Őszinteségét bizonyitandó kivett a zsebéből egy iv papirt, amelyen az uj kormány tagjai voltak felirva. Három miniszteri tárcát és hat államtitkárságot a szociáldemokrata pártnak ajánlott fel. Garamit külügyminiszternek akarta. Lovászyt nem akarta bevenni a kabinetbe, — de amikor mi ragaszkodtunk hozzá, beleegyezett. Nagyatádi Szabót azonban semmi körülmények között nem akarta.

“Ez a bitang paraszt a legkorruptabb embere a magyar politikának! — mondta — vegyük be helyette Sokorópátkai Szabót, aki intelligensebb is és tisztességes ember.”

A listát átvettük azzal, hogy másnap délelőttre összehivjuk a pártvezetőséget, előterjesztjük a javaslatot és értesitjük a határozatról. Megmondtuk neki, hogy még a tárgyalásra se volt megbizatásunk.

Reggel 4 órakor hagytuk el a palotát. Tárgyalásaink alatt egyszer Csilléry, másszor Ereky nyitott be, de látva, hogy Friedrich el van foglalva, — nem zavarták a tárgyalást.

Amikor Csilléry benyitott megkérdeztem tőle, hogy mi a terve ezekkel?

Friedrich igy felelt:

“Ha én a szociáldemokrata párttal együtt mehetek, akkor ezeket a senkiket mind egy szálig kirugom. Ezek zsidófalásból akarnak élni és ezzel akarják az éhező országot etetni. Én nem vagyok antiszemita.”

Mikor a tárgyalásokat befejeztük Preusz Mór a következő kérdéssel fordult Friedrichhez:

“Van-e tudomása róla miniszterelnök ur, hogy ma a Nap nyomdában kiszedtek egy nagy plakátot, amely közli Garami Ernőnek egy állitólagos nyugtáját, amit 700 font sterlingről adott Kunnak, valamilyen ezután végzendő sajtószolgálatért?!”

“Tudom! A plakátot én rendeltem! Azonnal intézkedem, hogy ki ne ragasszák!”

Ezzel elváltunk.

—

Reggel 8 órakor már a pártitkárságban voltunk mind a hárman Varjassy nem jött el. A pártvezetőségi tagokat telefon utján hivtuk össze. Kilenckor már kezdődött az ülés.

Elmondtuk, hogy hol jártunk az éjszaka és kértünk a kérdésben sürgős határozatot.

Peidl Gyula volt az első felszólaló, aki azt a véleményét fejezte ki, hogy Garami nem fog tárcát vállalni a Friedrich kormányban. Ha pedig Garami nem vállalja, — akkor ő se vállalja.

Buchinger összeszidott minket, hogy miért álltunk szóba ezzel a csirkefogó Friedrich Istvánnal és haragudott, hogy a pártvezetőség felhatalmazása nélkül tárgyaltunk.

Megnyugtattuk, hogy azok az elvtársak, akiket ütöttek-vertek a rendőrségen — majd megadják a felmentést, ha kijönnek. Erre Buchinger elhallgatott.

A jó emlékü Somogyi Béla szólalt fel ezután és kifejtette, hogy valamikor az volt a párt álláspontja, hogy a választójogért — az ördöggel is szövetkezünk. Ha a választójog elég értékes volt arra, hogy az ördöggel szövetkezzünk, akkor a tizezrével elfogott és kinzott elvtársaink szabadsági és élete még jobb arra, hogy akár egy csirkefogóval is szövetkezzünk! Somogyi ajánlotta, hogy fogadjuk el Friedrich ajánlatát.

A pártvezetőség többsége az elfogadás mellett látszott dönteni, amikor Payer Károly lépett a terembe és letette az asztalra a Friedrich plakátját a 700 fontról. Az ellenforradalom parvenüje elfelejtette a plakátot letiltani. Természetesen a pártvezetőség elutasitotta ajánlatát.

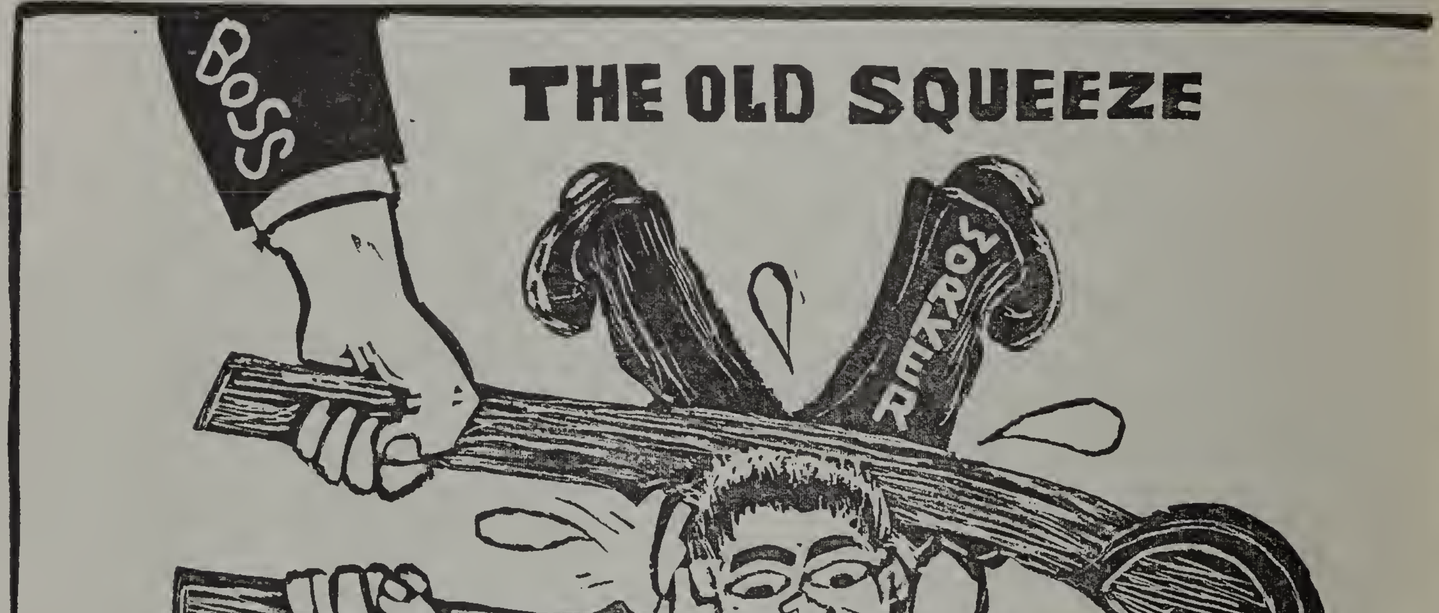
A választ én telefonáltam meg neki, élénken a szemére hányva, hogy megszegte az igéretét.

"Nem szegtem meg, — csak elfelejtettem," — ez volt a válasza.

Feledékenysége azonban a fejébe került.

Néhány hét mulva már az angoloknak se kellett. A Clark féle tárgyalások idején Garaminak már csak egy szavába került, hogy kiröpitsék a bitorolt miniszterelnökségből. Persze nem csináltunk jó cserét. Utána Huszár Károly lett a miniszterelnök.

Szörnyü idők! Bibliai idők! Hogy is mondja a jó öreg Károli Gáspár? "Disznók elejébe entették az kalárist."



A szervezeti ügyekkel nem törődő munkásság a munkáltató és a féker munkásvezér szoritójába kerül.

LEFKOVITS LAJOS

FONTOS A NEVELÉS IS

AZ IWW hivatalos nyomtatványain feltüntetett három csillag egyike a nevelés szükségességét jelképezi, amelylyel a munkásmozgalom eljuthat célkitüzéséhez, az ipari társadalom megvalósitásához. Nem elegendő, hogy a munkásság unió tagsági kártyával rendelkezzen, mert azt már elérték ugy a fél évszázados American Federation of Labor, mint az ujabban alakult Committee of Industrial Organization szervezetekben is. Ez a két szervezet magában foglalja Amerika dolgozóinak egy ötödrészét, sok helyen olyan erős ellenőrzéssel, hogy a munkatelepeken csak azok dolgozhatnak, akiknek a zsebében benne van az union igazolvány, a tagsági kártya.

Ennek ellenére lépten-nyomon azt látjuk, hogy a szervezet irányitásában a tagságnak, különösen, ha valaki más véleményen van, mint az unio vezetősége, nemcsak beleszólása nincsen, sőt a kizárásnak is kiteszi magát az illető. Ezeknek a szervezeteknek a tagsága tehát tulnyomórészt a tagsági jogát csak azért tartja, hogy a munkán maradhasson és a szervezettel szemben egyébb hivatást nem is ismer, mint, hogy fizetési kötelezettségének eleget tegyen. De maga az unio törvényei, tisztviselői sem kivánnak többet, sőt nem is akarják, hogy az egyszerü tag belekontárkodjon a szervezet irányitásába.

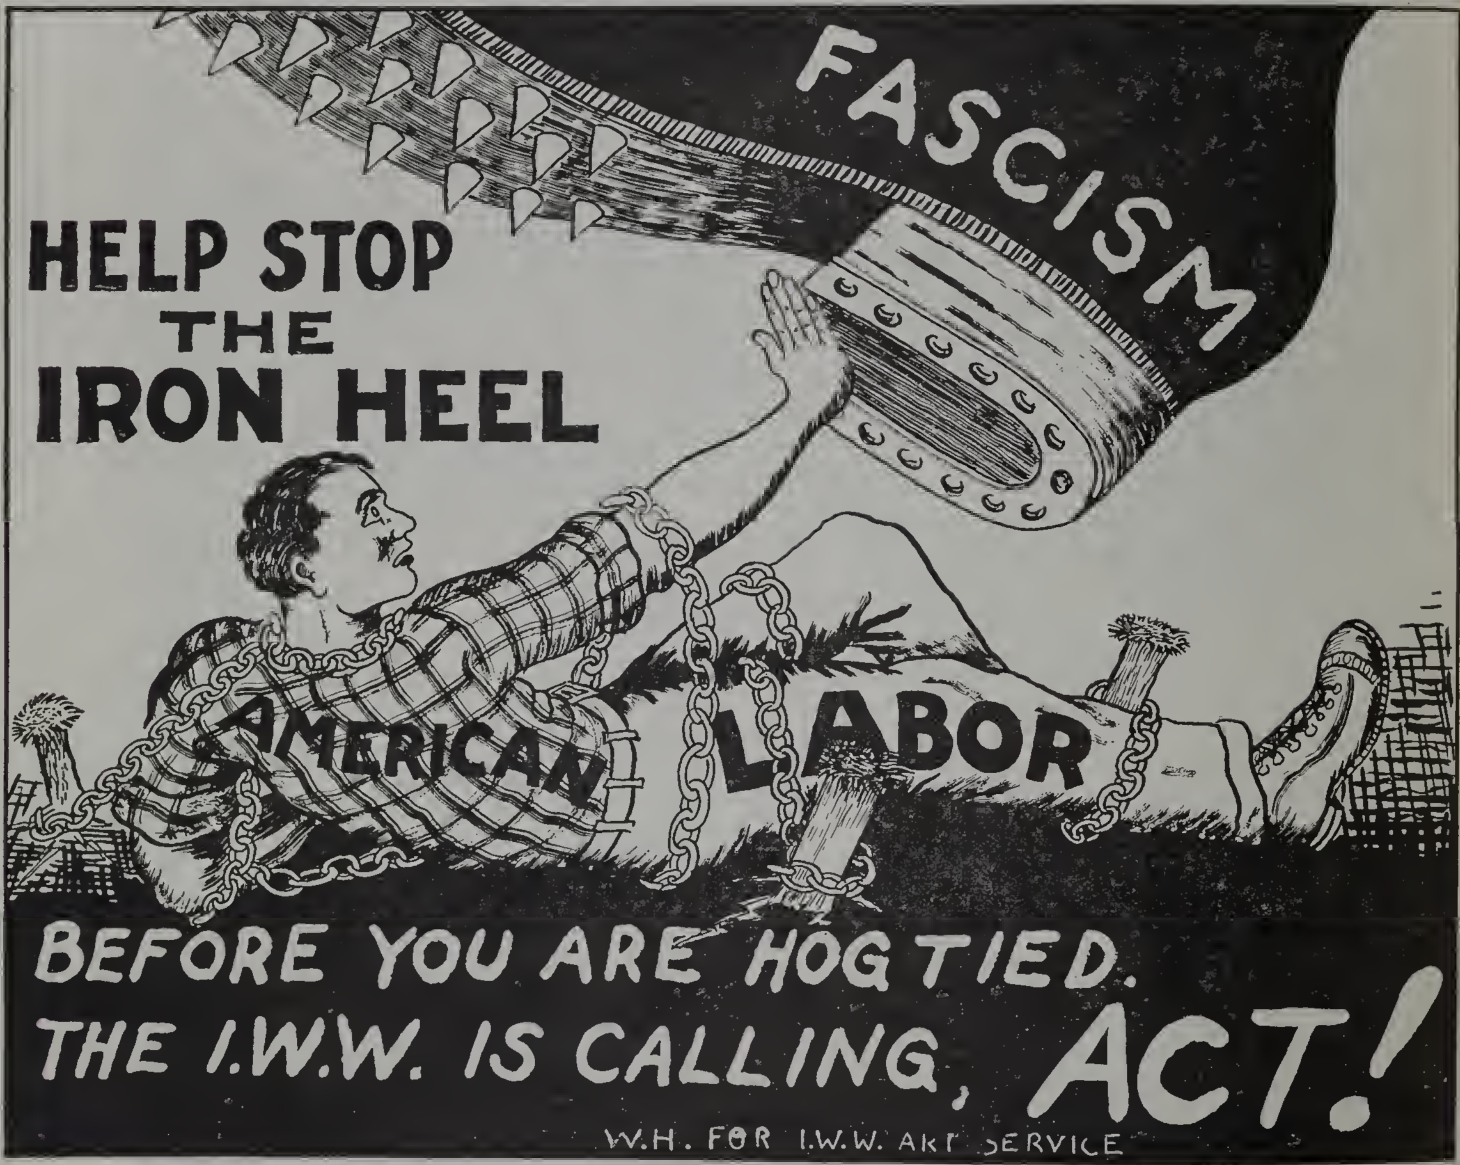
Ezzel ellentétben az IWW megalakulásának pillanatában megállapitotta, hogy a munkásságnak a nevelése nem kevésbbé fontos a szervezésnél. Nem szabad, hogy a munkások egyszerü munka-piacnak tekintsék a szervezetüket, hogy csak azt érezzék a szervezettel szemben, hogy annak őrködni kell, hogy a munkáltatók a megállapitott munkabért megfizessék és a munkaórát betartsák, szóval, hogy a munkást a munkán sérelem ne érje. Ezt mint emlitettük elvégzi és gyakorolja más szervezet is. De meg kell a munkásokkal ismertetni, hogy az a munkabér, az a munkaidő amellyel ma dolgoznak csak azért van, mert a szervezet nem elég erős ahhoz, hogy megvalósithassa célkitüzését, a bérrendszer eltörlését, a magántulajdon megszüntetésével az ipari társadalom megvalósitását. Ezen rendszerben mindenkinek dolgoznia kell és ezért a közösség látja el mindazzal, amire szüksége van és amit a technika fejlődésével az emberiség előnyére, javára kitermelni lehet.

Más szavakkal: a munkásságot a szervezete keretében meg kell ismertetni azzal, hogy ugy a mai, mint minden későbbi rendszernek ők az igazi fenntartói, nélkülök nincs sem egyéni, sem társadalmi élet. A munkást a legtökéletesebb gép sem nélkülözheti, mert az emberi kéz nélkül a gép hideg, holt tárgy marad. Ennek számtalan bizonyságát láthatjuk napjainkban. Ha a munkások tudatára jönnek annak, hogy nem nekik kell függni a ma munkáltatóitól, hanem a társadalomnak a munkásosztály szükségéhez és igényeihez kell alkalmazkodni, berendezkedni, el fog tünni mind azon körülmény, amely eddig sullyal nehezedett a munkásosztály, a munkáscsaládok vállaira.

Az IWW-nak ezt a célkitüzését a nevelés szükségességére már egy egész könyvtárat kitevő irodalomban és cikkekben vetettük papirra. És, hogy ezuttal itt foglalkozunk azzal, azért történik, mert e sorok irójának sok alkalma van annak a megismerésére, hogy a szervezetnek eme célkitüzésében sok hiányossága van. Sokan, az IWW üzemekbe beszervezett munkások sem haladtak tovább a szervezet fontosságát illetőleg, mint az előbb kihangsulyozott unionok tagsága. Nincs meg bennük a harc tovább vitelére az ösztönösség. Ennek a kinevelésére nem történik meg mind az, aminek történni kellene. Csak Clevelandon közel egy tucat IWW shop van, részben az egész telep, részben egyes departmentek beszervezésével már több esztendő óta. Bár ezeknek a mühelyeknek a munkásai ragaszkodnak az IWW szervezethez, de nem kapják meg azt a nevelést, hogy nekik nemcsak a munkatelepüknek a szervezetben való megtartását kell szemelőtt tartaniok, de ugyan abban az iparban a többi mühelyek megszervezésében is segédkezet kell adniok. Igy történik meg, hogy esztendők óta egyetlen ujabb munkatelep beszervezésével nem növekedett a clevelandi ipari szervezetünk.

Egy másik szomoru állapot, hogy munkásemberek, akik évtizedeket töltöttek a munkásmozgalomban, értelmesen, öntudatosan magyarázzák a szervezet forradalmi célkitüzését, hogy annak másokat is megnyerhessenek, a hozzájuk legközelebb állókat, a feleséget, a gyermekeket elmulasszák meggyőzni a maguk eszméjének, felismerésének a helyességéről.

Igaz, hogy ez a jelenség nem kizárólagosan nálunk van meg, de a munkásmozgalom történetét kiséri végig kezdetleges elindulásától mind a mai napig. Ki nem tudna családi viszályokról a férj, az apának a mozgalomban való részvételeért? Ennek a következménye, hogy a munkás elsősorban nem a vele együtt élő feleségét győzi meg a mozgalomnak az, hogy



FASCISM
HELP STOP THE IRON HEEL
AMERICAN LABOR
BEFORE YOU ARE HOG TIED.
THE I.W.W. IS CALLING, ACT!
W.H. FOR I.W.W. ART SERVICE

Az I.W.W. cselekvésre szólitja Amerika munkásait a fasizmus rémuralma ellen.

egymás között gyakori, vagy állandó a veszekedés, civódás. Sok esetben a férj, hogy elkerülje a szóváltást, az esti gyülések után nem igyekszik haza, de a mozgalom nevében más elmaradásokat rendez, amit mind a mozgalom terhére irnak otthon és az ellenségeskedés jobban fokozódik. Ennek kapcsán a feleség, az anya egyenesen ellenségnek neveli a gyermeket nemcsak a mozgalomnak, de sok esetben az apának is, ami sulyosságát akkor éri el, amikor a gyermek önállóvá lessz és bizony sok családapát öregségére a szó szoros értelmében kitagadják.

Éppen ugy, mint ahogy sok munkás előtt ujból és ujból kell a helyes szervezkedés szükségességét és előnyeit ismertetni, amig megértve azt közibénk áll, ugyan ugy a nők, az asszonyok meggyőzését sem szabad feladni és józanul, intelligensen, szép szóval és az életadta ezer és ezer példával meg kell győzni arról, hogy ő is érezze azt, hogy a gyár, a munkatelep, erejét, egészségét rombolja szét a munkásnak olyan kis jövedelmezésért, ami a legjobb esetben csak azt szolgálja, hogy amig a munkás dolgozik, megszerezhessék a szükséges élelmet, ruhát és lakást. Hogy amikor a munka megszünik, már mindezeknek a beszerzése lehetetlenné válik. Minden asszonnyal meglehet értetni, hogy ha ő is és ők is valamennyien, együtt a munkásokkal tudatában lesznek annak, hogy ez a rendszer helytelen, igazságtalan, a munkások a szervezetük segitségével és az asszonyok támogatásával ezt a rendszert megváltoztathatják. A munkásmozgalom lassu haladásának az igazi célja felé, nem kis mértékben akadályai ezek a jelenségek, amelynek a kiküszöbölése sohasem késő. Minél hamarabb hozzálátunk, annál előbb célt érünk vele.

A család meggyőzésének az elhanyagolása nyilvánul meg abban is, hogy amikor a mai rendszer emberfölötti kihasználása folytán a munkás, aki egy életet a munkásmozgalomnak élt, azért fáradozott, öntudatosnak vallotta magát, fölülhelyezkedett a bigottságon, kivetkőzött az egyház tanitásaiból, évtizedekig semmi összeköttetése nem volt templom és pappal, amikor ez a munkás utolsó óráihoz kerül, a feleség, a család, a rokonság semmibe sem veszi a haldokló multját, meggyőződését, valóságos hitét, hanem megszégyeniti a haldoklót azzal, hogy a magával tehetetlen öntudatos munkás fölé papot állit és egyházi temetést rendeznek, amelyről az illető munkástársai azután különböző véleményezéssel vannak és megtörténik, hogy ezt a fordulatot a volt munkástárs szégyenére számlázzák.

Az amerikai magyarság felett eljártak az esztendők. Mindközelebb vagyunk az elmuláshoz. Az emlitett esetek a közelmultban több helyen történtek meg. De hadd mondjak el egy clevelandi esetet is. Egyik munkástársunkat hosszu betegeskedése, mind közelebb vitte ereje, élete végéhez. Maga is látta és tudta ezt. E sorok irójával sokat elbeszélgetett a jövőt illetőleg, sőt temetését is reá és a szervezetre bizta. Torok baja folytán az utolsó napokban már csak ceruzával, irás utján beszélgettünk és még ma is az iróasztal fiókjában van a kezeirása, hogy elégettessük. Amikor ravatalon feküdt, a hátramaradt négy gyermeke közül az egyik elhozta a papot, aki azt állitotta, hogy az utolsó órákban ő beszélt elhunyt Munkástársunkkal, aki hozzájárult, hogy ő temesse el. Amikor mi ezt kétségbe vontuk, hogy Munkástársunk ilyen hozzájárulást adott volna, a pap és a gyerekekkel közel egy órás vita után, ott a temetkezési intézetben a gyerekeket ugyszólván leszavaztattuk és ma mind a négyen örvendenek annak, hogy a többségük ugy szavazott, hogy apjuknak az irásos akarata érvényesüljön.

Vagyis nem csak az életben vannak sulyos következményei a nevelési hiányosságnak, de elkisért az bennünket a sirig is. Mig az utóbbi állapoton már sokat nem változtat, bár azért is élünk, hogy bennünket minden időben a megérdemelt, megszolgált megbecsülés érjen, annál jobban hasznosithatjuk a nevelésnek mindenre kiterjedő figyelmességét az életben. Öntudatos munkásnak nem szabad figyelmen kivül hagyni egyetlen utat-módot sem, amely a cél, az ipari társadalom megvalósitásához vezet.

VASZKó GYöRGY

A GYERMEK-MUNKA

A FIATALKORUAK munkája mindkét nembeli gyermekek és fiatalkoruak hivatásszerü dolgoztatása, legtöbbször a munkaerejük nagymérvü kihasználása, amely testi és szellemi fejlődésüket károsan befolyásolja. A géptechnika haladása, a nagyarányu munkamegosztás, a gyártási módok egyszerüsitése a legtöbb iparban lehetővé tette a gyermekmunkát és fiatalkoruak munkáját. A gépek kiszolgálása, az ezzel kapcsolatos és egyébb sokfajta munka alig kiván testi erőt és szakértelmet, a vállalkozók inkább alkalmazzák tehát a könnyebben fegyelmezhető, igénytelen, főképpen olcsó gyermek és fiatal munkásokat, akiknek a kizsákmányolással szemben gyöngébb az ellenálló képességük, a termelésben elfoglalt helyzetüknél fogva hiányzik a saját erejükből való helyzetjavitás lehetősége, ennélfogva türik a kedvezőtlen munkaföltételeket és a felnőtt munkásokkal szemben a bérlenyomás legkivánatosabb eszközei. A gyermekmunkának és fiatalkoruak munkájának több csoportja van: a) a tanulatlan gyermekmunkásoké, amelyet az ipari és másfajta munka könnyü természete hozott létre, az e csoporthoz tartozók bérért dolgoznak, hogy saját magukat fenntartsák és segitsenek a családfönntartásban; b) az otthoni és háziiparban foglalkoztatottaké, akiket többnyire szülőik dolgoztatnak. Ide tartoznak a háztartásokban alkalmazott és cselédmunkára fogott fiatalkoruak is; c) a mezőgazdasági gyermekmunkások és d) a tanoncok csoportja, amelyhez tartozókat szerződés köt a munkáltatókhoz bizonyos szakma elsajátitása végett.

A gyermek munka és fiatalkoruak munkájának szociális, erkölcsi és egészségügyi hátrányai annál nagyobbak, mivel a munkáscsaládok rossz helyzete folytán munkára kényszerült, a megfelelő táplálkozást, lakást, tisztaságot, testápolást és iskoláztatást nélkülöző gyermekek és fiatalkoruak fejletlen testét és szellemét a tulfeszitett és egyhangu munka, a munkahely rossz levegője, — sokszor pincéje — az ipari por s mérgező anyagok, a hosszu munkaidő és az elfáradás ártalmas hatásai idő előtt elkorcsositják. Kiterjedt vizsgálatok mutatják, hogy a dolgozó gyermekek testhosszaságának, sujának, izomerejének és mellbőségének átlagmértéke kissebb, mint a munka hatásainak ki nem tett hasonló koru gyermekek testi átlagmérete.

A modern értelemben vett gyermekmunka a kapitalizmus kialakulása kezdetén jelentkezett. A mult századelej Angliában a pamutgyárakhoz egész hajórakományokkal szállitották azokat a gyermekeket, akik mint árvák vagy találtak a község jótékonyságára voltak bizva. A brutális bánásmód, az éjjel-nappal tartó munka és tulzsufolt lakás a gyermekek százezreit kergette a korai halálba. 1796-ban hallatszik az első tiltakozás a gyermekkizsákmányolás ellen. Ekkor már 6—7 éves gyermekeket is alkalmaztak, akiket napi 16—18 órai munkára fogtak. Az angol parlament 1802-ben végre szükségesnek tartotta a beavatkozást, igy született meg az első gyermekmunka törvény, amely tulajdonképpen az első munkástörvény is volt. A gyermekmunka komoly védelme csak jóval később történt. 1839-ben Angliában a munkások 45.8 százaléka 18 éven aluli volt. A gyermekmunka és fiatalkoruak munkája a kapitalizmus fejlődésével párhuzamosan terjedt és az angolokhoz hasonló állapotokat mutatott föl a többi országokban és Amerikában is. A 19. század végén és 20. század elején az összes európai államokban, az esetleges törvényes szabályozás ellenére is hatalmasan nőtt és a világháboru óta pedig ugrásszerüen emelkedett a dolgozó gyermekek és fiatalkoruak száma. Ujabban Ázsia és Afrika kapitalizálódó országaiban is egyre nagyobb arányokat ölt a korai kapitalizmus jelenségeit mutató gyermekmunka és fiatalkoruak munkája terén fönnálló borzalmas viszonyok későn birták rá az államok törvényhozását bizonyos minimális intézkedések megtételére. A foglalkoztatás első korhatárának megállapitásait, a munkaidő maximumát, az éjjeli munka korlátozását és egyes iparágakban való alkalmazás eltiltását ölelték föl a különféle országok első idevonatkozó törvényei, amelyek sokáig csak papirostörvények voltak és gyakorlati végrehajtásukat mindenütt a munkásság intenzivebb szervezkedése és erre irányuló követelései tették lehetővé.

Az Egyesült Államokban a Roosevelt adminisztráció próbálkozott a gyermekmunka mérsékeltebb vagy emberségesebb törvényekkel korlátozni, ami kissebb mértékben sikerült is. De a nagytőke nyomására a congressmenek és szenátorok, amennyire lehetett elgáncsolták a gyermekmunka kikapcsolását az iparokból.

Magyarországon a gyermekmunkások legnagyobb tömegeit a fonó- és szövöipar, vegyészeti, tégla és üveggyárak, kisebb számban a vas- és faipar foglalkoztatja. Ezek nagyobbára 12—18 évesek, de nagy számban vannak közöttük 10—11, sőt 9 évesek is. Munkaidejük 10—12, a tégla, szövő és üveggyárakban sokhelyütt 14 óra. Munkabérük heti 3—10 pengő között váltakozik. A szövő, gumi, szappan, gyógyszer, vegyészeti és gyufaüzemekben sok a fiatal lány. A nehéz munka, a különféle gázok és gőzök, a műhelyek pora párosulva a rossz és elégtelen táplálkozással okozza a fiatalkoru munkások megdöbbentő egészségügyi viszonyait. Vérszegény, gyönge testalkatu, tüdővészre hajlamosak a gyári ifjumunkások, akiknek sorát évenként nagyobbodó számban tizedelik a balesetek, mivel a fiatal szervezet gyorsabban elveszti a munkához szükséges lendületet és hamarább elfárad, mint a felnőtt. A termelés és forgalom más területén is nagyszámban találhatók a tanulatlan munkát végző fiatalkoruak.

Az otthon- és háziiparban foglalkoztatott gyermekek sorsa magán viseli az otthonmunka minden jellemzőjét. A szük, szennyes és fertőzött levegőjü műhellyel párosult lakás, a kora reggeltől késő estig tartó robot, a rossz táplálkozás folytán az átlagosnál jóval magasabb halandóság és a sürün előforduló ragályos betegségek, különösen a tüdővész korai áldozatai az otthoni és házi gyermekmunkások, akiknek nemcsak dolgozniok, de a házkörüli durva munkákat is el kell végezniök. Azt otthonmunka megszüntetése és a szülők fölvilágositása az egyedüli orvossága az otthoni gyermekmunkának és fiatalkoruak munkájának, mert az otthon és háziipar természete a szabályozást nem birja el.

A mezőgazdasági gyermekmunka nyomoruságát nehezebb föltárni, mert amig az iparban legtöbbnyire tömegmunkahelyeken foglalkoztatják a fiatalkoruakat, a mezőgazdaságban elszórtan, távoleső helyeken dolgoznak. A falusi és tanyai gyermekek többnyire már az iskolaköteles korban bérmunkát végeznek. Az 1900. évi népszámláláskor Magyarországon 350.152 7—14 éves koru gazdasági munkát végző gyermeket találtak. A mezőgazdasági munkálatok minden ágában alkalmazzák a gyermekeket, mert ha a fizetésnél nem is, de a munkánál emberszámba veszik őket. A kenyérgond a földmüvelő szülőket rákényszeriti, hogy legalább szegényes ruházatuk kikerüljön a járandóságból és kosztjukról ne kelljen gondoskodni. Ezeknek a fiataloknak a nyári hónapokban hajnali 3, legföljebb 4 órától este 9—10 óráig talpon kell lenniök, kitéve az időjárás viszontagságainak, a lealázó, tettlegességgel párosuló bánásmódnak rendkivül alacsony bérek vagy természetbeni ellátás mellett. Az állatok gondozását, a szőlőmunkák egy részét, kukoricakapálást, pásztorkodást, lóvezetést, marokszedést, béres és kocsiszolgálatokat, sőt sok helyen az utfedő kőtörést is fiatalkoruakkal végzik. Különösen azokon a vidékeken nagymérvü a mezőgazdasági gyermekmunkások kihasználása, ahol a kivándorlás és a háboru emberpusztitása a felnőtt munkások számát lecsökkentette. A háboru alatt és óta ennek következtében a mellékmunkálatokon kivül a termőföld nagy erőt igénylő megmunkálására is fölhasználják a gyermekmunkát. Ez a gyermekévektől kezdődő dolgoztatás nagy hatással van szellemi életükre is. Az általános tankötelezettség ellenére évenkint többezer gyermek nő fel iskola nélkül, akik a földeken dolgoznak. Sok a gyermek és fiatalkoru munkás a bányákban szerte az egész világon.

Az ifjumunkásszociálpolitika napjainkban nemzetközi probléma lett. Amig az egyes országok szabályozták csupán a gyermekmunkát és hoztak törvényeket a fiatalkoru munkások gazdasági, kulturális és szociálpolitikai érdekeinek védelmére és e téren nem állott fönn a nemzetközileg kölcsönösen biztositott egyforma bánásmód és védelem, valóságos gyermekkereskedelem alakult ki. A világháboru után létrejött Nemzetközi Munkaügyi Hivatal értekezletein hozott errevonatkozó egyezménytervezetek és megállapodások nagy mértékben hozzájárulnak a gyermekmunka nemzetközi szabályozásához és azokban az országokban, amelyek ezeket az egyezményeket ratifikálták, csökkentik is az ifjumunkás kizsákmányolási lehetőségeit. A békeszerződés "Munka" fejezetének 6. pontja szerint a szerződő felek kötelessége "a gyermekmunka megszüntetése és mindkét nembeli fiatalkoruak munkájának olyan korlátozása, amely nevelésük folytatását és kellő testi fejlődésüket lehetővé teszi." Az 1919-ben Washingtonban tartott munkaügyi konferencián elfogadott és az ipari munkára bocsátható gyermekek alsó korhatárát 14 évben megállapitó egyezménytervezethez eddig 23 állam, a fiatalkoruak éjjeli ipari munkájának tilalmát elrendelő egyezménytervezethez eddig 26 állam, közöttük Magyarország is hozzájárult. Az 1920. és 1921. évben Genfben a tengeri munkára bocsátható gyermekek legkisebb életkorára és a hajókon alkalmazott fiatalkoruak és gyermekek orvosi vizsgálata tárgyában hozott egyezménytervezetet 22 állam ratifikálta. Az ugyancsak 1921. évi genfi értekezleten a mezőgazdasági munkálatoknál alkalmazható gyermekek alsó korhatárát 14 évben megállapitó egyezménytervezetet pedig 16 állam fogadta el.

Természetesen azokban az országokban, ahol a gyermekmunkáknak és a fiatalkoruak munkájának védelmét célzó rendelkezéseknek gyakorlati alkalmazását és szigoru betartását nem biztositják a speciális ifjumunkásgondozó és ellenőrző intézmények, a jól kiépitett iparfölügyelet és a szakszervezetek megállapodásai, a vállalkozók azokat teljesen figyelmen kivül hagyják. A Nemzetközi Szakszervezeti Szövetség az 1927. évben megfelelő, tiz pontból álló programot alkotott, amelyet minden ország szakszervezeti tanácsához és munkáspártjához megküldött, hogy annak megvalósitása érdekében az ország viszonyait figyelembevevő akciókat inditsanak: 1. A 14 éven aluli ifjuságnak minden bérmunkától való eltiltása. 2. Ezidőig az iskoláztatásnak kötelező kiterjesztése. 3. A szakirányu iskolákban 18 évig minden ifjumunkás kötelező továbbképzése. 4. A gyermek és fiatalkoru munkások védelmének a 18 évig való kiterjesztése. 5. A nyolcórás fmunkanap biztositása az iskolaidő és a munkahely kitakaritásának a beszámitásával. 6. A teljes vasárnapi munkaszünet és a szabad szombat délután biztositása. 7. A fiatalkoruak éjjeli munkájának teljes eltiltása. 8. A 16 éven aluliak részére a fizetett szabadságidőnek három, a 16—18 éveseknek két hétben való megállapitása. 9. A keresetképtelen és munkanélküli ifjumunkások védelme és támogatása. 10. A szakmai képzés szabályozása a munkásszervezetek bevonásával.

* * *

Az emberi test.

Az emberi bőrön több mint 2 millió nyilás van, melyeken át a levegő behatolhat. A testben levő összes vér át megy a sziven körülbelül minden percben. A tüdő körülbelül 320 köb inch tartalmu. Egy lélegzésre átlag két harmad pint levegőt szivunk a tüdőnkbe. A gyomor annyi savat erjeszt naponta, amennyi 9 font táplálék feldolgozásához elegendő.

Az izmok száma több mint 500, ugyan ennyire tehető az erek és idegek száma is. A sziv átlagos sulya 8-10 ounce és minden órában körülbelül 100.000-et ver. Felnőtt ember percenként 18-19 lélekzetet vesz és óránként körülbelül 3000 köbláb levegőt vesz magához. Egy normális ember évenként egyforma sulyu tápanyagot és folyadékot fogyaszt el.

KOVÁCS ERNŐ

A HARMINCÉVES BÉRMUNKÁS

HÁROM évtized nagyon tekintélyes idő egy munkáslap életében még akkor is, ha az nem egy megalkuvás nélküli osztályharcos organum, amely egyedül a lap olvasóira, az általa hirdetett eszme hiveire támaszkodik, hanem egy olyan politikai lap, amely az irányát a politikai élet hullámzásai, vagy az államhatalom nyomása szerint változtatja.

Egy lap, amelyet nem a hirdetők, politikai pártok, vagy irányzatok finansziroznak, itt Amerikában fenn tud maradni, ha az nem az állam nyelvén jelenik meg azt igazolja, hogy a létezése jogosult, arra a munkásosztálynak szüksége van. Különösen nehéz lett egy osztályharcos nyelvi lapnak a fenntartása az első világháboru után, amikor a bevándorlást erősen korlátozták, az itt élő magyarság viszont természetszerüleg elöregedés, elhalás és nem kis mértékben elamerikaiasodás folytán el vész a nyelvi lap részére, mert mint olvasó a második generáció számitásba sem jöhet egy nyelvi lap életében.

A harmincéves Bérmunkáson kivül még két másik lap állitja magáról, hogy "munkáslap," de mig az egyiket csak a hirdetések és Oroszország iránti rokonszenvezőktőli folytonos gyüjtés; a másikat pedig a magyarországi munkásmozgalomból régen ideszakadt s mint kis üzletemberek jó anyagi viszonyok közé jutott hiveinek támogatása tartja fenn. De mindkét lapnál az összes munkát fizetett alkalmazottak végzik és a támogatóktól az anyagi segélyen kivül mást nem is várnak.

Igy valójában az egyetlen a Bérmunkás az, amelyet ténylegesen a lap olvasói és az eszme agitátorai tartanak fenn, igazolva azt, hogy erre a lapra az amerikai munkásosztály magyar nyelvü csoportjának szüksége van és hogy az osztályharc eszméjének a terjesztése terén pótolhatatlan munkát végez.

Mint régi munkástársak mondják azelőtt 15-18 éve a bevándorlás korlátozásának a kezdetén már sok jó munkástárs azon a véleményen volt, hogy miután uj bevándorlás nincs, a lap rövidesen feleslegessé válik és anyagi okokból is képteleneség lesz fenntartani. Ezek a munkástársak rossz jósoknak bizonyultak, mert ha a depresszió sulyos idejét nehezen is usztuk meg, ma ismét olyan anyagi alapon áll a Bérmunkás, amely a fennmaradását — dacára annak, hogy most a bevándorlás teljesen megszünt — biztositja, ezt annál is inkább el lehet érni, mert még minden elöregedés dacára is sok ezer olyan magyar munkás van, kiket még nem értünk el, akik ma még a hazafias, vagy a politikai féker lapok igájában vannak. Tehát nem csak a fennmaradás, hanem a fejlődés lehetősége is meg van.

A harminc év sok-sok kemény küzdelmet, sok üldöztetést, sok áldozatos munkát jelentett. Az elmult harminc év, amelybe beleesik az első világháboru, az orosz és más európai forradalmak, a kommunista pártok nagy robajjal való felvonulása, sokszor hozták a Bérmunkást nehéz helyzetekbe, amikor, hogy meg maradhasson a tiszta elvi alapon, szembe kellett néznie a hatósági üldöztetéssel éppen ugy mint a divatos áramlatokkal és mindezekben a kérdésekben megalkuvás nélkül álta meg a helyét. Az első világháboru idején minden háborus hisztéria dacára is kitartott az álláspontja mellett, hogy az a háboru az imperializmus háboruja és teljesen közömbös a munkásosztálynak az, hogy melyik fél kerül ki győztesen. Ez az álláspont a postai szállitások megvonását s üldöztetést jelentett.

A szovjet és a magyar tanácsköztársaság utáni időkben, amikor a magyar tömegekben divatos volt az orosz példának az amerikai viszonyokra való átültetése, a Bérmunkás kitartott a maga álláspontja mellett, nem volt soha sem szovjet ellenes, csak tiltakozott, védekezett az ellen, hogy Moszkva szabja meg az amerikai munkásságnak azt az utat, amelyen eljut a felszabadulásához. Nem volt szovjet ellenes, de ez nem jelentette, hogy ne mondjon kritikát, ha ugy látta, hogy az orosz vezérek ténykedése árt az egyetemes munkásmozgalomnak és főleg nem jelentette azt, hogy a legélesebben szembe ne szálljon az ugynevezett kommunista vezérekkel, akiknek a többsége csak egyszerü megélhetési lehetőségnek nézte a munkásmozgalmat.

Mindezeket a válságokat könnyen uszta meg a Bérmunkás és a köréje csoportosult magyar olvasótábor, mert meggyőződése, öntudata és tudása volt. Ez a három tényező segitette át azon az uj helyzeten is, amelyet a nácizmus előretörése és az ezt kiváltó második világháboru okozott.

Tökéletesen tisztában voltunk azzal, hogy ez a háboru sem a munkásosztály háboruja. Tudatában voltunk annak is, hogy mint az első világháborunak, ugy ennek is az inditó oka az imperializmus volt, de ugyan akkor megláttuk azt a veszélyt is, amelyet a kapitalizmusnak a végső kiformálódása a fasizmus jelent a kellőleg meg nem szervezett munkásosztályra.

A fasizmus ugyszólván minden erőfeszités és ellentállás nélkül söpörte el a politikai alapon szervezett munkásságot és az egész munkásosztályt az ipari feudalizmusba süllyesztette ugy, hogy ahhoz fogható helyzetben az ipari munkásosztály kialakulása óta soha sem volt.

Miután az európai munkásosztály nem volt felkészülve arra, hogy a nácizmus veszélyét legyürje, elveszitette mindazokat a jogait, amelyeket évtizedes harcok árán vivott ki magának. De éppen igy elmulasztotta az amerikai munkásosztály is azt, hogy megfelelő szervezeteket épitsen. Kétségtelen volt az, hogy a nácizmus győzelme hasonló sorsra juttatja az amerikai munkásosztályt is, mint az európai osztálytársait, nem csak a meglevő jogainak a megsemmisitését, de a felszabanulási lehetőségének bizonytalan időre való visszavetését is jelentené.

Ennek az osztályharc szempontjából való analizálása vezetett oda bennünket, hogy leirjuk azt, hogy a munkásosztály szempontjából ma nem közömbös, hogy melyik fél győz, az e amelyik minden munkásszervezetet megsemmisit és minden öntudatos munkást fizikailag kiirt, vagy az amelyik ma még megadja a lehetőséget a szervezkedésre, amely még megtüri a meglevő szabadság jogokat. Tudatában voltunk annak is, hogy a nácizmus leverése megadja a lehetőségét annak, hogy a ma elnémitott európai munkásosztály ujra hallassa a szavát és kiépüljön egy olyan nemzetközi szervezet, amely képes legyen nem csak egy uj nácizmus előretörését megakadályozni, de arra is, hogy a nácizmus szülőanyját, a kapitalizmust megszüntesse.

Ez a tiszta meglátás következménye volt az, hogy helyeslünk minden eszközt, amely a nácizmus bukását elősegiti, ezért nem elleneztük az ország felkészülését és követeltük a náci hordákkal szemben álló nemzetek, Anglia, Kina és Oroszország legmesszebbmenő megsegitését. Ezt az osztályharcos álláspontot sokan támadták a régi ellenfeleink, kik a gyámoltalan pacifizmusukat éppen ugy ez mögé bujtatták mint az eltitkolt magyar hazafiságukat, vagy náci rokonszenvüket.

Sokkal szomorubb az, hogy akadtak olyan IWW-isták is, kik a beléjük gyökeresedett, régi, abban az időben helyes taktikából, nem tudják meglátni a ma követelményét, ez a merevség, amelynek nagy oka van abban, hogy az IWW dacára, hogy fennállása ótha óriási tömegeket mozgatott meg, nem tudott szervezetileg ugy kiépülni, mint ahogy annak a lehetősége meg volt — ha idejében meg nem szünik, sulyos károkat okozhat a mozgalmunknak. A Bérmunkás nevelő képességének tudható be az, hogy magyar téren ezek a proletár izolácionisták elenyészően kis számban vannak.

Ma jósolni nem lehet, nem is szabad, de szent meggyőződésünk az, hogy a profit társadalomnak ez a legundokabb és legveszedelmesebb kinövése a fasizmus, el fog pusztulni és utána a szervezkedés reneszánsza jön, amikor olyan szervezeteket épit fel, amelyek ugy védő, mint támadó szempontból megálljak a helyüket. Erre az időre kell megtartanunk a Bérmunkást, hogy oktató és harci eszköze legyen az amerikai munkásosztály magyar csoportjának, ennek a célnak az érdekében, szem előtt tartva a végcélját, rendületlenül mutat rá továbbra is a munkásosztály legközvetlenebb veszélyére a nácizmusra, amelynek a kiirtását előfeltételnek tartja egy szebb jövőnek.

VISI ISTVÁN

RÁDIÓ ÉS MOZGÓKÉPEK

ELVITATHATATLANUL elfogadhatjuk a fenti két csoda dolgot leghathatósabb propaganda eszközöknek. Még az irás sem olyan hathatós, mint a kép vagy rádió, melyet kényelmesen otthonainkban hallgathatunk. Igy nagyon érdemes ezeket megismerni, értékelni, ahol lehet ellensulyozni.

A rádió hatását legjobban megérteti velünk, mikor Orson Welles drámai előadásban a H. G. Wells meséjét adta elő New Yorkban, mely szerint a Marsról inváziót inditanak a föld ellen, melyet nem birnak megállitani és mindent lerombol. Ezt olyan megrenditően és élethüen adta elő, hogy New York vidékén pánikot idézett elő és nagy tömegek menekülni akartak. Persze nagyon kevesen olvasták Wellsnek ezen regényét, igy nem tudták azt, hogy az csak mese. Amint nagyon sok mesét, propagandát olyan élethüen és meggyőzően adnak elő, hivatásos szinészek, propagandisták, hogy készpénznek veszik, elhiszik a tudatlan tömegek.

Másik példa a mozgóképeket illetőleg. A Charlie Chaplin, “Great Dictator” cimü képe, mely több egyént tett Hitler ellenessé, mint a németek által elkövetett tömeggyilkosságok hirei. Ez és több názi ellenes képek hatása alatt, mindég több és több amerikai felismerte a názi veszedelmet, annyira, hogy a fasizta rokonszenvezők, szenátusi vizsgálatot rendeztek, hogy megtudják ezeket akadályozni, vagy legalább is megcenzurázni. Ezt a két leghatalmasabb propaganda fegyvert, ámbár jó, de ugyan akkor rossz célra is sikeresen feltudják használni, azért az uralkodó osztály, éber figyelemmel vigyáz és mindent megtesz, hogy saját kezeiben, kontrólja alatt tarthassa és csak a saját érdekében használja.

Sok öntudatos munkás csodálkozott, hogy már nagyon nehezen lehet sikeres népgyülést összehivni, mely az irás mellett nekünk legsikeresebb eszközünk volt. Valamint szinelőadásokra is ma sokkal nehezebb tömegeket összehozni, mivel a rádió és mozi nagymértékben csökkentette ezen módozatok általuk való sikeres használatát. A rádió operákat, szindarabokat, meséket és kitünő szónokok beszédeit hozza nekünk helybe, otthonainkba. A Caughlinok, G.K. Smithek és Hitlerekkel együttesen.

Kevés igazsággal, tudománnyal, sok maszlagot összevegyitve, az uralkodó osztályt és rendszerüket védelmező szónoklatok, előadások, hirek tömegeit adják, drámai előadások zene és néha tanulságos előadások között.

A Rádió.

Melyből ma 52 millió müködő alkotmány van az Egyesült Államokban és közel minden két emberre esik egy és harminc millió otthonban be van szerelve, még hatalmasabb mint a mozgókép ipar és egy este, adott alkalom és körülmények között milliókat tudnának harcba uszitani, vagy menekvésbe, pánikba ejteni. A diktátoroknak is ez volt a leghathatósabb eszköze, legolcsóbb melyen keresztül országokat megigézték, béklyóba vertek. A rádió szónokainak óriási előnye van a régi népgyülések szónokjai felett, a rádión keresztül nem lehet vitatkozni, kérdezni, vagy vissza beszélni. Ottan nem lehet hazugságban fogni, vagy beszédjének hatását egy jól irányzott kérdéssel vagy közbeszólással lerontani.

A rádió 1895-ben Marconi által lett feltalálva, aki Olaszországból Angliába ment, ottan fejlesztette tovább találmányát, husz évig leginkább csak hajókon volt használva, csak a háboru alatt lett a szárazföldön de leginkább hadicélokra használva és csak a háboru után kezdett a mai formájában minden otthonba beférkőzni.

A statisztikai kimutatás 1922-től kezdődik, mely a következő: 1922-ben 40.000 készlet, 1927-ben, tehát öt év mulva 6,500.000, 1932-ben 18.000.000, 1937-ben 37,600.000 és már 1940-ben

52 millió készlet volt használatban az Egyesült Államokban.

1940-ben az üzleti forgalom a rádióval kapcsolatosan meghaladta a 932 millió dollárt, melyből 180 milliót csak a rádión leadott hirdetésekért és idővásárlásért fizettek, a 758 milliót rádió készletekért, darabokért és javitásokért fizettek, mely most már szintén trust szerüen van kontrolálva, legnagyobb részben a Radio Corporation of America, (RCA) név alatt, vagy kontrólja alatt müködnek.

Legujabb fejlődés szerint képeket is tudnak rádión továbbitani, sőt teljes szinelőadásokat. Ezen dolgot Televizió néven ismerjük és nagy lehetőség van további fejlődésre, mely esetleg nagy mértékben fogja csökkenteni a mozgóképek használatát. A rádió fejlődésével sok munkamegtakaritás is történt, de még sokkal többre van kilátás, egész könyveket, ujságcikkeket tudnak átutalni rádió segitségével Televizió utján. Valamint a rádió segitségével irányitani tudnak hajókat, repülőgépeket nem is szólva a villamos áram ki és bekapcsolását és más sok automatikus készletek irányitását amely mind rengeteg munkást tesz feleslegessé.

A Mozgóképek.

Ez sokkal régebbi és már a tetőfokát elértnek vélhető ipar, csak másod szerepre van itélve, de még mindég nagymértékben használható és fejlődési lehetőség sincs kizárva. Nem régen a beszélőfilmek behozatala, mely ugyancsak a rádió tudomány segitségével készült, nagy mértékben ujabb lendületet adott a moziiparnak.

1940-ben hetenként 80 millió személy látogatta a mozit, ami a lakosságnak több mint fele, ámbár vannak akik egyszer sem voltak szinházban, de vannak akik hetenként kétszer sőt háromszor is mennek és jobban tudják élvezni a filmet mint a rádiót. Ezeket csak a Televizió fogja a moziktól elragadni.

Érdemes itt megjegyezni, hogy tudósok vizsgálata szerint, a népességnek 30 százaléka látás, 40 százaléka hallás után bir legjobban tanulni, azonban a két módszer együttes használata 90 százalékban kielégiti a népességet és alig 15 százalék az, akik irásból is éppen ugy tudnak tanulni, mint hallás vagy képek szemlélése folytán.

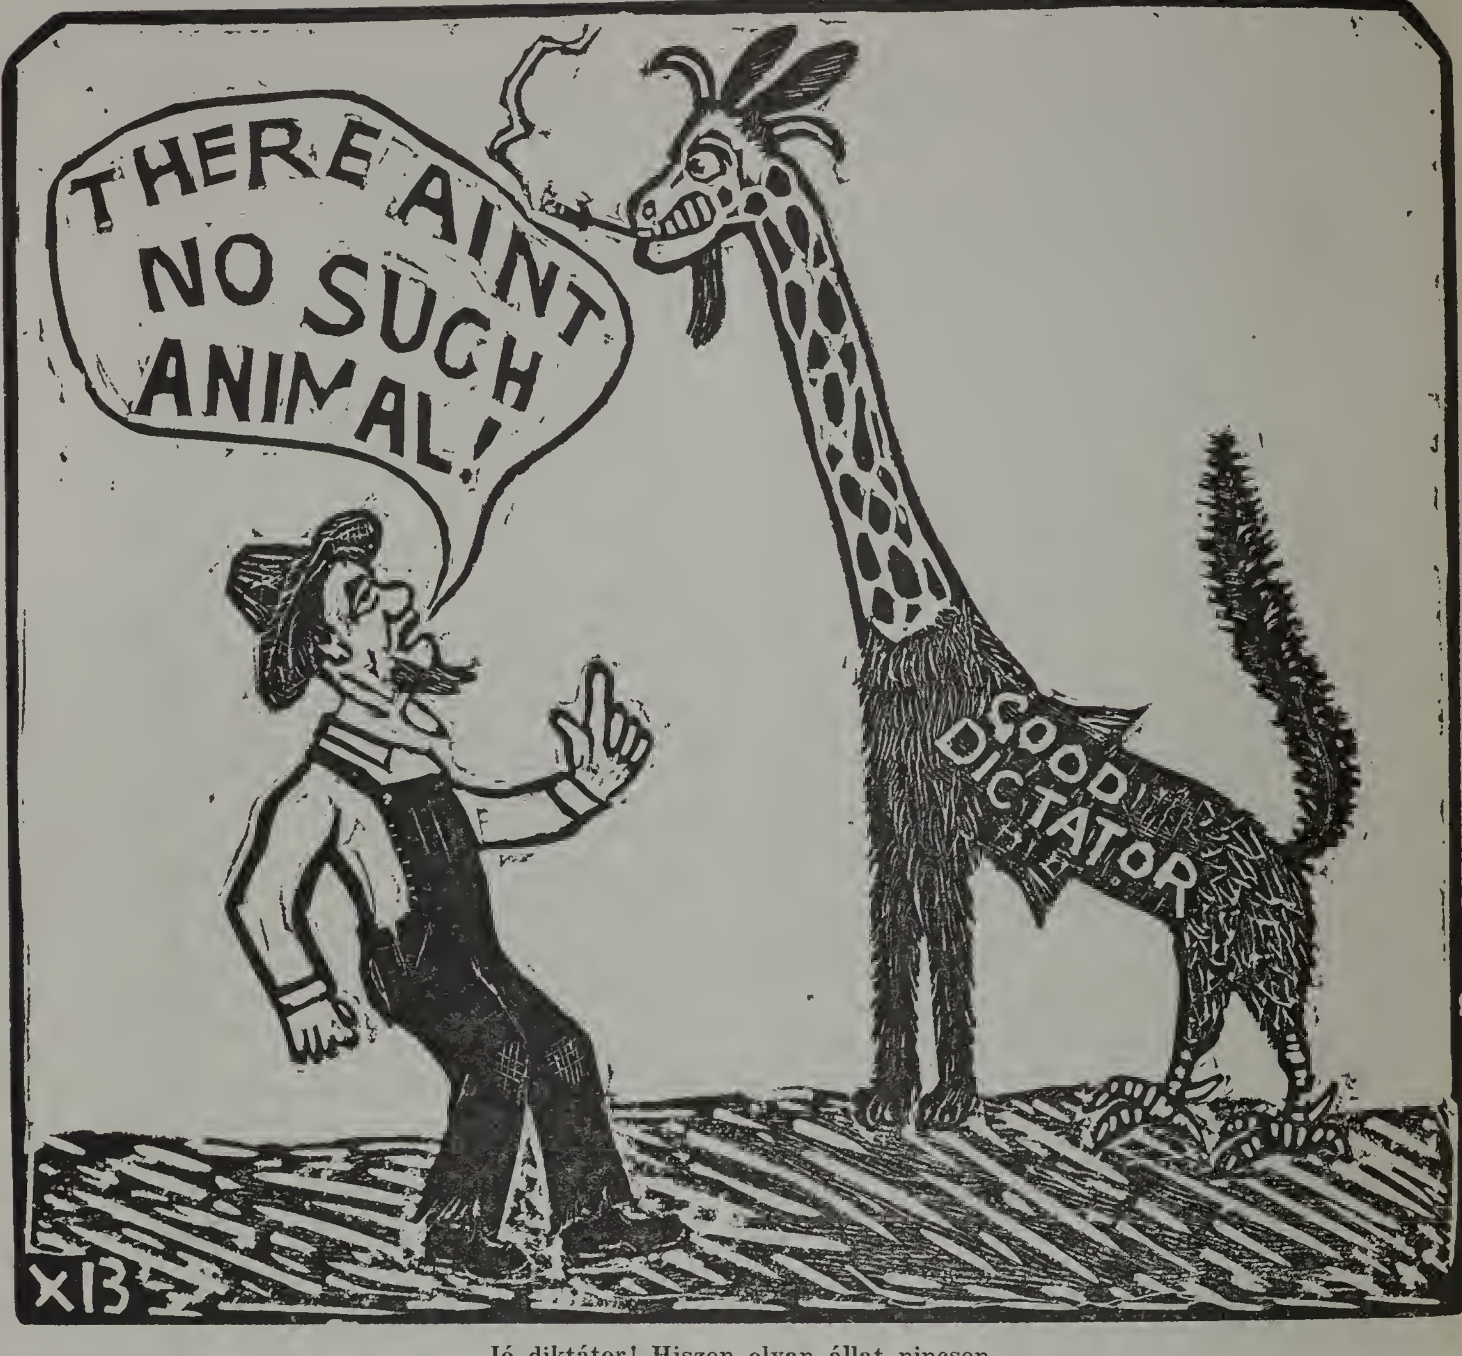
Az egész világon 69.153 mozgokép szinház van, melyből 19.032 itt az Egyesült Államokban van, 10,462.818 ülőhellyel. Ha számitásba vesszük, hogy legtöbb szinházban két előadást rendeznek naponta, igy naponta 21 millió egyénnek van kényelmes ülőhely a mozikban. Amerika legnagyobb államaiban a következő mennyiségben:

Állam	Szinház	Ülőhely
New York	1.418	1,609.773
Pennsyvania	1.258	882.052
California	1.095	804.872
Illinois	1.100	720.593
Ohio	942	595.530
Michigan	684	445.938
New Jersey	435	425.931

Az Egyesült Államokban 2.050 millió dollár van a mozgókép iparban befektetve, mely az egész világ ezen iparának kétharmad részét teszi ki és az amerikai filmeket az egész világon mutogatják és a legjobbak.

Oroszországban minden munkásotthon nagytermében, vagyis 30.000 ilyen teremben van beszerelve a filmelőadás, melyet ingyen mutogatnak. Itten most az Unionok is ezt akarják rendszeresiteni, legtöbb gyülésre ingyen mozgókép előadásokat, ámbár egyenlőre csak Unió propaganda képeket adnak elő.

Ezt a két hatalmas propaganda eszközt ma kizárólag az uralkodó osztály uralja és bizony sokszor a munkásság és a jobb társadalmi rendszer kialakulása ellen használják, holott ezeknek a segitségével, máról-holnapra kilehetne épiteni egy tökéletes, emberséges rendszert, ahol nem tömeggyilkosság, rombolás, gyülölet, éhség, nélkülözés és ezekből eredő betegségek járványai pusztitanák az emberiséget, hanem együttes, egymás boldogságát, szükségleteinek kielégitését és betegségek okainak megszüntetésével, közös boldogságban élhetnénk, melyhez a rádió és a moziképek segitségével nagyon hamar és könnyen elérhetnénk, de ezek ellenünk való felhasználásával, csak nagy küzdelmek után fogunk eljutni.



THERE AINT NO SUCH ANIMAL!
GOOD DICTATOR
X13

Jó diktátor! Hiszen olyan állat nincsen.

Távolságok New York és a nagyobb külföldi városok között:

Antverpen 4004, Alexandria 6150, Amsterdam 3985, Athén 5655, Bécs 4740, Bréma 4235, Buenos Ayres 11.120, Florence 4800, Havana 1366, Honkong 10.569, Hononlulu 5645, London 3740, Madrid 4925, Mexico 3750, Páris 4020, Rio de Janero 6204, Leningrád 9920, Stockholm 4975, Sydney 11.570, Yokahoma 7345 mérföld.

A világ legnagyobb folyói:

Mississippi 4200, Amazon 3800, Nilus 3760, Congo 300, Niger 2900, Lena 2800, Amur 2600, Hoangho 2600, Panama 2450, La Plata 2300, MacKenzie 2300, Volga 2300, Ob 2300, Yukon 2200, St. Lawrence 2100, Arkansas 2000, Madeira 2000, Rio Grande 1800, Duna 1725, Euphrates 1700, Indus 1700, Orinoco 1600, Zamberi 1600, Amu Darya 1500, Ganges 1500, Paraguay 1500 métföld.

ANONYMUS

AZ "OSZTÁLYHARC!"

AZ osztályharc a magántulajdon jogrendszerének terméke, a különböző társadalmi osztályok érdekellentéteiből fakadó küzdelem, amelynek Marx szerint döntő hatása van a történelem alakulására és az emberi haladás legjelentékenyebb előmozditója.

Az osztályok kialakulása egyidős a magántulajdonnal. A történelemelőtti emberi közösségek nem ismerték ezt a fogalmat, a nemzetiségi szervezetek, a családi közösségek, az ősi kommunisztikus együttélés formáinak keretében nem voltak egymástól elkülönitett osztályok, mert a közösségben élőknek nem is voltak érdekeik.

A törzsszervezet minden tagja egyformán részesült a közös munka, közös gyümölcsében. Csak amikor ezek a közös törzsszervezetek felbomlottak, vagy egymással való harcaikban foglyokat ejtettek, akiket munkára fogtak s akik mint idegenek alárendelt helyzetbe kerültek, amikor az anyajog helyébe az apajog került és kialakult a patriarchális családi szervezet s vele együtt a magántulajdon és az örökösödés uj rendje, akkor kezdődött meg az emberi társadalom osztályokra való szakadása és ezeknek az osztályoknak egymástól és gazdasági érdekeik szerint való elkülönülése és ezzel a ténnyel együtt kezdődött az osztályok egymás ellen való harca.

A történelemelőtti idők törzsi, nemzetségi szervezetében a magántulajdon ismeretlen volt. A törzs tagjainak minden munkaeredménye az egész törzs tulajdona volt. Ugyanis közös tulajdon volt minden munkaeszköz és a tüz is, amelyet közösen őriztek és védelmeztek. Ebben az időben a magántulajdon kialakulásának föltételei is hiányoztak még. Hiszen az élelmet ugyszólván napról-napra kellett megszerezni. Az állattenyésztés és földmüvelés ismeretlen volt és rettenetes küzdelmet kellett vivniok az ősi közösségek tagjainak létföntartásukért és csak közös erővel voltak képesek az éhséggel megbirkózni, csak közös erővel tudták legyőzni a természet vad ellenségeskedését. A közösségnek ez a szelleme nemcsak a megszerzett zsákmányra s a zsákmányok megszerzéséhez alkalmas eszközökre terjedt ki, nem csupán a létföntartás eszközeire, hanem a fajföntartás körülményeire is: a nemi érintkezés ezekben a kezdetleges törzsi szervezetekben korlátlan volt. Minthogy a csoportházasság eme rendszere mellett csupán csak az anyai ágon való leszármazás volt kimutatható, következésképpen csak ezt ismerték el és az a tény vált forrásává a későbbi anyajognak, amely a fejlődés bizonyos szakán az örökösödési viszony alapjává lett.

A barbárság alsó fokának határán kialakult törzsi és nemzetségi szervezeteket, ennek alapján a csoportházasságot és ebben a csoportházassági közösségben az anya megkülönböztetett szerepét, megrenditette a fejlődés, amely rávezette az embert az állatok megszeliditésével együttjáró előnyök fölismerésére, a nyájtenyésztésre. Ez a fölismerés egyértelmü volt az ősi közösségek létbizonytalanságának megszünésével, de legalább is ennek a bizonytalanságnak erős csökkenésével. A nyáj szaporodásával a törzsi szövetségek számára a gazdaság uj forrása nyilt meg. De a gazdaságnak ez a szaporodása bizonyos határon tul uj legelők fölkutatására és meghóditására ösztönözte a pásztortörzseket és eközben harcba keveredtek idegen törzsekkel, amelyeket a legelőkért vivott harcban legyőztek, vagy a megtámadott törzs győzte le őket. Akár az egyik, akár a másik eset következett be, a győzők a legyőzötteket előbb lemészárolták mint szükségteleneket, később azonban fölismerték, hogy a legyőzött törzsek tagjait munkára szorithatják és most már nem gyilkolták le, hanem rabszolgákká tették és munkára kényszeritették őket. Az ősi közösségekbe ezzel uj elem vonult be, amely az eddigi egységes szervezetet megbontotta. A nyájtenyésztés mellett kialakult a földmüvelés és bizonyos iparszerü munkálkodásnak halvány körvonalai is kibontakoztak. Mindez a gazdagság további szaporodásával járt együtt és az uj termelőmódok, a munkának uj formái az ősi közösségek szerkezetét is kikezdték. A csoportházasság megszünt és helyét a párosodó család váltotta föl. Ezzel együtt az ismert anya mellé került az ismert apa, akinek ebben a családi közösségben lényegesen megnőtt a szerepe és jelentősége is, amennyiben neki kellett gondoskodni a családi közösség élelméről és az élelem megszerzésének eszközeiről is. Ezeknek a megszerzésével megszerezte a hozzájuk füződő tulajdonjogot is. Ez a körülmény alapjában forgatta föl a régi rendet, noha az anyajog és az anya után való örökösödés rendszere még nem halványult el, minthogy a régi jog mindég később omlik össze, semmint az azt alkotó gazdasági és termelési viszonyok. De miként a javak szaporodásával nőtt a férfi sulya a családban, ahogy a nyájtenyésztés mellett terjedt a földmüvelés és ennek folytán megszünt a nemzetségeknek vidékről-vidékre való hullámzása, egyre szilárdabb alakot öltvén a törzsek és a nemzetségek állandó települése, akként homályosult el a nő szerepe a családban, mig végül teljesen eltünt az anyajog, helyet adván a patriarchális családi szervezetnek, amely a maga uj organizmusában egészen más képet adott, mint a csoportházassági rendszeren fölépült nemzetségi, vagy törzsi szervezetek kommunisztikus közössége. A patriarchális család ugyan magában foglalta a rabszolgákat is, de a családi közösségbe tartozók anyagi és erkölcsi közössége megszünt. A családfő az atya, a közösségbe tartozók fölött a mindenható ur. Noha ez a családi forma még ismeri a többnejüséget, mégis közvetlen őse a mai házassági rendszernek és Marx találóan irja róla, hogy "nemcsak a rabszolgaságat foglalja magában, hanem a jobbágyságot is, mert eleve a földmüvesszolgálatokra is tekintettel van. Kicsiben mindazok az ellentétek megtalálhatók benne, amelyek az államban és a társadalomban később nagy mértékben kifejlődtek."

A patriarchális családban megszünt a közös tulajdon. A családi vagyon fölött kizárólagosan a családfő rendelkezett és az örökösödés is ennek az uj tulajdonviszonynak megfelelően fejlődött.

A magántulajdon kialakulásából megdőlt a régi nemzetségi szervezet, a régi jog, a régi erkölcs, amennyiben ilyenről abban az időben mint az emberek által tudatosan fölismert és életüket szabályozó társadalmi törvényekről szó lehetett. Megdőlt az anyajog és ezzel Engels szerint "a férfi egyeduralmának utolsó korlátja is elpusztult." Ez az egyeduralom rést ütött magán a nemzetségi szervezeten is. Egyre erőteljesebb hatalommá alakult ki a család, mint a későbbi társadalmi fejlődésnek minden ellentétét magában foglaló sejtje.

A rabszolgatársadalom bizonyos fejlődési fokán a tevékenységek differenciálódásával az emberi haladás szempontjából óriási jelentőségü változás jött létre: az ipar elszakadása a földmüveléstől és ezzel együtt a termelés hatalmas megnövekedése, amely viszont az emberi munkaerő értékét fokozta eddig nem is sejtett mértékben. A rabszolga a termelés fontos tényezőjévé emelkedett s egyesek gazdagságának, hatalmának, befolyásának mértékét rabszolgáinak száma adta meg. Megkezdődött a kezdetleges árutermelés, a csere céljaira való termelés, a barbár kereskedelem és a termelés differenciálódásával a társadalom differenciálódása is. A szabadok és a rabszolgák közötti különbséget követte a szegények és gazdagok közötti különbség, az osztályokra való tagozódás és az egymástól elszakadt osztályokban jelentkező érdekellentétek csirájából kibontakozott az osztályok harca, mely az emberiség irott történelmét végigkisérte.

Marx és Engels voltak az elsők, akik az osztályharc tényében fölismerték a történelmet alakitó leghatalmasabb erőt és ennek jelentőségét a Kommunista Kiáltványban ragyogó ékesszólással és drámai erővel méltatták, tudománnyá kovácsolván ezt az uj történelemszemléletet. Tanitásaikat megdönthetetlen tételekre épitették és az osztályharc fölismerésével a történelem-filozófiának uj és valóságos tartalmat adtak, szemben az addigi terméketlen metafizikai spekulációval, amely a történelem alkotó erejét és az emberi élet törvényeit eszmék fejlődésében, vagy még korábban valami földöntuli világakaratban kereste.

Az osztályharc szerepének fölismerése nemcsak a filozófiai zürzavart szüntette meg, szilárd magyarázatát adván a történelmi eseményeknek, a gazdasági, társadalmi és ideológiai fejlődésnek, hanem halálos csapást mért az utópisztikus szocializmusra is, bebizonyitván a proletáriátusnak, minden más osztálytól különálló társadalmi osztálynak létezését és történelmi szerepét.

Marx és Engels a Kommunista Kiáltványban rakják le az osztályharcos szocializmus alapköveit, a következő megállapitásokkal:

"Minden eddigi társadalom története osztályharcok története."

'Szabad és rabszolga, patricius és plebejus, hübéres és jobbágy, céhmester és legény, szóval elnyomó és elnyomott örökösen szemben állott és hol nyilt, hol lappangó, de szakadatlan harcot vivott egymással. Ez a harc mindenkor vagy az egész társadalomnak forradalmi átalakulásával, vagy a harcoló osztályok együttes pusztulásával fejeződött be."

"A történelemnek régebbi szakaszaiban a társadalomnak különféle rendekre való pontos tagolása, a társadalmi állásoknak fokozatos elkülönitése figyelhető meg. Az ókori Rómában ott láthatjuk a patriciust, lovagot, plebejust, rabszolgát. A középkorban a hübérest, céhpolgárt, legényt, jobbágyot a azonfelül ezen osztályok mindegyikében különféle fokozatokat."

"A hübéri társadalom pusztulásával támadt modern polgári társadalom nem szüntette meg az osztályellentéteket. Csak uj osztályokat teremtett a régiek helyett, az elnyomatást uj föltételekhez, a harcot uj eszközökhöz füzte."

"A burzsoázia fejlődésének minden egyes fokozatát megfelelő politikai haladás követte nyomon. Elnyomott rend volt a hübéreseknek uralma idején, fölfegyverzett és önmagát igazgató társulat a községben, egyhelyt független, városi köztársaság, másutt harmadik adófizető rend valamely monarchiában, majd a manufaktura idején a rendi, vagy abszolut monarchiában a nemesség megfékezésére szolgáló ellensulyból a nagy monarchiák alapjává lett. A nagyipar és a világpiac kialakulása óta a modern képviseleti rendszerü államok kizárólagos urává küzdötte föl magát. A modern államhatalom az egész burzsoá osztály közös üzleteinek lebonyolitására rendelt végrehajtóbizottság."

Ebben a néhány mondatban az emberiség történelme kristályosodik ki az uj, történelmet alkotó osztálynak, a proletáriátusnak föllépéséig. Ennek az uj korszaknak osztályküzdelmei ugyszólván a szemünk láttára folynak le, mégis sokan vannak, akik nagy összefüggéseit nem látják, az uralkodó osztályokhoz tartozók pedig nemcsak az osztályharc jelentőségét, hanem a tényét is tagadják. Olyasvalamit nem látnak és olyasvalamit tagadnak tehát, amelynek részesei.

Az ember viszonya a társadalomhoz, a termelési folyamatban elfoglalt helye és a termelt javakban való részesedése szerint igazodik. A társadalom nem egységes. Nem egységes azóta, mióta a magántulajdon kialakult. Amiképen az ókorban voltak szabadok és rabszolgák, földtulajdonosok és nincstelenek, ahogyan a középkorban voltak hübérurak és jobbágyok, céhmesterek és céhlegények, azonképpen van ma burzsoá és proletár. Mindazok, akik azonos gazdasági körülmények között, azonos társadalmi helyzetben élnek együtt osztályt alkotnak. Minthogy a tulajdonviszonyok alakulása következtében vannak szegények és gazdagok s minthogy továbbá a társadalmi termelés eredményeiben a társadalomban élők nem egyformán osztozkodnak, a javakban bőségesebben részesülők és a javakból kitagadottak között érdekellentétek támadnak. A föld tulajdonosának más az érdeke, mint a nincstelen parasztnak. Ismét más az érdeke a termelőeszközök birtokosainak, mint a vagyontalan proletárnak, aki munkaerejét, hogy éhen ne haljon, kénytelen a termelőeszközök birtokosainak áruba bocsátani.

Az érdekellentétek a vagyonosak és vagyontalanok osztályát egymással szembe állitják, a vagyontalanokat arra ösztönzik, hogy maguknak a gazdasági és társadalmi élethez megfelelőbb elhelyezkedést érjenek el, a vagyonosokat pedig arra, hogy eddigi helyzetüket megvédelmezzék, hogy megtarthassák. Ezek a törekvések szükségképpen harcra vezetnek. A társadalmi osztályok egymás ellen való kiméletlen küzdelmére.

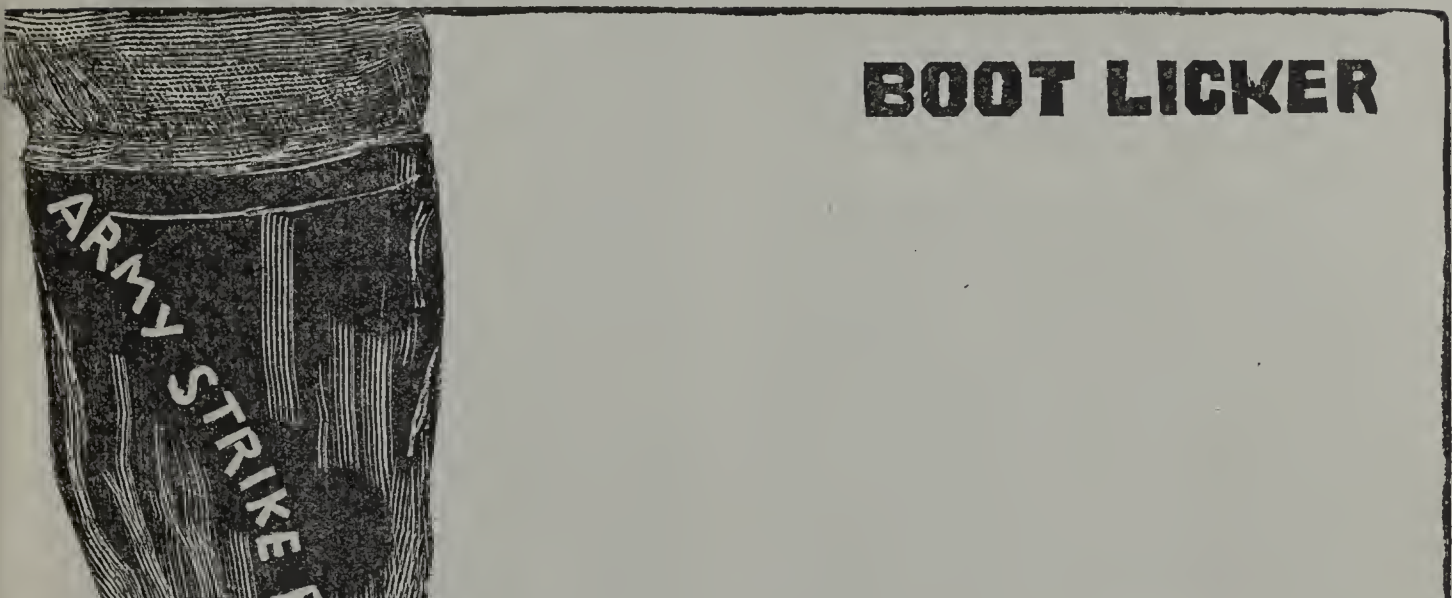
A hübéri társadalomban a polgárság volt az elnyomott rend, szemben a nemességgel és a királyi hatalommal, amely a polgárság történelmi érvényesülését a kezében összpontosult hatalommal megakadályozta. Ebben a hübéri társadalomban a burzsoázia képviselte a forradalmi elemet, mint egy következő korszaknak uralomra kijelölt osztálya, mert hiszen a kapitalista termelés már a hübéri társadalom méhében kicsirázott és az uj termelési mód kereste érvényesülésének föltételeit. Azok akik érdekeikkel az ipari termeléshez, a kapitalista gazdálkodáshoz kapcsolódtak, szükségképpen harcosaivá váltak az uj társadalmi rendnek, amely a kapitalisztikus termelés érvényesülésének feltételeit megadja. A feudális nemesség és a királyi hatalom viszont kiváltságokkal megerősitett hatalmát védelmezte az uj renddel szemben és hatalmának eszközeivel tört a feltörekvő harmadik rend ellen. Minden uralkodó osztálynak benső sajátossága, hogy megvédelmezze gazdasági és politikai hatalmát, hogy ezt a hatalmat isteni eredetünek nevezett jogrendszerrel bástyázza körül és mindaddig, amig a feltörekvő osztályok mint uj termelési rendnek előcsatárai meg nem erősödnek annyira, hogy legyőzhessék a régi uralkodó osztályokat, mindaddig a gazdasági hatalom terméke, a jogrend, elegendő védelmet nyujt az uralkodó osztályok számára, hogy uralmi rendszerüket megtarthassák. A hübériség is a végletekig védelmezte önmagát a megszületni akaró uj renddel szemben, de el kellett buknia, mert a termelési viszonyok tulnőttek rajta és az uj termelési viszonyok képviselője, a burzsoázia, elég erőhöz jutott, hogy megdöntse a régi rendet.

Az osztályharc azonban nem egy bizonyos időre korlátozott társadalmi mozgás, hanem állandó tartalma a történelemnek. Nem egyetlen végső küzdelemben jut kifejezésre, hanem apróbb-nagyobb csatározások végtelen láncolatában. Ez a mozgás folytonos változásokat hoz létre s igy világunk, mint az ellentétek világa, folytonos átalakulásokon megy át.

Az osztályharcokat tehát az osztályoknak egymással szemben álló érdekei idézik föl. Az érdekellentét ott van, ahol az érdekek nem azonosak, sőt ellenségesen állnak szemben egymással. Ez az ellentét letagadhatatlan és áthidalhatatlan. Vannak ugyan, akik azt állitják, hogy a szegény emberből is lehet gazdag ember, hogy a szegény emberek világából át lehet jutni a gazdag emberek világába, de ez az állitás nem más a való tények elhomályositásánál, mert hiszen, ha igaz is az, hogy a mai polgári társadalomban az osztályok közötti határvonalak elmosódottabbak, mint a régi rendi társadalomban, azért ez nem jelentheti, amiképpen nem is jelenti az osztályellentétek hiányát, mert hiszen a bérmunkásosztály egész tömegében nem lehet kapitalista, a nincstelen parasztság nem juthat a nagybirtokos nemesség osztályhelyzetébe, sem az ipari munkásosztály, sem a nincstelen parasztság nem változtathat osztályhelyzetén a mai társadalom keretei között. A proletáriátus, mint osztály politikailag elnyomott, gazdaságilag kizsákmányolt mivoltából csak a kapitalista termelési mód és a polgári társadalom megszüntetésével szabadulhat föl, csak a termelőeszközök magántulajdonának megszüntetésével, mert ameddig a termelőeszközök magántulajdona fönnáll, addig a proletáriátus gazdaságilag és politikailag elnyomott osztály marad. Harcaival tágithat bilincsein, előrenyomulásával könnyithet láncain, de bérmunkás mivoltán, nincstelenségén nem változtathat.

Ha a hübéri társadalomban a burzsoázia szükségképpen mint forradalmi osztály tünt föl és hajtotta végre történelmi szerepét, ugy a kapitalisztikus társadalomban a proletáriátus a történelmileg forradalmi osztály és amiképpen a feudális nemesség és polgárság között folytatott osztályküzdelmekből egy magasabb rendü gazdasági állapot, fejlettebb termelési rendszer s ezt követően magasabbrendü társadalmi szerkezet, haladottabb erkölcsi és szellemi kultura keletkezett, ugy a proletáriátusnak a tőkésekkel szemben folytatott osztályharca is a termelés magasabb kvalitásu rendszere s elébb egy uj, sajátságos forradalmi ideológiai rendszert tenyészt ki, hogy később, győzelme idején tökélyre emelkedjék a következő korszak gazdasági és szellemi tartalma.

Az osztályharc szerepe tehát elgondolhatatlanul nagyobb jelentőségü az emberiség történetében, semmint az



A munkásfékerek örömmel veszik a hadsereg felhasználását sztrájktörésre.

első hallásra bárki is fölmérni tudná. És minél tudatosabbá válik az osztályharc a szemben álló osztályok társadalmi tudatában, annál nagyszerübb eredményeket hoz létre a szociális élet minden területén.

A proletár osztályöntudat korunk társadalmának leghatalmasabb alkotóereje és az uralkodó osztályok legnagyobb veszedelme. Az osztályellentét társadalmat alakitó hatóerővé csak a forradalmi osztály tudatában válhat, amikor ez megtörténik, akkor az osztályharc szervezett és tudatos osztályharccá válik. A modern osztályharc hordozója az ipari proletáriátus, mint az uralkodó burzsoázia történelmi örököse.

Az osztályharc formái különbözők és korunk társadalmában sem korlátozódnak az osztályharcok pusztán és kizáróan a burzsoáziára és a proletáriátusra, mert hiszen egy társadalmi forma sem hal el nyomban az uj társadalom kialakulásának pillanatában. Megmaradnak a réginek csökevényei, nemcsak a gazdasági termelési viszonyok területén, hanem jogi, politikai és erkölcsi téren is. A burzsoázia nem egyszer szembekerül az ipari proletáriátuson kivül az ugynevezett történelmi nemességgel, vagy a kispolgársággal, amiként a feudális nemesség a hübéri társadalomban nem csupán a burzsoáziával állott szemben, hanem sokkal többször és talán élesebben az elnyomott parasztsággal s a lázongó jobbágyokkal, a proletáriátus viszont nem egyszer kénytelen több front felé egyszerre harcolni s ez mindaddig igy lessz, amig a megelőző korok gazdasági és társadalmi csökevényei ki nem mulnak, mindaddig, amig a társadalom két egységes osztályra nem szakad, a magántulajdon rendszerének ebben az utolsó fázisában.

Az osztályharc egyben politikai harc is. A proletáriátus a maga osztályharcát ennek megfelelően gazdasági és politikai területeken folytatja a vagyonos és kiváltságosokkal fölruházott uralkodó osztályokkal szemben. Az osztályharc egyik megnyilvánulási formája a sztrájk, amelynek segitségével a munkások életszinvonaluk emelkedésére törekszenek. A sztrájk sikeres megvivásának előfeltétele a szervezkedés. Ezen a fölismerésnek adott hatalmas lendületet a proletáriátus osztályszerveződésének és előretörésének. A sztrájk **támadás az értéktöbblet ellen, lényegében a tőkés termelés alapja ellen.** Ez a támadás a kapitalizmust védekezésre ösztönzi. Előbb uj kiváltságokat teremt, ujabb rendszert formál ki a proletáriátus ellen, később maga is szervezkedik, még később föladja merev ellenállását a munkaviszonyok javitásával és a szociálpolitikai törvényhozással szemben és az ellentétek elhomályositására törekszik. Védekezése és támadása egyaránt arra vezet, hogy a proletáriátus megteremtse szervezkedésének magasabbrendü formáit, fokozza kulturáját, ellentállóbbá keményedjen és nagyobb erővel forduljon a politikai és gazdasági küzdelmek felé, hogy mint szervezett osztály megteremtse érvényesülési utját a hatalom meghóditása felé.

A proletáriátus szervezett osztályharca az uralkodó osztályok ellen, időről-időre hatalmas változásokat visz véghez már a mai társadalomban is. A proletáriátus, mint osztály, maga is kitermeli a maga sajátos kulturáját és időről-időre rávetiti gondolkodását az egész társadalomra. Harcaival az uralkodó osztályok védelmi övezetének egy-egy bástyafokát dönti le, fogyasztó- és termelőszövetkezeteivel pedig már ebben a társadalomban elvégzi az eljövendő korszak gazdasági és termelési formáinak hatalmas kisérletét.

A proletáriátus osztályharca tömérdek értéket rejt magában, mindezekből az értékekből épül föl a szocializmus uj világa, mint a proletáriátus osztályharcának történelmi terméke.

● ● ● ● ●

A legnagyobb vizesések.

A világ legnagyobb vizesése Kukenaam, British Guenában van, amelynek a magassága 2000 láb. Utána a New Zelandban levő Sutherland következik 1904 láb magassággal. Az amerikai földrészen a legmagasabb a californiai Yosemite 1300 lábbal, mig a hires Niagara vizesés csak 167 láb magas.

PIKA PÁL

SZOCIALIZMUS

AZ öntudatlan agyakba félelmet jelentő “szocializmus” valódi értelmezése közösséget jelent. Az a társadalmi rend, amely ma ténylegesen uralja az emberi társadalmat, ugy igyekszik a szocializmust az emberek nagy tömegének értelmezni, mint valami borzasztó veszélyes jelenséget amely bizonyosan vissza vezeti az embereket a barbarizmus korszakába. Az emberi kapzsiság és ravaszság, amelynek fő célja mindig az volt, hogy mennyire képes lesz egyik ember a másikat legázolni és felette fölényesen rendelkezni. A világ történelmet lapozgatva és az emberi társadalom különböző korszakát tanulmányozva, megállapithatjuk, hogy valamikor az emberi törzsek közösségbe éltek, amit ős-kommunizmusnak nevez a történelem. A törzsek szaporodása és azon területek amelyen egyes törzsek éltek, amikor már a megélhetés lehetősége nehézzé vált, igy azután egyes törzsek felkerekedtek és több területet akartak hóditani, aminek következtében háboruba keveredtek más törzsekkel. És ha ezen háboruból kifolyólag egyik törzs győzelmet aratott a másik felett, azokat azután rabszolgákká tették, akikkel azután dolgoztattak, hogy ők maguk kényelmesen élhessenek. Ebben az időben a győző felek csak a legyőzött törzsek népeit dobták rabszolga sorsba. Az emberi társadalom fejlődése elvezetett bennünket az ugynevezett “civilizált” emberi társadalomba, amelyről nagyon sok ember azt hiszi, hogy ez a mai társadalmi rendszer a leghelyesebb, mert van egyéni szabadság (?). A népeknek van önrendelkezési joga, sőt még demokratikus rendszernek is nevezik.

Maga a szó demokrácia, amely görög eredetü, a tényleges jelentősége nép uralmat jelent. Most azt szeretnénk tudni hol létezik ilyesmi a földtekén? A mai emberi társadalomban amit modern rabszolga társadalmi rendszernek mondunk, modernnek nevezzük azért mert ugy funkcionál, hogy az emberek legnagyobb többsége abban a tudatban él, hogy szabad ember, mert a modern technikai tanitási rendszer igy hiteti el az emberekkel, amit a nagy gyakorlati megpróbáltatások sem tudtak megértetni az emberekkel, hogy tulajdonképpen most is egy rabszolga rendszerben élünk, aminek olyan elnevezést adtak, hogy a laikus ember azt hiszi, hogy szabad és megvan minden önrendelkezési joga. Ez az ugynevezett “bérrendszer” amelyben élünk, amikor minden ember függővé van téve azok jóakaratától, akik a termelő eszközök és a természeti kincsek birtokosai. A mai ember csak annyiban különbözik a mult rabszolgáitól, hogy amazok élelmiszert, ruházatot és lakhelyet kaptak a rabszolgatartóktól, amig a mai ember bizonyos bért kap munkája fejében, amiért élelmiszert, ruházatot és lakhelyet bérelhet érte. Hogy azután a Szocializmus eszméje miért hat olyan sullyal sokakra, azt meglehet érteni. Meglehet érteni azért, mert a mai rendszer a magántulajdon és az azzal járó kizsákmányoláson alapszik. Ennek azután természetes következménye az, hogy azok, akik ma birtokosai ugy a természeti kincseknek, mint a termelő eszközöknek, akik tényleg uralják ma az egész emberi társadalmat, semmi esetre nem akarják, hogy ezen bármi változás jöjjön létre. Mivel ők rendelkeznek az élet javai felett, ezért az ő gazdasági érdekeiknek megfelelőleg rendezték be magát a társadalom osztályintézményeit, amelynek hivatása nem is lehet más, mint minden tekintetben a jelenlegi fennálló gazdasági rendszer életben tartása. Megtudjuk érteni magát az uralkodó osztályt, hogy ragaszkodik a mai rendszer fentartásához. De nem tudjuk megérteni magát a munkásosztályt, hogy nagy részük annyira fél még a szocialista elnevezéstől is. Ezt a legtöbb esetben a kapitalista rendszer ferde nevelésének tudhatjuk be, de azért legalább elvárnánk a munkások nagy tömegétől, akikről tudjuk azonban, hogy mindenre hajlandó csak tanulásra és a saját osztályérdekében cselekedni nem, hogy ne féljen a szocializmus szónak már a puszta emlitésétől.

Annyi bizonyos, hogy ma már mindenki hallott a szocializmusról, akár jót, vagy akár rosszat. Ha már olyan sokszor hallottunk róla, akkor az volna mindenkinek a kötelessége, hogy valójában megtudja, hogy mi is a szocializmusnak az igazi lényege. Ma a legnagyobb baj, hogy különösen a munkások nagy tömege, akiknek tényleg osztályérdekük volna, hogy a valóságban megtudják mi is a szocializmus, mert mikor a nincstelenség beköszönt a proletár házba, azt legalább tudniok kellene, hogy mi az okozója az éhségnek és nyomornak és miért van az, hogy némelyek duskálnak az élet javaiban.

A szocializmus megértése igen könnyü, csak nem azoktól kell azt megtanulni, akik annak ellenségei, mert ők a mai rendszerben gond nélkül és a bőség közepette élnek.

A szocializmus, amint a bevezetésemben emlitettem közösséget jelent. Közösség alatt értjük az élet javainak egyenletes elosztását, hogy az emberi társadalomban az összes munkabiró emberek közösen termeljék meg az élethez szükséges összes javakat és azokat egyenlően szétosztani az emberi társadalom összes hasznos tagjai között.

A szocializmus eljövetelének csak azok lehetnek ellenségei, akik ma embertársaik kizsákmányolása érvén jólétet tudnak maguknak biztositani. Most azután, akár az emberszeretet, akár pedig vallási szempontból birálják meg a dolgot nem helyeselhetjük, hogy egyik ember a másik embertársát meglopja, vagy megfossza a megélhetési lehetőségtől csak azért, hogy saját jólétét biztositsa.

Az I.W.W. maga a szocializmus igazi megtestesitője. Habár nevében nem szerepel a szó szocializmus, de arra alakult és azért igyekszik a Világ Ipari Munkásait megszervezni, hogy megvalósithassa azt az emberi társadalmat, amelyet szocializmusnak nevezünk. Az I.W.W. a szintiszta szocializmust igyekszik megvalósitani akkor, amikor a mai "bérrendszer" helyébe egy olyan társadalmi rendszert akar felépiteni — a mainak keretein belül — ahol az emberek a közös termelési mód életbeléptetésével egy olyan társadalmi rend megalapozását irányitják elő, amelyben nem lesznek többé osztályok, nem lesznek sem diktátorok, hanem az igazi társadalmi demokrácia fog életbe lépni. Amikor közösen fogunk termelni a társadalmi javak igazságos és egyenletes elosztása alapján.

Ez jelenti magát a szocializmust, amiért mindenkinek küzdeni kell, hogy már egyszer az emberiség elérhessen egy olyan emberi társadalomba, ahol nem lessz többé az embereknek a főtörekvése a kapzsisággal járó vagyonfelhalmozás, amikor minden gyülölet megszünik, amit ma csak a gazdasági féltékenység és különbözet okoz. Ne féljen senki a szocializmus eljövetelétől, mert ez csak az emberiség boldogságát állandósithatja.

* * * * *

A föld ismertetése:

A föld felületének nagysága 196,550.000 négyszög mérföld. Ebből 141 millió négyszög mérföld vizzel van boritva, az egész felület 70 százaléka.

Az egyes világrészek közötti megoszlás a következő:

Afrika	11,632.000
Észak Amerika	7,746.641
Dél Amerika	7,334.508
Ázsia	17,470.282
Ausztrália	3,456.290
Európa	3,671.624
Sarkvidék	6,970.000

(A számok négyzetmértföldben értendők)

VASZKO GYÖRGY

MUNKÁSOK OKTATÁSA

MUNKÁSOKTATÁS, ugyszólván egyidős a munkásmozgalom fejlődésével a proletáriátus fölszabadulása el sem képzelhető a szellemi béklyók széttörése nélkül, amelyet az uralkodó osztály rakott az elnyomott munkásság vállaira, különösebb jelentőséget a szocialista munkásoktatás mégis a legutóbbi évtizedekben nyert, amikor a háborus országok munkáspártjai és szervezetei rideg kiméletlenséggel levonták a világháboru konzekvenciáit. Abból kiindulva, hogy azt a hatalmas vérfürdőt a kapitalista imperializmus és az uralkodó osztályok általában csak a tömegek tudatlanságán és szervezetlenségén keresztül zudithatták az emberiségre, logikussá vált, hogy ezt a jövőben csak ugy lehet megakadályozni, ha a munkástömegeket kiemelik tudatlanságukból és ezáltal képessé teszik olyan hatalmas szervezkedésre, amelynek erején megtörik minden háborus törekvés. A másik szempont, amely a forradlami munkásoktatásnak hatalmas lendületet adott a háboruutáni években, az volt, hogy a harctéren tömegével estek el olyan munkások, akik a munkásmozgalomban már szerepet játszottak, megfelelő képzettséggel rendelkeztek és akiket sürgősen pótolni kell a munkásmozgalom érdekében. Azonkivül a háborut követő forradalmak több olyan harci területet nyitottak meg a munkásság számára, amelyeken csak tudással vértezetten folytatható a fölszabadulásért vivott küzdelem.

A nyugati államokban a munkásságnak már beleszólása van az üzemi tanácsokon keresztül a termelés menetébe is, amit szintén csak hozzáértő munkások utján eszközölhet. Ez teszi lehetővé, hogy a nemzetközi munkásmozgalom vezetői a háboru utáni években hatalmas erőfeszitéseket tettek a munkásoktatás kiépitésére és egységes alapra való helyezésére. 1922-ben az Internationale már összehivja Brüsszelbe a Nemzetközi Oktatásügyi Kongresszust, hogy az egész világra kiterjedően irányt szabjon a szocialista munkásoktatásnak. Két év mulva, 1924-ben, ez a tanácskozás megismétlődik Oxfordban, ahol már 20 ország képviselteti magát 78 küldöttel. Itt már megjelennek Amerika, Ausztrália, Palesztina, India és Japán küldöttei is és szines delegátusok testvéri kézszoritásokkal pecsételték meg azt a frigyet, amely a nemzetközi munkásmozgalomban, fajra, nyelvre, vallásra és szinre való tekintet nélkül egybefüzi a világ munkásságát. Itt küldenek ki egy héttagu bizottságot azzal a föladattal, hogy teremtsék meg a szocialista munkásoktatás Internacionaléját. (Internationale Federation der Arbeiterbildungsorganization) Itt vetődik föl a terv egy Nemzetközi Főiskola (Internationale Hochschule) létesitésére nézve is. Ennek a főiskolának kell megoldania a munkásoktatók kitermelésének sulyos problémáját. A brüsszeli és az oxfordi tanácskozások eredménye gyanánt kiépülnek világszerte a munkásiskolák, egyazon pedagógiai módszer alapján. Mindenhol a gyakorlati képzésen van a hangsuly és a tantárgyak ugy vannak megválogatva, hogy semmi fölösleges és elvont értékü tanitás ne zavarja a munkáshallgatóság szellemi kifejlődését. A tanitás különböző retortákon keresztül a munkásegyetemeken éri el legmagasabb fokát. Kezdve az egyes nyilvános előadásokon, amelyeket sürün támaszt alá a vetitett képekkel és filmekkel operáló szocialista pedagógiai módszer, folytatva a heteken át tartó szemináriális esti tanfolyamokon, egészen az internátus jellegével biró főiskolákig, mindenfajta oktatás a propaganda jegyében folyik.

Az ifjuság, a nők, a felnőtt munkások, a bizalmiférfiak, az üzemi tanácstagok, sőt a vezető szerepre készülők is külön tanfolyamokon nyernek képzést. Az egyes országok oktató apparátusának külön sajtója is van. A gazdagon fölszerelt könyvtárak pedig, valamint a munkáshallgatóságnak nyujtott könyvvásárlási kedvezmények szintén ennek a magasztos célnak a szolgálatában állanak. Külön figyelmet érdemel a legutóbbi években megteremtett nyári iskola rendszere, amely szintén kétirányu. A nyári iskolák egy részben az illető ország szocialista pártja, szakszervezetei és szövetkezeti intézményei delegálnak hallgatóságot a maguk kiválasztott tagjai közül, ahol a nyáron megfelelő helyen, internátusban nyujtanak hónapokon át képzést a tanulóknak és azokat vezető szerepre készitik elő. A másik része a nyári iskolának olyképpen van megszervezve, hogy azokon különböző országok szocialista pártjai küldik ki kiválasztott embereiket, hogy ott más országok delegátusaival együttesen tanulva, nemcsak egyetemes szocialista képzést nyerjenek, hanem egyuttal, az állandó érintkezés folytán, megismerjék a különböző országok munkásmozgalmát is. Ez is tisztára gyakorlati célokat szolgál, mert lehetővé teszi, hogy az ezekből az iskolákból kikerülő tanulók hazavigyék magukkal idegen országok munkásmozgalmának praktikus és követésre érdemes ujitásait. Ezenkivül hátra vannak még az egyes országok munkásegyetemei, amelyek azonban nem szocialista propaganda jegyében végzik oktató munkájukat, hanem általános, egyetemes képzettséget nyujtanak a munkásokból álló hallgatóságnak. Ezek közül kiemelendő az angol Ruskin College (Munkás főiskola), amelyet 100 évvel ezelőtt alapitott két amerikai polgár, a Labour College, amely a fönti egyetem kebeléből alakult a 80-as években, a The Victorian Labour College az ausztráliai Melbourne-ben, amely 1917. évben alakult, valamint a hasonló berendezésü munkásfőiskolák Sydney-ben, Brisbaneban és Perthben. Az 1921-ben megalakult brüsszeli munkásegyetem, az 1905-ben alakult prágai Arbeiterakademie, az 1922-ben megalakult párisi Munkásegyetem, az 1882-ben Sottevilles-Rouen-ben létesitett Népegyetem, az 1921-ben megnyilt Német Birodalmi Munkásfőiskola, a frankfurti Arbeiterakademie, a Brookwod College az Egyesült Államokban és az edingurghi College Irországban, az esbjergi Munkásfőiskola Dániában, a chicagoi Munkásfőiskola, amely szakszervezeti veztők kiképzésére van berendezve, a Common-Wealth College az amerikai Newlandban és ugyancsak amerikai I.W.W. ellenőrzés alatt álló Duluth Colleg stb. Ezek az adatok a háboru előtti időkről valók.

Az egyes országok szocialista oktatóapparátusára vonatkozóan elsősorban kell megemliteni Belgiumot. Munkásegyetemén évente két hónapos tanszakon folyik az oktatás. Az egyik tanszak francia, a másik flamand nyelven. Az egyetem föntartási költségeire minden ottani szervezett munkás állandóan heti öt centimes külön járulékot (Son de L'Ecole) fizet, mig a tanulót delegáló szervezet minden hallgató után 1600 frankot fizet tanszakonként. Azonkivül számtalan szeminárium müködik 6—9 hétig tartó tanszakkal, esténként 2 órai tanitással. A szemináriumokat — alsó és felső fokon — szakszervezeti tisztviselők, bizalmiférfiak és üzemi tanácstagok látogatják. Az oktatásnak két folyóirata van: a francia Education et Recreation és a flamand Ontwikkeling. A munkásegyetemek könyvtárában több mint 25.000 könyv van fölhalmozva. Az iskolák ingyen adják a tankönyveket. Vannak speciális tanfolyamok, amelyek 30 hétig tartanak. Sürün rendeznek külföldi tanulmány kirándulásokat, amelyek szintén a munkásoktatás célját szolgálják. Németországban hatalmas arányokban folyik a munkásoktatás, ugy az élőszó, mint a nyomtatott betü utján, 60 hetilapjuk 9 millió példányban jelenik meg, 10 szakfolyóirat 500,000 példányban szolgálja a munkásoktatás célját. A helyi pártszervezetek 665 könyvtárral rendelkeznek, 107 helyiségben van olvasóterem. A szakszervezeti funkcionárusok számára 55.000 példányban nyomják a szakszervezeti értesitőt. A Gewerkschaftliche Frauenzeitunk cimü ujság 468.000 példányban jelenik meg. Rendszeres tanfolyamok vannak a pártszervezeti titkárok számára. A munkásfőiskolán főként szakszervezeti tisztviselők nyernek egy éven át képzést és ennek költségét a szakmai szervezetek fedezik. Főiskolájuk van Tinzben (Thuringiában) is, azonkivül gazdasági iskolákat tartanak fön Dusseldofban és Berlinben. Az üzemi tanácstagok számára münsteri egyetemen rendeznek hathetes tanfolyamokat. Berlinben van a Volksschule, amelynek négyhónapos tanszakára a párt és szakszervezetek küldik ki a hallgatókat. Külön szemináriális tanfolyamokat rendeznek az egyes szakszervezetek. A Betriebsrate-Zeitung százhusz ezer példányban jelenik meg. 9 nagy szakszervezet külön folyóiratot ad ki az üzemi tanácsok számára 350.000 példányban. Azonkivül a szociáldemokrata párt az egész országban rengeteg szemináriumot tart fön féléves tanszakkal, átlag 30 hallgatóval, akik a munka alól fölvannak mentve a párt költségén.

Angliában a két egyetemen kivül az egész országban mindenfelé föntartják az esti iskolákat, amelyek demokratikus alapon vannak megszervezve és amelyekben a hallgatók választják meg az igényelt tananyagot, sőt magát az oktatót is. Az angol párt nagyon sok munkást küld ki a külföldi főiskolákba, amelyeknek a költségeit a párt és a szakszervezetek fedezik. Tartanak azonkivül megszámlálhatatlan mértékben szocialista propagandisztikus előadásokat, amelyekben dominálnak a vetitettképes és filmes előadások. Angliában a legteljesebb tanszabadság uralkodik és ez teszi érthetővé, hogy ott már évtizedek óta, semmi akadálya sincs annak, hogy a legszegényebb sorsban élő proletár gyermekek is, a munkás iskolákon keresztül, egészen a munkásegyetemekig juthatnak el ingyenes tanulással a legteljesebb képzettségig. Kitünő oktatóapparátusa van Csehszlovákiának, amely különböző nagy városaiban létesitett már munkásiskolákat. Ezek közül különösen kiemelendő a pilseni, a mahrischostrani, a teplitzi, a karlsbadi birodalmi pártiskolák, amelyekben 30—60 hallgató tanul állandóan. Ezenkivül vannak szemináriumok a bizalmiférfiak, üzemi tanácstagok, községi funkcionárusok, a nők és ifjumunkások számára. Hollandiában nyári iskolákat tartanak fenn. Évente 10 hallgatót küldenek a frankfurti Arbeiter-Akademie tanszakára is, azonkivül különböző szemináriumokban képezik a munkásságot, Ausztriában tökéletes oktatóapparátus müködik. 1926-ban avatták föl Bécsben a mintaszerüen berendezett Arbeiter-Hochshule-t, ahol évente 32 tanulót helyeznek el internátusszerüen és ennek költségeit a párt és a szakszervezetek fedezik. A legképzettebb munkásvezetők, egyetemi professzorok és autodidakták oktatják a hallgatóságot. Sok szeminárium müködik Ausztriában specializált tanszakokkal, ifjak, nők és különböző funkcionárusok számára. Az egyes előadások rendezésénél nagy sulyt helyeznek a szemléltető oktatásra, a vetitettképes és filmes előadások ott napirenden vannak. Meg kell itt külön emliteni, hogy Bécsben, amely szociáldemokrata közigazgatás alatt áll, a munkásság vezetői megteremtették évekkel ezelőtt azt a nagyszerü iskolareformot, amellyel a népiskolákban is egészen uj pedagógiai rendszer alapjára helyezték az oktatást. Az iskolákból kiküszöbölték a régi, elavult és a gyermekek bifláztatásán alapuló pedagógiai rendszert és helyette életre hivták a tapasztaltatáson,

ELŐRE KÖLTŐK.

Előre költők!.. Lantotok hurjain
Csüggedt hattyudal ne zengjen soha!
Legyen a hangotok: recsegő harci kürt,
Vagy milliók jaját zugó orgona!

Szilaj induló — vagy lelkes ébresztő,
Petyhüdt ereket mely friss vérrel elönt;
Hivő munkásszivek zugó zsolozsmája,
Hajnalhasadás mely ujjongva köszönt.

Cikázó villám sürü éjszakában,
Mitől fénybe borul a setét égbolt.
S ha kell, kihalt puszták vándorkeselyüje,
Mely a romok felett vészesen rikolt.

Sirva vagy nevetve. Keserüen vagy vigan,
De előre költök! Hallasuk szavunk.
Rémitő a Csönd és riaszt a Némaság.
Tudják meg, hogy élünk s élni akarunk!

Zoldos István

ráeszméltetésen nyugvó pedagógiai rendszert. Abból indulva ki, hogy minden emberben van egy természetes, veleszületett képesség és hajlam, amelyet ki kell váltani már az ifju gyermekből, olykép rendezték be a tanitást, hogy az iskolákban nem kell a gyermekek fejébe beleverni a tudást, hanem komoly céltudatossággal és megfelelő tanitási módszerrel ki kell váltani a bensőjükből a bennük szunnyadó képességeket. A gyermekek ingyen kapnak könyveket és tanszereket, amelyek uniformizálva vannak és igy tehát a gazdag gyermek nem lehet megkülönböztetve a szegény gyermektől. Az osztrák pedagógiai módszer tehát már az elemi iskolában tompítja a gyermekek között látható osztályellentéteket. Az osztrák iskolákban a tanitónak nincs katedrája, dobogója, hanem csupán egy asztala és igy tulnyomó részt a gyermekek között járkálva végzi oktató munkáját. Az ilyen szabad szellemben nevelt gyermekek, ha kikerülnek az iskolából, fejlődésük minden fokán találkoznak a szocialista oktatómódszerrel és mire bekerülnek fölnőtt munkáskorukba a munkásiskolába már minden előfeltétellel rendlekeznek arra, hogy kitünő harcosaivá válhassanak a munkásság fölszabaditó küzdelmeinek. — Franciaország szocialista munkásoktatása a belgiumi rendszer nyomdokain halad, de távolról sem oly tökéletes, mint az. Két munkásegyetemen kivül ugyancsak rövidebb-hoszszabb tanfolyamokon képezi a szocialista munkásságot és rendezi az ország különböző részeiben ismeretterjesztő előadásait. — Olaszországban egy meglehetős nagykiterjedésü szocialista munkásoktatást fojtott meg a fasizmus. Az olasz munkásságnak 1921-ben még 97 munkásiskolája volt. Akkor létesült az Universita Proletária Monza, amelyet az olasz Magántisztviselők Szövetsége és a Szakszervezeti Tanács együttesen hivott életre. Azonkivül ugyanakkor létesitették Milánóban a Népegyetemet, amely szintén a szocialista munkásság képzésének célját szolgálta. Monzában a szakszervezetek és a fogyasztási szövetkezet együttes akciója nyomán létesült a Ricreatoria Laico Giuseppe Garibaldi nevü munkásintézmény, amely azonban csupán a munkásság sportszerü képzésével foglalkozott. Minthogy a fasizmus az egész szocialista munkásmozglamat tönkretette, igy ott jelenleg szocialista munkásoktatásról nem lehet szó. Hasonló a helyzet Lengyelországban, ahol 1920-ban alakitották meg a Kultura Robotnika nevü munkásoktatószövetséget, mely kebelébe zárt 16 oktató szervezetet, az Universytet Ludlowy-t, egy munkásfőiskolát, azonkivül egyes szakszervezeteket és néhány semleges kulturális szervezetet. A Lengyelországban dühöngő ellenforradalmi reakció azonban ezt az oktatási szervezetet szétdulta és Lodzban például ennek a szövetségnek az egyik szekcióját, amely munkásiskolát akart létesiteni, az alapitóval, a tanulókkal és a tanárokkal egyetemben letartóztatták. Svédországban szintén müködik egy munkásfőiskola, amelynek szervezete évente 6—7 kurzust rendez 10—12 heti időtartammal. Azonkivül Svédországban is százával tartanak az ország különböző részeiben oktatóelőadásokat. Az oktatásügyi központ havi folyóiratot ad ki és sulyt helyez vándorszinésztársulatok szervezésére, amelyek propagandisztikus előadásokat tartanak a munkásság számára. Svájcban rövidebb-hosszabb tanfolyamokkal, egyes ismeretterjesztő előadásokkal, külön oktatásügyi folyóirattal, külföldi tanulmányi kirándulások rendezésével képezik a munkásságot, azonkivül évente átlag 10 hallgatót küldenek ki a frankfurti munkásegyetemre.

Az Egyesült Államokban 1921-ben alakitották meg a munkásképző szervezetet, amelynek a kebelébe tartoznak a különböző szervezetek, összesen 2 millió taggal. Három internátussal rendelkeznek, amelyekben átlag 10 osztályban képezik a munkásokat. A különböző munkásegyetemeken kivül, amelyekről már föntebb emlitést tettünk, müködik Amerikában 26 munkásiskola, amelyek közül a legnagyobb a bostoni. Ezekben 24 hetes tanfolyamokkal oktatnak és minden munkásiskolának 5 osztálya van. Az oktatás ideje októbertől áprilisig terjed. Azonkivül föntartanak speciális tanfolyamokat különböző iparágak munkásai számára. Főiskola müködik Portlandban 200 hallgatóval. Továbbá Denverben, Coloradó Springsben, Greelyben, Pueblóban, Des Moines-ben, Minneapolisban, St. Paulban, Rochesterben, New Yorkban és Newhavenben. Ezenkivül 200 városban van rendszeres szeminárium a nők és az ifjumunkások részére is. Az iskolákban évente összesen 30—40 ezer hallgató tanul és ugyan ott nemcsak a munkásszervezetek vezetői, hanem tanitók, tanárok és különböző egyetemek vezetői is tanitanak. Az oktatószervezetnek van egy havi folyóirata, azonkivül egy negyedévenként megjelenő organuma (Workers Education). Külön oktatóapparátusokat tartanak fönn az egyes nagyobb szakszervezetek is. Dániában munkásfőiskola létesült helsingőrben, amelybe azonban külföldi országok is delegálhatnak hallgatókat. A munkásfőiskolába főként ipari munkásokat vesznek föl, mert ezeknek a kiképzésére helyezik a fő sulyt, (ez vonatkozik egyébként a bécsi munkásfőiskolára is). Dániában azonkivül a többi országokhoz hasonlóan, rendeznek munkásszemináriumokat és ismeretterjesztő előadásokat. Finnországban 1919-ben alakult meg az oktatásügyi központ és 1924-ben privát ajándék és a szervezetek hozzájárulása segitségével megteremtették Helsingforsban a munkásfőiskolát, amely azonban nem kifejezetten szocialista oktatást, hanem egyetemes képzést nyujt a hallgatóságnak. Évente átlagban 120—130 szemináriumot tartanak fönn Svédországban és tömegével rendezik az egyes ismeretterjesztő előadásokat. Uj-Zealandban a kormány évente 500 fonttal támogatja a munkásképzést, Canterburyban 3 nyári, 1 téli iskola van földmunkások számára és több szemináriális tanfolyam szolgálja a munkásoktatást. Azonkivül a különböző nagyobb városokban szintén müködnek tiz-tizenkét hetes munkásszemináriumok. Palesztinában a különböző városokban négy és hathetes szocialista tanfolyamokat rendeznek ugy az ipari, mint a mezőgazdasági munkások részére. Három városban és hét községben héber tanfolyamok müködnek, hogy az odaözönlő idegen bevándorlók mihamarább megtanulják ezt a nyelvet és hogy belekapcsolódjanak a munkásmozgalomba. Indiában most van kifejlődőben a szocialista munkásoktatás és egyelőre Bombayban müködik munkásiskola, amelynek előadásait bárki meghallgathatja. A különböző városokban tudományos előadásokat rendeznek és ezeknek előadói kizáróan a Bombay egyetem tanáraiból tevődnek össze. Magyarországon szintén csak a háboru utáni években kapott hatalmasabb lendületet a szocialista munkásoktatás, amelyet azonban nagyban hátráltat kifejlődésében az ellenforradalmi politikai rendszer. Ennek ellenére azonban ugy a fővárosban, mint a vidéken mind nagyobb számban létesülnek évente hathetes és féléves szemináriumok, amelyeket részint a párt és részint a szakszervezetek tartanak fönn. Az egész országra kiterjedően rendez a párt ismeretterjesztő és tudományos előadásokat, muzeumlátogatásokat és tanulmányi kirándulásokat. Azonkivül megszervezi a külföldi tanulmányi kirándulásokat is. A téli hónapokban kulturestélyek rendezésével szolgálja a munkásság irodalmi és müvészi képzését. Hasonló oktatásügyi apparátust tart fönn a Szak-

KORUNK JÁRMÁBAN

Nem merünk bátran önmagunkba nézni,
Hetykén kiszórni mi bennünk hazug;
Kinzó csalásra lettünk elitélve,
S igy vénit minket hajlottá a lug.

Lőre kell nekünk éltető méregnek,
Hogy elviseljük szótlan a nyomort.
Tavaszi felhők illatos zenéje.
Mert mártirságunk váltsa meg e Kort.

Vagy közhelyeket fecsegő poéta,
Ki gyáván mekeg alanyra igét;
Hogy tudatunkon fohásszá rothassza
Mit mákonnyal a kor szelleme véd.

Smint hol szerelmét dédelgető férfi,
Ki gyászruhában keres uj arát:
Asztal döngetve szellemet idézünk,
Hogy megszépitsük sután a halált.

Szüdi György

szervezeti Tanács, főként a munkásságnak a szakszervezeti mozgalomban szükséges gyakorlati képzés szempontjából. Ugyancsak a Szaktanács fáradozik azon, hogy a legközelebbi időben a szakszervezetek anyagi támogatásával megteremtse a munkásfőiskolát, amely vezetők képzésére volna hivatott.

Általában meg kell jegyeznünk, hogy a szocialista munkásoktatás ügyét minden országban demokratikusan szervezett testületek irányitják, amelyek speciálisan foglalkoznak a szocialista oktatás kimélyitésével. Ezeknek a testületeknek az összessége alkotja az Oktatásügyi Internationálét, amely fejlődése folyamán hivatva van nemcsak a Nemzetközi Főiskolának a megteremtésére, hanem egy olyan modern és szocialista alapelveken fölépülő pedagógiai rendszernek a kidolgozására is, amelynek alapján később a proletáriátus céltudatosan nevelheti a jövő nemzedéket.

Ezek a föntebb közölt adatok kézzel foghatóan bizonyitják, hogy menynyire szüksége van a munkásosztálynak a demokratikus keretek között élni, hogy fejlődhessenek, tanulhassanak és hogy céltudatosan szervezkedhessenek. A munkásosztálynak már többször is volt alkalma a történelem folyamán az uralkodó osztályt megsemmisiteni, de tudásának hiányában a megszerzett hatalmat hagyta kisiklani a kezéből, mert a felette álló osztály tanultabb, rafináltabb, képzettebb volt, ugy Spartakus, mint Dózsa avagy Hitler idejében is. És hiu ábránd az, hogy a fasizmus, vagy nácizmus ipari koncentrációja közelebb hozza a munkást a fölszabaduláshoz, mikor elzárják előle a tudást, mert "a tudás hatalom" és tudás nélkül nincs hatalom.

A technika, a szerszám fejlődhet, a tömegmunkás szétszórva, részletekben kezelheti a legkomplikáltabb gépeket is, de ha általános tudása nincs, akkor a fölszabadulás még nagyon messze van, még akkor is, ha a magánkapitalizmus elpusztul és helyét a diktatura veszi át, mint Németországban — bár ott sem pusztult el a kapitalizmus. Vakok azok a munkások és botorul tudatlanok, akik Hitlerben látják a fejlődés szentgyörgy lovagját. Végtelenül sajnálatos szellemi szegénységre vall az a gondolkozási mód, aki Hitler gaz, becstelen theóriáját és cselekedeteit tudja glorifikálni, mert sajnos, ilyen munkások is vannak.

Az áldemokratikus kapitalizmus kivánatos és kötelességünk felcserélni a szocializmussal, az ipari demokráciával, de, hogy ezt elérhessük, ehhez szükésges egy munkáskulturában felnevelt, harcos és öntudatos munkásosztály, hogyha majd az örökséget átveszi, tudjon azzal bánni.

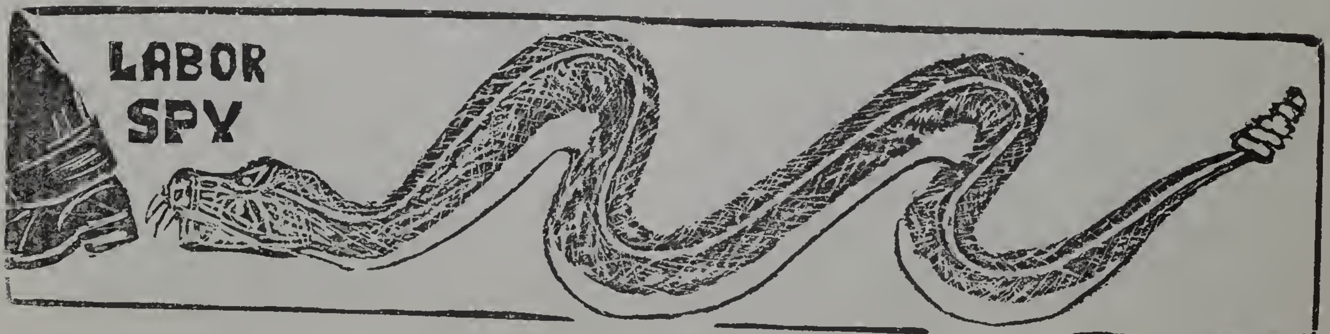
A gyakran használatos anyagok fajsulya:

Fasuly alatt azt a számot értjük, hogy az a bizonyos anyag hányszor nehezebb az ugyan olyan térfogattal biró tiszta viz sulyánál.

Viz 1, parafa 0.24, fenyőfa 0.61, hársfa 0.84, alkohol 0.84, jég 0.92, vaj 0.94, bor 1, ecet 1.02, tej 1.00, szén 1.30 ébenfa 1.33, méz 1.45, elefántcsont 1.43, kén 2.00, márvány 2.70, üveg 2.89, gyémánt 3.55, öntött vas 7.21, kovácsolt vas 7.79, acél 7.83, réz 8.95, ezüst 10.47, ólom 11.38, higany 13.57, arany 19.26, platina 21.50.



VÁMBÉRY RUSZTEM

MEGHALT A LIBERALIZMUS

RÉGI elérhetetlen álmom, hogy senki fiát ne engedjék a tanitó-mesterség közelébe — mindegy, hogy mint professzor, politikus, ujságiró, tudós vagy müvész gyakorolja-e —, aki egy fogalomtisztitóintézetnek hites bizonyitványával nem igazolja, hogy tisztában van azoknak a szavaknak fogalmi értékével, amelyeket használ. Sohasem volt aktuálisabb Mefisztó mondása: “mikor a fogalom hiányzik kapóra jön egy röpke szó” s bár közel két évtized óta kevés okom volt, hogy a hatalmat gyakorló államférfiak politikai tudásának szabatosságáért lelkesedjem, mégis el kell ismernem Marschall Ferenc államtitkár megállapitásának helyességét, hogy “a nemzet nagy tragédiái a felelőtlenül terjesztett jelszavak uralomrajutásából keletkeznek”. Kiegészitésre szorul e megállapitás, mert a tragédiák reménytelen katasztrófákká sulyosodnak, ha e szembenálló jelszavakat mindenki önkényesen más tartalommal tölti meg, mint aminőt jelentésükkel kifejeznek. Pénzhamisitás vagy élelmiszerhamisitás büntetendő cselekmény, de a fogalomhamisitás, bár sokkal veszélyesebb következményekkel jár, fémjelzett politikusok kedélyes játékának számit.

Pár évvel ezelőtt a magyar kormány egyik tudós korifeusa, a liberálisnak keresztelt ujságok üdvrivalgása mellett hirdette, hogy “Tisza István szelleme int bennünket a ma divatos diktatura-ideologia ellen”, sőt megállapitotta, hogy Tiszának liberalizmusa “egyenes folytatója volt Deák Ferenc liberalizmusának, mely az egyéni és a közszabadságok, a törvényes jogok és az emberi méltóságok köteles tiszteletét jelentette”. Vajjon a Tiszák, akik Deák Ferenc nemzetiségi törvényének végrehajtásától ‘liberálisan’ eltekintettek s a magyar dolgozó osztályok helyett a Habsburgok mellé álltak, valóban folytatói voltak-e Deák liberalizmusának s vajjon Tisza István, saját uri kasztjának a becsületes, bátor, de rövidlátó képviselője, valóban a közszabadságot tisztelte-e, amikor a zsebkendőszavazást feltalálta s az emberi méltóságot tisztelte-e, amikor a szocialista “izgatókat” a toloncházba csavargók s prostituáltak közé csukatta, arról ezuttal nehogy irásom tulhoszura nyuljon, inkább nem vitatkozom, de azt nehéz szó nélkül hagyni, mintha a liberalizmus általában s a háboruelőtti magyar “liberalizmus” különösen, a diktaturáknak hatékony ellenszere volna.

A föld- és finánctőke szabadsága

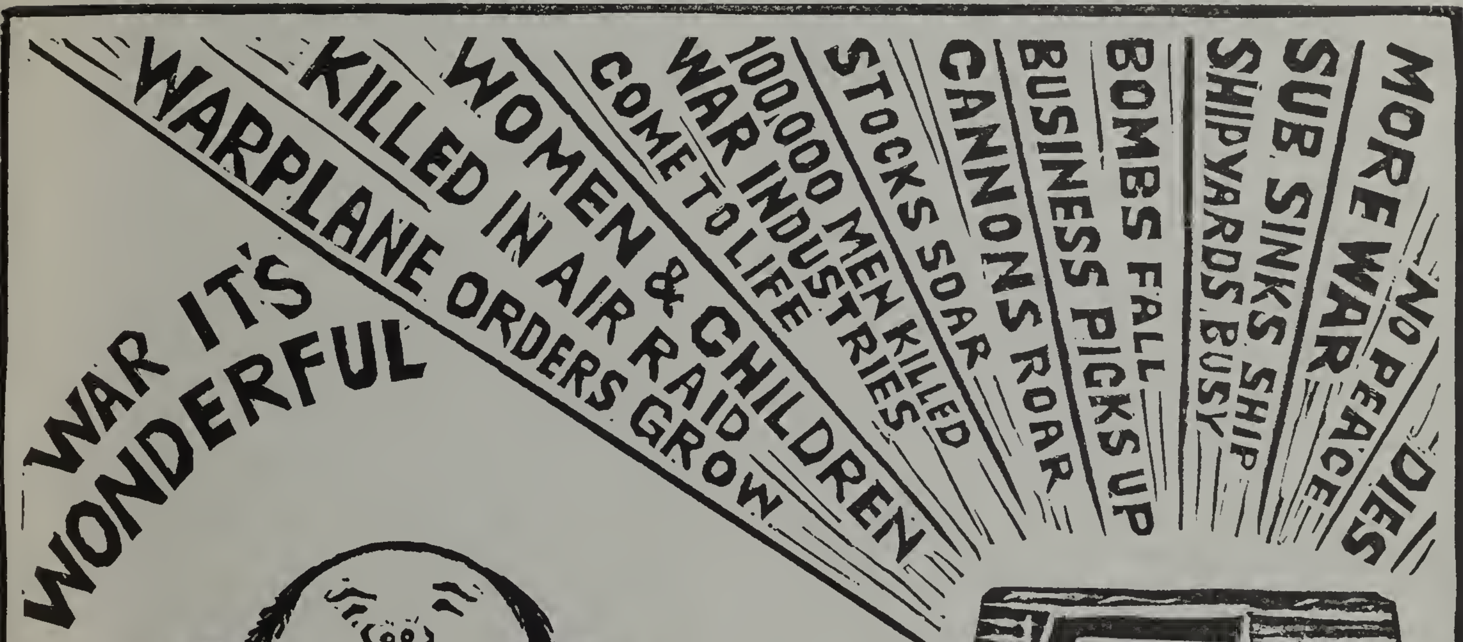
Noha a liberale szó őshazájában, Spanyolországban, a 19. század legelején, a servile szónak ellentéte volt és a negyvenes évek magyar liberalizmusa, ahogy azt Eötvös, Deák, Szalay, Kemény Zsigmond és társaik elkondolása kiépitette, a metternichi zsarnoksággal állt szemben, sőt az 1848 márciusának hitvallása is a maga tisztaságában tükrözte azt a politikai rendszert, amelyért a nyugati államokban, Palmerston, O’Connor, Victor Hugo és Cavour harcoltak, mégis annak a liberalizmusnak, amelyet Tisza Kálmán és utódai szabadelvüségre magyarositották, édes-kevés köze volt a francia forradalomnak a napoleoni korban leszürődött hagyományaihoz. Lényege, az erősen megnyirbált és csak papir-biztositékra támaszkodó szabadságjogoktól eltekintve, a föld- és finánctőke zsákmányoló szabadsága volt. Ez a laisser faire liberalizmus, amely a tengerek szabadságát összetévesztette a kalózkodás szabadságával, mit sem törődött azzal, hogy a nyugati államokban a 19. század végefelé e politikai irány képviselői: Hobhouse, J. A. Hobson és mások követelték az állami beavatkozást azon a cimen, hogy nemcsak az egyén, hanem a közösség is tényezője a gazdasági termelésnek. Amikor maguk meg a bankokkal szövetkezett feudális uralom a "szabadelvü" cimmel és jelleggel diszitve, szélesitette ki a gazdasági ellentéteket, Franciaországban a szocializmus, Angliában a fabianizmus, sőt a bismarcki Németbirodalomban is erősen céltudatos szociálpolotika gyakorolt befolyást arra a liberalizmusra, mely a gazdasági hatalom birtokosainak szabadságát a nekik alávetettek kifosztására használta föl.

Egész a világháboruig kifogástalanul müködött ez a magyar királyi szabadelvüség, de sajnos, kevesen akadtak a világháborut megelőző félszázadban, akik a szabadelvü minisztereket, főispánokat, bank- és iparvezéreket, mint hajdan Madame Le Mére a fiát, Napoleont, figyelmeztették volna, hogy "tout va bien, pourvu que ca doure" (minden jól megy feltéve, hogy ez igy tart) és ma is nyilván kevesen vannak, akik észreveszik a kapcsolatot a szabadelvüség aranykora és a mai "szélsőségek" korlátolt elkeseredése közt. Épp igy mgefeledkeznek a hazai veretü szabadelvüség letünt aranjuezi napjainak siratói arról, hogy a liberalizmus nemcsak a nyilt és az álparlamentarizmussal leplezett diktaturák országaiban bukott meg, hanem a demokráciákban is felmorzsolódott a tőke és a munka malomkövei között. Felmorzsolódott, de nem szünt meg, mert tartalma: a politikai szabadság, az egymással szembenálló pártokba egyaránt felszivódott. Valamikor nálunk, a negyvenes évek diétáján, Angliában még a háboru előtt is, a liberális párttal a konzervativ párt állt szemben, de ma a konzervativ párt egy jottával sem kevésbé biztos támasza a politikai szabadságnak, mint a munkáspárt s mindkettő, noha egyik sem "liberális", egyaránt ellensége a különböző nevü és szinü diktaturáknak.

Elemi fogalomzavar nélkül senki se tarthatja a háboruelőtti magyar liberalizmust, amelyért oly megható sirámok hangzanak el a "baloldali" karszalagu tizfilléres nyomtatványokban, a diktaturák ellenszerének. Nemcsak azért nem, mert a diktatura ellentéte a demokrácia, amely nem szükségképpen liberális, nemcsupán azért nem, mert a liberalizmus ellentéte a konzervativ reakció, amelyet csupán kevésbbé fegyelmezett elmék szoktak a diktaturával összetéveszteni, hanem főképpen, mert a magyarveretü "liberalizmus", amely az uri kaszt előtt meghódolóknak bő kereseti lehetőséget biztositott, nem éppen alkalmas a gazdasági elkeseredés enyhitésére. Már pedig nyilvánvaló, hogy a diktaturáknak nagyzási hóbortban szenvedő kalandorai, zavarosagyu fanatikusai és korlátolt követői éppen ebből az elkeseredésből táplálkoznak.

örök harc a diktaturák poklán át — a zsarnokság ellen

Belenyugodhatunk tehát, hogy az a liberalizmus, amelyet kivénült bankvezérek, a szekerük elé fogott kivénült politikusok és publicisták makacsul visszasirnak, minden felélesztési lehetőség nélkül jobblétre szenderült. Ami korátsem jelenti, hogy vele együtt halt volna meg az egyéni polgári és politikai szabadságért folytatott örök harc, amelynek formái és fegyverei váltakozhatnak ugyan, de amely minden diktaturák poklán át fog folytatódni a szarnokság ellen, akár a saját, akár az állammindenség (totalitás) nevében gyakorolja azt az itélőképességtől mentes kalandor, akinek tehetsége vagy tehetségtelensége a fejébe szállt. Szerencsére az emberi természetben rejlik, hogy a zsarnokság ellen küzdjön és bár Hazlitt szerint "egy zsarnok számára mindig készen áll ezer rabszolga" ("A talpnyalók és zsarnokok összefüggéséről"), épp oly kétségtelenül mindig készen állnak a milliók is, hogy zsarnokaiktól megszabaduljanak. De ennek a szabadulásnak egyik feltétele, hogy a szabadságért folytatott küzdelmet ne kapcsolják politikai pártoknak elkoptatott cimjelzéséhez. Diktaturák elhárítására sokkal alkalmasabb eszköz a közszabadságok helyreállitása, anélkül természetesen, hogy ez a szabadság jogot adna a diktatura őrültjeinek és gonosztevőinek az alkotmányosság lerombolására. Oly parlamenti párt, amely nyiltan a demokrácia ellen tör és a szabadságot arra használja, hogy a szabadság ellen lázitson, csak a bolondok házának logikájába illik, de nem a népképviseletbe. Éppen az utóbbi évtizedek tapasztalata bizonyitja, hogy a parancsuralomra vágyakozókat érvekkel épp oly lehetetlen vállalkozásuk ostobaságáról meggyőzni, mint az önjelölt diktátorokat arról, hogy bennük nem szükségképpen a kifürkészhetetlen isteni bölcsesség öltött testet. Arra a parlamentre, amelynek kormánya nem teszi ártalmatlanná a diktátorjelöltet, mielőtt ártalmassá válhatna, valóban Jézus szava illik: "Az én házam imádkozás házának mondatik,



WAR IT'S WONDERFUL
WARPLANE ORDERS GROW
KILLED IN AIR RAID
WOMEN & CHILDREN
COME TO LIFE
WAR INDUSTRIES
100,000 MEN KILLED
STOCKS SOAR
CANNONS ROAR
BUSINESS PICKS UP
BOMBS FALL
SHIPYARDS BUSY
SUB SINKS SHIP
MORE WAR
NO PEACE DIES
BOSS
WAR NEWS
X13

A Big Business soha nem remélt hasznot élvez a háboru borzalmaiból ti pedig ezt latroknak barlangjokká tettétek." (Máté 21. 13.)

Sem Tisza István szelleme, sem a magyar alkotmány szelleme nem nyujt elég védelmet a diktatura ellen, amelynek éppen az a sajátossága, hogy minden szellemi ellenvetést ököllel szokott elintézni. Különösen vonatkozik ez arra a diktaturára, amely szellemtelen pogányságát, troglodita brutalitását, tudománytalan nagyzási hóbortját és a belőle fakadó gyülöletet a keresztnek, mint a szeretet jelképének, különféle eltorzitásaival leplezi. Egyetlen "szellemi" hatalma: a fajelméletre alapitott antiszemitizmus, érveknek épp oly hozzáférhetetlen, mint más demagógikus jelszavak. Szinte el kellene szomorodni a naivságon, ha nem volna anynyira kómikus, hogy egyébként komoly emberek az antiszemitizmusnak ostobaságát, amely nem hajlandó tudomásul venni, hogy gazdag és szegény, eszes és korlátolt, tisztességes és becstelen zsidók között sokkal nagyobb az ellentét, mint mindezek és a nemzsidók közt, azzal akarják leküzdeni, hogy reámutatnak: mi mindent tettek zsidó iparmágnások és bankárok, mintaföldbirtokosok, kereskedők, tudósok és müvészek a magyar anyagi és szellemi kultura terén! Nem veszik észre, hogy éppen ez az, amit a nyilas- vagy horogkereszt nem tud megbocsátani. Nem veszik észre, hogy éppen ezzel igazolják a Nep meg a Nap "szélsőségeinek" a vádját, amely szerint a zsidók annyira elfoglalták a magyar közélet napos oldalát, hogy a szegény diplomás keresztény fiatalság az állástalanság árnyékában didereg. Mintha — mellesleg megjegyezve — az egyetemi oklevél, még amikor több tudással szerezték, mint ma, valaha is kereseti jogot s nem csupán lehetőséget biztositott volna. Éppen azok, akik a fajelméleti antiszemitizmus miatt joggal hördülnek fel, nem vesznek tudomást róla, hogy védekezésükkel zsidó fajelméletet teremtenek. Aki akár a gazdasági, akár a szellemi alkotás terén elért sikereket mint zsidó sikereket és eredményeket könyveli el, ezzel csak a tudatlan babona alá ad lovat, mintha a tehetség és szorgalom, a szellemi képesség és az erkölcsi kiválóság elsősorban fajtától, nemzetiségtől vagy vallástól függne. Holott a legelemibb társadalomtudományi ismeretekből kiderül, hogy mindezek az egyéni képesséség, a környezethatás és a gazdasági helyzet mellett elenyésző szerepet játszanak. Fogalomzavar nélkül nem is képzelhető, hogy valaki a nácizmussal vitába szálljon, még hozzá oly érveléssel, amely ellenfelének "elméleti" zagyvaságát támasztja alá.

Szociális igazságot és szabadságot!

Érvek azokról, akik ellenfeleink erőszakos elpusztitását politikai erkölcsnek tartják, ugy pattognak le, mint borsó a falról. Ideiglenesen a börtön és a bolondok háza alkalmas ugyan az erőszak közveszélyes fanatikusainak a megfékezésére, de a diktatura baktériumait, mint minden élősdit csak ugy lehet kiirtani, ha lecsapolják a lápot, amelyben tenyésznek. Lehet, hogy sok mindent köszönhetünk a háboruelőtti liberalizmusnak, csak éppen szociális igazságot és politikai szabadságot nem. E kettőnek összhangja nélkül pedig mindig fog akadni több-kevesebb bolond, kalandor és csirkefogó, aki sikeresen üzi a lélekhalászatot a fogalomzavar mocsaras vizében, hogy hataloméhségét kielégitse. Sem a szociális igazság, sem a politikai szabadság nem a szavakon mulik és hirdetésük — hogy boldogult Szabó Ervin barátom szavait variáljam — "annyit ér, amennyit hirdetőjük a maga cselekvésével valóra vált".

Nincs okunk, hogy a háboruelőtti Magyarország örökségének láttára a liberalizmus csendes elhunytán keseregjünk.

(Vámbéry Rusztem, egyetemi tanár, ezt a cikket eredetileg a budapesti Népszava 1937 május elsei számára irta. Az azóta lezajlott történelmi események igazolják nagyszerü megállapitásait és éppen azért a cikk ujbóli közlése igen aktuális. — Szerk.)

FISHBEIN LÁSZLÓ

HOGYAN VISELKEDJÜNK A MOZGALOMBAN

“AZ ipari szervezkedéssel az uj társadalom szerkezetét épitjük a régi társadalom keretein belül” az I.W.W. elvinyilatkozat történelmi megállapitásainak egyik részlete. Munkásmozgalmunk tehát megjelenésével különbözik a jelenlegi rendszert fenntartó mozgalmaktól. Egy kis uj társadalom a régi társadalomban. Habár sok tekintetben alkalmazkodnia kell a régi társadalom szokásaihoz és törvényeihez, formájában kiválik a rendszerből és még azok által is könnyen felismerhető, akik soha nem voltak aktiv résztvevői a munkásmozgalomnak.

Az utóbbi évekig azt mondhatjuk, hogy az igazi munkásmozgalom csak mint propaganda alakulat létezett és jó részben még ma is csak ezt a hivatást tölti be. A munkástömegek között elhinteni azt az eszmét “hogy egynek a sérelme valamennyiünk sérelmét jelenti” megértetni azt, hogy mint munkások mindannyian testvérek vagyunk az egész világon, eltekintve attól, hogy milyen nemzet fiai vagyunk, vagy milyen szine van arcbőrünknek, avagy milyen vallás istenének tisztelgünk. Mint munkások közös érdekeink vannak melyeket ugy a pillanatnyi sérelmeink orvoslására, mint a jövő társadalom felépitésére az Egy Nagy Szervezet hatalmi erejével érvényesithetünk.

Nehéz feladat a propaganda végzése és nagyon sok akadályokkal kell annak folytatásánál megküzdenünk. Amikor már elértük azt, hogy egy egy munkást a munkásmozgalmi uj társadalomba beszerveztük még csak azután kezdődnek az igazi akadályok, hogy a megnyert munkástársunkat a kis uj társadalmunkban megtartani tudjuk. Ismerve a kapitalista rendszer összetételét mi jól tudjuk azt, hogy minden megnyilvánulása végeredményben a kizsákmányolás szinterére nyulik vissza s csakis azon célból, hogy a profit gyüjtés minél simábban és eredményesebben történjen az uralkodó osztály részére.

Amikor egy munkás elhatározta magát arra a lépésre, hogy a munkásmozgalom tényleges tagjai közé akar tartozni, még nem jelenti azt, hogy a régi társadalom minden szokásaival felhagyott és mint osztályharcos forradalmár megtalálta a helyét az emberiség jövőjéért folytatott küzdelemben. De viszont ehhez már segitséget akar nyujtani és azoknak, akik már régebben tagjai annak a kis uj társadalomnak minden alkalmat meg kell ragadni, hogy az uj jövevényt állandó tagnak megtartani tudják. Ehhez szükséges a tapintatos bánásmód az uj munkástársunk fogadásánál és általában olyan viselkedés, mely az uj társadalmunkat kedvelté teszik előtte.

Mint ahogy mondani szokás, minden embernek van valami hibája, hiba nélkül ember nem létezik. Különösen nem létezhet ma, amikor a végletekig felsrófolt speed-up termelés a legjobb idegzetü embert is megtöri. A nagy bizonytalanság, mely munkanélküliség rémét tükrözi állandóan a munkás szeme elé, az alacsony bér, mely a család nélkülözését eredményezi, betegségek melyekre nincsen meg a szükséges orvosi kezelés és ezer és ezer más családi és egyéni bajok, a legerősebb idegzetet is részben felőrli. Ha megnyertünk egy munkást uj társadalmunknak ugy az közénk jött a régi társadalomban szerzett minden bajaival.

És mi magunk is a létezési táperőt a régi társadalomból meritjük. Bármilyen hosszu idő óta is tagjai vagyunk az uj társadalmunknak a réginek a bélyegét magunkon viseljük. Igy történik aztán az meg, hogy a régi társadalomban szerzett bajainkat az uj társadalmi családi körünkbe behozzuk ottan tárgyaljuk és a régi szokások szerint mások ügyeivel foglalkozunk. Ezeket a bajokat ki kell küszöbölni a mi kis társadalmi rendszerünkből, mert azáltal annak gyorsabb ütemü fejlődését fogjuk elősegiteni.

Első sorban tehát arra kell vigyáznunk, hogy amennyire csak tőlünk telik, egymással szemben a legnagyobb tisztelettel viselkedjünk, egyéni véleményeinket az eseményekről tiszta meggyőződéssel nyugodtan mondjuk el és soha ne felejtsük azt, hogy amilyen határozottan mi állitjuk véleményünk helyességét, ugyanolyan tiszta meggyőződésü határozottsággal állithatják annak ellenkezőjét más munkástársak. És ahogyan elvárjuk azt, hogy meghallgassanak bennünket, ugyanolyan jogon elvárják azt mitőlünk. Az eszmecsere az uj kis társadalmunk elméleti fejlődésének értékmérője. A kritika jogának szabad használata az egyik leghathatósabb fegyver a diktatorikus uralmi rendszerek ellen. Sose képzeljük azt el, hogy mivel mi vagyunk a legjobb forradalmárok, akik rajtunk kivül állanak azok senkik és semmik. Ezzel csak gyülölőket és nem barátokat fogunk nyerni a munkásmozgalomnak.

Sose foglalkozzunk munkástársaink egyéni és családi dolgaival. Sose itéljünk meg senkit arról, hogy milyen eset történt családjában. A családi bajok a kapitalista társadalmi rendszer kinövései melyekért első sorban a kapitalista társadalmi rendszer felelős. Nem lehet tehát birálat alá venni valakit a családi dolgaiért, csak azért mert a munkásmozgalmi uj társadalmunknak is tagja. És nem szabad leszólni egyeseket azért, mert családtagjaik a munkásmozgalom iránt ellenszenvesen viseltetnek. Ki kell vetköznünk abból a régi társadalmi szokásból, hogy apát a fiáról, a fiut az apáról itéljük meg. Mindenre meg kell várni az alkalmas időt, és aki ma a legnagyobb ellenségnek tekint bennünket dacára annak, hogy munkástestvére vagyunk, holnap talán legjobb barátunk lehet és hasznons tagja uj társadalmi rendszerünknek.

És ami szintén nagyon fontos, ne foglalkozzunk senkinek sem a vallási ügyeivel. Tudományos alapon, értelmes magyarázattal a legvallásosabb egyénnel is beszélgethetünk a vallási kérdésekről és sok esetben ha nem is nyerjük meg, de nem lesz ellenségünk. De egyeseket sértegetni vagy gunyosan leszólni csak azért mert bizonyos vallás hivei, az inkább kárt jelent a munkásmozgalmi agitációban. Azt az álláspontot követni a munkásmozgalmi ténykedésben, hogy "papszamarakkal nincs mit beszélni" átkos tévedés és felmérhetetlen károkat okozott a munkásmozgalomnak. Nem szabad felejtenünk, hogy a vallás hirdetésének évezredes gyökerei vannak és azt nem lehet máról-holnapra megváltoztatni. Ahhoz nyugodt, értelmes, ismertető propagandára van szükség. A leszólásokkal csak ellenséget szerzünk a munkásmozgalomnak. A vallást tehát tekintsük mindenki magánügyének és csakis társadalmi vonatkozásban foglalkozzunk vallási kérdésekkel.

Van még egy igen fontos kérdés, mely szinte elég sok bajokat okozott a kis munkásmozgalmi uj társadalmunkban, ez az alkohol fogyasztás kérdése. A magyar munkásmozgalomban különösen sok vita tárgyát képezte ezen ügy, leginkább azért, mert mig a régi magyarországi munkásmozgalomnak az egyik látszólagos forradalmi ténykedése volt az alkohol fogyasztás elleni harc, addig az amerikai munkásmozgalomnak őszintén bevallhatjuk egyik kelléke. Munkásmozgalmunk kezdetén itt az Egyesült Államokban is megpróbáltuk amennyire csak lehetséges volt az alkohol fogyasztást kiküszöbölni. Az eredmény az volt, hogy a munkás mulatságokra külső elemeket megnyerni nem lehetetett és anyagi jövedelem amelynek céljából leginkább a mulatságokat rendezték egyáltalán nem volt. Már pedig a munkásmozgalmi eszmék terjesztésére is első sorban anyagiakra volt szükség.

Fölvetődött a kérdés, hogy mi a különbség ha az a munkás aki bizonyos mennyiségü alkohol elfogyasztására betér a sarki szalonba és ott is marad, miért ne jöhetne közénk és miért ne lehetne a munkásmozgalom hasznára. Tény az, sokan bekerültek a munkásmozgalomba mint alkoholisták és azok is maradtak, de viszont az is tény, hogy sokkal többen vannak olyanok, akik a munkásmozgalomban szoktak le az erős alkohol használatról. Nem szabad felejtenünk azt sem, hogy az alkohol fogyasztás is a régi kapitalista társadalmi rendszernek egy beteges kinövése és ilyen elbirálásban kell azt kezelni. Nem szabad tehát egy munkásra azt a megjegyzést tenni, aki esetleg némelykor több alkoholt fogyaszt mint amit elbir, hogy "egy részeges alak" véleménye nem számit mert elitta az eszét.

Az alkoholizmus az egy betegség és éppugy mint ahogy nem vethetjük meg, egy más betegségben szenvedő munkástestvérünket, nem szabad lenézően elbirálni azokat, akik saját hibájukon kivül az alkohol bacillusának az áldozatai. Azokat a munkásokat egy különösen figyelmes propagandával inkább igyekeznünk kell időről időre az alkohol fogyasztásról leszoktatni. Ellenkező esetben elriasszuk őket a munkásmozgalomtól s számüzzük őket arra az utra, mely teljesen az alkoholizmus fertőjébe sodorja őket. A mi kis uj társadalmunkban tehát nem csak céljaink vannak a jövőt illetőleg, hanem a jelenlegi helyzethez megfelelően bizonyos kötelezettségeink is.

Ennek a kötelezettségünknek a jelzáloga az egyéni viselkedésünk a munkásmozgalomban. Amikor becsatlakoztunk a mai társadalom keretein belül épülő uj társadalom épitészei közé, igyekezzünk viselkedésünkkel is megfelelni a nagy feladatnak. Egy pillanatra sem szabad felejtenünk, hogy mi a jövő társadalomnak ideális meggyőződésü hirdetői vagyunk, egy olyan eszmének a hivei, mely a kapitalista társadalmi berendezkedés folytán, egymagában gyülöletes a nagy tömegek előtt. Ezt a gyülöletet a mi barátságos viselkedésünkkel részben ellensulyozni tudjuk. Barátokat és aztán harcosokat kell nyerjünk a munkásmozgalomnak, mert őszintén hisszük, hogy "a munkásosztály felszabaditása csakis a munkásosztály müve lehet!"

AKIK SZERETIK A NÉPET

“Ha majd minden rabszolga nép
Jármát megunva sikra lép,
Piroslό arccal és piros zászlókkal
És a zászlókon eme szent jelszóval:
Világszabadság!” . . . Petőfi

PETŐFITŐL nemcsak a gallérja viselését tanultam el, de egész életem pályáján az ő életfelfogását és tanitását állitottam magam elé követendő példának.

Ettől a tanitástól egy sokkal nagyobb és aktivabb Nagymester az Élet tudott csak más utra tériteni, amikor a gépkorszakba taszitott bennünket, hogy eme széditően nagyszerü, alkotó és pusztitó korban, melyben egymást gázlojuk el és pusztitsuk holnap, amit ma termeltünk . . .

Ha nem volna maga a rideg, szivtelen valóság, hát az ember azt hihetné, hogy ez csak fantazmagória, vagy másszóval agyrém, rémlátás az egész. Az ember feltud szállni a felhők fölé, sőt sokkal feljebb és nincs olyan nagyon messze az idő, amikor áttud majd kirepülni a legközelebbi testvérbolygóra, a Vénuszra, vagy a Mars-ra.

És mégis . . . mégis, nem tudja itt a saját Világán megbecsüli magát és embertársait, hogy ezt a rövidke életet békességben, jólétben, örömben élje le. Hanem, mindenféle gyilkoló és pusztitó gépeken töri azt a kis gonosz, nagy pénzekre vágyó fejét, hogy mennél jobban elkeseritse embertársainak az életét, mint ahogy csak egy keresztény tudja elkeseriteni, kinzóvá tenni a másik ember, a másik keresztény és nem keresztény létezését.

Milyen jogcimen merészeli egyik ember a másik embertársát “alkalmazni”, azaz szolgájává tenni őtet, hámba fogva robotoltatni, kinóztatni? Hát ő külömb ember, embernek mint az a másik, akit kinoz vagy kinoztat?! Nem hiszem! Mert ha ugy volna, akkor nem is tenné azt, amit tesz. Ellenkezőleg, felemelné őt magához s nem eltaszitva jármába fogná, hogy őt szolgálja, neki dolgozzon szakadásig, majdnem ingyen.

Hol van itt a “szabadság, egyenlőség, a testvériség”? A kereszténység legfőbb parancsa: “Szeresd felebarátodat mint önmagadat”. Mint társadalmunk funkcionál, azt kell hinnünk, hogy Krisztus sohasem létezett, az egész kereszténység egy a papok által kifundált, fabrikált mese és semmi más. Azért fundálták ki, mert nékik a munka nem komájuk, dolgozzon a paraszt, gondolták, s ma is csak igy gondolják, mivel igy is teszik, élnek gond nélkül, élvezik mások munkájának a gyümölcsét urimódon.

Arra nem is gondolnak, hogy ez igy, ilyenformán nem tisztességes eljárás, ez egy jellemnélküli, hitvány banditizmus semmi egyébb. Hazudni, csalni, lopni, gyilkoltatni, évezredes remekmüveket, más nagy vagyonokkal együtt a háborus hisztéria által elpusztitani, melyet ember soha jóvá nem tehet. Hiába mondta Jézus Péternek (feltéve ha élt és csakugyan mondta?) az ő elfogatásakor, amikor Péter kihuzván kardját, a főpap szolgája felé csapott vele s levágta a szolga fülét: “Tedd hüvelyébe a kardot, mert aki kardot huz, kard által vész el”.

Mondhatott Jézus akármit, az ő (sic!) papjai, prédikátorai fütyülnek a Jézus tanitására, hisz akkro nekik is be kellene tartani. Ha az igaz volna és Jézus csakugyan az Isten fia lett volna és Isten is csakugyan volna? Mert ha volna, hát nem engedhetné meg e földlakóknak azt a gyalázatosságot tenni, amit tesznek és tenyésztenek ki önmagukból.

Confucius, ez a nagy kinai bölcselő, (Krisztus előtt 551-ben született, élt 72 évet) aki korának kimagasló alakja volt, mondotta a többek között: “Ovakodj azoktól, akik azt állitják, hogy természetfeletti dolgokkal van kapcsolatuk. Nagy szerencsétlenség éri azt az országot, ahol a babona lábra kap.”

A vallásoknak az apja, anyja a babona volt, az nemzette, az hozta a világra. Legtalálóbban Marx nevezte nevén a gyereket: a vallás ópium, mellyel a népeket tartják álomkórságban lenyügözve, tehetetlenségre kárhoztatva az elnyomott dolgozó rabszolgákat, hogy ők uralkodhassanak, parancsolhassanak. Owen Róbert pedig igy ir a nagytőkések által dirigált társadalomról, melyben a munkások csak dolgozó állatok:

"A módszer, melyszerint a világ összes népei dolgoznak, a legdurvább csaláson alapszik, a legkifejlettebb tudatlanságon, vagy mindkettő egyesülésén,ugy, hogy bármint változzanak is az elvek melyeken ez a módszer alapul, soha emberre ebből jó nem háramlik, ellenkezőleg, minden gyakorlati eredménye rossz lesz és rosszat szül."

Ez igy fog menni mindaddig, amig mi termelő munkások elő nem vesszük a jobbik eszünket és szervezkedünk. Ott a munka szinhelyén, ahol ellopják tőlünk az általunk termelt javakat, még pedig az IWW tanitása nyomán. És ha már elég erősnek érezzük magunkat, akkor lefoglaljuk a gépeket s mindent amelyek a termeléshez szükségesek és kezdünk termelni közszükségletre és nem profitra. Csak akkor lesz gyakorlati eredménye a munkás munkájának, jó és áldásos, minden dolgozót kielégitő.

Tolstoj igy ir erről a témáról: "Hogy az emberek helyzete megjavuljon, a vagyonos osztályé csakugy, mint a munkásosztályé, meg kell érteni, hogy az emberek helyzete meg nem javitható, ha a saját előnyünket tartjuk szem előtt, hogy az emberiséget áldozatok meghozása nélkül szolgálni nem lehet és hogyha az emberek ténylegesen meg akarják javitani helyzetüket és nem mindenki csak a saját külön helyzetét, nem csak a megszokott egész életrend megváltoztatására kell késznek lenniök és minden előnyéről lemondaniok, de megerőltető küzdelemre is kell megukat szánni, küzdelemre, először is önmagukkal és családjaikkal. El kell készülniök azokra az uldözésekre is, melyekben a kormányhatalom követeléseinek ki nem elégitése, megtagadása miatt lesz részük."

Ugy bizony, ez az, amire sem az egyes ember, sem az embertömegek nem merészelik elszánni magukat: a küzdelemre. Azért, mint mindenben, ugy itt is vannak kivételek, de éppen ezek a kivételek megerősitik a szabályt, mely szerint a nagy tömeg rém nehezen akar megmozdulni. Ők csak nagy nehezen tudják rászánni magukat, hogy a megszokott életrendjüket elhagyják, egy általuk ismeretlenért.

Reggel felkelni, enni valamit, menni a munkahelyre dolgozni, délben félórára megállni, falni valamit, ismét neki a munkának egész erővel, este a rogyós inakkal hazamászni, enni valamit és be az ágyba, pihenni. Mert reggel előről kell kezdeni a hámbafogást ismét. Akárcsak az igavonó jószág, csak hogy mi még bőgni is alig merünk, ugy kiiskoláztak és templomoztak bennünket.

Megszoktuk a jármot, a századokon keresztül, tehát azt hisszuk, hogy annak ugy kell lenni, járom nélkül nem is lehetne életet csinálni. Mert az óvódától az egyetemig ezzel töltik meg az emberformáju állati fejeket. Tehát csak azt adhat amije van, ha más társadalmi és gazdasági életfelfogást akarna kitenyészteni és épiteni, előbb a sok szecskát kellene kiszórnia a koponyájából, hogy helye legyen korunk emberies eszméinek, a közmüködő, együttdolgozás (kooperációs) társadalom felépitésének, amelyben mindenki tehetsége szerint fog dolgozni, fogyasztani pedig a szükségletéhez mérten.

Tolstoj, aki életének nagyobbik részét a szabad emberek társadalmának áldozta fel, földjeit szétosztotta az orosz parasztok között, maga is egyszerü parasztruhában járt. Példát mutatott, hogy senkinek sincs joga nagy földeket lefoglalni, mert az egész földünk mindannyiunké s nem egyes uralkodóké, vagy hordóhasu papoké, akik azt nem müvelik s nem termelnek rajta semmit, csak bitorolják a birtokjogot.

Nekünk magyaroknak is van ilyen élő grófunk: gróf Károlyi Mihály. Aki szintén kiosztotta, szétosztotta földjeit a dolgozó földmüvesek között. Aki a magyar népet szerette s szereti ma is. Viszont a magyar nép is szereti őt. Őt is a magyar oligarchia (az arisztokraták, a főnemesek, főpapok, a kevesek uralma a nép felett) kiüzte, annyi sok más jeles férfiakkal, ugy, hogy Magyarországon a kilenc millió rabszolgán csak pár tucat főur s főpap, élükön a bitang, lator Horthyval uralkodik, Horthyékból áll tehát a nemzet. A többi azért született, hogy ez elsődieket eltartsa.

Közöttünk, egyszerü bérmunkások között is vannak szépszámmal ideális munkásemberek, akik feláldozzák önmagukat sorsosaikért, a dolgozó egyszerü népért. Van egy jóbarátom, aki szintén ebből a fajtából került ki. Együtt jártunk iskolába, együtt mentünk inasnak, egynapon szabadultunk fel, és később mint segéd, Budapesten az épitészeti iparrajziskola négyéves nappali tanfolyamát (a mester képzőt) elvégezte, jobban telt neki mint nekem, mivel az apja is céhmester volt, s egy kis pénz is maradt utána.

Mindig a nép bolondja volt, élthalt érte. A rákospalotai "Függetlenségi Kör"-nek jegyzője, majd alelnöke volt. Mindenütt a néppel, a népért harcolt. Hogy megmutassa, hogy a népet mennyire szereti, feleségül vett egy kofa Márinéninek a kis kofa Mariját. Én is, az anyja is, hiába próbáltuk őt lebeszélni, hogy ez a lány nem ő hozzá való, ez nem tudja őt sohasem megérteni, nem használt, elvette.

Majd a sors őt is, engemet is kihajtott a szeretett hazánkból, ide Amerikába. Persze, ez a "sors" a grófok, mágnások, főpapok és nagybirtokosok zsarnoki uralma volt az, hogy otthon (?!) kenyérből sem ehetett a munkásember eleget.

Itt, az én kedves barátommal ugy elbánt a Panca Mári felesége, hogy még a dologházba is becsukatta őt. Mivel az én barátom, itt is radikális lett és az IWW-nek tevékeny, harcos tagja lett. Csak néha látogattam meg őt, félve a felesége (!?) mosdatlan szájától, akkor is ilyesféléket kellett hallanom: "Minek házasodik meg olyan ganajember, aki a családját nem birja eltartani?" Vagy: 'Aki megbecsüli a munkáját, annak mindig van munkája."

A gyermekeit is, az apjuk ellen nevelte fel. És, mivel az első világháboru után, őt is kidobták a munkából s igy az uj ötezer dolláros házat, amit a felesége megvétetett vele nem tudta fizetni, hát a felesége és gyermekei kimarták, turták a családi fészekből. Sőt az egyik fia —aki önkényesen Árpád nevét Arthurra forditotta — őt még az akasztófára is óhajtotta, a többi radikálisokkal együtt. Hát kedves népeim, ilyenek is nőnek fel köztünk, ilyen bogáncs, parajfélék. Ilyen s ehhez hasonló sors vár mindazokra, akik őszintén, igazán szeretik a népet és érte mindenüket feláldozzák, sőt még az életüket is.

(U.S.)

SZÖLLŐSI ZSIGMOND

A BŐREMBER, ETHEL MEG A VÖRÖS TIGRIS

JEGYZET: Erkölcsi kötelességemnek tartom előrebocsátani, hogy e történetnek nem kitalálója, csak közvetitője vagyok. Ugy mondom el, ahogy azt barátom, a Bivaly, a história egyik döntő szereplője, maga volt szives elbeszélni. Barátomat, a Bivalyt különben a polgári életben Baloghnak hivják és a Bivaly nevet tőlünk, egykori osztálytársaitól az iskolában nyerte nem szellemi, hanem fizikai képességei jellemzéséül. A második A. és a második B. osztály közötti háborut igazán ő döntötte el, amikor ötször egymás után egymaga verte el az egész második B.-t. Akkor mi Kinizsi Pálnak neveztük el, a megvert ellenség viszont a Bivalynak. Az emberi hálátlanságnak nem utolsó dokumentuma, hogy az idők folyamán nem az első, hanem a második elnevezés lett általánossá. Különben ez a tudnivaló csak hasznos, de nem fontos. A barátom ugyanis nem az erőmüvészi, hanem a mérnöki pályára lépett, Zürichben kapott diplomát, azután néhány esztendeig Amerikában dolgozott, és mikor hazajött, igen rövid idő mulva elsőrangu tekintély lett a hidépitésben, egy nagy vállalat vezető-igazgatója. Ez a barátom volt szives elmondani e nem minden merészség nélkül való, sőt némileg amerikai történetet, tehát, aki elég életunt ahhoz, hogy kételkedni bátorkodnék benne, idevonatkozó kételyeivel őt sziveskedjék fölkeresni.

Egy különös találkozás.

— Harmadéve, — kezdte Balog, a Bivaly — junius elején Párisból jöttem hazafelé. A dolgomat jól és simán intéztem el, hogy egy pár heti időm is maradt. A tavasz istenien szép volt, gondoltam egy okosat, Zürichben megforditottam a szekerem rudját és még teljes alkonyati napsütésben a terrieti Grand Hotel csodás terraszán ültem, meghatott szinte imádkozóan bámulva alattam a tejfehér tavat és a tulsó parton az aranyos várában villogó sulyos havasokat.

Mikor dinner táján visszamentem a hotelbe, a portás elém lépett:

— Levelei vannak, uram.

Meglepődtem, hogy a posta már rámtalált. De mindjárt vissza is adtam a paksamétát. A leveleken, ujságokon amerikai bélyeg és valami Mr. H. K. Jonesnak szólt valamennyi.

— Tévedés — mondtam. — Ezek nem az enyimek.

A portás csodálkozva nézett rám, elpirulva és tétova mozdulattal vette át a leveleket. Olyan furcsán viselkedett, hogy el kellett mosolyodnom.

A következő pillanatban megint egy kis furcsaság. Beszállok a liftbe, amely a második emeleten áll meg. Odaszólok a fiunak:

— Az én szobám a harmadikon van.

A gyerek meghajtja magát és bocsánatkérő hangon mondja:

— Nem tudtam, uram, hogy átköltözködött.

Ha még valami kétségem lett volna, egy harmadik esetke végképpen fölmentett a további gondolkozástól. Amint a szobám felé tartva a lépcső előtt elmegyek, egy lehaladó kis társaságból hirtelen hátranéz egy fehérruhás lady és amint megpillant, visszaszól:

— Mr. Jones, ne feledje, hogy a hajó reggel hétkor indul!

Most már tisztában voltam a helyzettel. Ezek összetévesztenek engem Jones urral Amerikából. De hogy milyen szenzációs alapja volt ennek a tévedésnek, az csak az ebédnél derült ki. Még nem volt szezón. A gyönyörü, hatalmas teremben alig gyülekezett huszonöt-harminc ember, ezeknek azonban a szó szoros értelmében kiesett a kanál a kezükből és nem tudtak tovább enni, csak tátott szájjal hol engem néztek, hol meg egy másik jól megtermett szőke urat és dörzsölgették a szemüket és összesugtak és csóválgatták a fejüket. Valóságos izgalom támadt a teremben, egy nagy feszültség és a szemek bámuló tekintete valósággal egymáshoz taszitott bennünket: Jones urat meg engem. Hogy indult az összeismerkedés, már igazán nem tudom, de két óra mulva már együtt ültünk a hallban egy csodálkozó társaság közepében, amely nem győzött kifejezést adni a bámulatának.

— Nincs a világon két tojás, amelyik ennyire egyforma lenne! — mondta az egyik.

— A saját tükörképük nem mutathat az uraknak ekkora hasonlatosságot — konstatálta egy másik.

Kiderült, hogy a magasságunk, a vállunk szélessége, a hajunk szine és sürüsége, de még a kezünk formája is tökéletesen ugyanaz. Biztos, hogy ha véletlenül impreszárió van a vendégek között, szédítő ajánlatokkal ostromolt volna meg bennünket.

Nem nagyon szeretek látványosság, vagy az alkotó természet egy különös szeszélye lenni, a helyzet tehát nem volt nekem tulságosan kellemes. De lett e találkozásnak egy másik és szintén nem sulytalan következése is. A hasonmásom vagy nagyon szeretett a tükörbe nézni, vagy pedig egy belső kapcsolat eredőjének érezte a külső hasonlóságot: rohamos barátságával tisztelt meg. Egyszerüen belém tapadt és valósággal elárasztott a bizalmával. Menthetetlenül meg kellett tudnom, hogy Washingtonban született, kémiát tanult, egy egészen, sőt forradalmian ujfajta cserzési eljárást talált ki, most kilenc nagy bőrgyára van, amelyeket Bostonból igazgat. Egyáltalában nem bizonyos azonban, hogy vissza fog-e még térni a hazájába.

— Hát végképpen megunta az üzletet? — kérdeztem.

Megdöbbenten nézett rám.

— A világért se! — felelte mohón. — Hát hogy lehetne ezt az üzletet megunni?

— Akkor hát miért mondja, hogy meg kell válnia tőle?

Csöndesen felelte:

— Mert meg fogok halni . . .

Ez nagy szó volt. Részvéttel és megütődve néztem Mr. Jonesra.

— Meg fog halni? Hát beteg? . . . Igazán nem látszik meg rajta.

— Azt elhiszem. Az ilyen kórság nem látszik meg az emberen.

— Hát mi a betegsége?

Nagyot sóhajtott és alig hallhatóan mondta:

— Ethel.

Elcsodálkozva néztem rá:

— Sose hallottam ilyen betegségről.

Egy szomoru mosoly hullámzott át az ajkain:

— Ez nem is betegség. Ez a feleségem neve . . . A feleségemé aki megszökött.

— Az rossz lehet.

Hevesen bólintott a fejével:

— Az. Nagyon rossz. Nekem. Mert Ethel . . . ő nem rossz. Ethel nem gonosz. Ethel csak egy gyermek, aki imádja az erőt és nem tud ellentállni az erőnek . . . Ez az oka az egésznek.

— Ez az oka az egésznek?

— Ez. Mindjárt meg fogja érteni, ha megmondom: ki az, akinek az oldalán távozott.

— Hát mondja meg!

— Cnox.

— Cnox?

— Az. Most már érti, ugy-e?

Őszintén feleltem:

— Most már nem értem. Nem tudom, ki az a Cnox. Sejtelmem sincs róla. Soha a nevét se hallottam.

Mr. Jones összecsapta a kezét és karikára nyilt szemmel bámult rám.

— Lehetetlen! — mondotta. — Ön nem tudja, ki az a Cox? Ön sose hallotta a nevét a Vörös Tigrisnek, Amerika championjának, a két világ első öklöző-bajnokának? . . . Lehetséges ez?

— Lehetséges . . . De most már hallottam.

— Akkor tehát kezdi érteni, ugye?

— Igen. Kezdem érteni. Tehát ez a Cnox volt a szerencsés? . . .

— Igen. Ez az átkozott. ő ragadta el tőlem Ethelt és átkelt vele az oceánon. Mert Ethel miádja az erőt és nem tud ellentállni az erőnek . . . De én meg nem tudok élni Ethel nélkül. Nem tudok uram. Voltam egy chicagoi specialistánál, aki megvizsgált és kijelentette, hogy a vágy Ethel után föltétlenl sirba visz. Legfölebb háromszáz napig fogok élni és ebből a háromszázból hetven már letelt . . . Ezért jöttem Európába Ethel után.

— Hogy megölje?

Az amerikai összerázkódott a borzalomtól:

— Hogy mondhat ilyet? Ki lenne oly vadállat, hogy Ethelt megölje?

— Hát hogy . . . visszarabolja?

Mr. Jones szó nélkül a zsebébe nyult és egy levelet nyujtott át, hogy elolvassam. A levél rövid volt, de velős:

> "Bőrember! Ön elég vakmerő volt, hogy kövessen bennünket. Észrevettem. Ha még egyszer mutatkozni mer, össztöröm az orrcsontját és tizenkét bordáját. W.M. Cnox."

Mr Jones halkan magyarázta:

— Ezt a levelet Milanóban kaptam, mert a nyomozóvállalat értesitett, hogy ott vannak. Ugyanabba a hotelbe szálltam, de este már ezt a levelet találtam az asztalomon. Természetesnek fogja találni, hogy ezek után egy pillanatig se maradhattam tovább . . . De a reményről se mondhattam le, hogy ha lopva és csak egy pillanatra is láthassam Ethelt. Egy hét alatt el kellene sorvadnom a tudatban, hogy az egész oceán van közöttünk. Igy legalább nem vagyok oly nagyon messze tőle, a nyomozóvállalat minden lépéséről mindennap értesit és itt az emberek is jobbak, mint Amerikában . . . itt mindenki részvéttel van hozzám és mindenki nagyon sajnál engem . . .

Kissé elhülten mondtam:

— Hát mindenki tudja? . . .

— Oh igen. Oly nehéz a szivem, hogy ki kell öntenem minden alkalommal. És nagyon szivesen meghallgatnak, sőt vigasztalnak is. De hisz erről ön maga is meg fog győződni. Bizonyára össze fogják téveszteni velem s látni fogja: milyen sajnálkozó és szánakozó tekintetek szállnak feléje . . .

Elöntött a forró verejték és ha nem uralkodom minden erőmmel magamon, amerikai hasonmásomnak nagyon viharos meglepetésben lett volna része. De mégse tettem, amit tenni szerettem volna, sőt nem is mondottam, amit mondani szerettem volna. Csak fölrohantam a szobámba, egész éjszaka nem tudtam behunyni a szememet és a hajnali vonattal elutaztam, még mielőtt a meleg részvét egy szemsugarával találkoztam volna.

DERÜS INTELEM ÖNMAGUNKHOZ:

Csókolnak a lányok, a drágák
És szökdel a zerge, a fürge,
Virulnak a délszaki pálmák,
Rohannak a holdak az ürbe,
Forró a világ ölelése
És mind, ami él, robog és ég,
Zug, harsog a sors nevetése
És minket üz, kerget az éhség:

A jobbnak, a szebbnek a vágya,
A lelkes, a drága, nagy éhség:
Keményre van vetve az ágya
Mindannak, akit a reménység
Az élet igaz kenyerével
Táplál. Ha sovány is ebédünk,
Hátunkon a sok cudar évvel
Horpadt a hasunk, de remélünk:

Mert élni szerethet a gyáva,
Élvezheti éltét a gazdag,
Remeghet a féreg utána,
De szent joga minden igaznak
Hogy dus akarással akarja
A jobbat, a rossznak a végét
És szép öröm leple takarja
Be tagjai meztelenségét:

Akarj! Hogy a sors ki ne vessen
Téged, meg a többit öléből.
Vigyázz! Nehogy ugy kinevessen,
Mint azt, akit kishitüség öl.
A gyenge lapul, meg a gyáva
És félti, mit lopva elorzott,
Erősnek a sors a barátja,
Erős zabolázza a sorsot.

Erdődy János

Még egy különös találkozás.

Természetesen nagyon bosszantott, hogy a látogatásom a genfi tó partján ilyen korai, gyászos véget ért, valami különös, nagy lehangoltság is ránehezedett a lelkemre, de azért nem álltam meg, hogy Milanóban pár napos stációt ne tartsak. Az első napot nagyon kellemesen töltöttem. Fölmásztam a Dóm tetejére, benéztem a Brerába, üldögéltem a Biffiben, megvacsoráztam a Codában és végignéztem egy igen jó kis francia vigjátékot a Manzoni-szinházban. Szóval semmi baj se történt.

Másnap reggel pedig átrándultam csak a felöltőmmel a karomon Luganóba. Ez a hely nekem régi szerelmem, imádom ezt a görbe tavat, a kupos zöld hegyeket, a piros tetejü házakat, a ragyogó fehér utakat, a folyton lefől kapaszkodó és csuszkáló hegyi siklókat, a városka olasz derüjét és svájci tisztaságát. Csatangoltam, aztán megebédeltem, jó két óra hosszat ültem a Café Centrale egy fehér asztalkájánál, csöndes szédületben pihentetve a szememet a mozdulatlan vizen, azután egy kocsin bucsusétára indultam a tó partján.

Becsületes meleg volt, de elviselhető. Csöndes ballagással elhagytam a hotelek palotasorát, el már Paradisót is. A megkeskenyedett ut egészen a hegy tövébe csuszott: egy árva lélek sehol nem volt látható. Mintha minden és mindenki aludt volna a bóditó napsütésben.

Mikor visszafordultam, mert az időm kezdett már lejárni, meglehetős távolságban egy emberpárt pillantottam meg. Egy világoskék ruhás zömök ur, meg egy csipkeernyős, fehérruhás nő jöttek a város felől. Természetesen aligha törődtem volna velük, ha a viselkedésük egyszerre igen különössé nem válik.

Talán husz lépésnyire lehettünk egymástól, mikor a két ember egyszerre hirtelen megállt. Az asszony mintha sikoltott volna is, leeresztette az ernyőjét és hátralépett. A férfi pedig ellenzőt formált a szeme fölött a kezéből, ugy nézett rám.

Konstatáltam, hogy az asszony nagyon csinos, de mielőtt alaposabban szemügyre vehettem volna, ösztönszerüen meg kellett állanom. Mert nem kis meglepetés nélkül láttam, hogy a férfi, miután pár szót mond az asszonynak és egy kézmozdulattal hátradirigálja, nyilegyenesen felém tart. Egyenesen és gyorsan: tisztára egy roham lendületével. Nagy beretvált, husos arca vörös volt, mint a főtt rák, a szeme kidagadtan meredt rám. Egy lépésnyire előttem hirtelen megállt és a dühtől rekedten fujta az arcomba:

— Bőrember, ön dacolni mer a tilalmammal! Bucsuzzék el a csontjaitól!

De nem hagyott időt se bucsuzásra, se feleletre. Hirtelen előre szegte a nagy fejét és én csak azt láttam, hogy egy rettenetes ököl, mint egy lecsapó gránát, röpül felém.

Meg kell jegyeznem, hogy se az ökölvivás, se a birkózás technikájához abszolute nem értek. Tisztára naturalista vagyok ebben a mesterségben, amelyet gyerekkorom óta nem is praktizáltam. Az ellenfelem nyilván a müvészet szabályai szerint támadott, én pedig szabálytalanul védekeztem, azután ő nyilván szabályszerüen védekezett, én pedig szabálytalanul, sőt az is meglehet, hogy szabályellenesen püföltem.

Szabálytalanul, de izzó lelkesedéssel. Minden meglepetésem közepett is tisztában voltam vele, hogy semmi okot se adtam e barátságtalan eljárásra. Nem verekedni jöttem Luganóba és semmi rosszat nem terveztem a vörösképü ellen. Teljes jogom volt tehát a dühre, amely elfogott és teljes sikerü ellentámadásra tüzelt.

Az ököl-gránát nem érte el kitüzött célját, mert akkorát ütöttem a támadóm felső karjára, hogy reccsent. Még történt néhány tétova ellenséges mozdulat, de dolgozni igazán már csak az én iskolázatlan öklöm dolgozott. A düh megszéditett. Semmit sem láttam, csak egy éles női sikoltást hallottam, azután szitkot, nyögést, recsegést, egy mély jajkiáltást és egy tompa zuhanást. Éreztem, hogy a karom már az üres levegőt kaszálja.

Megtörültem a homlokomat és nagyot fujtam. A vörösképü ott feküdt előttem a földön, nyögött és jajgatott. Bizonyára volt rá oka. El volt látva egy időre. A fehérruhás lady jó pár száz lépésnyire a tusa helyétől futott, mint egy nyulacska, a néptelen uton.

Ismétlem: sejtelmem sincs az ököl-párbaj paragrafusairól. Teljes tanácstalanságban voltam tehát afelől, hogyan kell ilyen esetben a leteritett ellenféltől illendően elköszönni. Viszont azonban tisztában voltam a lehető legsürgősebb távozás tanácsosságával, még mielőtt egy svájci rendőr odatéved. Az öklöm megtette a kötelességét, most a lábamon volt a sor. Az első ösvényen fölkanyarodtam a lejtőre, hamarosan el is csiptem szerencsére egy szép fehér-kék villamoskocsit és tizenöt perc mulva már a vonatban ültem.

Más emlékem a csudálatos kalandból nem maradt, mint egy vérző karcolás a kezemfején. A helyzettel különben már az első percekben tisztában voltam. Ami a luganói tónál történt velem, egyenes folytatása volt annak, ami a genfi tónál kezdődött. Megint a külsőm druszájának néztek: ezuttal sulyosabb következésekkel.

Minthogy pedig a dolgom nem végződött rosszul: lassanként nagyon kellemes érzésem támadt. Hiu lény az ember. És különösen a férfi. Eszembe jutott az a leszerelt, kétségbeesett respektus, amellyel a szerencsétlen H. K. a Vörös Tigrisről beszélt és mosolyognom kellett. A siker csiklandozott és kifelé kivánkozott belőlem. Nem tudtam ellentállni ennek a csiklandozásnak. Amint megérkeztem Milanóba, levelet irtam:

> “Uram! A véletlen folytatta a játékot. Ma Luganóban találkoztam a Vörös Tigrissel, aki összetévesztett és rám ugrott. De a Vörös Tigris nem fog ugrani többé. Az én csontjaim épen maradtak. Az övéi nem. Ha ápolni kivánja: keresse föl egészen bátran.”

Ezt a levelet elküldtem a hasonmásomnak. Territetbe. És igen jól éreztem magamat. Csak azt sajnáltam, hogy az asszonyt jobban meg nem nézhettem.

Finálé.

Aztán nyár lett, aztán ősz lett, aztán tél lett és én már rég nem gondoltam az egész furcsa históriára, mikor éppen karácsony előtt egy kis paksaméta jött a cimemre — Amerikából, Bostonból. Természetesen nagyon kiváncsian nyitottam föl, Hát: először is egy levélke hullt ki belőle:

> “Uram! Nem a hálám volt késlelkedő, de az tartott sokáig, mig a cimét megtudtam. Közlöm önnel, hogy nagyon boldog vagyok, mert Ethel, amióta hősnek tart, ismét imád engem. Kilátásom van rá, hogy sohase halok meg. De ha örökké él, akkor is mindig hálával gondol önre és bizik az ön titoktartásában
>
> H. K. Jones.”

A levélnek melléklete is volt. Egy gyönyörü, nehéz, szinarany cigarettatárca a barátom monogrammjával. Tekintettel arra, hogy a kezdőbetük gyémántból voltak kirakva, még jobban szerettem volna, ha H. K. Jones a levelét irja a tárcára és a monogrammját a levélre. De igy is meg voltam nagyon hatva.

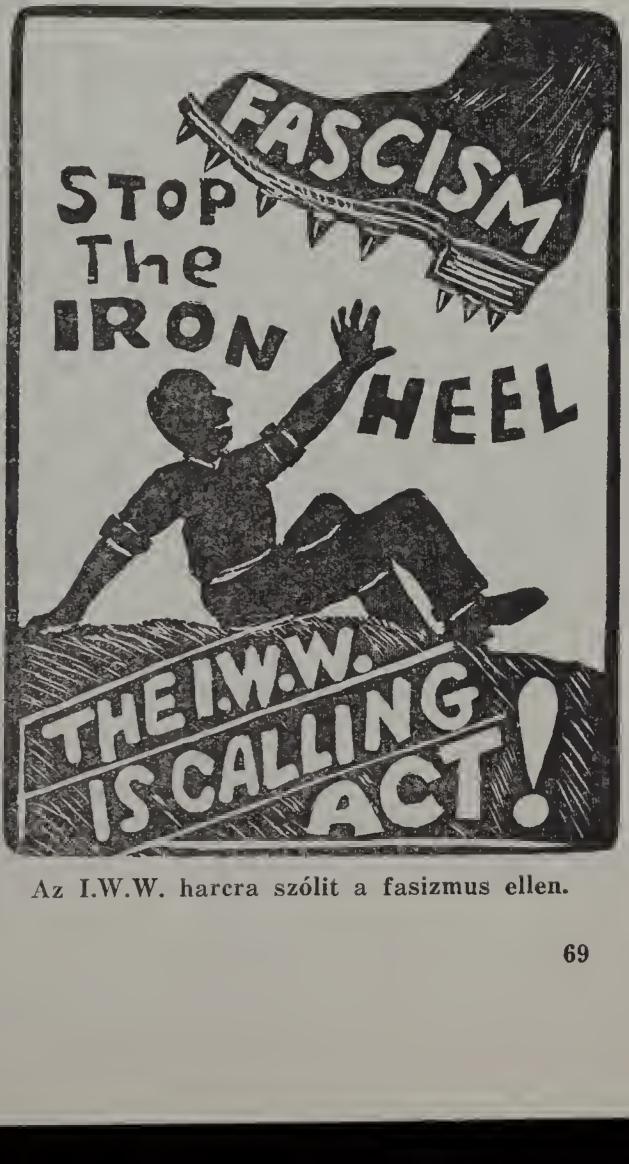
A világ legnagyobb szigetei:

Baffin Land 236.000, Borneo 284.000, Celebes 72.000, Ceylon 24.000, Cuba 44.164, Grönland 827.300, Anglia 88.600, Hayte 28.800, Izland 32.600, Japán 160.000, Jáva 48.400, Madakaszkár 227.000, New Foundland 42.000, New Genua 330.000, New Zeland 103.000, Sumatra 162.000, Tamánia 26.200 négyzetmérföld



Az I.W.W. harcra szólit a fasizmus ellen.

ÉRDEKES STATISZTIKAI ADATOK

Az Egyesült Államokban 1938-évben a születések száma 2,286.962 volt, ami 17.6 százalék születési rátának felel meg, vagyis, minden 10.000 lélekre ennyi születés esik. Az ujszülöttekből 1,172.541 fiu és 1,114.421 leány volt.

Ugyanabban az évben a halálozási ráta 10.6 százalék volt. Elhalt 1,381.391 egyén, amelyből 764.902 férfi és 616.-489 nő volt.

A születések megoszlása: fehér 2,005.965; néger 267.700, más fajok 13.307. A halálozás megoszlása: fehér 1,195.431; néger 178.573; más fajok 7.387.

Minden 100.000 lakosra 1.061 haláleset volt, amelynek okai: szivbaj 269 esetben; rák 115; tuberkulozis 45; agyvérzés 86; tudőgyulladás 67; cukorbetegség 24; vesebaj 77; autószerencsétlenség 24; öngyilkosság 15; gyilkosság 7; vakbélgyulladás 11; alkohol mérgezés 2; egyéb esetek 9.

A születések arányszáma legnagyobb volt New Mexico államban (34), majd Vermont (25) és Idaho (23) államokban. Legalacsonyabb volt a ráta New Jerseyben (13), majd Connecticut (14) és New York (15) államokban.

A halálozási arányszám legnagyobb volt Arizona államban (15), majd New Mexico (14) és District of Columbiában (13). Legkisebb volt New Dakota (7), Oklahoma (8) és South Dakota (8) államokban.

A gyermek halandóság aránya legnagyobb volt New Mexico (109), Arizona (99) és South Carolina (80) államokban. Legalacsonyabb rátát mutatnak: Connecticut (36), Nebraska (36) és Minnesota (39) államok. A zárjelben adott szám a minden 1000 élve született csecsemőből egy éven belül elhaltak számát jelzi.

Az Egyesült Államok legutóbbi statisztikai adatai szerint az elmult évben az ország teljes területén különböző balesetek folytán elhalt 93,805 egyén. Ebből

Autó balesetből	93.805
Esés következtében	32.582
Tüz és égés által	7.145
Vizbefulás révén	7.347
Vasuti balesetben	4.868
Fegyver balesetben	2.696
Gázmérgezésben	1.459
Másféle mérgezésben	2,196

Az Egyesült Államok lakosságának növekedése:

1790	3,929.214	1910	91,972.266
1800	5,308.483	1920	105,710.620
1850	23,191.876	1930	122,775.064
1900	75,994.575	1940	131,409.881

Az Egyesült Államok területén elitéltek 1,484.554 egyént. Ebből

Gyilkosságért	7.514
Nem szándékos emberölésért	4.394
Erőszakért	8.832
Rablásért	59.786
Támadásért	46.483
Betörésért	311.104
Csalásért	872.988
Atomobil lopásért	177.997

Elloptak az Egyesült Államok 207 városában, amelynek 25.000-n felüli lakosuk van: Pénzt és értékpapirt $3,284.042, melyből megkerült 404.611 értékü. Ékszert és drága ércet 2,955.-669, melyből megkerült 666.352. Szőrmét és ruhát 570.427, melyből megkerült 76.774.

● ● ● ● ●

Népsürüség:

Az 1930-as népszámlálás szerint egy négyzet mérföld területen az átlag 41 lélek. Az U.S.A. legsürübb lakossága Rhode Islandnak van, ahol egy négyzet mérföld területen 644 ember él mig a legritkább lakossága Wyomingnak van, ahol 4 négyzet mérföldre esik csak egy lélek.

O'HENRY (Sidney S. Porter)

SZERELEM ÉS MÜVÉSZET

"AKI a müvészetet szereti, az mindenre képes érte."

Elbeszélésünknek ez az alaptétele, amelyből természetesen a végén levonjuk a "tanulságot". Egyben azonban be fogjuk bizonyitani, hogy ez az alaptétel helytelen, ami ugyan ellenkezik a logikának iskolában tanitott szabályaival, de az elbeszélések történetében sokkal idősebb még magánál a kinai nagy falnál is.

—

Joe Larrabee a közép-nyugati államok egyik tölgyfa erdőkkel koszoruzott városkáját nevezte szülőföldjének. Itt történt meg vele az a szerencsétlenség, hogy hat éves korában a városi kutat lerajzolta az éppen arra haladó egyik előkelő polgárral egyetemben. A képet kiakasztották a városka gyógyszertárának kirakatába s mindenki megállapitotta róla, hogy Joe-ban "isteni szikra" szunnyadozik. Husz éves korában aztán Joe a városka népének segitségével, lobogó, széles, müvészi nyakkendővel, de annál szükebbre szabott tőkével, elindult New Yorkba, hogy a természettől nyert festői képességét hozzáértő mesterek vezetése alatt tökéletesitse.

Delia Karuthy, valahol a Délen, az egyik pálmasoros utcáju városkában, olyan brilliánsan vágta ki a hatodik oktávát is, hogy a rokonok isten ellen való véteknek tartották volna, ha a Delia tehetsége kiaknázatlanul marad. Nosza összeadták tehát azt az összeget, mellyel Delia utnak indulhatott New Yorkba, hogy hangját méltó mesterek vezetése alatt kiképezze. A rokonok ugyan nem gyönyörködtek többet ebben a hangban, — de várjunk csak, hiszen éppen ezt akarjuk elbeszélni.

Delia meg Joe találkoztak egy müteremben, ahol növendék müvészek Rembrandt, Wagner, Chopin, Caruso, Waldteufel s egyébmesterek felől álmodoztak szépeket.

A találkozásból barátság, a barátságból szerelem, a szerelemből pedig házasság lett, mert aki a müvészetet igazán szereti, az mindenre képes érte, — mint ahogyan már előbb is mondottuk.

Larrabee ur és Larrabee asszonyság kétszobás lakás béreltek és berendezkedtek a háztartáshoz. Lakás?! Eh, mit beszéljünk róla, hiszen boldogan éltek, müvészek voltak s szerették egymást. Müvészettel meg Deliával még az ilyen lakásban is boldog lehet az ember.

A kis lakások birtokosai bizonyithatják, hogy igazi boldogság csak az ilyen lakásokban található. Boldog emberek szemében a ruhaszekrény billiárd asztallá lesz, a szoba egyik sarka hálóteremmé, sőt Delia meg Joe még a mosókádat is csak zongorának nevezték.

Joe a nagyhirü és nagytekintélyü Magister mestertől vett leckét. Ismerik őt, ugyebár? Igen, igen, ő az, akinél a tandij nagyon sulyos, de a leckék annál könnyebbek. Delia az ugyancsak hirneves Rosenstock mesternél tanult. Ismerik őt is, a zongorabillentyük örökös veszedelmét, ugyebár?

Nagyon, de nagyon boldogak voltak, — mindaddig, mig tartott a pénzből. Tudták, hogy Joe nemsokára olyan képeket fog festeni, amelyek birásáért a vékony oldalszakállal, de annál vastagabb pénztárcákkal rendelkező pátronusok össze fognak veszni. És Delia? Rövid időn belül olyan tündöklő csillag lesz, hogy ha pár üres széket fog látni abban a szinházban, amelyet felléptével hirnevessé tesz, akkor bizony beteget jelent és Joeval valamelyik előkelő vendéglő barátságos külön szobájában fog vacsorázni, mialatt a boldogtalan direktor a haját tépi tehetetlenségében. Mind látták ők ezt már jó előre.

Ki törődne ilyenkor a lakással? A sovány vacsorákkal, meg a sajtszendvicsekkel helyettesitett ebédekkel? Delia és Joe nem törődtek. Számukra a jelen nem létezett. Legalább is nem addig, mig a folytonos kiadások teljesen le nem győzték a semmi bevételeket. De egyszer csak elérkezett az az idő is hogy a nagyhirü Magister meg Rosenstock mestereknek nem tudták beszállitani a tandijat.

De aki a müvészetet igazán szereti . . . (lásd fentebb) Delia rájött, hogy hiszen ő énekleckék adásával kereshetne is valamit. Három napon keresztül rótta az uccákat, hogy tanitványokra akadjon. A negyedik nap estéjén örömtől sugarzó arccal jött haza.

— Joe drágám — mondotta büszkén, — már van tanitványom. És milyen kedves népek! Gyönyörü házban laknak . . . a 71. uccában. Csak látnád azt a kaput! Azt hiszem bizanti stilus, persze te jobban tudnád. Hidd el Joe, soha még olyat nem láttam.

Most néhány forró csók következett és Delia csak azután folytathatta.

— Az apja tábornak . . . A. B. Pinkney generális. És milyen törékeny kis teremtés, mindig csak fehérbe öltözik, egészen egyszerüen. Óh, hogy szeretem már is. Három leckét adok neki hetenként és képzeld, öt dollárt kapok minden leckéért. Ha még három másik tanitványt szerzek, akkor meg tudom fizetni Rosenstocknak a tandijat. No, most aztán nézz vidámabban. Gyere, együnk egy jó vacsorát.

— Részedről már rendben van, — mondta ekkor Joe komoran — mialatt a favágó baltácskával igyekezett kinyitni a sarki "delicatessen" üzletben vett zöldborsót tartalmazó kannát, — de mi legyen velem? Azt hiszed talán hagyni foglak fizetésért dolgozni addig, mig én csak a müvészetben gyönyörködöm? Nem, Raphaelre mondom, nem! Tudok ujságot árulni vagy maltert hordani és én is kereshetek egykét dollárt.

Delia karjai a Joe nyaka köré fonódtak.

— Joe, édesem, milyen kis ostoba is vagy te. Neked folytatnod kell a tanfolyamot. Látod, nálam egészen más, mert mialatt én tanitok, magamat is gyakorlom. Tanitok és tanulok egyszerre. Aztán heti 15 dollárból megélhetünk addig . . . (Itt ismét csókok következtek.)

— Jól van, legyen igy, — mondotta Joe a zöldborsó főzeléket két tányérkára öntve, — hidd el, borzadok, ha arra gondolok, hogy leckéket adsz fizetésért. Ez nem müvészet. Téged is csak a nagy jóságod vitt erre.

—Aki a müvészetet szereti, az mindenre kész érte, — mondotta Delia.

— Magister mester megdicsérte az eget azon a képen, amelyet a parkban festettem, — szólt Joe rövid hallgatás után — és az egyik Broadway-i mükereskedő megengedte, hogy a kirakatába tegyem. Talán akad valami pénzes hülye, akinek megtetszik és megveszi.

— Óh, egész biztosan akad, drágám, — viditotta Joet Delia. — És most fogyasszuk el a zöldborsot. Pinkney tábornok segélyével lesz még itt borjusült is.

A következő héten állandóan korán reggeliztek és Joe elsietett, mert a reggeli napfényben tündöklő Central Park fáit festette. Delia uzsonnát készitett neki, összecsókolóztak és csak este 7 óra tájban találkoztak ismét. A hét végén Delia diadalmasan helyezte a 10 hosszu 8 széles (láb) szobának egyik sarkában álló 10 hosszu 8 széles (incs) asztal közepére első keresetét, — három darab ötdollárost.

— Néhai Clementin nagyon kifáraszt — mondotta Joenak, miközben lassan helyet foglalt a széken, — azt hiszem, nem gyakorolja magát eleget. Számtalanszor ismételnem kell neki mindent. És aztán mindig egyforma fehérbe öltözik, fehér, fehér . . . minden fehér . . . A tábornok, azonban nagyon kedves öreg ember. Néha bejön és mögénk áll, aztán mindig ezt kérdezi: "Nos, hogyan halad a kis tanitványunk?"

— Ugy szeretném, ha látnád a társalgószobában lévő képeket. Aztán a szőnyegek! Valódi perzsa készitmények. Clemetinának meg olyan furcsa kis diványa van. Tudod, Clementina nem is olyan törékeny, mint előbb hittem. Most még jobban szeretem, mert olyan jó, olyan előkelő. Egyszer a tábornoknak a fivére is ott volt, aki nagykövet Boliviában.

Jo ecsak hallgatta egy darabig, aztán lassan a zsebébe nyult és mintha Monte Cristo összes kincseinek birtokosa lenne, olyan büszkeséggel huzott ki onna egy tiz, egy öt, egy két, meg egy egydolláros bankjegyet, mind csupa jó, törvényes pénzt és odahelyezte Delia keresménye mellé.

— Eladtam azt az obeliszk vizfestményt egy Peoriába való embernek, — jelentette ki diadalmasan.

— Igazán? Nem csak valami tréfát akarsz üzni velem — kérdezte Delia meglepetve. — Aztán valóban Peoriába való volt?

— Oda valahová a felvidékre. Bár csak láttad volna, őt Del, — szólt Joe az asszonykát cirógatva. — Meglátta a képet a kirakatban és képzeld, azt hitte, hogy szélmalom. Előbb tréfázott, majd élcelődött, de a végén mégis megvette a képet és rendelt egy másikat is. Azt akarja, hogy fessem le a Lackawanna vasuti állomást akkor, midőn ő a jegyet váltja meg hazamenőben . . . Énekleckék?! De talán abban is van még valami müvészet.

— Olyan boldog vagyok, Joe, hogy végre kezdenek megismerni. Meglátod, hamarosan győzni fogsz. Az igazi nagy tehetség utat tör magának minden akadályon keresztül. Nézd csak 33 dollár. Ennyi pénzünk már régen nem volt. Estére osztrigát eszünk.

— És omlettet, meg hozunk egy üveg pezsgőt is, — tette hozzá Joe.

A következő szombat este Joe érkezett haza előbb és az asztalra tette a 18 dollárt, majd alaposan megmosta kezeit, amelyeken sötétkék festék jelei látszottak. Félórával később Delia is megérkezett. A jobbkarja vászonkötelékkel volt körülcsavarva és a nyaka köré erősitett kendőben tartotta.

— Mi történt? — kérdezte Joe elhalványulva.

— Semmiség az egésez, nevetett Delia erőltetve. Aztán a férjéhez szaladt a szokásos csókűdvözlésre. —Tudod, ez a Clementina olyan szeles. Délután 5 órakor eszébe jutott, hogy nyulpecsenyét eszik. Láttad volna, mint szaladt maga a tábornok az edényekért, mintha nem is volna elég cseléd a házban. Tudtam, hogy Clementinának valami baja van, olyan ideges volt. Amikor levettük az edényt, a karomra öntötte a forró zsirt. Borzalmasan fájt! Szegény leány ugy megijedt. De hát még a tábornok! Az egész házat szalajtotta a legközelebbi gyógyszertárba valami olajért, amelyet a karomra tettek és azóta nem fáj olyan nagyon.

A KÉK TENGER PARTJÁN

Ahol mások élnek, szeretnek,
Én eljöttem ide betegnek,
Csókot temetni, álmot dobni,
Nyugodt partokon nem nyugodni.

Mindig a holnapra mosolygok,
Elvágyom onnan, ahol bolygok,
Ugy vágytam ide s most már
szállnék.
Óh én bolond, bus beteg árnyék.

Ady Endre

— Mi ez? — kérdezte a kötelék alól kilátszó csepüszerü kócra mutatva.

— Ez az a fehér ruha, amelyre az olajat öntötték . . . És te, drágám, már megint adtál el képet? — igyekezett Delia más tárgyra terelni a beszélgetést, amint megláttam az asztalra tett 18 dollárt.

— Igen, igen, — felelt Joe vontatva, — a peoriai embernek. Talán másik képet is fog rendelni . . . valami vázlatot a Hudson folyóról . . . De, mondd csak, mikor is égetted meg a kezedet?

— Öt órakor délután . . . ugy gondolom. A vas, akakrom mondani, a nyulat akkor vettük le a tüzről. Joe láttad volna csak, mint rohant a tábornok . . .

— Delia, jöjj, ülj le ide a díványra . . . Igy ni . . . És most mondd meg nekem, kicsi feleségem, mit csinálsz te már két hét óta?

Az asszonyka elhalványodott, de azért egész bátran szembenézett férjével. Szerelemittas tekintettel kezdett el beszélni valamit Pinkney tábornokról. Joe hallgatta pár pillanatig, aztán végigsimitotta az asszonyka haját.

— Igen, igen, kicsikém, ezt már tudom. Hanem most mondd meg nekem, mivel keresed te ezt a heti 15 dollárt?

— Joe, édes, kis uram, ne haragudj reám, nem kaptam tanitványokat és nem nézhettem, hogy te abbahagyd a tanulást. Munkát vállaltam egy nagy mosódában a 24-ik uccában. Minden rendben lett volna, ha ma délután az egyik leány kezemre nem dönti a vasalót. Ugy-e, nem haragszol, drágám? Ugy-e, nem? Hiszen látod, ha nem megyek dolgozni, talán el sem adod azt a két képet a peoriai embernek.

— P-e-o-r-i-a? — mondta Joe vontatva, aztán semmitmondóan bámult maga elé.

— Hiszen nem baj, ha nem Peoriába való is . . . De Joe kérlek, ne nézz igy . . . jőjj, csókolj meg . . . Legyél már vidámabb. Ugy-e, ügyesen kieszeltem Pinkney tábornokot, meg Clementinát? De te még ügyesebb vagy, mert rájöttél. Mondd, mi tett gyanakodóvá?

— Nem gyanakodtam én egészen mostanáig, — mondta Joe szomoruan, — csak most, mikor láttam a csepüt a kezeden. Ezt az olajba mártott csepüt én küldtem fel a gépházból, amikor leüzentek, hogy valamelyik leány megégette a kezét. Két hét óta a gépházban a fütők segitője gyanánt dolgozom.

— Akkor te sem . . .

— Nem, én sem adtam el képeket. A peoriai ember, meg Pinkney tábornok egyformán kitalált mesék. Igaz, ilyen meséket kitalálni és igy végigjátszani, szintén müvészet, de nem vág sem a zene, sem a festészet körébe.

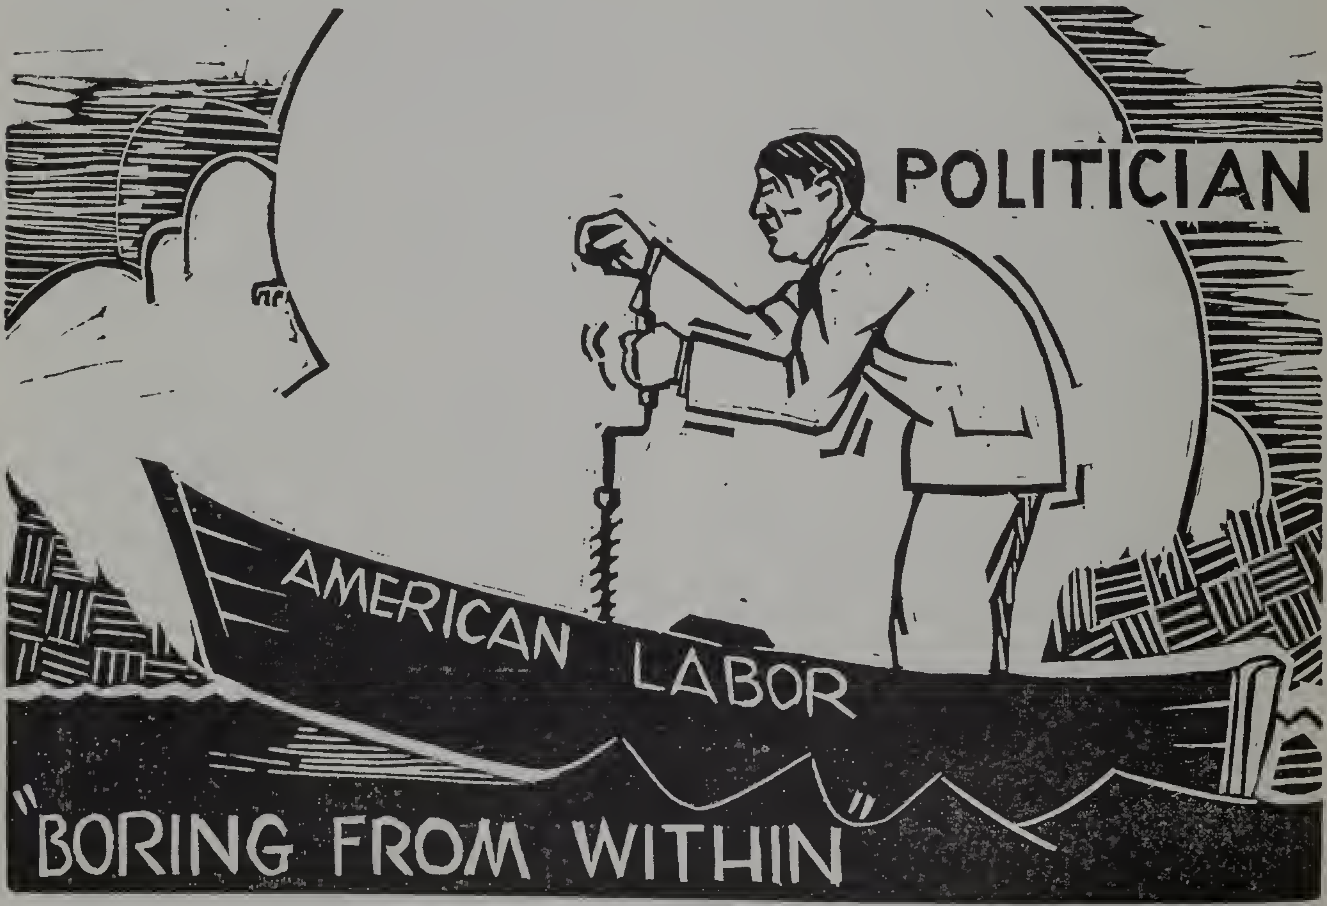
Egymásra néztek szerelmesen, aztán jóizüen felkacagtak.

— Aki a müvészetet szereti, az mindent megtesz érte, — kezdte Joe, de Delia megakasztotta.

—Nem, Joe, nem ugy, hanem csak igy: "Akik egymást igazán szeretik, azok . . .

Nem fejezhette be a mondatot. Joe hosszu, szenvedélyes csókkal bizonyitotta az uj alaptétel helyességét.

Geréb József forditása.



Ilyen a politikusok által hirdetett "belülről furás".

VOLTAIRE

EZ A VILÁG SORJA...

AZON szellemek között akik a birodalmak sorsát intézek, Ituriel egyike a legelőkelőbbeknek, müködésének köre Magas Ázsiára terjed ki. Egy reggel leszállott a skytha (az ókori Középázsiában elterülő Skytria lakosa) Babuk lakába, az Oxus (folyó Ázsiában) partjára s igy szólt hozzá: — Babuk, a perzsák bolondsága és esztelensége kihivták haragunkat. Magas Ázsia szellemei tegnap ülést tartottak abban a kérdésben, megbüntessék-e Persepolist (Ó-Perizsia fővárosa) vagy eltöröljék-e a föld szinéről. Eredj hát el abba a városba, vizsgálj meg mindent, térj vissza pontos jelentéssel s annak alapján fogom eldönteni, megjavitom-e azt a várost vagy elpusztitom. — De uram, — felelt alázatosan Babuk, — én sohasem voltam Perzsiában és egy lelket sem ismerek ott. — Annál jobb, — mondá az angyal, — legalább nem leszel részrehajló. Az ég fölruházott azzal a képességgel, hogy helyesen fogd föl a dolgokat, megtoldom ezt azzal, hogy bizalmat tudj gerjeszteni. Eredj, nézz körül, hallgatódzál, figyelj s ne félj semmitől, mindenütt szivesen fognak látni.

Babuk fölkapaszkodott a tevéjére s fölkerekedett a szolgáival. Néhány nap multával Sennaar (szerecsenek országa és városa Afrikában) sikságai irányában találkozott a perzsa hadsereggel, mely az indiai hadsereggel készült összecsapni. Először is egy hátramaradt katonával bocsátkozott beszélgetésbe s megkérdezte tőle, mi a háboru oka. — Az összes istenekre mondom — felelte a katona, — fogalmam sincs róla, az a mesterségem, hogy kenyérkeresetből öljek s megölessem magam, mit bánom én, kinek szolgálok. Holnap akár az indiai hadseregbe mehetnék át, mert ugy mondják, hogy azok egy fél rézdrachmával (régi görög pénzegység) többet fizetnek a katonáiknak mint amennyit nekünk adnak ebben a nyomorult perzsa szolgálatban. Ha meg akarja tudni, miért harcolunk, kérdezze meg a kapitányom.

Babuk valami csekélységgel mit magával hozott megajándékozván a katonát, belépett a táborba. Hamarosan megismerkedett a kapitánnyal s megkérdezte tőle a háboru okát. — Hogy tudjam azt én? — felelt a kapitány, — s mit törődöm vele én? Kétszáz mértföldnyire lakom Persepolistól s hallottam, hogy megüzenték a háborut. Ott hagytam a családomat s elmentem, amint ez szokásom, vagyont szerezni vagy megtalálni a halált, hisz egyéb dolgom ugy sincsen. — De hát a bajtársai sincsenek jobban értesülve a dolgok állásáról? — kérdé Babuk. — Bizony azok sem, — felelt a kapitány, — csakis a fősatrapák (óperzsai kormányzo) tudják azt, hogy miért öljük egymást.

Az elámult Babuk fölkereste a generálisokat s bizalmasukká vált. Egyikük végre igy szólt: — Ennek a háborunak, amely husz év óta tartja siralomban Ázsiát, az a civódás az oka, mely a nagy perzsa király egyik nőjének ennuchja s az Indiák nagy királyának egyik hivatalnoka között támadt. Valami vámilletékről volt benne szó, aminek az értéke egy darignak körülbelül harmincadrészét tehette. India első minisztere meg a mienk méltó módon megvédelmezték fejedelmeik jogait. A civódás elmérgesedett s mindkét részről milliós hadsereggel indultak a harcra. E hadseregek részére mnden évben több, mint négyszázezer embert kell sorozni. Se szeri, se száma a gyilkosságnak, a gyujtogatásnak, a rombolásnak, a pusztitásnak, az egész világ szenved s a gyülölködés nem enyhül. Főminiszterünk meg az indiai főminiszter gyakran kijelenti, hogy csupán az emberi nem boldogságáért cselekszenek igy s minden ujabb kijelentés alkalmával ujra elpusztitanak egynéhány várost s tönkretesznek egy-két tartományt.

Másnap, arra a hirre, hogy meg fogják kötni a békét, a perzsa és az indiai tábornokok siettek hamarosan megütközni. A csata véres volt. Babuk látta annak minden bünét és borzalmát s tanuja volt a fősatrapák mesterkedéseinek, akik főnökükkel el akarták veszittetni a csatát. Szemtanuja volt, hogy öldösték le a katonák a tulajdon tisztjeiket s látott olyan katonákat, akik egynéhány véres és sáros rongy birtokáért leszurták haldokló bajtársaikat. Elment a kórházakba, amelyekbe a sebesülteket vitték, akiknek legnagyobb része elpusztult azok embertelensége folytán, akiket a perzsa király drága pénzzel fizetett a betegek ápolásáért. — Emberek ezek, — kiáltotta Babuk, — vagy vadállatok? Ah, látom Persepolis el fog pusztulni.

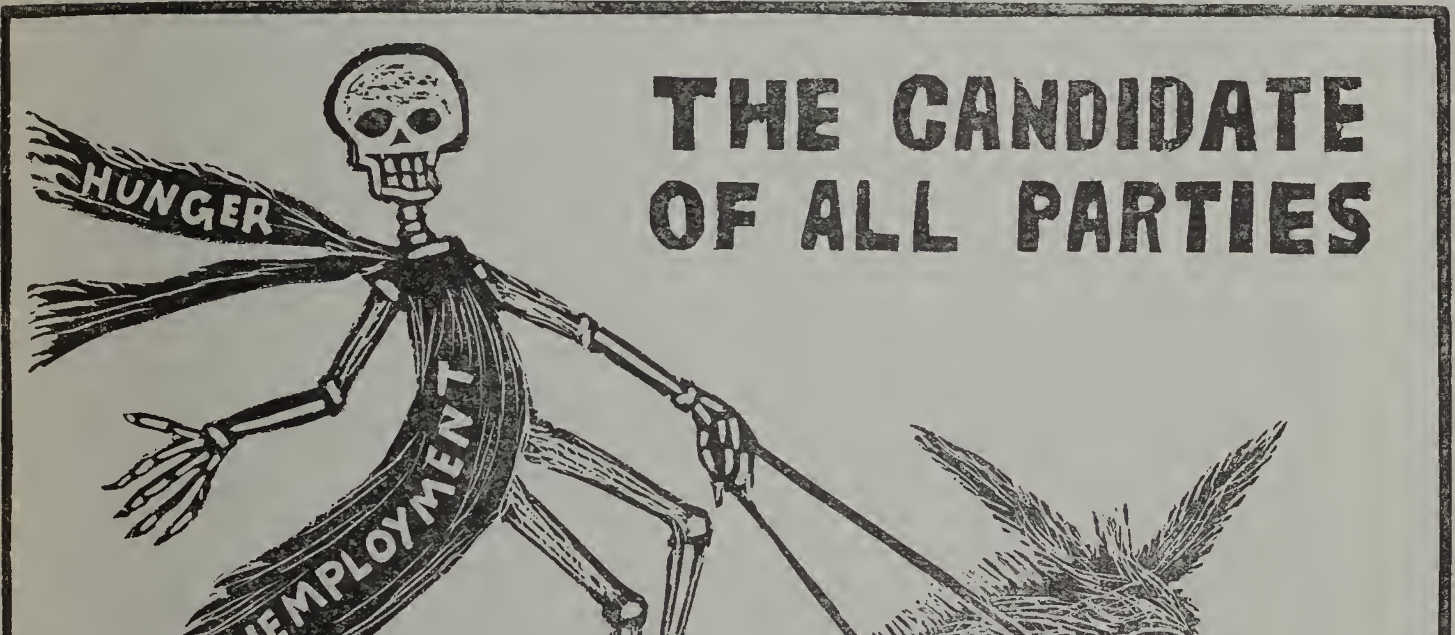
Eltünődve ezen a gondolaton, belépett az indiaiak táborába. Ott is olyan szivesen fogadták, mint a perzsáknál, ahogy ezt előre megmondták neki, de ott is ugyanazon borzalmak tárultak föl előtte. — Óh, óh — mondá magában, — ha Ituriel angyal ki akarja irtani a perzsákat, méltányos, hogy az Indiák angyala meg az indiaikat pusztitsa el. — De mikor azután részletes tudósitást nyert mindenről, ami a két táborban történt, olyan nemes, lelki nagyságra és emberségre valló tettekről is hallott, amelyek csodálatba ejtették és elragadták. — Megmagyarázhatatlan emberi lények, — kiáltott föl, — hogy férhet meg bennetek annyi aljasság és annyi nagyság, annyi erény és annyi bün?!

Időközben megkötötték a békét. A két sereg vezérei, akiknek egyike sem volt győztes és csak a saját érdekeikért ontották annyi embertársuk vérét, visszatértek a maguk udvarába, jutalmakat vadászni. A nyilvános irások nagy hangon ünnepelték a békét s tele voltak vele, hogy az erény és a boldogság ismét leszállottak a földre. — Hála légyen istennek! — szólt Babuk, — Persepolis lesz a megtisztult ártatlanság lakóhelye s nem fog elpusztulni, amint azok a csunya szellemek akarják. Siessünk hát késedelem nélkül Ázsiának e fővárosába.

Ebbe a roppant városba a régi bejárón át lépett be, amely teljesen barbár volt s amelynek a falusias mivolta bántotta a szemet. A városnak ez a része emlékeztetett arra a korra, amelyben épült, mert hát hiába megasztalják a régit a modern rovására, el kell ismerni, hogy az első kisérletek mindenben durvák.

Babuk belevegyült a tömegbe, amelyben férfi, nő a lehető legpiszkosabb volt. Ez a tömeg megriadtan rohant egy tágas és komor elkeritett helyre. A folytonos zajgásról, az emberek sürgölődéséről, meg arról, hogy egyesek pénzt adtak bizonyos személyeknek azért, hogy joguk legyen leülni, azt hitte, hogy valami piacra került ahol szalmaszékeket adnak-vesznek, de látván, hogy több nő térdreborul s ugy tesz, mintha merően maga elé tekintene, oldalvást azonban a férfiakra pislog, észrevette, hogy templomban van. Éles, rekedt, vad, harmóniátlan és rosszul tagolt hangok reszkettették meg az épület boltiveit, olyan hatást keltve, mint a vad szamarak nyeritése, amikor Pictave (régi francia tartomány) sikságán felelgetnek a hivogató duda tutulására. Befogta a fülét, de majdnem a szemét és az orrát is befogta, látván, hogy fogókkal és lapátokkal munkások lépnek be a templomba, akik félrehengeritenek egy nagy követ, az üregből dögletes szagot terjesztő földet lapátolnak ki jobbra-balra s ezután egy halottat fektetnek bele, visszaállitván tetejébe a követ. — Hogyan, — kiáltott föl Babuk, — ezek az emberek oda temetik a halottaikat, ahol az istenséget imádják és holttestekkel kövezik ki a templomaikat! Most már nem csodálkozom azokon a pestises nyavalyákon, amelyek oly gyakran ejtik kétségbe Persepolist, hiszen a halottak rothadása oly helyeken, ahol annyi élő gyül és szorul össze, akár az egész földtekét megmérgezhetné! Óh, utálatos város! Valószinüleg azért akarják elpusztitani az angyalok, hogy helyébe szebbet épitsenek s tisztább emberekkel népesitsék be, akik szebben tudnak énekelni. A Gondviselés tudja, mit miért tesz, hagyjuk hát cselekedni.

Közben a nap elérkezett pályája tetőpontjára. Babuknak a város másik végére kellett mennie, hogy egy hölgynél ebédeljen, akihez férje, egy katonatiszt, ajánlóleveleket adott részére. Előbb azonban körüljárta egynémely helyen Persepolist s látott szebben diszitett templomokat is, amelyekben udvariasabb emberekel találkozott és ahol bájos zene hangzott. Tetszettek neki a szökőkutak, amelyek, bár rosszul voltak elhelyezve, meglepték a nézőt, terek tárultak föl előtte, ahol bronzbaöntve lélegzeni látszottak Perzsia egykori legjobb királyai és ismét más terekre bukkant, ahol a nép füle hallatára igy kiáltott föl: — Mikor fogjuk itt látni kedves urunkat? — Megcsodálta a folyam nagyszerü habjait, a kényelmes és pompás rakodópartokat, a jobb és balparton épült palotákat és azt az óriási házat, amelyben ezernyi elöregedett, sebesült és győztes katona imádkozott naponta a hadak istenéhez. Végül eljutott a hölgyhöz, aki finom uriemberek társaságában ebédre várta. A ház tiszta és diszes volt, az ebéd pompás, a hölgy fiatal, szép, szellemes



Az összes politikai pártok jelöltje — Munkanélküliség.

és nyájas, a társaság pedig hozzá méltó, ugy, hogy Babuk minden pillanatban igy szólt magában: — Ituriel angyal, ugy látszik, bolondot üz a világból, amikor egy ily kedves várost el akar pusztitani.

Észrevette azonban, hogy a háziasszony, aki kezdetben oly gyöngéd figyelemmel kérdezősködött tőle férje hogylétéről, az ebéd vége felé még gyöngédebben beszélgetett egy ifju mágussal s látott egy birót, aki a felesége jelenlétében nagyon élénken ostromolt egy özvegyet, aki egyik karját a biró nyaka körül fonta, mig a másikat egy igen szép és igen szerény polgárnak nyujtotta. A biró felesége elsőnek kelt föl az asztaltól, hogy a szomszéd szobácskában értekezzék későn jött lelki gondozójával, akit ebédre vártak és az ékesszóló lelkiatya a szobácskában oly hévvel és kenetteljesen értekezett vele, hogy a hölgynek, amikor ujra megjelent, a szeme nedves, az arca piros, a járása bizonytalan volt és a hangja remegett.

S ekkor Babuk attól kezdett tartani, hogy Ituriel angyalnak mégis igaza lehet. Azon tehetsége folytán, melylyel másokban bizalmat tudott gerjeszteni, még azon a napon meghittjévé vált a hölgynek, aki elárulta neki az ifju mágus (csillagjós) iránt érzett hajlandóságát s arról biztositotta, hogy Persepolis minden házában épen ezt fogja látni, amit az övében láthatott. Babuk azt a következtetést vonta le ebből, hogy az ily társadalom nem képes fönmaradni, hogy a féltékenységnek, az egyenetlenségnek, a bosszunak minden ház békéjét föl kell dulnia, hogy minden nap könnynek és vérnek kell folynia, hogy a férjek bizonyára megölik feleségük udvarlóit vagy azok őket s hogy egyszóval Ituriel nagyon jól cselekszik, ha nem hagy követ kövön oly városban, mely botrányt botrányra halmoz.

Ezekben a sötét gondolatokba volt elmerülve, amikor az ajtónál egy komolykinézésü, feketeköpenyes ember jelent meg, aki alázatosan előadta, hogy beszélni óhajtana a fiatal biróval. A biró, anélkül, hogy székéről fölkelt s még csak rá is pillantott volna, büszkén és szórakozottan néhány iratot adott át neki és ezzel elbocsátotta. Babuk megkérdezte, hogy ki volt az az ember. A ház urnője halkan igy válaszolt neki: — Ez egyike a város legjobb ügyvédjének, ötven éve tanulmányozza a törvényeket. Ez az ur pedig, aki mindössze huszonöt éves és csak fél nap óta itélkező satrapa, átadta neki egy pör kivonatát, amelyben holnap kell itéletet mondania s amelyet még nem olvasott át. — Az a fiatal ugrifüles bölcsen teszi, ha tanácsot kér egy aggastyántól, de hát miért nem az öreg ember a biró? — Ön talán tréfál, — hangzott a válasz, — sohasem azok jutnak a méltóságokhoz, kik a munkás és alárendelt hivatalokban öregedtek meg. E fiatal embernek nagy tisztsége van, mert az atyja gazdag s mert itt a biráskodás jogát éppugy veszik, akár egy tanyát. — Óh, erkölcsök, — kiáltott föl Babuk, — ez már azután koronája a fejetlenségnek. Kétségtelen, hogy azok, akik igy megvásárolták a biráskodás jogát, el is adják az itéleteiket, valóban mindenütt csak feneketlen jogtalanságot látok.

Amint igy kifejezést adott fájdalmának és meglepetésének, egy fiatal harcos, aki aznap jött meg a seregétől, igy szól hozzá: — Miért ellenzi, hogy a birói hivatalokat megvásárolják? Én ugyancsak megvettem azt a jogot, hogy kétezer ember élén nézzek farkasszemet a halállal, akik parancsnokságom alatt állanak s ebben az évben negyvenezer darig-omba került, hogy harminc éjen át egymásután vörös ruhában fekhessen a puszta földön s két jó nyillövést kaphassak, amiket még ma is érzek. Ha én tönkreteszem magam ő perzsa felsége szolgálatában, akit sohasem láttam, a biró-satrapa ur is fizethet valamit azért az élvezetért, hogy kihallgatást adjon pörlekedő alattvalóinak. — Babuk telve méltatlankodással, nem állhatta meg, hogy el ne itélje szivében azt az országot, amelyben a béke és háboru tisztségeit a legtöbbet igérőnek adják oda s arra a hirtelen következtetésre jutott, hogy az ily országban sem a háboru tudományát, sem a törvényeket nem ismerhetik s azért, ha Ituriel nem is szánná el magát rá, hogy elpusztitsa ezt a népet, annak már a rossz kormányzás miatt is el kell vesznie.

Ezt a rossz véleményét még megerősitette egy vastag ember megérkezése, aki nagyon bizalmasan üdvözölvén a társaságot, a fiatal tiszthez lépett s igy szólt hozzá: — Csak ötvenezer arany darig-ot kölcsönözhetek önnek, mert igazán mondom, a birodalom vámjai mindössze háromszázezret hoztak az idén. — Babuk megkérdezte, hogy ki volt ez az ember, aki jövedelme csekélységéről panaszkodott s megtudta, hogy Persepolisban negyven plebejus király van, akik bérbevették a perzsa birodalmat s akik valamit juttattak a bevételekből a fejedelemnek.

Ebéd után elment a város egyik legponpásabb templomába s helyet foglalt egy sereg férfi és nő társaságában, akik azért gyültek itt össze, hogy agyonüssék az időt. Egyszerre valami emelvényfélén egy mágus jelent meg, aki hosszasan szónokolt a bünről s az erényről. Ez a mágus több részre osztotta föl azt, amit semmi szükség sem volt fölosztani, rendszeresen bebizonyitotta azt, ami anélkül is világos volt, megtanitott mindazokra, amiket ugy is mindenki tudott, hideg szivvel lelkesedett és megizzadva és elfulladva távozott. Az egész gyülekezet fölébredt erre s abban a hitben élt, hogy valami oktatásban részesült. Babuk pedig igy szólt: — Ime, egy ember, aki tőle telhetőleg mindent elkövet abból a célből, hogy két- vagy háromszáz polgártársát agyonuntassa, de hát a szándéka jó volt s ez nem lehetne ok Persepolis elpusztitására.

Ahogy elhagyta ezt a gyülekezetet, elvezették egy nyilvános ünnepélyre, amelyet az év minden napján megültek. Valami bazilikában folyt az le, amelynek a mélyében egy palota volt látható. Persepolis legszebb polgárnői s legtekintélyesebb satrapái, sorok szerint elhelyezkedve, oly szép látványt nyujtottak, hogy Babuk eleinte azt hitte, ebből áll az egész ünnepély. Az emlitett palota előcsarnokában azonban nem sokára két vagy három személy jelent meg, akik királyoknak és királynőknek látszottak. Nyelvük nagyon eltért a nép nyelvétől, mértékes, zengzetes volt és fenséges a hangzása. Senki sem aludt, mindenki mély csendben figyelt, amelyet csak az általános bámulat és elérzékenyülés jelei szakitottak olykor félbe. A királyok kötelességei, az erény szeretete, a szenvedélyek veszedelme oly élénk és megható jellemvonásokkal jutottak kifejezésre előadásukban, hogy Babuk könnyezett s meg volt róla győződve, hogy mindezek a hősök és hősnők, királyok és királynők, akiket beszélni hallott, a birodalom prédikátorai s föl is tette magában, hogy Iturielt rá fogja beszélni, jöjjön el és hallgassa meg őket, meg lévén róla győződve, hogy ily látvány örökre ki fogja békiteni a várossal.

Mihelyt az ünnepély véget ért, látni óhajtotta azt az első királynőt, aki ebben a szép palotában oly nemes és tiszta erkölcsöket hangoztatott. Be akart tehát mutatkozni őfelségénél. A hátsó lépcsőn, egy a második emeleten lévő kis, szegényes butorozott szobába vezették, amelyben egy hanyagul öltözött nőt talált, aki nemes és pathetikus (szenvedélyes) arckifejezéssel igy szólt hozzá:

— Ebből a mesterségből nem lehet megélni. Azon hercegek egyike, akiket látott, anyává tett, nemsokára meg fogom szülni gyermekemet, pénzem azonban nincs, már pedig pénz nélkül nincs szülés. — Babuk száz aranyat adott neki, mondván: — Ha csak ennyi baj van a városban, Iturielnek semmi oka sincs olyan szörnyü haragra.

Estéjét eltöltendő, innen azokhoz a kereskedőkhöz ment, akik boltjaikban pompás haszontalanságokat árultak. Egy értelmes ember vezette hozzájuk, akivel időközben megismerkedett. Ami megtetszett neki, azt megvette és a kereskedők sok mindent eladtak neki nagy udvariassággal és drágábbért, mint amennyit megértek. Amikor haztértek, barátja fölvilágositotta, hogy mennyire megcsalták. Babuk fölirta a kereskedő nevét, hogy Ituriel külön számoljon majd le vele, a város megbüntetésének napján. Ahogy éppen irt, kopogtak az ajtaján s ugyanaz a kereskedő lépett be, magával hozván Babuk erszényét, amelyet a boltban felejtett. — Hogy lehetséges az, — kiáltott föl Babuk, — hogy ön ily tisztességes és nemeslelkü s viszont nem általta, hogy olyan haszontalanságokat akasszon a nyakamba, négyszeres áron az értékük fölött. — Nincs olyan csak kevéssé neves kereskedő sem ebben a városban, — felelte a kalmár, — aki vissza ne vitte volna az ön erszényét, de azok, akik azt mondják önnek, hogy négyszeres áron adtam el azokat a dolgokat, amiket vásárolt tőlem, megtévesztették, mert én bizony tizszeresen megfizettettem őket. És ez, amit mondok, oly igaz, hogy ha egy hónap mulva el akarná azokat adni, a vételárnak még a tizedrészét sem kapná meg értük. Azonban semmi sem igazságosabb ennél. Ezeknek a haszontalanságoknak az árát az emberek kedvtelése szabja meg, ez a szeszély élteti azt a száz munkást, akiket alkalmazok, ez teszi lehetővé, hogy szép házam, kényelmes kocsim és lovaim legyenek, mert ez mozgatója az iparnak, táplálója az izlésnek, a forgalamnak és a bőségnek. Ugyanezeket a haszontalanságokat még drágábban adom el a szomszéd népeknek, mint önnek s ezen az uton-módon hasznot hajtok a birodalomnak .

Babuk, miután egy kissé eltünődött a mondottakon, kitörölte a kereskedő nevét.

Mivelhogy azonban sehogy sem tudta eldönteni, mit is gondoljon tulajdonképpen Persepolisról, fölkereste a mágusokat és az irástudókat, mert az elsők a bölcsességre, az utóbbiak a vallásra oktatnak s azzal biztatta magát, hogy miattuk a lakosság többi része is kegyelmet fog nyerni. Mindjárt másnap reggel elment hát a mágusok egyik kollégiumába. Az archimandrita (a keleti egyházak nagyobb kolostorainak főnöke) bevallotta neki, hogy szegénységi fogadalma százezer tallér évi jövedelmet hoz neki s alázatossági fogadalma révén ugyancsak széleskörü hatalmat gyakorol, ezek után pedig rábizta Babukot egy papocskára, hogy mutogasson meg neki mindent. Mialatt tehát a barát megszemléltette vele a bünbánatnak ezt a hajlékát, az a hir terjedt el, hogy e házak megreformálása céljából érkezett. Erre a hirre minden oldalról önzönlöttek hozzá a különböző emlékiratok, amelyek lényegükben mind ezt az egyet tartalmazták: — Hagyjon meg bennünket s törőlje el a többit. — A védekezéseket olvasva, ugy találta, hogy ezek a társaságok mind szükségesek, ha pedig kölcsönös vádjaikat mérlegelte, be kellett látnia, hogy valamennyi megérett a pusztulásra. Csodálkozással tapasztalta, hogy egy olyan sem akadt közöttük, mely nem a világ érdekében kivánta volna a világ fölött való uralkodást. S ekkor egy kis ember jelentkezett nála, aki afféle fél-mágus volt s aki igy szólt hozzá: — Látom, hogy a mü beteljesedik, mert Zerdust visszatért a földre, a kis lányokból próféták lesznek, akik elölről fogóval csipkedtetik magukat s megostoroztatják a hátulsó felüket. Igy hát az ön védelmét kérjük a nagy láma (budhista pap) ellen. — Hogyan, — kérdé Babuk, — azon nagy főpap ellen, aki Tibetben (Kinához tartozó ázsiai ország) székel? — Az ellen. — Hát háborut viselnek talán s hadseregeket mozgósitanak ellene? — Nem, de ő azt állitja, hogy az ember szabad, mi meg nem hisszük ezt. Apró könyvecskéket irkálunk ellene, amelyeket ő nem olvas s aligha is hallotta a hirünket és csak megelégszik vele, hogy elitéltessen bennünket, akárcsak egy gazda, aki meghagyja, hogy hernyózzák le a fáit. — Babuk elszörnyedt ez embernek bolondságán, akik bölcseknek vallották magukat s megbotránkozott azokon a cselszövényeken, amelyeket e világi hivságokkal leszámolt bünbánók szövögettek, akik még telve voltak dicsvággyal s gőgös megkivánásokkal, egyidejüleg pedig emberséget és önzetlenséget papoltak. Ugy döntött hát magában, hogy Iturielnek igaza van, amikor el akarja pusztitani ezt a szemétnépet.

Hazatérve, bánata elcsöndesitésére elhozatta az ujonnan megjelent könyveket s néhány irástudót hijt magához ebédre, egy kis szórakozásért. Kétszerannyian érkeztek, mint amenynyit hivott, darazsak módjára, melyeket a méz magához csábit. Ezek a tányérnyalók sokat ettek és sokat locsogtak. Kétféle embert dicsértek agybafőbe: azokat, akik már meghaltak s jómagukat. Kortásaikról azonban egy jó szót sem szóltak, kivéve a ház urát. Ha valamelyikük egy jó viccet mondott, a többi lesütötte a szemét s ajkát harapdálta, afölött való elkeseredésében, hogy az élcet nem ő sütötte el. Kevésbé tudtak szinlelni, mint a mágusok, mert ambicióik tárgyai sokkal szerényebb méretüek voltak. Mindegyikük valami szolgai állásra lesett s a nagy ember hirnevére vágyakozott, egyébiránt szemtől-szembe sértegették egymást, abban a hiszemben, hogy szellemességeket mondanak. Valamit megorrontottak Babuk küldetéséről s egyikük halkan arra kérte, hogy pusztittasson el egy kritikust, aki öt év előtt nem dicsérte ki eléggé, mert az sohasem nevetett a vigjátékain s végül egy harmadik az akadémia megsemmisitését szerette volna, miután sohasem tudott oda bejutni. Az ebéd végével valamennyien egyenként távoztak, mert az egész vendégseregben nem akadt két olyan ember, aki elbirta volna a másik társaságát s csakis a gazdag vendéglátók asztalánál tudtak beszélni egymással. Babuk ugy gondolta, hogy igazán nem lenne nagy kár, ha ezek a férgek elpusztulnának az általános pusztulásban.

Mihelyt megszabadult tőlük, belemélyedt egynéhány uj könyvbe. Fölismerte bennük vendégei szellemét, s különös méltatlankodás fogta el, olvasván a rágalom ez ujságjait, a rossz izlés ez okmánytárait, amelyeket az irigy rosszakarat, az aljasság és az éhség diktáltak, látva ezeket a gyáva gunyiratokat, amelyekben kimélik a keselyüt s széttépik a galambot, ezeket a képzeletszegény regényeket, amelyekben annyi olyan nő arcképe van megfestve, akiket a szerző sohasem ismert.

Tüzbe hajitotta hát ezeket az utálatos irásokat s kiment estefelé a sétatérre. Bemutatták ott egy öreg irástudónak, aki nem volt nála a többi tányérnyalóval. Ez az irástudó kerülte a tömeget, ismerte az embereket, tudta a velük való bánásmódot és megfontoltan nyilatkozott. Babuk panaszkodott előtte azok fölött, amiket olvasott és látott.

— Ön bizony nagyon alacsonyrendü dolgokat olvasott, — mondá neki a bölcs irástudó, — de a rossz minden müfajban, minden időben hemzseg s ami jó, az ritka. Vendégei az irodalom szemetjéből kerülnek ki, mert minden foglalkozásnál azok tolakodnak előtérbe a legnagyobb arcátlansággal, akik erre a legkevésbé jogosultak. Az igazi bölcsek egymás között visszavonulva csöndesen élnek s vannak még közöttünk jeles emberek és oly könyvek, amelyek méltók az ön figyelmére.

Amig igy beszélgettek, egy másik irástudó csatlakozott hozzájuk s társalgásuk oly kellemes, oly tanulságos volt, annyira kiérzett belőle a jóravalóság, hogy Babuk sohasem hallott hozzá hasonlót.

— Ime, — mondá, — ezek olyan emberek, akikhez Ituriel nem mer majd nyulni, ha csak nem akar könyörtelen lenni.

Kibékült hát az irástudókkal, de meg mindig haragudott a nemzet többi részére. — Ön idegen, — mondá neki az a helyes itéletü ember, akivel beszélgetett, — s ezért mig a visszaélések tömegesen föltárulnak szeme előtt, addig a rejtett jót, amely gyakran éppen ezekből a visszaélésekből származik, nem tudja meglátni. — S ekkor előadta neki, hogy az irástudók között is akadnak olyanok, akik nem irigyek és hogy még a mágusok karában is vannak erényes emberek. Megmagyarázta, hogy ezek a nagy testületek, amelyek egymással való surlódásaikban közös romlásuk felé látszanak haladni, alapjában véve üdvös intézmények, hogy a mágusok minden egyes társasága fékül szolgál a másikra nézve s hogy ha bizonyos véleményekben eltérések is vannak közöttük, valamennyien ugyanazt az erkölcsöt tanitják, nevelik a népet, tisztelik a törvényeket s olyanok, mint a tanitók, akik vigyáznak a ház gyermekeire, fölöttük pedig a mester őrködik. Babuk egynéhánnyal megismerkedett közülök s földöntuli jellemeket ismert meg bennük. S még arra is rájött, hogy azok között is, akik háboruskodni látszottak a nagy lámával, igen nagy emberek találkoztak. Sejteni kezdte, hogy Persepolis erkölcseivel is ugy állhat a dolog, mint azokkal az épületekkel, amelyeket a városban látott: egyik-másik szánalmasnak tünt föl előtte s viszont akadtak közöttük olyanok is, amelyeket kénytelen volt megcsodálni.

— Nagyon belátom, — felelt az irástudónak, — hogy ezek a mágusok, akiket oly veszedelmesnek tartottam, a valóságban nagyon hasznosak, különösen, ha egy jó kormány meg tudja akadályozni, hogy nagyon is szükségesek legyenek. Vallja be azonban legalább, hogy fiatal biróik, akik mihelyt megtanultak lovagolni, birói széket vásárolnak maguknak, az igazságszolgáltatás terén a legnevetségesebb arcátlanságot tárják föl közszemlére s a leggonoszabb jogtalanságnak nyujtanak tápot. Bizonyára többet érne, ha helyüket ingyen azok az öreg tudósok foglalnák el, akik egész életükben megtanulták mérlegelni az érveket és ellenérveket.

Az irástudó ekként válaszolt neki:

— Mielőtt Persepolisba érkezett láthatta, hogy fiatal titsztjeink nagyon jól harcolnak, pedig pénzen vásárolták a rangjukat. Talán meg fogja figyelni azt is, hogy fiatal biráink sem itélkeznek rosszul, ámbár megfizették birói székük birtokát.

Elmentek hát másnap a főtörvényszékre, ahol fontos itélet volt kihirdetendő. Az ügyet mindenki ismerte. Azok az öreg ügyvédek, akik beszéltek róla, haboztak határozott véleményt nyilvánitani s száz törvényt hoztak föl, amelyek közül egyik sem érintette a pör velejét. Száz oldalról vizsgálták a kérdést s egyikről sem tudták helyes világitásban meglátni. A birák gyorsabban itéltek, semmint az ügyvédek kételkedtek s itéletük egyhangu volt. Nemcsak egyhangu, de helyes is, mert a józan ész vezette őket, mig az ügyvédek rosszul okoskodtak, mert csak könyveiktől kértek tanácsot.

Babuk azt a következtetést vonta le ebből, hogy a visszaélésekben gyakran igen jó dolgok is rejtőzködhetnek. Sőt ezen a napon még azt is meglátta, hogy a pénzemberek gazdagsága is, mely annyira fölháboritotta, jó hatással lehet, mert a császárnak pénzre lévén szüksége, segélyükkel egy órán belül megszerezhette azt az összeget, amelyet rendes uton hat hónap alatt sem tudott volna megkapni. Látta azt, hogy ezek a vaskos felhők, telve a föld harmatjával, eső képében visszajuttatták neki mindazt, amit kaptak tőle. Különben is ez uj emberek gyermekei, akik igen sokszor jobb nevelésben részesültek, mint a régi családok fiai, sok esetben többet is értek azoknál, mert az, hogy valakinek az apja jól tudott számolni, nem állja utját annak, hogy jó biró, vitéz katona és ügyes államférfi váljék belőle.

Babuk észrevétlenül megkegyelmezett a financier kapzsiságának, mely lényegében nem különbözik más emberek kapzsiságától s amely szükséges. Megértette azt a bolondságot is, hogy valaki anyagilag tönkreteszi magát, azért, hogy mint biró itélkezhessék és mint katona harcolhasson, mert ez a bolondság nagy birákat és nagy hősöket termel. Megbocsátotta az irástudóknak irigységüket, akik között az emberiség világitótornyai akadnak, kibékült a dicsvágyó és cselszövő mágusokkal, akik sorában több nagy erényre, semmint apró bünökre bukkant, de hát még mindig elég kifogásolni valója maradt s különösen a nők galantériája s az abból keletkező nagy bajok nyugtalansággal és félelemmel töltötték el.

Miután ismerni óhajtotta az öszszes emberi életviszonyokat, elvezettette magát egy miniszterhez, de mindig attól reszketett, hogy valamelyik férj a jelenlétében fogja megölni a feleségét. Ahogy megérkezett az államférfiuhoz, két órán keresztül kellett várakoznia, mielőtt bejelentették volna s ismét két órán át, miután már bejelentették. Ez időközben megfogadta, hogy ugy a minisztert, valamint szemtelen ajtónállóit Ituriel angyal figyelmébe fogja ajánlani. Az előszoba mindenféle rétegbeli hölggyel, mindenféle szinü mágussal, birákkal, tisztekkel és tanférfiakkal volt tele és valamennyien a miniszterre panaszkodtak. A fösvény és az uzsorás igy szóltak: Kétségtelen, hogy ez az ember megdézsmálja a tartományokat, a szeszélyesek szemére vetették bizarrságát, a kéjenc kifogásolta, hogy csak gyönyörüségeinek él, a cselszövő abban bizakodott, hogy nemsokára elbukik valami intrika folytán, a nők pedig abban reménykedtek, hogy nemsokára fiatalabb miniszter kerül a helyére.

Babuk hallgatta ezeket a beszédeket s nem állhatta meg, hogy igy ne szóljon: — Boldog ember! Ime, minden ellensége ebben az előszobában van, ő pedig eltiporja hatalmával minden irigyét s lábai előtt hevernek mindazok, akik gyülölik. — Végül bejutott s egy kicsiny, az évek és az ügyek sulya alatt meggörnyedt, de még mindig élénk és szellemdus aggastyánt látott maga előtt.

Babuk megtetszett neki s ő viszont tiszteletre méltó embert ismert meg benne. Társalgásuk érdekessé vált. A miniszter bevallotta neki, hogy fölötte szerencsétlen. Gazdag ember hirében áll, de szegény, mindenhatónak tartják s mindenben ellenkeznek vele, lekötelezettjei nem ismerik a hálát s negyven évi fáradságos munkája alatt alig volt derült pillanata. Babuk elérzékenyült s ugy gondolta, hogy ha Ituriel angyal meg akarja büntetni ezt az embert, nem kell elpusztitania, hanem csak meg kell hagynia a hivatalában.

Mialatt a miniszterrel beszélgetett, hirtelen az a szép hölgy rontott be, akihez ebédre volt meghiva. Széméből és homlokán meglátszott a fájdalom és a harag. Szemrehányásokkal halmozta el az államférfit, sirt s keservesen panaszkodott, hogy megtagadták férjétől azt az állást, amelyre születésénél fogva igényt tarthatott s amely szolgálatainál és sebeinél fogva megillette. Oly erélyesen beszélt, annyi bájjal füszerezte panaszát s oly ékesszólóan védelmezte igazát, hogy mikor a szobából kikerült, férje szerencséjét kivivta.

Babuk kezet fogott vele, mondván: — Lehetséges-e, asszonyom, hogy ön ennyi fáradságot pazarolt egy emberre, akit nem szeret s akitől minden tekintetben félnie kell? — Egy emberre, akit nem szeretek? — kiáltotta föl a hölgy. — Tudja meg, hogy férjemnél jobb barátom nincs a világon s nincs semmi, amit áldozatul ne hoznék érte, kivéve a szeretőmet s ő is mindent megtenne értem, azon kivül, hogy elhagyja a kedvesét. Akarom, hogy megismerkedjék azzal a hölggyel, oly bájos, szellemes teremtés s a legnemesebb jellem. Ma este együtt vacsorázunk férjemmel és kis mágusommal, jöjjön el, vegyen részt örömünkben.

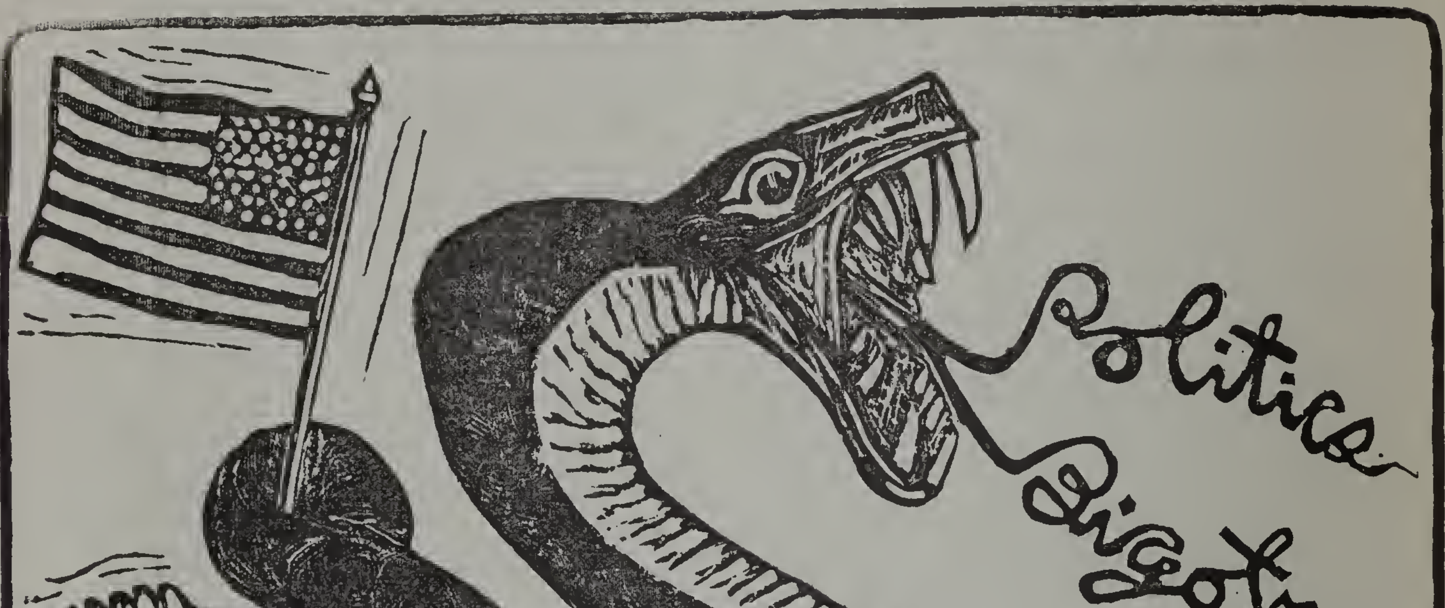
A hölgy el is vitte magával Babukot. A férj, aki végre bánatterhesen megérkezett, a legnagyobb hálával és kitörő vidámsággal látta viszont feleségét. Sorban megölelte hitvesét, a szeretőjét, a kis mágust és Babukot. Az együttérzés, a vidámság, a szellem és a kecsesség uralkodtak e vacsora alatt.

— Tanulja meg, — mondá Babuknak a szép hölgy, akinél vacsorázott, — hogy azok, akiket gyakorta nem tisztességes nőknek neveznek, igen sokszor érnek annyit, mint egy nagyon tisztességes férfi és hogy meggyőződjék állitásom igazságáról, jöjjön el velem holnap vacsorára a szép Téonehoz. Akad ugyan egynéhány elaggott vesztaszüz (papnő), akik nagyokat karmolnak rajta, de ő maga több jót tesz, mint azok együttvéve, a világ minden kincséért sem követné el a legkisebb igazságtalanságot, szeretőjének a legnemesebb lélekre valló tanácsokat adja, csakis az ő dicsőségével van elfoglalva és az viszont pirulna előtte, ha a jó cselekedetre kinálkozó legkisebb alkalmat is elszalasztaná. Mert semmi sem buzdit annyira nemes tettekre, mint annak a szeretőnek a tanusága és birálata, akinek becsülését birni akarjuk.

Babuk ott is volt a találkán. Oly házat látott, amelyben minden gyönyörüség föl volt található. Téone uralkodott fölöttük. Mindenkivel a maga nyelvén tudott csevegni, természetes szelleme fesztelnné tette a többieket, tetszett anélkül, hogy kereste volna a tetszést, époly szeretetreméltó volt, mint jótékony és szép, ami kidomboritotta minden jó tulajdonságát.

Babuk minden skytha-volta és minden angyali megbizatása ellenére érezte, hogyha még továbbra is Persepolisban marad, Téone kedvéért el fogja felejteni Iturielt. Megszerette azt a várost ,amelynek népe udvarias, szelid és jótékony volt, ámbátor könnyelnyelmü és telve hivságokkal. Félt Persepolis elitélésétől és félt előadandó jelentésétől.

Ime, hogy számolt be küldetéséről: A város legjobb ötvösével öntetett egy kis szobrot, amelynek anyaga a legdrágább és legközönségesebb fémekből, a legbecsebb és leghaszontalanabb kövekből és földből volt összekeverve s elvitte azt Iturielnek. — Össze fogod-e törni ezt a szobrocskát, — kérdé tőle, — azért, mert nem minden arany és gyémánt benne? — Ituriel megértette a célzást s elhatározta, hogy nem is gondol Persepolis megjavitására s rábizta a világra, haladjon a maga utján. — Mert, — mondá, — ha minden nem is jó, minden türhető benne. — Igy hát Persepolis megmaradt s Babuk távolról sem sajnálkozott ezen, nem ugy, mint Jónás, aki fájlalta, hogy nem pusztitották el Ninivét. De hát ha valaki három napig egy cethal gyomrában élt, nem olyan jókedvü, mint az, aki az operában volt, vigjátékokban gyönyörködött s jó társaságban vacsorázott.



A munkásfaló Dies Committee méregzacskóiból a politikai bigottság mérge lövel ki.

KOZMA ANDOR

KARÁCSONYI MEGLEPETÉS

EDUS ur, aki igen takarékos, rendes hivatalnok-ember, az imént elmult karácsonyi ünnepek előtt azt mondta csinos feleségecskéjének, hogy egy okos szót akar vele szólani.

— Asszony! A mi házi budgetünket minden esztendőben megzavarják a kölcsönös karácsonyi ajándékozgatások. Nem hagynók végre el ezt a bolond szokást?

— Dehogynem, lelkem. Már én is gondoltam erre, de nem mertem szólni. Mert hiába, nekem mégis jól esett, hogy karácsonyra mindig meglephettelek valami csekélységgel, csak azt rösteltem, hogy te meg ilyenkor rendesen nagy költségbe verted magadat miattam. Jobb lesz, igazán jobb, ha végét vetjük ennek.

Persze. A nélkül is tudjuk, hogy szeretjük egymást.

— Világos. És végre sem vagyunk már holmi mézes-heteket élő gyerek házaspár.

— Tehát karácsonyi programmunk. semmi ajándék!

— Semmi ajándék!

— S ha lenne is felesleges pénzünk, amint hogy nem szokott lenni: azt inkább félretesszük a takarékpénztárba.

— Igen okos gondolat! Tehát ne haragudjál Eduskám, ha én neked az idén semmi karácsonyi ajándékot nem veszek.

— Bolondos asszony, hát hogy haragudnám, mikor magam kérlek rá? Csak azután neked se fájjon, ha karácsonyestén üres kézzel jövök haza.

És ezzel teljes volt az egyezmény. Meg is pecsételték egy édes, okos, takarékos csókkal.

A mint azonban a karácsony mindinkább közeledett s a kirakatok fénye, a reklám zaja s a vásárló tömegek hullámzása mind jobban kezdték izgatni az embert, Edus urat meglepte az érzelgés.

— Szegény kis feleségem! — sóhajtozá magában — hát ezen a világon minden asszonyt érjen valami kedves karácsonyi meglepetés, csak éppen téged ne? Önzés, csunya fukarság volt tőlem az az inditvány, amelyet ő olyan önzetlenül szavazott meg, pedig az uj családi törvénnyel csak ő veszit sokat. Én, a blazirt férfi, vajmi könnyen viselem el, ha karácsonyra nem kapok három uj selyemnyakkendőt, mert hiszen amennyi nyakkendőre nekem szükségem van, annyit ugy is veszek. De ő, a szegény asszonyka, mikor jut valami kis ékszerhez, ha karácsonykor nem?

A sok érzelgő tünődésnek természetesen az lett a vége, hogy Edus ur, már három nappal karácsony előtt, elszántan betoppant egy ékszerész boltba. Ott ugy kezdte, hogy csak valami csekély emléket akar vásárolni s ugy végezte, hogy rajta maradt egy gyémántos arany nyaktü 150 forintért.

Mikor kijött a boltból, kissé meg volt illetődve. Ilyen drága karácsonya még nem igen volt. De vigasztalta s felderitette az a gondolat, hogy ez alkalommal igazán nagy meglepetést szerez a karácsonyfiával feleségének. Mert máskor mindig tudta az asszony, hogy kap valamit, de most a bölcs megegyezés után épen semmit sem vár.

Mivel pedig a szent estéig az asszonynak sejteni sem szabad, hogy immár kutba esett az egyezmény, Edus ur hazaérve, ki sem merte zsebéből venni a tüt, hanem szépen beletüzte s megkapcsolta azt kabátja belső zsebének selyem bélésébe. Azután, nehogy az elvesztés veszedelmének tegye ki a drága ajándékot, szépen levetette a kabátját s beakasztotta szekrénye belső sarkába. Más kabátot vett, a szekrényt becsukta s a kulcsot zsebre tette, mint rendesen.

Feleségének feltünt a kabát-váltás. Edus ur ugy magyarázta meg neki, hogy rösteli már amazt a kabátot viselni, annyira kopott és ócska.

A karácsony szent este még le sem

szállt mikor Edus ur már délutáni hivatalából is haza ment. Majd kifurta az oldalát a drága tü, bárha a szekrényben lógó kabát zsebébe volt is az beszurva. Alig várta, hogy elsüsse a nagy meglepetést, amelyen végtelen fog örvendezni az asszony, mialatt azt tételi majd, mintha az egyezség megtöréséért haragudnék.

De Edus ur, amint otthon a szobájába lépett, rögtön észrevette, hogy az asszony megelőzte és lefőzte őt.

Iróasztala előtt ugyanis fényes világitásban ott állott már egy gyönyörü faragott karosszék. Amolyan remeke a székipari leleményességnek: elől csucsba sarkal ki az ülődeszkája, karjait felmeredő hegyes kis piramisok czifrázzák, támlája pedig ijedt hirtelenséggel homoruan huzódik vissza az egész diszbutordarabtól. Szóval igazi karácsonyi ajándékszék: igen célszerü, csak éppen ülni nem lehet rajta.

—Ne haragudjál édes Eduskám — szólt a kedves asszony, férje nyakába omolva — én nem tudtam megállani, hogy ezzel a csekélységgel meg ne lepjelek.

— Ej, ej szivem, hát a megegyezésünk?

— Biz azt megszegtem, de ugy-e tudod, hogy szeretetből tettem? S ne félj, nem zavarja ám meg ez a csekélység a budgetemet.

Edus ur ezt ugyan nem vette egész komolyan, mert azt a csekélységet becsülte vagy negyven-ötven forintra. De persze, eszébe sem volt most a dolog prózai odalát szóvá tenni. Sőt inkább — tudván, hogy az egyezményszegésben ő maga még inkább ludas — hamiskodni kezdett.

— No szegény asszonykám, te ugyan rosszul jártál ez idén. Mert én nem szegtem ám meg az egyezményt. Igy én most kaptam karácsonyfiát tőled, te meg nem kapsz tőlem semmit.

— Nem baj az, csak szeress.

— Azért, nehogy tulságosan elszomorodjál, hát . . . hát . . . én mindenekelőtt hadd váltsak kabátot.

És Edus ur, levetette kabátját, kinyitotta a szekrényt, mely korántsem volt olyan tömött, mint három nappal azelőtt.

Edus ur idegesen, szinte remegve kutatott a ruhadarabok között.

— Hol az én sötétkék régi kabátom?

— Azt vennéd fel? Hiszen az már olyan ócska, hogy nem viselheted.

— Mindegy, hol van?

— Ugyan, miért keresed éppen azt?

— Add ide rögtön! . . . Meg nem foghatom, én magam akasztottam ide be, a kulcs nálam volt s most még sincs itt . . . Hogyan van ez?

— Aranyos Eduskám ne neheztelj érte: én tegnap reggel, mig aludtál, a kulcsoddal kinyitottam a szekrényt s a leviselt ócska ruháidat . . .

— Mit? Mit tettél az ócska ruháimmal?

— Eladtam egy handlénak.

— Jaj nekem! . . . Csakugyan? A kék kabátot is?

— Azt is. Az árukból vettem neked a karácsonyi meglepetést.

— Szerencsétlen asszony! S a zsebeket nem kutattad ki?

— De igen.

— S nem találtál egy gyémántos arany nyaktüt?

— Nem.

— Borzasztó! S mit kaptál a kék kabátért?

— 3 forint 75 krajcárt.

— Rettenes! Maga a tü, ami bele volt tüzve a belső zsebébe, 150 forintot ért.

— Jézus Máriám! Igazán?

— Igazán. Neked vettem karácsonyi meglepetésül. No, ez aztán szép meglepetés!

— Eduskám bocsáss meg, nem tehetek róla.

— Ne beszélj már, mondd meg legalább a handléd nevét?

— Nem tudom.

— A formáját.

— Vörös haja volt s nagy kampós orra. Rosszul volt öltözve, fején egy puha kalap felette egy kemény kalapot s még felette egy czilindert is viselt.

— Ebből nem igazodom utána. Legalább a lakását mondd meg.

— Várj csak, — azt megmondta, hogy érte küldhessek, ha megint kedvem lenne valami üzletre. Hanem azt is elfeledtem. Hadd gondolkozzam csak . . . Ah, tudom már: az ucca neve "r"-el kezdődik.

— Rombach ucca?

— Nem.

— Révay ucca?

— Nem.

— Rottenbiller ucca?

— Nem, nem . . . Igaz, megvan már: Szerecsen ucca.

— És ez kezdődik neked "r"-el? Ó, asszony, asszony!

— Tudtam, hogy van benne "r" betü és csakugyan van is.

— Számot, házszámot!

— Az vagy 3, vagy 13, vagy 53.

— Vedd a bundádat, hamar! Kocsiba ülünk s felhajtjuk a tüt, ha még lehetséges.

A házaspár fiákerba vetette magát s lóhalálban hajtatott Szerecsen ucca 3, 13 és 53 szám alá. Mindenütt, amerre és ahová csak mentek, karácsonyfák ragyogtak már az ablakokban. Amint beléptek egy-egy házba, ezzel a kérdéssel rohanták meg a házmestert:

Nem lakik itt egy handlé?

Mind a három házban lakott átlag három s ők benyitottak mind a kilenczhez. Mind a kilencz a gyermekserege közepén örvendezett a karácsonynak, nagy szemet meresztett a berohanó urra és hölgyre.

— Nem ez, ujra nem ez!

Aztán sorra vettek a Szerecsen uccában minden olyan házat, amelynek számában utolsónak volt benn a "3" számjegy. A keresett handlé nem volt meg.

Reményeikben csüggedten, megpróbálták megforditani a szám-spekulációt. Most azokat a házakat fogják még végig ostromolni, amelyek számában az első számjegy volt a "3".

S ime, amint a 31-ik számu házban a második handlé lakásába nyitottak be, a karácsonyfa előtt ujjongó kis vöröshaju gyermekek közül boldogan meredt ki az apa: a kampós orru, vörös haju handlé. S mi több — ünneplő gyanánt rajta volt Edus ur ócska kék kabátja.

— Ez az, ez az!

Edus ur, nagy ámulatára a karácsonyt ünneplő családnak, egyetlen szó nélkül, mint valami szerető rokon rohant a családapára s átölelve kezét a kék kabát belső zsebébe mélyesztette.

— Mit akar az ur? Mindjárt rendőrért kiáltok.

— Ne kiáltson, édes barátom, megvan már!

És diadalmasan huzta ki a zseb bélésébe rejtett gyémántos aranytüt.

Néhány perc mulva mindenki mindent megértett s mindenki örvendezett azon, hogy a derék handlé még nem adott tul a kabáton, hanem "mint valódi uraságtól levetett" csinos darabot, magának tartotta meg azt.

Edusék még soha sehol sem töltöttek vigabb karácsonyestét, mint a vörös handlééknál a Szerecsen ucca 31-ik szám alatt.

De az is bizonyos, hogy soha még annyi pénzükbe nem került a karácsonyi meglepetés, mint most, mikor előre megegyeztek volt abban, hogy ki nem adnak a karácsonyi meglepetésre egy fillért sem.

FALU—VÁROS

Vén világváros kavargó zajában
Örülni, élni mennyi sziv akar!

Vásári bódék eresze árnyában
Sok kopottbundás szomoru magyar
Talyigákkal a jó szerencsét várja,
Hogy valahol tán Munka is akad,
S nem kell gyujtani szortyogó pipára
és tétlenkedni szabad ég alatt!

Pereg az óra, repülnek a napok;
A hit, reménység egyre kevesebb:
Szent munka napja föl nem ragyog,
Több már a rongy, szivünkben a seb.

Szemünkben csodásan lobban a láng,
Ahogy cammognak szénásszekerek,
Egyszerre mind földéhes, falánk..
Az öregjének könnye is pereg.

Keserüség kél a futó örömből —
Tisza tájékán jár a gondolat..
Ott késnek, hol a drága anyaföldből
A sors nekik tán sohasem is ad!
Pedig, ó hányszor esenkedve kérték,
Ó, érte mennyi ember lelke fáj!
De — mint a hold — betelik majd a
mérték
S nem sir többé a falu, rög, a táj.

Tuba Károly

AMBRUS ZOLTÁN

RUHA TESZI AZ EMBERT

MAGÁBA mélyedve ült és egy levele felett gondolkodott a tanár. Z. Virág Ella! — ki lehet ez a Z.? És ujra elolvasta a levelet, lassan tagolva, hogy talán talál benne valamit, ami emlékeztetni fogja, a levél igy szólt:

> “Igen tisztelt Tanár Ur, nagyon lekötelezne, ha sulyosan beteg férjemet meglátogatni kegyeskednék. Egyes egyedül önben van bizalmam. Kérem ne fosszon meg attól, ami egyetlen reménységem.
>
> Z. Virág Ella, Kárpát-szálló.”

Ebből persze nem derült ki, hogy ki rejtőzik a Z. betü alatt.

Az asszonyra emlékezett egy kevéssé, abból az időből, amikor Z. Virág Ellát még K. vagy I. Virág Ellának nevezték. Virág Ella tudniillik volt már A. Virág Ella, B. Virág Ella, C. Virág Ella és igy tovább, végig az ábéczé minden betüjén. Ahány szinházi szezón, annyiszor cserélt névbetüt és férjet. Néha, szezón közepén, ugy választotta meg férjét, hogy a névbetüt azért ne kellessen megváltoztatnia. Kiss például ennek köszönhette, hogy Kovács után éppen ő következett. Néha meg egyáltalán nem ment férjhez, csakhogy névbetüjét megtarthassa; ennek tuljadonitható például, hogy mikor Bajort otthagyta, Margitházyval csak ugynevezett müvész-házasságot kötött. Mégis, az idők folyamán, kihasználta az egész ábéczét.

— Szép szokás, jó szokás — merengett a tanár.

Arra a szokásra gondolt, hogy a müvésznők a férj nevének rendszerint csak az első betüjét nyomtatják ki a szinlapra. Ennek az az előnye, hogy ha az ember elválik a férjétől, nem kénytelen boldogságával egyszersmind a müvészi nevét is feláldozni. Az ember férjhez megy máshoz és elhagyja a névbetüt, amint leveti az ingét és másikat vesz magára.

A Virág Ella név — hála a régi, jó szokásnak — ismeretes volt Kárpátoktól Adriáig. Remeteként a környékben kellett élnie annak, aki ennek a névnek a viselőjét Postás Milkában nem látta. De a tanár, mikor még ifju és bohó volt, a magánéletben is többször találkozott Virág Ellával. Ezek a találkozások nem igen hagytak mélyebb nyomot a komoly férfiu lelkében, s meglehet, a müvésznőt végképpen elfelejtette volna, ha nem vésődik emlékezetébe egy vidám kis eset, mely a Virág Ella hirnevének bizonyos maradandóságot biztositott. Egy kirándulás alkalmával ugyanis valami tréfás ur leveli békát dugott a müvésznő kivágott ruhájában, s akik látták, milyen ijedten, milyen hosszasan s milyen gyermeteg bájjal kereste meg a müvésznő a békát: Virág Ellát többé nem felejthették el. Olyan egyszerü volt, mint maga a természet.

— Ki lehet ez a Z.? — ismételte a tanár magában. — Szinész vagy civil?

Ez a kérdés azért érdekelte, mert a szinészek — tisztelet a kivételnek — nem nagy hitelnek örvendtek előtte. És egy darabig habozott, hogy ne az asszisztensét küldje-e a Kárpát-szállóba? De aztán felébredt benne a kiváncsiság: vajjon hogyan fest pár év multán ez az egészséges nő, aki, ha a tanár ur névbetüjét nem is nyomathatta ki a szinlapra, ezt vele annak idején egy cseppet se éreztette?! . . .

S végre elhatározta, hogy majd ő maga megy el. Személyesen, mintha egy biboroshoz hivnák.

Előbb persze ebédelni ment a Portugál király-ba s minthogy éppen ez az emlék járt a fejében, részletesen elmesélte társaságának a béka-históriát. Valaki tudta, hogy Virág Ella utóljára egy kövérségéről ismeretes komikushoz ment férjhez, s mások is elmondtak néhány béka-élményt. Három órakor aztán a tanár megkezdte körjáratát; sorra látogatta a beteg zászlósurakat s félhat tájban megérkezett a Kárpát-szállodába.

A Kárpát-szálló vidékén a tanár hintója méltó feltünést keltett. Mialatt fenn járt, egész csődület támadt a két nyönyörü fekete ló körül, amelyeket a tanár Oroszországból hozatott. A borotvált arcu, cilinderes, fekete libériás kocsis egy egyiptomi isten fenségével ült a bakon; keresztbe font két karja meg se moccant. A levegőbe nézett és nem látta meg a körülötte őgyelgő, bámész csőcseléket.

A tanár ezalatt mesés bundájában, melyet a walesi herczeg is megnézett volna, méltósággal haladt a lift felé, az alázatosan hajlongó szálló-személyzet kettős sorfala között. Arcza komoly volt, de nem szigoru. Homlokán ott ült annak tudata, hogy ahol ő megjelenik, a halál ijedten menekül le a lépcsőn, s ki a hátulsó kapun.

Virág Ella egy olyan kis előszobában fogadta, hogy a csodálatos bunda számára alig találtak helyet.

— Milyen szerencsétlenség! — siránkozott a müvésznő. — És éppen most! Vendégszerepelni hivták vidékre; az igazgató négy estét biztosit, s mind a négy este a Kis Kadét-ot kellene játszanom. Ó, kedves tanár ur, gyógyitsa meg az uramat, s mondja meg-hogy elutazhatom-e?!

A bánat határozottan igen kövérré tette.

— Nem lesz baj, nem lesz baj — vigasztalta a tanár.

A hangja olyan volt, mint a szelid orgonaszó; tömjénillatnak könnyü, finom parfőn terjengett körülötte. Ella szeretett volna kezet csókolni neki.

— Első ijedtségünkben — mentegetőzött — elhivattuk azt az orvost, akit a legközelebb kaptunk. Az illető éppen itt van. A szomszédból hozták s nem nagyon bizom a tudományában.

— Nem baj, nem baj — szólt kegyesen a tanár. — Majd utasitásokat adok neki és jelentést fog tenni nekem.

Benyitott a beteg szobájába; valaki az ágy mellől felállt és köszöntötte. A tanár biccentett, de nem nézett oda. Tekintetét az ágyra irányozta s arca felöltötte azt a felsőbbséges, de egyszersmind jóságos kifejezést, mely a magasztosabb pillanatokban Paulai Szent Vinczéhez tette hasonlóvá.

Mikor az ágyhoz ért, majdnem elnevette magát, Zengei feküdt előtte az ismert komikus, a bohózatok alakjainak legvidámabb személyesitője, azzal a kacagtatóan siralmas ábrázattal, mely a tanár urat minden szinpadi látványosság közül a legjobban mulattatta.

Zengeinek tudniillik a rémült arc volt a különlegessége; ebben a tekintetben egy szinész se versengett vele. Ha komoly akart lenni: nem lehetett ránézni mosoly nélkül; ha tekintélyes, zord, tragikus arcot vágott: senki se állhatta meg, hogy el ne nevesse magát; de ha telihold formáju husos arcán az aggodalom, ijedtség vagy éppen a rémület kifejezése jelent meg: az egész nézőtér rengett a kacagástól. Ennek az ijedelemnek a gyermekessége és a nevettetően vén arc között olyan sajátosságos, meglepő és furcsa ellentét volt, mely soha se téveszthette el hatását.

Most, isszonyu halálfélelmében, nevetségesebb volt, mint valaha.

— Végem van, tanár ur, végem van! — rikoltozott, mint a szinpadon szokta.

— Ej, akinek nagy baja van, az nincs igy a hangjánál! — enyelgett a tanár, s ezekből a nyugtató szavakból mintha balzsam csepegett volna.

— De, ugy-e, nem hagyhatom magára? — aggódott az ágy körül szorgoskodó müvésznő.

A tanár hozzáfogott a vizsgálathoz, és amint munkájában előrehaladt, az apostoli szelidség egyre fokozódott az arcán. Egy kicsit messziről és egy kicsit röviden tanulmányozta a beteget de azzal a biztonság-érzettel, mely az intuicióval megáldottaknál szinte megkettőzi az éleslátást és pótolja a részletekbe való tulságos elmélyedést. Nem időzött sokáig egyes külsőségeknél, ellenben gondosan figyelte meg a beteg érverését.

A gyönyörü óra, melyet kezében tartott, csodálatos remeke volt az iparmüvészetnek. A briliántokkal kirakott kis ékszer egy zsebóra alaku üvegburkolat felső részében rejtőzött; mutatólapját belehetett volna fedni egy körmöczi arannyal. Inkább herczegnők kezébe való játékszernek látszott, és mégis minta-pontossággal mutatta az időt. Nyilván fejedelmi óragyüjtők számára készült és párja nem volt sehol a világon.

Ezt az órát a nagylelküség egy rohamában Törköly gróf ajándékozta a tanárnak; Törköly gróf maga kétezer forintért szerezte meg a müvész-óriások egyik utolsó mohikánjától. A gróf másnap már megbánta a nagylelküséget; s visszaváltotta volna az órát háromezer forintért.

— Kilencvenkilenc, száz, százegy, számlálta a tanár az érütést magában, és észrevette, hogy Virág Ella nem tudja levenni a szemét az ezeregyéji drágaságról. Ez a néma hódolat határozottan megjavitotta a müvésznőről táplált véleményét.

De egyszersmind elhatározta, hogy a bucsuzás alkalmával kimértebb hangon fog beszélni a régi ismerőssel. A régi ismerős még készpénznek veheti az udvariasságot s talán ábrándokba ringatja magát. Már pedig a felesleges bizalmasságot annyival inkább el kell háritania, mert ime, a Z. betü is veszendőben van . . .

— Nem lesz baj, nem lesz baj — bátoritotta a beteget, miután a vizsgálatot befejezte. — Egy hét mulva már nem lesz semmi baj.

Kezet fogott a beteggel és félreszólitotta a kartárs urat.

Szép, meleg tekintetével csak most tisztelte meg az uccáról hozott kollegát. Ezzel ugyan aligha fog találkozni még egyszer: a zászlósurak betegszobajában. Középkoru, szürke ember volt; szürke a haja, bajusza, szakálla, s szürke a ruhája. Erről a ruháról lerítt, hogy készen vásárolták, valamelyik nagy ruharaktárban, hamincz forintért.

— Hát kérem, kartárs ur — szólt halkan, hogy a szoba másik részében ne hallják — ez: meningitis basilaris tuberculosa. Az embernek menthetetlenül vége. Alkalmazza, kérem, a szokásos szereket.

— Hogyan méltóztatott mondani tanár ur? — . . . szólt meglepetten a kartárs ur és fölemelte a szemüvegét.

Mintha mondani akart volna valamit. A tanár ur azonban, akinek már ez a kérdés se tetszett, egy mozdulattal, mely nem türt semmi fölösleges megjegyzést, véget vetett az orvosi tanácskozásnak. A kartárs ur visszament a beteg ágyához. Virág Ella pedig kikisérte a tanár urat.

— Nos? . . . — szepegett a müvésznő, a mikor kiértek az előszobába.

— Édes asszonyom, nem titkolhatom el, hogy a baj felette sulyos. A beteg azonban erős szervezetü s igy nem kell felhagynunk minden reménynyel.

— E szerint nem utazhatom el? — kérdezte Virág Ella lesujtottan.

A tanár ur egyet nyelt, mint aki nem akarja kimondani az egész gondolatát.

— Egyelőre nem ajánlom, hogy elutazzék. Ellenkezőleg, jó lesz, ha ápolónőt is hivat, mert — sajnos — kinos éjszakák következhetnek, amikor egyedül nem igen fogja birni az ápolást. Különben, minthogy a kezelést a kolléga urra kell biznom, elláttam őt a szükséges utasitásokkal . . . Megbizhatik benne.

— Istenem, ez a sörszagu ember! — kétségeskedett Virág Ella.

— Ó, igen értelmes orvosnak ismerjük! Mi is a neve? . . .

— Én bizony nem tudom . . .

— Mindegy. Szóval, ha a kolléga urnak kétségei volnának, csak forduljanak hozzám bizalommal. Én ez esetben, ha Budapesten leszek, mindenesetre eljövök.

A tanár ur hazahajtatott, átöltözött, és elnézett az Operába. A harmadik felvonás után a Portugál király-ba ment vacsorázni, osztrigát evett és végképpen elfelejtette a Zengei-párt.

A sörszagu ember, mint a sokgyermekes családfők általában, módfelett tisztelte a tekintélyeket, de nem utálta közelebbről is megnézni a beteget.

— Hát biz ez tifusz, — szólt magában, — de a tifuszból meg lehet gyógyulni.

És nem törődött többé a tanár ur utasitásával, hanem végezte dolgát, ugy, ahogy legjobbnak gondolta.

Virág Ella öt napig maga volt a némakétségbeesés . A hatodik napon azonban már megszokta az állapotot és ettől fogva nagyon kezdte nyugtalanitani, hogy mi lesz a Kis Kadét-tal?

— Édes doktor ur, — szólt egy

este a szürke emberhez, aki naponta háromszor ment fel a Kárpát-szállóba, — még most sem utazhatom el?! . . . Nem hallgathatom el ön előtt, hogy a mi anyagi viszonyaink nem a legjobbak. Mind a kettőnk fizetését lefoglalták, a szállóban alig van maradásunk, az ápolónőt is fizetnünk kell. Ez a vendégszereplés olyan szükséges, mint a falat kenyér. Mit csináljak?

— Utazzék el — felelte a szürke ember. — Napról-napra jobban bizom benne, hogy nem lesz baj. Ha szükség lenne rá: hazasürgönyözhetjük. Aztán itt van az ápolónő, és itt leszek én is.

— Ó, be aranyos ember ön, doktorkám! — örvendezett a müvésznő s a nyakába ugrott volna a szürke embernek, de hirtelen eszébe jutott, hogy ez a mozdulat nem volna éppen alkalomszerü ezekben a szomoru napokban. Hogy mégis némi jelét nyujtsa hálájának, megigérte, hogy képes levelezőlapot fog küldeni a doktor kis lányának.

Másnap elutazott, és önfeláldozását, hogy férje jólétéért hősiesen legyőzte kétségbeesését, megjutalmazta a kegyes ég. Nem négyszer, hanem tizenötször kellett eljátszania a Kis Kadét-ot, három különböző városban.

A szürke ember ezalatt szorgalmasan járogatott fel a Kárpát-szálló harmadik emeletére: naponként háromszor. Néha, mikor este hazament a gyermekei közé, el-elfogta a rémlátás: vajjon nem viszi-e magával az Eberth-féle bacilust? . . . — de jó csillaga megóvta ettől, s hogy meg ne bánja a tekintéllyel szemben tanusitott engedetlenséget: Zengei hat hét multán meggyógyult.

Szilveszter éjszakán Zengei Ödön és Z. Virág Ella rózsás hanglatban tértek haza a szállásukra. Az estét kitünően töltötték; malacot ettek, pezsgőt ittak rá, s a kollégák, akikkel lakomáztak, sokat beszéltek arról a nagy sikerről, amelyet Zengei Falstaff szerepében ért el, pár nappal előbb.

Az uj szezonban jobb napok virradtak rájok. Zengei igen jó szerződéshez jutott; Z. Virág Elláért pedig, mint egykor Homéroszért, hét város versengett. Már nem kellett a Kárpát-szálló másfél szobájában szoronganiok; éves szállást tartottak, saját butorokkal.

És jobban szerették egymást, mint valaha. Ujra élték mézes heteiket s boldogabbak voltak, mint az első alkalommal. Ezt a rájok nézve is meglepő másodvirágzást annak köszönhették, hogy néhány hónapig különváltan éltek. Zengei ugyanis, abban a téves hitben, hogy neje egy vidéki igazgatóval, akinél sürün vendégszerepelt, ugynevezett müvészházasságot akar kötni, nemcsak szóval hanem tettel is bántalmazta a feleségét. Virág Ella viszont ezt a gyöngédtelenséget azzal torolta meg, hogy otthagyta Othellóját és Cassiónál keresett menedéket. Sajnos, rövid idő multán Cassió is megverte, s Ella rájött, hogy ha már a szegény asszonyt okvetlenül verik, akkor jobb, ha a fővárosban verik meg. És minthogy tulajdonképpen csak egy kis félreértés választotta el őket, a félreértés kiderülvén, könnyü és édes volt megbékülniök. Tudvalevő, hogy egy kis vihar mindig javára válik a házasélet levegőjének. A Zengei-pár tehát Szilveszter éjszakáján igen jókedvüen sietett haza.

— Tudod-e, kedves — szólt Ella, akit a pezsgő igen gyöngédé tett — hogy a Párisi orvos-ban talán még remekebb voltál, mint Falstaffban?!

— Igaz — a Párisi orvos-ról jut eszembe . . . — vágott felesége szavába Zengei — még nem is mondtam neked, hogy micsoda kellemetlenség ért ma délelőtt, amikor a próbára mentem. Képzeld, találkoztam a volt háziorvosunkkal . . . tudod, aki a tifuszomban kezelt . . . Keményen rám támadt, hogy mért csufoltam őt ki a Párisi orvos-ban?! . . . Azt mondja: hozzá van szokva, hogy a müvészek gőzfürdőjegyekkel fizetik ki az orvost, de ahhoz nincs, hogy őt, hálából, nevetségessé tegyék. Halottál ilyet?! Hogy én nevetségessé teszem őt azzal, ha az ő maszkjában jelenek meg a szinpadon, s ha a jellemzetesség kedvéért utánzom a járását és a hanghordozását. De hát ki ismerné őt? Hogy az alakon nevettek?! Persze, hogy nevetnek rajta, ha az alakot én játszom! De ha kifiguráztam is, kérdém: ki előtt tettem nevetségessé? Ki ismert rá? . . .

— És ha ráismertek is! Köszönje meg, hogy reklámot csinálsz neki! . . .

— Hát persze. Egy ilyen senki!

— Hanem, ha már az orvosokról beszélünk . . . mondd, édesem . .. de ne haragudjál . . . gondoltál-e arra, hogy ránk virradt január elseje s hogy legfőbb ideje volna a tanárt . . .

— A tanárt?! . . . Biz erre nem gondoltam.

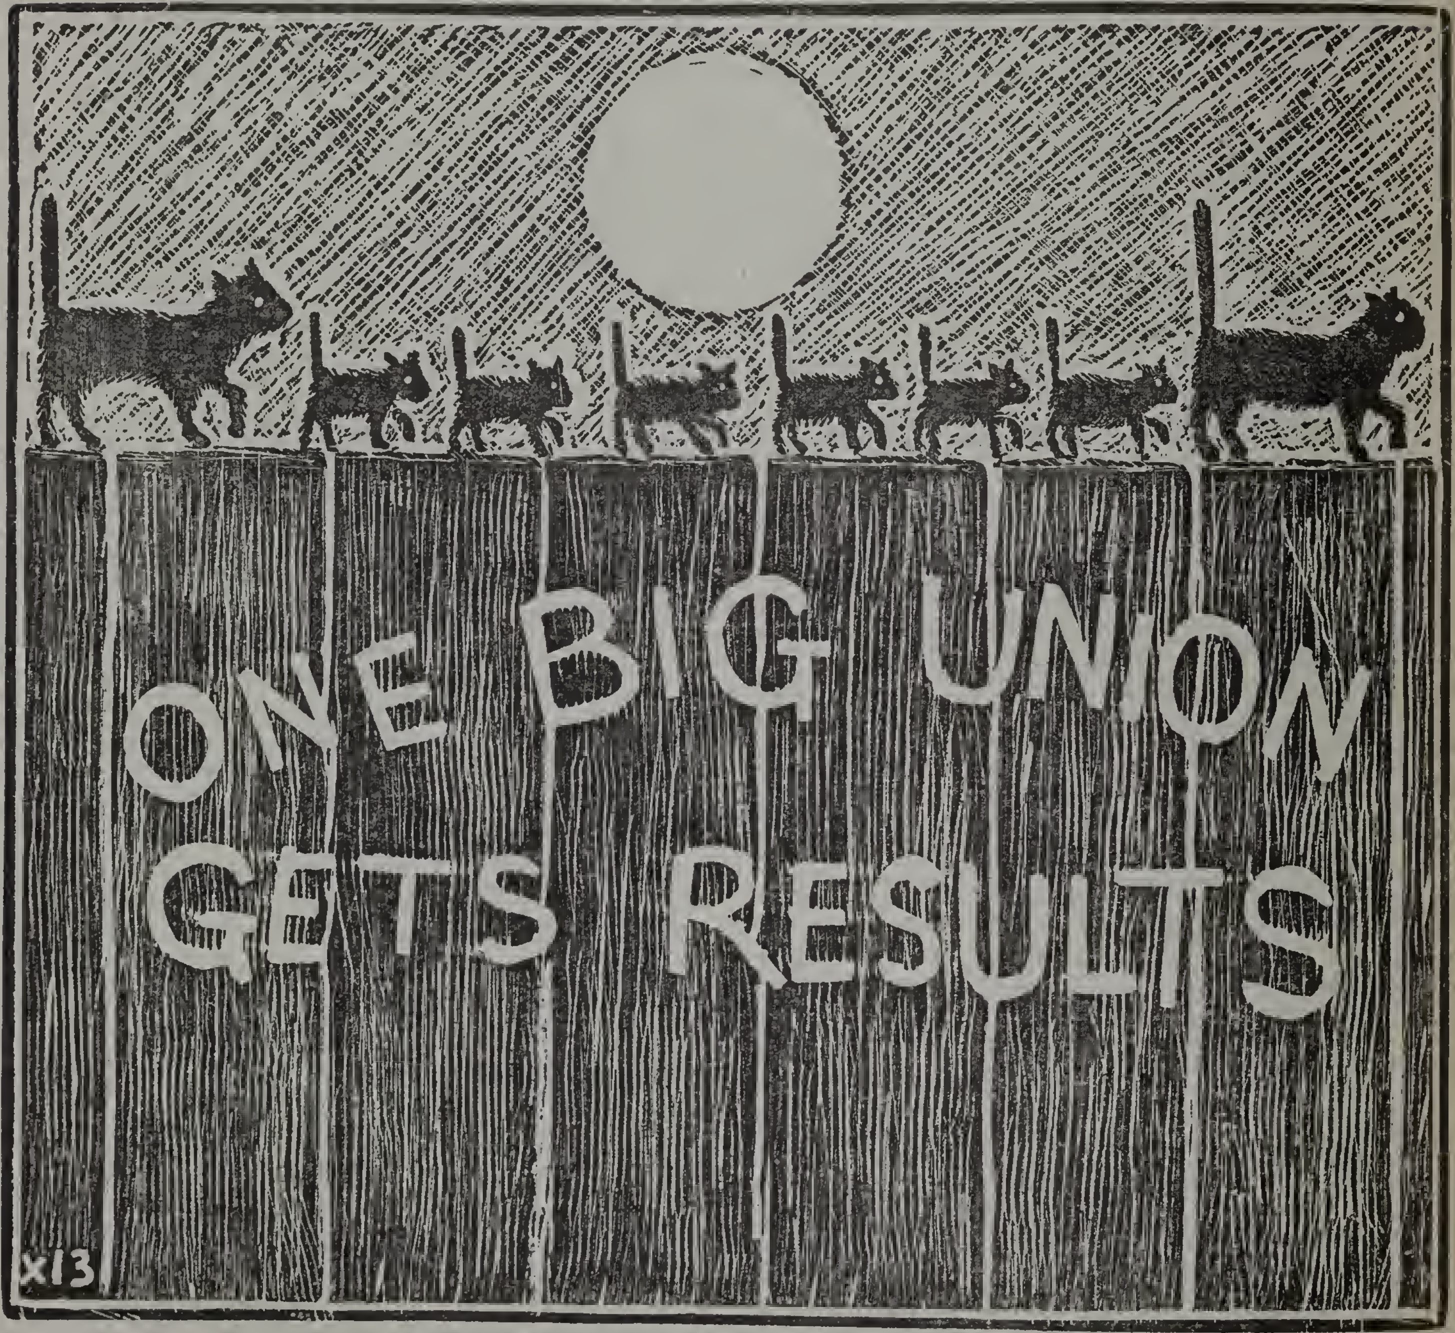
— Baj, baj.

— Annak pedig nem maradhatunk adósok.

— Mit gondolna rólunk ez az előkelő ember?! . . .

— Igen, okvetlenül meg kell fizetnünk a látogatását. Ha a föld alól is, elő kell teremtenünk, ami neki jár.

— Mert, ha nem fizetünk neki: kihez fordulunk, ha valami bajunk van?! . . .



Csak az Egy Nagy Szervezet eredményes!

NYERSANYAGOK

AZ ALÁBBI nyersanyagokra vonatkozó adatokat a második világháborut megelőző legutolsó statisztikai kimutatások alapján közöljük. Természetesen a háborus viszonyok nagyon megváltoztatták a termelést és mig ezen nyersanyagok némelyikéből most sokkal többet késziteneк, addig másokból a termelés csökkent. Mindazonáltal az alábbi adatok fogalmat nyujtanak ezen nyersanyagok mennyiségéről és arról, hogy a világ melyik részének képezik legfontosabb iparait.

A réz.

A réz csaknem olyan fontos nyersanyaga a nehézipari termelésnek, mint a vas. A réz alkalmazása az elektromosságban alapvető jelentőségü. A hadiipar pedig éppenséggel nem nélkülözheti. Ez a magyarázata annak, hogy a világ réztermő vidékeiért vagy az egyes gazdasági területeken kitermelt rézmennyiségért oly éles versenyfutás jelentkezik az egyes hatalmak részéről. A réz akárcsak a vas, aranyat ér és birtoklásától vagy hiányától egyes politikai területek (országok, nemzetek) gazdasági fejlődésének iránya függ.

A fontosabb réztermelő országok termelése ezer métermázsákban a következő volt:

USA	570
Chile	337.5
Kanada (angol)	222.7
Rhodézia (angol)	213
Belga Kongó	124
Japán	100
Szovjet-Unió	95.5
Németország	70
Jugoszlávia	42
Mexikó	40.6
Peru	36
Spanyolország	12
Svédország	10.7
Anglia	7.2
Brit-India	5.4

Ezen statisztikai adatok az Egyesült Államok nagy gazdagságát mutatják. Hasonló, sőt még kedvezőbb arányt mutat a U.S.A.-ra a vas, a kőolaj, szén, arany és sok más anyagra szóló statisztikai adatok is.

A kávé.

A dolog természeténél fogva, pusztán "észszerü" meggondolások alapján, minden munkatermék legeredetibb és legtermészetesebb rendeltetése az, hogy emberi szükségletet elégitsen ki. Sajnos, az uralkodó termelési viszonyok között ennek éppen az ellenkezője történik. A munkatermék kizárólag a profit varázsigéjére táncol elő a munka birodalmából. Ha a munkatermék nem lényegülhet át profittá, vagy csak részben teheti meg ezt, akkor a munkatermék tulajdonosa inkább megsemmisiti, de mégsem engedi, hogy a termék betöltse "természetes" hivatását, azt, hogy elfogyasszák.

Az 1935-ös esztendőben — bevallottan, hivatalos adatok szerint — 30 millió métermázsa kávét semmisitettek meg. A tengerbe dobták, kazánt fütöttek vele stb.

A fontosabb államok kávétermelése ezer métermázsákban a következő volt:

Brazilia	14.000
Kolumbia	2.500
Holland-India	1.040
Salvador	600
Guatemala	540
Mexikó	370
Kuba	307
Venezuela	300
Madagaszkár	295
Belga-Kingó	260
Haiti	250
Santo Domingo	215
Costa-Rica	210

Az esztelen termelés jellemzésére ennél a statisztikánál jobb példát alig lehet találnunk. Az 1938-39. évi kávétermelés főösszege (ideszámitva a föl nem sorolt területek kávétermelését is) 24,431.000 métermásza volt. Ezt megelőzően, 1937-38-ban mindössze

21,920.000 métermázsa kávét termeltek. Sem az 1937-38, sem pedig az 1938-39. évi terméseredmény nem éri el azt a mennyiséget (30 millió métermázsa), amelyet 1935-ben megsemmisitettek.

Országok szerint a legtöbb kávé a délamerikai államokban terem. Nagy tévedés lenne azonban azt hinni, hogy ez a termelés független az angol vagy az USA-tőkétől. Sőt, délamerikai viszonylatban a német tőke szerepléséről is beszélgettünk. Mégis főleg az angol és USA-tőke helyezkedett el legnagyobb mértékben a délamerikai kávéültetvényeken és a rendkivül alacsonybérü ültetvényesmunkás rovására igen magas profitot élvez.

A cukor.

Nincs olyan ember, aki közvetlen tapasztalatból ne tudná, hogy a cukor milyen fontos és sok tekintetben nélkülözhetetlen tápszere az embernek. Főként a zsenge gyermek szervezete nem nélkülözheti. Ezért azokban az országokban, ahol nincs elég cukor, vagy a cukor nem juthat el a közösség minden egyes tagjához, — az átlagos egészségügyi viszonyok megközelitőleg sem olyan kielégitőek, mint a cukorban gazdag országokban. Persze, a nemzetközi cukortőke, mint nagyhatalom, minden körülmények között iparkodik megóvni érdekeit, amelyek igen gyakran keresztezik a fogyasztók érdekeit.

A fontosabb államok répacukor termelése ezer métermázsákban a következő volt:

Szovjet-Unió	22.000
Németország	19.000
USA	15.286
Franciaország	8.100
Lengyelország	4.900
Cseh-Szlovákia	4.609
Olaszország	3.620
Anglia	2.942
Svédország	2.630
Hollandia	1.928
Románia	1.292
Spanyolország	1.150

Amint az itt föltüntetett statisztika mutatja, répacukortermeléssel főként az európai államok foglalkoznak. A tengerentuli gazdasági területek a nádcukor termelésével értek el kiváló eredményeket. A fontosabb államok nádcukortermelése ezer métermázsákban a következő volt:

Brit-India	27.500
Kuba	26.400
Holland-India	15.500
Formoza	14.610
Brazilia	12.000
Puerto-Rico	8.270
Hawai	8.250
Ausztrália	7.832
USA	4.918
Délafrikai Unió	4.601
Argentina	4.000

A felsorolt területeken kivül néhány angol gyarmaton, illetőleg mandátumos területen termelnek még számottevő nádcukrot. A nádcukornak összehasonlithatatlanul kisebb a termelőköltsége, mint a répacukornak. A nemzetközi cukorszindikátus annakidején egyezményben szabályozta a nád- és répacukor árának egymáshoz való viszonyát és a piacokat bizonyos kulcs alapján felosztották egymás között. A répacukor tőkései épugy nem fizettek rá erre az "egyezményre", mint a nádcukor tőkései. Ez utóbbiak, különben is nagy kivitelprofitra dolgoznak, amit az olcsó szines munkaerő, a gyarmati területek különleges viszonyai tesznek érthetővé.

A gyapot.

Nemcsak Bert Brecht remek verse és a gyapotültetvények pokla jut eszünkbe a "gyapot" szó használatakor, hanem azok a gyárak is, amelyekben világszerte éjjel-nappal dolgoznak a munkások és munkásnők milliói, hogy a gyapottermést, ezt az értékes nyersanyagot nélkülözhetetlen árucikké alakitsák át. Ruhánk, a kórházak kötszere, a hadiipar egyes termékei — mind gyapotból, vagy gyapot fölhasználásával készülnek. Az emberiség ma még nem nélkülözheti a gyapotot.

A gyapotban szegény, vagy a gyapot megszerzésében korlátozott országok bámulatos furfanggal, az alkimistákat megszégyenitő leleményességgel mindent elkövetnek a mügyapot létrehozására. Fontos élelmiszereket alakitanak át gyapottá, de, persze, a termelőköltségek sehogyan sem állanak arányban a végső eredménnyel. Mégis folytatják munkájukat, mert a gyapotra szükség van, a gyapot nélkülözhetetlen.

A fontosabb államok évi gyapottermelése ezer tonnákban a következő volt:

USA	25.897
Brit-India	9.290
Szovjet-Unió	8.350
Brazilia	4.059
Egyiptom	3.747
Törökország	663
Argentina	650
Szudán	574
Uganda	553
Korea	406
Belga Kongó	350
Birmánia	193
Görögország	146
Olaszország	95
Sziria	84
Bulgária	70

Ólom és horgany.

Az ólom rendkivül fontosságu nyersanyag ugy a béke- mint a hadiiparban, sőt, ez utóbbi csaknem teljesen megbénulna nélküle. Alkalmazása a nyomdák betüjétől, a vizvezetékek csövétől egészen a töltények gyilkos magjáig — széles területen történik. Becses és nélkülözhetetlen fém. Tudták már ezt az orosz cárok is, akik az egészségtelen ólombányákban gátlás nélkül használták föl a társadalomból kivetett munkaerőt, a politikai és nem politikai "bünösök" egész légióját.

A fontosabb államok ólomtermelése ezer tonnákban a következő volt:

USA	348.1
Ausztrália	227.3
Németország	185.3
Kanada	181.9
Belgium	84.6
Birmánia	81.4
Franciaország	43.6
Olaszország	43.3
Peru	28.5
Lengyelország	13.1
Jugoszlávia	8.6
Rhodézia	0.3

A Szovjet-Unió nem tette közzé az ólomtermelésre vonatkozó adatait, de a megelőző három év átlaga alapján termelése mintegy 50.8 ezer tonnára tehető. Ezek az adatok, természetesen, korántsem jelentik a bányák teljes termelőképességét.

A fontosabb államok horganytermelése ezer tonnákban a következő volt:

USA	406.3
Belgium	210.1
Németország	194.6
Kanada	156.1
Lengyelország	107.4
Franciaország	60.6
Olaszország	34.1
Hollandia	25.3
Rhodézia	10.4
Spanyolország	7.7
Jugoszlávia	4.1

Anglia és a Szovjet adatai hiányoznak. Anglia 1937-ben 63.1, a Szovjet pedig 70.1 ezer tonna horganyt termelt. Az USA 1937. évi horganytermelése viszont 505.2 ezer tonna volt. Az 1938. évi termelés általánosságban, megközeliti a bányák évi termelőképességét, mert hiszen ekkor már világszerte érezni lehetett a mai események előszelét. Németország 1935-ben 124.2, 1936-ban 136.4 és 1937-ben már 163.3 ezer tonna horganyt termelt. A termelt mennyiség fokozatos emelkedése jelzi a termelés iramának állandó növelését és a bányák valószinü teljesitőképességét.

Az olaj.

Egy közgazdasági tanulmány kimutatja, hogy az orosz nyersolajkutak milyen szerepet játszanak egyrészt az orosz, másrészt a világ gazdasági életében. Megállapitja, hogy eddig tulnyomórészt a bakukörnyéki nyersolajforrások látták el Szovjet-Oroszországot ezzel a fontos ipari- és hadi nyersanyaggal. A bakui kőolajforrások azonban közgazdasági és stratégiai szempontból egyaránt előnytelen helyen, az ország nehezen védhető határvidékén fekszenek. Éppen ezért a szovjet kormányzat különös gonddal kutatott ujabb kőolajforrások után, amelyeket a Volga és az Ural folyók által határolt területen meg is találtak. Ezt a vidéket elnevezték "második Baku"-nak.

A kutatásokat 1931-ben kezdték meg. Az 1933-as esztendőben már két kut állott üzemben. Ezután egyre-másra állitották üzembe az ujabb és ujabb kutakat a megfelelő olajfinomitókkal és feldolgozó üzemekkel együtt. A harmadik ötéves terv előirányzata szerint 1942-ben ez a terület az egész ország kőolajtermésének 40 százalékát szolgáltatja majd, ami feltünő eredmény. Nem kétséges, hogy az oroszok ezt az előirást valóban el is érik, mert 1938-ban már a következő arányban termelték a nyersolajat a második Baku vidékén (számok ezer tonnákban):

Syszran	55.129
Sztavropol	10.400
Buguruszlan	2.246
Tujmaszy	20.843
Isimbajevo	376.651
Kusjapkulovo	21.583
Krasznokamszk	55.900

A termelés iramának fejlesztésére jellemző, hogy ezen a vidéken 1932-ben még csak 10.600 tonna kőolajat termeltek, 1938-ban azonban már 1,300.000 tonnát.

Ami a feldolgozás hasznossági fokát illeti, erről a következő adatok beszélnek. Az isimbajevoi az uj olajvidék központja, kőolajának benzintartalma a legnagyobb a Szovjetben termelt összes olajfajták között. Összetétele:

Szén	83.95%
Hidrogén	12.65%
Kén	2.95%
Nitrogén	0.45%

A második Baku gazdasági és katonai jelentősége tehát rendkivül nagy sőt ennek révén Oroszország kőolajkészletének jelenleg a felét teszik. Sőt ez az arány nyilván javul is még, hiszen az orosz kőolajkutatás ügye még nem ért véget és a következő idők uj meglepetéseket hozhatnak.

Az első halottégető krematóriumot 1816-ban épitették az Egyesült Államokban.

VERSEK A MÉLYBŐL

Irta: Lukács Imre

Munkások

Dolgos milliók vagytok a világban,
munkátok nélkül semmi sem lehet,
hatalmas, alkotó sokaságban
betöltitek a földeket.
Szenvedéstek a testetekbe vágnak,
mégis vagytok, bátrak, nagyok,
teremtői egy emberi világnak..
Én is közületek való vagyok!

Csillagok

Ezrek, százezrek és milliók vagytok,
számlálni titeket nem lehet,
a föld körül, a mindenségben
átragyogjátok a kék eget.
Nézek felétek, féllek és csodállak,
szédülök, ha arra gondolok,
hogy nincs vége a végtelen világnak.
Ragyogjatok csak csillagok!

Mint testvéreim . . .

Az vagyok én, aki vagyok —
dolgozók és munkátlanok
között élek rozskenyéren,
nehéz munkán, olcsó béren.

Munkás vagyok nem szégyellem.
Küzdelem, harc az életem
mindennapi kenyerünkért,
aratásért, termőföldért
az éhesnek, mindenkinek,
henye életet senkinek

s mig két szemem lát és tekint,
ugy küzdök, mint testvéreim.

A szabadsághoz

Most, hogy kőfalakon belül a tanyám
s rácsok ugrálnak bus szemeim elé,
most vágyom csak utánad igazán,
drága szabadság. Bő termő televény

áldott földed. Második édesanyam
vagy te nekem pillantásod fény.
Nélküled élek most, mert csak tavaszán
az uj esztendőnek lész ujra enyém.

Fényed nélkül tengődök és a serény
hü napokat kérem, bármerre kerül
tőlem mosolyod, tartson meg erején

régi magamnak. S igy bizton sikerül
emberként hagyni el a kőfalakat
s megmaradok testbe' s lélekbe' szabad!

DR. KOVÁCS RICHÁRD

A SZIVBÁNTALMAKRÓL

NEMCSAK a próféták és szerelmesek származtatják hevitő érzelmeiket a szivből, hanem a mindennapi életben is minden nemes, fontos indulatot a szivbe helyezünk, ami csak azt bizonyitja, hogy a köztudat mily nagy fontosságot tulajdonit a “legnemesebb” szervünknek. Bár tény az, hogy szivünkben érzések és gondolatok nincsenek, sziv és sziv müködése nélkül mégis rögtön megszünnék az élet és annak mindenféle megnyilvánulása. A sziv lényegében egy izmos központi szivattyu, mely az agyból és gerincvelőből eredő idegbehatás folytán rendes időközökben összehuzódik és kitágul és igy szivja magába és löki ki a testben keringő vért.

Mint tudjuk, a sziv két félből áll, mindegyik ismét egy-egy pitvarból és egy kamrából. A pitvarok és kamrák, illetőleg a velük vagy a belőlük szájadozó nagy erek között finom, de erős hártyák, az u. n. billentyük vannak, ezek a szivösszehuzódásnál, illetőleg elernyedésnél különbözőkép záródnak és helyes müködésük azt eredményezi, hogy a véráram a rendes irányban halad, a vérkeringés zavartalanul folyik le.

Szivbántalmaknak azt nevezzük, ha a szivmüködés, ezen bonyolult és csodás berendezés bármely zavara áll fenn. Az ily zavarok két nagy csoportba oszthatók és pedig vannak u. n. organikus vagy szerves szivbajok, ezeknél a szivizomzat vagy a szivbillentyük valamely szemmel, illetőleg kórbonctanilag látható elváltozás áll fenn; azután vannak u.n. funkcionális vagy ideges szivbajok, melyeknél a sziv beidegzése zavart, a sziv rendetlenül müködik, fájdalmas érzéseket okoz, anélkül, hogy bonctani szerkezete bármiféle elváltozást szenvedett volna. Hogy a szivbántalmak a szervezetre mily káros következményekkel jár, az a bántalom keletkezési módjától és fokától függ. Sok egyén szenved hosszu időn át valamely szivbajban, rendszerint billentyübajban anélkül, hogy tudomással birna arról és csak egy véletlen vizsgálat állapitja meg a tényt.

Hogyan keletkeznek a szivbántalmak? Már a meg nem születetett magzat szervezetében támadhatnak káros befolyások a fejlődő szivre és ezek folytán a pitvarok és kamrák, vagy a két szivfél között rendellenes nyilások állnak fenn és lehetetlenné teszik a rendes vérkerigést. Az ily veleszületett szivbántalommal világra jövő gyermekek ezért szederjes (“blue baby ”-k) és pár hét alatt rendszerint elpusztulnak, bár a legujabb sebészet merész eljárásaival már ezen állapot meggyógyitását is megpróbálta a rendellenes nyilások villámgyors összevarrásával.

Mig az ily veleszületett szerves szivbajok száma szerencsére elég ritka, annál gyakoribb az örökölt szibajoknak az a faja, mikor a szivben bonctani elváltozás nincs, a sziv azonban mégsem oly erős és ellenálló, mint más egészséges embereké. Nem nehéz ezt megértenünk, ha meggondoljuk, hogy mily különböző erejü izomzattal, hajzattal fejlődnek az egyes emberek. Az ily vele született “gyenge sziv” rendszerint családi örökség és sok családban hallunk a gyermekek, szülők és nagyszülők szivbajáról. Az ilyen gyenge szivvel biró gyermekek azután keresztül mennek a gyermekkor fertőző betegségein: vörhenyen, diftérián, torokgyulladáson és ami a legveszedelmesebb, az izületi csuzon (rheumán). Mindezen fertőző betegségeknél a kórokozó mérgek és baktériumok belekerülnek a vérkeringésbe és ezzel a szivbe. Ugylátszik, különösen a veleszületett gyenge szivvel biró gyermekeknél a sziv belseje kevésbbé ellentálló; a bacillusok letelepednek a szivbillentyük felületére, ott felrakodásokat vagy sebeket okoznak, mely állapot kórbonctani neve szivbelhártyagyulladás és ennek eredménye azután, hogy a finom szivbillentyük egyes helyeken megvastagodnak vagy hegesen sorvadnak és

APÁM

Apám is volt nekem. Volt és beszélt.
Sirt és mosolygott. Nem ismert veszélyt.
Élt, dolgozott, csókolt, káromkodott.
És egyszer a szó ajkán megfagyott.

Meghalt. A földbe süllyedt drága teste,
De valami megbolygat minden este.
A hangját egyre hallom: felnevet,
s egy dalt dudolgat a falak megett.

A levegőben is őt keresem.
A négy fal közt a lépését lesem.
Tudom, hogy itt van. Mégse látom!

De él! A lelke lelkemig hatol.
Ha sirok, könnyem az ő könnye tán,
Nem hiszem, hogy meghalt az apám.

Nechanszky Lajos

ezért már most a szivösszehuzódásoknál többé nem zárnak jól, a véráram egy része ellenkező irányban folyik, hallgatódzásnál a sziven mindenféle rendetlen zörejek hallhatók és létrejön a szivbillentyü bántalom. Ezért halljuk minden szivbetegségre gyanus egyén vizsgálatánál mindig az orvos kérdését: Mily gyermekkori betegségben szenvedett? Volt-e izületi rheumája? Mert az ilyenek után mindig fennáll a lehetősége a billentyübajnak.

A fiatal korban támadó szivbajok más csoportja az ideges (funkcionális) szivbajoké. Az iskolában való tulerőltetés, rendetlen táplálkozás, sok család szerencsétlen házi élete, fiuknál a korai dohányélvezet és a szülők által tudatlanságból adott szeszes tialok megzavarják a sziv finom idegszervezetét. Serdülő leányoknál az ugynevezett vérszegénység, melynek lényege nem a vér kevés volta, hanem annak rossz összetétele, a vastartalmu fehérje alkatrészek hiánya, hoz létre ideges szivzavarokat. Sok ilyen leánynál a sziv és véredényrendszer nincs kellőkép kifejlődve, a sziv gyenge a véredények szükek és ezért persze a nehéz házi munkát, gyári munkát nem képesek elvégezni és náluk a szivizom tulerőltetései, ideges zavarok, ájulások mindennaposak, addig, mig kellő nyugalom, a vérszegénységet javitó gyógyszerek az egyensulyt helyre nem állitják. Serdülő korban lévő fiatal embereknél kellemetlen szivzavarok támadhatnak a tulsok sportolás folytán, mely a szivizomzat kifáradására, később elfajulására vezet. Már az egyszeri tulságos megerőltetés egy kevésbbé ellentálló szivben tartós következményekkel járhat.

A felnőtt korban a szivbajok létrehozatalánál, főként a létért való küzdelem és a kinálkozó élvezetek tulzásba vitele szerepel. Üzletemberek, kiket sok üzleti gond bánt, zenészek, kik állandóan ideges izgalmakon mennek keresztül, orvosok kiken nagy felelősség nyugszik és akik éjjel-nappal uton vannak és emeleteket járnak, munkások, kik nem alusznak eleget, mind kivannak téve azon veszélynek, hogy egy idő mulva a sziv beidegzésében, vagy ami még veszedelmesebb: a sziv izomzatában oly elváltozások állanak be, melyek az eddigi foglalkozás folytatását és magát az életet is komolyan fenyegetik.

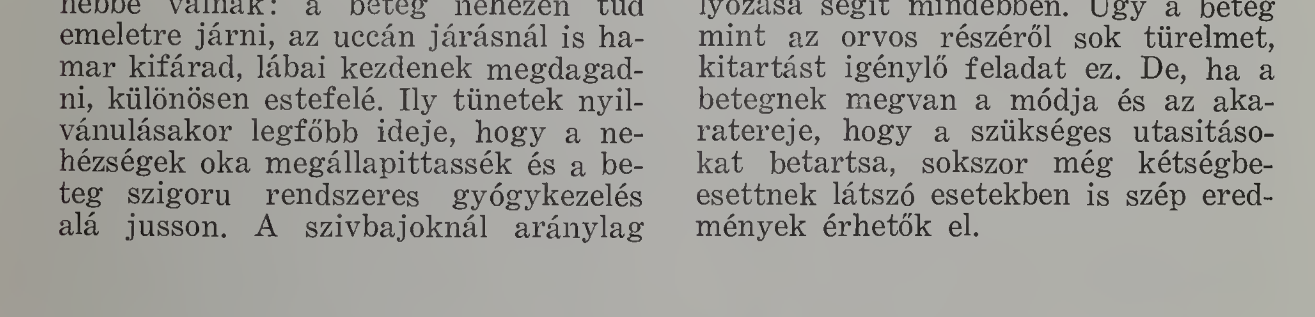
Igen nagy szerep jut a szivbajok létrehozatalában mindenféle szeszélvezésnek. Épp ugy, mint a gyomrot, májat, vesét és agyat, előbb-utóbb a szivet is megtámadja a mértéktelen alkoholfogyasztás; különösen a tulzott sörivás okoz szivbajt. Továbbá méreg a szivre a tulzott dohányzás, mely beidegzési zavarokat, rendetlen szivmüködést okoz. Végre nagy mértékben szerepel még az emberiség egyik legnagyobb nyavalyája: a vérbaj vagy syphilis. Csak az utolsó évtizedek kutatásai mutatták ki, hogy a szivizomzat, a nagy vérerek eddig ismeretlen oku bajainak, különösen a korai érelmeszesedésnek legtöbb esetében ki nem gyógyult syphilis az alapok. A nemi élet kicsapongásai pedig főleg az ideges szivbajok létrehozatalában szerepelnek.

A szivbajok létrejöhetnek minden olyan esetben is, ahol a szervezet általába beteg. Igy nagyfoku vérszegénység, idült gyomorbélzavarok, köszvény okozhatnak szivbajt. Tulságos elhizás sok esetben hoz létre szivizomelfajulást ,erőltetett fogyasztó kurák pedig szivgyengeségi állapotokat eredményeznek. A testet ért sulyos balesetek, ideg zavarok a szivmüködést időlegesen vagy tartósan megzavarhatják.

Az elsoroltakban, legalább főbb vonásokban, láttuk azon okokat, melyek az emberi test életfontos szervének, a szivnek zavarait okozhatják. — Miben nyilvánulnak mármost e zavarok, más szóval, mik a szivbántalmak tünetei? A betegnek mindegy lehet, hogy miféle szivbántalom áll fenn nála, ideges baja, billentyü bántalom vagy a szivizom megbetegedése, mert az ezek által okozott tünetek csaknem minden esetben egyformák és csak az orvosi vizsgálat képes a szivbaj milyenségét eldönteni. És ilyenkor sokszor kiderül, hogy a betegnek legtöbb aggodalmat okozó szivtünetek csak ideges zavaron alapulnak és nem veszedelmesek, mig más esetben, ahol csak kevés a fájdalom és a légszomj, a beteg kilátásai igen rosszak.

A szivbántalmak főtünetei: szivdobogás, nyomás a szivtájon, kisfoku fájdalom a szivcsucs tájékán, szorulás érzete a mellkasban, légzési nehézségek. — Ezek szoktak első jelei lenni annak, hogy a szivvel vagy annak idegeivel valami baj van. Máskor a test általános gyöngesége, a munkaképesség csökkenése mutatkozik először. A lélegzési nehézségek mind kellemetlenebbé válnak: a beteg nehezen tud emeletre járni, az uccán járásnál is hamar kifárad, lábai kezdenek megdagadni, különösen estefelé. Ily tünetek nyilvánulásakor legfőbb ideje, hogy a nehézségek oka megállapittassék és a beteg szigoru rendszeres gyógykezelés alá jusson. A szivbajoknál aránylag egyszerü gyógyintézkedésekkel és kevés gyógyszerrel néha csodákat lehet müvelni és még sulyos esetekben is a beteg életét évekkel meghosszabbitani, ha a kellő orvosi segély idején jön és az orvos rendelései lelkiismeretesen betartatnak. A szivizomnak csodás rezerv és regeneráló (magát felujitó) ereje van, ha kellő nyugalommal, további ártalmak elkerülésével alkalmat adunk neki ennek kifejtésére.

Csak néhány szóval emlitjük meg, hogy minden szivbaj gyógykezelésének mik az alapelvei. A kellő gyógykezelés alapfeltétele a szivbaj minőségének és okának pontos megállapitása. Szükséges erre a sziv gondos vizsgálata, esetleg X-sugaras vizsgálat, a vér és vesék állapotának megitélése. Ha megtaláltuk a szivbajt okozó ártalmat és az még mindig fennáll, az első dolog annak káros behatását egyszersmindenkorra megszüntetni. A szivbillentyük elváltozásait többé megszüntetni nem lehet, de kellő ágy-nyugalommal vissza lehet a vérkeringés egyensulyát és a szivizom müködőképességét állitani. A következő dolog megtalálni a helyes mértékét annak, hogy a megbetegedett egyén szive mennyi munkát bir el és mennyi kimélést szükségel. Óvatos testgyakorlat, az életmód, táplálkozás, folyadék felvétel gondos szabályozása segit mindebben. Ugy a beteg mint az orvos részéről sok türelmet, kitartást igénylő feladat ez. De, ha a betegnek megvan a módja és az akaratereje, hogy a szükséges utasitásokat betartsa, sokszor még kétségbeesettnek látszó esetekben is szép eredmények érhetők el.



DON'T STICK YOUR NECK OUT
RESIST REGIMENTATION!

AJÁNLATOS-E A KÁVÉ HASZNÁLATA

EURÓPA népei a kávéval a XV. század körül ismerkedtek meg, de használatának kezdetét teljesen homály födi. Kinai kutforrások szerint Kinában már Krisztus születése előtt 3000 évvel ismerték a kávét és üditő ital gyanánt használták.

Az európai népekhez az araboktól jutott el a kávé-ivás szokása. Egy ismeretlen eredetü legenda szerint a kávét abessziniai juhászok fedezték fel, akik észrevették, hogy azok a juhok, amelyek kávébabot ettek, egész éjjel nyugtalankodtak. A juhászok között aztán általános lett az a nézet, hogy a kávétól a juhok megbetegednek és épen azért vigyáztak arra, hogy juhaik a kávébokrokhoz ne menjenek. Igy a kávécserjét mindannyian ismerték s a kávét lassanként ők maguk is használni kezdték izgató szer gyanánt. Az abessziniai népektől az arabok tanulták el a kávéivást és azt Mohamed próféta idejében már oly nagy mértékben üzték, hogy a nagy próféta eltiltotta annak használatát.

Kávét és teát ma világszerte mindenütt használnak. A világháborut megelőzőleg csaknem pontos adataink voltak arra nézve, hogy az egyes országok mennyi kávét és teát használtak el évenként. A legutolsó statisztikai adat szerint legnagyobb kávé és tea fogyasztók az Egyesült Államok népei, majd Norvégia, Svédország, stb. következnek.

A kávé és tea legfontosabb része a “kaffein” nevü bóditó szer. Ugyanazon sulyu tea kétszer annyi kaffeint tartalmaz, mint a kávé. 1914-es statisztikai adatok szerint Hollandiában minden személy 17 font kávét, használt el évenkint. A többi európai országok nem sokkal különböznek ettől s Amerika talán még valamivel felül is mulja.

A kaffein bóditó szer lévén, ily nagymennyiségü használatánál fogva rendkivül fontos annak megállapitása, hogy milyen hatást gyakorol a használójára. Sajnos, erre egészen pontos és egyöntetü adataink még manapság sincsenek. Történtek ugyan többször kisérletek a kaffein hatásának pontos megállapitására, de ez oly nehézségekbe ütközik, hogy a kisérletek csak részben nevezhetők sikerülteknek.

A legfontosabb kisérletek egyikét Hollingworth tanár végezte 1912-ben. Ugyancsak sok adatot szolgáltattak a Rivers-féle kisérletek is. Hollingworth tanár kisérleténél 16 egyént figyeltek meg, akiknek naponként, a napnak bizonyos órájában megszabott mennyiségü kávét kellett inni. Hogy a kávé mindig ugyanazon erősségü legyen vegyi uton kivonatolt kaffeint használtak fel egy csésze meleg vizben.

A kisérleteknél a legnagyobb nehézséget az okozta, hogy szinte lehetetlen volt annak megállapitása, vajjon a kisérleti személyen tapasztalt változást a kaffein okozta-e, vagy valami más? Élő emberekkel kellett kisérletezni, akik nagyon természetesen rendesen táplálkoztak és pihentek. Mármost ha valamelyiknél — mondjuk — fejfájás mutatkozott, lehetetlen volt annak eldöntése, hogy az a kaffeintól, avagy valamilyen emészthetetlen ételtől, stb. származik-e.

A Hollingworth kisérletek különben azt a kérdést igyekeztek tisztázni, hogy mérsékelt kaffein élvezet után a munkabirás és az agy ébersége fokozódik-e? A kisérletek azt látszottak bizonyitani, hogy naponkénti kis adag élvezete után a kisérleti személyek jobban birták a munkát és azt nagyobb figyelemmel végezték. Igy pl. a gépiró-leány ugyanazon idő alatt többet és hibátlanabbul irt egy órával a kávé ivása után, mint a nap többi részében, vagy a kisérletet megelőző időben. Hollingworth professzor azonban maga megjegyzi, hogy a több munkabirás oka az is lehet, hogy a kisérletezők ezalatt a 40 nap alatt nagyon rendes életet éltek. Ezzel lehet megmagyarázni azt is, hogy a kisérlet végén csaknem mindegyik szaporodott testsulyban és izomzatuk is erősebbé lett.

Az azonban kétségtelenül kitünt, hogy ha tulságos nagy adagokat használtak, akkor az káros hatással volt a használóra. Munkaereje csökkent, étvágyát elvesztette és éjjelenként nem tudott aludni. A Rivers-féle kisérletek az állapitották meg, hogy a naponként kis mennyiségben használt kaffein semmi utóhatással sincs a szervezetre.

Hollingworth vizsgálatai szerint az átlagos csésze tea másfél grain kaffeint tartalmaz. Ugyanennyi kaffein van egy csésze fekete kávéban is. Az u. n. erős kávéban jóval több a kaffein. Egy átlagos csésze erős kávéban 3 grain kaffeint találunk. A kiserletek szerint 4 grainre tehető az a mennyiség, amelyet naponként elfogyaszthatunk anélkül, hogy megártana. Természetesen ez nem lehet egészen pontos adat, mert hiszen ez alá van vetve az egyéni természetnek és életkörülményeknek.

A kávé vegyi vizsgálatánál kétségtelenül kitünik, hogy mint tápanyag semmit sem számit. A cukornak, fehérjének és olajnak a nyomait találjuk meg benne, de csak olyan kis mennyiségben, hogy egyáltalában nem vehető számitásba. A kávé tehát erőt nem adhat, csak a más tápanyagokból nyert erőt izgatás révén fokozhatja, vagy gyengitheti.

Amnenyire meg lehetett állapitani, a kávé azonnal hat, mig a tea csak ugy félóra multán. Ez a hatás előbb bágyasztó, de gyorsan fokozottabb éberségbe megy át. Rövid időre gyenge kellemes érzés fogja el az embert, amely hasonlit a szesz élvezete utáni érzéshez, csak annál valamivel finomabb. Az emésztésre is jó hatással van s azt inkább elősegiti, mint akadályozza.

Dr. W. A. Evans amerikai orvos a kávéról irva, azt az ostorral hasonlitja össze. Szerinte a kávé és a tea az agy ostora, amellyel erősebb müködésre ösztökélhetjük. Arra kérdésre, hogy a kávé ártalmas-e, Dr. Evans igy felelt. "Csak ugy mint a lónak az ostorozás. Ha néha-néha meglegyintjük nem ártalmas, de a lovat sem verhetjük mindennap éveken keresztül anélkül, hogy kárt ne okoznánk benne. Agyunkat se lehet éveken keresztül erősebb munkára serkenti naponként bevett izgató szerrel anélkül, hogy az káros hatást ne gyakorolna ránk." Dr. Evans szerint reggel még csak megengedhető egy csésze gyenge kávé, hogy az éjjeli nyugalomtól még bágyadt testet energikussá tegye, de napközben, vagy este annak használata teljesen fölösleges. Még reggel is ajánlatosabb a hideg fürdő, vagy korai sétával való felfrissülés. De mindenek fölött ügyeljünk arra, hogy az erős kávézás rabjaivá ne tegyük magunkat.

IFJU SZIVEKBEN ÉLEK

ADY ENDRE

Ifju szivekben s mindig tovább,
Hiába törnek életemre
Vén huncutok és gonosz ostobák
Mert életem millió gyökerü.

Szent lázadások és ifju hitek
örökös urának maradni:
Nem adatik meg ez mindenkinek
Csak aki véres, igaz életü.

Igen, én élni és hóditani fogok
Egy fájdalmas, nagy élet jussán
Nem ér föl már szitkozódás,
piszok:
Lányok és ifjak szivvel védenek.

örök virágzás sorsa már enyém
Hiába törnek életemre,
Szent, mint a szent sir s mint
koporsó, kemény,
De virágzás, de Élet és örök.

KARIKÁS FRIGYES

PETRI KOCZKA PÉTER

AHOGY a Tiszán átvertek bennünket, egy negyvenkedő szekeres paraszt állt elém Poroszlón. Ránéztem de ismeretlen volt. Egyszer csak megszólalt.

— Elvtárs, én Petri Koczka Péter vagyok, mondja félig szemrehányó félig tanácskérő hangon. A telefonistákat hoztam ide Füredről most aztán összelőtték a hidat, a románok meg behurcolkodtak Füredre, én meg ittrekedtem lovastul. Mi legyen velem kérem?

— Itt marad kend, — mondom kurtán.

— Heszen nem nagy dolog ittmaradni kérem. De mi legyen a családdal, instálom?

— Hát mi volt a családdal, mikor kend Ferenc Jóskát szolgálta?

— Hát kérem az se vót valami hires dolog.

— Én nem tudok most kendel semmit se csinálni, menjen kend a gazdasági főnökhöz, az majd csinál valamit.

Vagy két hét mulva Koczka Péter megint elébem állt, de most már katonásabban.

— Biztos elvtárs nagyon szépen kérem, tessék engem beosztani az 1-39-be.

— Hát kend ki fia, atyja?

— Én kérem Petri Koczka Péter vagyok, a fuvaros, aki ideát rekedt a dandárnál.

— Hát a lovakkal mi lesz Petri Koczka Péter?

— Az unokatestvérem ott szolgál a trénnél, az majd gondjukat viseli.

— Na és kend mit fog csinálni a zászlóaljnál, Petri Koczka Péter?

— Amit a többi kérem. Mert hogy mindég frontkatona voltam kérem azért restelkedem kérem. Igen restelkedem kérem a földieim előtt.

— A földiei az 1-39-ben vannak?

— Igen kérem. A második századba a második és a harmadik szakasz az mind az én földim kérem. Csegeiek. Ott van a Dinnye-gyerek, mind a kettő az én regrutám vót a 39-eseknél. Ott van a Pikler-gyerek, az is az én regrutám, meg a zászlóalj parancsnok elvtársat, a Pájnik főhadnagy urat is igen jól ismerem még fenrik korából.

— Na?

— Abbizony. Majdnem mindig együtt voltunk szolgálatba. Merthogy én káplár voltam, kérem, korporál Petri Koczka kérem.

— Hát civilbe mi kend?

— Én kérem civilbe igen kis ember vagyok. Fuvaros ember vagyok evvel a két lóval kérem.

Irtam egy szolgálati jegyet a Peinlichnak és Petri Koczka Péternek ettől a naptól kezdve mindég hire járt felénk. Petri Koczka hires járőrparancsnok, ugyan olyan hires rajtaütő, őkelme a puska mester, meg a géppuskás, meg a zászlóaljfelcser, meg a kursmid, meg a fene tudja még, hogy micsoda. Egy alkalommal Peinlichtől egy értelmes embert kértem akit fontos megbízással a hadtesthez akartam küldeni. Peinlich minden gondolkodás nélkül odaszól az ordonáncnak:

— Eredj fiam, küld ide a Petri Koczka Pétert.

— Hallod, Peinlichkém, kérdem a mi ügyes zászlóaljparancsnokunkat, kid neked ez a Koczka?

— Miért tetszik kérdezni?

— Valahogy különösnek tartom, hogy te is ennek a hátuljába látod forogni a világ tengelyét.

— Kérem, a Petri Koczka nagyon ügyes ember. Szavamra mondom a legügyesebb ember. Majd meg tetszik látni.

És igazán megláttam. Értelmesebb embert a mi vidékünkön keveset láttam. Nem is vesztettem többé szem elől.

Valahol Rimaszombaton tul jártunk, az egész törzzsel terepet szemléltem. Ott ültünk a vasuti töltésen sokan. Ott volt a Sárai, a Peinlich, az öreg Korbély, meg egy egész csomó más ember. Arról volt szó köztünk, hogy milyen nagy munkát lehetne itt végezni, ha volna valamelyes páncélvonatféle. Két-három gépfegyverrel, egy ágyuval de nagy ribilliót lehetne csinálni!

— Nagy foga van annak kérem — mondja a vén Korbély.

— Nem olyan nagy János bátyám, — szólalt meg a hátunk megett a Petri Koczka Péter.

— Elég nagy foga van annak öcsém, elég nagy, — mondja bölcselkedve az öreg Korbély.

A Peinlich nevetni kezd s hangos röhögéssel jegyzi meg:

— Szavamra ez a Péter még ezt is megcsinálja.

— Hát mér ne csinálnám meg? nem kell ahoz kérem, csak egy irás a Karikás levtárstól az állomásfőnökhöz, hogy adjék egy mozdonyt két vaggónnal. Gépuska az van kérem nálunk elég nó meg ágyu is akad amennyi kell, ha akarják, én három nap mulva ideállitok vele, — mondja Péter nagy meggyőződéssel.

— Aztán, hogy csinálná meg kend, Koczka elvtárs, — kérdem nagy kiváncsisággal.

— Hát kérem nem olyan nagy dolog az. Két nyitott vaggon kell hozzá, belülről az ember dupla falat csinál neki. A két fal közé homokot hány az ember. A vaggon két sarkára egy-egy géppuskát, a közepére meg egy fakerékre egy ágyut, hogy forgatni lehessék, aztán nekiállit az ember hátuljával egy mozdony és kész a páncélvonat kérem.

— De honnan vennénk most hamarjában annyi rengeteg mesterembert meg páncélvonathoz értő embert? — kérdem erősen kacérkodva a kitünő gondolattal.

— Megcsinálom én kérem, csak tessék adni hozzá, ami kell, ember meg van rogyásig. A Nagy Jóska öcscse az olyan masinisztaféle, az igazitaná a masinát, az én földieimből meg kitelik a mancsaft rá. Mind igen jól értenek hozzá.

És a Petri Koczka Péter csakugyan csinált egy olyan páncélvonatot, hogy nekünk szemünk-szánk elállott. Harmadnap déltájban ott csudálta már a fél város a rimaszombati pályaudvaron a különös masinát. Péter meg ott sétált fel és alá, hogy és sokáig alig mertem megszóllitani. Végre aztán megembereltem magam.

— No Petri Koczka elvtárs, hát mégis megcsinálta kend a vonatot?

— Heszen meg mondtam kérem, hogy meg csinálom. Hát meg is csináltam.

— A legénység meg van már hozzá?

— Már régen kérem. És Péter elővette a fütyülőjét és cifrázza belefuvott. Erre a két vaggonról, meg a mozdonyról szaporán emberek ugráltak le s rang szerint sorakoztak a vonat előtt. Péter odaállott az első ember elé.

— Ez itt kérem a Nagy Lajos, a masinista. Emmeg a Dinnye Ádám, a főtüzér. Emmeg itt a Baja István, a főgéppuskamester. És igy szép sorjába bemutatta az egész mancsaftot, legutóljára meg saját magát, mint a "páncélvonat" parancsnokát.

— Mondja Péter, honnan a fészkes fenéből tanult maga ennyi mesterséget?

— Ej elvtárs, nagy mester a szegénység, megtanitja az az embert mindenre.

— Tán a világháboruban látott kend ilyesfélét?

— Nem láttam én kérem. Még csak hirét sem hallottam nékie. A fejem se törtem rajta soha. Csak ugy hallottam róla egyet-mást. Aztán, amikor hallottam, hogy az elvtársak szeretnének egy ilyen masinát, hát, mondok csinálok én a dandárnak páncélvonatot is. Tessék elhinni, hogy nem rosszabb ez, mint az igazi, csak egy kicsit szegényesebb. De a cseléd dandárnak ez is jó kérem. A fő az, hogy a puska szóljék rajta értelmesen.

— Aztán a puska értelmesen fog szólni rajta?

— Azám. Aztán mért ne szólna értelmesen, ha jó mancsaft van mellette?

Megérkezett a Sárai Szabó, azt mondja, hogy a páncélvonattól igen sokat vár. Bele is van kombinálva a ma esti támadási programmba, generális szereppel. Ugy szólt a parancs, hogy a vonat fél hatkor indul, hatra a vonalhoz ér és megütközik. Mi egy közeli templomból akartuk végignézni a vonat munkáját. Autóval előrementünk, erős tüzérségi látcsőkkel felszerelve állást foglaltunk a toronyban. Nagyon erős, meleg nyári zivatar volt, amely sokáig tartott, de arra elég volt, hogy ugy a mi, mint az ellenség fedezékéből kiöntse a katonákat, mint az ürgéket. A torony egész közel volt a rajvonalhoz, ugy hogy látcső nélkül is jól láttuk a fedezékek mentén ide-oda sétálgató ellenséges katonákat, sőt a nótájukat is egész tisztán hallottuk:

"Papicská, tü moj milii"

Vártunk vagy tiz percet, mikor egyszerre csak hallhatóvá vált a vonat zakatolása és a kanyarulatból hirtelen ott terem kegyetlen méltósággal az én Petri Koczka Péter komám tehervonatformáju páncélvonatja. Egy néhány pillanat müve volt az egész. Ugy néztek rá az ellenséges oldalon, mint a borju az ujkapura. Valószinüleg azt gondolhatták, hogy valamilyen eltévedt vonat. Sokáig a mi Petri Koczka Péterünk nem hagyta tévedésbe őket. Hirtelen megállott az ellenséges rajvonal közepébe és kegyetlenül lövöldözni kezdett. Most esztendők mulva, ha ugy visszagondolok erre a dologra, ma se fér bele sehogyse a fejembe, hogy hogyan tudott tizenhat ember olyan irtóztató zenebonát csapni. Tisztára pokol volt, amit csináltak. Az ágyuk, a géppuskák lehetetlen sebességgel okádták magukból a tüzet, a kézigránátok meg olyan szaporán röpültek, mint a zápor eső. A szó szoros értelmében hátbavagdalták az ellenséget kézigránáttal. A csehek az első pillanatban földbe gyökeredzett lábbal tátották a szájukat a vonatra. Ez a hirtelen tüzzápor annyira előkészületlenül találta őket, hogy alig tudtak a futáshoz fogni. Jó tiz percig lövöldöztek, eleinte kartáccsal, majd srapnelra fogták a dolgot. Aztán mikor kilométerekre se volt már kire lőni, a masina tüzet szüntetett, sipolt. A vasut mentén őrült nagy rés támadt. Nem volt ott nyoma se az ellenségnek ha csak a visszahagyott fegyverek, géppuskák s üres konzervdobozokat nem számitjuk nyomnak. Ezen a részen pedig vagy öt zászlóalj gyalogság vonult be dalolva és meg se állott Tiszolcig.

Mire odaértem a vonathoz, a mancsaft idősebb része, köztük Petri Koczkával, ott ültek már a vaggon szélén, lógatva a lábukat pipáztak és csöndesen beszélgettek. A fiatalabbja pedig birkózott a töltés oldalán egymással, térdig érő füben, mint akik igen jól végezték dolgukat.

— Pihennek, pihennek? — kérdem mosolyogva a fiukat.

Petri Koczka Péter leugrott a vonatról s katonásan jelentkezett:

— Biztos elvtárs! Petri Koczka Péter páncélvonatparancsnok tisztelettel jelentkezik tizenhat emberrel, négy géppuskával, két ágyuval a további rendelkezésre.

— Pihenj! — mondom csendesen. Nincs-e sebesültjük? kérdem a már pihenj-ben álló Petri Koczkát.

Petri Koczka Péter igen sértődött ábrázattal nézett rám és hallgatott.

— Azt kérdem, Péter, — ismétlem, — hogy nem sebesült-e meg valaki?

— Hol? — kérdi Péter, majdnem indulattal.

— A páncélvonaton, mondom.

— A dandár páncélvonatján?

— Azon, azon.

— Ugyan kérem, ne tessék már tréfálni — mondja a vérig sértett Koczka, kimondhatatlan büszkeséggel. Hát ki az isten mer puskát emelni egy ilyen vonatra kérem?

És Péter jóleső nagy büszkeséggel nézett végig csendesen füstölgő vonatján, az ő nagy müvén.

Én is . . .

Vagy két hét mulva megint Peinlichnél jártam. A mindig mosolygó Peinlich nagyon borus ábrázattal fogadott.

— Mi az öcsém? — kérdem a fiatal zászlóaljparancsnokot. Bicskát ettél, hogy olyan keserü ábrázatot vágsz hozzá?

Peinlich erőltetett mosolyt vett fel arcára és szomoruan nézett végig a minket körülvevő vöröskatonákon.

— Na mi a baj fiu?

— Tegnap délben kiküldtem Koczka Pétert járőrbe és még nem jött vissza.

— No. Aztán hová küldted!

— Ide vagy ezer lépésre a hámorhoz.

(Folytatás a 106-ik oldalon)

AZ ÁLMATLANSÁG OKAI ÉS LEKÜZDÉSE

ANNAK, hogy valaki nem tud rendesen aludni, sok mindenféle oka lehet. És mert a legtöbb esetben magától megszünik az álmatlanság, ha sikerül elhárítani az okot, mely azt előidézte, azért nem tud az ember aludni, mert olyan valami baja van, ami fájdalmat okoz neki. Ebben az esetben tehát ezt a fájdalmat, mint az álmatlanság előidéző okát, kell megszüntetni s ha lehet, azt a betegséget meggyógyitani, amely a fájdalmat okozza. Álmatlanság szokta gyötörni azokat, kik vérszegénységben szenvednek, ezeknek tehát ezt az alapbajukat kell kigyógyitaniok. Nem tudnak aludni a legtöbbször azok sem, akiknek a gyomruk és a beleik nem müködnek normálisan. Ha az ilyenek jól bevacsoráznak, ugy felfuvódnak s olyan kellemetlen teltségi érzésük támad, hogy e miatt el nem tudnak aludni. Ezeknek tehát azon kell lenniök, hogy a gyomor-bélmüködésük rendben legyen. Ez egynéhány ama sok ok közül, mely álmatlanságot von maga után. A leggyakoribb oka azonban az álmatlanságnak manapság az idegesség és ideggyöngeség, még pedig azért, mert ez a két baj is rendkivül módon el van most terjedve. A létért való nehéz küzdelemmel járó szellemi és testi tulerőltetés egyre növeli az idegesség és ideggyöngék számát s minthogy ennek a két bajnak elválhatatlan kisérő társa az álmatlanság, azért olyan ijesztő nagy azoknak a száma is, akiket álmatlanság gyötör. Itt is az alapbaj gyógyitására, tehát az idegek edzésére és erősitésére kell fektetni a fősulyt. A különféle álomhozó szerek használata csak orvosi rendeletre és ellenőrzés mellett ajánlatos, mert bár legtöbbje kitünően megfelel céljának, huzamosabb használatra egy sem ajánlaható, lévén mindegyiknek valamilyen kellemetlen és nem egyszer igen veszedelmes utóhatása is.

Sokféle módja van az álom természetes uton való előidézésének, aki türelmesen próbát tesz egyikkel vagy másikkal, az idővel nem fog rászorulni az álmot hozó mérgekre. A nyugodt alvásnak egyik főfeltétele, hogy a test olyan helyzetet foglaljon el az ágyban, amely a legtermészetesebb. A háton való fekvés például nem természetes, s aki megszokta a fekvésnek ezt a nemét, annak az álma rendesen nyugtalan. Háton való fekvéskor ugyanis a belső szervek ráfeküsznek azokra a nagy idegekre, melyek a gerincoszlop két oldalán vonulnak végig s nyomást gyakorolnak azokra. Ennek a nyomásnak a következménye az a sokféle kellemetlen érzés, mely a háton fekvőket alvás ideje alatt gyötörni szokta s mely álmukat megzavarja. Legmegfelelőbb a jobb oldalon való fekvés oly módon, hogy a térdek gyöngén meg legyenek hajlitva. A balodalon való fekvés azért nem jó, mert a telt gyomor ily fekvés mellett összenyomódik s az emésztés nem folyhat le rendesen, ami zavarja az álmot. A fej tartására nézve szabály az, hogy vérszegény, ideges emberek a fejüket valamivel mélyebben helyezzék el mint a lábukat, olyanok pedig, akiknek valami szivbántalmuk van, épp ellenkezőleg a fejüket magasabbra tartják, mint a lábukat. — Ilyen fekvés mellett sokkal nyugodtabb az álom s hamarább áll be, mint a fekvésnek egyébb módja mellett. Gyakori oka az álmatlanságnak különösen szellemi munkával foglalkozó embereknél az, hogy ezek fiatal korukban önként megröviditették alvási idejüket azzal, hogy a fél éjszakát is szellemi munka végzésére forditották. A szervezet végre annyira megszokja az éjjelezést, hogy akkor, amikor már szivesen aludnék az ember akár tiz órán át, nem képes korábban elaludni, mint a megszokott órában. Ezen csak ugy lehet segiteni, ha egy darab ideig teljesen félre teszi a szellemi munkát s testileg fárasztja ki magát, mielőtt lefekszik. — Különösen figyelmet kell forditani a fekvőhelyre, mert sokszor ennek a célszerütlensége oka az álmatlanságnak. A legcélszerübb a ruganyos matraccal biró vaságy, melyen a lepedőnek ugy kell kifeszitve lenni, hogy semmi ráncot ne vessen. A legkisebb ránc nyomást gyakorolhat az ilyen álmatlanságban szenvedő s azért rendszerint könnyen izgalomba hozható ember szerfelett érzékeny bőrére és ez már elegendő arra, hogy megzavarja álmában. A meleg pelyhes dunna nem célszerü, legjobb egy nem tulságosan nehéz gyapjutakaróval takarózni. Izgató ételeket, italokat természetesen nem szabad lefekvés előtt bekebelezni.

Az álmatlanságnak a legtöbb esetben a végső oka az, hogy az agyvelőben tulságosan sok a vér. A sok vér izgalmat okoz s azért kerüli az embert az álom. Mindenek előtt tehát arra kell törekedni, hogy az agyból a fölösleges vért elvonjuk a test más része felé. Az álomhozó szereknek, köztük az opiumnak is a hatása épp az, hogy tágitják az ereket, minek következtében a test külső részeiben folyik a vér az agyból. Ezt az értágitó hatást azonban el lehet érni másképpen is, mindenek előtt az által, hogy lefekvés előtt meleg lábvizet vesz az ember. A meleg viz kitágitja a lábak és az egész altest ereit, a kitágult erekbe több vér folyik, a felső testrész s igy az agy is ennélfogva kevesebb vért fog tartalmazni, ami megint az alvást elősegiti. Éppen igy hat a testmozgás is és a mély lélekzetvétel. Mozgáskor a vér a lábakba, mély lélekzéskor a tüdőbe száll és mindkét esetben megszabadul az agy a sok vértől.

Elősegiti az alvást az is, ha az ember lefekvés előtt egy pohár tejet vagy cukros vizet iszik, vagy pedig a nem nagyon bőséges vacsorához egy-két pohár sört fogyaszt. Sietteti az elalvást a gyomorra rakott hideg borogatás vagy a lábikra begöngyölitése nedves ruhával. Álmot hoz az ember szemére sokszor az is, ha komlóval töltött párnát tesz a feje alá. Dohányos emberek könnyebben alszanak el, ha lefekvéskor egy szivart vagy egy pipa dohányt elszivnak.

PETRI KOCZKA PÉTER

(Folytatás a 104-ik oldalról)

— Puska ropogást nem hallottatok utána?

— Nem.

— Elfogták őket. Hányan voltak?

— Tiz emberrel volt oda.

— Tudja, hogy ő mást nem visz magával soha.

Affene, ez már baj, mondom nagy aggodalommal. Szótlanul ültünk az árok partján, mint akik igen nagy halottat gyászolnak. Ettől a naptól kezdve mindenki Petri Koczkát kereste. Minden járőr, minden támadás a Petri Koczka jegyében folyt. Sárai Szabó minden nap vagy maga jött ki Peinlichhez, vagy ha mással volt elfoglalva, telefonon kérdezte meg, hogy nincse valami hir Petri Koczka Péterről.

Igy mullott el kilenc nap nagy szomoruságban. A kilencedik napon korán reggel Peinlichez értem s együtt reggeliztünk. Reggelizés közben beront a lovászom s jelenti, hogy megkerült a Petri Koczka Péter. Kiszaladtun az udvarra és tényleg ott feküdt a lépcső alatt, tizenegyedmagával bakancstalan véres lábbal, Petri Koczka Péter, akit alig tudtam visszatartani attól, hogy ne vágja vigyázz-ba véres bokáját.

Autóba ültettem az egész járőrt, beszállitottam őket a dandárkórházba. S szigoruan meghagytam Beretvás doktornak, hogy mint a két szemére, ugy vigyázzon ezekre az emberekre s hogy az én engedelmem nélkül ki ne eressze őket. Estefelé meglátogattam őket a kórházban. Tizenegy ágy állott egy sorban. Az ágyakban kiborotváltan szép tiszta fehér ingekben, kipödrött bajusszal feküdtek az én atyafiaim. Mindegyiknek a szájában az elmaradhatatlan, egyenes száru cseréppipa, az ágy támlájára pedig az erősen befáslizott lábukat tették ki, katonás sorban.

Csendesen beszélgettek. Egy széket tettem a Petri Koczka ágya elé s elmondattam vele, hogy merre jártak.

IRTA: OMEGA

A FÖLDI AZ EGYLETBE LÉP TAGNAK

ELMEGY a "földi" az orvoshoz "egyleti felülvizsgálás céljából" s már jó magyar szokás szerint nem felel meg egyenesen a hozzá intézett kérdésekre. Közte és az orvos között a következő párbeszéd folyik:

Orvos: Hogy hivják?

Jelölt: Már mint engem?

Orvos: Természetes.

Jelölt: Kis Pipás Endi, mert tetszik tudni, nálunk a faluban van egy nagy Pipás Endi is, meg egy rücskös Pipás . . .

Orvos: Elég, elég. Tehát akkor angolul magát Andrew Pipás-nak hivják.

Jelölt: Hát angolba már ugy jönne ki.

Orvos: Hány éves?

Jelölt: Azt bizony nehéz megmondani; tudja doktor ur, mikor nálunk a villám beleütött a luteránus toronyba, akkor öt éves vótam, annak pedig már van huszonöt éve.

Orvos: Akkor maga most harminc éves.

Jelölt: A harmincegyedikbe, ha összeszámoljuk.

Orvos: Nős?

Jelölt: Kicsoda?

Orvos: Hát maga. Van-e felsége?

Jelölt: Van az ó-kontriba, ha még él, mert ebbe a háborus időben, ahol levelet se kapni, ki tudja mi történik.

Orvos: Hol lakik?

Jelölt: Mező-Pájon, Csongrád megye, vasut állomás.

Orvos: Dehogy lakik maga ott. Maga csak oda való.

Jelölt: Ja ugy; itt a kis Holtonyon lakok.

Orvos: Az uccán lakik vagy egy házban?

Jelöt: Igaz, a házinumera is kell. Hát várjon csak kérem, mert én a numerát csak angolul tudom tontiét tontifór.

Orvos: Mi a foglalkozása?

Jelölt: Hát csak olyan szegény földmives ember.

Orvos: Hiszen itt csak nem foglalkozik ezzel?

Jelölt: Itt Klivlandban nem. Itt helper napszámos vagyok az öreg gyárban.

Orvos: Mi a vallása?

Jelölt: Én római katholikus, de a feleségem az . . .

Orvos: Hagyjuk csak azt. Iszákos ember maga?

Jelölt: Hászen már megiszom, mint aféle munkás ember, de azért nem sokat, mert ebben a drága világban nem is igen telik.

Orvos: Volt már kórházban?

Jelölt: Vótam, kétszer.

Orvos: Mi volt a baja?

Jelölt: Nekem hálistennek semmi. Beteglátogató vótam az egyletünknél, oszt ott feküdt egy fődi, hát azt látogattam meg.

Orvos: Operálva volt?

Jelölt: Operálva? az valami szinház ugy-e? nem vótam én soha.

Orvos: Dehogy; volt-e már orvos által vágva?

Jelölt: Nem vótam én orvos keze alatt még soha, nemhogy még vágva; ha már arra kerül a dolog, akkor inkább meghalok.

Orvos: Sérve van?

Jelölt: Nincs, pedig ettül a nehéz munkától, ami itten Amerikában járja . . .

Orvos: Édes apja él?

Jelölt: Dehogy, az már rég meghalt.

Orvos: Hány éves volt mikor meghalt?

Jelölt: Három éves.

Orvos: Az apját gondolom, nem magát.

Jelölt: Hja ugy; az vót . . . bizony már az öreg ember vót, azt se tudom, hogy hány éves lehetett, mert hát elkerültem a háztól, oszt édes anyám nem igen tudott irni, meg ha tudott vóna is, hát nem igen vót ideje, mert . .

Orvos: Körülbelül hány éves lehetett mégis?

Jelölt: Mibe halt meg?

Jelölt: Hát eljött az ideje, hát meghalt. Valami természetes halállal halt meg.

Orvos: De mégis mi volt a baja, meddig volt beteg?

Jelölt: Nem vót annak semmi baja, mig a háztetőről a fejire nem esett és szörnyet nem halt.

Orvos: Ezt maga természetes halálnak hivja?

Jelölt: Hát természetes, hogy ha valaki a fejire esik, hogy az meghal.

Orvos: Melyik évben halt meg az édes apja?

Jelölt: Hej, ugy vallatják itt az embert, mint nálunk a törvényszéken. Akkor én már Amerikában vótam vagy tiz éve és most vagyok már jövő gyertyaszenteléskor tizenöt éve itten.

Orvos: Édes anyja él?

Jelölt: Ha még az isten eddig megtartotta, hát él az ó-kontriban a feleségemmel együtt, mert már a második férje is elhalt, ő ugyan . . .

Orvos: Jól van, menjünk tovább. Hány éves az édes anyja?

Jelölt: No még azt is tudjam; 8 évvel fiatalabb vót az apámnál.

Orvos: Nincs időm azt kiszámitani, mégis mennyi idős lehet körülbelül?

Jelölt: Édes apám ötven vót, mikor meghót, most tizenöt éve annak, tehát akkor lenne hatvanöt . . . az édes anyám nyolc évvel fiatalabb.

Orvos: Hány fiu testvére van?

Jelölt: Hát vagyunk öten.

Orvos: Fiuk?

Jelölt: Nem, már a nők is beleszámitva.

Orvos: Én a fiukat kérdeztem.

Jelölt: Hárman vagyunk fiuk.

Orvos: Akkor még két fitestvére van.

Jelölt: Hát ugy jön ki.

Orvos: Hány évesek azok?

Jelölt: A János az öregebbik, azután jövök én, hát évvel fiatalabb . . .

Orvos: Hány éves a János

Jelölt: Hat évvel öregebb nálamnál.

Orvos: Tehát harminchat. Hát a másik fiu?

Jelölt: Az mán meghót a háboruban.

Orvos: Hiszen akkor csak ketten vannak, nem pedig hárman. Hány lánytestvére van?

Jelölt: Egy se, már mindakettő férjnél van. De az egyik nincs itt, az anyámnál van.

Orvos: Maga mindig egészséges volt?

Jelölt: Sose vótam beteg, mióta csak Amerikába vagyok.

Orvos: Hát odahaza?

Jelölt: Nem én, mig csak az eszemet birom.

Orvos: Nem szed most semmiféle orvosságot?

Jelölt: Szedi a fene; nem éltem én orvossággal soha.

Orvos: Mi a sulya?

Jelölt: Hogy mit vógolok? Itt Amerikában 165 fontot, már az amerikai métermázsálás szerint, de a hazai kilogrammos szerint . . .

Orvos: Az nem érdekel. Be van oltva?

Jelölt: De be ám, a fene vigye el. Egyszer a katonaságnál, meg kétszer a hajón, mert kétszer vótam Amerikában, oszt mindig beótottak, akkora karom vót, hogy . . .

Orvos: Jól van. Kire hagyja a halálozási összeget?

Jelölt: Hászen szeretném a feleségemre hagyni, ha isten őrizzen meghalok, de másrészt, tudja, hogy milyen az asszony, hátha a pénzt a második férjével elprédálja, oszt a gyermekek hoppon maradnak, mert az is előfordult ám már. Hát mondjuk csak felerészben a gyermekekre és felerészben az asszonyra, hogy ne mondja rám, hogy smucig vótam.

Orvos: Ez az egész. Irja alá a nevét.

Jelölt: Tyüh, az árgyélusát, hát még azt is kell. Tudja a kezem inkább a sufflihoz van szokva, mint a pennához, de azért már csak megpróbálom. Hát hova illesszem? Ugy ni. Ez is meg vóna. De rég nem irtam már. Ez az egész? De aztán nézze doktor ur, hogy valami hiba ne történjen és hogy felvegyenek ám, mert hát még is jó az egylet ha van. Jó napot kivánok.

HELTAI JENŐ

A GÉP-LEÁNY

AGENOR gróf üdén és sok pénzzel felszerelve a kaszinó felé tartott. Délben tizenkét órakor (ekkor jelentkeznek a lump-kisértetek, ellentétben az éjfélkor jelentkező becsületes kisértetekkel) megjelent neki a pikk-kilences, a káró-királlyal füszerezve. Ez az izgató jelentés annyira kihozta sodrából, hogy délután hat órakor már fel is kelt. Nem tudott tovább aludni és igy kissebb terjedelmü gyalogsétára indult, bár rendes körülmények között nem szeretett emberek közé keveredni.

És mintha ezen a napon a szerencse istenasszonya duplán is rámosolygott volna, ime egy előkelő karcsu nőalak lebegett előtte a sáros aszfalton. A ruháját azzal a merész biztonsággal emelte, amelyet csak a jó lelkiismeret és a kifogástalan cipő és harisnya ad meg a nőknek. A finom ismeretlen élénken érdekelte Agenort, minek következtében hevesen kisérni kezdte. Előbb tisztes távolságban lépkedett mögötte, majd közelebb jött és szakértő oldalpillantással igyekezett a karcsu hölgy arcvonásaiból egyet-mást ellesni. Mikor megpillantotta, hogy e rokonszenves teremtés minden kitüntetésre érdemes, még arra is, hogy egy előkelő grófi család utolsó sarja leereszkedjék hozzá, megszólitotta.

A fiatal hölgy nem felelt és némán tovább ment. Agenort e nem remélt kudarc még jobban lelkesitette. Állhatatosan és konokul haladt az ifju nő nyomán, még akkor is, amikor az már régen bekanyarodott a külső Ferenc-város rejtélyes uccáiba. És amikor az ifju nő eltünt egy kevés bizalmat érdemlő kapuba, Agenor hősies elhatározással tünt el utána. Az első emeleten utólérte. A fiatal nő egy ajtó előtt megállt és becsöngetett. Az ajtó nyomban kinyit, a fiatal nő besurrant, mire az ajtó ismét becsapódott. Agenor gróf ott maradt az ajtó előtt.

A lépcsőházban már eléggé sötét volt, Agenor gróf gyufát gyujtott és odavilágitott az ajtóra. Az ajtón egy táblácska volt, ezen pedig az a felirás: “Hobnoberry mester, órás.” Nézte a táblát.

— No, ha órás, — mondta magában Agenor gróf — akkor bemegyek!

Ezzel ő is becsöngetett. Az ajtó ujra kinyilt, Agenor gróf besurrant, mire az ajtó becsapódott. A gróf benn volt az előszobában, de nem látott senkit és semmit. Tőle sem kérdeztek semmit. Tapogatózva ment előre a sötétben.

Egyszerre egy hang megszólalt:

— Ki az?

A gróf megmondta nevét.

— Mi tetszik? — kérdezte ugyanaz a hang valamivel nyájasabban.

— A mesterrel szeretnék beszélni!

— Lépjen hármat előre, hármat balra, hármat ujra előre és hármat ujra balra — hangzott a sarokból.

A gróf hüségesen lelépte a hármakat.

— Most nyomja meg azt a gombot, amelyet balkézről találni fog . . .

A gróf kinyujtotta a kezét, megtapogatta a gombot és megnyomta. A nyomásra a gomb engedett, valami elkezdett csikorogni és a következő pillanatban a gróf egy nagy világos teremben volt.

Ebben a teremben, Hobnoberry mester, egy alacsony, furcsa emberke idegesen járkált föl-alá. Félelmetes pápaszem ült a horgas orrán, az egész figura inkább bagoly volt, mint ember.

— Mit akar? — förmedt rá a belépőre.

— Van-e valami szép órája? — kérdezte a gróf ártatlan arccal.

A mester gunyosan huhogott.

— Ugyan ne izéljen — mondta azután. — Ön nem az óra miatt jött ide. Ön Regia miatt jött ide . . .

— Regia? csodálkozott a gróf.

— Igen. Regia . . .

Ezzel a mester megnyomott egy gombot és a csöngetésre a szép ismeretlen bejött a terembe.

— Ez Regia — mondta a mester nevetve. — Ezért jött?

— Igen, — felelte a gróf bátran.

— Megveszi? — kérdezte a mester röviden.

— Hogyne!

— Nyolvanezer forint!

— Nyolcvanezer forint? . . . Kicsit sok.

— Nem adhatom olcsóbban. Hatvanezret már kaptam volna tegnap érte . . . de nem fizethetek rá. Négy évig dolgoztam rajta, amig meg tudtam szerkeszteni . . .

Agenor most már kissé nyugtalankodni kezdett. Vegyes érzésekkel nézett körül a teremben. Ez a terem mag is nagyon különös volt. Mindenféle-fajta álló és függő-óra volt a teremben, de egy se járt. Azután csodálatos és érthetetlen szerkezetü gépek, ezek is mind mozdulatlanul. A szép ismeretlen is hallgatott és nem moccant. Csak a mester ugrált ide-oda, a nagy pápaszem alól kisértetiesen villogott a szeme.

— Ne féljen, — mondta, amikor a gróf kutató pillantásával találkozott. — Nincs itt semmi baj . . . Regia, az én találmányom . . . a gép-leány . . . Nem él . . . de egészen olyan, mintha élne . . .

— Aha, — mondta Agenor megkönnyebülve, —e tehát olyan . . . hogy hivják azt az operettet, amit az Operában adnak? . . .

— Hoffmann? — nevetett a mester. Badarság! Az nem komoly dolog. Ez a komoly dolog . . . ez a leány! Ha elinditom, mindenki megesküszik rá, hogy él . . . Ez mindent tud, amit egy asszonynak tudnia kell. Ez él, nevet, beszél, csókol, énekel, szeret, kocsikázik, szinházba megy, vasal, főz, mos . . nincs a világon dolog, amire meg nem tanitottam! . . . És azután, ide vigyázzon, ennek nincsennek gépmozdulatai . . . ez kerek, gömbölyü, lágy, ez nem acél, nem vas, nem réz és nem bronz, ez hus és vér . . . Érti uram! . . . Ezért olyan drága! . . .

Agenor gróf feltette a monokliját és szótlanul nézte Regiát. A gépleány még mindig mozdulatlanul állt,, de csábitóan mosolygott. Csupa élet és igéret volt a mosolygása.

— Ez, hisz ez nem gép! Ez él — mondotta Agenor és odament hozzá.

A mester nevetett.

— Ugy-e? El sem hiszi, hogy gép! Pedig az! Tapogassa csak meg! . . .

— Bolond beszéd! — mondta ujra Agenor. — Él és él!

A mester erre odament Regiához és belefujt a fülébe. A következő pillanatban a leány nagy zuhanással a földre esett.

—Most emelje föl! — mondta a mester. Agenor ujra hozzányult a leányhoz, de remülten kapta el a kezét. A gépleány hideg és kemény volt, mint a vas és olyan nehéz, hogy a gróf meg se tudta mozditani.

— Most csak elhiszi? — nevetett a mester.

— A mesternek igaza van. Tényleg csak gép vagyok! . . .

— Vegye meg! — biztatta Agenort a mester. — Ilyesmit nem talál többé az életben. Csupa erény, csupa jó tulajdonság! Engedelmes, kedves, szelid, okos, hü . . .

— Hü? — kérdezte Agenor izgatottan.

—No hallja! — nevetett a mester. — Még hü se legyen? Igaz nő . . . Ha valaha valami hibát lel benne, visszaveszem . . . De nem fog benne találni! Mert ez a nő tökéletes! . . . Igazi nő!

Agenor nagy elhatározással állt a mester elé:

— Tudja mit? Adja ide nekem tiz napi próbaidőre tizezer forintért. Ha tiz nap alatt semmi hibát nem látok benne, megadom a többi hetvenezret is.

— Top! — mondta a mester. — Áll az alku! Nekem tiz nap mulva is jó a hetvenezer forintja . . .

És Agenor elvitte magával a gépleányt.

Tiz nap mulva visszahozta.

— Nos? — kérdezte a mester izgatottan.

— Visszahozom . . . Nagyon édes, nagyon bájos, nagyon elragadó! . . . de nem igazi nő!

— Nem igazi nő? Hogy mondhat ilyent? Mi baja van?

— Tiz napja van nálam . . . és még egyetlenegyszer sem kért tőlem pénzt . . . És erre meri maga azt mondani, hogy igazi nő?

A mester megsemmisülten roskadt össze, Agenor gróf pedig könnyü lépésekkel távozott a kaszinó felé.

MAGYAR FÜGGELÉK AZ IWW ALAPSZABÁLYHOZ

AZ INDUSTRIAL Workers of the World az ipari unionizmust képviselő s tanitó munkásszervezet, amely a munkásokat ipari foglalkozásuk szerint szervezi aból a célból, hogy a termelési eszközöket kisajátitsa, a bérrendszert megszüntesse, miáltal egyenlő jogokat teremt a társadalom minden egyes tagja részére.

Ezt a célt csak ugy érheti el a munkásosztály, ha EGY szervezetben tömörül. Az IWW minden nyelvü és minden szinü bérmunkást az Egy Nagy Szervezetbe tömöriti. Ezért szükségtelennek tartja a külön nyelvi vagy faji csoportokat, mert ahogy az iparban együtt dolgozik minden nemzetiségü, vagy szinü munkás, ugy a munkán történő kizsákmányolás ellen is együtt kell a harcot fölvenni és megküzdeni.

Ehhez a tanitáshoz egyik legalkalmasabb eszköz a sajtó. És mivel minden bérmunkás az anyanyelvén jobban megérti az IWW tanitását, az IWW különböző nyelvü lapjaiban hirdeti az Egy Nagy Szervezet szükségességét.

Az IWW magyar sajtója, bár szorosan az Egyetemes Központ ellenőrzése alatt áll, annak terjesztése és fenntartása a magyar bérmunkások kötelessége.

Ebből a célból agitációs bizottságokat létesitenek, ahol a magyar lap fejlesztését szolgáló ügyeket beszélik meg.

Az agitáció sikeresebb kifejtése céljából legalább egyszer évente értekezleteket tartanak és ha szükségét látják, országos értekezletre jönnek össze. Ugy a kerületek, valamint az országos értekezletek határozatait a magyarajku agitációt végző IWW tagok hagyják jóvá vagy vetik el.

A magyar lap ügyeinek intézésére az agitációs csoportok egy szerkesztőt, egy titkár-pénztárnokot s egy hét tagból álló bizottságot választanak egy évi időtartamára, mely bizottságnak föladata őrködni, hogy a lap IWW szellemben iródjék, hogy a lap körüli munkák elintézést nyerjenek, hogy a lap s igy az ipari unionizmus eszméjének terjesztése a magyar munkások között a legszélesebb körben történjék. E célból odatörekszik, hogy a magyar lap állandó tanitómunkája mellett szervezők is fölkeressék a magyarlakta területeket.

A magyar lap bevételeiről és kiadásairól, valamint a nevelést elősegitő céljairól havonta jelentést készit a lapbizottság és azt az agitációs bizottságok titkárainak, a delegátusoknak s a Bérmunkás lapkezelőinek megküldi.

BÉRMUNKÁS

a forradalmi ipari unionizmusnak szószólója, a magyar munkások bátor tanitója, az Egy Nagy Szervezet megtestesitő I.W.W.-nak hivatalos magyar lapja. Mindenkor sikra száll az elnyomottakért és kizárólag csak munkásérdekeket képvisel.

Ha munkás vagy, érted is harcol a BÉRMUNKÁS. Harcolj te is érte. Fizesd elő, légy olvasója és csatlakozz azokhoz a sokezrekhez, akik harmadik évtizede a BÉRMUNKÁSBAN találták meg tanitójukat, bátoritó és lelkesitő harcos társukat.

KIADJA A "BÉRMUNKÁS"
AZ I.W.W. MAGYARNYELVŰ
HETILAPJA.

OLVASÓINKHOZ

A BÉRMUNKÁS 1945-ös Naptárának összeállitásánál tekintettel voltunk arra, hogy ebben az évben szervezetünk, — az Industrial Workers of the World — elérte megalakulásának negyven éves évfordulóját. Ezzel az eseménynyel nemcsak vezető cikkünkben foglalkozunk, hanem szervezetünk ismertetésére teljes terjedelemben leközötük a Naptárban az Egyetemes Végrehajtó Bizottság által kiadott "One Big Union" füzetet, amely tudományos, de azért mindenki által könnyen érthető népszerü nyelven ismerteti szervezkedési formánkat és szervezetünk végcélját.

Történelmi Naptárunkban részletesen közöljük a háborus évek fontosabb eseményeit. Általában igyekeztünk arra, hogy ezen dátumok összeállitásával az olvasónak olyan megbizható táblázatot adjunk, amelyben könnyü szerrel keresheti fel a szóbakerült fontosabb események dátumait.

A Naptár anyagának összeállitásánál ügyeltünk arra, hogy az olvasók értékes EREDETI anyagot kapjanak ugy a társadalmi tudományok, mint a történelem a zeneismeret, az ipari tudomány, valamint a szónoklattan köréből meritett cikkekkel. A szépirodalmi részt jelen Naptárunkban is két O. Henry tárca müforditásával szolgáljuk. Kiegészitik ezt az anyagot a tudomány fejlődésének köréből, az orvostudományból és az asztronómia köréből vett cikkek, továbbá pár valóban kitünő vers és a magyar nyelven eddig még nem ismert adomák gyüjteménye.

A pár vers és a Fényes Lászlóról irt irt emlékezést leszámitva a Naptár öszszes cikkeit a szerzők jelen Naptárunk részére irták, forditották vagy dolgozták át. Egészen természetes, hogy az ennyi eredeti anyaggal telitett ily értékes munka kiadása jóval többe kerül, mint amit az eladási ár behoz. Naptárunk kiadását azonban lehetővé tette az, hogy a Bérmunkás olvasóinak igen nagy tábora hozzájárult a Naptár kiadási költségeihez.

E helyen tehát köszönetet mondunk nemcsak az irógárda tagjainak kitünő munkájukért, hanem mindazon intézményeknek is, amelyek a képeket vagy más anyagot készséggel rendelkezésünkre bocsájtottak és végre az olvasók százainak, akik anyagi támogatásukkal lehetővé tették a Bérmunkás 1945-ös Naptárának a megjelentetését.

A Bérmunkás Lapbizottsága.

A háborus évek fontosabb eseményei

1936 — Január 1. Az Egyesült Államokban érvénybe lépett a munkanélküli biztositás, ami sok millió munkásnak hozott anyagi segélyt.

— Február 16. Spanyolországban a képviselő választásokat nagy többséggel a szocialisták, szindikalisták és anarchisták egységfrontja nyerte meg. A választásnak azonban a főpapok, főurak, professzionális katonatisztek, stb. nem vetették magukat alá és az afrikai mórokat fellázitva forradalmat inditottak Francisco Franco generális vezetése alatt. Francot, Mussolini és Hitler támogatták, valamint a világ összes reakciós elemei, különösen a katholikus egyház a pápával előtérben. Viszont a kormány — loyalisták — oldalán felsorakoztak a liberálisok és radikálisok világszerte.

1937 — Január 23. A második moszkvai "áruló" tárgyalás, amelyen 13 vádlottat itéltek halálra, köztük több ismert bolshevik forradalmárt. Karl Radek 10 évet kapott.

— Japánnak Kina elleni háboruja, amelyet a japánok csak "incidens" névvel jelölnek, kezdetét veszi.

— Január 30. Hitler bejelenti, hogy Németország többé nem tekinti kötelezőnek a Versaillesi békét.

— Május 21. Szovjet repülők leszálltak a North Pole-on és időjelző állomást létesitettek .

— December 11. Olaszország kilép a Nemzetek Ligájából.

1938 — Máricus 2. Ausztria Németországhoz csatlakozik és megvalósitják a nácik által követelt "Anshluss"-t.

— Március 13. A harmadik moszkvai tárgyalásnál 21 vádlottat itéltek el, köztük 18-at halálra .Ezek között a legismertebbek voltak

— Buckharin, Yagoda, Rykoff, Grinko és Rosengoltz. Rakovszky 20 évet Pletnev nagyhirü sebész pedig 25 évet kaptak.

— Szeptember 30. Konferencia Münich városban ahol Chamberlain angol miniszterelnök, Deladier francia miniszniszterelnök behódoltak Hitler és Mussolininek. A második világháboru valóban ezzel a konferenciával vette kezdetét.

— Október 1. Német csapatok bevonulnak Csehszlovákiába.

1939 — Január. 26. Spa-

A háborus évek fontosabb eseményei

nyolországban a loyalista kormány feladta a harcot. Több százezer spanyol loyalista Franciaországba és Portugáliába menekült, akik később óriási szenvedéseken mentek át és jó részük elpusztult.

— Március 14. A csehszlovák köztársaságot Hitler felosztja.

— Április 7. Mussolini olasz csapatai behatolnak Albániába és elfoglalják az országot.

— Május 7. Németország és Olaszország katonai szövetségre lépnek.

— Augusztus 21. A Szovjet kormány "meg nem támadási paktumot" köt Németországgal.

— Augusztus 28. A németek elfoglalják Slovákiát.

— Szeptember 1. Német seregek átlépik a lengyel határt.

— Szeptember 3. Anglia és Franciaország hadat üzennek Németországnak.

— November 30. Orosz csapatok megkezdték a finnek elleni háborut.

A háborus évek fontosabb eseményei

— augusztus 17. Amerika és Anglia hajlandók beengedni azon zsidókat, akiket Magyarországból kiengednek.

— augusztus 17. Finnország hadat üzen Németországnak.

— augusztus 18. Az oroszok fogságba vetik Ion Antonescu, volt román diktátort és 9 társát.

— augusztus 18. Calais kikötő az egyesültek kezébe kerül.

— augusztus 19. Az oroszok elfoglalják Temesvárt.

— augusztus 21. Amerika és Anglia elismerik a De Gaulle kormányt.

— augusztus 22. Tallinin, Esztonia fővárosa orosz kézre kerül.

— augusztus 22. Jassy várost elfoglalják az oroszok.

— augusztus 23. Románia megadja magát.

— augusztus 24. Kishenev orosz kézre kerül.

— augusztus 25. Egyesültek bevonulnak Párisba.

— augusztus 25. Románia hadat üzen a németeknek.

— augusztus 28. Az oroszok betörnek Erdélybe.

— augusztus 30. Az oroszok elfoglalják Ploestit és ezzel a román olajmezők kezükbe kerülnek.

— augusztus 31. Az oroszok bevonulnak Bukarestbe.

— szeptember 2. Az oroszok megkezdik a Magyarország elleni offenzivát.

— szeptember 4. Megkezdik Görögország felszabaditását.

— szeptember 5. Az oroszok megtámadják Bulgáriát.

— szeptember 6. Magyarország és Románia hadat üzennek egymásnak.

— szeptember 9. Bulgária teljesiti az oroszok követelését, hadat üzen Németországnak.

— szeptember 11. Roosevelt és Churchill megkezdik a tanácskozást Quebeck, canadai városban.

— szeptember 12. Havre kikötő az egyesültek kezébe kerül.

— szeptember 16. Az oroszok bevonulnak Sofiába.

— szeptember 27. Albániában partra szállnak az egyesült csapatok.

— szeptember 30. Az oroszok elfoglalják Makó várost, bevonulnak Jugoszláviába.

— október 5. Warsoban a lengyel guerilla csapat Bor generálissal

A háborus évek fontosabb eseményei

együtt megadja magát a németeknek.

— október 7. Az oroszok elfoglalják Gyula és Gyom városokat Magyarországon.

— október 10. Churchill és Stalin tanácskoznak Moszkvában.

— október 10. Kolozsvár és Szeged az oroszok kezébe kerül.

— október 10. Spanyol guerillák megkezdik támadásaikat Franco ellen.

— október 13. Athen város felszabadul a német megszállás alól.

— október 13. Riga az oroszok kezére kerül.

— október 13. Nagy tengeri csata a Formoza szigeteknél, ahol a japánok több mint 100 hajót veszitettek.

— október 15. Horthy Miklós állitólagos beszéde, amelyben fegyverszünetet kért az egyesültektől.

— október 15. Achen, az első jelentékeny német város az egyesültek kezébe kerül.

— október 18. Mac Arthur megkezdi a Philliphine szigetek invázióját.

— október 18. Az oroszok elfoglalják Debrecent.

— október 19. Belgrád felszabadul a németek uralma alól.

— október 20. Cleveland városban óriási gázrobbanás elpusztit egész városrészt, igen nagy emberélet veszteséggel.

— október 30. Gen. Joseph W. Stilwellt visszahivják Kinából, ami a kinai kormány ujjászervezéséhez vezetett.

— október 30. Az oroszok elfoglalják Kecskemétet.

— november 5. Stalin jelentése szerint az összes orosz területeket megtisztitották a németektől.

— november 7. Soha eddig nem tapasztalt izgalmas választási kampány után az Egyesült Államok népe ujból Roosevelt elnököt választja meg most már negyedszeri időtartamra

— november 15. Az oroszok Miskolc, Eger és Hatvan vonal elfoglalását jelentik.

— december 1. A magyar népet a náci uralom alól felszabadító orosz hadsereg egyre közelebb ér céljához.

— december 12. Az önmagát kinevezett magyar kormány elmenekült. Budapest lángokban áll. Az orosz hadsereg Budapest uccáin van. A város elfoglalása a jelentések szerint rövid idő kérdése.

A NEGYVEN ÉVES I.W.W.

Irta: WAGNER JÓZSEF

PÁR hónappal ezen sorok irása után, — 1945 junius vagy julius havában, az Industrial Workers of the World szervezet születésének negyvenedik évfordulóját fogja ünnepelni. Negyven év csak egy rövid pillanat a történelemben és nem tul hosszu idő a munkásmozgalomban sem, azonban nagyon is tiszteletre méltó időköz egy proletár életében.

Amikor erre a közelgő évfordulóra gondolok, eszembe jutnak az I. W.W. születését megelőző idők, mert ez a születés nem véletlen müve volt, éveken át tartó fárasztó készülődés hozta létre ezt az eseményt. Jól emlékszem azon lázas aktivitásra, amit a még meg nem született forradalmi ipari unionizmus érdekében kifejtettünk, amelynek eljöttében rendületlenül biztunk. Eszembe jutnak most azon érvek, amelyeket az uj szervezet érdekében felszinre vetettünk és terjesztettünk szóban, levelekben és nyomtatásban az Atlanti oceántól a Csendes tengerig és Kanada északi fagyos mezőitől le Mexiko forró határáig. Sőt azokon is tul, mert harcias szellemü, agressziv müködésre képzett szociálista munkások voltunk, akik nagyban reméltük, hogy az életre hivandó uj szervezet a munkásság számára jobb világot fog teremteni nemcsak Amerikában, hanem az egész világon.

Ennek az országnak a munkásai abban az időben már nagyon megelégelték a régi módu, osztályok közötti összmüködést hirdető szakszervezkedést, amelyekben sztrájkot sztrájk után veszitettek. A Gompers féle vezéreik becsapták, vagy egyenest alárulták őket. Az American Federation of Labor szervezetnek akkor körülbelül egy milliónyi tagja volt, amelynek többségét nagyon bátortalanná tette és demoralizálta az A.F. of L. által nyujtott szervezkedés. Valami uj és jobb utáni vágy érzete szinte a levegőben volt és annak megérkeztét minden pillanatra várták.

Mi, az uj eszme hivei, szorgoskodtunk a munkások között a forradalmi ipari unionizmus eszméjének propagandájával. Hirdettük mindenhol, — a szakszervezetekben és a

Szocialista Párt gyülésein. A Szocialista Párt abban az időben még nem volt oly kimondottan a középosztály szervezete, mint később. És nehogy az olvasók némelyike mosolyogjon a Szocialista Párt emlitésén, meg kell jegyeznem, hogy abban az időben ez a párt minden hibái dacára is igen nagy aktivitást fejtett ki. Igy például csak Chicagoban több mint 40 müködő osztálya volt; a St. Louis lokal 26 osztállyal rendelkezett. És igy volt ez a többi városokban is az egész országban.

A szindikalista mozgalmak

Ugyanezen időben a külföldi viszonyok is ugy alakultak, hogy kedvezővé tették a talajt a forradalmi ipari unionizmus megteremtésére. Oroszországban a cári deszpoaizmus elleni véres politikai harcok elégtelennek bizonyultak. Az orosz munkások ráeszméltek arra, hogy ipari erejük nagy hatalmat ád nekik és az orosz birodalom hamarosan hatalmas sztrájkok szinhelye lett.

Franciaország is az Egyesült Államokhoz hasonló folyamaton ment keresztül. Hosszu időn át a francia munkások mozgalmait is féltucat különböző szocálista vagy munkáspárt őrölte fel. A politikai pártok vezérei uralták a munkások gazdasági szervezeteit és igyekeztek azokat a saját pártérdekeiknek megfelelőleg kihasználni. Végre a francia munkások is rájöttek erre a tényre és megalakitották a világhirüvé vált francia szindikalista mozgalmat, — a Confederation Generale du Travail-uniont, amely kizárt minden politikai szervezetet. Megalakulása után, — közvetlenül az I.W.W. megszületése előtt, — hamarosan lángbetükkel irta nevét a munkásmozgalom történetébe.

Ugyanebben a korban Spanyolországban, Portugáliában és Olaszországban is erős szindikalista mozgalmak keletkeztek. Igy midőn lelkesülten dolgoztunk az uj szervezet érdekében, jogosult volt a nagy reményünk, noha tulságosan optimisták voltunk az azonnali eredményekre vonatkozólag. Azonban mindezek dacára még ma is büszke vagyok arra, hogy résztvettem abban az előkészitő munkában, amely nem csak nagy befolyással volt, hanem valóban meggyorsitotta az egész munkásosztály előretörését.

A megszületendő Industrial Workers of the World érdekében aktivan dolgozó munkások 1905 január havában összejöttek Chicago városban. Gondosan megtárgyalták az ügyet, számbavették azon erőket, amelyekre számithatnak és azokat is, amelyek ellenezni fogják az uj mozgalmat s ezek alapján egy kiáltványt, (Manifesto) adtak ki. Ez a Manifesto felsorakoztatta azon okokat, amelyek most az amerikai munkásság számára szükségessé teszik az uj szervezetet és felhivta az amerikai munkásságot, hogy jöjjenek el a Chicagoba, 1905 junius 27-ére összehivott alakuló gyülésre.

Mint ismeretes, ezen a gyülésen hivatalosan is megalakult az Industrial Workers of the World szervezet és elindult arra az utjára, amelyen mély nyomokkal irta be nevét a munkásosztály történetébe. A negyven éves életében az I.W.W.-nak is voltak bajai, hol virágzott, vagy lejebb esett, de soha egy percre sem adta fel a munkásosztálynak kompromisszumot nem ismerő forradalmi zászlaját.

A politikai párt szerepe

Sokan közülünk, akik már hónapok óta dolgoztunk a szervezet megalakitásán, nem tudtunk elmenni az alakuló gyülésre. Többek között nem lehetett ott Vincent St. John sem, aki Idaho állam fémbánya vidékén fontos szervező munkát végzett. Többen azok közül ,akik később nagyon fontos szerepet vittek az I.W.W.-ban, sőt vérüket és életüket áldozták a szervezetért, nem voltak jelen. Biztunk abban, hogy a jelenlevők mindent a legjobban fognak elintézni. Később rájöttünk, hogy ez nagy hiba volt. Jobb lett volna minden fontos munka otthagyásával résztvenni az alakuló gyülésen, amelyre eljöttek olyanok, akiknek nem kellett volna ott helyet adni. És eljöttek olyan kalandorok, akiket nem is láttunk azelőtt a mozgalomban. Ezen felelőtlen elemek aztán a tárgyhoz nem tartozó beszédeket tartottak, vagy hasonló inditványokat tettek a delegátusok megzavarására.

És természetesen ott volt a De Leon banda is, maga az öreg "Dan" (Daniel) vezetése alatt, akiknek kihagyása szintén nagyon hasznos lett volna. Ezeknek a konferencián való jelenléte, valamint a szervezetben való müködésük az első évben mindjárt ellentétekre és az első szakadáshoz vezettek. Az a politikai kontraverzia, amit De Leonék magukkal hoztak, három éven keresztül forrongásban tartotta az I.W.W.-t, mig végre is 1908-ban sikerült kidobni őket az I.W.W.-ból. A De Leon elemeknek az I.W.W.-ban való szereplése annyira elidegenitette tőlünk az amerikai munkásságot, hogy csak évek multán lehetett visszaszerezni azoknak a szimpátiáját, akik az alakuló konvenció előtt a legnagyobb érdeklődést mutatták az uj forradalmi szervezet iránt.

Vannak ,akik azt állitják, hogy az SLP volt egyike azon csoportnak, amelyek az I.W.W.-t életre hivták. Ez az állitás nem felel meg a valóságnak. Az SLP már évekkel az I.W.W. megalakulása előtt mindenkit támadott, akinek bármi köze is volt az ipari szervezkedés eszméjéhez. Ezeket elnevezték árulóknak, munkásfékereknek, stb. Még az Industrial Manifestot is, amely csak pár hónappal előbb jelent meg az 1905-iki alakuló gyülésnél — élesen támadta az SLP lapja, a Daily People és Haywoodot, Hagertyt, St. Johnt s általában a Manifesztó aláiróit a munkásosztály árulóinak bélyegezte. A Daily People ujságban napokon át rovat jelent meg ezzel a cimmel: "As to that Manifesto-', amelyben bünösen támadták az ipari szervezkedés eszméjét és azokat, akik azt hirdették. Ezen támadásokat a De Leon vezércikkei által felizgatott olvasók irták.

Természetesen De Leon és pártja az AFL-t is élesen támadta, amelyet "a kapitalista osztály munkáshadnagyai" irányitottak. Azonban a támadás lényege mindig az volt, hogy egyetlen munkásszervezet sem szolgálhatja hüségesen a munkásosztályt, ha nem csatlakozik a Socialist Labor Party-hoz, nem fizet annak fejadót, nem választja tisztviselőit ezen párt tagjai közül és végre ha nem engedelmeskedik a párt rendeleteinek akár sztrájkok, vagy más ügyekben is. Az SLP-nek volt ugyan egy ilyen szervezete, de csak papiron, a Trade and Labor Alliance. Mint a név is mutatja, szakmai és nem ipari szervezetet hirdettek. Az SLP nem hirdette az ipari unionizmust egészen 1905 április haváig, amikor De Leon egy egész oldalra terjedő és általa aláirt cikkben elrendelte követőinek, hogy hagyjanak fel az ipari unionizmus támadásával és vegyenek részt a chicagoi konvención azoknak a kidobására, akik ellenzik az unionnak a politikai párttal való közösségét.

A vándor munkások harcai

Az I.W.W. valójában a Nyugaton hajtotta mélyebbre gyökereit. A Nyugaton, ahol a trösztök kombinációi láttak hozzá a még gyér lakosságu nyugati államok gazdag érctelepeinek kiaknázásához. A bérrabszolgák jelentékeny része valóságosan nomád életet élt, vándoroltak egyik munkahelytől a másikra. Többnyire nőtlen emberek voltak, akik a szabadság vágytól hajtva hagyták el a sürübb lakosságu vidékeket s folyvást lázongva az elnyomás ellen, otthagyták az ércbányák elnyomó munkaalkalmait, átmentek az erdőirtó telepekre ,ahol azonban hasonló munkaviszonyokra találtak. Egyforma elnyomó, kizsákmányoló munkaviszonyokat találtak mindenhol, ami nem volt csoda, hiszen sokszor még a munkaadó is azonos volt.

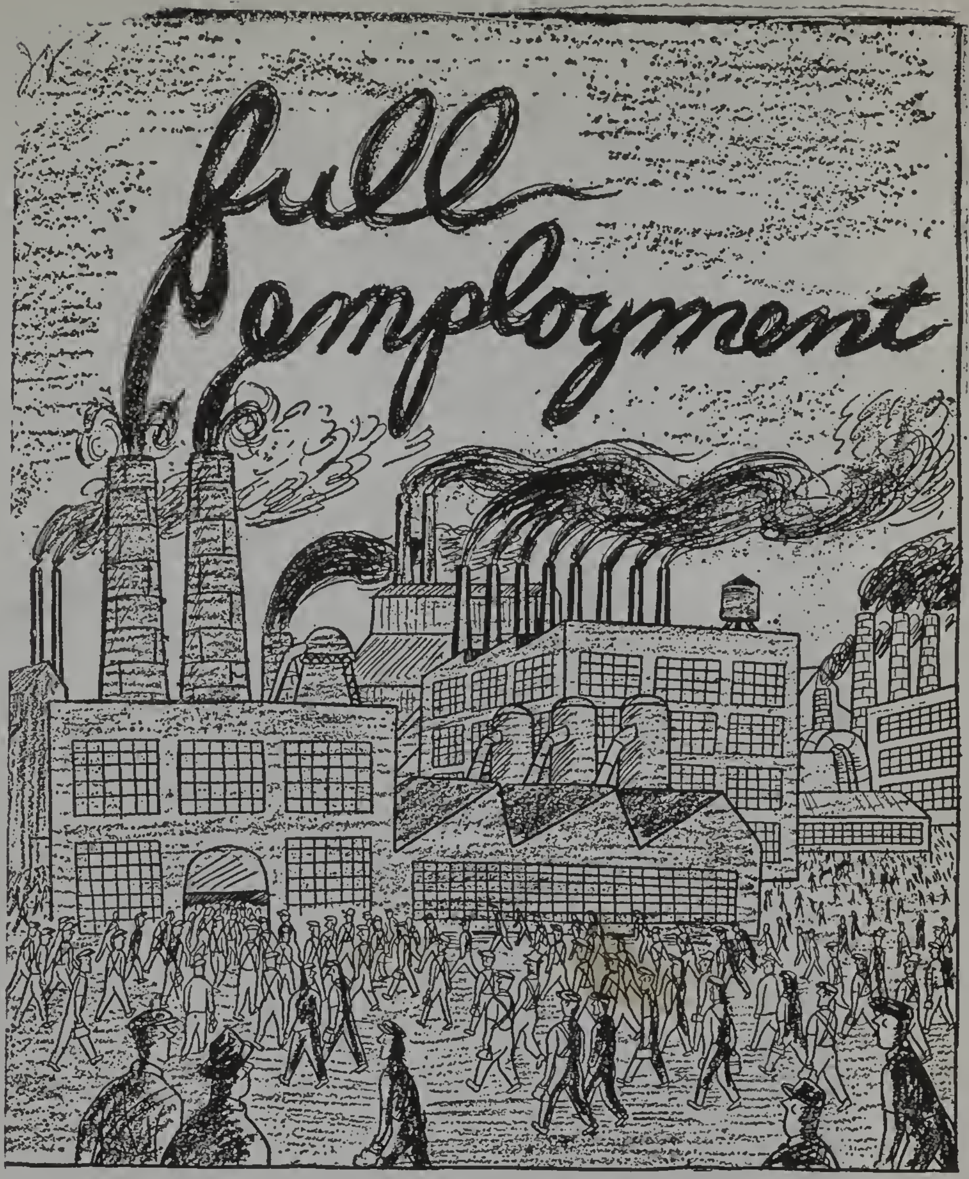
Szórványosan, itt-ott alakitottak helyi szervezeteket s valamit javitottak helyzetükön. A következő lépés természetesen az volt, hogy ezen helyi szervezetek között valamilyen összeköttetést teremtettek. Ez hozta életre a Western Federation of Miners nevü szervezetet, amelynek célja a munkásharcoknak az egész Nyugatra való kiterjesztése volt.

És harcoltak is, bámulatosan. A "vad" Nyugatot kifosztó korporációk akkoriban "thugs, plug-uglies, gunmen" név alatt ismert terroristákat alkalmazták a munkások megfélemlitésére. De a bányászok, — mint a nyugatiak általában, szintén kemény legények, elszánt emberek voltak, akiknél a fegyverhasználat általános és normális dolog volt. A sztrájkok gyakran lövöldözéshez vezettek, amelyekben emberélet esett áldozatul. Az akkori ujságok olyan rovatot vezettek a bányászok és a tulajdonosok szolgálatában álló terroristák közötti harcokról, mint akárcsak a mai lapok a jelenlegi háboruról.

Mint emlitettem a bányamunkások gyakran változtatták nemcsak a munkahelyüket, hanem a munkakörüket is. Egyszer mint bányászok dolgoztak, majd erdőt irtottak, máskor pedig valamelyik ut épitésén dolgoztak. Mindezen helyeken igyekeztek a Western Federation of Miners keretein belül helyi szervezeteket alakitani. Évi közgyüléseiken állandóan felmerült a kérdés, hogy csatlakozzanak az ország nagy munkásszervezetéhez, de az AFL által képviselt unionizmust nem tudták elfogadni, hiszen a saját tapasztalataikból tudták, hogy szakmák szerint ők nem szervezkedhetnek, hiszen egyik nap bányászok, másnap lumberjackek, harmadnap utépitő munkások voltak, a következő héten pedig már a farmeroknak segitettek az aratásnál, vagy pedig valamelyik vendéglőben mosták az edényeket. Igy elhatározták, hogy egy egészen független munkásszervezetet alakitanak, amelynek a Western Federation of Labor nevet adták.

Ezideig a vad és gyér lakosságu West, — két-három tengerparti város kivételével, elkerülte az American Federation of Labor figyelmét. Most azonban, hogy a Western Federation of Labor megkezdte a nyugati munkások szervezését, az AFL néhány International szervezete magának követelte bizonyos munkások fölött a juriszdikciót, szervezőket küldtek tehát az oly helyekre és sikerült nekik egyes esetekben, rendesen a munkáltató segélyével, rivális szervezeteket alakitani. Erre azonban a Western Federation of Labor azzal válaszolt, hogy a nevét American Labor Unionra változtatta és a Keletre küldött szervezőket olyan munkások megszervezésére, akiket az AFL általában eddig elhanyagolt, mert nem tartotta elég szakmunkásoknak őket. Ez a harc igy tartott pár éven át, mig végre az American Labor Union tagjai rájöttek, hogy a "szövetség" eszméje már idejét multa és ahelyett a munkásokat EGY NAGY SZERVEZETBEN kell csoportositani. Éveken át tartó nagy publicitást adtak ennek az eszmének, mig végre ugy találták, hogy annak megvalósitására elérkezett az idő. Ez hivta életre negyven évvel ezelőtt a chicagoi alakuló konvenciót.

Haywood, Moyer, St. John, Al-



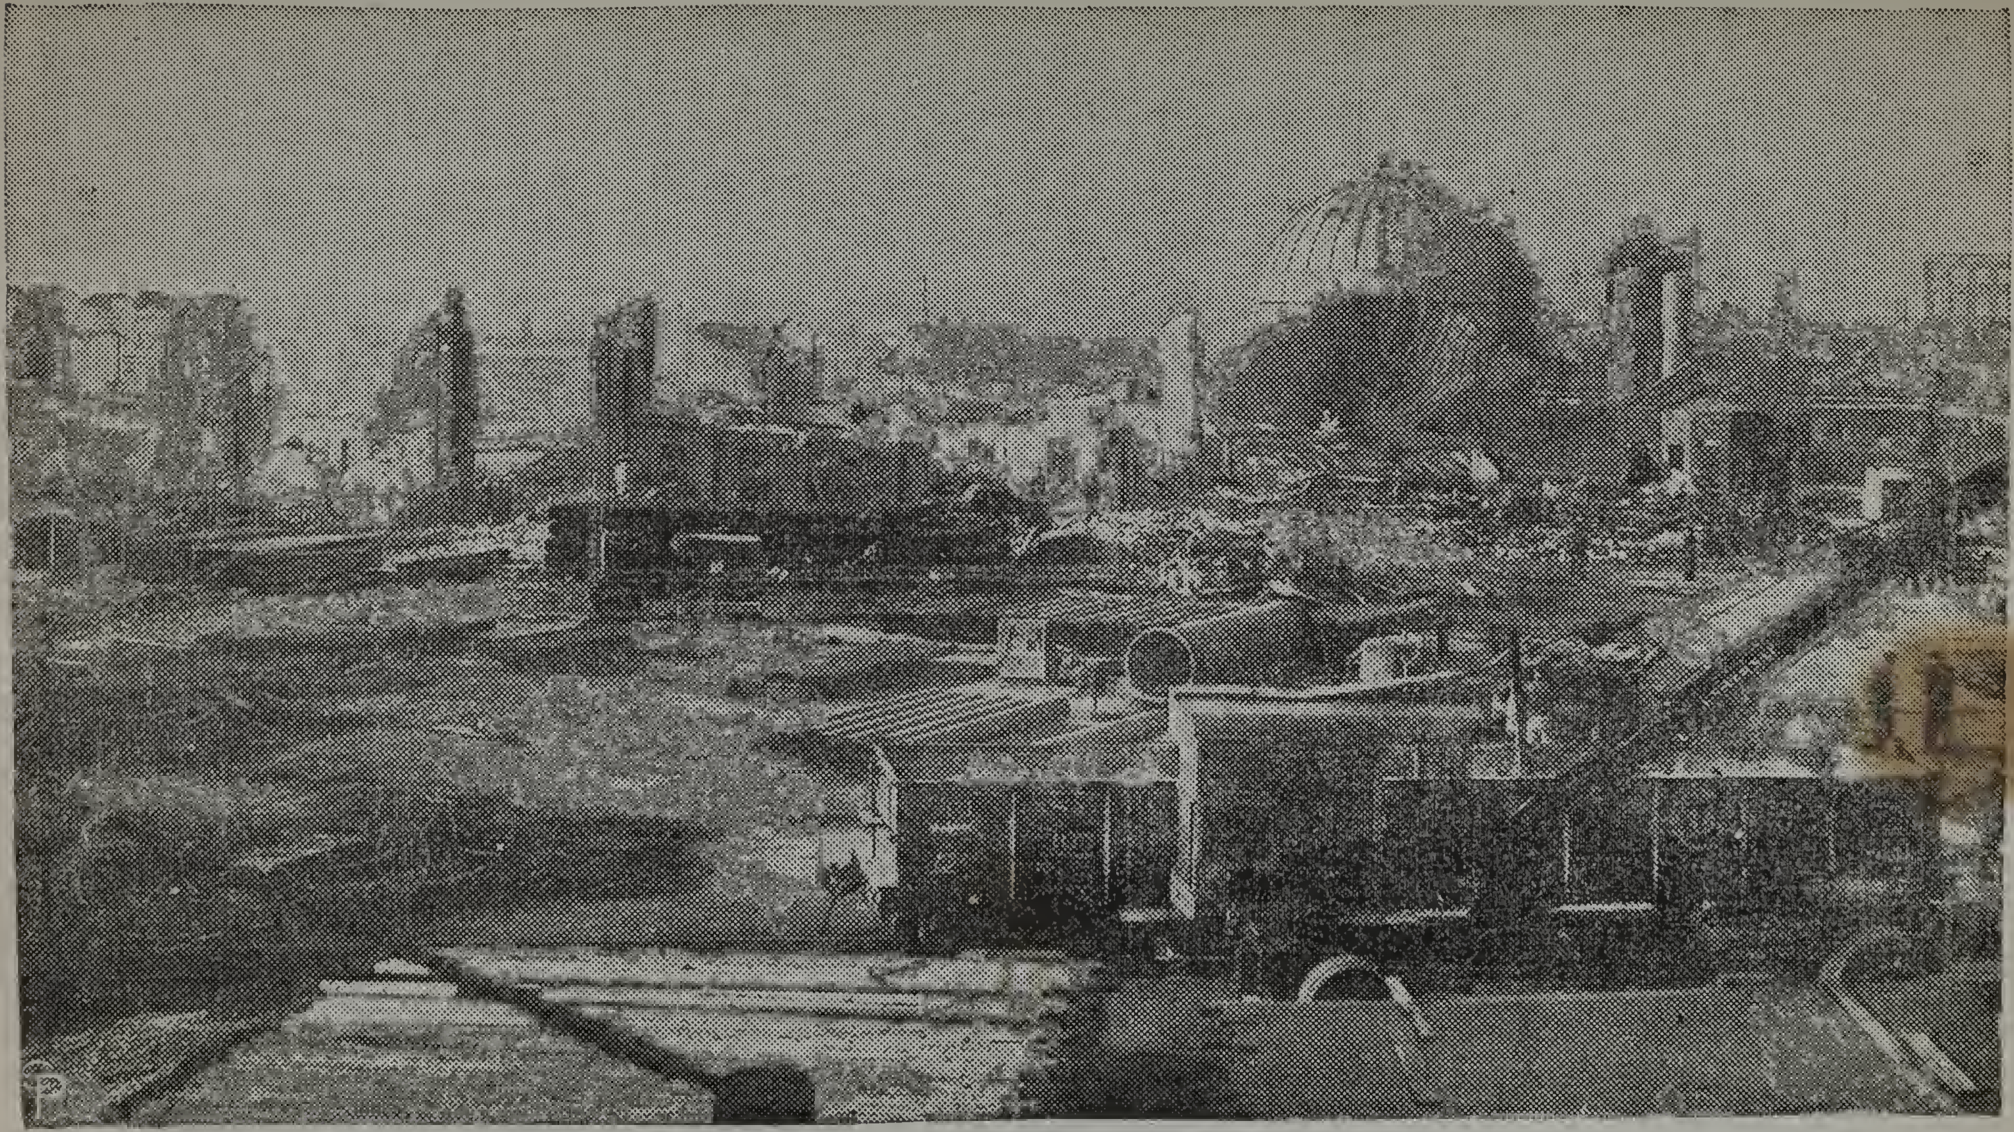
Az iparok zavartalan müködését, tehát az összes munkások foglalkoztatását csak az IPARI DEMOKRÁCIA biztositja.

bert Ryan és mások a Western Federation of Miners szervezetből. Hagerty, Hall és mások az Amerisan Labor Union részéről, akik vezérszerepet vittek az 'Industrial Union Manifesto' aláirói között és voltak egyben nevesebb delegátusai az első I.W.W. konvenciónak.

Munkástársaim azon tömegéből, akikkel negyven évvel ezelőtt együtt müködtem az Industrial Workers of the World megteremtésén és akik négy évtized alatt a szervezettel maradtak, tudomásom szerint ezen sorok iróján kivül már csak James P. Thompson marart meg. A régiek legtöbbje eltávozott oda, ahonnan már többé nincs viszszatérés; mások éveken át tartó odaadó munka után otthagyták a szervezetet, hogy más téren müködjenek; voltak aztán olyanok, akiknek látáskörük megváltozott és más eszmék szolgálatába kerültek. Én azonban valahogyan csak az elismerés hálájával gondolok mindazokra, akik hosszabb vagy révidebb időn át a mi csapatunkban szolgálták a munkásosztály felszabaditásáért folyó harcot.

Negyven éve, hogy az I.W.W. megszületett! Rövid időköz a történelem lapjain, de felöleli teljesen egy proletár életét. Az I.W.W. számos brilliáns oldalt ir a munkásmozgalom történetébe, még ma sincs oly szervezet, amely helyettesithetné. A magam részéről azt mondhatom, hogy ha az elmult évtizedeket ujra átélhetném, nem kivánnám másképpen élni, mint ahogyan átéltem azokat.

Az Industrial Workers of the World még nem hozta meg a világ munkásságának teljes gazdasági és társadalmi felszabaditását, de határozottan mondhatjuk, hogy amit haladtunk ebben az irányban, abban az I.W.W.-nak igen nagy érdemei vannak.



A clevelandi folyékony-gáz tartályok környéke az 1944 október 20-iki nagy robbanás után, amlynél egész városrész pusztult el.

Óda Egy Magyar Parasztasszonyhoz

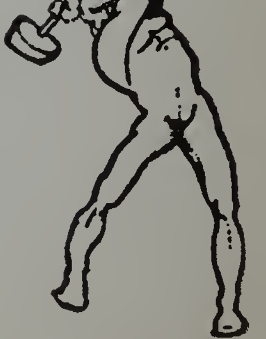
Irta: FALUDY GYÖRGY

Alkonytájt történt, Chalons-nál a Marne-on,
mikor hazulról elvitt a vonat,
hogy ujra néztem, félig álmodóra
csukott szememmel sárga arcodat.
Mellém szegődtél vándorul azóta,
s az éjszakákban gyakran láttalak,
Párisban, a Vincennes-i vár alatt,
germán bombák zaján a zöld Garonne
vizén és kinn az óceán-habon;
ott, hol kerestem s nem leltem hazát
az Alkazár előtt s Uarzazát
lapos tetői közt az atlaszon,
a Bermudáknál, beril utakon,
s itt is, ha földalattin utazom,
hol az ajtónál ácsorog, mig rut
homályba visz a fülledt alagut,
arcom hevét a vashoz nyomva hőn:
látlak, nyanya, mint akkor őszidőn,
mély ráncaiddal, mikbe a kemény
vénség ugy ült, mint barna televény,
látom kontyodat, macskátok agát
szemét és urad véres ludnyakát,
ahogy titeket akkor láttalak,
a kert előtt, a törpe fák alatt,
a vadszöllő pirjával vállatok
fölött, mikor megszálltam nálatok.
Igy nézlek most s a hosszu éjjelek
során elillott, régi éltedet
ugy pergetem, mint tünő képeket:
és látlak, lábtól alvó kisleányt,
reggel ,mikor legyek fulánkja bánt,
szedres szájja s pislogva szaporán,
avagy tovább, az országut porán,
az árokparti dönghalak között,
hol kis bokádra réce köpdösött,
s amerre kancán, tyukon, vereben
lovagló szörnyként jött a szerelem.
Aztán dolgozni látlak a halál
ölén s mig csuklód izzad és kapál,
gyomlál, arat, kévét köt vagy kaszál
a dombtetőn már ugy ül a Aszály,
mint győztes koldus, leskelő halál,
vagy árviz jön vagy fagy vagy jégverés
és ibolyanyiláskor éhezés,
mert szétvervén munkád csekély javát,
pusztitva, ölve ugy rohan reád
a természet, mint megvadult bika,
melyet legyőzni nem akadt iga:
irgalmas állam, könyv, csatorna, sem
testvéri kéz, sem égi kegyelem.
A kép fordul tovább: előttem áll
nászod s az asztal deszkáján a tál,
hová ugy nyulnak az éhes kezek,
mint folyópartra vörös gyökerek: —
vigadtak durva tréfáik szavával,
majd megnémultak s ez kedvükre rávall
s ülnek — harangszó szól az esten által
ritkán telt gyomruk néma bánatával
mig eltüntél uraddal a setét
s izzadt szobán, amelyben mécs sem ég,
s hol vágyatok betelt az ágyderék
festett fagömbje fényén, mely a holt
szobán az árva nászi fáklya volt.
S megint látlak dolgozni untalan
a gróf földjén s a dülő uttalan
sarán s azon töprengeni fénytelen
estéken, hogy a lét reménytelen,
mert nem lesz jószó, kedv, csak könnyre könny,
csak munka, bánat, nyomor és közöny,
a kocsmában kinyilnak a kések,
egymásra nyilnak s az aratás
azé maradt, aki mulat s agarász,
és mindörökre igy lesz már az élet,
s e földön, jobbágyföldön, hova nem
hullott, csak véred ezer éven át,
elpusztulsz te s elpusztul unokád
s nem lesz a tiéd soha, sohasem.
Aztán látlak a hosszu tél után
sétálgatni vasárnap délután
a sirkertnél, hol a tavaszi ár
széthordta a sok roskatag keresztet,
s az öreg csősz mig kurta keze reszket,
a sordombok közt meggörnyedve jár,
s a fejfákat unottan visszahordja,

nem nézve, hogy melyik volt ki felett,
mert holt szolgának ugyis egyremegy;
s látom fiad a kis Janit, fakó
szemével őt kit megrugott a ló,
s téged, mikor a temetés után
megálsz a kék tükörnél a szobán,
majd fel-lejárva a halott gyerek
emlékét keresed, de nem leled,
mert egy ingét elföldelték vele,
s nem volt cipője, sem játékszere,
sem könyve ,sem nyakában ékszere,
és igy bolyongsz, zokogva, nyugtalan,
mig feltünik az alkony szinarany
fényén a tükör sarkán egy kis folt,
lekváros nyom, hol egykoron a holt
játékos öt kis ujja ottragadt,
szétkent, sárgás és száradó maszat,
mit könnyen mosna le egy rongydarab,
de te állsz, nézed, mert ez a vigasz,
a hagyaték, az emlék: — ennyi az,
ami fiadból földi nyom maradt.
S látlak tovább, amint a vén időt
vevén öledbe, elfelejted őt,
árnyat sem üzve már, mely elrohan,
és látlak néha-néha boldogan,
ha ének száll az estveli falun,
s te udvarodban ,mozdulatlanul
s hallgatva állsz a végső, sárga csik
napfényben s néma-feketén, amig
a dalba — fájó, őszi üzenet —
a hulló alma kopog ütemet.

Nem ennyi az, amit rólad tudok,
de százszor többet tudunk rólatok,
s amikor a régi, elmerült napok
mélyén megláttam és hallottam ezt:
arcom veres lett s ugy tévelyegtem
Pétervására avagy Budapest
uccáin, lázas, szikkadó torokkal
jártam szobámban fel-alá, porokkal
aludtam s irtam lázadó sorokkal,
hogy e gyalázat ezer éve tart.
Ezért esküdtünk fel, hogy a világ
nem élhet igy, ha türjük ezt tovább,
ezért küzdöttünk, sápadt csillag alján,
szakadt ruhában és az isten balján
ezért bujdostunk szárazon s habon,
s most köztünk viz van, melyben mély a gázló,
magunk állunk: s mégse félts nagyon,
mert velünk van az Igazság s a Zászló,
Tavaszi szelek kelnek lassu-lassan
s habár soká fog folyni még a vér:
ha majd a füst eltünik a magasban
s talán a sors csak addig el nem ér —
ha oszlik majd a tél fekete gyásza,
s hozza a zsarnokgyilkoló tavaszt,
s a sovány magyar gebe is lerázza
az ezeréves, felpüffedt lovast:
a háboru zaján még, ha lehet
s feléd tárván a testvéri kezet,
nyugodt lélekkel és nem kérve bérünk
alázatosan egy nap hazaérünk,
s vállunk felett az örök magyar éggel,
felosztott földön, hogy igaz igékkel
járjunk, oktatva szünös-szüntelen,
s frigyet kötvén mindennel, ki büntelen,
s dolgozván bármi terhet ró is ránk
a föld, mely csak lesz és nem volt hazánk, —
hogy majd, ha ránk az örök béke int
ugy nőjjenek fel siremlékeink
az uj ország fölé, mint égmagas fák,
nem hogy nevünk tünő hirét marasszak,
de hogy bimbóid száz rügyét fakasszák
tizszer megölt, százszor feltámadó,
nem fáradó, folyóként áradó,
utolsó nyertes, végső számadó,
legyőzhetetlen, százszor szent Szabadság!

(New York, 1942 március hó)



THOMAS PAINE
A DEMOKRÁCIA APOSTOLA

Irta: VISI ISTVÁN

"A világ az én hazám:
Jót csinálni az én vallásom."
Paine.

MAJDNEM hihetetlen, hogy az amerikai függetlenség az az igazi demokrácia legnagyobb mesterét, teljesen agyonhallgatják ugy az iskolákban, valamint az irodalomban és politikai szónoklatoknál is. Mi nagyon jól tudjuk, hogy a tanitást, az iskolákat, a sajtót irányitó elemek gazdasági érdekeik megvédése szempontjából, nem látják tanácsosnak Thomas Paine gondolatait, tanitását hirdetni, nehogy valami ráragadjon a népre és esetleg követelje azoknak a megvalósitását, mászóval visszatérni a forradalmi eszmékhez, ahol az emberi jogokat a tulajdon jogok fölé helyezték; amely tanitás szerint minden ember egyforma jogokkal született és kellene, hogy egyformán élvezze azokat.

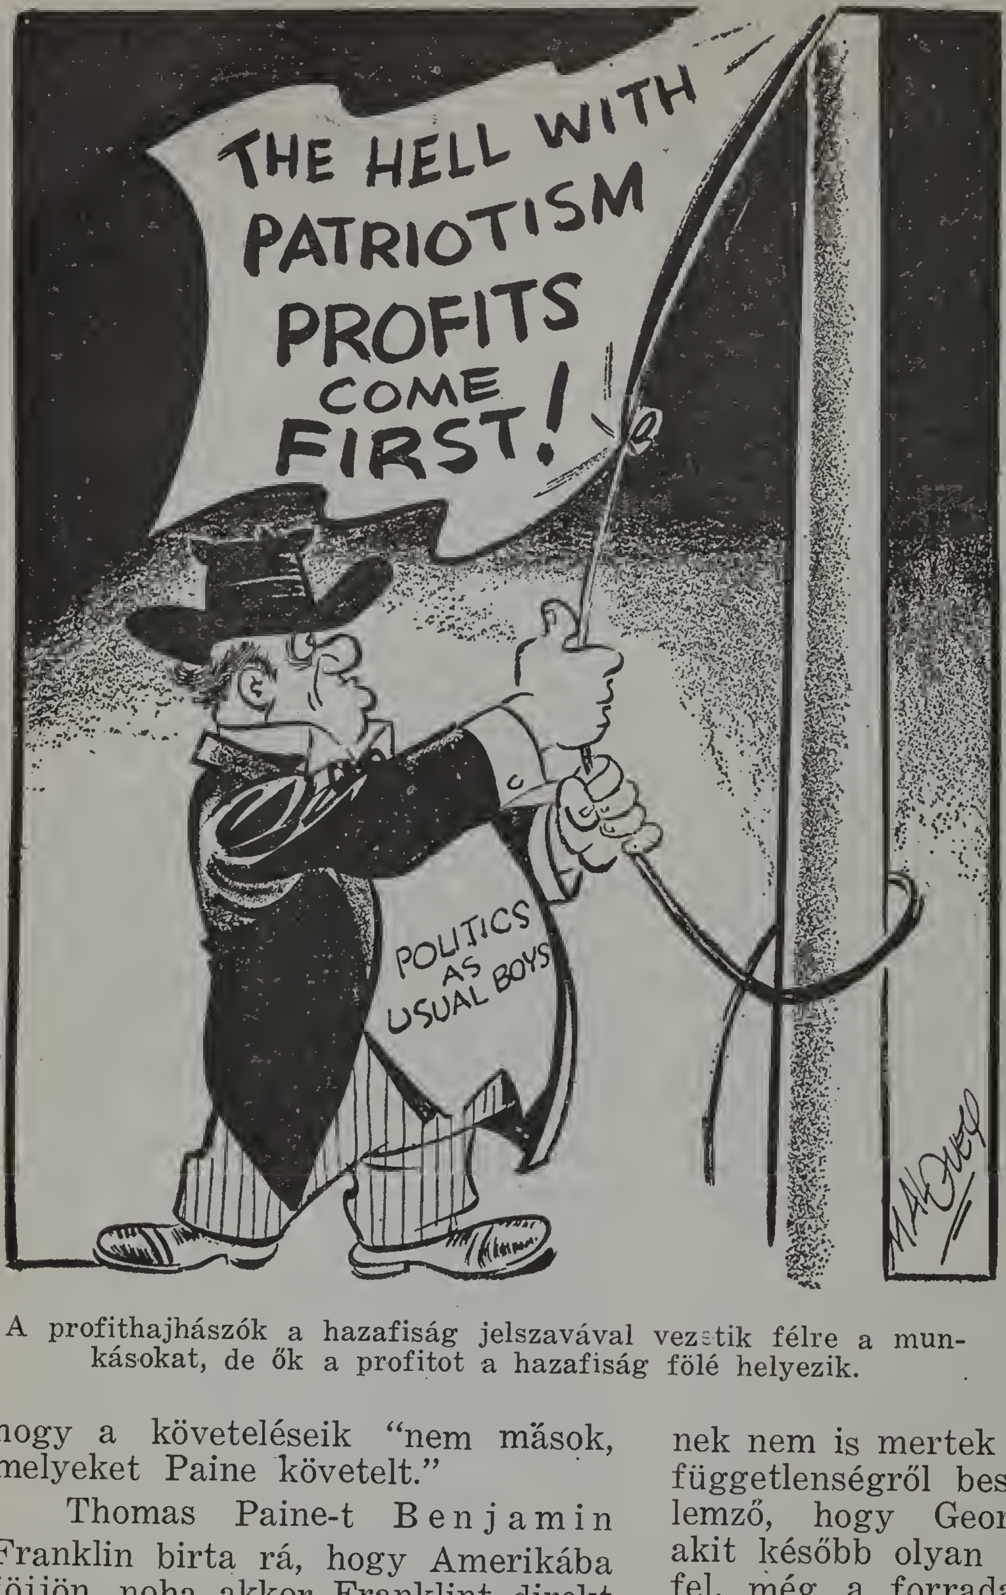
Igy nagy hiányt pótolunk, amikor Thomas Paine munkáiról irunk, és tanácsoljuk, hogy mindenki aki csa kaz angol nyelvet megérti, igyekezzen legalább a könyvtárakból megszerezni és olvasni a munkáit. Hogy miért nem magasztalják és hirdetik Paine munkáit, leginkább a forradalmi eszmék és a modern fejlődés utjának a kinyitása még a vallási téren is, ami ma ha nem is a tiltott könyvek, de az agyonhallgatottak közé sorozzák Thomas Paine iratait.

De még a legreakciósabb John Adams korabeli politikus is azt mondotta: "A történelem Paine részére fogja a forradalmat elkönyvelni". Valamint az amerikai függetlenségért harcoló Marquis de Laffayette mondta, hogy "Szerintem Amerika Thomas Paine nélkül elképzelhetetlen."

Thomas Edison, Amerika egyik nagy feltalálója mondta: "Szerintem Paine volt a mi legnagyobb gondolkozónk politikai téren."

George Washington, aki eleinte királypárti volt Thomas Paine "Common Sense" cimü füzetére mondta: "Logikája és érvelései meggyőzőek." De mindezen elismerések ellenére és az amerikai politikai és függetlenség kialakulására olyan nagy fontosságu, talán a legnagyobb müről és emberről munkahelyemen száz közül egyetlen egyet sem találtam, még a középiskolát végzettek között sem, aki tudta volna, vagy ismerte volna Paine irásait és a forradalomra gyakorolt hatását. Egy néhány akadt, aki csak mint istentagadót ismerte Painet és müveit a máglyára itélte, anélkül, hogy valaha is olvasta volna.

Paine nem csak mondta és érezte, hogy az egész világ az ő hazája, hanem legalább is három nagy országot, Angliát, Amerikát és Franciaországot tényleges hazájának mondhatta és nagyon is aktiv résztvett a szellemi és politikai fejlődésében. Maga Disraeli, az angol tory politikai vezér odavágta Gladstonenak, a liberális mogzalom vezérének,



THE HELL WITH PATRIOTISM PROFITS COME FIRST!
POLITICS AS USUAL BOYS

A profithajhászók a hazafiság jelszavával vezetik félre a munkásokat, de ők a profitot a hazafiság fölé helyezik.

hogy a követeléseik "nem mások, melyeket Paine követelt."

Thomas Paine-t Benjamin Franklin birta rá, hogy Amerikába jöjjön, noha akkor Franklint direkt azon szándékkal küldték Angliába, hogy a gyarmat és a trón között békét helyreállitsa. Ugyanis 1774-ben, már nagy elégedetlenség volt a gyarmati tartományok között, de még akkor csak azt követelték, hogy képviseltetést engedjenek nekik az anyaországban. Paine hidászati mérnök volt, de leginkább vitatkozással és irással szeretett foglalkozni, melyekben nagyon logikus érveket használt. Igy Franklin megkedvelte s rábirta, hogy átjöjjön Amerikába és itt beajánlotta oly körökbe, akik folyóiratot adtak ki azon időben. Philadelphiaban, az akkor Amerika kultur központjában telepedett le. Itt a Pennsylvania Magazint adta ki, közben a trón és telepesek között a viszony jobban elmérgesedett és a nép között a forradalmi hangulat kezdett kialakulni. De a nagyobb és gazdagabb egyének nem is mertek volna még akkor függetlenségről beszélni. Erre jellemző, hogy George Washington, akit később olyan naggyá épitettek fel, még a forradalom megkezdése előtt is nagyon hü királypárti volt. Egy esetet megörökitettek, hogy amikor a Potomac folyón találkozott lelkipásztorával, aki királypárti lévén, kérdezte tőle, hogy melyik oldalon áll? Washington azt mondta a papjának, hogy ha meghallja, hogy ő a forradalmárokhoz csatlakozik, akkor minden rosszat mondhat róla.

De hat hónapra ezen találkozás és vallomás után, megjelent Paine “Common Sense” müve s meggyőzte Washingtont, hogy csak a forradalom és a függetlenség tudja a helyzetet megoldani. És ezen füzet nemcsak Washingtont, hanem Thomas Jeffersont és Franklint is meggyőzte, meg sok százezret, hogy a forradalom mellé álljanak és azt segitsék győzelemre vinni. A füzet megjelenése előtt csak zugolódások, lázadások voltak minden cél nélkül és szervezet, vagy nagyobb tömeg nélkül. Öt hónap alatt egy és fél millió példányt terjesztettek széjjel és alig akadt valaki ugy a forradalmárok ,mint a királypártiak között, aki nem olvasta, vagy nem hallotta volna a “Common Sense” érveit a forradalom mellett. Igy ez a füzet volt az, mely a lázadásnak célt adott, melyért érdemesnek találták a harcot és esetleg a halált is.

Mi tudjuk, hogy a vezérférfiakat az idők szülik meg, azonban az időket meg az eszmék, melyet könnyen megérthető formában a nép elé tudnak terjeszteni. Igy az amerikai forradalom megszülte Washingtont, Jeffersont és a többi vezérférfiakat. A forradalmat, minden gondolkozó ember elismeri ,hogy az eszmének a tömegek köztudatában való átvitelének a sikere idézte elő, melyet semmi irás ,szónoklat, vagy érvelés nem segitett annyira, mint Paine “Common Sense” füzete.

Amint az 1848-as magyar forradalomnak is leginkább Petőfi irásai, versei adták meg a lüktető hatást, ugy az amerikai forradalomnak Paine irásai. Ezt a hasonlatot tovább is vihetjük. Megemlitjük, hogy ahogyan Petőfi, ugy Paine is ott volt a harcoló katonákkal, ott lelkesitette őket a harcra és amikor már, minden remény kezdett elszállingózni, amikor Washington csapatai az éhség, nélkülözés és vereségek miatt kezdtek felbomlani ,akkor Paine megint előjött és “A Krizis” cimü füzetével megmentette a helyzetet és ujabb erőt öntött a csüggedő katonaságba, a népbe, mely Washingtont is képessé tette, vagy éppen fellelkesitette, hogy télnek idején átkeljen a Delaware folyón. Paine ezen irását, hadiparancsban olvasták fel minden csapat előtt amellett, hogy sok millió példányban a civil lakósság között is terjesztették. Ez ugy a népet, mint a csapatokat ujabb erőfeszitésre és végső győzelemre vitte. Ezt a részt többször idézik, anélkül, hogy kellően ismertetnék az iróját, igy mivel ugy a forradalom, mint Paine történetében nagyon fényes pont, mi is közlünk kivonatot belőle.

“Ezek azon idők, melyek próbára teszik az emberek lelkét. A nyári katonák és hazafiak ezen krizisben visszariadnak hazájuk szolgálatától. De akik ma is megállják a helyüket, megérdemlik az emberiség háláját és szeretetét.”

“A zsarnokság, mint a pokol nem győzhető le könnyen, mégis meg van az a vigasz, hogy mentől nehezebb a harc, annál dicsőbb a győzelem. Amit könnyen megnyerünk kevésbé értékesnek tartjuk, az ár amit fizetünk adja meg mindendennek az értékét.”

“Krizis” cimen többször irt Paine, az utolsót 1783. április 19-én irta ,mely napon Cornwallis, az angol királyi generális megadta magát.

Az amerikai forradalom sikeres befejezése után Paine visszament Angliába, ahol megirta a “Rights of Men” müvét, melyben a francia forradalmat védte és az emberi jogok értékét magyarázta, melyet a francia forradalom az “Egyenlőség, Szabadság és Testvériség” jelszavakkal akkor porondra vetett. Paine szerint a francia forradalom csak folyamata volt az amerikai forradalomnak és igy teljes szivvel és lélekkel kapcsolódott bele. Egyenlőre Angliában védte az emberi jogokat,

Montneyan városban, Franciaországban, népfelkelők kisérik az elfogott és megsebesült német katonát.

melyekért a franciák akkor megindították a harcot. Később Paine is átment Franciaországba, ahol képviselőnek választották be a callaisi kerületből.

Robespiere terror uralma alatt őt is börtönbe vetették és mint sok sok más forradalmárt őt is kivégzésre szánták ,mert az emberi jogok védelmére, szembeszállt még Robespiere-vel is. Azonban amig igy börtönben várta a sorsa fordulását, nem volt tétlen, hanem megirta az “Age of Reason” cimü munkáját, amiért sok egyház eretneknek nyilvánitotta, holott, csak logikus magyarázatot adott sok olyan kérdésre, amit a vallás nem válaszolt meg. Bár Paine hitvallást tett, hogy hisz istenben, de ugyan akkor azt mondta: “Én nem hiszek a zsidó, római és görög katholikus, török, vagy protestáns egyházakban melyet ismerek. Az én eszem az én templomom.”

“Az egyházak nemzeti intézményei, akár zsidó, keresztény, vagy török, nekem ugy tünnek fel, mint emberi intézmények megijeszteni, rabságban tartani az emberiséget és lefoglalni az erőt és a hasznot.”

Ezen kijelentések nagyon merészek voltak az 1780-as években ,ámbár a francia forradalom részben az egyház ellen is irányult, de csak mint a király fegyvertársa ellen. Azt a tudományt, melyet Paine a vallással akart összeegyeztetni, a vallás nem akarta elfogadni. És igy Painet mint eretneket átkoztak ki minden egyházból. Az akkori egyházak, éppen ugy mint a mostaniak, nem akarták azt elfogadni, hogy “jót cselekedni elegendő vallásnak”. Akkor még a jócselekedet is csak egyházi jóváhagyással volt lehetséges. És ez a kijelentés, hogy minden egyház csak arra törekszik, hogy az erőt és hasznot maga részére lefoglalja, monopolizálja, ma is nagyon megállja a helyét és nem csoda, hogy ezt a bátor kijelentést nem tudják megbocsájtani neki, dacára, hogy “Age of Reason” elterjedése még jobban érthetővé és elfogadhatóvá tette volna azt az isteni eszmét, melyet Paine szerint éppen az egyházak rombolnak le az emberiség között.

Ne legyen elég, csak ezen korlátozott ismertetés Paine irásairól. Mind a négy értékes füzete, Common Sense”, “Rights of Men”, “Crisis” és a vallási dolgokkal foglalkozó “Age of Reason” egy könyvben van összefoglalva és nagyon érdemes tanulmányozni. Amint Clarence Darrom mondta: “ő (Paine) oly messze volt az időszakától, hogy százötven év nem elég hosszu idő a világnak utólérni. Valamikor ugy fogják ismerni, mint a szabadság legokosabb, legigazibb, legbátrabb barátját Amerika földjén.”

ISMERETEK A FÖLDRŐL

DACÁRA annak, hogy a Föld az emberiség lakóhelye, amelyhez száz és százezer éves fejlődés köti, amelyet elhagyni képtelen, egész az utóbbi időkig az emberek csak nagyon felületesen ismerték a földgolyót. A Földre vonatkozó első adatokat az ókori görögöknél találjuk. A görög hősi és vallási legendák legnagyobb irója Homer, aki körülbelül a mai időszámitást 900 évvel megelőzőleg élt, emliti hőskölteményeiben, hogy a Föld nagy, kerek alaku tányér, amelyet az Oceán nevü folyoviz vesz körül.

Az ókorban sokáig igy képzelték a Földet. Ha akadtak is olyanok, akik nagyobb távolságra mentek, rendesen valamilyen vizre bukkantak ,ami utjuk végét jelentette. Voltak aztán olyanok, akik a nagy viz helyébe egy nagy halat képzeltek. Valószinü, hogy a phoeniciaktól származott ez a felfogás, miután ez a nép merészkedett először a tengerre, amelyen természetesen nagyon sokáig nem mentek keresztül, hanem csak a partok mentén hajóztak.

Az első hosszabb utazásról szintén a phoeniciai hagyományok számolnak be. Ezek szerint Necho egyiptomi király rendeletére phoeniciak körülhajózták Afrikát körülbelül 600 évvel a mai időszámitás előtt. Azonban ebben az időben már akadt egy egyén, Aristotle, a görög tudós (384 B. C. —322 B. C.) aki gyanitotta, hogy a Föld gömb alaku. Erre ugy jött rá, hogy megfigyelt egy holdfogyatkozást és látta, hogy a Föld árnyéka kör alakot mutatott. Azonkivül tudta azt, hogy a láthatár éppen ugy távolodik, mint ahogyan közeledünk feléje. Mindazonáltal a Földről alkotott felfogás csak abban változott, hogy az Oceán folyóvizből nagy tengert csináltak. Az “oceán” szóval ma is a nagy tengereket jelöljük.

Egy másik tudós, Eratosthenes (276 B. C. — 196 B.C.) volt az első, aki megmérte a Föld tengelyének az elhajlását, amit 23 fok, 51 elsőperc és 20 másodpercnek talált. Ez nagyon pontosnak nevezhető, tekintve az akkori kezdetleges müszereket. Ugyancsak Eratosthenes volt az első, aki a térképen való eligazodás megkönnyebbitésére széltében s hosszában, egymásra merőleges vonalakat huzott. Hipparchusnak (körülbelül 160 és 125 B.C. években müködött, születés és halálának éve ismeretlen) ez adta az eszmét a szélességi és hosszusági körök megalkotására.

A nagy felfedezések.

A földrajzi és asztronómiai tudományt első izben az Alexandria városban élő, görög származásu Ptolemy (körülbelül 139 és 161 között élt) foglalta össze, az "Almagest" cimü munkájában. Ptolemy természetesen azt hitte ,hogy a világegyetem központját a Föld képezi és körülötte forognak a Nap és az összes csillagok. Miután ezt a világnézetet a katholikus egyház is magáévá tette, fennállt egészen addig, amig Copernikus (1473-1543), továbbá Kepler (1571-1630), Gàlilei (1654-1642) és Newton (1642-1727) számitásaikkal kimutatták a naprendszer törvényeit.

A Föld legnagyobb része azonban még igen sokáig ismeretlen maradt. A Föld megismerésére nagy felfedező utazásokra volt szükség. Ily utazásokat már a rómaiak idejében is tettek és irásos emlékeket hagytak, amelyek nagyban hozzájárultak a Föld megismeréséhez, noha a cél a katonai hatalom kiterjesztése volt. Igy körülbelül 60-ban Nero császár expediciót küldött a Nilus folyó eredetének kikutatására. A hatodik században Justianus császár két barátot küldött Kinába, akik állitólag selyemhernyó tojásokat hoztak onnan és ezzel bevezették Európba a selyemtermelést.

A legfontosabb felfedezések kora azonban a 15 és a 16-ik századdok voltak. A portugálok felfedezték Madeira szigetét 1482-ben, Vasco de Gama 1486-ban elérte a Jóreménység fokát és Columbus 1942-ben eljutott az Amerikához közel fekvő Nyugat Indiai szigetek egyikére, San Salvadorra. Miután ez már valójában az "Uj Világhoz" tartozik, ezt a dátumot veszik Amerika felfedezésének, noha magára a kontinensre csak pár évvel később léptek. A következő 30 év alatt azonban az egész keleti partvonalat felfedezték.

A következő két században a sarkvidékek kivételével csaknem az összes szigeteket felfedezték. A sarkokra való eljutást azonban igen sok sikertelen kisérlet előzte meg, mig végre 1909. április 7-én az amerikai Peary admirális eljutott az Északi sarokra. A Déli sarokra a norvég Amundsen jutott el 1911. december 14-én. Később mindkét saroknak több látogatója is volt. Ezek közül legnevezetesebb Richard E. Bird admirális, aki több expediciót vezetett a déli sarkvidékre, repülőgép segélyével óriási területeket néztek át s rájöttek, hogy a Déli sarok körül óriási föld terület fekszik, amely azonban csaknem teljesen mindig jéggel van boritva.

A Föld méretei.

A modern földrajzi tudomány szerint a Föld a Naprendszer kilenc bolygóinak egyike, ami azt jelenti, hogy kering a Nap körül. Keringési pályája nem kör, hanem elipszis, amelynek egyik fókuszában van a Nap. Legnagyobb távolsága a Naptól 94,452,000 mérföld, a legkisebb távolsága pedig 91,342,000 mérföld, — igy az átlagos távolsága 92,897,-000 mérföld.

A Föld nem szabályos gömb, amennyiben a két saroknál egy kicsit be van horpadva. Igy a két sarkon keresztülmenő tengely kisebb, mint az arra merőleges tengely. Ha a Földet a két sarok közötti tengelyre merőlegesen elvágva képzeljük, akkor a földet északi és déli félre osztjuk. Az osztást végző körnek a neve Egyenlitő. Az Egyenlitő átmérője 7,926 és hat-tized mérföld, mig a sarki tengelyé 7,899 és kilenc-tized mérföld.

Az Egyenlitő kerülete 24,901.7 mérföld ,a sarkokon átmenő köröké 24,859.4 mérföld. A Föld felületének területet 197,000,000 négyzet mérföld (átlagban), köbtartalma pedig 259,900,000,000 köb mérföld.

A viz sürüségéhez hasonlitva a Föld átlagos sürüsége 5.53. A Föld középpontjában a nyomás 22,500 tonna négyzet incsenként. A Föld sulya 6,592,000,000,000,000,000,000 (hat sextillió és 592 kvintillió) tonna. A Föld felületén körülbelül 54,000,000 szárazföld 143,000,000 négyzetmérföld pedig viz.

A Kontinensek.

A Földön ma a következő kontinenseket különböztetünk meg:

Kontinens	Négyzet mérföld	Lakóinak száma
Északamerika	8,500,000	170,000,000
Délamerika	7,500,000	65,000,000
Európa	3,900,000	510,000,000
Ázsia	17,200,000	1,117,000,000
Afrika	11,500,000	130,000,000
Ausztrália (New Zealanddal)	3,000,000	8,000,000
Antarctika (Délsarkvidék)	2,400,000	Lakatlan
Összesen:	54,000,000	2,000,000,000

A tengerek között nincs éles elválasztó vonal, azért azok területei csak átlagosak. A legnagyobb tengerek a következők:

Csendes óceán	71,000,000
Atlanti óceán	34,000,000
Indiai óceán	28,000,000
Déli jegestenger	6,000,000
Északi jegestenger	4,000,000

(négyzet mérföld)

A tengerek átlagos mélysége 12,350 láb. A legmélyebb pontra Mindano sziget közelében (A Philippin sziget csoportban) akadtak, ahol 35,400 láb mélységet mértek.

A Föld felszinen a tavak és folyók körülbelül 1,000,000 négyzetmérföld területet foglalnak le. A szárazföldből körülbelül 33,000,000 négyzetmérföld termőföld, 19,000,000 legelő és erdő, 5,000,000 négyzetmérföld pedig sivatag.

A Föld legmagasabb pontja a Mount Everest csucs Ázsiában, mely 29,141 láb magas; a legalacsonyabb pedig a Palesztinában fekvő Holt Tenger nevet viselő tó felszine, ami 1290 lábbal mélyebben fekszik a Földközi Tenger szinénél.

Geológusok a Föld korát 1,500,000,000 évre becsülik, de csak két millió éve érte el a fejlődés azon fokát, hogy az ember megjelenhetett rajta.

Nagy csillagok.

A Mexico városban nemrégiben épitett uj Nemzeti Astrophysikai Observatorium kurátora, Dr. Guillermo Haro vörös szinü ujfajta lemezekkel fotografálja a csillagokat. Haro jelentése szerint az ilyen vörös lemezeken egyes csillagok jóval nagyobbaknak, illetőleg fényesebbeknek mutatkoznak, mint az addig használt közönséges lemezeken és teleszkópon keresztül.

A csillagokat fényességük szerint első, másod, harmad, stb. rendü osztályokba sorozzák. A Tonanzittla csillagot eddig 14-ed rendünek tartották ,Haro vörös lemeze azonban 8-ik rendünek mutatja.

Ezen csillagok milliószorta nagyobbak a Napnál, folyékony, vagy gáz állapotban lévő buborékot alkotnak. Hőfokuk általában 1,500 Celzius fok körül van.

EMLÉKEZÉS FÉNYES LÁSZLÓRA

(A Londonban élő magyarok Fényes László émlékünnepélyén felolvasta Károlyi Katinka.

Irta: KÁROLYI MIHÁLY

FÉNYES LÁSZLÓ neve örökre elválaszthatatlan az októberi forradalomtól. Mint minden forradalomnak, Októbernek is voltak ideológiai előfutárja: Szabó Ervin, Jászi, Ady. Fényes a forradalom gyakorlati előfutárja volt. Ő volt az, aki jóval október 31 előtt a cselekvés terére lépett és mindent megtett, hogy a magyar nép felébredjen aléltságából. Leleplezett, nyomozott, beszélt, utazott és ahol az igazságtalanság, az uri Magyarország ezerfejü igazságtalansága sebeket ejtett ott termett és egyrészt enyhitett a szenvedésen, másrészt védelmébe vette az elesetteket, a kisemmizetteket. Ő volt az, aki a háboruban a legjobban megértette a harcoló katonákat és otthonmaradtakat. Ő volt az, aki hangot adott szenvedéseiknek, vágyaiknak, akarásaiknak. Empirikus ember volt. Hihetetlen energiával verekedte át magát az apró-cseprő dolgoktól, a mindennapok kis ügyétől a nagy problémákig. Az élet minden-napos igazságtalanságai felett való felháborodása vitte harcról-harcra, a nagy októberi harcig s végül az emigrációig. Ő teregette ki az uri Magyarország minden szennyesét és amit mások számokban, adatokban, politikai perspektivákban láttak, azt ő tényekben ismerte fel. "Le superflu, chose si nécessaire" — irja valahol Voltaire. Ezt az egyszerü igazságot kevesen ismerték fel olyan biztos szimattal, mint Fényes László. "Az annyira szükséges fölösleges", amivel a legtöbben nem törődnek, Fényesnek fontosabb volt minden másnál. Ebből a fölöslegesből, az istenhátamögötti faluk szolgabiráinak bakafántoskodásai és igazságtalanságai ellen vivott kis harcokból keletkezett nála a lényeg: a forradalom, majd a szocializmus.

Az elmult háboru alatt rövid idő után az ország legnépszerübb emberévé vált. És nem a sznobok, a hatalmasok csináltak belőle hires embert, hanem a nép. Ha valamely kisemberen sérelem esett, "majd megirom a Fényesnek" fenyegetéssel válaszolt és ezzel meg is rettentette a "packázó hivatalnokot". Igy nem csoda, hogy a szegények legendás szószólója, a katonák ujságirója és az ország lelkiismerete lett.

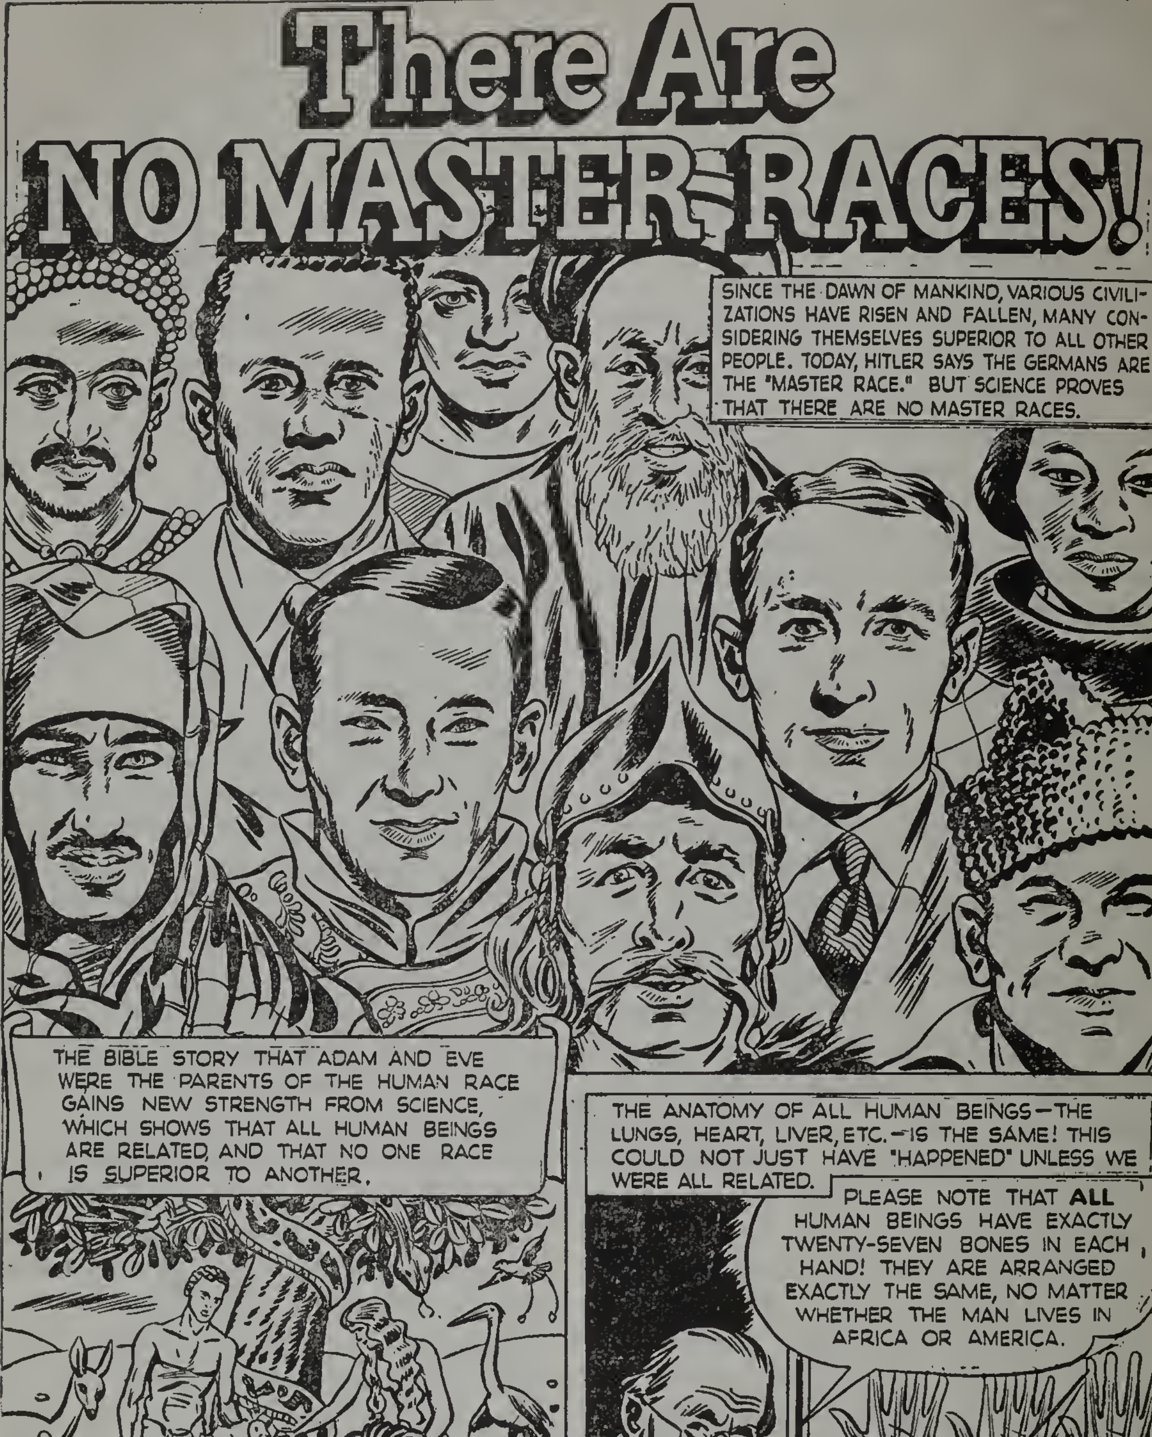
Fényes ,aki külsejére nézve inkább csunya ember volt és arcán a dzsentri korában vivott párbajokban kapott sebek éktelenkedtek, megjelenésének igénytelensége ellenére: mint parlamenti képviselő is óriási hatást váltott ki. Mert az igénytelen külsejü embert az igazság megszépitette, a nehézkes szónokot kitünő megfigyelő képessége és bátorsága ellenállhatatlanná tette, abban a képviselőházban, amelyben 90 százalékban ellenségek vették körül s ahol az uralkodó osztály kitenyészett nagy szónokai álltak vele szemben, minden külső hibája ellenére parancsolóan hatottak szavai. Mintha csak az igazság elevenedett volna meg benne, félelmet nem ismerve, határozottan, pontosan és keményen olvasta az urak fejére gazságaikat. A mágnásokat vékony hangjával is tulharsogta és nem törődött azzal, hogy süket fülekre talál, mert ő nem a mameluk képviselőkhöz beszélt, hanem azok feje fölött a lövészárok katonáihoz, a boltok előtt sorbanálló asszonyokhoz, a falu népéhez. A született ujságiró istenáldotta tehetségével adta hirül az országnak, hogy a hatalmasok hazudnak, becsapnak, félrevezetnek és vészt hoznak az országra. Példátlan személyes bátorsággal és erkölcsi erővel rendelkezett. Ez tette képessé arra, hogy felvegye a harcot saját osztálya ellen és a kevesekkel együtt küzdjön Tisza, Wekerle, és a többi országrontó eltávolitásáért. Nem félt felvenni a harcot a képviselőház legjobb szónoka, Vázsonyi Vilmos ellen sem. Vázsonyi, a választójogi blokk minisztere ugyanis nem tudott ellenállni a kegyelmes s méltóságos urak charmejának és egymásután adta fel progressziv állásait az urakkal szemben. Fényesnek, aki sajátos módján, jó értelemben mindig megőrizte uri mivoltát és ezt jellegzetes fényesi félszegséggel olykor ki is hangsulyozta, nem imponáltak az urak. Ezért nem tántorodott meg Vázsonyi retorikájától és ezért talált utat a nép szivéhez.

Fényes Lászlónak mindenki deferált. Az ellenségei s a barátai egyaránt féltek tőle, de mig az ellenségei robespierrei megvesztegethetetlenségétől, szókimondásától, vizsla szimatától féltek, barátai saját lelkiismeretüknek megelevenedését látták benne: a munkára ,elvhüségre, becsületességre, kitartásra ostorozót. Mert ő a barátainak is mindenkor kiméletlenül megmondta a véleményét és soha nem hizelgett senkinek. Mindenki pontosan tudhatta, hogy hányadán áll vele. Lehettek vele sulyos véleménykülönbségeink, de biztosak lehettünk afelől, hogy sohasem fog hátbadöfni bennünket. Barátai elviselték kellemetlenkedéseit ,meghajoltak előtte, mert mindenki érezte, hogy a magyar nép iránt érzett végtelen szeretete vezeti és nincs más gondja, mint népének megmentése.

Tartozom az igazságnak azzal, hogy megmondjam: sokszor ellentétben álltam vele. Ezek az ellentétek ideológiai természetüek voltak és ezen a téren Fényes László nem volt olyan határozott, mint a gyakorlati politikában. Azonban minden ellentét ellenére tudtam, hogy azt védi, amit igaznak hisz és azt támadja, amit nem tud a magáévá tenni. Soha senki nem vádolhatta megalkuvással, soha senki nem mondhatta, hogy személyi érdekeket követ. Puritánsága közismert volt. S ez a puritánság, amely egyaránt jellemző volt az októberi forradalom valamennyi nagy alakjára: Jászira, Kunfira, Szendére, adták meg a rezsim makulátlan jellegét ,olyannyira, hogy még az ellenségeink sem mertek ilyen tekintetben bemocskolni. Ebben a tisztajellemü társaságban még Nagyatádi Szabó István sem mert panamázni.

Valamennyien szegényen mentek az emigrációba. Szende Pál a bécsi népkonyhán étkezett, Fényes kis szobáiban maga készitette magának az ételt. A nép nagy barátai még a szegénységbe is követték népüket.

Most bucsuzunk Fényes Lászlótól. Lassanként elhullnak a forradalom vezetői. Valamennyien öregek vagyunk. Senki nem támadhat ránk azzal, hogy személyi ambiciók fütenek, amikor a végső harcot vivjuk. A l'honneur de drapeau-ról, a zászló becsületéről van szó. De, amikor elbucsuzunk Fényes Lászlótól, aki az utolsó pillanatig hü maradt önmagához és harcolt a Horthy Magyarországa ellen, azt kivánjuk, hogy a mai Magyarországon is akadjanak olyan bátor emberek, mint ő, mert ilyenekre van szükség. Kurta az időnk, de még tartjuk az égő fáklyát, hogy átadhassuk az utánunk következőknek — amint Fényes is átadta —, hiszen mi is másoktól kaptuk. Fényes nem érhette meg a magyar nép feltámadását, de látta már a fasizmusok bukását. És ez az egyetlen elégtétel azoknak, akik a zászló becsületén nem ejtettek foltot.



There Are NO MASTER RACES!
SINCE THE DAWN OF MANKIND, VARIOUS CIVILIZATIONS HAVE RISEN AND FALLEN, MANY CONSIDERING THEMSELVES SUPERIOR TO ALL OTHER PEOPLE. TODAY, HITLER SAYS THE GERMANS ARE THE "MASTER RACE." BUT SCIENCE PROVES THAT THERE ARE NO MASTER RACES.
THE BIBLE STORY THAT ADAM AND EVE WERE THE PARENTS OF THE HUMAN RACE GAINS NEW STRENGTH FROM SCIENCE, WHICH SHOWS THAT ALL HUMAN BEINGS ARE RELATED, AND THAT NO ONE RACE IS SUPERIOR TO ANOTHER.
THE ANATOMY OF ALL HUMAN BEINGS—THE LUNGS, HEART, LIVER, ETC.—IS THE SAME! THIS COULD NOT JUST HAVE "HAPPENED" UNLESS WE WERE ALL RELATED.
PLEASE NOTE THAT ALL HUMAN BEINGS HAVE EXACTLY TWENTY-SEVEN BONES IN EACH HAND! THEY ARE ARRANGED EXACTLY THE SAME, NO MATTER WHETHER THE MAN LIVES IN AFRICA OR AMERICA.

A civilizáció hajnala óta számos nép eltünt, akik éppen ugy, mint Hitler a németekről, azt állitották, hogy felsőbbrendü népek. Az Ádám és Éváról szóló bibliai mesének igaza van annyiban, hogy az összes emberek anatomiája ugyanaz. A tüdő, a sziv, a máj, stb. azonosak és egyformán müködnek. Ez nem a véletlen müve. Avagy nézzük a kezet, amelyben 27 csont van, akár európai, akár ázsiai, vagy afrikai ember kezét vizsgáljuk is.

NINCSENEK FELSŐBBRENDÜ EMBERFAJOK

A NÉMET nemzeti szocialisták (názi párt) a világ többi népei ellen intézett támadásuk igazolására azt hozták fel, hogy a németek (árják) felsőbbrendüek más népeknél és ezért a többi népek feletti uralomra hivatottak.

Ez a filozófiai felfogás különben csak szükebbkörü értelmezése annak az általános és a gyakorlatban is alkalmazott felfogásnak, hogy az ember az állatvilág felsőbbrendü képviselője és mint ilyen, joga van az állatvilág többi tagjainak a saját céljaira való felhasználásához. A kérdés csupán az, hogy vajjon emberfaj és emberfaj között megtaláljuk-e azt a felsőbbséget bizonyitó tényezőket ,mint amit kétségtelenül kimutathatunk az emberek és állatok között.

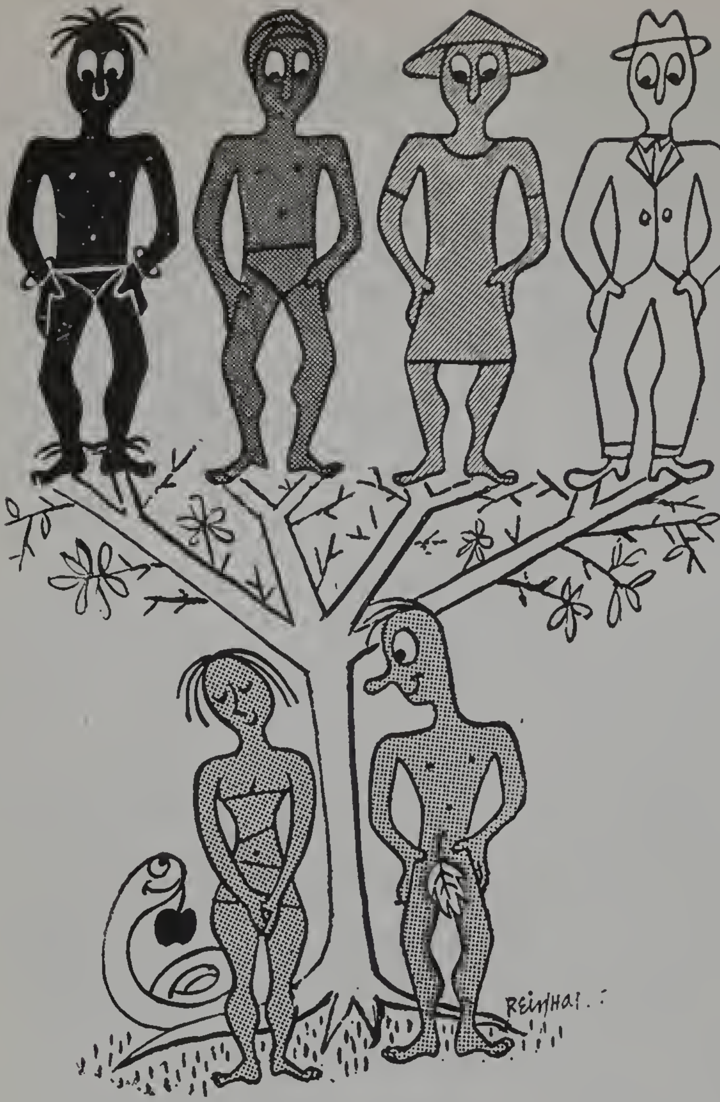
Az ember származására vonatkozólag ma már általánosan elfogadták a fokozott fejlődés elméletét. Ezen elmélet szerint amint a földön a hőmérsékleti és egyéb viszonyok alkalmasakká lettek az élet fentartásához ,kifejlődött az egysejtü legegyszerübb élőtest. Ez a nagyon primitiv, kezdetleges valami aztán szétesett két részre. Az eredeti volt a szülő ,az uj testek az utódok. Ezek megint uj ,több és több utódnak adtak helyet.

A modern tudomány állitása szerint a fejlődést két nagy természeti erő hajtja és irányitja. 1) Az utód hasonlitani akar a szülőhöz. 2) Az utód uj tulajdonságot igyekszik felvenni, vagyis különbözni akar a szülőtől. Ezen két törvény értelmében az utód, — noha hasonlit a szülőhöz, bizonyos tekintetben már attól különbözik is; ez a különbözet képezi a fejlődés alapját, mert évszázadokon, évezredeken vagy évmilliókon keresztül ezen különbözetek révén egészen más tipusu lények jöttek létre.

Nagyon messze esne tárgyunktól annak részletes tárgyalása, hogy az évmilliókig tartó fejlődés hosszu folyamata alatt mikor jelentkezett a földön az a lény, akit mi az EMBER szóval illetünk. Szabályként csak azt mondhatjuk ki, hogy emberré lett az a magasrendü ősállat, amelyik először használt tudatosan valamilyen szerszámot. A szerszám tudatos használata az, ami az embert az állattól megkülönbözteti.

Ádám és Éva meséje

Vita tárgyát képezi az, hogy vajjon csak egy ősember volt-e? Jobban mondva, hogy csak egy környezetben fejlődött-e ki az ember és azután szórodott szét a földön, vagy a szétszóródás megkezdődött már jóval előbb? Igy több helyen, tehát több fajtáju ősember fejlődött. Azonban ebben az esetben is mindegyiket vissza lehet vezetni a közös eredethez. Ezért mondják, hogy manapság a tudomány támogatja azt a bibliai mesét, hogy mindannyian Ádámtól és Évától, — vagyis közös szülőktől származunk. Amig azonban ezen felfogás szerint a közös ős vagyis Ádám és Éva már emberek voltak, az előbbi felfogás, amely a szétszóródást előbbre helyezi, azt tartja, hogy Ádám és Éva csak ősállatok voltak.



A föld összes népei egy családhoz tartoznak.

De bámilyen időtávolságban és állapotban találjuk is meg Ádám és Éva őseinket, annyi bizonyos, hogy azon lények között, akiket ma az EMBER fogalmával jelölünk, nincsenek olyan különbségek, amelyek azt bizonyitanák, hogy egyik felsőbbrendübb a másiknál.

Különösen nem igaz a felsőbbrendü fajokra vonatkozó állitás oly értelemben, mint a nácik tartják, akiknek ily meghatározásukat teljesen a politikai és gazdasági felfogásuk irányitotta. A felsőbbrendü fajok elméletét meghazudtolja maga Amerika, ahol a különböző fajok nagy száma él együtt és csupán az alkalom szükséges ahoz, hogy ezen fajok bármelyike is magasfoku intelligenciáról tegyen tanuságot.

A fajelméletről a "Public Affairs Committee" kiadásában igen érdekes könyvecske jelent meg Dr. Gene Weltfisch és Ruth Benedict szerzők tollából. Az értékes kis münek 'Az emberi fajok' cimet adták. Ezen cikkünknek további részei a Common Council által az emlitett munkából vett adatok felsorakoztatása. Ennél fogva ugy ezért a munkáért, valamint a szöveget illusztráló képekért ezen intézményeknek tartozunk elismeréssel.

Dr. Weltfisch és Ruth Benedict "Az emberi fajok" cimü munkájukban rámutatnak arra, hogy az emberek vérei egyformák, dacára annak, hogy orvosi szempontból többféle vértipust különböztetünk meg. Azonban ezen vértipusok mindegyikét megtaláljuk mindenféle emberfajnál. A megkülönböztetés csakis az orvostudomány, vagyis a gyógyitás szempontjából fontos, amennyiben vérátömlesztéseknél az orvosoknak arra figyelemmel kell lenni.

Az orvosok rájöttek arra, hogy a vért igénylő beteg részére nem mindenkinek a vére alkalmas. Ennek okát vizsgálva rájöttek, hogy az embereknek négy különböző tipusu vérük van, ezen tipusokat O, A, B és AB jelzésekkel látták el. Az O tipusu vér minden más vérrel keveredik. A másik három tipust azonban csak hasonló tipusu vérü emberbe lehet átömleszteni, mert a más tipusu vérben a vörös vérsejtek megalszanak.

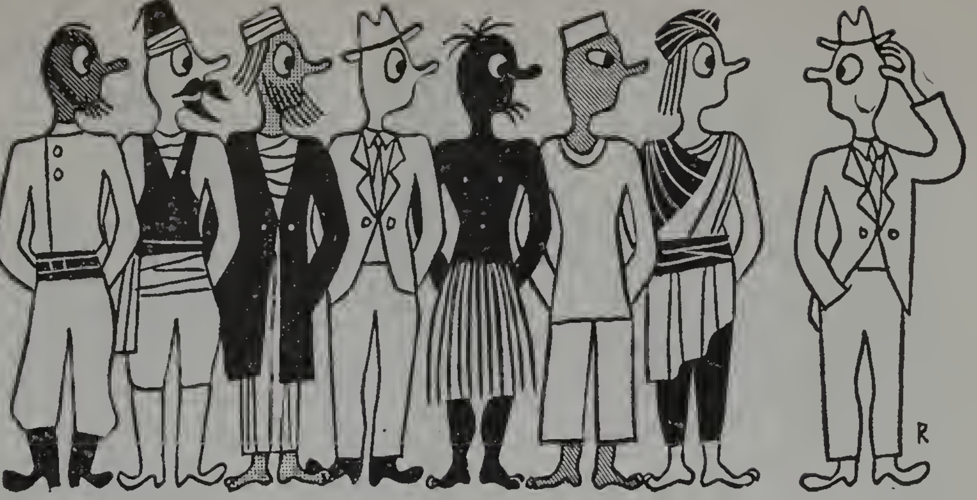
Természetesen mindenki az őseitől örökli a vérét. De melyik ösétől, az a nagy kérdés, mert ugy a fehér, mint a fekete vagy a sárga emberfajoknál megtaláljuk mind a négy tipusu vért. Sőt az is gyakori, hogy a gyermek vértipusa egészen más, mint a szüleié, tehát még egy családban is megtaláljuk a különböző vértipusokat, ami azt bizonyitja, hogy a vértipust valami nagyon régi ősünktől örököljük. A vér tehát ellentmond annak az állitásnak, hogy vannak felsőbbrendü emberfajok.

A bőr szine.

Térjünk át az emberek közötti külömbségek legkönnyebben észlelhető sajátosságára: a bőr szinére. A népek osztályozásánál ezt a külömbséget hangsulyozzuk a leggyakrabban. Fehér ,fekete és sárga emberfajokról beszélünk.

A legsötétebb bőrü emberek ma Nyugatafrikában élnek, a legvilágosabbak Európa északnyugati részén, délkeleti Ázsiában pedig ságabőrü emberek laknak. A legtöbb ember bőrének szine azonban nem követi a szélsőségeket, hanem átmeneti. Ezek az átmenetek azok, amelyek valaha általánosak lehettek, a fehér, a sárga és a sötétbarna szinek pedig végleti szélsőségek.

A tudósok ujabban megállapitották, hogy a bőr szinkülömbségeit két speciális vegyi anyag okozza. Az egyik a carotene: sárga árnyalatot idéz elő, a másik, a melanin: a barna szin okozója. Minden ember bőrében, akármilyen világos vagy sötét legyen is az, feltalálható mind a két anyag. Az egyetlen kivétel az u. n. albino esete, akinek a bőréből hiányzanak a festőanyagok. De ilyen albinok egyaránt előfordulnak a fehérek és a sötétebb bőrüek között is.

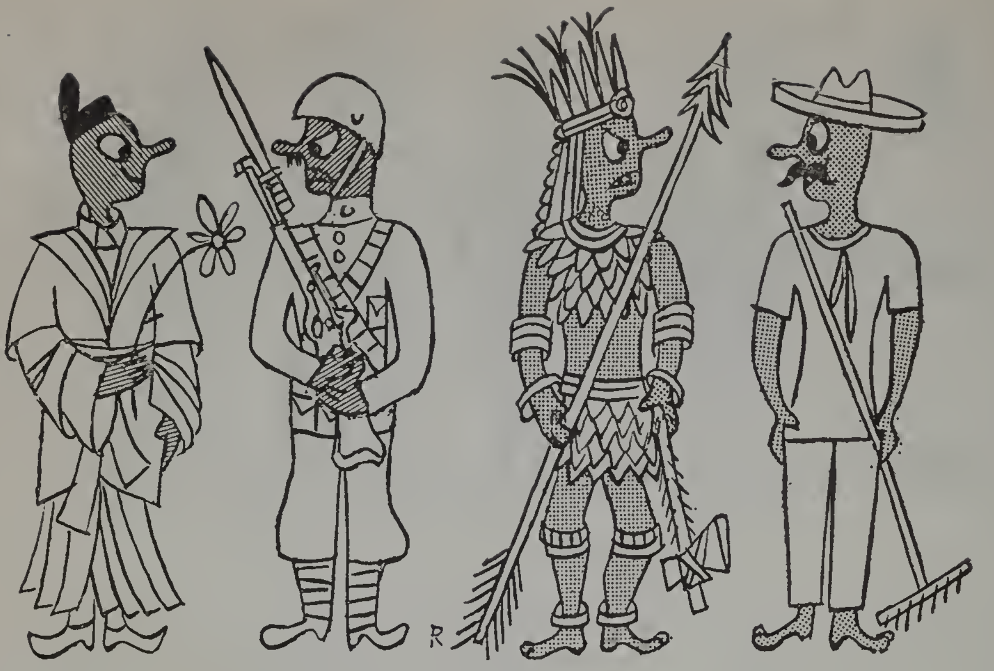


Nincs zsidó faj.

Az általánosan ismert emberfajok a kaukázusi, a mongol és a néger.

Az árja, zsidó vagy olasz — nem faj. Árják azok, akik indoeurópai: "árja" nyelveket beszélnek. Hitler maga is különféle értelemben használja az "árja" megjelölést. Néha szőke európaiakat ért alatta s ilyenkor beleérti a skandinávokat is; néha csak németeket, akár szőkék, vagy barnák legyenek is, néha olyanokat, akik politikailag egy véleményen vannak vele, beleértve a japánokat is. Ahogyan Hitler alkalmazza, az árja megjelölésnek sem faji, sem nyelvi, sem semmiféle értelme nincsen.

Zsidók azok ,akik a zsidó vallást követik. A zsidó vallásuak mindenféle fajhoz tartoznak, mert néger és mongol zsidók is vannak. Az európai zsidók igen sokféle tipust



Az emberek szelidek, vagy harcosak aszerint ahogyan nevelik őket

képviselnek; fizikailag azokhoz hasonlitanak, akiknek körében élnek. Az u. n. “zsidó” tipus tulajdonképen tengeri tipus és nem “zsidósabb”, mint a délolasz. Ahol a zsidókat üldözték és elnyomták, visszahuzódtak, régi életmódjukhoz ragaszkodtak és nem keveredtek a népesség többi részével. Igy alakultak ki “zsidós” jellegzetességek. De ezek nem faj, vagy “zsidós” vonások, mert eltünnek ismét, mihelyt az asszimilációt nem akadályozzák mesterségesen.

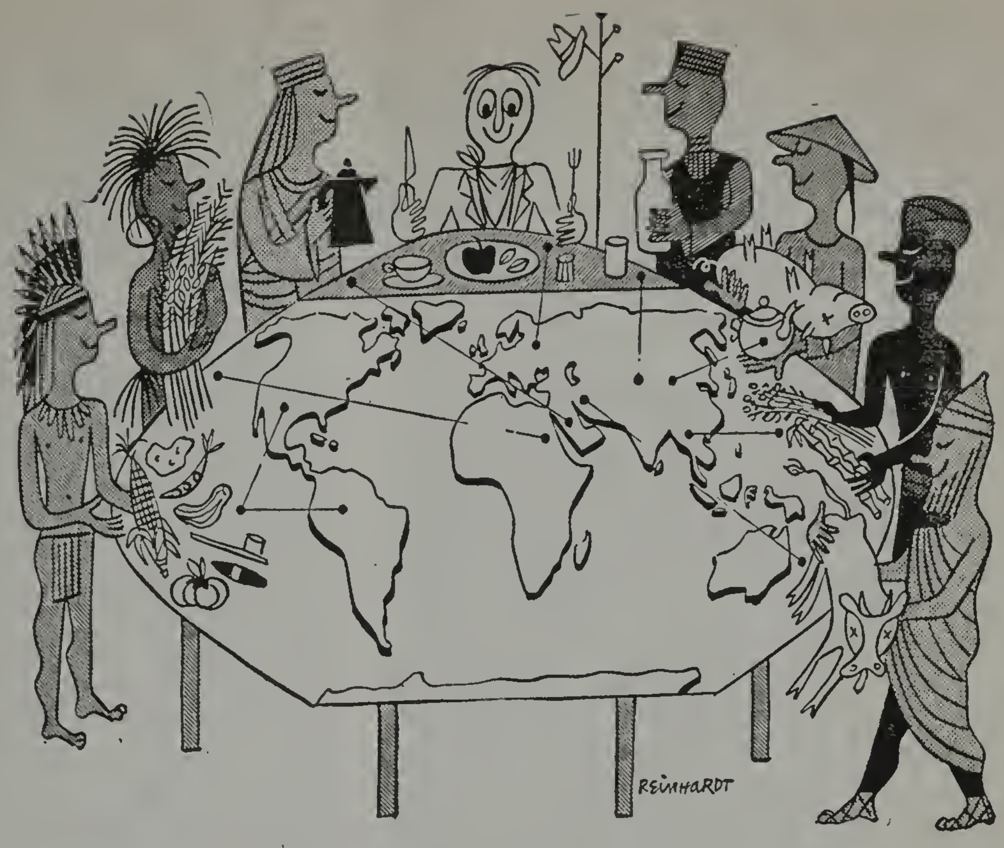
Az olasz név — nemzetiségi megjelölés. Az olaszok szintén különféle fajokra jellemző vonásokat tudnak felmutatni. Az olasz szó nemzetet jelöl meg, mint a német, az orosz, vagy a többi európai nemzet neve. Összetartanak — nem a fejük hasonló alakjából, vagy a bőrük szinéből kifolyólag, hanem nemzeti büszkeségük, földjükhöz való ragaszkodásuk, helyi szokásaik, közös nyelvük, stb. alapján.

Az amerikai nép vegyes eredetü, őseink, vagy mi magunk, a világ minden részéből származunk. De az angolokat angoloknak, a franciákat franciáknak nevezzük. Ez a nemzetiségre vonatkozik, ugy ahogy mi az amerikai nemzethez tartozunk. Ez nem jelent faji meghatározást. A németek azt állitják magukról, hogy ők a tiszta német faj képviselői. De semmiféle európai sem képvisel semmiféle tiszta fajt. Mert a keveredés más népekkel ott sem volt elkerülhető a különböző népek vándorlásai folytán.

Faji felsőbbségek és alárendeltségek.

A tudósok megállapitották, hogy milyen mértékben öröklik a gyermekek szülőik faji jellegzetességeit. Megmérték a fejformákat és osztályozták a bőr szinezetét. Megállapitották, hogy milyenféle orrok vannak a világon és egyes fajoknak mennyi az átlagos szőrzete. De a tudósok azt is megállapitották, hogy ezek a tulajdonságok nem járnak azzal, hogy egyes népek jobbak, vagy rosszabbak másoknál, ugy ahogy a fehér ló nem külömb a feketénél.

A fajoknak egymáshoz való viszonyában azonban igen fontos volna megállapitani, hogy egyes fajok külömbek-e mint mások. Alá kell támasztaniok, vagy meg kell hazudtolniok annak az embernek a büszkélkedését, aki azt állitja: “Ilyennek születtem, fajom bizonyitja, hogy külömb vagyok, mint más.” A kutatásoknak ki kell arra terjeszkedniök, hogy milyen örökölt jellegzetességek jobbak, vagy rosszabbak másokénál. Ehhez szükséges azonban elsősorban az, hogy a tudomány segitségével megállapitsuk, milyen jellegzetességekkel született valaki és mi történt vele születése után. Mert ha szerencséje volt, akkor elég élelemben, lelkiismetes gondozásban, jó nevelésben és szerencsés foglalkozásban volt része; mindezek jó hatással voltak szervezetére; de ezekről nem mondhatja senki, hogy "ilyennek születtem".



Élelmiszereinket sok néptől kapjuk.

Amerikában alapos kutatásokat végeztek a négerek és a fehérek intelligenciájának összehasonlitására. De valahányszor az egyén intelligenciáját biráljuk el, — legyen az fehér, vagy fekete — az intelligencia foka nemcsak azt fogja mutatni, hogy milyennek született, hanem azt is, hogy mi történt vele a születése után. A tudománynak megvannak erre a bizonyitékai.

Az első világháboruban például intelligencia vizsgáknak vetették alá az Európába kiküldött amerikai katonákat. Az eredmény azt mutatta, hogy a négerek átlagos intelligenciája alacsonyabb volt mint a fehéreké. De a vizsgák arról is bizonyságot tettek, hogy az északiak, — fehérek és feketék — az intelligencia magasabb fokán állottak, mint a déliek, — fehérek és feketék. Mindenki előtt ismeretes, hogy a déliek épen olyanoknak születnek, mint az északiak, de 1917-ben sok déli állam közoktatási kiadásai az északi államok hasonló kiadásainak csak kis töredékére rugtak; a lakásügy, az élelmezés és a jövedelem átlaga szintén mélyen az északi szinvonal alatt állottak.

Minthogy a négerek tulnyomó többsége a déli államokból származott, intelligenciájuk mértéke nemcsak a néger faj intelligenciáját fejezte ki, hanem valamenyi amerikaiét is, akik a déli szükös körülmények között nevelkedtek fel. A tudósok tehát a déli fehérek és az északi négerek értelmiségét is összehasonlitották:

Déli fehérek

Mississippi	41.65
Kentucky	41.50
Arkansas	41.55

Északi négerek

New York	45.02
Illinois	47.35
Ohio	49.50

ami azt mutatja, hogy a szerencsésebb körülmények között felnőtt négerek intelligensebbek, mint a kevesbé szerencsésebb fehérek.

A jellem nem velünk születik.

Igy senki sem büszkélkedhetik, hogy külömb a jelleme. A nácik fitogtatják "fenkölt fajelméletüket". De amikor az uj generációt nácivá akarták nevelni, nem biztak a "fenkölt fajelméletükben", hanem bizonyos tanok kötelező oktatását rendelték el az iskolákban és megkövetelték, hogy az ifjak náci szervezetekhez csatlakozzanak. Ilyen eszközökkel tudták csak azt a fajta nemzeti lelkületet kifejleszteni, amelyre törekedtek. A Hitler ifjak tehát előre kitervelt és betanitott jellemvonásokat vettek fel és nem örökölték születésük alkalmával nemzeti jellegüket.

Ugyanilyen eszközökkel a japánok is könyörtelenül harcoló generációt neveltek ki. Pedig alig van ötven éve, hogy azok az európaiak, akik Japánban éltek, ugy jellemezték őket, mint "pillangókat, akik virágról-virágra szállnak" és nem alkalmasak a nyugati civilizáció komoly megpróbáltatásaira.

1900 óta a "pillangók" hatszor harcoltak idegen területeken, vad és könyörtelen harcosoknak bizonyultak. Csak egy generáció kellett ahhoz, hogy a pillangóból pulykakakas váljék. Pedig a fajuk nem változott meg. Ugyanyolyan szinüek maradtak és ugyanolyan vér folyik az ereikben.

Az ellenkezőre is van példa. 1520-ban a mexicóiak épen ugy viselkedtek, mint a mai nácik. Gyermekeiket háborura nevelték, a fiaik állami iskolába jártak, ahol alig tanitottak egyebet. Ők is azt hirdették magukról, hogy verhetetlenek és a kicsiny védtelen falvak lakósaival szemben, azok is voltak. De már a spanyolok legyőzték őket. Vezéreiket megölték, templomaikat elpusztitották, kincseiket elkobozták és hatalmukat megtörték .

A mexicói paraszt ,aki még mindig az aztec nyelvet beszéli és akinek ereiben még mindig az aztec hóditók vére csörgedez, nem álmododozik többé a harctéri hősi halálról. Alázatos paraszt, akinek csak az a kivánsága, hogy békében müvelhesse kis birtokát, templomba járhasson, táncoljon, énekeljen és szeretkezhessen. Ezek a természetes, ösztönszerü kivánságok megmaradnak.

A faji előitélet célja csak az, hogy egy másik népet leigázzanak vele és az "alacsonyabb rendüség" cimkéje csupán az igazságtalanság és méltánytalanság leplezésére szolgál.

* * *

ADDAMS Janes (1860-1935). Amerikai társadalmi reformer, az amerikai "settlement house" név alatt ismert mozgalom megalapitója. Az első ilyen settlement házat Chicagoban nyitotta, amely a "Hull-house" név alatt lett ismertté. Társadalmi müködése elismeréséül a Nobel békedijat kapta.

ADLER Alfred (1870-1937). Osztrák orvos, aki a lelki betegségek után kutatott. Folytatta Freud orvos tanulmányait, de amig Freud a lelki rendellenességek okait leginkább a nemi rendellenességekkel magyarázta, Adler ujabb irányt jelölt ki a mások fölötti uralomvágyás és a másoktól való félelemben. Adlertól származnak az "inferior complex" (magát másoknál alantasabbnak tartó) és a "superior complex" (magát mások felülállónak tartó) kifejezések.

EGÉSZSÉGÜGY

A HOSSZU ÉLET TITKA

Dr. E. J. MURPHY

HA idős embereket megkérdeznek, hogy minek tulajdonitják hosszu életüket, a legtöbbször egymásnak ellentmondó, semmi értékes tanácsot nem tartalmazó válaszokat adnak. Igy nem csoda, hogy vannak, akik szerint a hosszu élet eléréséhez még fiatal korunkban valamilyen krónikus betegséget kell szerezni, amit aztán ha számos évtizeden át ápoltunk, hát megöregszünk. Jobban mondva, akinek valami betegsége van, az jobban vigyáz magára, mint az egészséges ember és sok esetben a betegség miatti gondos, tartózkodó élettel tul lehet élni az egészségeseket is.

Azonban mégis csak jobb, ha minden krónikus betegség nélkül érjük el az aggkort. Az előrelátó ember tehát vigyáz az egészségére, oly életet él, amellyel elejét veszi a betegségeknek; szóval gondol arra, hogy hosszu életet kiván. Különösen ajánlatos a 40 évet elért embereknek bizonyos egészségügyi szabályok betartása, mert az idősebb test nem birja el azon megerőltetéseket, amiket a fiatal fel sem vesz. Egy amerikai szállóige szerint az élet a 40 évnél kezdődik. Egészségügyi vonatkozásban ezt igy kell értelmeznünk: 40 évtől kezdve már nagyobb gonddal vigyázzunk magunkra.

Noha a hosszu élet eléréséhez nem lehet szabályokat adni, mindazonáltal az alábbi tanácsok betartása segiti a középkoru egyéneket abban, hogy egészséggel menjenek át az öreg korba.

1. Lassan járj, tovább érsz! — mondja a közmondás. Lassulj le mindenben, ha elérted a 40 évet. Az embernek ugyan nincs fékelő készüléke, mint a jármüveknek, de a középkort elért egyén helyesen teszi, ha ugy a munkájában, mint a mozgásban, sőt még a gondolkozásban is féket alkalmaz, lassabban csinálja, mint azelőtt. Fékelő készülék hiányában az embernek tudatosan kell magát rászoktatni erre a lassubb munkára és mozgásra. Egy ideig mindig gondolni kell rá. Később aztán már megszokja az ember ezt a lelassitott tempót. A gyors munka, gyors mozgás, izgatott élet a korai s rendesen csak rövid ideig tartó öregséghez vezetnek, a lassubb tempóju élet pedig megnyujtja az aggsághoz vezető időt.

2. Kerülni kell a kimerülést. A nagymérvü kimerülés gyilkosa a középkoru embernek. A nagy fáradtság nagymennyiségü mérgező anyagokat vált ki a testből, amelyek aztán megrongálják az idegrendszert. A kimerültségig tartó munka katasztrófa felé hajtja az embereket.

3. Tanuld meg, hogy időközönként szükséged van a pihenésre, méghozzá olyan pihenésre, amelyben nemcsak az izmok, de az idegek is pihennek. Aki megteheti, annak ajánlatos, ha napközben is ledül 20-30 percre.

4. Ne engedd idegrendszered megzavarni érzelmeid által. Az érzelmi világból eredő támadások megzavarják az emésztést, elősegitik a magas vérnyomást és szivbajokat okoznak. Ilyen érzelmi dolgok például a féltékenység, bosszankodás, rosszakarat, bosszuvágy, stb.

5. Gyakorold a türelmességet

A mai időkben arra mindenkinek szüksége van. A külesemények folyása felett nem rendelkezünk, de igen is szabályozhatjuk érzelmeinket, amelyeket a külvilági események kiváltanak belőlünk. Legyünk tehát nyugodtak, biráljunk minden dolgot óvatosan s ne hagyjuk, hogy nagy izgatottságot váltsanak ki belőlünk.

6. Keress magadnak valamilyen rendszeres szórakozást, kedvtelést, “hobby”-t, mint az amerikaiak mondják; valami olyasmit, ami különbözik napi foglalkozásodtól. Ilyesmik például valaminek a gyüjtése, fényképezés, olvasás, zene, stb. Az ilyen “hobby” rendkivül alkalmas a napi fáradalmak kipihenésére.

7. Legyél saját egészségügyi felügyelőd. Vigyázz arra, hogy az emésztésed rendes legyen. Szoktasd magad ahoz, hogy a nap azonos óráiban legyen székleted.

8. Kisérd figyelemmel a sulyod és öv vastagságod. Elhizás a 40 éven felül nagyon káros hatásu, mert akadályozza a sziv, a máj és a vesék normális müködését.

9. Vigyázz a vészjelekre. Krónikus szorulások, gyakori fejfájás, állandó fáradtság olyan jelek, amik mutatják, hogy valami baj van és ilyenkor orvoshoz kell fordulnod.

10. Határozd el, hogy nem leszel, “aggastyán”, ha nagy időt érsz is el. Aggastyán az, aki a multban él, akit a jelen már nem érdekel. Ne sóhajtozz a letünt “jó napok” után. Ne veszitsd el a napi események utáni érdeklődésedet. Igyekezz szellemileg fiatal maradni. Ne zugolódj ha körülötted uj világot látol kifejlődni. Próbáld beleélni magad, legyél részese és nem a mult távolából szemlélője környezetednek. Ez teszi az öreg kort nemcsak türhetővé, de sokszor boldoggá is.

(Labor)

—

Uj ojtószerek.

Az orvosi tudomány nagymértékben alkalmazza az ojtásokkal való gyógyitást, illetőleg betegségek elleni védekezést. A gyógyászat ezen nemét a francia Louis Pasteur fedezte fel, aki rájött, hogy az ember (vagy állat) teste automatikusan védekezik a testbe került korcsirok ellen. A test bizonyos mérgeket fejleszt a korcsirok megölésére. Ezen mérgek amelyeknek a “toxin” nevet adták, képesek a testbe került baktériumok elölésére bizonyos körülmények között.

Ilyen körülmények egyike az, hogy a toxinok gyorsabban szaporodjanak, mint a baktériumok, vagy egyéb korcsirok. Ezért Pasteur a meggyengitett baktériumokból szérumokat készitett, amelyekkel ha beojtanak embert vagy állatot, akkor azokban a toxinok gyorsabban fejlődnek, mint a baktériumok és a testet a betegség ellen semlegesitik.

Pasteur fellépése óta nagyon sokféle szérumot készitettek, mert a különböző baktériumok ellen mindig csak a megfelelő szérum használható. Vannak azonban olyan járványos betegségek, amiket nem baktériumok, hanem az azoknál jóval kisebb “virus” okoz. Amig a baktériumok százait választották már ki és tenyésztik zselatin, leves vagy egyéb más, ugynevezett “kulturában”, igy aztán lehet szérumot is késziteni, addig a virus kiválasztása még nem sikerült. A virus olyan kicsi, hogy átmegy a legfinomabb filtrálb készüléken is. Jelenlétéről azonban tudnak és tudják, hogy a fertőzött vér milliószoros higitásából vett cseppel még továbbitani lehet a betegséget.

Az orvosi tudomány arra is rájött, hogy amig a baktéria él és szaporodik zselatin, vagy más holt anyagon, virus csakis az élő testen él és szaporodik. Ez okozta a legnagyobb nehézséget arra, hogy vele kisérletezzenek. Pár évtizeddel ezelőtt azonban nagyon nekifeküdtek a csikebetegségek tanulmányozásának és látták, hogy bizonyos betegségek már a tojásban jelen vannak és a tojásból kibuvó csirkében azonnal tovább fejlődnek. Ekkor kisérletezni kezdtek a tojás beojtásával. A tojás kérgén pici nyilást vágtak, befecskendezték a szérumot és aztán visszahelyezték a kivágott kérget.

Két amerikai orvos, névszerint Dr. Ernest Goodpasture és Dr. Alice Hiles Woodruff a Nanshville városban fekvő Vanderbilt Egyetemen a virusok tovább fejlesztésére próbálták ki ezt a módszert. A megtermékenyitett tojásban élő sejt van, amely elég olcsó ily kisérletek számára. Az előbbi módszeren csak annyit változtattak, hogy a tojás kérgén vágott nyilást átlátszó plasztik lemezzel fedték be és igy figyelhették, hogy mi megy végbe a tojásban, amint az inkubatorba az embrio fejlődésnek indult. A siker minden várakozást felülmult.

Mindazonáltal amikor 1931-ben először jelentették kisérleteik eredményét az "American Journal of Pathology" cimü folyóiratban, nem keltett nagyobb feltünést. Csak később, mikor már többféle virust sikerült igy tenyészteni és azokból szérumot késziteni, ismerték fel a felfedezés óriási jelentőségét, mert már számos olyan virus betegséget sikeresen lehet gyógyitani, ami ellen addig semmit, vagy csak nagyon kevest tudtak védekezni.

A háboru természetesen meggyorsitotta az ily irányu kutatásokat és szérumok készitését. Most egyenlőre az összes szérumok a haderő részére készülnek, a háboru után azonban sok félelmes betegség kiirtására fognak vezetni.

Hogy milyen nagyfontosságu szerep jutott ezen uj ojtóanyagoknak, mutatja az, hogy a tropikus vidékekre küldött száz és százezer katona közül egy sem esett az azelőtt annyira félelmes sárga láz áldozatául. Az emberi nemnek ezt a kegyetlen gyilkosát az ujfajta ojtószerekkel ki fogják irtani a föld szinéről.

Egy másik nagyon veszedelmes járvány, amely ellen az uj módszer segélyével szérumot készitettek, a hirhedt influenza, amely az első világháboru után csaknem annyi emberéletet ragadott el, mint maga a véres küzdelem. Ma számos helyen nagymennyiségü influenza ellenes szérumot halmoztak fel arra az esetre, ha a járvány bárhol is felütné a fejét, azt azonnal lokalizálják és kiirtsák.

De nemcsak az emberek, hanem az állatok részére is készitenek szérumokat ezzel a módszerrel. Igy például ilyen szérummal vetettek véget a lovak között kitört nagy járványnak, amelyet az "enceohalomyelitis" (álomkór) virusza okozott és amely több mint 80,000 lónak az életét oltotta ki.

Legujabban azon kisérleteznek, hogy hasonló módon szérumot késziteenek a gyermek paralizis elleni védekezésre is, ami azonban eddig még nem sikerült.

* * *

Ha a Nap felrobbanna

Midőn egy csillag felrobban, akkor "nóva", vagy gázbuborékok tömege lesz, amely tömegben minden ilyen buborék egy-egy gőz állapotban levő égitest.

Dr. Dean B. McLaughlin (Michigan egyetem) számitásai szerint, ha a Nap ilyen nóva lenne és csak 10 napon át a mai meleg kisugárzását százezerszeresen emelné, akkor elég meleget küldene a földre, hogy itt minden anyag, még a kövek is megolvadnának egész 7 vagy 8 mérföldnyire. A tudós professzor szerint ezen tiz nap alatt a nap 3,800 trilliószor trillió kalória meleget küldene a földre. Ez jókora meleg lehet, ha meggondoljuk, hogy az átlagos munkásembernek a nap 24 órájában körülbelül 2000 kalória melegre van szüksége.

AKÁRMELYIK UTON

IRTA: O. HENRY

A "SUNSET EXPRESS" Tucson várostól mintegy husz mérföldnyire megállt, hogy a vonal melletti nagy viztartályból kielégitsék a gőzgép szomját. De a vizen kivül valami mást is kaptak, amit már nem igen köszöntek meg.

Mialatt a gépész és a segitője a nagy gummincső elhelyezésével voltak elfoglalva, a szeneskocsira felmásztak Bob Tidball, Shark Dodson és John Big Dog, egy félvér indián, — mindannyian szerencselovagok. John Big Dog előre mászott és valamit tartott a gépész és a fütő szemei elé. Ezek csak kis kerek nyilásokat láttak, de azok oly hatással voltak rájuk, hogy kezeiket egyszerre levegőbe emelték, mintha csak ezt mondták volna: "Engedelmeskedünk!"

Ekkor már a rablócsapat vezére, Shark Dodson is odaért. Az ő kezében is ott volt a revolver, amelyet mutogatott, miközben parancsait osztogatta. Ráparancsolt a gépészre, hogy oldja el a mozdonyt és vigye arébb, mintegy 50 yardnyira. A gépész és a fütő engedelmeskedtek. John Big Dog elhelyezkedett a szén tetején és puskáját lövésre készen tartva ügyelt a gépészre és fütőre.

Shark Dodson és Bob Tindball nem voltak közönséges tolvajok. A vonat utasaival nem igen törődtek, azok kiabálását lealacsonyitónak tartották. Ezért egyenesen a postakocsi felé mentek. A postás nyugodtan elszendergett, azt hivén, hogy a vonat a tiszta vizen kivül más veszedelmesebb anyagot nem vesz fel ezen a helyen. Bob azonban a revolvere agyával hamar kiverte ezt a gondolatot a szegény postás fejéből. Dodson pedig egy-kettőre elhelyezte a dinamitot a kassza alatt, felgyujtotta a kanócot, a kocsi másik végébe huzódtak és a kassza felrobbant.

A robbanás 30,000 dollárt hozott aranyban. Az utasok némelyike kinézett az ablakon és nézték, hogy honnan jön a zivatar .Menydörgésnek vélték a robbanást. A konduktor gyanitott valamit, meghuzta a csengő zsinórját, amely azonban a szabadba lógott az első kocsi végén. Dodson és Tindball kézitáskába rakták az aranyakat, kiugrottak a postakocsiból és a mozdonyhoz szaladladtak.

A gépész dühös volt ugyan, de azért jónak látta az engedelmességet és gyorsan meginditotta a gépet az elhagyott vonattal ellenkezőleges irányba. Mielőtt azonban megindulhattak volna, a postás, akit előbb a revolvere agyával megkenegetett Bob Tindball, kiugrott a kocsiból és részt kért magának a játékból. John Big Dog még mindig a szén tetején ült s előre nézett, ügyelt a gépészre és a fütőre. A postás célbavette és mert kitünő lövő volt, éppen a két válla között találta. A félvér indián szerencselovag egyet hördült aztán lefordult a szénrakásról. Ezzel egyhatoddal emelte két társának a 30,000 dollárból rájuk eső részt.

Mintegy két mértföldnyire Dodson ráparancsolt a gépészre, hogy álljon meg. Leszálltak, bucsut intettek a gépésznek és a fütőnek, akiknek gyorsan tovább kellett menni a géppel, majd a környező sürü erdő-nek vágtak neki. Körülbelül öt percig törtettek a sürü bozóton keresztül, amikor kis tisztásra akadtak. itt három felnyergelt ló várt rájuk. Az egyik ugyan John Big Dogra várt, aki azonban már nem igen fog többet lovagolni sem nappal, sem éjjel. Ezt a lovat megszabaditották a nyeregtől a kantárjaitól s azután szabadon engedték. A két rabló lóra kapott és a keskeny, kanyargós ösvényen gyorsan tovaügettek.

A rablott aranyat zsákba tették és a Dodson nyerge előtt keresztbe fektették a lovon. Rövid futam után a Tidball lova megcsuszott a vizes mohán ,elesett és kitörte az egyik első lábát. Azonnal fejbelőtték a szegény állatot, aztán letelepedtek tanácskozni. Egyelőre biztonságban érezték magukat. Már jó utat megtettek és reggelnél előbb nem igen indulnak üldözésükre. Akkor is jó időt fog igénybe venni, amig nyomukra akadnak. Közöttük és az üldözőik között tehát sok óra és sok mértföldnyi ut feküdt.

Dodson leeresztette a lova kantárát, kötelet erősitett rá és legelni engedte. A ló jóizüen ette a kis csermely mentén nőtt kövér füvet. Tindball kinyitotta a zsákot és kivett egy marék aranyat. Szinte gyerekes örömet érzett az arany látásán.

— Hallod, mégis csak nagy gazember vagy te, — mondotta hizelegve Dodsonnak, — én nem hittem, hogy igy fog sikerülni. Ezzel lepipáltunk mindenkit Arizonában.

— De honnan veszünk most lovat neked, Bob? — kérdezte Dodson, aki nem osztozott a Tindball örömében. Itt nem várhatunk valami sokáig. Nap felkeltekor már a nyomunkban lesznek.

— Oh, én ugy hiszem, hogy a te "szárnyasod" elvisz mind a kettőnket — mondta Tindball. — Elcsipjük az első lovat ,amellyel találkozunk . . . A teremfáját, ezt jó csináltuk, ugy-e? Az irás szerint itt 30,000 dollár van, 15,000 jut mindegyikünknek.

— Jóval kevesebb, mint ahogy számitottam, — válaszolta Dodson, gyengén megrugva csizmája orrával az arannyal telitett zsákot. Aztán gyanakodólag nézte a kifáradt lovat. — Bolivar igen fáradtnak látszik. Bárcsak baja ne esett volna a lovadnak.

— Engem is aggaszt egy kicsit — mondta Tindball, — de Bolivar erős ló, elvisz bennünket annyira, hogy uj lovakat szerezhetünk, Hanem nekem az a legfurcsább, hogy egy ilyen ember, aki a Keletről jön, mint te, hogyan ért ilyen jól az ilyen dolgokhoz. Még mi is tanulhatunk tőled, pedig azt tartják, hogy igazi deszperádók csak a Nyugaton teremnek. Az ország mely részében nevelkedtél, hogy ilyesmihez is értesz?

— New York államban, — szólt Dodson, majd beleharapott a rágódohányba és aztán folytatta. — Ulster megyében születtem egy kis farmon, de megszöktem amikor 17 éves voltam. Egészen véletlen, hogy idekerültem. Kis podgyászommal a kezemben New York irányába tartottam. Ugy gondoltam, hogy New Yorkba megyek és sok pénzt fogok keresni. Azt képzeltem, hogy szerencsés leszek, aki nagy vagyont fog szerezni a világvárosban. Valami belső ösztön azt sugta, hogy nagy vagyon vár reám. Az egyik este aztán keresztuthoz értem. Nem tudtam melyiken folytassam tovább az utamat. Félóráig is tanakodtam, hogy melyiket válasszam. Végre is a baloldalit választottam. Másnap ezen az uton vándor cirkuszra akadtam és csatlakoztam hozzájuk, igy jutottam a Nyugatra. Sokszor eszembe jut, hogy mi lett volna belőlem, ha akkor nem a bal, hanem a jobb oldali utat választom?

— Azt hiszem, hogy éppen igy végezted volna, — mondta Tindball derülten. — Nem az a fontos, hogy melyik utat választjuk, hanem az, hogy mi lakik bennünk és ez érvényre jut, akármelyik utra lépünk is.

Bob Tindball visszahelyezte az aranyakat a zsákba, bekötötte jó erősen nehogy utközben megoldódjon. Mikor ezzel a munkával elkészült és fejét felemelte, rámeredt Shark Dodson hatlövetü revolver csövének a nyilása.

— Ne bolondozz — mondta Bob nevetve, — jó lesz ha készülsz és indulunk!

— Maradj nyugodtan, — parancsolta Dodson, — te már nem fogsz indulni innen. Nehezemre esik bár, de meg kell mondanom, hogy csak egyikünk menekülhet. Bolivar ki van fáradva és nem birná el a kettős terhet.

— Három éve már a legobb bajtársak vagyunk, Shark Dodson, — mondotta Bob elhalványodva. — Három év óta osztozunk jóban rosszban, most csak nem hagysz itt?

Dodson arckifeezése egyszerre hideg, kegyetlenné lett, mely azonban nem tudta palástolni a pénz utáni sóvárgását. Ebben a pillanatban ördögi lelkének képe teljes borzalmasságában ült ki az arcára.

És igaza volt. Bob Tindball nem indult el ujra. Az áruló barát meghuzta a fegyver ravaszát és a fegyver dördülését, Tindball halálorditását elnyelte az erdő rengetegje. Bolivár nem sokat törődött az egész dologgal. Engedelmeskedett a parancsnak és gyorsan tovább vitte a "Sunset Express" rablóinak utolsóját, a rablott zsákmánnyal együtt. De ha értette volna is, hogy milyen eseménynek volt tanuja, akkor csak annak örült volna, hogy nem kellett kettős terhet szállitania.

Amint Shark Dodson tovább galoppolt az erdőben, sürü ködbe ért, amelynek oszlása után a kezében levő revolver mahagoni szék karjává változott, a nyeregből gyönyörüen párnázott fotel lett és amint felnyitotta a szemét, a lába nem a kengyelben, hanem a mahagoni irodaasztal sarkán nyugodott.

—

Mondom, hogy Mr. Dodson, a Dodson és Decker new yorki bankcég tuladonosa kinyitotta a szemét. Peabody ,a bizalmas titkár állt asztala előtt és habozott, vajjon szóljon-e? A szobában gyenge, altató morajt tartott fenn a villamos legyező.

— Hm! Peabody, — mondotta Dodson, szemét dörzsölve, — ugy látszik, hogy elaludtam. És milyen érdekes álmom volt! Jól elszundithattam . . . Nos, mi baj, Peabody?

— Mr. Williams van itt uram, a Tracy és Williams cég feje. Eljött, hogy halasztást nyerjen öntől az X. Y. kötvényekre vonatkozólag. Az árak nagyon magasra szöktek. Képtelen mind kiegyenliteni . . .

— Igen, igen, emlékszem már. Mi most az X. Y. árfolyama?

— Száznyolcvanöt, uram.

— Akkor ezzel az árral kell neki kiegyenliteni.

— Bocsánat uram, — szólt Peabody reszketve, — talán mégis meghallgatná Williams urat. Régi barátja önnek, sokat segitett önön annak idején. Ön teljesen ura most az X. Y. kötvényeknek. Önnek 98-ért adta ezeket a részvényeket. Ha most kiegyeliti a különbözetet, rámegy minden centje, még az otthona, a butorai is. Talán lehetne . . .

Dodson arckifejezése egyszerre hideg, kegyetlenné lett, amely azonban nem tudta palástolni a pénz utáni sóvárgását. Ebben a pillanatban ördögi lelkének képe teljes borzalmasságában ült ki az arcára.

— Fizetni fog száznyolcvanötével! — mondotta. — Bolivar nem bir el kettős terhet.

Geréb József forditása.

HOGYAN BESZÉLJÜNK

GYAKORLATI TANÁCSOK MUNKÁS ELŐADÓK SZÁMÁRA.

(A Bérmunkás multévi Naptárában “Hogyan irjunk a munkáslap részére” cimmel terjedelmes cikket közöltünk Morris Watson munkás lapszerkesztőnek “How to write for your Union Paper” cimü füzetének alapján. A munkásmozgalom aktiv tagjainak azonban az iráson kivül igen nagy szükségük van arra, hogy kisebb vagy nagyobb tömegekhez beszélni tudjanak. Jelen irásunkkal, amelyet a CIO által kiadott “Adivces to the inexperienced Speaker” (Tanácsok gyakorlattal nem biró szónokok számára) cimü füzet alapján állitottuk össze, gyakorlati tanácsokat kivánunk adni azon munkástársainknak, akik a forradalmi ipari unionizmus, — avagy általában a munkásmozgalom szolgálatában gyüléseken beszélnek. De nagy hasznát veszik az itt felsorolt tanácsoknak és adatoknak még a személyes vitatkozások, a háziagitációk alkalmával is. A füzet, valamint a szöveget kisérő tréfás illusztráció átengedéséért a CIO szervezetnek tartozunk köszönettel, — Szerk.)

NAGYON sok munkásembert alaposan megijeszt, ha felkérik, hogy valamely gyülésen tartson egy rövid előadást.

— Nem értek én ahoz,, — szabadkozik az a munkástárs, aki máskülönben igen értelmesen el tud beszélgetni a közönséget érdeklő problémákról.

Pedig kevés gyakorlat után minden értelmes ember képes rövidebb beszédek hatásos elmondására. Természetesen nem lesz belőlük professzionális szónok, aki éveken át tartó tanulás és gyakorlat után jól érti a szónoklat minden csinját-binját; aki tudja nemcsak azt, hogyan lehet a közönséget felvilágositani, de azt is, hogyan lehet hallgatóit félrevezetni. Mi olyan munkás szónokokra gondolunk, akik valóban hisznek valamilyen eszmében és ezen eszme iránt meggyőződésüknek szavakban kifejezést tudnak adni. Mert arra, hogy valaki jó és megnyerő szónok legyen, nem nagy tudás és előképzettség, hanem őszinte meggyőződés kell. Nagyon nehéz másokkal elhitetni az olyan dolgot, amiben magunk nem hiszünk.

A munkás szónoknak az a nagy előnye, hogy nem kell alakoskodnia, mert hisz abban, amit hirdet és aminek támogatására meg akarja nyerni a hallgatóit. Igy minden munkásember őszintén beszélhet a munkásság szervezkedési jogainak fentartásáról és további kiterjesztéséről. Avagy arról, hogy olyan társadalmi rendszert akarunk, amelyben minden hasznos munkát végző egyénnek az élete biztos legyen, ne kelljen félnie a munkanélküliség rémétől. Ilyen tárgy például a társadalmi biztositás, a faji egyenlőség, a sajtó és a szólás szabadság, stb. problémái.

És végre a forradalmi ipari unionizmus hiveinek kimerithetlen anyagot szolgáltat a szervezkedés helyes voltának magyarázata, melyre vonatkozólag részletes adatokat nyujtunk jelen Naptárunk “Egy Nagy Szervezet” cimü cikkében.

Készülni kell a beszédre.

Kezdő szónok nem számithat arra, hogy kellő előkészület nélkül hatásos beszédet tudjon tartani. Ne tévesszen meg senkit az, hogy gyakorlott szónokok csak egy kancsó vizet és egy poharat tesznek az asztalra. Egy korty viz néha szükséges, de sokkal fontosabb az, hogy a beszédet napokkal, vagy hetekkel előbb **megirjuk és betanuljuk.**

Igen, ez fontos! Ha nincs elég gyakorlatod a szónoklásban, akkor készitsd el a beszédedet irásban. És fogjál hozzá idejében, ne hagyd az utolsó percre.

De hogyan kell egy beszédet elkésziteni? — bizonnyal kérdezed. Igen egyszerü. 1. Csak olyan tárgyról beszélj amit jól imersz. 2. Ha nem vagy járatos a tárgyban, amiről beszélned kell, gyüjtsd össze az adatokat. Végre is csak nem gondolod, hogy valami kitünő beszédet leszel képes kivágni olyan tárgyról, amiben nem vagy járatos?

Ha már megvannak az adataid, akkor el kell rendezni azokat, az az bizonyos sorrendbe igyekezz felsorakoztatni. Erre vonatkozólag az a szokás a legáltalánosabb, hogy először is megmondod, hogy miről fogsz beszélni; azután elmondod, mondani akarsz és végül megmondod, hogy már elmondottad a mondókádat. Ennek megfelelőleg minden beszéd három főrészből áll: bevezetés, tárgyalás és befejezés (konkluzió).

BERNARDA BRYSON

Egy kancsó viz még nem elegendő a jó beszédhez.

A bevezetés legyen rövid. Ennek a célja nemcsak az, hogy bejelented miről fogsz beszélni, de egyben olyannak is kell lennie, hogy megnyerjed vele a közönség rokonszenvét, mert csak igy tudod elérni, hogy figyelemmel kisérjék további fejtegetéseidet.

A tárgyalás a beszéd tulajdonképeni teste. Ebben sorakoztasd fel a tárgyra vonatkozó összes érvedet meg hozzá ugy, hogy azok egymást támogassák és szugerálják azt a konkluziót, amit a beszéd utolsó részében fogsz bejelenteni.

A befejezés rövid legyen. Az érveket összegezd és mutass rá a konkluzióra és ha szükséges, hivd fel hallgatóidat, hogy álljanak a szóbanforgó eszme szolgálatába.

Mikor a beszédedet igy irásban összeállitottad, olvasd el azt gondosan, aztán vedd elő az ollót és vágd ki a nem fontos részeket. A rövid, de tartalmas beszéd mindig nagyobb hatást ér el mint a hosszu szónoklat, amely tele van jelentéktelen érvekkel. Gondolj erre a közmondásra: Hosszu lének hig a leve!

A beszéd elmondása

Persze a beszéd elkészitése még nem elégséges, mert hiába tudod, hogy mit akarsz mondani, ha nem tudod, hogyan kell azt elmondani. Itt tehát megint elérkeztünk ahoz a kérdéshez, hogyan kell a beszédet elmondani?

Beszédek elmondásánál általában három módszert alkalmaznak:

1. Fel lehet olvasni az elkészitett irásból. Ez nem valami jó módszer. Valójában csak a tudományos előadásoknál, vagy az olyan beszédeknél hatásos ez a módszer, ahol sok számadat, képlet vagy idézetet tartalmaz a beszéd és igy természetes, hogy azokat jegyzetből olvassuk fel.

Idejében fogj hozzá beszéded megirásához.

2. Jegyzetek nélküli beszéd. Erre csak a gyakorlott szónokok képesek. Azoknak természetesen nincs szükségük a mi tanácsainkra. Másokat azonban óva intünk az ilyen kisérlettől.

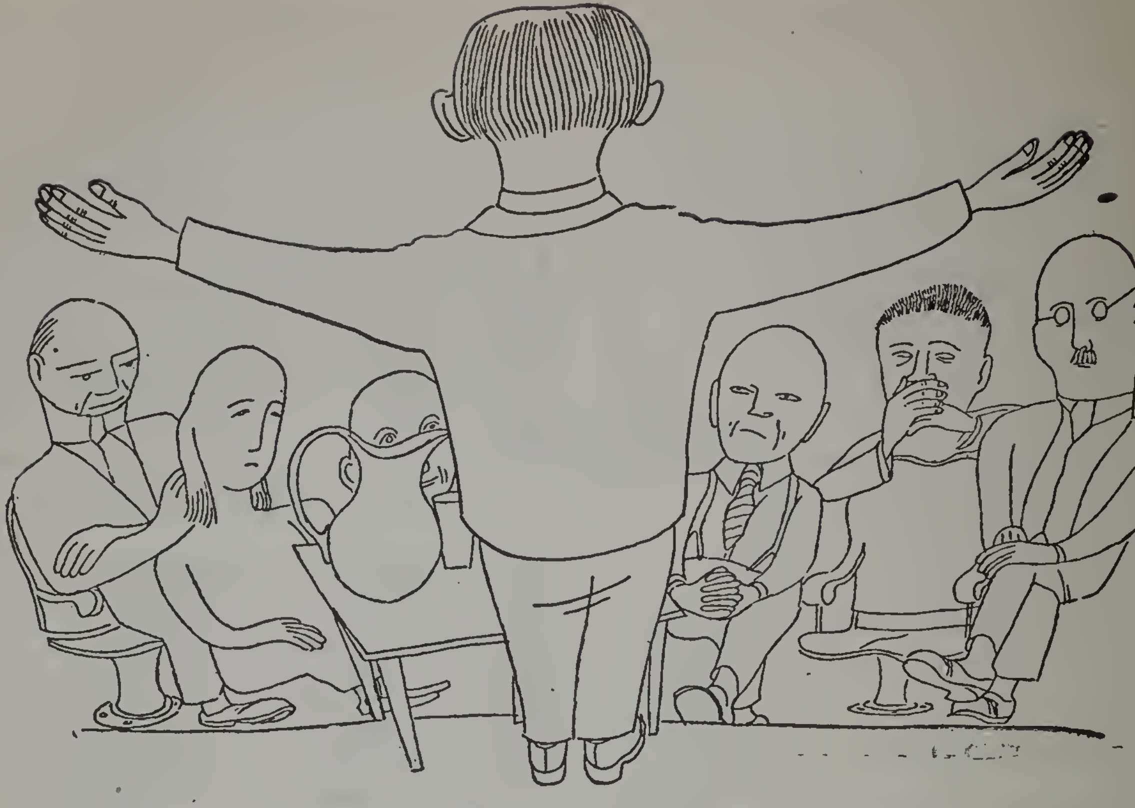
3. Be kell tanulni a beszédet, még hozzá alaposan és még annak dacára is magunk elé tesszük az irást, ami a biztonság érzetét kölcsönzi.

Ezt a módszert ajánljuk minden kezdő szónoknak. Itt is gyakorlat teszi az embert mesterré. Demostenes görög szónok a patakhoz ment és a vizharsogását tulkiabálva gyakorolta beszédeit. Mi nem ajánljuk most senkinek ezt a módszert, de igenis ajánljuk, hogy tanuld be a mondanivalódat és otthon a tükröd előtt mond el nem is egyszer, hanem többször. Igy egyben megfigyelheted, hogy mennyi ideig tart elmondani a beszédet és ragaszkodhatol a számodra engedélyezett időhöz.

Félsz, hogy ideges leszel? Hát nem tudod, hogy minden szónok ideges volt először? Szerencsésen keresztülesel rajta éppen ugy, mint mások. Azért ajánlatos, hogy a beszéded jól betanuld .Ha nem is mégy a patakhoz, mint Demostenes, de elharsoghatod beszéded munkaközben a géped mellett, hiszen a gépek is csinálnak olyan zajt, mint a patak. Szóval gyakorold a beszéd elmondását ott, ahol csak lehet.

Gondolj arra, hogy hallgatóidnak másnap munkába kell menni, ne nyujtsd beszéded tul hosszura.

Kezd valamilyen megszóllitással a beszédet. Megszokott megszóllitás munkás gyüléseken: Munkástársak! Munkástestvérek! Kedves hallgatóim! stb. Munkás hallgatóságnak tulságos hizelgő megszóllitása, nem ajánlatos. A megszóllitásnál nézz végig a közönségen. Addj pár pillanatot arra, hogy mindenki rád nézzen. Aztán kezdj hozzá a be-



Oly tárgyról beszélj, amely érdekli közönségedet.

szédedhez. Beszélj tisztán és ne gyorsan és ne tulságos emelkedett hangon, vagyis kiabálva mindjárt a kezdetben, igy megnyerheted a hallgatóid szimpátiáját, amit később már könnyebb megtartani.

Beszéd közben nézz végig a közönségen. Lehetőleg a legtávolabbi soroknak és ne az előtted ülőkhöz beszélj. Ne feledd, hogy amit az utolsó sorok meghallanak és megértenek, azt hallják az első sorban is, forditva azonban már nem áll ez a dolog.

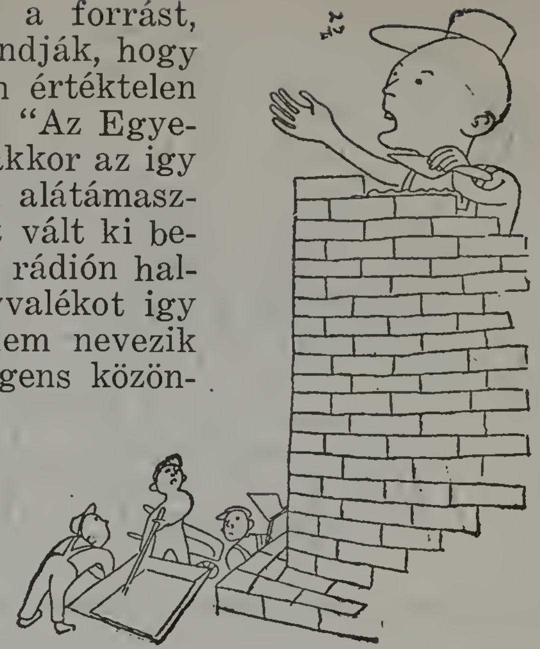
Ne zavarjon az, ha valaki ásit vagy köhög. Ezek olyan emberi tulajdonságok, amelyeket nem lehet kiküszöbölni olyan helyekről, ahol többen vannak együtt. Sőt még azt is el kell türnöd, ha valaki felkel és kimegy beszéded alatt. Csak a nagyon gyakorlott szónokok tudnak ilyen esetekben olyan megjegyzéseket tenni, amik nem vetik ki a beszéd sodrából.

A tények beszélnek.

A jó beszéd valójában nem más, mint választ valamilyen fontos kérdésre. Miután minden kérdést számos oldalról meg lehet világitani, igy a beszédben is hasonló módon fel kell sorakoztatni a tárgyra vonatkozó összes fontos érveket, a tényeket, hiszen tudott dolog, hogy a **tények beszélnek,** az az bizonyitanak. A tények hiányát nem lehet eltakarni kiabálással, vagy suttogással, mások kiejtésének kigunyolásával, stb.

Egy ismert politikus mindig széljegyzeteket irt az előre elkészitett beszédére, jelezte magának, hogyan mondja el a jelzett részt, ilyenformán: "Ezt lágyan, érzelmesen"; "Meg kell ismételni nyomatékosan s időt engedni, hogy jól megjegyezzék", stb. Az egyik szakaszhoz aztán ezt a megjegyzést füzte: "Ezt a részt erősen harsogni kell, mert az érvelés nagyon gyönge". Nos, mi ugy tartjuk, hogy az érvek gyöngeségét nem lehet takarni kiabálással.

Az adatok felsorolásánál nevezd meg a forrást, ahonnan vetted. Sohase használd az "azt mondják, hogy . . . ." formát. Az "azt mondják" teljesen értéktelen authoritás. Ellenben ha például ezt mondod: "Az Egyesült Államok 1940-es cenzusa szerint . . . ", akkor az igy felsorolt tényt már a forrás megnevezésével alátámasztod. De ne feledd, hogy milyen rossz érzést vált ki belőled, amikor az ujságokban olvasod, vagy a rádión hallod, amint valamilyen patent medicina kotyvalékot igy hirdetnek: "Orvosok ajánlják . . . ", de nem nevezik meg az ajánló orvosokat. Ilyesmit az intelligens közönség már nem tür el.



Gyakorold beszédeded elmondását mindenütt ahol csak lehet.

Azonkivül ügyelned kell arra, hogy minden adat, — különösen a szám és a dátumok, amiket idézel, helyesek legyenek. Ha a beszéd után hozzászólások következnek a helytelenül idézett dátumok vagy számadatok megemlitésével teljesen leronthatják beszéded sikerét.

Munkásgyüléseken rendesen a közönség is hozzászól a tárgyhoz a szónok beszédének befejezte után, azaz szokásos kérdéseket feltenni. A szónoknak el kell készülni arra, hogy minden árnyalatu kérdésre, ami a tárgyat érinti, feleni tudjon.

Mindig ismételd meg a kérdést, amelyre válaszolsz. Ezzel elejét veszed annak, hogy másról beszélsz, mint a kérdező óhajtotta. Ha a kérdés nem tartozik a tárgyhoz, azt udvariasan megmondhatod. Pár szóval meg lehet magyarázni, hogy a felvetett kérdés igen érdekes, de kiesik a jelenleg tárgyalás alatt álló probléma keretéből és az idő nem engedi, hogy annyira eltérjünk a tárgytól, de majd más alkalommal arról is lehet beszélni. Nem kell kigunyolni a kérdezőt még akkor sem, ha rosszakaratu kérdést tesz fel. Ily esetben csak rá kell mutatni, hogy az ilyen kérdéssel való foglalkozás eltériti a gyülés figyelmét az eredeti tárgytól.

És végre nem kell szégyenleni azt sem, ha valamelyik kérdésre, amelyik a tárgyhoz tartozik ugyan, de még sem tudsz választ adni. Ilyenkor leghelyesebb, ha nyiltan megmondod, hogy a kérdésnek ily szempontból való vizsgálatával még nem foglalkoztál és köszönd meg a kérdezőnek, hogy erre is felhivta a figyelmedet. Az ily őszinteség jobban biztositja a sikert, mintha "hasból" bluffolva válaszolnál a kérdezőnek.

Kezdő szónok részére általában a következőket ajánljuk:

1. Ne feledd, hogy hallgatóidat valamilyen eszme szolgálatába akarod állitani.

2. Ragaszkodj tehát szorosan a tárgyhoz, ne kalandozz el attól beszéd közben.

3. Inkább legyen egy kicsit rövid, mint egy kicsit tulhosszu a beszéded.

4. Csak arról beszélj, amiben magad is hiszel, akkor őszinteséged segit hallgatóid meggyőződésében.

5. Beszéded tárgyát korlátold. Ne igyekezz a világtörténelem összes fontos eseményeivel foglalokzni félórás beszéd keretében. Minél szükebb körre korlátozod a beszéded, annál kimeritőbb képet tudsz arról adni.

6. Adatokkal, érvekkel győzd

Üres, vagy semmitmondó frázisok nem elégitik ki a hallgatókat.

meg hallgatóidat.

7. Harsogás, kiabálás vagy másféle "bluff" ellenszenves a csak valamennyire is intelligens közönségnek.

8. Alkalmazd beszéded közönséged értelmi fokához.

9. Igyekezz megnyerni közönséged rokonszenvét ugy, hogy ne csak a szónokot, de a barátot is lássák benned.

10. Kerüld a személyeskedést. Személyeskedésnek nincs érvelő ereje.

11. Összegezd az érveidet ugy, hogy azok szugerálják a kivánt konkluziót.

12. Ne csak helyes érveket sorolj fel, de mond el azokat **helyesen** is.

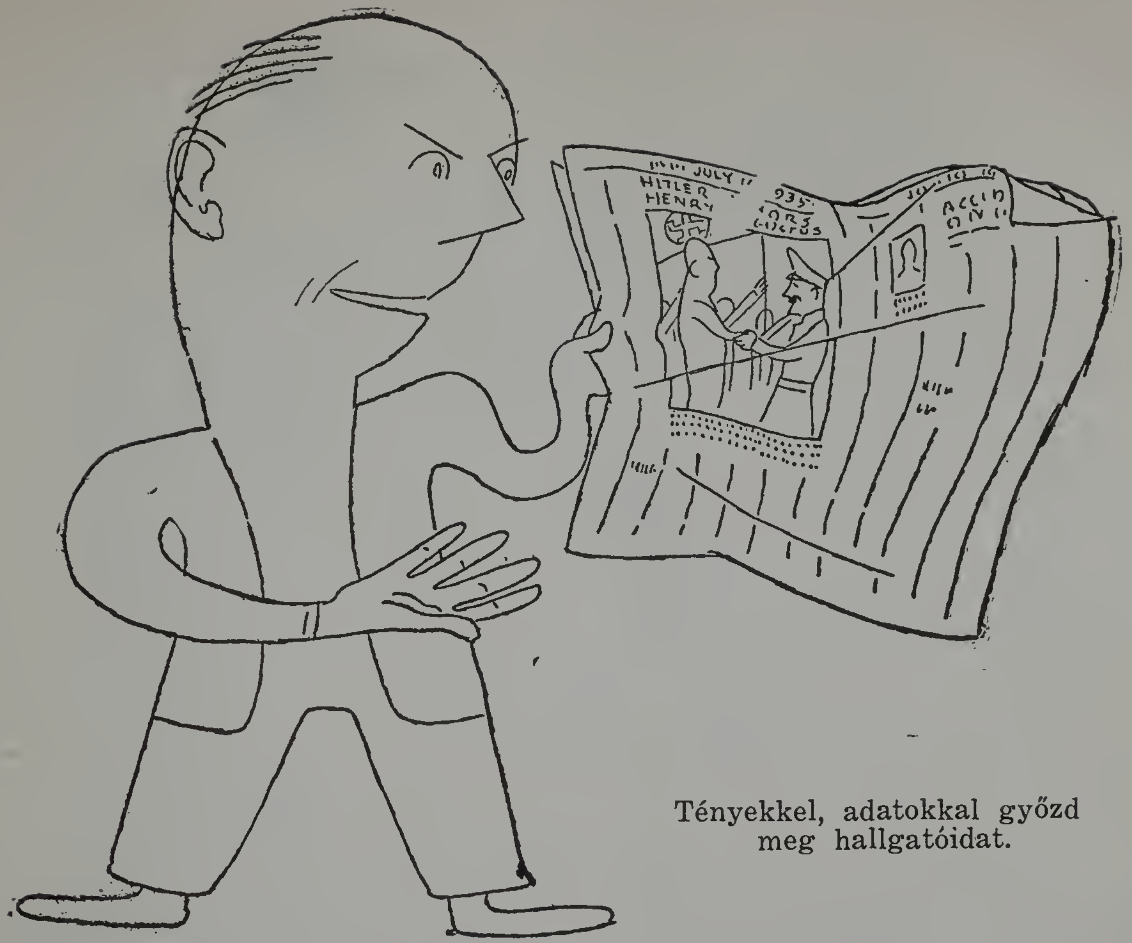
A közeljövőben még a mainál is jobban előtérbe nyomulnak az alábbi problémák:

1. Védekezés a munkanélküliség ellen.
2. A nagy drágaság és a bérek.
3. Adózás és infláció.
4. Munkásjóléti intézkedések.
5. Az agrár kérdés.
6. A néger kérdés.
7. Antiszemitizmus.
8. A szervezkedés helyes módja.
9. A sztrájk, mint a munkások leghathatósabb fegyvere.
10. Politikai akció.

Az alábbiakban a fenti problémákra vonatkozó adatokat sorolunk fel, melyeket nem csak előadások alkalmával, hanem házi agitációknál és indiferens munkásokkal való beszélgetés közben is sikeresen használhatunk.

MUNKÁSOK: A United States munkaügyi minisztérium statisztikája szerint 1939-ben az Egyesült Államoknak 39 millió ipari és agrár munkás volt. Ez a szám 1943-ban már 44 millióra emelkedett és a legutóbbi kimutatás szerint most 57 millió, dacára annak, hogy 11 millió egyént a haderő foglal le. Ha ezeket is számitjuk, akkor jelenleg 68 millió ember nyert foglalkozást. Igy ez a háboru bebizonyitotta, hogy **meg van a lehetőség arra, hogy mindenki, aki csak akar dolgozhasson.** A kérdés tehát ez. Miért nem lehet éppen ugy foglalkoztatni a munkásokat a nép jólétének az emelésére, mint ahogyan lehetett a háboru vagyis a pusztitás céljaira?

TERMELÉS: Ugyancsak a statisztikai hivatal kimutatása szerint az Egyesült Államok árutermelése 1932-ben 47 és fél billió dollárt tett ki, ami 1939-ben már 88 és fél billióra emelkedett fel, 1943-ban, pedig már elérte a 186 billiós számot. Ezen számok mutatják, hogy amig a munkások száma 1939-től 1943-ig csak 25 százalékkal emelkedett, addig az általuk termelt érték emelke-



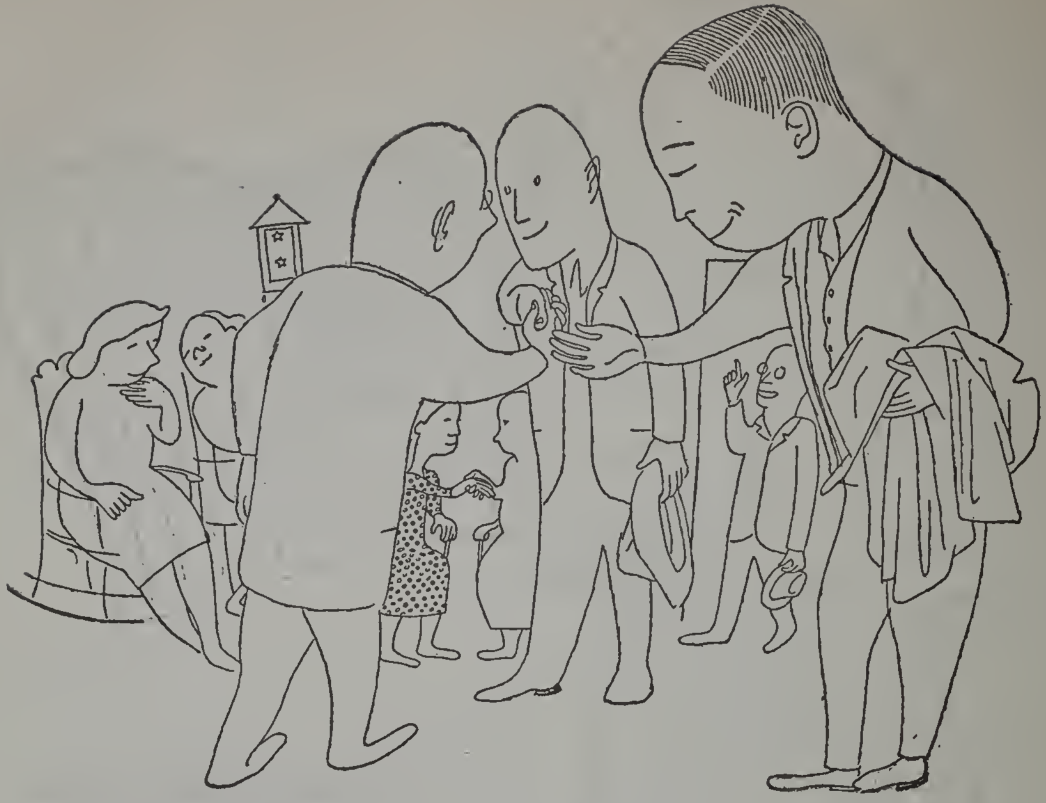
Tényekkel, adatokkal győzd meg hallgatóidat.

dése több mint 100 százalékot mutat, vagyis a munkások számának egy-negyeddel való szaporitása a termelést megkétszerezte.

MUNKABÉREK: A Department of Labor kimutatása szerint 1939-ben az iparok, vagyis a munkások és tulajdonosok összjövedelme 70.8 billió volt, 1943-ban pedig már 147.9 billió. Igy a munkások számának egy-negyeddel való megnövesztése az iparok jövedelmét több mint kétszeressére emelte. Vagyis az általgos munkás majdnem kétszer annyit termelt 1943-ban, mint 1939-ben. De kétszer akkora fizetést kapott-e? Dehogy is kapott! Ugyanazon statisztikai forrás szerint 1939-től 1944-ig a munkabérek csak 37 százalékkal emelkedtek, a "management", vagyis a tulajdonosok jövedelmei ellenben 281 százalékos ugrást mutatnak. Ezt aligha lehet **igazságos** elosztásnak nevezni.

DRÁGASÁG: California Egyetemének Heller Bizottsága a megélhetési árak emelkedését figyelve az alábbi adatokat tette közzé: A négy tagu család **tisztességes** megélhetéséhez 1943-ban 2900 dollárra volt szükség minimálisan. A bizottság szerint minden **három munkáscsalád közül kettőnek nincs meg ez a jövedelme.** A háborut megelőzőleg a viszonyok még rosszabbak voltak és a hadiiparok beszüntetése után megint a munkáscsaládok jövedelmének esése várható. Ezen bizottság állitása szerint 1936-ban például az ipari munkások negyven százaléka, a földmüves munkásoknak pedig 79 százaléka nem érte el az évi 1000 dolláros keresetet.

Ezzel szemben a drágaság emelkedésére vonatkozólag a következő adatokat kaptuk részben a Department of Labor irodájától, részben pedig az unionok által kinevezett bi-



Ahol csak lehet, már a gyülés előtt ismerkedj a közönségeddel.

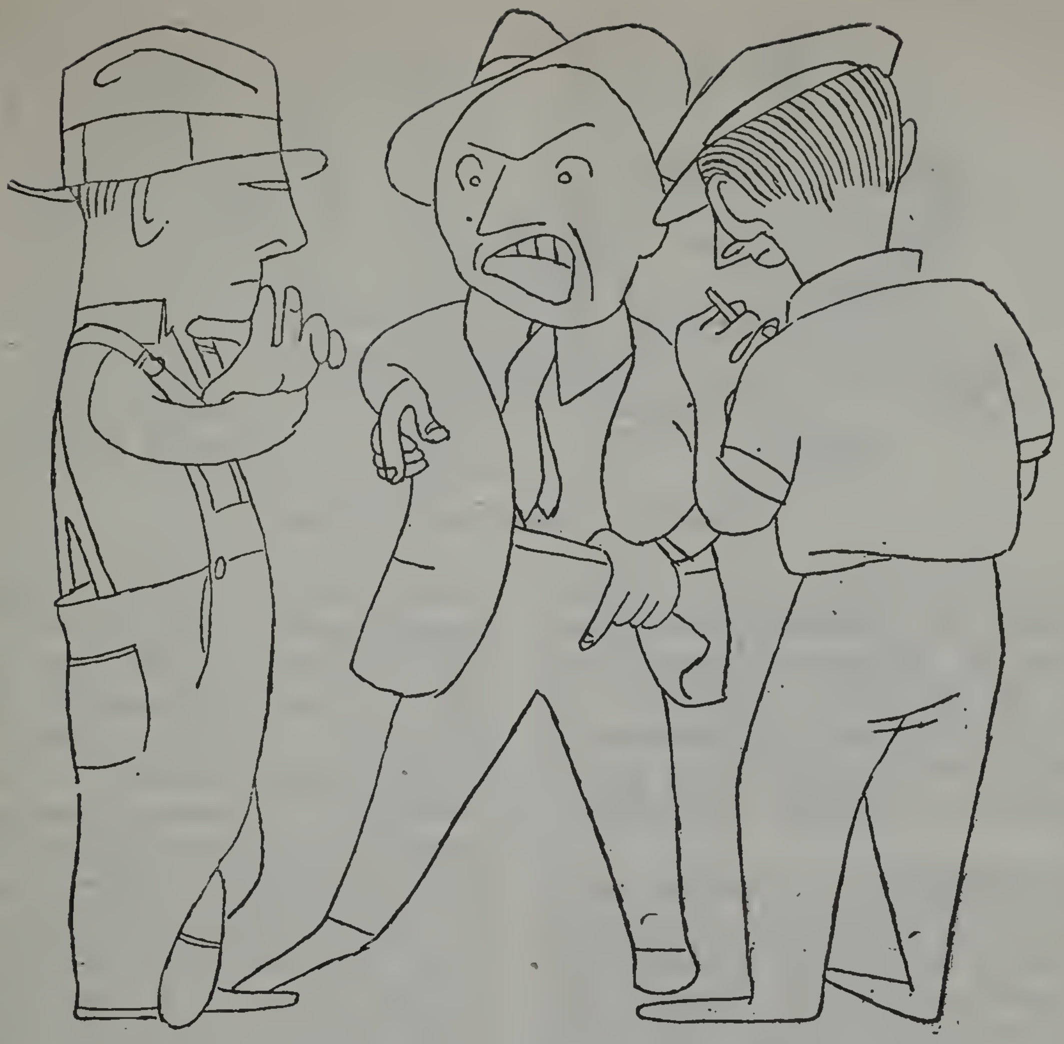
zottságoktól: A megélhetéshez szükséges anyagok árai 1941 január elseje és 1944 március elseje között 45.3 százalékkal emelkedtek. Ezzel szemben a béreket megfagyasztották és csak 15 százalékos emelkedést engedélyeztek a Little Steel Formula értelmében.

A háborus foglalkoztatás tehát bebizonyitotta, hogy lehet mindenkit foglalkoztatni az ipari termelésben. A háboru utáni egyetlen nagy probléma tehát, hogyan lehet felhasználni a termelt javakat, ha nem áldozzuk fel azokat Mars isten oltárán, vagyis nem pusztitjuk el a háboruban. Mi, munkások jól tudjuk, ha a termelésnek szabad menetet engednek, lesz elég helye a termelt javaknak, mert hisz még az annyira magasztalt amerikai életszinvonal is messze a kivánaton alul maradt. Nézzük csak a következő adatokat:

ÉLELMEZÉS: Az amerikai munkásság három-negyed részének élelmezése hiányos és messze a kivánalmakon alul áll. A depressziós években minden három amerikai lakos közül kettőnek nem jutott elegendő táplálék, jobban mondva nem volt képes a megfelelő tápszerek beszerzésére. Ez azt jelenti, hogy 95 millió ember nem kapta meg azt az eledelt, amit az egészségi szinvonal fentartása megkövetel. A viszonyok ebben a tekintetben nem igen javultak a háboru alatt, amennyiben most az adagolás és a drágaság állja utját a bőséges táplálkozásnak.

Az élelmiszer fogyasztásra vonatkozó adatok azonban azt mutatják, hogy a háboru utáni időkben az élelmiszerek termelését nem leejteni, hanem éppen ellenkezőleg, sokszorosan fokozni kell. Ez viszont csak ugy érhető el, ha a nagy néptömegeknek lesz vásárló képességük, meg tudják fizetni a farmeroknak az élelmiszerek termelésébe fektetett munkát.

LAKÁSOK: Az Egyesült Államok lakóházainak fele lényeges javitásra szorul. Igen sok olyan lakóház van még, amelyben nincs viz-



Kiabálás nem erősbiti az érvelést.

vezeték, tehát nincs fürdő és toilet sem; hiányzik ugy a villany, mint a gáz. Milliókra megy azon lakások száma, amelyek nem méltók arra, hogy emberi lakásoknak nevezzük· Az Egyesült Államokban legalább 16 millió uj lakást kellene épiteni. Természetesen most, a háboru alatt a lakások épitkezését is csaknem beszüntették. Azonban a békekötés utáni idők programjának a lakások épitését kell legjobban hangsulyozni. Nagymérvü épitkezés igen sok munkaalkalmat nyujt, amivel erősbödik a munkásság vásárló képessége is.

EGÉSZSÉG: Midőn az Egyesült Államokban 1940-ben megkezdték a kötelező sorozást, kitünt, hogy a sorkötelesek negyven százaléka nem üti meg a mértéket.

Más statisztikai adatok szerint itt, Amerikában még mindig oly nagy az orvoshiány, hogy évenként 275,000 gyermekszülésnél nincs orvos. Az évenkénti csecsemő halálozás eléri a negyedmilliót. Ezeknek legalább a felét meg lehetne menteni, ha az anya a gyermekszülésnél, aztán a csecsemő kellő orvosi felügyeletet kapnának. Az egész országot nézve azt látjuk, hogy minden három megye közül kettőben semmiféle kórház nincs. Természetesen a szegényebb néposztály szenved legjobban. Az egészségügyi hivatalok szerint az Egyesült Államoknak még legalább 300,000 orvosra lenne szüksége· A "Committee of Cost of Medical Care" név alatt müködő bizottság szerint legalább 500 uj nagy kórházat kell épiteni, amelyekben fél

Figyeld hallgatóid arckifejezését.

millió beteget lehet kezelni. (Körülbelül 1000 ágy kórházanként.) Ezen kórházak és klinikák nemcsak sok orvost, de igen sok ápolót és más személyzetet fognak foglalkoztatni. A nemzet jövője megköveteli az ily egészségügyi program keresztülvitelét.

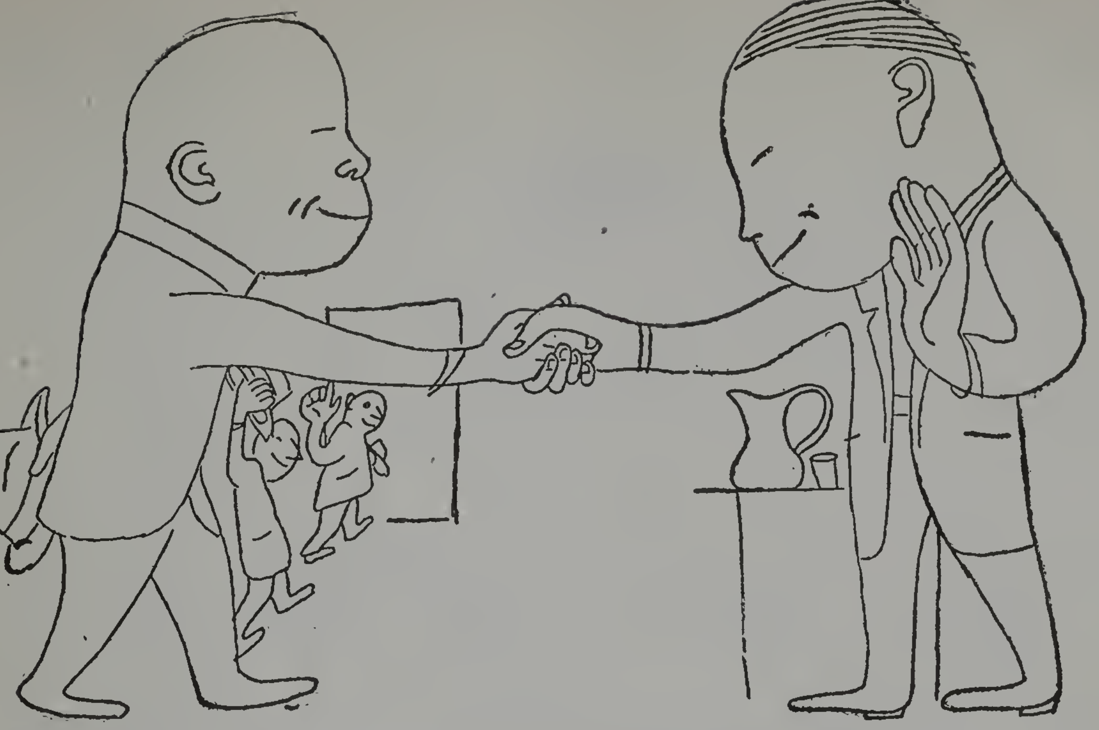
NEVELÉS: Az 1940-es népszámlálás adatai szerint az Egyesült Államokban az 5 és 19 évesek közül 25 százalék nem járt iskolába. Ez azt jelenti, hogy minden négy iskolaköteles gyermek közül egy nem járt iskolába. Az iskolába járóknak 25 évről vett statisztikája szerint az átlagos iskolázottság 8 és két-tized osztályt tesz ki, vagyis csak egy kicsit nagyobb, mint a nyolc osztályt képező elemi iskolázottság. Amerikai lakósok közül 75 millió nem jutott el high schoolba (középiskolába).

Az iskola épületeknek fele még mindig az egy teremből álló falusi iskola. Ilyen egytermü iskolában fejezi be iskoláztatását fél millió gyermek.

A városi iskolák tanitóinak átlagos fizetése az 1939-40-es tanévben 1,937 dollár volt, (heti $37·); a falusi tanitóké pedig csak 967 dollár (heti $18.60). A városokban minden iskolás gyermek tanitására abban az évben 180 dollárt, a falukban pedig csak 72 dollárt költöttek. Ez legmagasabb volt New Yorkban, ahol egy-egy tanulóra 169 dollár és 90 cent jutott és legalacsonyabb volt Mississippi államban, ahol egy-egy tanułóra csak 31 dollár és 23 centet költöttek. Alabama államban pedig amig a fehér gyermekekre 47 dollár 69 centet adtak ,a néger gyermekekre csak 14 dollár és 63 centet költöttek. Mississippiben még rosszabb volt az arány. Ott a fehér gyerekekre 62 dollár és 1 cent, a néger tanulókra pedig csak 7 dollár és 36 cent jutott.

Ezen számadatok mutatják azt, hogy a nevelés terén milyen nagymérvü javitásra van szükség. A nevelés, tanulás az alapköve minden nemzet jólétének. Nevelés hiánya nemcsak a nagyobb termelő képességtől fosztja meg a népet, hanem könnyebben a kizsákmányolás prédájává lesznek. Magasabb szinvonalu nevelés magasabb életszinvonalat jelent·

A MUNKÁSCSALÁD SZÜKSÉGLETE: Mindenki, aki megélhetésért dolgozik, a munkájáért kapott jövedelmet élelemre, ruházatra, lakásra, szórakozásra és kényelmi cikkekre költi. A munkácsaládnál az élelem kerül a legtöbbe. A négy tagból álló családnál, ahol a családfő heti 50 dollárt keres, az élelem a fizetésnek csaknem a felét felemész-



Beszéded utáni kongratulációkat szerényen fogadd.

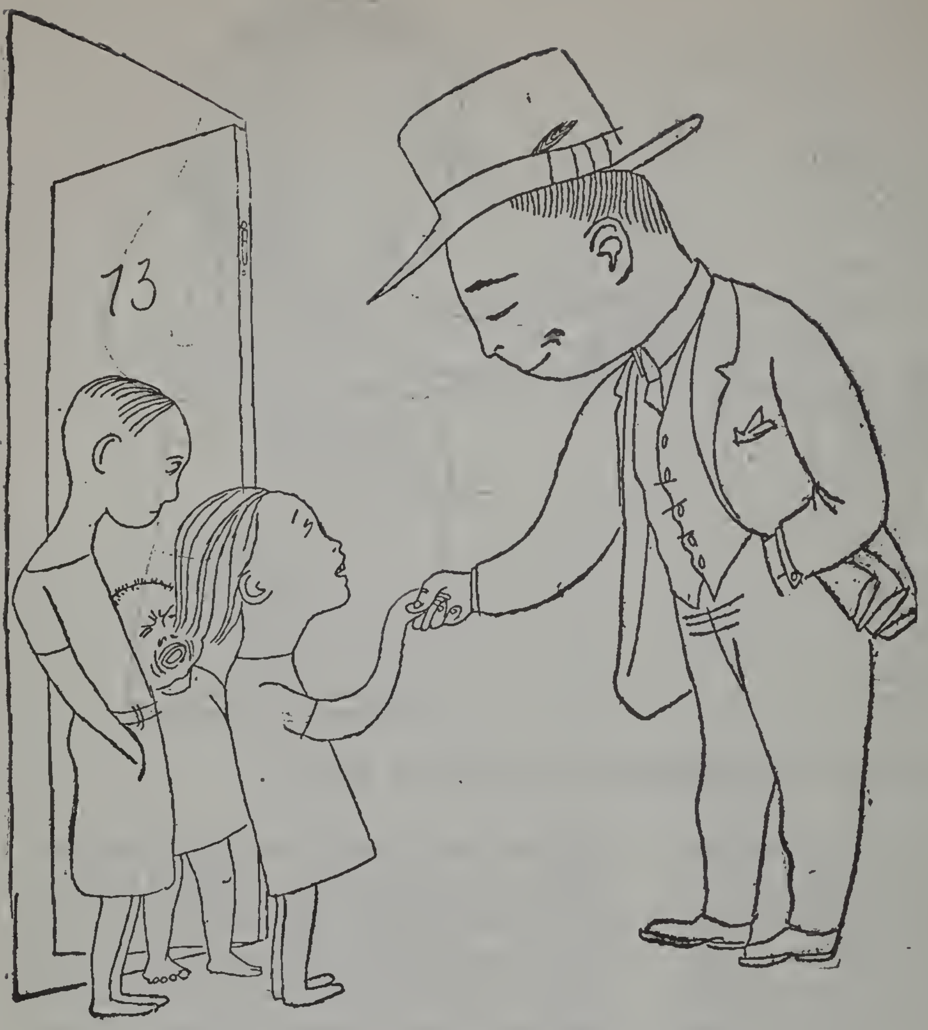
ti. A lakás megink közel egy-harmadát teszi a kerestnek. A ruházat elviszi a kereset tiz százalékát. A kereset fenmaradt részét fel kell osztani a biztositás, az orvos és kórház, a dohányzás, villamos költség, szórakozás és egyéb kiadások között.

A drágaság emelkedése elsősorban is az élelmiszereket érte. Az élemiszerek árai 1941. január elseje óta 71 százalékkal emelkedtek. A ruházat, ahol a minőség leszállitást is számitásba kell vennünk, 76 százalékkal emelkedett. A lakbérlet 15, a butorzat 63, fütőanyag 14 százalékos emelkedést mutatnak. Ilyen árak mellett a munkások csak a megfelelő módon felemelt bérekkel lesznek vásárló képesek.

ADÓZÁS: Az adózás csak akkor igazságos, ha az a fizető képességen alapul. Igy nem lehet nagyobb igazságtalanságot elképzelni a fogyasztási adónál. Fogyasztási adóból a sokgyermekes munkáscsalád többet fizet, mint az egy-két gyermekkel biró igen gazdag ember, mert a nagy család többet fogyaszt a kicsinél. Ugyancsak ilyen igazságtalanság a bérekre százalékban kivetett adózás is. Az adózásnak olyannak kell lenni, hogy ne terhelje azokat, akik a létminimumon alul keresnek és emelkedjen fokozatosan a nagy jövedelmeknél.

MUNKÁSJÓLÉTI INTÉZKEDÉSEK: A munkásság hosszas harcok árán számos olyan vivmányt ért el, amelyekhez nemcsak ragaszkodniok kell, hanem ki kell terjeszteniök azokat mindaddig, amig oly termelési rendszer lesz, amelyben munkájuk teljes gyümölcsét élvezhetik. A munkásjóléti intézmények, politikai és gazdasági szabadságjogok erősbitik a munkásosztályt a további harcokra. Már csak ezért is szükséges ezen jogok fölötti éber őrködés. Ilyen munkásjóléti intézkedések:

A szervezkedés szabadsága. A munkásságnak ezt a jogát az Egyesült Államokban törvényekbe iktatták. Az idevonatkozó törvényeket röviden "Wagner" törvényeknek ne-



Háziagitációnál légy barátságos mindenkihez.

vezik a törvény megalkotójáról, Wagner szenátorról.

A minimális munkabéreket és maximális munkaidőt megszabó törvények. A munkáltató osztály ezen törvények megsemmisitésére törekszik különös erőszakkal.

Aggkori és munkanélküli biztositás. Ez még nagyon kezdetleges, tovább kell fejleszteni. Egyrészről magasabbra kell emelni ugy az aggkori nyugdijat, mint a munkanélküli segélyezést, másrészről a jelenleg 65 évben megállapitott nyugdij jogosultság korát le kell szállitani.

Meg kell erősiteni és kitjeszteni a gyermekmunkát tiltó törvényeket is.

A mai privát jótékonysági üzletek helyett az állam gondoskodjon a vakokról, és mindazokról, akik képtelenek sajátmaguk eltartására.

A farmerok segélyzése is fontos problémája a közeljövőnek. A farmerok segitésénél valóban a szegény farmerokat kell segiteni és nem az óriási farmterületeket biró korporációkat és nagytőkéseket. A nemzet jövőjére olyan fontos ügyeket, mint például a termőföld elmosásának megakadályozása, letarolt hegyek befásitása, folyóvölgyek ármentesitése, stb., a jövőben sokkal nagyobb mértékben kell foganatositani, mint a multban tették.

Az amerikai agrár politigának az egyik legfontosabb pontja legyen, hogy a délvidékek bérlő farmerjai földhöz jussanak. Jelenleg az Egyesült Államok lakóinak körülbelül negyed része lakik farm területen. Ezeknek a jövedelme azonban nem éri el a nemzeti jövedelem egy-tizedét sem. Ennek következtében a farmerok házai dülledezőben vannak, gyermekeik nem nyernek megfelelő iskoláztatást, ők maguk nem élvezik azon kényelmi eszközöket, amihez a városi emberek könnyen hozzájutnak. Az amerikai farmok összes jövedelme 1939-től 1942-ig 86 százalékkal emelkedett. Ezzel szemben az amerikai korporációk jövedelme ugyanezen idő alatt 281 százalékkal emelkedett.

A farmeroknak is érdeke az,

Ne feledd el megdicsérni az asszonyokat, akik az általad nyujtott szellemi táplálkozást testi tápanyagokkal egészitik ki.

hogy az ipari munkások jól keressenek, mert akkor képesek nagyobb áron megvásárolni az agrár termékeket ,ami a farmerok részére fokozottabb jövedelmet jelent. De a farmerok javát szolgáló intézkedések egyben a munkásság érdekeit is szolgálják, vagyis a farmerok és az ipari munkások érdekei azonosak.

Az itt felsorolt adatok alapján meggyőző módon beszélhetünk ugy a gyüléseken, mint a háziagitációk alkalmával is. De egyben utmutatásul szolgál arra, hogyan kell az adatokat összeszedni és elrendezni, hogy akár beszélgetés, akár pedig gyülésen elmondott beszéd alkalmával kellő hatást érjünk el.

Ipari balesetek.

Az Office of War Information jelentése szerint az Egyesült Államokban 1943-ban csupán a hadiiparokban 58,800,000 munkanap veszett el ipari balesetek következtében. Ezen iroda statisztikai adatai szerint a balesetek aránya legkisebb volt a tankokat készitő ipartelepeken, a legmagasabb fokot pedig az erdőirtó iparban érte el, ahol minden munkásra 29 nap veszteség esett balesetek következtében.

Az Office of War Information az ipari balesetekre vonatkozó adatait a Labor Department, a War Manpower Commission és War Production Board statisztikai adataiból állitották össze. Ezen adatok szerint a hadiiparokban 1943-ban minden 500 munkásra 20 baleset esett.

Az ipari balesetek következtében a hadiiparokban abban az évben minden férfi munkásra 11, mig minden női munkásra 13 munkanap veszteség esett.

A TUDOMÁNY VILÁGÁBÓL

MÉG nem is olyan régen igen jól mulattunk azon a mesén, amelyben azt kérdezik a mezőn heverésző pásztorembertől, hogy mit csinál, amire ezt a választ adja: "Hallgatom a fü növését." Ez a válasz ma már nem vezet a mesék világába, mert a fü növése valóban zajjal jár és most már vannak oly tudományos készülékek ,amelyekkel ezt a zajt felfoghatjuk. Igy ha most ugyanezt a választ nyernénk a mezőn heverésző egyéntől, körülnéznénk, hogy hol vannak a készülékei, mert rögtön arra gondolnánk, hogy valami tudományos kutatást végző egyetemi tanárra bukkantunk.

Olyan kort élünk, amelyben a régi világ sok meséje ténnyé lett, vagy még a mesénél is fantasztikusabb dolgokat fedeztek fel. Ezek között vezetőhelyen kell emlitenünk az ELEKTRONICS nevü valamit, amivel hallgathatjuk a fü növését, megláthatunk olyan tárgyakat, amiket máskülönben csak százezres nagyitással látnánk, megvizsgálhatjuk a legkeményebb acél belső szerkezetét, stb. Mindezek olyan dolgok, amikről még nem is olyan régen csak a mesékben esett szó. Mi az a csodás valami, aminek segélyével ezen mesebeli képzelődést megvalósithatjuk s amelynek az ELEKTRONIC nevet adták?

Ennek megértésére elsősorban az "electron" szóval kell tisztába jönnünk. A tudomány fejlődésének lényege abban áll, hogy az ember felfogó képességét minden irányban fejleszti. Igy például mindinkább jobb és jobb teleszkópokat készitenek, amelyekkel nagyobb és nagyobb távolságokra látunk; jobb és jobb mikroszkóppal kisebb és kisebb tárgyakat vizsgálhatunk, stb. Ennek megfelelőleg a régi elméleteken változtatni kell. Ilyen régi általános elmélet volt az, hogy az anyagok elemekből állnak és az elemek legkisebb részei az atomok. Az elemekből az egyes atomot ugyan még a mai fejlett müszereinkkel sem tudjuk kiválasztani, de képesek vagyunk sulyaik megmérésére és sok más tulajdonságaik szabatos meghatározására.

Végre elérkezett az az idő, amikor felvetődött a kérdés, hogy miből áll az atom? Arra már rájöttek, hogy minden atomnak van egy magja, amely körül a többi részek elhelyezkednek. Ezen többi részecskéknek a "particle" (részecske) nevet adták. Aztán rájöttek arra is, hogy minden partikle valamilyen villamos áramot tartalmaz, amelyek egyik része negativ, a másik része pedig pozitiv feszültségü. Ezen ellentétes felszültségü áramok vonzák egymást és ennek következtében az atomon belül egyensulyban vannak. A negativ feszültségü részecske az "elktron", mig a pozitiv feszültségü a "proton" nevet kapta.

Az atom szerkezete.

A legujabb teória szerint tehát minden atom a magból (neucle) és a körülötte egyensulyban elhelyezkedett elektronok és protonokból áll. Az utóbbiak oly kicsik, hogy egynek-egynek az elválasztása és megmérése a mai müszerekkel még lehetetlen. Azok, akik az idevágó tudománnyal foglalkoznak azt állitják, hogy az elektron olyan kicsi, hogy

Aachen német város a bombázások után.

egy incs távolságban 25,000,000,000,000-t (25 trilliót) lehetne egymásmellé helyezni.

Ugyanssak ezen teória szerint a test szilárd részét csak az atommagok képezik, amelyek között ür van. Ezen ürt az eletkronok és a protonok töltik ki. Hogy némi fogalmat alkothassunk ezek mennyiségéről, azt a példát hozzák fel: Képzelj egy igen nagy épületet ,például a new yorki Empire State Buildinget. Ha ebből az épületből ki tudnánk vonni az össze elektronokat és protonokat ,akkor a megmaradó szilárd részt dió nagyságra lehetne összepréselni.

Mint ahogyan a villamos erőforrástól elindult áram képezi a villamosságot, ugy az **atomtól megszabaditott elektronok alkotják azt, amit elektronic névvel jelölnek.** Ennek az uj tudománynak a lényege tehát az elektronoknak az atomtól való kiszabaditása.

Noha ez a dolog már nem egészen uj keletü, mégis ma még csak a kezdet kezdetén tart. A végcél az atom teljes megsemmisitése, ami által olyan nagymennyiségü erő szabadulna fel, hogy — megint csak a tudósaink állitása szerint, — egy font kőszén elegendő energiát nyujtana a legnagyobb hajónak az Atlantic óceánon való átvitelére. Ma még ez éppen olyan mesének tetszik, mint pár évtizeddel ezelőtt a fü növésének a hallgatása.

Pedig az elektronic segélyével ma már valóban csoda dolgokat müvelnek. Elektronic a lényege a rádiónak, amely képessé tesz bennünket arra, hogy ezer meg ezer mérföldről nemcsak beszélgethetünk, hanem már láthatjuk is egymást. Ez a lényege a legujabb ugynevezett "fluorescent" világitásnak. Ez a lelke a "robot" név alatt ismert pilóta készülékeknek; a villamos szemnek s nagyon de nagyon sok modern tudományos eszköznek.

Az electronic feszültségégről a villamossággal kisérletező Franklin Benjaminnak is lehetett valami fogalma, amikor azt irta, hogy a villamos áram olyan végtelenül kicsiny részekből áll, hogy azok a legtömörebb anyagon is a legnagyobb könnyedséggel mennek keresztül. Azonban az igazi feltalálója mégis Thomas Edison, a nagynevü amerikai feltaláló volt. Edisonnak sok baja akadt az első villamos körtével, amelyek egyik oldalukon hamar elfeketültek. Edison már 1883-ban észrevette, hogy az elfeketülést az üvegre rakódott, méghozzá mindig pozitiv saroknál, amig a negativ oldal tiszta maradt. Ennek ellensulyozására egy másik negativ filamentet (lemezt) is tett a körtébe. Ezzel megszületett a mai mágikus "tube" atyja. Edison természetesen akkor még nem tudta, hogy mit hozott létre. Sokkal azután mások fejlesztették tovább ezt a körtét. A körtén belül keletkezett uj áramrá az angol G.S. Stoney fizikus adta az "elektronic" nevet 1891-ben. Az igazi elektronic tubusokat azonban csak az amerikai Lee De Forest találta fel 1907-ben. Ettől kezdve aztán rohamos fejlődésen ment keresztül s ma már száz és száz munkakörben, a tudományban és a müvészetekben nyer alkalmazást.

A MAGÁNKAPITALIZMUS UTÁN?

Irta: PIKA PÁL

A TÖTÉNELEM lapjai egymásután peregnek le. A természet törvénye szerint a fejlődést nem lehet teljesen megakadályozni, még akkor sem, ha az emberi társadalomba talán visszafejlődés vagy stagnálás észlelhető.

A közmondás szerint "Minden rossznak van esetleg egy jó oldala is." Beleértve a mai felkavart háborus társadalmi viszonyokat, azt tapasztalhatjuk, hogy a háboru leforgása alatt a technika fejlődése gyors léptekben halad előre, ugyszintén az orvosi tudomány terén is ugyanez áll fen. Nem azért, mintha bármilyenképen is szimpatizálnánk a háborus hisztériával, de a tény azt bizonyitja, hogy a technika fejlődése minden háboru alatt nagy haladást mutatott.

Az őstermelés, vagy az őskommunizmus korszakából fejlődött ki a mai kapitalista termelési rendszer. Ugyan nagyon sokan, akik soha a történelem lapjait nem tanulmányozták, vagy a jövőbe csak bárgyuan tekintenek bele, azt szokták egyszerüen mondani "mindig igy volt és igy is fog maradni". A közösségről való letérés hozta magával a magántulajdon rendszerét. A magántulajdon rendszere kapzsivá, szivtelenné tette az emberiséget. Az a rendszer, amely ugyszólván embertelenné fajultatja el az embereket, az nem lehet jó és nem is lehet örökké maradandó.

A magánvagyon na[illegible] révén jutottunk el oda, hogy azok, akik nagyobb magánvagyonra tettek szert, csak ugy tudták azt értékesiteni, ha másokat alkalmaztak annak gondviselésére, vagy még jobban való gyarapitására. Igy jutottunk el ebbe a rendszerbe, amelyben mi munkások csak létezünk és létkérdésünk csak azoktól függ, akik nagy magánvagyonnal vagy a jelen modern termelő eszközökkel rendelkeznek. A laikus ember szempontjából ugy tünik fel az egész dolog, mintha a gazdagok ,akik a természeti kincsek és a termelő eszközök felett rendelkeznek, azok az emberszeretet gyakorlása révén adnak megélhetési alkalmat a dolgozni kényszerülő szegényeknek. Hányszor de hányszor hallottuk már a tudatlanok ajkáról ezt a feljajdulást: "Mi történne a tömérdek szegény népekkel, ha a gazdagok nem adnának nekik munkát, hogy megélhessenek?" Ha azonban tényleg tüzetesen átvizsgáljuk a dolgokat, akkor éppen az ellenkezőjét foguk megállapitani. Azt kérdezem a tanulni vágyó olvasótól, nem-e gondolkozott még a felett, hogy mi lenne a gazdagokkal, ha a dolgozó munkás milliók egy szép napon, nem volnának tovább hajlandók a gazdagokat eltartani, értük dolgozni, hogy ők azután mit csinálhatnának ha mi munkások nem tartanánk el őket?

Ez a kapitalista társadalmi rendszer, amely a magántulajdon rendszerén épült, nem lete örökkévaló. Maga a technika fejlődése, amivel jár a gyors termelési mód és amint, hogy ma nem szükségletre, hanem profitra termelünk, nagyon könnyen és gyakran megtörténik az az eset, hogy a világpiac raktárai megtelnek felhalmozott árukkal, amit a sok milliók termelő munkások nem tudnak vissza vásárolni. A mai rendszer nem a logikus beosztáson alapszik, nem is a humaizmus képezi alapját, hanem a kizsákmányolásra alapozott profit.

Semilyen körülmények között a kapitalista rendszer nem lehet örökkévaló. Nagyon sokan, de különösen azok, akik a mai rendszerben bőségesen duskálnak az élet javaiban, azt szokták mondani, hogy ez a rendszer a legmegfelelőbb az emberiség számára. "A mai rendszer tette naggyá és hatalmassá ezt az országot."

Arról sohasem beszélnek, hogy a legutolsó száz év alatt ideözönlő szakképzett munkások voltak azok, akik munkaerejük révén tették ezt az országot naggyá. De nem csak itt, hanem az egész földtekén a technika fejlődése folytán a kapitalista termelési mód gyors fejlődést mutatott. Ez a fejlődés hozott el bennünket a mai időponthoz, amikor világosan láthatjuk, hogy a kapitalista rendszer befejezte hivatását és nem alkalmas tovább a társadalom irányitására.

A kapitalizmus védnökei

Mint minden társadalmi rendnek, ugy a mai kapitalizmusnak is megvannak a maga védnökei, amelyek osztályintézmény képpen szerepelnek. Ezek az osztályintézmények azok, amelyek ugyszólván fátyolt huznak az emberek látásköre elé, ugy, hogy az emberek legnagyobb része, nem is tudja elképzelni, hogy nem a politikai rendszer irányitja a társadalmat, hanem a létező gazdasági rendszer a saját rendszerének megfelelőleg irányitja a politikai osztályintézményeit.

A kapitalizmus kifejlődése óta, mindig ugy tudta befolyásolni az emberek tömegét, hogy politikai jogokat engedélyezett abból a célból, hogy gazdasági rendszerét háborithatatlanul fejleszthesse naggyá a tömegek rovására. El tudta hitetni és még ma is el tudja, hogy változás a politikai személyzetben gazdasági előnyöket fog biztositani a gazdaságilag bizonytalan tömegek részére. Ha most az emberi társadalom osztály viszonyait vesszük szemügyre, akkor megállapithatjuk, hogy az emberek legnagyobb része gazdasági bizonytalanságban él még akkor is, ha esetleg polgári politikai jogait zavartalanul gyakorolhatja.

Nem lehet semmi egyszerübb, mint azt megérteni, hogy a társadalom alapját csak a gazdasági berendezkedés képezheti. Ha ezt megtudjuk érteni, akkor arra a következtetésre kell, hogy jussunk, hogy magáért a gazdasági alap megváltoztatásáért folytassanak harcot mindazok, akik a mai kapitalista rendszerben bizonytalan gazdasági körülmények között tengetik életüket.

A kapitalista rendszer nem lehet maradandó

Nem lehet azért mert a technika fejlődése a termelést annyira fölfokozta ugyszólván az egész földtekén, hogy majdnem minden ország ki tudja termelni saját szükségletét ugy, hogy nagyon kevés alkalma lesz bármelyik ország iparilag fejlett kapitalista rendszerének ujabb világpiacokat szerezni a felhalmozott árui számára. Egy ország határain belül a kapitalizmus csak ideigóráig tud létezni, mert a termelő bérmunkások, akik a lakosságnak legnagyobb részét alkotják, munkabéreikből nem tudják visszavásárolni mindazt, amit termelnek és az a többlet, amit a kapitalista osztály profit képpen halmoz fel állandó ipari pangásnak képezheti csak alapját.

Amerikai és mexikói vasuti munkások együtt dolgoznak a vasutvonalakon.

Mindazok, akik még ma is hisznek abban, hogy a kapitalista társadalom továbbra is tud létezni, azok sohasem számolnak a fennálló igazi körülményekkel, hogy azután mi fog történni a társadalom gazdasági átalakulásával az csak attól függ, hogy hogyan tudjuk elképzelni és gyakorlatba érvényesiteni a szocializmusnak azt a gyakorlati kimenetelét, ami a társadalmi javak egyenletes elosztásán alapszik.

Állam kapitalizmus

A magánkapitalizmus, amely teljesen a szabad ipari versenyen alapszik, amiről fentebb leirtam, hogy létezése már csak rövid idő kérdése, még akkor is, ha sokan, akik jónak látják, szeretnék ugyan, de képtelenek megakadályozni azon rendszer változást, ami mindenfelé az egész földtekén ugyszólván folyamatban van. Az emberi társadalomban vannak olyan elemek, akik sem nem kapitalisták, sem nem termelő bérmunkások. Azonban tudatában vannak annak, hogy a jelen kapitalista rendszer, amely a magántulajdon és ezáltal a profit rendszeren alapszik, nem lehet alkalmas az emberek gazdasági igényeinek kielégitésére.

A társadalom alapvető tényezője

Ott van ahol az élet javait állitják elő. Ennek a termelési folyamatnak tényleges részesei kizárólag csakis a termelő munkások legyenek akár szellemi, vagy fizikai. Furcsa, de ugy van, hogy a termelő munkások legnagyobb része, még ma sem tudja, hogy ők a tényleges fentartói a társadalomnak rajtuk kivül mindenki csak a termelt javakat fogyasztja. Azok a haladó gondolkozásu egyének, akik felismerték már a magánkapitalizmus helytelenségét, sok esetben a bajok orvoslását politikai téren akarják elintézni. Mint ilyenek a politikai hatalom meghóditására törekednek.

Minden politikai párt, kivétel nélkül, uralkodási hatalomra törekszik. Az állami hatalom gépezetét fölé helyezi minden más erőcsoportnak, legyen az egyéni vagy megszervezett. Teljhatalmilag rendelkezik az iparok felett és ugyszintén a termelő erők felett. Minden vagyon és a munkaerő is az állam tulajdonát képezi. Ezáltal a termelt javak felett is az állam rendelkezik. Sokat irhatnánk az államkapitalizmus különböző válfajairól, annyi azonban egészen bizonyos, hogy addig amig a termelt javakkal nem kizárólag maguk a termelők rendelkeznek, addig mindig a munkaerő ki lesz zsákmányolva. A termelő munkások szempontjából nem az a fontos, hogy az állam legyen a kizsákmányoló, vagy a magántulajdon rendszerén történik az.

Mi nem tartjuk helyesnek magát az államkapitalizmust, vagy ha talán sokan államszocializmusnak nevezik is. A tény az, hogy mindaddig, amig a termelő munkások bérért dolgoznak, addig mindig ki lesznek zsákmányolva.

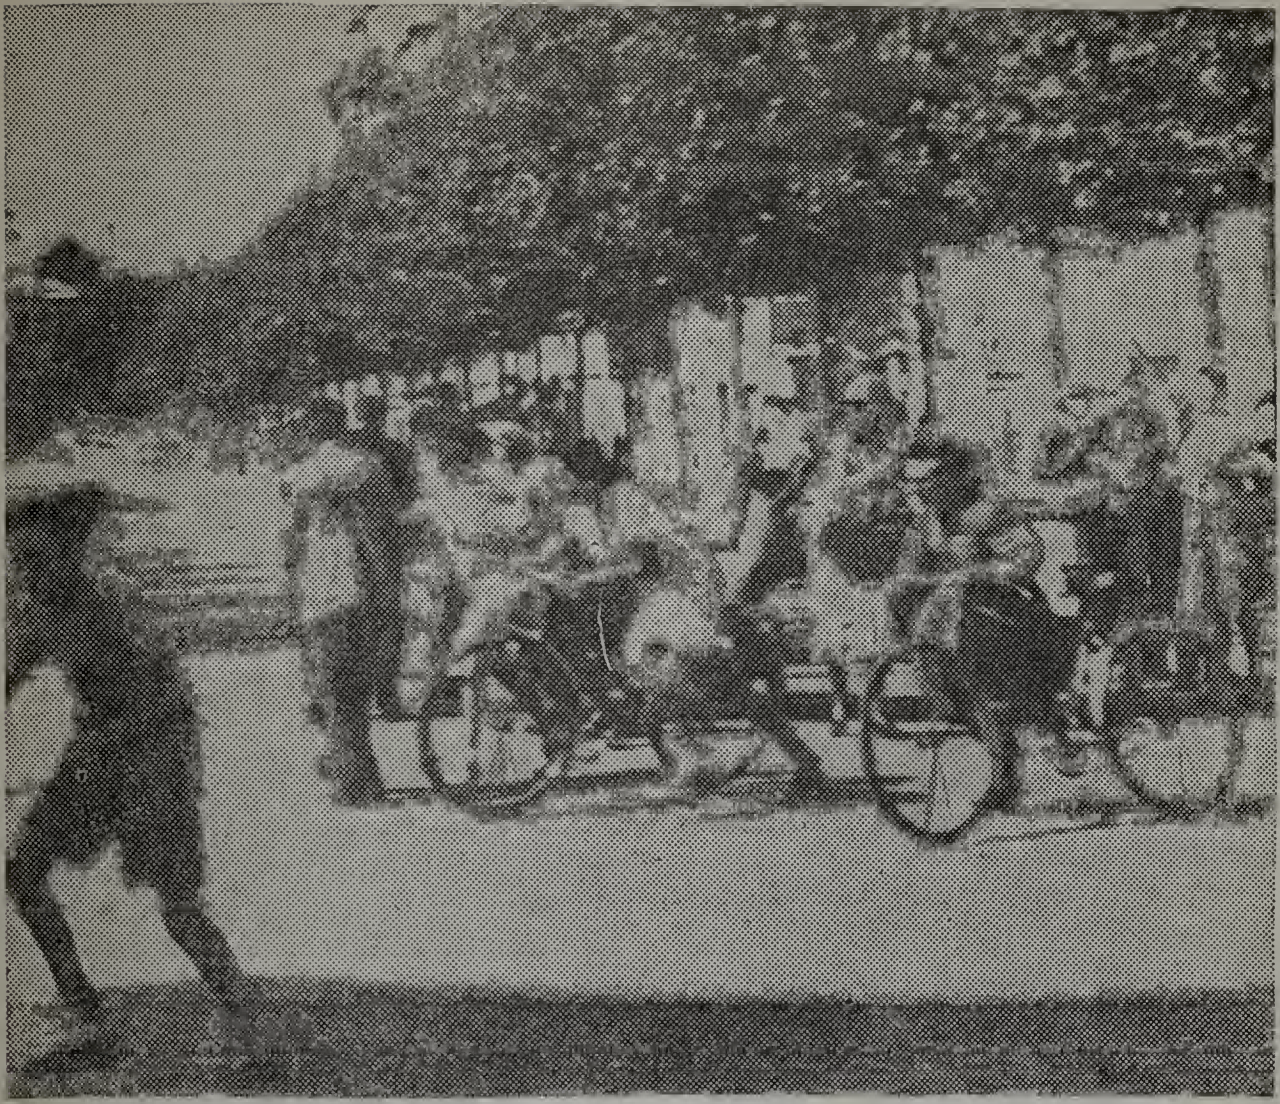
Éléslátásra van szükség

Maguk a munkástömegek, akik nem tudják teljesen megérteni a társadalom igazi összetételét, nagy tévedésbe vannak akkor, amikor azt hiszik, hogy szüksége lesz az emberiségnek minden országban politikai diktaturára, vagy a politikai diktatura, már igazi kommunizmust vagy szocializmust jelent. Az államkapitalizmus, vagy szocializmus nem jelenti a munkásosztály célkitüzését. Hogy azután miért van az, hogy mégis minden jelenlegi kapitalista állam ,az államkapitalizmus felé halad?

A liberális gondolkozásu államférfiak, nem szivesen látják a magánkapitalizmus összeomlását, reformokkal igyekeznek azt kifoltozni, ami lassu munka, de végeredményben mégis csak az államkapitalizmushoz vezet. Ezen az uton haladnak maguk a szocialista vagy kommunista pártok, csak azzal a különbséggel, hogy hatalomra jutásuk alkalmával a politikai gépezetet mindennél hatalmasabbá akarják tenni. Akarva nem akarva, diktaturájuk elkerülhetetlenül az államkapitalizmushoz vezet. Lehet, hogy ez a folyamat minden országban megismétlődik, hogy a magánkapitalizmus után az államkapitalizmus következik.

Ipari köztársaság

Vannak a társadalomban sokféle alakulatok és nagyon sokan azt gondolják, különösen azok, akik a kapitalista rendszerrel nincsennek megelégedve, hogy teljesen mindegy, hogy közvetve vagy közvetlen eszközökkel küzdjünk a munkásosztály tényleges felszabaditásáért. Azok az elemek, akik a közvetett cselekvésben hisznek, még nem ismerték fel azt a megdönthetetlen tényt, hogy a kapitalizmus minden erejét kizárólag a magántulajdon jogán tartja, mert tulajdonosai a ter-



Páris felszabaditásának első napján az ucca népe fedezék alá fut, amikor a lesből lövők (snipers) tüzelni kezdtek.

melt javaknak és termelő eszközöknek. Ennek megvédésére azután osztály intézményeket tartanak fen. Azért egészen bizonyos, hogy addig, amig csak az osztály intézménye ellen harcolunk, nem tettünk semmit a kizsákmányolás megszüntetésére. Hogy a munkásosztálynak van-e szüksége arra, hogy előbb államkapitalizmus, vagy ha talán sokaknak jobban hangzik államszocializmust létesitenek?

Ez lehet csak az eredménye ha tényleg el is érik amiért a küzdelem folyik. Igy tehát egész biztosan megállapithatjuk, hogy minden politikai pártnak teljesitménye nem lehet más, mint a politikai hatalom meghóditása.

Ipari szervezet — Ipari demokrácia

Amióta a tudományos szocializmus alapját lefektették, nem nyilvánult meg olyan tisztán egyetlen proletár mozgalom tanitásában sem a munkásosztály végleges célkitüzése, mint az I.W.W.-ban. Először a forradalmi ipari unionisták felismerték azt a tényt, hogy a társadalom alapját a gazdasági berendezkedés képezi és minden más ráépitett intézmény csak visszatükröződése a gazdasági rendszernek. Ezért ugy véljük, hogy a munkásosztály tényleges felszabadulása csak ugy jöhet létre, ha a kizsákmányolt termelő munkások termelő erejüket szervezik meg a gazdasági berendezkedés tényleges átvételére.

Politikai vagy ipari köztársaság?

Vannak oly elemek, akik nagyon sokszor hangoztatják, hogy végeredményben a szocialista vagy akár kommunista párt ugyan azt az eredményt kivánja elérni, mint amiért mi I.W.W.-isták küzdünk, csak taktikában különbözik egymástól. Megállapithassuk minden különösebb vita nélkül előre, hogy amilyen eszközökkel küzdünk csak olyan lehet az eredmény.

Egészen bizonyos, ha politikai hatalomért küzdünk, akkor az egész társadalomnak politikai visszatükröződése várható eredmény képen. Itten térünk mi el lényegében, mert mi nem politikai államot, hanem kizárólag ipari ügykezelést akarunk megvalósitani.

A kettő között nagyon lényeges különbség van. Az emberi társadalomba a legfontosabb tényező a létkérdés, hiszen e körül játszódik le az egész élet. Ha most már a létkérdés a legfontosabb, akkor természetesen ebben az irányban kell a gazdasági rendszert magát ugy irányitani, hogy minden embernek a társadalomban létkérdése egyformán biztositva legyen. Ennek a tényleges elérésére kell, hogy iparilag szervezkedjünk, hogy ugy a termelés és a szétosztás felett, maguk a termelők rendelkezzenek. A politikai állam lényegesen különbözik az ipari államtól. Amig a politikai állam beosztása teljesen a mai rendszer ferdeségein alapszik, ahogyan ma kerületenkinti képviseltetés a politikai pártok hatáskörén belül intéződik, addig az ipari ügykezelés ténylegesen a termelés szinteréről választja meg ipari ügykezelőit, akik tényleg értenek is magához a termeléshez és szétosztáshoz. Nem gyerekes felfogás az ha az iparok vezetésére nem szakembereket, hanem hozzá nem értő politikusokat állitanánk oda. Ennek ellenvetése képpen a politikai pártokban tömörült intellektueleknek az a kifogásuk, hogy maguk a munkások nem elég érettek arra, hogy az állam ügyeit intézzék. Ugy érezzük és tudjuk, hogy ma a kapitalista rendszerben is mérnökök, vegyészek és más mindenfajta szaktudósok irányitják a termelést és ha tudják irányitani a bonyolult kapitalista rendszerben, akkor miért ne tudnák irányitani egy közös társadalmi ipari rendszerben, ahol sokkal egyszerübb volna a számitás, mert nem a profitot, hanem csak az emberi szükségletet kellene számitásba venni.

Küzdjünk mindjárt a végcélért

A munkásosztály végleges felszabadulása kizárólag csak attól függ, hogy miért és milyen eszközökkel küzd annak megvalósitása érdekében. Egészen bizonyos, hogy a kapitalista rendszer a mai formájában teljesen befejezte létkérdését és hogy milyen rendszer fogja helyét betölteni az teljesen attól függ, hogy maga a munkásosztály a mai rendszer keretein belül mennyire lesz készen a saját társadalmát ténylegesen megformálni, ha sorsunkat a közvetett képviseltetésre bizzuk, akkor a jelen rendszer után nem lehet más, mint államkapitalizmus vagy szocializmus. És éppen ugy mint ma a munkásosztálynak harcot kell folytatni a létkérdéséért, ugy kell az államszocializmus idején küzdeni a kiépitett állami bürokrácia ellen, ha tényleg ipari köztársasággá akarják azt átformálni.

Mindazok, akik a tényleges ipari köztársaságért akarunk küzdeni, amit csak ugy érhetünk el, ha annak érdekében már mostan szervezkedünk iparilag. A termelés átvételére egy hatalmasan kiépitett ipari szervezeteinkben válasszuk meg magát az ipari társadalom tényleges ügykezelőit.

AKRON MARAD-E A GUMIIPAR KÖZPONTJA?

Irta: **BISCHOF JóZSEF**

NAGYON sok megállapitásban Akron és a gumiipar jövője ugyanaz ma, mint volt a New England és a textil ipara, félszázaddal ezelőtt. Igaz, hogy a szövő üzlet nem hagyta ott teljesen New Englandot, de tény ami tény, hogy az 1900. utáni időben nagyon megszaporodtak a szövőgyárak a napsütéses délen. New Englandnak még mindig van számottevő szövő üzlete és kereskedelme, de már a szövőipar dominálása nem New Englandé, mint ahogy volt éveken keresztül. A szövőgyárak a nyersanyag közelébe költöztek ujabb és tökéletesebb gyárakba, távol a magas munkabérektől, oly terepre ahol a bérek alacsonyak és elég bőven van alázatos munkás, aki kevesebbel is megelégszik.

A helyzet ugyan az, Akron gumiipara válasz ut előtt áll. A gumiipar tulajdonosok éppen ugy, mint a szövőipar tulajdonosok, kényszeritve vannak az egy városban összpontositott termelést az egész nemzetre kiterjeszteni. Igaz, hogy az utolsó negyed században több kisebb gyárak épültek az országban elszórtan, de mindez nem volt elég arra, hogy Akron ne szerepeljen még mindég jelentősen a gumi gyártásban, értve világméretben.

Mikor jut Akron, mint New England, amely ma csak a második hegedüs szerepét játsza a szövő áru gyártásban, második helyre a gumi gyártásban? Mert nincs még egy más ipar, amely annyira kivolna téve a verseny fejlesztő és romboló hatalmának, mint a gumiipar és éppen ennél az oknál fogva és a gyárivezetőségek ezirányu viselkedésüknek, a gyanu jogos és nem oknélküli. Mert készül valami.

Van még egy másik tényező, amiből ez a következtetés vonódik le, még pedig: az akroni gumi gyárak két irányu versenynek vannak kitéve, még pedig, először egymás ellen folytatnak versenyt és ennek tetejére amikor már kimerültek az egymásközti versenyben, ott van a United States Rubber Co. és számos kisebb társulat, amelyekkel az akroniaknak együttesen kell felvenni a versenyt.

Azután ott vannak a bérek. A gyárvezetők állitásaik szerint Akronkban ugy a darabszámos munka, mint az órabérek legmagasabbak — ezek tények és nem ráfogások. Az is tény, hogy magasabb bér, nehezebb fizetési boriték, magasabb életszinvonalat jelent és igy több családnak volt alkalma a sok évi munkálkodás után egy otthonra szert tenni. A nagy fizetésből arra is jutott, hogy egyesek gyermekeiket az egyetemre is küldhették. Az egyedüli gumi árut gyártó központ a nyugati partvidéken van, ahol a bérek az akroni bérekkel egyszinvonalon vannak. Se a középnyugat, se pedig a déli gyárakban fizetett bérek nem hasonlithatók össze a akroni gyárakban fizetett bérekkel, éppen ennél az oknál fogva, az országnak eme két részében, most arról beszélnek, hogy lesznek uj gyárak épitve. Többeknek azon reménye, hogy a gyárvezetők lemondanak a decentralizálás elhatározásáról ha az akroni munkások elfogadják a bér és munka mennyiség meghatározást, vagyis a bizonyos bérért bizonyos munka elméletet.

A termelés és kereset meghatározás nem is uj keletü az akroni gumi gyárakban, ezt monden gumi gyári munkás tudja és nem is próbálja senki sem letagadni. Ez tény, ez mindig is volt az akroni gyárakban. Persze ugy a kereset, mint a mennyiség meghatározása időközönként változott és ez nem is azóta létezik, mióta a gumi gyári munkások szervezve vannak, — mint mások állitják és hogy a szervezet kényszeritette ugy a társulatot, mint a munkásokat annak elfogadására és alkalmazására. A termelés mennyiség meghatározása meg volt olyan formán, hogy a munkások egymásközt megegyeztek ugy a bér, mint a munkamennyiségben. Tették ezt azért, legalább ez volt az elgondolás, hogy a béreket ne vágják, a munkát pedig ne gyorsitsák meg. És igy ezen balga elgondolás se fogja a társulatok vezetőit a decentralizálási szándékuktól visszatartani. A tisztán látó és a gazdasági törvényeket ismerő gyárvezetők tudják, hogy a munkásság bármily igénytelen is, még a jelenben, abba a pillanatban, amint ipari munkássá válik, az igényei megnövekednek. A megnövekedett igények kielégülést keresnek. Igy volt ez eddig és igy lesz ezután. Hisz az akroni gumi gyárak megszervezésében és azt követő harcaikban a déli államokból ide vándorolt munkásoknak oroszlán részük van és ezt a gyárvezetők tudják ,hisz volt szerencséjük a saját portájukon tapasztalni. És mégis költözködésről beszélnek, mikor nyilvánvaló, hogy az a három gazdasági tényező, ugy a bér, mint a termelés meghatározás vagy korlátozás és végül a szervezés, mint indok, minden alapot nélkülöz.

Igy hát a béke eljövetel kétes reményt tartogat Akron jövőjét illetőleg. Az itteni kereskedelmi kamara meglátásai szerint, akik az ördögöt festik a falra, nem tudni önmaguk megfélemlitésére, vagy csak a munkásság ijesztésére, akiket az ilyen és ehhez hasonló félemlitéssel próbálkoztak a multban, azért ez annyira megszokott valami, hogy fel sem figyelnek, teljesen hidegen hagyja őket. De nem minden jóslás vagy jövendölés félemlitő. Van amelyik vigasztaló és reménnyel telitett. A furcsa benne csak az, hogy ugyan onnan erednek. Számitva arra, hogy a béke eljövetele a gumiáru raktárarakat üresen találja a béke gumiáru szükségletekből és igy a kereslet nagy fog lenni, a kinálat pedig a nullával egyenlő és igy addig mig a kinálat a keresletet nem fogja megtetőzni és nem teremti meg az állapotoknak a megforditottját, addig a nagy fellendülésben, a piaci zavarban nem lesz idő a versenyre.

A harc a piacért akkor kezdődik majd megint, ha a raktárak kezdenek megtelni, amikor majd a kinálat megtetőzi a keresletet, amikor megint ideérkeztek a gumiáruk termelésével az akroni gyárak, fog a harc a piacért megujulni ott, ahol a háboru kitörése előtt abbahagyták, ugy a piacért, mint az olcsóbb munkaerőért. De vannak a fentieken kivül más elgondolások is a gumi gyárak elköltöztetését illetőleg. Azok a tervezgetések, amelyeket a kereskedelmi kamara és a város politikai vezetői végeznek, hogy a gumi gyárakat itt tudják megtartani, az észszerü elgondolást teljesen nélkülözi, még a munkásság megfélemlitésére sem alkalmasak.

A fenti megokoláson kivül a synthetic gumi feldolgozási módszert ,amely ha általánosan használva lesz, az épitési beosztása, összetákoltsága mint nem alkalmasnak, amelynek az átalakitása, az ujabb termelési követelmények szerint, többe kerülne mint egy teljesen ujonnan épitett és felszerelt gyár.

De van a már emlitett vigasztaló jósláshoz, amely a gumi gyárakat Akronban fogja tartani, még valami: a viz, amiből először is elegendő áll rendelkezésre és másodszor a legjobb vizeknek egyike az egész országban a gumi edzéshez. Az akroni vizből fejlesztett gőz edzi legjobban a gumit. Hozzáadva a gumi feldolgozásban a világ leggyakoroltabb munkásai és a világ legjobban felszerelt laboratóriumai, a kisérletező állomásai és végül mérnökeinek ezrei, a gyárakat vezető emberei, saját otthonukkal rendelkeznek és ennél az oknál fogva nem adnák a beleegyezésüket a gyárak elköltözéséhez és igy tovább.

A felszabaditott Brignolles, dél-franciaországi városban egy nő, akinek férjét a nácik megkinozták, elverte az elfogott gestapo ügynököt, akit csak a csendőrök mentettek meg a népitélettől.

Minket, gumi gyári munkásokat, a fenti jóslások, jövendölések és elhatározások teljesen hidegen kell, hogy hagyjanak, mivel nekünk munkásoknak a munkaerő kivételével más vagyonunk nincs és igy ha a gumi földolgozó gyárakat valamely oknál fogva máshová helyezik, azt tesszük, amit akkor tettünk mikor Akronba jöttünk a munkaerőnket eladni. Elvisszük az uj munkaerő piacra a munkaerőnket és kináljuk eladásra. Ha szükség lesz ránk, megvásárolják, ha nem parlagositják. És ezt fogják tenni a gyárak vezetői, müszaki emberei és adminisztrátorai is. Mi, akik a gumi földolgozásában résztveszünk, egyikünk sem azért va nitt, mert a város szép, vagy pedig sok a templom és nem is azért, hogy Akron egy üdülőhely, ahol a leromlott egészséget szokták helyrehozni, hanem ellenkezőleg.

Amint tudjuk, a gumi vegyi anyagoknak bizonyos keveréke, összetétele nincs a földön olyan anyag, amit a gumi előállitásához nem használnának. Egyes anyagok mérgező voltuk nemcsak a vele foglalkozó munkások egészségét támadják és rombolják le, hanem a nem vele foglalkozó egyéneket is a levegőn keresztül, amit az anyagok megfernek és mégis itt vagyunk. És ezt félti Akron város minden élő és mozgó halandója, hogy máshová költözködik a levegőt fertőző és a tájat csufá tevő gumi gyár.

De ugy van a gazdasági törvények szigorusága nemcsak a dolgozókra hat kényszeritőleg, hanem a tőkésekre is, az osztályharc elől nincsen menekvés, azt meg kell vivni.

Amig az üzletet féltő kereskedelmi kamara emberei és a várost vezető, könnyü életet megszokott politikusok egyéniségek ugy sajátmaguk, mint a munkások megfélemlitésére a gumi gyárak elköltözése ördögét festik a falra, a laboratóriumokban az uj kor modern Lavoisierjei ujabb és ujabb felfedezésekkel gazdagitják a gumiipart ,amely a termelést első sorban gazdaságogosabbá fogja tenni, másodsorban pedig az emberi életet szebbé és kényelmesebbé fogják tenni.

Az ujabb felfedezések közé tartozik az ugynevezett folyékony synthetic keverés, amely a mostani száraz keverést fogja a vegyészek állitása szerint feleslegessé tenni. A második, még pedig a legujabb felfedezés pedig a synthetic eddigi előállitását fogja megváltoztatni, mégpedig olyan formán, hogy ki fogja küszöbölni az adagolást, vagyis nem egy bizonyos sulyu adagokat fognak lehüteni külön, hanem több tartályokat helyeznek egymás mellé olyformán, hogy a folyékony alakban levő synthetic tartályba ömölve folyton folyvást mig az utolsó tartályba teljesen megsürősödik. Az ily megsürüsödött gumit minden időveszteség nélkül folytonosan szednék ki és szállitanák a további feldolgozás végett az illető telepekre. Ezzel a termelési módszerrel a synthetic gumi előállitását 40 százalékkal gyorsitanák meg és evvel az előállitási költséget nagyban csökkentenék.

Csak haszontalan fecsegés ugy az egyik, mint a másik oldalon, ha a gyárakba befektetett tőke érdeke kivánja, hogy csak elköltözéssel biztosabbak és nagyobbak a kilátások, akkor a gyárak elköltöznek. Ezt nem fogják a politikusok hizelgő kérései, sem pedig a üzletet dédelgető kereskedelmi kamara nagynevü vezetői meggátolni.

Az ipari törvényszerüség, a gazdasági törvények minden akadályt lerombolnak, ha a pénz érdeke ugy kivánja. A gumiipart kezükben tartó tőkéseknek éppen ugy mint az ipar tulajdonosoknak történelmi hivatásuk van, amit be kell tölteni mindenek ellenére. A profit éhség oly cselekvésrekre kényszeriti a gumiipart a kezükben tartó és a termelést ellenőrző tőkéseket, amely cselekvések előbb-utóbb a tőke pusztulását fogják maguk után vonni. A laboratóriumokban a vegyészek ma még hüséges szolgái a tőkének, nem azzal a szándékkal tökéletesitik a termelőeszközöket és teszik a termelést gazdaságosabbá, hogy a tőkés termelést elpusztitsák, hanem, hogy szolgálatot tegyenek és mégis mit látunk: Akarva nem akarva viszik a tőkés társadalmat a pusztulásba.

A gumiipar tőkéseinek éppen ugy, mint a más ipar tulajdonosoknak, a történelmi hivatásuk az ipari szabadság előfeltételeinek a megteremtése és végül ami a fentiek következménye, az egymásra utaltság megteremtése. A gumiiparban és a többi iparokban foglalkoztatott munkásoknak egy ipari szervezetbe tömörülve, a tőkések által kifejlesztett és megszervezett termelést, ha a történelmi hivatását be akarja tölteni, amire majd a gazdasági törvények kényszeritik, át kell venni és a saját céljainak megfelelőleg átformálni és folytatni a termelést, de már nem profitra, hanem közszükségletekre.

A ZENEISMERET ELEMEI

Irta: GULYÁS JÁNOS

A NÉPDALOK éneklése, pásztor sipokon való játszása, avagy bármely népies hangszereken való játszás nem kiván különösebb képzettséget, vagy hosszan tartó fáradtságos gyakorlást. De mihelyt a tudományos zenei képzés utját kivánjuk követni, mindjárt rendszeres, fegyelmezett gyakorlásra van szükségünk, hogy az éneklés, vagy bármely hangszer játszásának bizonyos virtuoz kezelésére szert tehessünk. Hogy ezt megtehessük szükségünk van módszerre, amellyel célunkat elérhessük. Ezen módszer a methodika.

A methodika megtanitja a tanulót a hangjegyek olvasására és a hangképletek formájának képzésére. (Hangképletek a dallam az az melódia). Egymásután következő hangok, melyek magassága bizonyos szabályok szerint mozog; a ritmus. Az egymásután következő hangok szabályozott erősség és időviszonya; a hangzat (akkord). Az egyidőben hangzo hangok rendesen 3—4,amelyek magassága bizonyos szabályokat követ. S végül megemlitem a skálát, amely 12 dur és 12 moll hangsorból áll. Sajnos ma a fiatal zenetanulók közül kevesen látják be a zenei hangsorok gyakorlásának jelentőségét, innen van azután, ha közülök valamelyik zenei főiskolába jut ,az első évben a legtöbb idejüket a hangsorok gyakorlására kell szentelniök, mielőtt bármihez kezdenének is.

A hangtani törvény

A hangsorok előállitását azon hangtani törvény követi, hogy a hangforrásul szolgáló rezgő test hossza forditott arányban áll a rezgések számával. Legkönnyebben a huros hangszereken figyelhetjük meg. Magasabb rezgés szám a magas hangot, az alacsony rezgés szám a mélyebb hangot szolgáltatja. A nagyobb rezgés számot olyképpen kapjuk, ha a hur vagy a cső hosszát megröviditjük és viszont. Tehát a dur hangok törzshangjait a következő számok fejezik ki: c, egy egész, d, nyolc-kilenced, e, négy-ötöd, f, három-negyed, g, két-harmad, a, három-ötöd, h, nyolc-tizenötöd, c, kettő. Ha a c-re hangolt cső vagy hurnak lefogjuk nyolc-kilenced részét, akkor a d hangot kapjuk és igy tovább.

A d-re hangolt hur ugyan ezen részei a d-dur skála hangjait adja, az e-re hangolt hur az e-dur skála hangjait és igy tovább.

Ámde nemcsak a törzshangok hangjaiból elindulva képzünk dur és moll hangsorokat, hanem a származék hangokból is. A származék hangokat ugy nyerjük, ha a törzshangsor minden egyes tagját fél hanggal föl, vagy le módositjuk. A fölfelé módositás jele a kereszt, a lefelé módositás jele a bé (b). Ha a törzshangsor hangjait fölfelé módositom a hangokat "isz" képzővel nevezem meg. Például cisz, disz, eisz, fisz, gisz, hisz. Ha lefelé módositom, akkor az "esz" képzőt használom: cesz, desz, esz, fesz, gesz, asz, a b vagy hesz. A hesz helyett rendesen a b, nevezést használják.

Ha rezgésszámok viszonyait kivánom kifejezni a származék han-

A Constantine diadalkapu Rómában.

goknál, a következő számokat kapom: c, egy egész, desz, tizenöt-tizenhatod, esz, öt-hatod, gesz, huszonöt-harminchatod, asz, öt-nyolcad, b, kilenc-tizenhatod, továbbá c, egy egész, cisz huszonnégy-huszonötöd, disz, hatvannégy-hetvenötöd, fisz tizennyolc-huszonötöd, stb.

Ha a kifeszitett hurnak a hosszát lemérjük, bármely huros hangszeren és a fentebb jelölt részeit kiszámitva megjelöljük ,akkor a megjelölt pontokon lenyomva a hurt, megkapjuk a hangrendszer összes hangjait egy oktáva keretében.

Az ütem

A föntnevezett hangsorok segitségével képezzük a dallamot, vagyis az egymásután következő hangok sorrendjét. Ámde az egymásután következő hangokat nem egyenként elkülönitve hallgatjuk, hanem összefoglaljuk emlékezetünkben zenei gondolattá, hogy időbeli arányban álljanak, csak ugy mint a vers irásban. Ezen időmérő az ütem (taktus) amely a lélekzetvétellel áll szoros időméretben, mig a taktus legmegnyugtatóbb aránya a sziv-veréssel áll vonatkozásban. Ha például, egy zenemü taktusa az szivverésünknél gyorsabb, akkor izgató hatást vált ki (induló), ha lassubb ,akkor fárasztó, ugynevezett álmositó érzést kelt. Largo, adagio, vontatott templomi énekek, stb. Ezek ismertetése után térjünk át a zene eredetére.

Amit az ember legelőször a két kezével alkotott, egyszersmint a müvészi alkotás legrégibb emléke. Persze akkor más volt Európa éghajlata, az állatvilága sem a mai volt. A kőszén pedig bizonyitja, hogy a növényvilága is más volt. Különben is a barlangokban talált eszközök következtetni engedik, hogy milyen volt az ősember életvilága. Ezen eszközök, nemcsak praktikus célt szolgáltak, de egyszersmint a müvészi alkotás gyönyöre is visszatükröződik bennök. Nézzük csak a pásztorainkat, milyen gyönyörü faragásokkal diszitik praktikus célt szolgáló eszközeiket. Mi történt a barlanglakó emberrel? Lehet, hogy a jégkorszak utolsó idejében, a glecserek visszahuzódásával követte az észak felé huzódó vadakat, melyeknek a husa táplálékot, a bőre pedig ruházatát szolgáltatta. Lehet, hogy a sarkvidék népei őrizték meg számukra következtetéseket. Most vessük föl a kérdést: Milyen lehetett a zenéjük?

Az ős-zene

A zene eredetére a sok hipotézis közül Dubos és Herder tanitását emlitem meg. Szerintük a müvészetek fejlődésére a faji jellegnek és éghajlatnak van nagy befolyása. Sokat földeritettek az ős-müvészetről Grosse és Guyau kutatásai. Spencer szerint az ősember tagolatlan hanglejtés nélkül beszélt, de a szenvedély, izgalom, ingerültség hangjának erősségét fokozta, magasságát megváltoztatta és élesebben tagolta. Igy lett a közönséges beszédből ritmikusan tagolt, dallamos zene.

Büchler szerint a ritmus a zene legrégibb eleme. Ha a mai divó amerikai tánc zenét vesszük bizonyitás alapjául ,akkor Büchernek hipotézise igazolva van. Szerinte az ősember észrevette, hogy ugyanazt a munkát kisebb fáradtsággal végzi, ha a mozgásban ritmust tart be ,ezért munkaközben meghatározott ritmusokat követett (ma is a katonák egyenletes lépése vagy a cölöpverő munkások egyenletes ütése) vagy pedig ritmikusan tagolt dallamokkal könnyitette munkáján. Stumpf azt hiszi, hogy a zenét különféle akusztikai (hangtani) jelenségek segitették létrehozni. Az ősember hivogató figyelmeztető jelzései, a legkezdetlegesebb dallam töredékek, amik meginditották a zene kifejlődését. Darwin az éneket tartja a zene őseredetének. Szerinte a zene azokból a hangokból eredt, melyet a him állatok (majmok, erdei vadak és madarak) hallatnak, ha párzás idején nőstényüket hivogatják. Ezek a hivogató hangok alakultak át az ősembernél szerelmi dallá, melyet valóságos csábtánccá fejlesztett ki. Ilyeneket találunk még ma is a kultura kezdetleges fokán élő vad népeknél.

A tudósok majdnem egyöntetüen megegyeznek abban, hogy az ének, tánc és a költészet egyidőben keletkezett, csak a történelmi idők későbbi folyamán vált szét egymástól.

A hangnak hangszerekkel való utánzását a játék ösztön váltotta ki az ősemberből. A vad népeknél használatos hangszerek nagy része inkább játékszer, mint praktikus célokat szolgáló zenei hangszer. Több mint valószinü, hogy a hangszerek sorában a lármás utőhangszerek megelőzték a többi fajta hangszereket. Dárdáknak a pajzshoz való ütögetése már elég ritmikus kombinációkra csábithatta az ősembert. A legkezdetlegesebb fuvóhangszereket is a természet szolgáltatta. A leölt szarvas állatok üreges szarvai, a tengerparti csigák csekély javitással már messzire hallható hangokat adtak.

Dal kutatók

Az ókor, de a jelenkor rézfuvó hangszerei (trombiták, kürtök) is megtartották eredetükre emlékeztető formáikat. A huros hangszerek készitése már fejlettebb kulturát követelt, mert az állati belek sodrása már bizonyos egymást követő munka folyamatának eredménye, ami az ősembertől egy kissé nagy teljesitmény lett volna.

Ujabb etnográfiai kutatások sok érdekes adatokat vetettek föl, melyek megvilágitják az ősember zenéjének szerkezetét, tagoltságát hangsorát. Ez a hangsor nagyban különbözik a föntebb vázolt hangsoroktól. A kottáinkkal alig fejezhető ki. A legtöbb dallam négy öt hang keretein belül mozog, néha a legfurcsább ritmusban. Etnografikus tanulmányokat végző utazók, kötetekre rugó harci dalokat, vallásos énekeket, táncdalokat, stb. gyüjtöttek össze, köztük a magyar Bartók Béla is, aki számtalan öt hangkeretében mozgó ősmagyar dallamokra is akadt.

A szinfónikus zene

Bocsánatot kell kérnem az olvasótól, hogy tárgyamat ily szükre szabott kereten belül nem világithatom meg kellőképpen, hiszen a zene irodalomban azon tárgyakról, ami a zenét tanitja és a zenemüvészetekkel foglalkozik, könyvtárakra menő könyveket irtak össze. Csak még egyre szeretnék kitérni. Sajnálatos jelenséget tapasztaltam nagyon sok munkás emberek házánál. Például ha a rádió állomásról — miközben a

A Pantheon épület Rómában ,egyike az ókori római épitészet müremekeinek.

rádiójuk be volt hangolva — véletlen szinfónikus zenét adtak, rögtön eltunolták azon kifogással, hogy az nem zene, csak lárma.

Be kell vallanom, hogy ha a zenei kulturáltságot veszem alapul, s azon fülekkel próbálom a szinfonikus zenét hallgatni, amely a közönséges tánczenéhez van szokva, érthetővé válik előttem, ami máskülönben bosszantó.

A hiba ott van, hogy zeneileg az átlag munkásember analfabéta.

Örvendetes jelenség ámbár, a fiatal generáció nagyarányu törekvése, hogy valamennyit a zenéből megtanuljon. Ugy van. Az általános müveltség megkivánja, hogy zeneileg is tudjunk valamit. Kevésbé mondhatja müveltnek az ember magát, ha valamennyit, habár elméletben is nem ért a zenéből.

Hogyan is várjuk iskolázatlan munkástömegektől, hogy a 16-20 partiturában mozgó szinfónikus zenekari játékból megértse, hogy népdalok és táncdalok müvészi feldolgozásának magasra fejlődött formájával áll szemben.

Emlékszem amidőn Sosztakovics hetedik szinfóniájának a premierjét adták New Yorkban és olvastam a kritikát. A legtöbb polgári gondolkozásu zenei kritikus nem értette ki a zenéből az orosz nép életét, munkálkodását, küzdelmét, egyszóval azt a gigászi előretörést, amit egy nép a Szovjet rendszeren belül képes megtenni. Shostakovics azt vetette kottába, amit tapasztalt, érzett és látott. Ujjongó lelke, marxista értelme, sokoldalu zenei képzettsége, olyan zenekari virtuozitást váltott ki belőle, ami előtt értelmetlenül állt meg a tudományos zenei világ is, ezért történt az, hogy a zenei kritikusok több tekintetben félremagyarázták a hetedik szinfóniát.

Mindenesetre a zenemüvészet, mint minden más müvészet tökéletes nem lehet, mert ez azt jelentené, hogy tovább nincs fejlődése. Ha figyelembe vesszük, hogy minden nagyobb társadalmi forradalom zenei téren is nagyobb változásokat hozott, akkor kifejezhetem magam igy is: a nagy francia forradalom megszülte Bethovent, a 48-as forradalmak Wagnert hozták felszinre és az orosz proletár forradalom sem történt meg zenei ujitás nélkül.

Akad muzsikus, aki nem az uralkodó osztályt és uralkodó házat dicsőiti, de a proletár forradalom nagyobb inspirációkra ragadta mint sok elődjét, ez Sosztakovics Dimitri. Máris a fiatal zeneirók egész légiói utánozzák. Hová jut ezen uj irányzat, még nem tudjuk. Egy azonban bizonyos, hogy nem fog a fejlődésben megállni.

MAGYAR ÉRTÉKEK AZ EMIGRÁCIÓBAN

Irta: KOVÁCH ERNŐ

REMÉLEM, hogy mikor e sorok eljutnak az olvasó kezébe, már a legutolsó magyar emigrációt elüldöző ellenforradalom 25 éves gyalázatos élete után felvette a "néhai" nevet és ha van igazság, akkor már azokról is, akik a megszemélyesitői, haszonélvezői voltak, annak a bitang uralomnak, már csak mint a megérdemelt büntetést elnyert halottakról fogunk beszélni.

A reakció minden időben és mindenhol arra törekedett, hogy az uralmának ellenzőit elhallgattassa, eltegye az utjából. A hatalmon levők a viszonyoknak megfelelő eszközökkel igyekeztek az ellenfeleiket megfélemliteni, legtöbbször vigyázva arra, hogy a törvényesség látszatát fentartsák. Ellenben a cári Oroszország, amely nem sokat törődött a látszat törvényességgel, nyilt brutalitással csapott le uralma ellenzőire, akasztás, börtön, deportálás réme lebegett minden szabadságszerető ember felett. A mozgalmak a föld alá kerültek és ha egy aktiv harcos körül nagyon szorult a hurok, ugy hosszabb, rövidebb, időre külföldre menekült, hogy azután ha a levegő tisztább lett, ujra visszatérjen a munkára. Ezek az orosz emigránsok, főleg munkások, diákok és diáknők, ismertek lettek az egész európai munkásmozgalomban és mindenütt tüntető szeretettel vették körül őket a szervezett munkások. Az 1905-ös felkelések után óriási tömege az orosz forradalmároknak kelt utra, hogy kikerüljön a reakció vad hajszájából, de akkor már az emigráció szenvedés lett, mert nagytömegü intellektuel, tanár, orvos, iró és müvész embernek is menekülnie kellett a cári kopók elől.

Nagy általánosságban mindig a szabadság harcosai voltak a menekültek, csak olyankor változott a helyzet, ha a forradalom győzött, akkor a reakció vezetői voltak kénytelenek külországba védelmet keresni. Különösen a nagy francia forradalom és a mi korunkban az orosz forradalom volt az, amely nagy tömegü uralkodó osztálybelit lökött ki a világba.

Az orosz emigránsok, hercegek, grófok, katonatisztek, bankárok és gyárosok lepték el Európát, miután előre érezték, hogy egyszer az uralmuk véget ér és menekülni kell, tehát a vagyonuk egy részét külföldi bankokban helyezték el, igy jó ideig vigan dőzsöltek, várva azt, hogy az ellenforradalmárok megnyitják az utat vissza az uralomhoz. Egy pár év után a pénz is fogyott, de még jobban a reménység a visszajövő uralomra. Igy kenyérkereset után kellett nézniök és sofőrök, pincérek, inasok lettek a férfiak nagy része, mig a nők, a törékeny kékvérüek, miután a munka büdös volt nekik, hát inkább az egyetlen kétes értéküket, a testüket bocsájtották áruba azoknak, akik nagyra értékelték azt, hogy egy vérbeli arisztokratát vásárolhatnak meg. Végre minden reményüket elvesztve, lezülöttek a cári emigránsok és mind gyakrabban találkozunk a neveikkel a rendőri rovatokban.

Magyar emigrációk

A magyar történelem is ismer emigrációs korszakokat, a multban Rákóczi, Kossuth emigrációi voltak nevezetesebbek. De ebben az előbb emlitettben főleg a felkelés fővezérei kényszerültek külföldre a Habsburgok dühe elől, mig a kissebb vezetők, az akkor még elmaradt közlekedési és rendőri viszonyok között könnyen elbujtak az üldözőik elől.

Kossuthal már sok ezer aktiv forradalmár ment emigrációba, nem csak politikusok, de katonák is, akik készséggel harcoltak minden forradalmi megmozdulásban, bárhol lett légyen is az.

Rákóczi és Kossuth is emigrációban pusztultak el, nem adatott meg nekik a lehetőség, hogy eszméik diadalával térhessenek vissza a hazájukba.

Az 1918-19-es forradalmak két emigrációt is kitermeltek. Az egyik amelyben a magyar uralkodó osztály volt a "szenvedő" fél, rövid életü volt, amit dőzsöléssel és az antant tisztekhöz szóban és irásban eljuttatott könyörgésekkel töltöttek el. Arra kérték a gyülölt, megvetett románokat, hogy inditsanak hadat Magyarország ellen, verjék le a forradalmat, helyezzék őket vissza az uralomra, a vagyonukat vissza kapják, annak ellenében készséggel vállallták el azt, hogy aláirják az országot megcsonkitó békeszerződést, amelynek az aláirását a forradalmárok megtagadták.

Ezt a rövid életü magyar emigrációt az egész kapitalista világ segitette abban, hogy visszakerüljön az uralomra, mert az osztályérdeke kivánta a nagytőkének, hogy a magyar Tanácsköztársaság, mint egy rés a kapitalista világon, eltünjön és az ujra uralomra jutott osztály, intézményesen biztositotta azt, hogy az uralma elleni támadás meg ne ismétlődhessen.

Ez a biztositás ugy történt, hogy először a "felelőtlen" elemek, amint akkor a különitményeket hivták, olyan fehér terrort teremtettek, amilyet az ideig az osztályharcok története felmutatni nem tudott. A munkások és szegény földmüvesek ezreit öltek le, mig tizezrek kerültek a börtönökbe, akik közül az orosz Szovjet pár százat ugy mentett meg a biztos haláltól, hogy a hadifogságban levő tiszteket lefogta és csak a halálra, vagy sulyosan elitélt forradalmárokért volt hajlandó kicserélni.

Rajtuk kivül a magyar ipari munkások tizezrei menekültek külföldre, hogy elkerüljék az akasztófát, a börtönt és a koncentrációs tábort. De az ellenforradalom 25 éves ideje alatt állandóan szaporodott a külföldre menekültek száma. Mig eleinte főleg a munkásosztály tagjai és az aktiv forradalmár intellektuellek menekültek el, később már mindig gyakrabban találkoztunk a világ minden részén oly intellektuelekkel, akik mert képtelenek voltak elviselni a magyar börtönlevegőt, önként mentek számüzetésbe, mig a bátrabbak otthon vették fel a harcot a reakció ellen mindaddig, mig a rájuk váró börtön elől elmenekülni nem kényszerültek. Meg kell mondani, hogy az ellenforradalmi kormányzat megerősödésével az otthon maradt szociáldemokrata vezérek megalkudtak a kormányokkal, a számukra engedélyezett szakszervezkedési lehetőség és képviselői székek, nagyon jó befektetésnek bizonyultak Horthyék részére, mert amig egyrészt megadták a kormányzatnak az alkotmányos, parlamentáris szinezetet ,amely Horthyék diktaturáját elleplezte, másrészt pedig a munkásosztály harciasságát lefékezte, lehengerelte. Ennél az ál-ellenzéknél sokkal bátrabb és főleg nagy nevelő munkát végeztek azok az intellektuelek, kiknek a tenkitélye oly nagy volt, hogy az ellenforradalom uralomra jutásakor nem mertek hozzájuk nyulni Horthy pribékjei, félve a nemzetközi felháborodástól. Ezek Vámbéry Rusztem világhirü iró és jogász vezetésével szóban és irásban éveken keresztül nagyszerü harcot vivtak a reakció ellen, mindaddig, amig nekik is menekülniök kellett.

Elvesztek az idegenben.

A magyar munkásmozgalom minden szervezeti vezetője az emigrációba került, akiknek a nagy része mint Kunfi, Rónai, Bakonyi és mások elpusztultak az emigráció hányatásában, mások a Szovjetekbe és Európa más városaikba várják azt, amikor visszatérhetnek a magyar munkásmozgalomba.

Hihetetlen az, hogy az aránylag kis magyarság, milyen bőségesen ontotta az egész világra a legjobb tehetségeket, amelyekre minden nép büszke lehetett volna, mig a magyar uralkodó osztály világgá üldözte őket.

Irók, tudósok, müvészek százai szórodtak szét a világ minden részébe, sok nagy érték kalódott el, mig mások a nyelvtudásuk és talán a szerencséjük folytán is sikeresen helyezkedtek el más országok kultur életében. Angliában, főleg Londonban tucat számra találhatunk magyar irókat, tudósokat, képző és zene müvészeket, szinészeket, kik a kényszer folytán elhelyezkedtek az angol kulturális életben.

Természetesen Amerikába is jutott nagy számban az elüldözöttekből, akik közül sok sikeresen helyezkedett el az itteni kultur életben és egy páran szenzációs sikereket értek el, akiknek a neveikkel gyakran találkozunk a lapok és folyóiratok hasábjain. De sokkal több azoknak a száma, kik kiszakadva a hazai talajból, idegenben tétlenségre vannak kárhoztatva.

A Medici Villa a felszabaditott Rómában.

Az "uj" emigrációt megelőzték azok, akiket Horthyék rögtön elüldöztek, ezek között van Jászi Oszkár, ki amellett, hogy aktiv harcot vivott az elmult 25 évben Horthyék ellen, Amerika számos egyetemén tanitott, még ma is, mint az oberlini egyetem nyugalmazott tanára, más egyetemeken tart előadásokat. A régiek közé tartoznak: Göndör Ferencz, Békessy Imre, Berend Pál, Hans Habe. (Békessy János), Erdős Árpád ujságirók, Tamás István, Görög László, Vadnay László, László Aladár, Ignotus Hugo, László Miklós, Hatvany Lili, Nógrádi Béla irók, Békásy István, Gyergyói István szinészek, Ábrahám Pál zeneszerző, Tóth Endre filmrendező, Kelemen Pál, Tolnay Károly történész, Lorsy Ernő iró és történész és sok mások, kiknek a neve nem jut az eszembe, kik közül sokan helyezkedtek el az amerikai lapoknál s tanitanak amerikai egyetemeken.

Ezeket a hosszabb, rövidebb emigrációs élet, még ha sikeresen el is helyezkedtek, nem szakitotta el őket a magyar élettől. Sokan ma is harcosai a magyar feudalizmus elleni küzdelemnek. Nagyrészük még ha itt nagyobb lehetőségeik is vannak, ha egyszer Magyarországon végig seper a forradalom tisztitó szele, vissza fognak sietni és a Horthyék által elnácisitott magyar kultur életnek lesznek értékes épitői.

Ha ők hazamehetnek, akkor már egy uj emigráció lesz folyamatba, a magyar nép elnyomói próbálják menteni a bőrüket a népharag elől, de ma már más szelek fujnak és aligha lesz lehetőség, hogy a hitvány életüket és az összerabolt vagyonukat külföldre vihessék. Mert reméljük, hogy bárhová is próbálnak szaladni, mindenütt várni fogja őket a jól megérdemelt akasztófa.

Uj kulturát teremtenek

Remélem, hogy mire e sorok az olvasók kezeibe kerülnek, addigra a magyar történelemben először, diadalmasan hazakerülhet a baloldali emigráció.

Huszonöt év nagy idő, egy uj generáció nőtt fel a Duna mentén, kik talán kitermelik a maguk értékét, de bizonyos az, hogy a kivert magyar emigráció, a szenvedés és a külföldi tapasztalataikkal végtelenül nagy értéket fognak jelenteni, az ujra éledő magyar kulturában.

Huszonöt év nagy idő, a világ minden táján szétszórt emigránsok, ha nem is szüntek meg harcolni az óhazai bitang rendszer ellen, ha bármily élénk figyelemmel kisérték is a magyar eseményeket, ha ők maguk nem is szakadtak el a magyar néptől, félő az, hogy az ellenforradalom által felnevelt uj generáció szakadt az emigrációtól, vagy ugy, hogy nem érte meg azt, amiért az emigránsok harcoltak, vagy ugy, hogy tulhaladták őket és megeshetik, hogy a hazatérő emigránsokat, nem ugy fogadják az otthon élők, mint a hivatott vezéreiket, pedig a jövő magyar élet kialakulására, alkalmasabbak a külföldről megtértek, kik a régi rendszer gyülöletébe éltek, mint azok, akik félrevezetetten, vagy oportunizmusból, a revizionista, nacionalista életet élték odahaza.

Magyarország körüli államokkal és a Szovjetekkel nagyobb lehetősége van az emigrációból megtérteknek a megegyezésre, mint azoknak, akik ezideig ha nem is aktivan, de hallgatólagosan, az ugynevezett utódállamokkal és a Szovjettel való harcot támogatták, illetve eltürték.

Az emigráció egy jó része viszont már nem tér véglegesen vissza, mert a kényszerült uj hazában helyezkedett el gazdaságilag és eszmeileg és csatlakozott a befogadó országok haladó mozgalmaihoz.

A harcok, amelyeket ezideig a magyar nép szabadságáért, jogaiért az emigráció külföldről folytatott, most áttevődik Magyarországba, remélve, hogy az elősegiti a magyar nép végleges és teljes felszabaditását.

Az 1918-19. évi forradalmak és a későbbi fehér terror emigrásai, megállták a helyüket ott, ahová a sors vetette és megbecsülést szereztek a magyar névnek, akár mint tudósok, irók, müvészek, vagy egyszerü munkások.

* * *

ACHESON Edward Goodrich (1856-1931). Amerikai mérnök és feltaláló. Jó ideig Edisonnal együtt dolgozott. Legfontosabb találmánya a rendkivül kemény carborandum, amelyből köszörüköveket készitenek. Acheson 1895-ben kezdte el a carborandum gyártását Niagara Falls, N. Y. városban. A carborandumnak a modern ipartelepeken rendkivül fontos szerepe van.

A VADON VIRÁGAI

IRTA: O. HENRY

FIAM — szólt hozzám Montague Silver, vállamra veregetve, — ha észre veszed, hogy az agyad már tompulni kezd s képtelen leszel a felnőtt emberek becsapására, menj New Yorkba. Itt, a Nyugaton is születik ugyan minden percben egy áldozat, de New Yorkban olyan tömegesen találod a "báránykákat", mint a tó sekélyebb részén a halikrát. Meg se tudod számolni őket.

Montague Silver, aki ezen atyai tanácsokat adta, egyike volt a Nyugat legismertebb "grafter"-jeinek. Azt tartotta, hogy minek dolgozzék addig, mig másokban meg van ez a nemes szenvedély. Az egyszerü apró-cseprő csalásoktól irtózott, nem tartotta magához méltónak. Csak nagyobbszerü "érvágásokat" eszközölt, amelyek többnyire sikerültek neki.

Ezt a megszivlelendő tanácsot Little Rock, Ark. város egyik szalónjában kaptam tőle s mint hü tanitványtól illik, jól emlékezetembe véstem. Két évvel később megdöbbenve vettem észre, hogy az orosz admirálisok neveit már nem tudom eszben tartani. Ugyanekkor a bal fülem mögött néhány ősz hajszálat pillantottam meg. Semmi kétség, elérkezett az ideje, hogy Silver tanácsát kövessem.

Ugy déltájban érkeztem New Yorkba és mindjárt nekivágtam a Broadwaynak. Pár percnyi sétálás után egyszerre csak egyenesen beleütköztem Silver barátomba, aki hátát egy szálloda falának vetve selyem zsebkendőjével fényesitette a körmén a félholdat.

— Gutaütés vagy végelgyengülés? — szóltam rá meglepetve.

— Ni-ni, te vagy az, Billy, — kiáltott fel örvendve Silver. — Tudod, vettem észre, hogy a Nyugaton már nagyon is megokosodtak az emberek. New Yorkot ugy tartogattam magamnak, mint az utolsó mentsvárat. Elismerem ugyan, hogy nagyon lealacsonyit bennünket ezeknek az embereknek a kifosztása. Olyan jámborak szegények, mindent készpénznek vesznek. Kétségbeesnék, ha az anyám megtudná, hogy ilyen gyámoltalan bárányokról nyirom le a gyapjut; sokkal többre nevelt ennél.

— Hallod öreg, — szóltam végre, mikor egy pillanatra elhallgatott, — ugy beszélsz, mintha az emberek tolonganának a várószobádba, hogy nyuzd meg őket egy kicsit.

— Azt éppen nem mondhatom, de azért nem kell valami nagyon megerőltetni az agyadat, hogy célt érj. Még csak egy hónapja vagyok itt, de már látom, hogy Manhattan lakói nem egyebek egy nagy "vasárnapi iskola" ájtatos tanitványainál, akik mindenben a kezemre fognak játszani. Olvasom a lapokat, tanulmányozom a várost s már ismerem is annyira, mint a "City Hall" macskája a városi tanácsosokat. Ez a bamba nép elveti magát a földön s ugy sir, kiabál, rugdalózik, hogy nem elég gyorsan szeded el a pénzét. De jöjj fel a szobámba. Együtt fogjuk "megdolgozni" a várost, már csak a régi barátság kedvéért is.

Felmentünk a szobájába, ahol a legkülönbözőbb értéktelen holmit halmozta fel költői rendetlenségben.

— A pénzszerzésnek itt nagyon

sok módja van, — folytatta Silver a lenti beszélgetést, — csaknem annyi, mint a rizskása főzésnek a kinaiaknál. Ennek a világvárosnak az üresfejü lakói mohón kapnak minden csalétek után. Minél intelligensebbeknek mutatják magukat, annál tompább agyuak. Csak képzeld, a minap valamelyik nagy pénzes zsáknak eladták a fiatal Rockefeller olajba festett arcképét a hires Sarto mester Szent János képe helyett.

— Látod ott az a csomó nyomtatott dolgot? Igazi aranybánya. A mult héten árulni kezdtem az uccán, de már 2 óra multán abba kellett hagynom. A vevők ököllel törtek utat hozzám a nagy tömegben, aztán bevittek a közforgalom megakasztásáért. Mialatt a rendőrállomásra vittek, eladtam egyet a rendőrnek is, a vásárt azonban be kellett szüntetnem. De én nem is akarok ilyen könnyen pénzhez jutni. Sérti az önérzetemet. Ha már igy rám erőszakolják a pénzüket, legalább legyen nekik annyi élvezetük érte, mint mikor hetekig tartó fejtörés után megfejtik azt a rejtvényt, hogy melyik betü hiányzik "Chicgo" városnévből.

— Megpróbálkoztam egy másik dologgal is, — folytatá Silver mindinkább belemelegedve. — Nézd ezt a kis üveg kék tintát. Horgonyt rajzoltam vele a jobb kezem fejére és Dewey admirális unokaöccsének adtam ki magamat. Mindjárt az első bankban be akartak váltani egy ezer dolláros checket, csak az volt a baj, hogy egészen elfelejtettem a nagybátyám keresztnevét és igy nem irhattam azt alá. De azért ez is mutatja, hogy milyen könnyü dolgunk lesz. Hidd el, ebben a városban a betörők feléje sem néznek az olyan helynek, ahol legalább is meleg vacsorával nem várják őket.

Silver, lehet, hogy igazad van, de nekem valahogy másképpen tünt fel a dolog. Két órája vagyok ugyan még a városban, de nem látom, hogy sült galambok röpködnének. Az emberek nagyon egyenesen tartják a fejüket, jobb szeretném, ha egy kis pelyva volna a hajukban. Én nem igen látom, hogy olyan könnyen meggyurhatók volnának.

— Hát te is Billy! — kiáltott fel Silver, majd jóizüt kacagott. — Az idegenek mind igy járnak ebben a városban, megijednek tőle. De nem is csoda. New York jóval nagyobb, mint Little Rock. Pofozni szeretném az embereket, mert mosó kosarakkal akarják rám erőszakolni a pénzüket. Hidd el ,a new yorkiakkal könnyebben el lehet bánni, mint a tövistelen rózsával. Az egyetlen dolog, ami aggaszt az, hogy a sok százdolláros bankó mind össze fogja törni a mellényzsebembe rakott szivarjaimat.

— Bárcsak igazat szólnál, — melegedtem neki végre én is, — de azért mégis csak biztosabbnak találom a little-rocki kis üzleteket. Ott akármelyik farmerral aláirathatsz egy postát kérő folyamodványt, amelyről a legközelebbi bankban kitudódik, hogy 200 dolláros váltó. Szóval ha nem csordult, hát cseppent de ezek itt ugyancsak vigyáznak magukra és talán mi nem is vagyunk elég tanultak arra, hogy kijátszuk őket.

— No csak meg ne ijedj. Én már alaposan szétnéztem köztük. Vannak itt olyan emberek is, akik felhőkarcolókon kivül soha még más házat nem láttak. Az életrevaló ember három hónap alatt itt arathat.

— De van-e már valami határozott terved?

— Egy egész tucat. Mennyi pénzt hoztál magaddal?

— Ezer dollárt.

— Jó! Nekem is van 1200 dollárom. Ez untig elég arra, hogy két olyan ember, mint mi, egy milliót csináljon vele.

Másnap reggel ismét felkerestem Silvert, aki sugárzó arccal fogadott.

— Megismerkedtem itt egy emberrel, aki jóbarátja J. P. Morgannak ,a világhirü bankárnak. Ma délután elhozza ide s bemutat neki bennünket. Az "öreg" szeret eltársalogni a Nyugatról jött emberekkel.

— Ez igazán jó hir, — mondottam én is felvidulva, — egy cseppet sem fog ártani, ha ismeretséget kötünk néhány pénzfejedelemmel.

Délután három órakor Silver ismerőse, akit Klein néven szólitott, beállitott hozzánk Wall streeti barátjával. Mr. Morgan valamit hasonlitott azokhoz a képekhez, amelyeket az ujságok közölnek róla. A jobb lába szines ruhadarabba volt csavarva és menés közben erősen a botjára támaszkodott.

— Mr. Silver és Mr. Pescud, — mutatott be bennünket Klein, — a világ legnagyobb pénzügyi tekintélyének a nevét akár el is hallgathatom.

— Ugyan Klein, hagyd ezt, — szólt közbe Mr. Morgan. — Nagyon örvendek, gentlemen, hogy Önöket megismerhettem. Nagyon érdeklődöm a Nyugat iránt. Klein emlitette, hogy Önök Little Rock-ról jönnek. Ugy gondolom, hogy azon a vidéken nekem is van egy-két vasutam. Nos,.fiuk, ha akartok egy parti . . .

— De Mr. Morgan, — vágott hirtelen közbe Klein, — ön elfelejtette . . .

— Bocsánat uraim ,otthon a barátaimmal néha társas kártyajátékot szoktam játszani.

Mielőtt nekünk alkalmat adott volna a szólásra, felugrott és botjával a padlót verve, nagyokat káromkodva járkálni kezdett alá és fel a szobában.

— Csak nincs valami baj a részvényekkel a Wall Street-en? — kérdezte Klein.

— Részvények?! Ugyan, törődöm is most én azokkal. De az a kép! Az a kép! Elküldöm az ügynökömet Olaszországba, hogy vegye meg és most azt táviratozza, hogy nem találja. Ötvenezer dollárt adnék érte . . . sőt hetvenötezret. De miért is engednek egy De Vinchi képet . . .

— Hogyan, hát Ön nem vette meg az összes De Vinchi képeket? — kérdezte Klein.

— Ez a kép biztosan van olyan nagy, mint egy három emeletes ház fala, — jegyezte meg Silver.

— Félek, hogy az Ön müvészi képzettsége egy kicsit hiányos, — mondotta Morgan. — A kép csak 27 incs magas és 42 incs széles. Ez az egyetlen De Vinchi, amit nem tudtam megkapni. A kép neve: "Unatkozó szerelmesek". Egy csapat leányt ábrázol ,akik biborszinü folyó partján kedvükre kitáncolják magukat. A távirat szerint a képet aligha Amerikába nem hozták.

Mr. Morgan és Klein távozása után Silver megjegyezte, hogy milyen barátságos emberek ezek a new yorkiak. Még az olyan gazdag és hires ember, mint Mr. Morgan is, milyen kedélyesen elbeszélgetett velünk. Másnap ebéd után Klein vezetése mellett egy kis sétára mentünk. A Hetedik Avenue egyik zálogházának ablakában Klein szép karperecet pillantott meg és kijelentette, hogy megveszi. Mind a hárman bementünk az üzletbe és Klein hosszas alkudozás után megkötötte a vásárt. Hazatérve Klein a szálloda előtt elbucsuzott tőlünk. Alig értünk a szobánkba Silver nekem esett:

— Láttad? Nem láttad?

— Mit?

— A képet! A kép, amelyet Morgan annyira keres! Ott lóg a zálogház falán az asztal mögött. Nem szóltam semmit, nehogy Klein is meghallja. Ez az a kép, olyan igaz, mint ahogyan élünk. A lányok mintha csak elevenek volnának, ugy bakfittyeznek a folyó parton. Menynyit is igért érte Morgan? . . . Mit tudják ezek, hogy mi van az ilyen zálogházakban.

Másnap reggel még ki sem nyitották a zálogházat, már ott ácsorogtunk előtte, mintha az ünneplő ruhánkat akarnánk "bevágni", hogy hozzájussunk egy "drink"-re való összeghez. Az üzletben természetesen csak valami olcsó óraláncot kivántunk venni.

— Ni-ni, milyen izgató képmásolat lóg ott, — jegyezte meg Silver csak ugy véletlenül a zálogházasnak. — Az a leány azzal a vékony fátyollal a vállán nekem is tetszik. Ugy-e ha $2.25-öt felajánlok érte, akkor olyan gyorsan bepakolja a számomra, hogy még a többi tárgyakat is leveri siettében?

A zálogházos mosolygott s mutogatta tovább az óraláncokat. Kis idő mulva aztán megszólalt.

— Ezt a képet 500 dollárra zálogositotta el nálam egy olasz gentleman egy évvel ezelőtt. Igazi Leonardo De Vinchi. A neve: "Unatkozó szerelmesek". Éppen most jár le a hivatalos egy év és többé nem lehet visszakövetelni. Ajánlom ezt a láncot, ez most nagyon divatos.

Fél óra multán 2000 dollárt fizettünk a képért és boldogan távoztunk vele. Silver azonnal kocsira ült és a Morgan lakására hajtatott. Én a szállodába mentem és ott vártam reá. Ugy két óra multán meg is érkezett.

— Nos, mennyit fizetett Morgan a képért?

Silver nem válaszolt mindjárt hanem lassan leült az asztal mellé és valami lassu indulót kezdett dobolni.

— Mr. Morgan nem vehette meg a képet, mert már hónapok óta Európában van.

— Európában van? — szóltam én elhülve.

— Igen, de ez még nem is volna olyan nagy baj. Hanem Billy, ezzel a képpel aligha meg nem jártunk. A sarki nagy üzletben a kirakat tele van aggatva ugyanezzel a képpel $2.48-ért árulják, de ki van irva, hogy maga a ráma megér $3.50-et.

Geréb József forditása

ŐSZI VARÁZSLAT

Homály erjed bomlott avarból,
gyürött gyepből viz bugyborékol,
cuppog a zsombék, duzzad az ér,
a földből buggyan barna vér,
a halmok gőzzel töltött csutorák.

Sötét vadkan magát beássa,
szarkák csörögnek a szántásra,
rögök kövér varanggyá válnak,
iramló nyulak köddé válnak,
szétvetett karral izzadnak a fák.

Veres irháju alkonyat
kérődzik zörgő ág alatt,
ég lóbálja ködemlejét,
egy szarvas felveti fejét,
aggancsa repedt fellegbe akad.

Párakendő hull hegytetőre,
nyirkos kigyó kuszik fenyérre,
roppant hullő az őszi sárban:
árny hentereg nyögő határban,
a völgyek vemhes öle felszakad.

Növény, kő mozdul, állat dermed,
széjjelfoszlik a biztos termet,
élőt elnyelnek lomha vermek,
vak holtak üstöket kevernek,
elomlik a bátor, a restnek szárnya termett.

Minden, mi rend volt, gyönyörüség,
emberalakra szabott szépség,
ember szivéhez mért öröm:
átcsörtet most a zárt körön,
megkergült kéjjel vesztébe rohan.

Veled mi lesz? Ejtsd el magad
s a hömpölygő ár elragad . . .
Vagy kulcsold össze két kezed
s mint aki célba érkezett,
itt van, nem tágit, megmarad:
most mutasd meg az arcodat!

LESZNEI ANNA
(Magyar Forum)

HUMOR

Megnyugtató.

Az orvos megvizsgálta az aléltan fekvő beteget ,aztán a leendőbeli özvegy felé fordulva mondta:

— Sajnálom asszonyom, de nem hiszem, hogy a férjén segiteni tudnék.

— De mégis, mennyi időt ad neki orvos ur? — kérdezte az asszony.

A beteg közben magához tért és meghallotta az orvos válaszát.

— Legfeljebb pár napot, nem hiszem, hogy sokáig viszi.

— Most már csak azért sem halok meg! — vágott közbe mérgesen a beteg.

Erre az asszony hozzálépett és megsimogatta a férje arcát, aztán csittitóan mondta:

— Csak ne mondj ellent az orvos urnak, drágám, hiszen látod, hogy csak a javadat akjarja!

Logikus.

A motorkerékpáros rendőr hosszu hajsza után megállitja a sebesen száguldó autót s rárivalkodik a kocsi hajtójára.

— Micsoda dolog ez, ily tulsebesen hajtani? Hát nem fél, hogy valami szerencsétlenség éri?

— Dehogyis nem félek, — válaszolta a bünös, — sőt éppen azért hajtottam ilyen sebesen, mert nagyon félek a bajtól, észrevettem, hogy a fékező készülékem elromlott és most azért sietek haza nehogy valami szerencsétlenség érjen.

Élet-halál kérdés.

Az irodafiu hosszas rábeszélés után bejelenti a főnöknek a látogatót, akit a főnök igy fogad:

— Ön azt üzente be a fiuval, hogy élet-halál fontos kérdésben kíván vele beszélni.

— Igen ura, szórul szóra igaz, — válaszolta a látogató. — Azért jöttem, hogy eladjak önnek egy élet, vagy haláleseti biztositást, mert a legnagyobb biztositó társulatot képviselem.

Ez volt az igazi büvészet!

Az alvilági alakok pártfogásából meggazdagodott politikus részére tisztelői diszvacsorát rendeztek egy előkelő vendéglőben. A vendéglős, aki észrevette, hogy az egyik vendég zsebébe dugta az ezüst kanalat, az étkezés befejeztével az asztalhoz ment és nagy hangon beszélni kezdett:

— Uraim, most mulattatni fogom önöket. Önök talán nem is tudják, hogy én Kagliosztró, a világhirü büvész leszármazottja vagyok. Számos kiváló trükk maradt meg a családunkban. Ime, most bemutatok egyet. Nézzenek ide, beteszem ezt az ezüst kanalat a kabátom zsebébe. Most elmondom a büvész mondatot: Akra-bakra, habakra! És ime az ezüst kanál átvándorolt Mr Herman zsebébe. Kérem a szomszédját, vegye ki a kanalát Mr. Herman zsebéből.

A szomszéd belenyult Mr. Herman zsebébe és kivett belőle nem egy, hanem KÉT ezüst kanalat.

Tévesztett bók.

— Mariska kisasszony, higyje el ugy érzem ,mintha egész életemben ismertem volna.

— De ugyan, Sáfrány ur, hiszen én még nem vagyok olyan idős.

A tudomány diadala.

Mr. Tulokos nem jól érezte magát. Elment tehát a doktorhoz és mindjárt igy kezdte:

— Doktor ur, én ugyan nem hiszek az orvosokban, de azért most mégis eljöttem, gondoltam, adok alkalmat arra, hogy bebizonyitsák, mégis tudnak-e valamit.

— Nem tesz semmit, barátom, hogy hisz-e vagy sem az orvosban, — válaszolta az orvos. — Éppen tegnap volt nálam az öcsém, aki állatorvos és panaszkodott, hogy nekünk, akik embereket gyógyitunk, könnyebb dolgunk van, mint nekik. Elmondotta, hogy a napokban egy nagyon makacs öszvért gyógyitott ki valamilyen betegségből. Az orvosság beadásánál mindig össze kellett kötözni az öszvér lábait és fel kellett peckelni a száját. Lássa, ez az öszvér sem hitt az orvosi tudományban, mégis kigyógyitották!

Ismerte magát.

Az utazó ügynököt utasitották, hogy keressen fel bizonyos kereskedőt, aki már igen sokkal tartozott a cégnek és nem reagált a felszólitásra. Ez a kereskedő azonban nagyon jó beszédképes ember lévén, nemcsak kibeszélte a dolgot az utazónál, hanem még ujabb rendelést is adott neki. A főirodában azonban megtagadták a rendelés kiküldését. Ehelyett ezt táviratozták a kereskedőnek:

“A rendelést csak akkor küldjük, amikor számlájának legalább a felét törleszti.”

Erre aztán ez a választ érkezett a kereskedőtől:

“Sajnálom, de addig nem várhatok!”

A hibanélküli ember.

Az evangélista pap rendkivül páthosszal ostorozta az emberek büneit, amelyekkel magukra vonják az Ur haragját. Jól meg akarta értetni a gyülekezettel, hogy minden ember bünözik és azért mindenkire ráfér a “megtérés”. Azért magát felhevitve kiáltotta oda hallgatóinak:

— Mindannyian bünösök vagyunk! Nincs tökéletes ember! Ki meri azt állitani önmagáról, hogy soha senkinek sem vétett, hogy semmi hibája sincs? Avagy ki meri azt mondani, hogy már látott ilyen embert?

Erre egy félénk kinézésü, kistermetü ember felállott.

— Ön azt meri mondani, hogy van tudomása ilyen tökéletes emberről? — fordult hozzá a pap.

— Mondhatom, hogy van, — válaszolt szorongva a kicsi ember.

— És ki az, ha szabad kérdeznem? — mondotta a pap.

— A feleségem megboldogult első férje, — volt a felelet.

Szükségtelen.

— Már régen nem hallottam Harry barátunk felől, mivel foglalkozik mostanában?

— Dadogó iskolát nyitott.

— Dadogó iskolát? De szent isten, hát ki akar dadogást tanulni?

Észnél volt.

A tisztelendő ur erősködött, hogy misét mond az elmegyógyintézet lakóinak is. Az igazgató beleegyezett és a betegeket beterelték a nagyterembe, ahol a pap az első imádkozás után hozzáfogott a szentbeszédéhez. Egyszerre csak az egyik beteg belekiáltott:

— Meddig hallgassuk még ezt a zagyvaságot?!

A pap zavartan fordult a főorvoshoz.

— Abbahagyjam talán, — kérdezte.

— Csak folytassa nyugodtan, — mondta az orvos, — nem fogja többet zavarni. Ez a szerencsétlen ember csak minden hét évben nyeri vissza az eszét egy-egy pillanatra.

Melyik a legjobb?

A városka piacterén három szalón versengett egymással azon, hogy az árusok szomját oltsa. Az egyik szalónnak ájris, a másiknak amerikai és a harmadiknak zsidó tulajdonosa volt. Egyszer csak az ájris nagy táblát akasztott ki ezzel e felirással: "It kapod a legjobb italt az egész városban!"

Meglátta ezt az amerikai szalónos, mérges lett és még nagyobb táblát akasztott ki ezzel a felirással:

"It kapod a legjobb italt az egész államban!"

Amikor a zsidó szalónos meglátta a két táblát, elnevette magát és másnap ő is kiakasztott egy táblát ezzel a felirással:

"I kapod a legjobb italt a Piactéren!"

Nagy baj.

A gazdag ur kényelmesen elhelyezkedett a vonat fülkéjében és mindjárt szunditani kezdett. Amikor azonban a vonat elindult, rémülten kiabálni kezdett a titkára után, aki nem volt a fülkében.

— De uram ,mi baja van, hogy igy kiabál a titkár után, talán mi is megtehetjük a kivánt szolgálatot? — udvariaskodott a borravalóra váró kalauz.

— Nincs itt a jegyem, a titkáromnál van, — jajgatott a gazdag ur.

— Sebaj kérem, mondotta megint a kalauz, — ezt könnyen el tudjuk intézni.

— Hiszen nem is azért ijedtem annyira, — mondotta a gazdag ur, — de most már nem tudom, hogy hová utazom?

Hasznos legyek.

Salamon, az ócskaruha kereskedő igen egyszerü módszert használt a ruha árak megjelölésére. A ruhára cérnázott kártyára egy vonalat huzott és a vonal alá annyi pontot tett, ahány dollárnál olcsóbban nem adhatta a ruhát. A vásárlói azonban hamar rájöttek erre a jelzési módra és akármilyen nagy árat kért is a ruháért, csak megolvasták a vonal alatti pontokat és annyit igértek a ruháért, amit kellő alkudozás után meg is kaptak. Egyszer Salamonnak dolga akadt a városba és a 12 éves Mojse nevü fiára bizta az üzletet. Amikor hazajött kérdezte a gyereket.

— Nos, Mojse, fiacskám, csináltál valami üzletet?

— Csináltam papám, — felelte büszkén a gyerek, — eladtam a fekete ruhát, ami már régen a sarokban hevert.

— És mennyiért adtad el azt a ruhát? — kérdezte Salamon.

— Tizenhat dollárt kaptam érte, — mondotta a fiu.

— Tizenhat dollárt?! — kiáltotta fel Salamon csodálkozva — Hiszen nem volt nekünk ilyen drága ruhánk.

— Dehogy is nem, —mondotta Mojse. — Ime itt van a cédula, nézd meg magad.

Salamon átvette a kártyát, jól megnézte, aztán felkiáltott.

— Hála legyen neked Istenem, még a legyekkel is segitel bennünket.

Már késő lett volna.

— Látja János gazda, — magyarázta az ügyvéd, — ha nem maga ütött volna először, amikor a vádló felemelt kezekkel maga felé rohant, hanem megvárta volna, mig az első ütést maga kapja, akkor most biztosan nyert pöre lenne, mert csak önvédelemből tett volna kárt az ellenfelében.

— Értem, uram, értem én azt nagyon jól, — mondja János gazda, — csakhogy ahogy én a Jóskát ismerem, hát nem hiszem, hogy alkalmam lett volna az önvédelemre, ha egyszer ütni hagyom.

Megijedt.

A nagy munkanélküliség idején egy skót munkás kiment valamelyik földijének a farmjára dolgozni. Azonban a harmadik héten már visszament a városba, ahol barátai kérdezték, hogy miért hagyta ott a farmot, mire igy válaszolt:

— Az első héten megdöglött egy malac, hát egész héten malachust ettünk. A második héten megdöglött a borju, hát egész héten borjuhust ettünk. A harmadik héten meghalt a farmer anyósa, hát gondoltam, most már jobb lesz ha innen megyek.

Megdicsérte.

A vidék legismertebb zsiványa ujból a biróság elé került. Ez alkalommal egy ujdonsült birónak osztották ki az ügyét.

— Ejnye, ejnye, Henrik, hát már megint bajban van? — szólt hozzá a biró.

— Igen, biró ur, — felelte jámboran a zsivány. — Amikor legutóbb bajban voltam ön volt a védőügyvédem.

— És ki most a védőügyvéde?

— Nem fogadtam én fel senkit, — mondta szomoruan a zsivány, — nem találok én már többet olyan jó védőügyvédet, mint a biró ur volt, aki ugy kitudna menteni a bajból, mint a biró ur megmentett annyiszor.

Nem volt csoda.

Az ócskavas kereskedésből meggazdagodott zsidó feleségével külföldi utra ment és meglátogatták Palesztinát is. A Galille tenger partján sétálva egy benszülöttre akadtak, aki csónakon vitte a turistákat azon ponthoz, ahol a legenda szerint Jézus a viz tetején járt. Rosenblatnak kedve támadt megnézni a helyet és lefizette az öt dollár taksát. A benszülött beevezett vagy félmérföldnyire a vizen, aztán kijelentette:

— Ez az a hely, ahol Jézus a vizen járt. — Aztán leheveredett a csónakjába és álmosan mondotta. — Inne most már csak 10 dollárért megyek vissza.

— Tiz dollárért! — hördült fel Rosenblat, — hát nem fizettem már egyszer öt dollárt?

— De igen, — felelte nyugodtan a benszülött, — de az csak a behozatalért volt. A visszavitel 10 dollárba kerül.

— Uram isten, — sóhajtott fel Rosenblat, — hát nem csoda, hogy Jézus inkább gyalog ment vissza.

Kiváncsi volt.

A délvidék egyes részein olyan lusta népek laknak, akik ebben a tekintetben méltán versenyezhetnek a magyar legendából ismert Mátyás király lustáival. Az egyik vidéki városkában, amelynek lakói különösen hiresek a lustaságról, a férj az ablaknál ülve szivta a pipáját és eregette a füstöt a uccára. Mindjárt mellette az asszony bóbiskált a hintaszékben, háttal az ablaknál. Egyszerre az uccáról nagy csörömpölés és riadalom hallattszott.

— Mi történik ott? — kérdezte az asszony álmosan.

— Felborult a szomszéd kocsija és az asszony meg a gyerekek, a földre pottyantak, azért sivalkodnak, — válaszolta a férj.

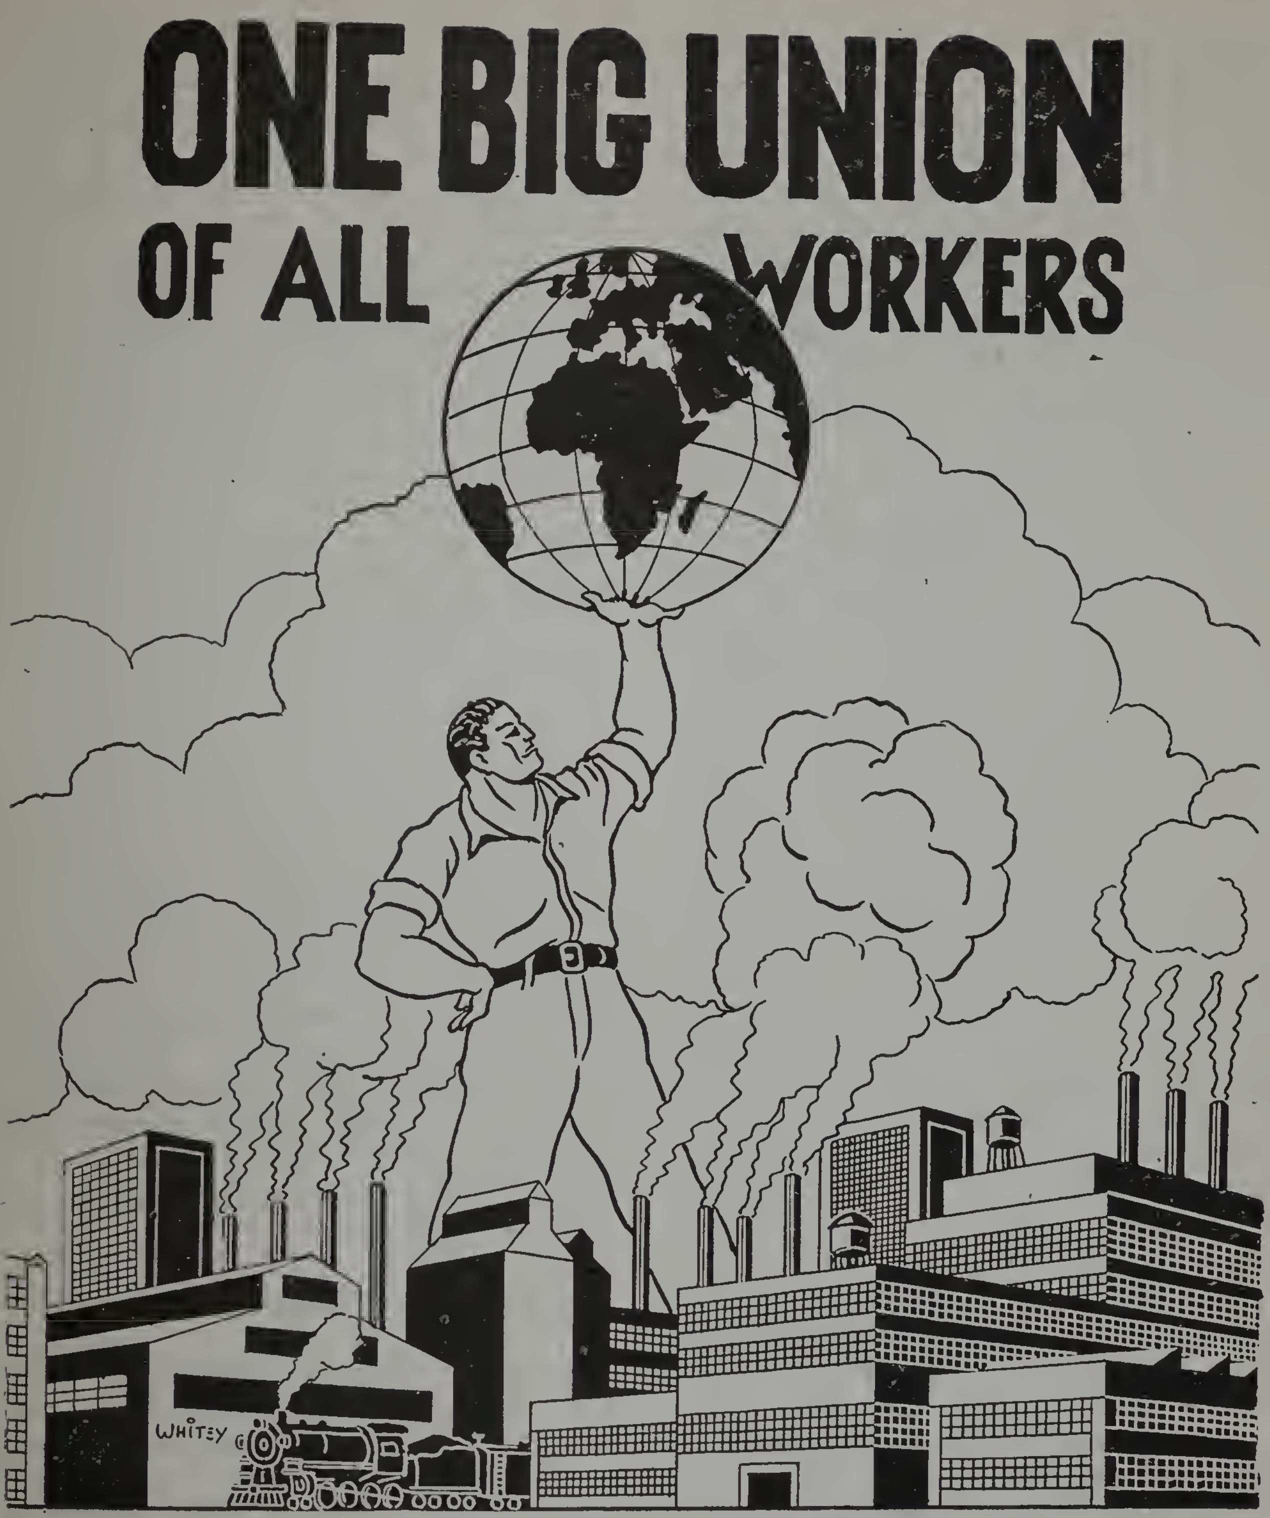
— Nohát azt már én is szeretném látni, sóhajtott egyet megint az asszony, — hogy az a kövér lusta Mrs. Hannah hogyan tápászodik fel a földről? De kár, hogy nem az ablak felé vagyok fordulva!

Alapos jelentés.

A szerencsétlenséget jelentő rendőrtől kérdi az irodatiszt.

— És sulyos a sebesülés?

— Két haláltokozó seb volt rajta, — mondotta a rendőr, — de a másik három seb, nem okozott nagy bajt.



A NYERSANYAGOK, ahogyan azokat a természet szolgáltatja, csak a legritkább esetben alkalmasak az ember használatára. Azon müveletek összességét, amely a nyersanyagoknak a kivánt formát adja, vagy megfelelő helyre szállitja, az IPAR fogalmával fejezzük ki. Társadalmi létünk alapját az ipar képezi.

Modern társadalmunkban az emberek két fontos osztályban csoportosultak. Az egyik, — a kisebb számu, birja ugy a nyersanyagokat nyujtó természeti kincseket, erőforrásokat, mint azon felszereléseket, amelyek segélyével a nyersanyagokat használatra kész árukká formálják.

A másik osztályt, — amely számbelileg sokkal nagyobb az előbbinél, a munkások alkotják. Ezek munkaerejükkel összegyüjtik, kibányászszák vagy termelik a nyersanyagokat, majd szerszámok és gépek segélyével olyan formát adnak azoknak, amilyet használatuk megkiván.

Ezen két embercsoportnak, másszóval OSZTÁLYNAK az érdekei ellentétesek. A modern korszak társadalmi életének a formáját ez a tény szabja meg.

A birtokos osztály, — amelyet gyakran KAPITALISTA osztálynak is emlitenek, — a természeti kincsek és a termelőeszközök birtoklása alapján uralma alatt tartja az iparokat. Ez az uralom nagy kiváltságokat biztosit számukra. Természetes, hogy az ilyen kiváltságokat meg akarják tartani. Azért minden társadalmi intézményre kiterjesztik befolyásukat. Ők készitik és hajtják végre a törvényeket; az ő kivánságuknak megfelelőleg tanitják az iskolás gyermekeket arra, hogy tiszteljék a kiváltságokat; a sajtó, a mozgókép és a rádió a közönség gondolkodását és érzelmeit az ő érdekeiknek megfelelőleg igyekszik befolyásolni. És végre, ha nem tudják megsemmisiteni a munkások által felépitett szervezeteket, akkor igyekszenek azokat is kontroljuk alá vonni.

A tulajdonos, vagy munkáltató osztály ipari kontrólja azonban két tény következtében veszélyben van. Ezek a következők:

1. A modern ipari fejlődés müködésüket szükségtelenné tette.

2. A munkásosztály már annyira fejlődött, hogy ha elhatározza, képes átvenni az iparok irányitását, hogy a mainál hatásosabb, sokkal jobban kielégitő társadalmi rendet alapitson.

A tőkés eredeti rendeltetése az ipari vállalathoz szükséges tőke megszerzése és az igazgatás szolgálata volt. Ma az igazgatást (management) az ily célra speciális kiképzést nyert alkalmazottak végzik. A tőkét pedig a profitból származó különböző tartalékokból veszik. A korporált adminisztrációs rendszer, — amit maguk a tőkések fejlesztettek ki, szükségtelenné teszi magukat a tőkéseket.

Jelen társadalmunkat domináló üzlet-osztály tagjai (tőkések) az előttük uralmon lévő királyokkal és feudális lordokkal folytatott harc révén kerültek mai poziciójukba. A köznép segélyével győztek azokban a harcokban leginkább azért, mert az uj találmányok, uj módszerek és felfedezések a feudális rendszert avulttá tették. Azon parlamentáris intézmények, amelyeket azért hoztok életre, hogy a királyoknak és a főuraknak a harcokhoz pénz szerezzenek, egyben olyan hatásos kormányzási rendszert fejlesztettek ki, amelybe a királyok és lordok már éppen ugy nem illettek bele, mint jelen társadalmunkba a tőkések.

A nagy felfedező utazások, a hajózás fejlődése és az uj gyári rendszer a raktárházak fölötti tulajdonjogot értékesebbé tette a földbirtok tulajdonjogánál. Társadalmi életünk alapja a mezőgazdaságról az iparokra ment át és ennek megfelelőleg társadalmunk feletti uralom is az iparok tulajdonosainak kezeibe került.

Forradalmi fejlődés.

Ezen változások idején is a konzervativ gondolkozásuak feljajdultak, hogy most már vége lesz az emberi civilizációnak. Pedig dehogy is lett! Éppen ellenkezőleg, előre haladt. Az uj rendszer átvette és tovább fejlesztette a régi rendszerből azt, amit fel tudott használni, ellenben megsemmisitette azon intézményeket, amelyek akadályozták a további fejlődést. Az ipar és a kereskedelem jobban virágzottak, mint előbb.

Az élethez szükséges javak elkészitésének módjai és általában az egész életmódunk nagyobb változáson ment keresztül az utóbbi kétszáz év alatt, mint a megelőző két ezer évben. Minden munkás termelőképessége százszorta nagyobb lett, mint azelőtt. Azonban a munkások életszinvonala nem emelkedett ebben a mértékben és nem is emelkedhetik mindaddig, amig az iparokat a tőkések kontrolálják, mert a bőség és kényelem eshetőségeit elrabolják a nagy ipari depressziók és a háboruk, amelyeket a munkásosztály nem engedne meg, ha az iparok fölött uralma lenne.

A modern ipari fejlődés nemcsak szükségtelenné tette a tulajdonos osztály munkakörét, de egyben össze is zsugoritotta ezt az osztályt ugy, hogy számuk mindinkább kevesebb lett.

A nagy korporációk fejlődése a kis üzletek bezárását eredményezik. Szakemberek állitása szerint Amerika gazdasági életét 60 vagy 70 ember uralja. Miután kartelokat kötnek a más országok hasonló tőkéseivel, ezen néhány ember kontrolálni akarja az egész világ gazdasági életét. Szolgák és talpnyalók seregei veszik őket körül, de barátaik száma nagyon csekély. Csak a tulajdonosoknak ez a kis számu osztálya vesztené el kiváltságait, ha az iparok irányitását kivennék a kezeikből. Az emberiség többi része azonban igen sokat nyerne vele.

A munkásosztály növekedése.

Az évek hosszu sorai alatt a munkásosztály megnövekedett, megnövekedett többféle módon. Először megnövekedett számban, méghozzá ugy, hogy csaknem mindenki ebbe az osztályba tartozik. De növekedett értelemben, tudományban, képességben is. Ma az egyszerü napszámos ember megért avagy alkot olyan dolgokat, amire száz évvel ezelőtt a mérnök nem lett volna képes.

Az irástudatlan jobbágyok helyét az irni és olvasni tudó ipari munkások foglalták el. Sőt már van nagykiterjedésü saját munkás irodalmuk is. És ebéidőben, mialatt a "lunchbucket"-ből falatozik, a világeseményék felől tárgyal szomszédjával.

De növekedett szervezeti hatalomban is. A szervezés területén tett minden lépésével a munkáltató osztály által kizárólagosan uralt területre tört be. A munkáltatók kizárólagos jogaiból csikart el akkor, midőn a munkaidőt korlátozta, avagy megszabta, hogy milyen gépeken dolgozik, bizonyos munkáért milyen fizetés jár; aż elsőbbségi "seniority" jogok, biztonsági és egészségügyi szabályok betartása, stb. stb., mint a munkásság hatalmát erősbitik.

Nemcsoda, hogy az üzleti érdekeltség a szervezett munkásságot ellenségnek tekinti. És ha logikusan gondolkozunk, akkor igazat kell adni nekik. A szervezett munkásságnak minden olyan lépése, amely hozzájárul ahoz, hogy az iparok fölötti rendelkezést az üzleti érdekeltségtől átvegye, az osztályok nélküli társadalom kiépitéséhez vezet, mert a munkásokon alul már nincsennek osztályok. Egyben végetvet mindama borzalmaknak, amiknek a jelenben tanui vagyunk éppen társadalmunknak osztályokba való felosztása révén.

A holnap égető kérdése tehát, hogyan lehetne az iparok fölötti irányitást a munkásságnak átvenni? Ez az irányitás a lényeges, hiszen a nagy korporációk által birt iparoknál a tulajdonjog ma már ugyis nagyon misztikus. Az irányitás, vagy igazgatás a fontos, amely ma már sok esetben bizonyos mértékig függetlenitette magát a tulajdonosoktól, avagy azoktól, akik a tőkét befektették a vállalatba. Aki az iparokat konrtolálja, nem sokat törődik azzal, hogy ki a tényleges birtokos. A fő az, hogy kinek a szava dönt, amikor az ily kérdések merülnek fel: Ki határozza meg, hogy az üzem megálljon, vagy tovább termeljen? Ki határozza meg, hogy mit termeljenek, hol termeljék és mennyit termeljenek?

Ezek az igazán fontos kérdések.

Kik jogosultak az iparok irányitására?

Ha a mai társadalmi osztály tagozódását nézzük, akkor láthatjuk, hogy az iparok irányitását csak a kis számu, de nagy vagyonnal, sok pénzzel rendelkező bankárok, vagy pedig a nevükben intézkedő politikusok, avagy **maguk a termelést végző munkások intézik.**

Miután az irányitó, vagyis a döntő faktor csak egy csoport lehet, igy valóban égetően fontos kérdés az, hogy melyik csoport kezébe kerüljön az irányitás. A bankárok a különböző trösztök, kartelok, igazgatóságok, hitelek, részvények és kötvények utján ma az egész világ gazdasági élete felett uralkodnak. Ez az uralom azonban olyan, hogy magát a gazdasági életet fojtogatja, mert nem engedi meg a munkásosztálynak a korlátlan termelést, — legfeljebb csak háboru esetén a pusztitás céljaira. Béke idején a termelő erőket guzsbaköti, tétlenségre kényszeriti, mert elzárja tőlük a termelő eszközöket.

Midőn aztán a termelésnek ily megakasztása a beálló inség következtében elégedetlenséget vált ki a néptömegekből, akkor a termelőeszközök tulajdonosai a kormánnyal szövetkeznek népeik további kizsákmányolására, — mint ezt Hitler Németországban láttuk; vagy pedig a kormány a "demokrácia megmentésére" az iparok irányitására korlátozó törvényeket hoz. Ez történt Amerikában a New Deal adminisztráció ideje alatt.

Ipari Demokrácia.

Vannak, akik ugy vélik, hogy ha ezt a kormány uralmat, vagyis a munkások kizsákmányolásának állami hatalommal való korlátozását még tovább fejlesztik, akkor a társadalmi nagy probléma megoldást nyer. Mi, az Industrial Workers of the World szervezet tagjai nem hiszünk ebben. De nem hiszik ezt a szervezett munkásság intelligensebb elemei sem, bármely szervezetnek a tagjai is. Mi jól tudjuk, hogy egészen mindegy, vajjon a bankárok maguk hajtják-e a kocsit, avagy csak a hátsó ülésről utasitják a korkormánykereket kezükben tartó politikusokat, hogy hová, merre és mily sebesen hajtsanak.

Ha a képviseleti kormány minden és mindenki fölött uralkodik, akkor már nem képviseleti kormány többé. A munkásokat már ma is anynyi sok mindenféle hivatalból irányitják, hogy ha azokat még a jövőben megszaporitják, akkor a munkások valóban csak bábok lesznek, akiket ide-oda tolnak a kormányhivatalnokok. És aztán ha nem felejtkezünk el arról a régi tradicióról, hogy "a kormány ellen nem sztrájkolhatsz", akkor hová lesz az a kollektiv egyezkedés, aminek állitólag a védelmére hozzák életre azt a sok kormányhivatalt?

Az ilyen totalitár gazdasági rendszer egyben megteremti a totalitár politikai rendszert is. És mi történik akkor az egyéni szabadsággal? A kezdeményezés jogával? Mert nem igaz ám az, hogy az emberiség legnagyobb problémája a termelés és a szétosztás kérdésének megoldása. Termelni is tudunk és a termelt dolgokat még könnyebben szét tudnánk osztani, ha egy kis számu embercsoportnak nem adnánk olyan HATALMAT, hogy a termelést és a szétosztást meg tudják akadályozni. Mindaddig, amig ennek a kis csoportnak megmarad ez a nagy hatalma, a többiek, a sokak élete soha sem lesz biztos. Nem lesz biztos, mert veszélyeztetik a nélkülözés, a munkanélküliség, depressziók és háboruk. Sőt mondhatjuk, hogy az emberiséget érő társadalmi bajok legtöbbjének okát abban találjuk meg, hogy ily nagy hatalom összpontosul a kis számból álló vagyonos osztály kezében. Sőt még azon találmányok is, amelyeknek célja a termelés növelése, csak ezen uralkodó osztály hatalmát gyarapitják.

A szállitás és a közlekedés fejlődése arányosan fejlesztette ezen vagyonos osztály birodalmát. De a legkülönösebb ebben a dologban az, hogy eddig valahányszor rájöttek erre a néptömegek és orvosolni akarták a bajokat, akkor kiválasztottak valakit, akinek még nagyobb hatalmat adtak, s aki ennélfogva nem, hogy javitott, de még rontott a dolgon, — mint láthattuk ezt Európában.

Joggal kérdezhetjük tehát, hogy vajjon a szervezett munkásság mikor eszmél már arra, hogy ne keressen közvetitőt, hanem **saját maga segitsen orvosolni a bajokat ugy, hogy átveszi az iparok irányitását.**

A munkásoktól függ.

Ha a munkások helyesen szervezkednek, akkor képesek lesznek arra, hogy saját maguk rendelkezzenek munkaerejükkel. De miután munkaerő hozza létre az összes termelt javakat és ezen javak birása hatalmat jelent, igy a munkaerő fölötti rendelkezés egyben hatalmat is jelent. A munkásosztály a jelenben mindig azt teszi, amit PARANCSOLNAK neki. Azonban ha egyesiti az erejét, akkor a parancsoló hatalmat helyettesitheti a saját, kollektiv akaratával. Sőt mi több, ezzel a határozatával, ha érvényre juttatja, egyben megfosztja az ellenfeleit minden hatalomtól, mert azoknak a hatalma valóban a munkásság engedelmességén nyugszik.

Az iparoknak a munkások által való irányitását sokan csak ábrándnak tartják. Pedig ha figyelnék a gazdasági fejlődést, akkor láthatnák, hogy **határozottan ebben az irányban haladunk.** Ez az a központ amely felé a munkásmozgalom minden lépése halad még ott is, ahol nem ez a kimondott cél.

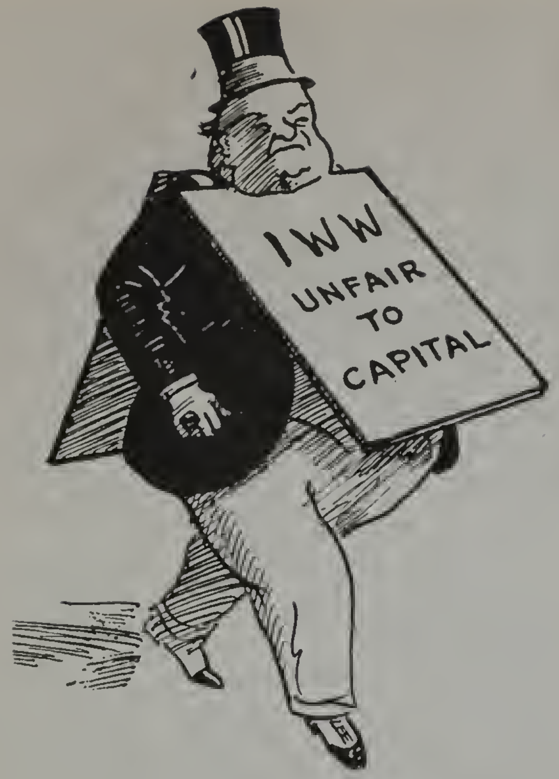
Azonban dacára annak, hogy állandóan az iparok átvétele felé haladunk, mégis a végcélt el nem érhetjük addig, amig kellőleg fel nem készülünk rá. Az Industrial Workers of the World azért alakult, hogy ezt az előkészitő munkát végezze. Ha ez a munka nem sikerül, akkor az ellenkező irányzat győz, — mindennek a megrendszabályozása vagy a kormány, vagy pedig az azzal szövetkező fasizmus által.

A mai problémáink legtöbbjének megoldásához csak az IPARI DEMOKRÁCIA utján jutunk el. Igy valóban fentarthatjuk az igazi demokráciát, amely napjainkban legfeljebb csak a választás napján érvényesül, de akkor is csak politikai téren. Az Ipari Demokrácia megszabadithat bennünket a szükségtől, félelemtől, ipari krizisektől és a háboruktól. A mai modern termelési rendszerekkel az Ipari Demokráciában képesek leszünk ellátni mindenkit az összes szükségleteivel. Az Ipari Demokrácia szabadságot és életbiztonságot nyujt, tehát azt a két tényezőt, amelyet az ember legtöbbre becsül.

De azonkivül az Ipari Demokrácia a mai anarkisztikus társadalmunkban harmóniát teremt, amelyben intelligensen fognak dolgozni az emberek nem a kiváltságos kisebbség, hanem az összesség javára. Olyan társadalmi rendszerben a termelők maguk határozzák el, hogy mit, hol és hogyan készitsenek, miután megállapitják a szükségletet, hogy mindenkinek elegendő jusson. Igy a szükség gazdaságát a bőség gazdasága váltja fel.

Az Ipari Demokráciát azonban csak a szervezett munkások épithetik fel. Az ilyen szervezetnek két célt kell szolgálni:

1) A leghatásosabb szervezeti formát kell nyujtania már a min-



Pokolba a politikával.

dennapi küzdelmeinkhez is, hogy a sorsunkon állandóan javithassunk;

2) Az ipari problémák teljes megeoldására kell törekednie, amit a modern iparoknak a munkásság által való hatásos igazgatásában találunk meg.

Szerencsére, — azonban nem a véletlen müve, — már van egy olyan szervezet, amely ezt a két célt nagyon hatásosan képes szolgálni. Ez a szervezet az Industrial Workers of the World, (Világ Ipari Munkások Szervezete), amely ugy szervezi a munkásokat, amint az ipartelepeken, a bányákban, a termőföldeken, stb. dolgoznak. Igy ebben a szervezetben a munkások között ugyan az a viszony áll fen, mint a munkahelyeken. Az ily szervezkedés nagyon hatásos fegyvert nyujt a munkásoknak a mindennapi küzdelmeikben, mert bérmozgalmak esetén az egyik csoportot nem lehet felhasználni a másik ellen. De azonkivül az ilyen szervezet, miután a munkásokat ugy csoportositja, amint a munkán dolgoznak, képes átvenni magát a termelés irányitását is, hiszen valójában ugyis a munkások végeznek minden munkát.

Igy tehát nagyon fontos, hogy részletesebben megismerjük azt a szervezeti formát, amely igy tökéletes kifejezője a munkásosztály törekvésének.

Tervezett gazdaság.

A modern ipari termelésnél az egyes iparágak összefonódnak, egymásra vannak utalva. Még a legegyszerübb ipartermékek előállitásánál is ugyszólván az összes iparok közrejátszanak. Igy aztán ha az iparok bármelyikében zavarok állnak be, azt a többi iparok is megérzik.

Az iparoknak egymástól való függését egy gyakorlati példán mutathatjuk be legkönnyebben. Nézzük csak például az inget, ami eléggé egyszerü ipartermelvény. Hajdanában a fehérnemüt s igy az inget is házilag készitették. A lent is saját maguk termelték a nagyon egyszerü, jóideig szintén házilag készitett földmüvelő eszközök segélyével. Az emberi erőn kivül legfeljebb az igás állatok erejét használták, amelyeknek az élelmet szintén maguk termelték meg. Nagyon de nagyon sok idő multán fejlődött a civilizáció odáig, hogy a munka megosztásához jutottak. De még akkor is évezredeken át, ha nem is maga a család, de egy kis környezet megtermelte azon közösség összes szükségletét.

Ma azonban a dolog másképp áll. Az egyszerü gyapot ing elkészitéséhez nem elegendő a munka és a nyersanyag. Az inget ma gépekkel felszerelt gyárakban készitik. Az ing elkészitéséhez tehát a gyapotszöveten kivül szükség van GÉPEKRE és ÉPÜLETEKRE. A gépeket viszont gépgyárakban csinálják. Ugyancsak már gyárak állitják elő az épületanyagokat és azon gépeket, amelyekkel az épitkezést végzik. Természetesen minden ilyen munkánál nagymennyiségü anyagot kell egyik helyről a másikra szállitani, tehát fontos, hogy a szállitó ipar is zavartalanul müködjön.

De számitásba kell vennünk, hogy mindezen szolgálatokat végző munkásoknak élelemre, lakásra és ruhára van szükségük. Az ily dolgokkal viszont megint más gyárak látják el őket. Ezt igy folytathatjuk vég nélkül. Ezért mondjuk azt, hogy a munka társadalmi jelleget öltött, vagyis minden munkatermelvény előállitásában a társadalom igen tekintélyes rétege vesz részt. Igy mondhatjuk, hogy a testünket fedő egyszerü ing elkészitésében része van a gyapotot termelő farmeron kivül az épitő munkásoknak, acélgyári munkásoknak, festékgyári munkásoknak, szállitó munkásoknak, bányászoknak, villanyszerelőknek, varrónőknek, könyvellőknek, nyomdászoknak, stb. stb.

A mai termelési rendszerünket az jellemzi, hogy a munkások minden határozott rendszer nélkül végzik szerepüket ebben a társadalmi termelésben. Ezt a ma már nagyon is komplikált ipari rendszert teljesen a VÉLETLEN irányitja. A véletlen szabja meg, hogy hol, mit és mennyit gyártanak minden szükséges áruból. Erre mondják azt, hogy a mai termelési rendszerben anarkia uralkodik.

Pedig ezt az anarkiát ki lehetne küszöbölni a termelésből. Sőt ki is fogják küszöbölni. A termelés fejlődésének ez a tendenciája, az anarkisztikus termelés át fog alakulni TERVEZETT, tehát TUDATOSAN IRÁNYITOTT termeléssé. Ezt meg lehet tenni, mert hiszen az emberi hasznos tevékenység összességét lehet osztályozni, összefoglalhatjuk hat csoportba, a következő módon:

1. — Nyersanyagok termelése vagy tenyésztése.

2. — Nyersanyagok bányászata.

3. — Épitkezés (épületek, utak, hajók, stb.)

4. — Használati cikkeek készitése (élelmiszerek, ruházat, gépek és egyéb eszközök).

5. — Szállitás és közlekedés.

6. — Közszolgálatok (iskolák, kórházak, szinházak, stb.).

Az 1905-ben alakult Industrial Workers of the World ennek a hat főcsoportnak megfelelőleg szervezi a munkásokat ipari szervezetekben. Ez a szervezet tehát hat DEPARTMENTBŐL ÁLL.

A DEPARTMENTEK aztán feloszlanak IPARI SZERVEZETEKRE a kivánalmaknak megfelelőleg. Miután azonban az iparok, mint előbb kimutattuk, ma már egymásba fonódnak, teljes lehetetlenség a departmentek között éles választóvonalat adni. Azonban erre nincs is szükség, hiszen az ipari szervezetekben való szervezkedés célja nem a munkások egymástól való elszigetelése, hanem éppen ellenkezőleg, az összes munkások kooperációjának a megkönnyitése.

Ipari tagoltság.

Az Industrial Workers of the World olyan szerkezeti formát ajánl, amely a munkásokat az iparoknak megfelelő csoportokba osztja, mert a munkások tagoltságát valójában az iparok szabják meg. Ezt is egy példával tudjuk legjobban megmagyarázni. Nézzük például azt a festőt, aki az automobil gyárban dolgozik. Ez a munkás az automobil iparhoz tartozik s őt első sorban is az automobil ipar munkaviszonyai érdeklik, nem pedig az, hogy a festők más iparokban milyen problémákkal állnak szemben. De azonkivül ez a festő munkás szerves része az automobil iparnak, munkájára ott elengedhetetlen szükség van, igy ő a többi automobil munkással együtt képviseli magát az egész ipart.

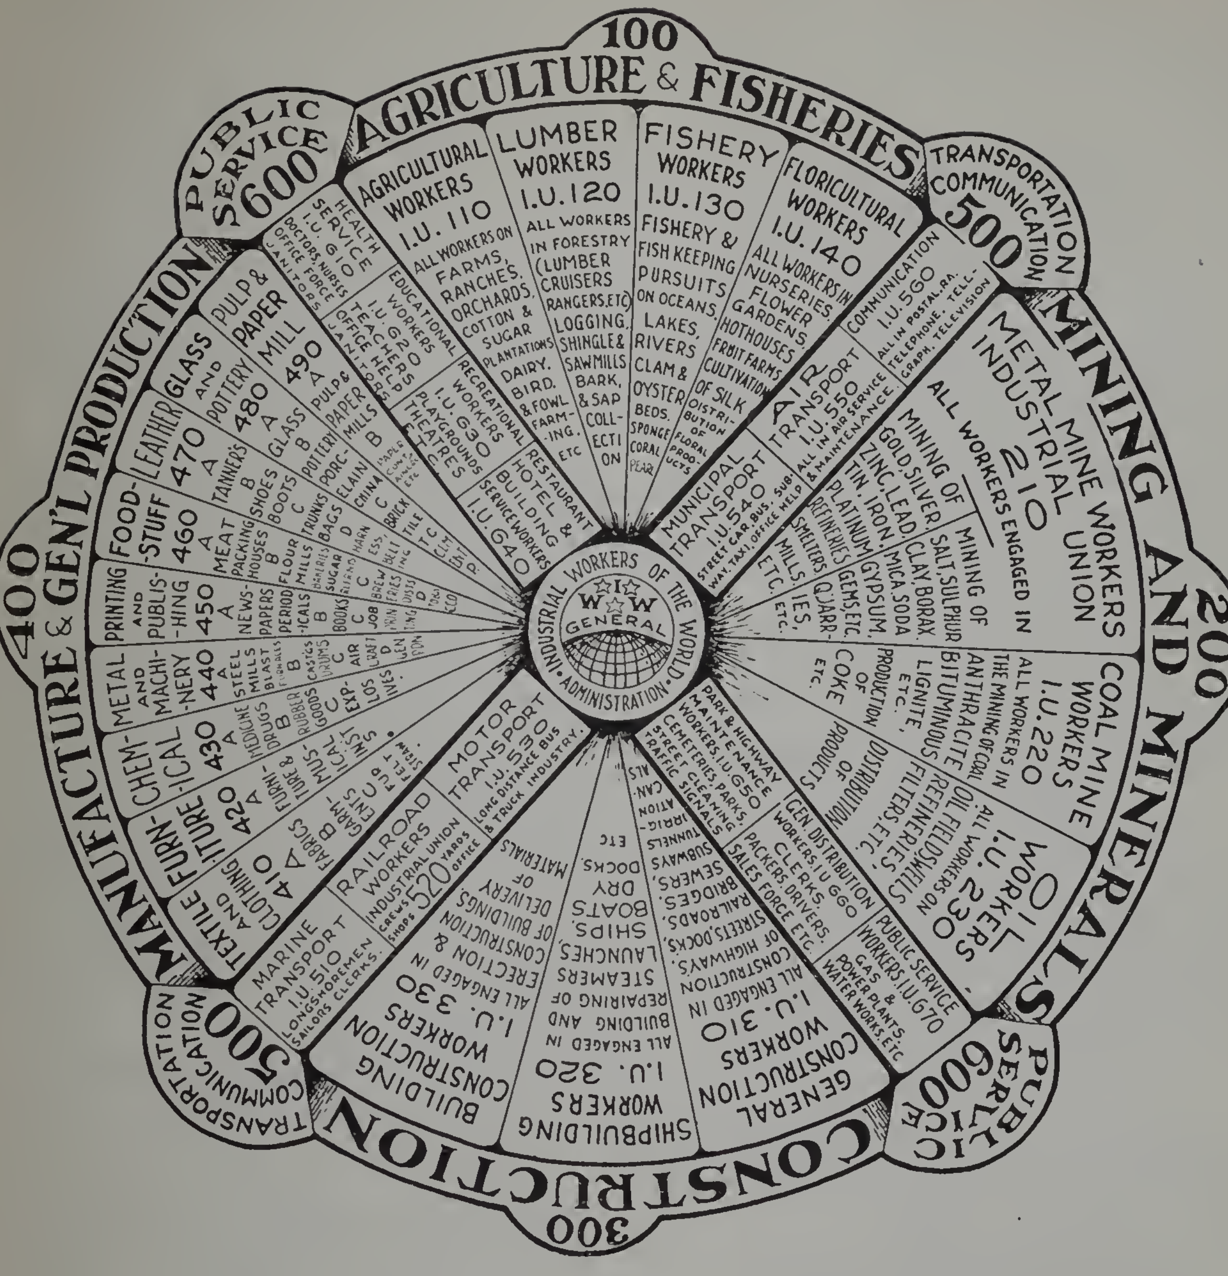
Az I.W.W. szervezeti formájának felépitésénél a tudományos alapu tizes számrendszert használja. Egy-egy ipari departmentnek a százas jelzést adta. Az ipari departmenten belül az ipari szervezetek a tizes jelzést nyerték és ezen belül az egyes ipari csoportok felvehetik az egység jelzést. Ez a csoportositás és jelzés nagyon hasonlit ahoz, amit a könyvtárakban a könyvek jelzésére használnak. Ez a könyvtári jelzés is éveken át tartó fejlődés eredménye. A lényege és főérdeme abban áll, hogy nemcsak minden könyvet, amit eddig irtak, hanem még amit a jövőben fognak irni is, el lehet helyezni a rokontárgyu könyvek közé a tudományos beosztás alapján. Az I.W.W. szervezetben is a csoportositás és a számjelzés ilyen logikus és nem a véletlen szüleménye.

Természetesen az összes szervezeteket és csoportokat összefogja, koordinálja az anyaszervezet, a ONE BIG UNION (Egy Nagy Szervezet). Az anyaszervezeten keresztül képesek mindazon együttes akciókra, amelyekre alkalomadtán szükség van. Igy például az acéliparban a vasmunkásokon kivül ott látjuk a bányászokat, vasutasokat, rakparti munkásokat, stb. stb. A One Big Union lehetővé teszi ezeknek a teljes kooperációját, de ugyanakkor nem zárja ki azt, hogy például szénbányászok ne kooperáljanak a többi szénbányászokkal, akik nem az acélipar részére bányásszák a szenet. Csakis az ilyen ipari szervezet, mint a ONE BIG UNION képes hatásosan harcolni a munkások követelményeiért a mindennapi harcok folyamán.

Az I.W.W. tervrajzát, illetőleg szerkezetét, grafikailag köralaku formában lehet legjobban bemutatni. A teljes kör az emberiség általì kifejtett HASZNOS munkák összességét jelenti. A kör középpontjában találjuk az Industrial Workers of the World központi adminisztrációját. A kör négy nagyobb szektora képviselik a termelés négy nagy departmentjét. Az első, amit 100-as jelzéssel láttak el a szervezet megalakitói, az őstermelés, vagyis a földmüvelés és halászat. A második, a 200-as jelzésü a bányászati department. A 300-as jelzésüt az épitkezési department alkotja. Az általános gyára termelés a 400-as számot kapta. Miután mindezen iparoknak és az iparokban dolgozóknak szükségük van ugy a szállitásra, mint a közszolgalati dolgokra, ezen két department grafikai jelképei keresztül mennek az egész kör területén, a beosztásban pedig az 500-as és a 600-as department jelzéseket nyerték.

A departmentekben csoportosulnak az IPARI SZERVEZETEK. Ezeknek számainál az első számjegy (a százas) a departmentet jelzi, mig a második (a tizes szám) az ipari szervezet száma. Igy még további felosztásra is alkalom marad, ha az ipari szervezeten belül csoportositásra van szükség, mondjuk az iptartelep megjelölésére. Ime egy példa: Az általános gyári termelést a 400-as department alkotja. Ebben a departmentben a fém és gépmunkások a 4-ik ipari szervezetet alkotják, tehát a számuk 440. Tegyük fel, hogy az automobil ipart megszervezve, a 440-es szervezeten belül külön csoportban a 6-os számot kapná, akkor az I.W.W.-hoz tartozó automobil munkások ipari szervezetének a száma 446 lenne, ahol az első 4-es a departmentet, a második 4-es a fém és gépipart és a 6-os magát a speciális terméket, — ebben az esetben az automobilt jelezné. A praktikusság kedvéért azonban az I.W.W. jelenleg csak azon számokat használja, illetőleg foglalta le, amelyekben már van szervezete. Ez a fenti 6-os szám csak példa, amit a magyarázat kedvéért hoztunk fel.

Az alábbiakban felsoroljuk az Industrial Workers of the World összes departmentjeit és ipari szervezeteit. Tekintettel arra, hogy itt, Amerikában midenféle nyelvü munkásnak az iparokban az angol nyelvet kell használni, igy ennek megfelelőleg ezt a szervezeti tervrajzot is ajánlatos, ha mindenki ismeri az angol nyelven is. Azért előbb az angol nyelvü ismertetés közöljük, s utána hozzuk a forditás.



100 AGRICULTURE & FISHERIES
AGRICULTURAL WORKERS I.U. 110 ALL WORKERS ON FARMS, RANCHES, ORCHARDS, COTTON & SUGAR PLANTATIONS, DAIRY, BIRD, & FOWL FARMING, ETC
LUMBER WORKERS I.U. 120 ALL WORKERS IN FORESTRY (LUMBER CRUISERS RANGERS, ETC) LOGGING, SHINGLE & SAWMILLS BARK, & SAP COLLECTION
FISHERY WORKERS I.U. 130 FISHERY & FISH KEEPING PURSUITS ON OCEANS, LAKES, RIVERS, CLAM & OYSTER BEDS, SPONGE, CORAL, PEARL
FLORICULTURAL WORKERS I.U. 140 ALL WORKERS IN NURSERIES, FLOWER GARDENS, HOTHOUSES, FRUIT FARMS, CULTIVATION OF SILK, DISTRIBUTION OF FLORAL PRODUCTS
TRANSPORTATION COMMUNICATION 500
200 MINING AND MINERALS
METAL MINE WORKERS INDUSTRIAL UNION 210 ALL WORKERS ENGAGED IN MINING OF GOLD, SILVER, ZINC, LEAD, TIN, IRON, PLATINUM, REFINERIES, SMELTERS, MILLS, ETC. MINING OF SALT, SULPHUR, CLAY, BORAX, MICA, SODA, GYPSUM, GEMS, ETC. QUARRIES, ETC.
COAL MINE WORKERS I.U. 220 ALL WORKERS IN THE MINING OF COAL, ANTHRACITE, BITUMINOUS, LIGNITE, ETC. PRODUCTION OF COKE, ETC.
OIL WORKERS I.U. 230 ALL WORKERS ON OIL FIELDS, WELLS, REFINERIES, FILTERS, ETC. DISTRIBUTION OF PRODUCTS
PUBLIC SERVICE 600
300 CONSTRUCTION
GENERAL CONSTRUCTION WORKERS I.U. 310 ALL ENGAGED IN CONSTRUCTION OF HIGHWAYS, STREETS, DOCKS, RAILROADS, BRIDGES, SEWERS, SUBWAYS, TUNNELS, IRRIGATION, CANALS
SHIPBUILDING WORKERS I.U. 320 ALL ENGAGED IN BUILDING AND REPAIRING OF STEAMERS, LAUNCHES, SHIPS, BOATS, DRY DOCKS, ETC
BUILDING CONSTRUCTION WORKERS I.U. 330 ALL ENGAGED IN ERECTION & CONSTRUCTION OF BUILDINGS, DELIVERY OF MATERIALS

GEN. DISTRIBUTION WORKERS I.U. 660 CLERKS, PACKERS, DRIVERS, SALES FORCE, ETC.
PUBLIC SERVICE WORKERS I.U. 670 GAS & POWER PLANTS, WATER WORKS, ETC.
MUNICIPAL TRANSPORT I.U. 540 STREET CAR, BUS, SUBWAY, TAXI, OFFICE HELP
AIR TRANSPORT I.U. 550 ALL IN AIR SERVICE & MAINTENANCE
COMMUNICATION I.U. 560 ALL IN POSTAL, RA., TELEPHONE, TELEGRAPH, TELEVISION
INDUSTRIAL WORKERS OF THE WORLD
I W W
GENERAL ADMINISTRATION

DEPARTMENT No. 100
Agriculture and Fisheries

Agricultural Workers Industrial Union No. 110

All workers on farms, ranches, orchards, cotton and sugar plantations. All workers engaged in the raising of cattle, livestock, an fowl, bird, dairy farms, etc.

Lumber Workers' Industrial Union No. 120

All workers in forests; (rangers, foresters, etc.). All workers engaged in lumbering operations, in saw and shingle mills, and preparing wood for fuel and manufacturing purposes; collectors of sap, bark, etc.

Fishery Workers' Industrial Union No. 130

All workers in fishery and fishing pursuits on oceans, lakes and rivers; oyster and clam-bed keepers. All workers engaged in collecting pearls, corals and sponges, etc.

Floricultural Workers' Industrial Union No. 140

All workers engaged in nurseries, hothouses, etc., mainly devoted to flower production, in the distribution of flowers, in landscape gardening, etc.

DEPARTMENT No. 200
Mining and Minerals

Metal Mine Workers' Industrial Union No. 210

All workers engaged in mining of gold, silver, copper, lead, zinc, tin, platinum, iron, etc., etc., in mills, smelters, refineries, and other reduction works. This division also includes quarry workers, such as those engaged in mining of salt, sulphur, clay, mica, bromida, graphite, soda, gypsum, asphalt, limestone, sandstone, granite, etc. All precious gems, salines, salt and soda dry works, etc.

Coal Mine Workers' Industrial Union No. 220

All workers engaged in coal mining, lignite, anthracite, bituminous, etc. in the production of coke, peat and turf, and in the distribution of these products.

Oil Workers' Industrial Union No. 230

All workers engaged in the production of oil, and in refineries, gas wells, filters, etc., and in the distribution of these products.

DEPARTMENT No. 300
Construction

General Construction Workers' Industrial Union No. 310

All workers engaged in the construction of highways, streets, railroads, docks, bridges, subways, sewers, tunnels, levees, canals, viaducts, air fields, dams, irrigation ditches, etc.

Shipbuilding Workers' Industrial Union No. 320

All workers engaged in the building and repairing of ships, launches, boats of all kinds, dry dock workers, etc.

Building Contsruction Workers' Industrial Union No. 330

All workers engaged in the erection and construction of buildings and the direct supply of building materials; or in their repair except maintenance workers.

DEPARTMENT No. 400
Manufacture and General Production

Textile and Clothing Workers' Industrial Union No. 410

a) All workers engaged in the manufacture of threads, yarns of fabrics, or in dyeing them, or in the manufacture of knitted wears, or of synthetic substitutes.

b) All workers engaged in the manufacture of garments, including sewn clothing, gloves, hats, caps, furs, etc. and in the supply of their accessories.

c) All workers producing other textile products, as cotton belting, rope, awnings, etc.

d) All workers employed in laundries, cleaning and dyeing establishments, and the repair of garments, etc.

Furniture Workers' Industrial Union No. 420

All workers employed in (a) planing mills, molding factories etc. not attached to sawmills; or (b) the production of furniture, whether of wood or other materials, including pianos, organs, etc., bowling and billiard equipment, and most sporting goods; phonographs, radios, etc.

Chemical Workers' Industrial Union No. 430

a) All workers engaged in the manufacture and distribution of drugs, medicines, perfumes and kindred products.

b) All workers in the production of rubber goods and synthetic substitutes, etc.; and in the distribution of these products.

c) All workers engaged in the production of explosives and their allied products, and the production of industrial Chemicals, etc.

Metal and Machinery Workers' Industrial Union No. 440

a) All workers engaged in steel mills, blast furnaces, rolling mills, tin-plate mills, etc.

b) All workers engaged in the production of machinery including electrical equipment, locomotives, autos, airplanes, industrial and household equipment, etc.

c) All workers engaged in the production of sheets, tubes, castings, etc. of non-ferrous metals.

d) All workers engaged in making household utensils, watches and clocks or musical and scientific instruments.

Printing and Publishing Workers' Industrial Union No. 450

a) Al lworkers engaged in the production and direct distribution of newspapers and other periodicals, whether employed in the editorial, art, business or mechanical departments.

b) All workers employed in other printing establishments, in concerns printing periodicals for their publishers, and in allied work as photo-engraving, book-binding, etc.

Foodstuff Workers' Industrial Union No. 460

All workers engaged in the manfacture of foods, as in

a) meat and fish packing plants;

b) canneries;

c) sugar refineries;

d) cheese and condensed milk factories, and dairies; including their distribution workers;

e) flour, cereal and feed mills;

f) bakeries and biscuit factories, confectioners;

g) breweries, wineries, distilleries, and plants producing carbonated and other beverages, and workers engaged in the direct distribution of these or allied products as yeast, malt, etc..

h) tobacco factories;

i) establishments for preparing and packaging teas, coffees, spices and other groceries.

Leather Workers' Industrial Union No. 470

All workers engaged in (a) tanneries, etc., (b) in making boots, shoes, and harness; (c) in the production of trunks, bags, belts and all other leather goods.

Pulp and Paper Mill Workers' Industrial Union No. 490

All workers engaged in (a) pulp and paper mills, (b) in making paper containers, etc.

DEPARTMENT No. 500

Transportation and Communication

Marine Transport Workers Industrial Union No. 510

a) All workers engaged in loading and unloading of vessels.

b) All workers engaged in the operation of ocean, river, lake and harbor crafts. This includes all workers, in all departments aboard ships.

c) All workers on docks, wharves, etc.

Railroad Workers' Industrial Union No. 520

All workers employed by railroads in the operation of their service whether they operate trains, repair and clean rolling stock, maintain the roadbed and equipment, work in the office, or watch at a crossing.

Motor Transport Workers' Industrial Union No. 530

All workers engaged in general trucking and inter-urban bus-lines, including the warehouses, garages, etc. incident to this industry. (Note: The truckdriver employed by a factory or store belongs in the industrial union of his fellow employees.)

Municipal Transportation Workers'

Industrial Union No. 540

All workers employed in streetcar, bus, elevated, or subway service; taxi drivers, and any truckers or draymen, etc., not attached to specific industries.

Air Transport Workers' Industrial Union No. 550

All workers employed in the maintenance of this service, whether in its direct operation, in repairs and maintenance of airfields and equipment, in offices or attendant services.

Communication Workers' Industrial Union No. 560

All workers engaged in communication service, such as postal, telephone, telegraph, radio, television, etc., and the maintenance of the same.

DEPARTMENT No. 600

Public Service

Health Service Workers' Industrial Union No. 610

a) All workers employed by hospitals, sanatoria, etc., including physicians, attendants, clerks, janitors, etc.

b) All workers employed by bath and massage establishments, barbers, beauticians, etc.

c) All workers employed in sanitation, garbage disposals, etc.

Educational Workers' Industrial Union No. 620

All workers engaged by institutions of learning, schools, college, libraries, museums, research, services, etc.

Recreation Workers' Industrial Union No. 630

a) All workers engaged in the production of motion pictures, (actors, mechanics, etc.) or in the operation of motion picture theatres; and all workers engaged in other theatres as actors, singers, musicians, stage-hands, ushers, etc.

b) All wage-earning musicians not otherwise classified.

c) All workers at amusement parks, circuses, and other places of recreation.

Hotel, Restaurant, and Building Service Workers' Iidustrial Union No. 640

a) All employees of restaurants, hotels, public cafeterias, etc.

b) All domestic help.

c) All workers engaged in maintenance, servicing and cleaning of office buildings, apartment houses, etc.

Park and Highway Maintenance Workers' Industrial Union No. 660

a) All employees in stores, warehouses, wholesale establishments including delivery service.

b) All employees of banks, insurance copanies, etc.

c) All wage earners engaged in general salvage and junking.

Public Service Workers' Industrial Union No. 670

All workers employed in such services as water supply, gas and power plants, central heating plants, and similar public services.

A DEPARTMENTEK MAGYAR NEVEI:

DEPARTMENT No. 100

Földmüvelés és Halászat.

110 — Földmüvelő munkások ipari unionja.

Magában foglalja a farmokon és az állattenyésztésben, továbbá a gyümölcstermelésnél, a gyapotföldeken, cukormezőkön alkalmazott öszszes munkásokat. Ide tartoznak mindazon munkások, akik marhatenyésztéssel, majorsággal, tejtermeléssel, stb. foglalkoznak.

120 — Erdőirtó munkások Ipari Szervezete

Az erdők kitermelésén foglalkoztatott tösszes munkások — a fü-

részmalmok, zsindelykészitők, tüzifán dolgozók, kéreg feldolgozók, fanedveket szedők, stb. szervezete.

130 — Halászati Ipari Szervezet

A halászattal foglalkozó összes munkások szervezete, akár a tengeren, tavakon vagy folyókon végzik munkájukat. Ide tartoznak az ojster, a klam és a gyöngyhalászok is.

140 — Kertészeti Ipari Munkások Szervezete.

Faiskolákban, melegházakban, gyümölcs, virág vagy zöldség kertészetben alkalmazott munkások, továbbá az ily termékek szétosztásával foglalkozó munkások szervezete.

DEPARTMENT No. 200
Bányászati Department

210 — Ércbányászok Ipari Szervezete

Ide tartoznak mindazon munkások, akik arany, ezüst, réz ólom, zink, ón, platina, vas, stb. érc bányában dolgoznak, továbbá akik az olvasztók és finomitók munkáját végzik. Ide tartoznak továbbá azon munkások is, akik só, kő, kén, borax, agyag, mica, grafit, szóda, aszfalt, gipsz, mészkő, márvány, pala, épitőkövek, stb. stb. bányakban dolgoznak, sőt még a drágakövek bányászói is.

220 — Szénbányászok Ipari Szervezete.

Ide tartoznak az összes szénbányászok, akár kemény (antracite), akár puha (bituminous) széntelepeken dolgoznak. Ugy szintén ebbe a szervezetbe tartoznak a kox munkások, a tőzeg és turf gyüjtők, stb. is.

230 — Olaj Munkások Ipari Szervezete.

Mindazon munkások, akik az olaj előállitásán, akár az olaj forrásoknál, akár a finomitóknál, avagy az olaj szétosztásánál nyernek alkalmazást.

DEPARTMENT No. 300
Épitkezések.

310 — Általános Épitőmunkások Ipari Szervezete.

Utak, uccák, kikötők, vasutak, hidak, alagutak, csatornák, repülőterek, gátak, öntöző zsilipek, stb. épitésénél dolgozók szervezete.

320 — Hajóépitő Munkások Ipari Szervezete.

A hajók épitésénél és javitásánál alkalmazott összes munkások ide tartoznak.

330 — Házépitő Munkások Ipari Szervezete.

Ide tartoznak mindazon munkások, akik az épületek épitésén dolgoznak, vagy akik az ily épitkezésekhez az épitő anyagokat szolgáltatják.

DEPARTMENT No. 400
Gyári és általános termelés.

410 — Textil és Ruhaipari Munkások Ipari Szervezete.

a) Mindazon munkások, akik cérnák, fonalak, pamutok gyártásával vagy festésével foglalkoznak, továbbá akik a kötött vagy szintatik textil áruk készitésénél dolgoznak.

b) Ruhák varrásánál foglalkozók, továbbá keztyüsök, kalaposok, szücsök és az idevágó kellékeken dolgozó munkások szervezete.

c) Másféle gyapot árun, mint például kötelek, ernyők, stb. dolgozó munkások csoportja.

d) Ebben a csoportba tartoznak a mosodák és tisztitók alkalmazottai, továbbá a ruhák javitásán dolgozók is.

420 — Butorkészitők Ipari Szervezete.

Ide tartoznak mindazon munkások, akik a fafeldolgozó telepeken, továbbá butorgyárakban dolgoznak, beleértve a zongora és egyéb fahangszerek és a sport készülékek gyártóit is.

430 — Vegyi Munkások Ipari Szervezete.

a) Orvosságok, vegyiszerek és parfümök készitői és szétosztói.

b) Ugy a természetes mint a mügumin dolgozó összes munkások és azok, akik az ily áruk szétosztásával dolgoznak.

c) Robbanó anyagok és ipari célra használt vegyi anyagokon dolgozó munkások, stb.

440 — Fém és Gépipari Munkáso Ipari Szervezete.

a) Acélgyárak, kohók, drótgyárak, lemezkészitő gyárak stb. összes munkásai.

b) Mindazon munkások, akik gépek készitésével foglalkoznak, beleértve a villany felszerelést is, továbbá a motórok, vasuti mozdonyok, automobilok, repülőgépek, házfelszerelési készülékek, stb. készitői is.

c) A vason kivül más fémek és ötvények készitői, ily fémek feldolgozói tartoznak ebbe a csoportba.

d) Házi eszközök, mint edények, órák, zeneszerek és egyéb, tudományos eszközök készitőinek csoportja.

450 — Nyomdai Munkások Ipari Szervezete.

a) Ujságok és folyóiratok készitésénél és szétosztásánál alkalmazott összes munkások, akár mechanikai munkát végeznek, avagy szerkesztési, müvészeti, vagy üzleti stb. munkakörük van.

b) Mindenféle más nyomdákban és nyomdákat anyagokkal ellátó iparágakban dolgozó munkások csoportja.

460 — Élelmiszer Munkások Ipari Szervezete.

Idetartoznak az alábbi munkakört betöltő munkások:

a) Hus és halpácolás

b) Gyümölcs kannázás

c) Cukor finomitás

d) Sajtkészités, tej konzerválás, stb.

e) Liszt és cereal készités

f) Pékek és cukrászok

g) Sörfőzés, borkészités, szeszfőzés, stb.

h) Dohánygyártás

i) Tea, kávé és egyéb füszerek elkészitése és szétosztása.

470 — Bőráru késziték Ipari Szervezete.

Ide tartoznak mindazon munkások, akik az alábbi munkáknál dolgoznak.

a) Timárság, bőr kikészités

b) Cipők, csizma és lószerszám készités

c) Szijak, táskák és egyéb bőráruk készitése.

480 — Üveg és Cserépedény készitők Ipari Szervezete.

Ehez a szervezethez tartoznak azon munkások, akik

a) Az üvegáru készitésénél

b) Cserépedény kszitésénél

c) Cement telepeken, téglagyárakban és a terra-cotta munkáknál dolgoznak.

490 — Papirkészitő Munkások Ipari Szervezete.

Ide tartoznak a papirgyárakban dolgozó összes munkások.

DEPARTMENT No. 500

510 — Tengerhajózási Munkások Ipari Szervezete.

a) Hajók be és kirakásánál dolgozó munkások

b) Tengeri, tavi vagy folyami hajókon alkalmazott összes munkások.

c) Kikötőben, rakpartokon alkalmazott összes munkások.

520 — Vasuti Munkások Ipari Szervezete.

A vasutasok szolgálatában álló összes munkások ide tartoznak, tekintet nélkül arra, hogy vajjon a vonatok üzemben tartásánál, avagy a reperálásnál, tisztogatásnál, uttest javitásnál, stb. végzik a munkájukat.

530 — Motor Szállitó Munkások Ipari Szervezete.

Trukszállitásnál, autobus vonalaknál és azokkal kapcsolatos raktároknál és garázsoknál alkalmazott munkások szervezete. (Azonban valamely gyár által alkalmazott trukhajtó azon ipari szervezethez tartozik, amelynek körébe esik maga a gyár, amelynek alkalmazottja)

540 — Közuti Alkalmazottak Ipari Szervezete.

Ide tartoznak mindazon munkások, akik községi villamosvonalak, bus vonalak szolgálatában állnak, továbbá a bérkocsisok, akik nem tartoznak más iparokhoz.

550 — Légszállitó Munkások Ipari Szervezete.

Ide tartoznak a repülés és a repülőtelepek szolgálatában álló összes munkások, akár a repülőgépek direkt operációjában, akár az irodákban, a fentartásban, javitásban, stb. nyernek is alkalmazást.

560 — Közlekedési Munkások Ipari Szervezete.

Ezen szervezethez tartoznak mindazon munkások, akik a posta, táviró, telefón, rádió, televisió, stb. szolgálatában állnak, azon közlekedési eszközök részére bármilyen munkát is végeznek.

DEPARTMENT No. 600
Közszolgálat.

610 — Egészségügyi alkalmazottak Ipari Szervezete.

a) Kórházak, szanatóriumok, stb. összes alkalmazottai, beleértve az orvosokat, ápolókat, irodai munkásokat, házmestereket, stb.

b) Fürdők, masszirozó intézetek munkásai, borbélyok, fodrászok, stb.

c) Uccatisztogatók és általában a köztisztaság fentartásánál alkalmazott munkások.

620 — Nevelésügyi alkalmazottak Ipari Szervezete.

Ide tartoznak az iskolák, könyvtárak, muzeumok és hasonló intézetek alkalmazottai.

630 — Szórakoztató Munkások Ipari Szervezete.

a) Szinházak és mozgókép vállalatok összes alkalmazottai, ugy a szinészek, mint a zenészek és szinpadi munkások, stb.

b) Bérért dolgozó zenészek, akik nem tartoznak semmi üzemhez.

c) Parkok, cirkuszok és egyéb szórakozási helyek alkalmazottai.

640 — Szállodai és Vendéglői Alkalmazottak Ipari Szervezete.

a) Szállodák, vendéglők, kafeteriák, stb. összes alkalmazottai.

b) Házi alkalmazottak

c) Apartment épületek, irodaépületek alkalmazottai, tisztántartói stb.

650 — Park és Utmunkások Ipari Szervezete.

Ide tartoznak mindazon munkások ,akik a parkok, az utak, temetők, állat és növénykertek, golf pályák, stb. alkalmazottai.

660 — Általános Elosztással foglalkozó Munkások Ipari Szervezete.

Ide tartoznak:

a) Üzletek, raktárok, nagykereskedők munkásai.

b) Bankok és biztositó társulatok alkalmazottai.

c) A hirdető ipar munkásai.

d) Ócska holmi összeszedésével foglalkozók.

670 — Közszolgálati Munkások Ipari Szervezete.

Viz és gázmüvek munkásai, továbbá központi fütést nyujtó és hasonló intézmények alkalmazottai tartoznak ebbe a csoportba.

Mindenki, aki valamely hasznos munkát végez, megtalálhatja a helyét az itt felsorolt ipari szervezetek valamelyikében. Megtalálhatja helyét és egyben olyan viszonyba juthat munkástársaival, hogy ugy a saját, mint az összesség érdekeit a leghathatósabban tudja szolgálni.

A felületes szemlélőnek ugy tetszik, hogy egyes ipari szervezetek igen széles kört ölelnek fel, például az, ahol együtt találjuk a rézöntőde és az óragyár munkásait. Azonban ujból megjegyezzük, hogy ez a szervezeti forma további alsóbb osztályozódást enged ott, ahol arra szükség van. Ez a tagozódás lemegy egészen a mühelyszervezetig. Minden mühely megalkotja a saját mühelyszervezetét, ahol azon mühelynek az ügyeit intézik. Amint a szervezet növekedése szükségessé teszi, a jelenlegi igen széles kört átfogó ipari szervezetek ujabb alosztályokra osztódnak, de mindig megtartják **ipari jellegüket.** Igy például a kórházban az orvosokon és ápolókon kivül dolgoznak mosónők, kertészek, asztalosok, festők, stb. azonban mindannyian ogyanazon unionhoz tartóznak.

De tegyük fel, hogy a kórházakban dolgozó laundry munkások tárgyalni akarnak a többi laundry munkásokkal a mosoda iparra vonatkozólag, hogy például valamilyen átlagos béreket és munkaviszonyokat érjenek el. Az I.W.W. keretében ezt is megtehetik, mert választhatnak bármilyen bizottságot, amelyek az ily munkát végzik.

Az I.W.W. One Big Unionjában a legfontosabb szabály az, hogy mindig a tagság akarata érvényesüljön.

Gyakorlati előnyök.

Az Industrial Workers of the World megalakitói nagy sulyt helyeztek arra, hogy olyan szervezetet alakitsanak, amely a mindennapi megélhetésért folyó harcok alatt a leghathatósabban szolgálja a munkások érdekeit. Tekintettel voltak tehát nemcsak arra, hogy mely munkásokat csoportositják az ipari szervezetekben, hanem feleletet igyekeztek adni az ilyen kérdésekre: Mely munkások kerülnek együvé kollektiv egyezkedésnél? a sztrájkoknál? stb. Például az erdőirtó munkások részére főző szakács ugyanazt a munkát végzi, mint a városi vendéglőben dolgozó szakács, azonban a munkabérekre és munkaviszonyokra vonatkozó követeléseinek csak ugy szerezhet érvényt, ha azt együtt harcolja ki azon erdei munkásokkal, akik számára főz, valahol az erdőirtó telepen. Nyilvánvaló, hogy ily esetben a szakmák szerinti szervezkedésnek semmi értelme sem volna.

A szétosztást szolgáló különböző iparokban a józan ész megmutatja a helyes szervezkedést. Nézzük például a gazolin állomások munkásainak a szervezését. Az olyan állomások munkásai, akik csupán egy társaság gazolinjának a szétosztásával foglalkoznak, természetesen helyesen teszik, ha az ipari szervezeten belül külön csoportot is alkotnak, mert egy-egy állomás munkásainak bérköveteléseit támogathatják azon cég összes munkásai. Azonban az olajat szállitó hajókon dolgozó munkásokat, noha szintén az olaj szétosztásában nyernek alkalmazást, helyesebb a többi hajós munkásokkal beszervezni, igy sztrájk esetén egyetlen hajós sem érinti a "forró olajat."

Azonban az olyan ipartelepeken, mühelyekben vagy kereskedelmi házakban, ahol a reláció nem olyan közeli, legalkalmasabb a munkásokat egy ipari szervezetbe szervezni, akár áruházakban, gyógyszertárakban, ruhaüzletekben, grocery üzletekben, stb. dolgoznak is. A fő az, hogy mindezen munkásokat együvé hozza és akcióban egyesiti az EGY NAGY SZERVEZET.

De a ONE BI GUNION összetartja nemcsak a rokon szakmákban vagy iparokban dolgozókat, hanem az összes munkásokat, akik a szervezethez csatlakoztak. Ilyen összekötő kapocs hiánya sok zavart okoz más szervezetekben.

Az I.W.W. erősen kihangsulyozza, hogy az ipari szervezetekben való megosztás nem állit falat a munkások közé. Az I.W.W.-hoz tartozó ipari szervezetek minden egyes tagja egyben tagja magának az anyaszervezetnek is, amelynek ügyeibe nemcsak beleszólása de szavazati joga is van. Az I.W.W.-ban a tagok direkt választják tisztviselőiket. Munkakör változtatás esetén az ipari szervezet ingyenesen átutalja az ily tagjait a megfelelő másik ipari szervezethez. Az I.W.W. tagjának felszólalási joga van minden I.W.W. gyülésen, szavazati joggal azonban csak a saját ipari szervezetében és az egyetemes szervezet ügyeiben élhet. Ugyanez áll a mühely szervezetekre vonatkozólag is. A mühely szervezetek gyülésein is csak az abban a mühelyben dolgozó munkásoknak van szavazati joguk.

Az Industrial Workers of the World szervezeténél a legfőbb irányadó elv az, hogy a tagság akarata érvényesüljön. Azért ugy a mühely szervezetek, mint az ipari szervezetek megalkotják a saját szabályaikat, amelyek természetesen nem állhatnak ellentétben az egyetemes szervezet szabályaival.

Az I.W.W. nem egyszerü federációja a különböző ipari szervezeteknek. Modern ipari életünkben az összes munkák annyira egymásra utaltak, hogy azt magában a munkások szervezkedési módjában is követni kell. Ennek megfelelőleg az I.W.W. ipari szervezetei integrális részét képezik magának az egyetemes szervezetnek. Ez kizárja azt, hogy a szervezetek között felmerüljenek az ugynevezett "zsuriszdikcionális" harcok a munkaalkalmakért.

Ipari Department

Az I.W.W. a rokon iparokat Ipari Departmentekben foglalja össze. Ennek előnyös volta könnyen észlelhető különösen az olyan iparokban, mint például a szállitási ipar. A szállitás eszközei ma a vasut, autobuszok, trukkok, repülőgépek, stb. Ha ezen iparok munkásai az ipari szervezeten kivül még egy közös ipari departmenet is alkotnak, akkor bérharcok esetén elejét vehetik annak, hogy egyik csoporttal végeztetik el azt a munkát, amelyen a másik csoport sztrájkba ment. Mondjuk, hogy a vasutasok sztrájkolnak, mire a személy és teher szállitást átutalják az autobuszokra és a truckkokra. Ezt megtehetik a munkáltatók akkor, ha a vasutasok és az autobusz és truck hajtók között semmi szervezeti kapocs sincs. Az ipari departmenten keresztül azonban nagyon hatásosan visszaverhetik az ilyen támadást.

A szállitó munkások kezében olyan nagy hatalom van, hogy mondhatjuk, kezükben tartják az emberiség sorsát. Gondoljuk csak meg, hogy mekkora szenvedéstől menthették volna meg az emberiséget, ha helyesen szervezkedtek volna és megtagadták volna a fasizta államok részére való szállitást, vagy mindazon államok részére, amelyek szállitó munkásai hasonló módon nem cselekedtek volna? Kitünő befektetés lett volna a munkásság részéről megfizetni azon szállitó munkások elvesztett béreit, akik az ily elvi álláspont következtében munkanélkül maradtak volna, igy az emberiségre nagyon jó dolgot lehetett volna elérni anélkül, hogy az egyesek nagyon megsinylették volna.

Avagy gondoljuk meg, hogy a munkáltatók mennyire elvesztenék kedvüket a sztrájktörők felfogadásától, ha a sztrájktörők által készitett árukat a szállitó munkások nem szállitanák. Ime ez a gyakorlati példája annak, hogy ha a munkások összetartanak, akkor legyőzhetlenek.

És valóban, az I.W.W. alapeszméjét ez a gondolat adja vissza legjobban: oly módon való egyesitése a munkásságnak, hogy legyőzhetlenek legyenek. Másszóval kifejezve, az Industrial Workers of the World **a munkásszolidaritás kifejezője.**

A munkások között nagyon gyakran halljuk ezt a kifejezést, — különösen ha szervezkedésre szóllitjuk fel őket: " Az union elég jó dolog, csak az a baj, hogy a munkások nem tartanak össze!" Ugy tartjuk, hogy ennek az állitásnak semmi alapja sincs. Nagyon sok esetben láttuk, hogy a munkásokban meg volt az akarat az összetartásra, de képtelenek voltak arra a hibás szervezkedési mód miatt. Láttuk már sokszor, hogy a szakszervezetek miként **tiltották** el tagjaikat attól, hogy összetartsanak.

Az anyagoknál is sokszor a formától függ, hogy milyen célra használhatók. Az irógép meg a varrógép egyformán acél vagy más fémdarabokból készül, azonban a forma az, amely megadja ezen fémdaraboknak, hogy speciális célt szolgáljanak. Ugyanazon munkások a laza szövetséget alkotó munkásszervezetben nem tudnak elérni olyan eredményeket, mint az egységes One Big Unionban. És amig a laza szövetségekben talán nem tartanak össze, addig összetartanak abban az Egy Nagy Szervezetben, amelyet éppen ezen összetartásra alakitottak.

A mai modern iparok hozták létre az I.W.W.-t, amelynek szerkezeti formáját az alábbi alapvető tények szabták meg:

1) A műhely, vagy "job" szervezetbe tartoznak az ugyanazon munkán dolgozó összes munkások szakmájukra való tekintet nélkül.

2) Ugyanazon ipar összes munkásai betartoznak az ipari szervezetekbe.

3) Az ipari szervezetek összes tagjai betartoznak az egész munkásosztályra kiterjedő Egy Nagy Szervezetbe.

4) Munkacserélés esetén minden tag jogosult az ingyenes áthelyezésre azon ipari szervezethez, amelynek iparában munkát nyert. Aki tehát egyszer belép az Egy Nagy Szervezetbe, mindig tagja marad, bármilyen iparban nyer is alkalmazást.

5) A munkásmozgalom egyik része se végezzen munkát a sztrájktörők által készitett árucikkeken, avagy szolgáltasson anyagot vagy munkát sztrájkok esetén, ne lépjen át sztrájk örvonalat és általában még közvetve se segitsen más munkáscsoportok küzdelmének letörésén.

Ily szerkezeti forma teszi a munkásosztályt legyőzhetetlenné.

Demokrácia az I.W.W.-ban.

Az I.W.W. végcélja az IPARI DEMOKRÁCIA megalkotása. Ezt a célt szolgáló gyakorlati ténykedésnél két irányelvet követ, ezek: SZOLIDARITÁS és DEMOKRÁCIA MAGÁBAN A SZERVEZETBEN.

Szükséges kerülni minden olyasmit ,ami a munkásosztálynak, mint **osztálynak** az egységét sérti. De éppen olyan fontosnak tartjuk, hogy ne az union intézkedjen a tagsággal, hanem forditva, a tagság az unionnal. Ha egy ilyen szervezetből, mint az I.W.W. kihagynánk a demokráciát, akkor könnyen a fasizmus eszközévé válhatna. Hitler és Mussolini is szükségesnek tartották a munkásság szoros egyesitését, de nem demokratikus, hanem éppen ellenkezőleg, autokratikus alapon. Ezért aztán az olyan munkásszervezet csak a parancsolók érdekeit szolgálja. A demokrácián alapuló One Big Union azonban, amellyel a tagság rendelkezik, csak a munkásosztály érdekeit szolgálhatja.

Az I.W.W. minden lehetőt megtett arra, hogy ez a szervezet megmaradjon demokratikusnak és ne kerüljön demagógok vagy autokraták hatalmába. Ilyirányu intézkedések a következők:

1. Egyetlen tisztviselő sem választható egy évnél hosszabb időtartamra.

2. Egyetlen tisztviselő sem vá-

lasztható egyhuzamban két terminusnál több időre.

3. Minden tisztviselőt referendum utján választanak. Ily választásoknál minden jótálló tag szavazatra jogosult. Minden tag választó a mühely szervezetben, ahol dolgozik; az ipari szervezetében és végre az egyetemes tisztviselők megválasztásánál.

4. Minden tisztviselő szavazati többség utján állásából elmozditható.

5. Az egész vonalon mindig a **választás** és **nem** kinevezés az irányadó.

Nem kell a "check-off" rendszer.

Az I.W.W.-nál az üzleti ügyek intézésénél is a demokrácia az irányitó. A pénztár felettr rendelkezés mindig a tagság kezében van. Ezért nem kell az I.W.W.-nak a "check-off" rendszer, amelynél a munkáltató levonja az union tagsági dijakat a munkások béreiből és átadja az union tisztviselőknek. Ily esetben a tisztviselőknek sok alkalmuk nyilik arra, hogy a tagsággal ne tudassák a valódi pénztári forgalmat. Az I.W.W.-nál ugy a felvételi, mint a havidijakat a delegátusok szedik be, akik együtt dolgoznak a munkán a többi tagokkal. Igy egyben ellenőrzik a tagokat, hogy jótállók-e? De ugyanakkor ellenőrzik az union pénztárnokát is, ugy a bevételnél, mint a kiadásoknál, — szóval a pénztár teljesen a tagság ellenőrzése alatt áll.

Egy másik előnye a tagsági dij ily szedésének a "check-off" rendszerrel szemben, hogy az ily rendszernél a tisztviselők, delegátusok állandóan érintkeznek a tagsággal. A "check off" rendszernél a legtöbb tag csak abból tudja, hogy unionhoz tartozik, hogy havonként lefogják a tagsági dijat a fizetéséből és azt a fizetési boritékon látja. A tagdijat fizető munkásnak alkalma van a tisztviselőknek felemliteni a panaszát, ha annak szükségét látja.

Az I.W.W.-ban semmiféle assessmentet (kivetést) nem lehet eszközölni referendum jóváhagyás nélkül. A tartalék pénzállományt decentralizálva tartják, részben az osztályoknál, részben az ipari szervezetek és részben az Egyetemes Szervezet pénztárában.

A One Big Union keretén belüli demokrácia további megerősitését célozzák az alábbi irányelvek is:

1. A tisztviselők fizetése ne legyen nagyobb, mint amennyit átlagosan keresnek azon munkások, akiket képviselnek. Pénzügyi müveletekről hivatalos könyvet kell vezetni, amelyet az ellenőrző bizottság havonként átvizsgál. A kiadásokat pontosan meg kell nevezni és nem lehet "általános kiadások" neve alatt elkönyvelni. Ezen intézkedések távoltartják a szervezettől azokat akik a pénzszerzés céljából csatlakoznak a munkás szervezetekhez.

2. A tisztviselők csak a tagság akaratának a végrehajtói. Sztrájkot nem rendelhetnek el, vagy nem szüntethetnek be az érdekelt munkások többségi szavazata nélkül. Munkáltatóval csak a mühelybizottságok jelenlétében tárgyalhatnak. Ez az elv kiküszöböli a munkásokkal kereskedni akaró, ugynevezett graftereket.

3. Az I.W.W. egyetlen politikai párt akcióját sem támogatja. Ezzel elejét veszi annak, hogy a politikai pártok civakodó területévé váljék.

Vallás és politika.

Az union a munkások gazdasági szervezete, gazdasági érdekeik védelmére és előbbvitelére. Azért az ily szervezetek helyes elvi iránya az, hogy nem indorszálnak sem vallást, sem politikai pártot vagy azok jelöltjeit. A vallás vagy a politikai nézetek nem union ügyek, azokat intézze el minden tag a saját belátá-

sa szerint. A gazdasági szervezet ipari kérdésekre vonatkozó határozatokat hoz, azoknak végrehajtására törekszik. Azonban ha a tagok egymással veszekszenek a politikai vagy vallási kérdések fölött ,akkor tönkreteszik erejüket, amellyel a gazdasági határozataiknak érvényt tudnának szerezni.

Ennek megfelelőleg az I.W.W. nem vallásos és nem politikai szervezet, de egyben nem is törődik azzal, hogy tagjai milyen valláshoz vagy politikai párthoz tartoznak, hanem egyesiti mindannyiukat a közös célra, munkás érdekeik megvédésére.

Ez természetesen nem jelenti azt, hogy az I.W.W. közömbösen viselkedik napjaink nagy eseményeivel szemben. Éppen ellenkezőleg! Sőt éppen azt tartjuk, hogy mi praktikus megoldást ajánlunk azon problémákra. Igy például, amikor az iparokat a munkások fogják irányitani, nem lesz többé munkanélküliség, nem lesz alkalom a háborukra, a nagymérvü bünözésre, stb. Az I.W.W. által épitett szervezet segélyével a munkások képesek lesznek eliminálni a politikusok ármánykodásait, igy elérik azt, amit a politikai kijárások révén meg sem közelitettek.

Manapság a törvényhozó testületek a törvények készitésénél mindig a hatalmasok felé néznek. A hatalmasok érdekében hozott törvényeket aztán ráerőszakolják a munkásságra. Nem-e sokkal praktikusabb lenne, ha a munkások maguk hoznák meg azon törvényeket, amelyek szerint élni akarnak? A One Big Union olyan hatalmassá teszi a munkásokat, hogy akkor a törvényeket az ő érdekeikben hozzák.

Olyan szervezet felépitésénél, mint a One Big Union soha sem mondják, hogy már elég tagunk van s egyidőre lezárjuk a könyveinket, — vagyis nem veszünk fel több tagot. A One Big Union ezt munkásosztály ellenes eljárásnak tartja. Ugyancsak ily célból nem törődik azzal, hogy kinek milyen a szine, a nemzetisége, a nyelve, stb. Addig, amig hasznos munkát végeznek, helyük van az Egy Nagy Szervezetben.

A One Big Unionban mindig a többség határozata a döntő, amelynek mindenki engedelmeskedik. Éppen azért csak ipari kérdésekben hoznak határozatokat és nem törődnek a nem gazdasági kérdésekkel, mint például, hogy melyik templomba menjenek azon tagok, akik éppen menni akarnak, avagy kire szavaznak, kivel kössenek barátságot, stb. Az ilyen dolgokról azt tartja az Egy Nagy Szervezet, hogy azok teljesen a tagok magánügyei, amibe a szervezetnek semmi beleszólása sincs.

Hatásos Union

Az Egy Nagy Szervezet a szolidaritás és a demokrácia elvek alapján épült. Ez a két elv azonban egyben nagyon hatásossá teszi a szervezetet. Hatásossá teszi, mert hiszen a tagság összes erejét egyesiti. Mindennek a hatásfokát meg lehet mérni. Az Egy Nagy Szervezet hatásfokát az elért eredmények és az értük fizetett ár összehasonlitása mutatja. Egy legyet nagyon hatásosan agyon lehet ütni a gőzkalapáccsal. Azonban a gőzkalapács mozgásba hozatala olyan költséges, hogy az elért eredmény nem ér annyit. A hatásfok akkor magas, ha a legnagyobb eredményt a legkisebb költséggel tudjuk elérni.

Hogy az I.W.W. valóban ilyen hatásos szervezet, azt mi sem bizonyitja jobban, mint az, hogy dacára kis számu tagságának, a munkáltatók rendkivül támadják, mert félnek tőle. Hatásfokát növeli az, hogy a szervezet irányitása teljesen a tagság kezében van. Vannak, akik azt állitják, hogy a demokrácia a hatásos müködés megölője. Az ipari unionizmus megcáfolja ezt az állitást. Azonban annyi tény, hogy ha valamit el akarunk érni, akkor azt a valamit célunkul kell kitüzni és aztán nyilegyenesen feléje kell tartanunk. Midőn az union irányitása a tagság kezéből kiesik, egyesek kezébe kerül, akkor azok sok esetben irányt változtatnak s nem csoda, hogy nem érnek közelebb az eredetileg kitüzött célhoz.

De azonkivül minél több tag vesz részt az union ügyeinek irányitásában, annál nagyobb erőt nyer az a szervezet. Munkásharcokat nem lehet megnyerni csupán csak tagdijak fizetésével. A tagdijak szükségesek az union költségeinek a fedezésére, de bérharcokat csak az ily harcokban aktivan résztvevő tagokkal lehet nyerni. De magán a munkán is csak a tagok ébersége óvhatja meg a már kivivott eredményeket és nem a "business agent", vagy valamilyen más, az ipartelepen nem dolgozó union tisztviselő. Azon elv, hogy a munkások maguk, közvetlenül és nem csak mások utján közvetve, vegyenek részt a szervezeti ügyek irányitásában és intézésében, teszi hatásossá az Egy Nagy Szervezetet.

És végre az I.W.W. kebelében müködő egyes osztályoknak vagy csoportoknak az önbizalma, saját erejüknek tudata és igy a tagság müködése teszik az általunk elért eredményeket a legkevésbé költségessé. Elmondhatjuk, hogy az I.W.W. ugy épült, mint az emberi kéz, amelynek minden ujja külön mozgásra és akcióra képes, de pillanat alatt készen áll arra, hogy ökölbe szorulva, az összes részek együttesen éreztessék sulyukat.

Direkt akció.

Az egyes részeknek önálló müködési képessége a gyakorlatban "direkt akció" néven lett ismertté. Midőn évekkel ezelőtt az I.W.W. a nyugati partok erdőirtó munkásait szervezte, a munkások elhatározták, hogy csak napi nyolc órát dolgoznak. Nyolc óra munka letelte után megfujták a gőzsipot és abbahagyták a munkát. Előbb több telepen az összes munkásokat elküldték munkából, azonban az uj munkások, akiket helyükbe vettek, megint csak ugy csináltak. Az eredmény azt lett, hogy mindenütt bevezették a nyolcórás munkanapot, sőt később még törvényt is hoztak rá. Az erdei munkások tehát ezt a törvényt direkt akcióval érték el.

Vannak esetek, midőn hosszu sztrájkok kikerülhetetlenek. Az I.W, W. hacsak lehet, kerüli az ilyen harcokat. A hosszu sztrájkok helyett a többször megismétlődő, rövid ideig tartó sztrájkokat ajánlja, mert igy ugyanazon eredményt, sokkal kevesebb költséggel és erőfeszitéssel lehet elérni. Sok esetben leghelyesebb ha a panaszt maguk a munkások intézik el. Igy például nem érdemes sztrájkba menni egy olyan előmunkás miatt, akit a kompánia nem akar elküldeni, noha a munkások ezt követelik. Nem-e egyszerübb, ha a munkások megválasztják maguk közül előmunkásnak azt ,akit erre alkalmasnak tartanak és aztán csak annak fogadnak szót? Ha ilyen esetekben a munkások összetartanak, nagyon sok panaszt igen kevés költséggel el lehet intézni a direkt akció utján.

Ugyanigy miért kell elhagyni a munkát, ha szervezkedési aktivitásért a munkáltató elküld egy-két munkást? A munkáltató hamarább észhez jön, ha a többi munkások ilyen esetben ugy dolgoznak, amint az ilyen munkáltató megérdemli. A direkt akció titkai nagyon egyszerüek. A lényege abban áll, hogy a munkások nem azt csinálják, amit a munkáltató parancsol nekik, hanem azt, amit együttesen kollektiv módon elhatároztak. Ezen egyszerü dolog nagyon segiti egy jobb világ kiépitését.

Az itt elmondottak röviden vázolják az 1905-ben alakult Industrial Workers of the World szervezetnek elvi irányát, taktikáját és adott esetekben alkalmazott stratégiáját, amelyeket az alakitók, akik az unionizmusban nagy jártassággal birtak, belefoglaltak az Egy Nagy Szervezetbe, hogy egyrészről a leghatásosabb fegyvert adják a munkásoknak a mindennapi előnyökért folyó harcaikhoz, másrészről pedig ezen szervezeten keresztül képesek legyenek felépiteni az uj észszerü s igazságosabb társadalmi rendszert. Az Industrial Workers of the World megalakitói az itt felsorolt elveket és végcélt az alábbi elvinyilatkozatban foglalták össze.

A munkásosztály és a munkáltató osztály között semmi közösség nincsen. Nem lehet béke mindaddig, amig éhség és nélkülözés található a dolgozó emberek milliói között s az élet összes javait ama kevesek birják, akikből a munkáltató osztály áll.

E két osztály között küzdelemnek kell folynia mindaddig, mig a világ munkásai mint osztály szervezkednek, birtokukba veszik a földet, a termelő eszközöket és megszüntetik a bérrendszert.

Ugy találjuk, hogy az iparok igazgatásának mind kevesebb és kevesebb kezekbeni összpontosulása a szakszervezeteket (trade unions) képtelenné teszik arra, hogy a munkáltató osztály egyre növekvő hatalmával felvegyék a küzdelmet. A szakszervezetek olyan állapotot ápolnak, amely lehetővé teszi, hogy a munkások egyik csoportját az ugyanazon iparban dolgozó másik csoport ellen uszitsák és ezáltal elősegitik, hogy bérharc esetén egymást verik le. A szakszervezetek segitenek a munkáltató osztálynak a munkásokba beoltani ama tévhitet, hogy a munkáltatókkal közös érdekeik vannak.

E szomoru állapotokat megváltoztatni és a munkásosztály érdekeit megóvni csakis olykép felépitett szervezettel lehet, melynek minden, az egy iparban — vagy ha kell, valamennyi iparban — dolgozó tagjai beszüntessék a munkát bármikor, ha sztrájk vagy kizárás van annak valamelyik osztályában, igy az egyen esett sérelmet az összesség sérelmének tekinti.

E maradi jelszó helyett: "Tisztességes napibért tisztességes napi munkáért," ezt a forradalmi jelszót irjuk a zászlónkra: "LE A BÉRRENDSZERREL!"

A munkásosztály történelmi hivatása, hogy megszüntesse a bérrendszert. A termelő hadsereget nemcsak a tőkésekkel való mindennapi harcra kell szervezni, hanem arra is, hogy folytassa a termelést akkor, amikor a bérrendszer már elpusztult. Az ipari szervezkedéssel az uj társadalom szerkezetét épitjük, a régi társadalom keretein belül.

Elismerjük, hogy felépiteni egy uj társadalmat a régi társadalom keretein belül valóban nagy munka. De azt is tudjuk, hogy olyan munka, amelyből ki akarja venni a részét minden olyan munkásember, aki rájött, hogy saját helyzetén csak osztályával együttesen, szervezetten tud segiteni. A felvilágosult, az öntudatos munkás jól tudja, hogy az ilyen munka tartalmat ád életének, jövőt magának és utódainak.

Aki tehát ebben a munkában a legpraktikusabb szervezet keretén belül ki akarja venni a részét, csatlakozik az Egy Nagy Szervezethez még akkor is, ha munkája következtében esetleg más unionnak a tagja is, ahol azonban az általunk hirdetett végcélt nem szolgálhatja. Az ilyen munkás érintkezést keres az Egy Nagy Szervezet központi irodájával melynek cime:

Industrial Workers of the World
2422 North Halsted Street . . .
Chicago 14, Ill.

* * *

ADAMS Maude (1872). Amerikai drámai szinésznő. A mult század utolsó éveinek és az első világháborut megelőző idők legnagyobb tragikai hősnője. 1918-ban visszavonult a szinpadról és a Stephen College drámai osztályának a tanárnője lett. Miss Adams a General Electric kompániával együttesen tökéletesitették a mai modern szipadok megvilágitását.

MAGYAR FÜGGELÉK AZ IWW ALAPSZABÁLYHOZ

AZ INDUSTRIAL Workers of the World az ipari unionizmust képviselő s tanitó munkásszervezet, amely a munkásokat ipari foglalkozásuk szerint szervezi abból a célból, hogy a termelési eszközöket kisajátitsa, a bérrendszert megszüntesse, miáltal egyenlő jogokat teremt a társadalom minden egyes tagja részére.

Ezt a célt csak ugy érheti el a munkásosztály, ha EGY szervezetben tömörül. Az IWW minden nyelvü és minden szinü bérmunkást az Egy Nagy Szereveztbe tömöriti. Ezért szükségtelennek tartja a külön nyelvi vagy faji csoportokat, mert ahogy az iparban együtt dolgozik minden nemzetiségü, vagy szinü munkás, ugy a munkán történő kizsákmányolás ellen is együtt kell a harcot fölvenni és megküzdeni.

Ehhez a tanitáshoz egyik legalkalmasabb eszköz a sajtó. És mivel minden bérmunkás az anyanyelvén jobban megérti az IWW tanitását, az IWW különböző nyelvü lapjaiban hirdeti az Egy Nagy Szervezet szükségességét.

Az IWW magyar sajtója a BÉRMUNKÁS, melynek fentartása és terjesztése a magyarajku bérmunkások kötelessége. Ezen célból a lap fentartói agitációs bizottságokat létesitenek, amelyek megbeszélik a lap támogatására és fejlesztésére vonatkozó ügyeket; lehetőleg egyszer évenként kerületi értekezleteket és egy országos konvenciót tartanak.

A magyar lap ügyeinek intézésére a fentartói, akik egyben az Industrial Workers of the World szervezet tagjai, titkár, szerkesztőt és lapbizottságot választanak egyévi időtartamra. A lapbizottság feladata a lap kiadása és pontos megjelentetése ,valamint a lap szellemi iránya fölött való őrködés is.

A lapbizottság lapkezelőket, lapmegbizottakat és szükség esetén szervezőket nevez ki a forradalmi ipari unionizmus eszméjének még hatásosabb és szélesebb körü terjesztésére. A magyar lap bavételeiről és kiadásairól, valamint a nevelést és az agitációt szolgáló munkájáról havi jelentést küld az agitációs bizottságoknak, delegátusoknak és lapkezelőknek.

ABELARD, Peter, (1079-1142). A középkor első ismertebb filozófusa. Franciaországban, a Nantes melletti Pallet városkában született, gondos nevelésben részesült és korának megfelelőleg leginkább csak a theológiai tanulmányokkal foglalkozott. Mint tanitó nagyon kedvelt előadó volt és előadásaival megvetette alapját a később hiressé vált Párisi egyetemnek. Abelard azzal tette magát nevessé, hogy abban a korban el merte itélni a dogmákban való vakhitet. Azt hirdette, hogy a hitet az értelemnek kell megelőzni.

METAL AND MACHINERY WORKERS INDUSTRIAL UNION
NO. 440

INDUSTRIAL WORKERS of the WORLD

BÉRMUNKÁS

HUNGARIAN OFFICIAL ORGAN OF THE INDUSTRIAL WORKERS OF THE WORLD

Entered as second-class matter at the Post Office, at Cleveland, Ohio under the Act of March 3, 1879

VOL. XXX. ÉVFOLYAM — CLEVELAND, 1942 SZEPT. 12 — NUMBER 1232 SZÁM

INFLÁCIÓ ÉS A MUNKABÉREK

(gb.) A háborus profitra éhes amerikai tőkések a sajtó meg a rádió propaganda utján azt akarják elhitetni a nagyközönséggel, hogy ha a kormány nem fogja "befagyasztani" a munkabéreket, akkor infláció áll be, vagyis a pénz elértéktelenedik. Az infláció elkerülhetetlenségét azzal magyarázzák, hogy a szerintük tul sokat kereső munkások mindenfélét vásárolni akarnak, holott most a nem hadi célokat szolgáló árukból ugyis hiány van, igy a nagy kereslet következtében mindennek fel fog szökni az ára, vagyis a pénz elértéktelenedik.

Hónapok óta állhatatosan folyik ez a propaganda s szinte erőszakosan követelik a kormánytól a munkabérek korlátozását. Az okoskodásuk olyan logikusnak mutatkozik, hogy azt hitték, ezzel ki tudják erőszakolni a munkabérek befagyasztását, amely ha az inflációt nem is akadályozná meg, de mindenesetre NÖVELNÉ A MUNKÁLTATÓK PROFITJÁT.

Az okoskodás logikus, de az alaptétele hazugság, enélfogva hazugságra épült az egész propaganda. Ezt a hazuságot szögelte le most a Department of Labor egy nyilatkozata, amelyet maga Miss Perkins, munkaügyi miniszter adott ki. Miss Perkins a nyilatkozatban foglalt tényeket a munkaügyi miniszterium statisztikai osztályának adataira alapitotta. Ezen adatok azt mutatják, HOGY A MUNKÁSOSZTÁLY MA KEVESEBBET VÁSÁROL, MINT EGY ÉVVEL EZELŐTT, igy tehát erről az oldalról nem fenyeget az infláció.

A Bureau of Labor Statistics hivatal több ezer munkáscsalád bevételeit és kiadásait tartja számon és azok átvizsgálása után mond következtetést. Ezen ugynevezett "sample" családok közé mindenféle keresetü munkásokat felvettek, hogy amennyire csak lehet valóban hü feletetet kapjanak, bármilyen kérdésre is keresik a választ.

A statisztikai hivatal igy nyert adatai szerint a munkásság bevétele az elmult 5 negyed év alatt 7 százalékkal emelkedett, az általuk elfogyasztott áruk csak 2 százalékos emelkedést mutatnak. Azonban amig a jövedelem csak 7 százalékkal emelkedett, a megélhetés ára 15 százalékkal ment fel ezen idő alatt. Az élelmiszerek árai is 11 százalékos emelkedést mutatnak. Ebből az következik, hogy ha egy család ma 15 százalékkal többet költ megélhetésre, mint másfél évvel ezelőtt, azért ugyanazt az árumennyiséget használják fel mint előbb, csak többet fizetnek érte.

A statisztikai iroda adatai szerint a munkások nagy adósságokat fizetnek ki és azok, akiknek nem volt adósságuk, megtakaritják keresetük jó részét. Ily megtakaritásnak számitanak a hadi kötvényekbe fektetett összegek is.

A "sample" családok budzset könyveit átnézve azt látták, hogy csak azon családok költenek ma többet élelemre és más tárgyakra, amelyeknek jövedelme mostanáig nagyon alacsony volt, tehát "sub-standard" (standardon aluli) életet éltek és nem volt alkalmuk számos olyan kényelmi eszközt vásárolni, amelyeket ma minden átlagos házban megtalálunk. Ugyancsak emelkedett a családok kiadása orvosokra és orvosságokra, ami azt mutatja, hogy a magasabb jövedelem emelte a közegészségügyi állapotokat.

A munkaügyi miniszterium ezen adatai rányomják a sajtó és a rádió kommentátorokra a hazugság bélyegét. De egyben kimutatják azt is, hogy a képviselők jó része milyen készséggel engedelmeskedik a kapzsi tőkéseknek, akik az infláció mumussal akarják a munkabéreket befagyasztani, de a saját, korlátlan nagyságu profitjuktól nem féltik a pénz értékét.

AZ ANGOL REPÜLŐTÁMADÁSOK HATÁSA A FRANCIA PARTOKON

London, aug. (ONA) A francia Vichy rádió akaratlanul tanuként jelentkezik az angol repülőtámadások hatásos volta mellett a francia parti városokra.

Vichy hivatalos rádió-bemondója felszólitotta ugyanis a francia lakósságot, támogassa a kormányt a bombázott lakosság ellátásának "nehéz feladatában". Dunquerqeban például csak hét lakható ház maradt meg egy városban, melynek 3500 lakóháza volt. Le Havrenak, e valaha virágzó kikötővárosnak lakóssága 200.000-ről 135.000-re csökkent. Mindössze 8.000 gyermek lakik a városban. Éjszakánként vagy 15.000 ember vándorol ki a városból a környékre, mert ott bátorságosabb az éjszakázás. 3.000 ember közkonyhán kénytelen élni, mert a repülőbombázás elpusztitotta gáz- és villany ellátásukat és házaikban nem lehet főzni. Egyéb városok az Angliával szemben lévő partokon szintén szenvedtek.

JEGYZŐKÖNYV

Felvéve a magyar nyelvü ipari unionisták és Bérmunkás olvasók Országos Értekezletén, Cleveland, Ohioban, 1942 szeptember 6-án.

L. Lefkovits, központi titkár üdvözli a megjelenteket és ajánlatára korelnöknek A. Kucher mtársat választották meg, korjegyzönek pedig J. Kollár mtársat.

Korelnök egy két tagu bizottságot nevez ki Molnár, Székely mtársak személyében akik felülvizsgálják a megjelentek megbizatásait. A bizottság jelenti, hogy eddig jelen van 16 delegátus. Névszerint:

Akron, O.: J. Vizi.

Buffalo, N. Y.: Hering Pál, Hering Pálné.

Cleveland, O. west side: Kovács Ernö, John Szilágyi, Jos. Kollár, Anton Molnár.

Cleveland, O. east side: Danka Mihály, Geréb József, Székely Sándor.

Chicago, Ill.: H. Varju, Zára János, Wagner József, Pika Pál.

McKees Rocks, Pa.: Steve Buza.

Pittsburgh, Pa.: Kucher András, Lelkó András és Pika József.

New York, N. Y.: Fishbein László, Engli Gyula.

A lapbizottság képviseletében Lefkovits Lajos központi titkár.

A bizottság jelentését az értekezlet tudomásul veszi.

Korelnök az értekezlet folyamára elnök és jegyző választását kéri. Elnöknek megválasztva: Zára János munkástárs, mig jegyzök lettek: Kollár József és Székely Sándor.

Zára munkástárs köszöni a bizalmat és üdvözli az értekezletet. Megállapitva a következö napirend:

JELENTÉSEK: Lapbizottság jelentése, delegátusok jelentése.

A BÉRMUNKÁS SZELLEMI IRÁNYA, a Bérmunkás anyagi helyzete és fentartásának az ügye.

INDITVÁNYOK.

INTERPELLÁCIÓK.

A LAPBIZOTTSÁG FELMENTÉSE.

A LAPBIZOTTSÁG MEGVÁLASZTÁSA.

JÓLÉTI ÜGYEK.

A lapbizottság jelentését Lefkovits munkástárs olvassa fel, amely részletesen kitér a lap körül végzett munkákra, ami az elmult év kimeritö munkálkodását adta. A jelentés beszámol az évben lefolytatott akciókról, számbeli kimutatást ad a lap két legfontosabb bevételéről az előfizetések és felülfizetésekről városonként illetve államonként, amely emelkedést mutat mind két tételben az előbbi évekhez. A jelentés tudomásul vétetett és a további tárgyaláshoz lett utalva.

Delegátusok jelentése: Akron: Vizi mtárs jelenti, hogy Akronból csak ő van jelen, mert a munkástársak nagyobb része vasárnap is dolgozik, de a délután folyamán mások is eljönnek. Jelenti, hogy a mult értekezletnek tett igéretüket, hogy tehetségükhöz képes fognak munkálkodni igyekeztek beváltani. Rendes csoport müködést végeznek. Megalakult egy Nöi Gárda a lap rendszeres támogatására, de amely más mozgalmi munkákból is igyekszik a részét kivenni. A Női Gárdára serkentőbb lenne, ha hasonló megnyilatkozások történnének más városokban is. Rendeztek több kirándulást, közösen dolgoznak a naptár, a sorsjegyek és egyéb mozgalmi munkáknál.

Buffaloból Hering munkástás jelenti, hogy a lapbizottság kimutatásában szerepelt összeggel tudták csak a Bérmunkást támogatni, ami figyelembe véve a kis számukat kielégitönek kell lenni, bár a magyarság számát tekintve több támogatást kellene kapnia egy munkás lapnak.

Chicagoból: South Sideröl Varju munkástárs tesz jelentést a végzett munkáról, amivel ö maga sincsen megelégedve, de a körülmények többet nem engedtek. Tolmácsolja Szász és Hosszu munkástársak üdvözletét.

Pika munkástárs jelenti, hogy az iparban való nagyobb elfoglaltsága miatt nagyon kevesèt tehetett az elmult esztendöben, de igéri, hogy a következő hónapokban aktivabb lesz.

Wagner munkástárs üdvözli az értekezletet, igérve, hogy több segitséget fog nyujtani, mint tehette az elmult évben. Tolmácsolja Vincze Sándor üdvözletét, aki az utolsó pillanatban elfoglaltsága miatt maradt le, hogy részt vegyen az értekezleten.

Zára munkástárs jelenti, hogy a mai helyzetben a lap részére nagyobb támogatást is lehetne szerezni a lap olvasóitól, ha azokat többen felkeresnék, de neki nincs annyi ideje, másoktól meg kevés segitséget kap erre. A nyár folyamán rendezett ünnepélyek sikeresek voltak. Sulyosnak tartja azt a körülményt, hogy általában a munkásmozgalom érdekében nem vállalnak munkálkodást a munkások, ugy, hogy annak sulya is lenne.

Cleveland, O.: east. Lefkovits munkástárs jelenti, hogy csoport müködés hiányában a munka végzése csak egy pár emberre van utalva, ezek között Bercsa és Danka munkástársnök végeznek szép munkát ugy az előfizetők megkeresésével, mint az ünnepélyek rendezésében. A nyári mulatságok sikerét a rossz időjárás nagyban befolyásolta.

Cleveland, O. west side: Kovách Ernö munkástárs jelenti, hogy ö a gyakorlati agitációban nem vett részt, mert a napi munkája után az irógárdában vállalt kötelezettsége erre nem hagyna idöt. Itt is csoport hiányában néhány ember végzi a munkát.

Molnár és Kollár munkástársak jelentik, hogy rendszeresen keresik fel az olvasókat felváltva Szilágyi munkástársal és a naptár valamint a kis jegyekkel eredményes munkát végeztek. Együtt müködtek az east side-dal a nyári ünnepélyek megrendezésében.

New York, N. Y.: Fishbein munkástárs jelent. Az előbbi években New York minden esetben azzal állhatott az értekezlet elé, hogy a lap és mozgalomhoz szükséges összegekből a nagyobb részt magára vállalhatja és ezt teljesitették is. Ma ezt nem fogja jelenteni, mert a new yorki csoport müködését is sikerült a helyzetet meg nem értöknek és elfogult rosszakaratu munkástársaknak megbénitani. Egyenlöre csak kevesen vannak, akik hüek maradtak a munkásosztály szolidáris célkitüzéseihez. Bár hiszi, hogy a megtévedteknek is világosság fog virradni és vissza kerülnek a munkás posztra. Jelentését irásba foglalta, amelyet lapunk más helyén közlünk.

Engli munkástárs jelenti, hogy ö a városon kivül volt elhelyezkedve, igy az utóbbi években nem vehetett részt a mozgalmi munkákban.

Pittsburgh, Pa.: Kucher munkástárs jelenti, hogy a munka végzésének nagyobb része most is reá hárul. Szorgalmasan látogassa az olvasókat, akiknek a véleményét tolmácsolja, amikor jelenti, hogy sohasem talált nagyobb ragaszkodást a Bérmunkáshoz az olvasók részéről mint most. Szeretik a lapot és szivesen támogatják az előfizetésen kivül is. Itt is az a baj, hogy kevesen vannak, akik felkeresik az olvasókat. A lap és a mozgalomért szivesen végzi a munkát, bár az utóbbi években leromlott anyagi helyzete ebben gátolja, de azért igéri, hogy a jövöben is minden töle telhetöt meg tesz a lapért.

Pika József nem egyezik meg a küldöttek eddigi jelentéseikkel, akik telve vannak panaszszal, mert hiszen azoknak egyedüli oka, hogy nem keresték az olvasókkal és a magyarsággal a személyes kapcsolatokat. Számos, személyes tapasztalatáról tesz emlitést és igéri, hogy azokból igyekezni fog a lap és a mozgalom részére is megvalósitani. Igéri, hogy kifogják épiteni a pittsburgh környéki rendszeres agitációt.

Lelkó munkástárs a további munkálkodását jelenti be az értekezletnek Pittsburgh környékére.

McKeesrocks, Pa.-ból Buza munkástárs jelenti, hogy a nehéz acél ipar városa ma szervezve van bár nem az IWW szervezetében, amely évtizedek előtt már véres küzdelmet folytatott itt a munkások megszervezésére. A lap érdekében megpróbál többet tenni.

A Magyar Munkások Védelmi Bizottsága részéről Geréb József munkástárs az alábbi jelentést teszi meg:

A mult évi konvenció pártolólag tudomásul vette a Magyar Munkások Védelmi Bizottságának ujbóli felelevenitését. Mint akkor bejelentettük, a Védelmi Bizottságnak célja jogi védelmet nyujtani, illetőleg az ily védelmet finanszirozni, adatokat gyüjteni és publicitást adni olyan ügyeknek, amelyeknél valakit azért ér hatósági üldözés, mert a munkásmozgalom valamely ágában tevékenykedett.

Az elmult év alatt a Védelmi Bizottságnak akadt egy ilyen ügye, Kovács munkástárs ügye, akinek bevándorlási törvényesitése elé azért állitottak akadályokat, mert aktiv részt vett a munkásmozgalomban, tehát ez az ügy száz százalékig a Magyar Munkások Védelmi Bizottságának hatáskörébe esik, ennélfogva a védelmet át is vettük.

Nem szükséges az ügy részleteibe mennünk, amennyiben azt a Bérmunkás hasábjain ismertettük. Csupán azt kivánom megjegyezni,hogy a Védelmi Bizottság valóban hatékonyan kezelte és kezeli az ügyet. Ezt természetesen lehetővé tette az ,hogy a munkástársak a felhivásunkra azonnal megadták az ily védelmi munkához szükséges anyagiakat, amivel osztály szolidaritásukról tettek tanuságot. A védelem céljára adott összegeket lapunkban nyugtáztuk, valamint a kiadásokról is nyilt elszámolást adtunk.

A védelmi ügyre vonatkozólag azt jelenthetem, hogy a hatóságok egyenlőre elhalasztották a további eljárást. Mint a lapunkban beszámoltunk, ez ügy sima lefolyását munkásellenes egyének denunciálása akadályozta meg. A jelenlegi elhalsztásnak minden valószinüség szerint az az oka, hogy egy hasonló, de országos méreteket öltött ügynek birói végzését várják. A védelmi bizottság készen áll minden további akcióra és minden jelentős fejleményröl azonnal beszámolunk az érdekelt munkástársaknak.

Az értekezletet a következők üdvözölték levél utján: az Akroni Női Gárda nevében Schwind Gyuláné, Munkácsy, Bethlehem, Policsány, Triadelphia, Schöpf, Camden, Gyurcsek, Thornville, Gancs, Carolina, Mrs. Szilvágyi, Detroit, Bécsiné, Philadelphia, Mácsay, Detroit, Visi, Lincoln Park, Bauer, Newark, Sivák, Maynard, Lachkó család, East Sagatuck, Bukovszky, Berwyn, Szász, Chicago, Takács, Hazelwood, Bukovszky, Cicero, Fekete és M. Mihályi, Coraopolis.

A jelentések tárgyalását az értekezlet összeköti a Bérmunkás irányvonalának a tárgyalásával.

Az értekezlet eme fontos napirendjét Geréb József és Kovács Ernö munkástársak hoszszasabban ismertetik. Mindkét jelentés teljes szövegét lapunk jövöheti számában közöljük.

Gyülésvezető elnök Pikal Pál, Kucher András és Kovách Ernő személyében egy bizottságot nevez ki, akik átnézik a new yorki értekezlet ajánlatára beérkezett véleményt mondó leveleket.

Déli 1:30-kor az értekezlet az ebéd tartamára felfüggeszti tanácskozását.

2:30-kor az értekezlet megválassza Hering munkástársat gyülésvezető elnöknek, aki megköszönve a bizalmat kéri a delegátusokat, hogy a további napirend fontosságához mérten tárgyalják meg azokat.

A kiküldött bizottság nevében Pika munkástárs jelenti, hogy a beérkezett és fölbontatlan leveleket felnyitották és örömmel jelenti, hogy azok kivétel nélkül a lap irányának a megelégedését tükrözik ki. Az értekezlet tudomásul veszi a jelentést.

A napirendhez Zára munkástárs szól, egy clevelandi angol munkástárs megjelent Chicagoban az Egyetemes irodában és vádat emelt a Bérmunkás ellen, hogy az olyan cikkeket hoz, amelyek nem egyeznek meg az IWW tanitásával.

Wagner munkástárs szerint a lapbizottság félre értette az egyetemes központ leveleit, a végrehajtó bizottság tagjai a benyujtott forditások elolvasása után ugy találták, hogy a vádnak nincs semmi alapja.

Fishbein mtárs szerint a Bérmunkás cikkeinek nagyobb részét az irógárda szolgáltatja, akik azokat aláirásukkal látják el. És e szerint elsösorban a saját egyéni véleményüknek adnak bennük kifejezést. Az IWW-t ugy ismeri a munkás társadalom, hogy abban a legszélesebb véleménynyilvánitás van. Ellentétes hát, hogy elzárjuk a Bérmunkás hasábjait azok elöl, akik a mai helyzetben nem százszázalékosságig az IWW szempontjából itélik meg a helyzetet nem beszélve arról, hogy a mozgalom angol lapja minden sorában megtalálja-e az IWW álláspontját.

Pika szerint a Bérmunkás szellemi irányát kintröl egyrészt tudatlanságból, egyrészt rosszakaratból félre magyarázzák. Azoknak, akik magyar szempontokból tesznek kifogásokat, azoknak azt válaszolhatjuk, hogy mi azért vagyunk magyarok, mert magyarul beszélünk, de érdekünk egyenlök a más nyelvü munkásokéval.

Vizi szeretné, ha az irógárda tagjai kevesebbet foglalkoznának az események tárgyalásával, amelyek sok esetben a lap megjelenésekor már más képet mutatnak, ahelyett több ipari unionizmust tanitó elméleti cikket irnának.

Lefkovits néhány kifogásolt közleményt ismertet, majd annak szükségességét, hogy a magyar mozgalmak vezéreivel miért kell most gyakrabban és többet foglalkozni.

Pika József a gyakorlati értékét ismerteti a munkás ujságnak, amelynek barátjává kell tenni az olvasót.

Geréb és Kovách munkástársak összegezik az elhangzottakra a maguk és a lapbizottság nézetét, amely szerint a Bérmunkás a legszorosabban áll az IWW irány vonalán és azon kiván maradni a jövőben is.

Toni Trup angolul értő és csak beszélö munkástárs állitja, hogy öt IWW magyar tagok és nem tagok informálják a Bérmunkás cikkei felöl, azért van ellene panasszal.

Az értekezlet egyhangulag megujitja Geréb munkástárs elöadásában idézett mult évi határozatát irányvonalának követésére és erről átiratban tudatja az Egyetemes Irodát is.

A Bérmunkás előfizetésének árát az értekezlet nem emeli fel. Örömmel állapitja meg, hogy az olvasók nagy része a drágasági pótlékkal pótolja a többlet kiadásokat, amellyel azt is igazolta, hogy a lap irányvonalával megegyezik.

Hosszabb vita indult meg a Bérmunkás terjesztésének módja fölött, amelyben több delegátus vett részt. Megállapodva abban, hogy a kihangsulyozott módszereket a viszonyokhoz arányitva alkalmazni fogjuk.

Az Akroni Nöi Gárda levele nyomán értékes vita folyik a Gárda intézmény fenntartásán. Kimondva, hogy mindkét nembeli gárdát a következő esztendöben igyekszünk legalább 50-50 tagra felemelni. (Egy mindjárt körözött iven 20-an irták alá és fizettek be egy-egy dollárokat az 1942-43-as gárdába, kimondva, hogy konvenciótól konvencióig szól a gárda évi tagság)

Inditványozva és elfogadva, hogy a Bérmunkás Naptár az 1943-ik évre is jelenjen meg.

Inditványozva és elfogadva, hogy az országos sorsolást 1943-ban is ejtsük meg.

A napirend kimeritve, az értekezlet egyhangulag megadja a felmentvényt a lapbizottság részére.

A lapbizottság tagjainak ajánlva lettek: Danka Mihály, Farkas Imre, Geréb József, Vizi József, Kollár József, Székely Sándor, Kovács Ernő, Szilágyi János.

Titkár-szerkesztönek megválasztva Lefkovits Lajos.

A délután folyamán Akronból megérkeztek Farkas Imre és Deák János munkástársak.

A Védelmi Bizottság titkára jelenti, hogy az osztályharc fogjairól való megemlékezésünkkel 25 dollárt fog átutalni az Egyetemes Védelmi bizottsághoz.

Határozva, hogy a jövő évi értekezlet Cleveland, Ohioban legyen megtartva.

A jóléti ügyeknél felszólaltak: Pika Pál, Kovách Ernő, Zára János, Fishbein László, Kucher András, Geréb József akik mindannyian megelégedéssel állapitják meg, hogy az értekezlet tisztázott sok hamis vádat és nagy mértékben fog hozzájárulni ahhoz, hogy az uj lapbizottság, amely az Orszá-

MUNKA KÖZBEN

(gb) ROVATA

JÓ MUNKÁT KERESÜNK

A műhelyben reggelenként, nem sokkal a munka megkezdése után, csaknem minden nap átszól hozzám valamelyik szomszéd, hogy **jó munkám** van-e? Nem azért, mintha már annyira megkedveltek volna, hogy nagyon érdekelné őket, miszerint könnyen dolgozom-e vagy pedig nagy erőlködéssel és ebben az esetben talán segitségemre sietnek majd. Szó sincs róla, a **jó munka** utáni érdeklődésnek egészen más háttere van.

De sietek mindjárt annak a bejelentésével, hogy nemcsak tőlem kérdezik, hogy **jó munkán** dolgozom-e, hanem másoktól is. Sőt bevallom, már engem is megszállt a **jó munka** utáni érdeklődés vágya és én is éppen ugy, mint a többiek, körüljárom a szomszédokat és ha olyan munkát **látok**, amelyet még nem ismerek, jobban mondva amelyen még nem dolgoztam, hát bizony én is megkérdezem a szaktársat, hogy **jo munkája** van-e?

Eleinte, amikor ezt a **jó munka** utáni kérdezősködést hallottam, hát mindig eszembe jutott a magyar paraszt, akinek hosszadalmas köszönésében mindig benne volt a jó munka kérés is. Emlékszem például, hogy aki az uzsonnázó arató munkások mellett ment el, az igy köszönt: “Adjon Isten jó napot, jó étvágyat az uzsonnához, jó szalonnát meg jó pálinkát az átvágyhoz, erőt, egészséget meg **jó munkát!**”

Ez a városi nép azonban már nem olyan bőbeszédü és a jó **munka** után sem azért érdeklődik, mert azt másnak kivánná, hanem inkább azért, mert saját maga részére szeretné lefoglalni. Mindezeből világos, hogy az olyan gyárakban, mint a miénk is, vannak **jó munkák**, tehát vannak rossz munkák is.

A laikus ember előtt ez egészen természetesnek látszik és ugy képzeli, hogy az egyik munkához nagyobb erő kifejtés kell, mint a másikhoz, ennélfogva az első munka nehezebb, tehát rosszabb munka. Ami viszont azt jelentené, hogy amelyik munkát csak igen kevés fizikai megerőltetéssel, avagy kevés szellemi energia feláldozásával lehet elvégezni, az a **jó munka.**

MELYYIK A JÓ MUNKA

Ez a laikus barátunk most igazán **laikus** és éppen azért nagy tévedésben van. A munka jóságát az szabja meg, hogy **mennyi külön keresetet, bónuszt lehet vele keresni.** Ez az egyetlen faktor a mérvadó, a többi mit sem számit. Nem számit már csak azért sem, mert a szükséges szellemi vagy fizikai erő a különböző munkáknál csaknem azonos. Olyan helyeken, ahol csak napi, vagy hetibérért dolgoznak, a munkások nem érdeklődnek annyira a jó, avagy rossz munka után. Ott a fő az, hogy mennyi órát dolgoznak.

Tapasztalatból mondhatom, hogy a legtöbb munkás szó nélkül elvégzi a rábizott munkát. Hetibér esetén a legtöbbje nem törődik azzal, hogy melyik munkadarabot kapja, avagy melyik gépre teszik, — föltéve, hogy a rendes, megszokott munkáról van szó. De egészen más az eset az olyan gyárakban, ahol **darabszámra** dolgoznak a munkások.

A darabszámu munkánál sem azért válogatnak, mintha az egyik vagy a másik munka elvégzésében isteni élvezetet találnának, mig némelyik beteggé tenné őket, hanem csupán azért, **mert egyikkel jobban lehet keresni mint a másikkal.** Igy egészen természetes, hogy minden munkás azt az “egyiket” akarja, amelyikkel többet lehet keresni.

A darabszámu munkánál a bószok rendesen kiválasztják a legügyesebb munkást s megfigyelik, hogy ez az átlagosnál ügyesebb és gyorsabb munkás hány darabot készit el óránként, vagy naponként és a fizetést akként szabják meg. És ha még ebben az esetben is sokat keresnének a munkások, hát levágják az egységnek az árát. A darabszámu munka a kizsákmányolás oly borzalmas fokához vezetett, hogy a legtöbb union alapszabályaiba vette a darabszámu munka elleni küzdelmet és a szervezett műhelyekből már mindenünnen kiküszöbölték.

Azt mondják, hogy nincsen olyan törvény, amelyen egy ügyes fiskális ki ne tudna fogni. És ugylátszik, hogy nincsenek olyan union szabályok sem, amelyeket a bószok és a szakszervezeti vezérek ki ne tudnának játszani, mert én ugy látom, **hogy a bónusz rendszer, amit ma csaknem minden nagyobb gyárban alkalmaznak, nem egyéb módositott darabszámu munkánál.**

A BÓNUSZ RENDSZER ÁTKAI

A hadiipar produkciós gyáraiban általánossá lett a **bónusz rendszer**, mert azt hiszik, hogy igy a munkások többet termelnek. A tökéletes munkafelosztás következtében a munka valójában csak gép-etetéssé lett. Befogjuk a munkadarabot a gépbe, amely elvégez rajta egyvagy két vágást, furást, vagy gyalulást, — “operációt” szakmai nyelven mondva, — aztán kivesszük és helyébe tesszük a másik, hasonló darabot. Van olyan munka, amelynél ez az egész operáció nem igen tart tovább, mint itt leirtam. Természetesen vannak olyanok is, amelyeknél az operáció ideje hosszabb. És fontos az is, hogy mennyi darab van abból a bizonyos munkából, mert a gép beállitása az első darabhoz rendesen jelentékeny időt vesz igénybe.

Mármost valahányszor egy uj munkadarab kerül a műhelybe, akkor a “Time Study Man” megállapitja, hogy az operáció elvégzésére mennyi idő kell, amit rendesen az óra ezred részeivel jelez. Ha tehát egy ilyen operáció elvégzésére például 0.125 (125 ezred) óra kell, akkor abból egy óra alatt 8 darabot kell késziteni, mert egy órában a 125 ezred nyolcszor található.

A bónusz rendszer szerint ennél a munkánál a munkásnak az órabérért nyolc darabot kell késziteni és külön fizetést kap a nyolc darabon felüliekért. Ennek az ugynevezett idő egységnek a megállapitása szabja meg, hogy vajjon a munka jó-e avagy **rossz?**

De az is világos, hogy az időegység megállapitása függ a Time Study Man jóindulatától, függ attól, akivel dolgoztat, amikor az egységet megállapitja. És függ attól, hogy minden további körülmények ugyanazok-e akkor is, amikor a munkán valóban dolgoznak, mint voltak az egység megállapitásánál. Mert sok esetben például az egységet gyorsabb menetü gépen állapitják meg, mint amilyen gépre teszik produkcióra. Máskor az anyag is cserélődik. Az egységet mondjuk nem olyan kemény acélon vették fel. Máskor megint a vágó eszközök lesznek életlenek, stb. Szóval számtalan ok van, ami még az esetleg eredeti **jó munkát** is rossz munkává teszi. Innen van az állandó kérdezősködés.

Az tény, hogy a munkák között a bónusz eshetőséget nézve igen nagy a különbség. Éppen azért igen sok helyen a foremanok visszaélnek ezzel a dologgal és vagy a kedveltebb munkásaiknak adják a **jó munkát**, vagy pedig sápot huznak nak érte, amit itt “graft”-nek neveznek.

IGAZSÁGTALANUL JUTALMAZ

Abban a csoportban, ahol én dolgozom, nem mondhatnám, hogy bármi ilyesmi is volna. Lehetőleg arányosan osztják be a munkát, mindenkinek jut rossz is meg rosszabb is. De hallom más gyárakban dolgozó munkásoktól, hogy a bónusz rendszer milyen veszekedésekre és egymás iránti gyülölködésre vezet.

Nekem, aki “morális” szempontból is vizsgálom a dolgokat, az tünik fel leginkább, hogy az átlagos munkást az ilyen rendszernél nem maga a munka, hanem csak a bónusz érdekli. Nem azt nézi, hogy a társadalom részére csinál-e valami hasznosat, hanem csak azt, hogy melyik munkánál mit lehet keresni.

A bónusz rendszernél a legtöbb gyárban a fizetés arányában adják a bónuszt is. Tegyük fel, hogy egy munkából 40 darabot kell csinálni óránként, de a munkás 50 darabot készitett, akkor 25 százalékkal termelt többet és igy órabérének 25 százalékát kapja bónusz gyanánt. Ha az a munkás, mondjuk 80 cent órabérért dolgozott, akkor a bónusz 20 centet tesz ki, ellenben ha az órabére csak 68 cent, akkor a bónusz csak 17 cent. Igy az első munkás egy dollárt, a második pedig csak 85 centet kap **teljesen azonos munkáért.** Ez a munkások közötti ellenségeskedésre vezet.

Viszont ha a munkás szerencsés és **jó munkát** kap, akkor többet keres, ha mindjárt lustálkodik is, ellenben annak, akinek rossz munka jutott, nem tud keresni, akármennyire iparkodik is. Igy a bónusz rendszer nem azt jutalmazza, aki igazán megérdemelné, hanem azt, akinek szerencséje van, vagy aki behizelegte magát a foremannak, avagy aki bünös módon megvesztegetéshez folyamodik. A bónusz rendszer tehát magában hordja az ily erkölcstelen eljárás csiráit.

És végre, amit ugyan legutóljára emlitek, de azért a legfontosabb, a bónusz rendszernél a munkások vigyáznak, nehogy elrontsák a **jó munkát**, mert ha tul sokat termelnek, akkor levágják az egységet. Igy a bónusz rendszer nem hogy emelné a termelést, **de igen sok esetben egyenesen korlátozza.**

Bizonyára vannak olyanok, akik a bónusz rendszerről még sok más káros tulajdonságot is fel tudnának sorolni, de az itt elmondottak is eléggé bizonyitják, hogy ennek a rendszernek is követni kell az elődjét, a darabszámu munkát, — a feledés homályába.

---

gos Értekezlettől $1120.45-t készpénzzel indul el az évi munkája végzésére, még nagyobb támogatást fog kapni a magyar munkásoktól.

Hering gyülésvezető munkástárs lelkes szavakban mond köszönetet a delegátusoknak a végzett munkájukért, a szakácsnőknek a kitünő ellátásért, akik Bercsa, Kollár, Molnár és Danka munkástársnők voltak. Hering munkástárs felszólitására a delegátusok és a jelenlevő hallgatóság $44.50-el járult hozzá a clevelandiak kiadásához. Majd berekeszti az értekezlet tanácskozását.

Nagy érdeklődés és izgalom mellett lett ezután megejtve az országos sorsolás.

Kollár József,
Székely Sándor,

"Laptulajdonosok és szerkesztők figyelmébe"

(gb.) Az Elmer Davis által vezetett Office of War Information hivatal megszervezte az idegen nyelvü sajtó osztályát, melynek vezetője, Alan Cranston, augusztus 25-én gyülésre hivta az amerikai idegen gyelvü sajtó szerkesztőit és kiadóit. A New York városban tartott gyülésen Mr. Cranston minden félreértést elkerülő módon, nyíltan és őszintén megmondotta a szerkesztőknek és kiadóknak, HOGY AZ IDEGEN NYELVÜ SAJTÓ BIZONYOS RÉSZÉNEK BE KELL SZÜNTETNI A BURKOLT NÁCI ÉS FASIZTA PROPAGANDÁT, ELLENKEZŐ ESTEBEN AZ IDEGEN NYELVÜ SAJTÓ ELNYOMÁSÁRA TÖREKVŐ ERŐK GYŐZEDELMESKEDNI FOGNAK.

Mr. Crantston erősen kihangsulyozta, hogy egyes német, olasz, magyar, román és bulgár lapok amig készséggel adnak le minden hirt a hadikötvényekről, polgári védelemről, sorozásról, ár vagy árukorlátozásról, addig soha sem nyomatnak ki olyasmit, ami a nácizmusra vagy a fasizmusra kedvezőtlen lenne. Az egyik német lapkiadó ezt igy magyarázta meg: "A német-amerikaiak nem szeretnek hallani Hitlerről és a nácizmusról. Valahányszor a nácizmust támadják azt hiszik, hogy rájuk céloznak. Én náei ellenes vagyok," — mondotta, — "de az olvasóim nem vásárolnának náci ellenes ujságot".

Az ilyen szerkesztők és lapkiadók vigyáznak, ne hogy a nácizmusról valami elitélőt irjanak. És mint ahogy Mr. Cranston nagyon helyesen jegyzi meg, "AKI NEM TÁMADJA A NÁCIZMUST, AZ PÁRTOLÓJA ANNAK!"

Mr. Cranston többször kiemelte, hogy a német lapra mondott dolgok vonatkoznak a magyar lapokra is. Mi természetesen kiegészítjük azzal, hogy Hitler és a nácizmus helyébe Horthyt meg a magyar fasizmust, a magyar fehér terrort tesszük. És mint azt már annyiszor megirtuk, AZ AMERIKAI MAGYAR SAJTÓ ÓRIÁSI TÖBBSÉGE NEM CSAK, HOGY NEM IRT HORTHY ÉS A MAGYAR FASIZMUS ELLEN, DE MÉG PEARL HARBOR UTÁN IS DICSHIMNUSZOKAT ZENGEDEZTEK RÓLUK. Sőt még ma is találunk gondosan elbujtatott náci vagy Horthy mellettes propaganda anyagot a lapjaikban.

És mint mi, ugy a hivatalos közegek is jól látják, hogy hadikötvények árulásával, ambulancok vételével és hazafias mellveregetéssel nem lehet elgáncsolni az igazi lényeget, a fasizmus és annak minden válfaja elleni igazi küzdelmet.

És mint ahogyan mi számos esetben kimutattuk, hogy a náci propagandát elbujtatják versekbe, elbeszélésekbe, szerkesztői üznetekbe és mindenféle más módon, nehogy rajtafogják őket, ugy Mr. Cranston is észrevette ezt és azért mondotta a következőket:

"őrízkedjetek az olyan alkalmazottaktól, akik Pearl Harbor előtt hüségesen szolgálták az ellenséget. Mindaddig, amig az ujságjaiknál dolgoznak, ellenséges propaganda ugyan nem jelenik meg a nagy cimekben, de ott lesz a folytatólagos regényekben, a tárcákban, az olvasóktól kapott levelekben, könyvszemlékben, sőt talán még a jövendölésben is. Mindaddig, amig a lap összes munkatársai megbizhatók nem lesznek, mindaddig amig önök ujságjuk minden sorát lelkiismeretesen Amerika és a szabadságért folyó harc szolgálatába nem állitják, nem adják teljes részesedésüket."

Az Office of War Information hivatal követelése tehát az, hogy a laptulajdonosok és szerkesztők dobják ki azokat, akik Pearl Harbor előtt hiven szolgálták az ellenséget. Ez nagyon helyes. Csak most már azt kell még megkérdeznünk Mr. Cranstontól, hogy mi történjék abban az esetben, amikor MAGUK A LAPTULAJDONOSOK ÉS SZERKESZTŐK SZOLGÁLTÁK AZ ELLENSÉGET OLYAN HIVEN NEMCSAK PEARL HARBORIG, DE MÉG AZUTÁN TÖBB HÓNAPPAL IS?

Mert sajnos és örök szégyene az amerikai magyarságnak, HOGY AZ AMERIKAI MAGYAR SAJTÓ ÓRIÁSI TÖBBSÉGÉNÉL EZ AZ ESET ÁLL FENN.

Konvenciós Képek

Megjöttek:

Háboru van és a mi delegátusaink nem kis üzlet emberek, nyugalomba vonult kistőkések, kiknek a nyugodt emésztéshez szükséges az, hogy egy évben egyszer kiszellőztesse a "forradalmi" érzelmeit, nem, a mi delegátusaink munkások, kiknek a többsége hadiiparban dolgozik, kiknek a munkából való elszabadulása nem csak anyagi veszteséget, de nem kis nehézséget is okoz, azonkivül a gumi és gazolin korlátozás volt az amely azt a félelmet keltette bennünk, hogy ez a konvenció nélkülözni fogja a távol lakó munkástársakat. De ugyan kellemes volt a csalódás, amikor az értekezlet előtti estén a barátságos vacsorán egymás után jöttek Chicago, New York, Buffaló, Pittsburgh jól ismert delegátusai, kik örömmel, szeretettel üdvözölték egymást és rögtön megindult a vitatkozás amelynek csak a

Vacsora

vetett véget, amely nagyon elütött a szokásos banketektől mert nem cigányzene és "müvészi" müsor kisérte a jó vacsorát, hanem komoly eszmecsere, amelynek az irányitása Lefkovits munkástárs avatott kezébe volt letéve. Pika, Fishbein, Zára, Hering, Geréb stb. munkástársak világos, céltudatosan forradalmi beszéde, megadták az irányvonalát a magyar ipari forradalmárok harcainak és igazolása volt a Bérmunkás irógárdájának, amelynek az irányvonalával való szolidaritást fejezte ki. Éjfél utánig oda adó figyelemmel hallgatták a felszólalásokat és kétségtelen, hogy nem csak a kitünő vacsora miatt, de főleg a rövid előadások rendkivül értékessé tették a szombat esti pár órát.

A konvencio:

Az éjfél utánig tartó vacsora után természetes volt, hogy a konvenció csak 10 órakor kezdődhetett meg. A formaságok elintézése után a lapbizottság jelentését olvassa fel Lefkovits munkástárs, amelynek a veleje az, hogy talán először a Bérmunkás életébe 500 dolláron felüli maradványt jelent, amely a konvenció folyamán ezer dollárra emelkedik. Utána a delegátusok jelentkeznek, mind egyik delegátus ma arról panaszkodik, hogy tulsokat kell dolgozni, kevés az idő az agitációra, egy két helyen az ellenzék müködése akadályozza a munkát, de ha a delegátus nem is tudja felkeresni az olvasókat ,maga az olvasó küldi be nem csak az előfizetést, de a hátralékot és a felül fizetést is. Leglelkesebb irásbeli jelentése az akroni munkástársnők jelentése, melyet Schwindt munkástársnő küldött, dollárokkal kibélelve és fokozott munkát igérve.

A lap szellemi irányvonaláról Geréb, Kovách munkástársak tették a jelentést, amely után a szavazólapokat nézi át egy bizottság, a beérkezett szavazatokat felbontva megállapitva, hogy egyhangulag a lap irányvonala mellett nyilatkoztak az olvasók, egy ellenvélemény sincs.

De volt a delegátusok között, alapos és jogos kritika, amely jóindulattal és épitéssel birálta el a lap tartalmát, rámutatva a hibákra, amely azonban nagyon kevés volt, de a lényeggel 100 százalékban egyetért a konvenció és mégujitotta a mult évi konvenció erre vonatkozó határozatát.

Egyik határozata az, hogy az épitő gárdát 50 tagsággal egésziti ki ugy a férfi, mint a női gárdát, minden gárdista havi egy dollárral járul hozzá a lap fenntartásához, amelynek ellenében minden dollár után egy-egy uj cimet küldhetnek, amely 6 hónapra fogja kapni a lapot.

Eddig 19 jelentkezett, a lapbizottság várja az uj jelentkezőket, kik a konvenciótol, konvencióig beküldik a havi egy dollárt.

FIZETÉS EMELÉS:

Fishbein munkástárs egy szép beszédben mondotta el azt a nagyszerü munkát, amelyet Lefkovits munkástárs végez és a drágaságra való tekintettel javasolta a fizetésének a felemelését, tekintve, hogy a mostani félfizetése nem felel meg a viszonyoknak.

A delegátusok bólogatnak, de mielőtt tárgyalásra került volna a javaslat, felállt Lefkovits munkástárs és sztrájkkal való fenyegetéssel utasitotta vissza a javaslatot, melyet a megijedt Hering munkástárs sietve vette le a napirendről.

Utána a napirend kimerülésével Pika, Zára, Fishbein, Geréb, Kucher munkástársak bélyegezték a rombolók szándékait, akik látva az akcióik csődjét még csak be sem mertek nézni a konvencióra, nehogy a lehetetlen álláspontjukat meg kelljen védeni.

A delegátusok egy jól végzett munka tudatában, egy szebb jövő reményében, egymást megértve, szeretve távoztak el, hogy dolgozzanak az Ipari Demokráciáért.

Hering munkástárs lelkes szavakkal zárta be a konvenciót.

(K.E.)

"Szervezés" — "Nevelés" — "Felszabadulás"
Az Ipari Forradalmárok Szentháromsága

AMIT NEM HAGYHATUNK SZÓNÉLKÜL

....CS...Ő MEGJEGYZÉSEI

MÁSODIK FRONT TANULSÁGAI

Az európai front megnyitása nagyon rövid időn belül elvitathatatlanul meg fog történni, hogy ezzel enyhitsék a Szovjetekre nehezedő rettenetes nyomást, másrészt, hogy megakadályozzák azt, hogy az oroszok visszaszoritása után, Hitler másutt használhassa fel a katonai gépezetét.

Hogy a második front megnyitásának a követelése, nem rosszakaratu akna munka volt, mint azt a reakció részéről beállitani szerették volna, hanem a legjobb ut a nácizmus megsemmisitésére azt igazolja uj frontok nyitása.

Az amerikai ofenziva amely együtt indult a kinaiak ellentámadásával, mind a két helyen jelentős eredményeket ért el, mert a japán imperialisták, nem tudták az erejüket egy helyre koncentrálni, kénytelenek azt megosztani és igy vereséget szenvedni.

A Szovjet amely ezideig hiába sürgette a hathatós segitséget, megnyitott egy "második" frontot a moszkvai offenzivával, amelyel egyidejüleg erős amerikai és angol légi offenziva indult a náci közlekedési vonalak és a hadi ipar szétrombolására, ma még korai volna végleges eredményről beszélni, de eltekintve a ténylegesen elért eredményektől ezideig két tény észlelhetö: pillanatnyi enyhülés a stalingrádi fronton miután a tartalékot a nácik kénytelenek megosztani a moszkvai fronttal, a másik, hogy a nácik az Egyiptom elleni indulásra kész offenziváját kénytelenek voltak elhalasztani mert a légi és a moszkvai offenziva elleni védelemre kénytelenek voltak több száz repülöt az afrikai hadszintérről elvonni.

Ha a szünet nélkül folyó és folyton erősödő légi támadások nem fognak megállni, a közlekedési vonalakat és a gyárakat, valamint a hadi bázisokat szétrombolják és meginditsák a szárazföldi támadást ,ezzel bekapcsolódnak a most folyó orosz offenzivába, kétségtelen, hogy a náci hordákra olyan csapást mérnek még a tél beállta előtt, amelyet kiheverni nem tudnak és ami a legfontosabb megmentik a hatalmas olajtelepeket a szétrombolástól.

PROFIT KORLÁTOZÁSA

A háborus helyzet, amikor millió és millió ember áll fegyverben, amely nem végez produktiv munkát, de a közösségnek kell őket élelmezni, ruházni, fizetni és ellátni "szerszámmal" fegyver, tank repülögép, munició stb.-vel, óriási terhet ró az államháztartásra, amelyet nem tud fedezni a normális bevételeiből, tehát az adók többszörösre emelésével fedezi egy kis hányadát, mig a nagy részét kölcsönök (bondok eladásával) fedezi a kiadásainak. Hatalmas aparátus dolgozik azon, hogy minél több uj bevételi forrást találjon az állam ahelyett, hogy az egyetlen természetes módhoz a nagy vagyonhoz fordulna és azt állitaná be szükségleteinek a fedezésére. Ha az államnak joga van arra, hogy a háborus veszély idején a polgárainak a millióit fegyverbe szóllitsa és a közösség védelmére az életének a feláldozását követelje, akkor kézenfekvő dolog az, hogy a holt vagyonok a védelemre való felhasználása sokkal természetesebb valami lenne, ha a társadalom nem osztályokra volna szakitva, hanem ténylegesen egyenlő jogu és érdekü egyénekből állana. De igy az erősebb, a gazdasági javak birtokában levö osztály igyekszik kibujni a terhek alól és arra törekszik, hogy azt a dolgozók osztályára háritsa át. A mai háborus kiadások azonban oly óriási nagyok, hogy azoknak a munkásosztályra való áthárítása lehetetlen és igy a kormányzat kénytelen mind erösebben az uralkodó osztályt is bevonni a terhek viselésébe oly mértékben, amilyen szervezett erővel a munkásság erre nyomást tud gyakorolni. Angliában, ahol a munkásság szervezett ereje jóval nagyobb mint az Egyesült Államokban már erős korlátok emelődtek a jövedelmek korlátok között való tartására, mig itt még mindig azt a dajka mesét fujják a tökések propaganditái, hogy a profit tul adóztatása a jövedelmek korlátozása megöli a kezdeményezési erőt, az ambiciót, ami a háborus termelés rovására menne és ami a fö a magántulajdon szentségének a megsértését jelentené.

Az első kifogás ellen, hogy csak a profit az amely a termelés fokozására képes, elég példa a Szovjetek helyzete, ahol dacára, hogy a magánprofit megszünt, ugy a termelés mint az általános áldozatkészség terén messze felülmulja a profitrendszeren épülő államokat. Nincs az a bolond aki elhinné azt, hogy a termelés hátrányára volna az, ha például Barbara Hutton "csak" évi 25 ezer dollárt költhetne el a milliós jövedelméből, mig a többit az állam venné el, legfeljebb nem tudna uj férjet vásárolni, de ugyan ugy nem befolyásolná a termelés menetét az sem, ha a többi milliós jövedelmek korlátozva lennének, legfeljebb ha ezek munkájára szükség volna az államnak, ugy megvannak az eszközei azok igénybevételére. Természetes, hogy értéktelen volna a korlátozás, ha az csak egyénekre vonatkozna, mert akkor a payrollra helyeznék a családtagokat, tehát a jövedelem korlátozás család szerint volna értendő.

Még egy érvet hoznak fel a jövedelem korlátozása ellen, hogy sulyosan érintené a luxus ipart és a háztartási alkalmazottakat. Ez az érv legkevésbé helytálló, mert ahogy nem lehet az állam tekintettel arra, hogy a gazolin állomások, az autó üzletek tulajdonosai a korlátozások miatt elvesztik az üzleteiket, éppen ugy eltekinthet a luxus ipar pusztulása felett, amelynek a munkásai helyet fognak találni a hadiiparban, ugyan ugy a nagyszámu személyi szolgálatra alkalmazottak is és hogy nem tudnák fentartani a nagy palotákat az csak előnyös volna, mert enyhitené a lakáshiányt. Egyes városok kiadták a jelszót, hogy dolgozz vagy harcolj, ezt természetesen nem alkalmazták a tökésekre, legfeljebb a hóbókra most a közveszély idején nagyon helyes volna az a jelszó, hogy csak az egyen aki dolgozik, a sok ezer mások munkájából élő paraziták a munkára kényszerités erösen enyhitené a munkáshiányt a farmokon.

A nagytöke ma még kézzel-lábbal tiltakozik a jövedelem korlátozása ellen, pedig ez csak az első lépés, amelyet feltétlen követni fog a nagy vagyonok a közösség szolgálatába állitása és a profit megszüntetése.

NEGYEDIK ÉV

A második világháboru a negyedik évébe lépett, az elmult éveivel együtt növekedett hatalmassá, soha el nem képzelhető borzalommá, hogy a negyedik évében tényleg az egész világon tombol a harc. Ez nem csak azért világháboru mert a világ minden részéből vesznek benne részt, de azért, mert a harc mindenütt folyik és egy-két "semleges" ország kivételével az egész emberiség harcban áll.

Az elmult három év millió és millió katona életén kivül a civil lakosok százezreit pusztitotta el. A fasizta államok borzalmas harcmodora, amely az öldöklést a frontokról átviszi a harctértől száz és száz mérföldre levő városok békés lakosaira, asszonyaira, gyermekeire, rettenetesebbé tette a háborut a középkor vad népeinek harcainál. Varsó, Rotterdam, London, Belgrád világvárosok támadása után, az ipari városok teljes szisztematikus kiirtása következett, veszett kutyákkal szemben nem lehet csak bunkós bottal harcolni és igy csak a nácik akciójának a reakciója volt, Berlin, Köln és a nagy német ipari városok bombázása. A nácik hihetetlen felkészültsége, a katonai gépezetének elképesztő nagysága hatalmas győzelmeket hozott a fel nem készült, a belsö reakció által elárult országokkal szemben, az elsö 20 hónap sikerei vakmerővé, elbizakodottá tette Hitlert és megtámadta a Szovjeteket, abban a reménybben, hogy három hónap alatt eltörli a szovjet rendszert. Még jól emlékszünk a Himlerek buta és gyalázatos kijelentéseikre, hogy csak had pusztitsák egymást az oroszok és a nácik, nekünk ahoz semmi közünk. Azóta beigazolódott sok minden főleg az, hogy a vörös hadsereget, az egyesült náci hadak, a német, olasz, finn, magyar, román, bolgár teljes katonai ereje, amelyet még a francia, spanyol fasizta légiók is támogattak, még 15 hónap után sem tudták leverni, megsemmisiteni. Óriási területet foglaltak el, de az ár amit érte fizettek borzalmas volt, a náci hordákból milliók pusztultak el, de rettenetes volt az oroszok vesztessége is, emberben és 20 éven keresztül koplalva, végsőkig megfeszitett erövel felépitett ipari városaival, erőmüveivel, de beigazolódott az is, hogy a Szovjet munkás nem a terror alatt türte el a rendszert, hanem az élete árán is ragaszkodik hozzá és olyan hősiességgel áll szemben a tulerővel, amilyet a történelem ezideig nem ismert. Az orosz hadsereg hősiessége megmentette Angliát és Amerikát az inváziótól, módot adott a felkészülésre és igazán itt volna az ideje annak, hogy a szovjet is ne csak elismerést, hanem tényleges segitséget is kapjon a szövetségeseitől, hogy a háboru egész terhét ne csak az ö vállai viseljék. Ma már mind és mind több hang hallatszik ,amely ezt a segitséget sürgeti, ez a tisztességes hang elnyomja a Chicago Tribune, a New York Daily News, a Peglerek, magyarban, a Kudlikok, Himlerek szovjet ellenes uszitásait.

Három év letelte után, még a borzalmaknak a vége beláthatatlanul messze van, a nácizmus kiirtása még millió és millió emberéletbe fog kerülni, de feltétlen bizonyos az is, hogy az emberiség, amely ezt a borzalmakat átéli, nem fog még egy ilyen világégést megengedni, fel fog ébredni és elfogja törölni azt a rendszert, amely ilyen borzalmakat zuditott az emberiségre és megteremt egy olyan társadalmi rendszert, amelyben nem lesz nyomor, kizsákmányolás, de nem teremhetnek Hitlerek sem és nem lesz háboru sem, hanem egy boldog, megelégedett, óriási léptekkel előre haladó emberiség fog élni egymással békében és szeretetben.

Hogy ez igy legyen, azon a szerény erőnket egyesitve kell dolgoznunk Ipari Unionisták.

CSONGRÁDI CSöDBEN

Tatyu bajba van, a hatóság a nagy adósságok miatt lezárta a náci Egyetértés lapvállalatot. Ja kérem az idők változtak, a náci dögvésszel kacérkodó atyafiak igyekeztek lekerülni a náci lap cimszalagjáról, mielőtt a Horthy-Hitler szimpátia bajokat okozna. Most már a Horthy követség sem tartózkodik Amerikában, hogy a hóna alá nyult volna az adósságokba fuldokló Csongrádinak és olyan "jó barátai" sincsennek mint Himlernek, hogy egy vagón ujságpapirost juttattak volna el Bridgeportra, mint azt eljutatták Detroitba, igy a tatyu elmerült. A Pearl Harbor óta teljesen szintelenné ijedt lapja, ha megszünik senkinek sem fog hiányozni.

Nyilnak a magyar szemek és reméljük, hogy az Egyetértést követni fogja a többi magyar kutmérgezö részvétnélküli pusztulása.

öSSZEILLENEK

Himler testvér hasábokon keresztül védi a leghirhedtebb és legreakciósabb polgári ujságirót Peglert, felháborodik azon, hogy a szervezett munkásság tiltakozik az undok förmedvényei ellen és valósággal szobrot követel Peglernek.

Nagyon helyén való Himler

A szocializmus előfeltételei

A szocializmus első föltétele a béke és demokratikus jogi állapotok, amelynek a kihasználásával feltudjuk épiteni azon intézményeket amelyekben képesek leszünk azon erőket gyüjteni melyek szükségesek, először az előfeltételeket és később magát a szocialista társadalom megteremtésére. Amint az irásom bekezdésnél mondon, először békére van szükség, mert amig a háboru folyik nem intézkedhetünk és nem cselekedhetünk. Egy kicsit furcsán hangzik, de ugy van. Hogy a háboru után milyenek lesznek a jogi állapotok arról majd akkor. Most csak arról, hogy a jelen és adott körülmények között mit cselekedhetünk. Ami a jövöt illeti legyünk elkészülve, mondjuk a legjobbra.

Tehát, hogy teremthessünk békét mi munkások, mikor még annyi erövel sem rendelkeztünk a háboru kitörésekor nemzetközi értelemben, hogy a háborut meg tudtuk volna kadályozni? Igy tehát a munkások részéről béke megteremtése szóba sem jöhet, sem pedig az elöfeltételek kikényszeritése. Téves az az elgondolás is, hogy a háboru szülte nyomor a szocializmus előfeltétele és az, hogy elégséges a szocializmus megteremtéséhez. A háboru vagy munkanélküliség okozta nyomor, csak szükségessé teszi, de nem előfeltétele a szocializmusnak.

Van egy másik társadalmi jelenség amelynek a munkásság részéröl való kisajátitása révén sokan a szocializmust vélik megvalósitani. Ez az, hogy az imperialista háborut átalakitani polgárháboruvá. A háboru nem szüli meg a szocializmus előfeltételeit. Szülhet lázadást, polgárháborut és még nagyobb szenvedést, de nem szocializmust.

Milyen elöfeltételekre van tehát szükség, hogy a nagy társadalmi alakitást tervszerüen és céltudatosan a nép összesége érdekében és a termelés megzavarása nélkül lehessen végrehajtani?

Most, mielött a szocializmus épitéséhez hozzá fognánk, kell tisztáznunk ne hogy tévedésekbe essünk az előfeltételek megbirálásában. Mert a szociális termelés bevezetése az előfeltételek minöségétöl függ, hogy mennyire igen és mennyire nem lehet a szocializmust megvalósitani. Kétszer is meg kell gondolnunk mielött a szocializmus kiépitéséhez hozzá fognánk, mert ne gondoljuk, hogy minden előfeltétel a szocializmus előfeltétele. Vannak mélyreható társadalmi reformok, amelyeknek szinte meg vannak a maga előfeltételei. Ilyenek a termelö eszközök fejlettsége a töke összpontosulása, egy nagymérvü munkanélküliség és több amire hivatkozás történt több alkalommal. Az eddigiek mind kilettek próbálva a multban ksebb nagyobb mértékben. Szomoru emlék, drága tapasztalat. Itt kell nekünk szocialistáknak figyelmeseknek lenni, hogy a több féle előfeltételek közül megtudjuk külömböztetni a helyeset. A tévedések elkerülése végett az IWW-nak van egy ajálata, még pedig az oly sokszor hangoztatott szervezés, nevelés. Mert tudva azt, hogy semmit, de semmit ami közérdekü nem lehet csak ugy, mondással vagy mivel ugy szeretnénk, megteremteni. A most a társadalom méhében duló harcok, amelyeket a tőkés rendszer elavultsága idézett elö és változtatja meg a társadalom épitményét, sokak szerint szocializmus előfeltételei. Még pedig avval a megindokolással, hogy a politikai machináció, az iparok felett ellenörzést kezd gyakorolni azaz felcsapott gazdasági intézkedő prókátornak. A kormánynak ezen cselekvése, az ipari demokrácia, vagyis a szocializmus közelségében helyez, de nem valósitja meg. Ez még a szocializmus előfeltételének is csak ugy volna nevezhetö. ha a munkásság szervezett erövel és harccal kényszeritette volna a kormányt erre a cselekvésre.

Bármilyen változások történjenek ugy társadalmi mint gazdasági életünkben, ha nem harccal kényszeritette ki a változást a munkásság, nem nevezhetö szocializmus előfeltételének. Az eddig tárgyalt és megemlitett előfeltételek a munkásság szervezetlensége sülyesztették a jellegtelenségbe. Igy hát ha történelmi hivatásunknak eleget akarunk tenti, ami a szocializmus megvalósitása és nem akarjuk megvárni mig a fejlödés reánk kényszeriti azt, hozzá kell, hogy fogjunk a szervezetünk felépitéséhez.

Nem egy havidijat kollektáló ügynökséget, mint a CIO vagy AFL, hanem ipari szervezetet, ipari tartalommal. És oly forradalmi nevelést, mely a szocializmus iránti érzés és óhaj kitermelését eredményezné. A háborus állapotok megnehezitik a szervező tevékenységét, de ha csak annyit is teszünk amit az adott körülmények megengednek a szervezés terén gyüjthetünk annyi erőt, hogy a béke eljövetele nem fog készületlenül találni.

Ha a munkásság a béketárgyalás megkezdésénél rendelkezni fog annyi erővel és társadalmi ismeretekkel, forradalmi elszántsággal és szocialista akarattal, csak akkor és nem máskép lesz képes a béketárgyalást hatalmába keriteni. Ne felejtsük el, minden ugy történik és minden csak azért történik mert mi munkások ugy akarjuk. Vagy tudatosan adjuk a hozzájárulásunkat, vagy pedig közömbösségünkkel járulunk hozzá. A szocialimussal is igy vagyunk, csak akkor lesz ha mi akarjuk.

Az IWW hiv, gyertek a kerete oly tágas, hogy minden munkást befogad bármilyen munkát végez a társadalomban, de oly szük is, hogy egy élösdinek sincs ott helye.

Bischof

Az országos sorsolásban az alábbiak számai lettek a nyertesek: az 504-es számmal $30.00-t Spolyár, Chicago; a 2012-es számmal $20.00-t J. Bank, Akron; $10-10 dollárt az 5434-es számmal Anna Haasz, Flushing és a 7400-es számmal M. Zajacz, Cleveland nyertek. A hat darab öt dolláros dijakat nyerték: St. Gecsö Garfield az 13255; R. Kurkovszky Copeland a 98993 számmal: a Coraopolisi Magyar Otthon a 6793. számmal;J. Sike Dearborn az 1106. számmal; G. Stengeri, Dearborn az 14357. számmal és Mrs. Haas. Flushing a 16801. számmal.

---

védelme mert amit Pegler angolba jelent, azt jelenti ez a Himler magyarban, csak idö kérdése az, hogy a magyar tömegek is meglássák az ö aljasságát és éppen olyan felháborodva tiltakozzanak a mocskolódásai ellen, mint az amerikai testvéreik teszik.

Szobrot Peglernek. kiálltja Himler ur, mi már meg is terveztük a szobrot; egy kövér nagy tőkés és Pegler a fő alakok, ahol a tőkés átnyujtja a fizettséget Peglernek a szolgálataiért, a mellék alak Himler volna, amint hasoncsuszva a talpát nyalja a nagytőkének és félszemmel azt lesve, hogy mikor hullik le neki is egy kis morzsa a pénzeszsákból.

ELVINYILATKOZAT

A munkásosztály és a munkáltató osztály között semmi közösség ninesen. Nem lehet béke mindaddig, amig éhség és nélkülözés található a dolgozó emberek milliói között s az élet összes javait ama kevesek birják akikből a munkáltató osztály áll.

E két osztály között küzdelemnek kell folynia mindaddig, mig a világ munkásai mint osztály szervezkednek, birtokukba veszik a földet, a termelö eszközöket és megszüntetik a bérrendszert.

Ugy találjuk, hogy az iparok igazgatásának mind kevesebb és kevesebb kezekbeni összpontosulása a szakszervezeteket (trade unions) képtelenné teszik arra, hogy a munkáltató osztály egyre növekvő hatalmával felvegyék a küzdelmet. A szakszervezetek olyan állapotot ápolnak, amely lehetővé teszi, hogy a munkások egyik csoportját az ugyanazon iparban dolgozó másik csoport ellen uszitsák és ezáltal elősegitik, hogy bérharc esetén egymást verik le. A szakszervezetek segitenek a munkáltató osztálynak a munkásokba beoltani ama tévhitet hogy a munkáltatókkal közös érdekeik vannak.

E szomoru állapotokat megváltoztatni és a munkásosztály érdekeit megóvni csakis olykép felépitett szervezettel lehet, melynek minden az egy iparban — vagy ha kell, valamennyi iparban — dolgozó tagjai heszüntessék a munkát bármikor, ha sztrájk vagy kizárás van annak valamelyik osztályában, igy az egyen esett sérelmet az összesség sérelmének tekinti.

E maradi jelszó helyett:"Tisztességes napibért, tisztességes napi munkáért" ezt a forradalmi jelszót irjuk a zászlónkra: "LE A BÉRRENDSZERREL!"

A munkásosztály történelmi hivatása, hogy megszüntesse a bérrendszert. A termelő hadsereget nemcsak a tőkésekkel való mindennapi harcra kell szervezni, hanem arra is, hogy folytassa a termelést akkor, amikor a bérrendszer már elpusztult. Az ipari szervezkedéssel az uj társadalom szerkezetét épitjük a régi társadalom keretein belül.

CHICAGO — MILLWAUKEE KERÜLETI SAJTÓ ÜNNEPÉLYT

rendeznek az IWW Chicago és Millwaukee kerületben levő csoportjai a Finn és Magyar propaganda csoportokkal egyetemben

1942 szept. 13-án vasárnap
egész nap a

TWIN CITY PARKBAN
(Mozina Park)

1120 Elmwood Avenue, North Chicago, Ill. Waukegan közelében.

A kerthelyiség megválasztásánál a rendezőség figyelemmel volt arra, hogy az ugy chicagoból, mint millwaukeeból könnyen megközelithetö legyen mig a közben esö Racine, Waukegan és Kenosha szomszédságában van és igy a legmegfelelőbb. A helyiség minden időben alkalmas. Szép idő esetén a kerthelyiség, esős vagy hüvös idő esetén pedig tágas fedett helyiségekben szórakozhatnak a vendégek.

A sajtóünnepély a szezón kimagasló eseménye lesz. Müsor, tánc, különféle társasjátékok. Izletes ennivalók és hüsitők.

Az ünnepély jövedelme az IWW sajtó, ugymint: "INDUSTRIALISTI" finn napilap; "INDUSTRIAL WORKER" angol heti és a "BÉRMUNKÁS" magyar hetilapok anyagi támogatását szolgálja.

Kössük össze a hasznosat a kellemessel és tömegesen jelenjünk meg ezen SAJTÓ ÜNNEPÉLYEN. Már most felszólitjuk lapunk olvasóit, hogy jegyezzék elö e napot és szólitsák fel ismerőseiket is.

Utirány:

A 41-es uton (Skokie Highway) az Illinois 120-ig, ott keletre fordul Waukegan felé. Waukeganbe vegye a Jackson Streetet délre a Tenth Streetig; a Tenth Streeten nyugatra az Elmwood Ave.-ig, ahonnan a Park egy block délre.

A 42-es uton (Sheridan Road) North Chicagoba, ott vegye a Tenth Streetet nyugatra az Elmwood Ave.-ig.

Fishbein L. mtárs jelentése az Országos Értekezlethez

Tisztelt Munkástársak

Pár év mult el azóta, amikor én mint a new yorkiak küldöttje találkoztam munkástársaimmal az IWW magyar tagjainak évi konvencióján. Igazán örültem annak, hogy voltak többen new yorki munkástársak akik kötelességüknek tartották, hogy az IWW magyar tagjainak a konvencióján megjelenjenek. Mindig nehéz volt küldöttett választanunk, leginkább azért, mert a két napos utazás és a 12 órát egyhuzamban tartó gyülésezés egyes delegátus munkástársainkat annyira kimeritette, hogy néhány napi pihenésre lett volna szükségük amikor New Yorkba visszaértek.

Ebben az évben azonban más okok voltak, amfért nem tudtunk rajtam kivül más delegátust választani. Ezen okok miatt jelentésem lényegét irásban teszem meg az utólagos félreértések és az esetleges félremagyarázások fedézésére. Mint jól tudják New Yorkban voltak többen olyan munkástársak akiket mozgalmi szempontból "tehetségeseknek" biráltunk el, akik a gyüléseken szabatosan tudtak felszólalni, sőt többen jó népgyülési előadók voltak, mig egyesek a tollforgatás mesterségét gyakoroltak.

A mozgalmi müködésünk teljesen rendben ment, mindaddig amig hitleri nácizmus meg nem inditotta a hóditási lavinát mely az egész világ berendezkedését összekavarta, ember és ember között a részben ledöntött vallási és faji válaszfalakat visszaállitva nem arról beszéltek többé a régi harcos forradalmárok, hogy az ipari unionizmus eszméjét hogyan lehetne hathatósabban terjeszteni, hanem arról voltak sokszor a hajnali órákig nyuló viták, hogy vajjon a Hitlerizmus a fejlődési folyamat mely végeredményben a kapitalizmust fogja kipusztitani, avagy visszafejlődés, mely a munkásosztály szervezeteit és jogait irtja ki a föd szinéről.

Ezek a viták már akkor kezdtek kiélesedni, amikor a Hitler-Stalin paktum a világkorát élte, annak elmultával aztán annyira elmérgesedtek, hogy ugylátszott mintha egyesek a gyilkos nácizmus mellé szegődtek volna, mig a másik oldalon az ipari harcosok megalkudva a kapitalizmus védelmére keltek volna. Ilyen körülmények között nehéz volt az agitációs munkát föntartani lapunk érdekében, mert ugy éreztük mi akik minden gondolatunkkal a Bérmunkás mellett álltunk, mintha a leggyülöltebb ellenségeink lennének sorainkban. Távol állott tőlünk bárkit is megbélyegezni, hogy a nácizmus mellé állott és nem is hisszük, hogy ezek a munkástársaink talán rosszakaratulag birálták el az eseményeket. Mert lehet valakinek kapitalista gondolat világa anélkül, hogy kapitalista volna (sajnos milliók vannak ilyenek), ugyanugy lehet és sajnos vannak sokan, akik nem nácik, de gondolat világuk a nácizmus maszlagával van megmételyezve.

New yorki mozgalmunk nem volt elég erős ahhoz, hogy nagyobb megrázkódtatás nélkül elbirta volna ezeket a zavarokat amihez még hozzájárult az is, hogy a speciális magyar kérdésben is sulyos nézeteltérések támadtak közöttünk és igy ezeknek a bajoknak az eredménye az lett, hogy a hosszu évek óta tartó péntek esti gyüléseinket sem tudjuk megtartani. Habár néhányan a munkástársaink akik minden körülmények között, mint osztályharcos forradalmárok kitartanak lapunk mellett, megjelennek a helyiségünkben és igyekeznek a rájuk hagyott még nagyobb terhet erejükhöz mérten viselni. Ezek a munkástársak nem fognak megfutamodni, mert jól tudják azt, hogy a háboru sem tart örökké és inkább maradjon meg akármilyen, tegyük fel rossz és gyenge szervezett és sajtó mint semmisem. Jelentésemben nem akarom és nem is fontos az elvi magyarázkodást firtatni a háborus helyzettel kapcsolatban, hiszen erről hétről hétre irunk a Bérmunkásban és mindannyiunknak megvan már a határozott kiforrott véleménye, hogy tulajdonképpen mi is a forradalmi kötelességünk a jelen helyzetben.

Ilyen körülmények között megértik munkástársaink, hogy New York részéről semmiféle számottevő igérettel nem járulhatok önök elé, ami a Bérmunkás megjelenésére határozott biztositékkal szolgálna. Annyit azonban igérhetek, hogy mi néhányan akik ott állunk lapunk és az IWW mozgalma mellett, mindent elfogunk követni, hogy a new yorki mozgalom alapja továbbra is megmaradjon. Módot fogunk találni arra, hogy a helyiségünk továbbra is fentartva lehessen és ugyanakkor lapunk érdekében is amit csak munkás akarattal elérni lehet végrehajtsuk. Azt örömmel jelenthetem, hogy a Bérmunkás előfizetése New Yorkban soha nem volt ennyire rendben mint most. Ugyszólván lejárt eláfizetőink nincsennek, ami Feckó lapkezelő munkástársunk fáradhatatlan munkájának köszönhető.

A new yorki munkástársaink üdvözletét tolmácsolom a konvenciónak azzal a reménnyel, hogy dacára a nagy bajoknak, dacára a zavaros helyzetnek, az IWW magyar tagjai továbbra is kitartunk az ipari szervezkedés forradalmi utján, és mint osztályharcos munkások épugy mint eddig, a jövöben is teljesiteni fogják kötelességüket.

Az amerikai ujságokat hirekkel ellátó ügynökségek a háborus helyzet minden nehézségét leküzdeni igyekeznek, hogy az amerikai ujság olvasók továbbra is informálva legyenek a világeseményekről. Ezt a szolgálatot az **Overseas News Agency** (ONA kibővitette azzal, hogy hireit a magyar lapok részére magyar nyelven küldi meg. Ezen hirekből a Bérmunkás is közölni fogja azokat, melyeket olvasóink külföldi tájékoztatására hasznosnak talál. Az ONA polgári intézmény és ebbő a szemszögből adja ki hireit is.

A HÉT

(A washingtoni háborus információs iroda ebben a rovatban hétről-hétre közli a fontosabb eseményeket, amelyek az országban és az egyes frontokon történtek. A közleményt az iroda juttatja lapunkhoz)

A HÁBORU NEGYEDIK ESZTENDEJÉBEN

Ezen a héten töltötte be harmadik esztendejét Hitler háboruja, amit akkor bocsátott a világra, midőn 1939 szeptember 1-én betört Lengyelországba.

Minden idők legnagyobb fegyveres összeütközése most lép negyedik esztendejébe és azt kell látnunk, hogy az egykor oly félelmetes elnevezés, hogy "villámháboru" szinte nem is használatos már. Ha valaki emliti, szinte gunyosan hat. Hogy is hivhatnók a háborut, amely ugylátszik tovább fog tartani az 1914-18-as háborunál is, villámháborunak?

A háboru harmadik évfordulója szinte már megszokott helyzetet tár elénk. Mint 1940-ben, a németek egyre csak győznek, egyre ontják a gyilkolást és a pusztitást, egyre tüzögetik a horogkeresztet Európa földjének mindig több és több pontjára. Mégis a végsö, a befejező győzelem ma is elérhetetlen messziségben van számukra.

Igaz, a tengelyhatalmak még távolról sincsenek megverve. Ám, a hozzáértő katonai birálók véleménye az, hogy Németország helyzete kétségtelenül romlott 1940 óta. Japánnak, leghatalmasabb szövetségesének helyzete most van rosszabbodóban. Olaszország már romlásban volt akkor, amikor a háboruba vetette magát.

"Az ellenség hóditásai tehát — irja Walter Lippman — tért nyertek 1940 óta, kilátásai azonban rosszabbak. Mert ez alatt a két év alatt, a mi mai világunk történetének fordulópontja idején, megalakult az a hatalmas és kérlelhetetlen szövetség, melyhez mi is tartozunk. Ezentul ez a szövetség vezeti már a háborut és meg is nyeri, hogy kiharcolja jövőnk megformálásának jogát számunkra."

Sikerült Hitlernek, akit nemrég még lángelmének néztek, német honfitársai nagy megdöbbenésére, 29 nemzetet sorba állitani Németország és tengelyi szövetségesei ellen. Nyolccal többet, mint annak idején Vilmos császárnak sikerült az ő Németországa nyakára hozni. Az 1943-i Szövetséges Nemzetek öblében nagyobb az emberanyag, mint a tengelyhatalmaknál, nagyobb a természeti kincsek tömege és hisszük, az elszántság, a virtus is — a kemény győzelmi akarat.

"Diadalmas győzelmünk oly bizonyos, mint ahogy a nap fölkel", mondotta George C. Marshall tábornok, az Egyesült Államok hadseregének vezérkari főnöke, amikor a legfrisebb harci szövetségest, Braziliát üdvözölte.

A LÉGI ERŐDöK EURÓPA EGÉN

Uj árny sötétedett Náci-Európa fölé a mult héten. A nagy amerikai repülőgépek szárnyai terjesztették, a Légi Erődök. Hadseregünk legjobb nehéz bombázó gépei először ütköztek össze az ellenséggel, annak legkeményebb légi ellentállásával — és döntő győzelmeket sikerült kivivniok.

De az eddig is megállapitott nagy eredményeket még tul fogják szárnyalni a most készülő uj amerikai bombavetők. Az uj repülőgépeknek és azok gyártási terveinek részletei ma még nem nyilvánosak, de annyit el lehet mondani, hogy még nagyobb és még jobb bombavetők vannak készülőben. Ez a leghatahatósabb mód Németországot és Japánt a saját földjükön sujtani, — ez az utja annak annyira, megtörni őket, hogy azután sor kerülhessen az invázióra.

A HADVISELő BRAZILIA MOZGóSITÁSA

A hadviselő Brazilia siet a küzdelembe vetni bőséges ember és hadianyag készleteit, egész hatalmát a Szövetséges Nemzetek végső győzelmének szolgálatába dobja.

Brazilia gazdasági jelentősége számunkra nem kisebb, mint stratégiai és katonai ereje a Szövetséges Nemzetek harci készségének szolgálatában. Természeti kincsekben való gazdagsága szinte mesés, a Szövetséges Nemzetek hadiüzemeit mangánnal, mikával, kvarccal, ipari gyémántokkal, krómmal, vanádium-fémmel, növényi olajokkal, gumival látja el, valamint egyéb hadianyagokkal. Hosszu távu gazdasági megállapodások Brazilia és az Egyesült Államok között siettetik a gumi, a rostanyagok és egyéb hadikészletek nagyszabásu termelését, amiket azelőtt az ázsiai Távol Keletről szereztük be. Ez az együttmüködés nem csupán a háboru tartamára szól, hanem a háboru után is, szükségleteink fedezésére.

Brazilia a Nyugati Földteke második gyáriparos országa. Az elmult két évtized alatt, gyártó képessége hatalmasan kiterebélyesedett. A nehézipar, mint vas- és acélipar — a hadiipar alapja — sebesen fejlődött az utóbbi esztendőkben. A kormány egy repülőgépgyárat is helyezett üzembe. Manapság Brazilia azoknak a gyáripari termékeknek nagy részét, amit azelőtt Európából és az Egyesült Államokból hozott be, maga gyártja.

Információk a Vörös Keresztről

A Vörös Kereszt az emberiség egyik legnemesebb intézménye. Bátorsággal és odaadással mindenütt megjelenik, ahol szükség van rá, ahol szerencsétlenség történik, ahol a szenvedők jajkiáltása hallatszik. A háboru nagy tragédiájában — szimbolum, amelyet barát és ellenség egyaránt tiszteletben tart — fényt vet az elsötétült világra. A sebesült és beteg ismeri enyhitő balzsamát, a lerongyolt és az éhező: gyengéd gondoskodását. Mint minden igazán nagy ideál, a Vörös Kereszt alapeszméje is egyszerü. Háboru idején, a betegeket és sebesülteket gyámolitani, tekintet nélkül egyenruhájukra, zászlójukra. Az emberi szenvedések ellen hatalmas küzdelmében, nem ismer nemzetiségi, vallási, társadalmi külöbségeket.

A genfi nemzetközi Vörös Kereszt bizottság, 1864-ben történt megalapitása óta, változatlanul birja az egyetemes bizalmat. A Vörös Kereszt munkája pártatlanul folyik, tagjainak felügyelete alatt, akik valamennyien svájciak. Őrködnek afelett, hogy a kormányok tiszteletben tartsák a Vörös Kereszt megállapodásokat. A hadviselők Vörös Kereszt egyletei között ők közvetitik a levelezést. Ők közvetitik a hadifoglyok és polgári internáltak jegyzékét is.

A nemzetközi Bizottság kiküldöttei meglátogatják a táborokat, ahol hadifoglyokat és polgári internáltakat tartanak. Felülvizsgálják az állapotokat és a foglyokkal ellenőrzés nélkül beszélgethetnek. A beérkezett panaszok orvoslására vállalkoznak és igyekeznek a felelős egyéneknél, alkalmas és tapintatos közbenjárással a viszonyokat enyhiteni. Ha szüksége mutatkoznék, a Nemzetközi Bizottság maga tesz az illetékes kormányoknál hivatalos lépéseket.

1939. szeptemberében, a Bizottság, mint azt az előző háborukban tette, magára vállalta, hogy felujitja a hadifoglyokra vonatkozó felvilágositások közvetitését. Genfben van a Bizottság főhadiszállása, amely külömböző svájci kantonokban 20 fiókot tart fenn, az alkalmazottak százaival, önkéntes munkások ezreivel, naponta tizezerszámra érkező levelekkel és csomagokkal és irattárukban milliókra rugó hadifoglyok névsorával.

Óriási feladat a világ minden részén foglyul esettek részére érkező élelmiszer-, ruhanemü-, könyv és egyéb tárgyakat tartalmazó csomagokat kezelni. Erre a célra óriási szállító szervezetet kellett megteremteni. Vörös Kereszt teherhajók közlekednek Lisszabon és a Földközi Tenger kikötöi között. Több mint 6000 vasuti teherkocsi gördült már ki Genfből, több mint 12 millió csomaggal. Azokat a küldeményeket, amelyeket rokonok és barátok küldtek ismert foglyoknak, azonnal továbbitják. A foglyok közötti általános kiosztásra szánt csomagokat időnként küldik szét.

A Nemzetközi Bizottság munkáját minden háboru megnöveli. Eredeti feladata háboru idején a betegek és sebesültek ápolása volt és csak nemrég teremtették meg a hadfoglyokra vonatkozó felvilágositások csere-hivatalát. Ma, ezeken a feladatokon kivül, a Bizottság magára vállalta az elesett és eltünt katonákra vonatkozó felvilágositások közvetitését, bénák kicserélését, az olyan hadifoglyoknak semleges országokba való szállitását, akiknek más éghajlat alatti orvosi kezelésre van szükségük, polgári elhelyezését, akiket hadi zónákból eltávolitottak, háboru elől való tömeges menekülők felkutatását, eleség, ruhanemü és orvosszerek polgárok közötti kiosztását és még sok más feladatot.

Hogy háboru idején mindezt elvégezhesse, békében is tevékeny a Vörös Kereszt. A nemzetek lelkiismeretében élve kell magát tartania. Amerikai javaslatra, a világháboru befejezése után a Vörös Kereszt egyletek ligáját alapitották meg. Két célja volt a lépésnek: a közegészségi viszonyok megjavitása és hatékony szolgálatról való gondoskodás szerencsétlenségek idejére.

A liga révén, amely a Nemzetközi Bizottságtól független intézmény, az egyes nemzetek Vörös Kereszt egyletei olyan nemzetközi tevékenységekre és felvilágositások kicserélésére vállalkoztak, amelyek a Nemzetközi Bizottság hatáskörén kivül esnek.

A Vörös Kereszt minden országot összehoz. Ma az egyetlen kötelék a szétvált nemzetek között. Elveit mindenki helyesli. A kormányok ismerik célját és szándékait; igyekeznek tiszteletben tartani őket. A szerződéseknek nemcsak betüit, de szellemét is. A bizalom, amellyel a Bizottság iránt viseltetnek, a legszebb elismerés.

E tények reményt nyujtanak a jövőre is. A Nemzetközi Bizottság elnöke, Dr. Huber Miksa szavai szerint: "A Vörös Kereszt megteremtése nemcsak a maga humanitárius birodalmában volt korszakalkotó. A nemzetközi jogot olyan utakra vezette, amelyek távol visznek attól a területtől, amelyre a Vörös Kereszt épült: a háborutól; a Vörös Kereszt megalapitása tehát magának a háborunak végső megszüntetésére vezethet. A háboru humanizálása az első lépés ezen az uton."

(Public Information Service)

Agitáljon a Chicago-Millwaukee kerületi sajtóünnepélyre, mely szeptember 13-án lesz.

Az IWW vas és fémipari szervezetének (I.U. 440) clevelandi osztálya rendes havi tagsági gyülését szeptember 11-én, pénteken este 8 órai kezdettel tartja 1426 W. 3rd St. (Blackstone Bldg., Room 311). A szervezet magyar tagjait ezuton is meghivja

a titkár.

HOLLANDIA UJ NÁCI GYARMATAI

Zürich, aug. (ONA) Hollandiát a balti országokkal és a keleti területekkel fogják kárpótolni elvesztett kelet-indiai birodalmáért, — jelentette ki Anton Mussert hollandi náci vezér, lapjának, a "Volk en Vaterland"-nak most ideérkezett számában megjelent vigasztaló cikkében.

"A keleti területek kárpótolnak majd Kelet-India elvesztéséért" mondja cikkében és annak a német tervnek támogatására szólitja fel honfitársait, amely szerint három millió hollandit telepitenének majd a meghóditott keleti területekre, ütközöül Németország és a szláv népek közé.

A holland náci, noha támogatja ezt a tervet, mégis aggodalmát fejezte ki azon, hogy a "közlekedés holland és német kapitalisták között egyre erősebb" és hangoztatta, hogy "a küzdelemnek marxizmus és kapitalizmus ellen, még egy évtizedig tovább kell folynia".

Vezető szerepet igért követői számára a háboru utáni Európában, a tengelyhatalmak győzelme után, kifejtvén, hogy "a vezető réteg a németekből, hollandokból, svédekből, norvégekből és dánokból keveredő 150 milliónyi germán népközösség lesz Hitler vezetése alatt".

Mussert nem tett emlitést arról, micsoda szerep jut majd Németország szövetségeseinek, Olaszországnak, Magyarországnak és Finnországnak ebben az uj rendben.

JEGYRE MEGY A BURGONYA IS BUDAPESTEN

Bern, aug. (ONA) A burgonya fogyasztást is racionálni kellett Budapesten, a ma ideérkezett magyar lapok szerint, mert a burgonyaszüret igen gyengének igérkezik.

A hosszu szárazság és a forró időjárás a burgonyatermés legnagyobb részét kiégette és a szállitmányok már ma sem elégségesek a főváros ellátására.

Az idei gabonatermés előzetes becslései alacsonyabb termést igérnek a tavalyinál, mert a vetési területek, a katonasághoz való behivások miatt megcsappantak. Árpában jobb termést várnak az 1940-esnél, de jelentékenyen alatt fog maradni az 1939-es termésnél.

Ide érkezett értesülések szerint Németország akkora burgonyaszüretet vár, hogy tartalékot is tehet félre, nem hiszik azonban, hogy a német feleslegből enyhiteni fogják a magyar burgonyainséget.

OROSZ REPÜLŐ SZÖKÉSE NÉMET FOGSÁGBÓL

Moszkva, aug. (ONA) Vasziljov hadipilóta német repülőgépen megszökött német fogságból és az orosz fővárosba érkezve, elmondta vakmerő kalandjának részleteit.

A fogolytáborban a közemberek közé keveredett, mert rongyolt egyenruháján nem viselt rangjelzést. Tizenegy társával együtt a közelben lévő repülőtér takaritásával és rendbentartásával bizták meg. Hetekig dolgozott ő és társai már a repülőtéren, az őrök végül megszokták őket és nem igen szorosan vigyáztak a rongyos, csontig lesoványodott emberekre. A térről naponta szálltak fel bombavető gépek, hatalmas bomba-teherrel. Egy nap az egyik bombavető gép hátramaradt. A személyzet éppen közeledett feléje, mig a pilóta utasitásait vette át. Vasziljov tizenegy társával rávetette magát az indulásra kész gépre, fölugrottak rá, a bombavető megmozdult, majd végiggurult padlóján és a levegőbe emelkedett. A németek puskával lövöldöztek utána, később az elháritó ágyuk is megszólaltak, de a gép magasban volt és szerencsésen megmenekült.

Vasziljov hátborzongató dolgokat mondott el az orosz hadifoglyok sorsáról a németek kezében. 15.00 fogoly volt abban a táborban. A napi ellátás százötven gramm kenyér és két liter viz, más semmi. Semmiféle egészségi intézkedés, latrina nem volt. Tömegesen betegedtek meg kiütéses tifuszban. Aki megbetegedett, azt egy gunyhóba dobták, étel, viz, ápolás nélkül és éjszakánként szedték ki a halottakat a kunyhóból horgos ruddal. Senki abból a kunyhóból vissza nem került a fogolytáborba.

POROSZOK NEM

London, aug. (ONA) A háboru után következő világrendezésben a németek is résztvehetnek majd a többi nemzetekkel együtt — mondotta Ján Massaryk csehszlovák külügyminiszter a Szakszervezetek Országos Klubjában tartott előadásán, — "a poroszokat azonban távol kell majd tartani".

GYARAPODIK A NAVY HATALMA

E héten vizrebocsátották a 45.000 tonnás Iova csatahajót, a leghatalmasabbat, ami valaha is elhagyta az Egyesült Államok hajógyárait, aztán az Independence repülőhordozót, a Boston cirkálót és két torpedórombolót, a Glennon-t és a Jefers-t.

Chicago-Millwaukee kerületi sajtóünnepély szeptember 13-án lesz. Bővebb információért keresse e lapban elhelyezett közleményt.

BÈRMUNKÂS

MAGYAR NYELVŰ LAP AZ IPARI UNIONIZMUS SZOLGALATABAN

Entered as second-class matter at the Post Office, at Cleveland, Ohio under the Act of March 3, 1879

VOL. XLI. ÉVFOLYAM CLEVELAND, 1954. OCT. 1 NO. 1849 SZÁM

Szakszervezeti egység

MILYEN EGYSÉGET AKARNAK A SZAKSZERVEZETI VEZETŐK. — EGYSÉG A MUNKÁLTATÓKKAL, — HANGOZTATTÁK AZ AFL ORSZÁGOS KONVENCIÓJÁN

LOS ANGELES — Az American Federation of Labor Los Angeles városban tartott országos konvencióját az "egység" szelleme uralta. Már a konvenciót megnyitó beszédében bejelentette a szervezet elnöke, George Meany, hogy az AFL és a CIO egyesülésének megvalósulása sokkal közelebb van, mint az átlagos ember gondolná.

A Konvenció második napján nagy tapssal fogadták a CIO elnöke, Walter Reuther azon levelét, amelyben azon reményének adott kifejezést, hogy a két nagy szakszervezett közötti egyesülés hamarosan meg fog valósulni.

Az AFL vezetői azonban félre nem magyarázható módon mondották, hogy csak azon **munkásokat akarják bevenni az általuk irányitott "egységes" szakszervezetekbe, akik a munkáltatókkal való kooperáció elv alapján állnak.** Vagyis a munkás és a munkáltató osztályok közötti ellentétet felismerő munkásokat ki akarják rekeszteni a szakszervezeti mozgalomból.

Az acélgyári munkások szervezetének az elnöke, David J. McDonald, még ennél is tovább megy. Az Atlantic Cityben tartott konvenciójukon kijelentette, hogy "uj unionizmusra" van szükség, mert most már ugy az AFL, mint a CIO elavultak. McDonald "uj unionizmusa" abból áll, hogy a **unionok vásároljanak partnerséget az iparvállalatokban, mert abban az esetben, — mondja McDonald, a munkásokat nem csak a béreik, hanem a profit nagysága is érdekelné.**

McDonald "uj unionizmusa" tehát a munkáltatók profithoz való jogát a jelenlegi állami hatalmon kivül még a munkások szervezett hatalmával is alá akarja támasztani. George Meany és Reuther azonban még nem jutottak el ily messzire, megelégszenek azzal, hogy ők csak a munkásokat szállitó intézményekké akarják tenni a unionokat.

A konvenciót figyelmeztette W. R. Metheral kanadai delegátus, hogy a világ ujabb ipari forradalmon megy át és a unionoknak ahoz kell alkalmazkodni.

Tító ujabb pálfordulása

A JUGOSZLÁV KORMÁNY NEM AKAR RÉSZTVENNI AZ ATLANTI SZÖVETSÉGBEN. — TITÓ UJRA KÖZELEDNI AKAR A SZOVJETUNION FELÉ. — KOMMUNISTÁNAK MONDJA MAGÁT.

BELGRÁD — Európaszerte nagy meglepetést okozott Tító, jugoszláv miniszterelnök beszéde, amelyben a legnagyobb határozottsággal jelentette ki, hogy Jugoszlávia nem fog a Dulles által tervezett és jelenleg előkészületben álló Atlanti Védelmi Szövetség tagjává lenni. Az amerikai külügyminiszter ugyanis a franciák ellenállásán csufosan elbukott "Eurpoean Defense Community" (EDC) helyett egy ujabb kommunista ellenes szövetség étrehozásán fáradozik.

Tító az előre beharangozott beszédét Jugoszlávia felszabaditásának 10 éves évfordulójával kapcsolatos ünnepélyen mondotta. Emeli a beszéd fontosságát, hogy **Tító három nappal megelőzőleg hosszas tanácskozást folytatott Dulles egyik asszisztensével, Robert Mulphyval.**

Tító kijelentette, hogy nem fog résztvenni a "kommunizmus elleni küzdelemre összehozott szövetségben", mert Jugoszlávia nem ellenzi a kommunizmust sőt éppen ellenkezőleg, szocialista ország, amelyben a kommunizmus felé haladnak. Jugoszlávia csak a Szovjetunion beavatkozása ellen tiltakozott. Most azonban már másképpen beszélnek a Szovjetunionban, engedményes hangokat hallatnak. **A jugoszláv kormány nagy örömmel fogadja ezen közeledését és várja, hogy a beszédet a Szovjetunion tettekkel is alátámassza.**

Ez nyilvánvaló bejelentése annak, hogy Tító vissza akarja állitani a népi köztársaságokkal azt a barátságos viszont, amit 1948-ban megtört, midőn szakitott a "Cominform" irodával.

HIRSZEMLE

HIREK, AMIKET ÉRDEMES TUDOMÁSUL VENNI

New York — Az Egyesült Nemzetek általános gyülésén az Egyesült Államok ujból megakadályozta, hogy a világ legnépesebb országát, a Kinai Népköztársaságot felvegyék a tagok sorába, illetőleg a Peiping kormányt ismerjék el a kina inép képviselőjének a Chiang Kaishek nemzeti kormánya helyett.

A Kinai Népköztársaság elismerésére a szovjet delegáció vezetője, Vishinsky tette meg az ajánlatot, mire Henry Cabot Lodge, az amerikai delegáció feje azonnal "ellen ajánlatot" tett hogy ezzel a kérdéssel ebben az évben ne foglalkozzon az Általános Tanács. Miután az Egyesült Nemzetek kisebb országai az amerikai kivánságnak megfelelőleg szavaznak, a Lodge ajánlatát fogadták el 43 szavazattal 11 ellenében. A népi köztársaságokon kivül csak India, Burma, Norvégia, Dánia és Svédország mertek az amerikai javaslat ellen szavazni. A jugoszláv delegáció szintén a népi köztársaságokkal szavazott.

—

Gifu, Japán — (AP riport). A japán biróság 5 évi fegyházra itélte a Roanoke, Va. városba való Clarence J. Butler amerikai tengerész-katonát (marine), mert az erőszakot vett, majd ugy megsebesitette a 73 éves Kintue Iwana japán asszonyt, hogy a belehalt sebesülésébe.

—

Washington — Az Egyesült Nemzetekhez tartozó "Food and Agricultural Organization" értesitette a Kewane, Ill. városban lakó Gordon McIntire nevü volt hivatalnokát, hogy 15 havi fizetésére kiutalt a részére 11,000 dollárt. McIntiret maga elé idézte az amerikai loyalty bizottság, miután valaki "kommunista szimpátiával" vádolta. McIntire, hivatkozva alkotmányos jogaira, megtagadta a választ a szokásos ugrató kérdésekre, mire elcsapták hivatalából. A Genfi Nemzetközi Biróság azonban ugy döntött, hogy McIntire jogosult hároméves szerződéses állásához, mire inkább kifizették a még hátralévő 15 hónapi fizetését, mintsem visszatették tisztségébe. — Ez mutatja, hogy az Egyesült Nemzeteket mennyire uralja az amerikai boszorkányüldöző társaság.

—

Tokyo — A Peiping rádió leadása szerint a Kinai Népköztársaság Kongresszusa uj alkotmányt fogadott el. Az uj alkotmány valamivel több hatalmat helyez az elnöki tanács s annak elnöke kezébe, mint az előző, — mondja az Associated Press riport.

Ezen jelentés szerint a kongresszus több mint ezer tagja nagy lelkesedéssel szavazta meg az uj alkotmányt, amelynek elfogadása után felhangzott a "Wan Sui" kiáltás, ami a magyar "éljen" kiáltásnak felel meg. (Valójában azt jelenti, hogy "éljen 1000 évig")

—

San Francisco — Az amerikai lapok riporterei megrohanták a Kinai Népköztársaságból hazatérő utjában ideérkezett Clement Attlee, volt labor party angol miniszterelnököt, hogy olyan nyilatkozatokat csikarjanak ki tőle, amit Kina ellen lehetne felhasználni. Attlee azonban csak egy igen rövid, irásba foglalt nyilatkozatot olvasott fel, amelyben felhivta az amerikai nép figyelmét arra a tényre, hogy Kina egyike a világ legnagyobb, legnépesebb országainak, amelynek civilizációja is a legrégibb s igy ennek az országnak s népnek a világ más népei közül való kisajátitását teljesen lehetetlennek tartja.

—

Tokyo — A Peiping rádió leadása szerint az indokinai francia csapatok a fegyverszünet megkötése után, amikor kivonultak Viet-Nam középső részéből minden ok nélkül megöltek 74 indokinai polgárt, 56-t pedig sulyosan megsebesitettek.

Erre a tömegmészárlásra állitólag az adott okot, hogy a megbüntetett falvakban régebben élelmiszert adtak a guerilla csapatoknak.

—

Santiago, Chile — Chile állam kormánya ostromállapotot hirdetett ki, ami Carloz Ibanez elnök kezébe csaknem teljesen diktátori hatalmat helyez.

A kormány azt hirdeti, hogy az ostromállapot kimondását a "kommunisták zavargása" tette szükségessé. Ezzel szemben maga az Associated Press jelenti, hogy Chile legfőbb iparában, a rézbányákban sztrájkba mentek a munkások, mire a munkáltatók és a politikusok azonnal rájuk sütötték a "kommunista" bélyeget. Ezen nem is lehet csodálkozni, hiszen a chilei rézbányák az amerikai Anaconda Cooper Mining Co. tulajdonát képezik, természetes tehát, hogy sztrájk esetén AMERIKAI MÓDSZERT alkalmaznak.

Az utolsó Ipari Forradalom

Pár hónappal ezelött az amerikai sajtó egyszerü napihir gyanánt adta az olvasók tudomására, hogy a Studebaker automobil gyár egyesült a Packard kompániával. Nem sokkal azután jött a hir, hogy hasonló módon egy vállalattá egyesültek a Nash és a Hudson kompániák, majd a Kaiser-Frazer és a Willys autógyártó cégek is.

Miután van valami igaz azon állitásban, hogy a jólfelszerelt, legmodernabb gépekkel dolgozó gyárak jóval olcsóbban állitják elö termelvényeiket, mint a kisebbek, amelyek képtelenek megszerezni az igen költséges uj gépeket, az ily ipari egyesüléseket (merger) az amerikai nép még talán örömmel is fogadta, remélve, hogy az autóipar ily átszervezése után majd olcsóbban vásárolhat automobilokat.

A csupán csak gazdasági kérdésekkel foglalkozó "The Brooking Institution" azonban azt jelenti, hogy minden más iparban megindultak és folyamatban vannak a hasonló csatlakozások és összevonások. Nyilvánvaló tehát, hogy az iparok jelen tendenciája a kisebbek kiszoritása. Ezt részben az egyesülés révén érik el, de ahol a kis iparvállalatok erre képtelenek, ott a nagyok egyszerüen felszivják, vagy pedig megfojtják azokat.

Az iparok fejlődését tanulmányozó ekonomisták jól látják, hogy jelenleg **EGY UJABB IPARI FORRADALOMNAK VAGYUNK A SZEMTANUI.** A történelemben már több ilyen ipari forradalmat jegyeztek fel. Ezeknek elseje a 18 és és a 19-ik század fordulójára esik, amikor megkezdték az iparok gépesitését. Ennek szintere időrendben Anglia volt, ahol a szövőipar forradalmával megszületett a mai tőkés termelő rendszer.

A TÖMEGGYÁRTÁS

A második ipari forradalmat a gőzgép (a vasut) uralma jellemzi. És miután az ily gépekhez már nagyon sok acél kellett, a kapitalizmusnak ezt a fázisát acél-kapitalizmusnak nevezték el az előző textil-kapitalizmussal szemben.

A harmadik ipari forradalmat a belső robbanásu gépek, — amiket az olaj valamelyik terméke hajt, — tették lehetövé. Azért ezt a korszakot az olaj-kapitalizmus néven emlitik. Ez tette lehetővé az igazi tömeggyártás kifejlődését. És mint minden fejlődésnél, ugy itt is áll az a természeti törvény, hogy az ipari forradalmak egyre gyorsulóbb tempóban következtek be. Amig a kapitalizmus első fázisa közel száz évig tartott, a másodikra, amely az elsö világháboru utáni évekig számitható, már körülbelül csak 50 év jutott.

A harmadik korszakra már alig adhatunk három évtizedet, noha az olaj végleges kiküszöbölése az atomenergia felhasználása révén még jó távol van. Mi okozza tehát a jelenlegi ipari forradalmat? A gazdasági szakértők állitása szerint az iparok egészen uj **AUTOMATIKUS** berendezése. Az utolsó pár év alatt ugyanis a technika annyira fejlődött, hogy rendkivül sok olyan munkát tudnak automatikus gépekre bizni, amelyeket azelőtt csak szakképzett munkások végeztek.

ÖNMÜKÖDŐ GÉPEK

A legutóbbi szaklapok hirei szerint az esztergapadtól kezdve a furógépekig mindenféle más megmunkáló gépekkel egyetemben automatikussá tehetők, vagyis ugy be lehet állitani, hogy az elsö darab munka elkészitése után önmüködően, — munkás nélkül, — késziti a többi másolatokat, akárhány ezret, ha kell. A tömeggyártásnál géprészekből igen sok azonos darabra van szükség.

A CIO elnöke, Walter Reuther Labor Day napján Windsor, Ont. városban beszélve már rámutatott arra, hogy mit is jelent az ipar ily nagymérvü automatikussá tétele. "Amig eddig 24 munkaóra kellett egy engine-block elkészitéséhez, most az automatikus gép 14 és fél PERC alatt késziti el és egy munkás több ilyen gépre "ügyelhet", — mondotta Reuther. Az ily automata gépek az okai annak, hogy az autólparban oly sok munkást tettek le, — tette hozzá.

Reuther folytathatta volna ezen uj ipari forradalom következményeinek a felsorolását legalább azzal, hogy lám a Studebaker Co. munkásai "önként" leszállitották a munkabéreket, hogy a gyár versenyezni tudjon a Ford, a General Motors és egyéb nagy, már automatikus gépekkel rendelkező cégekkel. Ugyanezt tették a Willys alkalmazottai is és most már egyre-másra jönnek a jelentések, hogy a textil és más iparokban is a munkások "önkéntesen" leszállitják a béreiket.

"önkéntesen" szállitják le saját béreiket, amikor a drágaság még egyre emelkedik, mert ha nem egyeznek bele az alacsonyabb bérekbe, akkor állitólag lezárnák azon gyárakat, amelyekben dolgoznak. És igy mi lesz? — kérdezhetjük, ha egyre több és több árneikket tudnak termelni, de ugyanakkor a munkásosztály vásárló ereje csökken?

DEPRESSZIÓ VAGY HÁBORU

A politikai propagandával nem törődő gazdasági szakértők válasza erre a kérdésre egy igen rosszhangzásu szó: **DEPRESSZIÓ.** A politikus nemzetgazdászok azonban gyakorlatból tudják, hogy azt el lehet kerülni egy jókora **HÁBORUVAL.**

A jelenlegi ipari farradalomnak tehát a következménye depresszió, vagy háboru. Tessék választani! De mindkét esetben felmerül a kérdés: **ÉS AZTÁN?** Mert a háboru vagy depresszió csak ideiglenes megoldást adnak.

És végre szóvá kell tennünk azt is, hogy miért van oly nagy szükség erre a legujabb ipari forradalomra? A válasz igen egyszerü: azért, mert a kollektiv termelésre áttért országok rohamosan fejlesztik iparaikat, azokban is folyamatban van az automatizálás. Ott is egyre jobb, egyre tökéletesebb gépeket alkalmaznak. És végre, ami a legfontosabb, a kollektiv termelő országokban szinte egy csapásra keresztül vitték az iparok egyesitését. Ott minden ipar már igazi nagy, az egész országra kiterjedő vállalat, amely **EGYSÉGES VEZETÉS ALATT ÁLL.** A kis gyártelepek oly egyesitése, aminek itt most tanui vagyunk, ott megtörtént, ott az alapját képezi az uj termelési rendszernek, azért és csakis azért fejlődhetnek az iparok oly rohamlépésben.

A tőkés sajtó rendkivül irigységgel jelenti, hogy a németországi Leipzig városban tartott ipari kiállitáson a népi köztársaságok igen sok exportálásra szánt gépet mutattak be. Az oroszok és a csehek nagyszerü automobilokat, szövőgépeket és igen finom tudományos eszközöket kináltak exportra. A kinai, a svéd, a svájei és egyéb ipari kiállitásokon is nagy feltünést keltettek a népi köztársaságok az exportra kinált áruikkal. A tőkés termelő világot tehát az a veszély fenyegeti, hogy elveszti a világpiacot, ha kivitelre szánt cikkeinek árait nem szállitja le. Ez a legfőbb rugója az amerikai iparok gyors automatizálásának.

A FEJLŐDÉS MENETE

Az eddigiekből azonban azt a konkluziót kellene levonni, hogy ha az iparok ily automatizálása Amerikát a depresszió vagy az ujabb háboru felé viszi, akkor ugyanezen jövő előtt állnak a népi köztársaságok is. Ez a konkluzió azonban helytelen lenne, mert a tőkés és a kollektiv termelés tisztán csak a profitra történik, az automatizálás révén ott a munkások, — tehát a fogyasztók nagy tömegének vásárló képessége esik; a kollektiv termelésnél azonban kiküszöbölték az egyéni profitot, minél többet termelnek, annál több jut minden termelőnek, vagyis a munkástömegek vásárló képessége nemhogy esne, hanem éppen ellenkezőleg emelkedik.

Éppn a két termelés közötti ezen nagyon lényeges különbség hozta létre a kollektiv termelési rendszert, amely a termlési rendszerek fejlödésében az előrevetett lépést jelenti, — olyan lépést, melyen át fog menni a termlés az egész világon. Mintahogyan a rabszolga rendszert követte a feudalizmus, azt pedig a kapitalizmus, ugy ezt is követni fogja a kollektiv termelés széles a világon minden háboru és minden depresszió dacára is.

Ezt a természeti törvényt mutatja be az iparok jelenlegi nagy központositása, a gyári gépek automatizálása; szóval a jelenleg szemünk elött folyó **NAGY IPARI FORRADALOM,** melyben csak kis buborék az a háborus uszitás és csetepaté, amivel a fejlődés folyamatát megakadályozni akarják.

Amerikában fogott kinaiak

Az amerikai sajtóban elég gyakran hallottuk a panaszt, hogy a Szovjetunion, vagy valamelyik népi köztársaság nem enged haza amerikai polgárokat, mert kémkedés, vagy valamiféle bünügygyel hozzák őket kapcsolatba. Ugyanez az amerikai sajtó eddig nagy titokban tartotta, hogy az Egyesült Államok nem engedi vissza Kinába azt a több mint kétezer kinai diákot, akik a jelenlegi krizist megelőzőleg tanulni jöttek az amerikai egyetemekre.

Ezen kinai diákok, — akiket a szó szoros értelmében hadifoglyoknak tartanak, — most végre nyilt levelet intéztek Eisenhower elnökhöz, kérve, hogy engedjék őket szülőházájukba, ahonnan törvényes kretek közepett jöttek ide s végezték el tanulmányaikat, igy most már vissza akarnak menni családjukhoz, szeretteikhez. És ha már nem engedik vissza, legalább mondják meg, hogy micsoda jogon fogják őket az Egyesült Államokban, holott semmiféle bünt sem követtek el.

A csak néhány liberális lapban közzétett nyilt levélből idézzük az alábbi sorokat.

"Mi, ezen levél 19 aláirója, akik több ezer kinai diákat képviselünk s akik már több évet töltöttünk az Egyesült Államokban a tudomány valamely ágának tanulmányozásában az ország különböző fölskoláln, tisztelettel kérdezzük az amerikai hatóságokat, hogy miért nem engednek bennünket haza, szülőföldünkre? Vannak közöttünk olyanok, akik már családapák, ezeket elválasztják feleségeiktől, gyermekeiktől; másokat szüleiktől, jegye-

TOLLHEGYRŐL

PÓTLÉKOK

Az első világháboru idején és valószinü, hogy fokozott mértékben történt ez a második világháboruban, hogy Európában minden olyan közszükségleti árucikket, amelyből hiány volt, valamiféle uj kitalált utánzattal pótolták. Végül már a lakosság majdnem minden élelmiszernek csak a pótlékát használta. Sőt, amikor már az ilyen "pótlékhoz" szükséges anyag is kifogyott, akkor kitalálták a pótlék pótlékát is.

Kávé, tea, cukor, liszt, hus, dohány, sőt stb., pótlékok voltak forgalomban. A kormányok "tudósai" kik a pótlékok feltalálásával jól kerestek, közölték a pótlékok használati módját és lelkesen magyarázták, hogy ezzel éppen oly jóizüek, de sokkal egészségesebbek az élelmiszerek.

Persze a gazdagok nem nagyon vették ezeket a pótlékokat igénybe, nekik módjukban volt megvásárolni a valódi élelmiszereket, csak az isten adta nép volt kénytelen ezeket a förtelmeket fogyasztani. Annyira, hogy végül már ők is csak a pótlékai voltak az eredeti mivoltuknak.

Valahogy ez jutott eszembe, amikor a mi nagyon aktiv ide-oda röpdöső külügyi államtitkárunk tevékenységét figyelem. Mr. *Dulles* tagadhatatlanul minden elképzelhetőt elkövet, hogy valahogy el ne muljon az emberiség feje fölül az atom-hidrogénbombás harmadik világháboru veszélye.

Ha a szövetséges kormányok visszautasitják a nagyon brutális, már egyáltalán takargatni nem lehetséges, háborus terveit, ugy rögtön gondoskodik valami pótlásról és nagyon lelkesen magyarázza azt, hogy ez a pótlék éppen olyan jó és alkalmas mint az eredeti. Nem rajta mulik az, hogy az amerikai nép, amelynek fizetnie kell a számlát pénzben és vérben, mindnagyobb mértékben kezdi belátni, hogy ugy az eredeti, mint a póttervek, veszedelmesen rosszak, veszélyeztetik nem csak a vörösök, de az egész világ, beleértve Amerika életét, vagyonát és az egész emberi civilizációt is. Hogy ez a felismerés mikorra érik meg annyira, hogy leszállitja a repülőgépről a halálkereskedők főügynökét, az még bizonytalan, mert itt ma még csak egy maroknyi bátor ember van, akik szerény eszközökkel hirdeti nem azt, hogy a társadalmi rendszerek között fenálló különbségeket nem hidrogénbombával, hanem békés megegyezésekkel kell megoldani. Hogy nem az dönti el, hogy melyik rendszer jobb az emberiségnek, hogy melyiknek van több atombombája, hanem az, hogy melyik rendszer tud a népeinek szebb és boldogabb életet biztositani. De a tőke bértolnokai, politikusai még ma is vadul és mind vadabbul uszitanak a háborura. Közben a legbrutálisabban fasizálják ezt az országot is, tiporják el az ország évszázados szobadságjogait. Viszik az országot a teljes rendőrállam felé, ahol már ma is mindenkit megfélemlitenek, hogy temetői csend legyen.

Ahol senki se merjen, alkotmányra, szabadságjogokra hivatkozni, hogy aki kinyitja a száját, az csak lelkesedni tudjon Mr. Dulles eredeti és pót háborus terveiért.

SOROZATOS KUDARCOK

Sehol a világon, csak itt a "demokrácia hazájában", lehetséges az, hogy a kormány, melynek rengeteg pénzbe kerülő politikájának a folyamatos kudarca után, még a helyén maradjon és uj pótlékokkal próbálja a kudarcait takargatni.

Ha a kormányunk őszinte akarna lenni, akkor nyiltan be kellene ismernie azt, hogy a háborus politikánk megbukott. A szövetségeseink, amelyeket éveken keresztül pénzeltünk, mind jobban ellentállanak a terveinknek és mind több ország áll ellent, helyezkedik szembe az amerikai politikával.

Már a koreai kudarc megmutatta, hogy megváltoztak az idők és ha csak nem akartak teljes szakitást a szövetségesekkel, akkor megegyezéssel be kellett szüntetni az oktalan vérontást és megkötni, ha nem is a békét, de legalább a fegyverszünetet.

A második kudarc Genfben érte a Dulles politikát, ahol minden erőfeszités dacára sem sikerült az indokinai háborut nemzetközivé tenni. Egyrészt mert Anglia visszautasitotta a genfi értekezlet felrobbantását, másrészt az ázsiai államok leghatározottabban szembeszálltak a háboru kiterjesztésének a tervével. Végül a francia nép nyomására a parlament leszavazta, megbuktatta a háborus kormányt és olyan kormányt kényszeritett ki, amelynek a fő programja az indokinai háboru záros határidőn belül való megszüntetése volt. Igy elvetve az amerikai tervet, létrejött a 8 éves háboru befejezése. Be lett igazolva, hogy egy kis jóakarattal, kölcsönös engedményekkel, meg lehet oldani az ellentéteket.

Huszonnyolc hónappal ezelőtt határozta el hat európai kormány, hogy feladja az önállóságát, megalkotja az Egységes Európai Hadsereget, amelynek a gérince az uj német hadsereg lenne. Eszerint a terv szerint, sem a parlamentek, sem a kormányok nem rendelkeztek volna a hadseregükkel, afelett a főparancsnokság rendelkezett volna. Ez a "védelmi" hadsereg terve, nagy tetszést váltott ki az amerikai kormánynál, készséggel vállalta, hogy a felszerelés költségeit viseli.

Ez a terv nagy ellentálást váltott ki különösen Francia és Olaszországban, mert nyilvánvaló volt, hogy a legvakmerőbb háborus provokációt jelentette volna. Az ellentállás oly erős volt, hogy Mr. Dulles minden rábeszélése és ultimátuma dacára sem merték azt a francia és az olasz kormányok jóváhagyása végett a parlament elé terjeszteni. Most a francia kormány — amerikai nyomásra — dacára, hogy a kormány nem tette magáévá, a parlament elé vitte, ahol nagyon röviden elbuktatták az egész tervet ugy, hogy véglegesen elbukott annak a lehetősége, hogy Európa népeit akarata nénkül bele lehessen rántani a harmadik világháboruba.

Most Mr. Dulles megint röpköd és igyekszik egy pótlékot összehozni, amellyel ha szegényen is, pótolni lehetne az elbukott kedvene tervét és mégis meglehetne teremteni ujra, a csak pár éve levert német militarizmust.

Ez a pót-terv is elbukott a francia ellenálláson. Most egy terven dolgozik, amely a pótlékot pótolná, amelyben segit Mr. Dullesnak az angol kormány is. Mert az a "veszély" fenáll, hogy az egész európai szövetkezés összeomlik.

Az ázsiai szövetség pót-terve sem sikerült. Abban az ázsiai országok nem voltak hajlandók kettő kivételével résztvenni és a pótlék pótléka, amit elfogadtak, csufos kudarc volt, mert egyrészt kizárták belőle Amerikai két hüséges kitartottját, a dél-koreai kormányt, valamint a Formosa szigeten meghuzódó Chiang bandát. Másrészt pedig nem sikerült egy fegyveres szövetséget létrehozni, csak egy tessék-lássék kitételt, hogy egy "támadás esetén tanácskozni fognak" nem pedig koreai módra háboruskodni.

A határozat amely se hideg, se meleg, csak egy látszat szövetség. Elvetik az ázsiai legfontosabb országok és tiltakoznak, hogy Ázsia ügyeibe Ázsián kivüli országok beavatkozzanak.

A kinai ügy sem megy Mr. Dulles tervei szerint. Nem csak mind több ország veszi fel vele a diplomáciai összeköttetést, de ma már a Nemzetek Szövetségében is többsége van annak a tervnek, hogy onnan a saját magát képviselő Chiang társaságot kiakolbólintsák és helyére a kinai nép valódi képviselőjét ültessék.

Ezt a tervet ma már a Skandináv államok, az ázsiai és arab országok is támogatják, ugy, hogy a többség, Amerika minden ellenzése dacára biztositva volna. Hogy ne érje Amerikát teljes kudarc, megint Anglia siet a segitségére, amely ugyan maga is az elismerés mellett van, de azt a Nemzetek Szövetsége következő ülésére akarja átteni. Valószinü, hogy ezt a pótlékot sikerül keresztülvinni, de ez is azt mutatja, hogy a nagy kapitalista terv, — hogy világháboru árán próbálják megállitani a haladást — összeomlóban van. Ma már nem csak a világ népei, de ezek nyomására mind több kormány is nyiltan vagy burkoltan, szembe áll az amerikai háborus készülődésekkel és rákényszeriti Mr. Dullest, hogy pótlékokkal, sőt potlékok pótlékairól kelljen gondoskodnia.

MARAKODÁS A KONCÉRT

WASHINGTON — Az "American Public Power Association" —a bankárok azon csoportja, amely villany és gáz erőmüvekből huz igen nagy profitot, — ellenzi az Eisenhower adminisztráció azon rendelkezését, hogy az Atom Energia Bizottság privát társulattal épittessen uj villanyfejlesztő gyárakat a jelenleg állami tulajdont képező TVA (Tennessee Valley Authority) telepek termelésének felfokozására.

Az igen nagy port felvert dolog lényege ez: Az Atom Energia Bizottságnak az atom- és H-bombák készitésénél óriási mennyiségü villanyáramra van szüksége, amelyet a jelenlegi (állami) TVA telepek már nem képesek kitermelni. A legegyszerübb dolog lett volna tehát ezen állami telepeket kibőviteni. Az Eisenhower adminisztráció azonban ellenzi az állami villanytelepek további fejlesztését, sőt a TVA-t is szeretné magánkezekbe juttatni, mert az állami termelés, szerintük "creeping socialism", — ami azt jelenti, hogy az adminisztrációt támogató tőkéseknek nem jut profit belőle.

Ezzel az elvvel természetesen rokonszenvezik a most panaszt tevő társaság is. Csak az ellen tiltakoznak, hogy az adminisztráció által pártfogolt bankárok egy másik csoportjából alakitott egy uj társulatot "Mississippi Valley Power Co." név alatt. **Ez a társulat most nagy állami kölcsönt kapott az uj villanygyárak épitésére és mindjárt RENDELÉST IS ADTAK NEKIK 107 millió dollár értékü villanyáram szállitására.**

Másszóval ez az uj társulat, — amelyet Dixon-Yates csoport név alatt emlitenek, — a közpénzeken fogja felépiteni a villanygyárakat és igy semmi rizikóval óriási hasznot hajtó ipartelepekhez jut, amelyeken keresztül az egész ország népétől fogják huzni a nagy profitot. Miután a panaszt tevő csoport tagjai igy estek a konctól, most "vizsgálatot" követelnek.

---

seiktől. Életünk legszebb éveit itt kell eltöltenünk tétlenségben. Miért?

"Mi jóhiszeműen jöttünk ide és Amerika népe is ugy fogadott bennünket. Egyesek közülünk az orvosi tudományt, mások a könyvelést és mások megint a mérnöki tudományokat sajátitották el, hogy ezen tudományok alkalmazásával szülőhazánkat segitsük. Nem akarunk mi hazavinni semmiféle ugynevezett 'titkos tudományt'. Az a tudás, amit mi itt szereztünk olyan természetü, amilyet az amerikai nép tradicionálisan a világ népének boldogitására szánt.

"Alázattal kérjük önt, Elnök ur, hogy tegye lehetővé részünkre a hazatérést. Biztositjuk önt, hogy a mi hazatérésünk nem fogja veszélyeztetni ezen hatalmas ország biztonságát. Sőt éppen ellenkezőleg, ugy tartjuk, hogy a mi hazatérésünk a két ország közötti barátság utját egyengetné.

Most már el lehet mondani

— AMIKOR DULLES, RADFORD ÉS KNOWLAND CSAKNEM MEGINDITOTTÁK A HARMADIK VILÁGHÁBORUT —

Irta: CHALMERS M. ROBERTS

Most már el lehet mondani! Talán soha még annyira igaz nem volt az a bizonyos hajszálra való hivatkozás, mint midőn azt mondjuk, hogy ez év április 3-ik napjában valóban csak egy hajszálon mult, hogy három ember bele nem vitt bennünket a harmadik világháboruba.

Pdig máskülönben az a nap is csak olyan volt, mint a többi. Washington városban sok ezer ember ment megnézni a Jefferson Memorial körül ültetett virágzó cseresznyefákat; az elnök a Maryland hegyekben fekvő pihenő helyére hajtatott, ahol a következő nagy beszédére készült s általában minden nyugodtnak, békésnek látszott.

A kongresszus 8 vezető tagja, — 4 szenátor és 4 képviselő — telefon meghivást kaptak a State Department azonnali meglátogatására, ahol John Foster Dulles külügyminiszter, Arthur W. Radford admirális, a közös vezérkar főnöke, Roger Keys alhonvédelmi miniszter, Robert B. Anderson Navy Secretary és Thurston B. Morton, Dulles első segitő asszisztense fogadták őket.

— President Eisenhower utasitott, hógy hivjam meg önöket erre a konferenciára, — fogadta a meghivottakat Dulles. Knowland (R.), Lyndon B. Johnson (D.), Eugene Milikin (R.) és Richard B. Russel (D.) szenátorok, tovább Joseph Martin házelnök, Earl Clement (R.) és John W. McCormack meg J. Persy Priest demokrata képviselők feszült figyelemmel hallgatták. Dulles azonban mindjárt átadta a szót Radford admirálisnak, aki Indokinát ábrázoló kifeszitett nagy térkép előtt állva mutogatni kezdte, hogy a francia csapatok milyen kutyaszoritóba kerültek Dienbienphu erődnél.

JAJ, MI LESZ MOST

— Ha ez az erőd elesik, akkor mindjárt utána megy egész Indokina, a többi délázsiai országok, a környező szigetek és veszélybe kerülnek még a Fülöp szigetek is, — mondotta Radford, botjával hadonászva.

Elmondotta aztán, hogy szerencsére ott vannak az Essex meg a Boxer nevü repülőgépszálitó hajók a kinai vizeken. Van ott elég gép, ember meg munició is. Ezek meg tudnák változtatni a háboru menetét dacára annak, hogy a franciák csak immel-ámmal harcolnak. Miután minden készen van, csupán arra lenne szükség, **hogy a kongresszus hozzon egy olyan határozatot, hogy az elnök, — ha jónak látja, — azonnal használhatja az Egyesült Államok légi és tengeri erejét.** (Ez tehát felhatalmazás lett volna arra, hogy az elnök megkezdheti a háborut a kongresszus hadüzenete nélkül is.)

Knowland szenátornak nagyon tetszett a dolog és késznek mutatkozott arra, hogy keresztül segit ilyen határozatot. A kollégái azonban már nem lekesedtek annyira. Különösen a demokrata szenátorok és képviselők akadékoskodtak és tettek fel ilyen kérdéseket:

— Az egyesitett vezérkar többi tagjai is helyeslik ezt a beavatkozást? — kérdezte Clements szenátor. Radford előbb himezett-hámozott, de aztán beismerte, hogy a vezérkar többi tagjai **ELLENZIK** az amerikai beavatkozást az indokinai háboruba.

— De, — tette hozzá Radford — azok nem ismerik a Távol-Keletet ugy, mint én. Én jobban tudom, hogy mire van szükség.

Aztán Lyndon Johnson adott fel egy igen fontos kérdést, amelynek a lényege ez: Mint Knowland szenátor állitotta, már a koreai háboruban is a költségek 90 százalékát, az emberek 85 százalékát az Egyesült Államok szolgáltatta. Milyen biztositéka van Dulles külügyminiszternek arra, hogy a kiszélesbitett indokinai háboruban az arány nem ilyen lesz, hanem abba Amerika a szövetségeseivel megfelelőbb arányban fogja megosztani a terheket?

A SZÖVETSÉGESEK

Dulles kénytelen volt beismerni, hogy bizony arra semmi kilátás sincs, sőt valószinü, hogy az Egyesült Államok még jobban magára marad ebben az uj háboruban. Erre aztán ezen szenátorok és képviselők azt ajánlották Dullesnak, hogy terjessze ezt az ügyet az Egyesült Nemzetek elé s annak a határozatától tegyék főggővé a beavatkozást.

Ez persze nem tetszett Radfordnak, se Knowlandnak, aki attól kezdve alig szólt valamit. Tettek fel aztán még másforma kérdéseket is. Igy megkérdezték, hogy Amerika beavatkozása nem-e vonná maga után a kinai beavatkozást? Radford és Dulles beismerték, hogy erre nagy a lehetőség. És akkor nem jutnának-e el a harmadik világháboruhoz? — kérdezte az egyik képviselő. Dulles és Radford beismerték, hogy azzal az eshetőséggel számolni kell.

McCormack (D) képviselő ekkor nem állhatta meg, hogy a republikánus kollégái orra alá ne dörgölje: "Furcsa, hogy a jelen adminisztráció, amelynek egyik szószólója, Sen. McCarthy "árulónak" nevezett bennünket, demokratákat, ilyen kéréssel mer hozzánk fordulni?"

Az ily kifakadásoknak aztán az lett a vége, hogy a kongresszus tagjai megijedtek a rendkivül nagy felelőségtől, amit magukra vettek volna a kivánt határozattal, amelyre oly szomjasan várt Radford admirális, hogy a harmadik világháborut meginditsa. Hosszu vita után aztán végre megegyeztek abban, **hogy jó lesz, ha Dulles külügyminiszter előbb megkérdezi az Egyesült Államokkal szövetkezett országokat, hogy velünk tartanak-e abban az esetben, ha az indokinai beavatkozás a harmadik világháboruhoz vezetne.**

Ami azután történt, már ismeretes. A szövetségesek, élükön Angliával, nagy rémületbe estek.

Igy maradt el a Radford-Dulles-Knowland által kitervezett nagy háboru.

(The Reporter)

AZ INDUSTRIAL WORKERS OF THE WORLD IPARI SZERVEZET

ELVINYILATKOZATA

A munkásosztály és a munkáltató osztály között semmi közösség nincsen. Nem lehet béke mindaddig, amig éhség és nélkülözés található a dolgozó emberek milliói között s az élet összes javait ama kevesek birják, akikből a munkáltató osztály áll.

E két osztály között küzdelemnek kell folynia mindaddig, mig a világ munkásai mint osztály szervezkednek, birtokukba veszik a földet, a termelő eszközöket és megszüntetik a bérrendszert.

Ugy találjuk, hogy az iparok igazgatásának mind kevesebb és kevesebb kezekbeni összpontosulása a szakszervezeteket (trade unions) képtelenné teszik arra, hogy a munkáltató osztály egyre növekvő hatalmával felvegyék a küzdelmet. A szakszervezetek olyan állapotot ápolnak, amely lehetővé teszi, hogy a munkások egyik csoportját az ugyanazon iparban dolgozó másik csoport ellen uszitsák és ezáltal elősegitik, hogy bérharc esetén egymást verik le. A szakszervezetek segitenek a munkáltató osztálynak a munkásokba beoltani ama tévhitet, hogy a munkáltatókkal közös érdekeik vannak.

E szomoru állapotokat megváltoztatni és a munkásosztály érdekeit megóvni csakis olykép felépitett szervezettel lehet, melynek minden az egy iparban — vagy ha kell, valamennyi iparban — dolgozó tagjai beszüntessék a munkát bármikor, ha sztrájk vagy kizárás van annak valamelyik osztályában, igy az egyen esett sérelmet az összesség sérelmének tekinti.

E maradi jelszó helyett: "Tisztességes napibért, tisztességes napi munkáért" ezt a forradalmi jelszót irjuk a zászlónkra: "LE A BÉRRENDSZERREL!"

A munkásosztály történelmi hivatása, hogy megszüntesse a bérrendszert. A termelő hadsereget nemcsak a tőkésekkel való mindennapi harcra kell szervezni, hanem arra is, hogy folytassa a termelést akkor, amikor a bérrendszer már elpusztult. Az ipari szervezkedéssel az uj társadalom szerkezetét épitjük a régi társadalom keretein belül.

ESNEK A FARMOK ÁRAI

WASHINGTON — A Department of Agriculture jelentése szerint az amerikai farmok árai az utolsó két évben 7 százalékkal estek.

U. S.-DÉLKOREA ELLENTÉT

SEOUL, Délkorea — A United Press állitása szerint az Egyesült Államok és Délkorea között egyre feszültebb lesz a viszony és nem lenne meglepő, ha Syngman Rhee kiutasitaná onnan az amerikai hadsereget a politikai "tanácsadókkal" egyetemben.

A két ország közötti viszony ily elhidegülésének legfontosabb oka az, hogy a washingtoni kormány már nem ad olyan nagy financiális és fegyveres segitséget Délkoreának, mint eddig. De ami a legjobban felingerelte a Synéman Rhee kormányt az, **hogy a pénzügyi támogatást már nem adják az ő kezükbe, mint azelőtt, hanem az amerikai kormány megbizottjai költik el.** A Rhee kormány tagjai ezt nagyon nagy sértésnek veszik.

A másik ok állitólag az, hogy az amerikai kormány délkorea felé akarja irányitani a japán iparok exportját. Japán ugyanis képtelen megállni külföldi élelmiszerek behozatala nélkül, amelyért természetesen csak a külföldre küldött ipari termékekkel fizethet. A japán ipar piacait az Egyesült Államok részben elfoglalta, részben pedig elzárja a kinai blokáddal. Ezért Koreát szeretné megnyitni a japán exportnak, de a koreaiak 40 évi kizsákmányoló japán uralom után hallani sem akarnak erről.

A NAGY BÉKEKÖTÉS

LOS ANGELES — Az American Federation of Labor két legnagyobb International unionja, a 900,000 taggal biró International Association of Machinists és a 800.000 taggal biró United Brotherhood of Carpenters and Joiners 40 évig tartó **egymás közötti harc után most végre békét kötöttek.** Ez a két szervezet 4 évtizeden át éles harcot folytatott egymás ellen azért, hogy melyiknek a jogkörébe (jurisdiction) esik olyan mühelyek megszervezése, amelyekben masiniszták és karpenterek együtt dolgoznak. Ez az évtizedekig tartó harc tisztán mutatta a szakszervezkedési forma nagy hibáit, amennyiben nemhogy a közös cél érdekében szervezte volna a munkásokat, **hanem éppen ellenkezőleg, egymás ellen uszitotta őket.**

A két szakszervezet elnökei nagy ünnepség közepette irták alá azon szerződést, amelyben kötelezik magukat, hogy a jövőben minden jurisdicktionális kérdésben alávetik magukat az ily célra kinevezett döntőbiróság itéletének.

INDIA ELTITOTTA A GYERMEKHÁZASSÁGOT

NEW DELHI — India parlamentje nagy szótöbbséggel elfogadta azon törvényt, amely eltiltja az Indiában ősidőktől szokásos gyermekházasságokat. Az uj törvény értelmében a leánynak legalább 18 évesnek, a fiunak pedig legalább 21 évesnek kell lenni, hogy házassági engedélyt kapjanak. Ezzel a törvénnyel végetvetnek a hindu vallás által ápolt évezredes embertelen gyermekházasságoknak.

IDEGBETEGEK

Irta: **DR. WILLIAM G. NEDERLAND**
Egyetemi tanár

"Az idegek összesége — ez az ember" — Cabanis

Idegbetegekkel találkozol mindenütt. Ott vannak az üzletekben, a politikában, az iskolában, a birósági tárgyalásokon; megtalálod őket a diplomás emberek között éppenugy, mint az egyszerü napszámosok soraiban. Számuk milliókra rug s mégis ezt a betegséget ismerjük legkevésbé.

A United States Public Health Service adatai szerint az Egyesült Államokban évenként 8-10 millió ember szenved idegbántalmakban. Nagyrészét ezeknek az átlagos ember csak "félbolondnak" nevezi. Ezek azok, akikre azt mondják, hogy "hiányzik az ötödik kerekük" s tovább nem törődünk velük. Pedig gondolni kellene arra, hogy hátha **MI IS KÖZÉJÜK TARTOZUNK!** Hátha mások miránk is azt mondják, hogy "az a félbolond?"

Mert látszatra a legtöbb esetben ezen embereknek nincs semmi szervi (organikus) hibájuk. De azonkivül folytatják munkakörüket ugy, mint mások; nem egy hires költő, zenész, szinész vagy hasonló kiválóság is akad közöttük. A vagyoni vagy esaládi állapot sem szab korlátot ennek a betegségnek; megtaláljuk őket a gazdagok között éppen ugy, mint a szegények soraiban. Van közöttük sok nagy keresetü, sok erősen dolgozó ember, de azért ezek is betegek.

Betegek, akik panaszkodnak és gyógyitásra szorulnak, ha ugyan az lehetséges. Ezek is törekszenek az élet örömi után, akárcsak te és én; **szeretet, barátság, boldogság, elismerés, vagy más valamilyen érzelem vágy kielégitése lappang idegességük mögött, amit nem tud kielégiteni, ami keserü csalódást okoz nekik.** Ez aztán annyira összegyülemlik, hogy egyszer csak letöri a józan gondolkodás erejét és az egészséges emberből idegbeteg lesz.

Az idegbetegség nagyon sokféle módon jelentkezik és noha számos tipust külömböztetünk meg, közöttük éles határt vonni nem lehet. Az idegbetegek száma az érettebb koruak között rősen emelkedik, talán azért, mert több alkalom volt arra, hogy valamilyen csalódás érje őket. Ezek aztán ugy látják, hogy az életük üres, amiért nem érdemes küzdeni.

Ennek a nagyon elterjedt betegségnek a legjobb gyógyszere az, ha a **beteget rá lehet eszméltetni arra, hogy nincs semmi szervi baja, csak éppen bebeszél magának valamilyen betegséget, elhagyatottságot, csalódást, üldöztetést, vagy valami hasonlót, ami az életét elkeseriti.**

Felsoroljuk a fontosabb tipusokat, márcsak azért is, mert tudjuk, hogy az olvasók mindegyike ismer egy-két olyan embert, akik egyik-másik tipusba tartoznak. De a leghasznosabb az lenne, ha az, akire ráillik ÖNMAGÁT MEGTALÁLNÁ valamelyik tipusban, mert ez a felismerés a gyógyuláshoz vezethet.

a) A TULÉRZÉKENY

A létért folyó durva marakodással telitett világban a tulérzékeny embereknek nagyon nehéz a sorsuk. A forradalmak, háboruk, depressziók és a nacionalista krizisek legtöbbünket megedzettek annyira, hogy érzelmeink nem lesznek urrá felettünk. A tulérzékeny emberek azonban valahogy elkerülték ezt az érzéktelenitést és azért minden külső hatásra tulzott érzelmi benyomással reagálnak, ami beteggé teszi őket.

Az ezen csoporthoz tartozókon a betegség már külsőleg is mutatkozik. Rendesen lesoványodott, törékeny testüek, étvágytalanság és álmatlanságról panaszkodnak, amihez hozzájárulnak az emésztési zavarok is. Szédülnek, gyakran el is vesztik eszméletüket és mégis semmi szervi betegséget sem lehet náluk találni.

Betegségeik okát nem is a szerveik vizsgálata, hanem az élettörténetük adja meg. Sokuknál hiányzott a szülői szeretet gyermekkorukban, másokkal nagyon szigoruan bántak, vagy tulságosan becézték, védték minden külső behatás ellen és igy félénk emberek lettek, nehezen barátkoznak s nem jól érzik magukat társaságban.

Érdekes, hogy ebbe a csoportba tartoztak olyan kiválóságok, mint például Shelley, a nagy angol költő; Chopin, Mozart, Schubert és Schumann zeneszerzők; John Keats költő és még sok más nevezetesség.

b) A KÉPZELT BETEG

Ebbe a csoportba tartoznak azok ,akik mindenféle betegségeket vélnek felfedezni saját magukon. Egyre-másra olvassák az egészségügyi könyveket, eljárnak orvosi előadásokra, gondosan figyelik az egyes betegségek szimptómáinak leirását és azután arra a gondolatra jönnek, hogy náluk is jelentkeznek ezen szimptómák.

Különösen gyakori ez a jelenség öreg emberek között, akik mindenféle pirulákat szednek, követnek minden "orvosi" tanácsot, **azokat is, amiket nem orvostol, hanem a szomszédasszonytól kapják.** Szekrényeik tele vannak mindenféle drugszerekkel, akárcsak egy kisebbszerü gyógyszertár. Minél több vitamint, "erősitőt", elikszirt, aspirint, vas-kivonatot, teákat és hasonló dolgokat szednek, annál jobban védve érzik magukat a betegségek ellen.

Közben azonban mindig ujabb meg ujabb betegségről hallanak, ami ellen még nem erősitették meg magukat és akkor ugy vélik, hogy az az uj betegség fogja el őket és kezdődik a nagy félelem megint, mint előbb.

Ebbe a csoportba sorolhatjuk az ugynevezett "fobiás" betegeket is, akik csak egy bizonyos dologtól félnek. Van például olyan, aki fél a szük helytől (claustrophobia), fél az emberektől (anthrophobia) és igy tovább. Ezeknél a FÉLELEM okozza az igazi betegséget és talán igaz az, hogy ezeknél a **félelem nagyobb fájdalmat okoz, mint okozna maga az a dolog, amitől félnek.**

e) AZ INDULATOS ÉS PARANCSOLGATÓ

Az idegbeteg tekintélyes száma nagyon indulatos, hamar felhevül, veszekedést kezd és véleményét nagyon erőszakosan akarja másokra rákényszeriteni. **Gyakran saját hiányosságukat akarják takarni** ezzel az **agresszív fellépéssel, máskor igen nagy embernek képzelik magukat, akik messze kiemelkednek környezetükből és azért megkövetelik, hogy környezetük engedelmeskedjen nekik.**

Az ilyen uralkodni, parancsolni vágyó (domineering) egyén környezete legfontosabb emberének tartja magát és ezt mindenütt érvényre akarja juttatni. Különösen veszedelmessé válik az ilyen ember, ha az üzleti életben valamilyen pozicióra tesz szert, amikor alattvalónak az életét végtelenül elkeseriti. De éppen igy tönkreteszi családja békéjét is. Az ily családban felnövekedett gyermekek csaknem biztosan szintén idegbetegek lesznek.

d) AZ ÖNZŐ

Az emberrel vele születik az önmagával való törődés. A gyermek gondolatvilágát csak önmaga foglalja el, ez szolgál alapul arra, hogy az önfentartás nagyon komplikált aktivitásait megtanulja. Amint azonban növekszik, egyre nagyobb mértékben vesz tudomást a testét környező világról, azok behatolnak szellemi világába is és idővel a felnőttek eszmevilágában helyet nyernek a barátai, a foglalkozása, a közintézmények, stb. stb.

Vannak emberek, akik ebben a tekintetben soha sem nőnek meg, akik egész életükön át, — mint a gyermekek, — csak saját magukkal törődnek. Ezek a világ központjában képzelik magukat és ugy tartják, hogy mindenkinek és minden intézménynek az ő kivánságukhoz kell alakulni, hogy az ő javukat vagy kényelmüket szolgálják.

Az ilyen emberek soha nem beszélnek másról, mint saját magukról. **Bármiről legyen is szó, azonnal saját magukra forditják a beszélgetést.** A közösségi szellem teljesen hiányzik náluk. Követelik a közintézményektől, hogy tisztán csak az ő javukat szolgálják, de ők nem segitik az ily intézményeket.

Éppen ugy engedelmességet, sgitést és lojalitást követelnek barátaiktól és környezetüktől, amit azonban ők nem viszonoznak. **Ezen emberek érzelmileg éretlenek, az életről nincs semmi komoly ismeretük. Nem tudnak külömbséget tenni a fontos és kevésbé fontos dolog között;** a saját dolgaikat, bármily jelentéktelen is, a családjuk, a környezetük vagy akár az ország legfontosabb dolgai fölé helyezik. Ebben a tekintetben ugy viselkednek, akár csak a gyerekek. Az ilyen megnőtt "gyermekek" is veszedelmessé válnak, ha valamilyen magasabb pozicióba kerülnek, de mindig elég bajt okoznak családjuknak, környezetüknek és barátaiknak.

A szerkesztő megjegyezése: A fentieket Dr. Niederland: **"Man-Made Plague"** cimü munkájából vettük, ahol az elmondottakon kivül még az idegbajosok számos válfaját ismerteti. Ezek terjedelmes közlésére azonban már nincs terünk. A fentiek ismertetését azonban nagyon kivánatosnak tartottuk.

REMÉNYKEDIK AZ ANGOL MUNKÁSPÁRT

LONDON — A közvéleménykutató intézmények jelentései szerint az angol választók többsége jelenleg a Labor Party mellé szegődött. Ha mostanában választásokat tartanának, — irja a London Observes, — akkor a Churchill kormánya alapos vereséget szenvedne.

MEGHIVÓ

A BÉRMUNKÁS Elsinore-Perris olvasói október 9-én, szombaton délután 2 órai kezdettel az Elsinore Progressive Hallban (Poe Street) az első kiváló magyar proletár költő müveinek felelevenitésére)

ABET ÁDÁM

emléküunnepélyt rendeznek a következő müsorral:

a) Költők szerepe a forradalomban	Bustya Károly
b) Abet Ádám élete és költészete	Geréb József
c) Omár Kháyám bölcs dalai (Rubiáyát) ismertetése.	

A méltatásban emlitett gyönyörü Abet verseket a következő szereplők fogják előadni:

1. Proletár vagyok	Soos Pál
2. Szülőimhez	Ádám András
3. Munkás vagyok	Tehoma Sándor
4. A szent törvények	Tabák Mihály
5. Jelenet	Schubert Irma
6. Fogadalom	Ádám András
7. Óda a dollárhoz	Bikfalvi Miklós
8. Szép ez a föld	Ádám Helén
9. Amerika csoda-népe	Magyary József
10. Marseilaise szöveg	Bustya Károly
11. Honvágy	Soos Hermina
12 Bölcsmondások	Schubert József
13. Egyesüljetek	Magyary József

Tekintettel a terjedelmes programa az ünnepélyt pontosan 2 órakor kezdjük. Beléptidij nincs, mindenkit szivesen látunk.

Ötven éves házassági évforduló

Nagy ritkaság számba megy egy olyan kiváló esemény, mint amilyenben szeptember 6-ikán, az ugynevezett "Labor Day" napján Los Angeles osztálytudatos magyar munkásságának volt része.

Eme ritka eseményt az országszerte ismert Bakos család váltotta ki azáltal, hogy házasságuk 50 éves évfordulóját munkástársaik, szeretett barátaik, kedves rokonaik társaságában kivánták megünnepelni. Eme kivánságuk várakozáson felül teljesült, mert akikkel együtt kivánták eltölteni életük eme jelentős eseményét, jelen voltak. Kivételt képeznek azok a munkástársak, rokonok, akik a nagy távolság miatt képtelenek voltak megjelenni. Délután két órára hivták össze a vendégsereget. Nyolcvan egyént hivtak meg és százon felül jelentek meg. Eljöttek olyanok is, akikről Bakos család nem is gondolta, hogy szeretetben, tiszteletben tartják őket.

Valamivel fél három előtt Köhler munkástárs — az esemény toastmestere — felszóllitotta a nagyteremben társalgó közönséget, hogy vonuljanak be az étterembe.

Az ételektől és virágoktól roskadozó asztalok mellé ülve fürkészték, keresték a boldog jubiláló házaspárt. A hosszu sorban felállitott asztalok fejénél foglaltak helyet a jubiláló házaspár, rokonaikkal. Mindketten hatalmas termetüek, de náluknál hatalmasabb száz szál rózsából álló csokor és az óriási nagy mennyasszonyi torta, teljesen eltakarta őket.

Munkástársnőink ez alkalommal is kitettek magukért. A konyha müvészetet itt Záráné. Köhlerné. Papné, Ádámné látták el. Nagy segitségükre voltak elejétől végig Simon munkástárs és Fábián Manci, akik bámulatos ügyességgel szolgálták ki a vendégsereg minden kivánságát.

Sok volna felsorolni azon munkástársnők és rokonok neveit, akik ez alkalommal is igazán müvésziesen készitett sütemények, torták halmazát hordták össze. Most látta csak igazán a Bakos család, hogy Los Angeles és környékének osztálytudatos magyarsági mily szeretettel, tisztelettel adóznak a Bakos család munkájáért, amelyet a munkásosztály felszabaditási harcában minden megalkuvás nélkül folytatnak.

A kellemes és izletes ételek és hüsitők fogyasztása után Köhler egyenként szóllitja fel Bakosék munkástársait, barátait, rokonait, hogy hajtsák meg az elismerés lobogóját nem csak azért mert a természet kegyes volt hozzájuk, hanem legkivált azért, mert a Bakos család minden megalkuvás nélkül harcol egy szebb jövőért. Hosszadalmas volna felsorolni azok neveit, akik jókivánságaikkal, elismeréssel adóztak. Három munkástárs felszólalását azonban fel kell, hogy sorojuk.

Az első felszóllitott, a los angelesi magyar munkásmozgalom egyik legrégibb harcosa Uhrin munkástárs volt, aki a tőle megszokott megfontolt szavakkal méltatta a Bakos család fáradhatatlan munkáját. Befejezésül mondá, hogy végtelen hálával tartozik a Bakos családnak, hogy őt is megtisztelték és boldognak érzi magát, hogy eme igazán szép vendégsereg közé sorolták. Kivánja, hogy a Bakos család jó egészségben még sokáig szolgálhassa a munkásosztály ügyét.

A Magyar Munkás Otthon nevében Szabó titkár üdvözölte és méltatta Bakosék érdemeit.

Utolsónak Zára munkástárs maradt, aki talpraesett szavakkal méltatta Bakosék önfeláldozó munkáját az IWW és annak magyar lapjáért a Bérmunkásért. Ugymond 42 esztendővel ezelőtt ismerte meg Bakosékat, amikor az IWW magyar mozgalma kialakulóban volt. De személyesen csak másfél évvel ezelőtt volt alkalma megismerni. Ugy találja, hogy a Bakos csacsalád nem csak a multban, hanem öregségük dacára ma is erélyesen dolgoznak a munkásosztály ügyéért.

Beszéde végeztével Köhler szólalt fel: Én nem Bakosék érdemeit kivánom ecsetelni, hanem inkább a ma esti kivánságainkat. Bakosék szigoruan kikötötték a vendégek összehivása alkalmával, hogy semmiféle ajándékot senkitől nem fogadnak el. Ennek dacára gyönyörü virágcsokrokkal, finom süteményekkel és sok igen értékes tárgyakkal halmozták el őket. Amikor felszólalok, Bakos munkástársék legforróbb óhajának kivánok kifejezést adni, amikor arra szóllitom fel önöket, hogy annak az eszmének, amelyért Bakosék egy egész emberéleten át önzetlenül dolgoztak, tetemesen áldoztak, hogy eme mozgalom magyar nyelvü lapját a Bérmunkást támogassák. A vendégek igazán meglepően sorakoztak fel Bakosék ezen kivánsága mellett és 118 dollárral támogatták az IWW magyar lapját.

Köhler munkástárs a Lapbizottság nevében meghajtotta az elismerés zászlaját Bakosék és a vendégsereg ádozatkészségéért.

Ezek után Bakos munkástárs emelkedett szólásra. Meghatóan, talpraesett szavakkal köszönte meg a nem várt szépszámu közönségnek, hogy házasságuk 50 éves évfordulóján résztvesznek. "Most látom csak, hogy mennyi igazi munkástárs, szeretett jóbarát, rokonaink vannak. Hosszu idők óta abban a tévhitben éltem, hogy ebben a nagy városmindenkitől elhagyatva, csak én és nőm harcolunk és dolgozunk az IWW magasztos eszméjéért és annak magyar lapjáért a Bérmunkásért. Most látom csak azt igazán, hogy mennyire csalódtam. Most látom, hogy az az eszme és a lap amelyért dolgozunk, amelyért egy emberéleten át fáradoztunk, önök ezt a lapot igazán szép összeggel támogatták. Én és nöm többre becsüljük eme megnyilvánulást, mint a részünkre ez alkalommal adott ajándékokat.

"Még csak annyit kivánok mondani, hogy az IWW mozgalmáért, lapjáért, amióta az eszemet tudom, amióta megismertem az osztályharc igazi utját, minden erőnkkel doldozunk. Erős a hitem — ma még sokkal jobban mint valaha — hogy az IWW tanitása az Ipari Unionizmus eszméje fog győzedelmeskedni, nem csak itt az Egyesült Államokban, hanem az egész világon. A világ munkásságának szabadsága, egyenlősége, testvéri szeretete csak akkor lesz igazán megvalósitva, ha az iparokban szervezik meg a VILÁG MUNKÁSSÁGÁT, akik aztán átveszik a termelés és szétosztás eszközeit és eltörlik a BÉRRENDSZERT."

Ezután Köhler felolvasta az üdvözlő táviratok, levelek, kártyák küldőinek neveit. Azok tartalmát azonban nagy számuknál fogva mellőzni kellett. Ezt követő hosszu társalgás után a jókedv emelkedett és a késő esti órákig szép magyar dalokat énekelve fejeződött be a Bakos házaspár 50 éves jubileuma.

Sok jó és kellemes estéken, összejöveteleken vettem részt 48 esztendi amerikai munkásmozgalmi tevékenységemben, de bátran mondhatom, hogy a Bakos házasuár 50 éves jubileuma részemről egyike volt a legkellemesebbeknek.

Köhler.

HOZZÁSZÓLOK

Noha más munkásmozgalmi csoporthoz tartozom mint a Bérmunkás, a legnagyobb tisztelettel vagyok, azért a nagyszerü, bátor munkáért, amelyet a Bérmunkás irógárdája évek hosszu sora óta végez. Mindenkor nagy élvezet és tanulságos nekem Geréb munkástárs irása, még akkor is, ha — ami elég gyakori — nem értek mindenben egyet vele. Igaz, amikor jól átgondolom, nem ritkaság, hogy elfogadom az álláspontját, de a legutóbb, amikor a munkás sportot, amelyet a szovjetekben és a népi demokrciákban üznek, azzal amit a tőkés országok üzleti csaláson alapuló sporttal hasonlitsa össze.

Ezért inkább elfogadom Kovach munkástárs álláspontját, bár azon nagyon meglátszik, hogy ő tényleg nem foglalkozik sporttal. Mert akkor jobban kihangsulyozta volna azt, hogy az előző országokban nem kiterjesztett super sportolók vannak, hanem hihetetlenül hatalmas tömegek üzik a sport minden ágát. Igy a nagy tömegekből kerülnek ki azo ka kiváló bajnokok, akiknek a nevei ott szerepelnek minden nemzetközi mérkőzésen. igazolva ezen a téren is a kollektiv társadalom fölényét a tőkés rendszer felett.

Legutóbb a Szovjetben járt az olympiai verseny elnöke, aki amerikai és a legnagyobb elismeréssel adózik a szovjeteknek, mert itt óriási tömegek üzik a sportot. Az ő jelentése szerint, egyedül Ukrajnában 60 ezer football csapat van, ami feltételezi hogy milliók vesznek ebben részt. Geréb munkástárs irásaiból tudom, hogy ő rossz szenvedélynek tartja az ivást, dohányzást, kicsapongást. Higyje el Geréb munkástárs, hogy az öntudaton keresztül a fentiek legjobb ellenszere az észszerü sport.

Én sokkal messzebb megyek el a haza és a hazafisák uj fogalmazásán. Még odahaza büszkén vállaltuk a "hazátlan bitang" elnevezést, amellyel a reakció a szocialistákat bélyegezte meg. Semmi közösséget sem éreztünk az általuk kisajátitott hazafisággal, annak jelképeivel, de egészen más most az otthoni magyar dolgozó érzése. Most a magukénak érzik és tudják a "hazát" és mint a második világháboruban láttuk és látttuk a koreai és vietnami háboruban, ahol az öntudatos dolgozók nem csak hajlandók, de képesek is megvédeni az országukat olyan hatalmakkal szemben is, mint Amerika, Franciaország, mert a haza most a szebb, boldogabb jövőt, a szocialista társadalmat jelenti. Ezt a hazát büszkén vallja magáénak és hajlandó azt az élete árán is megvédeni. De ennek a hazafiságnak semmi köze sincs a sovinizmushoz, más népek gyülöléséhez. A "tót nem ember kása nem étel", "bocskoros oláh"-féle gyalázatosságnak nincs helye ebben a hazafiságban. . Ma a mult "ellenségei" a magyar, tót, cseh, román, stb. testvéri népek, kik szorosan összetartanak, egymást segitve épitik a jövő társadalmát.

Ez a hazafiság összefér a nemzetköziséggel, amelyért anynyit harcolt Geréb munkástárs is.

cs. f.

TITÓ PÁLFORDULÁSA

(Folytatás az 1ső oldalról)

Titó ugyan nem ellenzi a németek ujbóli felfegyverzését, de azt valamilyen kontról alatt kivánja tartani.

Titó párfodulásának igazi magyarázatát az oroszok sikeres H-bomba kisérleteiben találjuk meg. Most már ráeszmélt, hogy a Kelet és Nyugat között folyó harcban Jugoszlávia teljesen elpusztulna. Legalább is arra gondolt, amidőn ezt mondotta: "A megelőző (preventiv) háboru sikerére már gondolni sem lehet". — Azért gondolt tehát arra, hogy jobb lesz kiegyezni a Szovjetunionnal.

MAGYAR KÉRELEM

BUDAPEST — United Press riport szerint a Magyar Népköztársaság miniszterelnöke, Nagy Imre, beadványt intézett az Egyesült Nemzetek titkárságához kérve, hogy Magyarországot is vegyék fel az Egyesült Nemzetek tagjai közé. A kérelmet Nagy azzal indokolja meg, hogy a Magyar Népköztársaság fontos szerepet tölt be a világbéke fentartásában.

ŐRÜLT-E McCARTHY?

FRANKFURT — Az amerikai hatóságok rájöttek, hogy ugy a Német, mint a Franciaországban elhelyezett nagy amerikai katonai raktárokat rendszeresen lopják és állandóan nagy értékü felszerelések tünnek el. A lopások felfedezésére és eltussolására az "American Daily" nevü lap most kisütötte, hogy ezen amerikai katonai árukat bizonyára a kommunisták lopják el, hogy azokból a "földalatti" mozgalmukat felfegyverezzék.

BÉRMUNKÁS

MAGYAR NYELVÜ LAP AZ IPARI UNIONIZMUS SZOLGALATABAN

Entered as second-class matter at the Post Office, at Cleveland, Ohio
under the Act of March 3, 1879

VOL. XLI. ÉVFOLYAM CLEVELAND, 1954 OCT. 15 NO. 1850 SZÁM

LEHUZZUK A ZÁSZLÓT

A Bérmunkásnak ez az utolsó lapszáma.

Lehuzzuk tehát a zászlót, amelyet több mint 42 éven át oly diesőségesen lengettünk.

Nem az anyagiak hiánya késztetnek lapunk feladására. Ezt ki kell jelentenüük, mert közismert tény, hogy a legtöbb lapot a pénzügyi nehézségek döntik sirba. Ellentétbe más lapokkal, a Bérmunkás kiadását lehetővé tette néhány munkástárs évtizedeken át tartó, valóban példát mutató, nehéz, fáradságos önzetlen munkája.

És most mégis lehuzzuk a zászlót. Lehuzzuk a körülmények kényszeritő hatása következtében. Az első világháboru után hozott bevándorlási törvények halálos itéletet jelentettek az idegen nyelvü sajtónak, mert a bevándorlókkal egyetemben arányosan fogyott az olvasótáborunk is. Különösen az utóbbi években érte igen nagy veszteség az idegen nyelvü sajtót, mert elöregedett olvasóik egyre gyorsulóbb ütemben hagyják el az élők sorát. Az olvasók elvesztése a jövedelem elfogyását jelenti és igy egyszer csak minden idegen nyelvü lap elér azon időponthoz, hogy kiadásait többé fedezni nem tudja és bezárja kapuit.

Ezen folyyamat alól a Bérmunkás sem képezhet kivételt. A zászló lehuzásának idejét azonban közel két évtizeddel kitoltuk ugy, hogy egymásután jelentkeztek a szerkesztő, az irók, az üzletvezető s a csomagolók, akik elveik szolgálatában, fizetés nélkül vállalták ezt a munkáát és igy képesek voltunk lapunk kiadására fizetett hirdetések nélkül és anélkül, hogy olvasóinkat tulságosan zaklattuk volna még az anyagi támogatásért is.

És büszkén mondhatjuk, hogy kiadtunk olyan tartalmas, bátor, tanitó és harcias lapot, aminőhöz hasonlót messze földön keresni kell. Ezt még ellenségeink is elismerik.

A számunk azonban egyre fogyott, a megmaradottak vállaira egyre nagyobb teher nehezedett. Amikor Lefkovits munkástársunknak felesége betegsége folytán el kellett hagyni Cleveland várost, lapunk krizis elé került, amit csak ugy oldottunk meg, hogy a kiadóhivatali munkát Takács munkástársunk vállalta. Sajnos, Takács munkástársunkon erőt vett a kiujult máj és vesebaja, ami szeptember 19-én elrabolta tőlünk. A már amugy is nagyon fogyott sorainkban nem akadt más a titkár-kiadó munkák végzésére és igy mást sem tehetve, elhatároztuk a Bérmunkás beszüntetését.

Lehuzzuk tehát a zászlót.

Nem mondjuk, hogy fájdalom nélkül hagy lapunk befejezése. De ugyanakkor megelégedést nyujt **MULTUNK**, amelyre büszkeséggel tekinhetünk. Mert joggal mondhatjuk, hogy azon gazdasági, politikai és kulturális vivmányokat, amiket az amerikai munkásság eddig elért, — **ÉS AMELYEKET MA OLYAN ÁDÁZ DÜHVEL TÁMADNAK**, — a munkáltató osztály nem hozta ezüst tálcán a munkások részére. Harcolni kellett azért, méghozzá nagyon is keményen. És **JOGGAL MONDHATJUK**, hogy abból a nehéz harcokból **A BÉRMUNKÁS ÉS A KÖRÖTTE CSOPORTOSULÓ OLVASÓ TÁBOR ALAPOSAN KIVETTE A RÉSZÉT.**

És nem megvetendő ám az az eredmény, amit elértünk. Éppen ez az oka annak, hogy Amerika uralkodó osztálya ma **OLYAN ERŐSZAKOS MÓDON IGYEKSZIK AZOKAT LEROMBOLNI.** A Bérmunkás idős olvasói még jól emlékszenek a 45-50 évvel ezelőtti időkre; az akkori munkaviszonyokra, munkabérekre, a munkások hihetetlenül alacsony életszinvonalára, — másszóval a munkások kizsákmányolási fokára.

De különösen emlékszenek arra a rendkivüli embertelen bánásmódra, amiben a szakmanélküli munkásokat részesitették. Századunk első éveiben már egyre nagyobb tömegekben alkalmazták a szakmanélküli munkásokat a nagy épitkezéseknél, az erdőirtásoknál és a mezei munkáknál. Ezen vándormunkások minden vagyonát a féreggel telitett felgöngyölt pokróc képezte, amelyet vállra vetve mentek egyik munkahelyről a másikra.

Ezeket nem szervezték az amerikai szakszervezetek. Olyanformán tekintettek rájuk, mint alsóbbrendü lényekre, holott ezeknek a megélhetési viszonyai szabták meg az ő életszinvonalukat is.

Ez az osztály értette meg és fogadta lelkesedéssel az 1905-ben alakult Industrial Workers of the World (Világ Ipari Munkásai) szervezet szózatát, amely kimondja, hogy csak két osztályt ismer; a munkáltatók és a munkások osztályát, amelyek között semmi közösség sines, amelyek érdekei ellentétesek, ezért örökös harc folyik közöttük. Ez a harc az **OSZTÁLYHARC.**

Amerika munkástömegeivel az **IWW** ismertette meg azt a nagy igazságot, hogy saját sorsán csak osztálytársaival együttesen, osztályuk helyzetének javitásával segithet. Az **IWW** porondra lépésével az osztályharc az elmélet mezejét elhagyva gyakorlati ténnyé lett. Ez a harc két évtized alatt gyökeresen megváltoztatta a legjobban kizsákmányolt néposztályok helyzetét, kivivta számukra is az emberi élethez való jogot. És amily mértékben emelkedett ezen legalantasabb osztályok helyzete, ugy vitte feljebb és feljebb az összes munkások életnivóját is.

Joggal mondhatjuk, hogy habár a munkaviszonyok, a munkabérek és az általános jólét emelkedése az összmunkásság nyeresége volt, annak **KIKÜZDÉSÉÉRT EGYETLEN CSOPORT SEM KÖVETELHET MAGÁNAK ANNYI ÉRDEMET, MINT AZ IWW SZERVEZET HIVEI.** Joggal dicsekedhetünk ezzel, hiszen megfizettünk **KÖNNYEL, VÉRREL ÉS MARTIRJAINK SZÁZAIVAL.**

Elöregedtünk, soraink megritkultak, számunk nagyon megfogyott s az események változatai félretoltak bennünket, de csak azután, amikor a **MUNKÁSOSZÁLYNAK TETT NAGY SZOLGÁLATOT MÁR ELVÉGEZTÜK.** Ezt nem lehet tőlünk elvitatni.

De még megfogyott számunkkal és erőnkkel is változatlan bátorsággal szálltunk sikra azon szabadságjogok védelméért, amelyektől az utóbbi években az amerikai munkásságot meg akarja fosztani az uralkodó osztály. És ugyanoly bátorsággal hangoztattuk, hogy a háboruk ideje már lejárt; a nemzetek és országok közötti ellentétek elintézésének helye nem a csatasor, hanem a tárgyaló asztal, mert ha kitör az atomháboru, akkor csatatérré lesz a föld teljes felszine eme végső nagy katasztrófában elpusztulhat maga az emberi civilizáció is.

Ezért hivatkozunk büszkeséggel multunkra; ezért mondjuk, hogy a zászló, amit most lehuzunk, mindig dicsőségesen lobogott. Lapunk közel félszázados élte alatt valóban osztálytudatos hüséggel és odaadással szolgáltuk osztályunkat, — a **MUNKÁSOSZTÁLYT!**

A Bérmunkás
Szerkesztősége és Lapbizottsága

HATÁROZATOK A BÉRMUNKÁS BESZÜNTETÉSÉRŐL

1. Takács József munkástársunk elhalálozása folytán, ki a központi titkári teendőket végezte, Lefkovits munkástárs eltávozása óta, sulyos, megoldhatatlan helyzet elé állitotta a lapbizottságot.

Miután más munkástárs nem vállalkozott a titkári teendők elvégzésére, miután többszöri felhivás dacára sem tudtuk az irógárda létszámát növelni és igy a lap megirása három munkástárs vállaira hárult. Miután a lapot csomagoló munkástársak közül kettő kórházba került és a harmadik is várja a kórházba való beualását, a lapbizottság arra az egyhangu megállapodásra jutott, hogy képtelenek vagyunk arra, hogy a Bérmunkást továbbra is, a több mint 15 éve folytatott alapon, önkéntes munkával jelentessük meg, viszont az elöregedett olvasótábort nem terhelhetjük meg egy fizetett alkalmazott felfogadásával, ezért a Bérmunkás kiadását október 15-ikén beszüntettük.

2. Mindazok az olvasók, kiknek az előfizetése még nem járt le, ha óhajtják és ebbeli kivánságukat 1954 november 15-ig a lapbizottságnak bejelentik, a nekik járó összeget visszakaphatják.

3. November 15-ike után a fenmaradt összegből egy Védelmi Alapot létesitünk, amely alapot egy országos bizottság fogja kezelni.

Ez az Országos Védelmi Bizottság jogos, hogy az alapból munkásvédelmi célokra kiutalást eszközöljön. Minden kiutalás csak az Országos Védelmi Bizottság többségének a határozata alapján történhet meg.

Az Országos Védelmi Bizottság tagjai között az összeköttetést a bizottság titkára tartja fen. Védelmi ügyekben a titkárhoz kell fordulni, ki arról jelentést tesz a bizottság tagjainak, kik szőtöbbséggel döntenek az ügy felett.

AZ ORSZÁGOS BIZOTTSÁG TAGJAI:

Akron: Vizi József, Farkas Imre.
Bridgeport: Barca Gábor.
Buffalo: Hering Pál.

(Folytatás az 5-ik oldalon)

BUCSUZÓ LEVELEK

Habár nem ért egészen váratlanul, mégis az a hir, hogy a Bérmunkás elérkezett az UTOLSÓ SZÁMÁHOZ, mélyen megrenditett.

Általában nézve az IWW sokkal nagyobb szerepet töltött be Amerika történelmében, mint ma azt igen sokan hiszik és ebből a szerepből a Bérmunkás körül csoportosult magyarajku munkástársak alaposan kivették részüket.

Természetes, hogy mélyen elszomorit azon éra elsorvadásának látása, amelyben oly szivvel-lélekkel vettünk részt. Az IWW és annak minden alkotó része nagy szolgálatot nyujtott az emberi haladásnak. Most, 50 év multán, midőn elenyésszőben van, itt hagyja azt a jótékony befolyást, amit nem csak az amerikai, hanem az egész világ munkásmozgalmára gyakorolt.

Nincs terünk az IWW születésének és fejlődésének ismertetésére, csupán azt jegyzem meg, hogy valószinüleg már csak egyedül én élek azok közül, akik félszázaddal ezelőtt, 1905-ben ott voltunk a születésénél, sőt az azt megelőző előkészületeknél is. Fiatal éveim ezen harcos társai ma már mind elhaltak.

És most a Bérmunkást is bucsuztatjuk! Nagyon sajnálom. És nagyon sajnálom, hogy az angolnyelvü szekciónk, maga az IWW is hasonló viszonyok közé került. — És aztán?! — kérdezem felütött fejjel. Talán szégyeljük a dolgot?

Nem, nem kell szégyenkeznünk! **Az osztályharc mezején nagyon fontos munkát kellett elvégezni. Mi vállaltuk a feladatot, elvégeztük becsülettel. Ennek a tudata szégyenkezés helyett büszkséggel tölt bennünket el.** Az általunk végzett nagy munka, a mi harcaink eredménye az a sok munkásjóléti vivmány, amelyek a munkásság legkizsákmányoltabb osztályait, a vándor munkásokat, a szakmanélküli munkásokat is kiemelte az emberhez nem illő pária sorsból.

A Bérmunkás büszkén mondhatja, hogy ebből a harcból alaposan kivette a részét. És ha most megszünik is, és ha az Industrial Worker is megszünik, az eszme, amit képviseltek, élni fog továbbra is.

Wágner József

Egy félévszázaddal ezelőtt Amerika tecnikai fejlődése rohamlépésben haladt előre. A kizsákmányoló osztály kapzsisága, kegyetlensége a végtelenségig zsákmányolta ki a bérrabszolgák millióit. Az amerikai munkásosztály ellentállási erejét az American Federation of Labor, Western Federation of Miners tömöritették. Ezek a szervezetek véghetetlen harcokat vivtak a kizsákmányoló osztály tulkapásai ellen. Borzalmas áldozatokat hoztak a nyolcórás munkidőért folytatott harcaikban és a legtöbbször minden ellentállásuk, minden áldozatuk kudarccal végződött. A szocialista és más radikális szervezetek vezetői kutatni kezdték az okokat és rájöttek, hogy minden hiba ott van, hogy Amerika munkásosztálya széttagoltan, szakszervezetekben tömörül. Rájöttek, hogy "A szakszervezetek olyan állapotokat ápolnak, amely lehetővé teszi, hogy a munkások egyik csoportját az ugyanazon iparban dolgozó másik csoport ellen uszitsák és ezáltal elősegitik, hogy bérharc esetén egymást verik le.. A szakszervezetek segitenek a munkáltató osztálynak a munkásokba beoltani ama tévhitet, hogy a munkáltatókkal közös érdekeik vannak."

Rájöttek arra is, hogy a világ bérrabszolgáinak a nemzetközi kizsákmányoló osztállyal szemben az egész világon egy szervezetbe kell, hogy tömöritsék. 1906 junius derekán Amerika radikális és haladó szervezeteinek küldöttei Chicago városban sereglettek össze, hogy a káros szakszervezkedési formát bathatósabb szervezeti formával váltsák fel. Néhány napi tárgyalás után junius 22-én kimondották a Világ Ipari Munkások Szervezetének megalakulását. Megszövegezték a világ osztálytudatos munkásságának legyönyörübb, legtisztább és érthetőbb elvinyilatkozatát, amelyben kimondották, hogy "A munkásosztály és a munkáltató osztály között semmi közösség nincsen. Nem lehet béke mindaddig, amig éhség és nélkülözés található a dolgozó emberek milliói között és az élet összes javait ama kevesek birják, akikből a munkáltató osztály áll.

"E két osztály között küzdelemnek kell folynia mindaddig, amig a VILÁG munkásai mint osztály szervezkednek, birtokukba veszik a FÖLDET, a TERMELŐ ESZKÖZÖKET és megszüntetik a BÉRRENDSZERT."

Alig egy félévtizedre, eme magasztos szervezet megalakulásának, Amerika osztálytudatos magyar munkásságának egy része 1911 augusztus 26-án Chicagoban megalakitották a Világ Ipari Munkásainak vas és fémmunkások első magyar csoportját.

Rövidesen eme csoport megalakulása után, Chicagotól New Yorkig országos szervező utra küldtük Rothfisher Károlyt. A magyar szocialista mozgalom legjobb erői csatlakoztak az uj szervezethez és minden magyarlakta városban, bányatelepen mozgalom indult meg, hogy az uj magyar szervezetet ne csak szóban, hanem irássban is hirdesse Amerika magyar bérrabszolgái között. A hatalmas lawrencei szövőipari munkások sztrájkja mozgalmunk ütőereibe uj vért öntött és 1912 novemberben New Yorkban megszületett a Világ Ipari Munkásai Szervezetnek első magyar lapja, a Bérmunkás. Szemeink örömkönnyekbe lábadt. Jártuk a magyar telepeket, hogy megszerezzük olvasónak a magyar dolgozókat a Bérmunkás számára.

A harcos Bérmunkás terjedt Amerika öntuduatos munkásai között és természetessen kihivta maga ellen a hatóságok üldözését.

A kormány utasitására a postahatóság megtagadta a lap szállitását és ezzel egy hatalmas küzdelembe kerültek a Bérmunkás irói, vezetői és olvasói. A Bérmunkás irói, szervezői börtönbe kerültek, de pár bét után már uj erők álltak a helyükre és a Bérmunkás helyett megjelent az "Ipari Munkás", de az "Ipari Munkás" és utána a "Védelem", a "Küzdelem", az "Uj Társadalom", a "Felszabadulás" cimen megjelent lapok is a Bérmunkás sorsára jutottak.

Öt éven keresztül folyt az üldözés, mig a háborus őrület elültével 1922-ben, ujra Bérmunkás cimen jelenhetett meg és terjeszthette zavartalanul az Ipari Unionizmus eszméjét.

Az amerikai magyarság elöregedett, uj bevándorlók csak a faiszta, nyilas bandákból kerülhetnek ki, igy állott elő az a helyzet, hogy a megalkuvást nem ismerő, harcos lapunk további kiadását az irók és az adminisztrativ erők hiányában kénytelenek vagyunk beszüntetni.

Négy és fél évtizedes küzdelem után, büszkén tekinthetünk vissza a megtett utra, ha most meg is szünik harcos lapunk a Bérmunkás, olvasótábora soha sem felejti el a harcias tanitásának a lényegét — "Solidarity for Ever".

Köhler.

Bármily rosszul esett is, amikor meghallottam, hogy a Bérmunkás meg fog szünni, ez utolsó számban nem a veszteségről, nem a fájdalomról akarok szólni, hanem inkább arról, hogy ez az ujság hosszu évtizedeken át mily odaadással vezette az amerikai magyar munkások tömegeit. Születünk, fejlődünk és elmulunk, — ezen törvény alól senki és semmi sem mentes. A fontos az, hogy milyen eredményeket hagyunk magunk után.

A Bérmunkás a legtisztább multra tekinthet vissza. Nem üzleti vállalkozás volt, hanem egy csoport öntudatos munkás oly áldozattal és készséggel teljesitet munkája, amely, mint példát mutató aranylapra tartozik.

De a szellemi tartalma még ezt is felülmulta. Minden sora az őszinte meggyőződés mgnyilvánulása volt. **Különösen az utolsó 15 évben az informáló és tanitó cikkei a hitelességet, a pontosságot mutatták, ami a legnagyobb disze az igazi munkáslapnak.**

Habár ezt a megszokott heti jóbarátot nélkülözni fogjuk, kárpótoljon bennünket az a tudat, hogy a Bérmunkás hüen teljesitette vállalt kötelezettségét. Helyeinket mi már ugyis átadjuk az uj nemzedéknek, amelyet az amerikai angol nyelven neveltek s akiket a társadalmi fejlődés akarva, vagy nem akarva is beleszorit azon eszmék terjesztésébe, amelyekért a Bérmunkás immár 42 éve küzdött.

Ha igy vesszük, akkor a Bérmunkás nem szünik meg, csak helyet cserél, mert a szelleme, a tanitása ott marad milliók agyában. És azon munkások, akik e lap kiadásában és fentartásában aktivan résztvettek, megelégedéssel szemlélhetik munkájuk eredményét s igy az a munka és áldozat, amit a Bérmunkásra adtak nem veszteségnek, **hanem igen jó befektetésnek tünik majd fel.** Mert ki merné tagadni azt, hogy a Bérmunkás utraindulása óta eltelt 42 év alatt a munkásság nagyon értékes gazdasági és kulturális eredményeket ért el s azért elismrés jár ennek a lapnak is.

Mint összekötő kapocs hiányozni fog a Bérmunkás, de baratainak szelleme, szeretete ott marad valamennyiünk szivében kitörülhetetlenül és emlékét őrizni fogjuk utolsó leheletünkig. Baráti összejöveteleinket ezentul is a Bérmunkás szellemében fogjuk tartani.

Bustya Károly

Takács József munkástárs halála nagy veszteséget jelent, mert nem csak ő halt meg, de magával rántotta a Bérmunkást is. Takács munkástárs nem tarthatta a várat addig, amig az utolsó bérrabszolga is beérkezzen. De a haladás folyamatát nem lehet örök időkre feltartani, mert az szétszakitja még a legerősebben épitett zsilipet is.

Az IWW szellemében nevelt munkások nem csüggednek, eljön az idő, — mert el kell, hogy jöjjön, — amikor minden bérrabszolga elveszti láncait s világszabadságot nyer. Minden katonája az IWW-nak egy láncszemet képez s minden láncszem kiesése gyengiti az IWW-t. Soraim Kolozsvári "Halotti induló" cimü költeményének eme két szakaszával végzem:

Bus szélvész szárnyán szállnak
Hullongó, sápat levelek.
Haldoklik erdő, mező . . .
Fuvom a halotti éneket.

Mennydörgő felhők, éghasitó lángok
Szülötte jobb lesz, mint a régi volt?
A sir megásva . . . Valahol a légben . . .
Fujják már a halotti indulót.

Bakos G.

Halálhirt hozott a posta, a legrosszabbat, amit egész életemben hallottam. Nem a Takács munkástárs halálára célzok, habár őt is nagyon sajnálom, hanem arra a hirre, hogy a Bérmunkás meg fog szünni.

Pedig nem először jött hozzám ez a hir, máskor is álltunk már ugy, hogy a Bérmunkás feladásáról kellett beszélnünk, de mindazon esetekben egy kis erőfeszitéssel, bátorsággal és verátömlesztéssel megmentettük lapunkat, ami uj erőre kapott. De most már ugy látom, nem vagyunk elég erősek ilyen ujabb véradásra.

Pedig ha van lap, amely megérdemelné még az erőnkön tuli erőfeszitést is, az a Bérmunkás. **Mert nem tévedek, amikor azt állitom, hogy most sem itt, sem sehol máshol magyar nyelven (vagy talán más nyelven sem) jelent meg ilyen bátor, harcias, tartalmas és nivós ujság, mint a Bérmunkás.**

Ezért esik olyan nagyon roszszul a halálhire.

Patchy Albert

Néhány heti távollétem alatt, amit New Jersy államban töltöttem, a Bérmunkás számos olvasójával találkoztam, akik mind-

(Folytatás a 8-ik oldalon)

EMELT FŐVEL BUCSUZUNK

Sok éjszakámat tett álmatlanná az a gondolat, hogy nem találunk Munkástársat a Bérmunkás ügykezelésének a végzésére, hogy a lapot be kell szüntetnünk.

Az utolsó tiz esztendőben megfogyatkozott az amerikai magyar munkások száma, akiknek értelmi képviselője volt a Bérmunkás, e részről nem jelentett volna már nagy hézagot, mert több mint negyven esztendeig fáradhatatlanul hirdette a dolgozó kéz hatalmát mindenek felett, ha azt a józan ész irányitja.

És hogy a májusi értekezlet megtalálta a lehetőséget a Bérmunkás további megjelentetésének, legnagyobb örömömre szolgált, hogy a pôszton állva, ujból és ujból leleplezhetjük az amerikai magyar reakciót, az Amerika Hangját, akik szervezett sajtóirodát tartanak fenn arra, hogy a legbődületesebb hazugságokkal lássák el az amerikai lapokat, amik megfelelnek Amerika mai külpolitikájának, nemkülönben az amerikai dolgozók félrevezetésére a népi demokráciák népének helyzetéről.

A Bérmunkás négy évtizeden át az ipari unionizmus tanitásával az Ipari Köztársaságért harcolt és amikor Magyarországot csődbe juttatta az évezredes grófi és papi uralom, az ország megmentése a dolgozó népre hárult — ugy éreztük, hogy a magyar dolgozók elérkeztek arra az utra, melyen haladva megvalósithatják a Bérmunkás négyévtizedes tanitását, az Ipari Köztársaságot.

Rokonok levelei, valamint az országot látogató külföldiek állitásai, hogy a közel tizesztendős épitő munka többet jelent Magyarország kulturájának és a magyar népnek, mint az előbbi évszázadok. Ebből a legkimagaslóbb, hogy a holnappal nincsen gondja sem a kétkezü munkásnak, sem a haladó értelmiségnek, akik megbecsült fenntartói az országnak.

Ezt az igaz megállapitást kivánjuk a Bérmunkás olvasóin keresztül az amerikai magyar dolgozóknak örökül hagyni, hogy a reakció minden ellenkező állitásával csatát veszitsen őrtállásunk nélkül is.

Lefkovits.

—

Engedtessék meg itt köszönetet mondanom a Bérmunkás olvasói százainak, akik néhány hónappal ezelőtt azzal az óhajjal bucsuztak tőlünk személyesen és leveleik utján, hogy feleségem megtalálja a gyógyulás utján. Az elmult három hónap kedvező eredményt mutat feleségem egészsége visszaszerzésére. Magam is megszokom a robotnélküli munkát.

Fenti

VISSZAPILLANTÁS

Irta: ZÁRA JÁNOS

Egy hónap hijján 43 éve, hogy a Bérmunkás első száma megjelent az amerikai magyar munkásság között, hogy megismertesse a forradalmi Ipari Unionizmus magasztos eszméjét a munkásság felszabadulási harcának elősegitésére. Most, hogy az utolsó szám kiadását reánk kényszeritették a viszonyok, felelevenednek emlékeimben a küzdelmek, harcok és aggodalmak, amelyekben részünk volt ezen közel félévszázad alatt.

Az "Industrial Workers of the World" (IWW) 1905-ben történt megalakulása után néhány évre, az akkor már müködő Socialist Labor Party és Socialist Party magyar frakcióiban tömörült magyar osztálytudatos munkásoknál is talajra talált az IWW által hirdetett Egy Nagy Szervezet eszméje és a nevezett pártok tagjai között folyt viták következményeként az IWW-nak magyar csopotjai alakultak az ország magyarlakta városaiban.

Azonban, még mielőtt a charterezett csoportok megalakultak, a két politikai párt tagjai közül kivált hivei a forradalmi Ipari Unionizmusnak függetlenül müködtek és sajtó alá rendezték az EGY NAGY SZERVEZET cimü füzetet, amely ismertett az Egy Nagy Szervezet — az Ipari Unionizmus — elméletének gyakorlati összetételét, amelynek követésével a munkásosztály felépitheti az "Uj Társadalom szerkezetét, a réginek keretein belül", annak elkerülésére, hogy a munkásosztályt készületlenül találja a kapitalista társadalmi rendszer összeomlása.

Az eszme gyorsan terjedt az amerikai magyar munkásság között is és hamarosan, az eddig függetlenül müködő csoportok szerves részei lettek az IWW-nak és az a meggyőződés alakult ki, hogy a munkásosztály felszabadulási harcának előmozditására ily rendkivül fontos és nagy horderejü eszme terjesztését lehetetlen eredményesen végezni élőszóval, vagy egy füzet terjesztésével; ehhez elengedhetetlenül szükség van egy lapra, amely az eszmét sokkal szélesebb keretek között és eredményesebben terjesztheti.

Az elgondolást tett követte és megindult szerte az országban az anyagiak gyüjtése és a jövendő előfizetők verbuválása. Országos és helyi szervezők — saját költségükön — végezték ezt a munkát és eredményesen, mert ugyszólván hetek alatt megvolt az alap egy eredetileg ket hetenként megjelenő lap meginditására.

MEGJELENIK A BÉRMUNKÁS

Amig a szervezés nagy lelkesedéssel folyt az alap lerakására, ugyan akkor a lap nevének megállapitása és a kiadóhivatal létesitése is munka alatt volt és a számos ajánlat közül a nagy többség a "BÉRMUNKÁS" név mellett döntött, ezzel is dokumentálva, hogy a megjelenő lap a bérért dolgozók érdekeinek lesz a szószólója.

Mivel New York abban az időben is a legnagyobb magyar központ volt, körülvéve a magyar munkások nagy tömegei által lakott városokkal s a technikai munkák elvégzésére is legalkalmasabbnak bizonyult, new yorki munkástársainknak jutott a megtisztelő és felelőségteljes feladat, hogy a forradalmi EGY NAGY SZERVEZET magyar nyelvü szószólóját, a Bérmunkást utnak inditsák.

Ezerkilencszáztizenkettő november első napjai izgalmas napjai voltak az IWW magyar tagjainak. New yorki munkástársainknak, hogy utjára inditsák a lapot, nekünk vidékieknek pedig, hogy mennél előbb olvashassuk a MI lapunkat és annak segitségével mennél szélesebb körben terjeszthessük a forradalmi Egy Nagy Szervezet eszméjét, amely meggyőződésünk szerint a munkásosztály felszabadulását évtizedekkel közelebb hozza a megvalósuláshoz és megkiméli a munkásosztályt az ugynevezett "átmenet" szenvedéseitől, mivel az uj társadalom szerkezetét, már a jelen keretein belül felfépitjük.

Nem a mi hibánk, hogy ma, több mint négy évtizeddel ezen történelmi fontos dátum után a munkásosztály felszabadulási harca még mindig bizonytalanul tapogatózik és a szenvedés és áldozatok határa végelláthatatlan. Még mindig nem ismerte fel a munkásosztály, hogy láncaitól csak saját maga szabadithatja meg magát.

Végignézve az osztályharc mezején, sajnos még mindig megállja a helyét a mult században uralkodó amerikai vasutmágnás — Jay Gould — azon állitása, hogy: "a munkásosztály felét felbérelhetem a másik fél legyilkolására".

A MUNKÁSSZOTÁLY EREJE

A munkásosztály még máig sem ismerte fel azt a felülmulhatatlan erőt, amely termelő erejében van, ha azt céltudatosan használja a termelés szinterén, amint azt az Egy Nagy Szervezet tanitja és amely eszmének a tanitására a Bérmunkás is vállalkozott. Viszont, a kapitalista osztály felismerte azt a veszélyt, amelyet az Egy Nagy Szervezet eszméjének a munkásság által való felismerése rejt számára és igyekezett azt minden eszközzel megakadályozni. A szószéket, a sajtót, az éther hullámait, pártjait és különösen a szakszervezeteket, mind, mind felhasználja — és sajnos eredménnyel. A politikusok és szakszervezeti basák hozzájárulásával alkalmazott terrorral, börtönnel sikerül a munkásosztályt eltériteni a helyes utról.

Az Egy Nagy Szervezet eszméjének tanitása miatt a Bérmunkás sem kerülhette el a kapitalista osztály támadásait. Az 1917 és azt követő években a kapitalista osztályt hüen szolgáló kormány többször megvonta a postai szállitás jogát a laptól — ami egyenlő a betiltással — de a Bérmunkás lelkes gárdája szembeszállt a támadókkal és a lap, bár akadályokkal, de megjelent. Ezen időkben többször kényszerült nevet változtatni — Ipari Munkás, Közös Társadalom, Küzdelem, Védelem és Felszabadulás — nevek alatt jelent meg, azonban a hatóságok hamar felismerték az Egy Nagy Szervezet szószólóját az uj nevek alatt és a szállitást ismét és ismét megtagadták.

A Bérmunkás lelkes támogatói azonban nem hátráltak meg és a kiadóhivatal express utján nagy csomagokban szállitotta a lapot a különböző városokba, ahol munkástársaink minden veszélyt megvetve vállalták az egyes lapok kézbesitését az olvasókhoz.

A feladat amelyre a Bérmunkás vállalkozott, nincs befejezve és a Bérmunkás megszünése időszerütlen, de a körülményeket, amelyek azt reánk kényszeritik, nincs módunkban megváltoztatni. A Bérmunkás több mint négy évtizedes létezése alatt sohasem fogadott el üzleti hirdetéseket — amely csaknem minden más lapnak az életerejét szolgáltatja — és kizárólag csak az osztálytudatos munkásság áldozatkészségére támaszkodott.

Ezen erők, melyek a Bérmunkást ily hosszu időn át minden üldöztetés és áldozat dacára is fentartották, soraikban megritkultak és az években megöregedtek és különösen a lap szellemi előállitása és az adminisztráció végzése nehezedett oly sullyal az öreg vállakra, ami reánk kényszeritette e szomoru aktust: a Bérmunkás utolsó számának kiadását.

BUCSUZÓ

Nehéz szivvel irom e sorokat, mert minden oly sajtótermék megszünése, amely a munkásosztály felszabadulási harcát támogatta, pótolhatatlan veszteség; mennyivel inkább az a Bérmunkás megszünése, amelynek minden sora kizárólag ezt szolgálta. Ugyszólván példátlanul áll a történelemben, hogy egy forradalmi szellemü lap, mint a Bérmunkás ily hosszu időn át és ily körülmények között megjelenhetett.

Ez csak egy módon történhetett meg: fentartóinak törhetetlen osztálytudatán, áldozatkészségén és kooperációján.

Bár voltak nézeteltérések közöttünk, ami természetes is, hiszen oly szervezetnek tanitványai vagyunk, amely arra tanitott bennünket, hogy a saját fejünkkel gondolkozzunk s megkritizáltunk és visszautasitottunk minden oly törekvést — bárkitől és bárhonnan jött is — amely saját, józan meggyőződésünkel ellenkezett s amelyet nem láttunk jónak a munkásosztály felszabadulási harcának előrevitelére.

Én hiszem, hogy ez a szellem továbbra is megmarad mindanyniyunkban és továbbra is gyümölcsöztetni fogjuk azt valamennyien minden kinálkozó téren és alkalommal osztályunk felszabadulása érdekében.

Ezen szavakkal bucsuzom sok száz munkástársaimtól, szerte az országban, akikkel e hosszu évtizedeken át szolgáltuk osztályunk felszabadulási harcát az Egy Nagy Szervezet utján, az IPARI DEMOKRÁCIÁÉRT.

Kézfogás a távolból

Természeti törvény, hogy aminek van kezdete, végének is kell lenni. Ezen törvény alól a Bérmunkás sem képezhet kivételt.

Még mindannyian jól emlékszünk a kezdetre. A második ipari forradalom befejező szakaszához ért. A gyors ütemben lerakott vasutvonalak ujabb meg ujabb kiaknázatlan területeket vontak az iparok és a kereskedelem hálozatába; az erdőirtások, a nagy épitkezések, a gőzzel hajtott megmunkáló gépek egyre tömegesebb alkalmazása nem csak iparmágnásokat termelt ki, hanem létrehozták az általuk kizsákmányolt proletárságot is.

Ez a második ipari forradalom tette lehetővé a szakmanélküli munkások tömeges alkalmazását, akiket a régi, szoros határok közé szoritott szakszervezetekbe már nem lehetett beszervezni, noha nyilvánvaló lett, hogy a technika haladásával a termelés sulya az ily munkások vállaira helyezkedik majd. Az Egyesült Államokban már azt is lehetett látni, hogy az általános választójog, — amelyért oly erős harcokat vivott Európa munkássága, — nem elégséges a munkásosztály felszabaditására, mert a politikai és gazdasági kérdésekben járatlan munkástömegeket a tőkés osztály bérencei elbóditják.

Szinte önként adódott tehát az a gondolat, hogy a munkásságot oly **OSZTÁLYUDATOS** gazdasági szervezetekbe kell csoportositani, amelyek végcélja a munkásság teljes felszabaditása. Egyes életlátásu munkásvezérek azt is észrevették, hogy a munkásokat nem szakmák, hanem **IPAROK** szerint kell szervezni, vagyis egy szervezetbe csoportositani az ugyanazon iparban dolgozó összes munkásokat, tekintet nélkül arra, hogy milyen szakmunkát végeznek.

VÁLTOZÓ RENDSZEREK

Ezen munkásvezérek jól tudták, hogy a tudományos szocializmus alapitói, — Marx és Engels — midőn felismerték a társadalmi rendszerek fejlődését és rájöttek, hogy miként a rabszolga rendszert felváltotta a feudalizmus, azt pedig a tőkés termelő rendszer, ez sem marad meg örökre, hanem elvénül és át fogja adni helyét a fejlettebb szocialista (kollektiv) teremlésnek.

Marx és Engels nem mondották meg, hogy az uj kollektiv termelő rendszerben miként veszi át a munkásság a termelést. Azt tartották, hogy ezt a kérdést majd megoldja az alkalom, amikor annak ideje elérkezik. A forradalmi ipari unionizmus életrehivói ugy vélték, hogy megtalálták a feleletet erre a fontos kérdésre. Azt hirdették, hogy az osztálytudatos és végcéllal biró ipari szervezetek képesek lesznek átvenni a termelést és zavartalanul folytatni az uj társadalmi rendszerben. Másszóval, az Industrial Workers of the World megalapitói ugy vélték, **HOGY EGY LÉPÉSSEL TOVÁBB FEJLESZTETTÉK A MARXIZMUST.**

Ezen alapgondolaton épült fel az 1905-ben alakult Industrial Workers of the World (Világ Ipari Munkásai) szervezet, s erre az alapgondolatára céloz elvinyilatkozata ezen mondatával: "Az ipari szervezetben az uj társadalmat épitjük a régi keretein belül."

A BÉRMUNKÁS SZÜLETÉSE

Az eleinte igen gyorsan fejlődő uj szervezetnek hamarosan akadtak magyarajku hivei is, akik 1912-ben kiadták a Bérmunkást, hogy az ipari unionizmus eszméjét még hatásosabban terjesszék. Ennek már 42 éve és az IWW megjelenésének éppen félszázada. Az idők és az események változata azonban félretolták a szervezetet, alapeszméje kipróbálására nem került sor. Az amerikai munkásság átvette az ipari szervezeti formát, de az uralkodó osztály az informálást szolgáló összes eszközök tulajdonában képes volt megakadályozni az amerikai munkástömegek osztálytudatra ébresztését.

Ma már nem sok értelme lenne vitatni, hogy az IWW félretolásában vajjon a rendkivül nagy mérvü üldöztetés, avagy az örökös frakció harcok voltak-e a fontosabb tényezők. A lényeg az, hogy most, amikor a tömeggyártás valóban nagy proletár tömegeket alkalmaz, az amerikai munkások óriási többségét elbóditják a sajtó, a rádió, a televizió, a filmszinház, a szószék, segélyével, amelyek mind a tőkés osztály tulajdonát képezik.

A közönség informálása milliós nagy ipar lett, amivel a munkássajtó nem birta a versenyt. A munkáslapok egymásután zárták le kapuikat, avagy szükebb korlátok közé szorultak. Ez a sors érte az IWW számos lapját is, amelyek közül ma már csak egy maradt meg. Ez volt a sorsa a Bérmunkásnak is, amely oly hősies módon élte keresztül az első világháboru utáni üldöztetések idejét, majd a nagy depressziót is.

A FASIZMUS RÉME

A 30-as évek vége felé a fasizmus vésze ütötte fel fejét Európában. Ebben az időben adtam fel a farmerkodást és tértem vissza New Yorkba, ahol azonnal érintkezésbe léptem a munkástársakkal és hamarosan ujból én irtam a Bérmunkás vezércikkeit. Mindjárt kezdetben megirtam, — nem is egy, hanem több vezércikkben, — de az 1941-es országos konvención is kifejtettem, hogy a frakciós harcok **IDEJE LEJÁRT**, mert a fasizmus (nácizmus) dögletes szelleme az összmunkásság ellen irányul, amely ellen tehát **MINDANNYIUNKNAK ÖSSZE KELL FOGNI FRAKCIÓKRA VALÓ TEKINTET NÉLKÜL.**

Egy jelentéktelen kis csoport kivételével a Bérmunkás vezetői és olvasó tábora örömmel tette magáévá ezt az irányt s az "ellenzéket" hamar elsöpörte, akik aztán az ultra-hazafiak között találták meg helyüket. A lapunknál beállt uj változást, hangnemet oly örömmel vették, hogy a már elmaradt olvasók százai tértek vissza táborunkba, magukkal hozva sok oly öntudatos munkást is, akiket az örökös frakciós veszekedések elriasztottak.

A második világháboru befejezte után megint uj probléma elé kerültünk, mert időközben elöregedtünk, legtöbbünk kiesett a tényleges iparokból. Közben az IWW szervezete is — ugyancsak a tagság előregedése folytán, — egyre fogytak. Ily körülmények között nevetségesen hangzott volna az olvasók ösztökélése, hogy lépjenek be az ipari szervezetbe, amikor már kikerültek az iparokból. Ehelyett tehát lapunkban a fősulyt az osztálytudatra való ébresztésre és annak fentartására fektettük ,noha állandóan ismertettük a forradalmi ipari unionizmus eszméjét is.

CSAK AZ IGAZAT

Az osztálytudat kifejezése volt az is, hogy noha nem zárkóztunk el a jóakaratu, épitő kritikától, a kollektiv termelésre áttért országok felé szimpátiával tekintettünk. Akadtak ugyan páran, akik ezt "cenzurának" tartották, de az országos konvenciók évrőlévre megerősitették ezt az elvi irányt.

És végre az utolsó években, amidőn a kommunista mumus felépitésével a leggaládabb módon fosztották meg az amerikai népet szabadságjogaitól, lapunkban első sorban is ezen galád támadások leleplezésére és a szabadságjogok védelmére fektettük a fősulyt.

És végre gyakran hoztunk lapunkban vallás-felvilágositó cikkeket is, mert mint minden józaneszü ember látja, az egyházak a kizsákmányoló osztály leghüségesebb szövetségesei, amelyek manapság valóban tömegprodukció módjára végzik az "agymosást", — a népbolonditást.

Ezen irányelvek szemmel tartásával mindig az **IGAZSÁG** megirására törekedtünk. A Bérmunkásnál komolyan vettük azt a jelszót, amit még 1940-ben tüztem ki magam elé: **MÉG AZ ELLENSÉGEINKRŐL IS CSAK AZ IGAZAT KELL IRNI!** Ezzel elértük azt, hogy a Bérmunkás olyan tekintélyre tett szert, aminőhöz hasonlót nem mutathat fel Magyar-Amerika.

De nem csak Magyar-Amerikában, hanem talán az egész világon sem találhatunk még egy olyan lapot, amelyiket annyi szeretettel, oly nagy odaadással és oly nagy áldozatkészséggel adtak ki, mint a Bérmunkást, amelynek szerkesztője, irói, kiadóhivatali alkalmazottja, csomagolói, stb. évtizedeken keresztül dijtalanul végezték ezt a nagy és terhes munkát.

A SZABADSÁG-JOGOK VÉDELME

Éppen azért ugy vélem, hogy lapunk beszüntetése nem fog végetvetni olvasótáborunk munkásmozgalmi tevékenységének. Akiben van erő és akarat, megtalálja módját, hogy osztályát tovább is szolgálja. Erre elég alkalmat nyujt az az országos méretü üldöztetés, ami szemeink előtt megy végbe.

A Smith és a McCarran törvények alapján már több mint száz ártatlan ember ül a börtönben s százak ellen folyik a deportálási eljárás is. Amerika igen eminens jogászai állitják, hogy ezen törvények, — valamint a 83-ik kongresszus zárórájában hozott anti-kommunista törvény is, — alkotmányellenesek, hiszen valójában a gondolatszabadságot tiltják el. A jelenlegi adminisztráció azonban eddig még mindig megakadályozta, hogy ezen törvények alkotmányos volta felett a legfelsőbb biróság itélkezzen.

De egyszer csak eljutnak ezen törvények is a Supreme Courthoz, amelynek kedvező döntése sok száz ártatlan embernek adná vissza szabadságát s azonkivül megszüntetné a jelenlegi hisztérikus állapotokat. Az ily ügyeknek a Supreme Court elé terjesztése igen sok pénzbe kerül. A Bérmunkás olvasó tábora, bármily csekéllyel is, **DE SEGITHETI A SZABADSÁGJOGOKÉRT FOLYÓ KÜZDELMET.**

Ezért határozta el a Bérmunkás Lapbizottsága, hogy védelmi alapot teremt. És a Bérmunkás volt olvasói szerte az országban időközönként összejönnek majd, hogy a védelmi alapot valamivel segitsék és ezzel egyben a védelmi bizottság utján **MÉG EGY IDEIG FENNTARTJÁK AZ EGYMÁSSAL VALÓ ÉRINTKEZÉST.**

Ezért nem bucsuzom, hanem abban a reményben küldöm kézszoritásomat a Bérmunkás minden egyes olvasójának, hogy a **VÉDELEM** mezején még hallani fogunk egymásról.

Geréb József

TOLLHEGYRŐL

mondja: F. MEZŐSÉGI

AZ UT VÉGE

Valami mélységes szomoruság fog el, amikor ezeket a bucsusorokat elkezdem megirni.

Mint a mozgalmunk fel nem szentelt "papja", számtalan esetben éreztem azt, hogy a temetési bucsuztatók, a munkásmozgalom legnehezebb funkcióját jelentik. Elbucsuztatni egy harcostársat, kivel együtt harcoltunk az osztályunk, a munkásosztály jogiért, felszabadulásáért, szomoru és fájdalmas kötelesség, amelynél nagyon gyakran elful a hang, kicsordul a könny. De soha ezideig nem éreztem a veszteséget olyan nagynak, elszomoritónak, mint most, amikor magyar Amerika legharciasabb, legtisztább lobogóját, a Bérmunkást vonjuk le.

Dacára annak, hogy ha egy lapról el lehet mondani, hogy megtette a kötelességét, ugy a Bérmunkásról elmondhatjuk azt, mert ez a lap mindenkor piros virága volt a proletáriátus szent harcának a szebb, boldogabb életért, a nyomor, elnyomatás, a bün nélküli társadalomért.

Husz éve, hogy hétről-hétre nem csak olvasom, de irom is a Bérmunkást. Ezalatt az idő alatt szoros barátság kapcsolt össze az olvasótáborral, ismerve és ismeretlenül is megbecsültük egymást. Mi irók, a leveleikből, cselekedeteikből ismertük meg azt a tábort, amely fentartotta és terjesztette a Bérmunkást. Ők viszont az irásaink révén ismertek meg bennünket és igy alakult ki egy nagyszerü, közös munka, amely kiváltotta az egymás megbecsülését és személyes ismeretség nélkül is a barátságot.

Ez a közös célért való munkánál nagyon természetes, hisz igy ismerek én már 40-50 éves "öreg Amerikás" magyarokat, kikkel mint a los angelesi Uhrin és Bakos munkástársaimmal már 15-20 évvel Amerikába jövetel előtt is barátságba voltunk, dacára, hogy személyesen ma sem ismerjük egymást.

Ez azt jelenti, hogy amit én érzek most, amikor e sorokat irom, azt érzik az olvasóink is, szerte nagy Amerikában, kik most elvesztették a szeretett lapjukat, amely évtizedeken keresztüli olvasás után nélkülözhetetlen életszükségletükké vált. Száz és száz öreg harcos levele igazolja ezt.

EGY EMBERÖLTŐ

Negyvenhárom év! Mennyi harcot, mennyi küzdelmet, időt, költséget jelentett ez a harcos magyar Ipari Unionistáknak, hogy az eszmét eljutassák a tömegek közé. Ezt nálam illetékesebbek mondják el, kik a bölcsöjénél ott voltak a Bérmunkásnak.

Akik végig kitartottak a harcos lap körül, kik közben ha el is fáradtak, ha le is csendesedtek, ha végleg ki is dőltek, mégis a munkásmozgalom hősei ők, éppen ugy mint akiknek vég eljöveteléig futotta az erejükből, a harcos akaratból. Mi már régen tudtuk azt, hogy Amerikába az összes harcos nemzetiségi mozgalmak ideje, a bevándorlás korlátozásával — lejáróban van és csak ezeknek a kipróbált harcosoknak az emberfeletti akarata, harcikészsége tette lehetővé, hogy a Bérmunkás vagy két évtizeddel tulélte a sorstársait az Ipari Unionizmus hirdetésében. Tizenőt éve elmult már annak, amikor kemély elhatározással kimondottuk, hogy a Bérmunkást fizetett alkalmazottak nélkül mentsük ki a pusztulásból. Proletár irók a nehéz napi munka után szerkesztették, irták, adminisztrálták a lapunkat. Önfeláldozó asszonyaink jöttek hétről-hétre csomagolni, postázni a Bérmunkást, de a gárda egyre fogyott, betegség ,halál, ritkitotta a sorainkat, akik még megmaradtak, napról-napra öregebbek, fáradtabbak lettek és a két legutóbbi esemény, Lefkovits munkástársnő betegsége, amely a lap lelkének Lefkovits munkástársnak az eltávozását kényszeritette ki és most az utódjának Takács munkástársnak hirtelen halála két lapcsomagolónak a kórházba menése, juttatott oda bennünket, hogy be kellett szüntetni lapunkat. Dacára, hogy az olvasóink odaadó szeretete, amely gondtalanná tette a lap kiadását anyagilag, de nem birjuk tovább, fel kell adnunk a küzdelmet, amelyet két világháborun és a győzelmes proletár forradalmak sorozatán keresztül folytattunk.

Büszkeséggel mutathatunk azonban e szomoru órában arra, hogy a Bérmunkás, annak aktiv munkásai, az olvasótábor, megtette ebben a világot átváltoztató küzdelemben a kötelességét.

Nem volt szektáriánus, rugalmasan harcolt mindenkor a viszonyok és adott körülményeknek megfelelően, nem irigykedett a testvérmozgalmak sikere miatt. Nem siránkozott, hogy azok más uton, más eszközzel közelitették meg a nagy célt, hanem mindenkor támogatta a tőkés rendszer ellen vivott harcot, bárki, bármilyen eszközzel vivta is meg. Megvolt arról győződve, hogy azok is eljutnak harcaik, küdelmeik, győzelmeiken keresztül a legtisztább elgondoláshoz, az Ipari Demokráciához.

NEM HUZZUK LE A ZÁSZLÓT

A Bérmunkás zászlóját ugyan le kellett huznunk, amit nem tudott elérni a legvadabb üldözés sem, azt végrehajtotta az idő, az elhallgattatott bennünket.

A mi Bérmunkásunk zászlaja a munkásmozgalom muzeumába kerül, de a harc amelyet a Bérmunkás folytatott tovább folyik. Az osztályharc zászlaja magasan lobog. Nap, nap után ujabb és ujabb milliók rázzák le magukról a tőke uralmát. Ma már 800 millió dolgozó szabadult meg a tőke uralmától, sok, sok millió szerte a világon készülődik a döntő csatára, amely után a világ népei összefogva épitik fel a szocialista társadalmat, az Ipari Demokráciát.

A tőkések vicsoritják az odvas fogaikat, borzalmas háborura készülnek, hogy a maguk tulélt uralmi rendszerének életét meghosszabbitsák. Ugyan akkor a dolgozók nagy tömegei is felkészültek arra, hogy minden eszközzel megvédjék a halálkereskedőkkel szemben a békét.

Bucsuzóul — Bérmunkás olvasók, öreg testvérek, soha egy pillanatra se feledjétek azt a tanitást, amit a lapotok több mint negyven éven keresztül hirdetett.

Legyetek továbbra is öntudatosak, tisztánlátók, ne üljetek fel az aljas de ostoba rágalmaknak, amelyeket a tőkések kitartott sajtó rimái szórnak a kapitalizmus testéről levált országokra, köztük szülőhazánkra, Magyarországra is. Továbbra is mutassuk ki az irántuk kötelező nemzetközi szolidaritásunkat és tüzön, poklon keresztül is tartsunk ki a meggyőződésünk mellett és ott ahol arra módunk van, hirdessük azt, hogy a haladást feltartóztatni nem lehet. A kapitalisták profitrendszerének amely csak nyomort, elnyomatást, háborut jelent, pusztulnia kell, mert halálosan beteg és helyét felfogja váltani az a társadalmi rendszer, amelyet a Bérmunkás hirdetett, amelyben minden ember boldog és szabad lesz.

Kitartás! Szolidaritás! Éljen a munkásosztály egységes harca a békéért, a munkásosztálynak a kizsákmányolás alól való felszabadulásért!

NOTICE TO OUR READER

Due to the death of our managing editor and other circumstances beyond our control, with this issue we have to suspend the publication of the Bérmunkás. All further inquiries should be sent to: Joseph Gereb, Editor, Rd. 1, Box 830, Elsinore, Cal.

POLITIKAI FOGLYOK

NEW YORK — A titkosrendőrség (FBI) vezetősége jelenti, hogy letartózatták a 48 éves Dr. Albert Emanuel Blumberget, aki 1933-tól 1949-ig tagja volt az amerikai Kommunista Párnak és egyideig a párt törvényhozási osztályának ügyvivője volt. Mászóval Dr. Blumberg nagy büne az, **hogy az amerikai alkotmányos, parlamenti módszer gyakorlati alkalmazását hirdette.**

Az FBI jelentése szerint Dr. Blumberg letartóztatásával a Smith és a McCarran törvények alapján vád alá fogott egyének száma elérte a 118-t. Ezeknek lelgtöbbjét már el is itélték s börtönben szenvednek azért, mert ugy vélték, hogy itt mindenki hirdetheti politikai és gazdasági felfogását.

Az Egyesült Államokban a politikai fogllyok száma egyre szaporodik.

HATÁROZATOK A BÉRMUNKÁS BESZÜNTETÉSÉVEL

(Folytatás az 1-ső oldalról)

Cleveland: Kollár József, F. Mezőségi, Bischof Róza,

Chicago: Balogh István.

Detroit: Visi István.

Los Angeles: Zára János, Török István, Köhler A.

Miami Beach: Lefkovits Lajos.

New York: Fischbein László, Feczkó J., Szigeti E.

Philadelphia: Mrs. P. Bécsi.

Pittsburgh: A. Kucher.

A bizottság titkára: Geréb József, Rd. 1, Box 830, Elsinore, Call., ahová minden levél küldendő.

A Védelmi Bizottság 1954 december 15-én kezdi meg a müködését, amikor a Bérmunkás Lapbizottság müködése megszünik.

3. A lapbizottság védelmi célokra a General Defense részére 300 dollárt utalt át.

MUNKÁSTÁRSAK!

A lapbizottság hosszas, de sikertelen próbálkozás után hozta meg ezt a határozatot,. amelyel beszüntette Magyar Amerika legharciasabb lapját a Bérmunkást, amely az elmult 43 évben oly odaadó harcot vivott a munkásosztály felszabadulásáért.

A lapbizottság ez alkalommal kötelességének tartja azt, hogy a legnagyobb elismerését fejezze ki mindazoknak, akik lehetővé tették, hogy odaadó munkájukkal, az elmult 15 évben, teljesen dijtalan volt a lap megirása, adminisztrálása, csomagolása, postázása, hogy emellett megteremtették Amerika legnivósabb ujságját.

Köszöntet mondunk az olvasóinknak, odaadó hüséges támogatásukért.

Megvagyunk győződve arról, hogy a Bérmunkás 43 éves tanitása kitörülhetetlen nyomokat hagyott bennünk és arra kérjük önöket, hogy ne szakitsák meg a kapcsolataikat egymással és vegyék fel az érintkezést az Országos Bizottság titkárával, Geréb József munkástársal (Rd. 1 Box 830, Elsinore, Cal.) értesitsék őt az eseményekről, ki azt az olvasó tábor tudomására hozza.

A mai nehéz időkben nagy hiányt fog jelenteni a Bérmunkás igazság hirdető szava, a magyar dolgozóknak, hogy ne legyenek ráutalva a polgári lapok hazug, félreveztő hirszolgálatára. Azt ajánljuk tehát, hogy a Bérmunkás helyett olvassák az Industrial Workerst, vagy pedig olyan magyar lapot, amely nem feledkezik meg a munkásosztály nemzetközi szolidaritásáról. Keressék fel azokat a magyar összejöveteleket, amelyek a munkásosztály felszabaditásának nagy célját szolgálják.

Munkástársi üdvözlettel,

A Bérmunkás Lapbizottsága

Mark Twain megfigyelése: "Tizennégy éves koromban nagyon tudatlannak tartottam az apámat, 21 éves koromban azonban már oly bölcsnek találtam, hogy nem ls tudtam megérteni, miként tanulhatott olyan sokat a rövid 7 év alatt."

Mit köszönhetek a Bérmunkásnak

IRTA: VISI ISTVÁN

Ámbár nem végelgyengülésben, vagy pénzhiányban, inkább emberhiány következtében mulik ki, mégis bucsut kell mondani a lapunktól, olvasóktól és tanitóimtól. Mert bizony engem sokan tanitottak a lapunkon, könyveken, levelezésen keresztül, valamint egyénileg.

Én csak hat elemivel indultam az élet ezen tekergős utjára 17 éves koromban ide az idegenbe menekülve, már 1912-ben a falu bikáját ápoló csordás által is biztosnak vélt világháboru elől. Hát bizony sokaknak kellett engem tanitani. Igy helyénvaló, hogy ezen tekergős ut fontosabb fordulatairól megemlékezzek. Tanitóimat megemlitsem, azoknak hálámat kifejezzem. Mert csak igy érthetik meg az olvasók, hogy mit köszönhetek lapunknak.

Még 1915 tavaszám is ministráns — oltár gyerek — voltam a clevelandi Szent Imre templomban, mivel tudásom nem lévén, hittem. Ezen év tavaszán egy nagymise után kérdeztem Péter József "főurat", hogy "hogyan van az, hogy a tizparancsolat azt mondja 'Ne ölj' és mi mégis a magyar fegyverek győzelméért imádkozunk?" Erre a főur azt válaszolta, hogy még én fiatal vagyok, nem birom azt megérteni.

De én akartam megérteni, kerestem a kérdésre a választ. Akkor a west sideon volt egy erős szocialista szervezet. Erdei Mihály bátyánk tartott előadásokat, iskolákat. Igy erre a kérdésre is, meg másra megadták a kielégitő választ, vagy tanácsolták, hogy milyen könyvekből kaphatom meg azokra a kimeritő választ. Akkoriban nagyon sok szép, értékes magyar könyv volt a Fulton streeti könyvtárban. Ezen években ismertem meg Takács József munkástársat is, aki már akkor is nagyon vitaképes volt.

1917 október hónapjában engem is besoroztak katonának. Amikor a Szocialista Párt központját kérdeztem, hogy mit csinálja, besoroztak katonának, azt a kitérő választ kaptam, hogy "cselekedjek az egyéni belátásom szerint". De a katonai börtönben "Guard House"-ban találkoztam wobblykkal és megtudtam, hogy az IWW mint szervezet lépett fel a háboru ellen. Ez nekem nagyon tetszett.

Igy, amikor vagy öt ezren megtagadtuk a vágóhidra való átszállitást, engem kirugtak és egy éven keresztül ellenőrzés alatt tartottak.

1919 tavaszán Detroitban eljártam az IWW előadásokra, ahol Barta Lajos és Csik Mihály beszéltek. Egy házi agitáció alkalmával Csik munkástárs vékany hangjával, de annál vaskosabb érvekkel meggyőzött és IWW tagnak vett fel. Tovább jártam ott rhetorikára, Barta vezetése alatt az akkor nagyon hires "Vörös Templomba".

Már az első évben is tudósitások irására ösztönöztek, mivel hajlamos voltam az irásra. Azonban az első irásom még az Előrében jelent meg 1919-ben, mely a "Munkás Egység Szükségessége" cimen ugy az IWW mint akkor az egység felé törekvő Szocialista Párt tagoknak tetszett. Több irásra serkentettek. Ezek között volt Takács József munkástárs is, aki legközelebb jött hozzánk és velünk maradt haláláig.

1920 őszén Barta Lajos tanácsára beiratkoztam a new yorki Rand School-ba ,ahol legkedveltebb tanárunk volt Scott Nearing, a társadalmi tudomány előadója, valamint egy nagyon németesen beszélő tanár, aki a történelem tudomány előadója volt. Attól hallottam ezen nagyon fontos kijelentést: "Ismernünk kell a multat, megérteni a jelent, hogy ezeket összeadva elképzelhessük a jövőt."

Közben New Yorkban nagyon sikeres rhetorikai és vita estélyek voltak Barta Lajos vezetése alatt, azokon is résztvettem. De nagyon sokat tanultam még Rothfischer Károly és Goldberger László irásaiból.

1923 őszén Köhler munkástárs biztatására, a legtanulságosabb aktivitást, három hónapos szervezői körutat kezdtem meg, hogy a tanult dolgokat gyakorlatilag érvényesitsem. Ezen három hónapban többet tanultam, mint más három évben. Ámbár majdnem az életembe került. A United Steel Trust gunmenjei akartak megtanitani (fejembe verni) hogy a magántulajdon szentsége sérthetetlen. Ugyanis a U.S. bányái akkor szervezetlenek voltak, a gunmenek uralma alatt és oda is elmerészkedtem menni.

A második legtanulságosabb lecke volt, amikor a new yorkiak, de leginkább Lefkovits munkástárs biztatására elvállaltam a központi titkárságot, ahol Köhler és Zára munkástársak tanitottak be az ügykezelésre.

De a legtöbb segitséget, biztatást mégis Geréb és Lefkovits munkástársak adtak. Nekik köszönhetem, hogy sokszor kijavitották a cikkeimet, értékesebbé tették az irásaimat és a szerintük elfuseráltakat a szemétkosárba dobták, amiért éppen olyan hálás vagyok, mint a javitásokért.

A Bérmunkással tehát éppen én vesztek legtöbbet, mert még olyan sok tanulni, irni, mondanivalóm van. Olyan eseménydus időszakban élünk, a szebb jövő kezd kialakulni, mely az általunk hirdetett közös termelési rendszert már láthatóvá teszi. Most még mindég nagy szükség volna lapunkra, de sajnos, nem mondhatjuk, hogy mindnyájan megtesszük kötelességeinket.

Igy bucsut kell venni a kedves lapunktól, az olvasóktól. Részemről még köszönet mindenkinek, akiktől tanultam, leginkább az itten megemlitetteknek. Köszönet, hogy képessé tettek, hogy a Bérmunkás történetében irásban résztvehettem mely fényes szakasza az amerikai munkásharcoknak, tanitásnak, szervezésnek. Nagyon sajnos, hogy még ideje előtt kell neki megszünni.

A háboru őrültjei

A HÁBORUS USZITÓK 1956-RA VAGY 60-RA TERVEZIK A HARMADIK VILÁGHÁBORUT.

WASHINGTON — Ugylátszik, hogy az amerikai hadügyminiszteriumban ugy megragadtak a Forrestall bacillusok, — (James W. Forrestal tengerészeti, majd honvédelmi miniszter beleőrült abba a gondolatba, hogy az oroszok megtámadják az Egyesült Államokat) — hogy az utódain is erőtvesznek időközönként.

Legalább is ezt bizonyitja Thomas K. Finletter, volt légierő miniszter most megjelent "Power and Policy" cimü könyve, amelyben megirja, hogy a hadveztőség véleménye szerint a **már sokszor beigért orosz támadás 1956-ban esedékes, — de ha akkor mégsem támadnának, ugy 1960-ban már egész biztossan megteszik.**

Finletter és a Pentagon egyetlen bizonyitéka ezen állitásukra az, hogy ime a Szovjetunion nagyon erősen fegyverkezik. Hogy a Szovjetuniont a Finletterek állandóan fenyegetik, azt a csekélységet a volt légügyi miniszter szerényen elhallgatja.

Finletter hosszasan részletezi az orosz és általában a népi köztársaságok fegyverkezését és ugy találja, hogy az oroszoknak 1956-ra már lesz annyi hidrogénbombájuk, hogy azokkal el tudják pusztitani az Egyesült Államokat. És ha nem fognak támadni, — mondja Finletter, — annak oka csupán az lesz, hogy repülőgépeik nem lesznek képesek áttörni Amerika radár védelmi vonalát.

Azonban ez a védelmi vonal sem tart örökké, — folytatja tovább, — mert az oroszok is megkezdték már az irányitható lövegek készitését, amelyek áttörnek a rádár vonalon. A Pentagon adatai szerint 1960-ra már annyi ilyen irányitható lövege lesz a Szovjetunionnak, hogy megvalósithatja állitólagosan régóta tervezett támadását.

De nem kell félni, — irja tovább a Forrestal bacillus által kikezdett Finletter, — mert ha az Egyesült Államok a jelenlegi évi 11 és fél billió dollár helyett 20 billiót fog köteni a légierőre és ezzel arányosan emeli az öszszes katonai költségeket, akkor annyi irányitható atom lövegünk lesz, hogy a Szovjetunion nem mer majd támadni. — Szóval Finletter ur fokozni akarja a fegyverkezési versenyt.

HIVATALOS ÉRTESITÉS

Az Industrial Worker (az IWW angol nyelvü hivatalos lapja) 1954 október 1-én megjelent száma tartalmazza ezen értesitést:

"Sajnálattal tudatjuk olvasóinkkal, hogy az Industrial Worker ezen számával megszüntetjük a hetenkénti megjelenését és ezután csak kéthetenként fogjuk kiadni. Oly financiális körülmények késztetnek erre az intézkedésre, amelyekkel nem tudunk megbirkozni."

"Reméljük, hogy olvasóinktól megkapjuk azt a támogatást, hogy rövidesen visszatérhetünk lap hetenkénti kiadására. Jelen változással nem ér senkit veszteség, miután az előfizetéseket nem az idő, hanem lapszámok szerint könyveljük el, vagyis aki 3 dollár előfizetést küldött, az ezután is 52 lapszámot fog kapni érte."

AZ INDUSTRIAL WORKERS OF THE WORLD IPARI SZERVEZET

ELVINYILATKOZATA

A munkásosztály és a munkáltató osztály között semmi közösség nincsen. Nem lehet béke mindaddig, amig éhség és nélkülözés található a dolgozó emberek milliói között s az élet összes javait ama kevesek birják, akikből a munkáltató osztály áll.

E két osztály között küzdelemnek kell folynia mindaddig, mig a világ munkásai mint osztály szervezkednek, birtokukba veszik a földet, a termelő eszközöket és megszüntetik a bérrendszert.

Ugy találjuk, hogy az iparok igazgatásának mind kevesebb és kevesebb kezekbeni összpontosulása a szakszervezeteket (trade unions) képtelenné teszik arra, hogy a munkáltató osztály egyre növekvő hatalmával felvegyék a küzdelmet. A szakszervezetek olyan állapotot ápolnak, amely lehetővé teszi, hogy a munkások egyik csoportját az ugyanazon iparban dolgozó másik csoport ellen uszitsák és ezáltal elősegitik, hogy bérharc esetén egymást verik le. A szakszervezetek segitenek a munkáltató osztálynak a munkásokba beoltani ama tévhitet, hogy a munkáltatókkal közös érdekeik vannak.

E szomoru állapotokat megváltoztatni és a munkásosztály érdekeit megóvni csakis olykép felépitett szervezettel lehet, melynek minden az egy iparban — vagy ha kell, valamennyi iparban — dolgozó tagjai beszüntessék a munkát bármikor, ha sztrájk vagy kizárás van annak valamelyik osztályában, igy az egyen esett sérelmet az összesség sérelmének tekinti.

E maradi jelszó helyett: "Tisztességes napibért, tisztességes napi munkáért" ezt a forradalmi jelszót irjuk a zászlónkra: "LE A BÉRRENDSZERREL!"

A munkásosztály történelmi hivatása, hogy megszüntesse a bérrendszert. A termelő hadsereget nemcsak a tőkésekkel való mindennapi harcra kell szervezni, hanem arra is, hogy folytassa a termelést akkor, amikor a bérrendszer már elpusztult. Az ipari szervezkedéssel az uj társadalom szervezetét épitjük a régi társadalom keretein belül.

A nagy háboru esélye

MINDEN ESETBEN ÖNGYILKOSSÁGHOZ VEZET A HARMADIK VILÁGHÁBORU.

A második világháboru vége felé, — egészen pontosan 1945 augusztus 6-ik napján az egész emberiséget megrettentő hir járta be a világot: egyetlen bombával elpusztitották Japán egyik virágzó ipari városát, a százezer lakossal biró Hiroshimát. Három nap multán az atombomba egy másik nagy japán várost törült le a föld szinéről.

Az ily szörnyü pusztitásra képes atombomba feltalálása ujra felvetette azon régen hangoztatott felfogást, hogy az állandóan fejlődő fegyverek egyszer csak olyan pusztitó hatásuak lesznek, **hogy azok automatikusan végetvetnek a háboruknak, mert a veliik való háboruskodás az emberiség kiirtásához vezetne.**

A háboru után meginditott nagy fegyverkezési versenyben azonban egy-kettőre feledésbe ment ez a felfogás. Feledésbe ment leginkább azért, mert az Egyesült Államok vezető politikusai ugy tartották, hogy csak ez az ország rendelkezik atombombákkal és igy elérkezett az alkalom, hogy leszámoljanak nem csak az ellenséggel, hanem a vetélytársakkal is, akiket hamarosan ellenségnek bélyegeztek. Ilyen vetélytársra akadtak az iparát rendkivül gyors tempóban fejlesztő Szovjetunionban.

A Szovjteunion hatalmas hadereje azonban egyenlőre elegendőnek mutatkozott az ellene irányuló támadás elhalasztására dacára azon őrületes háborus propagandának, amit Amerikában kifejtettek. Közben aztán a Szovjetunion is megkezdte az atombomba kisérleteket, majd áttért a hidrogénbombára s ma már ebben a tekintetben is oly erős, hogy nuclear támadásra hasonló módon válaszolna.

A JAPÁN HALÁSZ

Most aztán ujból felmerült a kérdés, hogy vajjon lehet-e még öngyilkosság nélkül nagy háborut folytatni. Különösen előtérbe nyomult ez a kérdés az 50 éves Aikichi Kuboyama nevü japán halász halálával kapcsolatban, aki a "Szerencsés Csillag" nevü halászhajón 82 mér**földnyire volt attól a szigettől ahol az amerikaiak ez év március elsején felrobbantották a hidrogénbombájukat, mégis ő és 22 más társa halálos rádióaktiv égési sebeket kaptak a robbanás okozta hamutól.**

Ennek a szegény halásznak a halála nem csak nagy szánalmat és mellékesen amerikaellenes hangulatot keltett, de egyben uj értékelés alá vették az atom-, illetőleg a hidrogénbomba pusztitó lehetőségét is. Részben az Atom Energia Bizottság, részben pedig a hadvezetőség által kiadott nyilatkozatokból szakemberek a következő magyarázatot adják:

Az atombombák pusztió hatásfokát általában a Hiroshimára dobott bombáéval hasonlitják ugy, hogy azt egységnek, — egy "megatom"-nak veszik. Az a hidrogénbomba, amelyet március elsején robbantottak fel s amely képes volt 82 mérföldre halálos égési sebeket okozni, **öt megatom erősségü volt.** Most azonban már képesek 10, 20, sőt 50 megatom erősségü hidrogénbombát is késziteni.

ÖNGYILKOSSÁG LENNE

De a kérdés az, hogy lehet-e ilyen nagyon erős bombákat használni? Először is azért, mert ma már egész bizonyos, hogy a Szovjetunion is rendelkezik ilyen bombákkal és onnan hasonlókkal válaszolnának. De van ennél még fontosabb ok is, mert erre azt lehetne mondani, hogy ha elegendő bombát dobunk le a potenciális ellenségre, akkor az már nem tud válaszolni sehogyan sem.

Hát ez nem egészen biztos. De tegyük fel, hogy igy áll a dolog. Szakemberek számitása szerint 2-300 öt megatomos bombával el lehetne pusztitani a Szovjetuniont és a hozzá csatlakozott népköztársaságokat is. Igen ám, de ha egyszerre elrobanna 1000-1500 megatom nuclear atom vagy hidrogénbomba, **abból annyi rádióaktiv hamu kerülne a levegőbe, hogy elpusztitana a földön minden életet, tehát a bombavetők éppenugy elpusztulnának, mint azok, akikre a bombákat hajigálták.**

Ebből következik, hogy most már csakugyan elértünk azon időponthoz, amelynél **maguk a fegyverek teszik lehetetlenné a háborut.** Háborut ma már csak abban az esetben várhatunk, ha valamely nagyobb országban olyan emberek kezébe kerül a hatalom, akiket a háborus őrület annyira elvakit, hogy nem bánják, ha saját maguk is elpusztulnak, csak a vélt ellenséget elpusztithassák.

Ilyen őrületre a magánéletben sok példát láttunk már. És láttunk hasonló példát a vallásos őrület hatása alatt is.

A sovinizmus szintén hasonló őrülteket termelhet ki.

DÉLI DEMOKRÁCIA

FLAT ROCK, North Caroline — A déli államok egyik legismertebb politikusa, Burnet R. Maybank demokrata szenátor szivbaj következtében hirtelen elhalt 55 éves korában.

Maybank mint a szenátus bankügyi bizottságának az elnöke nagyon erélyesen harcolt azért, hogy a szövetségi kormány épitsen olcsó lakásokat a munkásság részére. Midőn azonban a Supreme Court ugy döntött, hogy az ilyen állami lakásokból nem lehet kirekeszteni a negró népet. **Maybank egyszerre megváltoztatta nézetét és az állami épitkezések legnagyobb ellensége lett.** — Lehet, hogy talán a másvilágon is abban a mennyországban, vagy pokolban helyezkedett el, amelyet kizárólagosan csak a fehérek részére tartanak fenn.

A tudomány martirjai

AMERIKA TUDÓSAI VÉDELMEZIK DR. OPPENHEIMERT.

NEW YORK — Az ország vezető tudósaiból álló "Institute for Advances Study" tudományos intézmény 15 tagból álló végrehajtó bizottsága egyhangu szavazással igazgatójává választotta az 50 éves Dr. J. Robert Oppenheimer atom tudóst, akit négy hónappal ezelőtt eltiltották attól, hogy az Atom Energia Bizottság vezetése alatt folyó atomkutatásokban tovább is résztvegyen.

Eddig szól a Princeton, N. J. városból világgá röpitett kis hir, amely egy az emberiség jövőjére igen nagy befolyással járó szenzációs dráma kulisza titkaira enged vetni egy röpke pillantást. Mert a tudósok Dr. Oppenheimer megválasztásával egészen érthetően azt mondották, **hogy lejárt már az az idő, amikor a babona, avagy hatalmi érdekek szolgálatában máglyára vittek komoly tudósokat.**

Nem véletlen, hogy ezen eminens tudósok éppen most hozták nyilvánosságra az Oppenheimer felé irányuló bizalmukat és tiszteletüket. A napokban megjelent egy nagyon "beharangozott" könyv, amelyet James Shepley és Clay Blair, Jr. ujságirók irtak, amelyben Dr. Oppenheimert a szó szoros értelmében az "áruló" szinében igyekeznek feltüntetni azért, mert amikor először vetődött fel a hidrogénbomba eszméje, Oppenheimer ugy vélte, hogy arra nem lesz szükség és azt mondotta, hogy arra már nem kellene billiókat költeni. Amikor azonban a bizottság tagjai a H-bomba mellett döntöttek, Oppenheimer nem csak dolgozott érte, hanem több eszmével segitette a bomba létrehozását, mint bárki más.

Ezzel a könyvvel kapcsolatban most az alábbi "kulisza" titkok kerültek napfényre:

STRAUSS, A NAGY HŐS

Az Atom Energia Bizottság jelenlegi elnöke, Louis L. Strauss mint tudós a korlátolt tehetségek közé tartozik, máskülönben azonban igen gazdag és hatalomravágyó ember. De még kicsinyes politikus is, aki a háborus feszültség emelésével igyekszik hatalmi pozicióját megerősiteni.

A Truman adiminisztrációja alatt nem sok szerep jutott ennek az embernek, habár tagja volt az Atom Energia Bizottságnak, de ott nem sokat számitott. A bizottság elnöke akkor Gordon Dean volt s Straussnak erre a tisztségre fájt a foga. A republikánus párt kormányra jutásával Strauss elérte a célját, kiszoritotta Gordon Deant, aki azzal vádolt meg, hogy barátja és pártfogója volt Dr. Oppenheimernak, akinek viszont több olyan ismerőse és barátai voltak, akik kommunistákkal is barátkoztak.

Strauss, illetve a bérencei megkezdték az Oppeiheimer elleni áskálódást, akire a "loyalty risk" (kockázatos hüség) bélyeget sütötték rá. Az emlitett könyv irói már valóságos árulónak bélyegzik Oppeiheimert, mert egy ideig ellenezni merte a H-bombát.

PUBLICITÁSI TRÜKK

De most jön a dolog java: Midőn az emlitett könyv megjelent, beharangozták, hogy az igen gazdag Strauss, akinek a szerzők bemutatták a kéziratot, azt meg akarta venni, hogy 25 évig ne lásson napvilágot. Márpedig ez a könyv igazi nagy nemzeti hősnek mutatja be Strausst, aki az emberiséget, de főleg Amerika népét megvédte a "kommunista Oppenheimer" ármánykodásaitól. És ime, ez a hős mégis sok pénzt akart adni csak azért, hogy ez a könyv ne lásson napvilágot.

Az Alsop testvérek állitása szerint azonban a **könyv kéziratának megvásárlása csak publicitási trükk volt, hogy az Oppenheimert gyalázó és Strausst magasztaló könyvnek nagy reklámot csapjanak.** Szóval lényegében ez is csak egy Strauss trükk volt, amely szépen beleillik a jelenlegi háborus uszitásba is.

Ez a nézete nem csak Gordon Dean, volt AEC elnöknek, hanem ezt állitja Dr. Norris E. Bradbury, a Los Alamos atomtelep vezetője is. Természetesen Straussnak is vannak segitői, többek között egy magyar származásu Edward Teller nevü atomtudós is, aki felhasználva az Oppenheimer elleni hajszát azt igyekszik elhitetni a világgal, hogy ő a hidrogénbomba feltalálója.

Oppenheimer fent emlitett kitüntetése az igazi tudósok válasza ezen gyászos intrikára.

NEMZETKÖZI DIÁKTÁBOR NYILIK BUDAPESTEN

A Dolgozó Ifjuság Szövetsége vezetősége a tavalyihoz hasonlóan ismét nemzetközi diáktábort szervez Budapesten. A diáktábor vendégei a nyugati országok diákszervezeteinek tagjaiból kerülnek ki. Előreláthatólag mintegy 45 fiatal érkezik Hollandiából, Dániából, Ausztriából, Angliából, Belgiumból és Finnországból.

A szépen berendezett zuglói diáktábor sportfelszerelésekkel, árnyas kerttel, kényelmes társalgókkal várja a fiatalokat. A kéthetes táborozás idején a külföldi fiatalok megtekintik a X. nyári Főiskolai Világbajnokság eseményeit, meglátogathatják Sztalinvárost és a Balatont. Ellátogatnak néhány egyetemre, ipari tanuló otthonba, termelőszövetkezetbe is. Budapesten az uttörővasut ,a csillezérvi uttőrőtábor, s több kerületi uttörőház megtekintése szerepel a programon. Találkozókat szerveznek a külföldi fiatalok s magyar diákok és ifjumunkások között.

A delejtü nem az északi sarok felé mutat, hanem a föld mágnesos sarkpontja felé, amely Kanadában van a sarkkör közelében.

BUCSUZÓ LEVELEK

(Folytatás a 2-ik oldalról)

annyian nagy szeretettel beszéltek a velünk együtt Elsinore tek lapunkról s üzenetet küld- (Cal.) városban lakó Geréb József munkástársnak, hogy mennyire meg vannak elégedve a lappal és mily nagyra becsülik a munkáját.

Hazatérve átadtam az üzenetet, de mielőtt Geréb munkástársnak alkalma lett volna örülni az olvasók ily ragaszkodásának a kifejezésén, tudtomra adta a szomoru hirt, hogy a Bérmunkás meg fog szünni.

Mikor a lesujtó hirt hallottam, ugy éreztem, **mintha valami olyasmit vesztettem volna el, ami nagyon közel állt hozzám igen sok éven keresztül, valami olyasmit, amit már többé nem lehet pótolni és aminek elvesztése különösen rosszul esik ebben a mai megkergült világban.**

De szeretném hinni, hogy módot találunk arra, hogy Geréb munkástárs veterán ujságiró és szerkesztő tudását továbbra is élvezhessük az összmunkásság javára. Kivánságomat arra alapitom, hogy évtizedek óta ismerem Geréb munkástársunk jóhirnevét és elsőrendü ujságirói képességét, amit az amerikai magyar munkássajtó olvasói nem nélkülözhetnek.

Schubert József

A Bérmunkás heti lapszáma szomoru jelentéseket szolgáltatott számunkra. A halálozási jelentések melyek az utóbbi időkben nagyon gyakoriak voltak, mélyen megdöbbentett bennünket, de tudtuk, hogy azok az élet természetes következményei, melyeket bármilyen fájdalmas, de tudomásul kell vennünk. Az a bejelentés azonban, mely a Bérmunkás végleges megszünését hozta hirül, még lesujtóbban hatott ránk, mert ezen bizony lehetett volna változtatni. Ha azonban figyelemmel kisértük az utóbbi évek halálozási jelentéseit, jól tudjuk azt is, hogy bármilyen változtatás a Bérmunkás megjelentetését illetőleg csak ideiglenes változtatás lett volna.

Különben is ha esak egy rövid pillantást vetünk a Bérmunkás multjára, irányelvére és céljaira, nyugodtan megállapithatjuk, hogy a Bérmunkás tulélte hivatását és eredeti célkitüzésének hüsgesen megfelelt. A Bérmunkás, mint jól tudjuk az Ipari Unionizmus, az Industrial Workers of the World ipari szervezkedésnek volt a magyar nyelvü propaganda közlönye. Célja és hivatása az volt, hogy az angolul nem értő és a 900-as években ezrével beözönlő ifju magyar munkásságot, a saját nyelvén az ipari szervezetbe toborozza. Azokban az időkben vivta az amerikai munkásság nagy harcait, mondhatjuk döntő harcait az uralkodó osztálylyal és azoknak a harcoknak, az eredményekép könyvelhetjük el, ma még mindig valamennyit jelentő szólás és szervezkedési szabadságot. Ha az amerikai munkástömegek nem a fék szakszervezetek vagy fék ipari szervezetekbe (mint a CIO) szervezkedtek volna és ha erejüket nem a semmit jelentő politikai pártok épitésére pazarolták volna, ugy ma a szólás és szervezkedési szabadság másképp állna előttünk.

Ahogyan az amerikai magyar munkásság életkorban öregedett és ahogyan az ifju magyar munkások bevándorlása ugyszólván teljesen megszünt, ugy vesztette el a Bérmunkás azt a propaganda hivatást, amit az ipari unionizmus szolgálatában végeznie kellett. Igaz nagyon szép az iparokból nyugdijba helyezkedett munkások között az ipari unionizmus hirdetése és szolgálata, de annak azonban többé semmiféle gyakorlati értéke nem lehet. Talán ezért volt az, hogy a Bérmunkás egyes irói az utóbbi néhány évben mindig jobban és jobban elorientálódtak az ipari unionizmus eredeti céljától és nagy mértékben behódoltak a forradalmi változásoknak.

Csak természetes, hogy jórészt igazuk volt azoknak, akik azt hangoztatták, hogy nem dughatjuk a fejünket a homokba a nagy világesemények birálatánál. Csak ott tévedtek, hogy a Bérmunkás, mint az Ipari Unionizmus hivatalos lapja, nem volt az a fórum, ahol a tulzásba vitt és legtöbbnyire helyesléssel találkozó birálat, minden tekintetben helyeslően találkozott volna jó néhány régi IWW-ista véleményével. Az is aztán határozottan bizonyos, hogy ezek az emberek azt sem akarták volna, hogy a Bérmunkás, más ugynevezett "munkásujság" nyilas politikai véleményére helyezkedjen. Viszont aztán az is még mindig egy nagy kérdőjel marad, hogy van-e ennél a kérdésnél középut?

De ez mitsem változtat azon a tényen, hogy a Bérmunkás 42 esztendős létezése kizárólag az Ipari Unionizmust volt hivatva szolgálni és hogy ennek a hivatásának minden tekintetben eleget tett, arról legfényesebb bizonyiték az öreg amerikai magyar munkások odaadó anyagi és erkölcsi támogatása a lap mögött. És ha többé nem is kopogtat majd a Bérmunkás ezeknek a munkásoknak az ajtaján, az eszme, az Ipari Unionizmus eszméje ott marad örökre ezeknek a munkásoknak a szivében. Bárhogyan is néz ki a világ ma, meggyőződésünk mégis csak az, hogy nem lehet igazi fölszabadulás, nem lehet Ipari Demokrácia, ipari uniok irányitása nélkül. A közszükségleteken alapuló termelés az egyetlen ut az Ipari Demokráciához. Propaganda eszközünk kiesett kezünkből, de az eszme az él és élni fog!

Fishbein László

Igazán mély megdöbbenéssel vettem hirül Takács munkástárs halálhirét, de még inkább azt a szomoru tényt, hogy lapunkat, a Bérmunkást is kénytelenek vagyunk beszüntetni.

Mert igazán szomoru, — habár hihetetlenül hangzik is — hogy egy munkástárs halála ilyen nagy csapást mér ránk, hogy fel kell adni azt a lapot, amely az évtizedeken át ugy a szivünkhöz nőtt, hogy most, beszüntetésének a hire ugy hat ránk, mintha családunk valamelyik tagjának halálhirét hozta volna a posta. Hiszen ugy a szivünkhöz nőtt, hogy most már nagy ür marad nálunk, amikor hetenként hiába várjuk.

Csak az a tudat vigasztal, hogy valami módon megtaláljuk a módját annak, hogy azon barátok és munkástársak kis csoportja, akik a Bérmunkáson keresztül évtizedeken együtt barcoltunk a munkásosztály jobbléteért, együtt marad és még hallani fogunk egymásról..

Ádám Helén

Takács munkástárs halálhirét nagy fájdalommal vettem és részvétemet küldöm a Bérmunkás nagy családjának, amelyet ez a veszteség ért.

Fájdalmam azonban végtelenül emelkedett, amikor meghallottam, hogy a Bérmunkás is meg fog szünni. Mert ez aztán az igazán végtelenül nagy veszteség ránk, Bérmunkás olvasókra. Mi tudjuk csak igazán, hogy mit is jelent ennek a lapnak beszüntetése. Tudom, hogy nagyon sokszor fogom nélkülözni, tudom, hogy hiába fogom várni éppen most, amikor ennek a lapnak a tanitására, bátoritására olyan nagy szükség lenne.

No de reméljük, hogy eljön még a "kikelet".

Molnár Hedvig

Jó tizenöt esztendeje, hogy megpillantottam a Szabadság szobrát és ittlétem óta tökéletes vendégjogot élveztem a Bérmunkásnál. Arról irhattam és azt amit lelkiismeretem mondott tollba. Otthon éreztem magamat hasábjain, annélkül, hogy személyes kapcsolatban lettem volna vezetőivel.

A Bérmunkás most negyvenkét évi küzdelmes pálya után bucsuzik; és bár szivemhez nőtt mint tisztes munkások lelkes munkája, őszintetlenség volna azt mondanom, hogy elmulásán szomorkodom. Nem aggastyáni eltompultság vagy közöny ennek az oka. Hosszu életemen át jó egynéhány lapalapitás körül bábáskodtam és nem egyet láttam koporsóba tenni. Azok közt, amikre gondolok — Huszadik Század, Szocializmus, Nyugat, Szabadgondolat, Századunk, Korunk, Uttörő, stb., stb. — egyik se volt üzlet. Nem az volt kérdés körülöttük, hogy tőkebefektetésük célirányos-e, hogy ügyvezetésük gyakorlatias-e, hanem inkább az, vajjon időszerü volt-e célkitüzésük, hogy kitüzött erkölcsi céljuknak, eszményeiknek meg tudtak-e felelni. Volt-e igazából szellemi visszhangjuk? Tömegeinek helyesen fejezték-e ki vágyait, törekvéseit, igényeit?

Egy régi közhely szerint "minden könyvecskének megvan a maga végzete". Ez itt annyit jelent, hogy a nemzedékek forgandóságában minden emberi közületi törekvésnek — igy hát az olyan erkölcsi ténynek is mint egy közösségi folyóirat megvan a maga fiatalsága, férfikora, estéje.

Az amerikai magyar bérmunkásság különös módon éppen egy igazi emberöltőt élt át. A tömegbevándorlók — azokra gondolok, akik a századforduló körül százezrével keltek át az Oceánon uj hazát keresni — ma öregek és kevesen vannak már.

Egész életünkben igyekeztünk nem regényes álomkergetők, hanem valóság-keresők lenni. Most a végórában se legyünk hütelenek elveinkhez hitünkhöz. Tisztességgel megtette mindenki a kötelességét, amig tudta. Rakjuk le a szerszámokat megbékélten.

Varró István

SOK ILYEN BOLOND VAN

BATTLE CREEK, MICH. — Róbert Roscoe megölt egy hatgyermekes anyát, mert azt hidte, hogy **veszedelmes kommunista.** Persze nagy csodálkozva látta, hogy kitüntetés helyett börtönbe zárták mint bolondot.

Azt állitották az elme szakértők, hogy sok más egyént is megölne, ha szabadon járhatna, akikről azt hiszi, hogy kommunista. Persze ezen elmeszakértők nem igen vizsgálják meg, vagy tennének jelentést arról, hogy milyen lapok, könyvek, rádió programok bolonditották meg Roscoet és sok millió esetleg kevésbé veszedelmes őrültet, akik kötelességüknek tartják mindazok ellen harcolni, esetleg legyilkolni, akiket ők vagy mások vörösöknek tartanak. Hiszen azért sok helyen jutalmat kapnak, pláne ha csak félig verik agyon az ilyen vörösöknek beállitott egyéneket.

Mert csak azért jelentették Roscoet bolondnak, mivel a vizsgálat kideritett, hogy Mrs. Beula Pontius, a hat gyermek anyja, nem volt még csak rózsaszinü sem. Ha esetleg igazán kommunista lett volna, akkor Roscoe meg is kapta volna a várt kitüntetést.

AZ AGYMOSÁS MÓDJA

FT. SHERIDAN, ILL. — Annak a hadbiróságnak, amely a vörösökkel kooperáló Harry Fleming alezredes ügyét tárgyalja, Dr. Glenn A. Bacon elmegyógyász ezt a magyarázatot adta: Fleming alezredes esak azért adott le rádió beszédeket a koreai vörösöknek, akiknek fogságába került, mert azok "kimosták az agyát". Az "agymosást" megelőzőleg vitaminhiányos ételeket adtak neki, minek következtében az alezredes elvesztette tisztán gondolkodó képességét és akaraterejét. Csakis igy történhetet meg az, hogy az amerikai hadsereg egy tisztje oly elmebeteg lett, hogy a vörösök kivánságára rádió leadásokat tartott.

A DUPLA NŐ

DETROIT — A 28 éves Mrs. Boyd Braxton előbb két ikerleánynak, majd három héttel később egy fiugyermeknek adott életet. Mindkét szülésnél az orvosok a "császár-vágást" alkalmazták. Az első szülésnél kitünt, hogy Mrs. Braxtonnak két, — egymástól független müködő anyaméhe van s igy akár minden négy és félhónapban lehet egy-egy gyermeke. Az orvosok Mrs. Braxton ivarszervi berendezkedését rendkivül ritka jelenségnek mondják.
